AAM Section 8110
Casino Industry Developments—1995/96

Industry and Economic Developments

.01 During 1995, gambling continued its pattern of exponential growth across America. Casino gambling, though once confined to the isolated deserts of Nevada and one square mile in Atlantic City, New Jersey is now, in some form, within two hours of travel time for half of all Americans. While new jurisdictions adopt the legalization of gambling to create new gaming markets, existing markets in the large population centers of the East Coast and Midwest continue to expand. Industry analysts predict, therefore, that before long casinos will be coming to every neighborhood. And, with 125 million visitors lured to the slot machines and card tables last year, Americans now spend more on casino gambling than on books, records, and movies combined. As such, casinos have become the fastest growing segment of the entertainment industry.

.02 Gambling is currently legal in 26 states and all but two states, Hawaii and Utah, have adopted, in some form, provisions regarding legalized gambling. Many other states have had annual referendums on introducing casino gambling, driven by the general view that it is a quick and painless revenue enhancer—and, typically, a very effective one at that. For example, the state of Mississippi will be considering a bill to reduce state taxes solely on the basis of a revenue surplus arising from taxes on casino profits. In New Jersey, the gaming industry is now the state's biggest taxpayer as well as the biggest employer. And, in Nevada, the gambler's paradise, the gaming industry dominates the state economy.

.03 The rate and type of growth of the gaming industry are greatly influenced by the philosophy of local regulatory authorities responsible for the oversight of gambling activities. While many states pattern their regulatory guidelines after the Nevada Gaming Control Act and the New Jersey Casino Control Act, state statutes and regulatory attitudes toward the gaming industry vary considerably. These differences are usually reflected in the mandatory accounting procedures, internal controls, and application requirements set by the various jurisdictions. Nevada, for example, offers a low-tax environment with minimal regulation. As a result, the state's major cities, Reno, Lake Tahoe, and Las Vegas, have become the exclusive domains of the casino industry. Most other jurisdictions, however, view casino gaming solely as a source of revenue rather than an integral part of the social and economic environment. Auditors should gain an understanding of the nature of the regulatory environment in which a casino operates since it is a factor likely to have an impact on the assessment of audit risk. Further discussion of this issue is contained in the "Regulatory Issues and Developments" section of this Audit Risk Alert.

.04 Among the obstacles faced by the industry are the public perception that casino gambling has negative consequences for society, and that it has a detrimental impact on surrounding localities. Riverboat casinos, first introduced by Iowa in 1991, were initially seen by legislators and industry lobbyists as a way to ease the introduction of state sanctioned gambling by allaying such fears. Proponents believed that restricting gaming activities to cruising riverboats would ensure that a casino was not going to be near a school, a church, or in somebody's backyard—thus limiting the amount of community resistance. Since that time casino gambling on riverboat cruises has been a significant growth segment of the gaming industry. So much so that states such as Iowa and Missouri have led the way in easing riverboat regulations by allowing the boats to remain at dockside rather than requiring them to take periodic cruises. Industry observers believe that permanent dockside for riverboat casinos is the wave of the future.

.05 In giving consideration to the industry environment in which their casino clients operate, auditors should be aware that despite the current popularity of gambling, there are some signs of threats to future growth. At the state level, gambling referendums in Florida and Texas have been unsuccessful. Louisiana has gone even further, perhaps to the point of reversing its position on legalized gambling. Published reports have discussed the rise of an anti-gambling sentiment in that state driven by moral objections to gambling, disappointing economic payoffs,

an adverse competitive impact on local commercial enterprises, and alleged political scandals. This sentiment has been fueled by the Federal Bureau of Investigation's (FBI's) recent release of wiretap transcripts in which a Louisiana state legislator allegedly discussed taking bribes from a representative of the gaming industry (see "Illegal Acts by Clients" in the "Audit Issues" section of this Audit Risk Alert). At the national level, published reports documenting concerns by some about the penetration of organized crime into the realm of legitimate gambling—as well as concerns about the moral implications of government sanctioned gambling—underlie a bill presented in the House of Representatives that seeks to establish a national commission to investigate economic and social effects of gambling.

.06 While the cumulative effect of these events is uncertain, they may ultimately have some adverse impact on the gaming industry. It is likely to take the form of more restrictive legislation or tighter regulatory monitoring of casino operations, or perhaps a reduction of growth in the expansion of legalized gambling to new jurisdictions. Auditors may wish to consider the impact of these events, and their possible ramifications on legislative and regulatory initiatives when planning their audits and considering the internal control structure of their gaming clients.

Competitive Environment

.07 Casinos face direct competition from other entities in the gaming industry for such things as limited gaming licenses, desirable locations for casino construction, qualified personnel and, of course, customers. And although the spread of legalized gambling to new jurisdictions, including Indian Reservations and riverboats, is likely to present opportunities for casinos with the expertise and financial ability to gain footholds in these newly created markets, there will also be a corresponding increase in the level of competition. Casinos also face indirect competition from other forms of legalized gambling including state-sponsored lotteries, off-track wagering, charity bingo as well as the emerging area of electronic gambling (for example, lotteries conducted on-line or by telephone). Industry analysts expect the competitive environment to become even more intense in the near term as existing casinos expand their operations, and as new enterprises emerge to meet the growing demand for gambling. Some observers have suggested that the race to meet this demand may result in an oversaturated market, with the threat of a glut facing some major gambling centers. For example, Las Vegas is now being forced to absorb its second significant wave of casino construction since the early 1990s. Auditors may wish to consider whether potential asset realization problems could result from this circumstance. See "Impairment of Long-Lived Assets" in the "Accounting Developments" section of this Audit Risk Alert for further discussion.

.08 As a competitive strategy, new casinos have adopted more exotic and creative themes to differentiate themselves from the numerous gaming enterprises with which they compete. Plans for the construction of new Las Vegas mega-casinos include an opulently designed casino-resort situated on an island in the middle of a 50-acre artificial lake. Another casino under construction will use Paris as a central theme, featuring a 50-story replica of the Eiffel Tower. The estimated price tags of such projects run as high as $1 billion. As such, these undertakings generate huge financing needs and, typically, the related loan agreements contain highly restrictive covenants. The audit implications of such loan covenants are addressed under "Loan Covenants" in the "Audit Issues" section of this Audit Risk Alert.

.09 The impact of external influences that affect a casino's operations, and matters relating to the industry in which a casino operates, such as the current competitive environment issues discussed above, are among the factors to be noted by auditors when—

- considering the control environment of a casino's internal control structure pursuant to AICPA Statement on Auditing Standards (SAS) No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319), and
- planning the audit in accordance with SAS No. 22, *Planning and Supervision* (AU section 311).

Casino Specialization

.10 The casino business has generally been considered to be a natural extension of the hotel industry for many major companies. In the early days of gambling, when such activities were confined to Nevada and Atlantic City, most customers came from out of state. The casino-hotel tandem was, therefore, a natural outgrowth of the business environment. As such, several large hotel chains have been prominent in casino gaming. With the proliferation of casino gambling, however, a trend appears to be developing toward separating the two segments. As a result, casino specialization is becoming more prevalent.

.11 During 1995, two major hotel companies announced their intention to spin-off their casino operations into separate companies to allow the casinos to focus their attention on the expanding opportunities in the gaming industry. Authoritative accounting guidance for the disposal of a business segment by, for example, "spinning-off" the unit, is set forth under Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13), along with paragraph 23 of APB Opinion No. 29, *Accounting for Nonmonetary Transactions* (AC N35.113). In order to qualify for discontinued operations treatment, an entity must meet all the criteria established by APB Opinion No. 30 (AC I13). These include, a formal plan to dispose of a business segment, and the expectation that the plan of disposal will be carried out within a one-year period from the measurement date. In these circumstances, auditors should consider whether management has appropriately accounted for the disposal of a business segment in accordance with the guidelines of APB Opinion No. 30 (AC I13). See "Restructuring Charges" and "Impairment of Long-Lived Assets" in the "Accounting Developments" section of this Audit Risk Alert for further discussion of this matter.

.12 For publicly held casinos, the Securities and Exchange Commission's (SEC's) Staff Accounting Bulletin (SAB) No. 93 (Topic 5Z), *Accounting and Disclosures Regarding Discontinued Operations*, expresses certain views of the SEC staff regarding accounting and disclosures related to discontinued operations. The SEC SAB indicates that an entity's plan of disposal would not meet the criteria in APB Opinion No. 30 (AC I13) if the method of disposal of the business segment has not been determined or if the plan of disposal requires more than one year. The SEC SAB also discusses accounting for the abandonment of a business segment, disposal of an operation with a significant interest retained, classification and disclosure of contingencies relating to discontinued operations, and accounting for subsidiaries that an entity intends to sell.

Regulatory Issues and Developments

.13 Gaming is regulated in every jurisdiction in which it is currently legalized, and regulations generally require the receipt of a non-transferable, renewable, license prior to the commencement of gaming operations. Typically the casino's officers, directors, and certain key employees, must be licensed by local gaming authorities. Regulatory frameworks impose restrictions and costs, including additional taxes, that may materially detract from the feasibility or profitability of gaming operations. Gaming regulations, and their enforcement, are within the discretion of the regulating jurisdictions. In addition, floating gaming ventures, such as riverboat casinos, require compliance with certain maritime laws and U.S. Coast Guard regulations. The issue of compliance with regulatory guidelines may have audit significance in that violations could result in the suspension or revocation of the casino's license to operate.

Bank Secrecy Act

.14 Money laundering—the funneling of cash generated from illegal activities through legitimate businesses that handle cash—has spread outward from the banking sector to non-bank financial institutions and non-financial businesses. The Bank Secrecy Act (BSA), enacted to address this problem, authorizes the Treasury Department to issue regulations requiring financial institutions, as well as casinos, to file reports, keep certain records, implement counter-money laundering programs and compliance procedures, and report suspicious

transactions to the government. The Money Laundering Suppression Act of 1994 further empowers the Treasury Department to extend BSA regulations to the full range of gaming establishments in the U.S.

.15 Failure to comply with the provisions of the BSA may result in the assessment of severe penalties on casinos. The BSA was instituted to discourage the use of currency in illegal transactions and to identify unusual or questionable transactions that could aid in criminal, tax, and other regulatory investigations. The government is vigorously enforcing the BSA, and casino operators need to closely review their compliance with its reporting and recordkeeping requirements. Auditors may wish to gain an understanding of the BSA and the nature of its stringent reporting and recordkeeping requirements on casinos. Also, see "Illegal Acts by Clients" in the "Audit Issues" section of this Audit Risk Alert.

.16 Concerned with possible money laundering in Native American casinos, the U.S. Treasury Department issued proposed regulations under the BSA during 1995 that will bring tribal gaming under its regulatory purview and away from that of the Interior Department where it has been (Indian casinos are presently regulated under the Indian Gaming Regulation Act [IGRA] of 1988). The proposed regulations would amend the definition of casinos to include those operated on Indian lands. By the first quarter of 1996, about 120 tribal casinos of all types in 16 states, whose aggregate wagering exceeds $27 billion, will be required to comply with various provisions of the BSA.

.17 The inclusion of Native American casinos under BSA regulations will tend to level the competitive playing field for casinos that operate in the U.S. However, that still leaves Nevada casinos outside the reach of BSA regulations and Treasury Department supervision. Casinos in that state received an exemption from the BSA in 1985, with the Treasury Department's approval, that may provide them with some competitive advantages over gaming operators in other states.

Casino Taxation

.18 The level of casino taxation varies greatly from one jurisdiction to the next and typically reflects the local philosophy and attitudes toward the industry. While gaming taxes range from 3 percent to 6.25 percent in Nevada, they start at 8 percent in Atlantic City, New Jersey. The riverboat markets of Illinois, Indiana, and Missouri start at a rate of 20 percent.

.19 In New Orleans the minimum tax on gaming revenues of 18.5 percent is mitigated to some extent through the granting of exclusive rights to land-based gaming. And, while the combination of high taxes and exclusive licensing generally benefits both the jurisdiction and the gaming operator, high-tax locales, that have liberal licensing guidelines, pose significant business risks for gaming operators. A number of riverboat casinos in such venues have recently failed or have been forced to seek new locations. The implications of high tax rates, intense competitive pressures, along with other circumstances discussed above, may give rise to substantial doubts about the ability of a casino to continue as a going concern. Auditors should consider their responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). SAS No. 59 (AU section 341) provides guidance to auditors for evaluating whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period not to exceed one year from the date of the financial statements being audited.

Audit Issues

Audit Planning Considerations

.20 In planning their audits of casinos pursuant to SAS No. 22 (AU section 311), it is important for auditors to familiarize themselves with the unique aspects of the casino industry. Among other things, auditors may wish to consider—

- The regulatory requirements applicable to the casino.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- Whether the casino is under investigation by a regulatory body and if so, management's and counsel's expectations of the outcome.
- The increased likelihood of irregularities given the handling of large amounts of cash by casino employees. If necessary, auditors should refer to the guidance set forth under SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316).
- Regulatory requirements which dictate that casinos maintain an internal audit staff. Auditors should be aware of the difficulties in considering the work of internal auditors in a casino environment. A significant portion of the work of internal auditors in this environment involves the observation of casino operations thus limiting the documentary evidential matter available. Auditors should be aware of the authoritative guidance set forth under SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AU section 322).

Internal Control Structure

.21 *Gaming Revenues.* Due to the limited amount of physical evidence supporting gaming revenue transactions, auditors of casinos must generally place reliance on the entity's internal control structure. Reliance on the internal control structure may involve a significant amount of on-line testing of controls since there may be little or no documentary evidence available for evaluation. Auditors may therefore be limited to corroborative inquiries and unannounced observations of casino floor operations, and cage and count room activities. Auditors should be aware that a scope limitation may arise due to the inability to obtain sufficient competent evidential matter about the effectiveness of the design and operation of a casino's internal control structure policies and procedures that are relevant to those financial statement assertions concerning gaming revenues. As such, there may be no basis to support an assessed level of control risk that allows the auditor to conclude that the risk of material misstatement of the balance has been reduced to an acceptable level. If so, the auditor may consider modifying his or her opinion accordingly.

.22 *Reports on a Casino's Design of an Internal Control Structure.* Guidelines imposed on casinos by gaming regulators typically include a requirement for the submission of a detailed proposal setting forth a system of controls over the casino's accounting system. While requirements vary from one jurisdiction to the next, it is common that such proposals are accompanied by the report of an independent accountant stating whether the proposed system of controls conforms to the standards established by the gaming authority. Authoritative guidance for reports of this type is set forth under AICPA Statement on Standards for Attestation Engagements No. 2, *Reporting on an Entity's Internal Control Structure Over Financial Reporting* (AT section 400).

Casino Revenues—Analytical Procedures

.23 Given the lack of sufficient underlying documentation, auditors face difficulties in applying tests of details to casino revenues. As such, the use of analytical procedures take on increased importance. Ratio and fluctuation analyses, comparisons of financial statement assertions with auditor developed expectations, and comparisons of accounting data with operating data, are some of the techniques available to auditors. In performing analytical procedures on casino revenues, auditors may consider, along with other information, the following factors—

- Demographic data of casino clientele
- Betting limits established by regulatory agencies
- Effects of adverse weather conditions or special events, such as conventions, on casino attendance
- Seasonality of casino operations
- General economic conditions
- Effects of intense competition

- Impact of promotional programs
- Probable win ratios

.24 Plausible relationships among data may reasonably be expected to exist, and continue, in the absence of known conditions to the contrary. The detection of variations in such relationships may uncover the existence of unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements. However, auditors of casinos should note that statistical information for casinos may be prone to more significant fluctuations than that of other industries due to the element of chance, which is a fundamental characteristic of casino operations. And, while over the long term such fluctuations may be more likely to conform to expected patterns, short term fluctuations are not uncommon.

.25 Auditors should note that authoritative guidance on the use of analytical procedures is set forth under SAS No. 56, *Analytical Procedures* (AU section 329), which requires the use of analytical procedures in the planning and overall review stages of all audits.

Illegal Acts by Clients

.26 During 1995, the FBI initiated an investigation into public gaming in the state of Louisiana involving money laundering and the bribery of state legislators. The FBI is looking into allegations of payoffs to the legislators from video-poker interests in the state including owners of so-called "mini-casinos" where these machines are in abundance.

.27 While the auditor does not ordinarily have a sufficient basis for recognizing possible violations of laws and regulations when their financial statement effect is indirect, this event, though not suggestive of an industry-wide problem, should serve as a reminder to auditors of their responsibilities with regard to possible illegal acts by clients. Auditors should design their audits to provide reasonable assurance of detecting material misstatements resulting from illegal acts that have a direct and material effect on the determination of financial statement amounts. However, an audit performed in accordance with generally accepted auditing standards does not include procedures specifically designed to detect illegal acts that would have only an indirect effect on the financial statements. Auditors should, however, be aware of the possibility that such illegal acts may have occurred. Specific guidance in this area is set forth in SAS No. 54, *Illegal Acts by Clients* (AU section 317).

Loan Covenants

.28 The intense competitive pressures in such venues as Las Vegas and Atlantic City have forced new operators seeking entrance to those markets, and existing operators embarking upon expansion, to build mega-resorts that incorporate fanciful and extravagant themes. These projects are extremely expensive and generate significant financing requirements. The restrictive covenants that frequently accompany the loan agreements negotiated for such projects can be an area of considerable audit risk in the current year. Auditors should be alert to the possibility that covenant violations could cause long-term debt to be reclassified as a current liability.

.29 Loan agreements may contain covenants requiring the borrower to adhere to specified financial ratios or to maintain amounts for certain financial statement items within a given range. Others may contain restrictions on capital expenditures and dividends, and some may place restrictions on executive compensation and benefits. If a covenant violation on a long-term debt agreement has occurred and exists at the balance-sheet date, no matter how "insignificant" or "technical," Financial Accounting Standards Board (FASB) Statement No. 78, *Classification of Obligations That Are Callable by the Creditor* (AC B05), requires that the obligation be classified as a current liability, unless one of the following conditions is met:

- The creditor waives (see FASB Emerging Issues Task Force (EITF) Issue No. 86-30, *Classification of Obligations When a Violation is Waived by the Creditor*) or subsequently loses, for more than one year from the balance-sheet date, its right to demand repayment.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- The obligation contains a grace period within which the debtor may "cure" the violation, and it is "probable" that the violation will be cured.

In addition, if the second condition occurs, thereby resulting in a reclassification of long-term debt, paragraph 5 of FASB Statement No. 78 (AC B05.109A and .118) requires that the circumstances be disclosed. For public entities, Rule 4.08(d) of SEC Regulation S-X requires that if a default exists but acceleration of the debt has been waived for a stated period of time beyond the date of the most recent balance sheet being filed, the footnotes to the financial statements should disclose the amount of the obligation and the period of the waiver.

.30 Some long-term debt agreements may contain a subjective acceleration provision that gives the lender the power to call a loan without an objectively determinable cause (for example, a material adverse change occurs). In such cases, FASB Technical Bulletin No. 79-3, *Subjective Acceleration Clauses in Long-Term Debt Agreements* (AC B05), which incorporates criteria set forth in FASB Statement No. 5, *Accounting for Contingencies* (AC C59), should be followed to evaluate the likelihood of debt acceleration. Such evaluations may be highly subjective, and, therefore, the rationale for the entity's conclusion should be carefully assessed by the auditor.

.31 Some loans may contain "due on demand" clauses along with a schedule of payments for principal and interest. The demand clause gives the lender the right to call a loan at any time. EITF Issue No. 86-5, *Classifying Demand Notes with Repayment Terms,* concludes that loans with "or on demand" clauses should always be considered current liabilities in accordance with FASB Statement No. 78 (AC B05) (except in the rare instance that a lender waives that right for a period of one year).

.32 Auditors may wish to carefully consider the requirements imposed by loan covenants while planning and performing the audit. Auditors may consider employing the following procedures:

- Obtain written confirmation of lender waivers of loan covenant violations and of lenders' lack of knowledge of any violations or intent to call a loan.
- Consider obtaining an opinion from the entity's attorney regarding technical covenant violations.
- Obtain specific management representations regarding known covenant violations and any communications with lenders regarding violations or waivers during the year.
- Give particular consideration to potential audit adjustments that, if made, would affect loan covenant provisions.

Additionally, for highly leveraged casinos, auditors may wish to consider the effect such a reclassification may have on that entity's ability to continue as a going concern.

Casino Receivables

.33 Casino receivables arise from the extensive use of credit for casino play. Receivables are also known as markers, hold checks, or IOUs. Extensive procedures involving checks and balances are built into the systems, relating to the issuance, collection, and administration of casino credit. From an audit and financial presentation standpoint, the primary audit objectives are—

- Valuation of receivables.
  - — Specification of proper amounts of receivables, including proper accounting for the markers and any payment made against the total balance
  - — Recognition of the bona fide nature of the receivables, through traditional procedures of confirmation
  - — Adequacy of valuation reserves, including those for uncollectibles, as well as provisions for foreign exchange losses on markers denominated in a foreign currency

- Consistent methods of revenue recognition from credit play.

.34 The recent trend in corporate gaming has resulted in the increasing formalization of credit procedures, from credit approval, which may be evidenced by the use of credit cards, to collection methods, which are standardized and include monthly statements. In these circumstances, procedures are becoming more like accounts receivable in other industries, and the process of confirmation—both positive and negative, as appropriate—is finding increasing use in the auditing of casinos. When using confirmations to obtain evidence from third parties about financial statement assertions made by management, auditors should refer to the guidance contained in SAS No. 67, *The Confirmation Process* (AU section 330).

.35 Factors that affect the nature, timing, and extent of confirmation procedures include the following:

- *The effectiveness of the internal control structure*— Documents supporting casino receivables may be found in several locations, and segments of the receivable balance may be included in more than one area of accountability, such as the casino cage, branch offices, or collection agencies. Because there is a possibility that assets from one area might be used to cover shortages in another, it is generally advisable to consider all casino receivables as one population to be confirmed as of a single date. Internal control structure policies and procedures may be different for each area; accordingly, the effectiveness of the internal control structure for each should be considered separately.

- *The possibility of disputes and the possibility that debtors will be unable to confirm the information requested*—The possibility of disputes and the possible inability to confirm information are greater than normal in casino operations because customers do not generally receive copies of documents evidencing indebtedness; they rely primarily on their own records, if any, or on their memories.

- *Customers' knowledge of components of account balances*—Confirmation procedures may be directed to account balances or to individual items included in such balances. Although casino customers' balances may include several separately executed instruments, it is likely that the customers will be able to confirm only their account balances. They do not generally know, nor do they usually have records of, the individual components of their balances.

In addition, casino customers may be more sensitive to contact about their accounts than customers in other businesses. Customers' true names may not be on the credit file (generally, though, such records are maintained), or the record of their true names may be kept elsewhere. Customers may have requested that they not receive mail or perhaps not be contacted at all regarding their accounts. Such situations require care by auditors and cooperation from management so that the casino customers are not alienated and so that the auditors can satisfactorily confirm the accounts, thus avoiding a possible significant limitation on the scope of the audit.

Chip and Token Liability

.36 A unique issue of casino liability is the existence and nature of chip and gaming token liability. Virtually all casinos have issued various denominations of gaming chips for use in their casino operations.

.37 From an operational standpoint, the chips and tokens that a casino has outstanding must be redeemed by the casino upon presentation by a patron or another casino. At any time, the amount of liability is the difference between the total amount of chips and tokens issued by the casino and the amount actually on hand within the casino. Over a period of years, the amount of chip liability generally tends to increase, as the casino has more of its chips and tokens outstanding in circulation.

.38 The primary reason for this increase over time is not merely transaction float in the immediate casino trading area, but also the propensity for customers to keep chips and tokens for souvenirs. A second factor is that the redemption of the $1.00 tokens from casino to casino is lagging, since the physical separation of tokens is very difficult and time consuming.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Accounting Developments

Impairment of Long-Lived Assets

.39 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the entity estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. (The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.)

.40 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by APB Opinion No. 30 (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.41 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Earlier application is encouraged. Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.42 In order to attract gamblers and maintain an advantage over the competition, casinos periodically upgrade their gaming machines with the latest technological advances. During the current year several casinos have replaced their slot machines with state-of-the-art devices with embedded bill acceptors. Thus, older, outdated long-lived assets such as slot machines may not generate adequate future cash flows. Additionally, significant adverse changes in a casino's business climate or an adverse action taken by a gaming regulator could affect the value of other casino gaming assets. In such instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.43 In considering a casino's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

Risks and Uncertainties

.44 In December 1994, the AICPA's Accounting Standards Executive Committee issued SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* SOP 94-6 requires nongovernmental entities to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires entities to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.45 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Examples of similar estimates that may be included in the financial statements of casinos include, but are not limited to:

- Net realizable value of casino receivables
- Capitalization and amortization of costs relating to a casino's major entertainment production

Examples of concentrations that may be subject to disclosure in the financial statements of casinos may include:

- volume of business with a particular class of customer such as convention business, "tour-package" vacationers or consistent wagerers;
- revenue from a particular gaming operation such as slot machines or table games;
- operations in a single geographic location such as a riverboat casino

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995 and for complete financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.46 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements of the entity being audited. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

Restructuring Charges

.47 During 1995, two major hotel-casino operators announced their intention to spin-off their casino operations into separate companies. Another major casino owner agreed to be acquired by a large gaming concern. These actions are designed to enable the constituent companies to gain access to new markets through acquisition or allow them to concentrate on their core business by divesting themselves of unrelated divisions. Restructuring often accompanies these activities as redundant functions are eliminated and existing areas streamlined. Auditors should consider the impact of such activities on the entity's operations and internal control structure; the reserves relating to current restructuring plans; and the appropriate period for reporting the costs associated with restructurings.

.48 In considering restructuring liabilities and costs, auditors should be aware of EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*, for authoritative guidance on the appropriate accounting for restructurings. EITF Issue No. 94-3 also provides guidance on (1) the types of costs that should be accrued, (2) the timing of recognition of restructuring charges, and (3) prescribing disclosures that should be included in the financial statements.

.49 For publicly held entities, SEC SAB No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges*, requires that restructuring charges be reported as a component of income from continuing operations.

Promotional Allowances or Complimentary Expenses

.50 It is customary for casinos to provide many customers with free rooms, food, beverages, and other amenities without cost. These free services are known in the industry as complementaries or promotional allowances. The services are usually rendered by the casino's support departments, such as the hotel or food and beverage operation, to encourage customers to play in the casino.

.51 The standard financial reporting rules for the Nevada Gaming Control Board, for example, require the inclusion of these complimentary services at full retail value in the reported revenues of the appropriate department (rooms, restaurant, bar). This requirement follows the widespread hotel industry practice of valuing

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

these items at retail value. Although there may be many different ideas of what constitutes retail, most casinos have established standard charge rates, usually slightly below premium prices for the valuation of complimentary services. The primary use of including these services at retail is to avoid distorting the operating ratios and performance measures in these support areas, particularly in the food and beverage area.

.52 The accounting treatment of the costs of these complimentary services is much less uniform. In some cases, the retail value is merely subtracted from the total sales to arrive at a net sales figure. This presentation then usually labels the deductions as promotional allowances and has become known as the promotional allowances method.

.53 The second method, known as the complimentary expense method, treats the retail amount of the complimentary service either as a cost of operation of the department providing the service or, by using some form of transfer allocation, as a cost of business of the casino department. In some cases, the complimentary expenses are merely regarded as overall administrative expense, and the retail value of the goods and services are included in this area of expense.

.54 The promotional allowance method of presentation is preferred, and results in the correct statement of net income of the casino operation. SEC SAB No. 69, *Disclosures by Non-bank Holding Companies Engaged in Lending and Deposit Activities and Casino-Hotels*, requires the separate presentation of revenues and related costs and expenses applicable to major revenue-providing activities of hotel-casinos. Thus, for promotionals, the financial statements should reflect the actual cost of promotionals as an expense of the activity that gave rise to them (for example, if the casino issued a food complimentary, the cost of this complimentary is to be included in casino expenses in the financial statements).

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.55 The AICPA Audit and Accounting Guide *Audits of Casinos* is available through the AICPA's loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the guides as they appear in the service are printed annually.

Information Sources

.56 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.57 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.58 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.59 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.60 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8120

Construction Contractors Industry Developments—1996/97

Industry and Economic Developments

.01 Over the past several years, the construction industry has experienced increased levels of growth—thus reversing the steep declines of the early 1990s that resulted from speculative building during the previous decade. This trend toward steady, moderate growth appears to be continuing in the current year as evidenced by the industry's profitable first half.

.02 Residential building, led by single-family home construction, has had the most significant impact on the industry's continued resurgence. The level of activity in new home construction, as monitored by the United States Department of Commerce, increased by 1.3 percent during the month of June. This increase in housing starts represents a seasonally adjusted annual rate of 1.48 million—its highest level since April 1994.

.03 The housing sector of the construction industry is considered to be highly sensitive to interest rate changes. Housing starts typically increase when interest rates decline, and decrease when interest rates rise. But while this year's increase in housing starts is consistent with strong employment and other positive economic conditions, it also seems to be running counter to the current trend in interest rates. The yield on thirty-year United States Treasury bonds, which is considered a long-term interest rate benchmark, rose to over 7 percent at midyear, after ending 1995 at about 6 percent. This increase had driven up thirty-year mortgage rates from a low of 6.94 percent in February to 8.4 percent by July. Nevertheless, housing starts and new home sales have increased steadily this year. Industry observers suggest that these higher interest rates did not immediately affect demand because home buyers had the option to secure more affordable financing by obtaining adjustable-rate mortgages. Interest rates on these mortgages, which are tied to short-term market rates, have risen far less this year than those on fixed-rate mortgages. Additionally, although the rate increases priced some buyers out of the market, they may also have prompted a surge of purchases by previously hesitant buyers seeking to avoid further increases. However, industry economists believe that the effect of rising interest rates will ultimately depress the housing market, and therefore are predicting a slowdown in growth for housing starts in the second half of 1996. They also believe that the following factors reinforce the notion that home sales and new construction have hit their peak:

- Applications for building permits for single-family homes dropped 1.2 percent in June.
- Although mortgage applications in the second quarter matched first quarter volume, both were well below 1995 fourth-quarter activity.
- The recent growth in housing construction is likely to be viewed by the Federal Reserve Board as a reason to raise interest rates.
- A slowdown in the overall economy is expected for the second half of 1996.

.04 Current favorable economic conditions along with the prospect of a second-half slowdown have implications for audit risk that auditors may wish to consider. The following are examples—

- Auditors should be alert to the potential for management to use overly optimistic assumptions when developing estimates under favorable economic conditions. Also, in the event of a change in economic conditions during the second half, such assumptions, unless revised, may result in material misstatements.

- Auditors should note that business decisions (such as, undertaking new construction projects) made by construction contractors during periods of economic growth may not have an immediate positive impact on the contractor's results of operations due to the length of the start-up period and the contract term. As a result, such projects cannot always be expected to improve short-term results. Auditors may wish to consider this fact when developing independent expectations relating to client estimates or when applying analytical procedures to evaluate the reasonableness of financial statement assertions.

- Even under favorable economic conditions, a high level of inherent risk is associated with management's judgments underlying estimates of, for example, progress toward completion of construction contracts. Such estimates in turn affect the determination of revenues, cost of revenues, accounts receivable, unbilled receivables, retentions receivable, and inventory. See the "Auditing Estimates" section of this Audit Risk Alert for further discussion of this issue.

- A change in economic conditions in the later half of 1996 may affect a large number of construction contractors' business decisions. For example, contractors may enter into high-risk contracts with uncreditworthy customers in the hope of maintaining the results achieved earlier in the year. In this circumstance, the auditor's assessment of the proper valuation of receivables from such customers may take on increased importance. Auditors may wish to consider applying such procedures as reviewing subsequent cash receipts, assessing customer financial viability and past payment performance, and evaluating the adequacy of allowances for doubtful accounts.

.05 Apartment construction should continue its pattern of growth from the previous year. Construction is expected to begin on 290,000 apartments in 1996, up from 274,000 units started in 1995.[1] This segment of the industry is typically volatile, though less sensitive than other forms of housing to interest-rate fluctuations. Evidence of this volatility can be seen in the 20 percent decrease in apartment construction for the month of June—after a 6 percent gain in May. Despite this isolated drop, construction of new apartments is expected to increase overall by 10 percent this year.

.06 Nonresidential construction tends to follow business cycles rather than other economic trends. In addition, unlike housing, which is a leading economic indicator, nonresidential construction generally lags behind the economy by about a year. Growth in this segment has remained relatively flat through the first half of 1996 and no significant change is expected for the remainder of the year. Within the nonresidential segment:

- Retail construction is closely tied to the consumer sector and therefore tends to mirror housing and employment trends. However, construction growth in this sector is expected to decline to perhaps as much as 10 percent less than last year's growth, given numerous consolidations and bankruptcies in the retail industry, along with expectations of lower retail sales revenues in the second half.[2] Growth from the aggressive expansion of some major retail chains will be largely offset by the contraction of smaller retailers.

- Office construction is expected to do well this year due in large part to the growth of companies in the high-technology sector.[3] As a result, office vacancy rates are expected to continue their decline throughout many parts of the country. The strength of the office market can be seen not only in the "build-to-suit" projects currently under way, but also in the rise of speculative office building construction where work begins with as little as 50 percent of the project preleased. Many expect this segment of the industry to perform better this year than it has in over a decade. Some markets however, such as the business districts of Los Angeles and downtown Dallas, will continue to struggle due to overcapacity. And all markets are likely to face competitive threats from improved and less expensive telecommunication capabilities which will, for some, obviate the need to maintain a business district location.

---

[1] By comparison, the number of apartment units started in 1985 was 670,000, so although the trend is upward, the increase does not compare favorably with past performance.

[2] See the Audit Risk Alert, *Retail Industry Developments—1996/97* [AAM section 8230].

[3] See the Audit Risk Alert, *High-Technology Industry Developments—1996/97* [AAM section 8200].

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.07 Nonbuilding construction, which includes public works and utilities, rose slightly by midyear but only modest growth is anticipated for the remainder of the year. This category of construction generally consists of long-term, publicly financed projects that are typically less sensitive to economic conditions than other segments of the industry.

.08 Regional variations in the performance of construction industry segments may differ significantly from national trends. See Exhibit 1, "Regional Analysis of Conditions in the Construction Industry."

Audit Issues and Developments

Impairment of Long-Lived Assets

.09 In March 1995, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08), which requires that long-lived assets and certain identifiable intangibles and goodwill related to those assets to be held and used by an entity, be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less costs to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value. The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Accordingly, this is the first year that auditors will evaluate management's implementation of the Statement (AC I08).

.10 FASB Statement No. 121 (AC I08) is likely to have a significant impact on many construction contractors, given the inherently capital-intensive nature of the industry. Auditors may face issues relating to the recoverability of the carrying amount of certain long-lived assets if, as expected, a general economic slowdown occurs in the latter part of 1996. In evaluating a construction contractor's implementation of FASB Statement No. 121 (AC I08), major issues to be considered by auditors include the following:

- *The appropriate classification of long-lived assets as either those being held and used or those to be disposed of.* Auditors should obtain an understanding of the policies and procedures used by the contractor to classify long-lived assets pursuant to FASB Statement No. 121 (AC I08), as well as evaluating whether those classifications are proper.
- *The identification of events or circumstances indicating that the carrying amounts of assets to be held and used may not be recoverable.* Auditors should obtain an understanding of the policies and procedures used by the contractor to identify such events and circumstances. Examples of such events and circumstances could include the following:
  - — A dramatic change in the manner in which an asset is used
  - — A reduction in the extent to which an asset is used
  - — Forecasts showing lack of long-term profitability
  - — A change in the law or business environment
  - — A substantial drop in the market value of an asset
- *The assumptions used in the underlying calculation of estimated future cash flows when testing for asset impairment used in management's impairment test, and assumptions used in estimating the fair value of assets for which an impairment loss is to be recognized.* A contractor's estimate of future cash flows from asset use and the fair value of assets used in calculating impairment losses should be evaluated pursuant

to the guidelines set forth in AICPA Statement on Auditing Standards (SAS) No. 57, *Auditing Accounting Estimates* (AU section 342). Procedures to be employed should include one or a combination of the following: (1) reviewing and testing the process used by management to develop the estimates, (2) developing an independent expectation to corroborate the reasonableness of the estimates, (3) reviewing subsequent events or transactions occurring before the completion of fieldwork.

- *The recording of assets to be disposed of at the lower of carrying amount or fair value less costs to sell.* Auditors should verify that the contractor has appropriately classified and valued long-lived assets to be disposed of.
- *The disclosure requirements of FASB Statement No. 121.* Auditors should verify that all disclosure requirements of FASB Statement No. 121 (AC I08) have been included in the contractor's financial statements.

Auditing Estimates

.11 Given the unique nature of a construction contractor's business and the extensive use of estimates, audits of construction contractors can be relatively complex. Estimates relating to future events affect the determination of contract costs, revenues, gross profits, and percentage of completion. A high level of audit risk associated with a contractor's estimates is likely, given the current economic environment. For example, estimates based on assumptions developed during the first half of the year may no longer be valid if a second-half economic slowdown occurs. In such circumstances, auditors should consider whether the contractor has made appropriate revisions.

.12 Proper implementation of the percentage-of-completion method (see the "Revenue Recognition" section of this Audit Risk Alert) requires that contractors have the ability to make reasonable, dependable estimates. Although the development of estimates is generally considered to be a normal and essential part of a contractor's business, auditors should, nevertheless, give careful consideration to whether the contractor is capable of making sufficiently dependable estimates.

.13 Auditors should consider the effect of current industry and economic conditions along with expected future trends on management's estimation process. The following are examples—

- With slower growth forecast for the housing sector, there is increased risk that some construction contractors may be inclined to offset lower revenue growth by underestimating costs to complete.
- Based on expectations of continued low inflation, management may underestimate future price escalations.
- Estimates of future financing costs may be understated by using current interest rates rather than projected rates, which are likely to be higher.

.14 Auditors should carefully review contractors' estimated costs to complete to determine whether it is probable that losses may be incurred on contracts. When evaluating the propriety of estimated costs, auditors should review representations of management and obtain explanations of apparent disparities between estimates and past performance on contracts, experience on other contracts, and information gained in other areas of the audit. Auditors should also consider internal control relating to the contractor's estimation process. There is usually a high degree of inherent risk associated with management judgments underlying estimates of progress towards completion as well as costs to complete. These estimates have a significant impact on the construction contractor's revenue recognition, accounts receivable, and inventory.

.15 Given the significant effect of the estimating process on the profit or loss associated with each contract, auditors should carefully evaluate evidence supporting all material estimates. SAS No. 57 (AU section 342)

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

provides guidance to auditors on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates in an audit. Auditors should note that while the nature of evidential matter supporting financial statement assertions for most commercial enterprises is typically factual (shipping documents, suppliers invoices, etc.), evidential matter for a construction entity is generally more varied and its analysis requires greater auditor judgment. As such, evaluating estimates of progress toward completion, estimated gross profit, and their underlying methodologies is a significant area of audit risk. Additionally, when considering the reasonableness of management's estimates of project completion dates, auditors should be alert to the potential risks for not meeting scheduled deadlines (for example, cost overruns or litigation).

.16 The pervasive impact of estimates used by construction contractors may also affect working capital, equity, and income statement accounts. Plausible relationships between contract billings, contract costs incurred, and gross profit, may reasonably be expected to exist and continue in the absence of known conditions to the contrary. The detection of variations in such relationships may uncover the existence of unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements. Analytical procedures, which consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data, provide useful tools for this purpose. The application of such procedures can assist the auditor in developing independent expectations as to the estimates used by construction contractors. Auditors may wish to compare client-generated information with industry statistics to assess the reasonableness of financial statement assertions. The "Information Sources" section of this Audit Risk Alert contains the names of several industry associations that may be helpful in obtaining such statistics. Authoritative guidance on the use of analytical procedures by auditors is set forth in SAS No. 56, *Analytical Procedures* (AU section 329), which requires the use of analytical procedures in the planning and overall review stages of all audits.

.17 The technical complexities and subjectivity of estimates relating to future events or the unique nature of the contractor's work may necessitate consideration of using the work of independent specialists, as discussed in SAS No. 73, *Using the Work of a Specialist* (AU section 336). Expert opinions and analyses from engineers, architects, appraisers, or attorneys may serve as a basis to obtain sufficient competent evidential matter in performing substantive tests to evaluate material financial statement assertions. A specialist may be engaged by management or the auditor to, for example, interpret complex contractual arrangements or evaluate a construction project's percentage of completion or estimates of costs to complete.

.18 Auditors should also carefully consider the effects of post-balance-sheet events on both the estimation process and revenue recognition or loss accrual on construction contracts. Auditors of construction contractors should refer to SAS No. 1, section 560, *Subsequent Events* (AU section 560). SAS No. 1, section 560 (AU section 560), provides guidance on events or transactions that have a material effect on financial statements and that occur subsequent to the balance-sheet date, but prior to the issuance of the financial statements and the auditor's report. Such events or transactions may require adjustment or disclosure in the financial statements.

Change Orders and Claims

.19 Change orders are modifications of an original contract that effectively alter the provisions of the contract without adding new provisions. They may be initiated by either the contractor or the customer, and they may include changes in specifications or design, method or manner of performance, facilities, equipment, materials, site, and period for completion of the work. Many change orders are unpriced; that is, the work to be performed is defined, but the adjustment to the contract price is to be negotiated later. For some change orders, both scope and price may be unapproved. In the current year, auditors are likely to see modifications to the contractual provisions of their client's construction projects in circumstances such as the following—

- In anticipation of a second-half economic slowdown in the housing industry, change orders might call for a reduction in the scope of a project in order to lower its overall cost.

- Change orders might expand existing construction plans due to the increased demand that may occur in the apartment sector given the growth rate of 10 percent that is expected for the current year.

In these circumstances, auditors should pay close attention to receivables arising from change orders. Auditors may wish to consider—

- Confirming the amounts of unapproved change orders with owners.
- Obtaining written representations from management and/or the client's legal counsel regarding change orders.
- Evaluating control procedures in place relating to unapproved change orders.
- Assessing the quality and extent of documentary evidence supporting the change order.
- Evaluating the impact of change orders on total contract revenue and costs calculated under the percentage of completion method.
- Assessing the propriety of underlying accumulated costs.
- Evaluating the existence and collectibility of revenues related to unapproved change orders.

.20 Claims are amounts in excess of the agreed contract price (or amounts not included in the original contract price) that a contractor seeks to collect from customers or others. These amounts may be attributable to customer-caused delays, errors in specifications and designs, contract terminations, change orders in dispute or unapproved as to both scope and price, or other causes of unanticipated additional costs. Recognition of the amounts of additional contract revenue relating to claims is appropriate only if it is probable that the claim will result in additional contract revenue and if the amount can be reliably estimated. Those two requirements are satisfied by the existence of all the following conditions:

1. The contract or other evidence provides a legal basis for the claim; or a legal opinion has been obtained, stating that under the circumstances there is a reasonable basis to support the claim.
2. Additional costs are caused by circumstances that were unforeseen at the contract date and are not the result of deficiencies in the contractor's performance.
3. Costs associated with the claim are identifiable or otherwise determinable and are reasonable in view of the work performed.
4. The evidence supporting the claim is objective and verifiable, based on neither management's "feel" for the situation nor unsupported representations.

If the foregoing requirements are met, revenue from a claim should be recorded only to the extent that contract costs relating to the claim have been incurred. The amounts recorded, if material, should be disclosed in the notes to the financial statements. Costs attributable to claims should be treated as costs of contract performance as incurred. Auditors may wish to consider performing procedures similar to those cited previously for change orders.

Control Environment

.21 Many construction contractors are small, family-owned businesses operating as sole proprietorships. Internal control in these entities often includes unique characteristics that may affect an auditor's assessment of control risk. Characteristics that may increase control risk include the following:

- The entire accounting function of a small, closely-held construction contractor may be the responsibility of one or a few employees, with inadequate segregation of duties. Also, owners or managers often have the authority to override prescribed control activities.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Owners and managers of construction entities frequently are entrepreneurs who may be more likely to give priority to the business of building over accounting systems and related control activities. As a result, internal control, accounting, and financial reporting functions may receive less support and attention than might be warranted.
- Owners and managers of small construction entities may not be well versed in matters of accounting, finance, and administration.
- The limited resources of some smaller contractors may engender informal accounting systems with inadequate internal control.

.22 If a construction contractor's internal control includes the preceding characteristics, control risk might be assessed as high. Auditors should adjust the scope of their audits accordingly and should document the understanding of the entity's internal control as required by SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319).[4] If that understanding reveals that the oversight function is weak, there is increased risk that material errors and irregularities will result in misstatements in the financial statements, and reportable conditions, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist.

.23 When assessing control risk, auditors may wish to consider whether the contractor has established control procedures to provide reasonable assurance of the following:

- Estimates of contract revenues and costs are updated periodically and reported to the appropriate levels of management.
- Revenue recognition is based on current estimates of progress in terms of cost incurred, physical completion of work, or another appropriate measure.
- Recorded contract revenues are periodically compared with contract terms for compliance.
- Change order and claim revenues are recognized in conformity with generally accepted accounting principles (GAAP).
- Adjustments to previously recognized contract profits resulting from management decisions are thoroughly documented.
- Revenues recognized on all contracts during the period are reconciled to the total revenues reflected in the financial statements.
- Management reporting of estimate updates provides sufficient information to allow for the determination of whether a contract loss reserve is required.

Job Site Visits

.24 For certain audit engagements, job site visits to selected construction sites will enable auditors to understand the construction contractor's operations and to compare internal accounting information to events that occur at the job sites. For example, current favorable economic conditions may increase the risk that construction contractors will be overly optimistic in establishing estimates. Job site visits can assist the auditor in assessing the reasonableness of such estimates by comparing their underlying principles with actual conditions at the construction site. Such visits provide valuable firsthand information about the physical status of construction projects and the existence of operational problems. Job site visits are also important when the auditor intends to assess control risk at the site as below the maximum or when the

[4] SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), revises the definition and description of internal control and makes conforming changes to relevant terminology. SAS No. 78 (AU section 319) was issued in December 1995 and is effective for audits of financial statements for periods beginning on or after January 1, 1997. See the "New Pronouncements" section for further discussion of this matter.

related accounts cannot be substantiated by other procedures. Yet another objective of an on-site visit is to obtain information and supporting documentation to evaluate the reasonableness of the progress of the project to date. The auditor may perform such procedures as the following:

- Identify uninstalled materials that should be excluded when measuring progress toward completion and noting physical security over such materials.
- Discuss with job site personnel the status of labor hours incurred to date and estimates to complete, including an evaluation of those estimates by observing the physical progress of the project. If the project is complex, the auditor should consider engaging the services of a specialist.
- Observe contractor-owned or rented material.
- Discuss with job site personnel issues that may affect the estimated total gross margin, such as problems encountered or operational inefficiencies.

Other Auditing Considerations

.25 *Retentions.* Contracts are sometimes structured so that the client may be permitted to withhold payment of a portion of the total contract price pending the completion of the contract or the occurrence of some specified event. In certain instances, these amounts may be retained for extended periods of time. Thus, auditors will need to assess the ultimate collectibility of such retentions. In doing so, auditors should understand the contractual provisions under which such amounts are withheld; the specified events or circumstances upon which these amounts are to be remitted; and the likelihood of such conditions being satisfied and the retentions being remitted.

.26 *Progress Payments.* Certain fixed-price contracts may be financed by way of progress payments made by the customer over the term of the contract. In examining this area auditors may wish to consider the following procedures:

- Conduct a review of subsequent cash receipts.
- Analyze activity in the progress payments accounts such as progress billings and progress payments received.
- Analyze the underlying costs incurred by the contractor.

New Pronouncements

Auditing Standards

.27 *SAS No. 75.* In September 1995, the Auditing Standards Board (ASB) issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except in certain circumstances, as discussed in the SAS (AU section 622). The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.28 *SAS No. 76.* In September 1995, the ASB issued SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634). The SAS (AU section 634) provides reporting guidance and an example of a letter, actually a form of agreed-upon procedures report, that the accountant can provide in response to a request to provide a comfort letter in circumstances in which the party requesting the letter is not willing to provide the accountant with the representations required in paragraphs 6 and 7 of SAS No. 72 (AU section 634.06 and .07). The Statement is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.29 *SAS No. 77.* In November 1995, the ASB issued SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77 is effective for engagements beginning after December 15, 1995.

.30 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.31 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58 (AU section 508) concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. This SAS does not affect SAS No. 59 (AU section 342) nor preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

.32 A table outlining the significant provisions aspects of the newly issued auditing standards is set forth in Exhibit 2, "Significant Provisions of Newly Issued SASs" of this Audit Risk Alert.

Attestation Standards

.33 *SSAE No. 4.* In September 1995, the ASB issued Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600). SSAE No. 4 (AT section 600) sets forth attestation standards and provides guidance on the performance and reporting in all agreed-upon procedures engagements, except in certain circumstances, and is effective for reports on agreed-upon procedures engagements dated after April 30, 1996. SSAE No. 4 (AT section 600) generally should be used when applying agreed-upon procedures to nonfinancial statement subject matter. In addition, SSAE No. 4 (AT section 600) requires a written assertion from management as a condition of engagement performance.

.34 *SSAE No. 5.* In November 1995, the ASB issued SSAE No. 5, *Amendment to Statement on Standards for Attestation Engagements No. 1,* Attestation Standards (AT section 100). This amendment provides guidance on the quantity, type, and content of working papers for attestation engagements and is effective for engagements beginning after December 15, 1995.

.35 *SSAE No. 6.* In December 1996, the ASB issued SSAE No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400). This amendment conforms the description of elements of an entity's internal control to the components of internal control contained in SAS No. 78 (AU section 319) (see the discussion in the preceding section) and *Internal Control—Integrated Framework.* The amendment is effective for an examination of management's assertion when the assertion is as of or for the period ending December 15, 1996, or thereafter. Early application of the provisions of this Statement (AT section 400) is permitted.

.36 *Quality Control Standards.* In May 1996, the ASB issued Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). SQCS No. 2 (QC section 20)

supersedes SQCS No. 1, *System of Quality Control for a CPA Firm*, and its Interpretations (QC sections 10 and 10-1). The provisions of these Statements (QC sections 20 and 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997.

.37 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the Accounting and Review Services Committee under Rules 201, *General Standards* (ET section 201.01), and 202, *Compliance With Standards* (ET section 202.01), of the AICPA Code of Professional Conduct. The definition of a firm's accounting and auditing practice has been revised to include engagements performed under SSAEs issued by the ASB. These standards had not been issued when SQCS No. 1 (QC section 10) was promulgated. Also, the new standard replaces the nine specific elements discussed in SQCS No. 1 (QC section 10) with the following five broad elements: (1) independence, integrity, and objectivity; (2) personnel management; (3) acceptance and continuance of clients and engagements; (4) engagement performance; and (5) monitoring. SQCS No. 3 (QC section 30) provides guidance on how a firm can implement the new monitoring element of a quality control system in its accounting and auditing practice.

Ethics Ruling—Indemnification of a Client

.38 Recently, the AICPA Professional Ethics Executive Committee issued Ethics Ruling No. 102, *Member's Indemnification of a Client* (ET section 191.204 and .205), as published in the January 1996 *Journal of Accountancy*. This ruling (ET section 191.204 and .205) states that auditors should not enter into agreements that would require them to indemnify their client for damages, losses, or costs arising from lawsuits, claims, or settlements that relate, directly or indirectly, to client acts, or their independence will be impaired. In assessing their independence, auditors of construction contractors should consider the implication of indemnification arrangements requested by their clients, in light of this new ethics ruling (ET section 191.204 and .205).

AICPA Exposure Drafts: Proposed SASs

.39 *Consideration of Fraud in a Financial Statement Audit.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, *and No. 47,* Audit Risk and Materiality in Conducting and Audit. The proposed Statement would provide expanded operational guidance on the consideration of fraud in conducting a financial statement audit. The proposed changes in auditing standards also clarify the auditor's current responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether caused by error or fraud. In addition, the proposed changes provide added guidance on the standard of due professional care in the performance of work, including the need to exercise professional skepticism, and the concept of reasonable assurance. In addition to amending SAS Nos. 1 (AU sections 110 and 230) and 47 (AU section 312), the proposed Statement would—

- Describe fraud and its characteristics.
- Require the auditor to specifically assess the risk of material misstatement due to fraud and provide categories of fraud risk factors that should be considered in the auditor's assessment.
- Provide guidance on how the auditor should respond to the results of the assessment.
- Provide guidance on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud.
- Describe related documentation requirements.
- Provide guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.40 *Amendment to SAS No. 31,* Evidential Matter. In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Amendment to SAS No. 31,* Evidential Matter. This proposed Statement would provide guidance for a practitioner who has been engaged to audit an entity's financial statements where significant information is transmitted, processed, maintained, or accessed electronically. The proposed Statement would include examples of evidential matter in electronic form and provide that an auditor should consider the time during which such evidential matter exists or is available in determining the nature, timing, and extent of substantive tests. In addition, the proposed Statement would indicate that an auditor may determine that, in certain engagement environments where evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests. The proposed Statement would provide that in such circumstances, an auditor should consider performing tests of controls to support an assessed level of control risk below the maximum for affected assertions.

.41 *Investments in Debt and Equity.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Investments in Debt and Equity.* This proposed Statement would revise the guidance on auditing investments to make that guidance consistent with recently issued accounting standards, particularly FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80).

Accounting Issues and Developments

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.42 In June 1996, the FASB issued FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities.* This Statement provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities. Those standards are based on consistent application of a financial-components approach that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished. This Statement provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.43 A transfer of financial assets in which the transferor surrenders control over those assets is accounted for as a sale to the extent that consideration other than beneficial interest in the transferred assets is received in exchange. The transferor has surrendered control over transferred assets if and only if all of the following conditions are met:

1. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.
2. Either (*a*) each transferee obtains the right—free of conditions that constrain it from taking advantage of that right—to pledge or exchange the transferred assets or (*b*) the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right—free of conditions that constrain them from taking advantage of that right—to pledge or exchange those interests.
3. The transferor does not maintain effective control over the transferred assets through (*a*) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (*b*) an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.

.44 FASB Statement No. 125 requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interest in transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.45 FASB Statement No. 125 requires that servicing assets and liabilities be subsequently measured by (*a*) amortization in proportion to and over the period of estimated net servicing income or loss and (*b*) assessment for asset impairment or increased obligation based on their fair values.

.46 FASB Statement No. 125 requires that debtors reclassify financial assets pledged as collateral and that secured parties recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.

.47 FASB Statement No. 125 requires that a liability be derecognized if and only if either (*a*) the debtor pays the creditor and is relieved of its obligation for the liability or (*b*) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.

.48 FASB Statement No. 125 provides implementation guidance for assessing isolation of transferred assets and for accounting for transfers of partial interest, servicing of financial assets, sercuritizations, transfers of sales-type and direct financial lease receivables, securities lending transactions, repurchase agreements including "dollars rolls," "wash sales," loan syndications and participations, risk participations in banker's acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishment of liabilities.

.49 FASB Statement No. 125 supersedes FASB Statements No. 76, *Extinguishment of Debt*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. This Statement amends FASB Statement No. 115 (AC I80) to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights*. This Statement also supersedes Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)* and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*.

.50 FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Delayed Effective Dates—Accounting Pronouncements

.51 *Disclosures about Fair Value of Financial Instruments.* FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), issued in December 1991, was effective for financial statements issued for fiscal years ending after December 15, 1992. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995. In that a sizable portion of construction contractors may be smaller development-stage enterprises, financial statements for years ended during 1996 will be subject to the provisions contained therein. In such circumstances, auditors should consider whether management has made all disclosures required by FASB Statement No. 107 (AC F25).

.52 FASB Statement No. 107 (AC F25) requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement (AC F25) requires the disclosure of descriptive information pertinent to estimating the value of a financial instrument. Certain financial instruments (for example, lease contract, deferred-compensation arrangements, and insurance contracts) are excluded from the scope of the Statement (AC F25).

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.53 *Disclosures about Derivative Financial Instruments.* FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), issued in October 1994, was effective for financial statements issued for fiscal years ending after December 15, 1994. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995.

.54 FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments, such as futures; forward, swap, and option contracts; and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), to require disaggregation of information about financial instruments with off-balance-sheet risk of accounting loss by class, business activity, risk, or other category that is consistent with the entity's management of those instruments. The Statement also amends FASB Statement No. 107 (AC F25) to require that fair value information be presented without combining, aggregating, or netting the fair value of derivative financial instruments with the fair value of nonderivative financial instruments and be presented together with the related carrying amounts in the body of the financial statements, a single footnote, or a summary table in a form that makes it clear whether the amounts represent assets or liabilities.

.55 Auditors should consider whether the provisions of FASB Statement No. 119 (AC F25) apply to their construction contractor clients, and if so, evaluate whether the client's financial statement disclosures are adequate and appropriate in view of the requirements set forth therein.

Revenue Recognition

.56 Accounting Research Bulletin (ARB) No. 45, *Long-Term Construction-Type Contracts* (AC Co4), addresses the accounting issues relevant to construction-type contracts for commercial organizations engaged in the contracting business. Under GAAP, there are two methods of recognizing revenues on construction contracts:

1. The percentage-of-completion method allows the contractor to recognize income over the term of the contract. Under this method, a contractor computes the extent of progress toward completion for each contract in progress at a given point in time. For example, if a contract is 75 percent complete on a particular date, the contractor will then recognize 75 percent of the contract's revenues, costs, and gross income.
2. The completed-contract method defers income recognition until a contract is substantially complete. Under this method, revenues, costs, and gross income are not recognized during the period of construction. Instead, recognition is deferred until the project's completion.

.57 AICPA Statement of Position (SOP) 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts,* establishes a strong preference for the percentage-of-completion method, virtually requiring that it be used as the basic method of accounting by most construction contractors. The only time the completed-contract method should be used is when either of the following conditions exists:

1. The results do not vary materially from those achieved under the percentage-of-completion method.
2. With persuasive evidence, the contractor can overcome the basic presumption of having the ability to make reasonable dependable estimates.

Joint Ventures

.58 Contractors faced with limited financial resources and lack of access to new markets commonly overcome these obstacles by forming joint ventures. By combining resources with other construction entities, a contractor may be able to bid on and complete larger, more complex construction projects as well as expand into other geographic locations.

.59 Joint ventures may be formed to complete one specific project or create a permanent business relationship designed to pool resources and bid on all contracts of a specific type for an indefinite period of time. Joint ventures may take the form of a general partnership, limited partnership, or corporation.

.60 There are several different methods of accounting for a construction contractor's interest in a joint venture (see SOP 78-9, *Accounting for Investments in Real Estate Ventures*). The more common methods are the cost method, the equity method, and consolidation. The method of accounting for investments in joint ventures is generally determined by the extent of control the construction contractor has over the joint venture's operations.

.61 The FASB's Emerging Issues Task Force (EITF) has discussed several matters that may affect the appropriate accounting for investments in joint ventures. Those matters include the following:

- EITF Issue No. 95-6, *Accounting by a Real Estate Investment Trust for an Investment in a Service Corporation*, sets forth criteria for determining whether significant influence exists. Although the criteria were developed specifically for real estate investment trusts and service corporations, they may be useful in making that determination for other entities as well.
- EITF Issue No. 94-1, *Accounting for Tax Benefits Resulting from Investments in Affordable Housing Projects*, describes the Task Force's consensus position about how an entity that invests in a qualified affordable housing project through a limited partnership should account for its investment.
- Appendix D-46, *Accounting for Limited Partnership Investments*, describes the discussion of the Securities and Exchange Commission (SEC) staff's position that investments in all limited partnerships should be accounted for pursuant to paragraph 8 of SOP 78-9. That guidance requires the use of the equity method unless the investor's interest "is so minor that the limited partner may have virtually no influence over partnership operating and financial policies."

Auditors should consider these developments as they evaluate the appropriateness of construction contractor's accounting for investments in joint ventures and similar entities.

.62 In addition to evaluating the propriety of the contractor's method of accounting for an investment in joint ventures, the auditor should be aware that such arrangements may create relationships that meet the definition of related-parties as set forth in FASB Statement No. 57, *Related Party Disclosures* (AC R36). Auditors should consider the guidance contained in SAS No. 45, *Omnibus Statement on Auditing Standards—1983* (AU section 334), which outlines procedures to identify related party relationships and transactions, and to assess the propriety of the required financial statement accounting and the adequacy of related disclosures.

Exhibit 1

Regional Analysis of Conditions in the Construction Industry[5]

Region	Economic Conditions
New England	• Solid gains in retail construction may slow as a result of bankruptcy filings by regional chains. • Office and industrial construction lags the rest of the nation due to corporate downsizing and consolidations.
Middle Atlantic	• Sharp declines in office construction are accompanied by excess office space. • Retail construction is saturated despite the relocation to the region of several large warehouse retailers. • Moderate growth is expected for industrial construction given declines in manufacturing.
South Atlantic	• Nonresidential construction in the region's northern states is depressed due to corporate downsizing and slower population growth. • Construction related to the 1996 Summer Olympics will boost growth in Atlanta and surrounding areas. • Southern states in the region contain some of the strongest office markets. • Retail construction is booming due to above-average employment growth. • Industrial construction is thriving given that the Carolinas are a prime location for manufacturing.
East North Central	• Industrial construction will continue to prosper given the high concentration of manufacturing firms and national distribution. • Office construction has seen scattered gains as vacancy rates continue to fall. • Retail construction has grown in many areas led by expansion in the industrial sector.
East South Central	• Industrial construction, which dominates this region is expected to continue growing due to the trend towards relocation to this region. • Retail construction is benefitting from growing tourism and the Mississippi casino boom.

[5] New England: CN, ME, MA, NH, RI, and VT.
Middle Atlantic: NJ, NY, and PA.
South Atlantic: DE, FL, GA, MD, NC, SC, VA, DC, and WV.
East North Central: IL, IN, MI, OH, and WI.
East South Central: AL, KY, MI, and TN.
West North Central: IA, KS, MN, MS, NE, ND, and SD.
West South Central: AK, LA, OK, and TX.
Mountain: AZ, CO, ID, MO, NV, NM, UT, and WY.
Pacific: AL, CA, HA, OR, and WA.

Region	Economic Conditions
West North Central	• The region's well-diversified economy is insulated from many cyclical variations. Accordingly, construction levels that have remained relatively constant over the past several years, should continue to do so.
West South Central	• Retail construction has shown significant growth, driven by an expanding labor market. • Gradual improvement in office construction is expected as the region rebounds from overbuilding. • Industrial construction is benefitting from growth in the high-technology field.
Mountain	• Commercial construction has grown significantly due to population increases. • Apartment construction may slow in some sections due to previous overbuilding, but will increase in the western states. • Retail construction is slowing as migration from more prosperous California decreases. • Industrial construction is expanding due to the influx of high-technology companies.
Pacific	• Excess office space in California will slow new office construction. • Industrial construction in the Northwest is expected to increase. • Retail construction is expected to strengthen along with the region's economy.

Exhibit 2

Significant Provisions of Newly Issued SASs

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.
SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634)	SAS No. 72	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623)	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341]).

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.65 The AICPA Audit and Accounting Guide *Construction Contractors* is available through the AICPA loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the Guides as they appear in the service are printed annually.

Construction Contractors' Financial Reporting Checklist

.66 The AICPA has published a revised version of *Checklists Supplement and Illustrative Financial Statements for Construction Contractors* as a tool for preparers and reviewers of financial statements of construction contractors.

Technical Practice Aids

.67 *Technical Practice Aids* is an AICPA publication that, among other things, contains questions received by the AICPA Technical Information Service on various subjects and the service's responses to those questions. Several sections of *Technical Practice Aids* contain questions and answers specifically pertaining to construction contractors. *Technical Practice Aids* is available both as a subscription service and in paperback form.

Information Sources

.68 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table entitled "Information Sources," of this document. Many non government and some government publications and services involve a charge or membership requirement.

.69 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.70 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.71 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.72 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

* * * *

.73 This Audit Risk Alert supersedes *Construction Contractors Industry Developments—1995/96.*

* * * *

.74 Practitioners should also be aware of the economic, industry, regulatory, and professional developments described in *Audit Risk Alert—1996/97* [AAM section 8010] and *Compilation and Review Alert—1996/97* [AAM section 8015].

Federal Government Contractors Industry Developments—1995/96

Industry and Economic Developments

.01 Throughout 1995, the U.S. economy as a whole continued its steady recovery from several years of recession. However, the recovery has not necessarily improved the economic outlook for many federal government contractors. There is mounting pressure in Congress to balance the federal budget. As a result, funding for many government programs is being reduced, and several programs are under consideration for elimination entirely. The cuts in government spending have resulted in fewer and smaller government contracts.

Mergers, Consolidations, and Downsizing

.02 Mergers, consolidations, and downsizing in the government contractors industry continued during 1995 in response to the decrease in federal spending. Such restructurings allow contractors to eliminate overlapping staff, broaden their technological base and, in some cases, increase their market base. Often, costs incurred in such restructurings are substantial. However, recent legislation may delay reimbursement of otherwise allowable costs until overall net savings to the federal government from the restructuring activities are demonstrated and certified by the Department of Defense (DOD). The legislation also would make certain restructuring costs unallowable in circumstances where a contractor undertakes restructuring activities that cannot be reasonably projected to result in net overall savings to the government. (See the "Regulatory and Legislative Developments" section of this Audit Risk Alert for a further discussion of legislative, government policy, cost accounting, and regulatory developments related to restructuring costs.) In addition, such reorganizations may call into question the carrying values of certain long-lived assets, such as goodwill and other intangibles, and fixed assets. Auditors of financial statements of federal government contractors that have been parties to such transactions should carefully consider whether the carrying values of such long-lived assets have been impaired.

Unexpected Losses and Claims Activity

.03 Federal government contractors are subject to complex regulations and statutes that expose them to significant business risk for noncompliance. Many contractors have recently experienced unexpected losses due to violation of regulations (for example, defective pricing under the Truth in Negotiations Act). Such violations typically result in a liability to the federal government for amounts that have been disallowed. Although the disallowed amounts may be immaterial, the contractor also may be subject to fines and penalties that could be material to the financial statements. In addition, violations could result in criminal charges, subjecting the contractor to even larger losses. AICPA Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients* (AU section 317), requires auditors to consider laws and regulations that generally are recognized to have a direct and material effect on the determination of financial statement amounts. The AICPA Audit and Accounting Guide *Audits of Federal Government Contractors* addresses the auditor's responsibility to consider illegal acts, including suspension and debarment of contractors and civil and criminal fraud charges. In planning their audits of federal government contractors, auditors should carefully evaluate the financial statement effect of the applicable laws and regulations. See the "Regulatory and Legislative Developments" section of this Audit Risk Alert for a discussion of new laws and regulations of which auditors should be aware.

.04 The ongoing budget cuts have caused the federal government to cancel or substantially scale back several programs. Contractors may suffer adverse financial consequences as a result of those program cancellations and curtailments. For example, cancellation or curtailment of a significant program could substantially increase

overhead rates on a contractor's remaining contracts because the base over which the costs are spread would be greatly reduced. In addition, many contractors continue to experience increases in claim activity related to the cancellation of contracts. Some contractors have filed, or are in the process of filing, contract claims to recover the additional costs.

.05 SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), states that auditors have a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year from the date of the financial statements being audited. That evaluation is based on the auditor's knowledge of relevant conditions and events that exist at, or have occurred prior to, the completion of fieldwork. Information about such conditions or events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited.

.06 SAS No. 59 (AU section 341) requires that if, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about an entity's ability to continue as a going concern, he or she should consider management's plans for dealing with the adverse effects of the conditions or events. As they make the evaluation described in SAS No. 59 (AU section 341), auditors should consider the effects that spending cuts and other changes in the economy may have on the ability of contractors to continue as going concerns. Auditors should be cognizant of the fact that, because of recent business restructurings and the entry of many contractors into new lines of business, historical data and trends in the industry may no longer be meaningful indicators of current and future performance. Auditors should consider whether contractors have evaluated the effects of the changes in the business environment, prepared business plans to respond to the changes, and have the ability to execute those plans. In addition, after considering management's plans, auditors should consider the possible effects on the financial statements, the adequacy of the related disclosures, and the possible effects on the auditor's report.

Regulatory and Legislative Developments

Regulatory Developments

.07 *Cost Accounting Standards Board Initiatives.* The Cost Accounting Standards Board (CASB), which was established by Congress, develops Cost Accounting Standards (CASs) to provide uniformity and consistency in the accounting principles used by federal government contractors and subcontractors. (CAS are not included in the hierarchy of generally accepted accounting principles (GAAP) established by SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report* (AU section 411). Applicable laws and regulations regarding CASs established by the CASB may affect cost allowability and, as a result, the amount of revenue and costs accrued under government contracts, depending on the type of contract involved. Auditors should carefully evaluate the financial statement effect of CASs and cost allowability (cost principles) on contract revenues and costs.

.08 The CASB is continuing to address issues relating to the measurement of costs, the assignment of costs to accounting periods, and the allocation of costs to objectives. In promulgating new or revised CASs, the CASB must, by law, undertake a four-step process by issuing (1) Staff Discussion Papers, (2) Advance Notices of Proposed Rulemaking (ANPRMs), (3) Notices of Proposed Rulemaking (NPRMs), and (4) final Rulemakings. This rulemaking process can take several years from the development of a staff discussion paper to the issuance of a final rule.

.09 Below is a summary of current CASB initiatives and each one's status.

Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Staff Discussion Paper	*Issued*
Contract Price Adjustments for Organizational Changes	April 1993
Advance Notices of Proposed Rulemaking	
Changes in Cost Accounting Practices	April 1995
Notice of Proposed Rulemaking	
Revisions to the CASB Disclosure Statement Form (CASB DS-1)	November 1994
Treatment of Gains or Losses Subsequent to Mergers or Business Combinations by Government Contractors	March 1995
Final Rules	
Composition, Measurement, Adjustment, and Allocation of Pension Costs	March 1995

.10 CASB activities are discussed below in relation to other activities and developments affecting their applicability to government contractors.

.11 *Composition, Measurement, Adjustment, and Allocation of Pension Costs.* In March 1995, the CASB issued a final rule to revise CASs relating to accounting for pension costs under negotiated government contracts. The CASB addressed certain problems that have emerged since the original promulgation of the pension standards, CAS No. 412, *Cost Accounting Standards for Composition and Measurement of Pension Costs,* and CAS No. 413, *Adjustment and Allocation of Pension Costs.* The final rule includes requirements for the components, measurement, assignment, and allocation of pension costs for qualified and nonqualified defined benefit pension plans. The most significant changes relate to qualified pension plans subject to limits on federal tax deductions, recognition of costs on nonqualified plans, and accounting for segment closures. The final rule is effective on or after the start of the contractor's next cost accounting period following receipt of a contract or subcontract awarded on or after March 30, 1995, that is subject to full CAS coverage.

.12 The final rule provides for a four-step process of computing, assigning, funding, and allocating pension costs. An entity's accrual for periodic pension cost is subject to a floor of $0 and a ceiling equal to the maximum tax-deductible amount plus prepayment credits. Portions of pension costs computed for a period that fall outside of this range must be amortized over ten years as either an "assignable cost deficit" or an "assignable cost credit." The final rule also includes an "assignable cost limitation" (ACL) that prevents the assignment of period costs to an overfunded pension plan. The costs assigned to a period cannot exceed the ACL. Failure to comply with the new rules will result in the cost being lost forever.

.13 The final rule also substantially changes the accounting for nonqualified defined benefit pension plans. Under the final rule, nonqualified pension costs assignable on an accrual basis must be funded at a level equal to the percentage of the compliment of the highest published federal corporate income-tax rate in effect on the first day of the cost accounting period. Alternatively, contractors may treat those costs on a pay-as-you-go basis.

.14 In addition, the final rule includes new definitions of pension plan terminations and segment closures. The existing accounting rules for adjusting previously determined pension costs related to segment closures now applies to segment closures, plan terminations, or curtailments of benefits. The final rule also adds new requirements for measuring the pension adjustment.

.15 Because the final rule includes significant new requirements, auditors should consider whether their clients have adopted transition plans to implement the rule into their accounting systems, forward pricing rates, and actuarial assumptions. Failure to comply may result in severe limitations on future cost recovery.

.16 *Gains or Losses Subsequent to Mergers and Business Combinations.* The CASB continues to study the treatment of gains or losses that are attributable to tangible capital assets subsequent to mergers or business

combinations of government contractors. The CASB issued an NPRM on this subject in March 1995. To resolve the problems identified in this area, the CASB proposes to amend CAS No. 404, *Capitalization of Tangible Capital Assets.* The proposed amendments are based on an approach involving "no step-up, no step-down" of asset bases and no recognition of gain or loss on a transfer of assets following a business combination by contractors subject to CASs.

.17 CAS No. 404-50(d) currently requires that, under the purchase method of accounting, acquired assets be written to fair value, which is consistent with GAAP. In other words, asset bases could be stepped down. The NPRM instead would prescribe that for federal government contract costing purposes, tangible capital assets after a business combination and accounted for under the "purchase method" of accounting would retain their net book value recognized prior to the business combination, provided that the assets had previously generated costs that were chargeable to federal government contracts subject to CASs. The cost of tangible capital assets would be restated after the business combination at a figure not to exceed the fair value at the date of the acquisition pursuant to a business combination in which the assets prior to the business combination did not generate costs that were chargeable to federal government contracts subject to CASs. (See "Consensus Decisions of the FASB's EITF" in the "Accounting Issues and Developments" section of this Audit Risk Alert for further discussion of issues relating to business combinations.)

.18 In addition, CAS No. 409, *Depreciation of Tangible Capital Assets,* currently requires that gains and losses on disposition of tangible capital assets be considered adjustments of previously recognized depreciation costs and assigned to the period in which disposition occurs. The NPRM clarifies that the CAS No. 409 provisions dealing with the recapture of gains and losses on disposition of tangible capital assets should not apply when assets are transferred subsequent to a business combination, because it is assumed that the assets will be transferred at their net book values.

.19 The approach involving no "step-up, no step-down" of assets, embodied in the NPRM, is not consistent with the Federal Acquisition Regulation (FAR) cost principle (section 31.205-52), *Asset Valuations Resulting from Business Combinations,* which prohibits step-ups but does not rule out step-downs. If the NPRM is adopted, it would replace, for government purposes, the current CASs and GAAP.

.20 Guidance issued by the Defense Contract Audit Agency (DCAA) to its auditors suggests that for business combinations that occurred prior to July 23, 1990 (effective date of FAR 31.205-52), the government contracting officer should examine each situation "on a case-by-case basis to achieve equity or protect the government's interests . . ." DCAA auditors are further instructed to advise the contracting officer to enter into an advance agreement if they encounter those prior business combinations, in order to provide equitable treatment to both the government and the contractor and to minimize future disputes.

.21 An appeal from a contracting officer's final decision on the issue of applicability filed with a board of contract appeals is likely. Auditors should be alert to the outcome of any such appeal that may be filed. Auditors also should carefully evaluate the allowability of costs under section 31.205-52, including a review of any agreements between the government and contractor on the treatment of such costs.

.22 *Proposed Revisions to the CASB Disclosure Statement Form.* Contractors with more than $25 million in government contracts covered by CASs are required to file a disclosure statement containing details of the accounting practices of all recognized business segments doing business with the federal government. In November 1994, the CASB issued an ANPRM on a revised draft of CASB DS-1, which solicited views from the government procurement community with respect to the current format of the disclosure statement. Comments were requested by February 23, 1995.

.23 *Changes in Cost Accounting Practices.* In April 1995, the CASB issued an ANPRM to revise the current definitions and illustrations governing changes in cost accounting practices. Among other things, the revision will indicate explicitly that a change in the manner in which costs are grouped and accumulated constitutes a change in cost accounting practices. It also will clarify that organizational changes must be evaluated on a case-by-case basis

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

to determine if a change in cost accounting practice has occurred. The new definition likely will cause many organizational changes to be classified as accounting practice changes. This change is significant because increased costs arising from a voluntary accounting practice change may not be reimbursable on CAS-covered contracts.

.24 The ANPRM also proposes the addition of a new subpart to clarify the process for determining and resolving the cost impact on covered contract prices or contract costs, or both, when a contractor makes a change to its cost accounting practices, fails to comply with a CAS, or fails to consistently follow its established cost accounting practices. Comments were requested by July 10, 1995.

.25 *Department of Defense Initiatives.* In June 1995, the DOD issued *Defense Acquisition Circular* (DAC) 91-7, which amends the Defense FAR Supplement (DFARS) to revise, finalize, or add language to various rules (see *Federal Register,* vol. 60, No. 107, June 5, 1995). DAC 91-7 includes thirty-nine rules and miscellaneous editorial amendments. Among other things, DAC 91-7 addresses contract accounting controls, predetermined indirect cost rates, limitations on allowable individual compensation, restructuring costs under defense contracts, and indirect costs of institutions of higher learning.

.26 Under the final rule, contractors receiving cost-reimbursement or incentive-type contracts, or contracts that provide for progress payments based on costs or on a percentage or stage of completion, must maintain an accounting system and related internal controls that provide reasonable assurance that (1) applicable laws and regulations are complied with; (2) the accounting system and cost data are reliable; (3) risk of misallocations and mischarges is minimized; and (4) contract allocations and charges are consistent with invoice procedures.

.27 The final rule also provides that indirect cost rates for educational institutions may be predetermined for a period of up to four years when cost experience and other pertinent facts are sufficient to assess the probable level of indirect costs during subsequent accounting periods. In addition, it prohibits the DOD from placing any limitation on the reimbursement of otherwise allowable indirect costs incurred by an institution of higher learning, unless that same limitation is applied uniformly to all other organizations performing similar work under DOD contracts.

.28 DAC 91-7 limits allowable costs for individual compensation to $250,000 per year. This limitation applies to contracts that are awarded after April 15, 1995, and that are funded with fiscal year 1995 appropriations. It also restricts the DOD from reimbursing restructuring costs associated with a business combination unless certain conditions are met. (See the "Regulatory and Legislative Developments" section of this Audit Risk Alert for a further discussion of allowability of restructuring costs.)

.29 The rule was effective May 17, 1995.

Cost Allowability and Allocability Issues

.30 *New DCAA Audit Guidance.* New guidance provided to DCAA auditors in the DCAA January 1995 and July 1995 *Contract Audit Manuals* addressed the following areas:

- Understanding, evaluating, and reporting on the contractor's internal control structure
- Assessing control risk and translating the risk to audit scope
- Allowability of executive compensation costs
- Auditing contractors that are subject to suspension or debarment agreements
- Review and follow-up on internal and external auditor reports and findings
- Relying on the work of internal and external auditors
- Maintaining coordinated audit matrices to manage coordinated audits at participating contractors
- Allowability of environmental clean-up costs

- Contractor internal controls for screening unallowable costs and directly associated costs
- Allowability of costs related to employee stock ownership plans
- Real-time discussions of audit findings
- Inclusion of cost of money in corporate aircraft costs
- Joint-venture partners' cost accounting practices and internal controls
- Depreciating assets below residual values
- Application of cost accounting standards to educational institutions
- Review of the contractor's billing system internal controls for identifying and notifying the government of overpayments
- Review of the contractor's internal controls for briefing contract terms for special provisions affecting the allowability of costs
- Application of penalties on unallowable costs
- A contractor's responsibilities for monitoring subcontractors
- Allowability of costs associated with air shows, special events, and trade shows
- Revised independent research and development and bid and proposal cost ceilings
- The contractor's use of management-reduction factors instead of having internal controls to identify and segregate unallowable costs
- Application of agreed-upon procedures to the review of proposals
- Evaluating a contractor's estimates at completion for use in progress payment requests and cost performance reports
- Use of statistical sampling techniques in the contract audit environment
- Audits of progress payment requests and related internal controls
- Use of electronic media to store records

.31 The DCAA will provide new guidance to its auditors in the 1996 *Contract Audit Manuals* in the following areas:

- Contractor reorganization and restructuring costs
- Allowability of gift, recreation, employee morale, and entertainment costs
- Accounting for the impairment of long-lived assets
- Internal controls for reviewing outside attorney billings
- Systemic defective pricing issues
- Allowability of costs incurred in defense of stockholder suits
- Composition, measurement, and allocation of pension costs
- Cost realism reviews
- Audits of government depots

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- Sampling of incurred cost proposals for audits at small, low-risk contractors

.32 The DCAA *Contract Audit Manual* (DCAAM 7640.1) is printed semiannually, January and July. It can be obtained by calling the Superintendent of Documents, U.S. Government Printing Office, at (202) 512-1800. The order processing code is 7679. The cost of the manual is $32.00 per year ($40.00 foreign).

.33 The DCAA also publishes a *Guide for New Government Contractors,* which includes information for those companies that have government contracts. The Guide can be obtained by writing to: the Defense Contract Audit Agency (Attention: CMO), 8725 John J. Kingman Road, Suite 2135, Fort Belvoir, VA 22060-6219.

.34 See the "Audit Issues" section of this Audit Risk Alert for a discussion of allowable and allocable costs charged to contracts.

.35 *DCAA Internal Control Assessments.* The DCAA has issued guidance to help DCAA auditors understand a contractor's internal control structure and assess control risk in the contract audit environment. The guidance is designed to enable DCAA auditors to place reliance on the contractor's internal control structure, if appropriate, and to identify areas for improvement.

.36 The DCAA has identified the following ten accounting and management systems that it believes are the most important in the contract audit environment:

1. Environment and overall accounting controls (accounting system)
2. Billing system
3. Budget and planning system
4. Compensation system
5. EDP system
6. Estimating system
7. Indirect and other direct cost system
8. Labor system
9. Material system
10. Purchasing system

.37 The new guidance uses a matrix approach—identifying control objectives, control procedures, and audit steps—for understanding and assessing control risk for each control objective within each of the ten systems.

.38 Audits of each of the ten systems are performed on a cyclical basis (for example, every year or every two years) depending on the significance of the system at a particular contractor. The assessed level of control risk for each control objective and for the overall system is documented in the DCAA's *Internal Control Audit Planning Summary (*the *Summary).* The *Summary* is also used to document the translation of control risk to the audit scope of other planned DCAA audits at the contractor. At large contractors, the DCAA updates the *Summary* annually. The *Summary* is provided to, and discussed with, contractor executives in the annual audit planning and risk assessment meetings. At those contractors audited by DCAA, the auditor may wish to consider reviewing the summaries during their assessment of the contractor's internal control structure.

.39 *Educational Institutions That Receive Federal Research Awards.* In November 1994, the CASB issued a final rule that requires educational institutions awarded negotiated contracts or subcontracts in excess of $500,000 (excluding contracts awarded for the operation of federally funded research and development centers, which already are subject to CASs) to comply with four new CASs:

1. CAS No. 501, *Consistency in Estimating, Accumulating and Reporting Costs by Educational Institutions*

2. CAS No. 502, *Consistency in Allocating Costs Incurred for the Same Purpose by Educational Institutions*
3. CAS No. 505, *Accounting for Unallowable Costs—Educational Institutions*
4. CAS No. 506, *Cost Accounting Period—Educational Institutions*

Those new standards prescribe essentially the same practices that are embodied in CASs No. 401, 402, 405, and 406. They are set forth in a new FAR Part 9905, *Cost Accounting Standards for Educational Institutions,* and are generally effective as of January 9, 1995. The Office of Management and Budget (OMB) has indicated it will amend OMB Circular A-21, *Cost Principles for Educational Institutions,* to incorporate the CAS requirements. For more information, see *Federal Register,* vol. 59, No. 215, November 8, 1994.

.40 Auditors should consider the financial statement effects of allowable and unallowable indirect costs on revenues, receivables, and income.

Legislative Developments

.41 *Federal Acquisition Streamlining Act.* The most significant legislative and regulatory changes affecting government contractors in the past year relate to the Federal Acquisition Streamlining Act of 1994 (FASA). A major goal of FASA is to create a uniform procurement system in which civilian and defense agencies are governed by the same statutes.

.42 By modifying fifteen statutes, FASA removes nearly all restrictions on acquisitions of less than $100,000 by raising the simplified acquisition threshold from $25,000 to $100,000. FASA also encourages agencies to buy more off-the-shelf products by expanding the definition of *commercial items* to include products customarily used by the general public as well as certain commercial products and services using evolving technology that may not currently be available in the commercial marketplace. Under FASA, contracting officers will be encouraged to obtain data other than cost or pricing if it can be used to establish a fair and reasonable price.

.43 FASA sets a $500,000 government-wide threshold, to be adjusted for inflation every five years, under which cost and pricing data need not be certified. Previously, that threshold was $100,000. FASA also makes all government contracts over $500,000 in which unallowable costs are charged to the government subject to penalties. Previously, only DOD contracts were subject to penalties for unallowable costs.

.44 FASA clarifies those activities and items that represent allowable and unallowable recreation, entertainment, and gift costs. In addition, agencies also are required under FASA to consider a contractor's past performance in evaluating whether that contractor should receive future contracts.

.45 FASA is effective for contracts issued on or after October 1, 1995. Additional proposed legislation, referred to as FASA-2, currently is being drafted to further clarify and streamline the process.

.46 *Allowability of Restructuring Costs.* As discussed in the "Industry and Economic Developments" section of this Audit Risk Alert, the decline in defense spending has caused many government contractors to undergo major business restructurings and to incur substantial costs in those restructurings. For example, contractors might incur costs related to relocating and retraining personnel, fixed-asset dispositions, facility closings and lease terminations, and idle facilities.

.47 In July 1993, the undersecretary of defense issued a policy that established a basis for treating restructuring costs incidental to an acquisition or merger as allowable as long as the contractor expects that, over time, those costs will result in overall reduced costs for the DOD or will preserve a critical capability that would otherwise be lost.

.48 In October 1994, the National Defense Authorization Act for Fiscal Year 1995 (the Act), which sets strict review and certification requirements for the reimbursement of restructuring costs, was signed into law. Section 818 of the Act states:

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

> The Secretary of Defense may not, under section 2324 of title 10, United States Code, pay restructuring costs associated with a business combination undertaken by a defense contractor until the Department of Defense reviews the projected costs and savings that will result for the Department from such business combination and an official of the Department of Defense at the level of Assistant-Secretary of Defense or above certifies in writing that projections of future cost savings resulting for the Department from the business combination are based on audited cost data and should result in overall reduced costs to the Department.

The requirements for such a review and certification do not apply to any business combination for which restructuring costs were paid or otherwise approved by the secretary of defense before August 15, 1994.

.49 In addition, the Act required the secretary of defense, by January 1, 1995, to prescribe regulations on the allowability of restructuring costs associated with business combinations under defense contracts. Such regulations are required to include a definition of the term *restructuring costs* and to address the issue of contract novations under such contracts.

.50 As required by the legislation, a DFARS interim regulation that addresses the reimbursement of *external* restructuring costs was issued in January 1995 (see *Federal Register*, vol. 60, No. 1747, January 5, 1995). In addition, a DFARS interim regulation related to *internal* restructuring costs and *not* mandated by the legislation also was issued in January 1995 (see *Federal Register*, vol. 60, No. 2924, January 12, 1995).

.51 The interim DFARS regulations define restructuring activities to include nonroutine, nonrecurring, or extraordinary activities associated with the reduction of facilities or workforce, or consolidation of facilities or operations, in an effort to improve future operations and reduce overall costs. For example, restructuring costs may include costs of closing or relocating facilities, disposing of assets, or eliminating jobs. Routine or ongoing activities, such as repositioning or redeployment of a contractor's productive facilities or workforce, are not considered restructuring activities for purposes of the interim regulations. External restructuring activities are those occurring after a business combination that may involve facilities or workforce from both of the previously separate companies. Internal restructuring activities are those occurring after a business combination that involve facilities or workforce from only one of the previously separate companies, or, when there has been no business combination, restructuring activities undertaken within one company.

.52 The Act and implementing regulations may have a significant effect on certain federal government contractors. Companies that have recently undergone business restructurings may be faced with significant unrecoverable costs if they fail to meet the required criteria.

.53 In March 1995, the CASB issued Interim Interpretation 95-01, *Allocation of Contracts Restructuring Costs Under Defense Contracts*, which was designed to address period cost assignment and allocability criteria for both external and internal restructuring costs incurred under certain national defense contracts. Restructuring costs may be deferred and amortized over a period not to exceed five years, or may be treated as period costs if they result in an equitable assignment of costs. The Interpretation is applicable to contractor restructuring costs paid or approved on or after August 15, 1994.

.54 As they consider the appropriateness of restructuring charges recorded by their clients, auditors should be aware of the consensus reached by the Financial Accounting Standards Board's (FASB's) Emerging Issues Task Force (EITF) in Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. That consensus provides authoritative guidance on (1) the types of costs that should be accrued, (2) the timing of recognition of restructuring charges, and (3) prescribes disclosures that should be included in financial statements. Auditors of financial statements of publicly held entities that record restructuring charges should also be aware of the Securities and Exchange Commission's (SEC's) Staff Accounting Bulletin (SAB) No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges*, which requires that restructuring charges be reported as a component of income from

continuing operations. (See "Consensus Decisions of the FASB's EITF" in the "Accounting Issues and Developments" section of this Audit Risk Alert for a discussion of other EITF Issues that should be considered when a contractor is involved in a restructuring.)

.55 In addition, differences between GAAP and the FAR that are related to the accounting treatment of certain costs, such as pension curtailments and settlements, that may be included in restructuring charges exist. Auditors should be aware of those differences and should consider the related accounting and reporting issues involved in business restructurings of government contractors.

Audit Issues

Claims, Change Orders, and Requests for Equitable Adjustment

.56 In the current economic environment, it is likely that contractors will encounter significantly more claims activity, either with the government or subcontractors. Auditors should discuss with appropriate client personnel the need for an opinion of legal counsel to support claims, Requests for Equitable Adjustment (REAs), and, if necessary, unnegotiated change orders. They also should consider the contractor's history in negotiating similar claims and REAs when evaluating the estimated net realizable value of such amounts. Auditors should refer to the criteria for recognizing claims as set forth in *Audits of Federal Government Contractors.* Auditors also should consider the adequacy of financial statement disclosure for significant claims, REAs, and unnegotiated change orders.

High-Risk Contracts

.57 Contractors occasionally experience difficulty in performing on certain contracts and may believe that the government may be responsible, to some extent, for the problems. In those instances, contractors may include the effect of claims or other adjustments that they believe will result in additional revenues from the government in their estimates at completion. Such claims and adjustments may reduce the amount of the estimated loss on such contracts or avoid a reduction in the level of profit recognized. As a result, auditors should evaluate the evidence supporting the contractor's basis for claims and adjustments, especially in contracts on which the contractor is known to have had difficulty performing. Auditors also should carefully consider the adequacy of the financial statement disclosure of significant claims and unnegotiated change orders.

Costs in Excess of Contractual Funding

.58 Many contractors, for various business reasons, will continue to perform on a contract and incur costs in excess of the government's current appropriation of funds. Auditors should carefully review such costs for recoverability and consider the potential need for an allowance against the ultimate collectibility of such costs.

Recoverability of Environmental Liability Costs

.59 Some federal government contractors have been designated by the Environmental Protection Agency as potentially responsible parties on hazardous waste sites and, as such, are subject to cleanup requirements under the Resource Conservation and Recovery Act. The cleanup costs related to hazardous waste sites often are quite substantial. Federal government contractors may seek to recover all or a portion of those cleanup costs from the federal government. In such cases, the contractors may record a receivable for the amount they expect to recover.

.60 The EITF reached a consensus in EITF Issue No. 93-5, *Accounting for Environmental Liabilities,* that the amounts of the contingent liability and any claim for recovery should be estimated and evaluated independently. In addition, any loss arising from the recognition of an environmental liability should be reduced by a potential claim for recovery only when realization of that claim is probable. In June 1993, the SEC issued SAB No. 92, *Accounting and Disclosures Relating to Loss Contingencies,* which states that "separate presentation of the gross liability and related claim for recovery in the balance sheet must fairly present the potential consequences of the

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

contingent claim on the company's resources and is required unless the company has the legal right of setoff as discussed in FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* [(AC B10)]." It also states that "registrants should ensure that notes to the financial statements include information necessary to an understanding of the material uncertainties affecting both the measurement of the liability and the realization of recoveries." See the "Accounting Issues and Developments" section of this Audit Risk Alert for a discussion of the AICPA's exposure draft proposed Statement of Position on environmental remediation liabilities.

.61 Auditors should evaluate the probability that the contractor will recover environmental costs included in the contract pricing. Auditors also should carefully consider the adequacy of the financial statement disclosure of the contingent costs and the realization of recoveries. See the "Accounting Issues and Developments" section of this Audit Risk Alert for additional information on accounting for, and disclosure of, environmental cleanup costs.

Accounting Issues and Developments

Postretirement Benefits Other Than Pensions (OPEB)

.62 FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions* (AC P40), is likely to create an OPEB cost that is greater than the expense allowed as a contract cost used to determine contract revenue. The full amount of the OPEB liability calculated in accordance with GAAP may be allowable if the contractor elected to fully fund it and used the cumulative-effect method in a prior year to adopt FASB Statement No. 106 (AC P40). A number of issues, including tax laws regarding deductibility of OPEB costs, changes in CASs, funding, negotiation of forward pricing arrangements with respect to OPEB expenses, and the timing of adoption of FASB Statement No. 106 (AC P40), may further complicate the allowability of such costs. In addition, auditors should be aware that the DCAA has taken the position that a change from the pay-as-you-go method of accounting for OPEB costs to that required by FASB Statement No. 106 (AC P40) may result in a change in cost accounting practice for contract costing purposes. Such a change would result in the disallowance of any increased costs allocated to current contracts, including cost-type contracts.

.63 On adoption of FASB Statement No. 106 (AC P40), some contractors recorded a related asset. The future recoverability of such an asset, and the timing thereof, may have a significant degree of uncertainty resulting from—

1. The current industry environment and related business-base concerns when the OPEB expense is projected to be recovered via contract costing.
2. The computations and assumptions used (including the amounts and years in which the amounts are recovered) to support the asset, which may be subjective. For example, given the current environment, questions arise of whether future contract values should include funded backlog, total contract backlog, loss contracts, contracts with small margins, or contract options.

Because of the significance of the uncertainties, auditors should carefully consider the appropriateness of recording any deferred costs (or, alternatively, accrued revenues) by contractors to account for the difference between FASB Statement No. 106 (AC P40) and CAS requirements related to OPEB costs. The staff of the SEC has indicated that it will scrutinize the realizability of such assets and look for sufficient disclosure in the registrant's Management's Discussion and Analysis regarding the uncertainties related to recovery of those assets.

Commercial Nonrecurring Costs

.64 Many federal government contractors are moving into commercial markets and using the program method of accounting for products manufactured for delivery under production-type contracts, which may result in the deferral of costs. Under this method, costs are accumulated and accounted for by programs rather than by individual units or contracts. A program consists of the estimated number of units of a product to be produced by an enterprise in a continuing, long-term production effort for delivery under existing and anticipated contracts.

Auditors should be aware that the AICPA Audit and Accounting Guide *Audits of Federal Government Contractors* states that program accounting has had very limited applications because of the significant uncertainties associated with making reasonably dependable estimates of the total number of units to be produced and sold, the length of time to produce and sell them, and the associated production costs and selling prices. Additionally, the recoverability of the deferred costs is subject to a greater degree of risk and, accordingly, becomes more difficult to estimate in the current uncertain business environment. Program accounting is further discussed in paragraphs 3.57 through 3.60 of *Audits of Federal Government Contractors*.

Discontinued Operations

.65 To qualify for discontinued operations treatment, an entity must meet all the criteria in Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). These include a formal plan to dispose of a business segment, as well as the expectation that the plan of disposal will be carried out within a one-year period. In November 1993, the SEC staff issued SAB No. 93, *Accounting and Disclosures Relating to Discontinued Operations*, which expresses certain views of the SEC staff regarding accounting and disclosures related to discontinued operations. The SAB indicates that an entity's plan of disposal would not meet the criteria in APB Opinion No. 30 (AC I13) if the method of disposal of the business segment has not been determined or if the plan of disposal requires more than one year. The SAB also discusses accounting for the abandonment of a business segment, disposal of an operation with a significant interest retained, classification and disclosure of contingencies relating to discontinued operations, and accounting for subsidiaries that an entity intends to sell.

Impairment of Long-Lived Assets

.66 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the contractor estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.

.67 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by APB Opinion No. 30 (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of carrying amount or net realizable value.

.68 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. (Earlier application is encouraged.) Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

Copyright © 1995, American Institute of Certified Public Accountants, Inc.

.69 Auditors of federal government contractors should be aware that the current industry climate of downsizing, contract cancellations, consolidations, and mergers has increased the likelihood that events or changes in circumstances that indicate that assets have been impaired may have occurred. In these instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.70 In considering a federal government contractor's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

.71 Impairment losses recognized under FASB Statement No. 121 (AC I08) for financial accounting purposes are not recognized for government contract costing. The federal government follows the provisions of CAS 409, and FAR 31.205-16, *Gains and Losses on Disposition of Depreciable Property or Capital Assets,* regarding asset valuation, depreciation, and amortization. Consequently, an impairment loss is recognized only upon disposal of the impaired asset. Until an impaired asset is disposed of, depreciation or amortization is calculated on the basis of asset value before any impairment loss that may have been recognized for financial reporting.

Consensus Decisions of the FASB's EITF

.72 The EITF frequently discusses accounting issues of interest to federal government contractors. A description of issues discussed during the year is provided here; however, readers should consult detailed minutes of EITF meetings for additional information.

.73 EITF Issue No. 95-10, *Accounting for Tax Credits Related to Dividend Payments in Accordance with FASB Statement No. 109,* addresses whether a deferred tax asset should be recognized for the tax benefits of future tax credits that will be realized when income previously taxed at the undistributed rate is subsequently distributed.

.74 EITF Issue No. 95-8, *Accounting for Contingent Consideration Paid to the Shareholders of an Acquired Enterprise in a Purchase Business Combination,* addresses what criteria should be used to determine how contingent consideration based on earnings should be accounted for.

.75 EITF Issue No. 95-4, *Revenue Recognition on Equipment Sold and Subsequently Repurchased Subject to an Operating Lease,* addresses whether a manufacturer is precluded from recognizing a sale of a product to a dealer if the customer subsequently enters into an operating lease with the manufacturer or its financial affiliate who acquires that product subject to the lease.

.76 EITF Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination,* addresses what types of direct, integration, or exit costs to accrue as liabilities in a purchase business combination and when to recognize those costs.

.77 EITF Issue No. 95-2, *Determination of What Constitutes a Firm Commitment for Foreign Currency Transactions Not Involving a Third Party,* addresses what constitutes a significant economic penalty to a consolidated entity under EITF Issue No. 91-1, *Hedging Intercompany Foreign Currency Risks.*

.78 EITF Issue No. 94-10, *Accounting by a Company for the Income Tax Effects of Transactions among or with Its Shareholders under FASB Statement No. 109,* addresses whether tax effects caused by transactions among or with shareholders should be included in the income statement or in equity in the separate financial statements of the company affected.

.79 EITF Issue No. 94-6, *Accounting for the Buyout of Compensatory Stock Options,* addresses how to determine the total amount of compensation cost recognized as expense for compensatory stock options when they are repurchased by the issuing company.

.80 Appendix D-45 contains FASB staff views on *Implementation of FASB Statement No. 121 for Assets to Be Disposed Of.*

.81 Readers should consult the minutes for the following issues to understand the effect of issuance of FASB Statement No. 121 (AC I08) on related consensuses.

- EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*
- EITF Issue No. 90-16, *Accounting for Discontinued Operations Subsequently Retained*
- EITF Issue No. 90-6, *Accounting for Certain Events Not Addressed in Issue No. 87-11 Relating to an Acquired Operating Unit to Be Sold*
- EITF Issue No. 87-11, *Allocation of Purchase Price to Assets to Be Sold*
- EITF Issue No. 84-28, *Impairment of Long-Lived Assets*

Risks and Uncertainties

.82 In December 1994, the AICPA's Accounting Standards Executive Committee issued Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. SOP 94-6 requires federal government contractors to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of their financial statements. In addition, if specified disclosure criteria are met, SOP 94-6 also requires federal government contractors to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.83 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Because of the pervasive use of estimates in determining amounts reported in the financial statements of federal government contractors, auditors of those entities should carefully consider the requirements of SOP 94-6. Examples of such estimates often found in federal government contractor financial statements include the following:

- Cost and revenue estimates
- Inventory subject to rapid technological obsolescence
- Specialized equipment subject to technological obsolescence
- Valuation allowances for deferred tax assets based on future taxable income
- Capitalized computer software costs
- Environmental remediation-related obligations
- Litigation-related obligations
- Contingent liabilities for obligations of other entities
- Amounts reported for long-term obligations, such as amounts reported for pensions and postemployment benefits
- Estimated net proceeds recoverable, the provisions for expected loss to be incurred, or both, on disposition of a business or assets
- Amounts relating to long-term contracts

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of federal government contractors in accordance with paragraph 21 of the SOP include—

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- Concentrations in the volume of business transacted with a particular customer, (for example, the federal government) supplier, lender, grantor, or contributor.
- Concentrations in revenue from particular products, services, or fund-raising events.
- Concentrations in the available sources of supply of materials, labor, or services, or of licenses or other rights used in the entity's operations.
- Concentrations in the market or geographic area in which an entity conducts its operations. For purposes of the SOP, it is always considered at least reasonably possible that operations located outside an entity's home country will be disrupted in the near term.

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied. Early application is encouraged but not required.

.84 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

AICPA Exposure Draft: Proposed SOP on Environmental Remediation Liabilities

.85 In June 1995, the AICPA issued an exposure draft of a proposed SOP, *Environmental Remediation Liabilities.* The proposed SOP provides that—

- Environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5, *Accounting for Contingencies* (AC C59), are met. (It includes benchmarks to aid in determining when those criteria are met.)
- Accruals for environmental remediation liabilities should include (1) incremental direct costs of the remediation effort, as defined, and (2) costs of compensation and benefits for employees to the extent that the employees are expected to devote time directly to the remediation effort.
- Measurement of liabilities should include (1) the entity's specific share of the liability for a specific site, and (2) the entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- Measurement of liabilities should be based on enacted laws and existing regulations, policies, and remediation technology.
- Measurement of liabilities should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed, and may be discounted to reflect the time value of money if the aggregate amount of the obligation and the amount and timing of cash payments for a site are fixed or reliably determinable.

.86 The exposure draft also includes guidance on display in the financial statements of environmental remediation liabilities and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations. A separate, nonauthoritative section of the exposure draft discusses major federal environmental pollution responsibility and clean-up laws and the need to consider various individual state and other non-U.S. government requirements.

SEC Staff Accounting Bulletin

.87 SEC SAB No. 94, *Recognition of a Gain or Loss on Early Extinguishment of Debt,* expresses SEC staff views about the period in which a gain or loss should be recognized on the early extinguishment of debt.

Information Sources

.88 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.89 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.90 Electronic bulletin board services allow users to read, retrieve (download), and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.91 Recorded announcements allow users to call and listen to announcements about a variety of recent or scheduled actions or meetings.

.92 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8140

Finance Companies Industry Developments—1995/96

Industry and Economic Developments

.01 Finance companies provide a wide variety of lending and financing services. And though not easily classified, given the diverse nature of the industry, they can be broadly defined as those companies that, at a minimum, provide such services to both consumer and commercial markets. In consumer markets, finance companies may provide mortgage loans—collateralized by the underlying property or, more commonly, the borrower's equity in the property (that is, second mortgages); direct consumer loans—usually collateralized by household goods and repayable in installments; financing for sales of consumer goods and services through retail sales contracts; and increasingly, credit card services. In commercial markets, finance companies may extend working capital and installment loans—usually collateralized by the borrower's accounts receivables or capital assets; provide funding for the acquisition of equipment through leasing arrangements or purchase trade receivables (generally referred to as factoring).

.02 Finance companies typically operate by borrowing money at wholesale and, in turn, lending those funds at retail for many of the purposes described above. Some companies involved in captive finance activities limit their lending to the financing of purchases of products manufactured by an affiliated company, while others have diversified into other related financial services. See "Industry Diversification" below for further discussion.

.03 In the current economic environment interest rates have stabilized and credit demand has been robust in both the commercial and consumer credit markets. Short-term interest rates have stopped climbing, thereby easing some of the pressure on lending margins from rising funding costs earlier in the year. As such, finance companies involved in credit card issuance, as well as commercial and consumer lending, are expected to perform well during 1995.

.04 Loan delinquencies, an important issue in the assessment of audit risk, often track overall economic conditions—rising when the economy weakens and falling as the economy strengthens. Current economic growth is strong and therefore likely to prevent any rapid ascent in problem loans. At the same time, many finance companies have improved their management of credit risks, reflecting the extensive use of comprehensive credit scoring systems. Accordingly, the expenses of carrying, writing down, and reserving for problem assets continue to decline, although at a slower pace than in the past few years.

Credit Card Services

.05 Individual credit card use has been increasing at a high double-digit rate over the past few years. One major credit card issuer announced that its outstanding credit cards worldwide climbed 23 percent in the first quarter of 1995. Industry analysts expect continued growth from this segment given the trend of credit cards to gain growing acceptance as a major medium of exchange. The trend toward a "plastic-economy" should be bolstered by credit card issuers as they extend incentives (for example, money-back offers, product guarantees, etc.) and as the base of nontraditional merchants outlets that accept credit cards (for example, movie theaters, grocery stores, supermarkets, fast-food restaurants, etc.) grows. Continued expansion is also expected of the co-branded segment of the credit card industry.

.06 Some finance companies involved in credit card issuance have expanded their customer base by issuing co-branded credit cards. These cards, which have become increasingly popular in recent years, typically carry the name of a merchant outlet (for example, a department store or retail chain) and may also include the issuer's

name. Auditors may wish to consider whether revenue sharing or fee allocation arrangements arise from co-branded credit cards, and if so, whether or not they have any audit or accounting implications. If such contractual obligations exist, auditors should consider the propriety of the accounting treatment used. Issues discussed by The Financial Accounting Standards Board's (FASB's) Emerging Issues Task Force (EITF) relating to credit card services include:

- EITF Issue No. 88-20, *Difference between Initial Investment and Principal Amount of Loans in a Purchased Credit Card Portfolio*
- EITF Issue No. 88-22, *Securitization of Credit Card and Other Receivable Portfolios*
- EITF Issue No. 90-18, *Effect of a "Removal of Accounts" Provision on the Accounting for a Credit Card Securitization*
- EITF Issue No. 92-5, *Amortization Period for Net Deferred Credit Card Origination Costs*
- EITF Issue No. 93-1, *Accounting for Individual Credit Card Acquisitions*

Mortgage Related Services

.07 Last year's earnings for underwriters of residential mortgages were crippled by the Federal Reserve's tough stance against inflation. In the aftermath of successive interest rate increases, mortgage volume collapsed leaving behind an industry deluged with overcapacity. This is no longer the case given the significant increase in credit demand during 1995.

.08 Industry-wide shipments of manufactured homes are expected to increase by approximately 10 percent during 1995, reflecting the growing popularity of such homes as a lower-cost alternative to traditional site built homes. Finance companies involved in funding the purchase of manufactured homes should expect increased growth in this market segment.

.09 Home improvement lending continues to be a source of significant revenue growth for finance companies. This segment of the industry will extend loans amounting to approximately $45 billion in the current year. Many home improvement loans involving major renovations are taken in the form of home equity lines of credit (that is, second mortgages). In assessing the adequacy of the related loan loss allowance, auditors should consider that in the event of default, such loans, although collateralized by the underlying property, are usually subordinate to the claims of other lenders.

Industry Diversification

.10 An industry-wide trend toward diversification is growing as many finance companies broaden their product lines in order to take advantage of new opportunities as well as to offset the risk of economic downturns in other, more traditional lending areas. This activity is likely to fuel business combinations as well-capitalized firms make acquisitions aimed at broadening their product lines and geographic markets. In these circumstances, auditors should consider whether management has appropriately accounted for transactions related to such combinations. Other audit implications of acquisitions, along with other forms of business combinations, are discussed in "Restructuring Charges" under the "Accounting Issues and Developments" section of this Audit Risk Alert (also see EITF Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination*). Additionally, as finance companies embark upon diversification, consideration should be given to whether the auditor has adequate knowledge of matters relating to the entity's new line of business and the industry in which it operates. Some of the areas into which finance companies have expanded, or have an increased presence, are discussed below.

.11 *Refund Anticipation Loan (RAL) Program.* Some finance companies have expanded into the RAL program whereby taxpayers, expecting refunds on their federal income tax returns, forego a portion of the proceeds in order

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

to receive the funds immediately. In substance, the taxpayer has been extended a loan by a finance company with the reduction in total proceeds they receive representing an interest charge. The growth of this service has been significant given minimal collectibility problems along with interest rates that run as high as 20 percent. At the initiation of this program, the Internal Revenue Service (IRS), with the authorization of the filer, would remit the tax refund directly to the finance company. However, the IRS has changed this policy and instead sends the refund to the filer, who is then responsible for repaying the loan extended by the finance company. The initial effects of this change have caused an increase in collectibility problems and loan defaults. The IRS is making efforts to resolve these problems, however, the nature of their solution is uncertain. Auditors of finance entities participating in the RAL program should be alert to the collectibility problems inherent in refund anticipation loans and carefully consider the adequacy of the related loan loss allowance.

.12 *Insurance services.* Finance companies have become more involved in offering life, accident, health and property policies written for borrowers for the purpose of paying off their remaining loan balances, continuing their loan payments or protecting the value of loan collateral. Finance companies may provide these policies through insurance subsidiaries or, more commonly, by acting as insurance brokers. Auditors of finance companies involved in insurance activities should consider whether management has appropriately accounted for transactions related to these activities pursuant to the guidance set forth under relevant pronouncements such as: FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises* (AC In6), FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments* (AC In6), and FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts* (AC In6). The Audit Risk Alert *Insurance Industry Developments—1995/96* [AAM section 8040] contains information that may be relevant to auditors of the financial statements of finance companies with significant involvement in insurance related financial services.

.13 *Additional services.* Finance companies whose core business is commercial and consumer lending are seeking to broaden their product mix by expanding into revolving credit and home equity lending, thus providing cross-selling opportunities to existing customers. Additionally, for those finance companies providing residential mortgages, the acquisition of mortgage servicing entities, which are typically counter-cyclical to mortgage lending (income generated from loan servicing becomes more reliable in a rising rate environment when prepayment risk typically declines), has become more prominent. Some finance companies are also diversifying their lending mix to consumer and commercial applications, such as financing pianos, boats, motorcycles, tractor trailers and the like.

.14 In general, auditors should be alert to the audit and accounting implications of diversification by their finance clients as they enter into areas that are new or not directly related to the client's existing business. For example, auditors may wish to consider the effects of the development of new product lines or the expansion of existing services, through internal or external means on the entity's:

- existing internal control structure along with the corresponding effect on the auditor's assessment of control risk.
- ability to implement industry specific accounting pronouncements previously inapplicable to the financial services offered as well as other accounting practices common to the industry.
- obligation to comply with regulatory guidelines (for example, state banking or insurance agencies) with which the entity may be unfamiliar. The auditor may wish to consider whether the client has sufficient expertise in this area, and, if not, the impact on the accounting and reporting function.
- financing requirements of diversification, and its impact, if any, on the entity's solvency, along with the possible existence of any restrictive loan covenants. Since finance companies borrow funds to lend to others and thus have debt-to-equity ratios that are generally higher than many other industries, debt incurred to finance diversification may have a significant impact on audit risk.

- modification of credit or documentation standards to accommodate new products. Such actions may increase the audit risk associated with loan loss estimates.

Auditors may also wish to consider whether the entity's diversification will involve the application of auditing standards previously inapplicable to the audit of that entity's financial statements. For example, a finance company that ventures into insurance related areas may require auditors to consider using the work of a specialist, such as an actuary.

Competitive Environment

.15 AICPA Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), requires that, in planning their audits, auditors consider matters relating to the entity's business and the industry in which it operates. One such matter for finance companies is the fierce competitive environment in which the industry operates.

.16 For example, the credit card segment of the industry is highly competitive and has become an increasingly saturated market. Many issuers must offer incentives on their cards in order to attract new customers. Low teaser-rates, no annual fees, balance-transfer options, and rebates are often needed to attract borrowers, as too are frequent mailings and promotions, all of which may add significant costs to customer acquisitions. Auditors should consider whether such incentives have been appropriately accounted for. Further, profit margins have come under pressure due to intense pricing by some card issuers in their attempts to gain market share. However, industry-wide growth in receivables has, thus far, been sufficient to offset the shortfall for a number of finance companies offering credit card services. Auditors should note that low teaser-rates are introductory offers that typically expire after several months and then return to their much higher market levels. Auditors may wish to consider the effects such increases could have on the borrowers' ability to repay.

.17 In mortgage banking, even the largest residential mortgage lenders and servicers must contend with pricing competition from lenders willing to write unprofitable loans in order to increase market share. Despite being burdened by severe credit quality problems during the last market downturn, some finance companies have chosen to combat the competitive pressures by sacrificing asset quality to achieve desired levels of volume. Some finance companies may relax lending policies in order to maintain, if not gain, market share. Significant industry-wide credit quality problems have yet to emerge, however, auditors may wish to consider the effects of a finance entity's increase in loan volume on such issues as liquidity, loan receivable collectibility as well as the adequacy of the related loan loss allowance. Additionally, some finance companies may sell securities or loans to generate cash with which to fund higher volume. Auditors should consider the effects of such transactions on management's intent for, classification of, and valuation of securities and loans for financial reporting purposes. Auditors should also be alert to the effects of sales with recourse on credit risk and recognition of gains and losses and the appropriateness of the accounting for the securitization and/or sale of loans or securities.

.18 Industry observers believe that over the coming years growth for finance companies is likely to slow due to the increasing level of competition. Revenue growth has tapered off dramatically for many banks and it is likely that they will attempt to regain lost market share by adding new product lines, or expand existing services, that will compete with services provided by finance companies. Auditors should consider the effects of the competitive nature of the industry on their finance company clients.

Audit Issues and Developments

Asset Quality and Valuation Issues

.19 Auditors of the financial statements of finance companies, especially those adopting new or more aggressive lending strategies, should give special attention to credit quality issues surrounding the loans extended by these entities. Auditors also should give special attention to other asset quality issues related to areas such as real estate, troubled debt restructurings, foreclosed assets and other real estate owned; off-balance-sheet financial

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

instruments, and other assets. Auditors should obtain sufficient competent evidence to evaluate the adequacy of management's loan loss allowance and liabilities for other credit exposures. The subjectivity of determining such amounts reinforces the need for careful planning and execution of audit procedures in this area, as well as evaluation of results of those procedures.

.20 Lack of an effective system to evaluate credit exposure and other sources of impairment, or the failure of a finance company to document adequately its criteria and methods for determining loan loss allowances, may suggest a reportable condition or a material weakness in the finance company's internal control structure over financial reporting. These deficiencies generally would—

1. increase the degree of judgment auditors and regulatory examiners must apply in evaluating the adequacy of management's related allowances and liabilities, and

2. increase the likelihood that differences in judgments will result.

The guidance in SAS No. 57, *Auditing Accounting Estimates* (AU section 342), is useful when considering this area. The AICPA Auditing Procedure Study *Auditing the Allowance for Credit Losses of Banks* (Product No. 021050) may provide relevant information on auditing estimated credit losses.

.21 Auditors also should be alert to valuation issues related to classification and impairment of securities and other finance company investments. Paragraph 16 of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80.115), requires that, for individual securities classified either as available-for-sale or held-to-maturity (as defined), a finance company determines whether a decline in fair value below the amortized cost basis is other than temporary.

.22 Regarding the appropriateness of a finance company's classification of securities, paragraph 69 of FASB Statement No. 115 (AC I80) says that "if the sale of a held-to-maturity security occurs without justification, the materiality of that contradiction of the enterprise's previously asserted intent must be evaluated."

.23 Other factors that may affect audit risk include a finance company's exposure to interest-rate, liquidity, prepayment, and related risks. For example, finance companies heavily invested in fixed-rate assets (or variable-rate assets subject to caps on interest-rate increases) may face narrower spreads in a rising-rate environment. Auditors may wish to consider the effects that interest-rate increases could have on borrowers' ability to repay loans and the effects interest-rate decreases could have on the realization of assets that are sensitive to prepayments (such as mortgage servicing rights and interest-only securities).

Noncompliance With Regulatory Requirements

.24 Events of noncompliance with regulatory requirements by finance companies involved in providing services that are subject to state or federal oversight (for example, participation in impermissible activities or investments), expose finance companies to regulatory action, such as the forced disposition of those impermissible investments. Events of noncompliance may be brought to the auditor's attention during the application of normal auditing procedures, during the review of regulatory examination reports, or because of actions required by regulators.

.25 SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), provides that "the auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited." Events of noncompliance with laws and regulations or the need to dispose of substantial assets are conditions, when considered with other factors, that could indicate substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. SAS No. 59 (AU section 341) identifies examples of other factors that the auditor may evaluate.

Elimination of Uncertainty Reporting

.26 The Auditing Standards Board (ASB) has issued an exposure draft of a proposed SAS, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements, that would eliminate the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report.

.27 The amendment also would expand the guidance in paragraph 37 of SAS No. 58, *Reports on Audited Financial Statements* (AU section 508.37), to indicate that "unusually important risks or uncertainties associated with contingencies, significant estimates, or concentrations" are matters that auditors may wish to emphasize in their reports. The amendment retains the option allowing auditors to disclaim an opinion on financial statements due to uncertainties.

.28 The proposal does not affect the provisions of SAS No. 59 (AU section 341), which requires that the auditor add an explanatory paragraph to the auditor's report when there is substantial doubt about the entity's ability to continue as a going concern.

.29 Currently, auditors of the financial statements of finance companies may consider it necessary to add an uncertainty explanatory paragraph to their reports when there is a material uncertainty relating to possible regulatory sanctions as discussed above. If the proposed SAS is issued in final form, that requirement will be eliminated. Nonetheless, auditors reporting on financial statements that include such an uncertainty may wish to emphasize that fact by adding an emphasis-of-a-matter paragraph to their reports. Such paragraphs, however, are optional and are added solely at the auditor's discretion.

.30 The ASB hopes to finalize this SAS late this year and to issue an SAS that would be effective for reports issued on or after June 30, 1996. Comments on the proposed SAS were due on October 20, 1995.

Mortgage Banking Engagements

.31 In May 1995, the Mortgage Bankers Association of America (MBA) released its revised *Uniform Single Attestation Program for Mortgage Bankers* (USAP). The USAP supersedes the MBA's existing program (published in 1983) with an opinion-level attestation engagement performed following AICPA Statement on Standards for Attestation Engagements (SSAE) No. 3, *Compliance Attestation* (AT section 500). Specifically, the MBA redefined the engagement to address mortgage servicing companies' compliance with the USAP's specified minimum servicing standards. The USAP will be effective for fiscal years ending on or after December 15, 1995, and later, with earlier application encouraged.

.32 In a September 27, 1995 letter to its members, the MBA said that commercial and multifamily loan servicers could report using the USAP, except that minimum standards V.4 and VI.1 could be omitted from management's assertion and the auditor's attestation reports. In the letter, the MBA described a project under way to consider amending or expanding the USAP to explicitly address reporting by commercial and multifamily loan servicers.

.33 The USAP addresses reporting on management assertions about an entity's compliance with specified criteria. SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324), provides guidance on factors auditors should consider when auditing the financial statements of entities that use service organizations (such as mortgage bankers that service mortgages for others). Information about the control structure policies and procedures at mortgage bankers or other loan servicing organizations may affect assertions in the user entity's financial statements. Also, some service auditors' reports prepared according to SAS No. 70 (AU section 324) include descriptions and results of tests of operating effectiveness of specified control policies and procedures. Accordingly, those SAS No. 70 (AU section 324) reports may enable an auditor of the financial statements of a user entity to assess control risk below the maximum of relevant financial statement assertions.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Readers should consult SAS No. 70 (AU section 324) for additional information on how to use a service auditor's report when auditing the financial statements of a user organization.

.34 The Federal Home Loan Mortgage Corporation (Freddie Mac) sent a September 29, 1995 letter to chief financial officers of its seller/servicers announcing that, effective immediately, Freddie Mac no longer requires an independent accountant's agreed-upon procedures attestation report on compliance with requirements of Freddie Mac's programs. The report previously was required by Freddie Mac's 1993 *Compliance Reporting Guide*. Readers should be alert to a Freddie Mac bulletin that will be issued explaining the change and clarifying Freddie Mac's other independent audit requirements.

SAS No. 70 Auditing Procedure Study

.35 A task force of the ASB has drafted an auditing procedure study that provides guidance to auditors on implementing SAS No. 70 (AU section 324). The study provides guidance to a service auditor engaged to issue a report on the control structure policies and procedures of a service organization and to user auditors engaged to audit the financial statements of an entity that uses a service organization. An example of a service organization is a bank trust department that invests and holds assets for employee benefit plans. The task force expects to issue the study in early 1996.

Agreed-Upon Procedures Engagements

.36 In September 1995, the ASB issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which supersedes SAS No. 35, *Special Reports—Applying Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement*. The ASB also issued SSAE No. 4, *Agreed-Upon Procedures Engagements* (AT section 600), which, among other things, in amending agreed-upon procedure reports prepared in accordance with SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600):

- Prohibits negative assurance about whether management's assertion is fairly stated from being included in reports on agreed-upon procedures.
- Clarifies that SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AU section 322), does not apply to agreed-upon procedures engagements.
- States that the concept of materiality does not apply to agreed-upon procedures engagements unless the definition of materiality is agreed to by the specified users.

SSAE No. 4 (AT section 600) also requires a written management assertion as a condition of engagement performance. SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600) are effective for reports dated after April 30, 1996, with earlier application encouraged.

Accounting Issues and Developments

Mortgage Servicing Rights

.37 FASB Statement No. 122, *Accounting for Mortgage Servicing Rights* (AC Mo4), amends FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), to require that finance companies involved in mortgage banking activities recognize as separate assets rights to service mortgage loans for others, however those servicing rights are acquired. Finance companies involved in mortgage banking activities may acquire mortgage servicing rights through either the purchase or origination of mortgage loans. A finance company that acquires mortgage servicing rights through the origination of mortgage loans and sells or securitizes those loans with servicing rights retained is required by FASB Statement No. 122 (AC Mo4) to allocate the total cost of the mortgage loans to the mortgage servicing rights and the loans (without the mortgage servicing rights) based on their relative fair values if it is practicable to estimate those fair values. If it is not practicable to estimate the fair

values of the mortgage servicing rights and the mortgage loans (without the mortgage servicing rights), the Statement (AC Mo4) requires that the entire cost of purchasing or originating the loans should be allocated to the mortgage loans (without the mortgage servicing rights) and no cost should be allocated to the mortgage servicing rights.

.38 FASB Statement No. 122 (AC Mo4) requires that a finance company involved in mortgage banking activities assess its capitalized mortgage servicing rights for impairment based on the fair value of those rights. The Statement (AC Mo4) requires that a finance company should stratify its mortgage servicing rights that are capitalized after the adoption of the Statement (AC Mo4) based on one or more of the predominant risk characteristics of the underlying loans. The Statement (AC Mo4) requires that impairment should be recognized through a valuation allowance for each impaired stratum.

.39 FASB Statement No. 122 (AC Mo4) applies prospectively in fiscal years beginning after December 15, 1995, to transactions in which a finance company sells or securitizes mortgage loans with servicing rights retained and to impairment evaluations of all amounts capitalized as mortgage servicing rights, with earlier application encouraged. The Statement (AC Mo4) prohibits retroactive capitalization of mortgage servicing rights retained in transactions in which a finance company originates mortgage loans and sells or securitizes those loans before the adoption.

.40 In July 1995, the FASB staff announced that the Board agreed to clarify the transition provisions of FASB Statement No. 122 (AC Mo4), noting in FASB's Action Alert No. 95-21 that:

> ...earlier application is encouraged as of the beginning of a fiscal year for which annual financial statements or annual financial information has not been issued or as of the beginning of an interim period within that fiscal year for which interim financial statements or interim financial information has not been issued. For example, Public Company X issued financial information for the first quarter. In the second quarter, management of Public Company X has two choices for early adoption: (1) adopt as of the beginning of the fiscal year because annual financial statements or annual financial information has not been issued for that fiscal year or (2) adopt as of the beginning of the second quarter because interim financial statements or interim financial information has not been issued for that quarter.

Impairment of Long-Lived Assets

.41 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the finance company estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.

.42 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and*

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Transactions (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.43 Paragraph 16 of FASB Statement No. 121 (AC I08.135) states that assets to be disposed of that are within the scope of that Statement (AC I08), such as other real estate owned, should "not be depreciated (amortized) while they are held for disposal."

.44 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. (Earlier application is encouraged.) Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.45 Auditors of finance companies should be aware that the current industry climate of diversification has increased the likelihood that events or changes in circumstances that indicate that assets have been impaired may have occurred. For example, diversification by way of acquisition may result in duplication of branch office locations within certain geographic areas that would compete for business. In these instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.46 In considering a finance company's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57 (AU section 342).

Disclosures About Derivatives

.47 In October 1994, the FASB issued Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25). FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments—futures, forward, swap, and option contracts, and other financial instruments with similar characteristics.

.48 The Statement (AC F25) also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), and FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25). The Statement (AC F25) requires disclosures about amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. Paragraph 12 of FASB Statement No. 119 (AC F25.115P) encourages, but does not require, entities to disclose quantitative information about risks associated with derivatives.

.49 FASB Statement No. 119 (AC F25) was effective for financial statements issued for fiscal years ending after December 15, 1994, except for organizations with less than $150 million in total assets. For those organizations the Statement (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1995.

.50 The FASB Special Report *Illustrations of Financial Instrument Disclosures* contains illustrations of the application of FASB Statements No. 105 (AC F25), No. 107 (AC F25), and No. 119 (AC F25).

Income Recognition on Impaired Loans

.51 In October 1994, the FASB issued Statement No. 118, *Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures* (AC I08), which amends FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan* (AC I08), to allow creditors to use existing methods for recognizing interest income on impaired loans. To accomplish that, it eliminates the provisions in FASB Statement No. 114 (AC I08) that describe how creditors should report income on impaired loans.

.52 FASB Statement No. 118 (AC I08) does not change the provisions in FASB Statement No. 114 (AC I08) that require creditors to measure impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the observable market price of the loan or the fair value of the collateral if the loan is collateral-dependent.

.53 FASB Statement No. 118 (AC I08) also amends the disclosure requirements in FASB Statement No. 114 (AC I08) to require disclosure of information about the recorded investment in certain impaired loans and about how creditors recognize interest income related to those loans.

.54 FASB Statement No. 118 (AC I08) is effective concurrent with the effective date of FASB Statement No. 114 (AC I08), that is, for financial statements for fiscal years beginning after December 15, 1994.

Impairment of a Loan

.55 In May 1993, FASB Statement No. 114 (AC I08) was issued to address the accounting by creditors for impairment of certain loans. A loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. The Statement (AC I08) is applicable to all creditors and to all loans, uncollateralized as well as collateralized, except large groups of smaller balance homogeneous loans that are collectively valued for impairment (for example, credit-card, residential mortgage, and consumer installment loans), loans that are measured at fair value or at the lower of cost or fair value, leases, and debt securities as defined in FASB Statement No. 115 (AC I80). It applies to all loans that are restructured in a troubled debt restructuring involving a modification of terms, including groups of smaller balance homogeneous loans that may otherwise have been excluded from the scope of the Statement (AC I80).

.56 FASB Statement No. 114 (AC I08) requires that impaired loans that are within its scope be measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of collateral if the loan is collateral-dependent. The impairment is recognized by creating or adjusting a valuation allowance for the impaired loan with a corresponding charge to bad debt expense.

.57 The Statement (AC I08) amends FASB Statement No. 5, *Accounting for Contingencies* (AC C59), to clarify that a creditor should evaluate the collectibility of both the contractual interest and contractual principal of all receivables in assessing the need for a loss accrual. The Statement (AC I08) also amends FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings* (AC D22), to require a creditor to measure all loans that are restructured in a troubled debt restructuring involving a modification of terms in accordance with its provisions.

.58 The Statement (AC I08) applies to financial statements for fiscal years beginning after December 15, 1994. Earlier application is encouraged.

Offsetting

.59 APB Opinion No. 10, *Omnibus Opinion—1966*, paragraph 7 (AC B10.101-103), says that "it is a general principle of accounting that the offsetting of assets and liabilities in the balance sheet is improper except where a

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

right of setoff exists." FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10), defines *right of setoff* and specifies what conditions must be met to permit offsetting. FASB Interpretation No. 41, *Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements* (AC B10), modifies FASB Interpretation No. 39 (AC B10), to permit offsetting in the statement of financial position of payables and receivables that represent repurchase agreements and reverse repurchase agreements and that meet all of the conditions specified in FASB Interpretation No. 41 (AC B10). FASB Interpretation No. 41 (AC B10) was effective for financial statements issued for periods ending after December 15, 1994.

Consensus Decisions of the FASB's EITF

.60 The EITF frequently discusses accounting issues involving financial instruments, real estate, or transactions of similar importance to finance companies. A description of issues discussed during the year follows; readers should consult detailed minutes for additional information.

- EITF Issue No. 95-5, *Determination of What Risks and Rewards, If Any, Can Be Retained and Whether Any Unresolved Contingencies May Exist in a Sale of Mortgage Loan Servicing Rights,* addresses certain issues related to sales of mortgage loan servicing rights.
- EITF Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination,* addresses what types of direct, integration, or exit costs to accrue as liabilities in a purchase business combination and when to recognize those costs.
- EITF Issue No. 95-2, *Determination of What Constitutes a Firm Commitment for Foreign Currency Transactions Not Involving a Third Party,* addresses what constitutes a significant economic penalty to a consolidated entity under EITF Issue No. 91-1, *Hedging Intercompany Foreign Currency Risks.*
- EITF Issue No. 94-9, *Determining a Normal Servicing Fee Rate for the Sale of an SBA Loan,* discusses how, when applying EITF Issue No. 88-11, *Allocation of Recorded Investment When a Loan or Part of a Loan Is Sold,* addresses how an enterprise should determine a normal servicing fee rate for United States Small Business Administration loans without a major secondary market maker. A secondary issue is how to account for a change in the normal servicing fee rate.
- EITF Issue No. 94-5, *Determination of What Constitutes All Risks and Rewards and No Significant Unresolved Contingencies in a Sale of Mortgage Loan Servicing Rights under Issue No. 89-5,* involves issues associated with sales recognition on a transfer of mortgage servicing rights.

.61 Appendix D to the *EITF Abstracts* contains EITF discussions of technical matters that have long-term relevance and do not relate specifically to a numbered EITF Issue. Readers should be alert to the following topics of recent discussion:

- Appendix D-45, *Implementation of FASB Statement No. 121 for Assets to Be Disposed Of,* contains FASB staff views on issues relating to implementation of FASB Statement No. 121 (AC I08).
- Appendix D-44, *Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value,* contains a FASB staff announcement concerning implementation of FASB Statement No. 115 (AC I80).
- Appendix D-43, *Assurance That a Right of Setoff is Enforceable in a Bankruptcy under FASB Interpretation No. 39,* contains FASB staff views on that subject.

.62 Readers should consult the minutes for the following issues to understand the effect of issuance of FASB Statement No. 122 (AC Mo4) on related consensuses.

- EITF Issue No. 88-11, *Allocation of Recorded Investment When a Loan or Part of a Loan Is Sold*
- EITF Issue No. 86-39, *Gains from the Sale of Mortgage Loans with Servicing Rights Retained*

- EITF Issue No. 86-38, *Implications of Mortgage Prepayments on Amortization of Servicing Rights*

.63 Readers should consult the minutes for the following issues to understand the effect of issuance of FASB Statement No. 121 (AC I08) on related consensuses.

- EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*
- EITF Issue No. 90-16, *Accounting for Discontinued Operations Subsequently Retained*
- EITF Issue No. 90-6, *Accounting for Certain Events Not Addressed in Issue No. 87-11 Relating to an Acquired Operating Unit to Be Sold*
- EITF Issue No. 87-11, *Allocation of Purchase Price to Assets to Be Sold*
- EITF Issue No. 84-28, *Impairment of Long-Lived Assets*

Risks and Uncertainties

.64 In December 1994, the AICPA's Accounting Standards Executive Committee issued Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* SOP 94-6 requires that finance companies include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires financial statement disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.65 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Besides valuation allowances for business and real estate loans, examples of similar estimates that may be included in financial statements of finance companies include, but are not limited to, the following:

- Impairment of long-lived assets, for example, marginal branch offices.
- Estimates involving assumed prepayments, for example, discounts or premiums on financial assets (such as securities or loans), mortgage servicing rights and excess servicing receivables, and mortgage-related derivatives.
- Lives of goodwill and identifiable intangible assets.

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of finance companies in accordance with paragraph 21 of the SOP include the following:

- Sale of a substantial portion of or all receivables or loan products to a single customer.
- Concentration of sales of loans to a third party.
- Concentration of revenue from mortgage banking activities.

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.66 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Restructuring Charges

.67 Entities offering financial services have seen an increased rate of mergers and acquisitions given the current industry trend toward diversification. These entities may be seeking access to new markets through acquisition or concentrating on their core business by divesting themselves of unrelated divisions. Greater cost efficiencies and economies of scale are being sought through such vertical and horizontal integrations. Restructuring often accompanies these activities as redundant functions are eliminated and existing areas streamlined. When finance companies implement restructuring programs, auditors should consider the impact of reductions in personnel on operations and on the entity's and internal control structure, the appropriateness and completeness of recorded liabilities relating to current restructuring plans, and the appropriate period for reporting the costs associated with restructurings.

.68 In considering restructuring liabilities and costs, auditors should be aware of EITF Issue No. 94-3 that provides authoritative guidance on the appropriate accounting for restructurings. EITF Issue No. 94-3 also provides guidance on (1) the types of costs that should be accrued, (2) the timing of recognition of restructuring charges, and (3) prescribing disclosures that should be included in the financial statements.

.69 For publicly held entities, Securities and Exchange Commission Staff Accounting Bulletin No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges*, requires that restructuring charges be reported as a component of income from continuing operations.

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.70 The AICPA Audit and Accounting Guide *Audits of Finance Companies* is available through the AICPA's loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the guides as they appear in the service are printed annually.

Information Sources

.71 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.72 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.73 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.74 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.75 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8150

Investment Companies Industry Developments—1996/97

Industry and Economic Developments

.01 Investment companies continued their record growth during the first five months of 1996, led by mutual funds which averaged monthly cash inflows of more than $24 billion dollars. By historical standards, these inflows are enormous. Through the first half of 1996, investors put more money into mutual funds than they had in all of 1995 ($138.3 billion through June 1996 as opposed to $128.2 billion in 1995). As a result, total net assets in all types of mutual funds increased to $3.2 trillion by midyear, compared with $2.5 trillion in June 1995. Total net assets of stock funds increased to $1.5 trillion; bond and income fund assets increased to $830 billion; taxable money market fund assets decreased to $686 billion; and tax-exempt money market fund assets decreased to $132 billion.

.02 This pattern of growth, however, could not be sustained beyond May. Beginning in June, cash inflows into mutual funds dropped to $14.5 billion, a 38 percent decline from the previous month. The decline continued in July when the amount of cash invested in stock mutual funds dropped to $3.5 billion, its lowest level since November 1994. For some investment companies, the reduction in cash inflows was accompanied by a significant increase in fund redemptions. For example, within the span of one week during July, $112 million flowed out of emerging growth stock funds; $98 million was withdrawn from small stock technology funds; and $25 million was redeemed from aggressive small stock funds—the largest weekly outflows since January 1992. By August, stock mutual funds, following a market recovery, rebounded with inflows of approximately $17 billion, a significant increase over July but below both the 1996 monthly average and the January high of almost $30 billion. Bond mutual funds, which had outflows of more than $1 billion in July, continued their poor showing with inflows of only $1.7 million in August.

.03 In periods of sharply rising investor redemptions, auditors should be alert to the liquidity problems that may develop. Some investment companies have sought outside financing to satisfy redemption demands. Numerous investment companies have established contingent funding through financing arrangements such as lines of credit (by one newspaper account, a major bank reported a 50 percent increase in financing extended to mutual funds so far this year). In these circumstances, auditors should consider whether such financing arrangements have been properly disclosed in the notes to the financial statements. Auditors also should consider whether these loan agreements include restrictive covenants that raise reporting and disclosure issues.

.04 As an alternative means of financing redemption demands, some investment companies, with approval from the Securities and Exchange Commission (SEC), may lend money from one fund to another. In an approach that is generally considered more expedient and less expensive than other forms of financing, an investment company's equity fund might, for example, borrow cash from a bond fund affiliate on a temporary basis. Auditors should evaluate interfund loans such as these pursuant to auditing and accounting guidance on related-party transactions. The "Auditing Issues and Developments" section of this Audit Risk Alert gives further consideration to the issue of related-party transactions.

.05 For some investment companies, the sudden increase in outflows came on the heels of significant losses incurred due to sharp declines in market values during the summer months. Market value losses from equity holdings totaled more than $66 billion in the first two weeks of July. If such a trend continues beyond an investment company's year end, auditors may wish to consider whether subsequent events disclosure is

warranted. For example, although declines in the market value of security portfolios and the corresponding change in the net assets and net asset value per share are risks inherent to mutual fund investments, they have, in some instances, been accompanied by investor withdrawals that resulted in a significant decline in the value of an investment company's assets. If a sale of a substantial amount of securities is necessary to generate sufficient amounts of cash to satisfy investor withdrawals, disclosure may be warranted. In such circumstances, auditors should consider the guidance set forth in AICPA Statement on Auditing Standards (SAS) No.1, section 560, *Subsequent Events* (AU section 560).

.06 Sharp declines in market value, decreases in cash inflows, along with increases in investor redemptions, may cause portfolio managers to adopt more aggressive trading strategies (within the parameters of shareholder-approved investment objectives) as they attempt to improve shareholder returns, retain current investors, and attract new investors. Such strategies might include the use of derivatives—innovative financial instruments that often are very complex and involve a substantial risk of loss—as risk management tools, or as speculative investment vehicles. An investment company's use of derivatives may increase audit risk. As such, it is essential that auditors understand both the economics of derivatives used by the investment companies whose financial statements they audit and the nature and business purpose of their derivative activities. To the extent that derivatives qualify as financial instruments, as defined by Financial Accounting Standards Board (FASB) Statements of Financial Accounting Standards Nos. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), and 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), the disclosure requirements set forth in these pronouncements must be met. The AICPA publication, *Derivatives—Current Accounting and Auditing Literature*, summarizes current authoritative accounting and auditing guidance and provides background information on basic derivatives contracts, risks, and other general considerations. The FASB has issued an exposure draft of a proposed Statement of Financial Accounting Standards, *Accounting for Derivative and Similar Financial Instruments and for Hedging Activities.*

.07 Additionally, auditors should consider the impact of the current industry environment that has fluctuated between significant growth, rising redemptions and sudden, sharp declines in the market value of investments on an investment company's internal controls. These circumstances could place burdens on internal controls that may affect an auditor's assessment of control risk.

Regulatory and Legislative Developments

Securities Regulation Bill

.08 Congress has undertaken an effort to reduce the role of state regulators in the review of mutual funds and stock sales, and to modernize mutual fund regulation. Legislation already passed by both Houses of Congress would create a national system of securities regulation. Federal rather than state regulations would govern mutual fund offerings and sales documents, sales of securities to professional investors, and securities of companies with more than $10 million in assets. If adopted, this bill will eliminate the burdens of duplicate regulations on investment companies. It would also codify previous exemptive orders which would provide a statutory exemption for certain types of mutual funds that offer new funds that invest only in the shares of other mutual funds, and exempt some investment companies from Federal law. As of this writing, the legislation passed by both Houses of Congress was to be reconciled in a House-Senate conference. The bill is likely to become law this year given its bipartisan nature along with the more than two-third's support needed to override a possible presidential veto. Auditors should be alert to the passage of this legislation to determine the effect, if any, on their audits of investment companies.

IRS Audits of Investment Companies

.09 The Internal Revenue Service (IRS) has conducted examinations of investment advisor firms of mutual funds with some regularity, however, mutual funds themselves have rarely been examined. To rem-

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

edy this shortcoming, the IRS has announced its intent to undertake an initiative to audit the tax returns of investment companies. The objectives of the IRS initiative are expected to include the identification of unreported income, the scrutiny of transactions with affiliates such as investment advisor firms, and the verification of Form 1099 information (focusing on the proper classification of ordinary income versus capital gain). If a revenue agent's examination is in process, and it concerns issues relevant to the financial statements for periods under audit, the auditor should consider the implications of any issues set forth therein. Adjustments resulting from the examination should be evaluated for their accounting and disclosure impact. If any assessments for tax deficiencies and related interest expense have been levied, consideration should be given to whether they have been properly reflected in the financial statements.

.10 Investment companies registered under the Investment Company Act of 1940 may elect to qualify for special Federal income tax treatment as regulated investment companies (RICs) under the Internal Revenue Code (IRC). Qualification as an RIC permits the investment company to avoid Federal and most state taxes on the investment income and capital gains it earns and distributes to its shareholders. Thus, an investment company distributing all of its income to its shareholders would have no taxable income and, therefore, would incur no tax liability. If an investment company fails to qualify as an RIC, it will be taxed as a corporation. Accordingly, when addressing the area of accounting for income taxes, auditors should consider whether the investment company has maintained its exempt status as an RIC.

.11 Tax regulations imposed upon investment companies are complex and varied. Auditors should consider an investment company's compliance with tax regulations that have a direct and material effect on the determination of financial statement amounts pursuant to SAS No. 54, *Illegal Acts by Clients* (AU section 317), which requires that audits be designed to provide reasonable assurance of detecting misstatements that result from illegal acts that have a direct and material effect on the determination of financial statement amounts.

SEC—Proposed Mutual Fund Disclosure Practice

.12 In a proposal to be issued some time this fall, the SEC is expected to set forth certain required disclosure practices for mutual funds. The proposal is expected to require improved risk disclosure and may include a graphic risk disclosure representation near the beginning of the prospectus. This would include a narrative description of the specific risks associated with the fund's investment approach, that is, the fund's risk profile. If this element of the proposal is adopted, auditors should consider their responsibilities pursuant to SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550). SAS No. 8 (AU section 550) provides that, although an auditor's responsibility with respect to information in a document such as a prospectus does not extend beyond the financial information identified in the report, and although the auditor has no obligation to perform any procedures to corroborate other information contained therein, the auditor should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. If the auditor concludes that there is a material inconsistency, a determination should be made as to whether the financial statements, the report, or both require revision.

.13 The proposal may permit the sale of funds using *fund profiles* that are short summaries of key fund features. A full-length prospectus would be available upon request, at any time, and would be required to be delivered upon confirmation of the purchase.

1996 SEC Generic Comment Letter

.14 The SEC's Division of Investment Management has issued its generic comment letter for 1996, providing assistance to investment company registrants in preparing disclosure documents to be filed with the SEC. The letter includes discussions of the following topics:

- Prospectus improvement
- Disclosure comments for multiple class funds, registration statements filed on Form N-14, and closed-end funds' tender offers

- Proxy disclosure requirements relating to material factors discussions, compensation disclosure, as well as electronic proxy voting and voting results
- EDGAR implementation and filing procedures relating to Financial Data Schedules, Paper Copies, Cover Letters, and Extending Effectiveness of Rule 485(a) Filings
- Register additional shares under Rule 24f-2
- Deregistering funds

Private Securities Litigation Reform Act

.15 The Private Securities Litigation Reform Act of 1995 (the Act) became effective on December 22, 1995 (though not applicable to pending lawsuits) when Congress overrode a presidential veto. It offers significant relief to the accounting profession from class action securities lawsuits relating to publicly held entities. Such lawsuits will be more difficult to file through the imposition of tougher requirements on plaintiffs and their attorneys. Limitations are placed on accountants' liability and a safe harbor is created for certain projections of financial performance. The legislated reporting responsibility of auditors will be expanded to include a requirement for auditor notification to the SEC of illegalities not appropriately addressed by management.

.16 The Act requires that audits of financial statements by independent public accountants include the following:

- Procedures to identify illegal acts and related-party transactions that would have a direct and material effect on the determination of financial statement amounts
- An evaluation as to whether there is substantial doubt about the ability of the entity to continue as a going concern in the subsequent year

The Act also requires auditors who become aware that an illegal act has or may have occurred to determine the possible effect of fines and other factors on the financial statements. Auditors must then inform the entity's audit committee (or in the committee's absence, the board of directors) of their findings. If the auditor determines that there has been no timely and appropriate response to their notification, the auditor must forward that conclusion to the entity's board of directors. The board is then required to notify the SEC of that report within one business day, providing the auditor with a copy. If the auditor does not receive a copy, the auditor must forward the report of illegal acts to the SEC within the next business day.

SEC Proposal to Implement Private Securities Litigation Reform Act

.17 The SEC has released a proposed rule designed to implement the requirements of section 10A of the Securities Exchange Act of 1934 which was added by Title III to the Private Securities Litigation Reform Act of 1995, which is discussed above. The proposal will incorporate the statutory provisions of Section 10A into the Exchange Act Rules and Regulation S-X. The statutory provisions of Section 10A, which codifies certain professional auditing standards and expands the auditors reporting obligations, can be summarized as follows:

Section 10A(a)—Auditor Responsibilities. This section requires that audits of registrants' financial statements include the following:

- Procedures designed to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statement amounts
- Procedures designed to identify related party transactions that are material or otherwise require disclosure
- An evaluation of whether there is substantial doubt about the registrant's ability to continue as a going concern during the ensuing fiscal year

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

These requirements appear to be consistent with generally accepted accounting principles. In fact, footnote 5 of the release specifically refers to the following for "standards addressing those procedures mandated by section 10A":

- SAS No. 54, *Illegal Acts by Clients* (AU section 317)
- SAS No. 45, Omnibus Statement on Auditing Standards—1983, "Related Parties" (AU section 334)
- SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341)
- SAS No. 64, *Omnibus Statement on Auditing Standards—1990* (AU section 341)
- SAS No. 77, *Amendments to Statements on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU section 341)
- SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316)

In addition, the definition of "illegal acts" is consistent with that used in SAS No. 54 (AU section 317).

.18 *Section 10A(b)—Auditor Reporting of Illegal Acts.* This section contains provisions that would require the auditor to report certain illegal acts directly to the SEC if the registrant fails to do so. If the auditor becomes aware of information indicating that an illegal act (whether or not material) has occurred or may have occurred, then the auditor would be required "in accordance with GAAS" to determine whether it is likely that an illegal act has occurred and, if so, it's possible effect on the financial statements. The auditor would be required to inform the registrant's management of the illegal act "as soon as practicable." In addition, the auditor must gain assurance that the registrant's board of directors was adequately informed of any detected illegal act. Generally accepted auditing standards (GAAS) already contains similar notification requirements; Section 10A(b) contains the additional requirement that these notifications occur "as soon as practicable."

.19 The auditor would be required to then notify the board of directors directly if the following three conclusions are met:

1. The illegal act has a material effect on the financial statements;
2. Senior management has not taken timely and appropriate remedial action;
3. The failure to take remedial action is reasonably expected to warrant either a departure from the auditor's standard report or the auditor's resignation from the audit engagement.

After receiving such a report, the board of directors has one business day to notify the SEC that it received such a report. If the auditor does not receive a copy of the board's notice to the SEC within that one business day period, then by the end of the next business day the auditor is required to furnish directly to the SEC a copy of the report given to the board.

.20 *Section 10A(c)—Private Rights of Action.* This provision states that there is no private right of action against auditors based on any findings, conclusions, or statements expressed in their reports to the SEC.

.21 *Section 10A(d)—Civil Money Penalties.* This section subjects auditors to civil money penalties if the SEC finds in a cease-and-desist proceeding that the auditor willfully failed to comply with the direct reporting provisions in Section 10A.

.22 *Definition of an Audit.* The proposed amendment would conform the definition of *audit* in Regulation S-X with Section 10A by noting that the audit of the financial statements of SEC registrants should be performed in accordance with GAAS as may be modified or supplemented by the SEC.

.23 *Report Confidentiality.* Reports filed under Section 10A would be confidential and exempt from disclosure under the Freedom of Information Act.

Audit Issues and Developments

Related-Party Transactions

.24 The expected scrutiny of transactions with affiliates by the IRS, along with such issues as interfund loans, should serve as a reminder to auditors of the significance of the examination of related-party transactions and transactions with affiliates (including advisory and 12b-1 fees, sales load commissions, and purchases and sales of investments through an affiliate) in their audits of investment companies.

.25 FASB Statement No. 57, *Related Party Disclosures* (AC R36), defines related parties as "parties with which the enterprise may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. Another party also is a related party if it can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests."

.26 In a mutual fund environment, the investment manager, distributor, custodian, and transfer agent are generally considered to be related parties. Transactions occurring between the fund and such parties are common. FASB Statement No. 57 (AC R36) sets forth the requirements for the disclosure of related-party transactions. Although certain accounting pronouncements may prescribe a specific accounting treatment for related-party transactions, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis other than that which would be appropriate if the parties were not related. Auditors should view related-party transactions within the framework of existing pronouncements, placing emphasis on the adequacy of disclosure. SAS No. 45, *Omnibus Statement on Auditing Standards—1983,* "Related Parties" (AU section 334), provides guidance on procedures auditors should consider to identify related-party relationships and transactions when they are performing an audit of financial statements in accordance with GAAS. Auditors should satisfy themselves concerning the required financial statement disclosures.

Valuation of Securities

.27 In that the purchase and redemption prices of fund shares are based almost exclusively on the value of a fund's investment portfolio, the area of securities valuation is a prime concern for auditors of investment companies. Investment securities whose disposition is restricted under Federal law and securities for which active markets do not exist require additional auditor scrutiny to ensure that carrying amounts approximate fair value. If security values are determined by the investment company's board of directors, auditors should review and evaluate relevant evidential matter underlying the basis for the valuation. Security investments may also include securities of companies that are in default on the payment of dividends and interest, or that have filed for protection under bankruptcy laws. Such investments may also include floating- or variable-rate senior loans to corporations, partnerships, and other entities issued as part of leveraged buyouts, acquisitions, or recapitalizations. The AICPA Audit and Accounting Guide *Audits of Investment Companies* includes guidance on testing portfolio valuations. As discussed in the Guide, the audit focus should include such procedures as a review of the fund's pricing methods, consideration of the board's oversight (that is, through a valuation committee), etc. These considerations are especially important in emerging market environments. Auditors of financial statements of investment companies registered with the SEC should consider whether management has addressed the guidance set forth in Accounting Series Releases (ASRs) 113 and 118 as well as the 1994 Dear CFO letter.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Tax Qualification

.28 Investment companies that qualify under the special provisions of subchapter M of the IRC are not taxed on earnings that are distributed to shareholders. Auditors should exercise special care when verifying that funds have met the quarterly and annual tests imposed by the IRC.

.29 Auditors should also be alert to the tax consequences of investing in complex financial instruments. Such investments may cause differences between book and tax income and generate income that may not be eligible for the 90-percent-gross income test or may constitute short-short gains subject to the 30-percent-short-short limit specified in the IRC. Investment companies also must meet certain quarterly diversification requirements with respect to total assets.

.30 When evaluating whether investment companies meet those requirements, auditors of single-state municipal bond funds that have multiple issues guaranteed by a single agency or municipality should consider aggregating such agency's or municipality's issues into one issue solely for the purpose of measuring diversification. Investments in limited partnerships and securities denominated in foreign currencies also pose special tax qualification and valuation risks.

Service Auditor's Reports

.31 Investment companies frequently use the services of fund custodians, transfer agents, and other service organizations that affect assertions in an investment company's financial statements. In obtaining an understanding of an investment company's internal control and assessing control risk, auditors should consider carefully the functions or processing performed by such service organizations. SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324), provides guidance to auditors of entities, including investment companies, that use service organizations. SAS No. 70 (AU section 324) may specifically influence custodian and transfer agent third-party internal control reports, as well as multiple-class fund design and operation reporting on expense allocation and the calculation of net asset value per share and distributions.

.32 SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319), requires an auditor to obtain an understanding of an entity's internal control sufficient to plan the audit. If an investment company uses a service organization, control activities at the service organization that affect the functions or processing performed by the service organization may have a significant effect on assertions in the investment company's financial statements. For this reason, planning the audit of an investment company may require that the auditor gain an understanding of control activities performed by a service organization. If an investment company relies on a service organization's control activities over the processing of transactions that are material to the investment company's financial statements, these control activities should be considered by the auditor.

.33 One method of obtaining information about these control activities is to obtain a service auditor's report as described in SAS No. 70 (AU section 324). Auditors assessing whether there is a need to obtain a service auditor's report if their clients use service organizations should note that the fact that an entity uses a service organization does not, in itself, mean that such a report must be obtained. In certain situations, the investment company may implement control activities that will obviate the need for a service auditor's report. In such circumstances, the investment company is not relying on the service organization's controls.

.34 Some additional factors that may be considered in determining whether to obtain a service auditor's report are the following—

- Whether the transactions or accounts processed by the service organization are material to the investment company's financial statements

- The extent to which the user organization retains responsibility for authorizing the transactions and maintaining the related accountability
- The availability of other information (for example, user manuals, system overviews, and technical manuals) at the investment company (Such information may provide the auditor with sufficient information to plan the audit.)

.35 The AICPA Auditing Procedure Study, *Implementing SAS No. 70,* Reports on the Processing of Transactions by Service Organizations, can provide auditors with guidance in this area.

New Pronouncements

Auditing Standards

.36 *SAS No. 75.* In September 1995, the Auditing Standards Board (ASB) issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except for certain circumstances, as discussed in the Statement (AU section 622). The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.37 *SAS No. 76.* In September 1995, the ASB issued SAS No. 76, *Amendments to Statement on Auditing Standards No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634). The Statement (AU section 634) provides reporting guidance and an example of a letter, actually a form of agreed-upon procedures report, that the accountant can provide in response to a request to provide a comfort letter in circumstances in which the party requesting the letter is not willing to provide the accountant with the representations required in paragraphs 6 and 7 of SAS No. 72 (AU section 634.06 and .07). The Statement is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

.38 *SAS No. 77.* In November 1995, the ASB issued SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections. 311, 341, 544, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. Such reports frequently are prepared in connection with an underwriting of a closed-end fund. SAS No. 77 is effective for engagements beginning after December 15, 1995.

.39 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.40 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58 (AU section 508) concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. Such uncertainties may include the valuation of illiquid investments or those investments for which a readily

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

ascertainable market value does not exist. This Statement (AU section 508) does not affect SAS No. 59 (AU section 341) nor preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

.41 A table outlining the significant provisions of the newly issued auditing standards is set forth in the Exhibits section of this Audit Risk Alert.

Attestation Standards

.42 *SSAE No. 4.* In September 1995, the ASB issued Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600). SSAE No. 4 (AT section 600) sets forth attestation standards and provides guidance on the performance and reporting in all agreed-upon procedures engagements, except for in certain circumstances, and is effective for reports on agreed-upon procedures engagements dated after April 30, 1996. SSAE No. 4 (AT section 600) generally should be used when applying agreed-upon procedures to nonfinancial statement subject matter. In addition, SSAE No. 4 (AT section 600) requires a written assertion from management as a condition of engagement performance. Reporting on security counts performed pursuant to Rules 17f-1 and 17f-2 of the 1940 Act should follow SSAE No. 4 (AT section 600). The SEC staff notes that SSAE No. 4 (AT section 600) is not accepted for 17f-1 or 2 reports.

.43 *SSAE No. 5.* In November 1995, the ASB issued SSAE No. 5, *Amendment to Statement on Standards for Attestation Engagements No. 1,* Attestation Standards (AT section 100). This amendment provides guidance on the quantity, type, and content of working papers for attestation engagements and is effective for engagements beginning after December 15, 1995.

.44 *SSAE No. 6.* In December 1995, the ASB issued SSAE No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400). This amendment conforms the description of elements of an entity's internal control to the components of internal control contained in SAS No. 78 (AU section 319) (see discussion in the preceding section) and *Internal Control—Integrated Framework.* The amendment is effective for an examination of management's assertion when the assertion is as of or for the period ending December 15, 1996, or thereafter. Early application of the provisions of this Statement (AT section 400) is permitted.

.45 *Quality Control Standards.* In May 1996, the ASB issued Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). SQCS No. 2 (QC section 20) supersedes SQCS No. 1, *System of Quality Control for a CPA Firm,* and its Interpretations (QC sections 10 and 10-1). The provisions of these Statements (QC sections 20 and 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997.

.46 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the Accounting and Review Services Committee under Rules 201, *General Standards* (ET section 201.01), and 202, *Compliance With Standards* (ET section 202.01), of the AICPA Code of Professional Conduct. The definition of a firm's accounting and auditing practice has been revised to include engagements performed under SSAEs issued by the ASB. These standards had not been issued when SQCS No. 1 (QC section 10) was promulgated. Also, the new standard (QC section 20) replaces the nine specific elements discussed in SQCS No. 1 (QC section 10) with the following five broad elements—independence, integrity, and objectivity; personnel management; acceptance and continuance of clients and engagements; engagement performance; and monitoring. SQCS No. 3 (QC section 30) provides guidance on how a firm can implement the new monitoring element of a quality control system in its accounting and auditing practice.

New Independence Standards

.47 The second general auditing standard, "Independence" (AU section 220.07) provides that in all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor or auditors. The precepts established to guard against the presumption of loss of independence are contained in the AICPA's *Code of Professional Conduct*. Recently issued standards relating to independence are enumerated in the following sections:

Ethics Ruling—Indemnification of a Client. The AICPA Professional Ethics Executive Committee issued Ethics Ruling No. 102, *Member's Indemnification of a Client* (ET section 191.204 and .205), as published in the January 1996 *Journal of Accountancy*. This ruling states that auditors should not enter into agreements that would require them to indemnify their client for damages, losses, or costs arising from lawsuits, claims, or settlements that relate, directly or indirectly, to client acts, or their independence will be impaired. In assessing their independence, auditors of investment companies should consider the implication of indemnification arrangements requested by their clients, in light of this new ethics ruling.

Extended Audit Services. The AICPA Professional Ethics Executive Committee issued the following independence standards relating to providing extended audit services:

- Ethics Interpretation 101-13, *Extended Audit Services* (ET section 101.15)
- Ethics Ruling No. 97, *Performance of Certain Extended Audit Services* (ET section 191.194 and .195)
- Ethics Ruling No. 103, *Member Providing Attest Report on Internal Controls* (ET section 191.206 and .207)
- Ethics Ruling No. 104, *Member Providing Operational Auditing Services* (ET section 191.208 and .209)
- Ethics Ruling No. 105, *Frequency of Performance of Extended Audit Procedures* (ET section 191.210 and .211)

The complete text of the standards shown above were published in the August 1996 edition of the AICPA's *Journal of Accountancy* and became effective upon publication.

AICPA Exposure Drafts: Proposed SASs

.48 *Consideration of Fraud in a Financial Statement Audit.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, *and No. 47,* Audit Risk and Materiality in Conducting and Audit Proposed Statement on Auditing Standards. The proposed Statement would provide expanded operational guidance on the consideration of fraud in conducting a financial statement audit. The proposed changes in auditing standards also clarify the auditor's present responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether caused by error or fraud. In addition, the proposed changes provide added guidance on the standard of due professional care in the performance of work, including the need to exercise professional skepticism, and the concept of reasonable assurance. In addition to amending SAS Nos. 1 (AU sections 110 and 230) and 47 (AU section 312), the proposed Statement would:

- Describe fraud and its characteristics.
- Require the auditor to specifically assess the risk of material misstatement due to fraud and provide categories of fraud risk factors that should be considered in the auditor's assessment.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Provide guidance on how the auditor should respond to the results of the assessment.
- Provide guidance on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud.
- Describe related documentation requirements.
- Provide guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

.49 *Amendment to SAS No. 31, Evidential Matter.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter. This proposed Statement would provide guidance for a practitioner who has been engaged to audit an entity's financial statements where significant information is transmitted, processed, maintained, or accessed electronically. The proposed Statement would include examples of evidential matter in electronic form and provide that an auditor should consider the time during which such evidential matter exists or is available in determining the nature, timing, and extent of substantive tests. In addition, the proposed Statement would indicate that an auditor may determine that, in certain engagement environments where evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests. The proposed Statement would provide that in such circumstances, an auditor should consider performing tests of controls to support an assessed level of control risk below the maximum for affected assertions.

Accounting Issues and Developments

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.50 In June 1996, the FASB issued FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities.* This Statement provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities. Those standards are based on consistent application of a financial-components approach that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished. This Statement provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.51 A transfer of financial assets in which the transferor surrenders control over those assets is accounted for as a sale to the extent that consideration other than beneficial interest in the transferred assets is received in exchange. The transferor has surrendered control over transferred assets if and only if all of the following conditions are met:

1. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.
2. Either (*a*) each transferee obtains the right—free of conditions that constrain it from taking advantage of that right—to pledge or exchange the transferred assets or (*b*) the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right—free of conditions that constrain them from taking advantage of that right—to pledge or exchange those interests.
3. The transferor does not maintain effective control over the transferred assets through (*a*) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (*b*) an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.

.52 FASB Statement No. 125 requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interest in transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.53 FASB Statement No. 125 requires that servicing assets and liabilities be subsequently measured by (*a*) amortization in proportion to and over the period of estimated net servicing income or loss and (*b*) assessment for asset impairment or increased obligation based on their fair values.

.54 FASB Statement No. 125 requires that debtors reclassify financial assets pledged as collateral and that secured parties recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.

.55 FASB Statement No. 125 requires that a liability be derecognized if and only if either (*a*) the debtor pays the creditor and is relieved of its obligation for the liability or (*b*) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.

.56 FASB Statement No. 125 provides implementation guidance for assessing isolation of transferred assets and for accounting for transfers of partial interest, servicing of financial assets, securitizations, transfers of sales-type and direct financial lease receivables, securities lending transactions, repurchase agreements including "dollars rolls," "wash sales," loan syndications and participations, risk participations in banker's acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishment of liabilities.

.57 FASB Statement No. 125 supersedes FASB Statements No. 76, *Extinguishment of Debt*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. This Statement amends FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights*. This Statement also supersedes Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)*, and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*.

.58 FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Disclosures About Derivative Financial Instruments

.59 FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), issued in October 1994, was effective for financial statements issued for fiscal years ending after December 15, 1994. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995.

.60 FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments futures; forward, swap, and option contracts; and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), to require disaggregation of information about financial instruments with off-balance-sheet risk of accounting loss by

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

class, business activity, risk, or other category that is consistent with the entity's management of those instruments. The Statement (AC F25) also amends FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), to require that fair value information be presented without combining, aggregating, or netting the fair value of derivative financial instruments with the fair value of nonderivative financial instruments and that it be presented together with the related carrying amounts in the body of the financial statements, a single note, or a summary table in a form that makes clear whether the amounts represent assets or liabilities.

.61 Auditors should consider whether the provisions of FASB Statement No. 119 (AC F25) apply to their investment company clients and, if so, evaluate whether the client's financial statement disclosures are adequate and appropriate in view of the requirements set forth therein.

.62

Exhibit

Significant Provisions of Newly Issued SASs

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.
SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634)	SAS No. 72	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623)	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341]).

Information Sources

.63 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.64 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.65 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.66 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.67 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8160

Oil and Gas Producers Industry Developments—1995/96

Industry and Economic Developments

.01 Oil and gas production includes those activities relating to the acquisition of mineral interests in properties, exploration and production (E&P), development, and production of crude oil, natural gas, and natural gas liquids (such as butane and propane).

.02 Producers of oil and gas may be classified as independent or integrated companies. The so-called independents are those companies whose activities are typically limited to the exploration, development, and production of oil and gas properties. Integrated companies, on the other hand, are more diverse, with organizations involved not only in exploration, development, and production, but also in the operation of refineries, pipelines, and wholesale and retail outlets.

.03 Surging demand for oil products in the United States resulted in strong prices during 1995. Led by high gasoline consumption during the summer driving season; favorable economic conditions; a steadily rising driver population, along with a de-emphasis on energy conservation, gasoline demand should, by year end, rise to its highest levels since 1978. Demand has also been strong for certain oil-based petrochemical products due to global economic growth and the increased use of synthetic chemical compounds by the textile and other industries. The demand for oil products from Pacific Rim countries has increased as well. And it is expected to continue, given that area's rising prosperity, increased automobile usage, and continued industrialization. In response, many of the largest domestic and foreign oil producers are repositioning their productive assets out of limited growth areas, such as the older, more mature markets of Europe and the United States, into areas of high-demand growth, such as the Pacific Rim.

.04 The abnormally warm winter across much of North America drove down demand for natural gas. Increased drilling in the Gulf of Mexico and rising imports from Canada, along with the warm winter, kept gas inventories abundant. These supply and demand factors resulted in depressed natural gas prices through the first part of 1995. And, since gas prices are typically weakest during the summer months, there was no midyear price rally. The price of natural gas has showed no further declines, however, remaining moderately below prior-year levels. As the heating season approaches, natural gas prices should rise modestly, but the abundance of supplies will likely preclude sustainable increases. Only an unusually cold winter can reduce those supplies to levels at which gas prices may rise to prior-year levels. If, on the other hand, the United States experiences another abnormally warm winter, the supply/demand factor will significantly lower gas prices. See further discussion of oil and natural gas prices under "Price Volatility" in the "Audit Issues" section of this Audit Risk Alert.

.05 Along with product demand and seasonal requirements, production levels have a significant effect on the price of fossil fuels. In considering worldwide production levels, industry analysts always review the annual quotas set by the Organization of Petroleum Exporting Countries (OPEC). Although once the dominant force in oil production, OPEC is no longer the powerhouse it once was. At one time, OPEC was responsible for providing for 60 percent of the world's petroleum consumption—today, its share of the world market is down to less than 40 percent. As such, OPEC now finds itself competing for customers with prolific non-OPEC rivals in Asia, the North Sea, and Latin America, with most new demand for oil being met by sources outside of OPEC control. Still, OPEC plays a significant role in establishing worldwide production levels and, therefore, has a direct impact on oil prices. While OPEC has, in the past, attempted to gain market share by increasing production output this strategy has typically backfired by driving prices down due to excess supplies. OPEC is, therefore, unlikely to increase

output for fear of the negative impact on revenues. Most industry analysts expect OPEC to maintain current oil production quotas through year end.

.06 The United States is the world's largest market for petroleum products. Although it is viewed as a mature market, recent expansion has occurred more rapidly than it has in some time. This should be good news for domestic producers except for the fact that the United States is importing more petroleum than ever before. Almost 52 percent of this year's domestic consumption was derived from foreign sources. Analysts predict that by the year 2000 imports will reach 65 percent. This trend to import has persisted over the past ten years; as a result, the domestic petroleum industry has been decimated. Daily domestic crude output has plummeted from more than 9 million barrels in the early 1980s to 6.5 million today. Hundreds of companies have gone bankrupt and more than 400,000 workers have been squeezed out of petroleum-related jobs. "Oil patch" lawmakers, deeply concerned about the premature abandonment of a significant number of wells, are vigorously pursuing tax breaks and regulatory relief for the struggling domestic industry and are adamant about trying to turn the tide on increasing foreign oil imports. While regulatory relief may be a reachable goal (see the "Legislative and Regulatory Issues" section of this Audit Risk Alert), tax breaks in the current budgetary climate are highly unlikely. Accordingly, despite strong oil prices, auditors should be aware that going-concern issues remain relevant in the current year. Auditors should consider their responsibilities pursuant to AICPA Statement on Auditing Standards (SAS) No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). SAS No. 59 (AU section 341) provides guidance to auditors for evaluating whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period not to exceed one year from the date of the financial statements being audited.

.07 Merger and acquisition activity has increased during the current year in both the oil and gas segments of the industry. Most gas producers, feeling the continuing effects of deregulation (see the "Legislative and Regulatory Issues" section of this Audit Risk Alert), are buying their way into the more lucrative distribution business, though some others are diversifying through internal development. Depressed gas prices have driven some firms, with both high debt levels and a large stake in gas, to consider the option to merge. The increase in mergers and acquisitions among oil producers has generally been driven by firms burdened with high debt levels who are unable to develop promising fossil fuel properties. With limited access to outside financing, they have opted to merge with, or to be acquired by, cash-rich competitors. In these circumstances, auditors should consider whether management has appropriately accounted for transactions related to the merger or acquisition activities. Other audit implications of mergers and acquisitions are discussed in the "Accounting Issues and Developments" section of this Audit Risk Alert under "Restructuring Charges".

.08 Oil and gas properties are the most significant assets of producers. The nonregenerative nature of these properties requires producers to engage in exploration activities to replenish their inventory of such wasting assets. However, domestic exploration has declined in part due to the enormous expense of recovering oil and gas from existing, mature reservoirs. In a move that many analysts believe will serve as a model for the industry, as it struggles to maintain a foothold in the nations's maturing oil fields, two major U.S. oil companies announced their intention to establish a jointly owned company to engage in domestic oil and gas exploration. Joint ventures of this type not only provide the financial resources necessary to employ the advanced oil recovery techniques crucial to the continued development of mature properties but also spread the significant risks over several participants. Joint ventures typically create redundancies which result in staff reductions, streamlining operations, and other cost-cutting devices. The audit implications of such restructuring programs are discussed in the "Accounting Issues and Developments" section of this Audit Risk Alert.

Legislative and Regulatory Issues

Continuing Impact of FERC Order 636

.09 The full effects of the radical changes brought about by Federal Energy Regulatory Commission (FERC) Orders 380, 436, 500, and particularly 636, are now being felt by the natural gas industry. With the intent of

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

reversing federally granted monopolistic protection and enhancing competition among natural gas suppliers, the FERC Orders eliminated the advantage enjoyed by gas pipeline companies over other sellers of natural gas.

.10 The advantages at issue are based on a pipeline company's ability to "bundle" gas, that is, its transportation and other related services, into a composite commodity. Given this, a pipeline's operating practices have tended to favor the transportation of its own product to the disadvantage of gas provided by other sellers that also is transported by the pipeline. The open access to transportation service granted by Order 636 has enabled buyers and sellers to go around the pipeline companies and deal directly with each other, thus resulting in a more efficient national market for natural gas. Rather than relying on pipeline companies to buy, store, and transport their gas, customers now have the option to deal with gas marketers that can put together gas supply packages tailored to the customer's specific needs.

.11 The resulting economic circumstances of these regulatory changes mandate that the gas industry emphasize marketing. Most industry analysts believe those companies that do nothing else but produce gas will almost certainly be unprofitable. Thus, as gas producers are pressed to expand their operations into areas such as product marketing, auditors should be alert to the effects these new activities may have on the entity's internal control structure. Auditors should consider the implications on their assessment of control risk when such activities strain existing policies and procedures to the point where effectiveness may be reduced. In such circumstances, auditors should understand the control implications of expansion into new areas of operation, or the internal development of, for example, marketing operations. Documentation of that understanding is required by SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319). If the assessment of control risk is high, auditors should adjust the scope of their audits accordingly. If that understanding reveals significant deficiencies in the design or operation of the internal control structure, there is increased risk that material errors and irregularities will result in misstatements in the financial statements, and a reportable condition, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist.

Proposed Environmental Legislation

.12 The new Congress has stated its intent to assess future environmental regulations from the perspective of required cost outlay to expected benefit. Without a demonstration that expected future costs are justified by expected future benefits, new regulations are unlikely to be issued. Given the significant costs of compliance, many oil and gas industry groups and trade associations have expressed their support for required analysis of cost-benefit assessments before the adoption of new regulations.

.13 The Job Creation and Wage Enhancement Act (H.R. 9) follows through with the above-stated philosophy by rolling back certain federal regulations. Although the Senate may impose substantial modifications, the House bill is likely to set the tone for future environmental deregulation. The significant aspects of the Act propose—

- The temporary suspension of most new environmental regulation.
- The imposition of elaborate scientific review on proposed rules on health, safety, and environmental protection.
- Compensation for private landowners when environmental regulations reduce property values.

While these proposals provide insight into the possible future of environmental regulation, oil and gas producers currently face significant concerns with regard to remediation liabilities imposed by existing regulations. This issue is discussed further in the "Accounting Issues and Developments" section of this Audit Risk Alert.

Reformulated Gasoline Program

.14 The federal government has in place a reformulated gasoline (RFG) program whose purpose is to ensure the availability of automobile fuel with less harmful environmental effects than conventional gasoline. While the

impact of this program on crude oil and natural gas production is likely to be indirect, those integrated producers involved in refining activities are already feeling the effects on their operations. In order to comply with these regulations, these entities are generally required to make additional investments to upgrade their facilities.

.15 The program requires that the new gasoline be made available in certain geographical areas. However, other states and localities are permitted a certain degree of flexibility. They are allowed to "opt in" or "opt out" of the program. Therein lies the problem for refiners. For example, one company had already shipped the new reformulated gasoline to a number of Pennsylvania counties, which then chose not to participate in the program. Another company had modified its refining facilities in Kentucky to accommodate the production of RFG only to find out that the state is likely to back out of the program. Accordingly, integrated companies that have made the plant investments in their refineries necessary to produce reformulated gasoline may incur significant losses. Auditors should consider whether circumstances such as these call into question the recoverability of certain long-lived assets by integrated oil producers. See the "Accounting Issues and Developments" section of this Audit Risk Alert for further discussion of this issue.

Audit Issues

Price Volatility

.16 As with most energy sources, fossil fuel prices generally track normal seasonal patterns. For example, gasoline prices can be expected to rise during peak summer driving months, while heating fuel prices will increase during the winter heating season. However, the prices of natural gas and oil products are difficult to predict with any degree of certainty. Due to the impact of such factors as worldwide production levels, economic growth rates, fluctuations in supply and demand, and unforeseen weather patterns, prices can be extremely volatile. A case in point was the threat, in October, of a massive hurricane in the Gulf of Mexico. In response to dire weather predictions, many major companies in the Gulf area implemented plans to curtail or completely shutter their operations. Analysts initially estimated that the storm would force producers to shut down 6.2 billion cubic feet of natural gas output, which is about 45 percent of total Gulf gas production, and 12 percent of total U.S. gas output. On the basis of these predictions, there was a surge of buying by traders, who viewed the impending weather conditions as a threat to offshore production facilities and coastal refineries. The impact on prices? Significant increases for both natural gas and crude oil. Natural gas scheduled for November delivery jumped $.144 to $1.894 per thousand cubic feet while crude prices increased by $.10 a barrel, settling at $17.64. Subsequent weather forecasts predicted that the hurricane would bypass most offshore rigs. Ultimately, the storm lost strength and was downgraded from a hurricane to a tropical depression. Based on the revised weather report, along with rumors (later proved unfounded) of a one-time United Nations supervised sale of oil by Iraq, prices dropped to near twelve-month lows.

.17 Price volatility presents considerable risks. Declines will produce obvious cash-flow problems. However, dramatic increases such as those described above may cause producers to overextend themselves. Liquidity problems may then arise when prices return to expected, or lower than expected, levels. Therefore, auditors may wish to consider the impact of price volatility on, for example, an oil and gas producer's—

- Debt-service requirements.
- Compliance with restrictive loan covenants.
- Valuations assigned to oil and gas reserves, especially those used as loan collateral.
- Cash flow for drilling commitments and trade payables.
- Ability to collect joint interest billings receivable.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Environmental Issues

.18 In spite of the potential regulatory relief ahead, oil and gas producers face significant environmental compliance issues. Existing environmental remediation liability laws, written at all levels of government, have exposed entities with oil and gas producing activities to an increased vulnerability to environmental claims. Requirements imposed by federal, state, and local regulations that wells be plugged, all facilities and equipment removed, and terrain restored to specified conditions may expose producers to potential litigation. The Oil Pollution Liability and Compensation Act of 1990, the Superfund Amendments and Reauthorization Act, along with various clean air and water acts, may be used to hold oil and gas producers liable for the remediation of environmental contamination. Superfund, for example, legally empowers the U.S. Environmental Protection Agency to seek recovery from current and previous owners or operators of a particular contaminated site or from anyone who generated or transported hazardous substances to such a site.

.19 Auditors should be aware that oil and gas producers may be held liable for cleanup costs despite their lack of intent or knowledge. Auditors of producers that face such claims should carefully consider whether the accounting and disclosure requirements of Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies* (AC C59), have been met. FASB Statement No. 5 (AC C59) requires that an estimated loss be accrued when—

- Information available prior to the issuance of financial statements indicates that it is probable that an asset has been impaired or that a liability has been incurred at the date of the financial statements, and
- The amount of the loss can be reasonably estimated.

.20 The nature and amount of the accrual should be disclosed if it is necessary for the financial statements not to be misleading. Additionally, other disclosures may be necessary when the above conditions are not met and, therefore, no loss has been accrued, or if the exposure to loss exceeds the amount accrued and the loss or additional loss is at least a reasonable possibility. In such circumstances, disclosures should include the nature of the contingency, an estimate of the possible loss or range of loss, or a statement that an estimate of the loss cannot be made.

.21 Auditors should also be aware of the consensus reached by the FASB's Emerging Issues Task Force (EITF) in Issue No. 93-5, *Accounting for Environmental Liabilities*, which states that, among other things, an environmental liability should be evaluated independently from any potential recovery and that the loss arising from the recognition of an environmental liability should be reduced only when a claim for recovery is probable of realization. Additional accounting guidance in this area is included in FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (AC C59), FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10), EITF Issue No. 89-13, *Accounting for the Cost of Asbestos Removal*, and EITF Issue No. 90-8, *Capitalization of Costs to Treat Environmental Contamination*. See further discussion of this matter under the "Accounting Issues and Developments" section of this Audit Risk Alert.

.22 Auditors of publicly held oil and gas producers should be aware of the Securities and Exchange Commission's (SEC's) Staff Accounting Bulletin (SAB) No. 92, *Accounting and Disclosures Relating to Loss Contingencies*. The SAB provides the SEC staff's interpretation of current accounting literature related to the following:

- The inappropriateness of offsetting probable recoveries against probable contingent liabilities
- The recognition of liabilities for costs apportioned to other potential responsible parties
- The uncertainties in estimating the extent of environmental liabilities
- The appropriate discount rate for environmental liabilities, if discounting is appropriate
- Accounting for exit costs

- Financial statement disclosures of exit costs and other items and disclosure of certain information outside the basic financial statements

Investments in Derivatives

.23 In recent years there has been a growing use of innovative financial instruments, commonly referred to as derivatives, that often are very complex and can involve a substantial risk of loss. Oil and gas producers may hedge or speculate with energy futures or options on such futures. Normally, subsequent production rather than existing inventory is hedged. As interest rates, commodity prices, and numerous other market rates and indices from which derivative financial instruments obtain their value have increased in volatility, a number of entities have incurred significant losses as a result of their use. The use of derivatives almost always increases audit risk. Although the financial statement assertions about derivatives are generally similar to assertions about other transactions, the auditors' approach to achieving related audit objectives may differ because certain derivatives are not generally recognized in the financial statements.

.24 It is essential that auditors understand both the economics of derivatives used by entities whose financial statements they audit and the nature and business purpose of the entities' derivatives activities. In addition, auditors should carefully evaluate their clients' accounting for any such instruments, especially those carried at other than market value. To the extent the derivatives qualify as financial instruments as defined in FASB Statements No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), and No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), the disclosure requirements set forth in those Statements (AC F25) must be met. When derivatives are accounted for as hedges of on-balance-sheet assets or liabilities or of anticipated transactions, auditors should carefully review the appropriateness of the use of hedge accounting, particularly considering whether the criteria set forth in applicable accounting literature are met.

.25 The SEC staff has indicated in public speeches and letters of comment to registrants during the past year that publicly held companies should disclose the nature and purpose of certain commodity-based derivatives activities, the nature and terms of certain commodity-based derivatives used, and the accounting methods used even when such derivatives do not meet the definition of financial instruments set forth in the FASB Statements (AC F25) cited above.

.26 Many of the unique audit risk considerations presented by the use of derivatives are discussed in detail in *Audit Risk Alert—1995/96* [AAM section 8010]. Also, see "Disclosures About Derivatives" in the "Accounting Issues and Developments" section of this Audit Risk Alert. The AICPA publication *Derivatives—Current Accounting and Auditing Literature* (Product No. 014888) summarizes current authoritative accounting and auditing guidance and provides background information on basic derivatives contracts, risks, and other general considerations.

Related-Party Transactions

.27 In the oil and gas production industry, related-party transactions are often extensive and may result in possible conflicts of interest among investors, operators, and general partners. Though always an area of significant audit risk, related-party concerns are particularly important in the current year given the rise in joint ventures brought about by regulatory forces affecting gas producers and economic necessity in the case of some oil producers.

.28 FASB Statement No. 57, *Related Party Disclosures* (AC R36), sets forth the requirements for related-party disclosures. Certain accounting pronouncements prescribe the accounting treatment if related parties are involved; however, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis different from that which would be appropriate if the parties were not related. Auditors

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

should view related-party transactions within the framework of existing pronouncements, placing emphasis on the adequacy of disclosure.

.29 SAS No. 45, *Omnibus Statement on Auditing Standards—1983,* "Related Parties" (AU section 334), provides guidance on procedures auditors should consider if they are performing an audit of financial statements in accordance with generally accepted auditing standards to identify related-party relationships and transactions. Auditors should satisfy themselves concerning the required financial statement accounting and disclosure.

Estimated Reserves

.30 The reliability of reserve estimates is a key consideration in many aspects of accounting for oil and gas producing activities. This area could be a source of significant audit risk in the current year as domestic producers apply advanced, unproven recovery techniques to mature reservoirs. Reserve estimates have a direct impact on the calculation of depreciation, depletion, and amortization as well as on ceiling and impairment tests. In addition, some companies with bank debt and other forms of long-term borrowing may be subject to various debt covenants that are based on the value of oil and gas reserves. Such covenants may stipulate, for example, that if the value of the reserves falls below a certain level, the entire debt or a part thereof may be callable in the current year. Auditors should review debt covenants for such matters and consider the effect of reserve valuations and debt restrictions. Auditors should be alert to matters subject to "events of default" and, if necessary, examine written waivers from lending institutions.

.31 In assessing the reliability of reserve estimates, auditors should consider whether qualified and reputable petroleum engineers have been involved in determining reserve estimates. If engineers were involved in the determination of the reserve estimates, the auditor should follow the guidance in SAS No. 73, *Using the Work of a Specialist* (AU section 336).

.32 Accordingly, auditors who use the work of a petroleum engineer in auditing the financial statements of an oil or gas producer should evaluate the professional qualifications of the specialist in determining that the specialist possesses the necessary skill or knowledge in the particular field. In making that evaluation, auditors should consider factors such as the following:

- The professional certification, license, or other recognition of the competence of the engineer in the field of petroleum engineering (The Society of Petroleum Engineers of the American Institute of Mining Engineers has established Standards Pertaining to the Estimating and Auditing of Oil and Gas Reserve Information. Those standards, which are included as appendix B to the AICPA Audit and Accounting Guide *Audits of Entities With Oil and Gas Producing Activities,* describe professional qualifications that should be met by reserve estimators and reserve auditors.)
- The reputation and standing of the engineer in the views of peers and others familiar with the specialist's capability or performance
- The engineer's experience in the type of work under consideration

.33 Auditors who use the work of petroleum engineers in auditing the financial statements of oil and gas producers should also obtain an understanding of the nature of the work performed by the engineers. That understanding should cover the objectives and scope of the engineer's work; the engineer's relationship to the client; the methods or assumptions used; a comparison of the methods or assumptions used with those used in the preceding period; the appropriateness of using the engineer's work for the intended purpose; and the form and content of the engineer's findings that will enable the auditor to evaluate the appropriateness and reasonableness of the methods and assumptions used and their application.

.34 FASB Statement No. 69, *Disclosures about Oil and Gas Producing Activities* (AC Oi5), sets forth requirements for a comprehensive set of disclosures for oil and gas producing activities. The Statement (AC Oi5) also requires publicly traded enterprises with significant oil and gas producing activities to disclose prescribed

supplementary information that includes data about their reserves. SAS No. 52, *Omnibus Statement on Auditing Standards—1987*, "Required Supplementary Information" (AU section 558), provides guidance to auditors regarding the procedures they should apply to required supplementary information and describes circumstances that require reporting on such information.

Adequacy of Disclosure

.35 SAS No. 32, *Adequacy of Disclosure in Financial Statements* (AU section 431), sets forth the auditor's responsibility to ensure that audited financial statements include disclosures required by generally accepted accounting principles. The SEC staff has noted several instances in which financial statement disclosures have been inadequate. For example—

- *Standardized Measure of Discounted Future Net Cash Flows.* FASB Statement No. 69 (AC Oi5) requires the disclosure of both future net cash flows and the standardized measure of discounted future cash flows in the aggregate and for each geographic area for which reserve quantities are disclosed. In the financial statements of publicly held entities, the SEC staff has noted presentations of the required supplementary information on the standardized measure of discounted future cash flows that omit the line item "future net cash flows". Such presentations fail to comply with the specific disclosure requirements of Statement No. 69, paragraph 30(d) (AC Oi5.180). Illustration 5 in appendix A to Statement No. 69 (AC Oi5) provides an example of the disclosures required to comply with paragraph 30 of that Statement (AC Oi5.180).

- *Volumetric Production Payments.* FASB Statement No. 19, *Financial Accounting and Reporting by Oil and Gas Producing Companies*, paragraph 47(a) (AC Oi5.138), for companies following the successful efforts method of accounting, and Rule 4-10(h)(5)(i) of SEC Regulation S-X, for companies following the full cost method, require the seller to account for volumetric production payments received as unearned revenue to be recognized as the oil and gas is delivered. These rules also require that the related reserve estimates and production data be reported as those of the purchaser of the production payment and not of the seller in the disclosures required by FASB Statement No. 69 (AC Oi5). Auditors should carefully review reserve disclosures to ensure that sellers of volumetric production are properly excluding the related reserves from the disclosures required by FASB Statement No. 69 (AC Oi5).

Accounting Issues and Developments

Impairment of Long-Lived Assets

.36 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the entity estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. (The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.)

.37 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.38 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.39 The Statement (paragraph 25 [AC Oi5.141]) also amends FASB Statement No. 19 (AC Oi5) by adding a new paragraph dealing with impairment test for proved properties and capitalized exploration and development cost after paragraph 62 (AC Oi5.141). The paragraph reads as follows:

> The provisions of FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of,* are applicable to the costs of an enterprise's wells and related equipment and facilities and the costs of the related proved properties. The impairment provisions relating to unproved properties referred to in paragraphs 12, 27-29, 31(b), 33, 40, 47(g), and 47(h) of this Statement remain applicable to unproved properties.

.40 Given the capital-intensive nature of oil and gas production activities, auditors should be alert to those events or changes in circumstances that indicate an impairment of an asset may have occurred. For example, auditors should consider the possible impairment of—

- Undeveloped properties—resulting from declining leasehold values.
- Producing properties—as a result of the reduced value of the related reserves.
- Lease and well equipment inventory—due to excess supply.

.41 Auditors of integrated oil producers should consider the possible impairment of—

- Plant investments necessary to produce reformulated gasoline for refineries located in areas that have opted out of the RFG program.
- Single-hulled tankers and barges required to be phased out over a fifteen-year period pursuant to the Oil Pollution and Liability Compensation Act of 1990.

.42 As oil and gas producers adopt technologically advanced recovery techniques for mature properties, traditional long-lived equipment may be rendered obsolete. Additionally, environmental regulations may impose restrictions on the use of a long-lived asset used in exploration, development, and production, thus significantly reducing its ability to generate future cash flows. In these instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.43 In considering an oil and gas production entity's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

.44 In the past, the SEC staff has, as a matter of administrative policy, required publicly held entities that use the successful efforts method of accounting, to recognize an impairment loss on oil and gas properties when the total capitalized costs of such properties exceed undiscounted after tax net revenues on a worldwide basis. Such an

impairment policy represented only a minimum test for impairment; successful efforts entities could elect to apply a more "stringent" test for impairment. The SEC staff has indicated in public speeches during the past several months that upon the adoption of FASB Statement No. 121 (AC I08), publicly held entities using the successful efforts method of accounting will be required to comply with the provisions of the new impairment standards rather than follow the previous minimum standard.

Risks and Uncertainties

.45 In December 1994, the AICPA's Accounting Standards Executive Committee issued Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. SOP 94-6 requires nongovernmental entities to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires organizations to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.46 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to changes in the near term. Examples of similar estimates that may be included in the financial statements of oil and gas producers include, but are not limited to the following:

- Estimates of oil and gas reserve quantities
- Standardized measure of discounted future net cash flows relating to proved oil and gas reserve quantities

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of oil and gas producers in accordance with paragraph 21 of the SOP include the following:

- Revenue from a particular oil or gas based product
- Exploration, development, and production of properties in a particular geographic area
- International exploration activities

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.47 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

Restructuring Charges

.48 Oil and gas producers have seen an increased rate of mergers, acquisitions, and related activities. These entities typically seek to gain access to new markets through acquisition or to concentrate on their core business by divesting themselves of unrelated divisions. Greater cost efficiencies and economies of scale are being sought through such vertical and horizontal integrations. For example, during the current year:

- Two major U.S. oil companies announced their intention to establish a jointly owned company to engage in oil and gas exploration and production.
- Declining U.S. oil production has prompted domestic producers to seek overseas opportunities. As part of that reallocation of assets, many producers have been downsizing their domestic operations and selling off marginal production properties.

Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- In a billion dollar sale, one major oil producer shed its plastics division to concentrate on its core operations—oil, gas, and petrochemicals. (Authoritative guidance on accounting for the disposal of a business segment is set forth in APB Opinion No. 30 [AC I13].)

The restructuring that often accompanies these activities typically creates redundancies that raise the specter of staff reductions and related cost-cutting measures as duplicate functions are eliminated and existing areas streamlined. Auditors should consider the impact of such activities on the entity's operations and internal control structure; the reserves relating to current restructuring plans; and the appropriate period for reporting the costs associated with restructurings.

.49 In considering restructuring liabilities and costs, auditors should be aware of EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*, for authoritative guidance on the appropriate accounting for restructurings. EITF Issue No. 94-3 also provides guidance on (1) the types of costs that should be accrued, (2) the timing of recognition of restructuring charges, and (3) prescriptions for disclosures that should be included in the financial statements.

.50 For publicly held entities, SEC SAB No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges*, requires that restructuring charges be reported as a component of income from continuing operations.

Disclosures About Derivatives

.51 As previously discussed, oil and gas producers may employ derivative financial instruments as risk management tools. Derivatives are complex financial instruments whose values are affected by the volatility of interest rates, foreign currency indices, and commodity and other prices.

.52 In October 1994, the FASB issued Statement No. 119 (AC F25) which requires disclosures about derivative financial instruments—futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statements No. 105 (AC F25) and No. 107 (AC F25).

.53 FASB Statement No. 119 (AC F25) requires disclosures about amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. Paragraph 12 of FASB Statement No. 119 (AC F25.115P) encourages, but does not require, entities to disclose quantitative information about risks associated with derivatives.

.54 FASB Statement No. 119 (AC F25) was effective for financial statements issued for fiscal years ending after December 15, 1994, except for organizations with less than $150 million in total assets. For those organizations, the Statement (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1995.

.55 The FASB Special Report *Illustrations of Financial Instrument Disclosures* contains illustrations of the application of FASB Statements No. 105 (AC F25), No. 107 (AC F25), and No. 119 (AC F25).

AICPA Exposure Draft: Proposed Statement of Position on Environmental Remediation Liabilities

.56 Environmental compliance costs may be significant for oil and gas producers. Federal, state, and local regulations require that depleted well sites be plugged, facilities and equipment removed, and the terrain restored to specified conditions. As such, auditors should note that in June 1995, the AICPA issued an exposure draft of a proposed SOP, *Environmental Remediation Liabilities*. The exposure draft provides that:

- Environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5 (AC C59) are met: the exposure draft includes benchmarks to aid in determining when those criteria are met.
- Accruals for environmental remediation liabilities should include (1) incremental direct costs of the remediation effort, as defined, and (2) costs of compensation and benefits for employees to the extent the employees are expected to devote time to the remediation effort.
- Measurement of the liabilities should include (1) the entity's specific share of the liability for a specific site and (2) the entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- Measurement of the liability should be based on enacted laws and existing regulations, policies, and remediation technology.
- Measurement should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed and may be discounted to reflect the time value of money if the aggregate amount of the obligation and the amount and timing of cash payments for a site are fixed or reliably determinable.

The exposure draft also includes guidance on display in the financial statements of environmental remediation liabilities and on disclosures about environmental cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations. A separate, nonauthoritative section of the exposure draft discusses major federal environmental pollution responsibility and clean up laws and the need to consider various individual state and other non-U.S. government requirements.

Disclosures—Publicly Held Companies

.57 *Management's Discussion and Analysis.* SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550), requires that auditors read such information and consider whether it and the manner of its presentation are materially consistent with information appearing in the financial statements. As auditors of oil and gas producers that are required to file reports with the SEC read the Management's Discussion and Analysis (MD&A) sections of SEC filings, they might consider whether the MD&A includes discussions of—

- The impact of recently issued accounting standards that are not effective until some future date. If the adoption of a standard is expected to have a significant effect on the oil and gas producer's financial position or results of operations, the MD&A disclosure should (1) notify that a standard has been issued which the oil and gas producer will be required to adopt in the future and (2) assess the significance of the impact the adoption of the standard should have on the company's financial statements (unless this cannot be reasonably estimated, in which case a statement to that effect should be made).
- The effects of hedging on liquidity and results of operations.
- Known trends, demands, commitments, events, or uncertainties that are reasonably likely to have a material effect on the oil and gas producer's results of operations or financial condition.

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.58 The AICPA Audit and Accounting Guide *Audits of Entities With Oil and Gas Producing Activities* is available through the AICPA loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the Guides as they appear in the service are printed annually.

Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Information Sources

.59 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.60 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.61 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.62 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.63 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8170

Securities Industry Developments—1996/97

Industry and Economic Developments

.01 Strength in the major financial markets, along with effective cost controls, led the brokerage industry to a strong first half in 1996. Revenues from all lines of business—principal transactions (meaning, firms trading on their own account), commissions, investment banking, and asset management—rose sharply during this period. As a result, net income for many brokerage firms reached levels not seen since 1993. The factors that have contributed to the industry's success, along with the possible audit implications, include the following:

- *Trading volume.* The average daily volume of stock trading was almost double that of 1990 levels, and continues to trend upwards. Eight out of ten of the highest trading days took place during 1996. In fact, the busiest day on record occurred in July when a combined volume of more than 1.5 billion shares traded on the New York and the National Association of Security Dealers and Quotation Analysts (NASDAQ) exchanges. Accordingly, there was a significant increase in broker commissions derived from buy and sell transactions on the sales of domestic stocks and bonds totaling $476.8 billion, a 47 percent increase over the first half of last year. When documenting their understanding of a broker-dealer's internal control and assessing control risk, as required by AICPA Statement on Auditing Standards (SAS) No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319A),[1] auditors may wish to consider the impact of sudden and significant increases in trading activity whether they are isolated events or sustained conditions. Auditors may also wish to consider the effect of such circumstances on the potential for an increased risk of material errors and irregularities, and whether reportable conditions, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist. Auditors should also be aware of their responsibilities with respect to material inadequacies in internal control pursuant to the Securities and Exchange Commission's (SEC) rule 17a-5(h)(2), and, where appropriate, the Commodity Futures Trading Commission's (CFTC) regulation 1.16(c)(5).

- *Underwriting activities.* Many brokerage entities have benefitted from the stock underwriting boom that began in the second quarter. Stock underwriting volumes are running at a near record pace and are expected to eclipse strong 1995 totals. Though rising interest rates may put a damper on some debt offerings, overall stock and bond issuance climbed 31 percent in the second quarter to $237 billion, pushing disclosed fees for underwriting debt and equity deals to a record $2.9 billion (up 70 percent from the same period last year). Some of the audit implications germane to the area of underwriting are discussed in the "Audit Issues and Developments" section of this Audit Risk Alert under "Underwriting Activities." It should be noted that the increase in underwriting activity is likely to result in a greater number of engagements to provide underwriters with *comfort letters.* Though not directly related to the audits of broker-dealers, auditors involved in such engagements should be aware of recently issued SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 622), the provisions of which are discussed in the "New Pronouncements" section of this Audit Risk Alert.

---

[1] SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), revises the definition and description of internal control and makes conforming changes to relevant terminology. SAS No. 78 (AU section 319) was issued in December 1995 and is effective for audits of financial statements for periods beginning on or after January 1, 1997. See "New Pronouncements" in the "Audit Issues and Developments" section for further discussion of this matter.

One of the most lucrative segments of the underwriting business relates to initial public offerings (IPOs). Sales of IPOs nearly tripled in the second quarter of 1996 to $18.6 billion (compared to $6.7 billion for the same period last year), breaking the record of $12.2 billion set in the fourth quarter of 1995. However, a tumultuous stock market in July had a dampening effect on IPOs, particularly for companies without a track record of earnings. Given the sharp decline in stock prices, it became extremely difficult to proceed with new issues and a number of IPOs were postponed. A subsequent market turnaround did improve the outlook for many IPOs, but for others the delay lingered. For such IPOs, auditors should consider examining relevant underwriting agreements to which the broker-dealer is party in order to determine whether provisions for losses arising from unfulfilled underwriting commitments are necessary, and if so, whether they have been appropriately reflected in the financial statements by management.

- *Mergers and acquisitions.* A high level of corporate merger and acquisition activity during the first half of 1996 drove up investment banking revenues for many brokerage firms. Mergers and acquisitions have also increased within the securities industry itself. Restructuring often accompanies such activities as redundant functions are eliminated and existing areas streamlined. Further consideration of this matter is discussed in the "Accounting Issues and Developments" section of this Audit Risk Alert under "Restructurings." Additionally, auditors who are called upon to perform agreed-upon procedures in due diligence engagements relating to mergers and acquisitions should be aware of the following recently issued pronouncements, the provisions of which are discussed in the "New Pronouncements" section of this Audit Risk Alert: SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), and AICPA Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600).

- *Continued bull market.* As the Dow Jones Industrial Average continued to climb through the early part of the year, brokerage firms generated higher revenues from their own trading activities. However, the dramatic market decline during the summer months may have caused some broker-dealers to implement riskier hedging strategies to offset future market downturns. Those strategies may include the use of complex financial instruments including derivatives. It is essential that auditors understand both the economics of the derivatives used and the nature and business purpose of the broker-dealer's derivatives activities. If derivatives are accounted for as hedges of recorded assets or liabilities or of anticipated transactions, auditors should review the appropriateness of the use of hedge accounting, based on the criteria set forth in relevant accounting literature.

.02 Some industry observers expect the strong revenue growth to continue through year end given the upward trends in underwriting, and mergers and acquisition activity, along with continued active trading by both individual and institutional investors. However, the industry is cyclical in nature, with profits largely a function of the market environment and the direction of interest rates, and vulnerable to any severe retreat in the stock market.

Regulatory and Legislative Developments

Justice Department Action

.03 After a two-year probe into alleged price fixing on the NASDAQ exchange, the United States Justice Department and two dozen securities firms agreed to settle the government's civil complaint charging antitrust violations. Specifically, these securities firms were accused of keeping the spread between buy and sell prices for NASDAQ stocks artificially high while, at the same time, intimidating rival brokerage firms that did not follow this practice. The settlement, which some analysts predict may cost the industry more than $50 million in the first year alone, calls for the following:

- The random taping of conversations on over the counter trading desks
- Stepped up monitoring of NASDAQ traders' conversations by internal compliance officers

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Future legal sanctions for firms that engage in collusive behavior
- Semiannual briefings for traders by securities firms on the restrictions set forth under the settlement
- The filing of detailed reports certifying compliance with the terms of the settlement agreement

Further discussion of this matter is undertaken in the "Audit Issues and Developments" section of this Audit Risk Alert under "Illegal Acts by Clients."

Commodities Futures Trading Commission—Issuance of Final Rules

.04 Broker-dealers that are also commodities brokers must consider the rules and regulations of the CFTC. The CFTC was created by Congress in 1974 and is the Federal agency with regulatory and oversight responsibility for the trading of commodity futures and options contracts on the United States futures exchanges. Since 1982, the CFTC has also regulated operations on futures contracts and options on physical commodities trading on commodity markets. On May 1, 1996, the CFTC issued its final rules, which became effective on May 31, 1996, addressing early warning reporting requirements; minimum financial requirements; prepayment of subordinated debt; gross collection of exchange-set margin for omnibus accounts; and capital charge on receivables from foreign brokers. Specifically, the CFTC adopted amendments to the following:

- Rule 1.12, sets forth the financial early warning repurchase agreement requirements for futures commission merchants (FCMs) and introducing brokers (IBs), that are intended to provide the CFTC and industry self-regulating organizations (SROs) with sufficient advance notice of a firm's financial or operational problems and to take necessary protective or remedial action to ensure the safety of customer investments and the integrity of the marketplace. The amendments to this rule, which would be applicable to FCMs only, will—
  - — Require the reporting of a decrease in net capital of 20 percent or more within two business days and a planned reduction in excess adjusted net capital of 30 percent or more two business days prior thereto, and to make that provision applicable to all FCMs, rather than just those FCMs subject to the risk assessment reporting requirements of CFTC Rule 1.15
  - — Require the reporting of a margin call that exceeds an FCM's excess adjusted net capital that remains unanswered by the close of business on the day following the issuance of the call
  - — Require reporting by an FCM whenever its excess adjusted net capital is less than 6 percent of the maintenance margin required to support positions of noncustomers carried by the FCM, unless the noncustomer is itself subject to the CFTC's minimum financial requirements for an FCM or the SEC's minimum financial requirements for a securities broker-dealer
- Rules 1.17(a)(1)(i) and (ii) were amended in order to—
  - — Increase the minimum required dollar amount of adjusted net capital for FCMs from $50,000 to $250,000
  - — Increase the minimum required dollar amount of adjusted net capital for IBs from $20,000 to $30,000
  - — Make the amount of adjusted net capital required by a registered futures association for its member FCMs and IBs an element of the CFTC's minimum financial requirements for FCMs and IBs
- Rule 1.17(h)(2)(vii) was amended with respect to the procedure to obtain approval for prepayment of subordinated debt.
- Rule 1.58, which governs gross collection of exchange-set margins for omnibus accounts carried by FCMs for foreign brokers was also amended.

According to the CFTC, the 5 percent capital charge for unsecured receivables from a foreign broker will not apply in the following instances.

1. The receivables represent deposits required to maintain futures or options positions
2. The foreign broker has been granted comparability relief under CFTC Rule 30.10
3. The asset is held in accordance with the relevant grant of relief under Rule 30.10 at the foreign broker, with another foreign broker that has been granted comparability relief under Rule 30.10, or a depository in the same jurisdiction as either foreign broker in accordance with Rule 30.7

Private Securities Litigation Reform Act

.05 The Private Securities Litigation Reform Act of 1995 (the Act) became effective on December 22, 1995 (though not applicable to pending lawsuits), when Congress overrode a presidential veto. It offers significant relief to the accounting profession from class action securities lawsuits relating to publicly held entities. Such lawsuits will be more difficult to file through the imposition of tougher requirements on plaintiffs and their attorneys. Limitations are placed on accountants' liability and a safe harbor is created for certain projections of financial performance. The legislated reporting responsibility of auditors will be expanded to include a requirement for auditor notification to the SEC of illegalities not appropriately addressed by management.

.06 The Act requires that audits of financial statements by independent public accountants include the following:

- Procedures to identify illegal acts and related-party transactions that would have a direct and material effect on the determination of financial statement amounts
- An evaluation as to whether there is substantial doubt about the ability of the entity to continue as a going concern in the subsequent year

.07 The Act also requires auditors who become aware that an illegal act has or may have occurred to determine the possible effect of fines and other factors on the financial statements. Auditors must then inform the entity's audit committee (or in the committee's absence, the board of directors) of their findings. If the auditor determines that there has been no timely and appropriate response to their notification, the auditor must forward that conclusion to the entity's board of directors. The board is then required to notify the SEC of that report within one business day, providing the auditor with a copy. If the auditor does not receive a copy, the auditor must forward the report of illegal acts to the SEC within the next business day.

Securities and Exchange Commission Proposal to Implement Private Securities Litigation Reform Act

.08 The SEC has released a proposed rule designed to implement the requirements of Section 10A of the Securities Exchange Act of 1934 which was added by Title III to the Private Securities Litigation Reform Act of 1995, which is discussed above. The proposal will incorporate the statutory provisions of Section 10A into the Exchange Act Rules and Regulation S-X. The statutory provisions of Section 10A, which codifies certain professional auditing standards and expands the auditors reporting obligations, can be summarized as follows:

Section 10A(a)—Auditor Responsibilities. This section requires that audits of registrants' financial statements include the following:

- Procedures designed to provide reasonable assurance of detecting illegal acts that would have a direct and material effect on the determination of financial statement amounts
- Procedures designed to identify related party transactions that are material or otherwise require disclosure

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- An evaluation of whether there is substantial doubt about the registrant's ability to continue as a going concern during the ensuing fiscal year

These requirements appear to be consistent with generally accepted accounting principles. In fact, footnote 5 of the release specifically refers to the following for "standards addressing those procedures mandated by Section 10A":

- SAS No. 54, *Illegal Acts by Clients* (AU section 317)
- SAS No. 45, Omnibus Statement on Auditing Standards—1983, "Related Parties" (AU section 334)
- SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341)
- SAS No. 64, *Omnibus Statement on Auditing Standards—1990* (AU section 341)
- SAS No. 77, *Amendments to Statements on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU section 341)
- SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316)

In addition, the definition of "illegal acts" is consistent with that used in SAS No. 54 (AU section 317).

.09 *Section 10A(b)—Auditor Reporting of Illegal Acts.* This section contains provisions that would require the auditor to report certain illegal acts directly to the SEC if the registrant fails to do so. If the auditor becomes aware of information indicating that an illegal act (whether or not material) has occurred or may have occurred, then the auditor would be required "in accordance with GAAS" to determine whether it is likely that an illegal act has occurred and, if so, it's possible effect on the financial statements. The auditor would be required to inform the registrant's management of the illegal act "as soon as practicable." In addition, the auditor must gain assurance that the registrant's board of directors was adequately informed of any detected illegal act. Generally accepted auditing standards (GAAS) already contains similar notification requirements; Section 10A(b) contains the additional requirement that these notifications occur "as soon as practicable."

.10 The auditor would be required to then notify the board of directors directly if the following three conclusions are met:

1. The illegal act has a material effect on the financial statements;
2. Senior management has not taken timely and appropriate remedial action;
3. The failure to take remedial action is reasonably expected to warrant either a departure from the auditor's standard report or the auditor's resignation from the audit engagement.

After receiving such a report, the board of directors has one business day to notify the SEC that it received such a report. If the auditor does not receive a copy of the board's notice to the SEC within that one business day period, then by the end of the next business day the auditor is required to furnish directly to the SEC a copy of the report given to the board.

.11 *Section 10A(c)—Private Rights of Action.* This provision states that there is no private right of action against auditors based on any findings, conclusions, or statements expressed in their reports to the SEC.

.12 *Section 10A(d)—Civil Money Penalties.* This section subjects auditors to civil money penalties if the SEC finds in a cease-and-desist proceeding that the auditor willfully failed to comply with the direct reporting provisions in Section 10A.

.13 *Definition of an Audit.* The proposed amendment would conform the definition of *audit* in Regulation S-X with Section 10A by noting that the audit of the financial statements of SEC registrants should be performed in accordance with GAAS as may be modified or supplemented by the SEC.

.14 *Report Confidentiality.* Reports filed under Section 10A would be confidential and exempt from disclosure under the Freedom of Information Act.

Securities and Exchange Commission Amendments

.15 In May 1996, the SEC amended its Rules 12g-1, 12g-4, and 12h-3 under the Securities Exchange Act of 1934 (the Exchange Act) to increase the total assets threshold for registration and reporting requirements from $5 million to $10 million. The rule amendments, which became effective immediately, will increase the number of issuers not subject to the Act's registration and reporting requirements (for example, Forms 10-K, 10Q, and 8-K). The rule amendments will revise:

- Rule 12g-1 so that an issuer will not be required to register under section 12(g) until it has 500 or more record holders of a class of equity securities and total assets of $10 million or more. The revision does not change the existing requirements that securities traded on national securities exchanges or on the National Association of Securities Dealers, Inc. (NASD) automated quotation system (NASDAQ system) be registered pursuant to section 12 of the Act.
- Rules 12g-4 and 12h-3 to raise the asset threshold from $5 million to $10 million for termination of section 12(g) registration and for the suspension of section 15(d) reporting. The rule amendments do not change the other tests for the termination of registration and for the suspension of reporting. An issuer that conducts a public offering registered under the Securities Act of 1933 will continue to be subject to reporting pursuant to section 15(d) of the Exchange Act unless the issuer otherwise becomes eligible to suspend such reporting.

FOCUS Reports

.16 In February 1996, the SEC approved an NASD requested rule change that will—

- Eliminate the requirement for all NASD member firms to file monthly FOCUS Part I reports.
- Require monthly filings of a modified FOCUS Part II report only for those firms that carry customer accounts and that are subject to the reserve computation requirement of SEC Rule 15c3-3 or are classified as brokers or dealers under the net capital rule. The modified FOCUS Part II report would consist of a balance sheet, net capital computation, reserve formula computation, a one-line profit and loss figure for the month, and certain financial and operational data.
- Require all firms to file a quarterly FOCUS Part II or IIA report, as currently required.

.17 According to the NASD under the rule change, approximately two thousand firms that operate on a fully disclosed basis will no longer have to file a monthly FOCUS Part I report. In addition, those firms that must continue to file monthly will have a simplified filing requirement.

Audit Issues and Developments

Illegal Acts by Clients

.18 During 1996, the United States Justice Department filed a civil complaint in Federal court alleging that two dozen securities firms violated antitrust laws by engaging in anticompetitive behavior (price fixing) on the NASDAQ exchange. While the auditor does not ordinarily have a sufficient basis for recognizing possible violations of laws and regulations when the financial statement effect is indirect, this event, though not suggestive of an industry-wide problem, should serve as a reminder to auditors of their responsibilities with regard to possible illegal acts by clients. Auditors should design their audits to provide reasonable assurance of detecting material misstatements resulting from illegal acts that have a direct and material effect on the determination of financial statement amounts. However, an audit performed in accordance with

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

GAAS does not include procedures specifically designed to detect illegal acts that would have only an indirect effect on the financial statements such as the alleged price-fixing scheme noted above. Auditors should, however, be aware of the possibility that such illegal acts may have occurred. Specific guidance in this area is set forth in SAS No. 54 (AU section 317). In May 1996, the AICPA issued an exposure draft of a proposed Statement on Auditing Standards—*Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, *and No. 47,* Audit Risk and Materiality in Conducting and Audit. The exposure draft is discussed in the "Audit Issues and Developments" section of this Audit Risk Alert.

Underwriting Activities

.19 Issuers of securities often engage broker-dealers to underwrite their public or private offerings. In such arrangements, the underwriter (or a syndicate of underwriters) either agree to buy the securities issued and in turn sell them to the public (commonly referred to as a firm commitment), or agree to sell as much of the security issue as possible, normally with a minimum requirement to complete the underwriting (best efforts approach). Given the high volume of underwriting activity during the current year, along with the postponement of some IPOs during the summer months, this area may present a higher than usual level of audit risk. In auditing a broker-dealer's underwriting cycle, some of the procedures to be considered by auditors include the following:

- Auditors should consider reviewing underwriting contracts to which the broker-dealer is party in order to assess the accounting and disclosure implications of the terms and conditions contained therein. Additionally, auditors may wish to confirm amounts of open contractual commitments as well as assessing management's treatment of its underwriting liability for unsold positions. Auditors should give consideration to subsequent events relating to such transactions—as set forth under SAS No. 1, section 560, *Subsequent Events* (AU section 560), and to assess whether a provision for losses arising from unfulfilled commitments is necessary, and if so, whether it has been properly reflected in the broker-dealer's financial statements.

- Purchase transactions for newly issued securities may involve the payment of a good-faith deposit to the managing underwriter. As part of the audit of a broker-dealer acting in this capacity, auditors may wish to confirm the client's liability with the participants in the offering. Auditors may be confronted with a circumstance in which the broker-dealer, as a participant in an offering, has made a good-faith payment to a managing underwriter. In such cases, the auditor may wish to confirm the client's asset with the managing underwriter.

- In assessing the completeness and accuracy of a client's recorded underwriting commitments, it may be beneficial for auditors to monitor announcements in financial periodicals of securities offerings (commonly referred to as *tombstones*). In those cases in which the offering has been advertised, the auditor can determine whether the broker-dealer has recorded the commitments pertaining to the offerings in which its name appears as manager or participant.

- Underwriters are common targets in shareholder lawsuits. As such, in the evaluation of litigation, claims, and assessments, auditors should ascertain the existence of any current or pending legal action against the broker-dealer. Auditors should pay particular attention to whether the underwriters are jointly or severally liable for legal claims arising in connection with the underwriting. Although the liability of participants who are severally liable is limited to those claims relating to their portion of the securities underwritten, those participants who are jointly liable will be responsible for all claims to the extent that those claims are not satisfied by other participants to the underwriting. Auditors should be aware of their responsibilities in this area pursuant to SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AU section 337).

Valuation of Securities

.20 The valuation of investment securities continues to be a prime concern for auditors of broker-dealers. Investments generally represent the most significant asset in a broker-dealer's statement of condition. Chap-

ter 4, *Auditing Considerations*, of the AICPA's Audit and Accounting Guide *Audits of Brokers and Dealers in Securities* describes the estimation of fair values of securities in good faith by management. In auditing securities' valuations determined by management, auditors should review the information considered by management in determining the value of the securities, ascertain that the procedures followed were reasonable, consider internal control related to the estimation process, and read relevant minutes. Auditors should refer to SAS No. 57, *Auditing Accounting Estimates* (AU section 342), which provides guidance on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates in an audit. In some instances, auditors may consider using the work of a specialist in auditing the valuation of such securities. SAS No. 73, *Using the Work of a Specialist* (AU section 336), provides guidance for when auditors decide to consider the work of a specialist used. Auditing the valuation of such securities is an area that requires a high degree of professional judgment and scrutiny to ensure that the carrying amounts approximate fair value.

On-Line Trading

.21 On-line trading initiated from personal computers continues to increase, advanced predominantly by discount brokers. Although on-line trading has been available for several years to investors who trade shares using their broker's in-house software, investors are increasingly being given the option to buy and sell shares by dialing a computer system using a modem on a home computer. One of the nation's largest discount brokerage firms is expected to offer investors the option of trading certain load and no-load mutual funds on its Internet web site. Many other discount brokers are expected to follow suit by year end. These technological changes are likely to redefine the industry as well as increasing audit risk given that electronic evidence obtained from the client's computer system may not provide the same level of assurance as to authenticity and occurrence as do externally generated documents. Auditors should consider carefully internal control related to on-line and Internet trading along with the nature and sufficiency of available evidential matter underlying on-line trading transactions. The AICPA's Auditing Procedure Study, *Audit Implications of EDI* (product no. 021060), provides auditors with guidance on engagements in an electronic data interchange environment and may be helpful in these circumstances. Additionally, the AICPA recently issued an exposure draft of a proposed SAS, *Amendment to SAS No. 31*, Evidential Matter. The proposed SAS addresses certain issues related to evidential matter in electronic form as discussed in the "AICPA Exposure Drafts: Proposed SASs" section of this Audit Risk Alert.

Service Auditor's Reports

.22 Broker-dealers frequently use the services of fund custodians, transfer agents, and other service organizations that affect assertions in a broker-dealer's financial statements. In obtaining an understanding of a broker-dealer's internal control and assessing control risk, auditors should carefully consider the functions and processing performed by such service organizations. SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324), provides guidance to auditors of entities, including broker-dealers, that use service organizations. SAS No. 70 (AU section 324) may specifically impact custodian and transfer agent third-party internal control reports, as well as multiple-class fund design and operation reporting on expense allocation and the calculation of net asset value per share and distributions.

.23 SAS No. 55 (AU section 319) requires an auditor to obtain an understanding of an entity's internal control sufficient to plan the audit. If a broker-dealer uses a service organization, control activities at the service organization that affect the functions or processing performed by the service organization may have a significant effect on assertions in the broker-dealer's financial statements. For this reason, planning the audit of a broker-dealer may require that the auditor gain an understanding of control activities performed by a service organization. If a broker-dealer relies on a service organization's control activities over the processing of transactions that are material to the broker-dealer's financial statements, these control activities should be considered by the auditor.

.24 One method of obtaining information about these control activities is to get a service auditor's report as described in SAS No. 70 (AU section 324). Auditors frequently ask whether it is necessary to obtain a

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

service auditor's report if their clients use service organizations. The fact that an entity uses a service organization does not, in itself, mean that such a report must be obtained. In certain situations, the broker-dealer may implement control activities that will obviate the need for a service auditor's report. In such circumstances, the broker-dealer is not relying on the service organization's controls.

.25 Some additional factors that may be considered in determining whether to obtain a service auditor's report are the following:

- Whether the transactions or accounts affected by the service organization are material to the broker-dealer's financial statements
- The extent to which the user organization retains responsibility for authorizing the transactions and maintaining the related accountability
- The availability of other information (for example, user manuals, system overviews, and technical manuals) at the broker-dealer (Such information may provide the auditor with sufficient information to plan the audit.)

The AICPA Auditing Procedure Study, *Implementing SAS No. 70,* Reports on the Processing of Transactions by Service Organizations (product no. 021056) can provide auditors with additional guidance in this area.

New Pronouncements

Auditing Standards

.26 *SAS No. 75.* In September 1995, the Auditing Standards Board (ASB) issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except for certain circumstances, as discussed in the Statement. The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.27 *SAS No. 76.* In September 1995, the ASB issued SAS No. 76, *Amendments to Statement on Auditing Standards No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634). The Statement (AU section 634) provides reporting guidance and an example of a letter, actually a form of agreed-upon procedures report, that the accountant can provide in response to a request to provide a comfort letter in circumstances in which the party requesting the letter is not willing to provide the accountant with the representations required in paragraphs 6 and 7 of SAS No. 72 (AU section 634.06 and .07). The Statement is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

.28 *SAS No. 77.* In November 1995, the ASB issued SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. Such reports frequently are prepared in connection with an underwriting of a closed-end fund. SAS No. 77 is effective for engagements beginning after December 15, 1995.

.29 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.30 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58 (AU section 508) concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. Such uncertainties may include the valuation of illiquid investments or those investments for which a readily ascertainable market value does not exist. This Statement does not affect SAS No. 59 (AU section 341) nor preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

.31 A table outlining the significant provisions of the newly issued auditing standards is set forth in the Exhibits section of this Audit Risk Alert.

Attestation Standards

.32 *SSAE No. 4.* In September 1995, the ASB issued Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600). SSAE No. 4 (AT section 600) sets forth attestation standards and provides guidance on the performance and reporting in all agreed-upon procedures engagements, except for in certain circumstances, and is effective for reports on agreed-upon procedures engagements dated after April 30, 1996. SSAE No. 4 (AT section 600) generally should be used when applying agreed-upon procedures to nonfinancial statement subject matter. In addition, SSAE No. 4 (AT section 600) requires a written assertion from management as a condition of engagement performance. Reporting on security counts performed pursuant to Rules 17f-1 and 17f-2 of the 1940 Act should follow SSAE No. 4 (AT section 600). The SEC staff notes that SSAE No. 4 (AT section 600) is not accepted for 17f-1 or 2 reports.

.33 *SSAE No. 5.* In November 1995, the ASB issued SSAE No. 5, *Amendment to Statement on Standards for Attestation Engagements No. 1,* Attestation Standards (AT section 100). This amendment provides guidance on the quantity, type, and content of working papers for attestation engagements and is effective for engagements beginning after December 15, 1995.

.34 *SSAE No. 6.* In December 1995, the ASB issued SSAE No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400). This amendment conforms the description of elements of an entity's internal control to the components of internal control contained in SAS No. 78 (AU section 319) (see discussion in the preceding section) and *Internal Control—Integrated Framework.* The amendment is effective for an examination of management's assertion when the assertion is as of or for the period ending December 15, 1996, or thereafter. Early application of the provisions of this Statement (AT section) is permitted.

.35 *Quality Control Standards.* In May 1996, the ASB issued Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). SQCS No. 2 (QC section 20) supersedes SQCS No. 1, *System of Quality Control for a CPA Firm,* and its Interpretations (QC sections 10 and 10-1). The provisions of these Statements (QC sections 20 and 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997.

.36 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the Accounting and Review Services Committee under Rules 201, *General Standards* (ET section 20158.01), and 202, *Compliance With Standards* (ET section 202.01), of the AICPA Code of Professional Conduct. The definition of a firm's accounting and auditing practice has been revised to include engagements

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

performed under SSAEs issued by the ASB. These standards had not been issued when SQCS No. 1 (QC section 10) was promulgated. Also, the new standard (QC section 20) replaces the nine specific elements discussed in SQCS No. 1 (QC section 10) with the following five broad elements—independence, integrity, and objectivity; personnel management; acceptance and continuance of clients and engagements; engagement performance; and monitoring. SQCS No. 3 (QC section 30) provides guidance on how a firm can implement the new monitoring element of a quality control system in its accounting and auditing practice.

New Independence Standards

.37 The second general auditing standard, "Independence" (AU section 220.07) provides that in all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor or auditors. The precepts established to guard against the presumption of loss of independence are contained in the AICPA's *Code of Professional Conduct*. Recently issued standards relating to independence are enumerated in the following sections:

Ethics Ruling—Indemnification of a Client. The AICPA Professional Ethics Executive Committee issued Ethics Ruling No. 102, *Member's Indemnification of a Client* (ET section 191.204 and .205), as published in the January 1996 *Journal of Accountancy*. This ruling states that auditors should not enter into agreements that would require them to indemnify their client for damages, losses, or costs arising from lawsuits, claims, or settlements that relate, directly or indirectly, to client acts, or their independence will be impaired. In assessing their independence, auditors of investment companies should consider the implication of indemnification arrangements requested by their clients, in light of this new ethics ruling.

Extended Audit Services. The AICPA Professional Ethics Executive Committee issued the following independence standards relating to providing extended audit services:

- Ethics Interpretation 101-13, *Extended Audit Services* (ET section 101.15)
- Ethics Ruling No. 97, *Performance of Certain Extended Audit Services* (ET section 191.194 and .195)
- Ethics Ruling No. 103, *Member Providing Attest Report on Internal Controls* (ET section 191.206 and .207)
- Ethics Ruling No. 104, *Member Providing Operational Auditing Services* (ET section 191.208 and .209)
- Ethics Ruling No. 105, *Frequency of Performance of Extended Audit Procedures* (ET section 191.210 and .211)

The complete text of the standards shown above were published in the August 1996 edition of the AICPA's *Journal of Accountancy* and became effective upon publication.

AICPA Exposure Drafts: Proposed SASs

.38 *Consideration of Fraud in a Financial Statement Audit.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, *and No. 47,* Audit Risk and Materiality in Conducting and Audit Proposed Statement on Auditing Standards. The proposed Statement would provide expanded operational guidance on the consideration of fraud in conducting a financial statement audit. The proposed changes in auditing standards also clarify the auditor's present responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether caused by error or fraud. In addition, the proposed changes provide added guidance on the standard of due professional care in the performance of work, including the need to exercise professional skepticism, and the concept of reasonable assurance. In addition to amending SAS Nos. 1 (AU sections 110 and 230) and 47 (AU section 312), the proposed Statement would:

- Describe fraud and its characteristics.
- Require the auditor to specifically assess the risk of material misstatement due to fraud and provide categories of fraud risk factors that should be considered in the auditor's assessment.
- Provide guidance on how the auditor should respond to the results of the assessment.
- Provide guidance on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud.
- Describe related documentation requirements.
- Provide guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

.39 *Amendment to SAS No. 31, Evidential Matter.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter. This proposed Statement would provide guidance for a practitioner who has been engaged to audit an entity's financial statements where significant information is transmitted, processed, maintained, or accessed electronically. The proposed Statement would include examples of evidential matter in electronic form and provide that an auditor should consider the time during which such evidential matter exists or is available in determining the nature, timing, and extent of substantive tests. In addition, the proposed Statement would indicate that an auditor may determine that, in certain engagement environments where evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests. The proposed Statement would provide that in such circumstances, an auditor should consider performing tests of controls to support an assessed level of control risk below the maximum for affected assertions.

Accounting Issues and Developments

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.40 In June 1996, the FASB issued FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities.* This Statement provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities. Those standards are based on consistent application of a financial-components approach that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished. This Statement provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.41 A transfer of financial assets in which the transferor surrenders control over those assets is accounted for as a sale to the extent that consideration other than beneficial interest in the transferred assets is received in exchange. The transferor has surrendered control over transferred assets if and only if all of the following conditions are met:

1. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.
2. Either (*a*) each transferee obtains the right—free of conditions that constrain it from taking advantage of that right—to pledge or exchange the transferred assets or (*b*) the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right—free of conditions that constrain them from taking advantage of that right—to pledge or exchange those interests.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

3. The transferor does not maintain effective control over the transferred assets through (*a*) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (*b*) an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.

.42 FASB Statement No. 125 requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interest in transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.43 FASB Statement No. 125 requires that servicing assets and liabilities be subsequently measured by (*a*) amortization in proportion to and over the period of estimated net servicing income or loss and (*b*) assessment for asset impairment or increased obligation based on their fair values.

.44 FASB Statement No. 125 requires that debtors reclassify financial assets pledged as collateral and that secured parties recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.

.45 FASB Statement No. 125 requires that a liability be derecognized if and only if either (*a*) the debtor pays the creditor and is relieved of its obligation for the liability or (*b*) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.

.46 FASB Statement No. 125 provides implementation guidance for assessing isolation of transferred assets and for accounting for transfers of partial interest, servicing of financial assets, securitizations, transfers of sales-type and direct financial lease receivables, securities lending transactions, repurchase agreements including "dollars rolls," "wash sales," loan syndications and participations, risk participations in banker's acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishment of liabilities.

.47 FASB Statement No. 125 supersedes FASB Statements No. 76, *Extinguishment of Debt*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. This Statement amends FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights*. This Statement also supersedes Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)*, and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*.

.48 FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Delayed Effective Dates—Accounting Pronouncements

.49 *Disclosures about Fair Value of Financial Instruments.* FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), issued in December 1991, was effective for financial statements issued for fiscal years ending after December 15, 1992. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995. In that

a sizable portion of broker-dealers may be smaller enterprises, financial statements for years ended during 1996 will be subject to the provisions contained therein. In such circumstances, auditors should consider whether management has made all disclosures required by FASB Statement No. 107 (AC F25). In September 1996, the FASB issued an exposure draft of a proposed Statement of Financial Accounting Standards, *Elimination of Certain Disclosures about Financial Instruments by Small Nonpublic Entities*, which, if adopted, would exempt certain small entities from the requirements of Statement No. 107 (AC F25).

.50 FASB Statement No. 107 (AC F25) requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement requires disclosure of descriptive information pertinent to estimating the value of a financial instrument. Certain financial instruments (for example, lease contract, deferred-compensation arrangements, and insurance contracts) are excluded from the scope of the Statement (AC F25).

.51 *Disclosures about Derivative Financial Instruments.* FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), issued in October 1994, was effective for financial statements issued for fiscal years ending after December 15, 1994. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995.

.52 FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), to require disaggregation of information about financial instruments with off-balance-sheet risk of accounting loss by class, business activity, risk, or other category that is consistent with the entity's management of those instruments. The Statement (AC F25) also amends FASB Statement No. 107 (AC F25) to require that fair value information be presented without combining, aggregating, or netting the fair value of derivative financial instruments with the fair value of nonderivative financial instruments and be presented together with the related carrying amounts in the body of the financial statements, a single footnote, or a summary table in a form that makes it clear whether the amounts represent assets or liabilities.

.53 Auditors should consider whether the provisions of FASB Statement No. 119 (AC F25) apply to their broker-dealer clients, and if so, evaluate whether the client's financial statement disclosures are adequate and appropriate in view of the requirements set forth therein.

Restructurings

.54 During the current year, the securities industry has continued its efforts to trim the costs of operations and has seen an increase in the number of mergers and acquisitions. Restructuring often accompanies these activities as redundant functions are eliminated and existing areas streamlined. Restructuring charges typically include employee-related costs, costs associated with the elimination and reduction of product lines, and costs related to the consolidation of operations. Restructuring charges also include asset writedowns and losses on the disposal of assets. If broker-dealers implement restructuring programs, auditors should consider the impact of the reductions in personnel on operations and on the entity's internal control, the appropriateness and completeness of recorded liabilities relating to current restructuring plans, and the appropriate period for reporting the costs associated with restructurings.

.55 In considering restructuring liabilities and costs, auditors should be aware of FASB Emerging Issues Task Force (EITF) Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)*, for authoritative guidance on the appropriate accounting for restructurings. EITF Issue No. 94-3 also provides guidance on the types of costs

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

that should be accrued and the timing of recognition of restructuring charges. It also prescribes disclosures that should be included in the financial statements.

.56 For publicly held entities, SEC Staff Accounting Bulletin (SAB) No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges*, requires that restructuring charges be reported as a component of income from continuing operations.

FASB Exposure Draft

.57 The FASB has issued an exposure draft of a proposed Statement of Financial Accounting Standards, *Accounting for Derivative and Similar Financial Instruments and for Hedging Activities*, which if adopted would establish accounting and reporting standards for derivative financial instruments and other similar financial instruments and for hedging activities. The proposed Statement would be effective for fiscal years beginning after December 15, 1997, with earlier application permitted only as of the beginning of a fiscal year that begins after the issuance of the final Statement. The comment deadline is October 11, 1996.

.58

Exhibit

Significant Provisions of Newly Issued SASs

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.
SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634)	SAS No. 72	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623)	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341]).

Information Sources

.59 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.60 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.61 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.62 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.63 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8180

Not-for-Profit Organizations Industry Developments—1997

Industry and Economic Developments

.01 Overall, the effects of growth on the not-for-profit sector continue to lag behind those on the economy as a whole. Funding that not-for-profit organizations receive from private foundations has increased. Funding from the federal government has remained relatively steady. However, the use of block grants rather than specific program grants for government funding for social service programs is likely to increase. This will result in states having more discretion in the kinds of services that are ultimately funded. Interest rates remained steady, resulting in not-for-profit organizations receiving steady levels of return on their interest-earning investments. Significant increases in equity markets have resulted in higher returns on equity investments, resulting in many organizations earning significant returns on their total investment portfolios. Exhibit 1 summarizes the changes in key economic factors from last year.

Exhibit 1

Economic Factor	*Change from Last Year*
Private Contributions	Information not available. (Increases are expected to outpace inflation.)
Interest Rates	Steady
Corporate Contributions	Increase (5 percent to 7.5 percent)
Equity Markets	Significant Increase
Funding from Foundations	Significant increase (Some surveys say as high as 16 percent)
Government Funding	Steady

.02 The use of gifts, such as annuities, charitable remainder annuity trusts and unittrusts, pooled income funds, and lead trusts, that provide donors with tax deductions while retaining beneficial interests in property continues to increase. Not-for-profit organizations that receive those gifts are faced with the challenge of maintaining the investment assets at sufficient levels to support the required payments to donors and beneficiaries. The recently issued AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, which is discussed in the "AICPA Guide Project" section of this Audit Risk Alert, provides new guidance concerning accounting for those gifts. Auditors should consider whether organizations' accounting for those gifts are appropriate and consistently applied.

.03 The media continue to focus attention on issues relating to not-for-profit organizations, including the following:

- Reasonableness of compensation
- Fringe benefits
- Perquisites afforded to the senior management personnel of some organizations
- Conflicts of interest arising from transactions with members of the board of trustees and other insiders
- Lobbying activities

- The perception that expenditures for program services are too low as a percentage of total expenditures
- Fraud and abuse
- The amounts of assets held by not-for-profit organizations
- The portion of revenue earned from fees for goods or services
- Whether activities undertaken by the organization are consistent with its exempt purpose
- Contractual compliance and excess revenues related to government sponsored or funded programs

The adverse publicity concerning such issues continues to adversely affect the amounts some donors are willing to contribute. Furthermore, the excess benefits of executives may have the following consequences:

- The imposition of fines on the organization by the Internal Revenue Service (IRS) under recently enacted intermediate sanctions, which are discussed in the "IRS Activities" section of this Audit Risk Alert
- Jeopardizing the tax-exempt status of the organizations they serve

.04 Changes in funding as well as increased scrutiny continue to exert pressure on not-for-profit organizations to maximize investment returns and to present financial statements that make their operations appear as efficient as possible. Auditors should consider the effect that such pressures may have on audit risk, particularly those associated with areas such as (1) allocation of costs between program services and support services and (2) potentially high-risk investments, such as certain derivatives and equity instruments.

.05 Like many organizations, some not-for-profit organizations are restructuring and reengineering their operations to become more efficient. Auditors should consider the effects of such restructuring and reengineering on their consideration of internal controls, as well as considering whether such charges are reported in conformity with generally accepted accounting principles (GAAP).

Regulatory and Legislative Developments

Major Changes to Single Audits of Federal Awards

.06 The promise of major change in single audit policy became a reality during 1996. These changes continue to be finalized during the first half of 1997. Auditors performing audits of federal awards should follow developments in this area closely to ensure that the appropriate guidance is followed. The sections below summarize four key pieces of guidance which have been or are currently being revised for single audits and program-specific audits of federal awards. The latter three, U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations,* the *Compliance Supplement,* and the AICPA Statement of Position, were not completed at the time of publication of this Audit Risk Alert. Information on the status of these documents will be published in the *Journal of Accountancy* and *The CPA Letter* and will be made available on the AICPA Fax Hotline and home page (http://www.aicpa.org).

.07 *Single Audit Act Amendments of 1996 (1996 Amendments).* On July 5, 1996, President Clinton signed into law legislation amending the Single Audit Act of 1984 (Public Law 104-156), which is effective for fiscal years beginning after June 30, 1996. The 1996 Amendments extend the act's jurisdiction to not-for-profit organizations, raise the dollar threshold for audit coverage to $300,000 from $25,000, implement a risk-based approach to identify the major federal programs to be audited, and shorten the audit report due date to nine months after a transition period of two years. The 1996 Amendments are discussed further in a November 1996 *Journal of Accountancy* article entitled "Auditing Federal Awards, A New Approach." A copy of the 1996 Amendments is also available on the AICPA Fax Hotline; dial (201)-938-3787 from a fax machine and select document number 402. The full text of the amendments is located on IGnet at http://www.sbaonline.sba.gov/ignet/under the listing "Single Audit."

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.08 *OMB Circular A-133*, Audits of States, Local Governments, and Non-Profit Organizations. A revised OMB Circular A-133, applicable only to not-for-profit organizations, was issued on April 22, 1996. Once the 1996 Amendments were passed (see above), it became necessary for the OMB to propose another revision to OMB Circular A-133 to add states and local governments to the scope of the Circular and to comply with certain other aspects of the 1996 Amendments. This proposed revision was issued in the November 5, 1996, *Federal Register* (61 FR 57231), and a final document is expected to be issued before June 30, 1997. The OMB intends to rescind Circular A-128, *Audits of State and Local Governments*, which is the existing regulation governing audits of federal awards for states and local governments once OMB Circular A-133 is issued in final form.

.09 Once finalized, OMB Circular A-133 will establish audit requirements that apply to not-for-profit organizations (including hospitals and colleges and universities) and state, local, and Indian tribal governments, and will be effective for fiscal years beginning after June 30, 1996. Provisions of the revised Circular include the following:

- The threshold for audit is raised to $300,000 from $25,000.
- Auditors are required to identify major programs on the basis of a risk assessment, considering prior audit experience, oversight performed by federal agencies and others, and the inherent risk of the program, rather than solely on the basis of federal expenditures. Due to the timing of the issuance of the final Circular and related audit guidance, auditors may want to consider a provision in the Circular that allows auditors to determine major programs solely on the basis of federal expenditures for first year audits. First year audits are defined as the first year that an entity is audited under the new Circular or the first year of a change of auditors. As an example, if an auditor has a client with a June 30, 1997, fiscal year end, the use of the risk-based approach to determine major programs would be optional for that year because it would be the first audit under the new Circular.
- Major program coverage is required to be a minimum of 50 percent (or 25 percent for low-risk auditees) of the federal awards expended.
- The required level of testing of internal control over major programs is clarified as being based on auditors' planning for a low assessed level of control risk.
- Guidance is included for conducting program-specific audits covering those situations in which a federal grantor agency has not issued a program-related audit guide, as well as those situations in which a program-specific audit guide has been issued by the grantor agency.
- Minimum requirements for the Schedule of Expenditures of Federal Awards are provided.
- Guidance is included concerning the following:
  1. Reporting audit findings in a single schedule of findings and questioned costs which includes a summary of the audit results, and findings and questioned costs related to the financial statement audit as well as to federal awards
  2. Thresholds for determining which audit findings should be included in the schedule of findings and questioned costs
  3. Descriptions of what information auditors should include in an audit finding
  4. Required follow-up on audit findings
- Auditee management is required to provide a corrective action plan for current year audit findings and a summary schedule reporting the status of prior year audit findings.
- The definition of *non-profit organization* is revised to include non-profit hospitals.
- Restrictions are imposed on auditor selection whereby auditors who also prepare the indirect cost proposal or cost allocation plan are prohibited from being selected as the auditor if the indirect costs recovered in the prior year are greater than $1 million in total. This provision is not effective until audits of fiscal years beginning after June 30, 1998.

- The due date is shortened for submitting reports to nine months from thirteen months, after a two-year transition period. The transition period is for fiscal years beginning on or before June 30, 1998, during which auditees will have thirteen months after the end of the audit period to complete the audit and submit the reporting package. The provision for a cognizant or oversight agency to grant an extension is retained. Also the report submission process is streamlined, including incorporating a data collection form, and expanding the role of the federal clearinghouse.

Auditors should note that the November 1996 proposed revisions to OMB Circular A-133 included two significant changes from the earlier revision concerning the data collection form and audit coverage of indirect cost pools. In summary, the proposal would require auditors to prepare and sign the data collection form, and test and report on the allowability of costs charged to cost pools. Because the final resolution of these issues is unknown at this time, auditors should carefully review the final Circular for any new requirements.

.10 As noted in the preceding paragraphs, the 1996 Amendments are effective for fiscal years beginning after June 30, 1996, and OMB expects to issue the revised OMB Circular A-133 before June 30, 1997. OMB will instruct federal agencies to adopt OMB Circular A-133 in codified regulations within six months after publication of the final OMB Circular A-133 in the *Federal Register* so that it will apply to audits of fiscal years beginning after June 30, 1996. Therefore, the revised OMB Circular A-133 should be followed for audits of years beginning after June 30, 1996. Until such time as OMB publishes the final revision of OMB Circular A-133, auditors are encouraged to use the revision of OMB Circular A-133 published in the November 5, 1996 *Federal Register* for planning purposes.

.11 Last, as a result of the issuance of the 1996 Amendments and revisions to OMB Circular A-133, questions have arisen with regard to the status of position statements issued by the President's Council on Integrity and Efficiency (PCIE). These position statements were originally developed to address issues related to audits conducted under the Single Audit Act of 1984, OMB Circular A-128, and the March 1990 version of OMB Circular A-133. Therefore, with the exception of PCIE Statement No. 4, none of the remaining position statements is applicable to audits conducted under the 1996 Amendments or the new OMB Circular A-133 requirements.

.12 Upon publication, a copy of the final revision to OMB Circular A-133 may be obtained from the *Federal Register*; the OMB fax information line (202) 395-9068, document number 1133; the OMB home page on the Internet, which is currently located at http://www.whitehouse.gov/WH/EOP/OMB/html/ombhome.html; or by calling or writing the Office of Administration, Publications Office, Room 2200, New Executive Office Building, Washington, DC 20503, telephone (202) 395-7332.

.13 *Compliance Supplement.* A revised OMB Compliance Supplement which is currently under development will set forth the material compliance requirements that are to be included in an audit in accordance with OMB Circular A-133. It will cover states, local governments, and not-for-profit organizations. The OMB is expected to issue a Provisional Compliance Supplement before June 30, 1997, to replace the existing Compliance Supplements entitled *Compliance Supplement for Single Audits of State and Local Governments* (issued in September 1990) and *Compliance Supplement for Institutions of Higher Learning and Other Non-Profit Institutions* (issued in October 1991), which are no longer current. It is expected that a notice will be provided in the *Federal Register* of the Provisional Supplement's availability along with a request for public comment. Auditors should use the Provisional Supplement until the public comment process is completed and OMB issues a Final Supplement. OMB anticipates issuing a Final Supplement in 1998.

.14 The most significant changes to the revised Compliance Supplement will include the following:

- A compliance matrix, which provides an overview of the compliance requirements applicable to the programs listed in the supplement
- Replacement of the classifications of general requirements and specific requirements with the following fourteen types of compliance requirements, all of which are covered by the auditor's opinion on compliance:

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

  - — Activities Allowed or Unallowed
  - — Allowable Costs/Cost Principles
  - — Cash Management
  - — Davis-Bacon Act
  - — Eligibility
  - — Equipment and Real Property Management
  - — Matching, Level of Effort, Earmarking
  - — Period of Availability of Federal Funds
  - — Procurement and Suspension and Debarment
  - — Program Income
  - — Real Property Acquisition and Relocation Assistance
  - — Reporting
  - — Subrecipient Monitoring
  - — Special Tests and Provisions
- Audit objectives and suggested audit procedures for each type of compliance requirement
- Expanded guidance on allowable costs and cost principles, which includes a comparison of the requirements between the common rule, OMB Circular A-21, *Cost Principles for Educational Institutions;* and OMB Circular A-122, *Cost Principles for Non-Profit Organizations*
- Detailed guidance on how to determine applicable compliance requirements, control objectives, and audit objectives for programs not listed in the Compliance Supplement
- Characteristics of internal control over compliance are presented in the format included in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission

.15 Initially, the Provisional Supplement will include approximately twenty-five federal programs. This is far less than what was included in the Compliance Supplements that are being replaced. However, the OMB has made a commitment to continue working on the Provisional Supplement and to include additional programs in the Final Supplement. As noted above, the OMB will be adding guidance to the Compliance Supplement that instructs auditors on the appropriate steps to take when a program is not included. The Compliance Supplement will be available from the Government Printing Office (See the table under the section of this Audit Risk Alert entitled "Information Sources" for information on how to contact the Government Printing Office) and the OMB home page on the Internet, which is currently located at http://www.whitehouse.gov/WH/EOP/OMB/html/ombhome.html. Once the supplement has been issued, more detailed guidance on how to obtain copies will be included in the AICPA's *CPA Letter* and posted on the OMB and AICPA home pages.

.16 *AICPA Statement of Position.* With the changes described in the preceding three sections, Statement of Position (SOP) 92-9, *Audits of Not-for-Profit Organizations Receiving Federal Awards,* and certain sections of the Audit and Accounting Guide *Audits of State and Local Governmental Units* (the Guide) have become outdated. In response, the AICPA is in the process of developing a new SOP that will supersede SOP 92-9 and the sections of the Guide that are outdated. The new SOP is expected to be issued during the summer of 1997 (assuming that the previously described OMB guidance is issued on the dates planned) and will provide auditors of states, local governments, and not-for-profit organizations with guidance on the work performed and the reports issued for audits under the 1996 Amendments, and OMB Circular A-133. It will also include revised simplified illustrative audit reports. The new illustrative simplified reports will include one report on the financial statements, one report that will meet the requirements for reporting on compliance

and internal control under *Government Auditing Standards* (GAS, also known as the Yellow Book), and one report that will meet the requirements of the 1996 Amendments and OMB Circular A-133 for reporting on single audits of federal awards.

OMB Circulars A-21 and A-122

.17 Auditors involved with audits of federal awards for colleges and universities should be aware that the OMB issued revisions to OMB Circular A-21 in May 1996 (*Federal Register*, May 8, 1996) which are effective for fiscal years beginning after May 8, 1996. The revisions incorporate four cost accounting standards issued by the Cost Accounting Standards Board (CASB) applicable to all sponsored agreements subject to OMB Circular A-21 and extend the applicability of the CASB disclosure statement to universities that receive more than $25 million in federally funded sponsored agreements. It also amends the definition of equipment; eliminates the use of special cost studies to allocate utility, library, and student services costs (effective for fiscal years beginning on or after July 1, 1998); requires the use of fixed facilities and administrative cost rates for the life of sponsored agreements; establishes cost negotiation cognizant agency responsibilities; clarifies the policy for a change from use allowance to depreciation; adds criteria to interest allowability; and disallows tuition benefits for employee family members for fiscal years beginning on or after September 30, 1998. In performing audits in accordance with OMB Circular A-133, auditors should consider whether organizations subject to OMB Circular A-21 have complied with the CASB standards and disclosure requirements incorporated therein.

.18 In October 1995, OMB published proposed revisions to OMB Circular A-122. The proposed revisions would change the definition of equipment, make certain additional costs unallowable, modify the multiple allocation based method for computing indirect cost rates, and place a 26 percent ceiling on the administrative portion of indirect costs for organizations with federal funding over $10 million. The proposed changes would provide consistency among OMB Circulars for not-for-profit organizations, state and local governments, and educational institutions. The period for commenting on the proposal has expired and the final revision is expected to be issued in October 1997.

U.S. Department of Education Issues New Drawdown Procedures for Grant Payments

.19 Auditors with clients that receive grants from the U.S. Department of Education should be aware of changes in the procedures for grant payments accounting and reporting. A letter was issued in July 1996, notifying program recipients of the new drawdown procedures to take effect in 1997 between July and September. The fundamental change is that recipients will have to request Department of Education dollars by individual program when drawdowns are made. In the past, recipients were allowed to pool their drawdowns into a single amount without identifying the specific programs being funded. The new procedure may require many recipients to change their internal processes and systems. Auditors should consider this change when testing cash management in conjunction with single audits. Contact Charles L. Coleman, Director of Cash Management, U.S. Department of Education, for further information at (202) 401-1776.

Audit Quality

.20 The AICPA and the President's Council on Integrity and Efficiency (PCIE) are involved in a cooperative effort in which Federal Inspectors General (IGs) of government agencies refer to the AICPA Professional Ethics Division audits of entities receiving federal awards that the IGs consider to be of a substandard nature. Also, the PCIE issues periodic reports on the results of IG desk reviews and quality control reviews of work performed by independent auditors. Information gathered during these investigations about the most common deficiencies can be useful to auditors when undertaking, planning, and conducting audit engagements of entities receiving federal awards. Some of the more common deficiencies cited by reviewers include—

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Deficient audit reports (incorrect reports on internal control or compliance, not all required information included, incorrect presentation of financial information without proper qualification, improper or missing opinion, incorrect or missing findings, no disclosure of reportable conditions)
- Inadequate working papers (failure to adequately support opinion, no documentation of required procedures such as internal control evaluation, analytical procedures, or subsequent events review)
- Failure to perform all procedures required in agency audit guide or compliance supplement (no compliance testing, no study and evaluation of internal control)

The risks and ramifications to auditors of issuing deficient audit reports or performing inadequate audits are significant. AICPA-required corrective actions and sanctions can include mandatory CPE in specified subjects, mandatory work product preissuance reviews, preclusion from performing quality reviews, and suspension or expulsion from the AICPA and state CPA society. Substandard audit work can also result in actions by state boards of accountancy such as fines and loss of license or certification.

Other Federal Issues

.21 *Business-Related Activities.* Some businesses believe that tax-exempt not-for-profit organizations have unfair competitive advantages over taxable entities and have asked the U.S. Congress to pass laws to eliminate those perceived advantages. Such laws could adversely affect some not-for-profit organizations, although their passage does not appear imminent.

.22 *Work Opportunity Reconciliation Act and Health Care Reform Issues.* In August 1996, the federal government passed the Personal Responsibility and Work Opportunity Reconciliation Act (Public Law 104-193) to overhaul the welfare system. Beginning October 1, 1996, states gained broad authority over their own welfare programs, and the form of federal funding was changed to block grants, giving the states flexibility in determining who is eligible for the funds. On an overall basis, the law is expected to reduce the amount of government funds expended for welfare per person. As a result, not-for-profit organizations that provide programs to serve the homeless, immigrants, the poor, and others who may be adversely affected by the overhaul may receive pressure to increase their levels of service. Some are responding to that pressure by changing the ways in which they raise funds, and operate and deliver services.

.23 Similarly, continued state wide initiatives to move health care services (physical care as well as behavioral care) to managed care arrangements are creating opportunities as well as challenges to some organizations. These organizations must assess changes to their service delivery systems and funding mechanisms but are also identifying opportunities to provide new services or to serve new populations.

.24 Auditors should consider the effects of these changes on their consideration of internal control and on the organization's compliance with applicable laws and regulations.

.25 Also, some organizations may be motivated to increase their lobbying activities at the state level as they compete for funds. Auditors should consider whether those activities are in accordance with IRS restrictions on lobbying activities.

.26 In addition, the act eases restrictions that religious organizations may face in establishing eligibility for federal funds. As a result, some religious organizations may receive increased government funds and may also be subjected to increased audit and compliance requirements. For example, the organization may be required to have an audit performed in accordance with *Government Auditing Standards* issued by the Comptroller General of the United States or in accordance with OMB Circular A-133. Auditors should consider whether the organization has complied with applicable laws and regulations. Paragraphs 21 through 23 of Statement on Auditing Standards (SAS) No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AU section 801.21–.23), provide

guidance on the auditor's responsibilities if he or she becomes aware that the entity is subject to an audit requirement that may not be encompassed in the terms of the engagement. SAS No. 74 (AU section 801) provides that, in that situation, "the auditor should communicate to management and the audit committee, or to others with equivalent authority and responsibility, that an audit in accordance with generally accepted auditing standards may not satisfy the relevant legal, regulatory, or contractual requirements." SAS No. 74 (AU section 801) also notes that "the auditor should consider how the client's actions in response to such communication relate to other aspects of the audit, including the potential effect on the financial statements and on the auditor's report on those financial statements. Specifically, the auditor should consider management's actions (such as not arranging for an audit that meets the applicable requirements) in relation to the guidance in SAS No. 54 [*Illegal Acts by Clients* (AU section 317)]."

.27 *Philanthropy Protection Act of 1995.* The Philanthropy Protection Act of 1995, which took effect March 6, 1996, exempts charitable gift annuities, charitable remainder unittrusts, charitable remainder annuity trusts, and other kinds of split-interest agreements that will be commingled for investment purposes from the Investment Company Act and other securities laws. Also, it requires organizations to make certain written disclosures about the terms of the operations of the fund to potential contributors. Auditors should consider whether organizations have made the disclosures required by the act.

.28 *New Postal Rates.* In October 1996, the U.S. Postal Service changed its rate structure for not-for-profit organizations. The Postal Service estimates that the changes will save organizations an average of 6.4 percent for each piece of mail they send, though rates will increase for certain kinds of mail, such as mail that is neither sorted according to certain specifications, delivered to local postal facilities, nor bar coded. Auditors should consider the effects of such changes when performing their analytical procedures and other substantive tests of expenses.

State and Local Issues

.29 State and local laws concerning not-for-profit organizations continue to change. Some states have enacted or are revising existing laws concerning not-for-profit registration or licensing requirements; annual reporting requirements; charitable solicitation, registration, and disclosure requirements; charitable gift annuity registrations; and limitations on fund-raising expenses. Also, some states have increased efforts to have not-for-profit organizations pay property taxes, collect and remit sales and use taxes, or make other payments in lieu of such taxes. The American Association of Fund-Raising Counsel, Inc. (AAFRC) publishes its *Annual Survey of State Laws Regulating Charitable Solicitations* (available for $24). Copies of this publication can be obtained by writing to the AAFRC, Suite 820, at 25 West 43d Street, New York, NY 10036, or by calling (212) 354-5799.

IRS Activities

.30 Auditors should be aware of applicable tax laws and regulations and their potential impact on not-for-profit organizations and their financial statements. An organization's failure to maintain its tax-exempt status could have serious tax consequences and affect both its financial statements and related disclosures, and it could possibly require modification of the auditor's report. Failure to comply with tax laws and regulations could be an illegal act that may have either a direct and material effect on the determination of financial statement amounts. Examples include the result of an incorrect accrual for taxes on unrelated business income (UBI) or a material indirect effect on the financial statements that would require disclosures, such as the result of a potential loss of tax-exempt status. SAS No. 54 (AU section 317) discusses the nature and extent of the consideration the auditor should give to the possibility of illegal acts and provides guidance on the auditor's responsibilities when a possible illegal act is detected.

.31 *Intermediate Sanctions and Other Matters.* On July 30, 1996, the Taxpayer Bill of Rights (HR 2337) was enacted into law. This law allows the IRS to impose harsh penalties on insiders and managers of section

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

501(c)(3) and section 501(c)(4) organizations in certain circumstances related to excess benefit transactions. Under the new law, disqualified persons who unjustly benefit from an organization are subject to a first-tier penalty excise tax of 25 percent of the excess benefit amount. Also, organization managers who knowingly participate in an excess benefit transaction are subject to an excise tax of 10 percent. Further, taxes may be imposed on disqualified persons who do not correct the transaction by undoing the excess benefit to the extent possible.

.32 An *excess benefit transaction* is a transaction in which an economic benefit is provided to or for the use of any disqualified person if the value of the economic benefit provided directly by the organization exceeds the value of the consideration received by the organization. Also included is any transaction in which the amount of any economic benefit provided to any disqualified person is determined by the revenues of the organization, provided the transaction constitutes prohibited inurement under the present law. A *disqualified person* is any individual who is in a position to exercise substantial influence over the affairs of the organization, whether by being an organization manager or otherwise. Also included are certain family members and 35-percent-owned entities of a disqualified person, as well as anyone who was a disqualified person at any time during the five-year period prior to the transaction at issue. An *organization manager* is an officer, director, trustee or anyone who has the power or authority of an officer, director, or trustee.

.33 In general, intermediate sanctions are effective for excess benefit transactions occurring on or after September 14, 1995. However, they do not apply to transactions occurring pursuant to a written contract that was binding on September 13, 1995, and at all times thereafter before such benefits arose, and the terms of which have not materially changed. The Treasury Department and the IRS will likely issue regulations and provide guidance for interpretations of these provisions.

.34 Congress is considering expanding the provisions concerning excess benefit transactions to other tax-exempt organizations, such as those under section 501(c)(5) (for example, labor unions) and those exempt under section 501(c)(6) (for example, business leagues), but further action is not imminent.

.35 Also, under this law, all tax-exempt organizations must provide copies of their three most recent annual information returns and application for exemption from tax to the general public. Specifically, if the request is made in person, a copy must be made available immediately, with certain exceptions, such as if the requested documents have been made widely available to the public. If not made in person, a copy must be provided within 30 days. The organization may charge a reasonable fee for copying and mailing costs. The penalty for failure to furnish a requested information return or exemption application is $10 for each day during which such failure continues, with a $5000 limit on the return penalty and no limit on the exemption application penalty.

.36 The rules concerning the annual information return and application for exemption from tax to the general public will not go into effect until 60 days after regulations to implement them have been issued.

.37 On September 12, 1996, the IRS issued a notice in which they requested comments in drafting future guidance. In particular, comments were requested concerning ways in which the organization can make relevant documents widely available.

.38 *Eligibility as an S Corporation Shareholder.* For tax years beginning after 1997, qualified charities and certain retirement plans will be eligible to be S corporation shareholders. Currently, and until 1998, the contribution of voting or nonvoting S corporation stock to either of these entities would have terminated the S election for the business.

.39 The not-for-profit organization must treat the shares of the S corporation as an interest in an unrelated trade or business. Therefore, the items of income, loss, deduction, or credit that flow through to the tax-exempt shareholder and gain or loss on the sale of the stock will be treated as UBI. This characterization

of the income and loss as UBI applies regardless of the nature of the income actually passed through. Therefore, interest income (ordinarily excluded from UBI due to its passive nature) will be treated as UBI.

.40 *Increased Penalties for Failure to File Form 990.* The penalty for failure to file timely or complete returns for small tax-exempt organizations has been increased from $10 to $20 per day, with a maximum fine of the lesser of $10,000 or five percent of the organization's gross receipts. Large organizations (those having gross receipts exceeding $1 million) are subject to a penalty of $100 per day, with a maximum of $50,000. No penalty will be imposed if an organization can show that the failure to file a complete return was due to reasonable cause. This provision applies to returns for taxable years ending on or after July 30, 1996.

.41 *Establishing 401(K) Plans.* Since 1986, tax-exempt organizations have been prohibited from establishing 401(k) plans. Therefore, many section 501(c)(3) and governmental education organizations established 403(b) plans that provide employees with the ability to defer wage income into annuity investments. Under the recent tax bill, all tax-exempt organizations are once again permitted to establish 401(k) plans. This provision is effective for plan years beginning after December 31, 1996.

.42 *Unrelated Business Income Taxes.* If UBI taxes are material to the financial statements, they must be accrued. Auditors should consider the following developments in determining whether liabilities for taxes are properly reported:

- *Taxability of affinity and rental revenue from mailing lists.* The 9th Circuit Court of Appeals ruled that income from the rental of the Sierra Club's mailing list, which was used in connection with an affinity program, is nontaxable royalty income because the revenue represents payments for the right to use intangible property. The Sierra Club did not actively participate in the rental of its list but instead engaged an unrelated mailing list broker, who paid royalties to the club.

  However, the Court refused to agree that all of the club's income from the affinity program constituted exempt royalties. As a result, the issue of whether the club's affinity program income is fully nontaxable has been remanded to the Tax Court for additional tax finding. The IRS will continue to pursue this issue.

- *Administrative services.* The IRS recently issued two identical rulings concerning fees earned by an exempt fraternal organization in exchange for its performance of administrative services for closely related exempt organizations. The fraternal organization charged the lower of its cost or market for its services, and expense allocations were reviewed by the related exempt organization's board of directors. The IRS ruled that due to the close control relationship between the entities, the services should be considered to contribute to the fraternal organization's exempt purpose. Accordingly, the charge for administrative services will not be subject to UBIT.

- *Instant bingo.* In an appeal from the Tax Court, the 5th Circuit Court of Appeals recently confirmed that what is commonly called *instant bingo* (or *pull tab bingo*) is not bingo for tax purposes. Thus, at least in the 5th Circuit, income from instant bingo cannot avoid UBI tax using the statutory exception for bingo. However, the organization involved in the case would have avoided tax on the income if it ether had used volunteers to run the activity or had conducted it on an irregular basis.

- *Museum activities.* A recently released Technical Advice Memorandum (TAM 9550003) focuses on the taxability of various activities undertaken by museums. It provides insight concerning the current thinking of the IRS on a number of UBI issues regularly faced by museums.

.43 *Taxable Subsidiaries.* The IRS recently issued Private Letter Ruling (PLR) number 9542045, which discusses several issues concerning taxable subsidiaries of tax-exempt entities, such as potential taxation on formation, the requirement to maintain operations that are separate from the operations of the tax-exempt entity, and factors to consider concerning section 512(b)(13) in order to avoid unrelated business income on royalty payments. Also, the Treasury has released proposed regulation 1.337(d)-4 under section 337(d). Under the proposed regulations, if a taxable corporation transfers all or substantially all of its assets to one or more tax-exempt entities, the taxable corporation must recognize gain or loss as if the assets transferred

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

were sold at fair market value. This can also apply if the taxable corporation changes its status to tax-exempt. Proposed regulations are effective thirty days after publication as final regulations. Similar treatment applies under section 337 (b)(1) on a liquidation of a taxable corporation into an exempt parent organization.

.44 *Tax-Sheltered Annuity Voluntary Correction (TVC) Program Extended.* The IRS's TVC program, which began in 1995, gives plan sponsors of section 403(b) annuity plans the opportunity to voluntarily correct any plan defects. The program was scheduled to conclude October 1996. However, the IRS has recently announced that the program has been extended until December 31, 1998. Use of the TVC program may result in significantly reduced settlements with the IRS, compared to assessments based on deficiencies discovered during audits performed by the IRS.

.45 Based on past IRS audit experience, thousands of exempt organizations are believed to have defective plans. But, as of July 15, 1996 only 31 had taken advantage of the TVC program. The IRS has speculated that employers are awaiting to see how harshly the penalties are being applied. The IRS proposed examination guidelines were included in Announcement 96-25, 1996-17 Internal Revenue Bulletin No. 1.

.46 *Lobbying Disclosure Act of 1995.* The Lobbying Disclosure Act of 1995 requires organizations that lobby to register and report their federal lobbying activities. The act includes definitions of lobbying activities, including exemptions for organizations spending less than $20,000 on lobbying activities during a semiannual reporting period, and for religious organizations exempt from filing tax returns. Organizations meeting certain requirements must register with the U.S. Congress and file semiannual reports no later than February 14 and August 14 of each year. Failure to comply with the provisions of the act may result in civil penalties up to $50,000.

Audit Issues and Developments

Internal Control

.47 Changes in financial accounting standards, increased attention to the requirements to properly bill overhead costs to government agencies, restructuring, increased participation in affinity programs or similar arrangements, and expanded contractual audit requirements are resulting in the need for significant changes in the accounting systems and internal control of not-for-profit organizations. In addition, as the overall economy improves, competition for qualified staff increases and not-for-profit organizations, which tend to pay lower salaries than for-profit entities, may have difficulty retaining well qualified staff, which may result in changes in internal control. Auditors should ensure that they have a sufficient understanding of the organization's internal control in order to plan and perform the audit. As discussed in the "Auditing Pronouncements" section of this Audit Risk Alert, in December 1995, the AICPA's Auditing Standards Board (ASB) issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which discusses the auditor's consideration of internal control in a financial statement audit.

.48 *Affinity Programs and Other Affiliations.* Some entities, including some operating on the Internet, offer not-for-profit organizations fund-raising opportunities through various arrangements, such as affinity programs and investment networks. Some of those arrangements may be fraudulent, such as those that are actually investment pyramids, and organizations associated with them may be committing illegal acts. SAS No. 54 (AU section 317) discusses the nature and extent of the consideration that auditors should give to the possibility of illegal acts and provides guidance on the auditor's responsibilities if a possible illegal act is detected.

.49 Some affinity programs or other arrangements offer organizations royalties or other income in exchange for using the organization's name or logo. Auditors should consider internal controls over revenue earned and received under such arrangements.

Auditing Pronouncements

.50 Exhibit 2 summarizes six new Statements on Auditing Standards that have been recently issued.

Exhibit 2

Pronouncement	Pronouncements Affected	Key Provisions	Effective Date
SAS No. 77, *Amendments to Statement on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, and 623)	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared; precludes the use of conditional language in a going concern report	The Statement (AU sections 311, 341, and 623) is effective for engagements beginning after December 15, 1995.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	Recognizes the COSO definition of internal control	The Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application encouraged.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341])	The Statement (AU section 508) is effective for reports issued on or after February 29, 1996, with earlier application permitted.
SAS No. 80, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter (AU section 326)	SAS No. 31	Provides guidance for audits in which significant information is transmitted, processed, maintained, or accessed electronically	The Statement (AU section 326) is effective for engagements beginning on or after January 1, 1997.
SAS No. 81, *Auditing Investments,* (AU section 332)	SAS No. 1	Revises the guidance on auditing investments to make that guidance consistent with recently issued accounting standards, particularly FASB Statement Nos. 115 (AC I80) and 124 (AC No5)	The Statement (AU section 332) is effective for audits of financial statements for periods ending on or after December 15, 1997.
SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU section 316)	SAS No. 53	Provides expanded guidance on the consideration of fraud in conducting a financial statement audit	The Statement (AU section 316) is effective for audits of financial statements for periods ending on or after December 15, 1997.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.51 *SAS No 77.* In November 1995, the ASB issued SAS No. 77, *Amendments to Statement on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77 (AU sections 311, 341, and 623) is effective for engagements beginning after December 15, 1995.

.52 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78 (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in the COSO Report. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.53 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, if certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58, *Reports on Audited Financial Statements* (AU section 508), concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. This SAS (AU section 508) neither affects SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), nor precludes the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted. Auditors are permitted to delete the uncertainties paragraph in their audit reports for year end audits.

.54 *SAS No. 80.* In December 1996, the ASB issued SAS No. 80, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter (AU section 326). This Statement (AU section 326) amends SAS No. 31, *Evidential Matter* (AU section 326), to recognize that evidential matter may exist only in electronic form. It also provides guidance to auditors engaged to audit the financial statements of entities for which significant information is transmitted, processed, maintained or accessed electronically.

.55 SAS No. 80 (AU section 326) recognizes that, in certain entities, some of the accounting data and corroborating evidential matter are available only in electronic form. Source documents such as purchase orders, bills of lading, invoices, and checks might be replaced with electronic messages. In image processing systems, source documents are scanned and converted into electronic images to facilitate storage and reference, and the source documents may not be retained after conversion. SAS No. 80 (AU section 326) also states that, in entities in which significant information is transmitted, processed, maintained, or accessed electronically, the auditor may determine that it is not practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. For example, the potential for the improper initiation or alteration of information to occur and not be detected may be greater if information is produced, maintained, or accessed only in electronic form. In such circumstances, the auditor should perform tests of controls to gather evidential matter to use in assessing control risk, or consider the effect on his or her report. SAS No. 80 (AU section 326) is effective for engagements beginning on or after January 1, 1997.

.56 *SAS No. 81.* In December 1996, the ASB issued SAS No. 81, *Auditing Investments* (AU section 332), which supersedes SAS No. 1, section 332, *Long Term Investments.* The Statement (AU section 332) revises the guidance on auditing investments to make that guidance consistent with recently issued accounting standards, particularly Financial Accounting Standards Board (FASB) Statement Nos. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), and 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations* (AC No5). The Statement (AU section 332) includes guidance on auditing asser-

tions about the valuation of investments, including guidance on auditing investments carried at cost and fair value. The guidance in SAS No. 81 (AU section 332) regarding investments accounted for using the equity method of accounting is generally unchanged from the guidance contained in the previous standard. SAS No. 81 (AU section 332) is effective for audits of financial statements for periods ending on or after December 15, 1997, with early application permitted.

.57 *SAS No. 82.* In February 1997, the ASB issued SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU section 316). The new Statement (AU section 316) will supersede SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316A). SAS No. 82 (AU section 316) provides auditors with expanded guidance on the consideration of fraud in conducting a financial statement audit. It strengthens the auditor's ability to fulfill his or her responsibility to plan and perform the audit in order to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether caused by error or fraud.

.58 The new Statement (AU section 316) describes the types of fraud and requires auditors to specifically assess the risk of material fraud in every audit. It also provides separate categories of risk factors for fraudulent financial reporting (management fraud) and misappropriation of assets (theft) that require consideration.

.59 In addition, the new Statement (AU section 316) provides procedural guidance and examples of how auditors can respond to the presence of fraud risk factors. The new Statement (AU section 316) reaffirms the requirement that auditors communicate known instances of fraud to appropriate levels of management and the audit committee and, under certain circumstances, appropriate regulators.

.60 The new Statement (AU section 316) is effective for audits of financial statements for periods ending on or after December 15, 1997.

.61 The AICPA is undertaking a major initiative to assist auditors in understanding and implementing SAS No. 82 (AU section 316). Implementation efforts include the following:

- A Practice Aid entitled, *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82*, walks auditors through issues likely to be encountered in applying the new SAS (AU section 316) to audits, with valuable tools, such as sample documentation. It also provides specific guidance on applying the concepts of the SAS (AU section 316) to various industries, including not-for-profit organizations. To obtain this publication (No. 008883) auditors should contact the AICPA Order Department at (800) 862-4272 or fax a request to (800) 362-5066.
- A self-study continuing professional education (CPE) course (No. 732045) entitled, *Consideration of Fraud in a Financial Statement Audit: The Auditor's Responsibilities Under SAS No. 82*, offers intermediate level information in test format and eight hours of recommended CPE. To obtain the CPE course auditors should contact the AICPA Order Department.
- Helpful guidance about the new SAS (AU section 316), including a press release, speech outline, and a comparison of SAS No. 82 (AU section 316) with SAS No. 53 (AU section 316A), are available on the AICPA's home page.

Financial Statements on the Internet

.62 It has become more common for not-for-profit organizations to make information available on the Internet or electronic bulletin boards (electronic sites). Information in electronic sites may include financial statements and other financial information, press releases, and other promotional material. Auditors should be aware that an interpretation of SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550) entitled "Other Information in Electronic Sites Containing Audited Financial

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Statements" (AU section 9550.16–.18) has been issued to address an auditor's responsibility with respect to other information included in an electronic site if the audited financial statements and the independent auditor's report thereon are also included. The Interpretation (AU section 9550.16–.18) appeared in the March 1997 *Journal of Accountancy* and was effective upon publication.

.63 The Interpretation (AU section 9550.16–.18) concludes that electronic sites are a means of distributing information and are not documents in the sense that the term *documents* is used in SAS No. 8 (AU section 550). Therefore, auditors are not required by SAS No. 8 (AU section 550) to consider the consistency of information in electronic sites with the original documents or to read other information contained in electronic sites. The Interpretation (AU section 9550.16–.18) also addresses the situation in which auditors are asked by their clients to consider information in electronic sites. It advises auditors that such consideration, which might take different forms, is not a service contemplated by SAS No. 8 (AU section 550). However, other auditing or attestation standards may apply, for example, agreed-upon procedures.

.64 Auditors should also note that the AICPA issued a nonauthoritative Practice Alert entitled, *Financial Statements on the Internet*, which describes distribution of audited financial statements and the related auditor's report on the Internet and speaks to several concerns for the auditor community. The Practice Alert is available on the AICPA's Fax Hotline at (201) 938-3787, document number 1566, and the AICPA's home page at http://www.aicpa.org/pubs/cpaltr/jan97/suppl/prac.htm.

Modifying Computer Systems for the Year 2000

.65 Many computer systems process transactions based on storing two digits for the year of a transaction (for example *97* for the year 1997), rather than a full four digits. A significant number of computer systems based on two-digit years are not programmed to consider the start of a new century, unless they have been recently modified. Systems that process year 2000 transactions with the year *00* may encounter significant processing inaccuracies and even inoperability. The potential impact of the year 2000 problem on not-for-profit organizations is that date sensitive calculations would be based on erroneous data or could cause a system failure. All forms of financial accounting, including interest computations, due dates, pensions, personnel benefits, investments, and legal commitments will be affected. It can also affect record keeping, such as inventory, maintenance, and file retention.

.66 Fixing this problem will likely be a very long, involved, and expensive process for many organizations, requiring computer coding changes that will affect millions of lines of program code. Auditors should consider the consensus reached by the Emerging Issues Task Force (EITF) of the FASB in its discussion of Issue No. 96-14, *The Accounting for Costs Associated with Modifying Computer Software for the Year 2000*, which provides that costs specifically associated with modifying software for the year 2000 should be expensed as incurred. It may be advisable for auditors to consider discussing this matter with their clients to determine whether it is an issue and to determine whether the costs incurred to date have been accounted for properly.

Lawyers' Letters

.67 An interpretation of SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AU section 337), was issued in January 1997. The Interpretation, entitled "Use of Explanatory Language Concerning Unasserted Possible Claims or Assessments in Lawyers' Responses to Audit Inquiry Letters" (AU section 9337.31 and .32) addresses a concern that the inclusion of certain explanatory comments in responses by lawyers to audit inquiry letters may result in a limitation on the scope of the audit. The Interpretation (AU section 9337.31 and .32) appeared in the January 1997 issue of the *Journal of Accountancy* and was effective upon publication.

.68 A number of lawyers include explanatory comments in their responses to audit inquiry letters that are intended to emphasize the preservation of the attorney-client privilege with respect to unasserted pos-

sible claims or assessments. These comments might include the following: "It would be inappropriate for this firm to respond to a general inquiry relating to the existence of unasserted possible claims or assessments involving the organization." The Interpretation (AU section 9337.31 and .32) states that the inclusion of this or similar wording in a lawyer's response does not result in a limitation on the scope of the audit. The Interpretation (AU section 9337.31 and .32) also reminds auditors of the requirement pursuant to SAS No. 12 (AU section 337) to obtain the lawyer's acknowledgment of his or her responsibility to advise and consult with the client concerning financial statement disclosure obligations with respect to unasserted possible claims or assessments.

Pre-Award Surveys

.69 As part of the process of applying for a government grant or contract, not-for-profit organizations may be required to submit a written pre-award assertion (survey) by management about the effectiveness of the design of an entity's internal control or a portion thereof, together with an auditor's report thereon. An interpretation of AICPA Statement on Standards for Attestation Engagements No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400), entitled "Pre-Award Surveys" (AT section 9400.01–.08), was issued in February 1997. The Interpretation (AT section 9400.01–.08) appeared in the February 1997 *Journal of Accountancy* and was effective upon publication. The Interpretation (AT section 9400.01–.08) was issued to clarify that there are certain things that an auditor should not do in conjunction with a client's pre-award survey. The Interpretation (AT section 9400.01–.08) states that the consideration of internal control in a financial statement audit does not provide a sufficient basis for auditors to issue a report expressing any assurance about the effectiveness of the design of internal control or any portion thereof. Other questions that are answered in the Interpretation (AT section 9400.01–.08) include how auditors can report on the design effectiveness of an entity's internal control or a portion thereof, what auditors' responsibilities are if they are requested to sign a form prescribed by a government agency in connection with a pre-award survey, and whether auditors can issue reports on an entity's ability to establish suitably designed internal control.

Accounting Issues and Developments

Joint Costs

.70 In 1987, the AICPA issued SOP 87-2, *Joint Costs of Informational Materials and Activities of Not-for-Profit Organizations That Include a Fund-Raising Appeal.* SOP 87-2 provides guidance on reporting the costs of informational materials that include solicitations for financial support, and requires such costs to be reported as fund-raising expenses if it cannot be demonstrated that a bona fide program or a management and general function has been conducted in conjunction with the appeal for funds. If such bona-fide program or management and general activities can be demonstrated, such costs should be allocated between fund-raising and the related program or management and general function. Certain financial statement disclosures concerning such allocations are also required.

.71 Because of pressure to portray fund-raising expenses within certain percentages of revenue and expenses, there continues to be an increased risk that the cost of mailing materials or conducting other communications with the public may not be properly allocated between program expenses and fund-raising or management and general expenses in conformity with SOP 87-2.

.72 Some state attorneys general continue to criticize the manner in which some organizations allocate joint costs. They believe that some organizations have been too liberal in their allocation of costs to program expenses, especially those costs incurred to educate the public.

.73 Not-for-profit organizations and auditors should carefully review the requirements of the SOP and consider the sufficiency of evidence that exists to support any allocations of such joint costs. An AICPA proposed SOP on this subject is discussed in the "Accounting for the Costs of Joint Activities" section of this Audit Risk Alert.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Religious Organizations

.74 Some religious organizations are structured and operate under principles and practices based on their beliefs, including doctrines concerning control and authority, rather than corporate law or other structures. Accordingly, the relationships between and among such organizations, as well as the appropriate reporting for transactions they enter into, may be unclear. That lack of clarity may result in the following reporting issues:

- In some circumstances, control or authority is vested in another body or entity, either voluntarily or in accordance with principles followed by the organizations. In those circumstances, it may be unclear whether certain entities should be included in the consolidated financial statements of the reporting entity in conformity with the guidance in SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations.*
- Assets may be owned by the reporting entity but held or perhaps even titled to another entity. (This circumstance is more likely to occur in situations in which one of the entities operates outside of the United States.) It may be unclear whether those assets should be reported as assets in the reporting entity's financial statements.
- In some circumstances, pension benefits and other employee benefits, including post-employment benefits, such as food, housing, life insurance, and medical benefits, may be administered by the either (1) a religious entity, (2) a separate corporate entity that is not in trust form, or (3) a separate corporate entity that is in trust form. It may be unclear which entity(ies) should report liabilities for unfunded obligations under either FASB Statement No. 87, *Employers' Accounting for Pensions* (AC P16), or FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions* (AC P40).

Auditors should consider whether the financial statements represent the entity that they purport to represent and whether the accounting for benefit plans and related liabilities, if any, is appropriate and consistently applied.

.75 As part of that consideration, auditors may wish to request the organization to obtain a specific opinion from legal counsel concerning the interpretation of principles, practices, canon laws, or other arrangements and related legal implications. SAS No. 73, *Using the Work of a Specialist* (AU section 336) provides guidance concerning circumstances in which auditors rely on the representations or work of an attorney for other than litigation, claims, and assessments as addressed in SAS No. 12 (AU section 337).

Restructuring and Reengineering

.76 Like many organizations, some not-for-profit organizations are restructuring and reengineering their operations to become more effective and efficient. Some organizations are recording restructuring and reengineering charges in the face of workforce reductions, facility closings, and the discontinuance of certain operations and programs. Auditors should consider the consensus reached by the EITF of the FASB in its discussion of EITF Issue No. 94-3, *Liability Recognition for Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)*, which provides guidance on whether certain costs (such as employee severance and termination costs) should be accrued and classified as part of restructuring charges, or whether such costs would be more appropriately considered a recurring operational cost of the organization. EITF Issue No. 94-3 provides guidance concerning the appropriate timing of recognition of restructuring charges and prescribes disclosures that should be included in the financial statements. Also, auditors should consider the effects of such restructuring and reengineering, including the outsourcing of significant functions, on the organization's internal controls, and on the auditor's audit planning and testing.

Accounting Pronouncements and Projects

.77 Recent key FASB pronouncements affecting not-for-profit organizations, which are discussed below, and their effective dates are summarized in exhibit 3.

Exhibit 3

Pronouncement	Effective Date
FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC C67)	Annual financial statements issued for fiscal years beginning after December 15, 1994, except for organizations with less than $5 million in total assets and less than $1 million in annual expenses (For those organizations, the Statement [AC C67] is effective for fiscal years beginning after December 15, 1995. Earlier application is encouraged.)
FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC C25)	Same as FASB Statement No. 116 (AC C67)
FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25)	Financial statements issued for fiscal years ending after December 15, 1994, except for organizations with less than $150 million in total assets (For those organizations, the Statement [AC F25] is effective for financial statements issued for fiscal years ending after December 15, 1995.)
FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08)	Financial statements issued for fiscal years beginning after December 15, 1995
FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations* (AC No5)	Financial statements issued for fiscal years beginning after December 15, 1995
FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (AC F38)	Transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996
FASB Statement No. 126, *Exemption from Certain Required Disclosures about Financial Instruments for Certain Nonpublic Entities* (AC F38)	Financial statements issued for fiscal years ending after December 15, 1996
FASB Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power, (An Interpretation of FASB Statement No. 116)* (AC C67)	Financial statement issued for years ending after September 15, 1996

.78 *FASB Not-for-Profit Organizations Project.* The FASB is continuing its consideration of the specialized accounting principles and practices pertinent to not-for-profit organizations. The FASB added this project to its agenda in March 1986, initially to address accounting for contributions and the recognition of depreciation by not-for-profit organizations. The portion of the project addressing depreciation was completed in September 1988 and resulted in FASB Statement No. 93, *Recognition of Depreciation by Not-for-Profit Organizations* (AC D40). The portion of the project addressing contributions was completed in June 1993 and resulted in FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC C67). The portion of the project addressing financial statement display was completed in June 1993 and resulted in FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC C25). The portion of the project addressing investments was completed in November 1995 and resulted in FASB Statement No. 124 (AC No5).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.79 *Agency Transactions.* In December 1995, the FASB released an exposure draft of a proposed Interpretation, *Transfers of Assets in Which a Not-for-Profit Organization Acts as an Agent, Trustee, or Intermediary (An Interpretation of FASB Statement No. 116).* After considering the comments received on the exposure draft, the FASB has decided to split this project into two separate pieces. One part of the project addresses situations in which the recipient organization has the unilateral power to redirect the use of the assets away from the specified beneficiary. FASB Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power (An Interpretation of FASB Statement No. 116)* (AC C67), issued in September 1996, addresses this. The other part of the project addresses other situations in which a donor specifies a third-party beneficiary, including accounting by that beneficiary for the contribution received. FASB Interpretation No. 42 (AC C67) provides that an organization that receives assets acts as a donee and a donor, rather than an agent, trustee, or intermediary, if a resource provider specifies a third-party beneficiary or beneficiaries and explicitly grants the recipient organization the unilateral power to redirect the use of the assets away from the specified beneficiary or beneficiaries (variance power).

.80 Auditors should consider the wording used in the solicitations or gift agreements to determine whether resources received by not-for-profit organizations are received in agency transactions. This issue is particularly pertinent for audits of community foundations, federated fund-raisers, and fund-raising foundations. Auditors should consider discussing these matters with clients as soon as possible, to avoid misunderstandings between clients and auditors concerning accounting for such transactions.

.81 The balance of the issues covered in the exposure draft will be addressed in the second piece of the project. The period for commenting on the proposal has expired.

.82 *Extinguishment of Liabilities.* In June 1996, the FASB issued FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (AC F38). Among other things, the Statement (AC F38) requires that a liability be derecognized if and only if either (1) the debtor pays the creditor and is relieved of its obligation for the liability or (2) the debtor is legally released from being the primary obligator under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance. (The Statement [AC F38] supersedes FASB Statement No. 76, *Extinguishment of Debt.*)

.83 *Disclosures About Fair Value of Financial Instruments.* In December 1996, the FASB issued Statement No. 126, *Exemption from Certain Required Disclosures about Financial Instruments for Certain Nonpublic Entities* (AC F38). The Statement (AC F38) amends FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), to make the disclosures about fair value of financial instruments prescribed in FASB Statement No. 107 (AC F25) optional for entities that meet all of the following criteria:

1. The entity is a nonpublic entity.
2. The entity's total assets are less than $100 million on the date of the financial statements.
3. The entity has not held or issued any derivative financial instruments, as defined in FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), other than loan commitments, during the reporting period.

The Statement (AC F25) is effective for fiscal years ending on or after December 15, 1996. Earlier application is permitted in financial statements that have not been issued previously.

.84 *Consolidations.* In October 1995, the FASB released an exposure draft of a proposed Statement, *Consolidated Financial Statements: Policy and Procedures.* The exposure draft would apply to not-for-profit organizations and would require a controlling organization to consolidate all entities that it controls unless control is temporary at the time the entity becomes a subsidiary. For purposes of this requirement, control of an entity is the power to use or direct the use of the individual assets of another entity in essentially the same ways as the controlling entity can use its own assets. The exposure draft includes presumptions of effective control and indicators of effective control.

.85 Not-for-profit organizations are currently required to follow SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations.* If, however, the FASB Statement resulting from the exposure draft were issued and required to be applied by not-for-profit organizations, it would supersede SOP 94-3 to the extent that it is inconsistent with the FASB Statement resulting from the exposure draft.

.86 The exposure draft would require the consolidation in all circumstances in which SOP 94-3 requires consolidation. Also, the exposure draft requires consolidation in circumstances in which SOP 94-3 permits but does not require consolidation. (SOP 94-3 does not include the presumptions of effective control. However, paragraph 12 of the SOP permits consolidation with certain kinds of control if coupled with an economic interest. Therefore, the circumstances in the exposure draft that result in effective control, and therefore consolidation, could result in consolidation being permitted but not required, under SOP 94-3.)

.87 The period for commenting on the proposal has expired, and the FASB expects to conduct a sunset review of the project in June 1997.

.88 *AICPA Guide Project.* In August 1996, the AICPA Not-for-Profit Organizations Committee issued the Audit and Accounting Guide *Not-for-Profit Organizations* (the Guide). The Guide incorporates certain provisions of FASB Statement Nos. 116 (AC C67) and 117 (AC C25) and is directed at not-for-profit organizations in general, and not at specific kinds of organizations, such as voluntary health and welfare organizations or private colleges and universities.

.89 The Guide supersedes the following AICPA Audit and Accounting Guides:

- Industry Audit Guide *Audits of Voluntary Health and Welfare Organizations*
- Industry Audit Guide *Audits of Colleges and Universities*
- Audit and Accounting Guide *Audits of Certain Nonprofit Organizations*

.90 It also supersedes the following AICPA SOPs:

- SOP 74-8, *Financial Accounting and Reporting by Colleges and Universities*
- SOP 78-10, *Accounting Principles and Reporting Practices for Certain Nonprofit Organizations*
- SOP 87-2, *Accounting for Joint Costs of Informational Materials and Activities of Not-for-Profit Organizations That Include a Fund-Raising Appeal*
- SOP 94-2, *The Application of the Requirements of Accounting Research Bulletins, Opinions of the Accounting Principles Board, and Statements and Interpretations of the Financial Accounting Standards Board to Not-for-Profit Organizations*

.91 Some of the Guide's provisions are as follows:

- The term *not-for-profit organizations* encompasses all entities defined as not-for-profit organizations by FASB Statement No. 116 (AC C67), including the kinds of organizations that were covered by the pronouncements that were superseded by the Guide.
- If the financial statements include prior-year financial information that does not include sufficient detail to constitute a presentation in conformity with GAAP because it does not include the minimum information required by FASB Statement No. 117 (AC C25) and the Guide (for example, if the statement of activities does not present revenues, expenses, gains, and losses by net asset class), the nature of the prior-year information should be described by the use of appropriate titles on the face of the financial statements and in a note to the financial statements. The use of appropriate titles includes a phrase such as "with summarized financial information for the year ended 19PY," following the title of the statement or column headings that indicate the summarized nature of the

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

information. Labeling the prior-year summarized financial information "for comparative purposes only" without further disclosure in the notes to the financial statements would not constitute the use of an appropriate title.

> If such summarized comparative information that does not include the minimum information required by GAAP is presented, certain disclosures about the nature of the information presented are required. If the required disclosures about the nature of that information are omitted or are incomplete, the auditor ordinarily should add a paragraph to his or her report calling the omitted or incomplete disclosure to the readers' attention. To reduce the likelihood that a reader might misinterpret such a paragraph to be a qualified opinion on the current-period financial statements, the paragraph should follow the opinion paragraph and should not be referred to in either the scope or opinion paragraphs of the auditor's report.

- Solicitations for donations that (1) clearly include wording such as "information to be used for budget purposes only" or that (2) clearly and explicitly allow resource providers the ability to rescind their indications that they will give are intentions to give rather than promises to give and should not be reported as contributions.

- Not-for-profit organizations may receive contributions of the use of electric, telephone, and other utilities and of facilities (such as a building or office space) in which the donor retains legal title to the facilities. Organizations receiving such contributions should recognize contribution revenue in the period in which the promise is received and expenses in the period the utilities, facilities, or long-lived assets are used. (Whether such contributions should be reported is unaffected by whether the not-for-profit organization could afford to purchase the utilities or facilities at their fair value.) If the transaction is an unconditional promise to give for a specified number of periods, the promise should be reported as contributions receivable and as restricted support that increases temporarily restricted net assets.

- If a contribution is transferred to the ultimate recipient through an agent acting as an intermediary, the ultimate recipient should report the contribution when sufficient verifiable evidence that the agent has received the promise to give or contribution becomes available.

- Unconditional promises to give cash should be measured at fair value, based on the present value of their estimated future cash flows.

- Contributions receivable are not accounts receivable that are required to be confirmed in accordance with SAS No. 67, *The Confirmation Process* (AU section 330). Although contributions receivable are not required to be confirmed, auditors may nevertheless decide to request confirmation of contributions receivable. If auditors confirm promises to give, they should follow the guidance in SAS No. 67 (AU section 330) concerning the confirmation process.

- For split-interest agreements, if the not-for-profit organization is the trustee, it should recognize the assets held under the trust at fair value and a liability for the present value of the expected future cash payments to be made to other beneficiaries. Contribution revenue should be reported for the present value of the cash flows expected to be received by the organization. If the not-for-profit organization is not the trustee, it should recognize contribution revenue and an asset representing its right to receive future cash flows. In all cases, all changes in the value of assets held under split-interest agreements are recognized in the financial statements.

- Contributions of an irrevocable right to receive income from a perpetual trust held by third parties should be reported as permanently restricted support, with distributions reported as unrestricted or temporarily restricted investment income.

- Contributions of inventory should be reported in the period received and should be measured at fair value. Estimates of fair value may be obtained from published catalogs, vendors, independent appraisals, estimated selling prices, and other sources. If methods such as estimates, averages, or

computational approximations, such as average value per pound or subsequent sales, can reduce the cost of measuring the fair value of inventory, use of those methods is appropriate, provided the methods are applied consistently, and the results of applying those methods are reasonably expected not to be materially different from the results of a detailed measurement of the fair value of contributed inventory. If the gifts have no value, as might be the case for certain clothing and furniture that cannot be sold or used either internally or for program purposes by the not-for-profit organization, the items received should not be recognized.

- If collection items are not capitalized, auditors should perform procedures to understand the organization's controls over recording accessions (including contributions) and deaccessions of collection items, controlling the collections, and periodically physically inspecting them. Those auditing procedures are performed, in part, to provide evidence supporting the disclosures required by paragraph 27 of FASB Statement No. 116 (AC C67.124). They are also part of auditors' work in obtaining an understanding of the organization's controls over collection items and contributions of such items. The objective of performing those procedures when the collection is not recognized is not to obtain evidence to corroborate a recorded amount, since no amount has been recorded. Instead, the objective is to help auditors understand the organization's control environment, which is a component of its internal control.

- FASB Statement No. 124 (AC No5) does not address measurement issues concerning investments other than investments in equity securities with readily determinable fair value and all investments in debt securities. Investments not covered by FASB Statement No. 124 (AC No5) are referred to in the Guide as *other investments.* Other investments include, among others, investments in real estate, mortgage notes, venture capital funds, partnership interests, oil and gas interests, and equity securities that do not have a readily determinable fair value. The Guide retains the measurement guidance for accounting for other investments included in the AICPA publications that will be superseded by the Guide, until such time as the FASB or AcSEC issues more definitive guidance, except as stated in the next sentence. To the extent that the guidance in the AICPA publications that will be superseded by the Guide requires all investments to be measured using the same measurement attribute, only other investments, rather than all investments, will be required to be measured using the same measurement attribute. For example, if an AICPA publication that will be superseded by the Guide permits investments to be carried at either cost or fair value, provided that the same attribute is used for all investments, and if equity securities with a readily determinable fair value are carried at fair value in conformity with the guidance in FASB Statement No. 124 (AC No5), other investments are permitted to be carried at either cost or fair value, provided that the same attribute is used for all other investments.

- FASB Statement No. 124 (AC No5) provides that net appreciation on donor-restricted endowment funds should be reported as changes in unrestricted net assets unless the appreciation is temporarily or permanently restricted by explicit donor-imposed stipulations or by law. Laws concerning net appreciation of donor-restricted endowment funds may vary from jurisdiction to jurisdiction. For example, some jurisdictions follow trust law, some follow the Uniform Management of Institutional Funds Act (UMIFA), some follow modifications of UMIFA, and some follow interpretations of those laws issued by state attorneys general. Generally, in jurisdictions following trust law, net appreciation is not spendable and, therefore, should be added to permanently restricted net assets. Accordingly, unless the donor has explicitly restricted the net appreciation on an endowment fund, net appreciation subject to such limitations should be reported as a change in unrestricted net assets. Also, it has generally been interpreted that, absent donor restrictions, net appreciation is spendable under UMIFA and therefore should be added to unrestricted net assets. (Legal limitations that require the governing board to act to appropriate net appreciation under a statutorily prescribed standard of ordinary business care and prudence do not extend donor restrictions to the net appreciation.) Auditors should obtain an understanding about these issues and the laws concerning net appreciation on donor-restricted endowments applicable to the reporting organization. Also, auditors should obtain representations from management about any interpretations made by the organization's governing board concerning whether laws limit the amount of net appreciation of donor-restricted

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

endowments that may be spent. However, for organizations operating in jurisdictions in which there may be questions concerning interpretations of the applicable laws or where there are conflicting interpretations by various legal counsel, auditors should request the organization to obtain a specific opinion from legal counsel concerning interpretation of the legal requirements. SAS No. 73 (AU section 336) provides guidance concerning circumstances in which auditors rely on the representations or work of an attorney for other than litigation, claims, and assessments as addressed in SAS No. 12 (AU section 337).

- Property and equipment used in exchange transactions (other than lease transactions), such as federal contracts, in which the resource provider retains legal title during the term of the arrangement, should be capitalized by the not-for-profit organization only if it is probable that the organization will be permitted to keep the assets when the arrangement terminates. The terms of such arrangements should be disclosed in notes to the financial statements.

- Revenues from exchange transactions should generally be reported gross of any related expenses, rather than net of related expenses. If the organization regularly provides discounts (such as financial aid for students that is not reported as an expense, reduced fees for services, or free services) to certain recipients of its goods or services, revenues should be reported net of those discounts. (Net revenue may be reported as a single line item in a statement of activities, or the gross revenue is permitted to be reported less the related discount, provided that the discount is displayed immediately beneath the revenue.)

- Some not-for-profit organizations provide reductions in amounts charged for goods or services, such as financial aid provided by colleges and universities. Reductions in amounts charged for goods or services provided by a not-for-profit organization should be recognized as expenses if such reductions are given in exchange for goods or services provided to the organization, such as part of a compensation package. Amounts recognized as expenses for such reductions should be reported in the same functional classification in which the cost of the goods or services provided to the organization are reported. If reductions in amounts charged for goods or services provided by a not-for-profit organization are given other than in exchange for services provided to the organization, such amounts should be reported as—
  - — Expenses if the organization incurs incremental expense in providing such goods or services.
  - — Discounts if the organization incurs no incremental expense in providing such goods or services.

- Fund-raising costs, including costs incurred in one period that may result in contributions that will be received in future periods, should be expensed as incurred.

- The costs of soliciting contributed services, such as volunteers, regardless of whether those services are recognized as contributions in conformity with the provisions of paragraph 9 of FASB Statement No. 116 (AC C67.109), should be reported as fund-raising.

- The financial statements should disclose the total fund-raising expenses.

- The financial statements should provide information about program expenses. If the components of total program expenses are not evident from the details provided on the face of the statement of activities, for example, if cost of sales is not identified as either program or supporting services, the notes to the financial statements should disclose total program expenses and should provide information about why total program expense disclosed in the notes does not articulate with the statement of activities. The financial statements should also provide a description of the nature of the organization's activities, including a description of each of its major classes of programs, either on the statement of activities (for example, using column headings) or in the notes to the financial statements.

- Occupying and maintaining a building is not a separate supporting service. Interest costs, including interest on a building's mortgage, should be allocated to specific programs or supporting services to the extent possible; interest costs that cannot be allocated should be reported as part of the management and general function.

- Auditors should not report separately on operations if the statement of activities includes an intermediate measure of operations.

.92 In addition, the Guide includes the following:

- A definition of a governmental entity
  - — Indicators to distinguish exchange transactions from contributions
  - — Indicators to distinguish contribution and exchange portions of membership dues

.93 The provisions of the Guide are effective for financial statements for periods ending on or after December 31, 1996.

.94 *Accounting for the Costs of Joint Activities.* In February 1997, a proposed SOP, *Accounting for Costs of Activities of Not-for-Profit Organizations and State and Local Governmental Entities That Include Fund Raising*, was cleared for final issuance by the FASB and Governmental Accounting Standards Board (GASB), subject to certain revisions. The proposed SOP would be applied by not-for-profit organizations and state and local governmental entities in determining fund-raising costs. It would require entities to report the costs of all materials and activities that include a fund-raising appeal as fund-raising costs, including costs that otherwise might be considered program or management and general costs if they had been incurred in a different activity, unless the criteria of purpose, audience, and content, as defined in the SOP, are met. If the criteria of purpose, audience, and content are met, the joint costs of those activities would be allocated and costs that are clearly identifiable with fund-raising, program, or management and general functions would be charged to that cost objective.

.95 The proposed SOP would be effective for years beginning on or after December 15, 1997. The AICPA is in the process of drafting those revisions and expects to issue the final SOP in the summer of 1997.

.96 *GASB—Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities.* Issued in April 1997, this exposure draft would make sweeping changes to the financial reporting standards for public colleges and universities. The GASB is expected to issue a final Statement by mid 1998.

.97 *GASB—The Financial Reporting Entity: Affiliated Organizations.* Issued in December 1994, this exposure draft would establish standards to determine whether an organization should be classified as an affiliated organization and, if so, would establish criteria to determine whether that affiliated organization is a component unit of a primary government's financial reporting entity. The GASB is expected to issue a final Statement by late 1997.

Nonauthoritative AICPA Audit and Accounting Literature

Continuing Professional Education Courses

.98 The AICPA offers group-study and self-study courses. Group-study courses include the following:

- — Audits of HUD-Assisted Projects
- — Advanced Auditing of HUD-Assisted Projects

- The AICPA Survival Guide for the Not-for-Profit Auditor
  - — Compliance Auditing
  - — Cost Principles for Nonprofit Organizations Under OMB Circular A-133

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Getting Started With Nonprofit Organization Tax Issues
  - — Implementing SFAS Nos. 116 and 117 in Financial Statements of Nonprofit Organizations
  - — Nonprofit Accounting and Auditing Update
- Single Audit Requirements for Nonprofit and Governmental Organizations
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations
  - — Tackling Tough Tax Topics in Nonprofit Organizations
- Using the AICPA Not-for-Profit Organizations Audit and Accounting Guide
- Workpaper Preparation Techniques for Government and Nonprofit Organizations
  - — Yellow Book: Government Auditing Standards

.99 Self-study courses include the following:

- — Accounting for Nonprofits: Contributions and Financial Statements
- Audit Requirements of OMB Circular A-133
- Audits of Rural Development and Housing Programs
- Communicating Material Noncompliance and Internal Control Weaknesses
  - — Compliance Auditing
  - — HUD Audits: A Comprehensive Guide
- Nonprofit Accounting and Auditing Update
- Not-for-Profit Organizations: Using the New AICPA Audit and Accounting Guide
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations
  - — Understanding Federal Audit and Administrative Requirements
  - — Working with the Revised Yellow Book on Government Auditing Standards

.100 Videocourses include the following:

- Effective Yellow Book Auditing Videocourse
- 1997 Nonprofit Auditing and Accounting Videocourse

.101 For more information about AICPA CPE courses, call the AICPA information hotline at (800) 862-4272.

Not-for-Profit Organizations Checklists

.102 The AICPA's Technical Publications staff has developed various publications that may be of interest to readers of this Audit Risk Alert. For example, an annual publication entitled *Checklists and Illustrative Financial Statements for Not-for-Profit Organizations,* product number 008681, is a nonauthoritative Practice Aid designed to help those preparing reports and financial statements of not-for-profit organizations.

Technical Practice Aids

.103 *Technical Practice Aids* is an AICPA publication that includes questions received by the AICPA's Technical Information Service on various subjects and the service's response to those questions. Sections 6960 and 7300 of *Technical Practice Aids* include questions and answers specifically pertaining to not-for-profit organizations. *Technical Practice Aids* is available both as a subscription service and in hardback form.

Industry Conference

.104 The AICPA will hold its Fifth Annual Not-for-Profit Organizations Industry Conference on June 12 to 13, 1997 in Washington DC. The conference is designed for both practitioners and financial executives, and to provide technical information for those decision makers. An additional four CPE credit optional session entitled "OMB A-133 In-Depth 97," will be offered on the evening of June 11, 1997. For further information, call the AICPA CPE Conference Hotline at (800) 862-4272.

References for Additional Guidance

Federal Agencies—Administrative Regulations

.105 Most federal agencies issue general administrative regulations that apply to their programs. These regulations provide general rules on how to apply for grants and contracts, how grants are made, the general conditions that apply to and the administrative responsibilities of grantees and contractors, and the compliance procedures used by the various agencies. The regulations are included in the *Code of Federal Regulations.*

.106 Auditors should also be aware that many agencies have program-specific and other audit requirements that are not covered by OMB Circular A-133. Such requirements may relate to certain programs (such as student financial assistance or HUD-insured mortgage programs), as well as to contract audit requirements. Auditors may want to refer to the PCIE's *Revised Program Audit Guide Listing* for a summary of federal programs that have separate audit guides.

General Accounting Office

.107 General Accounting Office (GAO) publications include the following:

- *Government Auditing Standards, 1994 Revision*—These standards, also referred to as the Yellow Book, relate to audits of government organizations, programs, activities, and functions, and of government funds received by contractors, nonprofit organizations, and other nongovernment organizations. The standards incorporate the AICPA Statements on Auditing Standards for fieldwork and reporting, and prescribe the additional standards needed to meet the more varied interests of users of reports on governmental audits. These standards are available from the Government Printing Office (GPO), Superintendent of Documents, Washington, DC 20401; telephone (202) 783-3238; telefax (202) 512-2250; Stock No. 020-000-00-265-4.

- *Interpretation of Continuing Education and Training Requirements*—This provides guidance to audit organizations and individual auditors on implementing the CPE requirements of *Government Auditing Standards* (April 1991, 020-000-00250-6). This Interpretation is available from the GPO, Superintendent of Documents, Washington, DC 20401.

- *Assessing the Reliability of Computer-Processed Data*—This guidebook is intended mainly for auditors and evaluators, not for experts in data processing. It provides some guidelines on what auditors must do to satisfy the requirements of *Government Auditing Standards* (September 1990, GAO/OP-8.1.3).

- *Guide to Federal Agencies' Procurement of Audit Services from Independent Public Accountants*—This booklet provides a basic understanding of how independent public accountant (IPA) contracts should be awarded to officials unfamiliar with federal procurement. It discusses the special requirements of the Chief Financial Officers (CFO) Act (April 1991, GAO/AFMD-12.19.3).

- *How to Get Action on Audit Recommendations*—This guide is intended to help auditors get more action and better results from their audit work on governmental programs and operations (July 1991, GAO/OP-9.2.1).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Unless otherwise noted above, requests for copies of these publications should be sent to the GAO, P.O. Box 6015, Gaithersburg, MD 20884-6015. The telephone number is (202) 512-6000. Orders may also be placed by using the fax number (301) 258-4066. For copies of GAO reports and testimony, the status of GAO's open recommendations, and GAO's audit policy, check the GAO home page at: http://www.gao.gov. The GAO home page also contains the electronic version of *Government Auditing Standards.* For information on how to access GAO reports or other documents on the Internet, send an e-mail message with "info" in the body to: info@www.gao.gov.

Office of Management and Budget

.108 *Circulars.* OMB issues grant management circulars to establish uniform policies and rules to be observed by federal agencies for the administration of federal grants. Federal agencies then adopt these circulars in their regulations. The process for issuing grants management circulars includes due process with a notice of any proposed changes in the *Federal Register,* a comment period, and careful consideration of all responses before issuance of final circulars. Circulars and other documents relevant to audits of not-for-profit organizations are listed below. For copies of circulars and bulletins, write or call the Office of Administration, Publications Office, Room 2200, New Executive Office Building, Washington, DC 20503; telephone (202) 395-7332 or check the OMB home page at: http://www.whitehouse.gov/wh/EOP/OMB/html/ombhome.html. An alternate address is http://www.sbaonline.sba.gov/ignet.

OMB Circulars Relevant to Audits of Not-for-Profit Organizations

Circular Number	*Applicability*	*Issue Date*
A-21 (Revised)	Cost principles for educational institutions	May 1996
A-110	Uniform Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations	November 1993
A-122 (Revised)	Cost principles for non-profit organizations	October 1995
A-133 (Revised)	Audits of states, local governments, and nonprofit organizations	Revision expected before June 30, 1997

.109 *OMB Circular A-133 Compliance Supplement.* The OMB Compliance Supplement sets forth the major federal compliance requirements that should be considered in an audit of states, local governments, and nonprofit organizations that receive federal assistance. It supplements OMB Circular A-133. A revision to the supplement is expected to be issued before June 30, 1997. For a separate discussion of the Compliance Supplement, see the section of this Audit Risk Alert entitled "Regulatory and Legislative Developments."

.110 *Other Guidance.* The *Catalog of Federal Domestic Assistance* (CFDA) is a government-wide compendium of federal programs, projects, services, and activities that provide assistance or benefits to the American public. The General Services Administration (GSA) is responsible for the dissemination of federal domestic assistance information through the catalog and maintains the information database from which program information is obtained. A searchable version of the CFDA is available on the GSA home page, which is currently located at http://www.gsa.gov/fdac.

.111 Program information provided by the catalog includes authorizing legislation and audit requirements. The GSA makes copies available to certain specified national, state, and local government offices. Catalog staff may be contacted at (202) 708-5126. The catalog may be purchased from the GPO by calling (202) 783-3238.

.112 Program information is also available on machine-readable magnetic tape. The tape may be purchased by writing the Federal Domestic Assistance Catalog Staff (WKU), General Services Administration, Ground Floor, Reporters Building, 300 Seventh Street, SW, Washington, DC 20407, or calling (202) 708-5126.

Information Sources

.113 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.114 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.115 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.116 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.117 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bands per second (bps), are listed data lines.

* * * *

.118 This Audit Risk Alert supersedes *Not-for-Profit Organizations Industry Developments—1996.*

* * * *

.119 Practitioners should also be aware of the economic, industry, regulatory, and professional developments described in *Audit Risk Alert—1996/97* [AAM section 8010].

AAM Section 8190

FDIC Improvement Act Implementation Issues

Introduction

.01 This document alerts CPAs to how the Federal Deposit Insurance Corporation (FDIC) Improvement Act of 1991 (FDICIA) and its implementing regulations and guidelines affect the engagements they perform. This section of the Audit Risk Alert synthesizes the requirements. Appendix A (paragraph .52) presents, verbatim, the regulations and guidelines that implement the law. Commentary prepared by the staff of the American Institute of Certified Public Accountants (AICPA) is included to focus on practical matters that the independent accountant should consider when taking action to comply with the requirements. The agreed-upon procedures that must be performed by the independent accountant, as presented in Appendix B (paragraph .53), are also reprinted verbatim with AICPA staff commentary. Both appendixes should be read in their entirety.

.02 Independent accountants serving covered institutions will be required—for the first time—to attest to managements' assertions about internal controls over financial reporting and compliance with laws and regulations. Independent accountants should become familiar with the new reporting requirements, particularly those that address the independent accountant's qualifications, exposure to enforcement actions, required communications with client institutions, and interaction with the audit committee. The effects of a number of the law's provisions on a client institution's ability to remain a going concern should also be considered.

.03 This document is not intended to provide comprehensive guidance on implementing the requirements of the law, regulations, and guidelines. This document does, however, focus on several practical matters concerning implementation that the independent accountant should consider in complying with the requirements. In a number of these areas, guidance has not yet been developed and the independent accountant will need to exercise judgment about how to proceed. For example, independent accountants will need to make judgments on practical matters such as the following:

- Performing agreed-upon procedures on internal auditors' workpapers
- Determining sample sizes for agreed-upon procedures
- Defining financial reporting controls
- Reporting on "safeguarding" objectives in the report on management's assertion about financial reporting controls

This Audit Risk Alert should not be substituted for a complete reading of the applicable sections of the law, regulations, and guidelines where appropriate.

The Law

.04 Early in 1991, Congress was informed that the FDIC's Bank Insurance Fund (BIF) would need more money because a record number of banks had failed, and that regulators needed timely information about the financial condition of banks. Legislative proposals coupling additional money for the BIF with an enhanced financial reporting system for federally insured depository institutions became the basis for a number of reforms embodied in the FDICIA. These measures reflect policymakers' emphasis on regulatory solutions to concerns about the depository institutions industry.

.05 Although related legislative proposals that would have expanded bank powers (by permitting interstate activities and new products and services) were ultimately dropped, the reach of the final provisions—which

emphasize least-cost resolutions and improved supervision and examinations—surpasses even that of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA).

.06 Signed into law in December 1991, FDICIA spawned a rule making process that, when completed, will alter every major area of existing regulation of banks and thrifts. As discussed below, the effect of FDICIA on practice in the industry and on the current regulatory environment requires heightened awareness among practitioners.

.07 The federal banking regulatory agencies have been carrying out the massive effort necessary to develop regulations to implement the law, including audit provisions that directly affect CPAs. Many provisions of the FDICIA are amendments or additions to the Federal Deposit Insurance Act (FDI Act). Major provisions affecting practitioners who provide services to depository institutions are summarized below. Readers should refer to the law, implementing regulations, and guidelines for a complete discussion of these and other requirements.

The Implementing Regulations

Reporting Requirements—Section 36

.08 New Section 36 of the FDI Act (added by Section 112 of the FDICIA) creates new reporting requirements including, for the first time, reports by managements and independent accountants on internal controls over financial reporting and compliance with certain laws and regulations. It also establishes minimum qualifications for independent accountants serving the affected institutions. The Section 36 provisions, as summarized below, apply to each FDIC-insured depository institution having total assets of $500 million or greater at the beginning of its fiscal year. The reporting requirements are effective for fiscal years ending December 31, 1993, and thereafter. Despite the asset threshold, Section 36 does not override any non-FDICIA requirements for audited financial statements or other requirements that an institution exempt from Section 36 must otherwise satisfy.[1]

.09 To implement Section 36, the FDIC has issued both a final regulation[2] and accompanying guidelines and interpretations (guidelines), which became effective July 2, 1993. The general requirements are summarized below; however, the side-by-side analysis of the detailed regulation and guidelines presented in Appendix A (paragraph .52) should be read as an integral part of this Audit Risk Alert.

.10 *Annual Report.* Management is required to prepare, annually, a report that includes the following: [3]

- Financial statements prepared in conformity with generally accepted accounting principles (GAAP)
- A written assertion about the effectiveness at year-end of the institution's internal controls over financial reporting
- A written assertion about the institution's compliance during the year with (a) federal laws and regulations relative to insider loans, and (b) federal and state laws and regulations relative to dividend restrictions

Management must also include a statement about its responsibilities for the financial statements, financial reporting controls, and compliance with laws and regulations.

.11 Management must engage an independent accountant to provide the following reports annually:

- An audit report on the GAAP-basis financial statements

[1] In FDIC Financial Institution Letter (FIL-43-93), the FDIC noted that, in adopting the final rule implementing Section 36, the Board of Directors of the FDIC reiterated its belief that "every depository institution, regardless of size or charter, should voluntarily have an annual audit of its financial statements by an independent public accountant and establish an independent audit committee."

[2] The regulation and guidelines implementing FDI Act Section 36 (which have been reproduced in Appendix A [paragraph .52]) are codified in Section 12 of the Code of Federal Regulations (CFR) Part 363. The regulation was published in the *Federal Register* on June 2, 1993, and in FDIC FIL-41-93.

[3] The reporting requirements may be satisfied for certain subsidiaries through reporting by their holding companies. These exemptions are discussed in Section 363.1 of the rule and in guidelines 2-4.

 Copyright © 1994, American Institute of Certified Public Accountants, Inc.

- An examination-level attestation report on management's assertion about financial reporting controls

An agreed-upon procedures-level attestation report on management's assertion about compliance with insider loan and dividend restriction laws and regulations is also required, but is not included in the institution's annual report and, therefore, is not publicly available.

.12 The financial statement audit is to be performed in accordance with generally accepted auditing standards (GAAS). The examination of management's assertion about financial reporting controls and the agreed-upon procedures report on management's compliance assertion are to be performed in accordance with the AICPA's Statements on Standards for Attestation Engagements (SSAE).[4]

.13 The audited financial statements and other reports of management and the independent accountant must be filed with the FDIC and other regulatory agencies within the ninety days following the institution's fiscal year-end. Management must also file any management letter, qualification, or other report within fifteen days following receipt from the independent accountant.

.14 All of management's reports will be made publicly available. The independent accountant's report on the financial statements and attestation report on financial reporting controls will also be made publicly available. The independent accountant's agreed-upon procedures report and any management letter, while filed with the FDIC, will not be included in the annual report and, therefore, will not be publicly available.

.15 *Qualifications of Independent Accountants.* Acceptance of an engagement to report under Section 36 is conditioned on the independent accountant being enrolled in a practice-monitoring program. Membership in the AICPA Division for Firms' SEC Practice Section or Private Companies Practice Section, or enrollment in the AICPA's Quality Review Program will satisfy this requirement.

.16 Another condition of the engagement is that the independent accountant agree to provide regulators with access to workpapers related to the three engagement reports. Although this condition is not explicitly expressed in the law or regulations, the implementing guidelines also call for providing copies of workpapers to regulators. Independent accountants should read the July/August 1993 *Notice to Practitioners* (included as Appendix C (paragraph .54) to this Audit Risk Alert), which provides guidance on complying with requests for access to, and copies of, workpapers when required to do so by contract, law, or regulation.

.17 The accountant must meet the independence requirements and interpretations of the AICPA and the Securities and Exchange Commission (SEC) and its staff.

.18 The implementing regulation requires both management and independent accountants to provide certain notifications of changes in an institution's independent accountants within specified time periods. An independent accountant must also file a peer review report within fifteen days of acceptance of the report.

.19 *Enforcement Actions Against Accountants.* Section 36 of the FDI Act also provides for enforcement actions against accountants with respect to the Section 36 requirements. However, the regulatory agencies have not yet proposed or published rules or guidelines to implement this statutory requirement.[5]

.20 *Communication With Auditors.* Each subject institution must provide its independent accountant with copies of the institution's most recent reports of condition and examination; any supervisory memorandum of understanding or written agreement with any federal or state regulatory agency; and a report of any action initiated or taken by federal or state banking regulators.

---

[4] SSAE No. 2, *Reporting on an Entity's Internal Control Structure Over Financial Reporting* (AT section 400), was issued in June 1993. On April 7, 1993, the AICPA's Auditing Standards Board issued an exposure draft of a proposed SSAE, *Compliance Attestation,* which, when finalized, will provide additional guidance on compliance attestation engagements. A final statement is expected to be issued by year-end 1993.

[5] Section 36(g)(4) of the FDI Act states that the FDIC or the appropriate federal banking agency may "remove, suspend, or bar an independent public accountant, upon a showing of good cause, from performing audit services" required by Section 36. The federal banking agencies are expected to jointly issue rules to implement this provision.

.21 *Audit Committees.* Each subject institution must have an independent audit committee made up entirely of outside directors independent of management. One of the audit committee's required duties is to review with management and the independent accountant the reports required under Section 36. A list of other suggested duties is included in the guidelines, some of which relate to the independent accountant. Audit committees of institutions having $3 billion or more in assets must include members with banking or related financial management expertise, have access to their own outside counsel, and not include any large customers of the institution.

Accounting Reforms—Section 37

.22 FDI Act Section 37 was added by FDICIA Section 121 to establish accounting objectives, standards, and requirements for regulatory financial reporting, that is, the Federal Financial Institutions Examination Council (FFIEC) Consolidated Reports of Condition and Income (Call Reports) and Thrift Financial Reports (TFRs). Among other provisions, Section 37—

- Requires regulatory financial reporting to be uniform and consistent with GAAP, unless more stringent principles are considered necessary to reflect capital accurately, facilitate effective supervision, or permit prompt corrective action.
- Instructs the regulatory agencies to develop both a method for supplemental disclosures of market values of assets and liabilities (to the extent feasible and practicable) and regulations to ensure adequate reporting of off-balance-sheet transactions (including reporting of contingent assets and liabilities).
- Promotes uniformity of capital and accounting standards among the federal regulatory agencies.

.23 On April 13, 1993, the FFIEC requested comment on a proposed approach to unaudited supplemental fair value disclosures that would use concepts and principles set forth in the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25). No other proposals have been made toward implementation of the Section 37 provisions.

Prompt Corrective Action—Section 38

.24 FDICIA makes capital an essential indicator to be used by regulators in monitoring the financial health of insured depository institutions. Regulatory intervention is focused primarily on an institution's capital levels relative to regulatory standards. Through FDI Act Section 38, FDICIA added a uniform framework for prompt corrective regulatory action to the existing capital adequacy guidelines set forth by each agency for safety and soundness purposes.[6]

.25 The independent accountant considers regulatory capital from the perspective that noncompliance or expected noncompliance with regulatory capital requirements may be a condition, when considered with other factors, that could indicate substantial doubt about an entity's ability to continue as a going concern. The AICPA's Statement on Auditing Standards (SAS) No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), provides guidance in this area.

.26 Capital regulations are complex and their application by management requires a thorough understanding of specific requirements and the potential impact of noncompliance. Accordingly, relevant regulations and regulatory guidance should be referred to by the independent accountant as necessary when considering regulatory capital matters.

.27 Effective December 19, 1992, Section 38 provides for supervisory action at certain institutions based on their capital levels. Each institution falls into one of five regulatory capital categories based primarily on three capital measures: Tier 1 leverage, total risk-based, and Tier 1 risk-based capital. These capital ratios are defined in

[6] The final rules implementing prompt corrective action were published in the September 29, 1992, *Federal Register;* in the FDIC's FIL-70-92; and in the Office of the Comptroller of the Currency's (OCC's) Banking Bulletin 92-52 and Banking Circular 268.

 Copyright © 1994, American Institute of Certified Public Accountants, Inc.

the same manner for Section 38 purposes as under the respective agencies' capital adequacy guidelines and regulations. For savings institutions, Tier 1 leverage capital is comparable to core capital, as defined.

.28 Regulations also specify a minimum requirement for tangible equity, which is defined as Tier 1 capital plus cumulative perpetual preferred stock, net of all intangibles except limited amounts of purchased mortgage servicing rights (PMSRs). In calculating the tangible equity ratio, intangibles (except for qualifying PMSRs) should also be deducted from the total assets included in the ratio denominator.

.29 An institution may be reclassified between certain capital categories if its condition or an activity is deemed by regulators to be "unsafe or unsound." A change in an institution's capital category initiates certain mandatory—and possibly additional discretionary—action by regulators.

.30 Under Section 38, an institution is considered—

- *Well capitalized* if its capital level significantly exceeds the required minimum level for each relevant capital category.
- *Adequately capitalized* if its capital level meets the minimum levels.
- *Undercapitalized* if its capital level fails to meet the minimum levels.
- *Significantly undercapitalized* if its capital level is significantly below the minimum levels.
- *Critically undercapitalized* if it has a ratio of tangible equity to total assets, as defined, of 2 percent or less, or otherwise fails to meet the critical capital level, as defined.

.31 The minimum levels are defined as shown in the following table:

Capital Category	*Total Risk-Based (Ratio)*	*Tier 1 Risk-Based (Ratio)*	*Tier 1 Leverage (Ratio)*
Well capitalized	≥ 10%	≥ 6%	≥ 5%
Adequately capitalized	≥ 8	≥ 4	≥ 4*
Undercapitalized	< 8	< 4	< 4*
Significantly undercapitalized	< 6	< 3	< 3

* 3.0 percent for 1-rated institutions under the regulatory CAMEL, MACRO, or related rating system.

.32 As noted in the preceding, critically undercapitalized institutions are those having a ratio of tangible equity to total assets of 2 percent or less.

.33 An institution will not be considered well capitalized if it is under a cease-and-desist order, formal agreement, capital directive, or prompt-corrective-action capital directive.

.34 Actions that may be taken under the prompt corrective action provisions range from the restriction or prohibition of certain activities, such as the payment of dividends, to the appointment of a receiver or conservator.

.35 Regulators will also require undercapitalized institutions to submit a plan for restoring the institution's capital to an acceptable level. For example, each undercapitalized institution is required to submit a plan that specifies the following:

- Steps the institution will take to become adequately capitalized
- Targeted capital levels for each year of the plan
- How the institution will comply with other restrictions or requirements put into effect
- The types and levels of activities in which the institution will engage

.36 Savings institutions that are complying with capital plans approved by the Office of Thrift Supervision (OTS) prior to December 19, 1991, are not required to file new plans and are not immediately subject to certain sanctions.

.37 Noncompliance or expected noncompliance with regulatory capital requirements may be a condition, when considered with other factors, that could indicate substantial doubt about an entity's ability to continue as a going concern. The implementation of the prompt corrective action provisions warrants similar attention by auditors when considering an institution's ability to remain a going concern.

Internal Control Standards—Section 39

.38 New Section 39 of the FDI Act (as added by Section 132 of the FDICIA) requires the federal banking agencies to prescribe safety and soundness standards for management and operation of insured depository institutions, including standards for internal controls. Implementing regulations will apply to all federally insured institutions and must be finalized by August 1, 1993, to become effective no later than December 31, 1993.

.39 In July 1992, the federal banking agencies jointly published an advance notice of proposed rule making for Section 39 (*Federal Register,* July 15, 1992). In April 1993, the Board of Governors of the Federal Reserve System (FRB) approved a staff proposal for implementation of Section 39. Because the federal banking agencies plan to simultaneously issue their proposals for comment, the FRB proposal was not immediately published for comment. However, the joint proposal is expected to track the FRB's draft.

.40 Among other matters, the FRB draft proposal would require state member banks to have internal controls and information systems that provide for the following:

(a) An organizational structure that establishes clear lines of authority and responsibility for monitoring adherence to prescribed policies

(b) Effective risk assessment

(c) Timely and accurate financial, operational, and regulatory reports

(d) Adequate procedures to safeguard and manage assets

(e) Compliance with applicable laws and regulations

.41 The Section 39 internal control requirements (as proposed in the FRB draft) would exceed the scope of the Section 36 management and independent accountant reports, which are limited to internal controls over financial reporting. Management is not required to make an assertion, nor is the independent accountant required to examine or report on any such management assertion, about the broader internal controls and information systems contemplated by Section 39.

.42 The Section 39 proposal also prescribes standards for operations, management, internal audit, asset quality, earnings, stock valuation, and employee compensation. If an institution fails to meet any of the prescribed standards, it must submit and implement a plan to achieve compliance. Failure to submit or implement the plan could lead to supervisory action.

Effects on Institutions' Liquidity

.43 Several provisions of FDICIA may affect the liquidity of an institution. Specifically, FDICIA places new restrictions on the following:

- Acceptance of brokered deposits by certain institutions[7]

[7] See FDICIA Section 301 and FDIC FIL-3-92.

 Copyright © 1994, American Institute of Certified Public Accountants, Inc.

- Availability of borrowings through the discount window[8]
- Exposure to the institution posed by transactions with correspondent banks and related limitations on interbank liabilities[9]

Accordingly, the independent accountant should consider whether the effect on the institution's liquidity, when considered with other factors, could indicate substantial doubt about an entity's ability to continue as a going concern.

Qualified-Thrift-Lender Test—Subtitle G

.44 To be considered a savings institution, an entity must hold a specific portion of its assets in eligible housing-related assets. On July 1, 1991, the required minimum percentage of qualified investments was 70 percent. Subtitle G of the FDICIA modified the qualified-thrift-lender (QTL) test to require that minimum qualified thrift investments equal or exceed 65 percent of assets, as defined, on a monthly average basis in nine out of every twelve months. Subtitle G also expands the definition of qualified thrift investments to include stock of any Federal Home Loan Bank, the Federal Home Loan Mortgage Corporation, and the Federal National Mortgage Association. The amounts of certain assets includable in the numerator and deductible in the denominator of the QTL ratio were also modified (see *Federal Register,* September 2, 1992).

.45 Noncompliance with the QTL requirement subjects an institution and its holding company, if any, to certain restrictions, among other regulatory actions. An institution that fails the OTS QTL test may also fail the separate Internal Revenue Service (IRS) QTL test.

Information Sources

.46 Copies of the FDICIA (stock number 869-015-00242-6) are available from the Government Printing Office (GPO). Call (202) 783-3238, or send an order via fax to (202) 512-2250 (VISA or MasterCard charges only; include expiration date). The price is $4.50.

.47 FDIC policy is communicated in Financial Institution Letters, News Releases, Regional Director Memoranda, updates to the Division of Supervision Manual of Examination Policies, and instructions for FFIEC Consolidated Reports of Condition and Income (Call Reports). For information about ordering these issuances, call FDIC Corporate Communications at (202) 898-6996.

.48 OCC supervisory policies and guidance are issued as Advisory Letters, Banking and Examining Bulletins and Circulars, Memoranda, News Releases, updates to the OCC Policies and Procedures Manual, the Bank Accounting Advisory Series, instructions for FFIEC Call Reports, and other issuances. For information on ordering copies of OCC issuances, call OCC Publications Control at (202) 874-4884.

.49 Information about FRB publications is available through FRB Publications Services at (202) 452-3245.

.50 OTS supervisory policies and guidance are issued in the form of Thrift Bulletins, Regulatory Bulletins, Transmittals, and in guidance provided to examiners through a multivolume set of agency handbooks. For information on ordering OTS publications, call the OTS Controller's Division at (202) 906-6427.

.51 The *Federal Register* contains notices about the actions of federal government agencies. It may be purchased from the GPO by calling (202) 783-3238 or by writing to New Orders, Superintendent of Documents, PO Box 371954, Pittsburgh, PA 15250-7954. Most public libraries also have copies of the *Federal Register.*

Appendix A
Audit and Reporting Requirements

Reprinted below are 12 CFR Part 363—Annual Independent Audits and Reporting Requirements (left column) and Appendix A to Part 363—Guidelines and Interpretations (center column). The regulation and appendix were published in the June 2, 1993 *Federal Register*. The right column is the AICPA staff's commentary on the regulation and guidelines.

Regulation	*Guidelines*	*Commentary*
§ 363.1 SCOPE *(a) Applicability This part applies with respect to fiscal years of insured depository institutions which begin after December 31, 1992. This part does not apply with respect to any fiscal year of any insured depository institution, the total assets of which, at the beginning of such fiscal year, are less than $500 million.*	1 Measuring Total Assets To determine whether this part applies, an institution should use total assets as reported on its most recent Report of Condition (Call Report) or Thrift Financial Report (TFR), the date of which coincides with the end of its preceding fiscal year. If its fiscal year ends on a date other than the end of a calendar quarter, it should use its Call Report or TFR for the quarter end immediately preceding the end of its fiscal year 2. Insured Branches of Foreign Banks Unlike other institutions, insured branches of foreign banks are not separately incorporated or capitalized To determine whether this part applies, an insured branch should measure claims on non-related parties reported on its Report of Assets and Liabilities of U.S Branches and Agencies of Foreign Banks (form FFIEC 002).	● The requirements for independent accountants apply only to accountants serving the subject institutions. If an institution does not fall within the scope of § 363, neither the institution nor its independent accountant is subject to the rule or guidelines.
(b) Compliance by subsidiaries of holding companies. The audited financial statements requirement of § 363.2(a) may be satisfied for an insured depository institution that is a subsidiary of a holding company by audited financial statements of the consolidated holding company. The other requirements of this part for an insured depository institution that is a subsidiary of a holding company may be satisfied by the holding company if: *(1) The services and functions comparable to those required of the insured depository institution by this part are provided at the holding company level; and* *(2) Either the insured depository institution has total assets as of the beginning of such fiscal year of:* *(i) less than $5 billion, or*	3. Compliance by Holding Company Subsidiaries Audited consolidated financial statements and other reports or notices required by this part which are submitted by a holding company for any subsidiary institution, should be accompanied by a cover letter identifying all subsidiary institutions to which they pertain. An institution filing holding company consolidated financial statements as permitted by § 363.1(b) also may report on changes in its independent public accountant on a holding company basis. An institution that does not meet the criteria in section 36(i) must satisfy the remaining provisions of the statute and this part on an individual institution basis, and maintain its own audit committee. Multi-tiered holding companies may satisfy all requirements of this part at any level	

Regulation	*Guidelines*	*Commentary*
(ii) more than $5 billion, but less than $9 billion, and a composite CAMEL (or MACRO, or equivalent) rating of 1 or 2.	4. Comparable Services and Functions. Services and functions will be considered "comparable" to those required by this part if the holding company: (a) Prepares reports used by the subsidiary institution to meet the requirements of this part; (b) Has an audit committee that meets the requirements of the part appropriate to its largest subsidiary institution; and (c) Prepares and submits the management assessments of the effectiveness of the internal control structure and procedures for financial reporting ("internal controls"), and compliance with the Designated Laws defined in Guideline 12 that are based on information concerning the activities and operations of all subsidiary institutions within the scope of this part.	● The guidelines use *internal controls* throughout to refer internal controls over financial reporting. Management and independent accountant reports required by the rule relate only to financial reporting controls—including *safeguarding of assets* as discussed in Guideline 9. These controls do *not* extend to compliance with applicable federal, state, and local laws and regulations *(compliance controls)* or controls over effectiveness and efficiency of operations *(operational controls).* ● See the related commentary on Guideline 8. Further guidance is needed on how the independent accountant would report (under SSAE No. 2, *Reporting on an Entity's Internal Control Structure Over Financial Reporting* [AT section 400]) when management applies Guideline 4(c) by making an assertion about the financial reporting controls of more than one of its subsidiary institutions within the scope of 12 Code of Federal Regulations (CFR) 363 *(a covered subsidiary).* ● In applying Guideline 4(c) to performance of the compliance attestation procedures, if the independent accountant performs procedures listed in Section I of Appendix B (paragraph .53) of this Audit Risk Alert, he or she could use sample sizes calculated on a consolidated basis for the holding company and all covered subsidiaries of that holding company. Sample sizes for covered subsidiaries that are not being reported on following Guideline 4(c) should not be calculated on a conHsolidated basis.
§ 363.2 **ANNUAL REPORTING REQUIREMENTS**		
(a) Audited financial statements. Each insured depository institution shall prepare annual financial statements in accordance with generally accepted accounting principles which shall be audited by an independent public accountant.	5. Annual Financial Statements. Each institution should prepare comparative annual consolidated financial statements (balance sheets, statements of income, changes in equity capital, and cash flows, with accompanying footnote disclosures) in accordance with generally accepted accounting principles (GAAP) for each of its two most recent fiscal years. Statements for the earlier year may be presented on an unaudited basis if the institution was not subject to this part for that year and audited statements were not prepared.	

Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Regulation	*Guidelines*	*Commentary*
	6. Holding Company Statements. Subsidiary institutions may file copies of their holding company's audited financial statements filed with the Securities and Exchange Commission (SEC) or prepared for their FR Y-6 Annual Report under the Bank Holding Company Act of 1956.	
	7. Insured Branches of Foreign Banks. An insured branch of a foreign bank should satisfy the financial statements requirement by filing one of the following for the two preceding fiscal years: (a) Audited balance sheets, disclosing information about financial instruments with off-balance-sheet risk; (b) Schedules RAL and L of Form FFIEC 002, prepared and audited on the basis of the instructions for its preparation; or (c) With written approval of the appropriate federal banking agency, consolidated financial statements of the parent bank.	● The guidelines permit insured branches of foreign banks to satisfy the requirement with (a) a balance sheet prepared in conformity with United States GAAP; (b) a schedule prepared on another comprehensive basis of accounting defined in the Federal Financial Institutions Examination Council (FFIEC) Consolidated Reports on Condition and Income (Call Reports) or Thrift Financial Reports (TFRs) instructions; or (c) the parent bank's consolidated financial statements, which may be prepared on a basis other than United States generally accepted accounting principles (GAAP).
(b) Management report. Each insured depository institution annually shall prepare, as of the end of the institution's most recent fiscal year, a management report signed by its chief executive officer and chief accounting or chief financial officer which contains: *(1) A statement of management's responsibilities for preparing the institution's annual financial statements, for establishing and maintaining an adequate internal control structure and procedures for financial reporting, and for complying with laws and regulations relating to safety and soundness which are designated by the FDIC and the appropriate federal banking agency; and* *(2) Assessments by management of the effectiveness of such internal control structure and procedures as of the end of such fiscal year and the institution's compliance with such laws and regulations during such fiscal year*	8. Management Report. Management should perform its own investigation and review of the effectiveness of internal controls and compliance with Designated Laws defined in guideline 12. Management also should maintain records of its determinations and assessments until the next federal safety and soundness examination, or such later date as specified by the FDIC or appropriate federal banking agency Management should provide in its assessment of the effectiveness of internal controls and compliance with the Designated Laws, or supplementally, sufficient information to enable the accountant to report on its assertions The management report of an insured branch of a foreign bank should be signed by the branch's managing official if the branch does not have a chief executive or financial officer.	● The Statement on Standards for Attestation Engagements (SSAE) No. 2 (AT section 400) states "an entity's internal control structure over financial reporting includes those policies and procedures that pertain to an entity's ability to record, process, summarize, and report financial data consistent with the assertions embodied in either annual financial statements or interim financial statements, or both" (paragraph 2 [AT section 400.02]). Accordingly, management's assertion and the independent accountant's report should relate to the assertions embodied in the annual financial statements required by 12 CFR § 363.2(a). The federal banking agencies have not issued guidance about whether Call Reports or TFRs fall within the scope of management's assertion and the independent accountant's report. Call Reports and TFRs are not included in the annual report required by 12 CFR § 363.4(1). However, the FDIC staff has stated that management's assertion will be expected to address call reporting. ● Guideline 8 supports the concept in the exposure draft of the proposed SSAE, *Compliance Attestation,* issued by the AICPA's Auditing Standards Board on April 7, 1993, that management's assertion be specific enough to be capable of evaluation.

Regulation	*Guidelines*	*Commentary*
	9 Safeguarding of Assets. The FDIC believes "safeguarding of assets," as the term relates to internal controls policies and procedures regarding financial reporting, and which has precedent in accounting literature, should be addressed in the management report and the independent public accountant's attestation discussed in guideline 18. It also believes that testing the existence of and compliance with internal controls on the management of assets, including loan underwriting and documentation, represents a reasonable implementation of section 36 Management should therefore address such internal controls as part of its management report, and the accountant should test compliance with them Recognizing the lack of objective criteria against which the accountant may judge safeguarding of assets, however, the FDIC does not require the accountant to attest to the adequacy of safeguards, but only to determine whether safeguarding policies exist, and whether management has implemented them [1]	● There are projects underway at various banking industry associations to provide guidance on management reporting ● SSAE No. 2 (AT section 400) addresses "safeguarding of assets" as required by Guideline 9 * Management's assertion about, and the independent accountant's tests of, financial reporting controls will consider "safeguarding of assets" policies and procedures accordingly The independent accountant's tests of controls over financial reporting of loans, for example, should include tests of whether the institution is executing transactions in accordance with management's policies for loan underwriting and loan documentation. Such procedures might include, for example, comparing approvals for loan transactions to management's written policy to ascertain whether the loan was apHproved by an officer or committee consistent with the authority limits specified for that officer or committee in the policy. Therefore, such policies and procedures are implicit in management's assertion and the independent accountant's opinion. However, management's assertion and the independent accountant's opinion could explicitly refer to safeguarding of assets, to emphasize that the scope of management's assertion and the attestation report is consistent with, and limited to, safeguarding of assets in the context discussed in paragraph 27 of SSAE No. 2 (AT section 400.27). Further guidance on such report language is needed

[1] It is management's responsibility to establish underwriting policies and to make credit decisions. The auditor's role is to test compliance with management's policies.

* Specifically, paragraph 27 of SSAE No. 2 (AT section 400.27) states:

> In the context of an entity's internal control structure, safeguarding of assets refers only to protection against loss from errors and irregularities in the processing of transactions and the handling of related assets. It does not include, for example, loss of assets arising from management's operating decisions, such as selling a product that proves to be unprofitable, incurring expenditures for equipment or material that proves to be unnecessary or unsatisfactory, authorizing what proves to be unproductive research or ineffective advertising, or accepting some level of merchandise pilferage by customers as part of operating a retail business.

See also Appendix D of SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319.69).

Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Regulation	*Guidelines*	*Commentary*
		If the scope of management's assertion with respect to safeguarding of assets goes beyond the context discussed in paragraph 27 of SSAE No. 2 (AT section 400 27), management should explicitly describe the scope of its assertion and further guidance would be needed for reporting by the independent accountant
	10. Standards for Internal Controls. Each institution should determine its own standards for establishing, maintaining and assessing the effectiveness of its internal controls.[2]	● SSAE No. 2 (AT section 400.27) establishes conditions for the acceptance of engagements to examine and attest to management assertions about financial reporting controls One condition is that management evaluate the effectiveness of the institution's financial reporting controls using reasonable criteria for effective internal control structures established by a recognized body. Criteria issued by the AICPA, regulatory agencies, or other bodies that comprise experts who follow due procedures, including procedures for the broad distribution of proposed criteria for public comment, usually should be considered reasonable criteria for this purpose. For example, the report *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission provides reasonable criteria. The Auditing Standards Board has a project under way to conform SAS No. 55 (AU section 319) to the COSO report SAS No. 30, *Reporting on Internal Accounting Control,* has been superseded by SSAE No. 2 (AT section 400)

[2] In considering what information is needed on safeguarding of assets and standards for internal controls, management may review guidelines provided by its primary federal regulator; the Federal Financial Institutions Examination Council's "Supervisory Policy Statement on Securities Activities"; the FDIC's "Statement of Policy Providing Guidance on External Auditing Procedures for State Nonmember Banks" (Jan. 16, 1990), "Statement of Policy Regarding Independent External Auditing Programs of State Nonmember Banks" (Nov. 16, 1988), and Division of Supervision Manual of Examination Policies; the Federal Reserve Board's Commercial Bank Examination Manual and other relevant regulations; the Office of Thrift Supervision's Thrift Activities Handbook; the Comptroller of the Currency's Handbook for National Bank Examiners; standards published by professional accounting organizations, such as the American Institute of Certified Public Accountant's (AICPA) Statement on Auditing Standards No. 30, "Reporting on Internal Accounting Control"; and other internal control standards published by the AICPA, other accounting or auditing professional associations, and financial institution trade associations.

Regulation	*Guidelines*	*Commentary*
	11 Service Organizations. Although service organizations should be considered in determining if internal controls are adequate, an institution's independent public accountant, its management, and its audit committee should exercise independent judgment concerning that determination On-site reviews of service organizations may not be necessary to prepare the reports required by the Rule, and the FDIC does not intend that the Rule establish any such requirement.	● SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324),which provides guidance to independent accountants of a service organization on issuing a report on certain aspects of the service organization's internal control structure that can be used by other independent accountants, also provides guidance on how other independent accountants should use such reports. Further, paragraphs 84-87 of SSAE No. 2 (AT section 400.84—.87) discuss the relationship of the practitioner's examination of an entity's internal control structure to the opinion obtained in an audit of financial statements.
	12 Compliance with Laws and Regulations The designated laws and regulations are the federal laws and regulations concerning loans to insiders and the federal and state laws and regulations concerning dividend restrictions, which are more specifically identified in Section I of the Agreed Upon Procedures referred to in guideline 19

Regulation	*Guidelines*	*Commentary*
§ 363.3 INDEPENDENT PUBLIC ACCOUNTANT		
(a) Annual audit of financial statements. Each insured depository institution shall engage an independent public accountant to audit and report on its annual financial statements in accordance with generally accepted auditing standards and section 37 of the Federal Deposit Insurance Act (12 U S C. 1831n). The scope of the audit engagement shall be sufficient to permit such accountant to determine and report whether the financial statements are presented fairly and in accordance with generally accepted accounting principles.	13 General Qualifications To provide audit and attest services to insured depository institutions, an independent public accountant should be registered or licensed to practice as a public accountant, and be in good standing, under the laws of the state or other political subdivision of the United States in which the home office of the institution (or the insured branch of a foreign bank) is located. As required by section 36(g)(3)(A)(i), the accountant must agree to provide copies of any workpapers, policies, and procedures relating to services performed under this part.	● If the independent public accountant is a firm, the firm and the signing partner should meet qualification criteria. ● Practitioners should consult the AICPA Auditing Standards Division's *Notice to Practitioners* (reproduced as Appendix C (paragraph 54) to this document) for further guidance on complying with requests for access to workpapers With respect to requests for access, the independent accountant should consider asking that the regulators' request be in writing (as discussed in the *Notice to Practitioners*) and specify the documents sought and the reason for requesting access. The independent accountant should also consider asking that the request be signed by the highest official responsible for examinations at a state banking regulatory agency or the regional office of a federal regulatory agency Further, the independent accountant should consider asking that the request acknowledge that the agency requesting access will keep any information obtained from the documents confidential. Agencies with access should be permitted to disclose such information if it is to be used as evidence in a formal proceeding brought by, or on behalf of, the agency against the client or the independent accountant, but only after the independent accountant and the client have received reasonable notice of the proposed disclosure and the opportunity to apply for an effective protective order.
	14. Independence. The independent public accountant also should be in compliance with the AICPA's *Code of Professional Conduct* and meet the independence requirements and interpretations of the SEC and its staff.	● Under Guideline 14, independent accountants not currently subject to the Securities and Exchange Commission's (SEC's) independence requirements must meet those requirements.
	15. Peer Reviews. As required by section 36(g) (3)(A)(ii), the independent public accountant must have received, or be enrolled in, a peer review that meets acceptable guidelines The following peer review guidelines are acceptable: (a) The external peer review should be conducted by an organization independent of the accountant or firm being reviewed, as frequently as is consistent with professional accounting practices; (b) The peer review should be gener-	● Guideline 15 acknowledges that certain firms—for example, those that have been recently formed—may be enrolled in a practice monitoring program but may not have yet received a review. It also recognizes that certain firms may not have previously performed audits of depository institution financial statements. ● Current practice, as referred to by Guideline 15(a), requires a review once every three years. ● Guidance on making workpapers available to the FDIC in a form consistent with the SEC's agreement, as

Regulation	*Guidelines*	*Commentary*
	ally consistent with AICPA standards; [3] and (c) The review should include, if available, at least one audit of an insured depository institution or consolidated financial holding company. Peer review working papers are to be retained for 120 days after the peer review report is filed with the FDIC, and be made available to the FDIC upon request, in a form consistent with the SEC's agreement with the accounting profession. 16. Filing Peer Review Reports. Within 15 days of receiving notification that the peer review has been accepted, or before commencing any audit under this part, whichever is earlier, two copies of the peer review report, accompanied by any letter of comments and letter of response, should be filed by the independent public accountant with the FDIC, Registration and Disclosure Section, 550 17th Street, NW, Washington, DC 20429, where they will be available for public inspection. Accountants may elect to file an annual list of their insured depository institution and holding company (identifying any subsidiary institutions subject to this part) audit clients in lieu of copies of peer review reports for each institution they have been engaged to audit. The FDIC has determined that such client lists are exempt from public disclosure. All corrective action required under any qualified peer review report should have been taken prior to commencing services under this part.	referred to by Guideline 15(c), is available from the AICPA's Quality Review Division to independent accountants who receive such a request from the FDIC. ● Based on footnote 3 to Guideline 15, membership in the AICPA's Division for CPA Firms' SEC Practice Section or Private Companies Practice Section or enrollment in the AICPA Quality Review Program should satisfy the requirement. ● Consistent with Guideline 15, a firm that is enrolled in a practice monitoring program, but has not yet received a report, would not be required to file a report before commencing an engagement under the rule. Independent accountants who are not currently undergoing a review in 1993 may wish to consider filing their most recent report with the FDIC now.

[3] These would include Standards for Performing and Reporting on Peer Reviews, codified in the *SEC Practice Section Reference Manual;* Standards for Performing and Reporting on Quality Reviews (QR section 100); or Standards for Performing and Reporting on Peer Reviews, of the AICPA's Private Companies Practice Section.

Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Regulation	*Guidelines*	*Commentary*
	17 Information to Independent Public Accountant Attention is directed to section 36(h) which requires institutions to provide specified information to their accountants. An institution also should provide its accountant with copies of any notice that the institution's capital category is being changed or reclassified under section 38 of the correspondence from the FDI Act, and any appropriate federal banking agency concerning compliance with this part	● Section 36(h) referred to by Guideline 17 requires an institution to generally provide its independent accountant with copies of the following: —The institution's most recent Call Report (or TFR) and report of examination —Any supervisory memorandum of understanding and any written agreement between the institution and any federal or state banking agency —A report of any action initiated or taken by federal or state banking agencies —A report of any assessment of any civil money penalty under any other provision of law with respect to the institution or any institution-affiliated party.
(b) Additional reports. Such independent public accountant shall examine, attest to, and report separately on, the assertions of management concerning the institution's internal control structure and procedures for financial reporting. The accountant shall apply procedures agreed upon by the FDIC objectively to determine compliance by an insured depository institution with designated laws and regulations. The attestations shall be made in accordance with generally accepted standards for attestation engagements	18. Attestation Reports The independent public accountant should provide the institution with an internal controls attestation report, a compliance with Designated Laws attestation report, and any management letter, at the conclusion of the audit as required by section 36(c)(1). If a holding company subsidiary relies on its holding company management report, the accountant may attest to and report on the management's assertions in one report, without reporting separately on each subsidiary covered by this part. One attestation report for compliance with the Designated Laws also may be filed, if all exceptions are listed and the respective institutions to which the exceptions apply are identified. The FDIC has determined that management letters and the Designated Laws attestation report are exempt from public disclosure.	● Practitioners should consult SSAE No. 2 (AT section 400), and the final SSAE on compliance attestation that is expected to be issued by the AICPA by year-end 1993, for guidance on reporting that involves multiple locations. ● The independent accountant's compliance attestation report and any management letter will not be publicly available.

Regulation	*Guidelines*	*Commentary*
	19. Procedures for Determining Compliance with Designated Laws. In order to permit the independent public accountant to determine the extent of compliance with the Designated Laws defined in guideline 12 and the related assessment by management, the procedures set forth in schedule A (the Agreed Upon Procedures) to these Guidelines should be applied The accountant should require all management representations to be in writing, and take appropriate steps to determine that any sampling is reasonably representative Attestation reports generally should identify all findings from application of the Agreed Upon Procedures which establish any items of non-compliance, note any absence of written policies, and disclose the reasons why any Agreed Upon Procedures were not performed 20. Reviews with Audit Committee and Management The independent public accountant should meet with the institution's audit committee to review the accountant's reports required by this part before they are filed. It also may be appropriate for the accountant to review its findings with the institution's board of directors and management.	● Although Guideline 19 refers to a determination about compliance with laws and regulations, the independent accountant will make no such determination. Rather, the independent accountant will report procedures performed and findings. The FDIC and other regulatory agencies will have to consider the procedures and findings in making their own determination about compliance. ● The AICPA's SSAEs provide guidance on reporting findings, and scope limitations
(c) Notice by accountant of termination of services. An independent public accountant performing an audit under this part who ceases to be the accountant for an insured depository institution shall notify the FDIC and the appropriate federal banking agency in writing of such termination within 15 days after the occurrence of such event, and set forth in reasonable detail the reasons for such termination	21. Notice of Termination. The notice required by § 363 3(c) should state whether the independent accountant agrees with the assertions contained in any notice filed by the institution under § 363.4(d), and whether the institution's notice discloses all relevant reasons.	

Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Regulation	*Guidelines*	*Commentary*
	22. Reliance on Internal Auditors. Nothing in this part or this appendix is intended to preclude the ability of the independent public accountant to rely on the work of an institution's internal auditor.	● The extent to which the independent accountant may consider the work of internal auditors in a financial statement audit is addressed in SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AU section 322). SSAE No. 2 (AT section 400) refers the accountant to SAS No 65 (AU section 322) when addressing the competence and objectivity of internal auditors; the nature, timing, and extent of work to be performed, and other related matters in an examination-level attestation engagement (such as a report on the examination of management's assertion about financial reporting controls) With respect to the compliance attestation engagement, the Auditing Standards Board, at its December 1992 meeting, concluded that the external auditor may not use the internal auditor for direct assistance in an agreed-upon procedures engagement to satisfy the FDICIA requirement. As discussed in appendix B (paragraph 53), guidance is needed for reporting on procedures performed on internal auditors' workpapers.
§ 363.4 FILING AND NOTICE REQUIREMENTS		
(a) Annual reporting. Within 90 days after the end of its fiscal year, each insured depository institution shall file with each of the FDIC, the appropriate federal banking agency, and any appropriate state bank supervisor, two copies of: *(1) An annual report containing audited annual financial statements, the independent public accountant's report thereon, management's statements and assessments, and the independent public accountant's attestation report concerning the institution's internal control structure and procedures for financial reporting as required by § 363.2(a) and 363.3(a), and 363 3(b) respectively; and* *(2) the accountant's attestation concerning compliance with laws and regulations pursuant to § 363.3(b).*	23. Place for Filing. Except for peer review reports filed pursuant to Guideline 16, all reports and notices required by, and other communications or requests made pursuant to, this part should be filed as follows: (a) FDIC: Regional Director (Supervision) of the FDIC Regional Office in which the institution is headquartered; (b) Office of the Comptroller of the Currency (OCC): appropriate OCC Supervisory Office; (c) Federal Reserve: appropriate Federal Reserve Bank; (d) Office of Thrift Supervision (OTS): appropriate OTS District Office; and (e) State bank supervisor: the filing office of the appropriate state bank supervisor	

Regulation	*Guidelines*	*Commentary*
	24 Relief from Filing Deadlines Although the FDIC believes that the deadlines for filings and other notices established by section 36 and this part are reasonable, it recognizes some institutions occasionally may be confronted with extraordinary circumstances beyond their reasonable control that may justify extensions of a deadline In that event, upon written application from an insured depository institution, setting forth the reasons for any requested extension, the FDIC or appropriate federal banking agency may, for good cause shown, extend the deadline for a period not to exceed 30 days	
(b) Public availability The foregoing annual report in paragraph (a) of this section shall be available for public inspection	25 Public availability Each institution's annual report should be available for public inspection at its main branch offices no later than 15 days after it is filed with the FDIC Alternatively, an institution may elect to mail one copy of its annual report to any person who requests it The annual report should remain available to the public until the annual report for the next year is available. An institution may use its annual report under this part to meet the annual disclosure statement required by 12 CFR 350 3, if the institution satisfies all other requirements of 12 CFR part 350	● The publicly available annual report contains the independent accountant's audit report on financial statements and attestation report on management's assertion about financial reporting controls. The independent accountant's agreed-upon procedures report is not to be included in the annual report and is not publicly available.
(c) Independent accountant's reports Each insured depository institution shall file with the FDIC, the appropriate federal banking agency, and any appropriate state bank supervisor, a copy of any management letter, qualification, or other report issued by its independent public accountant with respect to such institution and the services provided by such accountant pursuant to this part within 15 days after receipt	26. Independent Public Accountant's Report Section 36(h)(2)(A) requires that, within 15 days of receipt by an institution of any management letter or other report, such letter or other report shall be filed with the FDIC, any appropriate federal banking agency and any appropriate state bank supervisor Institutions and their accountants are encouraged to coordinate preparation and delivery of audit and attestation reports and filing the annual report, to avoid duplicate filings	● Note that management must file, within fifteen days of receipt, reports of the independent accountant, even if they will be filed later with the annual report discussed in Guidelines 23 and 25 For example, if management receives a letter communicating internal control structure matters noted in the interim fieldwork for a subject financial statement audit, that report should be filed when received. SAS No. 1, *Codification of Auditing Standards and Procedures* (AU section 530), provides guidance on dating of the independent auditor's report on financial statements When providing final reports, practitioners may wish to include a transmittal letter, which will help document when the report was sent to the institution. ● The law, implementing regulations, and guidelines do not eliminate the independent accountant's responsibility under generally accepted auditing standards (GAAS) for communicating internal control structure related matters noted in a financial statement audit

Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Regulation	*Guidelines*	*Commentary*
(d) Notice of engagement or change of accountants. Each insured depository institution shall provide, within 15 days after the occurrence of any such event, written notice to the FDIC, the appropriate federal banking agency, and any appropriate state bank supervisor of the engagement of an independent public accountant, or the resignation or dismissal of the independent public accountant previously engaged. The notice shall include a statement of the reasons for any such event in reasonable detail.	27. Notices Concerning Accountants. Institutions should review and satisfy themselves as to compliance with the required qualifications set forth in guidelines 13-15 before engaging an independent public accountant. With respect to any selection, change or termination of an accountant, institutions should be familiar with the notice requirements in guideline 21, and should send a copy of any notice under § 363.4(d) to the accountant when it is filed with the FDIC. An institution which files reports with its appropriate federal banking agency under, or is a subsidiary of a holding company which files reports with the SEC pursuant to, the Securities Exchange Act of 1934 may use its current report (e.g. SEC Form 8-K) concerning a change in accountant to satisfy the similar notice requirements of this part.	● "Other report" refers to the reports required by 12 CFR § 363. ● The current report filed with regulators (that is, Form F-3 for the FDIC and SEC Form 8-K for others) includes the independent accountant's response to management's disclosures. However, it may not include all matters required to be reported under 12 CFR § 363.3(c) and Guideline 21.
§ 363.5 AUDIT COMMITTEES		
(a) Composition and duties. Each insured depository institution shall establish an independent audit committee of its board of directors, the members of which shall be outside directors who are independent of management of the institution, and the duties of which shall include reviewing with management and the independent public accountant the basis for the reports issued under this part.	28. Composition. The board of directors of each institution should determine if outside directors meet the requirements of section 36 and this part. At least annually, it should determine whether all existing and potential audit committee members are "independent of management of the institution." If the institution has total assets in excess of $3 billion, the board also should determine whether members of the committee satisfy the additional requirements of this part. Because an insured branch of a foreign bank does not have a separate board of directors, the FDIC will not apply the audit committee requirements to such branch. However, any such branch is encouraged to make a reasonable good faith effort to see that similar duties are performed by persons whose experience is generally consistent with the Rule's requirements for an institution the size of the insured branch 29. "Independent of Management" Considerations. In determining whether an outside director is independent of management, the board should consider all relevant information. This would include considering whether the director: (a) Is or has been an officer or employee of the institution or its affiliates;	

Regulation	*Guidelines*	*Commentary*

(b) Serves or served as a consultant, advisor, promoter, underwriter, legal counsel, or trustee of or to the institution or its affiliates;

(c) Is a relative of an officer or other employee of the institution or its affiliates;

(d) Holds or controls a direct or indirect financial interest in the institution or its affiliates; and

(e) Has outstanding extension of credit from the institution or its affiliates.

30. Lack of Independence An outside director should not be considered independent of management if such director is, or has been within the preceding year, an officer or employee of the institution or any affiliate, or owns or controls, or has owned or controlled with the preceding year, assets representing 10 percent or more of any outstanding class of voting securities of the institution.

31. Holding Company Audit Committees. Members of an independent audit committee of a holding company may serve as the audit committee of any subsidiary institution if they are otherwise independent of management of the subsidiary. This would not, however, permit officers or employees of the holding company to serve on the audit committee of its subsidiary institutions. The audit committee of the holding company may perform all the duties of the audit committee of a subsidiary institution, even though such holding company directors are not directors of the institution.

32. Duties. The audit committee should perform all duties determined by the institution's board of directors. The duties should be appropriate to the size of the institution and the complexity of its operations, and include reviewing with management and the independent public accountant the basis for the reports issued under § 363 2(b) Appropriate additional duties could include:

(a) Reviewing with management and the independent public accountant the scope of services required by the audit, significant accounting policies, and audit conclusions regarding significant accounting estimates;

Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Regulation	*Guidelines*	*Commentary*
	(b) Reviewing with management and the accountant their assessments of the adequacy of internal controls, and the resolution of identified material weaknesses and reportable conditions in internal controls, including the prevention or detection of management override or compromise of the internal control system; (c) Reviewing with management and the accountant the institution's compliance with laws and regulations; (d) Discussing with management the selection and termination of the accountant and any significant disagreements between the accountant and management; and (e) Overseeing the internal audit function. It is recommended that audit committees maintain minutes and other relevant records of their meetings and decisions.	
(b) Committees of large institutions. The audit committee of any insured depository institution that has total assets of more than $3 billion, measured as of the beginning of each fiscal year, shall include members with banking or related financial management expertise, have access to its own outside counsel, and not include any large customers of the institution.	33. Banking or Related Financial Management Expertise At least two members of the audit committee of a large institution shall have "banking or related financial management expertise" as required by section 36(g)(1)(C)(i). This determination is to be made by the board of directors of the insured depository institution. A person will be considered to have such required expertise if the person has significant executive, professional, educational, or regulatory experience in financial, auditing, accounting, or banking matters as determined by the board of directors. Significant experience as an officer or member of the board of directors or audit committee of a financial services company would satisfy these criteria. 34. Large Customers. Any individual or entity (including a controlling person of any such entity) which, in the determination of the board of directors, has such significant direct or indirect credit or other relationships with the institution, the termination of which likely would materially and adversely affect the institution's financial condition or results of operations, should be considered a "large customer" for purposes of § 363.5(b).	

Regulation	*Guidelines*	*Commentary*
	35. Access to Counsel. The audit committee should be able to retain counsel at its discretion without prior permission of the institution's board of directors or its management. Section 36 does not preclude advice from the institution's internal counsel or regular outside counsel. It also does not require retaining or consulting counsel, but if the committee elects to do either, it also may elect to consider issues affecting the counsel's independence. Such issues would include whether to retain or consult only counsel not concurrently representing the institution or any affiliate, and whether to place limitations on any counsel representing the institution concerning matters in which such counsel previously participated personally and substantially as outside counsel to the committee.	
	36 Forming and Restructuring Audit Committees. Audit committees should be formed within four months of the effective date of this part. Some institutions may have to restructure existing audit committees to comply with this part. No regulatory action will be taken if institutions restructure their audit committees by the earlier of their next annual meeting of stockholders, or one year from the effective date of this part.	
	37. Modifications of Guidelines. The FDIC Board of Directors has delegated to the Director of the FDIC's Division of Supervision authority to make and publish in the *Federal Register* minor technical amendments to the Guidelines (including the attached Agreed Upon Procedures in schedule A to this appendix), in consultation with the other appropriate federal banking agencies, to reflect the implementation of this part. It is not anticipated any such modification would be effective until affected institutions have been given reasonable advance notice of the modification Any material modification or amendment will be subject to review and approval of the FDIC Board of Directors.

.53

Appendix B
Agreed-Upon Procedures

Reprinted in the following are the agreed-upon procedures to be performed by the independent accountant in relation to management's assertion about compliance with dividend restriction and insider loan laws and regulations.[1] The resulting report will not be publicly available (see guideline 18 in appendix A [paragraph .52]). The AICPA staff commentary on the procedures is provided in the fully italicized paragraphs.

Section I—Procedures for Individual Institutions

The following information should be obtained, and the indicated procedures should be performed, by the institution's independent public accountant in accordance with generally accepted standards for attestation engagements, or by the institution's internal auditor if the procedures set forth in section II of this schedule are to be performed by the accountant.

> ***Commentary:*** *On April 7, 1993, the Auditing Standards Board published an exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE),* Compliance Attestation. *That statement would provide additional guidance on such agreed-upon procedures level attestation engagements. Comments on the exposure draft were due by June 30, 1993. A final statement is expected to be issued by year-end 1993.*

> ***Commentary:*** *The following sample sizes have not been objected to by the FDIC, the OCC, or the OTS for purposes of applying those procedures that require sampling:*

Population Number (N)	*Sample size*
100 or greater	60
50 to 100	25
0 to 50	N or 20, whichever is smaller

A. Loans to Insiders

1. *Designated Laws.* The following laws and regulations (Designated Insider Laws) should be read:

(a) The laws codified at 12 U.S.C. 375, 375a, 375b, 376, 1468(b), 1828(j)(2), 1828(j)(3)(B), 1817(k), and 1972; and

(b) The regulations set forth at 12 CFR 23.5, part 31, 211.3(b)(4), part 215, 337.3, 349.3, 563.43, and 935.2.

2. *Information and Procedures.* Obtain from management of the institution, and read, the following information for the institution's most recent fiscal year through the date of the attestation report, and perform the procedures indicated with respect to such information:

a. *General Information.* Obtain management's assessment of compliance with the Designated Insider Laws; all minutes (including minutes drafted, but not approved) of the meetings of the board and its committees; reports of examinations, supervisory agreements, and enforcement actions issued by the institution's primary federal and state regulators, if applicable; all public documents filed under the Securities and Exchange Act of 1934 with the FDIC, SEC, Federal Reserve Board, OCC, or OTS and annual reports filed by insiders identifying their related interest as required by 12 CFR 215.7.

Procedure:

(i) Read the foregoing information.

[1] Reprinted from Appendix A to 12 CFR Part 363. See *Federal Register,* June 2, 1993.

(ii) Trace and agree each disclosed insider loan and other extension of credit to see that it is included on the list of Insider Transactions.

b. *Calculations.* Obtain management's calculation of the greater of 5 percent of the institution's year-end capital and unimpaired surplus or $25,000.

Procedure: Recalculate for mathematical accuracy, and trace amounts used in management's calculations to the institution's year-end Call Report or TFR.

c. *Policies and Procedures.* Obtain the institution's written policies and procedures concerning its compliance with the Designated Insider Laws, including any written "Code of Ethics" or "Conflict of Interest" policy statements. If the institution has no written policies and procedures, obtain a narrative from management that describes the methods for complying with such laws, and includes provisions similar to those listed below.

Procedure: Ascertain that the policies and procedures include, or incorporate by reference, provisions consistent with the Designated Insider Laws for:

(i) Defining terms;

(ii) Prohibiting and restricting loans to insiders (i.e., directors, executive officers, and principal shareholders and their related interests);

(iii) Maintaining records of loans to insiders;

(iv) Requiring reports and disclosures by the institution and by executive officers, directors, and principal shareholders;

(v) Disseminating policy information;

(vi) Revising policies to reflect subsequent changes in the law;

(vii) Educating employees about the legal requirements and management's related policies and procedures;

(viii) Prior approval of the board of directors or its committees, as appropriate; and

(ix) Reporting insider loans to regulatory agencies on the institution's Call Report or TFR.

d. *Insider Transactions.* Obtain a list of loans or other extensions of credit to insiders (including their related interests) during the fiscal year and management's written representations regarding—

(i) The completeness of the list, and

(ii) Whether the terms of insider transactions are comparable to those that would have been available to unaffiliated third parties.

Procedure: Select a sample of the insider transactions from the list. For each transaction in the sample selected:

(1) Ascertain that each executive officer and principal shareholder (or related interest) has reported annually to the board of directors, on or before January 31 of the following year, any indebtedness to correspondent banks, and that such report states:

(a) The maximum amount of indebtedness during the previous calendar year;

(b) The amount of indebtedness outstanding 10 days prior to report filing; and

(c) A description of the loan terms and conditions, including the rate or range of interest rates, original amount and date, maturity date, payment terms, security, and any unusual terms or conditions.

 Copyright © 1994, American Institute of Certified Public Accountants, Inc.

(2)(a) Trace and agree amounts outstanding by insiders to the schedule aggregating indebtedness of all insiders on the institution's year-end Call Report or TFR;

(b) Obtain from management documentation that indicates whether the specific extensions of credit, at the option of the institution, will become due and payable at any time that the insider is indebted to any other insured institution in an aggregate amount greater than the amount specified for a category of credit in 12 CFR 215.5(c);

(c) Obtain from management a copy of the institution's written notification to the insider to ascertain whether the insider has been informed of the reporting requirements relative to insider transactions and has acknowledged such requirements;

(d) If the credit exceeds the lesser of the calculation obtained in paragraph 2b. or $500,000, read the minutes of the meetings of the board of directors and determine whether the minutes indicate that the credit was approved in advance by the board and the insider abstained from participating directly or indirectly in voting on the transactions; and

(e) Obtain management's calculated legal lending limit for the credit and ascertain whether the amount of the credit exceeds such limit.

(3) For executive officers, directors, and principal shareholders of the institution included in the sample, obtain a written history of the insider's overdrafts for the year and obtain management's representation whether that history is complete. In addition,

(a) Inquire whether cash items for the individual are being held by the institution to prevent an overdraft, and

(b) Trace and agree subsequent payment by the insider of the insider's overdrafts to records of the account at the institution.

(4) For overdrafts of executive officers and directors included in the sample that are being paid by the institution for the executive officer and director on an account at the institution:

(a) Trace and agree to a written, pre-authorized, interest-bearing extension of credit plan that specifies a method of repayment; or,

(b) Trace and agree to a written, pre-authorized transfer of funds from another account of the insider at the institution; or,

(c) For aggregate amounts of $1,000 or less, obtain a written representation from management that:

(i) It believes the overdraft was inadvertent,

(ii) The account was overdrawn in each case for less than 5 business days, and

(iii) The institution charged the executive officer and director the same fee that it would charge any other customer in similar circumstances.

(5) For extensions of credit to an executive officer selected, ascertain that each credit was:

(a) Preceded by a submission of a financial statement;

(b) Promptly reported to the board of directors; and

(c) Made subject to the condition, as specified in the note or other evidence of indebtedness, that the extension of credit will become, at the option of the institution, due and payable at any time that the executive officer is indebted to other insured institutions in an aggregate amount greater than the executive officer would be able to borrow from the institution.

(6) Based on the types of transactions in the sample selected, select a sample of similar transactions with persons who are not insiders of the institution or its affiliates as of the same dates or within two weeks of the

insider transaction. Compare the terms of the transactions with the persons not affiliated with the institution to those with insiders, and note in the findings any material differences in the terms favorable to insiders compared to the terms of the transactions with persons not affiliated with the institution or its affiliates.

Commentary: The independent accountant's selection of "similar" transactions and comparison of terms should only relate to objectively measurable characteristics of the loan (for example, the stated interest rate, or the type of loan).

(7) Aggregate the indebtedness to executive officers, directors, and principal shareholders of the institution and to their related interests from the list obtained as of the end of the fiscal year and one other day selected during the year. Compare this total with 100 percent of the institution's unimpaired capital and surplus at the one day selected during the year and the end of its fiscal year. (The unimpaired capital and surplus calculated from the most recent Call Report or TFR may be used, unless there is reason to believe that a significant change has taken place between the dates.) Report any excess as an exception in the findings.

Commentary: The independent accountant should state his or her objective criterion for "significant change" if applicable.

e. *Executive Officers' Reports.* Obtain a list of all written reports made by executive officers of the institution concerning debt with other insured institutions, and management's representation concerning the completeness of such list.

Procedure: Select a sample of written reports. For reports selected, note any reported aggregate extensions of credit in excess of the amounts management represents the executive officer would have been able to borrow from the reporting institution and whether the report was made within 10 days of the date the indebtedness reached such a level.

Commentary: The preceding procedures relate to the insider's debt at other institutions. The procedures that follow relate to the insider's debt at the covered institution.

Obtain management's calculation of:

(i) The aggregate amount of loans and other extensions or lines of credit to the executive officer and

(ii) 2.5 percent of the institution's capital and unimpaired surplus.

Recalculate management's computations for mathematical accuracy and trace amounts used in management's computations to the institution's Call Report or TFR. Ascertain whether the aggregate amount of the credits for the executive officer exceeds the greater of 2.5 percent of the institution's capital and unimpaired surplus or $25,000, but in no event more than $100,000, unless such credits are used to finance the education of the executive officer's children or the officer's principal residence. If the credit extended is a real estate loan, obtain documentation for the credit and note whether such documentation contains representations that:

(i) The purpose of the credit is for the purchase, construction, maintenance, or improvement of the executive officer's principal residence;

(ii) The credit is secured by a first lien on the residence; and

(iii) The executive officer owns or expects to own the residence after the extension of credit.

B. Dividend Restrictions

1. *Designated Laws.* The following federal laws and regulations (Designated Dividend Laws) should be read:

(a) The laws codified at 12 U.S.C. 56, 60, 1467(a)(f), 1831o; and

(b) The regulations set forth at 12 CFR 5.61, 5.62, 6.6, 7.6120, 208.19, and 563.134.

 Copyright © 1994, American Institute of Certified Public Accountants, Inc.

Commentary: The independent accountant should also read any state laws identified by management in its assertion.

2. *Information and Procedures.* Obtain from management of the institution, and read, the following information for the institution's most recent fiscal year through the date of the attestation report, and perform the procedures indicated with respect to such information:

a. *Management's Assessment.* Obtain management's assessment of the institution's compliance with the Designated Dividend Laws and any applicable state laws and regulations cited in management's assessment. Also obtain management's written representation whether dividends declared comply with the legal limitations and any restrictions on dividend payments under any supervisory agreements, orders, or resolution of any regulatory agency (including a description of the nature of any such agreement, order, or resolution).

b. *Policies and Procedures.* Obtain in the institution's written policies and procedures concerning its compliance with the Designated Dividend Laws. If the institution has no written policies and procedures, obtain from the institution a narrative that describes the institution's methods for complying with Designated Dividend Laws, includes provisions similar to those below.

Procedure: Ascertain whether the policies and procedures include, or incorporate by reference, provisions which are consistent with the Designated Dividend Laws. For banks and savings institutions, these would include capital limitation tests, including section 38 of the FDI Act, earnings limitation tests, transfers from surplus to undivided profits, and restrictions imposed under any supervisory agreements, resolutions, or orders of any federal or state bank regulatory agency. For savings associations, include prior notification to the OTS.

c. *Board Minutes.* Obtain minutes of the meetings of the board of directors for the most recent fiscal year to ascertain whether dividends (either paid or unpaid) have been declared.

Procedure: Trace and agree total dividend amounts to the general ledger records and the institution's appropriate Call Reports or TFRs filed with regulators.

d. *Calculation.* Obtain management's computation of the amount at which declaration of a dividend would cause the institution to be undercapitalized.

Procedure: Recalculate management's computation (for mathematical accuracy) and compare management's calculations to the amount of any dividend declared to determine whether it exceeded the amount.

e. *National and State Member Banks.* Obtain management's computation concerning its compliance with 12 U.S.C. 56, "Capital Limitation Test," 12 U.S.C. 60, "The Earnings Limitation Test," and transfers from surplus to undivided profits after payment of the dividends referenced in subsection 2c. above.

Procedure: Recalculate management's computations (for mathematical accuracy) and compare management's calculations to the standards defined in the test set forth in subsection 2d. above to ascertain whether the dividends declared fall under the permissible level under this standard. If dividends are not permissible under such standard, ascertain if the dividends were declared under approval of the appropriate federal banking agency or any other exception. If not, report the exception in the findings.

f. *Savings Associations.* Obtain management's documentation of the OTS determination of whether the institution is a Tier 1, Tier 2, or Tier 3 savings institution and management's computation of its capital ratio after declaration of dividends under the Tier determined by the OTS. For dividends declared, obtain a copy of the savings institution's notification to the OTS to ascertain whether notification was made at least 30 days before payment of any dividends.

Procedure: Recalculate management's computation (for mathematical accuracy) and trace amounts used by management in its calculation to the institution's TFRs.

Section II—Procedures for Independent Public Accountant

If the internal auditor has performed the procedures set forth in section I, the following procedures may be performed by the independent public accountant if neither the FDIC nor the appropriate federal banking agency has objected in writing. If the procedures in section I have been performed by an internal auditor employed by a holding company, such procedures should be applied to each subsidiary institution (a Covered Subsidiary) subject to this part. The report of procedures performed and list of exceptions found by the internal auditor, identifying the institution with respect to which any exception was found, should be submitted to the audit committee of the board of directors.

A. Review of Designated Laws

The Designated Insider Laws and Designated Dividend Laws applicable to the institution should be read.

B. Information and Procedures

Obtain from management of the institution, and read, the following information for the institution's most recent fiscal year through the date of the attestation report, and perform the procedures indicated with respect to such information:

1. *Designated Laws.* Read section I of this schedule. Obtain management's assessment contained in its management report on the institution's or holding company's compliance with the Designated Laws.

2. *Internal Auditor's Workpapers.* If an internal auditor performed the procedures in Section I, obtain the internal auditor's workpapers documenting the performance of those procedures on the institution, including all Covered Subsidiaries, and the chief internal auditor's written representation that:

(a) The internal auditor or audit staff, if applicable, performed the procedures listed in section I on the institution and each Covered Subsidiary;

(b) The internal auditor tested a sufficient number of transactions governed by the Designated Laws so that the testing was representative of the institution's or Covered Subsidiary's volume of transactions;

(c) The workpapers accurately reflect the work performed by the internal auditor and, if applicable, the internal audit staff;

(d) The workpapers obtained are complete; and

(e) The internal auditor's report, which describes the procedures performed for the preceding fiscal year as well as the internal auditor's findings and exceptions noted, has been presented to the institution's audit committee.

Procedure: Compare the workpapers to the procedures that are required to be performed under section I, and report as an exception any procedures not documented and any procedures for which the sample size is not sufficient.

> ***Commentary:*** *The independent accountant should compare sample sizes to those in the table at the beginning of section I of this appendix. A subjective determination about the sufficiency of sample sizes is beyond the scope of an agreed-upon procedures attestation engagement.*

Compare the exceptions and errors listed by the internal auditor in its report to the audit committee to those found in the workpapers, and report as an exception any exception or error found in the internal auditor's workpapers and not listed in the internal auditor's list of exceptions.

> ***Commentary:*** *The objective of this procedure is to ensure that any findings identified as such by internal auditors in their workpapers are also included in their report to the institution's audit committee.*

C. Testing by Independent Public Accountant

 Copyright © 1994, American Institute of Certified Public Accountants, Inc.

The accountant should perform the procedures listed in section I on a representative sample of the transactions of the institution and Covered Subsidiaries to which each of the Designated Laws applies. The sample tested at each institution, or Covered Subsidiary, should be at least 20 percent of the size of the sample tested by the internal auditor at such institution, although samples selected should be from the population at large.

> ***Commentary:*** *The independent accountant should consult any future guidance issued on reporting of procedures performed on internal auditors' workpapers. The independent accountant's sample should be selected from the population at large, not from the internal auditor's sample.*

If the testing is being performed on a holding company with more than one Covered Subsidiary, the sample tested for each Designated Law should include transactions from each such subsidiary at least every other fiscal year. If the holding company has more than eight Covered Subsidiaries, the sample of transactions tested for each Designated Law should include transactions from each such subsidiary at least every third fiscal year.

D. Reports Concerning Holding Companies

Only one report of any exceptions noted from application of the procedures in section II performed by the independent public accountant on all Covered Subsidiaries of a holding company should be filed as required by guideline 3, but the report should identify, for each exception or error noted, the identity of the Covered Subsidiary to which it relates.

Appendix C

Guidance for Independent Auditors When Required to Provide Access to or Photocopies of Workpapers to Regulators [1]

[This Notice to Practitioners appeared in the July/August 1993 issue of the *CPA Letter*]

The AICPA AdHoc Task Force on Auditor Workpapers has developed guidance for independent auditors to consider when they are obligated by law, regulation, or audit contract to provide access to or photocopies of audit workpapers to a regulator. This guidance has not been approved, disapproved, or otherwise acted upon by a senior technical committee of the AICPA.

The guidelines that follow were developed to assist auditors in fulfilling these obligations while also maintaining control over the workpapers. (The guidance does not apply to situations involving a request from the IRS, or firm practice-monitoring programs to comply with AICPA or state professional requirements, such as peer or quality reviews, or in response to a subpoena.)

Statement on Auditing Standards (SAS) No. 41, *Working Papers* (AU section 339), provides auditors guidance on the functions, nature, content, ownership and custody of working papers.[2] SAS No. 41 (AU section 339) observes that working papers are the property of the auditor. However, in some situations, auditors may be obligated to provide access to or photocopies of their workpapers to a regulator.

Providing Access to Workpapers

When the auditor is required by law, regulation, or audit contract to provide the regulator access to workpapers, the auditor should:

- Ensure that the client and the audit team are aware that the workpapers may be reviewed by regulators, and have the client acknowledge in the engagement letter that the workpapers are the property of the auditor but the regulator may be provided with access to workpapers, upon request in accordance with the law, regulation, or audit contract.

Sample language which may be included in the engagement letter follows:

> The working papers for this engagement are the property of [*name of firm*] and constitute confidential information. However, as required by [*law, regulation, or the terms of the audit contract*], we are required to make certain workpapers available to [*name of regulator*] upon request for their regulatory oversight purposes. Access to the requested workpapers will be provided to [*name of regulator*] under the supervision of [*name of firm*] audit personnel and at a location designated by our firm.

- Ensure that a request for access to workpapers by the regulator is in writing. The auditor should communicate specific details (such as date, time, and location) to the client of how access to the workpapers will be provided, and request the client acknowledge to the auditor in writing that the auditor is **required** to provide such access to the regulator. In the event the client does not comply with this request, the auditor may wish to consult his or her own legal counsel.

- Maintain control over the workpapers at all times. Unless expressly provided for by law, regulation, or audit contract, only workpapers related to specific requests should be made available.

---

[1] The term "regulator" includes federal, state, and local government officials with legal oversight authority over the entity being audited.

[2] SAS No. 41 (AU section 339) states that "working papers are records kept by the auditor of the procedures applied, the tests performed, the information obtained, and the pertinent conclusions reached in the engagement. Examples of working papers are audit programs, analyses, memoranda, letters of confirmation and representation, abstracts of company documents, and schedules or commentaries prepared or obtained by the auditor."

Providing Photocopies of Workpapers

In addition to the above guidelines, when required by law, regulation, or contract to provide a regulator photocopies of workpapers, the auditor should—

- Provide copies of only those specific portions of workpapers that were requested, preferably only requests made during the course of an on-site review.
- Consider asking the client to review requested workpaper copies before they are submitted to the regulator.
- Ensure that control over copies of the workpapers is maintained by having all workpaper copies clearly labeled as confidential and by noting that secondary distribution of the workpapers is not permitted without the written approval of the auditor. Copies should be transmitted to the regulator with a cover letter requesting confidential treatment of information contained in the workpapers.

  Sample language for the cover letter follows:

  These workpapers are submitted as CONFIDENTIAL. Exemption from disclosure to nongovernmental parties of these documents and any copies of them is claimed under the Freedom of Information Act and all other applicable provisions of law and regulation. **Before** any disclosure is permitted of these documents, including any part or copies of them, please provide notice to [*insert name, address and telephone number of auditor or his or her representatives*].

Members should contact the AICPA's Auditing Standards Division at (212) 596-6036 with questions.

AAM Section 8200

High-Technology Industry Developments—1996/97

Industry and Economic Developments

.01 After several consecutive years of high growth rates in both earnings and stock price, high-technology enterprises are showing signs of more moderate patterns of earnings growth along with increased stock price volatility. To begin the year, investors sold off stocks in certain high-technology sectors, such as Internet-related entities and semiconductor manufacturers, that were perceived as being overpriced. However, soon after January's sell-off, high-technology stocks began to rebound, showing a gain of 21 percent by midyear. Then, in July, following lower-than-expected earnings reports from two major high-technology companies—both considered industry bellwethers—a key high-technology stock index dropped almost 20 percent from its high point in June. Although some suggest that these events presage fundamental changes in the economics of the industry, the consensus is that the industry's performance this year does not necessarily signal an end to the technology boom.

.02 This year's earnings decline has generally been attributed to—

1. The aftermath of last year's "over-enthusiasm" for anything related to high technology (evidence of this could be found in the significant initial public-offering activity of high-technology startups). In some cases those optimistic expectations of continued high-earnings growth led production to outpace demand, thus bloating inventories and reducing profit margins. As such, in planning this year's engagements, auditors should consider the increased level of audit risk associated with inventory valuation and revenue recognition. These matters are addressed in the "Audit Issues and Developments" section of this Audit Risk Alert.
2. A ripple effect attributable in large part to a decline in demand for personal computers in the corporate, small business, and home markets. This decline has had a pervasive impact throughout the industry on entities whose operations relate to components (for example, semiconductors), peripherals (for example, CD-ROM players), and software (systems and applications programs) for personal computers.
3. Excess capacity. After several years of cautious plant expansion, semiconductor manufacturers put into operation more than forty new production facilities in the fourth quarter of 1995. The resulting overproduction is expected to drive down current revenues by 9 percent—after a 42 percent increase in the prior year. Excess capacity and downward revenue trends may call into question the recoverability of the carrying amount of certain long-lived assets. The "Impairment of Long-Lived Assets" section of this Audit Risk Alert addresses this issue from the auditor's perspective.

Despite these circumstances, continued revenue growth is expected for 1996, but at a more moderate pace. This projection is based on the premise that although certain market segments of the industry (for example, personal computers and cellular communications) appear to be maturing and consequently profit growth, while still generally healthy, will slow from rapid to incremental, new areas of high growth are emerging. Examples include computer hardware and software for linking networks as well as electronic commerce on the Internet.

.03 The Internet is expected to be the next major medium of communication and will likely have a significant impact on many segments of the high-technology industry. Internet usage currently is expanding

at a rate of approximately 15 percent to 20 percent a month and is expected to grow rapidly for the rest of the decade. And, while Internet-related software (that is, programs that provide access to the Internet, allow users to browse the world-wide-web, or create firewalls that protect corporate data) currently accounts for less than 1 percent of the $100 billion global software market industry, analysts see an enormous potential for growth. Some predict annual growth as high as 100 percent, with $4 billion in projected software sales revenues by the year 2000. This expansion will offset slow growth in other software categories such as mainframe software.[1] The rush to cater to potential Internet customers is expected to serve as a catalyst for reorganization and internal as well as external expansion by high-technology enterprises. Some of the concerns related to these activities are discussed in the "Accounting Issues and Developments" section of this Audit Risk Alert under "Restructurings."

.04 The demand for Internet-related services has generated an increase in the number of start-up enterprises involved in the development of software to gain access to, or browse, the Internet. In these circumstances, auditors should consider whether the guidance set forth in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 7, *Accounting and Reporting by Development Stage Enterprises* (AC De4), is being properly applied by the client. Development-stage enterprises also present auditors with unique risks. In developing an audit strategy, assessing risk, and designing substantive procedures, auditors should consider factors such as the entity's—

- Dependence on a limited product line or service.
- Dependence on a limited number of suppliers, customers, or financing sources.
- Credit arrangements imposing restrictive financial covenants or requirements to achieve "target" operating results.
- Related-party sales or purchase or leasing transactions.

.05 The industry's competitive environment has intensified during 1996, posing a particularly serious threat to a variety of industry segments such as those relating to personal computers, certain components and peripherals, and cellular phones. Widespread "price wars" in these markets have had a significant impact on profit given that margins, which are generally very small, leave little or no room to absorb sustained price reductions. A formidable competitive threat is expected from Japanese consumer electronics giants who are mounting an effort to break into the U.S. personal computer market, after failing to do so a decade ago. A Japanese push into the desktop field will almost certainly escalate the already fierce price cutting wars. As a result, these industry segments are likely to experience a higher rate of business failure than in prior years. Auditors, should, therefore be aware of their responsibilities pursuant to AICPA Statement on Auditing Standards (SAS) No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). The "Audit Issues and Developments" section of this Audit Risk Alert includes further discussion of this matter. Additionally, to counter rampant competition and diminishing profit margins, high-technology enterprises are likely to place greater emphasis on the need to rapidly identify, and move into, new market segments. In such circumstances auditors should consider the audit risks implicit in any such expansion (that is, the impact on internal control, accounting systems, and organizational structure).

Legislative Developments

Telecommunications Act

.06 On February 8, the Telecommunications Act of 1996 became law. This legislation ended government mandates that established and maintained regulatory barriers between local and long-distance calling, cable

[1] The mainframe software market is expected to grow at less than 2 percent annually through the end of the century as corporations downsize their computer operations from main frames to network servers.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

television, broadcasting, and wireless services. The intent of this legislation is to increase competition, thereby encouraging both low rates for consumers and innovative approaches to telecommunications. The bill will permit long-distance carriers, local telephone companies, and cable-tv operators to enter each other's markets. It is anticipated that the short-term effect of the legislation will be to set off a high level of activity in restructurings, mergers, acquisitions, and joint ventures by, among others, local and long-distance phone companies, broadcasters, cable television operators, publishing companies, movie studios, and information technology firms. It is expected that the Telecommunications Act will transform the industry, generating intense competition, fierce price wars, and new technologies. Accordingly, auditors should be aware of their responsibilities pursuant to SAS No. 22, *Planning and Supervision* (AU section 311), which provides that auditors should consider matters affecting the industry in which an entity operates, such as economic conditions, government regulations, and changes in technology, as they relate to the audit.

Litigation Reform

.07 Expectations of quick profits have lured many investors into the high-technology industry. However, the associated investment risks have been formidable. Lower- than-projected earnings, intense competition, slowing demand, and, in some cases, Chapter 11 bankruptcy filings have led to sharp declines in the value of some high-technology stocks. In the past, disappointed investors have often sought to recoup their losses through litigation. Auditors of publicly held high-technology entities (particularly young, highly touted start-ups) have been disproportionately involved in such class action shareholder lawsuits. The accounting profession, which has been active in seeking legislation to place limits on such legal actions, has achieved its objective in the form of the Private Securities Litigation Reform Act of 1995 (the Act).

.08 The Act became effective (though not applicable to pending lawsuits) on December 22, 1995, when Congress overrode a presidential veto. It offers significant relief to the accounting profession from class action securities lawsuits relating to publicly held entities. Such lawsuits will be more difficult to file because of the imposition of tougher requirements on plaintiffs and their attorneys. Limitations are placed on an accountant's liability and a "safe harbor" is created for certain projections of financial performance. The reporting responsibility of auditors is expanded by the Act to include a requirement for auditor notification to the Securities and Exchange Commission (SEC) of illegalities not appropriately addressed by management.

.09 The Act requires that audits of financial statements by independent public accountants include—

- Procedures to identify illegal acts and related-party transactions that would have a direct and material effect on the determination of financial statement amounts.
- An evaluation as to whether there is substantial doubt about the ability of the entity to continue as a going concern in the subsequent year.

The Act also requires auditors who become aware that an illegal act has or may have occurred to determine the possible effect of fines and other factors on the financial statements. Auditors must then inform the entity's audit committee (or, in the committee's absence, the board of directors) of their findings. If the auditor determines that there has been no timely and appropriate response to his or her notification, the auditor must forward that conclusion to the entity's board of directors. The board is then required to notify the SEC of that report within one business day, providing the auditor with a copy. If the auditor does not receive a copy, the auditor must forward the report of illegal acts to the SEC within the next business day.

Audit Issues and Developments

Inventory Valuation

.10 Inventory valuation is always a concern in high-technology enterprises. The following are some of the factors that make it even more important this year.

- Rapid changes in a product's design may have an adverse impact on some entities. For example, business news reports disclosed an instance in which a small semiconductor manufacturer was unable to sell a significant portion of its inventory of a Pentium chip clone, *at any price*, because of a new, faster version released by a competitor.
- The Telecommunications Act is expected to increase the need for rapid product innovation.
- The slowdown in sales of personal computers has had an impact on many component and peripheral manufacturers. Since these products are built before the personal computers are sold, the slowdown has caused production levels to outpace consumer demand.
- Given the highly competitive nature of the industry, some entities may be unable to conduct adequate market research studies and thus may release new products prematurely.

Given the speed of technological advances and the highly competitive environment of the high-technology industry, rapid inventory obsolescence, such as that occurring in the circumstances described above, is commonplace. Products are typically susceptible to frequent changes intended to upgrade their performance. Product life cycles may be short and competitive products with superior price and performance can quickly enter the marketplace. In this environment, auditors should consider whether the value at which inventories are carried is appropriate. Auditors may find that increased use of quantitative analyses can be an efficient and effective way to determine whether inventory amounts and trends seem plausible given a particular set of circumstances. Factors that should be considered include expected future demand for the product and anticipated technological advancements that render existing inventories obsolete or significantly diminish their value. In making inventory obsolescence evaluations auditors may consider reviewing sales forecasts prepared by management and comparing them to industry association statistics to assess their reasonableness. The "Information Sources" section at the end of this Audit Risk Alert contains the names of several such industry associations.

Loan Covenants

.11 During 1995, a significant number of initial public offerings involved small, start-up high-technology entities. As was widely reported, some of those entities had only one product and no track record of profitability. One year later, some of those entities, in need of capital infusions, have been unable to satisfy their financing needs through the equity market, given its current volatility. In response, many high-technology entities have sought capital through debt financing. Given the lack of profitability on the part of some of these entities, many lenders have sought to protect their investments by imposing highly restrictive covenants as part of the terms of financing. Auditors should consider the audit risk associated with such circumstances along with the reporting and disclosure problems likely to occur. For example:

- Auditors should be alert to loan covenant violations that cause long-term debt to become a current liability. In some instances, such a reclassification may raise questions about the entity's ability to continue as a going concern.
- Loan agreements may include covenants that require the borrower to maintain predetermined financial ratios or specified minimum or maximum amounts for certain financial statement items. Restrictions may be imposed on capital expenditures, dividends, or, in certain cases, executive compensation and benefits. If a violation has occurred and exists at the balance-sheet date, no matter how "insignificant" or "technical," FASB Statement No. 78, *Classification of Obligations That Are Callable by the Creditor* (AC B05), requires that the entire loan be classified as a current liability, unless one of the following conditions is met:
  1. The creditor waives or subsequently loses, for more than one year from the balance-sheet date, its right to demand repayment.
  2. The obligation contains a grace period within which the debtor may "cure" the violation, and it is "probable" that the violation will be cured.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

If the second condition is met, thereby resulting in a long-term debt classification of the obligation, paragraph 5 of FASB Statement No. 78 (AC B05.118) requires that the circumstances be disclosed. For public entities, rule 4.08(c) of Regulation S-X requires that if a default exists but acceleration of the debt has been waived for a stated period of time beyond the date of the most recent balance sheet being filed, the notes to the financial statements should disclose the amount of the obligation and the period of the waiver.

- An increasingly common clause in loan agreements is a subjective acceleration provision that gives the lender the power to call a loan without an objectively determinable cause (for example, a material adverse change occurs). In such cases, FASB Technical Bulletin No. 79-3, *Subjective Acceleration Clauses in Long-Term Debt Agreements* (AC B05), which uses criteria in FASB Statement No. 5, *Accounting for Contingencies* (AC C59), should be followed to evaluate the likelihood of debt acceleration. Such evaluations are very subjective, and the rationale for the entity's conclusion should be properly assessed by the auditor.
- Some loans contain "due on demand" clauses along with a schedule of payments for principal and interest. The demand clause gives the lender the right to call a loan at any time. The FASB's Emerging Issues Task Force (EITF) Issue No. 86-5, *Classifying Demand Notes with Repayment Terms*, concludes that loans with "or on demand" clauses should always be considered current liabilities (except in the rare instance that a lender waives that right for a period of one year).

.12 Auditors should carefully consider the implications of loan covenant violations while planning and performing the audit. Auditors may wish to consider applying procedures such as the following:

- Obtain written confirmation of lender waivers of loan covenant violations or of lenders' lack of knowledge of any violations or intents to call a loan. Evaluate all waivers carefully and assess whether the lender has truly waived its right to call the debt.
- Carefully read loan amendments that management represents as constituting waivers of covenant violations; lenders may have amended the financial covenant requirements but otherwise retained their right to call the debt.
- Consider obtaining an opinion from the entity's attorney regarding technical covenant violations.
- Obtain specific management representations regarding known covenant violations and any communications with lenders regarding violations or waivers during the year.
- Give particular consideration to potential passed adjustments that, if made, would affect loan covenant provisions.
- Be alert for escalating quarterly loan covenant requirements that cover the period rather than the end of a quarter. An entity may be in compliance at the end of one quarter but immediately be in noncompliance if a more restrictive covenant is effective on the following day.

.13 In some cases, the issuance of the financial statements may be delayed until appropriate lender waivers can be obtained or cures effected. To avoid having to extend other audit procedures past the normal fieldwork date, the auditor may dual-date the report by giving one date for the completion of fieldwork and a subsequent date for the waiver or cure; see SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AU section 530). Auditors should obtain sufficient evidential matter to support the lender's waiver or the entity's actions that effected the cure. In the event that the defaults are not cured, auditors should consider the effect on the overall continued existence of the entity as a going concern in accordance with SAS No. 59 (AU section 341).

Impairment of Long-Lived Assets

.14 High-technology products are susceptible to rapid obsolescence. Long-lived assets used by enterprises involved in the manufacture of such products may require significant retooling to retain their useful-

ness. In some cases these assets may not lend themselves to modification and could be rendered obsolete. Additionally, the passage of the Telecommunications Act of 1996 should spur merger and acquisition activity. The elimination of duplicate functions, which typically accompany a merger or acquisition, may affect the carrying amount of certain assets. In these instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08), may need to be applied.

.15 In March 1995, the FASB issued Statement No. 121 (AC I08), which requires that long-lived assets and certain identifiable intangibles and goodwill related to those assets to be held and used by an entity, be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less costs to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value. The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Accordingly, this is the first year that auditors will evaluate management's implementation of the Statement (AC I08).

.16 FASB Statement No. 121 (AC I08) is likely to have a significant impact on many construction contractors, given the inherently capital-intensive nature of the industry. Auditors may face issues relating to the recoverability of the carrying amount of certain long-lived assets if, as expected, a general economic slowdown occurs in the latter part of 1996. In evaluating a construction contractor's implementation of FASB Statement No. 121 (AC I08), major issues to be considered by auditors include the following:

- *The appropriate classification of long-lived assets as either those being held and used or those to be disposed of.* Auditors should obtain an understanding of the policies and procedures used by the contractor to classify long-lived assets pursuant to FASB Statement No. 121 (AC I08), as well as evaluating whether those classifications are proper.
- *The identification of events or circumstances indicating that the carrying amounts of assets to be held and used may not be recoverable.* Auditors should obtain an understanding of the policies and procedures used by the contractor to identify such events and circumstances. Examples of such events and circumstances could include the following:
  - — A dramatic change in the manner in which an asset is used
  - — A reduction in the extent to which an asset is used
  - — Forecasts showing lack of long-term profitability
  - — A change in the law or business environment
  - — A substantial drop in the market value of an asset
- *The assumptions used in the underlying calculation of estimated future cash flows when testing for asset impairment used in management's impairment test, and assumptions used in estimating the fair value of assets for which an impairment loss is to be recognized.* A contractor's estimate of future cash flows from asset use and the fair value of assets used in calculating impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342). Procedures to be employed should include one or a combination of the following: (1) reviewing and testing the process used by management to develop the estimates, (2) developing an independent expectation to corroborate the reasonableness of the estimates, and (3) reviewing subsequent events or transactions occurring before the completion of fieldwork.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- *The recording of assets to be disposed of at the lower of carrying amount or fair value less costs to sell.* Auditors should verify that the contractor has appropriately classified and valued long-lived assets to be disposed of.
- The disclosure requirements of FASB Statement No. 121. Auditors should verify that all disclosure requirements of FASB Statement No. 121 (AC I08) have been included in the contractor's financial statements.

Control Environment

.17 Many high-technology entities are young, development-stage enterprises or have a number of traits that are similar to those often found in such enterprises. Internal control in these entities often include unique characteristics that may affect an auditor's assessment of control risk. Characteristics that may increase control risk include those suggested in the following circumstances:

- Many high-technology entities are relatively small, and frequently, closely held. In such entities, the entire accounting function may be the responsibility of one or a few employees and thus lacking in adequate segregation of duties. In addition, owners or managers often have the authority to override prescribed control procedures.
- High-technology enterprises may seek to boost declining earnings by cutting overhead. Such cost reductions may be imposed on nonrevenue-producing areas such as the accounting department. This may place a strain on existing accounting, reporting, and control functions, thus increasing the likelihood of errors.
- Owners and managers of high-technology enterprises frequently are entrepreneurs who may be more likely to give priority to research and development functions over accounting systems and related control procedures. As a result, control, accounting, and financial reporting functions may receive less support and attention than might be warranted.
- Although the owners and managers of most small high-technology entities are capable in areas such as manufacturing, marketing, research, and sales, others may not be as well versed in matters of accounting, finance, and administration.
- The limited resources of some start-up or developmental-stage high-technology enterprises may engender informal accounting systems with inadequate control procedures.

If internal control in a high-technology company includes the above characteristics, control risk might be assessed as high. Auditors should adjust the scope of their audits accordingly, and should document the understanding of the entity's internal control as required by SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319).[2] If that understanding reveals that the oversight function is weak, there is increased risk that material errors and irregularities will result in misstatements in the financial statements, and reportable conditions, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist.

Going Concern

.18 The price wars and competitive pressures pervasive throughout the industry are factors likely to increase the level of business risk faced by many high-technology entities. Accordingly, auditors should be alert to conditions and events which, when considered in the aggregate, indicate that there could be substantial doubt about their client's ability to continue as a going concern. For example, such conditions

[2] SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), revises the definition and description of internal control and makes conforming changes to relevant terminology. SAS No. 78 (AU section 319) was issued in December 1995 and is effective for audits of financial statements for periods beginning on or after January 1, 1997. See "New Pronouncements" in the "Audit Issues and Developments" section for further discussion of this matter.

and events could include (1) negative trends such as recurring operating losses or working capital deficiencies, (2) financial difficulties such as loan defaults or denial of trade credit from suppliers, (3) internal matters such as trade union difficulties, or (4) external matters such as legal proceedings or environmental legislation that could jeopardize the entity's ability to operate. In such circumstances auditors will have to consider whether, based upon such conditions and events, there is substantial doubt about the client's ability to continue as a going concern.

.19 Auditors should be aware of their responsibilities pursuant to SAS No. 59 (AU section 341). SAS No. 59 (AU section 341) provides guidance to auditors in conducting an audit of financial statements in accordance with generally accepted auditing standards for evaluating whether there is substantial doubt about a client's ability to continue as a going concern for a period not to exceed one year from the date of the financial statements being audited.

.20 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 (AU section 341) does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statements being audited. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.21 If there is substantial doubt about the entity's ability to continue as a going concern, the auditor should consider whether it is likely that existing conditions and events can be mitigated by management plans and whether those plans can be effectively implemented. If the auditor obtains sufficient competent evidential matter to alleviate doubts about going-concern issues then consideration should be given to the need for disclosure of the principal conditions and events that initially caused the auditor to believe there was substantial doubt. If, however, after considering identified conditions and events, along with management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, auditors should refer to the specific guidance set forth under SAS No. 59 (AU section 341).

.22 For those entities emerging from bankruptcy reorganization pursuant to Chapter 11 of the Bankruptcy Code, the auditor should consider whether the contractor is following the accounting guidance of AICPA Statement of Position (SOP) 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code.*

Revenue Recognition

.23 Entities in the high-technology industry may be particularly susceptible to revenue recognition problems during the current year given declining growth rates of revenue. Additionally, there have been a number of prominent audit failures related to the area of revenue recognition. Alleged inappropriate revenue recognition has become one of the major issues facing auditors in recent litigation. As such, auditors should be aware that the consideration of this area warrants special attention in the current year. Auditors should exercise professional skepticism in this area by being alert to possible warning signs, such as—

- Material, unusual, or significant year-end transactions.
- Past-due accounts receivable.
- Sales subject to further performance by the selling entity, the customer, or a third party.

Some specific circumstances to consider are described in the following paragraphs.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.24 Products offered by high-technology enterprises are by their nature innovative and their performances frequently are unproven. Similarly, customers may have unjustified expectations of a product's capabilities. As a result, sales agreements entered into by such enterprises may include provisions for customer approval, cancellation options, return privileges, or price protection. FASB Statement No. 48, *Revenue Recognition When Right of Return Exists* (AC R75), provides accounting guidance that may be helpful in evaluating a high-technology enterprise's revenue recognition policies. In such circumstances, auditors should carefully evaluate the entity's revenue recognition policies and procedures. Auditors should obtain an understanding of contractual relationships with customers and pay particularly close attention to nonstandard clauses that may alter the economic substance of otherwise standard transactions.

.25 Auditors should also consider the possible existence of "side-agreements" that contain additional terms or conditions that may affect the timing of revenue recognition. The use of such side-agreements has been especially prevalent in the computer hardware and software segment of the high-technology industry. Side-agreements may create obligations or contingencies relating to financing arrangements or to product installation or customization. Typically, very few individuals within an entity are aware of the use of side-agreements. Therefore, it may be difficult for auditors to uncover their existence. Management representations and other standard audit procedures may not be adequate in these circumstances. When there is a significant risk that undisclosed side-agreements exist, the auditor should consider confirming, directly with the contract signer, relevant contract terms to obtain assurance from the entity's customer that side-agreements do not exist. Since, in this circumstance, it is difficult to perform alternative procedures on non-replies, auditors should make every effort to obtain responses to these special confirmations.

.26 The SEC Accounting and Auditing Enforcement Releases (AAERs) have addressed revenue recognition by high-technology enterprises. The problem areas noted include—

- Sales recorded before customer acceptance of a product, that is, before the risks and rewards of ownership are passed to the buyer (see AAERs 40, 44, 58, 125, 213, 466, 495, 513, 513A, 546, 572, 581, 615, and 711).
- Bill and hold or ship in place sales. Revenue associated with such agreements qualifies for recognition only in unique and controlled circumstances (see AAERs 47, 108, 196, 215, 292, and 624).
- Recorded sales in which the seller has continuing involvement or that are subject to a significant future contingency (see AAERs 40, 58, 65,78, 86, 131,145, 225, 303, 475, 615, 645, 646, 647, 689, 690, and 737).

Auditors should be alert to those high risk circumstances in which an entity may prematurely recognize revenue.

.27 Revenue recognition issues may arise with regard to the sale of computer software. High-technology enterprises may sell software by means of a license for its use. The completion of the earnings process in such licensing transactions may vary depending on whether the software is modified to meet customer specifications or whether significant installation support is necessary. Additionally, customer acceptance may be uncertain, and sales agreements may provide for extended payment terms, trial periods, or liberal termination features.

.28 SOP 91-1, *Software Revenue Recognition*, provides guidance on revenue recognition for the licensing, selling, leasing, or marketing of computer software. Applying the provisions of SOP 91-1 may require considerable judgment; therefore, auditors should obtain an understanding of the provisions of contracts with customers, particularly those with unique or unusual terms and conditions. Auditors should assess any nonstandard terms and consider their effect on accounting for revenue associated with a transaction. Auditors should also be alert to the revenue recognition implications of transactions with cancellation privileges, exchange rights, and deferred-payment terms, all of which are discussed in SOP 91-1. See the "Accounting Issues and Developments" section of this Audit Risk Alert for a discussion of the proposed SOP that would modify the provisions of SOP 91-1.

.29 Transferring product rights through licensing or royalty arrangements is common among high-technology enterprises. Auditors should consider the existence of any such arrangements, understand the products and related services being sold, and consider whether all products or processes involving licensing or royalty payments are being properly identified and controlled.

.30 Entities in the computer industry, as well as other segments of the high-technology industry, may sell products that include a combination of product maintenance and customer-support contracts, or they may sell, separately, maintenance and customer- support contracts or consulting services. SEC rules require that publicly held companies disclose revenue from such activities, if significant, on the face of the income statement. Specifically, rule 5-03(b)(1) and (2) of Regulation S-X requires separate reporting of tangible product sales, operating revenues, income from rentals, revenues from services, and other revenues if that category exceeds 10 percent of total revenues. The rule also requires separate reporting of costs and expenses for each line item reported for sales and revenues. Auditors of the financial statements of publicly held high-technology enterprises should be familiar with rule 5-03(b)(1) and (2) of Regulation S-X and carefully consider the adequacy of the required disclosures.

.31 Auditors should consider whether uncertainties associated with revenue recognition have implications for other audit areas as well. For example, the collectibility of receivables may be affected by customers' perceptions of product performance and by support and maintenance expectations.

New Pronouncements

Auditing Standards

.32 *SAS No. 75.* In September 1995, the Auditing Standards Board (ASB) issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except in certain circumstances, as discussed in the SAS (AU section 622). The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.33 *SAS No. 76.* In September 1995, the ASB issued SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634). The SAS (AU section 634) provides reporting guidance and an example of a letter, actually a form of an agreed-upon procedures report, that the accountant can provide in response to a request to provide a comfort letter in circumstances in which the party requesting the letter does not provide the accountant with the representations required in paragraphs 6 and 7 of SAS No. 72 (AU section 634.06 and .07). The Statement is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

.34 *SAS No. 77.* In November 1995, the ASB issued SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77 is effective for engagements beginning after December 15, 1995.

.35 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78 (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.36 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58 (AU section 508) concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. This SAS (AU section 508) does not affect SAS No. 59 (AU section 341) nor preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

.37 A table outlining the significant provisions of the newly issued auditing standards is set forth in the Exhibits section of this Audit Risk Alert.

Attestation Standards

.38 *SSAE No. 4.* In September 1995, the ASB issued Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600). SSAE No. 4 (AT section 600) sets forth attestation standards and provides guidance on the performance and reporting in all agreed-upon procedures engagements, except in certain circumstances, and is effective for reports on agreed-upon procedures engagements dated after April 30, 1996. SSAE No. 4 (AT section 600) generally should be used when applying agreed-upon procedures to nonfinancial statement subject matter. In addition, SSAE No. 4 (AT section 600) requires a written assertion from management as a condition of engagement performance.

.39 *SSAE No. 5.* In November 1995, the ASB issued SSAE No. 5, *Amendment to Statement on Standards for Attestation Engagements No. 1,* Attestation Standards (AT section 100). This amendment provides guidance on the quantity, type, and content of working papers for attestation engagements and is effective for engagements beginning after December 15, 1995.

.40 *SSAE No. 6.* In December 1996, the ASB issued SSAE No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400). This amendment conforms the description of elements of an entity's internal control to the components of internal control contained in SAS No. 78 (AU section 319) (see discussion in the preceding section) and *Internal Control—Integrated Framework.* The amendment is effective for an examination of management's assertion when the assertion is as of or for the period ending December 15, 1996, or thereafter. Early application of the provisions of this Statement (AT section 400) is permitted.

.41 *Quality Control Standards.* In May 1996, the ASB issued Statements on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). SQCS No. 2 (QC section 20) supersedes SQCS No. 1, *System of Quality Control for a CPA Firm,* and its Interpretations (QC sections 10 and 10-1). The provisions of these Statements (QC sections 20 and 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997.

.42 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the Accounting and Review Services Committee under Rules 201, *General Standards* (ET section 201.01), and 202, *Compliance With Standards* (ET section 202.01), of the AICPA Code of Professional Conduct. The definition of a firm's accounting and auditing practice has been revised to include engagements performed under SSAEs issued by the ASB. These standards had not been issued when SQCS No. 1 (QC section 10) was promulgated. Also, the new standard (QC section 20) replaces the nine specific elements discussed in SQCS No. 1 (QC section 10) with the following five broad elements—independence, integrity, and objectivity; personnel management; acceptance and continuance of clients and engagements; engage-

ment performance; and monitoring. SQCS No. 3 (QC section 30) provides guidance on how a firm can implement the new monitoring element of a quality control system in its accounting and auditing practice.

Ethics Ruling—Indemnification of a Client

.43 Recently, the AICPA Professional Ethics Executive Committee issued Ethics Ruling No. 102, *Member's Indemnification of a Client* (ET section 191.204 and .205), as published in the January 1996 *Journal of Accountancy*. This ruling (ET section 191.204 and .205) states that auditors should not enter into agreements that would require them to indemnify their client for damages, losses, or costs arising from lawsuits, claims, or settlements that relate, directly or indirectly, to client acts, or their independence will be impaired. In assessing their independence, auditors of high-technology enterprises should consider the implication of indemnification arrangements requested by their clients, in light of this new ethics ruling (ET section 191.204 and .205).

AICPA Exposure Drafts: Proposed SASs

.44 *Consideration of Fraud in a Financial Statement Audit.* In May 1996 the AICPA issued an exposure draft of a proposed Statement on Auditing Standards, *Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, *and No. 47,* Audit Risk and Materiality in Conducting and Audit. The proposed Statement would provide expanded operational guidance on the consideration of fraud in conducting a financial statement audit. The proposed changes in auditing standards also clarify the auditor's present responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether caused by error or fraud. In addition, the proposed changes provide added guidance on the standard of due professional care in the performance of work, including the need to exercise professional skepticism, and the concept of reasonable assurance. In addition to amending SAS Nos. 1 (AU sections 110 and 230) and 47 (AU section 312), the proposed Statement would—

- Describe fraud and its characteristics.
- Require the auditor to specifically assess the risk of material misstatement due to fraud and provide categories of fraud risk factors that should be considered in the auditor's assessment.
- Provide guidance on how the auditor should respond to the results of the assessment.
- Provide guidance on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud.
- Describe related documentation requirements.
- Provide guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

.45 *Amendment to SAS No. 31,* Evidential Matter. In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Amendment to SAS No. 31,* Evidential Matter. This proposed Statement would provide guidance for a practitioner who has been engaged to audit an entity's financial statements where significant information is transmitted, processed, maintained, or accessed electronically. The proposed Statement would include examples of evidential matter in electronic form and provide that an auditor should consider the time during which such evidential matter exists or is available in determining the nature, timing, and extent of substantive tests. In addition, the proposed Statement would indicate that an auditor may determine that, in certain engagement environments where evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests. The proposed Statement would provide that in such circumstances, an auditor should consider performing tests of controls to support an assessed level of control risk below the maximum for affected assertions.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.46 *Investments in Debt and Equity.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Investments in Debt and Equity*. This proposed Statement would revise the guidance on auditing investments to make that guidance consistent with recently issued accounting standards, particularly FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80).

Allocation of Purchase Price in "Purchase" Business Combinations

.47 When a business combination involving a high-technology enterprise is accounted for using purchase accounting, a portion of the purchase price may be allocated to R&D in process. Generally accepted accounting principles require that a portion of the purchase price be immediately written off for R&D that did not have an alternative future use. In recent years, a number of high-technology enterprises, specifically software companies, have reported business combinations in which a substantial portion of the purchase price was allocated to software that was to be used in R&D projects. The amounts allocated to software were immediately expensed in accordance with FASB Interpretation No. 4, *Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method* (AC B50).

.48 After the acquisition or merger with the high-technology company, auditors should consider whether there is adequate evidential matter regarding the reasonableness of purchase price allocations to the assets acquired and for the valuation of the acquired software or other technology to be used in R&D. Auditors need to be sensitive to indications that clients may be overly aggressive in assigning value to R&D, thereby writing off a substantial part of the purchase price as an "unusual" item and enhancing future operating income. It should also be noted that purchased R&D should be a separately identified and valued amount. Its assigned value should not be the residual remaining after the cost of an acquired entity has been assigned to the acquired entity's net assets.

.49 Auditors should also consider the nature and stage of development of the software acquired, as well as its expected use by the acquirer, when evaluating the appropriateness of management's allocation. The purchase price allocated to software acquired as part of a business combination, for which the acquirer has met the technological feasibility criteria of FASB Statement No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed* (AC Co2), and that no longer is considered to be in the R&D stage, should not be immediately expensed.

.50 Companies should have appropriate documentation to support their accounting by reference to appraisals, replacement cost studies, and other supporting data. Auditors should evaluate the evidential matter supporting these transactions as they assess the propriety of the accounting treatment and the adequacy of related financial statement disclosures.

.51 EITF Issue No. 96-7, *Accounting for Deferred Taxes on In-Process Research and Development Activities Acquired in a Purchase Business Combination*, addresses the issue of whether a deferred tax liability should be recognized at the consummation date of a purchase business combination, for the initial difference (that is, prior to the write-off of in-process R&D) between the amounts assigned for financial reporting purposes to in-process R&D and its underlying tax basis. The Task Force reached a consensus that the write-off of amounts assigned for financial reporting purposes to in-process R&D occurs prior to the measurement of deferred taxes in a purchase business combination. Accordingly, deferred taxes are not provided on the initial differences between the amounts assigned for financial reporting and tax purposes, and in-process R&D is charged to expense on a gross basis at acquisition.

Research and Development Arrangements

.52 As a result of their need to fund substantial amounts of R&D costs, high-technology enterprises frequently enter into a variety of legal arrangements that may include debt-and-equity interests as well as contracts to provide R&D services for others. FASB Statement No. 68, *Research and Development Arrangements* (AC R55), specifies how companies should account for their obligations under arrangements for the funding

of R&D for others. Auditors of high-technology enterprises should obtain an understanding of the facts and circumstances surrounding such arrangements, including the relationships among the parties involved, and consider the propriety of their clients' accounting for such arrangements in light of that understanding.

.53 *Loans or Advances to Other Parties.* R&D arrangements sometimes call for extending loans or advances to another party. FASB Statement No. 68 (AC R55) states: "If repayment to the enterprise of any loan or advance by the enterprise to the other parties depends solely on the results of the [R&D] having future economic benefit, the loan or advance shall be accounted for as costs incurred by the enterprise. The costs shall be charged to [R&D] expense unless the loan or advance to the other parties can be identified as relating to some other activity, for example, marketing or advertising, in which case the costs shall be accounted for according to their nature." Auditors should consider the propriety of their clients' accounting for such loans.

.54 *Issuance of Warrants or Similar Instruments.* R&D arrangements sometimes also involve the issuance of warrants or similar instruments. FASB Statement No. 68 (AC R55) requires that the portion of the proceeds representing fair value of such instruments at the date of the arrangement be reported as paid-in capital rather than as revenue. Auditors should be alert to the issuance of warrants and similar instruments in connection with such arrangements and evaluate carefully their clients' accounting, particularly the determination of the amount of the proceeds deemed to represent fair value and allocable to paid-in capital.

.55 *Obligation is a Liability to Repay Other Parties.* FASB Statement No. 68 (AC R55) specifies that the enterprises must determine whether they are obligated only to perform contractual R&D for others, or whether they are otherwise obligated. To the extent the enterprises are obligated to repay the other parties regardless of the outcome of the R&D, they should record liabilities and expense R&D costs as incurred. To conclude that a liability to repay the other party does not exist, the transfer of risk related to the R&D must be substantive and genuine. FASB Statement No. 68 (AC R55) and SEC Staff Accounting Bulletin (SAB) No. 63 (Topic 5O), *Research and Development Arrangements*, provide further guidance on assessing whether such risk transfers have occurred and provide examples of conditions leading to the presumption that the enterprise will repay the other party, whether contractually obligated to or not.

.56 As part of the overall effort to reduce the budget deficit, federal grants to the academic and scientific communities, earmarked for R&D, may be reduced or eliminated. The impact of such legislation on the operations of high-technology enterprises may be beneficial or detrimental, depending on the type of R&D arrangement in which the company is involved. If, for example, a high-technology audit client contracts for others to perform R&D, a reduction in federal subsidies may increase the costs of such contracts to the client. Conversely, if the client provides R&D to others, such reductions could drive up the client's R&D-related revenue. Auditors should be aware of the final provisions of such legislation and its impact on the entity being audited.

Accounting Issues and Developments

Costs of Internally Developed and Purchased Software

.57 FASB Statement No. 86 (AC Co2) specifies the accounting for the costs of internally developed and purchased software. It requires that the costs of R&D-related activities, which must be expensed in the period incurred, be differentiated from the costs of production activities, which are capitalized. The difference between these two activities is based on the concept of technological feasibility. To qualify for capitalization, costs must be incurred subsequent to establishing technological feasibility. Software rights purchased or leased for resale and no alternative future use must also meet the requirements for technological feasibility to be capitalized. Production costs for software that is to be used as an integral part of a product or process should not be capitalized until both (1) technological feasibility has been established for the software and (2) all R&D for the other components of the product or process has been completed.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.58 Auditors should evaluate management's judgments regarding technological feasibility. To do this, product plans and software development methodologies should be reviewed at each balance-sheet date. Factors to be considered include—

- The carrying value of the capitalized software, and whether revenue forecasts are reasonably constructed, adequately documented, and realistic in view of a company's established channels of distribution and financial resources.
- The reasonableness of the product's life, which typically ranges from three to five years. The amortization of these costs should not be included in R&D costs, but should be charged to costs of goods sold or a similar expense category.

.59 EITF Issue No. 96-6, *Accounting for the Film and Software Costs Associated with Developing Entertainment and Educational Software Products,* raises the issue of how companies should account for the film and software costs associated with developing entertainment and educational products. However, because of the position taken by the SEC staff, the Task Force was not asked to reach a consensus on this Issue. The SEC's position is included in the EITF Abstracts.

AICPA Exposure Draft: Proposed SOP, *Software Revenue Recognition*

.60 In June 1996, the AICPA issued an exposure draft of a proposed SOP, *Software Revenue Recognition.* This SOP provides guidance on applying generally accepted accounting principles in recognizing revenue on software transactions. This proposed SOP would supersede SOP 91-1, *Software Revenue Recognition,* and would require the following:

1. If an arrangement to deliver software or a software system, either alone or together with other products or services, requires significant production, modification, or customization of software, the entire arrangement should be accounted for in conformity with Accounting Research Bulletin No. 45, *Long-Term Construction-Type Contracts,* using the relevant guidance in SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts,* unless specified criteria for separate accounting for any service element are met.
2. Separate accounting for a service element of an arrangement to which contract accounting applies is required if both of the following criteria are met.
   a. The services are not essential to the functionality of any other element of the transaction.
   b. The services are stated separately in the contract such that the total price of the arrangement would be expected to vary as the result of inclusion or exclusion of the services.
3. If an arrangement to deliver software or a software system does not require significant production, modification, or customization of software, revenue should be recognized when all of the following criteria are met:
   a. Persuasive evidence of an agreement exists.
   b. Delivery has occurred.
   c. The vendor's fee is fixed or determinable.
   d. Collectibility is probable.
4. Software arrangements may consist of multiple elements, that is, additional software products, upgrades or enhancements, rights to exchange or return software, postcontract customer support (PCS), or services, including elements deliverable only on a when-and-if-available basis. If contract accounting does not apply, the vendor's fee must be allocated to the various elements based on vendor-specific objective evidence of fair values. If sufficient vendor-specific objective evidence of

fair values does not exist, all revenue from the arrangement should be deferred until such sufficient evidence exists, or until all elements have been delivered. Exceptions to this guidance are provided for PCS, subscriptions, and arrangements in which the fee is based on the number of copies. Vendor-specific objective evidence is limited to (*a*) the price charged when the element is sold separately, or (*b*) if not yet being sold separately the price for each element established by management having the relevant authority.

5. The portion of the license fee allocated to an element should be recognized as revenue when all of the revenue recognition criteria have been met. In applying those criteria, delivery of an element is considered not to have occurred if there are undelivered elements that are essential to the functionality of any delivered elements. Additionally, collectibility of that portion of the fee is not considered to be probable if the amount of the fees attributable to delivered elements is subject to forfeiture, refund, or other concession if the undelivered elements are not delivered.

As drafted, the provisions of this proposed SOP would be effective for fiscal years beginning after December 15, 1996 with earlier application encouraged. The cumulative effect of changes caused by adopting the provisions of this proposed SOP would be included in the determination of net income in conformity with APB Opinion No. 20, *Accounting Changes* (AC A06).

Delayed Effective Dates—Accounting Pronouncements

.61 *Disclosures about Fair Value of Financial Instruments.* FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), issued in December 1991, was effective for financial statements issued for fiscal years ending after December 15, 1992. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995. In that a sizable portion of high-technology entities may be smaller, development-stage enterprises, financial statements for years ended during 1996 will be subject to the provisions contained therein. In such circumstances, auditors should consider whether management has made all disclosures required by FASB Statement No. 107 (AC F25).

.62 FASB Statement No. 107 (AC F25) requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement (AC F25) requires disclosure of descriptive information pertinent to estimating the value of a financial instrument. Certain financial instruments (for example, lease contract, deferred-compensation arrangements, and insurance contracts) are excluded from the scope of the Statement (AC F25).

.63 *Disclosures about Derivative Financial Instruments.* FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), issued in October 1994, was effective for financial statements issued for fiscal years ending after December 15, 1994. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995.

.64 FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), to require disaggregation of information about financial instruments with off-balance-sheet risk of accounting loss by class, business activity, risk, or other category that is consistent with the entity's management of those instruments. The Statement (AC F25) also amends FASB Statement No. 107 (AC F25) to require that fair value information be presented without combining, aggregating, or netting the fair value of derivative financial instruments with the fair value of nonderivative financial instruments and be presented together with the related carrying amounts in the body of the financial statements, a single footnote, or a summary table in a form that makes it clear whether the amounts represent assets or liabilities.

.65 Auditors should consider whether the provisions of FASB Statement No. 119 (AC F25) apply to their high-technology clients and, if so, evaluate whether the client's financial statement disclosures are adequate and appropriate in view of the requirements set forth therein.

Restructurings

.66 A significant increase in the level of organizational restructuring undertaken by high-technology enterprises is likely this year, based on factors such as—

- The Telecommunications Act, which is expected to generate an increased rate of mergers, acquisitions, and consolidations.
- The need for greater cost efficiencies and economies of scale to offset declining revenue growth.
- Intense competitive pressures, which will force many entities to expand into new markets.
- The anticipated growth in the Internet market, for which many high-technology entities are preparing through the reallocation of assets along with significant capital expenditures.

Restructuring often accompanies these activities as redundant functions are eliminated and existing areas streamlined. Restructuring charges typically include employee-related costs, costs associated with elimination and reduction of product lines, and costs related to the consolidation of operations. Restructuring charges also include asset write-downs and losses on disposal of assets. When high-technology entities implement restructuring programs, auditors should consider the impact of reductions in personnel on operations and on the entity's internal control, the appropriateness and completeness of recorded liabilities relating to current restructuring plans, and the appropriate period for reporting the costs associated with restructurings.

.67 In considering restructuring liabilities and costs, auditors should be aware of EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*, for authoritative guidance on the appropriate accounting for restructurings. EITF Issue No. 94-3 also provides guidance on the types of costs that should be accrued and the timing of recognition of restructuring charges. It also prescribes disclosures that should be included in the financial statements.

.68 EITF Issue No. 96-9, *Classification of Inventory Markdowns and Other Costs Associated with a Restructuring*, raises the issue of whether inventory markdowns associated with an exit plan or a restructuring activity should be classified in the income statement as a cost of goods sold or as an exit or a restructuring cost. The Task Force agreed to not address this Issue. However the position taken by the SEC is included in the EITF Abstracts.

.69 For publicly held entities, the SEC's SAB No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges*, requires that restructuring charges be reported as a component of income from continuing operations and, in a "two-step" income statement, should generally be classified as an operating expense.

Management's Discussion and Analysis Public Companies

.70 SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550), requires that auditors read such information and consider whether the information, or the manner of its presentation, is materially inconsistent with that appearing in the financial statements. As auditors of high-technology entities that are required to file reports with the SEC read the Management's Discussion and Analysis of Operations sections of SEC filings that contain audited financial statements, they might consider whether those discussions include items such as—

- The reasonably likely effects on future operating results of known trends, such as further declines of sales of mature products. The life cycles of products of high-technology entities are frequently short because of the pace of technological change.

- Discretionary operating expenses, such as those relating to R&D, that have materially affected the most recent period presented but are not expected to have an impact on future operations, or those matters that have not affected the most recent period presented but are expected to materially affect future periods.

Exhibit

Significant Provisions of Newly Issued SASs

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.
SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634)	SAS No. 72	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623)	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341]).

Information Sources

.72 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.73 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.74 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.75 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.76 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8210

Real Estate Industry Developments—1996/97

Industry and Economic Developments

.01 In last year's *Real Estate Industry Developments*, it was noted that the state of uncertainty that had existed in the real estate industry continued. That state continues to exist in 1996, as investors, having suffered through a prolonged recession in the industry, continue to display hesitancy despite improvement in many indicators.

.02 Positive trends related to vacancy rates and housing starts continue to emerge, but there are variances by region and property type. Auditors should be aware of the risks relevant to the property type and geographical region(s) in which their clients operate (and not just where the clients' headquarters are located).

.03 In the 1980s and early 1990s, the commercial markets experienced an oversupply of space. The primary factors contributing to the oversupply were the overbuilding of the 1980s combined with the general economic recession, a trend towards corporate downsizing, and the changing demographics of many entities. As the industry began to suffer the results of the oversupply, new construction slowed drastically.

.04 Over the past several years, the demand for commercial space has been improving. However, much of that demand has been met by space that was already available, and no more than a limited level of new construction has been required. As vacancy rates continue to decline, and capital continues its slow return to the real estate market (albeit from new sources, as discussed later), indications are that new construction is picking up. Although many observers feel that the industry will not return to the exaggerated overbuilding of several years ago, concern does exist that the industry may overreact.

.05 In the residential market, demand for houses continues to be linked to mortgage rates. Mortgage rates continue to be low compared to recent historical rates. However, any future increases in interest rates would have an adverse impact on housing demand.

.06 Throughout the early 1990s, the real estate industry experienced a marked increase in the formation of real estate investment trusts (REITs). For owners and developers, REITs provide an alternative method of raising capital in tight credit markets (which existed for the real estate industry during the early 1990s). For investors, REITs offer a securitized investment that may be an attractive vehicle for increasing investment yields. As discussed in the "Audit Issues and Developments" section of this Audit Risk Alert, auditors should be aware of recent developments in the REIT marketplace that may indicate going-concern or asset-valuation issues.

.07 While capital has begun to return to the market, the sources of that capital have changed. Although the traditional investors such as banks, pension funds, and life insurance companies remain the major sources of capital, alternative sources, primarily REITs and issuers of collateralized mortgage-backed securities (CMBSs), have increased in significance. Some of the largest real estate capital providers have been converting debt assets into debt securities, providing an efficient way for real estate to be financed. Securitization of real estate continues to increase. A record level of CMBS issuance is expected this year.

.08 The current securitization activity continues an upswing that started when the Resolution Trust Company (RTC) needed to dispose of large numbers of mortgages as quickly as possible. The return of capital is likely to accelerate now that legislation related to Financial Asset Securitization Investment Trusts (FASITs)

has been passed. FASITs, with less restrictive qualification and operational requirements than Real Estate Mortgage Investment Conduits (REMICs), likely will increase the credit availability to most market segments, particularly small businesses and developers. Unlike a REMIC, a FASIT is permitted to increase or decrease its asset pool after the assets have been placed in the portfolio. As a result, construction financing will qualify for securitization, making financing more available to real estate developers. Although passage of the FASIT legislation is viewed as a positive development for the industry, some concerns exist that the increased availability of financing may lead to a return to overbuilding.

.09 Also contributing to the fear of overbuilding is the increased availability of credit already existing in some markets, even before the September 1, 1997 effective date of the FASIT legislation. Lending activity has increased in response to the slow upward trend in real estate values. As a result of the increased lending, construction activity in some markets has begun to pick up, which also contributes to the fears of overbuilding.

.10 Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), as amended, requires that in planning their audits, auditors consider matters that affect the industry in which the entity operates, such as the economic factors. With respect to audits of real estate entities, this would include the commercial and residential markets described above.

Regulatory Matters

.11 Real estate entities and the transactions in which they engage have become the focus of an increasing level of government regulation. SAS No. 22 (AU section 311) requires that in planning their audits, auditors should obtain a knowledge of matters that relate to the entities' business, including, among other things, government regulations. Auditors should consider such regulations in light of their potential effect on the financial statements being audited. SAS No. 54, *Illegal Acts by Clients* (AU section 317), requires auditors to design their audits to provide reasonable assurance of detecting material misstatements of the financial statements resulting from illegal acts that have a direct and material effect on the determination of financial statement amounts. An audit performed in accordance with generally accepted auditing standards (GAAS) normally does not include procedures specifically designed to detect illegal acts that would have only an indirect effect on the financial statements. Nonetheless, auditors should be aware of the possibility that such illegal acts may have occurred.

.12 Specific laws and regulations that may affect the real estate industry are discussed in the following paragraphs.

Private Securities Litigation Reform Act of 1995

.13 In December of 1995, the Congress passed over the President's veto the Private Securities Litigation Reform Act of 1995. One important aspect of this legislation is the inclusion of Section 10A into the Securities Exchange Act of 1934. Section 10A codifies certain professional auditing standards, provides a broad definition for "illegal acts," and expands the obligations of auditors to timely report certain uncorrected illegal acts.

.14 New Section 10A codifies existing auditing standards in four areas. It requires auditors to identify illegal acts (which is currently required by SAS No. 54 [AU section 317]), identify related parties (which is currently required by SAS No. 45[1]), and evaluate whether substantial doubt exists about an entity's ability to continue as a going concern (which is currently required by SAS No. 59,[2] as amended by SAS No. 64[3] and SAS No. 77[4]), Section 10A also codifies and expands the auditor's responsibility to report illegal acts pursuant to SAS No. 53.[5]

---

[1] *Omnibus Statement on Auditing Standards—1983* (AU sections 313, 334, and 557).

[2] *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341).

[3] *Omnibus Statement on Auditing Standards—1990* (AU sections 341, 508, and 543).

[4] *Amendments to Statements on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623).

[5] *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.15 Auditors should note that Section 10A broadly defines "illegal acts" to include "an act or omission that violates any law, or any rule or regulation having the force of law." This definition is especially significant when it is considered in relation to the specific determinations an auditor must make and the expanded responsibilities of auditors to timely report certain uncorrected illegal acts.

.16 For example, Section 10A specifies that when the auditor becomes aware of information indicating that an illegal act may have occurred, regardless of the perceived impact of the illegal act on the issuer's financial statements, the auditor must make certain determinations. The auditor must (1) determine whether it is likely that an illegal act has occurred; (2) if so, determine the possible effects (including any contingent fines, penalties, and damages) on the issuer's financial statements; and (3) as soon as practicable, inform management of the illegal act(s) and assure the issuer's Board of Directors is also adequately informed of such act(s) (unless the illegal act is clearly inconsequential).

.17 However, the auditor's responsibility is expanded beyond the present guidance under GAAS to include the requirement that auditors report to the issuer's Board of Directors the auditor's belief that the illegal act has a material effect on the financial statements of the issuer, senior management has not taken "timely and appropriate remedial actions with respect to the illegal act," and the auditor reasonably expects the failure to take remedial action will result in the issuance of a non-standard report or the auditor's resignation from the audit engagement.

.18 Once auditors report to the Board of Directors that appropriate remedial actions have been taken, an issuer must inform the SEC of the auditor's conclusions within one business day of receiving the auditor's report. If the issuer fails to inform the SEC, the auditor is required to notify the SEC within one business day. Section 10A, through the Exchange Act, provides for the imposition of penalties of up to $500,000 on auditors for willful failure to comply with the reporting responsibilities created by Section 10A.

.19 The SEC has proposed a rule to implement the reporting requirements set forth in Section 10A with a deadline for comments of October 28, 1996. The proposed rule would specify, among other things, that registrants and auditors should submit any notice or report required by Section 10A in a written, confidential communication rather than on a public disclosure form, that the SEC's Office of the Chief Accountant should receive the report, that the report should include information identifying the issuer and the auditor, and that the report would be exempt from the Freedom of Information Act to the same extent as SEC investigative records. In addition, practitioners should be aware that neither Section 10A nor the release alters existing auditor reporting requirements.

U.S. Department of Housing and Urban Development Regulations

.20 Through the Federal Housing Administration (FHA), the U.S. Department of Housing and Urban Development (HUD) regulates the development and operation of all of the housing projects for which it insures mortgages or provides rent subsidies. Entities that receive financial assistance from HUD are required to submit audited financial statements to HUD annually. Those audits are required to be performed in accordance with GAAS, Government Auditing Standards (GAS; also commonly referred to as the "Yellow Book") issued by the Comptroller General of the United States, and the Consolidated Audit Guide for Audits of HUD Programs, issued by the HUD Office of the Inspector General (OIG).

.21 Before accepting HUD audits, auditors should be aware of the HUD oversight program. Representatives of HUD have the ability to review workpapers of individual engagements. If HUD determines that the audit is not in compliance with the HUD audit program, the individual (rather than the firm) that performed the audit can be banned from performing future HUD audits. Furthermore, HUD might refer the matter to the individual's state board of accountancy.

Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance

.22 Because real estate entities may be recipients of governmental assistance, auditors should consider the guidance in AICPA SAS No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AU section 801). SAS No. 74 (AU section 801), which supersedes SAS No. 68, *Compliance Auditing Applicable to Governmental Entities and Other Recipients of Governmental Financial Assistance*, is effective for audits of financial statements and of compliance with laws and regulations for fiscal periods ending after December 31, 1994. SAS No. 74 (AU section 801) provides general guidance to practitioners engaged to perform compliance audits of recipients of governmental financial assistance.

.23 SAS No. 74 (AU section 801) continues to recognize three levels of audits—GAAS, *Government Auditing Standards*, and certain other federal requirements—of recipients of governmental financial assistance. SAS No. 74 (AU section 801) is applicable when the auditor is engaged to perform an audit of a governmental entity under GAAS, an audit under *Government Auditing Standards*, or in certain other circumstances involving governmental financial assistance, such as single or organization-wide audits or program-specific audits under certain federal or state audit regulations.

.24 SAS No. 74 (AU section 801) provides general guidance to the auditor on the:

1. Application of the provisions of SAS No. 54 (AU section 317), relative to detecting misstatements resulting from illegal acts related to laws and regulations that have a direct and material effect on the determination of financial statement amounts in audits of the financial statements of governmental entities and other recipients of governmental financial assistance.
2. Performance of a financial audit in accordance with *Government Auditing Standards*.
3. Performance of a single or organization-wide audit or a program-specific audit in accordance with federal audit requirements.
4. Communication with management if the auditor becomes aware that the entity is subject to an audit requirement that may not be encompassed in the terms of his or her engagement.

Interstate Land Sales and Full Disclosure Act

.25 Developers are required to make full disclosure in connection with the sale or lease of certain undeveloped subdivided land. The Interstate Land Sales and Full Disclosure Act (the Act) makes it unlawful for a developer to sell or lease, by use of the mail or any other means of interstate commerce, any land offered as part of a common promotional plan unless the land is registered with the Office of Interstate Land Sales Registration. The Act requires that a printed property report be furnished to all prospective purchasers or lessees. Similarly, the Federal Trade Commission has the authority to act on unfair or deceptive trade practices with respect to real estate sales, particularly as they relate to the marketing and selling activities of real estate companies. See the discussion on SAS No. 22 (AU section 311) and SAS No. 54 (AU section 317) in the "Regulatory Matters" section of this Audit Risk Alert.

Regulation Z of the Consumer Credit Protection Act

.26 Because most real estate purchases are made on credit, truth-in-lending laws can have a significant effect on real estate financing transactions. Regulation Z of the Consumer Credit Protection Act prescribes requirements for both creditors and borrowers for full disclosure of credit costs that are applicable to all real estate transactions, regardless of amount, in which individual borrowers are involved in nonbusiness transactions. Failure to comply could be considered an illegal act that has an indirect effect on the financial statements.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Tax Matters

.27 Many real estate transactions such as "synthetic" leases or formation of an umbrella partnership REIT (UPREIT) or a DownREIT are structured to achieve specific tax purposes. Each of these transactions is discussed below. Further discussion of accounting topics relevant to these types of transactions is included in the "Accounting Developments" section of this Audit Risk Alert.

.28 *UPREITs.* In the formation of a typical UPREIT, an operating partnership is formed by a sponsor. The sponsor contributes real estate properties and related debt to the operating partnership. The exchange typically is accounted for as a reorganization of entities under common control in a manner similar to a pooling of interests. Concurrent with the formation of the operating partnership, a REIT invests proceeds from a public offering in exchange for a majority interest (general partner) in the operating partnership; the sponsor retains a minority interest in the operating partnership. Because of its controlling financial interest, the REIT consolidates the operating partnership in its financial statements. In the typical UPREIT structure, the REIT's consolidated financial statements report the assets and liabilities contributed by the sponsor at the sponsor's historical cost basis. One of the reasons for the popularity of the UPREIT conversion is that the seller can defer tax by accepting operating partnership units as consideration.

.29 *DownREITs.* In the formation of a typical DownREIT, an existing REIT forms an operating partnership with the property owners of the desired acquisition property, generally with the existing REIT as the general partner. The owner contributes the assets to the operating partnership and, in return, receives partnership units that can be exchanged at some future date for shares of stock in the REIT. Similar to UPREITs, one of the benefits of a DownREIT structure is that the seller can defer tax by accepting partnership units as consideration. Additionally, the DownREIT structure is easier to implement than an UPREIT conversion.

.30 *Synthetic Leases.* The use of synthetic leases is becoming more common in the real estate industry. Use of a synthetic lease allows the lessee to obtain financing while permitting off-balance sheet treatment for the related obligation and asset. Establishment of a typical synthetic lease might include the following steps:

- A nonconsolidated special purpose entity (SPE) would be established to act as the lessor of the property in question.
- The lessee would sign a lease under which the monthly net rental payments would cover the SPE-lessor's debt service.
- The SPE-lessor would obtain nonrecourse financing to be used to obtain the property, using the lease as security.

.31 The lease agreement would be structured so that upon expiration, the lessee would have the option of renewing the lease, purchasing the property, or causing the property to be sold. If the property is sold for an amount greater than the SPE-lessor's investment, the lessee would retain the excess. If the sales proceeds do not cover the SPE-lessor's investment, the lessee would be required to make a contingent rental payment to the SPE-lessor in the amount of the shortfall, subject to the limitation of the residual value guarantee. The present value of the minimum lease payments (base rental payments plus the residual value guarantee) to the SPE-lessor must be less than 90 percent of the original cost of the property, or capital lease treatment would result.

.32 One reason a lessee might wish to use a synthetic lease is that such an arrangement permits the lessee to use off-balance sheet treatment for the asset and obligation, yet retain the benefit of any appreciation in the property during the lease term. Additionally, because the lessee will be considered the owner of the property for tax purposes, the lessee will be entitled to claim deductions for interest on the debt and tax depreciation on the property.

.33 Auditors should be aware that the accounting literature covering synthetic leases, including Financial Accounting Standards Board (FASB) Emerging Issue Task Force (EITF) Issue No. 90-15, *Impact of Nonsubstantive Lessors, Residual Value Guarantees, and Other Provisions in Leasing Transactions*, and EITF Issue No. 96-21, *Implementation Issues in Accounting for Leasing Transactions Involving Special-Purpose Entities*, is complex, and failure to comply with all of the requirements could result in material misstatement of the financial statements.

.34 Auditors also should be aware that the use of synthetic leases, UPREITs, DownREITs, or similar strategies may affect audit risk. If structured incorrectly, these types of transactions or arrangements may have significant adverse impact on the financial statements of clients. For example, one of the main reasons to use synthetic leases is the ability to retain off-balance sheet treatment for the related asset. However, if the synthetic lease is structured incorrectly, the entity may be required to consolidate the SPE that was formed to act as the lessor of the property. This would defeat the purpose of the synthetic lease structure.

Audit Issues and Developments

General Risk Factors

.35 Although conditions vary from region to region and entity to entity, general factors inherent in the real estate industry that influence audit risk include the following.

.36 *Magnitude and Complexity of Transactions.* The financial statements of real estate companies generally include a large number of highly complex transactions. The complexity of these transactions is increased by the fact that a number of them are based on estimates.

.37 *Lengthy Development or Holding Periods.* By their nature, real estate projects involving construction require significant lead time. Delays may result in increased costs and potentially affect the accounting for the assets being constructed. See the section entitled "Asset Impairment."

.38 *Financing and Liquidity Concerns.* Real estate enterprises are often highly leveraged, creating concerns about the ability of entities in the industry to continue to obtain adequate capital and to meet obligations as they come due. Auditors should carefully consider these industry-specific conditions and assess the effect they have on audit risk.

Asset Impairment

.39 Impairment of assets continues to be a major concern throughout the real estate industry and requires critical attention in the audits of financial statements of real estate entities. FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08), which is effective for financial statements for fiscal years beginning after December 15, 1995, has particular importance in the real estate industry. As discussed in the "Accounting Developments" section of this Audit Risk Alert, FASB Statement No. 121 (AC I08) revises significantly the way in which entities will account for real estate. It requires different accounting for impaired assets based on whether those impaired assets are "to be held and used" or "to be disposed of."

.40 Auditors should obtain reasonable assurance that management has considered all relevant factors in determining whether asset impairment has occurred. The subjectivity of determining the adequacy of the impairment adjustment reinforces the need for careful planning and execution of audit procedures in this area.

.41 Conditions or events such as the following may indicate a need for assessing the recoverability of investments in real estate:

- Cash flows from operating activities are insufficient to cover debt service.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Current occupancy rates indicate that future cash flows to be received are lower than the amounts needed to fully recover the carrying amount of the investment.
- Major tenants have experienced or are experiencing financial difficulties.
- A significant portion of leases will expire in the near term.
- Lessors are being forced to make significant concessions in order to rent property.
- Properties held for sale remain unsold at subsequent balance sheet dates.
- Other investors have decided to cease providing support or to reduce their financial commitment to a project or venture.
- Rental demand for a rental project currently under construction is not meeting projections.
- Auditors' reports on financial statements of investee properties are modified for reasons that relate to real estate investments. For example, an auditor's report on the financial statements of investee properties is modified for a departure from generally accepted accounting principles (GAAP) due to improper valuation of assets.

.42 Lack of an asset-impairment evaluation system may indicate a material weakness in the entity's internal control structure. Further, a lack of documentation generally will increase the extent to which judgment must be applied by auditors in evaluating the adequacy of management's writedowns and will increase the likelihood that differences will result. The AICPA Audit and Accounting Guide *Guide for the Use of Real Estate Appraisal Information* provides guidance to help auditors understand real-estate appraisal concepts and information. SAS No. 57, *Auditing Accounting Estimates* (AU section 342), should be followed in auditing estimates such as impairments.

.43 Auditors also should consider the propriety of the client's classification of assets as "held for sale" or "held for investment." Land to be developed and projects under development should be accounted for in accordance with paragraphs 4 through 7 of FASB Statement No. 121 (AC I08.123-126) (that is, they should be considered "assets to be held and used"). Completed projects that the entity intends to dispose of should be accounted for in accordance with paragraphs 15 through 17 of the Statement (AC I08.134-136) ("assets to be disposed of ").

.44 SAS No. 73, *Using the Work of a Specialist* (AU section 336), provides guidance on auditing internal or external appraisals of real estate.

.45 *Real Estate Properties Held for Investment.* Real estate held for investment should be reported at cost, less accumulated depreciation, and should be evaluated for impairment if facts and circumstances indicate that impairment may have occurred, in conformity with the provisions of paragraphs 4 through 7 of FASB Statement No. 121 (AC I08.123-126). If events or changes in circumstances indicate that impairment may exist, the entity is required to estimate the future cash flows expected to result from the use of the asset and its eventual disposition.

.46 An impairment is deemed to have occurred if the carrying amount of the asset exceeds the sum of the expected future cash flows (undiscounted and without interest charges) from the asset. The impairment is measured as the amount by which the carrying amount exceeds the fair value of the asset. After an impairment is recognized, the reduced carrying amount of the asset should be accounted for as the new cost of the asset and depreciated over the remaining useful life (for depreciable assets). Restoration of previously recognized impairment losses is prohibited.

.47 *Real Estate to Be Disposed Of.* All real estate to be disposed of that is not subject to the provisions of Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects*

of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions (AC I13), for which management, having the authority to approve the action, has committed to a plan of disposal, should be reported at the lower of carrying amount or fair value less costs to sell. Subsequent revisions to fair value less costs to sell should be reported as adjustments to the carrying amount of the asset to be disposed of. However, the carrying amount may not be adjusted to an amount greater than the carrying amount of the asset before an adjustment was made to reflect the decision to dispose of the asset. Determination of whether the carrying amounts of real estate projects require writedowns should be done on a project-by-project basis, in accordance with paragraph 24 of FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects* (AC Re2.124), as amended by FASB Statement No. 121 (AC I08).

.48 In assessing the valuation of assets to be disposed of, auditors should consider various issues, including the following:

- Has management committed to the plan of disposal? Was the commitment made by management with the authority to approve the action?
- Has fair value been determined using reasonable assumptions and estimates?
- Has the client included appropriate costs in the estimate of costs to sell? Have the costs to sell been discounted, if appropriate?

.49 In deliberating FASB Statement No. 121 (AC I08), the FASB decided not to provide an exception for assets subject to nonrecourse debt. The FASB considers the recognition of an impairment loss and the recognition of gain on extinguishment of debt to be two separate events.

Foreclosed Real Estate

.50 SOP 92-3, *Accounting for Foreclosed Assets*, provides guidance on measuring foreclosed assets after foreclosure. Under SOP 92-3, there is a rebuttable presumption that foreclosed assets are held for sale. The SOP requires foreclosed assets held for sale to be carried at the lower of fair value minus estimated costs to sell or cost. Foreclosed assets held for the production of income should be treated the same way they would be had they been acquired in a manner other than foreclosure.

.51 Auditors should be aware that some believe that the "held for sale" presumption of SOP 92-3 has been effectively superseded by FASB Statement No. 121 (AC I08). The FASB has added a project to its agenda to address certain provisions of FASB Statement No. 121 (AC I08). It is possible that, as a result of this project, that interpretation could be formalized.

.52 SOP 92-3 refers to FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings* (AC D22), for its definition of fair value. In considering the appropriateness of fair values, auditors of publicly held entities should consider the guidance in Section 401.09d of the SEC's *Codification of Financial Reporting Policies*, which indicates that the mere adoption of strategies such as hold-for-the-future strategy based on expectations of future price increases, or a strategy of operating repossessed collateral on one's own behalf, cannot justify the use of derived accounting valuations that portray the results of operations more favorably than would the use of current values in active markets.

Revenue Recognition

.53 As discussed in the "Tax Matters" section of this Audit Risk Alert, certain real estate transactions are structured to achieve a desired result. Auditors should analyze such creative funding deals to ensure that their clients have accounted for the transaction properly.

.54 The persistent feeling that the industry is on the verge of a recovery may lead to clients forecasting improvements in financial results that may not fully materialize. Auditors should consider the appropriate-

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

ness of their clients' revenue-recognition policies, or changes therein. A number of clients may view the continued optimism within the industry as an opportunity to present improved financial results through changes in operating or accounting policies that affect the timing or propriety of revenue recognition. In evaluating the revenue recognition policies of real estate industry clients, auditors should consider carefully whether the criteria set forth in FASB Statement No. 66, *Accounting for Sales of Real Estate* (AC R10), have been met. Auditors should consider the facts and circumstances surrounding property sales carefully to be certain that there are no formal or informal "put" arrangements committing the seller, its officers, or its shareholders to repurchase the property, find other buyers, or indemnify the buyer or third-party guarantors for risk of loss. Auditors should also consider circumstances that would indicate that a seller may have directly or indirectly provided the funds for a down payment (or for the entire purchase price) in a cash sale. Apart from precluding the use of the full accrual method of profit recognition, such circumstances may create relationships that meet the definition of related parties as set forth in FASB Statement No. 57, *Related Party Disclosures* (AC R36). SAS No. 45 (AU sections 313, 334, and 557) describes procedures that are designed to determine the existence of related parties as defined by FASB Statement No. 57 (AC R36).

Availability of Funding

.55 Real estate entities require substantial amounts of capital. Although lending activity appears to be on the rise, it is not at the level of the 1980s. As a result of the prolonged slump in the industry, and losses incurred in recent years, a number of the traditional sources of capital for the industry are no longer lending in the amounts they did previously. Financial institutions have become more selective in their real estate lending, a tendency that is attributable partly to recent losses, as well as to increased regulatory scrutiny. Moreover, sluggish global economic conditions have kept foreign investors from becoming an alternative source of funds.

.56 SAS No. 59 (AU section 341) describes an auditor's obligation to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. SAS No. 59 (AU section 341) includes the "need to seek new sources or methods of financing" as an example of a condition or event that indicates there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable amount of time.

Deferred Rents

.57 FASB Statement No. 13, *Accounting for Leases* (AC L10), requires that rents be recognized on a straight-line basis over the term of the lease even if payments are not made on a straight-line basis. Because of the number and magnitude of rent abatements and concessions being offered, significant deferred rent balances are sometimes recorded. In auditing such balances, auditors should consider carefully the reasonableness of assertions by management concerning the ability of tenants to perform according to the lease agreement. If tenants are unable to perform according to the lease agreement, deferred rents may not be fully recoverable.

Environmental Issues

.58 The U.S. Environmental Protection Agency (EPA) is empowered by law to order any party that owned or operated a site currently included on the National Priorities List, or anyone who has arranged for disposal or transported hazardous materials to such a site, to remediate the site or to reimburse the EPA for remediation costs and pay additional damages. In many states, state agencies have powers similar to the EPA's with respect to contaminated sites. In view of the liabilities that may be incurred from owning contaminated sites, virtually all entities entering into real estate transactions today consider potential environmental liabilities. Auditors of real estate entities that face such claims should evaluate carefully whether the accounting and disclosure requirements of FASB Statement No. 5, *Accounting for Contingencies* (AC C59), have been met. As discussed in the "Accounting Developments" section of this Audit Risk Alert,

in October 1996 the AICPA issued SOP 96-1, *Environmental Remediation Liabilities*. This SOP includes benchmarks to aid in the determination of when environmental remediation liabilities should be recognized in accordance with FASB Statement No. 5 (AC C59). It also provides guidance on the display of environmental remediation liabilities in financial statements and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations.

.59 Auditors also should be aware of the consensuses reached in EITF Issues No. 93-5, *Accounting for Environmental Liabilities*, and No. 95-23, *The Treatment of Certain Site Restoration/Environmental Exit Costs When Testing a Long-Lived Asset for Impairment*. In EITF Issue No. 93-5, the EITF reached a consensus that an environmental liability should be evaluated independently from any potential recovery, and that the loss arising from the recognition of an environmental liability should be reduced only when a claim for recovery is probable of realization. In EITF Issue No. 95-23, the EITF reached a consensus that future cash flows for environmental costs that are associated with a long-lived asset should be excluded from the undiscounted expected future cash flows used to test the asset for recoverability under FASB Statement No. 121 (AC I08). For environmental costs that have not been recognized as a liability for accounting purposes, the EITF reached a consensus that whether environmental exit costs should be in the undiscounted expected future cash flows used to test a long-lived asset for recoverability under FASB Statement No. 121 (AC I08) depends on management's intent with respect to the asset. The EITF Issue provides examples of management's intent and the corresponding treatment of the environmental exit costs in the FASB Statement No. 121 (AC I08) recoverability test.

.60 Auditors of publicly held companies should also consider the requirements of the Securities Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 92, *Accounting and Disclosures Relating to Loss Contingencies*, which provides the SEC staff's interpretation of current literature related to accounting for environmental issues.

.61 For further discussion, see *Audit Risk Alert—1996/97* [AAM section 8010].

Real Estate Investment Trusts

.62 As discussed previously, the number of REIT offerings proliferated in the early 1990s. Beginning with the second half of 1994, however, interest rates began to rise. This resulted in an increased cost of capital for REITs, which was not necessarily offset by corresponding increases in the returns from properties owned. REIT share prices experienced a downturn, and initial public offering (IPO) activity decreased markedly, to only seven IPOs in 1995. REIT activity has increased again in 1996, although the level of activity is nowhere near the level of 1993 and 1994.

.63 REITs require new capital to fund acquisitions for growth. Other than IPOs, REITs have been implementing several other methods of raising capital, each of which presents issues that an auditor should be aware of.

.64 *Secondary Public Offerings.* In 1995, secondary offerings far exceeded IPO activity. Although there have been recent successes in the secondary-public-offering marketplace, this avenue is more likely to be open only for REITs with highly successful past operating results. Those REITs that have not been as successful will be forced to pay higher underwriting costs and incentives to purchasers of the stock. The increased cost of capital, without a corresponding increase in return from the properties, results in decreased yields and cash flows.

.65 Auditors should be aware of the competition involved for secondary-public-offering money. As REITs compete for this money, trusts may overvalue assets in order to increase their desirability to investors. Auditors should obtain reasonable assurance that the valuations of the assets and liabilities are reasonable.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.66 *Bond Financings.* In 1995, REITs were active in the bond market. Publicly rated debt sometimes can be issued more cheaply than equity. To the extent a REIT stock is considered undervalued, public debt is a more cost-effective method of raising capital. The relatively low weighted average cost of capital permits REITs to purchase real estate at low yields without diluting earnings. The achievement of an investment grade rating has made this an attractive method of capital formation for several REITs.

.67 *Mergers and Acquisitions.* The increased cost of capital to REITs, combined with the fact that the majority of property previously owned by the Resolution Trust Corporation (RTC) has now been purchased, has made it more difficult for REITs to acquire properties at yields that substantially exceed a REIT's cost of capital. Additionally, a number of REITs have not met expectations that had been included in their offering materials. These factors serve to reduce the stock price of affected REITs, which in turn may make them acquisition candidates.

.68 Auditors of REITs that may be acquisition candidates, such as those discussed above, should be aware of the possibility that trusts may overvalue assets in order to maintain a stock price at a level that would make them attractive to investors, but less attractive to potential acquiring entities. Auditors of larger, more successful REITs that may be looking to acquire other REITs also should be aware of this possibility.

.69 *Formation of Umbrella-Partnership Real Estate Investment Trusts.* As a result of the downturn in IPO activity, many property owners found themselves unable or unwilling to proceed with planned IPOs. Many of these property owners are faced with "bullet" loans now coming due. These property owners may wish to consider the alternative of forming an UPREIT. Formation of an UPREIT is discussed in the "Tax Matters" section of this Audit Risk Alert. Also, for reasons discussed below, a traditional REIT may wish to convert itself to an UPREIT in order to place itself in an advantageous position for future property acquisitions.

.70 The accounting issue discussed in EITF Issue No. 94-2, *Treatment of Minority Interests in Certain Real Estate Investment Trusts,* involves the question of how, and at what amount, the sponsor's minority interest should be reported in the REIT's consolidated financial statements. The EITF reached a consensus that the sponsor's interest in the operating partnership should be reported as a minority interest. As discussed in the "Accounting Developments" section of this Audit Risk Alert, in EITF Issue No. 95-7, *Implementation Issues Related to the Treatment of Minority Interests in Certain Real Estate Investment Trusts,* the EITF discussed certain issues related to minority interests in REITs.

.71 Auditors of REITs should be aware of the requirements of SEC SAB No. 97, *The Inappropriate Application of Staff Accounting Bulletin No. 48,* Transfers of Nonmonetary Assets by Promoters or Shareholders, *to Purchase Business Combinations Consummated Just Prior to or Concurrent With an Initial Public Offering, and the Identification of an Accounting Acquirer in Accordance With APB Opinion No. 16,* Business Combinations, *for Purchase Business Combinations Involving More Than Two Entities,* and the relationship between SAB No. 97 and EITF Issue No. 94-2.

.72 When property owners look to sell their properties on a tax-deferred basis, an UPREIT can acquire the property in question by exchanging limited partnership units for it, thus postponing the taxable gain that the seller would have been required to recognize had it sold the property.

.73 *Formation of a DownREIT.* As discussed in the "Tax Matters" section of this Audit Risk Alert, a DownREIT is a joint venture formed by an existing REIT with the owners of the desired acquisition property. All current properties continue to be held directly by the REIT. The REIT generally is the general partner of the joint venture.

.74 Auditors should be aware of several disadvantages of the DownREIT structure. First, the structure may not provide for central ownership of all the REIT's properties. Future property acquisitions may become cumbersome. Also, the lack of central ownership may increase the administrative burden of managing and

recordkeeping for the REIT properties. Auditors also should determine that the acquired property's cash flow and taxable income is not blended with those of the other REIT properties. Additionally, the DownREIT structure gives rise to potentially significant issues related to gain recognition, new basis, and consolidation. Finally, because of the complexity of the DownREIT structure, financial statement disclosures should be reviewed carefully.

Liquidity and Cash Flow Information

.75 The SEC staff has noted that SEC registrants are expected to use the statement of cash flows and other appropriate indicators in analyzing their liquidity, and to present a balanced discussion in the Management's Discussion and Analysis (MD&A) section of SEC filings that addresses the cash flows from investing and financing activities, as well as from operations. A discussion of cash flow from operations by itself is not considered an appropriate presentation. If cash flow information is included in the Selected Financial Data section of SEC filings, it also should be presented in a balanced manner, including cash flows from operations, investing, and financing activities. The SEC staff also has indicated that, in the context of amounts available for distributions, it is more appropriate to discuss "cash available for distribution" than cash flow from operations, since distributions will be paid from available cash. SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550), requires that auditors read such information and consider whether the information, or the manner of its presentation, is materially inconsistent with that appearing in the financial statements.

Non-GAAP Measures of Performance

.76 The SEC staff has noted that publicly held real estate entities increasingly have been presenting "operating income before depreciation and amortization and writedowns of real estate" or, in some cases, "funds from operations" in Selected Financial Data and MD&A. The SEC staff believes that such captions in financial statements themselves are inappropriate because they suggest that the amount represents cash flow for the period, which is rarely the case. Cash flow from operations is the appropriate financial statement caption, which must be included in a balanced presentation with cash flows from investing and financing activities when discussing cash flows in MD&A and elsewhere. Auditors of public entities should read such information and consider whether the information, or the manner of its presentation, is materially inconsistent with that appearing in the financial statements.

.77 The SEC staff has noted that funds from operations (FFO) has been discussed outside of the financial statements in several recent filings with the SEC. Neither GAAP nor the authoritative accounting literature provides a definition for FFO, and the SEC staff's view with respect to the presentation of a cash flow measure as a proxy for net income and the presentation of Funds Generated from Operations is expressed in Accounting Series Release (ASR) 142. ASR 142 states that if such measurements of economic performance are presented in the MD&A section or elsewhere, they should not be presented in a manner that gives them greater authority or prominence than conventionally computed earnings. In no event should the presentation leave the reader with the impression that FFO is the appropriate measure of operating performance for the REIT and an appropriate measure for which dividends are computed and based. Net income and cash flows from operating, investing, and financing activities remain the appropriate measurements.

Investments in Derivatives

.78 Interest rates, commodity prices, and numerous other market rates and indices from which derivative financial instruments derive their value have increased in volatility over the past several months. As a result, a number of entities have incurred significant losses attributable to the use of derivatives. Entities in the real estate industry sometimes use such instruments as risk management tools (hedges) or as speculative investment vehicles. Derivatives nearly always increase audit risk. Although the financial statement assertions about transactions involving derivatives are generally similar to assertions about other transactions, the auditor's approach to achieving related audit objectives may differ because certain derivatives, such as

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

forward contracts, swaps, options, and other financial instruments with similar characteristics, generally are not recognized in the financial statements. Many of the unique audit risk considerations presented by the use of derivatives are discussed in detail in *Audit Risk Alert—1996/97* [AAM section 8010]. In addition, auditors may wish to refer to the SEC's proposal on comprehensive disclosure requirements for derivatives and other financial instruments, issued for public comment in early 1996. The SEC anticipates issuance of a final staff bulletin on this topic by December 31, 1996.

Auditing Pronouncements

.79 As summarized in the following Exhibit, five new SASs, which are discussed below, have been issued recently.

.80

Exhibit

Significant Provisions of Newly Issued SASs

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement*	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.
SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties	SAS No. 72	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55*	SAS No. 55	Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59).

.81 *SAS No. 75.* In September 1995, the AICPA issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except in certain circumstances, as discussed in the SAS (AU section 622). The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.82 *SAS No. 76.* In September 1995, the AICPA issued SAS No. 76, *Amendments to Statement on Auditing Standards No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634 and AT

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

section 300). The SAS (AU section 634 and AT section 300) provides reporting guidance and an example of a letter, actually a form of agreed-upon procedures report, that the accountant can provide in response to a request to provide a comfort letter in circumstances in which the party requesting the letter is not willing to provide the accountant with the representations required in paragraph 6 of SAS No. 72 (AU section 634.06). SAS No. 76 (AU section 634 and AT section 300) is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

.83 *SAS No. 77.* In November 1995, the AICPA issued SAS No. 77 (AU sections 311, 341, 544, and 623) which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77, *Amendments to Statements on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623), is effective for engagements beginning after December 15, 1995.

.84 *SAS No. 78.* In December 1995, the AICPA issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission, formed to address the Report of the National Commission on Fraudulent Financial Reporting. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.85 *SAS No. 79.* In December 1995, the AICPA issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58 (AU section 508) concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. SAS No. 79 (AU section 508) does not affect SAS No. 59 (AU section 341) nor does it preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements.

.86 As discussed in SAS No. 79 (AU section 508), a matter involving an uncertainty is one that is expected to be resolved at a future date, at which time conclusive evidential matter concerning its outcome would be expected to become available. Uncertainties include, but are not limited to, contingencies covered by FASB Statement No. 5 (AC C59) and matters related to estimates covered by SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* Conclusive evidential matter concerning the ultimate outcome of uncertainties cannot be expected to exist at the time of the audit because the outcome and related evidential matter are prospective. In these circumstances, management is responsible for estimating the effect of future events on the financial statements, or determining that a reasonable estimate cannot be made and making the required disclosures, all in accordance with GAAP, based on management's analysis of existing conditions. Absence of the existence of information related to the outcome of an uncertainty does not necessarily lead to a conclusion that the evidential matter supporting management's assertion is not sufficient. Rather, the auditor's judgment regarding the sufficiency of the evidential matter is based on the evidential matter that is, or should be, available. If, after considering the existing conditions and available evidence, the auditor concludes that sufficient evidential matter supports management's assertion about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate. If the auditor is unable to obtain sufficient evidential matter to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. A qualification or disclaimer of opinion because of a scope limitation is appropriate if sufficient evidential matter related to an uncertainty does or did exist but was not available to the auditor for reasons such as management's record retention policies or a restriction imposed by management.

.87 SAS No. 79 (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

.88 *SAS No. 80.* In December 1996, the AICPA issued a new SAS, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter (AU section 326), which is effective for engagements beginning on or after January 1, 1997. This Statement (AU section 326) provides guidance for a practitioner who has been engaged to audit an entity's financial statements where significant information is transmitted, processed, maintained, or accessed electronically. The new Statement (AU section 326) includes examples of evidential matter in electronic form and provide that an auditor should consider the time during which such evidential matter exists or is available in determining the nature, timing, and extent of substantive tests. In addition, the Statement (AU section 326) indicates that an auditor may determine that, in certain entities when evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. The Statement (AU section 326) provides that in such circumstances, an auditor should perform tests of controls to support an assessed level of control risk below the maximum for affected assertions. Evidence provided by these tests of controls, when combined with that provided by substantive tests, should be sufficient to support the auditor's opinion to be issued.

.89 Additionally, at the time of this writing, an exposure draft of the following proposed SAS was outstanding.

.90 *Consideration of Fraud in a Financial Statement Audit.* In May 1996 the AICPA issued an exposure draft of a proposed Statement on Auditing Standards, *Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, and No. 47, Audit Risk and Materiality in Conducting and Audit. The proposed Statement would provide expanded operational guidance on the consideration of fraud in conducting a financial statement audit. The proposed changes in auditing standards also clarify the auditor's present responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether caused by error or fraud. In addition, the proposed changes provide added guidance on the standard of due professional care in the performance of work, including the need to exercise professional skepticism, and the concept of reasonable assurance. In addition to amending SAS Nos. 1 and 47 (AU section 312), the proposed Statement would—

- Describe fraud and its characteristics.
- Require the auditor to specifically assess the risk of material misstatement due to fraud and provide categories of fraud risk factors that should be considered in the auditor's assessment.
- Provide guidance on how the auditor should respond to the results of the assessment.
- Provide guidance on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud.
- Describe related documentation requirements.
- Provide guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

Accounting Developments

FASB Statement on Impairment

.91 In March 1995, the FASB issued FASB Statement No. 121 (AC I08). As discussed previously, FASB Statement No. 121 (AC I08) has particular importance to the real estate industry. FASB Statement No. 121

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

(AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or circumstances indicate that their carrying amounts may not be recoverable. In performing the review for impairment, the entity should estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset.

.92 The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying value or fair value less cost to sell, except for those assets that are covered by APB Opinion No. 30 (AC I13).

.93 It also amends FASB Statement No. 67 (AC Re2) by requiring that "a real estate project, or parts thereof, that is substantially complete and ready for its intended use shall be accounted for at the lower of carrying amount or fair value less costs to sell." Under FASB Statement No. 67 (AC Re2), such real estate projects were accounted for at the lower of cost or net realizable value. Projects under development and land to be developed are considered assets to be held and used.

.94 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995, with earlier application encouraged.

FASB Statement on Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.95 In June 1996, the FASB issued Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (AC F38). This Statement (AC F38) provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities. Those standards are based on consistent application of a financial-components approach that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished. This Statement (AC F38) provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.96 A transfer of financial assets in which the transferor surrenders control over those assets is accounted for as a sale to the extent that consideration other than beneficial interest in the transferred assets is received in exchange. The transferor has surrendered control over transferred assets if and only if all of the following conditions are met:

1. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

2. Either (*a*) each transferee obtains the right—free of conditions that constrain it from taking advantage of that right—to pledge or exchange the transferred assets or (*b*) the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right—free of conditions that constrain them from taking advantage of that right—to pledge or exchange those interests.

3. The transferor does not maintain effective control over the transferred assets through (*a*) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (*b*) an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.

.97 FASB Statement No. 125 (AC F38) requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interest in transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.98 FASB Statement No. 125 (AC F38) requires that servicing assets and liabilities be subsequently measured by (1) amortization in proportion to and over the period of estimated net servicing income or loss and (2) assessment for asset impairment or increased obligation based on their fair values.

.99 FASB Statement No. 125 (AC F38) requires that debtors reclassify financial assets pledged as collateral and that secured parties recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.

.100 FASB Statement No. 125 (AC F38) requires that a liability be derecognized if and only if either (1) the debtor pays the creditor and is relieved of its obligation for the liability or (2) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.

.101 FASB Statement No. 125 (AC F38) provides implementation guidance for assessing isolation of transferred assets and for accounting for transfers of partial interest, servicing of financial assets, securitizations, transfers of sales-type and direct financial lease receivables, securities lending transactions, repurchase agreements including "dollar rolls," "wash sales," loan syndications and participations, risk participations in banker's acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishment of liabilities.

.102 FASB Statement No. 125 (AC F38) supersedes FASB Statements No. 76, *Extinguishment of Debt*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. This Statement (AC F38) amends FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement (AC F38) amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights*. This Statement (AC F38) also supersedes FASB Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)*, and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*.

.103 FASB Statement No. 125 (AC F38) is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Stock-Based Compensation

.104 In October 1995, the FASB issued Statement No. 123, *Accounting for Stock-Based Compensation* (AC C36), which establishes financial accounting for stock-based employee compensation plans. The Statement (AC C36) encourages companies to account for stock compensation awards using a fair value method. Fair value is determined based on the stock price at the date the awards are granted. The resulting compensation cost would be recognized as an expense in the income statement over the service period. FASB Statement No. 123 (AC C36) also applies to equity instruments issued for goods or services provided by persons other than employees. The accounting requirements of this Statement (AC C36) are effective for transactions entered into in fiscal years that begin after December 15, 1995, though they may be adopted on issuance.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

FASB Statement on Derivatives

.105 FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), issued in October 1994, was effective for financial statements issued for fiscal years ending after December 15, 1994. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995.

.106 FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), to require disaggregation of information about financial instruments with off-balance-sheet risk of accounting loss by class, business activity, risk, or other category that is consistent with the entity's management of those instruments. The Statement (AC F25) also amends FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), to require that fair value information be presented without combining, aggregating, or netting the fair value of derivative financial instruments with the fair value of nonderivative financial instruments and that it be presented together with the related carrying amounts in the body of the financial statements, a single footnote, or a summary table in a form that makes it clear whether the amounts represent assets or liabilities.

.107 Auditors should consider whether the provisions of FASB Statement No. 119 (AC F25) apply to their clients, and if so, evaluate whether the client's financial statement disclosures are adequate and appropriate in view of the requirements set forth therein. Also, as discussed in the "Audit Issues and Developments" section of this Audit Risk Alert, auditors should be aware that the SEC anticipates that a final staff accounting bulletin will be issued by December 31, 1996 on the topic of comprehensive disclosure requirements for derivatives and other financial instruments.

FASB Statement on Disclosures About Fair Value of Financial Instruments

.108 FASB Statement No. 107 (AC F25) was effective for financial statements issued for fiscal years ending after December 15, 1992. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995. For those real estate entities with less than $150 million in total assets as of December 15, 1992, financial statements for years ended during 1996 will be subject to the provisions of FASB Statement No. 107 (AC F25). In such circumstances, auditors should consider whether management has made all disclosures required by FASB Statement No. 107 (AC F25).

.109 FASB Statement No. 107 (AC F25) requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement (AC F25) requires disclosure of descriptive information pertinent to estimating the value of a financial instrument. Certain financial instruments (for example, lease contracts, deferred-compensation arrangements, and insurance contracts) are excluded from the scope of the Statement (AC F25).

.110 Auditors should be aware that in September 1996, the FASB issued an exposure draft of a proposed Statement of Financial Accounting Standards, *Elimination of Certain Disclosures about Financial Instruments by Small Nonpublic Entities—an Amendment of FASB Statement No. 107*. This proposed Statement would make the disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 (AC F25) optional for entities that meet all of the following criteria:

1. The entity is a nonpublic entity.
2. The entity's total assets are less than $10 million on the date of the financial statements.

3. The entity has not held or issued any derivative financial instruments as defined in FASB Statement No. 119 (AC F25) during the reporting period.

.111 The proposed Statement would be effective upon issuance. The FASB expects to issue a final Statement in the fourth quarter of 1996.

Emerging Issues Task Force Issues

.112 The EITF frequently discusses accounting issues involving financial instruments, real estate, or transactions of similar importance to real estate enterprises. A description of issues discussed since the release of *Audit Risk Alert—Real Estate Industry Developments 1995/96* follows; readers should consult detailed minutes for additional information.

.113 In EITF Issue No. 95-6, *Accounting by a Real Estate Investment Trust for an Investment in a Service Corporation*, the EITF reached a consensus that, regardless of the method of accounting used by a REIT for its investment in a service corporation, the service corporation should not be considered an independent third party and the costs capitalized by the REIT for leasing services provided by the service corporation should be no greater than the amount of costs that would have been capitalized under FASB Statement No. 13 (AC L10), as amended by FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Leases and Initial Direct Costs of Leases* (AC L20), had the REIT incurred the costs directly.

.114 The EITF also reached a consensus that the existence of certain factors (listed in the EITF Abstract) indicate the REIT has the ability to exercise at least significant influence over the service corporation and that, accordingly, the REIT should not account for its investment in the service corporation using the cost method.

.115 In EITF Issue No. 95-7, the EITF reached a consensus that although a minority interest balance may be negative, the minority interest charge in the REIT's consolidated income statement should be the greater of (1) the minority interest holder's share of the operating partnership's earnings for the year (if any) or (2) the amount of distributions to the minority interest holder during the year. Any amount by which (1) exceeds (2) for the year should be credited directly to the REIT's equity (with a corresponding debit to minority interest) until the minority interest deficit that existed at the formation of the REIT is eliminated. If the minority interest deficit increases after the formation (for example, due to operating partnership distributions in excess of earnings) and then is reduced (but still is greater than the deficit at formation), the reduction should first be credited to the majority interest to the extent of minority interest losses and distributions previously absorbed through earnings by the majority interest.

.116 The EITF also reached a consensus that the REIT should account for any subsequent acquisitions of the sponsor's minority interest in the operating partnership for cash in a manner that is consistent with the accounting for the formation of the REIT. This second consensus is applicable only to REITs with operating structures described in the Issue and Issue No. 94-2.

AICPA Statement of Position 94-6 on Disclosure of Certain Significant Risks and Uncertainties

.117 In December 1994, the AICPA issued SOP 94-6. The SOP is effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which the SOP is first applied. The SOP requires reporting entities to include in their financial statements disclosures about the nature of their operations and the use of estimates in the preparation of the financial statements. If specified disclosure criteria are met, the SOP requires entities to also include in their financial statements disclosures about certain significant estimates and current vulnerabilities due to certain concentrations.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.118 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Examples of estimates that may be included in the financial statements of real estate enterprises are:

- Impairment of long-lived assets
- Estimates of environmental remediation liabilities
- Profit recognition on sales recognized on the installment method

.119 Examples of concentrations that may be subject to disclosure in the financial statements of real estate enterprises may include the following:

- Ownership of numerous properties within one geographical area
- Financial results reliant on a single lessee
- Funding commitments from one financial institution related to project development

.120 Auditors should be alert to the requirements of this new SOP and its impact upon the financial statement disclosures of the entity being audited. Auditors should consider carefully whether all significant estimates and concentrations have been identified and considered for disclosure.

AICPA Statement of Position 96-1 on Environmental Remediation Liabilities

.121 In October, 1996, the AICPA issued SOP 96-1. This SOP provides—

- That environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5 (AC C59) are met, and it includes benchmarks to aid in the determination of when environmental remediation liabilities should be recognized in accordance with FASB Statement No. 5 (AC C59).
- That an accrual for environmental liabilities should include—
  - — Incremental direct costs of the remediation effort, as defined.
  - — Costs of compensation and benefits for those employees who are expected to devote a significant amount of time directly to the remediation effort, to the extent of the time expected to be spent directly on the remediation effort.
- That the measurement of the liability should include—
  - — The entity's allocable share of the liability for a specific site.
  - — The entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- That the measurement of the liability should be based on enacted laws and existing regulations and policies, and on the remediation technology that is expected to be approved to complete the remediation effort.
- That the measurement of the liability should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed and that the measurement may be discounted to reflect the time value of money if the aggregate amount of the liability or the component of the liability and the amount and timing of cash payments for the liability or component are fixed or reliably determinable.
- Guidance on the display of environmental remediation liabilities in financial statements and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations.

.122 The provisions of SOP 96-1 are effective for fiscal years beginning after December 15, 1996. Earlier application is encouraged. The effect of initially applying the SOP should be reported as a change in accounting estimate. Restatement of previously issued financial statements is not permitted.

Accounting Standards Executive Committee Conforming Changes

.123 In March 1996, the Accounting Standards Executive Committee (AcSEC) of the AICPA updated its technical guidance to conform certain SOPs and Practice Bulletins with pronouncements issued recently by the FASB. AcSEC made conforming changes to the following SOPs and Practice Bulletins:

- SOP 75-2 and SOP 78-2, both entitled *Accounting Practices of Real Estate Investment Trusts*
- SOP 78-9, *Accounting for Investments in Real Estate Ventures*
- SOP 90-11, *Disclosure of Certain Information by Financial Institutions About Debt Securities Held as Assets*
- SOP 93-6, *Employers' Accounting for Employee Stock Ownership Plans*
- Practice Bulletin 1, *Purpose and Scope of AcSEC Practice Bulletins and Procedures for Their Issuance*, exhibit F, Accounting and Disclosure for Reinsurance Transactions
- Practice Bulletin 9, *Disclosures of Fronting Arrangements by Fronting Companies*

Auditors should be aware of these changes.

Information Sources

.124 Further information matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.125 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.126 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols. In 1996 many organizations have established Web Sites on the World Wide Web.

.127 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.128 All telephone numbers listed are voice lines, unless otherwise designated by fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed for data lines.

AAM Section 8220

Public Utilities Industry Developments—1995/96

Industry and Economic Developments

.01 The public utilities industry is an industry in a state of transition. The dynamic environment in which the industry operates holds many challenges and opportunities. The challenges relate to issues such as competition, cost containment, and deregulation. The opportunities relate to diversification and increased operational efficiencies and productivity. The electric, gas, and telecommunications industry is dealing with unprecedented competitive pressures while the water industry is coping with environmental laws, such as the Safe Drinking Water Act and the Clean Air Act, and regulations issued by the Environmental Protection Agency (EPA) and various state regulators.

Electric Utilities

.02 In 1992, Congress passed the National Energy Policy Act, which provides for opening the wholesale power market to full competition. Since then, the Federal Energy Regulatory Commission (FERC) has strived to develop a framework that would ensure equal access to transmission and distribution systems while assuring fair pricing across all customer classes. In order to survive and succeed in the new competitive environment, many electric utilities are implementing strategic plans to cut costs and lower prices. Many of these strategic plans involve business combinations: merging, acquiring, partnering, and joint venturing with other utilities. Such combinations allow utilities to achieve economies of scale and increase overall productivity and efficiency. In addition, many electric utilities are restructuring and realigning existing operations in an effort to contain costs and enhance organizational efficiencies.

Gas Utilities

.03 FERC Order 636 changed the structure of the gas industry to allow open access transportation, enabling end users to purchase gas on the spot market directly from producers. Order 636 requires gas pipelines to unbundle their services from the traditional provision of gas services. Such unbundling has allowed industrial users to bypass local distribution companies and purchase gas directly from producers and pipelines. As a result, gas customers—especially electric generators and other large industrial users—now have the ability to make gas supply choices that are market-driven rather than mandated by regulation. As gas utilities enter their second full year of operations under Order 636, they are adapting to the competitive environment in a number of ways:

- Investing in natural gas storage facilities. Storage allows local distribution companies to purchase natural gas at off-peak prices and pass the savings on to customers.
- Using natural gas marketing initiatives. Marketing initiatives assist gas utilities in their efforts to combine supply, transportation, and storage capabilities into efficient, cost-effective service packages.
- Expanding to different market segments and geographic regions. Market and geographic expansion allows gas utilities to diversify and gain new competitive advantages.

A relaxed regulatory environment, designed to let market forces work, has thus given gas companies an unprecedented level of operational flexibility.

Telecommunications

.04 The advent of competition, the rapid introduction of advanced technology, and the divestiture of local companies by AT&T continue to increase both local telephone rates and the business risks faced by telephone utilities. The breakdown of regulatory barriers at both the state and federal levels has allowed competitors to enter telecommunication services markets with increasing frequency. At the same time, it has allowed telecommunication providers to enter new markets in areas of increased competition, such as cable services.

Water Utilities

.05 Recent environmental laws enacted by Congress and the related regulations administered by the EPA and various state regulators have set stringent standards for water utilities and their operations. For example, the EPA raises national standards for water purity at least once every three years in accordance with the Safe Drinking Water Act and the Clean Air Act. In order to meet the increased standards, water utilities are often faced with increased costs related to (1) substantial capital investments, (2) highly paid technical personnel, and (3) expensive water treatment chemicals. When planning the audit of water utilities, auditors should consider such cost increases and should consider whether they are recoverable from water customers.

The Impact of Competition on Accounting Decisions

.06 The monopoly status granted to utilities in the past brought with it governmental regulation of rates charged for the services the utilities provided. This regulation is performed through various rate-making processes, which determine selling prices and specify overall levels of revenue, the types and amounts of rates that may be charged, and the various classes of users to which the different rates apply. Rate-making also influences the application of generally accepted accounting principles (GAAP) by public utilities.

.07 AICPA Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), requires that, in planning the audit, auditors should consider "matters relating to the entity's business and the industry in which it operates." Increased competition and other economic factors affecting the public utilities industry raise a number of issues that may increase audit risk and should be carefully considered by auditors as they plan their audits. For example, as a result of increased competition, some utilities may find that the actual useful lives of certain assets are shorter than originally anticipated or that costs deferred in accordance with Financial Accounting Standards Board (FASB) Statement No. 71, *Accounting for the Effects of Certain Types of Regulation* (AC Re6), may not be recoverable. These and other issues are addressed further in the "Audit Issues and Developments" section of this Audit Risk Alert.

Regulatory and Legislative Development

Rural Utilities Service Approval of AICPA Peer Review Program

.08 In July 1995, the Rural Utilities Service (RUS)—formerly the Rural Electrification Administration—approved the AICPA peer review program as meeting its quality review requirements under Section 1773.5(c)(3)(iii) of the Code of Federal Regulations (CFR). If a CPA firm previously had a review under the AICPA quality review program, it will be deemed to be in compliance with the RUS peer review requirements.

Audit Issues and Developments

The Interrelationship of Rate Making and Accounting

.09 As part of the rate-making process of governmental regulation, rate orders often require rate-regulated entities to observe accounting practices for rate-making purposes that are at variance with GAAP for nonregulated entities. For example, although GAAP requires the immediate recognition of research and development expenses, regulators of public utilities may require the utilities subject to their jurisdiction to defer research and development

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

costs for rate-making purposes and amortize them over the future periods in which compensating revenues will be generated through the rate-making process.

.10 FASB Statement No. 71 (AC Re6) requires utilities to capitalize costs if regulation provides reasonable assurance that incurred costs will be recovered in the future through the rate-making process. For example, a regulator may permit unanticipated repair costs incurred in one fiscal period to be recovered in a future period through higher customer rates. For accounting purposes, the unanticipated repair costs should be deferred until the rates are effective and should be amortized as the revenues are collected. Similarly, if current rates are provided for costs that are expected to be incurred in the future, such as the costs of potential storm damage repairs, FASB Statement No. 71 (AC Re6) requires that those current additional receipts be recognized as liabilities.

.11 As they plan their audits of the financial statements of public utilities, auditors should consider inherent risk, especially risk factors relating to the regulatory structure of the industry. The recovery of regulatory assets, such as deferred energy costs, abandoned plant assets, and phase-in assets, may depend highly on the rate-making process. Assessment of audit risk should include an assessment of the risk that those costs will not be recovered. Auditors should also plan to determine whether such costs have been accounted for properly.

Continued Applicability of FASB Statement No. 71

.12 The environment in which utilities operate is rapidly changing due to changes in the marketplace, technology, and a political climate that favors deregulation. Changes in state and federal regulation of utilities have resulted in increased use of incentive-type rate regulation, regulator-imposed conservation measures (for example, demand side management), significant regulatory disallowances and deferred rate recovery of material costs, and increased competition. In certain industries, changes in technology have created new competitors and caused the rapid obsolescence of plant and equipment. Given the movement toward deregulation and increased competitiveness of the utility operating environment, a utility's auditors must assess whether any one factor or the combined effect of these factors would lead to the conclusion that the criteria for the application of FASB Statement No. 71 (AC Re6) are no longer met by the utility. The basic criteria for the application of FASB Statement No. 71 (AC Re6), as discussed in paragraph 5(a) (AC Re6.115) of that Statement are:

1. The enterprise's rates for regulated services or products provided to its customers are established by or are subject to approval by an independent third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.
2. The regulated rates are designed to recover the specific enterprise's costs of providing the regulated services or products.
3. In view of the demand for the regulated services or products, and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

.13 FASB Statement No. 101, *Regulated Enterprises—Accounting for the Discontinuation of Application of FASB Statement No. 71* (AC Re6), provides several examples of reasons that may cause an enterprise, or "a separable portion" thereof, to no longer meet the criteria for applying FASB Statement No. 71 (AC Re6). Reasons cited include deregulation, a change from cost-based rate making to another form of regulation, increasing competition that limits the ability to recover costs, and regulatory actions that limit rate relief to a level insufficient to recover costs. These factors should be considered in determining when an enterprise ceases to meet the criteria for application of FASB Statement No. 71 (AC Re6).

.14 In the face of retail wheeling and other competitive forces, electric utility companies have been offering wholesale customers and large industrial customers large discounts to retain their business. FASB Statement No. 101 (AC Re6) states that a "separable portion" of the business may be the operations within a regulatory

jurisdiction or a smaller portion, such as a customer class within a jurisdiction. Auditors of utilities that are discounting rates to certain classes of customers should consider the effect of such discounting on the appropriateness of the continued application of FASB Statement No. 71 (AC Re6) for those classes of customers, even when the remainder of the utility's operations continue to meet the Statement No. 71 (AC Re6) criteria. If discontinuance of Statement No. 71 (AC Re6) is appropriate for a class of customers, applying Statement No. 101 (AC Re6) may require allocation of systemwide assets and liabilities.

.15 Because regulated enterprises may be experiencing one or more of the circumstances cited, it is important that such enterprises assess annually, and auditors consider carefully, the propriety of the continuing applicability of FASB Statement No. 71 (AC Re6). As utilities adopt alternative regulatory plans, auditors should consider the cause-and-effect relationship between a company's own costs and revenues in reaching a determination about the appropriateness of continued application of FASB Statement No. 71 (AC Re6). Auditors can look to such factors as—

- The basis used for setting the company's initial rates under alternative regulation and whether the regulatory intent is that such rates be cost-based.
- The frequency of price adjustments and whether the regulatory intent of adjustments is to maintain rates that are cost-based.
- The company specificity of price-adjustment formulas.
- The degree of adjustment to the company's actual costs through sharing provisions.
- How closely changes in the company's actual costs track the changes in revenues produced by applying price-adjustment formulas.

Auditors should consider whether their clients cease to meet the criteria for applying the provisions of FASB Statement No. 71 (AC Re6) and should consequently apply the provisions of FASB Statement No. 101 (AC Re6). FASB Statement No. 101 (AC Re6) states that once all or a separable portion of an enterprise's operations no longer meet the criteria for application of FASB Statement No. 71 (AC Re6), the enterprise should discontinue its application by eliminating from its balance sheet the effects of any actions of regulators that had been recognized as assets and liabilities pursuant to FASB Statement No. 71 (AC Re6) but that would not have been recognized as assets and liabilities by enterprises in general. However, the carrying amounts of plant, equipment, and inventory measured and reported pursuant to FASB Statement No. 71 (AC Re6) should not be adjusted unless those assets are impaired, in which case the carrying amounts of those assets should be reduced to reflect that impairment. (Impairment should be judged in the same manner as assets of enterprises in general—see "Impairment of Long-Lived Assets" in the "Accounting Issues and Developments" section of this Audit Risk Alert.) The net effect of the adjustments required by FASB Statement No. 101 (AC Re6) should be included in income of the period of the change and classified as an extraordinary item.

Regulatory Assets

.16 Regulatory assets are created when the rate actions of regulators provide reasonable assurance of the existence of an asset. The criteria for the establishment of such assets are contained in paragraph 9 of FASB Statement No. 71 (AC Re6.119).

.17 Because regulatory assets are recorded only if it is "probable" (as defined in FASB Statement No. 5, *Accounting for Contingencies* [AC C59]) that future revenue will recover those costs, a critical assessment of the sufficiency of the audit evidence available to support them is a matter that requires judgment. A currently effective rate order generally provides assurance of the existence of a regulatory asset. Generic orders of regulators may also provide evidence of the existence of a regulatory asset. Sometimes, however, because of the nature and length of the regulatory process, a rate or a generic order may not yet be available. In such cases, auditors may need to look to related jurisdictional precedent, accounting orders, or other evidence involving other utilities in order to test an

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

assertion that recovery of regulatory assets is probable. In the absence of a rate or a generic order, discussion of the situation with the regulatory staff having jurisdiction may be advisable. Recognition of regulatory assets, in the absence of the audit evidence described above, should be approached with a high degree of professional skepticism. Factors such as a good working relationship with regulators or the recent favorable resolution of issues unrelated to the incurred costs being evaluated are not generally an adequate basis for the recognition of regulatory assets.

.18 In addition to the provisions set forth in FASB Statement No. 71 (AC Re6), specific criteria for the recognition and measurement of regulatory assets and related matters are included in the following pronouncements:

- FASB Statement No. 90, *Regulated Enterprises—Accounting for Abandonments and Disallowances of Plant Costs* (AC Re6)
- FASB Statement No. 92, *Regulated Enterprises—Accounting for Phase-in Plans* (AC Re6)
- FASB Statement No. 101, *Regulated Enterprises—Accounting for the Discontinuation of Application of FASB Statement No. 71* (AC Re6)
- FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08)
- FASB Emerging Issues Task Force (EITF) Issue No. 92-7, *Accounting by Rate-Regulated Utilities for the Effects of Certain Alternative Revenue Programs*
- EITF Issue No. 92-12, *Accounting for OPEB Costs by Rate-Regulated Enterprises*
- EITF Issue No. 93-4, *Accounting for Regulatory Assets*

Auditors should refer to these pronouncements, when applicable, in evaluating the propriety of a client's accounting for regulatory assets.

.19 Auditors should consider whether the amount and recovery period of regulatory assets, as well as the amount of regulatory assets not earning a return, are adequately disclosed in the financial statements. The staff of the Securities and Exchange Commission (SEC) has indicated its preference that, for publicly held enterprises, disclosures include the amount and nature of regulatory assets and liabilities as well as the manner in which the financial statements would differ if the enterprise were not regulated, including differences in methods of depreciation. The SEC staff has also indicated that, when a regulated enterprise has a rate case or cases subject to appeal through the regulatory or judicial system, the enterprise should disclose the status of each issue on appeal and indicate how the item is recorded in the financial statements.

.20 Certain regulatory assets (for example, costs deferred under a phase-in plan and those that relate to postretirement benefits other than pensions) have prescribed maximum recovery periods and methods. Other regulatory assets (for example, those arising from flow-through income tax accounting) may have a recovery period related to their underlying nature. Recovery periods related to other regulatory assets are left to the judgment of the utility and its regulator. Auditors should be aware that in the changing regulatory environment the recovery of regulatory assets over a long period of time may call into question whether such assets are probable of recovery.

.21 Deferral of an incurred cost is permitted only if it is probable of recovery. If uncertainties develop after a regulatory asset has been recorded, management should reconsider whether the asset will be recovered through rates. If not, the asset should be written off. If the asset is not impaired but uncertainties exist, auditors should consider the adequacy of disclosures in the financial statements regarding the uncertainty and the need to add an

explanatory paragraph in the auditor's report. See also the sections of this Audit Risk Alert entitled "Impairment of Long-Lived Assets", "Risks and Uncertainties", and "Elimination of Uncertainty Reporting."

.22 The addition of an explanatory paragraph to the auditor's report because of an uncertainty concerning the recoverability of a regulatory asset is not a substitute for recognition of a loss when such recognition is appropriate. Accordingly, it should first be determined whether a loss should be recognized in those situations because the asset is impaired. If it is determined that a loss is not recognized when it should be and the effect on the financial statements is material, the auditor's report should be modified for a departure from GAAP. See also the "Risks and Uncertainties" section in this Audit Risk Alert.

Stranded Costs

.23 A recent study, *Stranded Costs Will Threaten Credit Quality of U.S. Electrics*, estimates that a substantial amount of fixed costs approved for recovery in prior regulatory climates may become "stranded," that is, not recoverable by the utility, in the future as the industry moves toward a more free market environment.[1] As regulators move away from cost-based regulation, the issue arises of whether utility customers or utility shareholders and bondholders will ultimately bear the sunk costs associated with previously constructed plants, long-term power purchase contracts, or fuel cost structures that are not economically viable at competitive, market-based rates. An auditor should be aware of and consider the impact of competition on the utility's ability to recover its costs. One factor that the auditor might consider in assessing a company's exposure to stranded costs and the possible impact of such costs on the company's financial statements is the cost structure of the utility in comparison to its competitors and in conjunction with rate-setting developments within its operating jurisdiction. The existence of such costs may suggest that an asset is impaired or that the discontinuation of regulatory accounting under FASB Statement No. 71 (AC Re6) is appropriate, or both.

Depreciation

.24 The estimated useful lives and the estimated removal or retirement costs of plants and other facilities may change significantly over time because of various factors, including changes in planned use due to competitive or environmental factors, governmental requirements, and physical plant changes that shorten or extend the life of the facility. The determination of estimated useful lives and removal or retirement costs involves accounting estimates. SAS No. 57, *Auditing Accounting Estimates* (AU section 342), provides guidance to auditors on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates. In situations involving complex or highly specialized plants or facilities, auditors may need to engage a specialist to achieve the required degree of assurance regarding estimated useful lives. In these instances, auditors should consider the requirements of SAS No. 73, *Using the Work of a Specialist* (AU section 336). Auditors should also consider whether estimates of useful lives of plants and other facilities are the types of significant estimates that would require disclosure under AICPA Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties.*

.25 Regulatory agencies often require specific approval of depreciation rates used by the utilities they regulate and any changes therein. Generally, any differences between the amounts of depreciation expense that would be recognized in accordance with GAAP and those that are allowed in the rate-making process give rise to regulatory assets or liabilities. (An exception to the general rule is prescribed by FASB Statement No. 92 (AC Re6), which prohibits the recognition of a regulatory asset for such differences if they relate to recently completed plant.) Auditors should be familiar with the applicable regulatory requirements for approval of depreciation rates and should read regulatory orders in assessing the propriety of depreciation recorded in the financial statements as well as the propriety of regulatory assets recorded in accordance with FASB Statement No. 71 (AC Re6).

Nuclear Decommissioning

.26 Nuclear decommissioning refers to decontaminating a nuclear power plant at the end of its useful life. In 1994, the FASB added to its agenda a project on accounting for obligations for decommissioning of nuclear power plants. Traditionally, the estimated decommissioning obligation for nuclear power plants has been treated as negative salvage value and recognized over the life of the plant as depreciation rather than reflected as a liability. The objective of the FASB's project is to determine if and when a liability for nuclear decommissioning should be recognized, how any such liability should be measured, and whether a corresponding asset is created. At the end of 1995, the FASB expects to release a proposed Statement of Financial Accounting Standards entitled *Liabilities for Closure and Removal of Long-Lived Assets* that will address this issue.

.27 SEC Staff Accounting Bulletin (SAB) Topic 10B, *Estimated Future Costs Related to Spent Nuclear Fuel and Nuclear Electric Generating Plants,* provides guidance that should be followed by publicly held utilities on disclosures that should be made concerning the estimated future costs of storing spent nuclear fuel and decommissioning nuclear generating plants. Auditors of financial statements of utilities that own nuclear power plants should evaluate carefully the adequacy of financial statement disclosures related to decommissioning costs. In particular, they should consider whether a reliable decommissioning study has been conducted and whether estimated costs include all applicable items. Auditors should also consider the reasonableness of estimates of the useful lives of such plants. The useful lives of some plants may be substantially shorter than originally anticipated. (See the previous discussion of issues related to depreciation.) If decommissioning costs are underestimated and useful lives of plants overstated, provisions made over the lives of the plants and recovered in rates may be inadequate to cover the costs that will need to be incurred in the decommissioning process.

.28 Because the determination of decommissioning or removal costs involves accounting estimates, auditors may find useful guidance in SAS Nos. 57 (AU section 342) and 73 (AU section 336).

.29 On June 30, 1995, the FERC issued a final rule entitled *Nuclear Plant Decommissioning Trust Fund Guidelines* that sets forth the guidelines for the formation, organization, and purpose of nuclear plant decommissioning trust funds (Funds) and for Fund investments. The rules are intended to (1) give Funds greater investment flexibility, (2) improve the returns earned on Funds contributed through wholesale electric rates, and (3) decrease the amounts collected from rate payers for decommissioning. The final rule became effective July 31, 1995.

Environmental Matters

.30 Because of the nature of their operations, utilities are often faced with obligations driven by environmental requirements. Such obligations frequently include the disposition of materials containing polychlorinated biphenyl (PCB), the disposition of high- and low-level radioactive waste, the reduction of sulfur dioxide emissions, remediation of residuals associated with manufactured gas plant sites, and asbestos removal. Such environmental issues have the potential to result in significant costs.

.31 Auditors of utilities that face such environmental issues should evaluate whether the accounting and disclosure requirements of FASB Statement No. 5 (AC C59) have been met, as well as the implications of rate regulation and FASB Statement No. 71 (AC Re6). Additional guidance is included in the following:

- FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (AC C59)
- FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10)
- EITF Issue No. 89-13, *Accounting for the Cost of Asbestos Removal*
- EITF Issue No. 90-8, *Capitalization of Costs to Treat Environmental Contamination*
- EITF Issue No. 93-5, *Accounting for Environmental Liabilities*

.32 Auditors of publicly held utilities should also consider the requirements of SAB No. 92, *Accounting and Disclosures Relating to Loss Contingencies*, which provides the SEC staff's interpretation of current accounting literature related to matters such as—

- The inappropriateness of offsetting probable recoveries against probable contingent liabilities
- Recognition of liabilities for costs apportioned to other potential responsible parties
- Uncertainties in the estimation of the extent of environmental liabilities
- The appropriate discount rate for environmental liabilities if discounting is appropriate
- Financial statement disclosures of environmental exit costs and other items and disclosure of certain information outside the basic financial statements

SAB No. 92 includes a separate section (Topic 10F, *Presentation of Liabilities for Environmental Costs*) that discusses the impact of environmental liabilities on the utilities industry. The SAB indicates that utilities subject to the SEC's rule (1) should not offset regulatory assets against liabilities for environmental costs and (2) should not delay recognition of probable and reasonably estimable liabilities for environmental costs until regulators have determined whether the costs are recoverable in the rate-making process.

.33 SAB No. 92 also states that when estimating liabilities for environmental remediation, a company should consider available evidence, including the company's prior experience in remediation of contaminated sites, other companies' clean-up experience, and data released by the EPA or other organizations. The continued expansion of environmental databases has resulted in the availability of significantly more information to support a reasonable estimate of the amount of loss or range of loss. As has been noted in recent press reports, companies have been using such expanded informational resources in developing or refining their estimates of environmental liabilities. When evaluating a utility's environmental remediation liabilities, auditors may consider the evidence currently provided by the expanded environmental databases. (See also the "Accounting Issues and Developments" section of this Audit Risk Alert for information on environmental remediation liabilities.)

Derivatives

.34 Recent years have seen a growing use of innovative financial instruments, commonly referred to as derivatives, that often are very complex and can involve a substantial risk of loss. Public utilities are increasingly entering into forward contracts, futures contracts, and options in order to hedge against losses related to the effect of changing prices and other uncertainties. As interest rates, commodity prices, and numerous other market rates and indices from which derivative financial instruments obtain their value have increased in volatility, a number of entities have incurred significant losses as a result of their use. The use of derivatives almost always increases audit risk. Although the financial statement assertions about derivatives are generally similar to assertions about other transactions, the auditors' approach to achieving related audit objectives may differ because certain derivatives are not generally recognized in the financial statements.

.35 It is essential that auditors understand both the economics of derivatives used by the entities whose financial statements they audit and the nature and business purpose of the entities' derivatives activities. In addition, auditors should carefully evaluate their clients' accounting for any such instruments, especially those carried at other than market value. To the extent the derivatives qualify as financial instruments as defined in FASB Statements No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), and No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), the disclosure requirements set forth in those Statements (AC F25) must be met. When derivatives are accounted for as hedges of on-balance-sheet assets or liabilities or of anticipated transactions, auditors should carefully review the appropriateness of the use of hedge accounting, particularly considering whether the criteria set forth in applicable accounting literature are met.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

.36 The SEC staff has indicated in public speeches and letters of comment to registrants during the past year that publicly held companies should disclose the nature and purpose of certain commodity-based derivatives activities, the nature and terms of certain commodity-based derivatives used, and the accounting methods used even when such derivatives do not meet the definition of financial instruments set forth in the FASB Statements (AC F25) cited above.

.37 Many of the unique audit risk considerations presented by the use of derivatives are discussed in detail in *Audit Risk Alert—1995/96* [AAM section 8010]. Also, see "Disclosures About Derivatives" in the "Accounting Issues and Developments" section of this Audit Risk Alert. The AICPA publication *Derivatives—Current Accounting and Auditing Literature* (Product No. 014888) summarizes current authoritative accounting and auditing guidance and provides background information on basic derivatives contracts, risks, and other general considerations.

Order 636 Transition Costs

.38 FERC Order 636 requires gas pipelines to "unbundle" their services from the traditional provision of gas services. Order 636 was issued in 1992 and was subsequently revised on rehearing by Order 636-A and Order 636-B (collectively referred to herein as Order 636). Order 636 precipitated the complete transition to an open-access and competitive natural gas pipeline industry. Accordingly, pipeline companies subject to FERC jurisdiction are required by Order 636 to unbundle firm and interruptible transportation services, including gas storage services, from gas sales. In light of the increased competition in this segment of the natural gas industry as a result of Order 636, auditors should consider carefully the appropriateness of continued application of FASB Statement No. 71 (AC Re6) by pipeline companies subject to FERC jurisdiction.

Purchased-Power Contracts

.39 The increasing numbers of independent power producers and nonutility generators and the growing significance of purchased-power contracts as a source of system capacity have focused attention on the accounting and disclosure of purchased-power contracts.

.40 Paragraph 7 of FASB Statement No. 47, *Disclosure of Long-Term Obligations* (AC C32.102), specifies the disclosure requirements of long-term unconditional purchase obligations that have the characteristics specified in paragraph 6 of FASB Statement No. 47 (AC C32.101). The disclosure requirements include (1) the nature and term of the obligation(s), (2) the amount of the fixed and determinable portion of the obligation(s) as of the date of the latest balance sheet presented in the aggregate and, if determinable, for each of the five succeeding fiscal years, (3) the nature of any variable components of the obligation(s), and (4) the amounts purchased under the obligation(s) for each period for which an income statement is presented. FASB Statement No. 47 (AC C32) allows disclosures of similar or related unconditional purchase obligations to be combined. FASB Statement No. 105 (AC F25) contains similar disclosure requirements for unconditional purchase obligations not subject to FASB Statement No. 47 (AC C32).

.41 In addition to the disclosure requirements in FASB Statements No. 47 (AC C32) and No. 105 (AC F25), SAB Topic 10D, *Long-Term Contracts for Purchase of Electric Power*, also provides guidance concerning disclosures required for certain purchased-power contracts of publicly held entities. The disclosures suggested by the SAB include the terms and significance of such contracts to the utility, including date of contract expiration, share of plant output being purchased, estimated annual cost, annual minimum debt-service payment required, and amount of related long-term debt or lease obligations outstanding.

.42 The SAB suggests additional disclosure if the contract provides, or is expected to provide, more than 5 percent of current or estimated future system capability. According to the *Glossary of Electric Utility Terms* published by the Edison Electric Institute, capability of a plant is defined as "the maximum load which a unit can carry under specified conditions over a given period of time without exceeding approved limits of temperature and

stress." If the 5 percent test is met, the SAB gives two alternatives for disclosure. The first is separate financial statements of the vendor entity. The second is disclosure of the amount of the obligation under contract as a liability on the balance sheet, with a corresponding amount as an asset representing the right to purchase power under the contract.

.43 The accounting for and disclosure of purchased-power contracts are also receiving increased attention. These contracts may have varying terms, but typically they are segregated into capacity and energy components. As accounting for these contracts is being considered, auditors should be aware that some of the contracts may have characteristics similar to leases. FASB Statement No. 13, *Accounting for Leases* (AC L10), defines a lease as an "agreement conveying the right to use the property, plant, or equipment (land and/or depreciable assets) usually for a stated period of time." FASB Statement No. 13 (AC L10) further states that "a lease that transfers substantially all of the benefits and risks incident to the ownership of property should be accounted for as the acquisition of an asset and the incurrence of an obligation by the lessee and as a sale or financing by the lessor."

.44 In determining whether a long-term purchased-power contract is appropriately accounted for, auditors should consider whether the purchaser has evaluated the arrangements and assessed the risks and rewards assumed and retained by the parties to the agreement. Specific factors to consider include—

- The amount and timing of the fixed, noncancelable payments due under the contract and their relationship to the fair value of the generating plant.
- The period of the contract in relation to the economic life of the plant, including the existence of any renewal options. (Particular attention should be given to whether the utility would incur a penalty—as defined in FASB Statement No. 13 (AC L10), as amended—if it does not exercise a renewal option.)
- The source of fuel for the plant and which party bears the risk associated with its price and availability.
- The existence of any option that allows the utility to purchase the generating plant.

.45 If the terms of the contract convey the right to use property and equipment, the contract should be accounted for as a lease pursuant to FASB Statement No. 13 (AC L10).

Elimination of Uncertainty Reporting

.46 The AICPA's Auditing Standards Board (ASB) has issued an exposure draft of a proposed SAS, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements, that would eliminate the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report.

.47 The amendment would also expand the guidance in paragraph 37 of SAS No. 58, *Reports on Audited Financial Statements* (AU section 508), to indicate that "unusually important risks or uncertainties associated with contingencies, significant estimates, or concentrations" are matters that auditors may wish to emphasize in their reports. The amendment retains the option allowing auditors to disclaim an opinion on financial statements due to uncertainties.

.48 The proposal does not affect the provisions of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), which requires that the auditor add an explanatory paragraph to the auditor's report when there is substantial doubt about the entity's ability to continue as a going concern.

.49 The ASB hopes to finalize this SAS late this year and to issue an SAS that would be effective for reports issued on or after June 30, 1996. Comments on the proposed SAS were due on October 20, 1995.

Accounting Issues and Developments

Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Restructuring Charges

.50 Several public utilities have recently recorded restructuring charges, and with downsizing in the electric industry and the formation of strategic alliances in the telecommunications industry, more companies may be recording such charges in the future. In considering restructuring reserves and costs, auditors should be aware of EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring),* for authoritative guidance on the appropriate guidance for restructurings. EITF Issue No. 94-3 provides guidance on (1) the types of costs that should be accrued and (2) the timing of recognition of restructuring charges. It also prescribes disclosures that should be included in the financial statements. For publicly held entities, SAB No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges,* requires that restructuring charges be reported as a component of income from continuing operations.

Revenue Recognition on Long-Term Power Sales Contracts

.51 EITF Issue No. 91-6, *Revenue Recognition of Long-Term Power Sales Contracts,* addresses revenue recognition on long-term power sales contracts that have scheduled price changes. The consensus is applicable for contracts entered into after the date of the consensus (May 21, 1992). Several issues have arisen in applying the consensus to contracts acquired in conjunction with a purchase business combination with a nonutility power generator. The first issue is whether long-term power sales contracts acquired in a purchase business combination subsequent to the date of the consensus must be accounted for by the acquiring entity in accordance with the consensus as if they were "new" contracts. The SEC staff has communicated, in various speeches and comment letters to SEC registrants, its position that contracts that are acquired in a purchase business combination subsequent to the date of the consensus should be considered to be new contracts by the acquiring entity and accounted for in accordance with the consensus.

.52 The second issue involves contracts that in the early years include provision for fixed prices with scheduled price changes but in the later years have pricing provisions based on actual avoided costs. The consensus requires a company to recognize as revenue the lesser of (1) the amount billable under the contract or (2) an amount determined by the kilowatt hours (kwh) made available during the period multiplied by the estimated average revenue per kwh over the term of the contract. The issue is whether the consensus requires a company to determine the average revenue per kwh over the entire life of the contract, including both the years in which there are fixed payments with scheduled changes and the years based on avoided costs or whether the averaging can be applied only to the fixed portion of the contract. The SEC staff has communicated its position, in various speeches and comment letters to SEC registrants, that the estimated average revenue per kwh must be determined over the entire remaining life of the contract, since the consensus specifies "term of the contract" rather than some shorter period.

Impairment of Long-Lived Assets

.53 In March 1995, FASB issued Statement No. 121 (AC I08), which establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the entity estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be

based on the fair value of the asset. The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.

.54 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets that are covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.55 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.56 Auditors of public utilities should be aware that the current industry climate of restructurings, mergers, and realignments has increased the likelihood that events or changes in circumstances that indicate that assets have been impaired may have occurred. In these instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.57 The Statement (AC I08) also has a number of specific implications to rate-regulated enterprises:

- It amends paragraph 9 of FASB Statement No. 71 (AC Re6.119) to require that, if at any time the incurred costs no longer meet the criteria of paragraph 9 (AC Re6.119), they should be charged to earnings. Thus regulatory assets are now subject to a continuing probability-of-recovery test. This provision nullifies the consensus in EITF Issue No. 93-4, *Accounting for Regulatory Assets,* related to the impairment of a regulatory asset.

- It amends paragraph 10 of FASB Statement No. 71 (AC Re6.120) to require that if a regulator excludes all or part of a cost from allowable costs, the carrying amount of any regulatory asset should be reduced to the extent of the excluded cost.

- It provides that if a regulator allows recovery through rates of costs previously excluded from allowable costs, a new regulatory asset should be recognized. The classification of that asset should be consistent with the classification that would have resulted had those costs been initially included in allowable costs.

In considering a public utility's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57 (AC section 342). SEC registrants should consider the disclosure requirements included in SAB No. 74 (Topic 11M), *Disclosure of the Impact That Recently Issued Accounting Standards Will Have on the Financial Statements of the Registrant When Adopted in a Future Period.*

Disclosures About Derivatives

.58 Utilities are increasingly using derivatives to manage the price risk associated with fuel purchase and energy sales contracts. A variety of instruments including futures, forwards, options, and swap contracts have been used.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

.59 In October 1994, the FASB issued Statement No. 119 (AC F25) which requires disclosures about derivative financial instruments—futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statements No. 105 (AC F25) and No. 107 (AC F25).

.60 The Statement (AC F25) requires disclosures about amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. Paragraph 12 of FASB Statement No. 119 (AC F25.115P) encourages, but does not require, entities to disclose quantitative information about risks associated with derivatives.

.61 FASB Statement No. 119 (AC F25) was effective for financial statements issued for fiscal years ending after December 15, 1994, except for organizations with less than $150 million in total assets. For those organizations, the Statement (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1995.

.62 The FASB Special Report, *Illustrations of Financial Instrument Disclosures,* contains illustrations of the application of FASB Statements No. 105 (AC F25), No. 107 (AC F25), and No. 119 (AC F25).

Risks and Uncertainties

.63 In December 1994, the AICPA's Accounting Standards Executive Committee issued SOP 94-6. SOP 94-6 requires organizations to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires organizations to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.64 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Examples of similar estimates that may be present in financial statements of public utilities include, but are not limited to, the following:

- Specialized equipment subject to technological obsolescence
- Capitalized computer software costs
- Environmental remediation-related obligations and other environmental liabilities, such as those related to nuclear decommissioning
- Litigation-related obligations
- Contingent liabilities or obligations of other entities
- Amounts reported for long-term obligations, such as amounts reported for pensions and postemployment benefits
- Estimated net proceeds recoverable or the provisions for expected loss to be incurred, or both, on disposition of a business or assets
- Recoverability of certain regulatory assets

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of public utilities in accordance with paragraph 21 of the SOP include the following:

- Concentrations in the volume of business transacted with a particular class of customer, supplier, lender, grantor, or contributor
- Concentrations in revenue from particular products or services

- Concentrations in the available sources of supply of material, labor, or services or of licenses or other rights used in the entity's operations
- Concentrations in the market or geographic area in which an entity conducts its operations

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.65 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

AICPA Exposure Draft: Proposed Statement of Position on Environmental Remediation Liabilities

.66 In June 1995, the AICPA issued an exposure draft of a proposed SOP, *Environmental Remediation Liabilities*. The exposure draft provides that—

- Environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5 (AC C59) are met, and it includes benchmarks to aid in determining when those criteria are met.
- Accruals for environmental remediation liabilities should include (1) incremental direct costs of the remediation effort, as defined, and (2) costs of compensation and benefits for employees to the extent the employees are expected to devote time directly to the remediation effort.
- Measurement of the liabilities should include (1) the entity's specific share of the liability for a specific site and (2) the entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- Measurement of the liability should be based on enacted laws and existing regulations, policies, and remediation technology.
- Measurement should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed and may be discounted to reflect the time value of money if the aggregate amount of the obligation and the amount and timing of cash payments for a site are fixed or reliably determinable.

The exposure draft also includes guidance on display in the financial statements of environmental remediation liabilities and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations. A separate, nonauthoritative section of the exposure draft discusses major federal environmental pollution responsibility and cleanup laws and the need to consider various individual state and other non-U.S. government requirements. The proposed SOP also includes guidance for auditing environmental remediation liabilities, addressing audit planning, and assessing audit risk, along with the appropriate application of relevant auditing standards.

.67 Comments on the exposure draft were due by October 31, 1995.

AICPA Accounting and Auditing Literature

Technical Practice Aids

.68 *Technical Practice Aids* is an AICPA publication that includes questions received by the AICPA's Technical Information Service on various subjects and the service's responses to those questions. Section 6200 of *Technical Practice Aids* contains questions and answers specifically pertaining to regulated entities. *Technical*

AAM Section 8230
Retail Industry Developments—1996/97

Industry and Economic Developments

Industry Profile

.01 The retail industry is broadly defined as being comprised of those businesses engaged in the distribution of products and services directly to the consumer market. Retailing is one of the largest and most diversified of domestic industries, consisting of two million firms that generate more than $2 trillion in annual sales while employing over 18 million people. Individual retail establishments are generally classified by the following: (1) the type of merchandise carried, (2) the level of specialization, that is, the variety of merchandise offered, and (3) in-store versus nonstore sales format. The United States Department of Commerce classifies retailing activities into the following general categories:

- Food stores
- General merchandise
- Apparel and accessory stores
- Furniture, home furnishings, and equipment stores
- Equipment stores
- Automotive dealers
- Gasoline service stations
- Eating and drinking establishments
- Supply and mobile home dealers
- Drug and proprietary stores
- Miscellaneous retail stores
- Building materials, hardware, and garden

The ownership of a retail business can take a variety of forms including the independent or single-store retailer, chain stores, or franchises.

.02 *Independent Retailer.* By far the most common form of retail ownership is the small, owner-operated firm. Such entities comprise approximately 80 percent of all retail establishments, while accounting for more than 50 percent of all retail sales. This form of ownership is characterized by ease of entry, comparatively low initial capital outlays and few legal obstacles (such as the general absence of rigorous licensing requirements). These minimal barriers explain the prevalence of this form of ownership, as well as the industry's intense competition. A high rate of business failure is also a hallmark of the independent retail ownership form in that it tends to attract a disproportionate number of relatively unsophisticated entrepreneurs. Auditors should therefore be alert to the possibility that in these circumstances accounting records and internal control may be inadequate (this matter is discussed in greater detail in the "Audit Issues and Developments" section of this Audit Risk Alert under "Control Environment").

.03 *Chain Stores.* Chain stores are characterized by common ownership of multiple retail units and centralized management. Regional and national retail outlets typically adopt this form of organization.

.04 *Franchises.* Franchises involve a contractual relationship whereby, for an initial fee and, typically, a percentage of future gross sales, an individual entrepreneur (franchisee) is granted the right by a sponsoring organization (franchisor) to operate an established business. The rights and obligations of both parties to the arrangement are set forth in a legal document known as the franchise agreement. Auditors of entities adopting this form of ownership should become familiar with the franchise agreement so they can identify those matters that may have accounting or disclosure implications for the franchisee.

.05 For analytical purposes, retail establishments are often categorized on the basis of financial attributes such as gross margin and inventory turnover. For example, retail establishments with otherwise diverse activities such as supermarkets, pharmacies, discount stores, and building material outlets are sometimes grouped into a single category based on their tendency to generate low gross margins and high inventory turnover. Retail establishments such as jewelry stores, men's clothing stores, and furniture stores may also be viewed as a particular retail category in that they tend to generate, conversely, high gross margins and low inventory turnover. Comparing a retail client's results with overall performance in these categories can provide auditors with useful insight into the reasonableness of certain financial statement assertions. Auditors may therefore wish to consider the value of analytical tools such as a retailer's gross profit margin and inventory turnover ratio when addressing the guidance set forth under AICPA Statement on Auditing Standards (SAS) No. 56, *Analytical Procedures* (AU section 329). SAS No. 56 (AU section 329) requires the use of analytical procedures in the planning and overall review stages of all audits.

.06 Retail enterprises range in size and age from well established multinational corporations to small development-stage enterprises. See Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 7, *Accounting and Reporting by Development Stage Enterprises* (AC De4), for relevant accounting guidance. Development-stage enterprises present auditors with unique risks. In developing an audit strategy, assessing risk, and designing substantive procedures, auditors should consider characteristics of the entity such as the following:

- Dependence on a limited product line or service
- Dependence on a limited number of suppliers, customers, or financing sources
- Credit arrangements imposing restrictive financial covenants or requirements to achieve "target" operating results
- Related-party sales or purchase or leasing transactions

See further discussion under "Control Environment" in the "Audit Issues and Developments" section of this Audit Risk Alert.

.07 Although retail sales are generally consummated through store operations, electronically conducted sales transactions are becoming more prevalent as the necessary technology becomes available to both retailers and consumers. The consensus among industry observers is that the allure of so-called on-line commerce will, in the foreseeable future, become overwhelming because, on the Internet, no store ever closes, and no location is isolated from the rest of the planet. Sales transactions consummated through electronic means, such as the Internet, will present unique challenges to the auditor, particularly in the areas of internal control and evidential matter. In recognition of this developing trend the Auditing Standards Board (ASB) has issued an exposure draft amending SAS No. 31, *Evidential Matter* (AU section 326). The amendment would provide guidance to auditors relating to electronic information and the testing of related controls. See "New Pronouncements" under the "Audit Issues and Developments" section of this Audit Risk Alert for further discussion.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Economic Developments

.08 The Christmas shopping season, of crucial importance to retailers, netted dismal results for 1995, the worst holiday sales figures since 1990. As a result, annual retail sales for 1995 rose only 4.5 percent over the previous year, which is significantly lower than the 7 percent annual growth rate common during the benchmark 1980s. The poor holiday season showing led to reduced profits in early 1996 as retailers were forced to offer steep discounts to move unsold inventories. Although many larger retailers recovered from the holiday "fire-sales," smaller stores that were unable to match such price reductions have been driven out of business.

.09 The industry rebounded later in the first quarter of 1996 on the basis of a surge in consumer spending. A stronger than expected economy in the second quarter lifted retail sales through May, though they declined slightly in June. Despite these favorable results, industry analysts estimate that 1996 sales growth will be limited to a disappointing 4 percent to 5 percent annual increase (with the nation's major retailers expected to reap the largest gains). The low expectations for 1996 retail performance are primarily based on current economic and demographic conditions such as the following:

- Stagnant family incomes (as evidenced by government statistics showing that real average hourly wages grew by approximately one percent annually between 1990 and 1995)
- An aging population that is curtailing in spending
- A current downward trend in the consumer confidence index
- An all-time high nonmortgage debt-to-income ratio of 19 percent for consumers, along with sharply rising credit card delinquencies

.10 The modest level of expected growth is likely to be mitigated in many retail segments by the heavy discounting that has become common practice throughout much of the industry. This is expected to hold true even for industry segments such as consumer electronics, which performed well in 1995. Despite expectations of continued sales growth, market segments such as this one will be operating on extremely narrow gross margins largely due to intense competitive pressures. These retailers have attempted to offset the impact of discounting by offering customers separately priced extended warranty and product maintenance contracts. This strategy has been successful for some in recouping the profits lost through discounting. In these circumstances, auditors should become familiar with the terms of such agreements and consider whether management has applied the appropriate accounting treatment to these transactions. This topic is explored further in the "Accounting Issues and Developments" section of this Audit Risk Alert under "Product Warranties, Extended Warranties and Product Maintenance Contracts."

.11 High levels of promotional activity have accompanied the aforementioned product discount programs. Accordingly, auditors should consider whether their clients have properly addressed the accounting and disclosure issues relating to advertising expenses. The accounting treatment for advertising costs is addressed in the "Accounting Issues and Developments" section of this Audit Risk Alert under "Advertising Costs."

.12 On Wall Street, retail stocks mirrored the industry's poor performance in the early part of the year. Although the Standard and Poor's Composite Index of 500 Stocks Index rose nearly 38 percent in 1995, the retail stores index was up just 12 percent. Early in the year some investment advisors forecast that retail stocks, beaten down by liquidations and cost-conscious consumers, had nowhere to go but up. And indeed, retail stocks did rebound by midyear. However, the general consensus is that this recovery will be short-lived and that 1996 will be a disappointing year for retail stocks. Auditors may wish to consider the impact of stock performance on the control environment of publicly held retail clients. Management's philosophy and operating style may be adversely affected by pressure from stockholders stemming from poor stock performance. This situation could, for example, manifest itself in overly aggressive positions on accounting

issues adopted by management to more extreme instances of intentional material misstatement of the financial statements. The ASB has considered the issue of management fraud as detailed in its recently issued exposure draft of a proposed SAS, "Consideration of Fraud in a Financial Statement Audit." See the "Audit Issues and Developments" section of this Audit Risk Alert under "AICPA Exposure Drafts: Proposed SASs," for further information.

.13 During 1995, approximately 15,000 retail establishments sought protection from their creditors by filing for bankruptcy under Chapter 11. These filings, which include several prominent national and regional chains, represented a 20 percent increase over 1994 bankruptcy activity. The consensus of industry analysts is that the retail trade is currently "overstored," that is, there are too many stores chasing too few consumer dollars. Accordingly, future growth for retailers can only come from taking market share away from the competition. Such competitive pressures will continue to have an impact on bankruptcy filings. For example, established retailers will face increasing threats from nontraditional retailers. These include direct consumer sales being carried out by manufacturers and wholesalers, who sell their products directly to the consumer through outlets such as "superstores" or warehouse clubs. Based on these circumstances, retail economists are predicting an even greater increase in bankruptcies for 1996. In these circumstances, auditors should be aware of their responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). The "Audit Issues and Developments" section of this Audit Risk Alert includes further discussion of this matter.

.14 In addition to bankruptcies, cost cutting, restructurings, and downsizing undertaken by local, regional and national retailers have led to an increased number of store closings. During the first quarter of 1996, approximately 3,500 retail stores outlets closed down operations. In these circumstances, auditors should consider whether management has addressed relevant accounting guidance such as the FASB's Emerging Issues Task Force (EITF) Issue 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)*, EITF Issue No. 96-9, *Classification of Inventory Markdowns and Other Costs Associated with a Restructuring* (guidance provided by the Securities and Exchange Commission), and FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). Additionally, auditors should consider whether the store closing constitutes the disposal of a business segment. If it is determined that the store(s) is a component of the retail enterprise whose activities represent a separate major line of business or class of customer, auditors should consider whether management has properly applied the accounting treatment specified under Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13).

.15 The highly competitive environment has resulted in a "consolidation fever" spreading throughout retailing. According to industry analysts, it is becoming increasingly difficult for regional chains to succeed in metropolitan markets. Larger companies who benefit from economies of scale and enhanced purchasing power have targeted weaker retailers seeking bargain basement sales while weaker firms are seeking buyers to avoid bankruptcy. Industry analysts predict a developing trend whereby, through acquisition and consolidation, "the strong will get stronger" at the expense of weaker retailers. Auditors should consider whether management has appropriately accounted for an acquisition or consolidation in accordance with relevant accounting literature such as APB Opinion No. 16, *Business Combinations* (AC B50).

Audit Issues and Developments

Going-Concern Issues

.16 Economic and demographic factors coupled with the retail industry's intensely competitive environment contributed to record bankruptcies for 1995. This trend is expected to continue in 1996. Accordingly,

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

auditors should be alert to conditions and events which, when considered in the aggregate, indicate that there could be substantial doubt about a retailer's ability to continue as a going concern. For example, such conditions and events could include the following:

1. Negative trends such as recurring operating losses or working capital deficiencies
2. Financial difficulties such as working capital loan defaults or denial of trade credit from suppliers
3. Internal matters such as uneconomic long-term commitments
4. External matters such as legal proceedings that could jeopardize the entity's ability to operate

In such circumstances auditors may conclude that, based upon such conditions and events, there is substantial doubt about the retailer's ability to continue as a going concern.

.17 Accordingly, auditors should be aware of their responsibilities pursuant to SAS No. 59 (AU section 341). SAS No. 59 (AU section 341) provides guidance to auditors in conducting an audit of financial statements in accordance with generally accepted auditing standards for evaluating whether there is substantial doubt about a client's ability to continue as a going concern for a period not to exceed one year from the date of the financial statements being audited.

.18 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 (AU section 341) does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statements being audited. However, the results of auditing procedures designed and performed to achieve other audit objectives may bring such contrary information to the auditor's attention.

.19 If, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about the entity's ability to continue as a going concern, the auditor should consider whether it is likely that existing conditions and events can be mitigated by management plans and whether those plans can be effectively implemented. If the auditor obtains sufficient competent evidential matter to alleviate doubts about going-concern issues then consideration should be given to the need for disclosure of the principal conditions and events that initially caused the auditor to believe there was substantial doubt. If, however, after considering identified conditions and events, along with management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, auditors should refer to the specific guidance set forth under SAS No. 59 (AU section 341).

.20 For those retailers emerging from bankruptcy reorganization pursuant to Chapter 11 of the Bankruptcy Code, the auditor should consider whether the retailer is following the accounting guidance of AICPA Statement of Position (SOP) 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code.*

Merchandise Inventory

.21 Merchandise inventory is generally the most significant asset on the balance sheet of a retailing enterprise. Given the current industry and economic environment, auditors should be alert to the potential for a high level of audit risk associated with this area.

.22 Many retail businesses are now confronted with problems such as declining sales, narrow profit margins, and intense competition. These conditions may increase the likelihood that management will adopt

overly aggressive positions in accounting for particular inventory transactions. For example, the failure to adequately assess inventory obsolescence might be used as a means of overstating ending inventory in order to inflate solvency ratios. Accordingly, when auditing inventory in these circumstances, auditors should adopt an approach of heightened professional skepticism.

.23 Audit risk relating to merchandise inventory generally involves issues such as the following:

- *The proper cutoff of sales and purchase transactions.* Transactions occurring near year-end should be examined to ensure that they are recorded in the period in which the related revenue has been earned or the expense has been incurred. Procedures that may be performed by the auditor to assess the proper cutoff of sales and purchase transactions (see the completeness assertion in paragraph 3 of SAS No. 31 [AU section 326.03]) could include the observation of physical inventory counts, analytical procedures comparing the relationship of inventory balances to recent purchasing and sales activities, along with testing the client's cutoff procedures for shipping, receiving, sales, sales returns, purchases, and purchase returns.

- *Inventory valuation.* Current industry and economic conditions suggest increased significance in assessing the net realizable value of inventory; the proper application of inventory cost flow assumptions; and the consideration of obsolescence, shrinkage, and changes in demand on inventory valuation. Procedures that may be performed by the auditor to assess the valuation of the client's merchandise inventory (see the valuation assertion in paragraph 3 of SAS No. 31 [AU section 326.03]) might include examining paid vendors' invoices and current market value quotations, assessing inventory obsolescence by analyzing inventory turnover, comparisons with industry experience and trends, and for highly specialized merchandise (for example, jewels) the guidance set forth in SAS No. 73, *Using the Work of a Specialist* (AU section 336), should be considered.

- *Inventory ownership.* Failure to determine ownership can result in the overstatement of inventory through, for example, improper sales or purchase cutoff, incorrect assessment of when title passes in sales or purchase transactions (FOB shipping point or FOB destination). Procedures that may be performed by the auditor to assess whether the inventory balance shown on the client's balance sheet is actually owned by the client (see the rights and obligations assertion in paragraph 3 of SAS No. 31 [AU section 326.03]) might include observing physical inventory counts, obtaining confirmation of inventories at locations outside the entity, testing cutoff procedures relating to sales, sales returns, purchases, and purchase returns, as well as examining paid vendors' invoices, shipping terms, consignment agreements, and bill and hold arrangements.

- *The physical existence of merchandise inventory.* A key audit objective is to establish the existence of inventory. Procedures that may be performed by the auditor to make this assessment (see the existence assertion in paragraph 3 of SAS No. 31 [AU section 326.03]) might include observation of the client's physical inventory count, obtaining confirmation of inventories at locations outside the entity, along with the testing of inventory transactions between a preliminary physical inventory date and the balance sheet date.

Revenue and Purchasing Cycles

.24 *Accounts Receivable.* A retailer's accounts receivable may include, among other items, customer accounts, installment or layaway plans, as well as amounts due from third-party charge companies that are not included in cash. Some of the major issues facing the auditor in this area include the collectibility of the account balance, the validity of receivables, along with evaluating the client's procedures for safeguarding cash receipts, and the collections of accounts receivable.

.25 Given the current economic difficulties faced by many retailers, there is likely to be a high level of audit risk associated with credit sales. In order to address the problems of a diminishing customer base, the potential exists for management to relax restrictions on granting credit to the point where collectibility may

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

be called into question. Accordingly, auditors should consider the client's procedures for granting credit to new customers as well as authorizing credit for established customers. This should also factor into the auditor's evaluation of the adequacy of the allowance for doubtful accounts.

.26 In the current environment, auditors should be alert to the potential for the overstatement of assets, such as accounts receivable. Given the inordinately high rate of retail business failures, lenders, in an effort to protect their investments, may establish restrictive loan covenant provisions specifying minimum levels of liquidity to be maintained by the debtor. As such, auditors should be alert to the potential manipulation of solvency ratios through the overstatement of current assets such as accounts receivable.

.27 Procedures that may be performed by the auditor to assess the validity of accounts receivable include various analytical reviews and, principally, direct confirmation by the auditor with customers. In this regard, auditors may wish to refer to the AICPA publication, Auditing Procedure Study (APS), *Confirmation of Accounts Receivable* (Product Code No. 021064). This APS discusses the relationship of financial statement assertions to accounts receivable audit objectives and how those objectives may be achieved by using confirmations. The APS illustrates and discusses four different kinds of confirmation forms (positive, negative, blank, and expanded-field forms) and presents guidance on selecting an appropriate confirmation form for various client situations. Finally, the APS identifies practical suggestions for improving the quality and quantity of accounts receivable confirmation responses. The APS includes a copy of SAS No. 67, *The Confirmation Process* (AU section 330).

.28 *Sales.* Declining sales revenues in the current environment suggest an increased level of audit risk in this area. Auditors may wish to place special emphasis on evaluating the adequacy of client procedures relating to the proper cutoff of sales, returns and allowances, and shipping. Auditors may wish to pay particular attention to specialized credit transactions, large, end-of-year transactions including consignment and bill-and-hold arrangements. Management must be in a position to establish that the earnings process is complete before revenue related to these transactions can be recognized.

.29 Additionally, in connection with credit sales, auditors should assess management's consideration of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), which requires the disclosure of information about significant concentrations of credit risk.

.30 *Accounts Payable.* Retailers typically have a significant number of vendors to whom they are liable for merchandise and expense items. Accounts payable is generally the most significant current liability on the retailer's balance sheet. Given the current economic circumstances, auditors should be alert to the potential for the understatement of liabilities and the related expense. To accomplish specified audit objectives, auditors may wish to utilize procedures such as the following:

- Analytical procedures to test the reasonableness of payables
- Search for unrecorded liabilities
- Reviews of cutoff procedures relating to purchases and purchase returns
- Direct confirmation with vendors (in certain extreme circumstances)

Impairment of Long-Lived Assets

.31 In March 1995, the FASB issued Statement No. 121 (AC I08) which requires that long-lived assets and certain identifiable intangibles and goodwill related to those assets to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Statement (AC I08) also requires that long-lived assets and certain

identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less costs to sell, except for assets covered by APB Opinion No. 30 (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value. The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Accordingly, this is the first year that auditors will evaluate management's implementation of the Statement (AC I08).

.32 In evaluating management's implementation of FASB Statement No. 121 (AC I08) issues to be considered by auditors include the following:

- *The appropriate classification of long-lived assets as either those being held and used or those to be disposed of.* Auditors should obtain an understanding of the policies and procedures used by management to classify long-lived assets pursuant to FASB Statement No. 121 (AC I08) as well as evaluating whether those classifications are proper.
- *The identification of events or circumstances indicating that the carrying amounts of assets to be held and used may not be recoverable.* Auditors should obtain an understanding of the policies and procedures used by management to identify such events and circumstances. Examples of such events and circumstances could include the following:
  - — A dramatic change in the manner in which an asset is used
  - — A reduction in the extent to which an asset is used
  - — Forecasts showing lack of long-term profitability
  - — A change in the law or business environment
  - — A substantial drop in the market value of an asset
- *The assumptions used in the underlying calculation of estimated future cash flows when testing for asset impairment used in management's impairment test, and assumptions used in estimating the fair value of assets for which an impairment loss is to be recognized.* Management's estimates of future cash flows from asset use and the fair value of assets used in calculating impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342). Procedures to be employed should include one or a combination of the following: (1) reviewing and testing the process used by management to develop the estimates, (2) developing an independent expectation to corroborate the reasonableness of the estimates, or (3) reviewing subsequent events or transactions occurring before the completion of fieldwork.
- *The recording of assets to be disposed of at the lower of carrying amount or fair value less cost to sell.* Auditors should verify that management has appropriately classified and valued long-lived assets to be disposed of.
- *The disclosure requirements of FASB Statement No. 121.* Auditors should verify that all disclosure requirements of FASB Statement No. 121 (AC I08) have been included in the client's financial statements.

Control Environment

.33 Minimal barriers to enter the retail trade guarantee that a sizable number of entities will be young, development-stage enterprises. Internal control in these companies often include unique characteristics that may affect an auditor's assessment of control risk. Characteristics that may increase control risk include the following:

- Many retail entities are relatively small and frequently closely held. In such entities, the entire accounting function may be the responsibility of one or a few employees and thus lacking in adequate segregation of duties. In addition, owners or managers often have the authority to override prescribed control procedures.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Owners and managers of retail entities frequently are entrepreneurs who may be more likely to give priority to the business of selling over accounting systems and related control activities. As a result, internal control, accounting, and financial reporting functions may receive less support and attention than might be warranted.
- Owners and managers of small retail entities may not be as well versed in matters of accounting, finance, and administration.
- The limited resources of some start-up retail enterprises may engender informal accounting systems with inadequate internal control.

If internal control of a retail entity includes the preceding characteristics, control risk might be assessed as high. Auditors should adjust the scope of their audits accordingly, and should document the understanding of the entity's internal control as required by SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319).[1] If that understanding reveals that the oversight function is weak, there is increased risk that material errors and irregularities will result in misstatements in the financial statements, and reportable conditions, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist.

New Pronouncements

Auditing Standards

.34 *SAS No. 75.* In September 1995, the ASB issued SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except in certain circumstances, as discussed in the SAS (AU section 622). The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.35 *SAS No. 76.* In September 1995, the ASB issued SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634). The SAS (AU section 634) provides reporting guidance and an example of a letter, actually a form of agreed-upon procedures report, that the accountant can provide in response to a request to provide a comfort letter in circumstances in which the party requesting the letter does not provide the accountant with the representations required in paragraphs 6 and 7 of SAS No. 72 (AU section 634.06 and .07). The Statement is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

.36 *SAS No. 77.* In November 1995, the ASB issued SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77 is effective for engagements beginning after December 15, 1995.

.37 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78 (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), pub-

[1] SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), revises the definition and description of internal control and makes conforming changes to relevant terminology. SAS No. 78 (AU section 319) was issued in December 1995 and is effective for audits of financial statements for periods beginning on or after January 1, 1997. See the "New Pronouncements" section for further discussion of this matter.

lished by the Committee of Sponsoring Organizations of the Treadway Commission. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.38 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58 (AU section 508) concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. This SAS does not affect SAS No. 59 (AU section 341) nor preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

.39 A table outlining the significant provisions of the newly issued auditing standards is set forth in the "Exhibits" section of this Audit Risk Alert.

Attestation Standards

.40 *SSAE No. 4.* In September 1995, the ASB issued Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600). SSAE No. 4 (AT section 600) sets forth attestation standards and provides guidance on the performance and reporting in all agreed-upon procedures engagements, except in certain circumstances, and is effective for reports on agreed-upon procedures engagements dated after April 30, 1996. SSAE No. 4 (AT section 600) generally should be used when applying agreed-upon procedures to nonfinancial statement subject matter. In addition, SSAE No. 4 (AT section 600) requires a written assertion from management as a condition of engagement performance.

.41 *SSAE No. 5.* In November 1995, the ASB issued SSAE No. 5, *Amendment to Statement on Standards for Attestation Engagements No. 1,* Attestation Standards (AT section 100). This amendment provides guidance on the quantity, type, and content of working papers for attestation engagements and is effective for engagements beginning after December 15, 1995.

.42 *SSAE No. 6.* In December 1996, the ASB issued SSAE No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400). This amendment conforms the description of elements of an entity's internal control to the components of internal control contained in SAS No. 78 (AU section 319) (see the discussion in the preceding section) and *Internal Control—Integrated Framework.* The amendment is effective for an examination of management's assertion when the assertion is as of or for the period ending December 15, 1996, or thereafter. Early application of the provisions of this Statement (AT section 400) is permitted.

.43 *Quality Control Standards.* In May 1996, the ASB issued Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). SQCS No. 2 (QC section 20) supersedes SQCS No. 1, *System of Quality Control for a CPA Firm,* and its Interpretations (QC sections 10 and 10-1). The provisions of these Statements (QC sections 20 and 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997.

.44 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the Accounting and Review Services Committee under Rules 201, *General Standards* (ET section 201.01), and 202, *Compliance With Standards* (QC section 202.01), of the AICPA Code of Professional Conduct. The definition of a firm's accounting and auditing practice has been revised to include engagements performed under SSAEs issued by the ASB. These standards had not been issued when SQCS No. 1 (QC section 10) was promulgated. Also, the new standard replaces the nine specific elements discussed in SQCS

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

No. 1 (QC section 10) with the following five broad elements: (1) independence, integrity, and objectivity; (2) personnel management; (3) acceptance and continuance of clients and engagements; (4) engagement performance; and (5) monitoring. SQCS No. 3 (QC section 30) provides guidance on how a firm can implement the new monitoring element of a quality control system in its accounting and auditing practice.

Ethics Ruling—Indemnification of a Client

.45 Recently, the AICPA Professional Ethics Executive Committee issued Ethics Ruling No. 102, *Member's Indemnification of a Client* (ET section 191.204 and .205), as published in the January 1996 Journal of Accountancy. This ruling (ET section 191.204 and .205) states that auditors should not enter into agreements that would require them to indemnify their client for damages, losses, or costs arising from lawsuits, claims, or settlements that relate, directly or indirectly, to client acts, or their independence will be impaired. In assessing their independence, auditors of retail enterprises should consider the implication of indemnification arrangements requested by their clients, in light of this new ethics ruling (ET section 191.204 and .205).

AICPA Exposure Drafts: Proposed SASs

.46 *Consideration of Fraud in a Financial Statement Audit.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Consideration of Fraud in a Financial Statement Audit and Amendments to Statements on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures, *and No. 47,* Audit Risk and Materiality in Conducting and Audit. The proposed Statement would provide expanded operational guidance on the consideration of fraud in conducting a financial statement audit. The proposed changes in auditing standards also clarify the auditor's present responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether caused by error or fraud. In addition, the proposed changes provide added guidance on the standard of due professional care in the performance of work, including the need to exercise professional skepticism, and the concept of reasonable assurance. In addition to amending SAS Nos. 1 (AU sections 110 and 230) and 47 (AU section 312), the proposed statement would—

- Describe fraud and its characteristics.
- Require the auditor to specifically assess the risk of material misstatement due to fraud and provide categories of fraud risk factors that should be considered in the auditor's assessment.
- Provide guidance on how the auditor should respond to the results of the assessment.
- Provide guidance on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud.
- Describe related documentation requirements.
- Provide guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

.47 *Amendment to SAS No. 31,* Evidential Matter. In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Amendment to SAS No. 31,* Evidential Matter. This proposed Statement would provide guidance for a practitioner who has been engaged to audit an entity's financial statements where significant information is transmitted, processed, maintained, or accessed electronically. The proposed Statement would include examples of evidential matter in electronic form and provide that an auditor should consider the time during which such evidential matter exists or is available in determining the nature, timing, and extent of substantive tests. In addition, the proposed Statement would indicate that an auditor may determine that, in certain engagement environments where evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests. The proposed Statement would provide that in such circumstances, an auditor should consider performing tests of controls to support an assessed level of control risk below the maximum for affected assertions.

.48 *Investments in Debt and Equity.* In May 1996, the AICPA issued an exposure draft of a proposed SAS, *Investments in Debt and Equity.* This proposed Statement would revise the guidance on auditing investments to make that guidance consistent with recently issued accounting standards, particularly FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80).

Accounting Issues and Developments

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.49 In June 1996, the FASB issued FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities.* This Statement provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities. Those standards are based on consistent application of a financial-components approach that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished. This Statement provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.50 A transfer of financial assets in which the transferor surrenders control over those assets is accounted for as a sale to the extent that consideration other than beneficial interest in the transferred assets is received in exchange. The transferor has surrendered control over transferred assets if and only if all of the following conditions are met:

1. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

2. Either (*a*) each transferee obtains the right—free of conditions that constrain it from taking advantage of that right—to pledge or exchange the transferred assets or (*b*) the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right—free of conditions that constrain them from taking advantage of that right—to pledge or exchange those interests.

3. The transferor does not maintain effective control over the transferred assets through (*a*) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (*b*) an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.

.51 FASB Statement No. 125 requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interest in transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.52 FASB Statement No. 125 requires that servicing assets and liabilities be subsequently measured by (*a*) amortization in proportion to and over the period of estimated net servicing income or loss and (*b*) assessment for asset impairment or increased obligation based on their fair values.

.53 FASB Statement No. 125 requires that debtors reclassify financial assets pledged as collateral and that secured parties recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.54 FASB Statement No. 125 requires that a liability be derecognized if and only if either (*a*) the debtor pays the creditor and is relieved of its obligation for the liability or (*b*) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.

.55 FASB Statement No. 125 provides implementation guidance for assessing isolation of transferred assets and for accounting for transfers of partial interest, servicing of financial assets, securitizations, transfers of sales-type and direct financial lease receivables, securities lending transactions, repurchase agreements including "dollars rolls," "wash sales," loan syndications and participations, risk participations in banker's acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishment of liabilities.

.56 FASB Statement No. 125 supersedes FASB Statements No. 76, *Extinguishment of Debt*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse.* This Statement amends FASB Statement No. 115 (AC I80) to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights.* This Statement also supersedes Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)*, and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights.*

.57 FASB Statement No. 125 is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Revenue Recognition When Right of Return Exists

.58 In the normal course of business, many retail entities offer their customers the option to return purchased merchandise. This policy may be a matter of contract or simply a matter of existing practice. Typically, the product may be returned for a refund of the purchase price, for a credit applied to amounts owed or to be owed for other purchases, or in exchange for other products. FASB Statement No. 48, *Revenue Recognition When Right of Return Exists* (AC R75), specifies how an enterprise should account for sales of its product in which the buyer has a right to return the product. FASB Statement No. 48 (AC R75) provides that revenue from such sales transactions shall be recognized at the time of sale only if all of the following conditions are met:

1. The seller's price to the buyer is substantially fixed or determinable at the date of sale.
2. The buyer has paid the seller, or the buyer is obligated to pay the seller and the obligation is not contingent on resale of the product.
3. The buyer's obligation to the seller would not be changed in the event of theft or physical destruction or damage of the product.
4. The buyer acquiring the product for resale has economic substance apart from that provided by the seller.[2]
5. The seller does not have significant obligations for future performance to directly bring about resale of the product by the buyer.
6. The amount of future returns[3] can be reasonably estimated.

---

[2] This condition relates primarily to buyers that exist "on paper," that is, buyers that have little or no physical facilities or employees. It prevents enterprises from recognizing sales revenue on transactions with parties that the sellers have established primarily for the purpose of recognizing such sales revenue.

[3] Exchanges by ultimate customers of one item for another of the same kind, quality, and price (for example, one color or size for another) are not considered returns for the purposes of FASB Statement No. 48 (AC R75).

If these conditions are not met, revenue recognition is postponed; if they are met, sales revenue and cost of sales reported in the income statement must be reduced to reflect estimated returns, and expected costs or losses must be accrued.

.59 The ability to make a reasonable estimate of the amount of future returns as specified in item 6 above depends on many factors and circumstances that vary from one case to the next. FASB Statement No. 48 (AC R75) outlines examples of factors that may impair the ability to make a reasonable estimate, such as the following:

- Technological obsolescence or changes in demand
- Relatively long periods in which a product may be returned
- The absence of historical experience with similar type of sales of similar products
- The absence of a large volume of relatively homogeneous transactions

.60 In circumstances where the right of return exists, the auditor should assess the client's application of FASB Statement No. 48 (AC R75) by referring to the full text of the Statement.

.61 For publicly held companies, the activity in the allowance for sales returns and allowances should be disclosed consistent with the requirements of Article 5.04 (c), Schedule II of Regulation S-X.

Product Warranties, Extended Warranties, and Product Maintenance Contracts

.62 Typically, sales to retail consumers are typically made subject to a product warranty. Such an arrangement will generally provide for repair services or replacement parts during a specified warranty period. The warranty represents an obligation incurred by the retailer in connection with the sale of products or services that may require further performance by the seller after the sale has taken place. Because of the uncertainty surrounding claims that may be made under warranties, warranty obligations fall within the definition of a contingency as set forth under FASB Statement No. 5, *Accounting for Contingencies* (AC C59). FASB Statement No. 5 (AC C59) provides that losses from warranty obligations shall be accrued when both of the following conditions are met:

1. Information available prior to issuance of the financial statements indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements.
2. The amount of loss can be reasonably estimated.

The loss accrued is commonly based on previous experience with regard to the same product line, or absent that, related products or the experience of other enterprises in the same business may be appropriate. If there is no basis to calculate a reasonable estimate of the loss accrual, the possibility of material future warranty costs may suggest that a sale should not be recorded before the expiration of the warranty period or until sufficient experience allows for the calculation of a reasonable estimate. If no accrual is made, the nature of the contingency and the range of potential loss or the fact that such an estimate cannot be made should be disclosed in the financial statements. In accordance with FASB Statement No. 5 (AC C59), if no accrual is made for warranty costs because one or both of the conditions for accrual are not met, or if an exposure to loss exists in excess of the amount accrued, disclosure of the contingency shall be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred. The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made.

.63 Auditors may wish to read relevant sales agreements and examine historical trends to determine the existence of warranty obligations along with the nature and extent of any warranty liability. Where applicable, the auditor should assess the valuation of the estimated liability recorded by the client.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.64 It is common practice for many retail establishments, particularly those selling consumer electronics, household appliances, and automobiles, to offer extended warranty and product maintenance contracts to provide warranty protection or product services not included in the product sales price. The losses incurred due to heavy discounting are often recouped through the sale of either or both the separately priced warranty and maintenance contracts.

.65 An extended warranty is an agreement to provide warranty protection in addition to the scope of coverage of the manufacturer's original warranty, if any, or to extend the period of coverage provided by the manufacturer's original warranty. A product maintenance contract is an agreement to perform certain agreed-upon services to maintain a product for a specified period of time. A contract is separately priced if the customer has the option of purchasing the services provided under the contract for an expressly stated amount separate from the price of the product.

.66 FASB Technical Bulletin No. 90-1, *Accounting for Separately Priced Extended Warranty and Product Maintenance Contracts* (AC R75), addresses how revenue and costs from a separately priced extended warranty or product maintenance contract be recognized. The bulletin (AC R75) provides the following:

1. Revenue from separately priced extended warranty and product maintenance contracts should be deferred and recognized in income on a straight-line basis over the contract period except in those circumstances in which sufficient historical evidence indicates that the costs of performing services under the contract are incurred on other than a straight-line basis. In those circumstances, revenue should be recognized over the contract period in proportion to the costs expected to be incurred in performing services under the contract.
2. Costs that are directly related to the acquisition of a contract and that would have not been incurred but for the acquisition of that contract (incremental direct acquisition costs) should be deferred and charged to expense in proportion to the revenue recognized. All other costs, such as costs of services performed under the contract, general and administrative expenses, advertising expenses, and costs associated with the negotiation of a contract that is not consummated, should be charged to expense as incurred.
3. A loss should be recognized on extended warranty or product maintenance contracts if the sum of expected costs of providing services under the contracts and unamortized acquisition costs exceeds related unearned revenue. Extended warranty or product maintenance contracts should be grouped in a consistent manner to determine if a loss exists. A loss should be recognized first by charging any unamortized acquisition costs to expense. If the loss is greater than the unamortized acquisition costs, a liability should be recognized for the excess.

Advertising Costs

.67 An increased level of product promotion occurred during 1995. Industry analysts expect that level to increase during 1996 as retailers advertise in an attempt to develop a competitive edge. Additionally, many retail chains, unable to sustain heavy discounting, have been forced to abandon the "every day low pricing" strategy. In turn, they have increasingly begun to rely on advertising to promote special sales.

.68 SOP 93-7, *Reporting on Advertising Costs*, defines advertising as a customer acquisition activity involving the promotion of an industry, an entity, a brand, a product name, or specific products or services so as to create or stimulate a positive entity image, or to create or stimulate a desire to buy the entity's products or services. SOP 93-7 provides guidance on accounting for advertising costs in annual financial statements for the following:

1. Reporting the costs of advertising, which should be expensed either as incurred or the first time the advertising takes place, except for direct-response advertising:
   a. The primary purpose is to elicit sales to customers who could be shown to have responded specifically to the advertising and

b. that results in probable future economic benefits.

2. For direct-response advertising that may result in reported assets (that is, capitalized pursuant to the criteria set forth in items *a.* and *b.* above) as follows:
   a. How such assets should be measured initially
   b. How the amounts ascribed to such assets should be amortized
   c. How the realizability of such assets should be assessed

Additionally, SOP 93-7 requires that the notes to the financial statements should disclose the following:

1. The accounting policy for reporting advertising, indicating whether such costs are expensed as incurred or the first time the advertising takes place
2. A description of the direct-response advertising reported as assets (if any), the accounting policy for it, and the amortization period
3. The total amount charged to advertising expense for each income statement presented, with separate disclosure of amounts, if any, representing a write down to net realizable value
4. The total amount of advertising reported as assets in each balance sheet presented

.69 The following is an example of the disclosures required by the SOP:

Note X. Advertising

The Company expenses the production costs of advertising the first time the advertising takes place, except for direct-response advertising, which is capitalized and amortized over its expected period of future benefits.

Direct-response advertising consists primarily of magazine advertisements that include order coupons for the Company's products. The capitalized costs of the advertising are amortized over the three-month period following the publication of the magazine in which it appears.

At December 31, 19XX, $1,000,000 of advertising was reported as assets. Advertising expense was $10,000,000 in 19XX, including $500,000 for amounts written down to net realizable value.

Preopening Expenses

.70 Selling space expansion grew at an annual rate of approximately 5 percent in 1995 and is expected to grow at the same rate during the current year. The construction of new retail facilities includes supercenters and huge specialty outlets such as home improvement and consumer electronics stores. Costs related to the planning and preparation for the opening of new retail store locations such as these are generally considered to be period costs and industry practice has been to expense these costs as they are incurred. However, costs that are directly related to a store opening and that are expected to benefit future periods may be deferred and amortized if there is objective evidence that probable future net operating results will be sufficient to recover such costs. The deferral of costs would be discontinued upon the store's opening. In practice, the amortization period for preopening expenses rarely extends beyond one year.

Delayed Effective Dates—Accounting Pronouncements

.71 *Disclosures about Fair Value of Financial Instruments.* FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), issued in December 1991, was effective for financial statements issued for fiscal years ending after December 15, 1992. However, for entities with less than $150 million in total

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995. In that a sizable portion of retail entities may be smaller, development state enterprises, financial statements for years ended during 1996 will be subject to the provisions contained therein. In such circumstances, auditors should consider whether management has made all disclosures required by FASB Statement No. 107 (AC F25).

.72 FASB Statement No. 107 (AC F25) requires disclosure of the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement requires disclosure of descriptive information pertinent to estimating the value of a financial instrument. Certain financial instruments (for example, lease contract, deferred-compensation arrangements, and insurance contracts) are excluded from the scope of the Statement (AC F25).

.73 *Disclosures about Derivative Financial Instruments.* FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), issued in October 1994, was effective for financial statements issued for fiscal years ending after December 15, 1994. However, for entities with less than $150 million in total assets as of that date, the effective date was extended to fiscal years ending after December 15, 1995.

.74 FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments such as futures; forward, swap, and option contracts; and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statement No. 105 (AC F25) to require disaggregation of information about financial instruments with off-balance-sheet risk of accounting loss by class, business activity, risk, or other category that is consistent with the entity's management of those instruments. The Statement (AC F25) also amends FASB Statement No. 107 (AC F25) to require that fair value information be presented without combining, aggregating, or netting the fair value of derivative financial instruments with the fair value of nonderivative financial instruments and be presented together with the related carrying amounts in the body of the financial statements, a single footnote, or a summary table in a form that makes it clear whether the amounts represent assets or liabilities.

.75 Auditors should consider whether the provisions of FASB Statement No.119 (AC F25) apply to their retail clients, and if so, evaluate whether the client's financial statement disclosures are adequate and appropriate in view of the requirements set forth therein.

.76

Exhibit

Significant Provisions of Newly Issued SASs

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.
SAS No. 76, *Amendments to SAS No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634)	SAS No. 72	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623)	SAS Nos. 22, 59, and 62	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341]).

Information Sources

.77 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.78 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.79 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.80 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.81 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

* * * *

.82 Practitioners should also be aware of the economic, industry, regulatory, and professional developments described in *Audit Risk Alert—1996/97* [AAM section 8010] and *Compilation and Review Alert—1996/97* [AAM section 8015].

AAM Section 9100
Supervision and Review Procedures

Introduction

.01 Supervision is an important phase of all engagements. A supervisor trains staff members, determines that there is an understanding of the work to be performed and ascertains that all procedures were appropriately performed.

.02 Review procedures are necessary to determine whether the objectives of the engagement and the results of the procedures performed were consistent with the conclusions presented in the accountant's or auditor's report.

Authoritative Literature

.03 The necessity for supervision is emphasized in the *AICPA Code of Professional Conduct*, which applies to all major areas of accounting practice, Rule 201, *General Standards* (ET section 201.01) states, "A member shall adequately plan and *supervise* an engagement."

.04 The first standard of fieldwork of generally accepted auditing standards states: "The work is to be adequately planned and assistants, if any, are to be properly *supervised*."

.05 For compilation and review engagements, SSARS 1, *Compilation and Review of Financial Statements*, paragraph 3 (AR section 100.03), provides the guidance necessary to enable the accountant to comply with the general standards of the profession as explained in .03 above.

.06 For audit engagements, the following Statements on Auditing Standards (SAS) provide specific guidance on supervising and reviewing audit engagements:

a. SAS No. 22, *Planning and Supervision* and SAS No. 77, *Amendments to Statements on Auditing Standards No. 22*, Planning and Supervision, *No. 59*, The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62*, Special Reports (AU section 311), establishes broad requirements for the review of the work of assistants.

b. SAS No. 39, *Audit Sampling* (AU section 350), states that nonsampling risk can be reduced to a negligible level through such factors as adequate planning and supervision and proper conduct of a firm's audit practice.

c. SAS No. 41, *Working Papers* (AU section 339), establishes requirements for documenting the supervision of work performed.

d. SAS No. 56, *Analytical Procedures* (AU section 329), provides guidance on the use of analytical procedures and requires their use in both the planning and review of audits.

e. SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Accounts, or Items of a Financial Statement* (AU Section 622), states that accountant's risks can be reduced through adequate planning and supervision and due professional care in performing the procedures, determining the findings, and preparing the report.

.07 In addition, the Quality Control Standard No. 1, *System of Quality Control for a CPA Firm* (QC section 10), provides that a CPA firm shall have a system of quality control. One of the elements of a quality control system discussed in this standard is supervision. Supervision as an element of quality control is defined as policies and procedures for the conduct and supervision of work to provide that the firm's work meets its standard of quality.

Phases of Supervision and Review

.08 Supervision and review are conducted in several phases:

a. Instructing and training assistants.

b. Providing the staff with an efficient and effective approach to the performance of the engagement.

c. Keeping informed of significant problems encountered.

d. Reviewing the work performed.

e. Comparing the time spent on performing the procedures required with the budget prepared for those procedures.

f. Dealing with technical differences of opinion among firm personnel.

Review Organization

.09 A firm's practice for reviewing engagements will vary depending on the size of the firm and on the complexity of the engagement.

.10 Some firms can justify a separate review department, while others cannot afford this functional division of duties. Firms cannot afford to omit any of the review procedures or processes. There should always be some form of reading of the reports for both professional and accounting matters as well as typographical errors after they are typed.

Firm Policy and Procedures Regarding Supervision and Review

.11 The foundation of good supervision is adequate firm policies and procedures on conducting and supervising work performed. Some examples of such policies are:

a. Procedures for planning engagements (AAM section 3000).

b. Procedures for maintaining the quality of work performed (AAM section 11,000).

c. Procedures for reviewing engagement workpapers and reports.

.12 The procedures for reviewing engagement workpapers and reports is broken into two separate components. The two components consist of (1) detailed review of the workpapers by the audit senior and (2) the higher-level supervisory review performed by the manager and partner on the engagement.

Review of Workpapers

.13 The purpose of the detailed review of the workpapers on an engagement is to determine that:

a. All procedures in the program, albeit audit, review or compilation, were performed and documented.

b. The results and conclusions reached are appropriate for the work performed.

c. The results are properly summarized and in agreement with the report to be issued.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Supervisory Review

.14 The purpose of the supervisory review is to determine that:

a. Professional and firm standards have been complied with.

b. Accounting and auditing concerns for the client's industry were evaluated properly.

c. The overall results of the procedures performed are appropriate.

Purpose of Form

.15 The In-Charge's and Partner's Engagement Review Programs are tools used for determining whether all engagement steps were properly considered, completed, and resolved. The In-Charge should complete the respective form by checking off "yes," "no," or "n/a" in the appropriate column. All "no" answers should be explained with a separate memorandum. The Partner should sign off on the In-Charge's Engagement Review Program and then complete the Partner's Engagement Review Program in the same manner.

[*The next page is 9201.*]

AAM Section 9200
In-Charge Engagement Review Program

The Partner's Engagement Review Program should be used for all engagements. The supplemental programs for Not-for-Profit Organizations, Local Governmental Units, and Banks should be completed in conjunction with the Partner's Engagement Review Program.

	Yes	No	N/A
I. General Procedures			
A. .010 General			
1. In planning the audit engagement, were the following matters properly considered?			
a. Matters affecting the environment in which the entity operates, such as accounting practices, economic conditions, government regulations, contractual obligations and technological changes. (SAS No. 22, as amended by SAS No. 77 [AU section 311])	____	____	____
b. Matters affecting the entity's operations, such as legal organization and types of services. (SAS No. 22, as amended by SAS No. 77 [AU section 311])	____	____	____
c. Preliminary judgment about materiality levels for audit purposes. (SAS No. 47 [AU section 312])	____	____	____
d. Consideration of internal control. (SAS No. 55, as amended by SAS No. 78 [AU section 319])	____	____	____
e. Conditions that may require extension or modification of audit tests, such as the possibility of material errors or irregularities and management's ability to override controls. (SAS No. 53 [AU section 316])	____	____	____
f. Other audit risks.	____	____	____
2. If the firm succeeded a predecessor accountant, did the firm:			
a. Communicate with the predecessor accountant to ascertain whether there were disagreements between the predecessor accountant and the entity's management on accounting or auditing matters and consider the implications of such matters in accepting the client?	____	____	____
b. Make other inquiries of the predecessor accountant on significant matters?	____	____	____
c. Satisfy itself on the fair presentation of opening balances, such as reviewing the predecessor accountant's working papers?	____	____	____
3. Did the auditor obtain an understanding of internal control sufficient to plan the audit by performing procedures to understand the design			

	Yes	No	N/A
of controls relevant to an audit of financial statements, and whether they have been placed in operation? (SAS Nos. 55 and 78 [AU section 319])	____	____	____
a. Did the auditor then assess control risk for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements? (SAS Nos. 55 and 78 [AU section 319])	____	____	____
b. If control risk is assessed below the maximum for an assertion, was evidential matter obtained supporting that lower assessed level? (SAS Nos. 55 and 78 [AU section 319])	____	____	____
c. If the client used computer processing in significant accounting applications, did the assessment of risk in internal control include an evaluation of the extent, as well as the complexity, of that processing, including those, if any, of an outside service center? (SAS Nos. 48, 55 (as amended by SAS No. 78), and 70 [AU sections 311, 319, and 324])	____	____	____
d. If the firm relied on the internal control at a service organization, was a service auditor's report obtained and appropriately considered? (SAS No. 70 [AU section 324])	____	____	____
4. If consideration was given to the work of internal auditors in determining the scope of the audit, was it done in accordance with SAS No. 65 (AU section 322)?	____	____	____
5. Was audit planning appropriately documented?	____	____	____
6. Was a written audit program prepared? (SAS No. 22, as amended by SAS No. 77 [AU section 311])	____	____	____
a. Was it responsive to the needs of the engagement identified during the planning process and was it developed in light of internal control? (SAS No. 55, as amended by SAS No. 78 [AU section 319])	____	____	____
b. Was consideration given to applicable assertions in developing audit objectives and in designing substantive tests? (SAS No. 31 [AU section 326])	____	____	____
c. Were tests considered regarding related party transactions? (SAS No. 45 [AU section 334])	____	____	____
d. If conditions changed during the course of the audit, was the audit program modified as appropriate in the circumstances?	____	____	____
e. Was guidance in the applicable AICPA Audit and Accounting Guide considered?	____	____	____
7. If statistical or nonstatistical sampling was used in test of controls (SAS No. 39 [AU section 350]):			
a. Was appropriate consideration given, in planning the sampling application, to the relationship of the sample to the objective of the test, maximum rate of deviation, allowable risk of assessing control risk too low and likely rate of deviations?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
b. Was the sample selected in such a way that it could be expected to be representative of the population?	____	____	____
c. Were the results of the sample evaluated as to their effect on the nature, timing, and extent of planned substantive procedures?	____	____	____
d. Was appropriate consideration given, in evaluating the sample, to items for which the planned test or appropriate alternative procedure could not be performed, for example, because the documentation was missing?	____	____	____
e. Was documentation of the foregoing considerations in accordance with firm policy?	____	____	____
8. If statistical or nonstatistical sampling was used for substantive tests of details (SAS No. 39 [AU section 350]):			
a. Was appropriate consideration given, in planning the sampling application, to the relationship of the sample to the audit objective, preliminary judgments about materiality levels, auditor's allowable risk of incorrect acceptance, and characteristics of the population?	____	____	____
b. Was the sample selected in such a way that it could be expected to be representative of the population?	____	____	____
c. Were the misstatement results of the sample projected to the items from which the sample was selected?	____	____	____
d. Was appropriate consideration given, in evaluating the sample, to items for which the planned substantive tests or appropriate alternate procedures could not be performed?	____	____	____
e. Was appropriate consideration given in the aggregate to projected misstatement results from all audit sampling applications and to all known misstatements from nonsampling applications in evaluating material misstatements in the financial statements?	____	____	____
f. Was documentation of the foregoing considerations in accordance with firm policy?	____	____	____
9. Were the guidelines of SAS No. 56 (AU section 329), followed in the performance of analytical procedures for:			
a. Audit planning?	____	____	____
b. Use as a substantive test?	____	____	____
c. Overall review of the audit?	____	____	____
10. Did the firm obtain timely and appropriate responses from the auditee's attorney concerning litigation, claims, and assessments? (SAS No. 12 [AU section 337])	____	____	____
11. Have all required engagement forms and documents been completed, signed, and dated?	____	____	____

	Yes	No	N/A
12. Have all questions, exceptions, or notes, if any, posed during the audit been followed up and resolved, including consideration of the views obtained from responsible officials of the organization, program, activity, or function audited concerning the auditor's findings, conclusions, and recommendations?	____	____	____
13. Did the firm obtain a timely appropriate letter of representation from management? (SAS No. 19 [AU section 333])	____	____	____
14. Does it appear that appropriate consideration was given to all past adjustments and to the risk that the current period's financial statements are materially misstated? (SAS No. 47 [AU section 312])	____	____	____
15. Were errors, irregularities, or illegal acts, if any, followed up in accordance with SAS Nos. 53 and 54 (AU sections 316 and 317)?	____	____	____
16. Have reportable conditions, if any, in the internal control been communicated to the audit committee or to individuals with a level of authority and responsibility equivalent to an audit committee in organizations that do not have one? (SAS No. 60 [AU section 325])	____	____	____
17. If required by firm policy, was an appropriate engagement letter issued?	____	____	____
18. Were communications of internal control related matters issued in accordance with SAS No. 60 (AU section 325)?	____	____	____
19. Was consideration given to the work of internal auditors in determining the scope of the audit in accordance with SAS No. 65 (AU section 322)?	____	____	____
20. If specialized skills were used (e.g., computer auditing, statistical sampling, etc.), were they properly evaluated by persons with training in these areas? (SAS No. 39 [AU section 350])	____	____	____
21. Did the planning and execution of the engagement include an assessment of the risk of errors and irregularities and management's ability to override control procedures? (SAS No. 53 [AU section 316])	____	____	____
22. Did the audit strategy and expected conduct and scope of the audit reflect the following assessments:			
a. The risk of material misstatement in the financial statements?	____	____	____
b. The risk of management misrepresentation?	____	____	____
23. Was the audit designed to provide reasonable assurance of detecting material misstatements?	____	____	____
24. If it has been determined that an audit adjustment is, or may be, an irregularity but it has also been determined that the effect on the financial statements would not be material, has the following been performed:			
a. Referral of the matter to an appropriate level of management that is at least one level above those involved?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
b. Obtain satisfaction that, in view of the organizational position of the likely perpetrator, the irregularity has no implications for other aspects of the audit or that those implications have been adequately considered?	____	____	____
25. If it has been determined that an audit adjustment is, or may be, an irregularity and the auditor has either determined that the effect could be material or has been unable to evaluate the potential materiality, has the following been performed?			
a. Consideration of the implications for other aspects of the audit.	____	____	____
b. Discussions of the matter and the approach to further investigate the irregularity with an appropriate level of management that is at least one level above those involved.	____	____	____
c. Obtaining sufficient competent evidential matter to determine whether, in fact, material irregularities exist and, if so, their effect.	____	____	____
d. If appropriate, suggestions that the client consult with legal counsel on matters concerning questions of law.	____	____	____
26. When it has been concluded that an illegal act has or is likely to have occurred, have the following been considered?			
a. The effect on the financial statements.	____	____	____
b. The implications for other aspects of the audit.	____	____	____
c. Communication with the audit committee.	____	____	____
d. The effect on the auditor's report.	____	____	____
27. If the engagement included the use of the work (domestic or international) of another office, correspondent, or affiliate:			
a. Do the instructions to the other office or firm appear adequate?	____	____	____
b. Does it appear that control exercised over the work of others through supervision and review was adequate?	____	____	____
c. Was there appropriate follow-up of open matters?	____	____	____
d. Were appropriate inquiries made as to its professional reputation?	____	____	____
28. Does the firm's disclosure checklist document that the audit report is properly prepared and that the financial statements are fairly stated?	____	____	____
29. Were matters related to the conduct of the audit communicated to those who have responsibility for oversight of the financial reporting process? (SAS No. 61 [AU section 380])?	____	____	____
30. Was the applicable disclosure checklist completed?	____	____	____

II. Working Paper Areas

A. .020 Cash

1. Was due consideration give to cash transactions shortly before and shortly after the balance sheet date to determine that transactions were recorded in the proper period?	____	____	____

	Yes	No	N/A
2. Were bank accounts confirmed at the audit date and were reconciling items existing at the balance sheet date cleared by reference to subsequent statements obtained directly from the bank?	____	____	____
3. Do the working papers indicate that the following were considered?			
a. Restrictions on cash balances.	____	____	____
b. Confirmation of bank credit arrangements such as compensating balances.	____	____	____
c. Review of confirmation responses for indication of related party transactions.	____	____	____
4. Based on the assessed level of control risk, do the substantive tests of cash appear adequate?	____	____	____
B. .030 Receivables			
1. Was a summary prepared (or obtained) properly classifying receivables (i.e., notes and accounts receivable; trade; officers, directors, and employees; parent and subsidiary companies; other related party transactions; etc.)?	____	____	____
2. If accounts receivable are not confirmed, has the reason been documented? One of the following is acceptable:			
a. Accounts receivable are immaterial to the financial statements.	____	____	____
b. Use of confirmations would be ineffective.	____	____	____
c. Combined assessed level of inherent and control risk is low (as addressed in the internal control section), and the assessed level, in conjunction with other evidence (analytical procedures or other substantive tests) reduced audit risk to an acceptably low level for applicable financial statement assertions.	____	____	____
3. Were accounts receivable confirmations sent out and appropriate follow-up steps taken?	____	____	____
4. If confirmation work was performed prior to year-end, is there evidence that an adequate review was made of transactions from the confirmation date to the balance sheet date?	____	____	____
5. If a significant number and amount of accounts receivable confirmations were not sent out, is there evidence that other auditing procedures were performed?	____	____	____
6. Were significant notes receivable confirmed as of the audit date?	____	____	____
7. Were the results of confirmation procedures summarized in the working papers?	____	____	____
8. Was collateral (if any) for receivables examined with respect to existence, ownership, and value?	____	____	____
9. Were adequate tests made of discounts and allowances?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
10. Was the reasonableness of allowances for doubtful accounts covered in the working papers and collectibility of receivables adequately considered?	____	____	____
11. Is there evidence in the working papers that inquiry was made and consideration given to whether receivables are pledged or factored?	____	____	____
12. Was receivables work coordinated with test of sales including inventory cut-off tests?	____	____	____
13. Are notes receivable accounted for to reasonably represent the present value of the consideration exchanged and at an appropriate interest rate? (APB Opinion No. 21 [AC I69])	____	____	____
14. Based on the assessed level of control risk, do the substantive tests of receivables appear adequate?	____	____	____
C. .040 Inventories			
1. Was an inventory summary prepared (or obtained) showing basis (e.g., "cost," "market," "LIFO," "FIFO," etc.) with respect to the various classifications of inventory (e.g., finished goods, work-in-process, raw materials, etc.)?	____	____	____
2. Where the physical inventory is taken at a date other than the balance-sheet date (or where rotating procedures are used), do the working papers indicate that consideration was given to inventory transactions between the inventory date(s) and the balance-sheet date?	____	____	____
3. Do the working papers contain evidence that counts were correctly made and recorded (i.e., was control maintained over inventory tags or count sheets) and were test count quantities reconciled with counts reflected in final inventory?	____	____	____
4. Do the working papers indicate that adequate tests were made of:			
a. The clerical accuracy of inventory footings?	____	____	____
b. Costing methods and substantiation of costs used in pricing all elements (raw materials, work-in-process, finished goods) of the inventory?	____	____	____
5. Do the working papers indicate that a lower of cost or market test was performed (including obsolescence)?	____	____	____
6. If perpetual inventory records are maintained, do the working papers indicate that differences disclosed by the client's physical inventory (or cycle counts) are properly reflected in the accounts?	____	____	____
7. Was an examination of purchase and sales commitments made, including consideration as to any possible adverse effects?	____	____	____
8. Were appropriate inventory cut-off tests performed?	____	____	____

	Yes	No	N/A
9. Where applicable, were gross profit percentage tests employed to check overall valuation of inventories?	____	____	____
10. Where the physical inventory in the hands of others was not observed, were inventory confirmations received (i.e., inventory in public warehouses, on consignment, etc.)?	____	____	____
11. Do the working papers indicate that steps were performed to determine if any inventory is pledged?	____	____	____
12. Based on the assessed level of control risk, do the substantive tests of inventory appear adequate?	____	____	____
D. .050 Investments			
1. Was a summary schedule prepared (or obtained) and details examined with respect to description, purchase price and data, changes during period, classification of investment income market value, etc., of investments?	____	____	____
2. Were all securities (including stock certificates of subsidiary companies) examined or confirmed?	____	____	____
3. Was investigation made of carrying value and possible cost impairment of long-term investments?	____	____	____
4. Do working papers indicate that consideration was given to indications that investments were pledged?	____	____	____
5. Were financial statements and other information reviewed to support the amounts presented for investments accounted for using the equity method?	____	____	____
6. Do the working papers indicate that adequate evidential matter has been accumulated for long-term investments?	____	____	____
7. Based on the assessed level of control risks, do the substantive tests of investments appear adequate?	____	____	____
E. .060 Prepaid Expenses, Intangible Assets, Deferred Charges, Etc.			
1. Were adequate tests made and/or confirmations received for all material:			
a. Prepaid expenses?	____	____	____
b. Intangible assets?	____	____	____
c. Deferred charges?	____	____	____
d. Other?	____	____	____
2. For prepayments, intangibles, and deferred charges, is there adequate support for deferral and amortization (or lack thereof)?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
3. If insurance policies were pledged as collateral or subjected to premium financing, were the related loans properly accounted for?	____	____	____
4. Based on the assessed level of control risk, do the substantive tests of prepaid expenses, intangible assets, deferred charges, etc., appear adequate?	____	____	____
F. .070 Property, Plant, and Equipment			
1. Was a summary schedule prepared (or obtained) to show beginning balances, changes during the period, and ending balances for:			
a. Property, plant, and equipment?	____	____	____
b. Accumulated depreciation?	____	____	____
2. Do tests appear adequate with respect to:			
a. Additions:			
(1) Examination of supporting documents?	____	____	____
(2) Physical inspection?	____	____	____
b. Retirement, etc. (including examination of miscellaneous income, scrap sales, etc.)?	____	____	____
c. The adequacy of current and accumulated provisions for depreciation and depletion?	____	____	____
d. Compliance with control procedures?	____	____	____
e. Status of idle facilities?	____	____	____
3. Do the working papers indicate the presence of liens on property?	____	____	____
4. Were differences between book and tax depreciation reconciled?	____	____	____
5. Was investigation made of possible impairment?	____	____	____
6. Based on the assessed level of control risk, do the substantive tests of property, plant, and equipment appear adequate?	____	____	____
G. .080 Current Liabilities			
1. Were accounts payable adequately tested for propriety?	____	____	____
2. Was an adequate test made of subsequent transactions (i.e., cash disbursements, voucher register entries, vouchers, unpaid invoices, etc.) to determine if any material unrecorded liabilities existed?	____	____	____
3. Was the payable work correlated with the purchase cutoff examination?	____	____	____
4. Was consideration given to costs and expenses that might require accrual (e.g., compensated absences), and to whether accrued expenses were reasonably stated?	____	____	____
5. Based on the assessed level of control risk, do the substantive tests of liabilities appear adequate?	____	____	____

	Yes	No	N/A
H. .090 Long-Term Debt			
1. Were confirmations received for significant debt obligations, together with verification of interest rates, repayment period, etc.?	____	____	____
2. Is there evidence that covenants to long-term debt obligations are being complied with?	____	____	____
3. Have leases been examined to determine that capital leases have been properly accounted for?	____	____	____
4. Do the working papers include evidence as to compliance with any loan restrictions?	____	____	____
5. Based on the assessed level of control risk, do the substantive tests of long-term debt appear adequate?	____	____	____
I. .100 Deferred Credits			
1. Do the working papers indicate that:			
a. The basis of deferring income is reasonable and is on a consistent basis from year to year?	____	____	____
b. Deferrals have been established on a reasonable basis?	____	____	____
2. Based on the assessed level of control risk, do the substantive tests of deferred credits appear adequate?	____	____	____
J. .110 Income Taxes			
1. Were current and deferred tax accrual accounts and related provisions analyzed and reviewed as to adequacy?	____	____	____
2. Do the workpapers document the determination of the adequacy of the income tax accruals and provisions in accordance with federal, state, local regulations and GAAP and any possible adjustments required for:			
a. Tax positions taken by the client that might be challenged by the taxing authorities?	____	____	____
b. Possible assessments, penalties or interest indicated by tax return examinations completed during the year or in progress, including similar adjustments applicable to years not yet examined?	____	____	____
3. Based on the review of the financial statements and working papers and, if necessary, discussions with engagement personnel, does it appear tax matters were adequately considered?	____	____	____
4. Based on the assessed level of control risk, do the substantive tests of income taxes appear adequate?	____	____	____
K. .120 Commitments and Contingencies			
1. Do the working papers include indication of the following?			
a. Inspection of minutes of meetings of the stockholders, board of directors, and executive and other committees of the board.	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
b. Inspection of contracts, loan agreements, leases, and correspondence from taxing and other governmental agencies, and similar documents.	____	____	____
c. Accumulation and analysis of confirmation responses from banks and lawyers.	____	____	____
d. Inquiry and discussion with management (including management's written representations concerning liabilities, and litigation, claims, and assessments).	____	____	____
e. Inspection of other documents for possible guarantees by the client.	____	____	____
2. Is there indication that procedures were performed to uncover the need for recording or disclosure of events subsequent to the date of the financial statements?	____	____	____
3. Based on the assessed level of control risk, do the substantive tests of commitments and contingencies appear adequate?	____	____	____
L. .130 Capital Accounts			
1. Were changes in capitalization checked to authorizations?	____	____	____
2. Do the working papers indicate that adequate inquiries were made as to:			
a. Stock options?	____	____	____
b. Warrants?	____	____	____
c. Rights?	____	____	____
d. Redemptions?	____	____	____
e. Conversion privileges?	____	____	____
3. Based on the assessed level of control risk, do the substantive tests of capital accounts appear adequate?	____	____	____
M. .140 Income and Expenses			
1. Were tests made of payrolls, including account distribution?	____	____	____
2. With regard to pension and profit sharing plans (including impact of ERISA), do tests of expenses and liabilities appear adequate?	____	____	____
3. Were revenue and expenses for the period compared with those of the preceding period and reviewed for reasonableness with significant fluctuations explained?	____	____	____
4. Was adequate consideration given to review of the client's revenue recognition policy and unusual sales transactions?	____	____	____
5. Has adequate consideration been given to loss contingencies in accordance with FASB Statements No. 5 (AC C59)?	____	____	____
6. Based upon the assessed level of control risk, do the substantive tests (review, analysis, and casting) of income and expense appear adequate?	____	____	____

	Yes	No	N/A
N. .150 Other			
1. Were procedures applied to supplementary information in accordance with SAS No. 52 (AU section 558), as applicable?	____	____	____
2. If the work of a specialist was used, was the effect of the specialist's work on the auditor's report considered in accordance with SAS No. 73 (AU section 336)?	____	____	____
3. Were specific procedures applied for determining the existence of related parties and examining identified related party transactions? (SAS No 45 [AU section 334])	____	____	____
4. Was the guidance in SAS No. 47 (AU section 312) regarding audit risk and materiality considered during the planning and performance of the engagement?	____	____	____

This audit engagement has been completed in accordance with professional standards and firm policy.

AAM Section 9210
Partner's Engagement Review Program

.01

		Yes	No	N/A
a.	Were all issues regarding independence considered including policies and procedures and reporting considered?	____	____	____
b.	Were all issues relating to assigning personnel to engagements including policies, procedures, scheduling, staffing, and training considered?	____	____	____
c.	If outside consultation was required, was proper documentation made and differences resolved in accordance with firm policy?	____	____	____
d.	Was engagement planning adequate and did it cover staff and specific industry issues?	____	____	____
e.	Were all forms, checklists, and questionnaires adequately completed?	____	____	____
f.	Were the financial statements reviewed to ensure compliance with professional standards, authoritative literature, and firm policy?	____	____	____
g.	Did the firm comply with its quality review guidelines and firm policy and procedures regarding acceptance and continuance of clients?	____	____	____
h.	Were all necessary inquiries and communications with the predecessor accountant made and was the firm satisfied with the responses?	____	____	____
i.	Did the firm obtain timely and appropriate responses from the auditee's attorney concerning litigation, claims, and assessments?	____	____	____
j.	Have all questions, exceptions, or notes, if any, posed during the audit been resolved, including consideration of the views obtained from responsible officials of the organization, program, activity, or function audited concerning the auditor's findings, conclusions, and recommendations?	____	____	____
k.	Did the firm obtain a timely appropriate letter of representation from management?	____	____	____
l.	Does it appear that appropriate consideration was given to all past adjustments and to the risk that the current period's financial statements are materially misstated?	____	____	____
m.	Were errors, irregularities, illegal acts, and reportable conditions adequately followed up and communicated including reporting, communication, other audit effects, legal consultation, etc.?	____	____	____

	Yes	No	N/A
n. Does the firm's disclosure checklist document that the audit report is properly prepared and that the financial statements are fairly stated?	____	____	____
o. Were matters related to the conduct of the audit communicated to those who have responsibility for oversight of the financial reporting process?	____	____	____
p. Did the partner sign the In-Charge Engagement Review Program?	____	____	____

This audit engagement has been completed in accordance with professional standards and firm policy.

AAM Section 9220

Partner's Engagement Review Program Supplement for Not-for-Profit Organizations

To be completed in conjunction with Partner's Engagement Review Program [AAM section 9210]

	Yes	No	N/A
I. General Audit Procedures			
A. .010 General			
[No additional General Audit Procedures are required as part of this supplement.]			
II. Working Paper Areas			
A. .020 Cash			
1. Do the working papers indicate that the following were considered?			
a. Confirmation of liabilities and contingent liabilities to banks.	____	____	____
b. Authorization for interfund cash transactions.	____	____	____
c. Determination that all cash accounts have been identified and appropriately recorded.	____	____	____
B. .030 Receivables			
1. Were procedures performed to provide evidence that pledged receivables are properly recorded in the appropriate funds?	____	____	____
C. .040 Investments			
1. Were income and realized and unrealized gains and losses from investments examined for proper allocation to the individual funds?	____	____	____
2. Do the working papers indicate that risk of loss on repurchase agreements was properly considered?	____	____	____
3. Do the working papers indicate that repurchase security transactions were reviewed for consistency with the disclosures of the terms or circumstances of the transactions?	____	____	____
D. .050 Collections of Works of Art and Similar Items			
1. If the collection is considered inexhaustible (i.e., exhibits owned by museums, art galleries, botanical gardens, etc.) and has been capitalized, do the working papers indicate that the auditor tested the reasonableness of the collection's carrying value?	____	____	____

	Yes	No	N/A
2. If the collection is considered exhaustible and has been capitalized, do the working papers indicate that the auditor tested the reasonableness of the collection's carrying value and related amortization?	____	____	____
3. Are the tests adequate with respect to acquisitions and deaccessions?	____	____	____
4. If the collection is capitalized:			
a. Were physical inventories observed at all locations where relatively large amounts are located?	____	____	____
b. Do the working papers contain evidence that counts were correctly made and recorded (i.e., was control over inventory tags or count sheets maintained) and were test count quantities reconciled with the quantities reflected in the final inventory?	____	____	____
5. If the collection is considered inexhaustible and has been capitalized, do the working papers indicate that the auditor:			
a. Evaluated the internal controls over the collection?	____	____	____
b. Observed a physical inventory at all locations where large amounts are located?	____	____	____
6. Based on the assessed level of control risk, do the substantive tests of collections of works of art and similar items appear adequate?	____	____	____
E. .060 Property, Plant, and Equipment			
1. Was a review made to determine that capital expenditures are classified in the proper fund accounts?	____	____	____
F. .070 Liabilities			
1. Were liabilities properly classified as current or long-term and in the proper fund?	____	____	____
2. Were procedures performed to determine whether tax deferred annuity plans are appropriately calculated to conform with GAAP and IRS regulations?	____	____	____
3. Was consideration given to any liabilities (including the effect of any temporary differences) resulting from the federal excise tax on investment income and any federal and state taxes on unrelated business income?	____	____	____
4. Do the tests of interfund borrowings appear adequate with respect to:			
a. Legal restrictions, if any, on such borrowings?	____	____	____
b. Authorization?	____	____	____
c. Classification?	____	____	____
d. Collectibility of amounts due from other funds?	____	____	____
e. Appropriateness of interest accruals and payments?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
G. .080 Deferred Revenue			
1. Do the working papers indicate that consideration was given to whether the basis of deferring revenue is reasonable and consistent with the donors' or grantors' restrictions?	____	____	____
2. Was consideration given to matching requirements, if any?	____	____	____
3. Do the working papers indicate that consideration was given to the appropriateness of the amounts of restricted gifts, grants, bequests, donations, or other income recognized as current revenue or support?	____	____	____
4. Based on the assessed level of control risk, do the substantive tests of deferred revenue appear adequate?	____	____	____
H. .090 Commitments and Contingencies			
1. Did the auditor consider evidence of the entity's activities (such as lobbying) which might cause the entity to lose its tax exempt status or be subject to penalties or taxes?	____	____	____
2. If the entity is a private foundation, as defined by IRC section 509, did the auditor determine whether the entity complied with IRS regulations concerning required distribution of income and prohibited activities?	____	____	____
I. .100 Fund Balance			
1. Where appropriate, were authorizations of changes in reserves and designated balances examined?	____	____	____
2. Do the working papers indicate that there were adequate inquiries, where appropriate, as to proper classification, description and disclosure of components of the fund balance?	____	____	____
3. Do the working papers indicate that fund transfers were properly approved and recorded?	____	____	____
4. If an endowment fund is maintained, do the working papers indicate that fund income is distributed to unrestricted and restricted funds in accordance with donors' stipulations?	____	____	____
5. Based on the assessed level of control risk do the substantive tests of fund balances appear adequate?	____	____	____
J. .110 Revenues, Expenses, Support, and Capital Additions			
1. Were revenues and expenses for the period compared with those of the preceding period and reviewed for reasonableness and were significant fluctuations explained?	____	____	____
2. Was adequate consideration given to:			
a. The entity's revenue recognition policy?	____	____	____
b. Income recognition on transactions where the earnings process is not complete?	____	____	____

	Yes	No	N/A
3. Do the working papers indicate that consideration was given to the valuation and classification of revenue derived from service fees, such as subscription and membership income, and sales of publications and other items?	____	____	____
4. If the entity is reimbursed by a third party for costs incurred in connection with providing services to others:			
a. Were pertinent sections of significant third party contracts reviewed to determine the basis for reimbursement?	____	____	____
b. Were cost reimbursement reports and the underlying support reviewed?	____	____	____
c. Were appropriate allocations made of indirect costs among the entity's programs?	____	____	____
5. Do the working papers indicate that the auditor considered actual receipt of, rights to, and any restrictions placed on amounts received during the current period from:			
a. Cash contributions?	____	____	____
b. Donated services?	____	____	____
c. Gifts of securities, materials, facilities, and other nonmonetary items?	____	____	____
d. Future interests and interest free loans?	____	____	____
6. If expenses are classified by function, did the auditor adequately test the classifications and allocations?	____	____	____
7. If grants are awarded to other organizations, did the auditor review:			
a. The classification of the grants?	____	____	____
b. The effects of the grantees' compliance or noncompliance with performance requirements?	____	____	____
8. Were tests of payrolls performed, including account distribution?	____	____	____
9. With regard to pension plans, do the tests made of the expense and liabilities appear adequate?	____	____	____
10. Based upon the assessed level of control risk, did the substantive tests (review, analysis, and testing) of revenues and expenditures/expense appear adequate?	____	____	____

K. .120 Other

1. If the entity is affiliated or otherwise financially related to other entities, did the auditor consider the need for combined financial statements or disclosure of the relationship?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A

III. Audits of Governmental Grantees

Note: These questions are derived from the U.S. General Accounting Office's (GAO) *Government Auditing Standards* ("Yellow Book") and the Office of Management and Budget, Circular A-110 (*Uniform Administrative Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations*).

A. .130 General

1. If the audit was required to be conducted in accordance with the *Government Auditing Standards*, do the auditor's report(s) include references to *Government Auditing Standards*, and appropriately cover:
   - *a.* The financial statements, including, where presented, the combining and individual fund financial statements? ____ ____ ____
   - *b.* Tests of controls based solely on the evaluation of the effectiveness of the controls made as part of the audit of the financial statements? ____ ____ ____
   - *c.* Compliance with finance-related legal and contractual provisions, including a summary of questioned costs and/or instances of noncompliance? ____ ____ ____
   - *d.* Instances or indications of illegal acts that could result in criminal prosecution of the top officials of the entity arranging the audit? ____ ____ ____
2. If required, did the auditor's report on internal control identify:
   - *a.* The scope of the auditor's work in obtaining an understanding of the internal control structure and in assessing control risk? ____ ____ ____
   - *b.* The entity's significant internal control structure including those controls established to ensure compliance with laws and regulations that have a material impact on the financial statements? ____ ____ ____
   - *c.* The reportable conditions, including the identification of material weaknesses identified as a result of the auditor's work in understanding and assessing control risk? ____ ____ ____
3. If required, did the auditor's report on compliance include:
   - *a.* A statement of positive assurance with respect to those items tested for compliance with applicable laws and regulations? ____ ____ ____
   - *b.* Negative assurance on those items not tested? ____ ____ ____
   - *c.* A summary of material instances of noncompliance? ____ ____ ____
4. If required by contractual obligations, were findings presented in accordance with the guidance in the *Government Auditing Standards* regarding reporting on economy and efficiency audits and program results audits? ____ ____ ____
5. Was interfund activity properly reviewed and were differences between total interfund receivables and total interfund payables investigated and resolved? ____ ____ ____

	Yes	No	N/A
6. If applicable, were adequate tests of controls with applicable laws and regulations made?	____	____	____
7. Were all reportable conditions in the internal control structure and all identified instances of noncompliance with applicable laws and regulations:			
a. Adequately evaluated and documented?	____	____	____
b. Appropriately reported in accordance with applicable standards? (SAS No. 60 [AU section 325]; GAO's *Government Auditing Standards*, paragraphs 5-26 through 5-28; OMB A-110, Attachment F)	____	____	____
8. Do the working papers indicate that consideration was given to prior audits of government financial assistance programs that disclosed questionable or disallowed costs, or instance of noncompliance?	____	____	____

This audit engagement has been completed in accordance with professional standards and firm policy.

AAM Section 9230

Partner's Engagement Review Program Supplement for Banks

To be completed in conjunction with Partner's Engagement Review Program [AAM section 9210]

	Yes	No	N/A
I. General Procedures			
A. .010 General			
1. Were FIRREA regulations considered in planning the audit engagement?	____	____	____
II. Working Paper Areas			
A. .020 General			
1. Do the working papers document the consideration of the results of inquiries, readings, excerpts or other evidence of an understanding of regulatory examinations, their findings and actions and the recognition of the above in planning the audit?	____	____	____
2. Did the engagement team obtain an adequate understanding of those factors that have a significant effect on the bank's business (i.e., interest rates, liquidity, off-balance sheet financing)?	____	____	____
3. If the client engaged in the following types of transactions, was there a review of the propriety of the accounting and recording for:			
a. Loan originations?	____	____	____
b. Loan commitments?	____	____	____
c. Fees?	____	____	____
d. Loan refinancing and restructuring?	____	____	____
e. Transfers between trading account and investment securities?	____	____	____
f. Wash sale transactions?	____	____	____
g. Hedging transactions, including interest rate swaps and interest rate futures?	____	____	____
h. Coupon stripping?	____	____	____
i. Adjusted price forward placement trades?	____	____	____
j. Reposition swaps?	____	____	____
k. Repos to maturity?	____	____	____
l. Dollar repos?	____	____	____
m. Commitments for the purchase or sale of securities?	____	____	____

	Yes	No	N/A
n. Industrial development bonds?	____	____	____
o. Purchase or sale of options?	____	____	____
p. Purchase or sale of securities?	____	____	____
4. Did audit planning and the implementation of audit procedures adequately consider:			
a. Off-balance sheet transactions?	____	____	____
b. The appropriate accounting for investments?	____	____	____
c. Related party transactions?	____	____	____
d. Regulatory examination reports?	____	____	____
e. Regulatory agreements?	____	____	____
f. Apparent fraud and insider abuse?	____	____	____
5. Did the engagement team consider the risks to the bank of possible violations of regulations such as the following?			
a. The Bank Secrecy Act.	____	____	____
b. Legal lending limit regulations and interest rates charged.	____	____	____
c. Affiliated party transactions.	____	____	____
d. The current minimum capital ratio requirements.	____	____	____
e. FIRREA.	____	____	____
6. Was the following considered in connection with foreign exchange transactions?			
a. Reasonable assurance that material commitments and contingent liabilities related to international operations have been properly recorded and disclosed.	____	____	____
b. Reasonable assurance that gains and losses from foreign exchange activities of the international department are properly recorded and disclosed.	____	____	____
B. .030 Cash			
1. Were bank accounts in the financial institutions confirmed at the audit date and were reconciling items existing at the balance-sheet date cleared by reference to subsequent statements obtained directly from the financial institutions?	____	____	____
2. Do the working papers indicate that the following were considered?	____	____	____
a. Confirmation of liabilities and contingent liabilities to other banks.	____	____	____
b. Proper recording of interest.	____	____	____
3. Do the workpapers indicate whether cash on hand represents currency and coins on hand?	____	____	____
4. Was it determined whether clearings, exchanges and in-transit items represent valid claims against the drawee bank?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
5. Do the workpapers reflect whether cash items (checks cashed after close of business, maturing coupons and bonds, returned checks and other items held temporarily pending their liquidation) are properly classified?	____	____	____
C. .040 Investment and Trading Securities			
1. Do the workpapers indicate physical evidence of the ownership of securities on hand or held in custody or safekeeping by others for the account of the bank?	____	____	____
2. Do the workpapers indicate whether interest and dividend income and security gains and losses were properly recorded?	____	____	____
3. Do the workpapers indicate whether investments have suffered a permanent reduction in recorded value?	____	____	____
4. Do the workpapers indicate whether allowances for losses have been provided where necessary?	____	____	____
5. Do the workpapers indicate whether securities have been properly identified as investment or trading securities and valued appropriately?	____	____	____
6. Do the workpapers indicate whether amounts for investment securities and the related income, gains and losses are properly presented in the financial statements, including disclosures of amounts pledged, market value and other related disclosures?	____	____	____
7. Were substantive tests of investment and trading securities adequate based on the assessed level of control risk?	____	____	____
D. .050 Federal Funds and Repurchase/Reverse Repurchase Agreements			
1. Do the workpapers indicate whether federal funds and repurchase/reverse repurchase agreements represent valid claims against the borrower or obligations to the lender?	____	____	____
2. Do the workpapers indicate whether amounts shown on the financial statements are properly classified and described?	____	____	____
3. Based on the assessed level of control risk were substantive tests of federal funds and repurchase/reverse repurchase agreements and trading securities adequate?	____	____	____
E. .060 Loans			
1. Was an evaluation of the adequacy of the allowance for loan losses and the selection of loans to be evaluated performed and documented?	____	____	____
2. Did the evaluation in 1 above include:			
a. The bank's lending policies and procedures including its control over loan file documentation and maintenance?	____	____	____
b. Consideration of the qualification of the bank loan officers?	____	____	____

	Yes	No	N/A
c. Consideration of the effectiveness of the bank's internal audit and loan review program?	____	____	____
d. Consideration of the results of prior years' examinations and industry statistics?	____	____	____
e. Consideration of overall portfolio mix (industry and location), loan loss experience, and charge-off policy?	____	____	____
3. Was consideration given to the relative degrees of inherent risk, by type, for: unsecured, depressed areas or industries; concentration or political risk; geographic or economic risks?	____	____	____
4. Was consideration given to the participations purchased or sold?	____	____	____
5. Was consideration given to overdrafts?	____	____	____
6. Was consideration given to the accounting for and disclosures of related party transactions?	____	____	____
7. Was consideration given to the extent to which loan renewals and extensions are used to maintain loans on a current basis?	____	____	____
8. Was consideration given to appraisals obtained on originations and foreclosures, including the qualifications, independence and findings of the appraisers?	____	____	____
9. Was consideration given to the disclosure of indirect (off-balance sheet) liabilities such as loan commitments, interest rate swaps, loans sold with recourse and standby letters of credit as well as direct liabilities?	____	____	____
10. Were management's responses to discussions concerning the adequacy of the allowance appropriate?	____	____	____
11. Was consideration given to the propriety of acquisition, development, and construction loans? (February 1986 AICPA Notice to Practitioners)	____	____	____
12. Was consideration given to the use of watch lists, delinquency reports and other sources of potential problems including troubled debt restructurings and in-substance foreclosures?	____	____	____
13. Were individual loan files reviewed, including borrowers financial statements, evidence of collateral and cash flow information?	____	____	____
14. Did the final assessment of the adequacy of loan losses consider specific loans and historical trends?	____	____	____
15. Was there comprehensive documentation to 14 above?	____	____	____
16. If real estate or other assets acquired through foreclosure were significant to the client:			
a. Was the carrying value at the time of foreclosure evaluated and properly classified in the financial statements?	____	____	____
b. Was the continuing carrying value assessed?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
c. Were loans restructured by the client reviewed for proper recording under the principles of FASB Statement No. 15 (AC D22)?	____	____	____
d. Was the accounting for in-substance foreclosures reviewed to determine that they were accounted for as troubled debt restructuring?	____	____	____
17. For loans, was the following considered?			
a. The bank's compliance with its internal control, i.e., approval, reports, documentation, disbursement, and collection.	____	____	____
b. Selection of a sample from all significant loan areas.	____	____	____
c. Did the tests include executed notes, loan applications, financial statements of borrowers, chattels, other credit information and approvals.	____	____	____
d. Confirmation with bank customers.	____	____	____
e. Proper accounting recognition of unearned income, interest income, recognition of acquisition and other fees such as "points".	____	____	____
f. Tests of interest income to average loan balance and yield to interest rates in effect.	____	____	____
g. Testing of related party transactions and conflicts of interest.	____	____	____
h. Testing of the bank's credit card operations.	____	____	____
i. Testing of lease financing operations.	____	____	____
j. Testing of loan participations.	____	____	____
k. Review of underlying collateral.	____	____	____
18. Based on the assessed level of control risk, were substantive tests of loans adequate?	____	____	____
F. .070 Deposits			
1. Do the workpapers indicate whether deposits are recorded at the proper amounts, segregated as to type and represent valid claims?	____	____	____
2. Was it determined whether the related accrued interest and interest expense is stated on a reasonable and consistent basis?	____	____	____
3. Was it determined whether the amounts shown on the financial statements are properly classified and adequately described?	____	____	____
4. Based on the assessed level of control risk were substantive tests of deposits adequate?	____	____	____
G. .080 Director's Examinations			
1. Because the procedures may be limited in a director's examination, were the nature and extent of such procedures clearly set forth in the engagement letter?	____	____	____

	Yes	No	N/A
2. Were state requirements considered in determining the scope of the audit?	____	____	____
3. If the examination consisted of performing certain agreed-upon procedures did the firm's report comply with the provisions of SAS No. 35 (AU section 622)?	____	____	____

H. .090 Trust Operations

1. Were the audit procedures directed to uncover the existence of contingent liabilities arising from trust department operations?	____	____	____
2. Did the procedures include a determination of whether administrative activities (including execution of trust instructions), safekeeping of assets, recordkeeping, tax, and reporting of the trust department were appropriate to meet the trust's fiduciary responsibilities?	____	____	____
3. Do the workpapers indicate whether trust assets exist, are recorded as trust assets, segregated from bank assets and are accounted for properly?	____	____	____
4. If other independent auditors or internal auditors audit the trust operations, were appropriate procedures performed to justify reliance on them?	____	____	____

AAM Section 9500
Report Processing

Drafting the Report

.01 This section provides guidance for preparing and processing the financial statements and notes and the appropriate auditor's report.

.02 Auditors should establish policies and procedures that would define responsibility regarding the preparation and review of the financial statements and the notes thereto and preparation of the auditor's report. (See AAM section 10,100 for a detailed discussion of the auditor's report.)

Uniformity

.03 Strict uniformity may stifle creative thinking, but a consistent format adds quality to the financial statement notes and auditor's report (the "report").

a. The client's name should appear at the top of every statement with identical spelling and punctuation. The certificate of incorporation should be inspected to determine the exact name of the corporation. Accuracy in seemingly small matters, such as whether "the" is part of the name, the word "Company" or "Incorporated" is abbreviated or spelled out, or commas are part of the name, is important to the accountant's reputation.

b. Descriptive phraseology should be uniform. If the phrase "cost of goods sold" is used in the income statement, then a schedule of these costs should show "cost of goods sold," not "cost of sales."

c. The manner in which the date or period covered is indicated should also be uniform. If the income statement is headed "for the year ended December 31, 19___," then all supporting schedules should be headed that way, rather than "for the year 19___."

d. Schedule and statement headings should conform to a pattern. For example, if "schedule of cost of goods sold" is used, then all other schedules should begin with "schedule of."

e. Statement and schedule headings should be the same in the letter, table of contents, index, and other references.

f. Each page should be well balanced, paragraphs should break in the right places, tables should be centered and not broken except when a table is longer than a page, page numbers should be in the same place on each sheet, type should be clean and alignment even, and there should be no "strikeovers" or visible erasures.

g. As part of firm policy, the following should be standardized:

Title	Captions
Indexing	Spacing
Salutation	Indentation
Page Numbering	Paragraphing
Closing and Signing	Capitalization
Dating	Underscoring
Whole Dollar Reporting	Punctuation
Headings	Dollar Signs

Double or Single Spacing

Draft of Report

.04 In some cases a draft of the report, clearly identified as a draft, can be used effectively to afford the client an opportunity to comment on the report before it is in final form.

Report Production

.05 A *report guide sheet* usually accompanies all reports submitted for processing. Included in the report guide sheet is the basic information which relates to the specific client, such as:

a. Client name

b. Audit date

c. Engagement partner and manager

d. Date audit commenced

e. Date audit completed

f. Date report submitted for review

g. Date review completed

h. Date submitted for typing

i. Date submitted for checking

j. Date sent to client

k. Special comments, such as "rush," "date promised to client," and "hold for confirmation."

.06 The purpose of the report guide sheet is to enable the audit team to know the status of the report at all times, and to ascertain if there are any time lags in the processing of the report. The following procedures are used in its preparation.

Engagement information. The in-charge accountant enters the engagement information, delivery instructions, and "hold items" (items to be cleared prior to releasing report). He signs the report guide sheet as initial reviewer.

Review. The report is approved at various levels or review. If there is more than one reviewer (for example, two department reviewers for phases of a large job), the primary reviewer should sign the report guide sheet. If another partner or manager performed the entire review in the absence of the primary reviewer, then such other reviewer should sign the report guide sheet as overall reviewer.

Processing. The various processing levels are signed off. If more than one typist is involved, the head of the typing department or the primary typist may sign the report guide sheet. If more than one person is involved in comparing and proofing, the person primarily responsible should sign the report guide sheet. The review partner or his delegate should sign as final reader.

Final release. The person who signs for final release must ascertain that all other required signatures are on the report guide sheet before releasing the report.

Report production. The reverse side of the report guide sheet is usually completed by the in-charge accountant. A photocopy may be given to the report production department as advance notice of production requirements (for example, where numerous printed covers will be needed).

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.07 The report guide sheet is bound with the operating office's file copy of the report. With the busy atmosphere prevailing at most firms, it is of vital importance that all work as it moves through the production process be under tight control independent of the work product and its guide sheet.

.08 A simple schedule can be maintained to control the flow of work from the date an audit engagement is begun to the date the report is finally mailed to the client. The schedule has key items arranged in columnar form and can be maintained by the office manager or another person in charge of staff assignments. Frequent references to the schedule should reveal any unusual delays in completing an engagement or typing a report.

.09 To account for each report from the time it is placed for typing to the time it is mailed or delivered to the client, some firms maintain a record in the typing department, in place of or as a supplement to the foregoing record. (See Report Production Control in AAM section 9500.13.)

.10 If this record indicates any time lags, the matter should be investigated; it may indicate either an abnormal backlog of work or some other problem.

.11 In preparing the report production control form, the following procedures are suggested:

- It should be manually prepared and updated daily by a control clerk.
- It should be retained in a notebook in a readily accessible location so that audit personnel can check report status without interfering with review and production operations.
- When a report and related workpapers are received by the reviewer, the client name, report description, fiscal year end, report-letter date, and due date should be entered.
- The review partner should assign a reviewer and record the date forwarded to the reviewer and the forwarding date for tax review.
- The person's name to whom the report is given for rework (if required) should be entered and the dates forwarded for tax and audit reviews of rework are recorded (if required).
- Other dates should be recorded through final release.

					Audit	Tax	Date	To (*name*)	Audit	Tax					

Signing Reports

.14 After the report has been reviewed, typed, proofread, and corrected, it is usually submitted to a partner for reading and signature.

.15 Some firms do not bind the report until after it is signed. This saves unbinding in case the signing partner orders any revisions. In offices where the reports have been sufficiently and systematically reviewed and referenced before or after typing, they may be submitted to the partner for his signature in final bound form. This saves time and additional handling.

.16 The transmittal letters and addressed envelopes should be submitted to the partner with the reports. This gives him an opportunity to review the mailing directions, so that reports are directed to the proper person.

.17 Report letters are usually signed by a partner using the firm name. Where reproducing equipment is used, a signature on the original is sufficient. It is important to establish rules applying to report signatures since all reports (add correspondence) issued to clients carry with them the reputation, authority, and responsibility of the firm.

Delivery of Completed Work

.18 Audit reports are rightfully considered by clients to be confidential documents. For this reason, care should be taken to address them to a responsible person, usually the treasurer or principal executive, in an envelope clearly marked "confidential." Where there is some question as to the person or persons to whom the report should be delivered, address it to the specific source of authority authorizing the report. In a majority of cases, especially for recurring engagements, the reports are mailed. However, some firms make it a practice to have a partner deliver the report personally and discuss it with the client.

.19 The report should be mailed in envelopes or boxes sturdy enough to withstand the rough treatment they may receive in transit.

.20 Many firms send separate transmittal letters with their reports. The letter should contain no comments on the report because it might be construed as a modification of the opinion on the report. It is advisable to write a letter requesting that a printer's proof be submitted to the accounting firm for review before any printed reports are released by the client to stockholders or the public.

.21 Reports are generally issued only to the client who engaged the services. The unauthorized distribution of a report represents a violation of the confidential relationship between a firm and its client. Firms are sometimes asked by clients to mail copies of their reports directly to third parties. Clients should be discouraged from making such requests. In rare instances, where a firm assumes this added responsibility, distributions are made only upon specific written instruction from the client, and reference to the client's instructions should be included in the transmittal to the third party. Printed annual reports to shareholders, prospectuses, and other reports that are a matter of public record, such as those filed with certain governmental agencies, are obvious exceptions to this rule.

AAM Section 10,000 Accountants' Reports

These examples are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of departure when drafting reports to meet their individual needs. This manual is a nonauthoritative kit of practice aids and accordingly, does not include extensive explanation or discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate.

These examples illustrate the body of various reports. For comment on addressing and dating of the report, see AAM section 10,100.

Examples which are assembled from illustrative reporting language set forth in Statements on Auditing Standards (SASs) and Statements on Standards for Accounting and Review Services (SSARSs) include citation of the particular source and its location in *AICPA Professional Standards.*

AAM Section 10,100
Format of Accountants' Reports

Report Preparation

.01 Firms should develop standard policies and procedures for preparing and issuing reports. The following are some suggested report preparation policies:

- *Letterhead.* The report should be presented on firm letterhead.
- *Addressee.* The report should be addressed to the board of directors, stockholders, partners, general partner, proprietor, or to the company whose financial statements are being audited. If the firm was engaged by others, the report should be addressed thereto.

  The Board of Directors
  XYZ Credit Union
  City, State Zip Code

- *Salutation.* A salutation should not be included on the report.
- *Report signing.* The firm name should be manually signed by the engagement partner. The words "Certified Public Accountants" should be excluded from the signature if they are a normal part of the firm's letterhead.
- *Report dating.* Audit reports should be dated as of the last day of field work.
  - The date should be presented at the bottom of the page along with the city and state, if not included in firm letterhead, as follows:

    City, State
    April 5, 199Y

  - If significant subsequent events are discovered before the report is issued, but after the completion of field work, the report should be dual-dated for the subsequent event.
  - Subsequent events affecting previously issued reports that are being reissued will also cause the report to be dual-dated. The following illustrates dual-dating:

    City, State
    February 26, 199Y, except for Note X as to which the date is
    April 5, 199Y

- *Level of service.* The level of service performed and the nature of the report are typically outlined in the engagement letter. The letter should be revised for any significant changes from the original understanding with the client, such as, in the event of a step-up or step-down in the level of service.
  - The partner should approve any step-up or step-down in level of service. A step-up in level of service may occur after obtaining a revised understanding with the client. A step-down in level of service should occur only after carefully evaluating the reasons for the change because the reasons for the change may also affect the report on lower levels of service. Limitations on the scope of an audit, for example, may also preclude issuing a review or compilation report.

— If more than one level of service is performed for financial statements of the same period (e.g., compilation and audit), the financial statements need only be accompanied by the report on the highest level of service performed.

Reports on Audited Financial Statements

.02 Generally accepted auditing standards (GAAS) establish reporting responsibilities. The four standards of reporting stated in AU section 150.02 are:

a. The report shall state whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).

b. The report shall identify those circumstances in which GAAP has not been consistently applied in the current period in relation to the preceding period.

c. Informative disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report.

d. The report shall contain either an expression of opinion regarding the financial statements taken as a whole, or a statement that an opinion cannot be expressed. When an opinion cannot be expressed, the reasons should be stated. In all cases, the report should contain a clear-cut indication of the degree of responsibility, if any, the auditor is taking.

Standard Report

.03 The standard auditor's report prescribed by SAS No. 58, *Reports on Audited Financial Statements*, as amended by SAS No. 79, *Amendment to Statement on Auditing Standards No. 58*, Reports on Audited Financial Statements (AU section 508), should be used when the auditor has formed an opinion, based on the application of GAAS, that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in accordance with GAAP. It should address all financial statements presented. A standard auditor's report for the presentation of comparative financial statements is illustrated in AAM section 10,210.010.

Modifications of the Standard Auditor's Report

.04 SAS No. 58 (AU section 508), as amended, describes situations that may require auditors to modify the standard report, and also provides illustrations of the appropriate modifying language. These modifications, which are discussed in greater depth in the following sections, are:

- *Explanatory language.* A wide variety of situations may arise that require a modification of the standard auditor's report, without affecting the expression of an unqualified opinion. Some of the more common of such situations are going-concern problems, part of the financial statements have been audited by another auditor, or a significant change in accounting principles. The explanatory paragraph for situations that do not affect the auditor's opinion should be placed after the opinion paragraph.
- *Qualified opinion.* Qualified opinions result from two general categories of situations: scope limitations and departures from GAAP. A scope limitation arises when the auditor has been unable to perform all of the auditing procedures he or she believes are necessary to express an unqualified opinion on the financial statements. Financial statements containing a material departure from GAAP, including inadequate disclosures in the financial statements, may lead the auditor to qualify his or her opinion. Both situations require that an explanatory paragraph, preceding the opinion paragraph, be included that describes the nature of the scope limitation or the departure from GAAP.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- *Disclaimer of opinion.* A disclaimer of opinion may be required when:
  - — The scope of the audit has been restricted so significantly that the auditor does not have a basis for forming an opinion on the financial statements. In this case, an explanatory paragraph, preceding the disclaimer paragraph, should be included in the auditor's report to explain all significant reasons for the disclaimer.
  - — The auditor is not independent, in which case a one-paragraph disclaimer is issued (applies for publicly held entities only). A compilation report with a lack of independence noted should be issued for nonpublic entities.
- *Adverse opinion.* An adverse opinion should be expressed on financial statements that do not present fairly the entity's financial position, results of operations, or cash flows in conformity with GAAP. In other words, the auditor concludes that the financial statements are *not* fairly presented in accordance with GAAP. Issuance of an adverse opinion requires inclusion of an explanatory paragraph, preceding the opinion paragraph, that explains all of the reasons for the adverse opinion and, if practicable, the effects of the subject matter of the adverse opinion on the financial statements.

Scope Limitations

.05 Restrictions on the scope of an audit, whether imposed by the client or by circumstances such as the timing of the auditor's work, the inability to obtain sufficient, competent evidential matter, or an inadequacy in the client's accounting records, may require a qualified opinion or a disclaimer of opinion. Deciding whether to qualify or disclaim is a matter of judgment, and generally the primary factor in this decision is the materiality of the financial statement items affected. However, other factors should be considered, such as the pervasiveness of the effects of the omitted auditing procedures and the nature of the financial statement items affected.

Departures From GAAP

.06 ***Unacceptable Principles.*** Significant departures from GAAP require that the auditor issue either a qualified or adverse opinion. Choosing between a qualified or adverse opinion depends on the magnitude of the departure. While the materiality of the effects of the departure is a primary consideration, the auditor should also consider the pervasiveness of the departure, such as the number of financial statement items affected, the importance of the departure to the organization's activities and its ability to obtain funding, and the dollar effect of the departure on individual financial statement items as well as the statements as a whole.

.07 For both qualified and adverse opinions, an explanatory paragraph should be included, preceding the opinion paragraph, that describes all of the substantive reasons for the auditor's opinion, and the effects on the financial statements, if readily determinable. If it is not practical to determine the effects of the departure, the explanatory paragraph should contain a statement to that effect. If information about the effects of the departure are described in the notes, the explanatory paragraph can be shortened by referring to the note.

.08 ***Inadequate Disclosure.*** Departures from GAAP include not just inappropriate application of accounting principles, but also omitted or inadequate disclosures in the financial statements. Such situations require the auditor to add an explanatory paragraph, preceding the opinion paragraph, that describes the nature of the inadequate or omitted disclosure and, if practical, the information that should have been disclosed. The significance of the omitted or inadequate disclosure will determine whether a qualified or adverse opinion is appropriate.

.09 ***Report Modification.*** The opinion paragraph for a qualified opinion due to a departure from GAAP should include the words "except" or "exception" and a reference to the explanatory paragraph that describes

that departure. Adverse opinions should include language such as "do not present fairly" and should also include a reference to the explanatory paragraph. A qualified opinion indicating a departure from GAAP is presented in AAM section 10,240.020. An adverse opinion indicating a departure from GAAP is presented in AAM section 10,220.01.

Errors, Irregularities, and Illegal Acts

.10 If the financial statements are materially affected by an error, irregularity or illegal act that has not been properly accounted for and disclosed, a qualified or adverse opinion should be considered. If the auditor is precluded from applying necessary procedures or from obtaining sufficient information to conclude whether an error, irregularity or illegal act that could be material to the financial statements has occurred, a qualified or disclaimer of opinion should be issued. All such matters should be discussed immediately with the engagement partner.

.11 If a client will not accept modification of the report under the circumstances above, the firm should consider withdrawing from the engagement and consulting with legal counsel.

Consistency Exceptions

.12 Accounting changes affecting consistency include:

- A change from one generally accepted accounting principle to another method, practice or principle that is different from the one previously used.
- A change from an unacceptable to an acceptable principle (correction of an error).
- A change in financial statement classification that significantly affects financial position or results of operations (e.g., classification of an item in earnings from operations as other income or expense).
- A change in reporting entity.

.13 Accounting changes not normally affecting consistency include:

- Initial adoption of an existing accounting principle for a new event or transaction.
- Insignificant reclassification.
- Correction of errors not involving a principle.
- Changes in accounting estimates.

.14 The nature of the accounting change will determine whether prior periods should be restated or a cumulative adjustment should be included in current activities. In either event, the change should be disclosed in the notes to the financial statements and in the auditor's report in a separate paragraph following the opinion paragraph. The auditor's concurrence with a change is implicit unless he or she takes exception to the change. The opinion paragraph would be standard unless the change is to an unacceptable principle or method, the change is not justified, or a prospective change of a principle requiring retroactive adjustment is not discussed. In such situations, either a qualified or adverse opinion should be issued.

Uncertainties

.15 Uncertainties are significant circumstances, events, or transactions affecting the financial statements, the outcome of which cannot be reasonably estimated. Uncertainties are a particularly complex area because

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

they can result in a qualified or adverse opinion due to a departure from GAAP, or a qualified opinion or disclaimer due to a scope limitation. Uncertainties include, but are not limited to, contingencies covered by FASB Statement No. 5, *Accounting for Contingencies* (AC C59), and matters related to estimates covered by SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties.*

.16 ***Uncertainties Not Requiring Modification of the Opinion.*** SAS No. 58, paragraph 29, as amended by SAS No. 79 (AU section 508.29), states that when the auditor has concluded that sufficient information supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate.

.17 ***Scope Limitations.*** A qualified opinion or disclaimer of opinion may be required if the auditor is unable to obtain sufficient information to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements. In some ways, information about uncertainties may always be considered insufficient because it is dependent on future, unknown events. However, if the auditor determines that information did or does exist, but it is unavailable to him or her (e.g., because the information was destroyed or management will not allow the auditor to have access to it), the auditor should consider modifying the report for a scope limitation.

.18 ***Departures From GAAP.*** SAS No. 58, paragraph 45, as amended by SAS No. 79 (AU section 508.45), describes three categories of departures from GAAP involving risks or uncertainties:

- Inadequate disclosure
- Inappropriate accounting principles
- Unreasonable accounting estimates

.19 A qualified or adverse opinion due to a departure from GAAP may be necessary if the auditor concludes that a matter involving an uncertainty has not been appropriately disclosed in the financial statements in conformity with GAAP.

.20 Also, a departure from GAAP may exist if management has made inappropriate estimates of future events in applying accounting principles (such as the use of unreasonable expected lives of depreciable assets for calculating depreciation) or in making other accounting estimates.

.21 ***Going-Concern Uncertainties.*** If the auditor concludes that there is substantial doubt about the organization's ability to continue as a going concern, the situation should be described in an explanatory paragraph, following the opinion paragraph. The explanatory paragraph should describe the principal events and conditions related to the going concern, their possible effects on the financial statements, management's plans for corrective actions, and the auditor's conclusion that substantial doubt exists. SAS No. 64, *Omnibus Statement on Auditing Standards—1990* (AU section 341.12 and .13), imposes the additional requirement that the explanatory paragraph include the terms "substantial doubt" and "going concern." The auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern in the going-concern explanatory paragraph.

.22 If financial statement disclosures about the uncertainty are inadequate, a departure from GAAP exists, and either a qualified or adverse opinion may be necessary.

Reporting on Supplementary Information

.23 Supplementary information includes detailed schedules of other data that are not necessary for a fair presentation of the basic financial statements. Whenever supplementary information is included in an auditor-

submitted document, the auditor must indicate the degree of responsibility, if any, taken for this information. A separate report on the supplementary information or a separate paragraph in the report on the basic financial statements may be used to report on supplementary information. If a separate report is issued, it should be on the firm's letterhead and be signed. The report date should be the same as for the basic financial statements.

.24 Reports on supplementary information should express or disclaim audit assurance. The extent and results of testing of supplementary information will determine the firm's responsibility in each circumstance. If a separate report on the supplemental information is issued, the first sentence of that report should refer to the report on the basic financial statements.

Reporting on a Single Statement

.25 In certain circumstances, an engagement to audit a single financial statement may be accepted. Generally these engagements, called "limited reporting engagements," are a result of the client needing a single financial statement to fulfill a contractual requirement, such as an organization that must provide its landlord with an audited income statement for purposes of calculating rent. Also, entities that have never been audited often request an audit of the statement of financial position only for the first year, with the intention of having audits of the entire financial statements in the future. Generally such engagements are accepted as long as there is a legitimate reason for the limited engagement, and provided there are no restrictions on access to information underlying the financial statements or on the scope of the procedures the auditor needs to perform. In such engagements, an unqualified opinion can be expressed on the financial statement the auditor was engaged to audit. If the other financial statements are presented, a disclaimer of opinion should be issued on those statements. An unqualified opinion on a single statement audit is presented in AAM section 10,210.030.

Relying on the Work of a Specialist

.26 The firm may engage specialists to perform certain work supporting representations in the financial statements. SAS No. 73, *Using the Work of a Specialist* (AU section 336), says if a review of the specialist's work finds it satisfactory, and if no report modification is necessary because of the specialist's findings, there is no need to refer to the specialist's work.

.27 If the specialist's work is not adequate to support the financial statement representations, a qualification or disclaimer of opinion because of a scope limitation may be required. Findings of the specialist that indicate the financial statements are not in accordance with GAAP may require a qualified or adverse opinion.

Lack of Independence

.28 For public entities, whenever the auditor is not independent with respect to a client whose financial statements have been audited, a disclaimer of opinion should be issued. For nonpublic entities, the firm may only issue a compilation report that includes a statement that the firm is not independent.

Reissuance of Audit Reports as Predecessors

.29 If the auditor is asked by a former client to reissue its report on prior-period financial statements, he or she should inform the client of the procedures necessary to comply with that request. If the client agrees to perform these procedures, and pay the fee for these services, the auditor would ordinarily agree to reissue the report.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.30 Before reissuing a report, the auditor should consider whether the previous opinion on those prior-period statements is still appropriate. Differences in the current form and presentation of the financial statements for the prior period, or the possibility of material subsequent events affecting those financial statements, could make the previous opinion inappropriate. The auditor should perform at least the following procedures:

- Read the financial statements of the current period.
- Compare the prior-period financial statements with the financial statements to be presented in comparative format by the successor.
- Obtain a letter of representation from the successor auditor. The successor should represent that his or her audit has not revealed any matters that may have a material effect on the prior-period financial statements.

.31 If the firm reissues its report without change, the previous report date should be used. If the financial statements or the report of the prior period are revised, the report should be dual-dated as to the event or matter causing the revision. There should be no reference to the report or the work of the successor auditor.

Reissuance of the Audit Report Subsequent to the Date of Original Issue[1]

.32 Occasionally the firm may be requested by a client to furnish additional copies of a previously issued report. Approval of the engagement partner is necessary to reissue a previously issued report. In such situations the engagement partner may prepare a memo stating the reasons for the reissuance and that he or she is not aware of any circumstances occurring since the original report date that would require adjustment to or disclosure in the financial statements.

.33 Use of the original report date removes any implication that records, transactions, or events after that date have been audited or reviewed. Although the auditor has no responsibility to make further investigation or inquiry as to subsequent events, the engagement partner should consider a brief discussion with the client's chief financial or executive officer before reissuing his or her report.

Subsequent Discovery of Facts Existing at Report Date

.34 Although the auditor has no obligation to make any continuing inquiries or perform other procedures after issuing his or her report, the auditor may become aware of information that affects the financial statements upon which he or she has previously reported. When becoming aware of such information, the auditor should determine the reliability of the information and whether such information existed at the date of the report. The engagement partner should make inquiries of client management in this regard.

.35 If the information is reliable and did exist at the date of the report, if the report would have been affected if the information had been known at the report date, and if there are persons relying on the financial statements who would attach importance to the information, the auditor should take action to prevent future reliance on the report. If the engagement partner concludes that action should be taken to prevent future reliance on the report, he or she should advise the client to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to the persons known to be, or likely to be, relying on the financial statements and related report. Disclosures should be made in one of the following ways:

[1] The AICPA Auditing Standards Board recently issued an Auditing Interpretation, *Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report* (AU section 9341.01 and .02), which deals with situations where a previously issued report contains a going-concern explanatory paragraph, and the situation that gave rise to the going-concern has been resolved.

- If the effects of subsequent facts can be promptly determined, disclosure should include reissuing revised financial statements and a revised report. The reasons for the revision usually should be described in a note to the financial statements and referred to in the auditor's report.
- If the current financial statements have not been released, appropriate disclosure of the revision of the prior-period financial statements can be included therein.
- When the effects of subsequent facts cannot be readily determined, revisions of financial statements and reports may be delayed. In this case, persons known to be, or likely to be, relying on the financial statements should be notified by the client that the financial statements and related reports should not be relied on, and that revised financial statements and report will be forthcoming.

.36 If the client refuses to make the disclosures discussed above, the auditor should contact legal counsel. He or she should also notify all members of the board of directors of such refusal and that the firm will take the following steps to prevent future reliance on its report:

- Notify the client that the auditor's report must no longer be associated with the financial statements.
- Notify any applicable regulatory agencies that the report should no longer be relied upon.
- Notify each person known to be relying on the financial statements that the report should no longer be relied upon.

.37 If the auditor's investigation of the subsequently discovered information is satisfactory, and he or she has determined that the information is reliable, the notifications in AAM section 10,100.36 should include a description of the effects of the information on the financial statements. If the client has not cooperated and, as a result, the auditor has been unable to conduct a satisfactory investigation, the auditor does not need to indicate the details of the information. Instead, he or she should indicate that the auditor's report must no longer be relied upon nor should the auditor be associated with the financial statements.

Unqualified Opinions

.010 Auditor's Standard Report—Comparative Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

.030 Report on a Single Statement Audit (Balance Sheet Only Presented) [Assuming the auditor is able to satisfy himself or herself regarding the consistency of application of accounting principles]

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19XX. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 19XX, in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 34, as amended by SAS No. 79 (AU section 508.34).]

Note: If reporting on a single statement (for example, balance sheet only) when other financial statements are also presented, the following paragraph should be added after the opinion paragraph:

> Because we were not engaged to audit the statements of income, retained earnings, and cash flows, we did not extend our auditing procedures to enable us to express an opinion on the results of operations and cash flows for the year ended December 31, 19XX. Accordingly, we express no opinion on them.

.040 Reference to Other Auditors—Successor Auditor's Report When Predecessor's Report (Unqualified) Is Not Presented

Independent Auditor's Report

Addressee:

We have audited the balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 19X1, were audited by other auditors whose report dated March 31, 19X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

[Source: SAS No. 58, paragraph 74, as amended by SAS No. 79 (AU section 508.74).]

Practice Tips

(1) The successor auditor should not name the predecessor auditor in his report; however, the successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with that of the successor auditor.

[Source: SAS No. 58, paragraph 74, footnote 27, as amended by SAS No. 79 (AU section 508.74).]

(2) If the predecessor's report was issued before February 29, 1996 (the effective date of SAS No. 79 [AU section 508]) and contained an uncertainties explanatory paragraph, a successor auditor's report issued or reissued after the effective date of SAS No. 79 (AU section 508) should not make reference to the predecessor's previously required explanatory paragraph.

[Source: SAS No. 58, paragraph 74, footnote 28, as amended by SAS No. 79 (AU section 508.74).]

.050 Reference to Other Auditors in Report

Independent Auditor's Report

Addressee:

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X2 and 19X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of $_____ and $_____ as of December 31, 19X2 and 19X1, respectively, and total revenues of $_____ and $_____ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 19X2 and 19X1, and the results of their operations and their cash flows for the years then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 13, as amended by SAS No. 79 (AU section 508.13).]

.060 Reference to Other Auditors—Successor Auditor's Unqualified Report When Predecessor's Report That included an Explanatory Paragraph Is Not Presented

Independent Auditor's Report

Addressee:

We have audited the balance of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 19X1, were audited by other auditors whose report dated March 1, 19X2, on those statements included an explanatory paragraph that described the change in the Company's method of computing depreciation discussed in Note X to the financial statements.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 74, as amended by SAS No. 79 (AU section 508.74).]

Note: If the predecessor's report was issued before February 29, 1996 (the effective date of SAS No. 79 [AU section 508]) and contained an *uncertainties* explanatory paragraph, a successor auditor's report issued or reissued after the effective date of SAS No. 79 (AU section 508) should not make reference to the predecessor's previously required explanatory paragraph.

[Source: SAS No. 58, paragraph 74, footnote 28, as amended by SAS No. 79 (AU section 508.74).]

.070 Reference to Other Auditors—Successor Auditor's Report When Prior Year Financial Statements Have Been Restated Following Issuance of the Predecessor's Report

Independent Auditor's Report

Addressee:

We have audited the balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 19X1, before the restatement described in Note X, were audited by other auditors whose report dated March 31, 19X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

We also audited the adjustments described in Note X that were applied to restate the 19X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.*

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 74, as amended by SAS No. 79 (AU section 508.74).]

* This paragraph may be added to the report when the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself as to the appropriateness of the restatement adjustment.

.080 Reference to Other Auditors—Prior Year Financial Statements Restated Following a Pooling of Interests

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated balance sheet of XYZ Company as of December 31, 19X2, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of XYZ Company as of [at] December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

We previously audited and reported upon the consolidated statements of income and cash flows of XYZ Company and subsidiaries for the year ended December 31, 19X1, prior to their restatement for the 19X2 pooling of interests. The contribution of XYZ Company and subsidiaries to revenues and net income represented _____ percent and _____ percent of the respective restated totals. Separate financial statements of the other companies included in the 19X1 restated consolidated statements of income and cash flows were audited and reported upon separately by other auditors. We also audited the combination of the accompanying consolidated statements of income and cash flows for the year ended December 31, 19X1, after restatement for the 19X2 pooling of interests; in our opinion, such consolidated statements have been properly combined on the basis described in Note A of notes to consolidated financial statements.

.083 Reference to Other Auditors—Successor Auditor Report When Prior Period Financial Statements Were Audited by a Predecessor Auditor Who Has Ceased Operations

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 19X1, were audited by other auditors who have ceased operations and whose report dated March 31, 19X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

* This Notice to Practitioners was issued by the Auditing Standards Division and is intended to provide guidance to accountants in situations in which the predecessor accountant has ceased operations. The guidance in this Notice does not apply to situations in which a firm of independent accountants assumes responsibility for the work of another firm in conjunction with, for example, a merger with, or acquisition of, the other firm.

.084 Reference to Other Auditors—Successor Auditor Report When Prior Period Financial Statements Were Audited By a Predecessor Auditor Who Has Ceased Operations Have Been Restated

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 19X1, before the restatement described in Note X, were audited by other auditors who have ceased operations and whose report dated March 31, 19X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

We also audited the adjustments described in Note X that were applied to restate the 19X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.*

.085 Reference to Other Accountants—Report on Nonpublic Entity Presented With Prior Period Financial Statements Reviewed by a Predecessor Accountant Who Has Ceased Operations

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We have conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

The 19X1 financial statements were reviewed by other accountants who have ceased operations, and their report thereon, dated March 1, 19X2, stated they were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

.086 Reference to Other Accountants—Report on Nonpublic Entity Presented With Prior Period Financial Statements Compiled by a Predecessor Accountant Who Has Ceased Operations

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosure in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by managements, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 19X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepting accounting principles.

The 19X1 financial statements were compiled by other accountants who have ceased operations, and their report thereon, dated February 1, 19X2, stated that they did not audit or review those financial statements and, accordingly, express no opinion or any other form of assurance on them.

.090 Change in Accounting Principles or Method of Accounting

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentations. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19XX, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

As discussed in Note X to the financial statements, the Company changed its method of computing deprecation in 19XX.

.100 Going Concern—Uncertainty

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19XX, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

.110 Liquidation Basis of Accounting—Single Year Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets in liquidation of X Company as of December 31, 19X2, and the related statement of changes in net assets in liquidation for the period from April 26, 19X2 to December 31, 19X2. In addition, we have audited the statements of income, retained earnings, and cash flows for the period from January 1, 19X2 to April 25, 19X2. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets in liquidation of X Company as of December 31, 19X2, the changes in its net assets in liquidation for the period from April 26, 19X2 to December 31, 19X2, and the results of its operations and its cash flows for the period from January 1, 19X2 to April 25, 19X2, in conformity with generally accepted accounting principles applied on the bases described in the following paragraph.

As described in Note X to the financial statements, the stockholders of X Company approved a plan of liquidation on April 25, 19X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 19X2 from the going-concern basis to a liquidation basis.

.120 Liquidation Basis of Accounting—Comparative Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 19X2 to April 25, 19X2. In addition, we have audited the statement of net assets in liquidation as of December 31, 19X2, and the related statement of changes in net assets in liquidation for the period from April 26, 19X2 to December 31, 19X2. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X1, and the results of its operations and its cash flows for the year then ended and for the period from January 1, 19X2 to April 25, 19X2, its net assets in liquidation, as of December 31, 19X2, and the changes in its net assets in liquidation for the period from April 26, 19X2 to December 31, 19X2, in conformity with generally accepted accounting principles applied on the bases described in the following paragraph.

As described in Note X to the financial statements, the stockholders of X Company approved a plan of liquidation on April 25, 19X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 19X2 from the going-concern basis to a liquidation basis.

.130 Comparative Financial Statements—Unqualified Opinion on the Current Year's Financial Statements With Disclaimer of Opinion on the Prior Year's Statements of Income, Retained Earnings, and Cash Flows

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We did not observe the taking of the physical inventory as of December 31, 19X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 19X0, enter into the determination of net income and cash flows for the year ended December 31, 19X1.

Because of the matter discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 19X1.

In our opinion, the balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 19X2, present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the year ended December 31, 19X2, in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 67, as amended by SAS No. 79 (AU section 508.67).]

Note: This report assumes that the independent auditor has been able to satisfy himself as to the consistency of application of generally accepted accounting principles.

.140 Comparative Financial Statements—Subsequent Restatement of Prior-Period Financial Statements to Conform With Generally Accepted Accounting Principles

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our report dated March 1, 19X2, we expressed an opinion that the 19X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 19X1 financial statements to conform with generally accepted accounting principles. Accordingly, our present opinion on the 19X1 financial statements, as presented herein, is different from that expressed in our previous report.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

.150 Comparative Financial Statements—Current Year's Statements Audited and Prior Year's Statements Reviewed

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

The 19X1 financial statements were reviewed by us (other accountants) and our (their) report thereon, dated March 1, 19X2, stated we (they) were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraph 17 (AU section 504.17).]

Notes: When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.

When the financial statements are those of a public entity, the separate paragraph should include a disclaimer of opinion or a description of a review. (A sample of a disclaimer of opinion is provided in AAM section 10,210.170.)

.160 Comparative Financial Statements—Current Year's Statements Audited and Prior Year's Statements Compiled

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

The 19X1 financial statements were compiled by us (other accountants) and our (their) report thereon, dated March 1, 19X2, stated we (they) did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraph 17 (AU section 504.17).]

Note: When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.

.170 Comparative Financial Statements—Current Year's Statements Audited and Disclaimer on Prior Year's Unaudited Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

The 19X1 financial statements were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

Notes: The above report illustrates a disclaimer of opinion as described in SAS No. 26, paragraph 17 (AU section 504.17) when the financial statements are those of a public entity. For a nonpublic entity, see AAM section 10,210.150 and .160.

When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.

.180 U.S.-Style Report Modified to Report on Financial Statements Prepared in Conformity With Accounting Principles Generally Accepted in Another Country That Are Intended for Use Only Outside the United States

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of International Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended which, as described in Note X, have been prepared on the basis of accounting principles accepted in [*name of country*]. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States (and in [*name of country*]). U.S. standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of International Company as of December 31, 19XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in [*name of country*].

[*Signature*]

[*Date*]

Note: The above illustrates a report as described in SAS No. 51, paragraph 10, as amended (AU section 534.10).

.190 Report on Financial Statements Prepared in Conformity With the Accounting Principles Generally Accepted in Another Country That Will Have More Than Limited Distribution in the United States

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of International Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in Note X to the financial statements, the Company has recorded fixed assets in excess of historical cost using appraised value as the basis for adjustment in accordance with accounting principles generally accepted in [*name of country*]. If the fixed assets had been recorded at historical cost, fixed assets and retained earnings would be decreased by $XXX,XXX and $XXX,XXX respectively, as of December 31, 19XX, and net income and earnings per share would be increased by $X,XXX and $X.XX respectively for the year then ended.

In our opinion, except for the effects of recording the fixed assets in excess of historical costs, discussed in the preceding paragraph, the financial statements present fairly, in all material respects, the financial position of International Company as of December 31, 19XX, and the results of its operations and its cash flows for the year then ended, in conformity with generally accepted accounting principles.

(Optional Paragraph)

In our opinion, the financial statements referred to above present fairly the financial position of the International Company at December 31, 19XX, and the results of its operations and its cash flows for the year then ended, in conformity with accounting principles generally accepted in [*name of country*].

[*Signature*]

[*Date*]

Note: The above illustrates a report as described in SAS No. 51, paragraphs 14 and 15 (AU section 534.14 and .15). This report does not apply to reports on financial statements of U.S. subsidiaries of foreign registrants presented in SEC filings of foreign parent companies where the subsidiaries' financial statements have been prepared on the basis of accounting used by the parent company.

.200 Correction of an Error, Not Involving an Accounting Principle

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

As discussed in Note X to the financial statements, certain errors resulting in an understatement of previously reported expenses for the years ended December 31, 19X1 and 19X0 were discovered by the Company's management during the current year. Accordingly, the 19X1 financial statements have been restated and an adjustment has been made to retained earnings as of January 1, 19X1 to correct the errors.

.210 Subsequent Event Prior to Issuance of Auditor's Report

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

As discussed in Note X to the financial statements, on March 1, 19X3, the Company entered into an agreement to sell Subsidiary A. This Subsidiary represents X% of the Company's total assets and X% of its revenues.

.220 Reissued Report Due to Subsequent Discovery of Facts Existing at the Date of the Auditor's Report

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

As discussed in Note 10 to the financial statements, the Company's 19X2 [*specify account corrected*] previously reported as $XX,XXX should have been $X,XXX. This discovery was made subsequent to the issuance of the financial statements. The financial statements have been restated to reflect this correction.

AAM Section 10,220
Adverse Opinions

.01 **Departures from GAAP**

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note X to the financial statements, the Company carries its property plant, and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Generally accepted accounting principles require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided.

Because of the departures from generally accepted accounting principles identified above, as of December 31, 19X2 and 19X1, inventories have been increased $_____ and $_____ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant, and equipment, less accumulated depreciation, is carried at $_____ and $_____ in excess of an amount based on the cost to the Company; and deferred income taxes of $_____ and $_____ have not been recorded, resulting in an increase of $_____ and $_____ in retained earnings and appraisal surplus of $_____ and $_____, respectively. For the years ended December 31, 19X2 and 19X1, cost of goods sold has been increased $_____ and $_____, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of $_____ and $_____ have not been provided, resulting in an increase in net income of $_____ and $_____, respectively.

In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the financial statements referred to above do not present fairly, in conformity with generally accepted accounting principles, the financial position of X Company as of December 31, 19X2 and 19X1, or the results of its operations or its cash flows for the years then ended.

AAM Section 10,230
Disclaimers of Opinion

.01 Beginning Inventory Not Observed (First Examination)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.*

Except as discussed in the following paragraph, we conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Because we were not engaged as auditors until after December 31, 19X1, we were not present to observe the physical inventory taken at that date and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities. Accordingly, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the accompanying statements of income, retained earnings and cash flows for the year ended December 31, 19X2.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 19X2, in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 26, as amended by SAS No. 79 (AU section 508.26).]

* Although the introductory paragraph of the standard disclaimer of opinion begins with "We were engaged to audit ..." and the scope paragraph of the report is omitted, SAS No. 58, paragraph 67, as amended by SAS No. 79 (AU section 508.67), shows that the introductory paragraph does not need to be modified nor does the scope paragraph need to be omitted when the disclaimed financial statements are with audited financial statements.

.02 Inability to Obtain Sufficient Competent Evidential Matter Due to a Scope Limitation

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.

The Company did not make a count of its physical inventory in 19X2 or 19X1, stated in the accompanying financial statements at $_____ as of December 31, 19X2, and at $_____ as of December 31, 19X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 19X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

.03 Scope Limitation—Inventory and GAAP Departure—Capitalized Lease Obligations

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with generally accepted accounting principles. If these lease obligations were capitalized, property would be increased by $_____ and $_____, long-term debt by $_____ and $_____, and retained earnings by $_____ and $_____ as of December 31, 19X2 and 19X1, respectively. Additionally, net income would be increased (decreased) by $_____ and $_____ and earnings per share would be increased (decreased) by $_____ and $_____, respectively, for the years then ended.

The Company did not make a count of its physical inventory in 19X2 or 19X1, stated in the accompanying financial statements at $_____ as of December 31, 19X2, and at $_____ as of December 31, 19X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 19X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraphs 39 and 63, as amended by SAS No. 79 (AU section 508.39 and .63).]

Note: This report would be used if the GAAP departure is not so material to require an adverse opinion. See AAM section 10,220.01 for an example of an adverse opinion.

AAM Section 10,240
Qualified Opinions

.010 Scope Limitation—Investment in Foreign Affiliate (Assuming Effects Are Such That Qualification Rather Than Disclaimer is Appropriate)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as discussed in the following paragraph, we conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_____ and $_____ at December 31, 19X2 and 19X1, respectively, or its equity in earnings of that affiliate of $_____ and $_____, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

.020 Departure from GAAP—Leases Not Capitalized

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with generally accepted accounting principles. If these lease obligations were capitalized, property would be increased by $_____ and $_____, long-term debt by $_____ and $_____, and retained earnings by $_____ and $_____ as of December 31, 19X2 and 19X1, respectively. Additionally, net income would be increased (decreased) by $_____ and $_____ and earnings per share would be increased (decreased) by $_____ and $_____, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

.030 Departure from GAAP—Leases Not Capitalized—Pertinent Facts Disclosed in Note

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, generally accepted accounting principles require that such obligations be included in the balance sheets.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

.040 Inadequate Disclosure—Omission of Disclosures

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The Company's financial statements do not disclose [*describe the nature of the omitted disclosures*]. In our opinion, disclosure of this information is required by generally accepted accounting principles.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19XX, and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 42, as amended by SAS No. 79 (AU section 508.42).]

Note: This report assumes the effects are such that the auditor has concluded an adverse opinion is not appropriate.

.050 Inadequate Disclosure—Omission of Statement of Cash Flows

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income and retained earnings for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company declined to present a statement of cash flows for the years ended December 31, 19X2 and 19X1. Presentation of such statement summarizing the Company's operating, investing, and financing activities is required by generally accepted accounting principles.

In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations for the years then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 44, as amended by SAS No. 79 (AU section 508.44).]

.060 Change in Accounting Principle Without Reasonable Justification

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As disclosed in Note X to the financial statements, the Company adopted, in 19X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with generally accepted accounting principles, in our opinion the Company has not provided reasonable justification for making this change as required by generally accepted accounting principles.

In our opinion, except for the change in accounting principle discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 52, as amended by SAS No. 79 (AU section 508.52).]

Note: If the change was from an accounting principle that is not generally accepted to one that is generally accepted it would be a correction of an error and would require recognition in the auditor's report as to consistency. However, because the middle paragraph contains all of the information required in an explanatory paragraph (following the opinion paragraph) as required by SAS No. 58, paragraphs 16–18, as amended by SAS No. 79 (AU section 508.16–.18), an explanatory paragraph is not required in this instance.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.070 Change to an Accounting Principle Not in Conformity With Generally Accepted Accounting Principles

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The company previously recorded its land at cost but adjusted the amounts to appraised values during the year, with a corresponding increase in stockholders' equity in the amount of $_____. In our opinion, the new basis on which land is recorded is not in conformity with generally accepted accounting principles.

In our opinion, except for the change to recording appraised values as described above, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 58, paragraph 55, as amended by SAS No. 79 (AU section 508.55).]

.080 More than One Reason—Qualified Opinion on Prior Year's Financial Statements With the Current Year Qualified for the Same Reason and an Additional Reason

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as discussed in the following paragraph, we conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at $_____ and $_____ at December 31, 19X2 and 19X1, respectively, or its equity in earnings of that affiliate of $_____ and $_____, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

The Company has excluded, from property and debt in the accompanying 19X2 balance sheet, certain lease obligations that were entered into in 19X2, which in our opinion, should be capitalized in order to conform with generally accepted accounting principles. If these lease obligations were capitalized, property would be increased by $_____, long-term debt by $_____, and retained earnings by $_____, as of December 31, 19X2. Additionally, net income would be increased (decreased) by $_____ and earnings per share would be increased (decreased) by $_____ for the year then ended.

In our opinion, except for the effects on the 19X2 and 19X1 financial statements of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, and except for the effects of the 19X2 financial statements of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

.020 Material Departures From FASB Guidelines on Supplementary Information

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

The [*specifically identify the supplementary information*] on page XX is not required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. As result of such limited procedures, we believe that the [*specifically identify the supplementary information*] is not in conformity with guidelines established by the Financial Accounting Standards Board because [*describe the material departure(s) from the FASB guidelines*].

[*Signature*]

[*Date*]

[Source: SAS No. 52, paragraph 2 (AU section 558.08).]

Note: Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by the FASB. However, management may choose not to place the required supplementary information outside the basic financial statements. In such circumstances, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor's report on the audited financial statements should be expanded to include a disclaimer on the supplementary information. [Source: SAS No. 52, paragraph 2 (AU section 558.10).] (See AAM section 10,245.060.)

.025 Material Departures From GASB Guidelines on Supplementary Information

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose financial statements of City of Example, Any State as of and for the year ended December 31, 19XX. These general-purpose financial statements are the responsibility of City of Example, Any State management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State as of December 31, 19XX and the results of its operations and cash flows of its proprietary fund types for the year then ended in conformity with generally accepted accounting principles.

The [*specifically identify the supplementary information*] on page XX is not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. As a result of such limited procedures, we believe that the [*specifically identify the supplementary information*] is not in conformity with guidelines established by the Governmental Accounting Standards Board because [*describe the material departure(s) from the GASB guidelines*].

[*Signature*]

[*Date*]

[Source: SAS No. 52, paragraph 2 (AU section 558.08).]

Note: Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by the GASB. However, management may choose not to place the required supplementary information outside the basic financial statements. In such circumstances, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor's report on the audited financial statements should be expanded to include a disclaimer on the supplementary information. [Source: SAS No. 52, paragraph 2 (AU section 558.10).] (See AAM section 10,245.060.)

.030 Prescribed Procedures Not Completed Regarding Supplementary Information Required by the FASB

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

The [*specifically identify the supplementary information*] on page XX is not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. Further, we were unable to apply to the information certain procedures prescribed by professional standards because [*state the reasons*].

[*Signature*]

[*Date*]

[Source: SAS No. 52, paragraph 2 (AU section 558.08).]

Notes: Even though he or she is unable to complete the prescribed procedures, if, on a basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she describes the nature of any material departure(s) in his or her report. [Source: SAS No. 52, paragraph 2 (AU section 558.08).]

Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by the FASB. However, management may choose not to place the required supplementary information outside of the basic financial statements. In such circumstances, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor's report should be expanded to include a disclaimer on the supplementary information. .050 Report on Accompanying Information

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The (identify accompanying information) is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[*Signature*]

[*Date*]

[Source: SAS No. 29, paragraph 12, as amended by SAS No. 52 (AU section 551.12).]

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document.

This form of reporting on accompanying information is not appropriate with respect to supplementary information required by the FASB; see SAS No. 52, paragraph 3 (AU section 551.15).

.060 Disclaimer on Accompanying Information (Not Audited)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The (identify the accompanying information) is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and, accordingly, we express no opinion on it.

[*Signature*]

[*Date*]

[Source: SAS No. 29, paragraph 13, as amended by SAS No. 52 (AU section 551.13).]

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document.

When the auditor disclaims an opinion on all or part of the accompanying information in a document that he or she submits to his or her client or to others, such information should either be marked as unaudited or should include a reference to the auditor's disclaimer of opinion. The wording of the disclaimer will vary according to the circumstances.

.070 Disclaimer on Part of the Accompanying Information (Not Audited)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information on pages XX-YY is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information, except for that portion marked "unaudited," on which we express no opinion, has been subjected to the auditing procedures applied in the audit of the basic financial statements; and, in our opinion, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[*Signature*]

[*Date*]

[Source: SAS No. 29, paragraph 13, as amended by SAS No. 52 (AU section 551.13).]

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document.

When the auditor disclaims an opinion on all or part of the accompanying information in a document that he or she submits to his or her client or to others, such information should either be marked as unaudited or should include a reference to the auditor's disclaimer of opinion. The wording of the disclaimer will vary according to the circumstances.

.080 Qualification on Basic Financial Statements and Accompanying Information (Departure From GAAP)

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with generally accepted accounting principles. If these lease obligations were capitalized, property would be increased by $_____ and $_____, long-term debt by $_____ and $_____, and retained earnings by $_____ and $_____ as of December 31, 19X2 and 19X1, respectively. Additionally, net income would be increased (decreased) by $_____ and $_____ and earnings per share would be increased (decreased) by $_____ and $_____, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules of property and related depreciation (page X), and long-term debt with related interest (page Y), as of December 31, 19X2, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The information in such schedules has been subjected to the auditing procedures applied in the audit of the basic financial statements; and, in our opinion, except for the effects on the schedule of property of not capitalizing certain lease obligations as explained in the third paragraph of this report, such information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.090 Supplementary Information Required by the FASB Included in Auditor-Submitted Document

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

The [*identify the supplementary information*] on page XX is not a required part of the basic financial statements but is supplementary information required by the Financial Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

[*Signature*]

[*Date*]

[Source: SAS No. 29, paragraph 15, as amended by SAS No. 52 (AU section 551.15).]

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document.

When supplementary information required by the FASB is presented outside the basic financial statements in an auditor-submitted document, the auditor should disclaim an opinion on the information unless he or she has been engaged to examine and express an opinion on it.

In certain circumstances, the auditor's report should be expanded in accordance with SAS No. 52, paragraph 2 (AU section 558.08). The illustrative reports at AAM section 10,245.010–.045 are assembled from illustrative reporting language in SAS No. 52, paragraph 2 (AU section 558.08).

.095 Supplementary Information Required by the GASB Included in Auditor-Submitted Documents

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose financial statements of City of Example, Any State as of and for the year ended December 31, 19XX. These general-purpose financial statements are the responsibility of City of Example, Any State management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State as of December 31, 19XX, and the results of its operations and cash flows of its proprietary fund types for the year then ended in conformity with generally accepted accounting principles.

The [*identify the supplementary information*] on page XX is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

[*Signature*]

[*Date*]

[Source: SAS No. 29, paragraph 15, as amended by SAS No. 52 (AU section 551.15).]

Notes: The report on the accompanying information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted documents.

When supplementary information required by the GASB is presented outside the basic financial statements in an auditor-submitted document, the auditor should disclaim an opinion on the information unless he or she has been engaged to examine and express an opinion on it.

In certain circumstances, the auditor's report should be expanded in accordance with SAS No. 52, paragraph 2 (AU section 558.08). The illustrative reports at AAM section 10,245.010–.045 are assembled from illustrative reporting language in SAS No. 52, paragraph 2 (AU section 558.08).

.100 Consolidating Information Not Separately Audited

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated balance sheets of X Company and subsidiaries as of December 31, 19X2 and 19X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of X Company and subsidiaries as of [at] December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations, and cash flows of the individual companies. The consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

[*Signature*]

[*Date*]

[Source: SAS No. 29, paragraph 18, as amended by SAS No. 52 (AU section 551.18).]

Notes: The report on the consolidating information may be added to the auditor's standard report on the basic financial statements or may appear separately in the auditor-submitted document.

When the auditor is engaged to express an opinion only on the consolidated financial statements and consolidating information is also included, the auditor should be satisfied that the consolidating information is suitably identified. For example, when the consolidated financial statements include columns of information about the components of the consolidated group, the balance sheets might be titled, "Consolidated Balance Sheet—December 31, 19X1, with Consolidating Information," and the columns including the consolidating information might be marked, "Consolidating Information." When the consolidating information is presented in separate schedules, the schedules presenting balance sheet information of the components might be titled, for example, "Consolidating Schedule, Balance Sheet Information, December 31, 19X1."

.110 Unqualified Opinion on Selected Financial Data in a Client-Prepared Document That Includes Audited Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated balance sheets of X Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of X Company and subsidiaries as of December 31, 19X5 and 19X4, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 19X5 in conformity with generally accepted accounting principles.

We have also previously audited, in accordance with generally accepted auditing standards, the consolidated balance sheets as of December 31, 19X3, 19X2, and 19X1, and the related consolidated statements of income, retained earnings, and cash flows for the years ended December 31, 19X2 and 19X1 (none of which are presented herein); and we expressed unqualified opinions on those consolidated financial statements.

In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 19X5, appearing on page XX, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

Engagements to Report on Internal Control

.010 Unqualified Opinion on Management's Assertion About the Effectiveness of an Entity's Internal Control When Management's Assertion is Presented in a Separate Report

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] included in the accompanying [*title of management report*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control, over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify stated or established criteria*].[1]

[Source: SSAE No. 2, paragraph 46, as amended by SSAE No. 6 (AT section 400.46).]

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

.020 Unqualified Opinion on Management's Assertion About the Effectiveness of an Entity's Internal Control When Management's Assertion is Presented Only in a Letter of Representation to the Practitioner

Independent Accountant's Report

We have examined management's assertion, included in its representation letter dated February 15, 19XY, that [*identify management's assertion, for example, W Company maintained effective internal control over financial reporting as of December 31, 19XX*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis of our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify stated or established criteria*].[1]

This report is intended solely for the information and use of the board of directors and management of W Company [*and, if applicable, a specified regulatory agency*] and should not be used for any other purpose.[2]

[Source: SSAE No. 2, paragraph 49, as amended by SSAE No. 6 (AT section 400.49).]

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

[2] If the report is a matter of public record, the following sentence should be added: "However, this report is a matter of public record and its distribution is not limited."

.030 Modified Report on Management's Assertion About the Effectiveness of an Entity's Internal Control When Management Includes in Its Assertion a Description of the Weakness and Its Effect on the Achievement of the Objectives of the Control Criteria and When It Appropriately Modifies Its Assertion About the Effectiveness of the Entity's Internal Control

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] included in the accompanying [*title of management report*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion that, except for the effect of the material weakness described in its report, [*identify management's assertion, for example, W Company maintained effective internal control over financial reporting as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify established or stated criteria*].[1]

As discussed in management's assertion, the following material weakness exists in the design or operation of the internal control of W Company in effect at [*date*]. [*Describe the material weakness and its effect on the achievement of the objectives of the control criteria.*][2] A material weakness is a condition that precludes the entity's internal control from providing reasonable assurance that material misstatements in the financial statements will be prevented or detected on a timely basis.

[Source: SSAE No. 2, paragraph 53, as amended by SSAE No. 6 (AT section 400.53).]

Note: If an examination report on management's assertion about the effectiveness of the entity's internal control is issued within the same document that includes the auditor's report on the entity's financial statements, the following sentence should be included in the paragraph of the examination report that describes the material weakness:

> These conditions were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 19XX financial statements, and this report does not affect our report dated [*date of report*] on these financial statements.

[Source: SSAE No. 2, paragraph 57, as amended by SSAE No. 6 (AT section 400.57).]

---

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

[2] The language used by the practitioner ordinarily should conform with management's description of the effect of the material weakness on the effectiveness of the entity's internal control.

.040 Adverse Opinion on Management's Assertion About the Effectiveness of an Entity's Internal Control[1]

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] included in the accompanying [*title of management report*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our examination disclosed the following condition, which we believe is a material weakness in the design or operation of the internal control of W Company in effect at [*date*]. [*Describe the material weakness and its effect on achievement of the objectives of the control criteria.*] A material weakness is a condition that precludes the entity's internal control from providing reasonable assurance that material misstatements in the financial statements will be prevented or detected on a timely basis.

In our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, management's assertion [*identify management's assertions, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] is not fairly stated based upon [*identify established or stated criteria*].[2]

[Source: SSAE No. 2, paragraph 55, as amended by SSAE No. 6 (AT section 400.55).]

---

[1] This report should be issued if:

a. Management disagrees with the practitioner over the existence of a material weakness and does not include in its assertion a description of the weakness and its effect on the achievement of the objectives of the control criteria, or

b. Management describes the material weakness but does not modify its assertion that the entity's internal control is effective.

[2] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.050 Qualified Opinion on Management's Assertion About the Effectiveness of an Entity's Internal Control Due to a Scope Limitation

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] included in the accompanying [*title of management report*].

Except as described below, our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our examination disclosed the following material weaknesses in the design or operation of the internal control of W Company in effect at [*date*]. A material weakness is a condition that precludes the entity's internal control from providing reasonable assurance that material misstatements in the financial statements will be prevented or detected on a timely basis. Prior to December 20, 19XX, W Company had an inadequate system for recording cash receipts, which could have prevented the Company from recording cash receipts on accounts receivable completely and properly. Therefore, cash received could have been diverted for unauthorized use, lost, or otherwise not properly recorded to accounts receivable. Although the Company implemented a new cash receipts system on December 20, 19XX, the system has not been in operation for a sufficient period of time to enable us to obtain sufficient evidence about its operating effectiveness.

In our opinion, except for the effect of matters we may have discovered had we been able to examine evidence about the effectiveness of the new cash receipts system, management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify established or stated criteria*].[1]

[Source: SSAE No. 2, paragraph 59, as amended by SSAE No. 6 (AT section 400.59).]

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

.060 Disclaimer of Opinion on Management's Assertion About the Effectiveness of an Entity's Internal Control Due to a Scope Limitation

Independent Accountant's Report

We were engaged to examine management's assertion [*identify management's assertion; for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] included in the accompanying [*title of management's report*].

[Scope paragraph should be omitted.]

[Explanatory paragraph.]

[*Include paragraph to describe scope restrictions.*]

Since management [*describe scope restrictions*] and we were unable to apply other procedures to satisfy ourselves as to management's assertion about the entity's internal control over financial reporting, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on management's assertion.

[Source: SSAE No. 2, paragraph 61, as amended by SSAE No. 6 (AT section 400.61).]

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.070 Unqualified Opinion on Management's Assertion About the Effectiveness of an Entity's Internal Control Based in Part on the Report of Another Practitioner

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] included in the accompanying [*title of management report*]. We did not examine management's assertion about the effectiveness of the internal control over financial reporting of B Company, a wholly owned subsidiary, whose financial statements reflect total assets and revenues constituting 20 and 30 percent, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 19XX. Management's assertion about the effectiveness of B Company's internal control over financial reporting was examined by other accountants whose report has been furnished to us, and our opinion, insofar as it relates to management's assertion about the effectiveness of B Company's internal control over financial reporting, is based solely on the report of the other accountants.

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination and the report of the other accountants provide a reasonable basis for our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, based on our examination and the report of the other accountants, management's assertion [*identify management's assertion, for example, that W Company maintained effective internal control over financial reporting as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify established or stated criteria*][1]

[Source: SSAE No. 2, paragraph 63, as amended by SSAE No. 6 (AT section 400.63).]

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

.080 Unqualified Opinion on Management's Assertion About the Effectiveness of a Segment of the Entity's Internal Control

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company's retail division maintained effective internal control over financial reporting as of December 31, 19XX*], included in the accompanying [*title of management report*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis of our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion [*identify management's assertion, for example, that W Company's retail division maintained effective internal control over financial reporting as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify established or stated criteria*].[1]

[Source: SSAE No. 2, paragraph 67, as amended by SSAE No. 6 (AT section 400.67).]

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.090 Unqualified Opinion on Management's Assertion About the Suitability of Design of the Entity's Internal Control

Independent Accountant's Report

We have examined management's assertion [*identify management's assertion, for example, that W Company's internal control over financial reporting is suitably designed to prevent or detect material misstatements in the financial statements on a timely basis as of December 31, 19XX*] included in the accompanying [*title of management report*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, evaluating the design of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of the inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertions [*identify management's assertion, for example, that W Company's internal control over financial reporting is suitably designed to prevent or detect material misstatements in the financial statements on a timely basis as of December 31, 19XX*] is fairly stated, in all material respects, based upon [*identify established or stated criteria*].[1]

[Source: SSAE No. 2, paragraph 69, as amended by SSAE No. 6 (AT section 400.69).]

Notes: This report assumes that the control criteria of the regulatory agency have been subjected to due process and, therefore, are considered reasonable criteria for reporting purposes. Therefore, there is no limitation on the distribution of this report.

When management presents such an assertion about an entity's internal control that has already been placed in operation, the report should be modified by adding the following to the scope paragraph:

> We were not engaged to examine and report on the operating effectiveness of W Company's internal control over financial reporting as of December 31, 19XX, and, accordingly, we express no opinion on operating effectiveness.

---

[1] For example, "criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."

.100 Unqualified Opinion on Management's Assertion About the Effectiveness of the Entity's Internal Control Based on Criteria Established by a Regulatory Agency That Did Not Follow Due Process

Independent Accountant's Report

We have examined management's assertion included in its representation letter dated February 15, 19XY, [*identify management's assertion, for example, that W Company's internal control over financial reporting as of December 31, 19XX is adequate to meet the criteria established by _____ agency, as set forth in its audit guide dated _____*].

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control over financial reporting, testing, and evaluating the design and operating effectiveness of the internal control, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, errors or irregularities may occur and not be detected. Also, projections of any evaluation of the internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We understand that the agency considers the controls over financial reporting that meet the criteria referred to in the first paragraph of this report adequate for its purpose. In our opinion, based on this understanding and on our examination, management's assertion [*identify management's assertion, for example, that W Company's internal control over financial reporting is adequate to meet the criteria established by _____ agency*] is fairly stated, in all material respects, based upon such criteria.

This report is intended solely for the information and use of the board of directors and management of W Company [*and, if applicable, a specified regulatory agency*] and should not be used for any other purpose.[1]

[Source: SSAE No. 2, paragraph 72, as amended by SSAE No. 6 (AT section 400.72).]

[1] If the report is a matter of public record, the following sentence should be added: "However, this report is a matter of public record and its distribution is not limited."

.110 Communication of Internal Control Structure Matters Noted in an Audit

Addressee:

In planning and performing our audit of the financial statements of the ABC Corporation for the year ended December 31, 19XX, we considered its internal control structure in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control structure. However, we noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect the organization's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

[*Include paragraphs to describe the reportable conditions noted.*]

This report is intended solely for the information and use of the audit committee (board of directors, board of trustees, or owners in owner-managed enterprises), management, and others within the organization (or specified regulatory agency or other specified third party).

[*Signature*]

[*Date*]

THE AUDITOR SHOULD NOT ISSUE A REPORT REPRESENTING THAT NO REPORTABLE CONDITIONS WERE NOTED.

[Source: SAS No. 60, paragraphs 12 and 17 (AU section 325.12 and .17).]

.120 Communication of Internal Control Structure Related Matters Noted in an Audit When One or More Reportable Conditions Were Identified, But None is Deemed to be a Material Weakness

Addressee:

In planning and performing our audit of the financial statements of the ABC Corporation for the year ended December 31, 19XX, we considered its internal control structure in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control structure. However, we noted certain matters involving the internal control structure and its operations that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect the organization's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

[Include paragraphs to describe the reportable conditions noted.]

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, none of the reportable conditions described above is believed to be a material weakness.

This report is intended solely for the information and use of the audit committee (board of directors, board of trustees, or owners in owner-managed enterprises), management, and others within the organization (or specified regulatory agency or other specified third party).

[Signature]

[Date]

THE AUDITOR SHOULD NOT ISSUE A REPORT REPRESENTING THAT NO REPORTABLE CONDITIONS WERE NOTED.

[Source: SAS No. 60, paragraphs 12, 16, and 17 (AU section 325.12, .16, and .17).]

.130 Report on Policies and Procedures Placed in Operation at a Service Organization

To XYZ Service Organization:

We have examined the accompanying description of the (payroll) application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's policies and procedures that may be relevant to a user organization's internal control structure, (2) the control structure policies and procedures included in the description were suitably designed to achieve the control objectives specified in the description, if those policies and procedures were complied with satisfactorily,[1] and (3) such policies and procedures had been placed in operation as of (*date*). The control objectives were specified by the (board of directors). Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

We did not perform procedures to determine the operating effectiveness of policies and procedures for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of XYZ Service Organization's policies and procedures, individually or in the aggregate.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's policies and procedures that had been placed in operation as of (*date*). Also, in our opinion, the policies and procedures, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described policies and procedures were complied with satisfactorily.

The description of policies and procedures at XYZ Service Organization is as of (*date*) and any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the system in existence. The potential effectiveness of specific policies and procedures at the Service Organization is subject to inherent limitations and, accordingly, errors or irregularities may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

[Source: SAS No. 70, paragraph 38 (AU section 324.38).]

Notes: This report should have an attachment containing a description of the service organization's policies and procedures that may be relevant to a user organization's internal control structure.

This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

See SAS No. 70, paragraph 39 (AU section 324.39), for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors.

See SAS No. 70, paragraph 40 (AU section 324.40), for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that there are sufficient deficiencies in the design or operation of the service organization's policies and procedures.

---

[1] If the application of internal control structure policies and procedures by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the internal control structure policies and procedures contemplated in the design of XYZ Service Organization's policies and procedures" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

.140 Report on Policies and Procedures Placed in Operation at a Service Organization and Tests of Operating Effectiveness

To XYZ Service Organization:

We have examined the accompanying description of the (payroll) application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's policies and procedures that may be relevant to a user organization's internal control structure, (2) the control structure policies and procedures included in the description were suitably designed to achieve the control objectives specified in the description, if those policies and procedures were complied with satisfactorily,[1] and (3) such policies and procedures had been placed in operation as of (*date*). The control objectives were specified by the (board of directors). Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's policies and procedures that had been placed in operation as of (*date*). Also, in our opinion, the policies and procedures, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described policies and procedures were complied with satisfactorily.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific policies and procedures, listed in Schedule X, to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from (*date*) to (*date*). The specific policies and procedures and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of XYZ Service Organization and to their auditors to be taken into consideration, along with information about the internal control structure at user organizations, when making assessments of control risk for user organizations. In our opinion the policies and procedures that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from (*date*) to (*date*). [However, the scope of our engagement did not include tests to determine whether control objectives not listed in Schedule X were achieved; accordingly, we express no opinion on the achievement of control objectives not included in Schedule X.][2]

The relative effectiveness and significance of specific policies and procedures at XYZ Service Organization and their effect on assessments of control risk at user organizations are dependent on their interaction with the policies, procedures, and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of policies and procedures at individual user organizations.

The description of policies and procedures at XYZ Service Organization is as of (*date*), and information about tests of the operating effectiveness of specified policies and procedures covers the period from (*date*) to (*date*). Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the system in existence. The potential effectiveness of specified policies and procedures at the Service Organization is subject to inherent limitations and, accordingly, errors or irregularities may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

---

[1] If the application of internal control structure policies and procedures by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the internal control structure policies and procedures contemplated in the design of XYZ Service Organization's policies and procedures" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

[2] This sentence should be added when all of the control objectives listed in the description of policies and procedures placed in operation are not covered by the tests of operating effectiveness. This sentence would be omitted when all of the control objectives listed in the description of policies and procedures placed in operation are included in the tests of operating effectiveness.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

[Source: SAS No. 70, paragraph 54 (AU section 324.54).]

Notes: This report should have two attachments: (*a*) a description of the service organization's policies and procedures that may be relevant to a user organization's internal control structure and (*b*) a description of policies and procedures for which tests of operating effectiveness were performed, the control objectives the policies and procedures were intended to achieve, the tests applied, and the results of these tests.

This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

See SAS No. 70, paragraph 55 (AU section 324.55), for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors.

See SAS No. 70, paragraph 56 (AU section 324.56), for an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that there are sufficient deficiencies in the design or operation of the service organization's policies and procedures.

.150 Reports on Internal Control Required by SEC Rule 17a-5

Board of Directors

Standard Stockbrokerage Co., Inc.

In planning and performing our audit of the consolidated financial statements of Standard Stockbrokerage Co., Inc. for the year ended December 31, 19X1, we considered its internal control structure, including procedures for safeguarding securities, in order to determine our auditing procedures for the purpose of expressing our opinion on the consolidated financial statements and not to provide assurance on the internal control structure.

Also, as required by rule 17a-5(g)(1) of the Securities and Exchange Commission, we have made a study of the practices and procedures (including tests of compliance with such practices and procedures) followed by Standard Stockbrokerage Co., Inc. that we considered relevant to the objectives stated in rule 17a-5(g), (1) in making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under rule 17a-3(11) and the reserve required by rule 15c3-3(e); (2) in making the quarterly securities examinations, counts, verifications and comparisons, and the recordation of differences required by rule 17a-13;* (3) in complying with the requirements for prompt payment for securities under section 8 of Regulation T of the Board of Governors of the Federal Reserve System; and (4) in obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by rule 15c3-3.

The management of the Company is responsible for establishing and maintaining an internal control structure and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures and of the practices and procedures referred to in the preceding paragraph and to assess whether those practices and procedures can be expected to achieve the Commission's above-mentioned objectives. Two of the objectives of an internal control structure and the practices and procedures are to provide management with reasonable, but not absolute, assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in any internal control structure or the practices and procedures referred to above, errors or irregularities may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operations may deteriorate.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving the internal control structure, including procedures for safeguarding securities, that we consider to be material weaknesses as defined above.[1]

---

* If the broker or dealer is exempt from compliance with Rule 15c3-3, does not maintain customer accounts and does not handle securities this report should be modified as stated in the AICPA Audit and Accounting Guide *Audits of Brokers and Dealers in Securities*, appendix A, exhibit I, footnotes 35 and 36.

[1] If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of the fifth paragraph of the report should be modified as follows:

> However, we noted the following matters involving the [control environment, accounting system, control procedures, or procedures for safeguarding securities] and its [their] operation that we consider to be material weaknesses as defined above. These conditions were considered in determining the nature, timing, and extent of the

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the Commission to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures were adequate at December 31, 19X1, to meet the Commission's objectives.[2]

This report is intended solely for the use of management, the Securities and Exchange Commission, the New York Stock Exchange and other regulatory agencies which rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 and should not be used for any other purpose.

procedures to be performed in our audit of the consolidated financial statements of Standard Stockbrokerage Co., Inc. for the year ended December 31, 19X1, and this report does not affect our report thereon dated February 15, 19X2. [*A description of the material weaknesses that have come to the auditor's attention and corrective action would follow.*]

[2] Whenever inadequacies are described, the report should include the last sentence of the fifth paragraph as modified in the note above. The report should also describe material inadequacies that the auditor becomes aware of that existed during the period but were corrected prior to the end of the period unless management already has reported them to the SEC.

.160 Report on Internal Control Required by SEC Rule 17a-5 When Broker or Dealer Has Not Made the Required Notification or When the Auditor Does Not Agree With the Statements Therein

December 10, 19X1

Securities and Exchange Commission

Washington D.C. and Appropriate

Regional Office

Designated Examining Authority

Dear Sirs:

Our most recent audit of the consolidated financial statements of Standard Stockbrokerage Co., Inc. and Subsidiaries was as of December 31, 19X0, and for the year then ended, which we reported on under date of February 15, 19X1. We have not audited any financial statements of the Company as of any date or for any period subsequent to December 31, 19X0. Although we are presently performing certain procedures as part of our audit of the consolidated financial statements of the Company as of December 31, 19X1, and for the year then ended, these procedures do not constitute all the procedures necessary in an audit conducted in accordance with generally accepted auditing standards or all procedures necessary to (1) consider the Company's internal control structure as required by generally accepted auditing standards or (2) study the Company's practices and procedures relevant to the objectives stated in rule 17a-5(g) of the Securities and Exchange Commission as required by rule 17a-5.

The management of Standard Stockbrokerage Co., Inc. is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles.

Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the internal control structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

The purpose of performing certain procedures prior to the date of the financial statements is to facilitate the expression of an opinion on the Company's financial statements. It must be understood that the procedures performed would not necessarily disclose all material weaknesses in the internal control structure, including procedures for safeguarding securities.

However, pursuant to the requirements of rule 17a-5(h)(2), we are to call to the attention of the chief financial officer any weaknesses that we believe to be material and that were disclosed during the course of interim work. We have made such notification to the chief financial officer of Standard Stockbrokerage Co., Inc. and we believe the following additional information is required pursuant to the requirements of rule 17a-11(f).

[*List and describe all instances where the independent auditor did not agree with the notification of the broker or dealer or where the required notification was not made.*]

Notes: The issuance of Statement on Standards for Attestation Engagements No. 2, *Reporting on an Entity's Internal Control Over Financial Reporting* (AT section 400), has not changed the reporting requirements under the Securities Exchange Act of 1934. This report would still be issued under Rule 17a-5.

AAM section 10,650 illustrates the auditor's reports on the financial statements of brokers and dealers in securities.

.170 Independent Auditor's Report on Internal Control Structure Required by Regulation 1.16 of the Commodity Futures Trading Commission

Board of Directors

ABC Commodities Corporation

In planning and performing our audit of the consolidated financial statements of ABC Commodities Corporation (the "Corporation") for the year ended December 31, 19X1, we considered its internal control structure, including procedures for safeguarding customer and firm assets, in order to determine our auditing procedures for the purpose of expressing our opinion on the consolidated financial statements and not to provide assurance on the internal control structure.

Also, as required by Regulation 1.16 of the Commodity Futures Trading Commission, we have made a study of the practices and procedures (including tests of compliance with such practices and procedures) followed by the Corporation that we considered relevant to the objectives stated in the Regulation 1.16 in making (1) the periodic computations of minimum financial requirements pursuant to Regulation 1.17, (2) the daily computations of the segregation requirements of section 4d(2) of the Commodity Exchange Act and the regulations thereunder, and the segregation of funds based on such computations, and (3) the daily computations of the foreign futures and foreign options secured amount requirements pursuant to Regulation 30.7 of the Commission.

The management of the Corporation is responsible for establishing and maintaining an internal control structure and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures and of the practices and procedures referred to in the preceding paragraph and to assess whether those practices and procedures can be expected to achieve the Commission's above-mentioned objectives. Two of the objectives of an internal control structure and the practices and procedures are to provide management with reasonable, but not absolute, assurance that assets for which the Corporation has responsibility are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit preparation of financial statements in conformity with generally accepted accounting principles. Regulation 1.16 lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in any internal control structure or the practices and procedures referred to above, errors or irregularities may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving the internal control structure, including procedures for safeguarding customer and firm assets, that we consider to be material weaknesses as defined above.[1]

---

[1] If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of the fifth paragraph of the report should be modified as follows:

> However, we noted the following matters involving the [(control environment, accounting system, control procedures, or procedures for safeguarding customer and firm assets)] and its [(their)] operation that we consider to be material weaknesses as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures to be performed in our audit of the consolidated financial statements of the Corporation for

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the Commission to be adequate for its purposes in accordance with the Commodity Exchange Act and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Corporation's practices and procedures were adequate at December 31, 19X1, to meet the Commission's objectives.[2]

This report is intended solely for the use of management, the Commodity Futures Trading Commission, and other regulatory agencies that rely on Regulation 1.16 of the Commodity Futures Trading Commission and should not be used for any other purpose.

the year ended December 31, 19X1, and this report does not affect our report thereon dated February 15, 19X2. [*A description of the material weaknesses that have come to the auditor's attention and corrective action would follow.*]

[2] Whenever inadequacies are described, the report should include the last sentence of the fifth paragraph as modified in the note above. The report should also describe material inadequacies the auditor becomes aware of that existed during the period but were corrected prior to the end of the period unless management already has reported them to the CFTC.

AAM Section 10,260
Special Reports

.010 Cash Basis Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of assets and liabilities arising from cash transactions of XYZ Company as of December 31, 19X2 and 19X1, and the related statements of revenue collected and expenses paid for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared on the basis of cash receipts and disbursements, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities arising from cash transactions of XYZ Company as of December 31, 19X2 and 19X1, and its revenue collected and expenses paid during the years then ended, on the basis of accounting described in Note X.

Notes: If the report is a matter of public record, the following sentence may be added: "However, this report is a matter of public record and its distribution is not limited."

See the AICPA publication, *Preparing and Reporting on Cash- and Tax-Basis Financial Statements*, for further guidance on the unique recognition, measurement, and disclosure issues for OCBOA (other comprehensive basis of accounting) financial statements, including illustrative financial statements and notes.

.020 Income Tax Basis Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of assets, liabilities, and capital—income tax basis of ABC Partnership as of December 31, 19X2 and 19X1, and the related statements of revenue and expenses—income tax basis and of changes in partners' capital accounts—income tax basis for the years then ended. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared on the basis of accounting the Partnership uses for income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and capital of ABC Partnership as of December 31, 19X2 and 19X1, and its revenue and expenses and changes in partners' capital accounts for the years then ended, on the basis of accounting described in Note X.

[*Signature*]

[*Date*]

.030 Regulatory (Statutory) Basis Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of admitted assets, liabilities and surplus—statutory basis of XYZ Insurance Company as of December 31, 19X2 and 19X1, and the related statements of income and cash flows—statutory basis and changes in surplus—statutory basis for the years then ended. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared in conformity with the accounting practices prescribed or permitted by the Insurance Department of [*State*], which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities and surplus of XYZ Insurance Company as of December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended, on the basis of accounting described in Note X.

This report is intended solely for the information and use of the board of directors and management of XYZ Insurance Company and for filing with the [*name of regulatory agency*] and should not be used for any other purpose.

Note: If the report is a matter of public record, the following sentence may be added: "However, this report is a matter of public record and its distribution is not limited."

.040 Report Relating to Amount of Sales for the Purpose of Computing Rental

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited the accompanying schedule of gross sales (as defined in the lease agreement dated March 4, 19XX, between ABC Company, as lessor, and XYZ Stores Corporation, as lessee) of XYZ Stores Corporation at its Main Street store, [*City*], [*State*], for the year ended December 31, 19X2. This schedule is the responsibility of XYZ Stores Corporation's management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of gross sales is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule of gross sales. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the schedule of gross sales referred to above present fairly, in all material respects, the gross sales of XYZ Stores Corporation at its Main Street store, [*City*], [*State*], for the year ended December 31, 19X2, as defined in the lease agreement referred to in the first paragraph.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Stores Corporation and ABC Company and should not be used for any other purpose.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.050 Royalties

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited the accompanying schedule of royalties applicable to engine production of the Q Division of XYZ Corporation for the year ended December 31, 19X2, under the terms of a license agreement dated May 14, 19XX, between ABC Company and XYZ Corporation. This schedule is the responsibility of XYZ Corporation's management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of royalties is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

We have been informed that, under XYZ Corporation's interpretation of the agreement referred to in the first paragraph, royalties were based on the number of engines produced after giving effect to a reduction for production retirements that were scrapped, but without a reduction for field returns that were scrapped, even though the field returns were replaced with new engines without charge to customers.

In our opinion, the schedule of royalties referred to above presents fairly, in all material respects, the number of engines produced by the Q Division of XYZ Corporation during the year ended December 31, 19X2, and the amount of royalties applicable thereto, under the license agreement referred to above.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Corporation and ABC Company and should not be used for any other purpose.

.060 Profit Participation[1]

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited, in accordance with generally accepted auditing standards, the financial statements of XYZ Company for the year ended December 31, 19X1, and have issued our report thereon dated March 10, 19X2. We have also audited XYZ Company's schedule of John Smith's profit participation for the year ended December 31, 19X1. This schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit of the schedule in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of profit participation is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

We have been informed that the documents that govern the determination of John Smith's profit participation are *(a)* the employment agreement between John Smith and XYZ Company dated February 1, 19X0, *(b)* the production and distribution agreement between XYZ Company and Television Network Incorporated dated March 1, 19X0, and *(c)* the studio facilities agreement between XYZ Company and QRX Studios dated April 1, 19X0, as amended November 1, 19X0.

In our opinion, the schedule of profit participation referred to above presents fairly, in all material respects, John Smith's participation in the profits of XYZ Company for the year ended December 31, 19X1, in accordance with the provisions of the agreements referred to above.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Company and John Smith and should not be used for any other purpose.

[*Signature*]

[*Date*]

.070 Report on Federal and State Income Taxes in Financial Statements[1]

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor's Report

Addressee:

We have audited, in accordance with generally accepted auditing standards, the financial statements of XYZ Company, Inc., for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX. We have also audited the current and deferred provision for the Company's federal and state income taxes for the year ended June 30, 19XX, included in those financial statements, and the related asset and liability tax accounts as of June 30, 19XX. This income tax information is the responsibility of the Company's management. Our responsibility is to express an opinion on it based on our audit.

We conducted our audit of the income tax information in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the federal and state income tax accounts are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures related to the federal and state income tax accounts. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the federal and state income tax accounts. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the Company has paid or, in all material respects, made adequate provision in the financial statements referred to above for the payment of all federal and state income taxes and for related deferred income taxes that could be reasonably estimated at the time of our audit of the financial statements of XYZ Company, Inc., for the year ended June 30, 19XX.

[*Signature*]

[*Date*]

[Source: SAS No. 62, paragraph 18 (AU section 623.18).]

[1] If a specified element, account, or item is, or is based upon, an entity's net income or stockholder's equity or the equivalent thereof (e.g., Federal and State Income Taxes), the auditor should have audited the complete financial statements to express an opinion on the specified element, account, or item.

.080 **Proposed Acquisition**

Independent Accountant's Report
on Applying Agreed-Upon Procedures

To the Board of Directors and Management of X Company:

We have performed the procedures enumerated below, which were agreed to by the Board of Directors and Management of X Company, solely to assist you in connection with the proposed acquisition of Y Company as of December 31, 19XX. This engagement to apply agreed-upon procedures was performed in accordance with standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the Board of Directors and Management of X Company. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and the associated findings are as follows:

Cash

1. We obtained confirmation of the cash on deposit from the following banks, and we agreed the confirmed balance to the amount shown on the bank reconciliations maintained by Y Company. We mathematically checked the bank reconciliations and compared the resultant cash balances per book to the respective general ledger account balances.

Bank	*General Ledger Account Balances as of December 31, 19XX*
ABC National Bank	$ 5,000
DEF State Bank	13,776
XYZ Trust Company—regular account	86,912
XYZ Trust Company—payroll account	5,000
	$110,688

We found no exceptions as a result of the procedures.

Accounts Receivable

2. We added the individual customer account balances shown in an aged trial balance of accounts receivable (identified as exhibit A) and compared the resultant total with the balance in the general ledger account.

   We found no difference.

3. We compared the individual customer account balances shown in the aged trial balance of accounts receivable (exhibit A) as of December 31, 19XX, to the balances shown in the accounts receivable subsidiary ledger.

   We found no exceptions as a result of the comparisons.

4. We traced the aging (according to invoice dates) for 50 customer account balances shown in exhibit A to the details of outstanding invoices in the accounts receivable subsidiary ledger. The balances selected for tracing were determined by starting at the eighth item and selecting every fifteenth item thereafter.

   We found no exceptions in the aging of the amounts of the 50 customer account balances selected. The sample size traced was 9.8 percent of the aggregate amount of the customer account balances.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

5. We mailed confirmations directly to the customers representing the 150 largest customer account balances selected from the accounts receivable trial balance, and we received responses as indicated below. We also traced the items constituting the outstanding customer account balance to invoices and supporting shipping documents for customers from which there was no reply. As agreed, any individual differences in a customer account balance of less than $300 were to be considered minor, and no further procedures were performed.

   Of the 150 customer balances confirmed, we received responses from 140 customers; 10 customers did not reply. No exceptions were identified in 120 of the confirmations received. The differences disclosed in the remaining 20 confirmation replies were either minor in amount (as defined above) or were reconciled to the customer account balance without proposed adjustment thereto. A summary of the confirmation results according to the respective aging categories is as follows:

	Accounts Receivable December 31, 19XX		
Aging Categories	*Customer Account Balances*	*Confirmations Requested*	*Confirmation Replies Received*
Current	$156,000	$ 76,000	$ 65,000
Past due:			
Less than one month	60,000	30,000	19,000
One to three months	36,000	18,000	10,000
Over three months	48,000	48,000	8,000
	$300,000	$172,000	$102,000

   We were not engaged to, and did not, perform an audit, the objective of which would be the expression of an opinion on the specified elements, accounts, or items. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

   This report is intended solely for the use of the Board of Directors and Management of X Company and should not be used by those who have not agreed to the procedures and taken responsibility for the sufficiency of the procedures for their purposes.

[Source: SAS No. 75, Appendix A (AU section 622.49).]

.090 Claims of Creditors

Independent Accountant's Report on Applying Agreed-Upon Procedures

To the Trustee of XYZ Company:

We have performed the procedures described below, which were agreed to by the Trustee of XYZ Company, with respect to the claims of creditors to determine the validity of claims of XYZ Company as of May 31, 19XX, as set forth in accompanying Schedule A. This engagement to apply agreed-upon procedures was performed in accordance with standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the Trustee of XYZ Company. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and associated findings are as follows:

1. Compare the total of the trial balance of accounts payable at May 31, 19XX, prepared by XYZ Company, to the balance in the related general ledger account.

   The total of the accounts payable trial balance agreed with the balance in the related general ledger account.

2. Compare the amounts for claims received from creditors (as shown in claim documents provided by XYZ Company) to the respective amounts shown in the trial balance of accounts payable. Using the data included in the claims documents and in XYZ Company's accounts payable detail records, reconcile any differences found to the accounts payable trial balance.

   All differences noted are presented in column 3 of Schedule A. Except for those amounts shown in column 4 of Schedule A, all such differences were reconciled.

3. Examine the documentation submitted by creditors in support of the amounts claimed and compare it to the following documentation in XYZ Company's files: invoices, receiving reports, and other evidence of receipt of goods or services.

   No exceptions were found as a result of these comparisons.

   We were not engaged to, and did not, perform an audit, the objective of which would be the expression of an opinion on the specified elements, accounts, or items. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

   This report is intended solely for the use of the Trustee of XYZ Company and should not be used by those who have not agreed to the procedures and taken responsibility for the sufficiency of the procedures for their purposes.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.100 Compliance With Contractual Provisions (Separate Report)

We have audited, in accordance with generally accepted auditing standards, the balance sheet of XYZ Company as of December 31, 19X2, and the related statement of income, retained earnings, and cash flows for the year then ended, and have issued our report thereon dated February 16, 19X3.

In connection with our audit, nothing came to our attention that caused us to believe that the Company failed to comply with the terms, covenants, provisions, or conditions of sections XX to XX, inclusive, of the Indenture dated July 21, 19X0, with ABC Bank insofar as they relate to accounting matters. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance.

This report is intended solely for the information and use of the boards of directors and management of XYZ Company and ABC Bank and should not be used for any other purpose.

[Source: SAS No. 62, paragraph 21 (AU section 623.21).]

Note: When this report is included in the auditor's standard report accompanying financial statements, the last two paragraphs are examples of the paragraphs that should follow the opinion paragraph of the auditor's report on the financial statements.

.110 Report on Financial Statements Prepared Pursuant to Loan Agreements That Results in a Presentation Not in Conformity With Generally Accepted Accounting Principles or an Other Comprehensive Basis of Accounting

Independent Auditor's Report

Addressee:

We have audited the accompanying special-purpose statement of assets and liabilities of ABC Company as of December 31, 19X1, and the related special-purpose statements of revenues and expenses and of cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of complying with section 4 of a loan agreement between DEF Bank and the Company as described in Note X, and are not intended to be a presentation in conformity with generally accepted accounting principles.

In our opinion, the special-purpose financial statements referred to above present fairly, in all material respects, the assets and liabilities of ABC Company as of December 31, 19X1, and the revenues, expenses and cash flows for the year then ended, on the basis of accounting described in Note X.

This report is intended solely for the information and use of the boards of directors and managements of ABC Company and DEF Bank and should not be used for any other purpose.

.120 Report on a Schedule of Gross Income and Certain Expenses to Meet Regulatory Requirements and to be Included in a Document Distributed to the General Public

Independent Auditor's Report

Addressee:

We have audited the accompanying Historical Summaries of Gross Income and Direct Operating Expenses of ABC Apartments, City, State (Historical Summaries), for each of the three years in the period ended December 31, 19XX. These Historical Summaries are the responsibility of the Apartments' management. Our responsibility is to express an opinion on the Historical Summaries based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Historical Summaries are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Historical Summaries. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Historical Summaries. We believe that our audits provide a reasonable basis for our opinion.

The accompanying Historical Summaries were prepared for the purpose of complying with the rules and regulations of the Securities and Exchange Commission (for inclusion in the registration statement on Form S-11 of DEF Company) as described in Note X, and are not intended to be a complete presentation of the Apartments' revenues and expenses.

In our opinion, the Historical Summaries referred to above present fairly, in all material respects, the gross income and direct operating expenses described in Note X of ABC Apartments for each of the three years in the period ended December 31, 19XX, in conformity with generally accepted accounting principles.

.121 Report on a Statement of Assets Sold and Liabilities Transferred to Comply With a Contractual Agreement

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets sold of ABC Company as of June 8, 19XX. This statement of net assets sold is the responsibility of ABC Company's management. Our responsibility is to express an opinion on the statement of net assets based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of net assets sold is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the statement of net assets sold. We believe that our audit provides a reasonable basis for our opinion.

The accompanying statement was prepared to present the net assets of ABC Company sold to XYZ Corporation pursuant to the purchase agreement described in Note X, and is not intended to be a complete presentation of ABC Company's assets and liabilities.

In our opinion, the accompanying statement of net assets sold presents fairly, in all material respects, the net assets of ABC Company as of June 8, 19XX, sold pursuant to the purchase agreement referred to in Note X, in conformity with generally accepted accounting principles.

This report is intended solely for the information and use of the boards of directors and managements of ABC Company and XYZ Corporation and should not be used for any other purpose.

.130 Report on the Application of Accounting Principles

Introduction

We have been engaged to report on the appropriate application of generally accepted accounting principles to the specific (hypothetical) transaction described below. This report is being issued to the ABC Company (XYZ Intermediaries) for assistance in evaluating accounting principles for the described specific (hypothetical) transaction. Our engagement has been conducted in accordance with standards established by the American Institute of Certified Public Accountants.

Description of Transaction

The facts, circumstances, and assumptions relevant to the specific (hypothetical) transaction as provided to us by the management of ABC Company (XYZ Intermediaries) are as follows:

> Prior to 19X1, ABC Company used the accelerated cost recovery method (ACRS) to depreciate fixed assets for financial reporting and income tax purposes. The number of years specified by ACRS for recovery deductions of the fixed assets did not fall within a reasonable range of the asset's useful life. ABC Company switched to the straight-line method of depreciating its fixed assets in the current year.

Appropriate Accounting Principles

The change in depreciation methods should be accounted for as a prior period adjustment in the current year's financial statements in accordance with FASB Statement No. 16, *Prior Period Adjustments*, paragraph 11 [AC A35.103]. Since the number of years specified by ACRS for recovery deductions of the fixed assets did not fall within a reasonable range of the asset's useful life, the ACRS method would not be considered a generally accepted accounting principle. According to APB Opinion 20, *Accounting Changes*, paragraph 13, [AC A35.104], "A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of an error for purposes of applying this Opinion."

Concluding Comments

The ultimate responsibility for the decision on the appropriate application of generally accepted accounting principles for an actual transaction rests with the preparers of financial statements, who should consult with their continuing accountants. Our judgment on the appropriate application of generally accepted accounting principles for the described specific (hypothetical) transaction is based solely on the facts provided to us as described above; should these facts and circumstances differ, our conclusion may change.

[Source: SAS No. 50, paragraph 9 (AU section 625.09).]

Note: This illustrative report is intended for an accountant in public practice either in connection with a proposal to obtain a new client or otherwise, when: (1) preparing a written report on the application of accounting principles to specified transactions, either completed or proposed, (2) requested to provide a written report on the type of opinion that may be rendered on a specific entity's financial statements, or (3) preparing a written report to intermediaries on the application of accounting principles not involving facts or circumstances of a particular principal.

[Source: SAS No. 50, paragraph 2 (AU section 625.02).]

.140 Report on Financial Statements Presented in Conformity With a Prescribed Basis of Accounting (Property and Liability Insurance Company)

Independent Auditor's Report

Addressee:

We have audited the accompanying statutory-basis balance sheets of P and C Insurance Company as of December 31, 19X2 and 19X1, and the related statutory-basis statements of income, surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to report on these financial statements based on our audits.

We conducted our audits of the accompanying statutory-basis financial statements in accordance with generally accepted auditing standards; however, as discussed in the following paragraph, we were not engaged to determine or audit the effects of the variances between statutory accounting practices and generally accepted accounting principles. Generally accepted auditing standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion on the accompanying statutory-basis financial statements.

The Company presents its financial statements in conformity with accounting practices prescribed or permitted by the [*name of state*] Insurance Department. When statutory-basis financial statements are presented for purposes other than for filing with regulatory agency, generally accepted auditing standards require that an auditor's report on them state whether they are presented in conformity with generally accepted accounting principles. The accounting practices used by the Company vary from generally accepted accounting principles as explained in Note X, and the Company has not determined the effects of these variances. Accordingly, we were not engaged to audit, and we did not audit, the effects of these variances. Since the financial statements referred to above do not purport to be a presentation in conformity with generally accepted accounting principles, we are not in a position to express and do not express an opinion on the financial statements referred to above as to fair presentation of financial position, results of operations, or cash flows in conformity with generally accepted accounting principles.

In our opinion, the statutory-basis financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and shareholders' (members') equity of P and C Insurance Company at December 31, 19X2 and 19X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting practices prescribed or permitted by the [*name of state*] Insurance Department.

Unaudited Financial Statements of a Public Entity

(When an accountant is associated with the financial statements but has not audited or reviewed such statements)

.01 Disclaimer

Addressee:

The accompanying balance sheet of X Company as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us, and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraph 5 (AU section 504.05).]

Notes: The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2510 and 2520.

.02 Current Period Financial Statements Unaudited—Prior Period Financial Statements Audited

Addressee:

The accompanying balance sheet of ABC Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

The financial statements for the year ended December 31, 19X1, were audited by us (other accountants) and we (they) expressed an unqualified opinion on them in our (their) report dated March 1, 19X2, but we (they) have not performed any auditing procedures since that date.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraphs 5 and 16 (AU section 504.05 and .16).]

Notes: The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2510 and 2520.

.03 Disclaimer—Cash Basis Statements

(When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles)

Addressee:

The accompanying statement of assets and liabilities resulting from cash transactions of XYZ Corporation as of December 31, 19X1, and the related statement of revenues collected and expenses paid during the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraph 7 (AU section 504.07).]

Notes: A note to the financial statements should describe how the basis of presentation differs from generally accepted accounting principles, but the monetary effect of such differences need not be stated.

The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2510 and 2520.

.04 Disclaimer—Regulatory (Statutory) Basis Statements

(When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles)

Addressee:

The accompanying statement of admitted assets, liabilities, and surplus—statutory basis of XYZ Insurance Company as of December 31, 19XX, and the related statements of income—statutory basis, cash flows—statutory basis, and changes in surplus—statutory basis for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraph 7 (AU section 504.07).]

Notes: A note to the financial statements should describe how the basis of presentation differs from generally accepted accounting principles, but the monetary effect of such differences need not be stated.

The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a privately held (nonpublic) company, this example is not appropriate. See AAM sections 2510 and 2520.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

AAM Section 10,280
Lack of Independence

.01 Disclaimer

Addressee:

We are not independent with respect to XYZ Company, and the accompanying balance sheet as of December 31, 19X1 and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[*Signature*]

[*Date*]

[Source: SAS No. 26, paragraph 10 (AU section 504.10).]

Notes: When an accountant is not independent, any procedures he or she might perform would not be in accordance with generally accepted auditing standards and he or she would be precluded from expressing an opinion on the financial statements. Accordingly, he or she should disclaim an opinion with respect to the financial statements and state specifically that he or she is not independent. The accountant should not include in his or her disclaimer the reasons for the lack of independence or any description of the procedures he or she has performed; including such matters might confuse readers concerning the importance of the lack of independence.

If the financial statements are those of a nonpublic entity, the guidance in Statements on Standards for Accounting and Review Services (SSARS) should be followed. (See AAM section 2510.03.)

[*The next page is 10,671.*]

AAM Section 10,300
Review of Interim Financial Information

.01 **Independent Accountant's Report**

Independent Accountant's Report

Addressee:

We have reviewed the accompanying [*describe the statements or information reviewed*] of ABC Company and consolidated subsidiaries as of September 30, 19X1, and for the three-month and nine-month periods then ended. These financial statements (information) are (is) the responsibility of the company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements (information) for them (it) to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SAS No. 71, paragraph 28 (AU section 722.28).]

Note: SAS No 71, *Interim Financial Information* (AU section 722), provides guidance for accountants engaged to review interim financial information of a public entity. SAS No. 71 (AU section 722) may also, in certain limited situations, apply to reviews of interim financial information for nonpublic entities. The accountant should refer to the SAS to determine its applicability.

[*The next page is 10,701.*]

AAM Section 10,400

Accountants' Reports on Condensed Financial Statements and Selected Financial Data

.01 Unqualified Opinion on Condensed Financial Statements[1]

Independent Auditor's Report

Addressee:

We have audited, in accordance with generally accepted auditing standards, the consolidated balance sheet of X Company and subsidiaries as of December 31, 19X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 19X1, we expressed an unqualified opinion on those consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

[*Signature*]

[*Date*]

[Source: SAS No. 42, paragraph 6 (AU section 552.06).]

[1] This report is appropriate when reporting in a client-prepared document on condensed financial statements (either for an annual or an interim period) that are derived from audited financial statements of a public entity that is required to file, at least annually, complete audited financial statements with a regulatory agency (See SAS No. 42, paragraph 1a [AU section 552.01a].).

.02 Adverse Opinion on Condensed Financial Statements Due to Inadequate Disclosure[2]

Independent Auditor's Report

Addressee:

We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 19X0, and the related earnings and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

The condensed consolidated balance sheet as of December 31, 19X0, and the related condensed consolidated statements of income, retained earnings, and cash flows for the year then ended, presented on pages XX-XX, are presented as a summary and therefore do not include all of the disclosures required by generally accepted accounting principles.

In our opinion, because of the significance of the omission of the information referred to in the preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with generally accepted accounting principles, the financial position of X Company and subsidiaries as of December 31, 19X0, or results of their operations and their cash flows for the year then ended.

[*Signature*]

[*Date*]

[Source: SAS No. 42, paragraph 7, footnote 6 (AU section 552.07).]

[2] This report is appropriate if a statement naming the auditor and stating that condensed financial statements have been derived from audited financial statements is made in a client-prepared document that does not include audited financial statements and the client is not a public entity that is required to file complete audited financial statements with a regulatory agency at least annually (See SAS No. 42, paragraph 7, footnote 6 [AU section 552.07].).

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.03 Review Report on Condensed Financial Statements

Independent Auditor's Report

Addressee:

We have reviewed the condensed consolidated balance sheet of ABC Company and subsidiaries as of March 31, 19X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 19X1 and 19X0. These financial statements are the responsibility of the company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with generally accepted accounting principles.

We have previously audited, in accordance with generally accepted auditing standards, the consolidated balance sheet as of December 31, 19X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 19X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 19X0, is fairly stated in all material respects, in relation to the consolidated balance sheet from which it has been derived.

[*Signature*]

[*Date*]

[Source: SAS No. 42, paragraph 8, as amended by SAS No. 71 (AU section 552.08).]

Note: This is an illustrative review report on a condensed balance sheet as of March 31, 19X1, and the related condensed statements of income and cash flows for the three-month periods ended March 31, 19X1 and 19X0, together with a report on a condensed balance sheet derived from audited financial statements as of December 31, 19X0, included in Form 10-Q.

.03 Audit Report—Departure From GAAP—Inappropriate Valuation Methods—Adverse Opinion

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with generally accepted auditing standards. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As discussed in Note X to the financial statements, assets amounting to $XX,XXX (XX percent of total assets) as of [*date*] have been valued at estimated current value as determined by James Person. I (We) have reviewed the procedures applied by James Person in valuing the assets and have inspected the underlying documentation. In my (our) opinion those procedures are not appropriate to determine the estimated current values of the assets in conformity with generally accepted accounting principles. The effects on the financial statements of not applying appropriate procedures to determine the estimated current values of the assets are not reasonably determinable.

In my (our) opinion, because of the effects of the matters discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with generally accepted accounting principles, the financial condition of James and Jane Person as of [*date*] and the changes in their net worth for the [*period*] then ended.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.18.]

.04 Audit Report—Departure From GAAP—Inappropriate Valuation Methods—Qualified Opinion

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with generally accepted auditing standards. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As discussed in Note X to the financial statements, assets amounting to $XX,XXX (XX percent of total assets) as of [*date*] have been valued at estimated current value as determined by James Person. I (We) have reviewed the procedures applied by James Person in valuing the assets and have inspected the underlying documentation. In my (our) opinion, those procedures are not appropriate to determine the estimated current values of the assets in conformity with generally accepted accounting principles. The effects on the financial statements of not applying appropriate procedures to determine the estimated current values of the assets are not reasonably determinable.

In my (our) opinion, except for the effects of the valuation of assets determined by James Person as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial condition of James and Jane Person as of [*date*], and the changes in their net worth for the [*period*] then ended in conformity with generally accepted accounting principles.

.05 Audit Report—Disclaim Opinion Because of Scope Limitation—Inadequate Records

Independent Auditor's Report

Addressee:

I (We) was engaged to audit the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person.

James and Jane Person do not maintain accounting records sufficient to assure that all transactions are recorded. Accordingly, it was not practicable for me (us) to extend my (our) auditing procedures sufficiently to determine that all of their assets and liabilities and the changes in their net worth are recorded in the financial statements referred to above.

Because James and Jane Person do not maintain certain accounting records and supporting documentation, and I was (we were) unable to apply adequate auditing procedures regarding the recording of transactions, the scope of my (our) work was not sufficient to enable me (us) to express, and I (we) do not express, an opinion on these financial statements.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide,* paragraph 5.16.]

.06 Audit Report—Scope Limitation—Inadequate Records

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (our) responsibility is to express an opinion on these financial statements based on my (our) audit.

Except as explained in the following paragraph, I (we) conducted my (our) audit in accordance with generally accepted auditing standards. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

James and Jane Person do not maintain accounting records sufficient to assure that all transactions are recorded. Accordingly, it was not practicable for me (us) to extend my (our) auditing procedures sufficiently to determine that all of their assets and liabilities and the changes in their net worth are recorded in the financial statements referred to above.

In my (our) opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had I (we) been able to determine that all assets and liabilities and changes in net worth were recorded in the financial statements, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial condition of James and Jane Person as of [*date*], and the changes in their net worth for the [*period*] then ended in conformity with generally accepted accounting principles.

.07 Audit Report—Income Tax Basis

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of assets and liabilities—income tax basis of James and Jane Person as of [*date*], and the related statement of changes in net assets—income tax basis for the [*period*] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with generally accepted auditing standards. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As described in Note X, these financial statements were prepared on the basis of accounting James and Jane Person use for income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In my (our) opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities of James and Jane Person as of [*date*], and the changes in their net assets for the [*period*] then ended on the basis of accounting described in Note X.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.19.]

.08 Accountant's Standard Compilation Report

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

[*Signature*]

[*Date*]

.09 Compilation Report—Statement of Financial Condition Only

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying statement of financial condition and, accordingly, do not express an opinion or any other form of assurance on it.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide,* paragraph 5.03.]

.10 Compilation Report—Omission of Substantially All Disclosures

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

James and Jane Person have elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the financial condition of James and Jane Person and changes in their net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide,* paragraph 5.04.]

Note: When personal financial statements omit substantially all disclosures and do not disclose that the assets are presented at their estimated current values and that the liabilities are presented at their estimated current amounts, the accountant should include the following sentence at the end of the first paragraph of his or her report:

> The financial statements are intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

[Source: AICPA *Personal Financial Statements Guide,* paragraph 5.05.]

.11 Compilation Report—GAAP Departure—Material Assets at Cost

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that assets be presented at their estimated current values and that liabilities be presented at their estimated current amounts. James and Jane Person have informed me (us) that their investment in ABC Company is stated in the accompanying financial statements at cost and that the effects of this departure from generally accepted accounting principles on their financial condition and the changes in their net worth have not been determined.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.08.]

.12 Compilation Report—Income Tax Basis

Addressee:

I (We) have compiled that accompanying statement of asset and liabilities—income tax basis of James and Jane Person as of [*date*], and the related statement of changes in net assets—income tax basis for the [*period*] then ended, in accordance with Statement on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.19.]

Note: When personal financial statements are prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the notes ordinarily would state the basis of presentation and describe how that basis differs from generally accepted accounting principles. [Source: Accounting and Review Services Interpretation No. 12 of SSARS 1 (AR section 9100.42).]

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.13 Compilation Report—Financial Statements Included in a Prescribed Form

Addressee:

I (We) have compiled the [*identification of financial statements, including period covered and name of individual(s)*] included in the accompanying prescribed form, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form prescribed by [*name of body*] information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of [*name of body*], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.08.]

.14 Accountant's Standard Review Report

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James and Jane Person.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.10.]

.15 Review Report—Statement of Financial Condition Only

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James and Jane Person as of [*date*], in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in this financial statement is the representation of James and Jane Person.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying statement of financial condition in order for it to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: AICPA *Personal Financial Statements Guide*, paragraph 5.10.]

.16 Review Report—GAAP Departure—Failure to Include a Provision for Estimated Income Taxes on the Differences Between the Estimated Current Values of Assets and the Estimated Current Amounts of Liabilities and Their Tax Bases

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James Person.

A review of personal financial statements consists principally of inquiries of the individual whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

Generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases. The accompanying financial statements do not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

.17 Review Report—Historical Cost Basis

Addressee:

I (We) have reviewed the accompanying statement of assets and liabilities—historical cost basis of James and Jane Person as of [*date*], and the related statement of changes in net assets—historical cost basis for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James and Jane Person.

A review of personal financial statements consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the historical cost basis of accounting described in Note X.

AAM Section 10,600
Reports on Employee Benefit Plans

.01 Unqualified Opinion—Defined Benefit Plan Assuming End-of-Year Benefit Information Date

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits and of accumulated plan benefits of XYZ Pension Plan as of December 31, 19X2 and 19X1, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 19X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan as of December 31, 19X2 and 19X1, and the changes in its financial status for the year ended December 31, 19X2 in conformity with generally accepted accounting principles.

[*Signature of Firm*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraph 13.04.]

Note: Department of Labor Regulations, section 2520.103-1 requires the accountant's report to be dated, manually signed, indicate the city and state where issued and identify the financial statements and schedules covered by the report.

.02 Unqualified Opinion—Defined Benefit Plan Assuming Beginning-of-Year Benefit Information Date

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 19X2 and 19X1, and the related statements of changes in net assets available for benefits for the years then ended and the statement of accumulated plan benefits as of December 31, 19X1, and the related statement of changes in accumulated plan benefits for the year then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 19X2, and changes therein for the year then ended and its financial status as of December 31, 19X1, and changes therein for the year then ended in conformity with generally accepted accounting principles.

.04 **Unqualified Opinion—Employee Health and Welfare Benefit Plan*** **[For those plans that have not yet adopted SOP 92-6]**

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets of Bizco Corporation Employee Health and Welfare Benefit Plan as of December 31, 19X1 and 19X0, and the related statement of changes in net assets for the year ended December 31, 19X1. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets of the Plan as of December 31, 19X1 and 19X0, and the changes in net assets for the year ended December 31, 19X1 in conformity with generally accepted accounting principles.

* This is an illustration of an auditor's report with an unqualified opinion on the financial statements of an employee health and welfare plan prepared in accordance with chapter 4 of the AICPA Audit and Accounting Guide (the Guide) *Audits of Employee Benefit Plans*. Chapter 4 of the Guide has been superseded by AICPA Statement of Position (SOP) 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans*. SOP 92-6 is effective for audits of financial statements of single-employer plans for plan years beginning after December 15, 1992, except that application of the SOP by single-employer plans with no more than 500 participants is effective for plan years beginning after December 15, 1994. SOP 92-6 is effective for audits of financial statements of multi-employer plans for plan years beginning after December 15, 1995. Earlier application is encouraged. When a plan adopts the SOP it must be adopted in its entirety.

An illustration of an auditor's report assuming the provisions of SOP 92-6 have been adopted is presented in AAM section 10.600.05.

.06 Unqualified Opinion—Supplemental Schedules Required by ERISA and DOL Regulations

Independent Auditor's Report

Addressee:

Our audits were performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedules of (*identify*) are presented for the purpose of additional analysis and are not a required part of the basic financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[*Signature of Firm*]

[*City and State*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraph 13.11.]

Notes: This paragraph can be shown separately in the auditor-submitted document or as a separate paragraph, after the opinion paragraph, of the auditor's standard report, when the auditor's report covers additional information and the auditor has applied auditing procedures and is expressing an opinion on the additional information.

Examples of paragraphs that should be added to the standard auditor's report when the report on the supplemental schedules is modified because of omitted information or an omitted schedule required by DOL regulations are presented in AAM section 10,600.08, .09, and .18.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.07 Unqualified Opinion—Defined Benefit Pension Plan Prepared on the Modified Cash Basis

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits (modified cash basis) of XYZ Pension Plan as of December 31, 19X2 and 19X1, and the related statement of changes in net assets available for benefits (modified cash basis) for the year ended December 31, 19X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements and supplemental schedules were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits and the accumulated plan benefits of XYZ Pension Plan as of December 31, 19X2 and 19X1, and the changes in net assets available for benefits and changes in accumulated plan benefits for the year ended December 19X2, on the basis of accounting described in Note X.

Our audits were made for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules (modified cash basis) of (1) assets held for investment purposes, (2) loans or fixed income obligations, (3) leases in default or classified as uncollectible, (4) reportable transactions, and (5) non-exempt transactions as of or for the year ended December 31, 19X2, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplementary schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[*Signature of Firm*]

[*City and State*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraph 13.21.]

Note: When reporting on financial statements prepared in conformity with a basis of accounting other than generally accepted accounting principles (OCBOA), the auditor should consider whether the financial statements and notes thereto include all informative disclosures that are appropriate for the basis of accounting used. Regardless of the basis of accounting used (GAAP or OCBOA), accumulated plan benefits disclosures should be made. If such disclosures are not made, the auditor should comment in his or her report on the lack of such disclosures and should express a qualified or adverse opinion on the financial statements. [Source: AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraph 13.22.]

.08 Modified Report—Omitted Information or Omitted Schedule Required Under DOL Regulations

Following are examples of paragraphs that should be added to the auditor's report when the auditor should modify his or her report on the supplemental schedules because of omitted information or an omitted schedule which is required under DOL regulations.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See AAM section 10,600.01–.04.]

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of *[identify]* are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations of Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The schedule of assets held for investment purposes that accompanies the Plan's financial statements does not disclose the historical cost of certain plan assets held by the Plan trustee [or custodian]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

or

The Plan has not presented the schedule of reportable transactions (transactions in excess of 5 percent of the current value of plan assets at the beginning of the year). Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

_____

.09 Qualified Opinion—Omitted or Incomplete Schedule or Material Inconsistency

The following paragraphs should be added to the auditor's report when the auditor concludes that his or her opinion on the supplemental schedules should be qualified because a schedule, or information thereon, was omitted (when the schedules are not covered by a trustee's certification as to completeness and accuracy), or because information in a required schedule is materially inconsistent with the financial statements.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See AAM section 10,600.01–.04.]

The schedule of assets held for investment purposes that accompanies the Plan's financial statements does not disclose that the Plan had loans to participants which are considered assets held for investment purposes. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of *[identify]* are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[*Signature of Firm*]

[*City and State*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraph 13.16.]

.10 Qualified Opinion—Disclosure of Material Prohibited Transaction With Party in Interest Omitted**

The following paragraphs should be added to the auditor's report on the plan's financial statements when the auditor concludes that his or her opinion on the supplemental schedules should be qualified because disclosure of a material prohibited transaction with a party in interest is omitted.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See AAM section 10,600.01–.04.]

The schedule of prohibited transactions that accompanies the plan's financial statements does not disclose that the Plan [*describe prohibited transaction*]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules [*identify*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.11 Adverse Opinion—Disclosure of Material Prohibited Transaction With Party in Interest Omitted

The following paragraphs should be added to the auditor's report on the plan's financial statements when the auditor decides that an adverse opinion should be expressed on the supplemental schedules because disclosure of a material prohibited transaction with a party in interest is omitted.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See AAM section 10,600.01–.04.]

The schedule of prohibited transactions that accompanies the plan's financial statements does not disclose that the Plan [*describe prohibited transaction*]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [*identify*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, because of the omission of the information discussed in the preceding paragraph are not fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.12 Modified Report—Disclosure of Immaterial Prohibited Transaction With Party in Interest Omitted

The following paragraphs should be added to the auditor's report on the plan's financial statements when the auditor decides to modify his or her report on the supplemental schedules because disclosure of a prohibited transaction with a party in interest that is not material to the financial statements has been omitted.

Independent Auditor's Report

Addressee:

[*Same first, second, and third paragraphs as the standard report.* See AAM section 10,600.01–.04.]

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [*identify*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The schedule of prohibited transactions that accompanies the plan's financial statements does not disclose that the Plan [*describe prohibited transaction*]. Disclosure of this information, which is not considered material to the financial statements taken as a whole, is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.13 Qualified Opinion—Disclosure of Material Prohibited Transaction With Party in Interest Omitted—Related-Party Transaction

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets available for benefits of XYZ Company Profit-Sharing Plan as of December 31, 19X1 and 19X0, and the related statement of changes in net assets available for benefits for the year ended December 31, 19X1. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Plan's financial statements do not disclose that the Plan [*describe related-party transaction*]. Disclosure of this information is required by generally accepted accounting principles.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 19X1 and 19X0, and the changes in net assets available for benefits for the year ended December 31, 19X1 in conformity with generally accepted accounting principles.

The schedule of prohibited transactions that accompanies the plan's financial statements does not disclose that the plan [*describe prohibited transaction*]. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [*identify*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.14 Limited-Scope Audits Under DOL Regulations

Independent Auditor's Report

Addressee:

We were engaged to audit the financial statements and schedules of XYZ Pension Plan as of December 31, 19X1 and 19X0, and for the year ended December 31, 19X1, as listed in the accompanying index. These financial statements and schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee (or custodian) of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of and for the years ended December 31, 19X1 (and 19X2) that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustee, have been audited by us in accordance with generally accepted auditing standards and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.15 Limited-Scope Audit in Prior Year

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 19X2 and 19X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 19X2, and the statements of accumulated plan benefits as of December 31, 19X2 and 19X1, and the related statement of changes in accumulated plan benefits for the year ended December 31, 19X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, investment assets held by ABC Bank, the trustee (or custodian) of the Plan, and transactions in those assets were excluded from the scope of our audit of the Plan's 19X1 financial statements, except for comparing the information provided by the trustee (or custodian), which is summarized in Note X, with the related information included in the financial statements.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the Plan's financial statements as of December 31, 19X1. The form and content of the information included in the 19X1 financial statements, other than that derived from the information certified by the trustee (or custodian), have been audited by us and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

In our opinion, the financial statements, referred to above, of XYZ Pension Plan as of December 31, 19X2, and for the year then ended present fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 19X2, and changes in its financial status for the year then ended in conformity with generally accepted accounting principles.

Our audit of the Plan's financial statements as of and for the year ended December 31, 19X2, was made for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of (1) assets held for investment purposes, (2) loans or fixed income obligations, (3) leases in default or classified as uncollectible, (4) reportable transactions, and (5) non-exempt transactions as of or for the year ended December 31, 19X2, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements for the year ended December 31, 19X2, and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.16 Limited-Scope Audit in Current Year

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying statement of net assets available for benefits of XYZ Pension Plan as of December 31, 19X2 and 19X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 19X2 and the supplemental schedules of (1) assets held for investment purposes, (2) transactions in excess of 5 percent of the current value of plan assets, and (3) investments in loans and fixed income obligations in default or classified as uncollectible as of or for the year ended December 31, 19X2. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee (or custodian) of the Plan, except for comparing the information with the related information included in the 19X2 financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of and for the year ended December 31, 19X2, that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Because of the significance of the information in the Plan's 19X2 financial statements that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules as of or for the year ended December 31, 19X2. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee (or custodian), have been audited by us in accordance with generally accepted auditing standards and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

We have audited the statement of net assets available for benefits of XYZ Pension Plan as of December 31, 19X1 and, in our report dated May 20, 19X2, we expressed our opinion that such financial statement presents fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 19X1, in conformity with generally accepted accounting principles.

.17 Multiemployer Pension Plan Assuming Limited-Scope Audit

Independent Auditor's Report

Addressee:

We were engaged to audit the statements of (*identify*) of XYZ Multiemployer Pension Plan as of December 31, 19X2 and 19X1, and for the years then ended. These financial statements are the responsibility of the Plan's management.

The Plan's records and procedures are not adequate to assure the completeness of participants' data on which contributions and benefit payments are determined, and the Board of Trustees did not engage us to perform, and we did not perform, any other auditing procedures with respect to participants' data maintained by the sponsor companies or individual participants.

Because of the significance of the information that we did not audit, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[Source: AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, paragraph 13.28.]

.18 Modified Report—Omitted Information or Omitted Schedule Required Under DOL Regulations in a Limited Scope Engagement

Independent Auditor's Report

Addressee:

[*Same first and second paragraphs as the limited-scope report.* See AAM section 10,600.14.]

The schedule of assets held for investment purposes that accompanies the Plan's financial statements does not disclose that the Plan has loans to participants which are considered assets held for investment purposes. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

or

The Plan has not presented the schedule of reportable transactions (transactions in excess of 5 percent of the current value of plan assets at the beginning of the year). Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustee, have been audited by us in accordance with generally accepted auditing standards and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.19 Trust Established Under an Employee Benefit Plan

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets of ABC Pension Trust as of December 31, 19X2, and the related statement of changes in net assets and trust balance for the year then ended. These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets of ABC Pension Trust as of December 31, 19X2, and the changes in its net assets and trust balance for the year then ended in conformity with generally accepted accounting principles.

The accompanying statements are those of ABC Pension Trust, which is established under XYZ Pension Plan; the statements do not purport to present the financial status of XYZ Pension Plan. The statements do not contain certain information on accumulated plan benefits and other disclosures necessary for fair presentation of the financial status of XYZ Pension Plan in conformity with generally accepted accounting principles. Furthermore, these statements do not purport to satisfy the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 relating to the financial statements of employee benefit plans.

.20 Defined Benefit Plan Assuming Inadequate Procedures to Value Investments

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 19X2 and 19X1 and of accumulated plan benefits as of December 31, 19X2, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 19X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note X, investments amounting to $_____ (_____ percent of net assets available for benefits) as of December 31, 19X2, have been valued at estimated fair value as determined by the Board of Trustees. We have reviewed the procedures applied by the trustees in valuing the securities and have inspected the underlying documentation. In our opinion, those procedures are not adequate to determine the fair value of the investments in conformity with generally accepted accounting principles. The effect on the financial statements and supplemental schedules of not applying adequate procedures to determine the fair value of the securities is not determinable.

In our opinion, except for the effects of the procedures used by the Board of Trustees to determine the valuation of investments as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 19X2, and information regarding the plan's net assets available for benefits as of December 31, 19X1, and the changes in its financial status for the year ended in December 31, 19X2 in conformity with generally accepted accounting principles.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of (1) assets held for investment purposes, (2) loans or fixed income obligations, (3) leases in default or classified as uncollectible, (4) reportable transactions, and (5) non-exempt transactions as of or for the year ended December 31, 19X2, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. That additional information has been subjected to the auditing procedures applied in the audit of the basic financial statements for the year ended December 31, 19X2; and in our opinion, except for the effects of the valuation of investments, as described above, the additional information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.21 Defined Benefit Plan Assuming Nonreadily Marketable Investments

Independent Auditor's Report

Addressee:

[*Same first and second paragraphs as the standard report.* See AAM section 10,600.01–.04.]

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 19X1 and 19X0, and the changes in net assets available for benefits for the year ended December 31, 19X1 in conformity with generally accepted accounting principles.

As explained in note 2, the financial statements include securities valued at $_____ (_____ percent of net assets), whose values have been estimated by the Board of Trustees in the absence of readily ascertainable market values. We have reviewed the procedures used by the Board of Trustees in arriving at its estimate of value of such securities and have inspected underlying documentation, and, in the circumstances, we believe the procedures are reasonable and the documentation appropriate. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

.22 Savings Plan Containing Separate Investment Fund Option Information

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of net assets available for benefits* of XYZ Employee Savings Plan as of December 31, 19X2 and 19X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 19X2. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts of disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 19X2 and 19X1, and the changes in net assets available for benefits for the year ended December 31, 19X2, in conformity with generally accepted accounting principles.

Our audits were performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedules of [*insert titles of DOL required schedules*] are presented for the purpose of additional analysis and are not a required part of the basic financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The Fund Information in the [statement of net assets available for benefits and the] statement of changes in net assets available for benefits is presented for purposes of additional analysis rather than to present the [net assets available for plan benefits and] changes in net assets available for plan benefits of each fund. The supplemental schedules and Fund Information have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Reports on Financial Statements of Brokers and Dealers in Securities

.01 **Unqualified Opinion on Financial Statements and Supplementary Schedules Required by the SEC**

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated statement of financial condition of Standard Stockbrokerage Co., Inc. and Subsidiaries as of December 31, 19X1, and the related consolidated statements of income, changes in stockholders' equity, changes in liabilities subordinated to claims of general creditors, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Standard Stockbrokerage Co., Inc. and Subsidiaries as of December 31, 19X1, and the results of their operations and their cash flows for the year then ended in conformity with generally accepted accounting principles.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, III, and IV is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by rule 17a-5 under the Securities and Exchange Commission. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Notes: SEC Regulation S-X section 210.2-02 requires the accountant's report to be dated, signed manually, indicate the city and state where issued, and identify without detailed enumeration the financial statements covered by the report.

AAM section 10,250.150 and .160 contain illustrative reports on internal control required by SEC Rule 17a-5.

.02 Qualified Opinion—Departure From GAAP

Independent Auditor's Report

Addressee:

We have audited the accompanying consolidated statement of financial condition of Standard Stockbrokerage Co., Inc. and Subsidiaries as of December 31, 19X1, and the related consolidated statements of income, changes in stockholders' equity, changes in liabilities subordinated to claims of general creditors, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note X to the financial statements, investment securities not readily marketable amounting to $XX,XXX (XX percent of stockholders' equity) as of December 31, 19X1, have been valued at fair value as determined by the Board of Directors. We have reviewed the procedures applied by the directors in valuing such securities and investments and have inspected underlying documentation. In our opinion, those procedures are not reasonable, and the documentation is not appropriate to determine fair value of securities in conformity with generally accepted accounting principles. The effect on the financial statements of not applying adequate valuation procedures is not readily determinable.*

In our opinion, except for the effects on the financial statements of the valuation of investment securities determined by the Board of Directors, as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Standard Stockbrokerage Co., Inc. and Subsidiaries as of December 31, 19X1, and the results of their operations and their cash flows for the year then ended in conformity with generally accepted accounting principles.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, III, and IV is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by rule 17a-5 of the Securities and Exchange Commission. Such information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, except for the effects on [*identify the schedules affected*] of the valuation of investment securities determined by the Board of Directors, as described in the second preceding paragraph, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

AAM Section 10,700
Reports for Investment Companies

.01 Unqualified Opinion on the Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company, including the schedule of portfolio investments, as of December 31, 19X4, and the related statements of operations and cash flows* for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended. These financial statements and per share data and ratios are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and per share data and ratios based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and per share data and ratios are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 19X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and selected per share data and ratios referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 19X4, the results of its operations and its cash flows* for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

Note: The reference to "and brokers" in the fourth sentence of the scope paragraph is not normally required if the investment company's financial statements do not show an amount payable for securities purchased. Also, if securities were "verified by examination," the report should be modified to state that.

---

* FASB Statement No. 102, *Statement of Cash Flows—Exemption of Certain Enterprises and Classification of Cash Flows from Certain Securities Held for Resale*, amends FASB Statement No. 95, *Statement of Cash Flows*, to exempt highly liquid companies that meet specified conditions from the requirement to provide a statement of cash flows.

.02 Unqualified Opinion on the Financial Statements for a Multicolumnar Presentation of the Portfolios Constituting the Series

Independent Auditor's Report

Addressee:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of XYZ Series Investment Company (comprising, respectively, the Foreign, Domestic Common Stock, Long-Term Bond, and Convertible Preferred Portfolios) as of December 31, 19X4, and the related statements of operations and cash flows* for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended. These financial statements and per share data and ratios are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and per share data and ratios based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and per share data and ratios are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 19X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and selected per share data and ratios referred to above present fairly, in all material respects, the financial position of each of the respective portfolios constituting the XYZ Series Investment Company as of December 31, 19X4, the results of their operations and their cash flows* for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

.03 Unqualified Opinion on the Financial Statements Presenting One of the Portfolios or Entities Constituting the Series

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of assets and liabilities, including the schedule of portfolio investments, of the Convertible Preferred Portfolio (one of the portfolios constituting the XYZ Series Investment Company) as of December 31, 19X4, and the related statements of operations and cash flows* for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended. These financial statements and per share data and ratios are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and per share data and ratios based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and per share data and ratios are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 19X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and selected per share data and ratios referred to above present fairly, in all material respects, the financial position of the Convertible Preferred Portfolio of the XYZ Series Investment Company as of December 31, 19X4, and the results of its operations and cash flows* for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

.04 Unqualified Opinion on the Financial Statements With an Explanatory Paragraph Due to Absence of Ascertainable Market Values (Documentation Supports Valuation)

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company, including the schedule of portfolio investments, as of December 31, 19X4, and the related statements of operations and cash flows* for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended. These financial statements and per share data and ratios are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and per share data and ratios based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and per share data and ratios are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 19X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and selected per share data and ratios referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 19X4, the results of its operations and its cash flows* for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

As explained in Note 2, the financial statements include securities valued at $____ (____% of net assets), whose values have been estimated by the Board of Directors in the absence of readily ascertainable market values. We have reviewed the procedures used by the Board of Directors in arriving at its estimate of value of such securities and have inspected underlying documentation, and, in the circumstances, we believe the procedures are reasonable and the documentation appropriate. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

.05 Qualified Opinion on the Financial Statements Due to Absence of Ascertainable Market Values (Documentation Does Not Support Valuation)

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company, including the schedule of portfolio investments, as of December 31, 19X4, and the related statements of operations and cash flows* for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended. These financial statements and per share data and ratios are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and per share data and ratios based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and per share data and ratios are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 19X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As explained in Note 2, the financial statements include securities valued at $____ (____% of net assets), whose values have been estimated by the Board of Directors in the absence of readily ascertainable market values. We have reviewed the procedures used by the Board of Directors in arriving at its estimate of value of such securities and have inspected underlying documentation. In our opinion, those procedures are not reasonable, and the documentation is not appropriate to determine the value of the securities in conformity with generally accepted accounting principles. The effect on the financial statements of not applying adequate valuation procedures is not readily determinable.

In our opinion, except for the effects on the financial statements and selected per share data and ratios of the valuation of investment securities determined by the Board of Directors, as described in the preceding paragraph, that financial statements and selected per share data and ratios referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 19X4, the results of its operations and its cash flows* for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the selected per share data and ratios for each of the five years in the period then ended, in conformity with generally accepted accounting principles.

Quality Control

These sample quality control documents are presented for illustrative purposes only. They are intended as an aid for users of this Manual who may want points of departure when establishing their own quality control policies and procedures. These illustrations are neither all inclusive nor are they prescribed minimums. Auditors and accountants should rely on professional standards and their individual professional judgment in determining what may be needed in individual circumstances.

AAM Section 11,100
Quality Control—General

This section of the Audit and Accounting Manual has been redesigned in response to the new quality control standards issued by the AICPA.

AICPA Requirements

.01 Article VI—*Scope and Nature of Services*—of the AICPA's *Principles of Professional Conduct* (ET section 57), requires that "members should practice in firms that have in place internal quality-control procedures to ensure that services are competently delivered and adequately supervised." Because of the public interest in the services provided by and the reliance placed on the objectivity and integrity of CPA's, a CPA firm should have a system of quality control for its practice.

.02 The AICPA has issued two new statements on quality control standards, which are effective January 1, 1997, to give firms improved guidance for establishing and maintaining a quality control system for their accounting and auditing practices. The two statements are: Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and SQCS No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). SQCS No. 2 (QC section 20) supersedes SQCS No. 1, *System of Quality Control for a CPA Firm*, issued in 1979.

.03 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, accounting and review, and other services for which professional standards have been established by the AICPA under rules 201 (ET section 201.01) and 202 (ET section 202.01) of the AICPA Code of Professional Conduct. SQCS No. 2 (QC section 20) replaces the nine specific quality control elements in SQCS No. 1 with five broad elements.

.04 Presented in AAM section 11,200 is a *Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice.* Following the guide are sample quality control forms to aid practitioners in implementing a quality control system.

.05 Certain questions arise about the new standards and their practice-monitoring implications. They include:

- How will the new standards be considered during a peer review year when they may be applicable to only part of the year?
- Will all elements of quality control be subject to peer review?
- What level of compliance will be acceptable under the practice-monitoring programs?

These questions are being addressed by the applicable practice-monitoring committees. Those committees and the AICPA staff will be revising applicable materials, including the peer review checklists, to reflect SQCS Nos. 2 (QC section 20) and 3 (QC section 30) appropriately.

.06 Certain sample documents (in particular, the sample quality control documents for various types of CPA firms) have been temporarily omitted from this edition of the Audit and Accounting Manual in order to undergo the revisions necessary to conform such sample documentation to the new quality control standards.

[*The next page is 11,201.*]

AAM Section 11,200

Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice

NOTICE TO READERS

This Guide presents recommendations of the AICPA Joint Task Force on Quality Control Standards (task force) on the application of Statements on Quality Control Standards. This Guide has not been approved, disapproved, or otherwise acted on by the Auditing Standards Board, the membership, or the governing body of the American Institute of Certified Public Accountants. Therefore, the contents of the Guide, including the recommendations, are not authoritative.

The suggested policies and procedures presented herein are illustrative only and firms are encouraged to consider these examples in designing and maintaining a quality control system that is appropriate for their accounting and auditing practice. A firm's policies and procedures should be sufficient for it to obtain reasonable assurance of complying with the requirements of Statements on Quality Control Standards, which, in turn, should be sufficient for a firm to obtain reasonable assurance of complying with professional standards. In considering an appropriate quality control system for its accounting and auditing practice, a firm should be aware that although some of the illustrative procedures are not explicitly required by professional standards, they present the views of the task force regarding an appropriate quality control system. The views of the task force are provided through illustrative examples of four hypothetical firms and their systems of quality control.

For handy paperback version of this guide call the AICPA Order Department at (800) 862-4272.

Chapter 1

OVERVIEW OF STATEMENTS ON QUALITY CONTROL STANDARDS

.01 Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), provides that a CPA firm shall have a system of quality control for its accounting and auditing practice and describes the elements of quality control and other matters essential to the effective implementation and maintenance of the system. A system of quality control is broadly defined as a process to provide the firm with reasonable assurance that its personnel comply with applicable professional standards and the firm's standards of quality.

.02 SQCS No. 2, paragraph 4 (QC section 20.04), provides that the nature, extent, and formality of a firm's quality control policies and procedures depend on a number of factors, such as its size, the number of its offices, the degree of authority allowed its personnel and its offices, the knowledge and experience of its personnel, the nature and complexity of its practice, and appropriate cost-benefit considerations.

.03 A firm should establish a system of quality control that includes policies and procedures related to each of the five elements of quality control identified in SQCS No. 2 (QC section 20), which are as follows:

a. Independence, Integrity, and Objectivity

b. Personnel Management

c. Acceptance and Continuance of Clients and Engagements

d. Engagement Performance

e. Monitoring

.04 The monitoring element of quality control is further described in SQCS No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30).

.05 The elements of quality control are interrelated. For example, the maintenance of *Integrity, Objectivity,* and, where required, *Independence* requires a continuing assessment of client relationships that affect policies and procedures for the acceptance and continuance of clients and engagements. Similarly, the element of *Personnel Management* encompasses criteria for professional development, hiring, advancement, and assignment of the firm's personnel to engagements, which affect policies and procedures developed to meet the objectives of the quality control element of *Engagement Performance.* Similarly, policies and procedures for the quality control element of *Monitoring* evaluate whether the policies and procedures that are required by the firm related to each of the other four elements of quality control are suitably designed and are being effectively applied.

.06 When a firm merges, acquires, sells or otherwise changes a portion of its practice, the surviving firm should evaluate and, as necessary, revise, implement, and maintain firm-wide quality control policies and procedures appropriate in light of the changed circumstances.

Independence, Integrity, and Objectivity

.07 The objective of the *Independence, Integrity, and Objectivity* element of a system of quality control is to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance) in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.08 This objective ordinarily would be satisfied by establishing and maintaining policies such as—

- Requiring that personnel adhere to applicable independence, integrity, and objectivity requirements. Regulations, interpretations, and rulings of the AICPA, state CPA societies, state boards of accountancy, state statutes, the Securities and Exchange Commission (SEC), and other regulatory agencies should be considered where applicable.
- Communicating policies and procedures relating to independence, integrity, and objectivity to personnel.
- Confirming the independence of another firm engaged to perform part (or parts) of an engagement, or when acting as principal auditor.

Personnel Management

.09 The objective of the *Personnel Management* element of a system of quality control is to provide the firm with reasonable assurance that all personnel have the proficiency to perform their assigned responsibilities. Attributes or qualities that enhance the proficiency of personnel who perform, supervise, or review work include integrity, objectivity, intelligence, judgment, competence, experience, and motivation.

.10 This objective ordinarily would be satisfied by establishing and maintaining policies such as—

- Hiring personnel who possess the appropriate characteristics to enable them to perform competently.
- Assigning personnel who have the degree of technical training and proficiency required in the circumstances. In making assignments, the nature and extent of supervision to be provided should be considered. Generally, the more qualified and experienced the personnel assigned to a particular engagement, the less direct supervision is needed. Conversely, the less qualified and less experienced the personnel assigned, the more direct supervision generally is needed.
- Having personnel participate in general and industry-specific continuing professional education and professional development activities that enable them to fulfill responsibilities assigned, and satisfy applicable continuing professional education requirements of the AICPA and regulatory agencies.
- Selecting for advancement only those who have the qualifications necessary for fulfillment of the responsibilities they will be called on to assume.

Acceptance and Continuance of Clients and Engagements

.11 The objective of the *Acceptance and Continuance of Clients and Engagements* element of a system of quality control is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for that client. Such policies and procedures should provide the firm with reasonable assurance that (*a*) the likelihood of association with a client whose management lacks integrity is minimized, (*b*) the firm undertakes only those engagements that can be completed with professional competence, (*c*) the risks associated with providing professional services in particular circumstances are appropriately considered, and (*d*) an understanding is reached with the client regarding the services to be performed.

.12 These objectives ordinarily would be satisfied, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining policies such as—

- Evaluating factors that have a bearing on management's integrity.
- Evaluating whether the engagement the firm will perform can be completed with professional competence and, accordingly, undertaking only those engagements that can be completed with professional competence; and appropriately considering the risk associated with providing professional services in particular circumstances.

- Obtaining an understanding with the client regarding the services to be performed.

Engagement Performance

.13 The objective of the *Engagement Performance* element of a system of quality control is to provide the firm with reasonable assurance that the work performed by engagement personnel meets the applicable professional standards, regulatory requirements, and the firm's standards of quality. Policies and procedures for engagement performance encompass all phases of the design and execution of the engagement. To the extent appropriate and as required by applicable professional standards, these policies and procedures should cover planning, performing, supervising, reviewing, documenting, and communicating the results of each engagement. Policies and procedures should also provide that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm, when appropriate.

.14 This objective ordinarily would be satisfied by establishing and maintaining policies such as—

- Requiring that all engagements be planned to meet professional, regulatory, and the firm's requirements.
- Requiring that the work performed and the reports and other communications issued meet professional, regulatory, and the firm's requirements.
- Identifying areas and specialized situations where consultation is necessary and requiring personnel to refer to authoritative literature or other sources or consult, on a timely basis, with individuals within or outside the firm, when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

Monitoring

.15 The objective of the *Monitoring* element of a system of quality control is to provide the firm with reasonable assurance that the policies and procedures relating to the other elements of quality control are suitably designed and being effectively applied. Monitoring is an ongoing consideration and evaluation process.

.16 This objective ordinarily would be satisfied by establishing and maintaining policies for considering and evaluating, on an ongoing basis—

- The relevance and adequacy of the firm's quality control policies and procedures.
- The appropriateness of the firm's guidance materials and any practice aids.
- The effectiveness of professional development activities.
- Compliance with the firm's policies and procedures.

Illustrative Examples

.17 The remainder of this Guide provides illustrative examples of the types of policies a firm should consider for each of the elements of quality control. Each chapter provides examples of procedures that a firm might consider in implementing and maintaining such policies. The specific policies and procedures used by a firm would not necessarily include all those described or be limited to those illustrated. Most firms will find it appropriate to communicate their policies and procedures in writing. These examples are based on the assumption that each firm's quality control policies and procedures are in writing and distributed to all personnel. The illustrative examples are provided through four hypothetical firms—National CPA Firm, Regional Accountants, AnyCity CPAs, and Jane Brown, CPA—with the following characteristics:

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

a. National CPA Firm is one of the largest firms in the country. It has sixty offices, eight hundred partners, five thousand professionals, five hundred publicly held clients, and it performs services for clients in a variety of industries. (Chapter 2)

b. Regional Accountants has ten offices in three states and is centrally managed. Regional has thirty-five partners, two hundred professionals, and twenty-five SEC clients. In addition to servicing SEC clients, it has a concentration in audit and attest services for financial institutions. (Chapter 3)

c. AnyCity CPAs is a local, one-office firm with three partners and ten professionals. Its accounting and auditing practice includes a concentration in employee benefit plan audits. AnyCity CPAs has no SEC clients. (Chapter 4)

d. Jane Brown, CPA, is a sole owner without any professional staff, who occasionally hires per diem professionals. Her accounting practice consists only of services performed under Statements on Standards for Accounting and Review Services (SSARSs). (Chapter 5)

Chapter 2

NATIONAL CPA FIRM'S SYSTEM OF QUALITY CONTROL FOR ITS ACCOUNTING AND AUDITING PRACTICE

.18 This chapter describes how National CPA Firm implements each element of quality control for its accounting and auditing practice. National CPA Firm is a hypothetical firm. It is presumed to be one of the largest firms in the country. It has sixty offices, eight hundred partners, five thousand professionals, and five hundred publicly held clients, and performs services for clients in a variety of industries.

Independence, Integrity, and Objectivity

.19 The objective of the *Independence, Integrity, and Objectivity* element of a system of quality control is to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance) in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities.

.20 National CPA Firm satisfies this objective by establishing and maintaining the following policies and procedures.

.21 **Policy 1**

Personnel will adhere to applicable independence, integrity, and objectivity requirements. These requirements include regulations, interpretations, and rulings of the AICPA, state CPA societies, state boards of accountancy, state statutes, the Securities and Exchange Commission, and other regulatory agencies where applicable.

.22 National CPA Firm implements this policy by—

a. Developing and maintaining a Professional Practice Manual that contains policies and procedures relating to independence, integrity, and objectivity. Such policies and procedures contain the firm's interpretations of professional and regulatory requirements, and guidance for identifying and resolving potential issues.

b. Designating a quality assurance partner in each office to provide guidance, answer questions, and resolve matters.

c. Designating a partner in its national office to answer more complex matters and determine the circumstances that might require consultation with sources outside the firm.

d. Identifying circumstances where documentation of the resolution of matters is appropriate.

e. Obtaining written representations from personnel, upon hire and on an annual basis, stating whether they are familiar with and are in compliance with professional standards and the firm's policies and procedures regarding independence, integrity, and objectivity. The quality assurance partner in each office is responsible for obtaining such representations and reviewing compliance files for completeness. A partner in its national office is responsible for resolving reported exceptions.

f. Requiring the managing partner in each office to periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm's independence.

.23 **Policy 2**

Personnel will be familiar with policies and procedures relating to independence, integrity, and objectivity.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.24 National CPA Firm implements this policy by—

a. Providing each of its personnel with access to a personal computer and software that has access to databases containing professional and regulatory literature and advising them that they are expected to be familiar with that literature.

b. Emphasizing the concepts of independence, integrity, and objectivity in its professional development meetings, in the acceptance and continuance of clients and engagements, and in the performance of engagements, including discussing the types of nonattest services that could impact independence.

c. Informing personnel on a timely basis of those entities to which independence policies apply, by—

1. Preparing and maintaining lists of entities to which independence policies apply.
2. Making the lists available to personnel who need them to determine their independence (including personnel new to the firm or to an office, and certain former partners[1]).
3. Notifying personnel of changes in the lists on a timely basis via a memorandum or the firm's E-mail system.

.25 **Policy 3**

Confirm the independence of another firm performing parts of an engagement, or when we act as principal auditor.

.26 National CPA Firm implements this policy by—

a. Describing in its Professional Practice Manual the form, content, and frequency of independence representations that are to be obtained.

b. Requiring that such representations be documented.

Personnel Management

.27 The objective of the *Personnel Management* element of a system of quality control is to provide the firm with reasonable assurance that all personnel have the proficiency to perform their assigned responsibilities. Attributes or qualities that enhance the proficiency of personnel who perform, supervise, or review work include integrity, objectivity, intelligence, judgment, competence, experience, and motivation.

.28 National CPA Firm satisfies this objective by establishing and maintaining the following policies and procedures.

.29 **Policy 1**

Personnel who are hired will possess the appropriate characteristics to enable them to perform competently.

.30 National CPA Firm implements this policy by—

a. Maintaining a national human resource function that establishes the firm's hiring objectives and evaluates the firm's personnel needs, including—

[1] AICPA's *Professional Standards*, volume 2, ET section 101.04, discusses circumstances when activities of a former practitioner could affect the firm's independence.

- Designating a partner in its national office to be responsible for evaluating the firm's overall personnel needs and establishing hiring objectives based on factors such as clientele, anticipated growth, personnel turnover, and individual advancement.
- Developing and maintaining a Human Resource Manual that identifies attributes, achievements, and experiences desired in entry-level and experienced personnel.
- Establishing criteria to evaluate personal characteristics such as integrity, competence, and motivation.
- Setting guidelines for additional procedures that are necessary when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions.

b. Designating a qualified individual in each practice office to be responsible for managing the human resource function. This individual's responsibilities include—

- Preparing budgets of personnel needs for all levels.
- Identifying sources of employment candidates such as universities and executive recruiters, and coordinating the hiring process within the practice office.
- Selecting and training those individuals who will be interviewing candidates or otherwise participating in the hiring process.
- Summarizing and evaluating the results of the hiring process for each candidate and providing final approval for hiring.

.31 Policy 2

The firm will make personnel assignments based on the degree of technical training and proficiency required in the circumstances and the nature and extent of supervision to be provided.

.32 National CPA Firm implements this policy by designating an appropriate person in each office to be responsible for assigning personnel to engagements based on such factors as—

- Engagement size and complexity.
- Specialized experience or expertise required.
- Personnel availability and involvement of supervisory personnel.
- Timing of the work to be performed.
- Continuity and rotation of personnel.
- Opportunities for on-the-job training.
- Situations where independence or objectivity concerns exist.

For partner and manager assignments, such person shall be a partner, and in the case of high-risk engagements, approval of the partner assignment is to be obtained from the industry partner or the quality assurance partner.

.33 Policy 3

Personnel will participate in general and industry-specific continuing professional education and professional development activities that enable them to satisfy responsibilities assigned and fulfill applicable continuing professional education requirements of the AICPA and regulatory agencies.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.34 National CPA Firm implements this policy by—

a. Maintaining a national professional development group to develop firm requirements and program materials for professional development and assigning responsibility for the professional development function to the Director of Professional Development. The group's responsibilities include—

- Setting guidelines for participation by personnel in professional development programs and considering the requirements of the AICPA, state boards of accountancy, and regulatory agencies in establishing the firm's CPE requirements.
- Maintaining appropriate documentation evidencing that personnel have met the professional educational requirements of the firm, the AICPA, and other regulatory bodies.
- Providing an orientation program and training for newly employed personnel to inform them of their professional responsibilities and the firm's policies.
- Preparing publications and programs designed to inform personnel of their responsibilities and opportunities.
- Developing in-house staff training programs that focus on general and industry-specific accounting and auditing subject matter.

b. Assigning responsibility to an office or industry partner to establish a professional development program that provides that personnel in the office or those serving clients in an industry participate in professional development activities in accordance with firm guidelines and in subjects that are relevant to their responsibilities.

c. Communicating and distributing to personnel changes in accounting, auditing, and independence, integrity, and objectivity requirements and the firm's guidance with respect to them.

d. Encouraging participation in other professional development activities for personnel at each level within the firm, such as participation in external professional development programs, including graduate-level university and self-study courses, membership in professional organizations, serving on professional committees, and writing for professional publications.

.35 **Policy 4**

Personnel selected for advancement will have the qualifications necessary to fulfill the responsibilities they will be called on to assume.

.36 National CPA Firm implements this policy by—

a. Maintaining a national human resource function to identify and communicate, in the firm's Human Resource Manual, the qualifications necessary to fulfill responsibilities at each professional level within the firm by—

1. Establishing the criteria for evaluating personnel at each professional level and for advancement to the next higher level of responsibility.
2. Developing evaluation forms for each professional staff classification.

b. Assigning responsibility to a partner in each office for making advancement and termination decisions for staff and recommendations for manager- and partner-level advancements and terminations to the firm's management committee. Such responsibilities should include—

1. Identifying responsibilities and requirements for evaluations at each level indicating who will prepare the evaluations and when they will be prepared.
2. Reviewing evaluations with the individual being evaluated on a timely basis.

c. Counseling personnel regarding their progress and career opportunities by—

1. Annually summarizing and reviewing with personnel the evaluation of their performance, including an assessment of their progress with the firm. Considerations should include performance, future objectives of the firm and the individual, assignment preferences, and career opportunities.
2. Annually evaluating partners by means of counseling, peer evaluation, or self-appraisal, as appropriate, regarding whether they continue to have the qualifications to fulfill their responsibilities or to assume added responsibilities.

Acceptance and Continuance of Clients and Engagements

.37 The objective of the *Acceptance and Continuance of Clients and Engagements* element of a system of quality control is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for that client. Such policies and procedures should provide the firm with reasonable assurance that (*a*) the likelihood of association with a client whose management lacks integrity is minimized, (*b*) the firm undertakes only those engagements that can be completed with professional competence, (*c*) the risks associated with providing professional services in particular circumstances are appropriately considered, and (*d*) an understanding with the client regarding the services to be performed is reached.

.38 National CPA Firm satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the following policies and procedures.

.39 **Policy 1**

The firm will evaluate factors that have a bearing on management's integrity.

.40 National CPA firm implements this policy by—

a. Developing and maintaining a Professional Practice Manual that contains policies and procedures relating to the acceptance of prospective clients and the continuance of current clients. Such policies and procedures state that the firm's clients should not present undue risks to the firm, including damage to the firm's reputation.

b. Advising personnel that they are expected to be familiar with the firm's policies and procedures for acceptance and continuance of clients.

c. Obtaining and evaluating information before accepting or continuing a client, as applicable:

1. Available information regarding the client and its operations from sources such as annual reports, interim financial statements, registration statements, Form 10-K, Form 8-K, other reports to regulatory agencies, enforcement actions by regulatory agencies, and income tax returns.
2. The nature and purpose of the services to be provided by making inquiries of client management.
3. Information regarding the client and its management and principals that may have a bearing on evaluating the client by making inquiries of third parties such as bankers, legal counsel, investment bankers, underwriters, and other members of the financial or business community who may have appropriate knowledge. Inquiries might also be made about management's attitude toward compliance with outside regulatory or legislative requirements and the presence of reportable conditions, especially those that management is unwilling to correct. In certain circumstances, background checks by investigative firms are required.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

d. Communicating with the predecessor accountant when required or suggested by professional standards. This communication also includes inquiries regarding the nature of any disagreements, and other events required to be reported by Form 8-K, and whether evidence of "opinion shopping" exists.

e. Evaluating the information obtained regarding management's integrity.

.41 Policy 2

The firm will evaluate whether the engagement can be completed with professional competence and accordingly undertake only those engagements that can be completed with professional competence and appropriately consider the risk associated with providing professional services in particular circumstances.

.42 National CPA Firm implements this policy by—

a. Evaluating whether the practice office has obtained or can reasonably expect to obtain the knowledge and expertise necessary to enable it to perform the engagement, for example, through use of other practice offices' resources.

b. Specifying conditions that require evaluation of a specific client or engagement, obtaining relevant information to determine whether the relationship should be continued, and establishing a time period for evaluations to be made (for example, continuance decisions should be made at least annually). Conditions include the following:

- Significant changes in the client, for example, a major change in ownership, senior personnel, directors, advisors, the nature of its business, or its financial stability.
- Changes in the nature or scope of the engagement, including requests for additional services.
- Changes in the strategic focus or composition of the firm, for example, a decision to discontinue services to clients in a particular industry.
- The existence of conditions that would have caused the firm to reject the engagement had such conditions existed at the time of the initial acceptance. These conditions may include unreliable processes for making accounting estimates, questionable estimates by management, questions regarding the entity's ability to continue as a going concern, or other factors that may increase the risk of being associated with the client.
- Client delinquent in paying fees. (This may also affect the firm's independence.)
- Engagements for entities operating in highly specialized or regulated industries, including financial institutions, governmental entities, and engagements for employee benefit plans.
- Engagements for entities in the development stage.

c. Evaluating the information obtained regarding the acceptance or continuance of the client or engagement.

1. All information obtained about the client or the specific engagement is to be evaluated by the engagement partner and a recommendation is made regarding whether the client or engagement should be accepted or continued.
2. The engagement partner completes a client acceptance form and submits it to the practice office managing partner for approval.
3. The engagement partner signs a step in the planning program noting client continuance, and a form documenting client continuance is completed if conditions identified in *b.* above exist.

4. The managing partner of the practice office is responsible for evaluating and approving the recommendation made by the engagement partner. In certain defined circumstances, such as new SEC engagements and high-risk engagements, documented acceptance may also require the approval of the national office.

.43 **Policy 3**

The firm will obtain an understanding with the client regarding the services to be performed.

.44 National CPA Firm implements this policy by requiring that all understandings with the client be in writing by obtaining an engagement letter for all engagements, thus minimizing the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed.

Engagement Performance

.45 The objective of the *Engagement Performance* element of a system of quality control is to provide the firm with reasonable assurance that the work performed by engagement personnel meets the applicable professional standards, regulatory requirements, and the firm's standards of quality. Policies and procedures for engagement performance encompass all phases of the design and execution of the engagement. To the extent appropriate and as required by applicable professional standards, these policies and procedures should cover planning, performing, supervising, reviewing, documenting, and communicating the results of each engagement. Policies and procedures should also provide that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm, when appropriate.

.46 National CPA Firm satisfies this objective by establishing and maintaining the following policies and procedures.

.47 **Policy 1**

Planning for engagements will meet professional, regulatory, and the firm's requirements.

.48 National CPA Firm implements this policy by developing, maintaining, and providing personnel with the firm's Professional Practice Manual, which prescribes the factors to be considered in the planning process by the engagement team and the extent of documentation of the considerations which may vary depending on the size and complexity of the engagement. Planning considerations include—

- Making the engagement partner or another qualified individual responsible for planning an engagement and assigning responsibilities to appropriate personnel during the planning phase.
- Developing or updating background information.
- Requiring planning documentation that includes—
  - — Development of proposed work program, tailored to the specific engagement.
  - — Staffing requirements and the need for specialized knowledge, which may have to be obtained from another practice office.
  - — Considering economic conditions affecting the client or its industry and their potential impacts on the conduct of the engagement.
  - — Considering risks and how they may affect the procedures to be performed.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

— Preparing a budget that allocates a sufficient amount of time so the engagement will be performed in accordance with professional standards and the firm's quality control policies and procedures.

.49 **Policy 2**

The engagement will be performed, supervised, reviewed, documented, and communicated in accordance with the requirements of professional standards, regulatory authorities, and the firm.

.50 National CPA Firm implements this policy by—

a. Providing personnel with the firm's Professional Practice Manual, which—

1. Prescribes the form and content of working papers, including firm-generated forms, checklists, and questionnaires that are to be used in the performance of engagements, the form in which instructions are given to other offices or correspondents, and the extent to which their work is reviewed and documented.
2. Specifies the extent of overall engagement review at all professional levels so that the financial statements meet professional and firm presentation and disclosure standards.
3. Specifies the extent of review that should be performed of communications to be made to management and the board of directors.

b. Assigning responsibility for the review of all reports, financial statements, and working papers to a reviewer senior to the preparer in accordance with procedures outlined in the firm's Professional Practice Manual to obtain reasonable assurance that—

1. The nature, timing, and extent of procedures performed are consistent with risk assessments made and the approach described in the planning documentation and that exceptions are appropriately investigated. The appropriateness of planned procedures should be reconsidered when significant changes in risk factors occur or are identified between the planning phase of the engagement and the execution of substantive procedures.
2. Firm-prescribed forms, checklists, and questionnaires, tailored as appropriate, are used in the performance of the engagement and reporting on it.

c. Requiring a second review of the report, financial statements, and selected working papers by a partner or manager as prescribed in the firm's Professional Practice Manual. The extent of review varies based on the type of engagement; for example, audits of SEC clients and high-risk engagements, as defined by the firm, receive the most extensive review.

d. Adhering to the following guidelines set up by the firm regarding the review of working papers, financial statements, and for documentation of the review process:

1. All reviewers are to have appropriate experience, competence, and responsibility.
2. All work performed and the reports and financial statements issued are to be complete and comply with professional standards and firm policy.
3. Appropriate documentation is required on all engagements evidencing review of working papers, financial statements, and reports. Necessary documentation includes completion of the firm's review and approval documentation.

e. Requiring that differences of professional judgment within an engagement team or with consultants be resolved with the assistance of the office's quality assurance partner and a designated partner in the firm's national office, where applicable. The resolution of the differences must be appropriately documented. If a member of the team continues to disagree with the resolution, he or she may disassociate himself or herself from the resolution of the matter and will be offered the opportunity to document that a disagreement still exists.

.51 Policy 3

The firm will identify areas and specialized situations where consultation is required and will require personnel to refer to authoritative literature and practice aids and to consult, on a timely basis, with individuals within or outside the firm when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

.52 National CPA Firm implements this policy by—

a. Providing personnel with the firm's Professional Practice Manual, which specifies the firm's consultation policies and procedures. Areas or specialized situations that may require consultation include—

- Application of newly issued technical pronouncements.
- Industries with special accounting, auditing, or reporting requirements.
- Emerging practice problems.
- Choices among alternative generally accepted accounting principles upon initial adoption or when an accounting change is made.
- Reissuance of a report, consideration of omitted procedures after a report has been issued, or subsequent discovery of facts that existed at the time a report was issued.
- Filing requirements of regulatory agencies.
- Meetings with the SEC and other regulators, at which the firm is to be called on to support the applications of generally accepted accounting principles which have been questioned.

b. Designating individuals within the firm as consultants in certain areas. Personnel are to consult with the appropriate individual when issues arise, as specified in the firm's manuals. When differences arise between the engagement partner and the consultant, all resolutions are determined by the office quality assurance partner and, if it continues to be unresolved, a designated national office partner.

c. Maintaining or providing access to adequate and up-to-date reference libraries in each office, which include materials related to specific industries and regulatory requirements.

d. Requiring that documentation of consultation include all relevant facts and circumstances, reference to professional literature used in the determination, the conclusions reached, and signatures of the engagement partner and consultant. This documentation is to be retained in the engagement working papers and, at the discretion of the consultant, entered in a retrievable database to promote consistency in the application of generally accepted accounting principles in similar circumstances.

Monitoring

.53 The objective of the *Monitoring* element of a system of quality control is to provide the firm with reasonable assurance that the policies and procedures relating to the other elements of quality control are suitably designed and being effectively applied. Monitoring is an ongoing consideration and evaluation process.

.54 National CPA Firm satisfies this objective by establishing and maintaining the following policies and procedures.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.55 **Policy 1**

The firm will consider and evaluate, on an ongoing basis, the relevance and adequacy of its quality control policies and procedures.

.56 National CPA Firm implements this policy by designating a partner or group in its national office to be responsible for quality assurance, including—

a. Assuring that the firm's quality control policies and procedures and its audit methodology remain relevant and adequate. Factors to be considered include—

- Mergers and divestitures of portions of the practice.
- Changes in professional standards and SEC or other regulatory requirements applicable to the firm's practice.
- Results of annual inspections and peer reviews.
- Review of litigation and regulatory enforcement actions against the firm and others.
- The impact that changes in technology may have on clients' methods of doing business.
- Changes in clients' industries that impact their operations.
- Changes in applicable AICPA membership requirements.

b. Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm's standards of quality in performing their duties.

c. Identifying the need to—

1. Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed.
2. Improve compliance with firm policies and procedures that are related to the other elements of quality control.

.57 **Policy 2**

The firm will consider and evaluate, on an ongoing basis, the appropriateness of its guidance materials and any practice aids.

.58 National CPA Firm implements this policy by—

a. Reviewing and updating firm practice aids, such as audit programs, forms, and checklists, based on the issuance of new professional pronouncements.

b. Issuing professional practice alerts to notify and provide guidance to personnel regarding new professional standards, regulatory requirements, and related changes to firm policy.

c. Having national office personnel periodically visit offices and interview partners and managers regarding the effectiveness of practice aids and tools.

.59 **Policy 3**

The firm will consider and evaluate, on an ongoing basis, the effectiveness of professional development programs.

.60 National CPA Firm implements this policy by—

a. Having the National Professional Development Group review the summary of evaluations of national training programs to determine whether the national professional development programs are achieving their objectives.

b. Having the National Professional Development Group review the overall professional development plan to determine whether professional staff are receiving the appropriate mix of in-house training, AICPA or state society classroom training, and self-study programs.

c. Having the National Professional Development Group review summaries of CPE records for the firm's professional staff to determine that each practice office has established a means of tracking each professional's compliance with the requirements of the firm, the AICPA, and other regulatory bodies.

d. Interviewing selected professional personnel regarding the effectiveness of training programs.

e. Considering the results of the firm's inspection procedures in connection with the effectiveness of the firm's professional development program.

f. Ascertaining whether inquiries received by individuals consulted within the firm indicate the need for additional CPE programs.

.61 **Policy 4**

The firm will consider and evaluate, on an ongoing basis, compliance with its policies and procedures.

.62 National CPA Firm implements this policy by making its national quality assurance partner responsible for the preparation of checklists and practice aids to be used in performing monitoring and inspection procedures. These procedures include—

- Developing and coordinating the firm's inspection program to achieve feedback about the effectiveness of the firm's policies and procedures.
- Developing a plan for an appropriate test of compliance with the firm's policies and procedures on a sample of engagements. Such a review could be preissuance or postissuance.
- Reviewing correspondence prepared by national office personnel regarding consultation on independence, integrity, and objectivity matters, acceptance and continuance decisions, and engagement performance.
- Reviewing the resolution of matters reported by professional personnel on independence circularization forms to determine that matters have been appropriately considered and resolved.
- Interviewing personnel at all professional management and staff levels to obtain information regarding operating procedures in practice offices and to determine whether personnel are knowledgeable of firm policies and procedures and whether they are being effectively communicated.
- Reviewing the following documentation to determine compliance with firm policies and procedures:
  a. Personnel evaluations, including documentation of hiring and advancement decisions
  b. Documentation of client acceptance and continuance decisions
  c. Participants' evaluations of training programs
  d. Professional development records of professional personnel
  e. Correspondence regarding the resolution of independence matters within the practice office

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Reviewing a cross-section of engagements that have had a preissuance or postissuance review from selected practice offices using the following criteria:
  a. All partners and those managers who have significant accounting and auditing responsibilities in the selected offices
  b. Significant specialized industries with emphasis given to high-risk industries
  c. First-year engagements
  d. Level of service performed (that is, audit, review, compilation, and agreed-upon procedures)
  e. Level of attestation services performed (that is, examination, review, and agreed-upon procedures)
- Periodically summarizing and communicating inspection findings to firm personnel on a timely basis.
- Communicating findings to practice office personnel and determining the corrective actions to be taken on the engagements reviewed. These findings are discussed and communicated in a report issued to each office. The practice office responds regarding the specific corrective actions or steps to be taken to improve compliance with the firm's policies and procedures and professional standards.
- Communicating the need for improved compliance with or changes to the system of quality control in training programs, partner or manager meetings, and firm policy correspondence.
- Preparing a summary inspection report that evaluates the overall results of the inspection to determine whether—
  a. The firm as a whole needs to improve compliance with the firm's policies and procedures.
  b. Revisions to the firm's quality control policies and procedures are necessary.
- Periodically reviewing the system of personnel evaluation and counseling to ascertain that—
  a. Procedures for evaluation and documentation are being followed on a timely basis.
  b. Requirements established for advancement are being achieved.
  c. Personnel decisions are consistent with evaluations.
  d. Recognition is given to outstanding performance.

Chapter 3

REGIONAL ACCOUNTANTS' SYSTEM OF QUALITY CONTROL FOR ITS ACCOUNTING AND AUDITING PRACTICE

.63 This chapter describes how Regional Accountants implements each element of quality control for its accounting and auditing practice. Regional Accountants is a hypothetical firm. It is presumed to have ten offices in three states and to be centrally managed. Regional has thirty-five partners, two hundred professionals and twenty-five SEC clients. In addition to servicing SEC clients, it has a concentration in audit and attest services for financial institutions.

Independence, Integrity, and Objectivity

.64 The objective of the *Independence, Integrity, and Objectivity* element of a system of quality control is to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance) in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities.

.65 Regional Accountants satisfies this objective by establishing and maintaining the following policies and procedures.

.66 **Policy 1**

Personnel will adhere to applicable independence, integrity, and objectivity requirements. These requirements include regulations, interpretations, and rulings of the AICPA, state CPA societies, state boards of accountancy, state statutes, the Securities and Exchange Commission, and other regulatory agencies where applicable.

.67 Regional Accountants implements this policy by—

a. Developing and maintaining a manual that contains the firm's policies and procedures relating to independence, objectivity, and integrity. Such policies and procedures contain the firm's interpretations of professional and regulatory requirements, and guidance for identifying and resolving potential issues or situations.

b. Designating one of its partners to provide guidance, answer questions and resolve matters, and determine the circumstances that might require consultation with sources outside the firm.

c. Identifying circumstances where documentation of the resolution of matters is appropriate.

d. Obtaining written representations from personnel, upon hire and on an annual basis, stating whether they are familiar with and are in compliance with professional standards and the firm's policies and procedures regarding independence, integrity, and objectivity.

e. Assigning responsibility for obtaining such representations, reviewing compliance files for completeness, and resolving reported exceptions to the firm's quality control partner.

f. Requiring the managing partner in each office to periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm's independence.

.68 **Policy 2**

Personnel will be familiar with policies and procedures relating to independence, integrity, and objectivity.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.69 Regional Accountants implements this policy by—

a. Providing personnel with access to a computer and software that has access to databases containing professional and regulatory literature and advising them that they are expected to be familiar with that literature.

b. Emphasizing the concepts of independence, integrity, and objectivity in its professional development meetings, in the acceptance and continuance of clients and engagements, and in the performance of engagements, including discussing the implications regarding engagements for financial institutions, such as the prohibition of any member of the engagement team having a loan with the institution, and the types of nonattest services that could affect independence.

c. Informing personnel on a timely basis of those entities to which independence policies apply, by—

1. Preparing and maintaining lists of entities to which independence policies apply.
2. Making the lists available to personnel who need them to determine their independence (including personnel new to the firm or to an office, and certain former partners[2]).
3. Notifying personnel of changes in the lists on a timely basis via a memorandum or the firm's E-mail system.

.70 **Policy 3**

Confirm the independence of another firm performing parts of an engagement, or when we act as principal auditor.

.71 Regional Accountants implements this policy by—

a. Describing in its policies and procedures manual the form, content, and frequency of independence representations that are to be obtained.

b. Requiring that such representations be documented.

Personnel Management

.72 The objective of the *Personnel Management* element of a system of quality control is to provide the firm with reasonable assurance that all personnel have the proficiency to perform their assigned responsibilities. Attributes or qualities that enhance the proficiency of personnel who perform, supervise, or review work include integrity, objectivity, intelligence, judgment, competence, experience, and motivation.

.73 Regional Accountants satisfies this objective by establishing and maintaining the following policies and procedures.

.74 **Policy 1**

Personnel who are hired will possess the appropriate characteristics to enable them to perform competently.

.75 Regional Accountants implements this policy by maintaining firm-wide hiring objectives and evaluating the firm's personnel needs, including—

[2] AICPA's *Professional Standards*, volume 2, ET section 101.04, discusses circumstances when activities of a former practitioner could affect the firm's independence.

- Designating a partner or a qualified individual in each office to be responsible for evaluating that practice office's overall personnel needs and establishing hiring objectives based on factors such as clientele, anticipated growth, personnel turnover, and individual advancement.
- Developing and maintaining personnel policies and procedures that identify attributes, achievements, and experiences desired in entry-level and experienced personnel.
- Establishing criteria to evaluate personal characteristics such as integrity, competence, and motivation.
- Setting guidelines as to additional procedures that are necessary when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions.
- Identifying sources of employment candidates such as universities and executive recruiters, and coordinating the hiring process within the practice office.
- Selecting and training the individuals who will be interviewing candidates or otherwise participating in the hiring process.
- Summarizing and evaluating the results of the hiring process for each candidate and providing final approval for hiring.

.76 **Policy 2**

The firm will make personnel assignments based on the degree of technical training and proficiency required in the circumstances and the nature and extent of supervision to be provided.

.77 Regional Accountants implements this policy by—

a. Designating an appropriate person in each office to be responsible for assigning personnel to engagements based on such factors as—

- Engagement size and complexity.
- Specialized experience and expertise required.
- Personnel availability and involvement of supervisory personnel.
- Timing of the work to be performed.
- Continuity and rotation of personnel.
- Opportunities for on-the-job training.
- Situations where independence or objectivity concerns exist.

b. Designating the quality control partner as the person responsible for approval of the partner assignments on high-risk engagements.

.78 **Policy 3**

Personnel will participate in general and industry-specific continuing professional education and professional development activities that enable them to satisfy responsibilities assigned and fulfill applicable continuing professional education requirements of the AICPA and regulatory agencies.

.79 Regional Accountants implements this policy by—

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

a. Designating one partner responsible for developing firm requirements and program materials for professional development. These responsibilities include—

- Setting guidelines for participation by personnel in professional development programs, and considering requirements of the AICPA, state boards of accountancy, and regulatory agencies in establishing the firm's CPE requirements.
- Maintaining appropriate documentation evidencing that personnel have met the professional education requirements of the firm, the AICPA, and other regulatory bodies.
- Providing an orientation program and training for newly employed personnel to inform them of their professional responsibilities and firm policies.
- Preparing publications and programs designed to inform personnel of their responsibilities and opportunities.
- Developing in-house staff training programs that focus on general and industry-specific accounting and auditing subject matter, including audits of financial institutions.

b. Assigning responsibility to an office or industry partner to maintain a professional development program that provides that personnel in the office or those serving clients in an industry participate in professional development activities in accordance with firm guidelines and in subjects that are relevant to their responsibilities.

c. Communicating and distributing to personnel changes in accounting, auditing, and independence, integrity, and objectivity requirements and the firm's guidance with respect to them.

d. Encouraging participation in other professional development activities for personnel at each level within the firm, such as participation in external professional development programs, including graduate level and self-study courses, membership in professional organizations, serving on professional committees, and writing for professional publications.

.80 **Policy 4**

Personnel selected for advancement will have the qualifications necessary to fulfill the responsibilities they will be called on to assume.

.81 Regional Accountants implements this policy by—

a. Appointing a Director of Human Resources to identify and communicate in the firm's policies and procedures manual the qualifications necessary to fulfill responsibilities at each professional level within the firm by—

1. Establishing the criteria for evaluating personnel at each professional level and for advancement to the next higher level of responsibility.
2. Developing evaluation forms for each professional staff classification.

b. Assigning responsibility to one of its partners for making advancement and termination decisions for staff and recommendations for manager- and partner-level advancements and terminations to the firm's management committee. Such responsibilities should include—

1. Identifying responsibilities and requirements for evaluation at each level and indicating who will prepare evaluations and when they will be prepared.
2. Reviewing evaluations with the individual being evaluated on a timely basis.

c. Counseling personnel regarding their progress and career opportunities by—

1. Annually summarizing and reviewing with personnel the evaluation of their performance, including an assessment of their progress with the firm. Considerations should include performance, future objectives of the firm and the individual, assignment preferences, and career opportunities.
2. Periodically evaluating partners by means of counseling, peer evaluation, or self-appraisal, as appropriate, regarding whether they continue to have the qualifications to fulfill their responsibilities or assume added responsibilities.

Acceptance and Continuance of Clients and Engagements

.82 The objective of the *Acceptance and Continuance of Clients and Engagements* element of a system of quality control is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for that client. Such policies and procedures should provide the firm with reasonable assurance that (*a*) the likelihood of associations with a client whose management lacks integrity is minimized, (*b*) the firm undertakes only those engagements that can be completed with professional competence, (*c*) the risks associated with providing professional services in particular circumstances are appropriately considered, and (*d*) an understanding with the client regarding the services to be performed is reached.

.83 Regional Accountants satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the following policies and procedures.

.84 **Policy 1**

The firm will evaluate factors that have a bearing on management's integrity.

.85 Regional Accountants implements this policy by—

a. Developing and maintaining a policies and procedures manual that contains policies and procedures relating to acceptance of prospective clients and the continuance of current clients. Such policies and procedures state that the firm's clients should not present undue risks to the firm, including damage to the firm's reputation.

b. Advising personnel that they are expected to be familiar with the firm's policies and procedures for acceptance and continuance of clients.

c. Obtaining and evaluating information before accepting or continuing a client, as applicable:

1. Available information regarding the client and its operations from sources such as annual reports, interim financial statements, registration statements, Form 10-K, Form 8-K, other reports to regulatory agencies, enforcement actions by regulatory agencies, and income tax returns.
2. The nature and purpose of the services to be provided by making inquiries of client management.
3. Information regarding the client and its management and principals that may have a bearing on evaluating the client by making inquiries of third parties such as bankers, legal counsel, investment bankers, underwriters, and other members of the financial or business community who may have appropriate knowledge. Inquiries might also be made about management's attitude toward compliance with outside regulatory or legislative requirements and the presence of reportable conditions, especially those that management is unwilling to correct. In certain circumstances, background checks by investigative firms are required.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

d. Communicating with the predecessor accountant when required or suggested by professional standards. This communication also includes inquiries regarding the nature of any disagreements and other events required to be reported by Form 8-K, and whether evidence of "opinion shopping" exists.

e. Evaluating the information obtained regarding management's integrity.

.86 **Policy 2**

The firm will evaluate whether the engagement can be completed with professional competence and accordingly undertake only those engagements that can be completed with professional competence and appropriately consider the risk associated with providing professional services in particular circumstances.

.87 Regional Accountants implements this policy by—

a. Evaluating whether the practice office has obtained or can reasonably expect to obtain the knowledge and expertise necessary to enable it to perform the engagement, for example, through the use of another practice office's resources.

b. Specifying conditions that require evaluation of a specific client or engagement, obtaining relevant information to determine whether the relationship should be continued, and establishing a time period for evaluations to be made (for example, continuance decisions should be made at least annually). Conditions include the following:

- Significant changes in the client, for example, a major change in ownership, senior client personnel, directors, advisors, the nature of its business, or its financial stability.
- Changes in the nature or scope of the engagement, including requests for additional services.
- Changes in the strategic focus or composition of the firm, for example, the inability to replace the loss of key personnel who are particularly knowledgeable about a specialized industry, or the decision to discontinue services to clients in a particular industry.
- The existence of conditions that would have caused the firm to reject the engagement had such conditions existed at the time of the initial acceptance. These conditions may include unreliable processes for making accounting estimates, questionable estimates by management, questions regarding the entity's ability to continue as a going concern, and other factors that may increase the risk of being associated with the client.
- Client delinquent in paying fees. (This may also affect the firm's independence.)
- Engagements for entities operating in highly specialized or regulated industries, including financial institutions and governmental entities, and engagements for employee benefit plans.
- Engagements for entities in the development stage.

c. Evaluating the information obtained regarding the acceptance or continuance of the client or engagement.

1. All information obtained about the client or the specific engagement is evaluated by the engagement partner and a recommendation is made regarding whether the client or engagement should be accepted or continued.
2. The engagement partner completes a client acceptance form and submits it to the practice office managing partner for approval.

3. The engagement partner signs a step in the planning program noting client continuance, and a form documenting client continuance is completed if conditions identified in *b.* above exist.
4. The firm's quality control partner is responsible for evaluating and approving the recommendation made by the engagement partner. In certain defined circumstances, such as new SEC engagements or high-risk engagements, documented acceptance or continuance decisions may also require the approval of the firm's managing partner.

.88 **Policy 3**

The firm will obtain an understanding with the client regarding the services to be performed.

.89 Regional Accountants implements this policy by requiring that all understandings with the client be in writing by obtaining an engagement letter for all engagements, thus minimizing the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed.

Engagement Performance

.90 The objective of the *Engagement Performance* element of a system of quality control is to provide the firm with reasonable assurance that the work performed by engagement personnel meets the applicable professional standards, regulatory requirements, and the firm's standards of quality. Policies and procedures for engagement performance encompass all phases of the design and execution of the engagement. To the extent appropriate and as required by applicable professional standards, these policies and procedures should cover planning, performing, supervising, reviewing, documenting, and communicating the results of each engagement. Policies and procedures should also provide that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

.91 Regional Accountants satisfies this objective by establishing and maintaining the following policies and procedures.

.92 **Policy 1**

Planning for engagements will meet professional, regulatory, and the firm's requirements.

.93 Regional Accountants implements this policy by developing, maintaining, and providing personnel with the firm's policies and procedures manual which prescribes the factors to be considered in the planning process by the engagement team and the extent of documentation of the considerations which may vary depending on the size and complexity of the engagement. Planning considerations include—

- Making the engagement partner responsible for planning an engagement and assigning responsibilities to appropriate personnel during the planning phase.
- Developing or updating background information.
- Requiring planning documentation that includes—
  - — Development of proposed work program, tailored to the specific engagement.
  - — Staffing requirements and the need for specialized knowledge, which may have to be obtained from another practice office.
  - — Considering the economic conditions affecting the client or its industry and their potential impacts on the conduct of the engagement.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

— Considering the risks and how they may affect the procedures to be performed.

— Preparing a budget that allocates a sufficient amount of time so the engagement will be performed in accordance with professional standards and the firm's quality control policies and procedures.

.94 Policy 2

The engagement will be performed, supervised, reviewed, documented, and communicated in accordance with the requirements of professional standards, regulatory authorities, and the firm.

.95 Regional Accountants implements this policy by—

a. Providing personnel with the firm's policies and procedures manual, which—

1. Prescribes the form and content of working papers, including firm-generated or purchased forms, checklists, questionnaires that are to be used in the performance of engagements, the form in which instructions are given to other offices or correspondents, and the extent to which their work is reviewed and documented.
2. Specifies the extent of overall engagement review, at all professional levels, so the financial statements meet professional and firm presentation and disclosure standards.
3. Specifies the extent of review that should be performed of communications to be made to management and the board of directors.

b. Assigning responsibility for the review of all reports, financial statements, and working papers to a reviewer senior to the preparer in accordance with procedures outlined in the firm's manual to obtain reasonable assurance that—

1. The nature, timing, and extent of procedures performed are consistent with risk assessments made and the approach described in the planning documentation and that exceptions are appropriately investigated. The appropriateness of planned procedures should be reconsidered when significant changes in risk factors occur or are identified between the planning phase of the engagement and the execution of substantive procedures.
2. Firm-prescribed forms, checklists, and questionnaires, tailored as appropriate, are used in the performance of the engagement and reporting on it.

c. Requiring a second review of the report, financial statements, and selected working papers by a partner or manager as prescribed in the firm's policies and procedures manual. The extent of review varies based on the type of engagement; for example, audits of SEC clients, engagements for financial institutions and high-risk engagements, as defined by the firm, receive the most extensive review.

d. Adhering to guidelines set up by the firm regarding the review of working papers, financial statements, and for documentation of the review process:

1. All reviewers are to have appropriate experience, competence and responsibility.
2. All work performed and the reports and financial statements issued are to be complete and comply with professional standards and firm policy.
3. Appropriate documentation is required on all engagements evidencing review of working papers, financial statements, and reports. Necessary documentation includes completion of the firm's review and approval documentation.

e. Requiring that all differences of professional judgment within an engagement team be resolved by the engagement and quality control partner. The resolution of the differences must be appropriately documented. If a member of the engagement team continues to disagree with the resolution, he or she may disassociate himself or herself from the resolution of the matter and will be offered the opportunity to document that a disagreement still exists.

.96 **Policy 3**

The firm will identify areas and specialized situations where consultation is required and will require personnel to refer to authoritative literature and practice aids and to consult, on a timely basis, with individuals within or outside the firm when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

.97 Regional Accountants implements this policy by—

a. Providing personnel with the firm's policies and procedures manual, which specifies the firm's consultation policies and procedures. Areas or specialized situations that may require consultation include—

- Application of newly issued technical pronouncements.
- Industries with special accounting, auditing, or reporting requirements.
- Emerging practice problems.
- Choices among alternative generally accepted accounting principles upon initial adoption or when an accounting change is made.
- Reissuance of a report, consideration of omitted procedures after a report has been issued or subsequent discovery of facts that existed at the time a report was issued.
- Filing requirements of regulatory agencies.
- Meetings with the SEC and other regulators at which the firm is to be called upon to support the application of generally accepted accounting principles which have been questioned.

b. Designating individuals within the firm as consultants in certain areas. Personnel are to consult with the appropriate individual when issues arise. When differences arise between the engagement partner and the consultant, the matter is resolved by the firm's quality control partner.

c. Maintaining or providing access to adequate and up-to-date reference libraries in each office which include materials related to specific industries, specialties, and regulatory requirements.

d. Requiring that documentation of consultation include all relevant facts and circumstances, reference to professional literature used in the determination, the conclusion reached, and signatures of the engagement partner and consultant. This documentation is to be retained in the engagement working papers, and at the discretion of the consultant, entered in a retrievable database to promote consistency in the application of generally accepted accounting principles in similar circumstances.

Monitoring

.98 The objective of the *Monitoring* element of a system of quality control is to provide the firm with reasonable assurance that the policies and procedures relating to the other elements of quality control are suitably designed and being effectively applied. Monitoring is an ongoing consideration and evaluation process.

.99 Regional Accountants satisfies this objective by establishing and maintaining the following policies and procedures.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.100 **Policy 1**

The firm will consider and evaluate, on an ongoing basis, the relevance and adequacy of its quality control policies and procedures.

.101 Regional Accountants implements this policy by designating a partner or a management-level individual with appropriate authority to be responsible for quality assurance, including—

a. Assuring that the firm's quality control policies and procedures and its audit methodology remain relevant and adequate. Factors to be considered include—

- Mergers and divestitures of portions of the practice.
- Changes in professional standards, and SEC or other regulatory requirements applicable to the firm's practice.
- Results of annual inspections and peer reviews.
- Review of litigation and regulatory enforcement actions against the firm and others.
- Impact that changes in technology may have on clients' methods of doing business.
- Changes in clients' industries that impact their operations.
- Changes in applicable AICPA membership requirements.

b. Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm's standards of quality in performing their duties.

c. Identifying the need to—

1. Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed.
2. Improve compliance with firm policies and procedures that are related to the other elements of quality control.

.102 **Policy 2**

The firm will consider and evaluate, on an ongoing basis, the appropriateness of its guidance materials and any practice aids.

.103 Regional Accountants implements this policy by—

a. Reviewing and updating firm practice aids, such as audit programs, forms, and checklists, based on the issuance of new professional pronouncements.

b. Issuing guidance regarding new professional standards, regulatory requirements, and related changes to firm policy.

c. Soliciting comments from partners and managers as to the effectiveness of practice aids and tools.

.104 **Policy 3**

The firm will consider and evaluate, on an ongoing basis, the effectiveness of professional development programs.

.105 Regional Accountants implements this policy by—

a. Designating a partner or qualified individual in each office to review the summary of evaluations of in-house training programs to determine whether the programs are achieving their objectives.

b. Designating a partner or qualified individual in each office to review summaries of CPE records for that office's professional staff to determine that the office has established a means of tracking each individual's compliance with the requirements of the AICPA and other regulatory bodies.

c. Interviewing selected professional personnel regarding the effectiveness of training programs.

d. Considering the results of the firm's inspection in connection with the effectiveness of the firm's professional development program.

e. Ascertaining whether inquiries received by individuals consulted within the firm indicate the need for additional CPE programs.

.106 Policy 4

The firm will consider and evaluate, on an ongoing basis, compliance with its policies and procedures.

.107 Regional Accountants implements this policy by making its quality control partner responsible for preparing inspection checklists and guidance materials, or using materials prepared by the AICPA for performing inspection procedures. These procedures include—

- Developing and coordinating the firm's inspection program to achieve feedback about the effectiveness of the firm's policies and procedures.
- Developing a plan for an appropriate test of compliance with the firm's policies and procedures on a sample of engagements. Such a review could be preissuance or postissuance.
- Reviewing the resolution of matters reported by professional personnel on independence circularization forms to determine that matters have been appropriately considered and resolved.
- Interviewing personnel at all professional management and staff levels to obtain information regarding operating procedures in practice offices and to determine whether personnel are knowledgeable of firm policies and procedures and whether they are being effectively communicated.
- Reviewing the following documentation to determine compliance with firm policies and procedures:
  - *a.* Personnel evaluations, including documentation of hiring and advancement decisions
  - *b.* Documentation of client acceptance and continuance decisions
  - *c.* Participants' evaluations of practice office training programs
  - *d.* Professional development records of personnel
  - *e.* Correspondence regarding the resolution of independence matters within the practice office
- Reviewing a cross-section of engagements from selected practice offices using the following criteria:
  - *a.* All partners and managers who have significant accounting and auditing responsibilities in the selected offices
  - *b.* Engagements for financial institutions
  - *c.* First-year engagements
  - *d.* Significant specialized industries with emphasis given to high-risk industries

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

e. Level of service performed (that is, audit, review, compilation, and attestation)

f. Level of attestation services performed (that is, examination, review, and agreed-upon procedures)

- Summarizing findings resulting from the inspection procedures.
- Communicating findings to practice office personnel and determining the corrective actions to be taken on the engagements reviewed. These findings are discussed and communicated in a report issued to each office. The practice office responds regarding the specific corrective actions or steps to be taken to improve compliance with the firm's policies and procedures and professional standards.
- Preparing a summary inspection report to the firm's senior management that evaluates the overall results of the inspection to determine whether—
  a. The firm as a whole needs to improve compliance with the firm's policies and procedures.
  b. Revisions to the firm's quality control policies and procedures are necessary.
- Communicating the need for improved compliance with or changes to the system of quality control in training programs, partner manager meetings, and firm policy correspondence.
- Periodically reviewing the system of personnel evaluation and counseling to ascertain that—
  a. Procedures for evaluation and documentation are being followed on a timely basis.
  b. Requirements established for advancement are being achieved.
  c. Personnel decisions are consistent with evaluations.
  d. Recognition is given to outstanding performance.

Chapter 4

ANYCITY CPAS' SYSTEM OF QUALITY CONTROL FOR ITS ACCOUNTING AND AUDITING PRACTICE

.108 This chapter describes how AnyCity CPAs implements each element of quality control for its accounting and auditing practice. AnyCity CPAs is a hypothetical firm. It is presumed to be a local, one-office firm with three partners and a total of ten professionals. Its accounting and auditing practice has a concentration of five employee benefit plan audits. AnyCity CPAs has no SEC clients. The firm uses purchased practice aids that have been subjected to peer review in accordance with standards established by the AICPA. These practice aids are supplemented by oral and written communications from the firm's partners. To enhance communications, the firm has chosen to provide its personnel with a written summary of its quality control policies and procedures that contains statements incorporated by reference to policies and procedures from its purchased practice aids, tailored to the specific needs of its practice.

Independence, Integrity, and Objectivity

.109 The objective of the *Independence, Integrity, and Objectivity* element of a system of quality control is to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance) in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities.

.110 AnyCity CPAs satisfies this objective by establishing and maintaining the following policies and procedures.

.111 **Policy 1**

Personnel will adhere to applicable independence, integrity, and objectivity requirements. These requirements include regulations, interpretations, and rulings of the AICPA, state CPA societies, state boards of accountancy, state statutes, and other regulatory agencies where applicable.

.112 AnyCity CPAs implements this policy by—

a. Designating a partner to provide guidance, answer questions, and resolve matters.

b. Identifying circumstances where documentation of the resolution of matters is appropriate.

c. Obtaining written representations from personnel, upon hire and on an annual basis, stating whether they are familiar with and are in compliance with professional standards and the firm's policies and procedures regarding independence, integrity, and objectivity.

d. Assigning responsibility for obtaining representations, reviewing compliance files for completeness, and resolving reported exceptions to a partner.

e. Having a partner periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm's independence.

.113 **Policy 2**

Personnel will be familiar with policies and procedures relating to independence, integrity, and objectivity.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.114 AnyCity CPAs implements this policy by—

a. Subscribing to and updating the AICPA *Professional Standards* loose-leaf service and other services pertaining to its practice, including a service that contains the Department of Labor's rules and regulations, and making these available in its office library.

b. Emphasizing the concepts of independence, integrity, and objectivity during its staff meetings, in the acceptance and continuance of clients and engagements, and in the performance of engagements, including discussing implications of auditing employee benefit plans and the types of nonattest services that could affect independence.

c. Informing personnel on a timely basis of those entities to which independence policies apply, by—

1. Preparing and maintaining a list of entities to which independence applies.
2. Making the list available to personnel who need it to determine their independence (including personnel new to the firm and certain former partners[3]).
3. Notifying personnel of changes in the list on a timely basis via memorandum or the firm's E-mail system.

.115 **Policy 3**

Confirm the independence of another firm performing parts of an engagement, or when we act as principal auditor.

.116 AnyCity CPAs implements this policy by—

a. Using its purchased practice aids, which prescribe the form, content, and frequency of independence representations that are to be obtained.

b. Requiring that such representations be documented.

Personnel Management

.117 The objective of the *Personnel Management* element of a system of quality control is to provide the firm with reasonable assurance that all personnel have the proficiency to perform their assigned responsibilities. Attributes or qualities that enhance the proficiency of personnel who perform, supervise, or review work include integrity, objectivity, intelligence, judgment, competence, experience, and motivation.

.118 AnyCity CPAs satisfies this objective by establishing and maintaining the following policies and procedures.

.119 **Policy 1**

Personnel who are hired will possess the appropriate characteristics to enable them to perform competently.

.120 AnyCity CPAs implements this policy by—

a. Establishing a general understanding among the partners of the attributes, achievements, and experiences desired in entry-level and experienced personnel.

[3] AICPA's *Professional Standards*, volume 2, ET section 101.04, discusses circumstances when activities of a former practitioner could affect the firm's independence.

b. Establishing criteria to evaluate personal characteristics such as integrity, competence, and motivation.

c. Setting guidelines as to additional procedures that are necessary when hiring experienced personnel such as performing background checks and inquiring about any outstanding regulatory actions.

d. Designating a qualified individual in the firm to be responsible for managing the human resource function.

.121 **Policy 2**

The firm will make personnel assignments based on the degree of technical training and proficiency required in the circumstances and the nature and extent of supervision to be provided.

.122 AnyCity CPAs implements this policy by conducting periodic partner and manager meetings to discuss the assignment of personnel to engagements. The factors to be considered in making such decisions include—

- Engagement size and complexity.
- Specialized experience and expertise required.
- Personnel availability and involvement of supervisory personnel.
- Timing of the work to be performed.
- Continuity and rotation of personnel.
- Opportunities for on-the-job training.
- Situations where independence or objectivity concerns exist.

.123 **Policy 3**

Personnel will participate in general and industry-specific continuing professional education and professional development activities that enable them to satisfy responsibilities assigned and fulfill applicable continuing professional education requirements of the AICPA and regulatory agencies.

.124 AnyCity CPAs implements this policy by—

a. Assigning responsibility to a partner to maintain an office professional development program that—

1. Provides that personnel in the office participate in professional development programs in accordance with firm guidelines and in subjects that are relevant to their responsibilities.
2. Considers requirements of the AICPA, state boards of accountancy, and regulatory agencies in establishing the firm's CPE requirements.

b. Encouraging participation in other professional development activities for personnel at each level within the firm, such as participation in external professional development programs, including graduate-level and self-study courses, membership in professional organizations, serving on professional committees, and writing for professional publications.

c. Communicating and distributing to personnel, when applicable, changes in accounting, auditing, and independence requirements and the firm's guidance with respect to them.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.125 **Policy 4**

Personnel selected for advancement will have the qualifications necessary to fulfill the responsibilities they will be called on to assume.

.126 AnyCity CPAs implements this policy by—

a. Assigning responsibility to a partner for making advancement and termination decisions. Such responsibilities include—

- Identifying responsibilities and requirements for evaluation at each level and indicating who will prepare evaluations and when they will be prepared.
- Using forms for evaluating the performance of personnel.
- Reviewing evaluations with the individual being evaluated on a timely basis.

b. Counseling personnel regarding their progress and career opportunities by—

1. Annually summarizing and reviewing with personnel the evaluation of their performance, including an assessment of their progress with the firm. Considerations should include performance, future objectives of the firm and the individual, assignment preferences, and career opportunities.
2. Periodically evaluating partners by means of counseling, peer evaluation, or self-appraisal, as appropriate.

Acceptance and Continuance of Clients and Engagements

.127 The objective of the *Acceptance and Continuance of Clients and Engagements* element of a system of quality control is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for that client. Such policies and procedures should provide the firm with reasonable assurance that (*a*) the likelihood of association with a client whose management lacks integrity is minimized, (*b*) the firm undertakes only those engagements that can be completed with professional competence, (*c*) the risks associated with providing professional services in particular circumstances are appropriately considered, and (*d*) an understanding with the client regarding the services to be performed is reached.

.128 AnyCity CPAs satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the following policies and procedures.

.129 **Policy 1**

The firm will evaluate factors that have a bearing on management's integrity.

.130 AnyCity CPAs implements this policy by—

a. Informing personnel of the firm's policies and procedures, including those outlined in the firm's purchased practice aids, for accepting and continuing clients.

b. Obtaining and evaluating available financial information regarding the client and its operations such as annual reports, interim financial statements, reports to regulatory agencies, income tax returns, and credit reports before accepting or continuing a client.

c. Making inquiries of the client management about the nature and purpose of services to be provided.

d. Making inquiries of the client's bankers, factors, attorneys, credit services, and others having business relationships with the entity.

e. Communicating with the predecessor accountant when required or suggested by professional standards.

f. Evaluating the information obtained regarding management's integrity.

.131 **Policy 2**

The firm will evaluate whether the engagement can be completed with professional competence and accordingly undertake only those engagements that can be completed with professional competence and appropriately consider the risk associated with providing professional services in particular circumstances.

.132 AnyCity CPAs implements this policy by—

a. Evaluating whether the firm has obtained or can reasonably expect to obtain the knowledge and expertise necessary to enable it to perform the engagement.

b. Specifying conditions that require evaluation of a specific client or engagement, obtaining relevant information to determine whether the relationship should be continued, and establishing a time period for evaluations to be made (for example, continuance decisions should be made at least annually). Conditions include the following:

- Significant changes in the client, for example, a major change in senior client personnel, ownership, advisors, the nature of its business, or the financial stability of the client.
- Changes in the nature or scope of the engagement, including requests for additional services.
- Changes in the composition of the firm, for example, the inability to replace the loss of key personnel who are particularly knowledgeable about a specialized industry, or the decision to discontinue services to clients in a particular industry.
- The existence of conditions that would have caused the firm to reject the client or engagement had such conditions existed at the time of the initial acceptance.
- Client delinquent in paying fees. (This may also affect the firm's independence.)
- Engagements for entities operating in highly specialized or regulated industries, including financial institutions, governmental entities, and engagements for employee benefit plans.
- Where there is a burdensome amount of hours required to complete the engagement.
- Engagements for entities in the development stage.

c. Evaluating the information obtained regarding acceptance or continuance of the client or engagement.

1. All information obtained about the client or the specific engagement is evaluated by the engagement partner, who makes a recommendation regarding whether the client or engagement is to be accepted or continued.
2. The engagement partner completes a client acceptance form and submits it to the managing partner for approval.
3. The engagement partner signs a step in the planning program noting client continuance, and a form documenting client continuance is completed if conditions identified above in *b.* above exist.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

4. The managing partner is responsible for evaluating and approving the recommendation made by the engagement partner. If the managing partner recommends not accepting or discontinuing a client relationship, all partners in the firm will review all of the information and participate in the acceptance or continuance decision.

.133 **Policy 3**

The firm will obtain an understanding with the client regarding the services to be performed.

.134 AnyCity CPAs implements this policy by requiring that all understandings with the client be in writing by obtaining an engagement letter on all engagements, thus minimizing the risk of misunderstanding regarding the nature, scope, and limitations of the services to be performed.

Engagement Performance

.135 The objective of the *Engagement Performance* element of a system of quality control is to provide the firm with reasonable assurance that the work performed by engagement personnel meets the applicable professional standards, regulatory requirements, and the firm's standards of quality. Policies and procedures for engagement performance encompass all phases of the design and execution of the engagement. To the extent appropriate and as required by applicable professional standards, these policies and procedures should cover planning, performing, supervising, reviewing, documenting, and communicating the results of each engagement. Policies and procedures should also provide that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm, when appropriate.

.136 AnyCity CPAs satisfies this objective by establishing and maintaining the following policies and procedures.

.137 **Policy 1**

Planning for engagements will meet professional, regulatory, and the firm's requirements.

.138 AnyCity CPAs implements this policy by maintaining and providing personnel with the firm's purchased practice aids which prescribe the factors to be considered in the planning process by the engagement team and the extent of documentation of the considerations which may vary depending on the size and complexity of the engagement. Planning considerations include—

- Assigning responsibilities to appropriate personnel during the planning phase.
- Developing or updating background information.
- Developing a planning document that includes—
  - — Proposed work programs, tailored to the specific engagement.
  - — Staffing requirements and the need for specialized knowledge.
  - — Considering the economic conditions affecting the client or its industry and their potential impacts on the conduct of the engagement.
  - — Considering the risks and how they may affect the procedures to be performed.
  - — Preparing a budget that allocates a sufficient amount of time so the engagement will be performed in accordance with professional standards and the firm's quality control policies and procedures.

.139 **Policy 2**

The engagement will be performed, supervised, reviewed, documented, and communicated in accordance with the requirements of professional standards, regulatory authorities, and the firm.

.140 AnyCity CPAs implements this policy by—

a. Providing adequate supervision during the course of an engagement. This supervision is based on the training, ability, and experience of the personnel assigned.

b. Adhering to the guidelines set forth by the firm and in its purchased practice aids for the form and content of working papers.

c. Utilizing appropriately tailored forms, checklists, and questionnaires to assist in the performance of the specific engagement.

d. Adhering to documentation guidelines set by the firm regarding the review of working papers, financial statements, and reports:

1. All reviewers are to have appropriate experience, competence, and responsibility.
2. All work performed and the reports and financial statements issued are to be complete and comply with professional standards and firm policy.
3. All engagements require appropriate evidence of review of working papers, financial statements, and reports.
4. All differences of professional judgment within an engagement team are to be resolved by the engagement and the managing partner. The resolution of the differences must be appropriately documented. If a member of the team continues to disagree with the resolution, he or she may disassociate himself or herself from the resolution of the matter and will be offered the opportunity to document that a disagreement still exists.

.141 **Policy 3**

The firm will identify areas and specialized situations where consultation is required and will require personnel to refer to authoritative literature and practice aids and to consult, on a timely basis, with individuals within or outside the firm when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

.142 AnyCity CPAs implements this policy by—

a. Informing personnel of the firm's consultation policies and procedures.

b. Consulting with appropriate individuals within and outside the firm when issues arise in certain areas.

c. Requiring consultation in specialized areas or specialized situations, which may include—

- Application of newly issued technical pronouncements.
- Industries with special accounting, auditing, or reporting requirements, including unusually complex employee benefit plans.
- Emerging practice problems.
- Choices among alternative generally accepted accounting principles upon initial adoption or when an accounting change is made.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Reissuance of a report, consideration of omitted procedures after a report has been issued or subsequent discovery of facts that existed at the time a report was issued.
- Filing requirements of regulatory agencies.

d. Maintaining an adequate and up-to-date reference library that is accessible to all professional personnel and that includes materials related to clients served.

e. Documenting all relevant facts, circumstances, professional literature used, and conclusions reached in the engagement working papers.

f. Documenting the resolution of differences of opinion. If on some occasions there is an unresolved disagreement, an outside source may be consulted to assist in determining the appropriate application of accounting principles.

Monitoring

.143 The objective of the *Monitoring* element of a system of quality control is to provide the firm with reasonable assurance that the policies and procedures relating to the other elements of quality control are suitably designed and being effectively applied. Monitoring is an ongoing consideration and evaluation process.

.144 AnyCity CPAs satisfies this objective by establishing and maintaining the following policies and procedures.

.145 Policy 1

The firm will consider and evaluate, on an ongoing basis, the relevance and adequacy of its quality control policies and procedures.

.146 AnyCity CPAs implements this policy by designating a partner or a management-level individual with appropriate authority to be responsible for quality assurance, including—

- Assuring that the firm's quality control policies and procedures and its audit methodology remain relevant and adequate. Factors to be considered include—
  - — Mergers and divestitures of portions of the practice.
  - — Changes in professional standards or other regulatory requirements applicable to the firm's practice.
  - — Results of annual inspections and peer reviews.
  - — Review of litigation and regulatory enforcement actions against the firm and others.
  - — Impact that changes in technology may have on clients' methods of doing business.
  - — Changes in clients' industries that impact their operations.
  - — Changes in applicable AICPA membership requirements.
- Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm's standards of quality in performing their duties.
- Identifying the need to—
  - *a.* Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed.

b. Improve compliance with firm policies and procedures that are related to the other elements of quality control.

.147 **Policy 2**

The firm will consider and evaluate, on an ongoing basis, the appropriateness of its guidance materials and any practice aids.

.148 AnyCity CPAs implements this policy by—

a. Reviewing and evaluating firm practice aids, such as audit programs, forms, and checklists, based on the issuance of new professional pronouncements.

b. Providing guidance during staff meetings regarding new professional standards, regulatory requirements, and related changes to firm practice aids.

.149 **Policy 3**

The firm will consider and evaluate, on an ongoing basis, the effectiveness of professional development programs.

.150 AnyCity CPAs implements this policy by—

a. Designating a management-level individual with the responsibility for reviewing the professional development policies and procedures to determine whether they are appropriate, effective, and meeting the needs of the firm.

b. Designating a management-level individual to review summaries of CPE records for the firm's personnel to determine that the office has established a means of tracking each individual's compliance with the requirements of the AICPA and other regulatory bodies.

c. Soliciting information from the firm's personnel during staff meetings regarding the effectiveness of training programs.

.151 **Policy 4**

The firm will consider and evaluate, on an ongoing basis, compliance with its policies and procedures.

.152 For purposes of illustration, two scenarios are described. Scenario I illustrates how AnyCity CPAs satisfies the objective of Policy 4 without performing an inspection of individual engagements. Scenario II illustrates how AnyCity CPAs implements Policy 4 through the use of engagement inspection.

.153 In determining which scenario is appropriate, consideration should be given to SQCS No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice*, paragraphs 3–7 (QC section 30.03–.07), which sets forth guidance that should be consulted in determining the extent of inspection procedures to be performed, including those related to individual engagements. Also, consideration should be given to time pressures such as report due dates and time budgets when considering whether a firm can effectively monitor its compliance with its policies and procedures through preissuance or postissuance engagement reviews.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Scenario I

.154 AnyCity CPAs implements Policy 4 by—

a. Designating a partner or management-level individual not previously associated with the engagement to perform a preissuance review of the engagement or a postissuance review of the engagement shortly after the release of the report. Deficiencies identified as a result of this process will be continuously summarized and evaluated to determine whether—

1. Additional emphasis should be placed on the specific areas or industries in future engagements.
2. Existing policies and procedures should be modified so any deficiencies noted do not recur.

b. Reviewing correspondence regarding consultation on independence, integrity, and objectivity matters, and acceptance and continuance decisions.

c. Reviewing the resolution of matters reported by professional personnel on independence circularization forms to determine that matters have been appropriately considered and resolved.

d. Summarizing the deficiencies noted resulting from the preissuance and postissuance reviews.

e. Preparing a summary of the deficiencies noted for the partner or management group in order to set forth any recommended changes to the firm's policies and procedures.

f. Communicating the deficiencies noted and the agreed-upon quality control changes to all professional personnel.

Scenario II

.155 AnyCity CPAs implements Policy 4 by—

a. Designating a partner to be responsible for performing an annual inspection using guidance prepared by the AICPA for performing inspection procedures. These procedures include reviewing a cross-section of engagements using the following criteria:

1. Significant specialized industries with emphasis given to high-risk engagements
2. Engagements for employee benefits
3. First-year engagements
4. Level of service performed (that is, audit, review, compilation, and attest)
5. All partners and other management level personnel having accounting and auditing responsibilities

b. Reviewing correspondence regarding consultation on independence, integrity, and objectivity matters, and acceptance and continuance decisions.

c. Reviewing the resolution of matters reported by professional personnel on independence circularization forms to determine that matters have been appropriately considered and resolved.

d. Summarizing findings resulting from the inspection procedures.

e. Preparing a summary inspection report for the partner or management group that evaluates the overall results of the inspection and that sets forth any recommended changes to the firm's policies and procedures.

f. Communicating inspection findings and agreed-upon quality control changes to all professional personnel.

Chapter 5

JANE BROWN, CPA'S SYSTEM OF QUALITY CONTROL FOR HER ACCOUNTING PRACTICE

.156 This chapter describes how Jane Brown, CPA implements each element of quality control for her accounting practice. Jane Brown, CPA is a hypothetical firm that is presumed to be a sole owner without any professional staff who occasionally hires per diem professionals. Her accounting practice consists only of engagements subject to the Statements on Standards for Accounting and Review Services. She uses purchased practice aids that have been subjected to peer review in accordance with standards established by the AICPA. Jane Brown, CPA recognizes that her policies and procedures will have to be changed if she hires full-time or part-time professional staff.

Independence, Integrity, and Objectivity

.157 The objective of the *Independence, Integrity, and Objectivity* element of a system of quality control is to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance), in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities.

.158 Jane Brown, CPA satisfies this objective by establishing and maintaining the following policy and procedures.

.159 **Policy 1**

I will adhere to applicable independence, integrity, and objectivity requirements. These requirements include regulations, interpretations, and rulings of the AICPA, state CPA societies, state boards of accountancy, state statutes, and other regulatory agencies where applicable.

.160 Jane Brown, CPA implements this policy by—

a. Purchasing AICPA *Professional Standards* annually.

b. Reviewing unpaid fees from clients to ascertain whether any outstanding amounts impair the firm's independence.

c. Reviewing relevant pronouncements relating to independence, integrity, and objectivity in the *Journal of Accountancy* and retaining copies of them.

d. Signing a step on each engagement program attesting to her independence and requiring per diem personnel to do the same.

e. Complying with *Statements on Standards for Accounting and Review Services* with respect to disclosing instances where the firm is not independent in the accountant's compilation report.

Personnel Management

.161 The objective of the *Personnel Management* element of a system of quality control is to provide the firm with reasonable assurance that all personnel have the proficiency to perform their assigned responsibilities. Attributes or qualities that enhance the proficiency of personnel who perform, supervise, or review work include integrity, objectivity, intelligence, judgment, competence, experience, and motivation.

.162 Jane Brown, CPA satisfies this objective by establishing and maintaining the following policies and procedures.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.163 **Policy 1**

I will maintain the degree of technical training and proficiency required in the circumstances.

.164 Jane Brown, CPA implements this policy by—

a. Evaluating the knowledge and expertise required to perform the engagement prior to accepting the client or engagement.

b. Accepting only those engagements that can be performed with professional competence.

.165 **Policy 2**

I will participate in general and industry-specific continuing professional education and professional development activities that enable me to satisfy my responsibilities and fulfill applicable continuing professional education requirements of the AICPA and regulatory agencies.

.166 Jane Brown, CPA implements this policy by—

a. Developing a professional development program and considering the requirements of the AICPA and state boards of accountancy.

b. Participating in external professional development programs, including graduate-level and self-study courses.

c. Joining and becoming an active member of professional organizations.

d. Serving on professional committees, writing for professional publications, when appropriate, and participating in other professional activities.

e. Considering changes in the applicable professional standards when determining her professional development program.

Acceptance and Continuance of Clients and Engagements

.167 The objective of the *Acceptance and Continuance of Clients and Engagements* element of a system of quality control is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for that client. Such policies and procedures should provide the firm with reasonable assurance that (*a*) the likelihood of association with a client whose management lacks integrity is minimized, (*b*) the firm undertakes only those engagements that can be completed with professional competence, (*c*) the risks associated with providing professional services in particular circumstances are appropriately considered, and (*d*) an understanding with the client regarding the services to be performed is reached.

.168 Jane Brown, CPA satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the following policies and procedures.

.169 **Policy 1**

I will evaluate factors that have a bearing on management's integrity.

.170 Jane Brown, CPA implements this policy by—

a. Obtaining information such as the following before accepting or continuing a client:

- Available information regarding the client and its operations from sources such as prior-year reports, internally generated financial statements (if applicable), income tax returns, and credit reports.
- The nature and purpose of the services to be provided.

b. Inquiring of third parties such as bankers, factors, legal counsel.

c. Communicating with the predecessor accountant when required or suggested by professional standards.

d. Evaluating the information obtained regarding management's integrity.

.171 **Policy 2**

I will evaluate whether the engagement can be completed with professional competence and accordingly undertake only those engagements that can be completed with professional competence and appropriately consider the risk associated with providing professional services in particular circumstances.

.172 Jane Brown, CPA implements this policy by—

a. Considering conditions that require evaluation of a client or specific engagement and obtaining the relevant information to determine whether the relationship should be continued. Conditions include—

- Establishing a time period for evaluations to be made (before the current-year engagement work begins).
- Significant changes in the client, for example, a major change in ownership, senior client personnel, directors, advisors, the nature of the business, or the financial stability of the client.
- Changes in the nature or scope of the engagement, including requests for additional services.
- The existence of conditions that would have caused the firm to reject the client or engagement had such conditions existed at the time of the initial acceptance.
- Client delinquent in paying fees. (This may also affect the firm's independence.)

b. Determining if the knowledge and expertise necessary to perform the engagement exists or can reasonably be obtained.

c. Evaluating the information obtained regarding the engagement and making the acceptance decision and documenting her evaluation or conclusion in a memorandum.

d. Evaluating the information obtained regarding the engagement and making the continuance decision.

.173 **Policy 3**

I will obtain an understanding with the client regarding services to be performed.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.174 Jane Brown, CPA implements this policy by—

a. Adhering to all requirements set forth in professional standards regarding obtaining an understanding with the client.

b. Requiring that the understanding with the client be documented either through an engagement letter or in a memorandum.

Engagement Performance

.175 The objective of the *Engagement Performance* element of a system of quality control is to provide the firm with reasonable assurance that the work performed by engagement personnel meets the applicable professional standards, regulatory requirements, and the firm's standards of quality. Policies and procedures for engagement performance encompass all phases of the design and execution of the engagement. To the extent appropriate and as required by applicable professional standards, these policies and procedures should cover planning, performing, supervising, reviewing, documenting, and communicating the results of each engagement. Policies and procedures should also provide that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm, when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

.176 Jane Brown, CPA satisfies this objective by establishing and maintaining the following policies and procedures.

.177 **Policy 1**

I will plan engagements to meet professional and the firm's requirements.

.178 Jane Brown, CPA implements this policy by adhering to professional standards regarding the planning process and the extent of documentation, if applicable. Engagement planning considerations may include, when applicable—

- Developing or updating background information.
- Obtaining an engagement letter.
- Reviewing prior financial statements and accountant's report.
- Using work programs.

.179 **Policy 2**

I will perform, supervise, review, document, and communicate in accordance with the requirements of professional standards and the firm.

.180 Jane Brown, CPA implements this policy by requiring the use of purchased practice aids on all appropriate engagements including—

- Maintaining availability of purchased practice aids and AICPA professional standards.
- Preparing all working papers and checklists in accordance with firm policy in order to document work performed in accordance with professional standards.
- Reviewing and initialing all engagement working papers in situations where per diem staff are utilized.

.181 **Policy 3**

I will identify areas and specialized situations where consultation is required and I will require personnel to refer to authoritative literature and practice aids and will consult, on a timely basis, with individuals outside the firm when appropriate (for example, when dealing with complex, unusual, or unfamiliar issues).

.182 Jane Brown, CPA implements this policy by—

a. Maintaining a technical reference library to assist in resolving practice problems. The library is updated as needed.

b. Referring to the AICPA's Technical Hotline when a practice problem arises for which the firm needs additional expertise.

c. Requiring that documentation of consultation include all relevant facts and circumstances and references to professional literature used in the determination and conclusion reached. This documentation is to be retained in the engagement working papers.

Monitoring

.183 The objective of the *Monitoring* element of a system of quality control is to provide the firm with reasonable assurance that the procedures relating to the other elements of quality control are suitably designed and being effectively applied. Monitoring is an ongoing consideration and evaluation process.

.184 Jane Brown, CPA satisfies this objective by establishing and maintaining the following policies and procedures.

.185 **Policy 1**

I will consider and evaluate, on an ongoing basis, the relevance and adequacy of my quality control policies and procedures.

.186 Jane Brown, CPA implements this policy by reviewing procedures that identify the need to—

a. Revise policies and procedures that are ineffective due to changes in professional standards or the nature of the practice.

b. Improve compliance with firm policies and procedures that are related to the other elements of quality control.

.187 **Policy 2**

I will consider and evaluate, on an ongoing basis, the appropriateness of my guidance materials and any practice aids.

.188 Jane Brown, CPA implements this policy by reviewing and determining that the firm's purchased practice aids are up-to-date based on the issuance of new professional pronouncements.

.189 **Policy 3**

I will consider and evaluate, on an ongoing basis, the effectiveness of professional development activities.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.190 Jane Brown, CPA implements this policy by—

a. Reviewing CPE records to determine whether the programs (AICPA or state society classroom training and self-study programs) are appropriate for the firm's practice.

b. Reviewing CPE records to determine compliance with the requirements of the AICPA and other regulatory bodies.

.191 Policy 4

I will consider and evaluate, on an ongoing basis, compliance with my policies and procedures.

.192 Jane Brown, CPA implements this policy by performing a postissuance review of selected engagements, in order to—

a. Summarize findings resulting from such reviews.

b. Place additional emphasis on certain deficient areas in future engagements.

c. Determine if existing policies and procedures should be modified so any deficiencies noted do not recur.

.193

Glossary of Selected Terms

Accounting and auditing practice. All audit, attest, accounting and review, and other services for which standards have been established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rule 201 or 202 of the AICPA Code of Professional Conduct (ET sections 201.01 and 202.01). Standards may be also established by other AICPA technical committees; engagements that are performed in accordance with those standards are not encompassed in the definition of an accounting and auditing practice.

Firm. Defined in the AICPA Code of Professional Conduct as "a form of organization permitted by state law or regulation whose characteristics conform to resolutions of Council that is engaged in the practice of public accounting, including the individual owners thereof" (ET section 92.05).

Personnel. All individuals who perform professional services for which the firm is responsible, whether or not they are CPAs.

Policy. A definite course or method of action to guide and determine present and future decisions. It is a guide to decision making under a given set of circumstances within the framework of a firm's objectives, goals, and management philosophies.

Procedure. A particular way of accomplishing something, an established way of doing things, a series of steps followed in a definite regular order. It provides for the consistent and repetitive approach to actions.

Sample Quality Control Forms

.01 Independence Checklist for Employees

Office _____

Employee name _____

In order to determine that the firm and its employees are in compliance with the independence rules, regulations, interpretations and rulings of the AICPA, the (*name of State*) CPA Society, the (*name of State*) Board of Accountancy, and state statutes the following must be completed by _____ (*date*) and returned to _____ as noted at the end of the form. If there are any questions you have related to the completion of the form, or if there is a matter that has come to your attention which may impair the firm's independence, please contact (*name of Partner*) to resolve the problem.

	Yes	*No*
1. Do you have a direct or indirect material financial interest in a client* or its subsidiaries and affiliates?	____	____
2. Do you have a financial interest in any major competitors, investees, or affiliates of a client*?	____	____
3. Do you have any outside business relationship with a client* or an officer, director, or principal stockholder having the objective of financial gain?	____	____
4. Do you owe any client* an amount, except a normal consumer note payable or home mortgage made by a financial institution under normal lending procedures, terms, and requirements?	____	____
5. Do you have a note or account receivable from a client*, except for a deposit in a financial institution?	____	____
6. Do you have the authority to sign checks for a client*?	____	____
7. Are you connected with a client* as a promoter, underwriter or voting trustee, director, officer or in any capacity equivalent to a member of management or an employee?	____	____
8. Do you serve as a director, trustee, officer, or employee of a nonprofit organization that is a present client*?	____	____
9. Has your spouse or minor child been employed by a client*?	____	____
10. Has anyone in your legal family, or any blood relative, been employed in any type of managerial position by a client*?	____	____
11. Are any billings delinquent for clients* that are your responsibility?	____	____

* Client. The enterprise with whose financial statements the member is associated.

I have read the Firm's Independence Policy and AICPA standards. I believe I understand the independence policy and standards. I am in compliance except for the exceptions listed below. (Exceptions to policies: A "Yes" answer to the independence checklist is an exception. Give details as to names, addresses, amounts (relationships of amounts to your net worth is relevant), etc. Leaving the space blank indicates you have no exceptions.)

Arrangements made to dispose of above exceptions to comply with policies:

.14 Performance Evaluation

[To be completed after each engagement of forty hours or more.]

Name _____ Classification _____

Client _____ From _____ To _____

Describe work assigned: _____

_____

_____

In your opinion based on the staff member's classification, should this assignment be considered:

Demanding ☐ Routine ☐

This individual is ☐ is not ☐ ready for increased responsibility. Explain _____

_____

Rating: Enter comments which describe the staff member's performance on this engagement. Rate the staff member on each of the items below as Outstanding (O), Very High (VH), Good (G), Below Normal (BN), or Not Applicable (NA).

[Support each caption with specific incidents or remarks.]

Technical Knowledge: Did the staff member possess adequate knowledge to function effectively at the level assigned? Did this knowledge encompass accounting principles, auditing standards, and tax accounting? Has the staff member kept current on recent developments and new pronouncements on professional practice matters as they affected this engagement?

O VH G BN NA
Rating: ☐ ☐ ☐ ☐ ☐

_____

_____

_____

Analytical Ability and Judgment: How well did the staff member recognize problems, develop relevant facts, formulate alternative solutions, and decide on appropriate conclusions? Did the staff member distinguish between material and immaterial items? Was the staff member practical in adapting theory and experience to the individual circumstances of this client?

O VH G BN NA
Rating: ☐ ☐ ☐ ☐ ☐

_____

_____

_____

Written and Oral Expression: Evaluate the effectiveness of the staff member's letters, memoranda, and other forms of written communication. In conversation, did the staff member communicate intentions effectively? Were instructions understood the first time? Did the staff member sell ideas, obtain acceptance and action?

O VH G BN NA
Rating: ☐ ☐ ☐ ☐ ☐

_____

_____

_____

Note: See the AICPA MAP Handbook for alternatives.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Performance: Can you depend on the staff member for sustained, productive work? Were assignments organized and completed accurately in a reasonable amount of time? Did the staff member readily assume responsibility? Did the staff member meet time estimates and document work papers properly?

O VH G BN NA
Rating: ☐ ☐ ☐ ☐ ☐

Development of Personnel: In assigning work, did the in-charge member make the most effective use of available talent in terms of getting the work done and in terms of developing staff members performing the work? Did the in-charge staff member tend to make assignments which were either too easy or too hard for his subordinates? Was the staff member readily accepted as a leader? Was the staff member effective in on-the-job coaching?

O VH G BN NA
Rating: ☐ ☐ ☐ ☐ ☐

Client Relations: How well did the staff member relate to this client and gain his acceptance? How well did the staff member recognize and take advantage of practice development opportunities, through extension of services to this client?

O VH G BN NA
Rating: ☐ ☐ ☐ ☐ ☐

Attitude: Did the staff member demonstrate a positive and professional approach to the assignment? Was this demonstrated by sustained effort in completing work? Was the assignment undertaken with enthusiasm and zest? Did the staff member respond in a positive way to suggestions and guidance from superiors? To what degree did the staff member make personal sacrifices to meet client requirements? Was the staff member a helpful member of the team? Knowledge and Skill Form

(and Profile of Management Role Performance)

Staff member evaluated _____ Date _____

Evaluator _____

Indicate most effective and least effective roles by placing a check in the far left or right hand column (maximum of two each). For the other five traits, indicate relative strength of staff member by placing a check in columns 2, 3, or 4.

(Circle at least two but not more than four in each section and indicate the effectiveness of each trait.)

			If you wish, add your own words.	Effectiveness				
				Least				Most
				1	2	3	4	5
Planner								
Careful	Sloppy	Thorough						
Imaginative	Foresighted	Infrequent						
Routine	Erratic	Last-minute						
Constant	Cautious	Meticulous						
Problem solver								
Analytical	Consistent	Superficial						
Critical	Faulty	Routine						
Hasty	Creative	Reliable						
Slow	Quick	Successful						
Communicator								
Warm	Sloppy	Cold						
Inhibited	Weak	Unstructured						
Thorough	Receptive	Patient						
Expressive	Efficient	Precise						
Leader								
Dominating	Excitable	Partial						
Uncertain	Permissive	Energetic						
Weak	Fair	Heavy-handed						
Loose	Amiable	Sure						
Decision maker								
Decisive	Lone	Delayer						
Slow	Avoider	Reliable						
Quick	Seldom	Participative						
Frequent	Rash	Dependent						
Trainer								
Systematic	Unprepared	Conscientious						
Patient	Efficient	Knowledgeable						
Sloppy	Diligent	Disinterested						
Off-on	Slow	Enthusiastic						
Team member								
Cooperative	Unreliable	Independent						
Influential	Divisive	Undisciplined						
Conformist	Reliable	Contributing						
Forceful	Reluctant	Welcome						
Innovator								
Original	Appropriate	Consistent						
Infrequent	Clever	Sensible						
Unnecessary	Creative	Unimaginative						
Constant	Disruptive	Rash						
Job expertise								
Amateur	Improving	Too technical						
Obsolete	Mediocre	Disinterested						
Masterful	Balanced	Lagging						
Versatile	Up-to-date	Thorough

.17 Employee Annual Performance Appraisal

Time Period Involved			
From	To		☐ EXEMPT ☐ NON-EXEMPT

Name	Position Title	Number

Hire Date	Present Position Date	Days Absent From: _____ To: _____ Charged To Sick Time: _____ Disability: _____

Strengths	Development Needs
	Suggested Plan for Performance Improvement

Summary

Overall Rating on Having Met Job Requirements	
Non-Exempt - Circle One	Exempt - Circle One
1 2 3	1 2 3 4 5
1 = Did Not Meet Job Requirements	1 = Did Not Meet Job Requirements 2 = Met Most
2 = Met All 3 = Exceeded	3 = Met All 4 = Exceeded 5 = Far Exceeded

Review the following questions before answering them, using the following criteria:

- A "yes" answer should be considered for possible mention as a "strength". If so, refer to it on the first page of this evaluation.
- A "no" answer should be considered for possible mention as a "development need". If so, refer to it on the first page of this evaluation.

All answers should be considered in arriving at an overall rating on having met job requirements.

	CHECK AS APPROPRIATE				
	Strength	Yes	N/A	No	Development Need
Quality of Work					
Is work accurate, neat and clearly presented?	( )	( )	( )	( )	( )
Carefully planned, well organized and thorough?	( )	( )	( )	( )	( )
Productivity					
Is a good level of production maintained?	( )	( )	( )	( )	( )
Are deadlines met?	( )	( )	( )	( )	( )
Are pressure situations handled effectively?	( )	( )	( )	( )	( )
Knowledge of Job					
Does the individual know where to get information?	( )	( )	( )	( )	( )
Is the individual used as a source of information by others?	( )	( )	( )	( )	( )
Communication					
Does the individual ask for clarification when necessary?	( )	( )	( )	( )	( )
Does the individual respond to others in a manner that indicates understanding?	( )	( )	( )	( )	( )
Are ideas expressed so that others are able to understand them?	( )	( )	( )	( )	( )
Human Relations					
Does the individual cooperate with others to get the job done?	( )	( )	( )	( )	( )
Does the individual demonstrate tact and courtesy in dealing with others?	( )	( )	( )	( )	( )
Does the individual maintain a good working relationship with all others?	( )	( )	( )	( )	( )
Are questions and requests dealt with in a helpful manner?	( )	( )	( )	( )	( )
Need for Supervision					
Can the individual be relied upon to get work done without close supervision?	( )	( )	( )	( )	( )
Does the individual take the initiative when appropriate?	( )	( )	( )	( )	( )
Problem Solving					
Does the individual collect the data needed to solve problems?	( )	( )	( )	( )	( )
Are problems solved quickly?	( )	( )	( )	( )	( )
Are solutions reasonable and accurate?	( )	( )	( )	( )	( )

.18 New Client Acceptance Checklist

Name of prospective client: _____

Address and Phone No.: _____

_____

Name and title of contact at prospective client: _____

_____

Form completed by: _____ Date: _____

Instructions

This form provides for information necessary to assess whether to accept a prospective client. The information should be obtained from discussions with the prospective client's management, bankers, attorneys, credit services, and if applicable current or former independent CPA, from reviewing the client's financial statements, regulatory agency reports, credit reports, and tax returns, and from other sources such as industry or accounting journals, etc. As much information as possible should be obtained before visiting the potential client. Depending on the type of engagement involved, some information requested on this form may not be applicable, or additional information may be necessary and should be attached.

Services and Reports Required

1. Describe the service and reports requested. _____
   _____
   _____
2. Describe the reason the service is needed, including any regulatory requirements or third parties for which the service or report is intended. _____
   _____
   _____
3. What is the required completion date? _____
   _____
4. Describe any other services not requested for which there appears to be a need. _____
   _____
5. What is the preliminary estimate of hours to complete the engagement? _____
   _____

Industry Practices and Conditions

6. In what industry does the company operate? _____
   _____
7. Describe any specialized tax or accounting practices applicable to the industry. _____
   _____
8. Describe any economic, technological or competitive conditions or other recent developments in the industry that may affect the company's operations. _____
   _____
   _____
9. Describe any special regulatory requirements applicable to the industry. _____
   _____
10. Is the company in the development stage? _____
    _____

Organization and Personnel

11. Company's Legal Name: _____ Fiscal Year End: _____

12. Type of legal entity (Corporation, S Corporation, partnership, proprietorship, etc.): _____

13. List the major stockholders (partners or owners) of the company and their percentage of ownership. If applicable, obtain and attach a copy of the company's organization chart.

Name and (if applicable) Title	% Ownership

14. List the principal members of management.

Name and Title	Stated Qualifications (education, training, and experience)

15. Briefly describe any existing or contemplated employee bonus arrangement (individual, title, method of computation), stock option, or pension (profit sharing) plans that may affect the engagement.

16. List each location maintained by the company (including foreign locations, if any), the nature of the activity performed at each, and the approximate number of employees at each, i.e., plant, sales office, executive offices, etc.

Location	Activity	No. of Employees

17. Inquire about possible transactions with related parties that may affect the engagement.

Name of Related Party	**Relationship**	**Type of Transaction**

Operations

18. Describe the nature of the company's major assets and liabilities. _____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

19. What are the company's sources of revenue and marketing methods? Describe major products, customers, etc.). _____

20. If the company is economically dependent on a major customer, name the customer and approximate percentage of total revenue generated by this customer. _____

21. Describe the components of cost of goods sold and the company's production process. _____

22. What are the major expenses of the company other than cost of goods sold? _____

23. Describe the company's compensation methods, i.e., salary , hourly wage, commissions, piece work, union scale, etc. _____

24. What are the company's major sources of financing, i.e., working capital loans, long term debt, leasing, equity, etc. Describe restrictive covenants on any loan agreements. _____

Accounting

25. Does the company maintain the following items? [Attach description, if appropriate.]
    a. Accounting manual? _____
    b. Budget? _____
    c. Cost accounting system? _____
    d. EDP equipment? (indicate type of equipment and software) _____
    e. Written credit policy? _____

26. Briefly describe the accounting system and accounting responsibilities.

Description of Accounting Record	Name of person who is responsible	EDP	MANUAL	N/A
General Ledger				
Subsidiary Ledgers:				
Accounts receivable				
Fixed assets				
Loans payable				
Accounts payable				
Perpetual inventory				
Physical inventory summarization				
Journals:				
Cash receipts				
Cash disbursements				
Sales/purchase/voucher				
Payroll				
General journal entries				
Financial Reporting				
[Indicate basis of accounting]:				
Annual financial statements				
Monthly financial statements				
Management reports				
Other:				
Bank reconciliations				

27. Describe the company's completeness procedures and methods to insure that accounting transactions enter into the accounting system, i.e., that all shipments or services are invoiced, that all cash sales are recorded, and that all disbursements are recorded.

28. Describe any unusual features of the accounting system.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

29. For audit engagements does it appear that the accounting system provides accounting records sufficient to permit the application of audit procedures on a cost-effective basis? [If no, attach a memo explaining the possible scope limitation, its potential effect on the auditor's report, and the potential management's reaction.] _____

_____

_____

_____

Tax Matters

30. Who prepares the tax returns? _____

31. Describe major differences between book and tax income, unusual tax elections, carry forwards or IRS examinations in process. If possible, review copies of the most recent 3 years of tax returns and attach them to this form. _____

_____

_____

_____

_____

Other Matters

32. Describe any significant problems that could affect the engagement, such as litigation or other contingencies, unusual agreements, and plans to acquire or dispose of significant assets, merge with another entity, enter a new area of business, convert to or expand use of EDP equipment, etc._____

_____

_____

_____

33. Give the name of a current or former independent CPA._____

_____

a. Describe any disputes over accounting matters._____

_____

34. Describe any apparent problems or areas for improvement that were noted where our firm could provide additional service or recommendations._____

_____

_____

_____

Independence

35. Would service to this client cause problems of independence or conflicts of interest because of relationships with other clients or members of the staff? _____

_____

Fees

36. Based on inquiries with a current or former independent CPA, if applicable, indicate the amount of any unpaid fees and the reason for nonpayment. _____

_____

37. If possible indicate the amount of fees charged by an existing or former independent CPA for the service being proposed. (The CPA or the potential client may be willing to furnish this information, or it might be obtainable from the financial statements or tax return.)_____

38. Describe any other indications that our firm might have a problem billing or collecting our fees. _____

_____

Management Integrity

39. Have any of the following sources raised any concerns about management's integrity?
    a. Difficulty in obtaining information from management, or evasive, guarded or glib responses to inquiries. _____
    _____
    b. Apparent difficulty in meeting financial operations or a deteriorating financial position that might predispose management to make an intentional error, irregularity or misrepresentation.
    c. Disputes about accounting principles, engagement procedures or similarly significant matters with an existing or former accountant, or doubts of the predecessor accountant about management's integrity. _____
    _____
    d. Comments by bankers, attorneys, creditors, or others having a business relationship with a potential client. _____
    _____

40. If management is changing accountants, why is the change being made? _____
    _____

41. Is there any reason to suspect that management would be uncooperative, unreasonable or otherwise unpleasant to work with? _____
    _____

Other Comments or Observations

42. Give any other comments or observations that might affect our decision whether to prepare a proposal letter or its contents. Add attachments to this form, if necessary. _____
    _____

.19 Summary Monitoring/Inspection Report

I. *Planning the Inspection*

A. Inspection period _____

B. Composition of Inspection Team:

1. Captain _____ Position _____
2. Team Member _____ Position _____
3. Team Member _____ Position _____

C. Indicate matters that may require additional emphasis in the inspection and explain why.

_____

_____

_____

_____

_____

D. Development of Inspection Program:

1. Describe programs used and indicate any deviations therefrom.

_____

_____

_____

_____

2. Describe basis for selection of engagements:

_____

_____

_____

E. Timing of Inspection:

Commencement _____

Completion of work _____

Issuance of report _____

II. *Scope of Work Performed*

A. Indicate elements of quality control not addressed and give reasons.

_____

_____

_____

_____

B. Engagements Reviewed:

	Firm Totals		Engs. Reviewed	
	Hrs.	No. of Engs.	Hrs.	No. of Engs.
Audits:				
SEC Clients				
Government[1]				
Other				
Reviews				
Compilations				
Attestations				
Other Accounting Services				

Comments: _____

III. *Engagement Conclusions*

A. Did the inspection disclose any situation that led the reviewers to conclude that the firm or office should consider:

1. Taking action to prevent future reliance on a previously issued report, pursuant to SAS No. 1 (AU section 561)? Yes _____ No _____
2. Performing additional auditing procedures to provide a satisfactory basis for a previously expressed opinion, pursuant to SAS No. 46 (AU section 390)? Yes _____ No _____

B. Did the inspection team conclude in any instances that the firm or office lacked a reasonable basis under the standards for accounting and review services for the report issued? Yes _____ No _____

If any of the answers above are yes, attach a description of such situations, including actions the firm or office has taken or plans to take.

IV. *Findings and Recommendations:*

Attach a copy of any reports issued, including a summary of any inspection findings and recommendations for improvement or list such findings and recommendations below.

_____

Supervisory Partner _____

Date _____

_____

[*The next page is 12,001.*]

1 Includes only audits conducted pursuant to the *Government Auditing Standards*, issued by the Comptroller General of the United States ("yellow book").

AAM Section 12,010

Illustrative Internal Control Questions—State and Local Governmental Units

.010 The following is a list of illustrative internal control questions an auditor might raise concerning a state or local governmental unit. The extent of controls that an organization should establish is a judgment that must be made by the management of the entity. The judgment is affected by circumstances, such as the size of the organization, and the number of personnel available, the entity's organizational characteristics, the nature, diversity, and complexity of its operations, its methods of transmitting, processing, maintaining, and accessing information, applicable legal and regulatory requirements, and cost/benefit considerations. These illustrative questions are numbered merely for organizational purposes. The numbers are in no way intended to infer completeness or a preferred sequence. A firm that believes the questionnaire approach is appropriate for its practice should develop its own internal control questionnaires based on its own needs and preferences. The auditor should also consider the illustrative questions in AAM sections 4400 and 4420. In any event, users of checklists and questionnaires should recognize that important matters in a particular set of circumstances may not be covered in a standard checklist.

.020 Internal control consists of the following five interrelated components:

a. Control environment

b. Risk assessment

c. Control activities

d. Information and communication

e. Monitoring

I. Control Environment

.030 The control environment sets the tone of an organization, influencing the control consciousness of its people. Control environment factors include the following:

- Integrity and ethical values
- Commitment to competence
- Board of directors or audit committee participation
- Management's philosophy and operating style
- Organizational structure
- Assignment of authority and responsibility
- Human resource policies and practices

.040 The control environment is the foundation for all other components of internal control, providing discipline and structure.

.050 The following questions are to assist the auditor in obtaining an understanding of the control environment as well as assessing the control risk.

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
.060 Integrity and Ethical Values							
1. Are outside parties made aware of the entity's ethical standards?	—						
2. Is the organization subject to external forces or pressures which make it vulnerable to errors?	—	—			—		
3. Does the public perceive this organization to be adequately controlled?	—						
4. Does management conduct business on a high ethical plane and insist that others do so, or pay little attention to ethical issues?		—			—		
5. Has management conveyed the message that ethics cannot be compromised and have employees received and understood that message?	—						
6. Does the "tone at the top" include explicit moral guidance about what is right and what is wrong, and is it established and communicated throughout the organization?	—				—		
.070 Commitment to Competence/Board of Directors' or Audit Committee Participation/Management's Philosophy and Operating Style							
1. Are goals and objectives for the organization current and in writing?	—	—					
2. Does management often enter into particularly high-risk ventures, or is it extremely conservative in accepting risks?	—	—	—		—		
3. Does management have to meet rigid targets to receive a portion of their compensation (e.g., bonus), particularly when such targets are considered unreasonably difficult?		—		—	—		
4. What is management's attitude and actions toward financial reporting, including disputes over application of accounting treatment (e.g., selection of conservative versus liberal accounting policies; whether accounting principles have been misapplied, important financial information not disclosed, or records manipulated or falsified)?					—

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
5. Is management conscientious and applies integrity with the judgmental aspects of reporting, when developing estimates?				—	—		
6. Is there frequent interacting between senior management and operating management, particularly for geographically removed units?	—	—					
7. What is management's attitude toward the data processing and accounting functions, and its concerns about the reliability of financial reporting and safeguarding assets?	—				—		
8. Has management communicated a commitment to strong internal control to employees during the past year?	—	—			—		
9. Is management's attitude that overriding or bypassing established controls is unacceptable?	—	—					
10. Is there a long-range planning process?	—	—					
11. Has the budget been submitted to the legislative body for approval and is there clear communication to operation departments or agencies of the effects of legislatively mandated budget modifications (either increases or decreases)?	—						
.080 Organizational Structure							
1. Is the organizational structure so simple that it cannot adequately monitor the organization's activities, or so complex that it inhibits the necessary flow of information?	—	—					
2. Do members of management fully understand their control responsibilities and possess the requisite experience and levels of knowledge commensurate with their positions?	—						
3. Do key managers possess the appropriate knowledge and experience in light of their responsibilities?	—	—					
4. Is the entity's organizational structure appropriate so as to provide the necessary information flow to manage its activities?	—	—					
5. Are the reporting relationships appropriate?	—	—					
6. To what extent are organizational modifications made in light of changing conditions?	—	—					
7. Are there sufficient quantities of employees, particularly in management and supervisory capacities?	—	—					
8. Is the organization chart current?	—	—					
9. Is the organization properly synchronized for the program/budget structure?	—	—			—		
10. Are functional statements current and in writing and consistent with the organization chart?	—	—					
.090 Assignment of Authority and Responsibility							
1. Is there an adequate definition of key managers' responsibilities and an appropriate understanding of those responsibilities?	—	—					
2. Are delegations of authority and responsibility current and in writing?	—						
3. Do the delegations of authority and responsibility reflect the segregation of duties concept?	—	—					
4. Are the job descriptions descriptive of the jobs actually performed?	—	—					
5. Do the delegations of authority and responsibility grant officials necessary authority to carry out functions for which they are responsible?	—	—					
6. Are employees held accountable for performance and results achieved?	—	—					
7. Do managers routinely follow-up on delegations of authority and responsibility to subordinates?	—	—					

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
.100 Human Resource Policies and Practices							
1. Do personnel practices include:							
a. A code of conduct?	—						
b. Provisions for conflict of interest disclosure?	—						
2. Are there accurate and up-to-date performance standards?	—	—					
3. Are the performance standards consistent with the operating plan?	—	—					
4. Are there sufficient training opportunities to ensure all employees are competent to perform work assigned?	—	—					
5. Are policies and procedures for hiring, training, promoting, and compensating employees in place?	—	—					
6. Are employees made aware of their responsibilities and expectations of them?	—	—					
7. Is there appropriate remedial action taken in response to departures from approved controls and violations of the code of conduct?	—						
8. Are policies regarding conflicts of interest and business practice policies established, documented, and distributed?	—						
9. Are there adequate employee candidate background checks, particularly with regard to prior actions or activities considered to be unacceptable by the entity?	—						
10. Are there adequate employee retention and promotion criteria, and related information gathering techniques, related to compliance with the code of conduct or other behavioral guidelines?	—						
11. Do management performance standards include provisions for maintaining adequate internal control?	—						
12. Are employees adequately supervised?	—	—					
13. Are staffing levels adequate?	—	—					
14. Is turnover low?	—	—					
15. Do employees have copies of their current position description?	—	—					
16. Is orientation training conducted for new employees?	—						
17. Are employees aware of their rights to communicate with any official of rank higher than their immediate supervisor?	—	—			—		
18. Do written personnel policies exist?	—	—					
19. Are payroll and personnel policies governing compensation in accordance with the requirements of grant agreements?			—	—

II. Risk Assessment

.110 An entity's risk assessment for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are fairly presented in conformity with generally accepted accounting principles. Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements. Risks can arise or change due to circumstances such as:

- Changes in the operating environment
- New personnel
- New or revamped information systems
- Rapid growth

.120 The following questions are to assist the auditor in obtaining an understanding of how management considers risks relevant to financial reporting objectives and decides about actions to address those issues. It is also structured to help the auditor assess control risk.

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
.130 Risk Assessment							
1. Are there mechanisms to identify and react to changes that can have a more dramatic and pervasive effect on the entity, and may demand the attention of senior management? Some examples include:							
a. New laws or regulations that affect the entity or its activities,	—	—					
b. New or redesigned information systems,	—	—			—		
c. New technology incorporated into the information systems.	—	—			—		
2. Do controls exist for approving decisions regarding financing alternatives and accounting principles, practices, and methods?	—			—			
3. Has management identified and analyzed entity risks relating to circumstances such as:							
a. Changes in the operating environment?	—	—			—		
b. New personnel?	—	—			—		
c. New or revamped information systems?	—	—			—		
d. Rapid growth?	—	—			—		
e. New technology?	—	—			—		
f. New lines, products, or activities?	—	—			—		
g. Restructurings?	—	—			—		
h. Other operations?	—	—			—		
i. Accounting pronouncements?	—	—			—		
4. Has management estimated the significance of the risks relevant to the preparation of financial statements?			—	—	—		
5. Has management taken appropriate steps to manage these risks?					—		
Phase 1: Preliminary Risk Assessment	L M H	L M H	L M H	L M H	L M H		
Phase 2: Final Risk Assessment—Based on audit tests of controls	L M H	L M H	L M H	L M H	L M H		

III. Control Activities

.140 Control activities are the policies and procedures that help ensure that management directives are carried out. They help ensure that necessary actions are taken to address risks to achievement of the entity's objectives. Control activities have various objectives and are applied at various organizational and functional levels. Generally, control activities that may be relevant to an audit may be categorized as policies and procedures that pertain to the following:

- Performance reviews
- Information processing
- Physical controls
- Segregation of duties

.150 Questions for the following functional areas have been included to assist the auditor in obtaining an understanding of the control activities relevant to planning the audit:

- Cash
- Investments
- Revenues and Receivables
- Capital Assets
- Procurement and Payables
- Employee Compensation

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
.160 Performance Reviews							
1. Are there periodic performance reviews (appraisals) of all employees?	—						
.170 Information Processing							
2. Have procedures been adopted and communicated establishing authority and responsibility for transfers between budget categories?	—	—	—		—		
3. Are requests for supplemental appropriations or budget changes processed and approved in the same manner as the original budget is processed and approved?	—	—	—		—		
4. Do controls exist over preparation and approval of input transactions outside the EDP department and is the department prohibited from initiating transactions?	—	—					
5. Does the user exercise control procedures over input to ensure that all approved input is processed correctly through the system and only once?	—	—		—			
6. Do controls exist over entry of data in on-line systems to restrict access to terminals and data entry to authorized employees?	—	—					
7. Do on-line systems controls exist that prevent documents from being keyed into the system more than once and that permit tracing from computer output to data source and vice versa?	—	—					
8. Do controls exist over changes to master files, such as requiring preparation of specific forms indicating data to be changed, approval by a supervisor in the user department, and verifying against a printout of changes?	—	—					

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
9. Do user controls exist over rejected transactions through the use of a computerized suspense file of rejected transactions or an auxiliary manual system?	—	—					
10. Does user department management reconcile output totals to input totals for all data submitted, reconcile the overall file balances, and review outputs for reasonableness?	—	—		—			
11. Do procedures exist within the data processing control function that provide that data is properly controlled between the user and the EDP department?	—	—					
12. Do controls exist over data entry, for example, that include adequate supervision, up-to-date instructions, key verification of important fields, and self-checking digits?	—	—					
13. Do program controls exist over entry of data into on-line systems?	—	—					
14. Is input data edited and validated?	—	—					
15. Do data processing controls exist over rejected transactions?	—	—					
16. Do controls exist for balancing transactions and master files?	—	—		—			
17. Do procedures exist within the data processing control function concerning review and distribution of output?	—	—					
18. Do controls exist over changes to system software?	—	—					
19. Are procedures to be followed by computer operators documented?	—	—					
20. Is the data processing system documented such that the organization could continue to operate if important data processing employees leave?	—						
21. Does the entity have adequate written statements and explanations of its accounting controls? (Written accounting controls may include such matters as:							
a. A chart of accounts accompanied by explanations of the items to be included in the various accounts.	—	—					
b. Identification and description of the principal accounting records, recurring standard entries, and requirements for supporting documentation. For example, this may include information about the general ledger, source journals, subsidiary ledgers, and detail records for each significant class of transactions.	—	—					
c. Expression of the assignment of responsibilities and delegation of authority including identification of the individuals or positions that have authority to approve various types of recurring and non-recurring entries.	—	—					
d. Explanations of documentation and approval requirements for various types of recurring and non-recurring transactions and journal entries. Documentation requirements, for example, would include the basis and supporting computations required for adjustments and write-offs.	—	—					
e. Instructions for determining an adequate cutoff and closing of accounts for each reporting period.)	—	—					
22. Are internal control manuals updated as necessary?	—	—					
23. Are manuals distributed to appropriate personnel?		—					
24. Are there written procedures to test and implement new systems and modifications to existing application systems?	—	—					
25. Are valuation reserves or other account balances based on estimates reviewed and approved?	—			—			
26. Are all journal entries reviewed, approved, and supported by adequate descriptions or documentation?	—	—					
27. Do controls exist that ensure that only authorized individuals can initiate entries?	—						

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
28. Do procedures exist to ensure the orderly and effective accumulation of financial data?	—	—			—		
29. Do procedures exist for the orderly processing of financial data received from departments and other accounting units?	—	—			—		
30. Do procedures exist to permit the recording and review of special entries generated in the combining process?	—	—			—		
31. Is appropriate insurance coverage maintained in amounts required by statutes or entity policy? (Such insurance may include loss of records coverage and fidelity bonding of employees in positions of trust.)							
32. Is the flow of expenditures or commitments controlled through the use of an allotment system?							
33. Are measures implemented to correct weaknesses?							
34. Are controls established to ensure that payroll costs charged to grants are in compliance with grant agreements?							
35. Do reasonable procedures and controls exist to provide assurances of compliance with recipient eligibility requirements established by grants?							
36. Do procedures exist to ensure that funds received are spent in accordance with legal requirements and spending restrictions?							
37. Have the significant account balances and transaction classes been identified such as:							
a. Cash?	—						
b. Investments?	—						
c. Revenues and Receivables?	—						
d. Capital Assets?	—						
e. Procurement and Payables?	—						
f. Employee Compensation?	—						
38. Are all receipts deposited on a timely basis (preferably daily)?		—					
39. Do controls exist over the collection, timely deposit, and recording of collections in the accounting records in each collection location?		—					
40. Are daily reported receipts compared on a test basis to bank statements to verify timeliness of deposits?	—						
41. Is a restrictive endorsement placed on each incoming check upon receipt?		—					
42. Are "not sufficient funds" checks delivered to someone independent of processing and recording of cash receipts?		—					
43. Do procedures exist for follow-up of "not sufficient funds" checks?		—					
44. Do controls exist to ensure that checks are returned promptly for deposit if checks received are forwarded to be used as posting media to taxpayers' or customers' accounts?		—					
45. Are receipts controlled by cash register, pre-numbered receipts, or other equivalent means if payments are made in person (over the counter)?		—					
46. Are receipts accounted for and balanced to collections on a daily basis?	—	—					
47. Are procedures provided for immediate notification to banks when warrant or check signers leave the unit or are otherwise no longer authorized to sign?	—	—					
48. Are invoices and supporting documents furnished to the signer prior to signing the warrant or check?	—	—		—			
49. Are reasonable limits set on amounts that can be paid by facsimile signatures?	—						

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
50. Are two signatures required on warrants or checks over a stated amount?	—						
51. Is the recording machine read by the signer or an appropriate designee to ascertain that all checks or warrants signed are properly accounted for by comparison to document control totals?	—	—					
52. Is the drawing of warrants or checks to cash or bearer prohibited?	—						
53. Are bank accounts properly authorized?		—					
54. Are depositories periodically reviewed and formally reauthorized?		—					
55. Are separate bank accounts maintained for each fund, or if not, is there adequate fund control over pooled cash?			—		—		
56. Do procedures exist to ensure that collections and disbursements are recorded accurately and promptly?		—		—	—		
57. Do procedures exist for authorizing and recording interbank and interfund transfers and for providing for proper accounting for those transactions?	—	—		—	—		
58. Do procedures exist for steps essential to an effective reconciliation, particularly—							
a. Comparison of warrants or checks in appropriate detail with disbursement records?		—		—			
b. Examination of signature and endorsements, at least on a test basis?	—		—				
c. Accounting for numerical sequence of warrants or checks used?		—		—			
d. Comparison of book balances used in reconciliations with general ledger accounts?	—	—		—	—		
e. Comparison of deposit amounts and dates with cash receipt entries?		—		—			
f. Footing of cash books?		—		—			
59. Are all reconciliations and investigations of unusual reconciling items reviewed and approved by an official who is not responsible for receipts and disbursements, including recording evidence of the review and approval by signing the reconciliation?	—	—		—			
60. Are checks outstanding for a considerable time periodically reviewed for propriety?	—						
61. If applicable, are procedures adequate to ensure that only investments that are permitted by law are acquired?	—			—	—		
62. Is the investment program integrated with the cash management program and expenditure requirements?	—	—		—			
63. Have authority and responsibility been established for investment opportunity evaluation and purchase?	—			—			
64. Are procedures formally established governing the level and nature of approvals required to purchase or sell an investment?	—			—			
65. Are competitive bids sought for certificate of deposit purchases?	—			—			
66. Are detailed accounting records maintained for investments?	—	—		—	—		
67. Do procedures exist to ensure that transactions arising from investments are properly processed, including income and amortization entries?	—	—		—	—		
68. Do controls exist to ensure that investment earnings are credited to the fund from which resources were provided for the investment?				—	—		

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
69. Do controls exist to ensure that transactions are recorded on a timely basis?		—		—	—		
70. Do procedures exist for reconciling the detailed accounting records with the general ledger control?	—			—	—		
71. Do controls exist to ensure that additions, deletions, transfers, and abatements are properly and timely reflected in property tax records?		—		—			
72. Do procedures exist to make property assessments in accordance with the law or legislative intent with prompt adjustment of records?		—	—	—			
73. Are filed returns cross-referenced against a database of previous taxpayers?		—					
74. Are records organized and integrated in such a fashion that probable taxpayers are identified as a result of reporting of other governmental activities such as licensing?		—					
75. If annual payments are involved, do procedures exist to ensure that previous years' records are properly updated for new registrants and withdrawals?	—	—					
76. Are updated records used as the basis for billing persons subject to payment?		—		—			
77. Are court and other records of payments due maintained and used as a basis for collections?		—		—			
78. Do procedures exist surrounding the control, issuance, and disposition of traffic violations to ensure that amounts due are assessed and collected?		—					
79. Are controls maintained that provide assurances that customer database and, where appropriate, usage records are accurately maintained to ensure that amounts due are billed?	—	—					
80. Do controls exist within the billing system to ensure that eligible property owners are billed?		—		—			
81. Do controls exist to ensure that tax assessments are being properly applied against tax rates and special charges are being considered in the preparation of billing amounts?			—	—			
82. Do controls exist to ensure that tax exemptions are within the law and properly approved?	—		—	—			
83. Are audits of returns filed to provide reasonable assurance that taxable income is properly reported?			—	—			
84. Do procedures exist providing for correlation of amounts collected with records of court proceedings?	—	—	—	—			
85. If billing is based on usage, are service readings performed in a timely fashion?	—	—	—				
86. Are assignments of meter readers periodically rotated?		—	—				
87. Do billing procedures exist providing for identification and investigation of unusual patterns of use?	—	—					
88. Are taxes and fees billed in a timely fashion?		—					
89. Do procedures exist designed for other revenue areas ensuring timely payment of amounts due?		—	—	—			
90. Are rates of taxes, fines, fees, and services periodically reviewed and approved by the legislative body?			—	—			
91. Are programs of tax exemption or relief periodically reviewed and approved by the legislative body?			—	—			
92. Are utility rate schedules authorized by the legislative body?			—	—			
93. Do procedures exist providing for timely notification of the accounting department at the time tax, service, or other billings or claims are prepared and rendered?		—		—			
94. Do numerical or batch-processing controls exist over tax, fee, service, or other billings?		—

95. Do controls exist over the billing of miscellaneous revenues (for example, sidewalk replacement and tree removal assessments)?	—	—	—	—			
96. Do procedures exist to prevent the interception or alteration by unauthorized persons of billings or statements after preparation but before they are mailed?		—		—			
97. Does an individual independent of receivables record keeping promptly investigate disputes with billing amounts that are reported by taxpayers or service recipients?	—		—	—			
98. Do controls exist providing reasonable assurances that restricted revenues are expended only for restricted purposes?			—	—	—		
99. Do procedures exist providing reasonable assurances that interest and penalties are properly charged on delinquent taxes, fees, or charges for service?		—	—	—			
100. Do procedures exist providing for the timely filing of liens on property for nonpayment in all cases permitted by law?			—				
101. Do controls exist surrounding the collection, timely deposit, and recording of collections in the accounting records at each collection location?		—					
102. Is the general accounting department notified of cash receipts from separate collection centers on a timely basis?		—					
103. If payments are made in person, are receipts for payment used and accounted for and balanced to collections?	—	—					
104. Are amounts collected on behalf of other governments segregated and remitted on a timely basis?			—	—	—		
105. Are delinquent accounts reviewed and considered for charge-off on a timely basis?			—	—	—		
106. Are write-offs or other reductions of receivables formally approved by senior officials not involved in the collection function?					—		
107. Do procedures exist providing for execution of all legal remedies to collect charged-off or uncollectible accounts, including tax sale of property, liens, and so forth?				—	—		
108. Do controls in the system exist that provide assurances that individual receivable records are posted only from authorized source documents?	—			—			
109. Are aggregate collections on accounts receivable reconciled against postings to individual receivable accounts?		—		—			
110. Are statements of account balance mailed on a timely basis, where appropriate (for example, in proprietary funds)?			—	—			
111. Are trial balances of individual receivable accounts prepared on a timely basis?				—			
112. Are trial balances reconciled with general ledger control accounts and are reconciling items investigated by someone other than accounts receivable clerks?		—		—			
113. Do procedures exist that provide for timely and direct notification of the accounting department of billings and collection activities?		—		—			
114. Is grant activity accounted for so that it can be separated from the accounting for locally funded activities?				—	—		
115. Is there a system for obtaining grantor approval before incurring expenditures in excess of budgeted amounts or for unbudgeted expenditures?			—				
116. Are grant revenues and disbursements processed under the same degree of controls applicable to the organization's other transactions (budget, procurement, etc.)?	—	—	—	—	—		
117. Are requirements included in subgrantee agreements that the subgrantee comply with the primary grant agreement conditions as well as the grantee's standards?			—				

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
118. Is an indirect cost allocation plan established?	—		—	—			
119. Is the plan approved by all grantor agencies?			—	—			
120. Is audit cognizance established for rates generated by the plan?				—			
121. Is the amount of funds received compared with the amount anticipated by a responsible official and are unusual variances investigated?		—		—			
122. Are those individuals authorized to initiate capital asset transactions identified and is there clear definition of the limits of their authority?	—						
123. Are guidelines established with respect to key considerations such as prices to be paid, acceptable vendors and terms, asset quality standards, and the provisions of grants or bonds that may finance the expenditures?	—						
124. Is a separate capital projects budget prepared?	—						
125. Is written executive or legislative approval required for all significant capital asset projects or acquisitions?	—						
126. Do controls exist for authorizing, approving, and documenting sales or other dispositions of capital assets?	—	—					
127. Do controls exist providing for obtaining grantor (federal/state) approval, if required, for the use of grant funds for capital asset acquisitions?	—			—			
128. Are grant-funded authorizations subjected to the same controls as internally funded acquisitions?	—	—					
129. Are supplemental authorizations required, including, if appropriate, those of the grantor agency, for expenditures in excess of originally approved amounts?	—	—					
130. Do controls exist to identify completed projects so that timely transfers to the appropriate accounts can be made?	—	—			—		
131. Is the accounting distribution reviewed to ensure proper allocation of charges to fixed asset and expenditure projects?				—	—		
132. If construction work is performed by contractors, do controls exist to provide for and maintain control over construction projects and progress billings?	—		—	—			
133. Do controls exist to—							
a. Distinguish between capital projects' fund expenditures and operating budget expenditures?			—	—			
b. Identify operating budget expenditures to be capitalized in the fixed asset fund?					—		
c. Distinguish between capital and operating leases?					—		
d. Govern depreciation methods and practices?				—			
134. If costs are expected to be charged against federal grants, are depreciation policies or methods of computing allowances in accord with the standards outlined in OMB circulars or grantor agency regulations?			—				
135. If not, is depreciation charged to grants adjusted accordingly?				—			
136. Are the accounting records adjusted promptly—both the asset and related allowance for depreciation—when items of plant and equipment are retired, sold, or transferred?	—		—	—	—		
137. Are purchases of goods and services initiated by properly authorized requisitions bearing the approval of officials designated to authorize requisitions?	—						
138. Are requisitions pre-numbered and are those numbers controlled?	—	—					
139. Is the appropriation to be charged indicated on the purchase requisition by the person requesting the purchase?	—				—

140. Before commitment, are unobligated funds remaining under the appropriation verified by the accounting or budget department as sufficient to meet the proposed expenditure?			—	—			
141. Are requests for special purpose (nonshelf items) materials or personal services accompanied by technical specifications?	—			—			
142. Are purchasing authorizations structured to give appropriate recognition to the nature and size of purchases and the experience of the purchasing personnel?	—	—					
143. Do approval procedures exist for purchase order and contract issuance?	—	—					
144. Does the accounting department submit approval regarding availability of funds before the issuance of a purchase order or expenditure commitment?	—	—	—				
145. Are competitive bidding procedures used?				—			
146. Do provisions in contracts for materials, services, or facilities acquired on other than a fixed price basis provide for an audit of contractors' costs, with payments subject to audit results?			—	—			
147. Do procedures exist for public advertisement of nonshelf item procurements in accordance with legal requirements?	—			—			
148. Is splitting orders prohibited to avoid higher levels of approval?	—			—			
149. Are price lists and other appropriate records of price quotations maintained by the purchasing department?				—			
150. Are procedures modified when funds are disbursed under grant or loan agreements and related regulations impose requirements that differ from the organization's normal policies?	—		—		—		
151. Are procedures instituted to identify, before order entry, costs and expenditures not allowable under grant (federal/state) programs?			—	—			
152. Is an adequate record of open purchase orders and agreements maintained?	—		—				
153. Are purchases made for the accommodation of employees prohibited or adequately controlled?	—			—			
154. If construction contracts are to be awarded, are bid and performance bonds considered?	—		—	—			
155. Does predetermining selection criteria exist for awarding personal service or construction contracts and is adequate documentation of the award process required?				—			
156. Are changes to contracts or purchase orders subjected to the same controls and approvals as the original agreement?			—	—			
157. Are receiving reports prepared for all purchased goods?	—						
158. Do controls exist for the filing of claims against carriers or vendors for shortages or damaged materials?	—		—	—			
159. Are steps taken to ensure that goods received are accurately counted and examined to see that they meet quality standards?	—			—			
160. Is a permanent record of material received by the receiving department maintained?	—	—		—			
161. Are receiving reports numerically accounted for or otherwise controlled to ensure that all receipts are reported to the accounting department?	—	—		—			
162. Are copies of receiving reports sent directly to purchasing, accounting, and, if appropriate, inventory record keeping?	—	—		—			
163. Do invoice processing controls provide for— *a.* Obtaining copies of purchase orders and receiving reports directly from issuing departments?	—	—					

	ASSERTIONS					Tests of Controls	Substantive Tests

b. Comparison of invoice quantities, prices, and terms with those indicated on the purchase order?		—		—			
c. Comparison of invoice quantities with those indicated on the receiving reports?		—		—			
d. Checking the accuracy of calculations?				—			
164. Are all invoices received from vendors in a central location, such as the accounting department?		—					
165. Do controls exist ensuring that the accounts payable system is properly accounting for unmatched receiving reports and invoices?	—	—	—	—			
166. Are requests for progress payments under long-term contracts related to contractors' efforts and are they formally approved?	—		—	—			
167. Do controls exist for processing invoices not involving materials or supplies (for example, lease or rental payments, utility bills)?	—	—					
168. Do controls exist ensuring accurate account distribution of all entries resulting from invoice processing?	—			—	—		
169. If applicable, is access to the EDP master vendor file limited to employees authorized to make changes?	—	—					
170. Does the accounting department maintain a current list of those authorized to approve expenditures?	—						
171. Do controls exist for submission and approval of reimbursement to employees for travel and other expenses?	—		—	—			
172. Is control established by the accounting department over invoices received before releasing them for departmental approval and other processing?	—	—		—			
173. Are payments made only on the basis of original invoices?	—			—			
174. Is responsibility fixed for seeing that all cash discounts are taken and, if applicable, that exemptions from sales, federal excise, and other taxes are claimed?				—			
175. Are differences in invoice and purchase order price, terms, shipping arrangements, and quantities referred to purchasing for review and approval?	—			—			
176. Does the accounting department record and follow up on partial deliveries?		—		—			
177. Are the accounting and purchasing departments promptly notified of returned purchases, and are such purchases correlated with vendor credit advices?	—			—			
178. Is the program and expenditure account to be charged reviewed for propriety and budget conformity?				—	—		
179. If applicable, do procedures exist to ensure adjustment of the reserve for encumbrances (obligations) when invoices are prepared for payment?	—			—	—		
180. Are invoices and supporting documents canceled by or in the presence of the signer at the time of signing?	—			—			
181. Are warrants or checks cross-referenced to vouchers?	—			—			
182. Do controls exist ensuring that warrants or checks that have been signed and issued are recorded promptly?	—	—		—	—		
183. Are encumbrance (obligation) entries recorded only on the basis of approved purchase orders?	—				—		
184. Do controls exist ensuring that accounts payable and encumbrances (obligations) are applied against the appropriate account?	—			—	—		
185. Do controls exist ensuring that department heads are notified of payments made against accounts payable and encumbrances (obligations)?	—			—	—

186. If liabilities and expenditures are recorded on an encumbrance or obligation basis, are there controls to ensure knowledge of outstanding commitments?	—	—	—		—		
187. Are trial balances of reserve for encumbrances (obligations) and accounts payable prepared on a regular basis?		—		—	—		
188. Are transactions between funds in all affected funds posted in the same accounting period and on a timely basis?				—	—		
189. Are grants disbursed only on the basis of approved applications?	—			—			
190. Are purchase orders and contracts issued under numerical or some other suitable control?							
191. If an invoice is received from a supplier not previously dealt with, are steps taken to ascertain that the supplier actually exists?							
192. Are all changes in employment (additions and terminations), salary and wage rates, and payroll deductions properly authorized, approved, and documented?	—	—		—			
193. Are notices of additions, separations, and changes in salaries, wages, and deductions promptly reported to the payroll-processing function?		—		—			
194. Are appropriate payroll records maintained for accumulated employee benefits (vacation, pension data, etc.)?		—		—			
195. Are terminating employees interviewed as a check on departure and as a final review of any termination settlement by the personnel department?	—	—		—			
196. Are wages at or above the federal minimum wage?				—			
197. Do records and controls exist for timekeeping and attendance?	—	—					
198. If time cards are used, are they punched only by the employees to whom they are issued?	—						
199. Do procedures exist for authorizing, approving, and recording vacations, holidays, and sick leave and is compensatory time controlled and approved?	—			—	—		
200. Do controls exist over payroll preparation?	—	—		—			
201. Are changes to the EDP master payroll file approved and documented?	—			—			
202. Is a separate, imprest-basis, payroll bank account maintained?	—			—			
203. Do adequate account coding procedures exist for classification of employee compensation and benefit costs so that such costs are recorded in the proper general ledger account?					—		
204. Are accrued liabilities for unpaid employee compensation and benefit costs properly recorded and disclosed?		—	—	—	—		
205. Are payroll advances to officials and employees prohibited or are they subjected to appropriate review?							
206. Is a log maintained that reconciles the counter on the check-signing machine with the number of checks issued in each payroll?							
207. Are employees required to provide identification before being given checks or pay envelopes?							
.180 Physical Controls							
1. Are there adequate facilities for custody of the general ledger and related records? (Examples of such facilities include fire-resistant locked cabinets, vaults, physical barriers, separate rooms, limited access to work areas, alarms, and other detection devices.)	—						
2. Do procedures exist to protect against a loss of important files, programs, or equipment?	—	—					

	ASSERTIONS					Tests of Controls	Substantive Tests

3. Do controls exist over use and retention of tape and disk files, including provisions for retention of adequate records to provide backup capabilities?	—	—					
4. Do controls exist that limit access to data processing equipment, tape, disks, system documentation, and application program documentation to authorized employees?	—	—					
5. Are equipment, programs, and data files covered by insurance?	—						
6. Do facilities exist for protecting undeposited cash receipts?	—	—					
7. Does control exist over warrant or check-signing machines as to signature plates and usage?	—	—					
8. Are signature plates maintained in the custody of the person whose facsimile signature is on the plate when not in use?	—						
9. Are signed warrants or checks delivered directly to the mailroom making them unaccessible to persons who requested, prepared, or recorded them?	—						
10. Are controls maintained over the supply of unused and voided warrants or checks?	—	—					
11. Do controls and physical safeguards exist surrounding working (petty cash) funds?	—						
12. Is adequate fidelity insurance maintained?	—	—	—				
13. Are bank statements and paid warrants or checks delivered in unopened envelopes directly to the employee preparing the reconciliation?	—	—			—		
14. Do adequate physical safeguards and custodial procedures exist over—							
a. Negotiable and nonnegotiable securities owned?	—		—				
b. Legal documents or agreements evidencing ownership or other rights?	—		—				
15. Are dual signatures or authorizations required to obtain release of securities from safekeeping or to obtain access to the government unit's safe deposit box?	—		—				
16. Are persons with access to securities authorized by the legislative body?	—	—	—				
17. Are all securities registered in the name of the government unit?	—		—				
18. Are securities periodically inspected or confirmed from safekeeping agents?	—		—	—			
19. Are individuals with access to securities bonded?			—				
20. Are tickets for fines, arrests, and so forth sequentially numbered and satisfactorily accounted for?		—					
21. Are project cost records established and maintained for capital expenditure and repair projects?	—	—		—			
22. Are detailed property records maintained for all significant self-constructed, donated, purchased, or leased assets?	—	—					
23. Is the accountability for each asset established?	—	—					
24. Do controls exist for periodic inventory of documents evidencing property rights (for example, deeds, leases, and the like)?	—	—		—			
25. Do physical safeguards over assets exist?	—	—					
26. Do controls exist ensuring that purchased materials and services for capital expenditure and repair projects are subjected to the same levels of controls as exist for all other procurements (for example, receiving, approval, checking)?	—	—					
27. Are differences between records and physical counts investigated and are the records adjusted to reflect shortages?	—			—

28. Do procedures exist ensuring that capital assets are adequately insured?	—			—			
29. Are lease transactions subjected to control procedures similar to those required for other capital expenditures?	—	—	—				
30. Is equipment properly identified by metal numbered tags or other means of positive identification?	—			—			
31. Are fully depreciated assets carried in the accounting records as a means of providing accounting control?	—	—					
32. Are an adequate number of price quotations obtained before placing orders not subject to competitive bidding?				—			
33. Do procedures exist for disbursement approval and warrant or check-signing?	—	—					
34. Do controls exist to notify banks when a new signer is authorized or a previous signer leaves the employ of the government?	—						
35. Is the signer furnished with invoices and supporting data and are they reviewed prior to signing the warrant or check?	—	—		—			
36. Are reasonable limits set on amounts that can be paid by facsimile signatures?	—						
37. Is there control over the signature plates and usage of the warrant or check-signing machines?	—						
38. Are signature plates maintained in the custody of the person whose facsimile signature is on the plate when not in use?	—						
39. Are plates only under the signer's control used and does that person or an appropriate designee record machine readings to ascertain that all checks or warrants signed are properly accounted for?	—			—			
40. Are signed warrants or checks delivered directly to the mail room, making them inaccessible to persons who requested, prepared, or recorded them?	—						
41. Are warrants or checks controlled and accounted for with safeguards over those unused and voided?	—	—					
42. Are funds disbursed to grantees only on an as-needed basis?	—			—			
43. Does the level of grant approval authority appear appropriate?	—	—					
44. Is access to the EDP master payroll file limited to employees who are authorized to make changes?	—			—			
45. Are signature plates and the use of the payroll check-signing machines kept under control of the official whose name appears on the signature plate or an employee to whom he has delegated that responsibility?	—						
46. Is the supply of unused payroll checks controlled?	—			—			
47. Are employees prohibited from accepting another employee's pay?	—						
48. Are unclaimed wages returned to a custodian independent of the payroll department?	—				—		
49. Do employees who distribute checks or pay envelopes make a report of unclaimed wages directly to the accounting department?	—				—		
50. Are payments of unclaimed wages made at a later date only upon presentation of appropriate evidence of employment and are they approved by an officer or employee who is not responsible for payroll preparation or time reporting?	—						
51. Is there general ledger control over all assets and transactions of all departments of the organization?	—	—		—			
.190 **Segregation of Duties**							
1. Are responsibilities for budget preparation, adoption, execution, and reporting segregated?	—	—			—		

	ASSERTIONS					Tests of Controls	Substantive Tests

2. Are the responsibilities for maintaining the general ledger segregated from those for maintaining subsidiary ledgers?	—	—					
3. Are the responsibilities for maintaining the general ledger and custody of assets segregated?	—						
4. Is access to the general ledger and related records restricted to those who are assigned general ledger responsibilities?	—						
5. Are the preparation and approval functions for journal entries segregated?	—	—		—			
6. Is the EDP department independent from the accounting and operating departments for which it processes data?	—						
7. Does appropriate segregation of duties exist within the data processing function for (*a*) systems development (design and programming), (*b*) technical support (maintenance of systems software), and (*c*) operations?	—	—					
8. In smaller and minicomputer installations with limited opportunities for segregation of duties, do procedures exist for user departments to—							
a. Utilize batch or other input controls?	—	—		—			
b. Control master file changes?							
c. Balance master files between processing cycles?							
9. Do the personnel policies of the EDP function include such procedures as reference checks, security statements, rotation of duties, and terminated employee security measures that enhance segregation of duties and otherwise improve controls?	—						
10. Is the final review and approval of financial reports segregated from the responsibility for preparation of the reports?	—	—					
11. Are responsibilities for collection and deposit preparation functions segregated from those for recording cash receipts and general ledger entries?		—					
12. Are responsibilities for cash receipts functions segregated from those for cash disbursements?		—					
13. Are responsibilities for disbursement preparation and disbursement approval functions segregated from those for recording or entering cash disbursements information on the general ledger?	—	—		—			
14. Are responsibilities for the disbursement approval function segregated from those for the disbursement, voucher preparation, and purchasing functions?	—			—			
15. Are responsibilities for entries in the cash receipt and disbursement records segregated from those for general ledger entries?	—	—					
16. Are responsibilities for preparing and approving bank account reconciliations segregated from those for other cash receipt or disbursement functions?	—	—			—		
17. If EDP is used, is the principle of segregation of duties within processing activities maintained?	—	—					
18. Are responsibilities for initiating, evaluating, and approving investment transactions segregated from those for detail accounting, general ledger, and other related functions?	—	—		—			
19. Are responsibilities for initiating investment transactions segregated from those for final approvals that commit government resources?	—			—			
20. Are responsibilities for monitoring investment market values and performance segregated from those for investment acquisition?	—			—			
21. Are responsibilities for maintaining detail investment accounting records segregated from those for general ledger entries?	—			—

IV. Information and Communication

.200 The information system relevant to financial reporting objectives, which includes the accounting system, consists of the methods and records established to record, process, summarize, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial reports. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting.

.210 The following questions have been included to assist the auditor in obtaining sufficient knowledge of (*a*) the information system relevant to financial reporting and (*b*) the means the entity uses to communicate financial reporting roles and responsibilities and significant matters relating to financial reporting.

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
.220 Financial Reporting, Including the Accounting System							
1. Is a budget calendar used for the orderly submission and approval of the budget?	—	—					
2. Are budgets prepared for all significant activities regardless of whether mandated by law?	—	—					
3. Is the budget prepared in sufficient detail providing a meaningful tool with which to monitor subsequent performance?	—	—			—		
4. Are interfund and interdepartmental transfers included in the budget?	—	—			—		
5. Is the type of budgeting performed compatible with the accounting system?	—	—			—		
6. Are budgets published if required by law?	—				—		
7. Are estimated revenues and appropriations recorded in the accounting records for later comparison to actual amounts realized or incurred?	—	—		—	—		
8. Is citizen input obtained through budget hearings?							
9. Is the budgeting system integrated with the planning process?							
10. Are actual results of operations against budget published if required by law?	—	—		—	—		
11. Are policies and procedures current and in writing?	—						
12. Are policies and procedures consistent with statutory authorities?	—	—	—				
13. Are all policies and procedures clearly stated and systematically communicated (manuals, handbooks, etc.)?	—	—					
14. Do the policies and procedures support internal control?	—	—					
15. Are all journal entries adequately explained and supported? (Explanation and support for an entry should be sufficient to enable the person responsible for its review and approval to reasonably perform this function.)	—	—					
16. Are all journal entries subject to controls over completeness of processing? (Examples of controls over completeness of processing include pre-numbering of journal vouchers and accounting for all numbers used, accumulation of control totals of dollar amounts debited and credited, and standard identification numbers for recurring entries.)	—	—					
17. Do all journal entries include adequate identification of the accounts in which they are to be recorded?	—	—		—	—		
18. Is a job accounting system (or console logs) used to ensure that scheduled programs are processed and proper procedures followed and that supervisory personnel know that only required programs have been processed?	—	—					

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
19. Are controls for closing the accounts for a reporting period sufficient to ensure that accounts are closed, adjusted, and reviewed on a timely basis?	—	—		—			
20. Do procedures exist to ensure that the financial reporting information system has included all transactions applicable to the reporting period?		—					
21. Do procedures exist to ensure that financial reports are supported by either underlying account records or other documentation?	—						
22. Do procedures exist providing reasonable assurances that all data required to be included in legal as well as public reports are properly disclosed?		—			—		
23. Do procedures exist to ensure that financial reports are prepared on a consistent basis?	—	—			—		
24. Are financial reports reviewed and approved at appropriate levels of management and, if appropriate, by the legislature before public release?	—				—		
25. Are there procedures to ensure that all requirements for filing of financial reports are met (for example, senior levels of government, bondholders, and the public)?	—	—		—			
.230 Individual Roles and Responsibilities Over Financial Reporting							
1. Is there a formal plan of organization for the unit of government under which reporting responsibilities are clearly defined and reasonably aligned?	—	—					
2. Are plans and budgets effectively communicated throughout the organization?	—	—			—		
3. Do all journal entries include approval in accordance with management's general or specific authorization?	—	—					
4. Are statistical or data reports that form the basis for revenue distribution reviewed by a responsible official before submission?	—			—			
5. Do reporting controls exist for in-progress and completed projects?					—		
6. Are reporting and compliance requirements defined (for example, regulations) and communicated to grantees?					—		
7. Are actual expenditures compared to budget timely with reasonable (monthly) frequency?		—		—	—		
8. Are reports discussed with departmental personnel and are there explanations for significant variations from budget?		—		—	—		
9. Are executives and legislative branches notified of expenditures in excess of appropriations or budgets?	—		—		—		
10. Are there clearly established levels of operational and financial accountability?	—	—					
11. Do procedures exist to ensure that only authorized persons can alter or establish a new accounting principle, policy, or procedure to be used by the entity?	—	—	—	—	—		
12. Does the principal accounting officer of the entity have adequate authority over accounting employees and principal accounting records locations?	—	—					
13. Are the principal accounting, treasury, and custody functions segregated?	—	—					
14. Are all journal entries reviewed and approved by designated individuals at appropriate levels in the entity? (The levels at which journal entries are reviewed and approved will usually vary depending on whether the entries are recurring, or non-recurring, routine or unusual, accumulations of routine transactions, or adjustments of balances requiring estimates and judgments.)	—	—		—

V. Monitoring

.240 Management monitors the controls it has established to consider whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. This process is accomplished through ongoing activities, separate evaluations, or by various combinations of the two.

.250 The following questions have been included to assist the auditor in obtaining sufficient knowledge of the major types of activities the entity uses to monitor internal control over financial reporting, including how those activities are used to initiate corrective actions.

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Completeness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
.260 Evaluations							
1. Are program evaluations/management reviews routinely performed?	—	—			—		
.270 Separate Activities							
1. Are hours worked, overtime hours, and other special benefits reviewed and approved by the employee's supervisor?	—	—		—			
2. Are time cards or other time reports reviewed for completeness and approved by the employee's supervisor?	—	—					
3. Is the time clock placed in a position where it can be observed by a supervisor?	—						
4. Are completed payroll registers reviewed and approved before disbursements are made?	—			—			
5. Are documents supporting employee benefit payments (such as accumulated vacation or sick leave) reviewed before disbursements are made?	—	—		—			
6. Are comparisons (reconciliations) of gross pay of current and prior period payrolls reviewed for reasonableness by a knowledgeable person not otherwise involved in payroll processing?	—	—		—			
7. Is the payroll (including an examination of authorization of changes on reconciliations) reviewed by an employee not involved in its preparation?	—	—		—			
8. Is the distribution of dollars and hours of gross pay balanced with the payroll registers, and reviewed by someone independent but knowledgeable in this area?				—	—		
9. Is a comparison to amounts appropriated and budgeted included in the review?				—	—		
10. Is the payroll bank account reconciled on a regular basis?	—			—			
11. Are payroll check endorsements compared, on a test basis, with signatures on file by someone independent of the payroll department?	—						
12. Is someone independent of the payroll department comparing payments made in cash, which require signed receipts, with signatures on file on a test basis?	—			—			
13. Are W-2 forms compared to payroll records and mailed by employees not otherwise involved in the payroll process?		—		—			
14. Do procedures exist for investigating returned W-2s?	—			—			
15. Are payroll checks periodically distributed by the internal auditors to ascertain that employees exist for all checks prepared?	—						
16. Are the adequacy and effectiveness of controls relevant to the entity's transaction classes and account balances periodically evaluated?	—	—			—

	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
17. Are EDP department employees supervised for all shifts?	—	—					
18. Is the principal accounting officer over accounting records and accounting employees supervised at all locations?	—	—					
19. Are investment policy guidelines formally established and periodically reviewed?	—				—		
20. Is the performance of the investment portfolio periodically evaluated by persons independent of the investment portfolio management activities?	—	—		—			
21. Is the nature of investments included in general ledger balances periodically reviewed?	—			—	—		
22. Are periodic comparisons made between income received and the amount specified by the terms of the security or publicly available investment information?	—			—	—		
23. Are returns reviewed for mathematical accuracy?				—			
24. Are current year's taxpayers' returns correlated with prior year's returns and are differences reviewed and accounted for?		—		—			
25. Are claims for refunds reviewed and approved separately?	—			—	—		
26. Are current year receipts compared to those for prior years and are explanations of variations reviewed by senior officials?		—		—			
27. Are taxes and fees collected by another unit of government monitored to assure timely receipt and are amounts received subjected to reviews for reasonableness?		—	—	—			
28. Are aged accounts receivable balances periodically reviewed by supervisory personnel?				—	—		
29. Is responsibility for monitoring grant activities properly fixed?			—				
30. Is grant activity monitored from a centralized location?	—		—				
31. Do procedures exist to monitor compliance with—							
a. Financial report requirements?			—				
b. Use of funds and other conditions in accordance with grant terms?	—		—	—			
c. Timely billing of amounts due under grants?		—	—				
32. Is a qualified employee or independent firm engaged to inspect and monitor technically complex projects?	—	—		—			
33. Does the unit of government have the right to audit contractors' records?	—	—	—	—			
34. Is the right to audit contractor records during project performance exercised?	—		—				
35. Do audits of contractors cover compliance with EEO, Davis Bacon, and other regulations and contract terms, in addition to costs?	—	—		—	—		
36. Do controls exist for monitoring the appropriate disposition of property acquired with grant funds?	—		—				
37. Are detailed property records periodically reconciled with the general ledger control accounts?	—	—		—			
38. Are purchase prices periodically reviewed by a responsible employee independent of the purchasing department?				—			
39. Are recurring purchases and documentation of the justification for informal rather than competitive bids periodically reviewed?	—			—			
40. Is a record of suppliers who have not met quality or other performance standards by the purchasing department maintained?	—	—					
41. Is a government technical representative assigned to monitor and evaluate contractor performance and approve receipt of							

	ASSERTIONS					Tests of Controls	Substantive Tests
	Existence/ Occurrence	*Complete-ness*	*Rights/ Obligations*	*Valuation/ Allocation*	*Presentation/ Disclosure*	*Program or W/P Reference*	*Program Reference*
services with respect to procurements of special purpose materials, services, or facilities?	—	—		—			
42. Are statements from vendors compared on a regular basis with recorded amounts payable?	—			—			
43. If an encumbrance (obligation) system is used, are outstanding purchase orders reconciled for encumbrances (obligations) on a monthly basis?	—			—	—		
44. Is the distribution of charges in the accounting department reviewed by a person competent to pass on the propriety of the distribution?				—	—		
45. Does a senior employee review and approve invoices by checking the clerical accuracy and examining the supporting documentation?	—	—					
46. Are trial balance footings checked and traced to the individual items as well as comparing the total to the general ledger balance by an employee other than the accounts payable clerk?		—		—	—		
47. Do procedures exist to monitor grantee compliance with grant terms?			—		—		
48. Are financial operations of grantees subjected to periodic and timely audit?	—	—	—	—			
49. Are recipients monitored sufficiently and on a timely basis to permit curtailment of any abuse before complete funds disbursement?	—	—	—	—			
50. Is failure by grantees to meet financial reporting requirements investigated on a timely basis?			—	—	—		
51. Are grantees required to evidence correction of previously detected deficiencies before approval of an extension or renewal of a grant?	—		—		—		
52. Do entitlement controls exist ensuring that statistics or data used to allocate funds are accurately accumulated (for example, census bureau forms)?				—	—		
53. Are statements of recipient compliance with entitlement conditions (for example, statement of assurances) required to be filed and does a responsible official review them?			—		—		
54. Are audited financial statements or other compliance requirements of entitlement recipients reviewed on a timely basis and are unusual items investigated?			—	—	—		
55. Does management periodically review internal control to ensure that it is being enforced?	—	—					
56. Are detailed property records periodically compared with existing assets?	—	—		—			
57. Are audits routinely performed?	—	—			—		
58. Are procedures in place and adhered to which require prompt implementation of resolved audit findings or program/management review results?	—	—			—

VI. Administrative Controls

Note: The Single Audit Act Amendments of 1996, which supersede the Single Audit Act of 1984, were enacted July 5, 1996 and are effective for fiscal years beginning after June 30, 1996. At the current time, the revised OMB Circular A-133 and Compliance Supplement have not been issued. The compliance requirements identified below follow the Single Audit Act of 1984.

.280 When conducting audits in accordance with the Single Audit Act of 1984, the auditor needs to identify the administrative controls that need to be in place in order to properly administer its federal assistance programs.

.290 These controls are normally established by an entity based on the major requirements with which the entity must comply. AAM section 12,010.300 and .310 are common control procedures which need to be documented and tested to support the auditor's report on internal administrative controls.

.300 **A. General Compliance Requirements**

1. Political Activity (Compliance Supplement)

a. Control Environment

(1) Ordinance exists prohibiting partisan political activity.

(2) Posters exist stating the prohibition against partisan political activity.

b. Risk Assessment

(1) Management understands and has identified key compliance objectives and risks.

(2) New and other employees who require close supervision are identified and monitored.

c. Control Activities

(1) Employee policy statement, handbook, or policy manual prohibiting partisan political activity are written and communicated.

(2) Expenditures are reviewed by a person who is knowledgeable of the restriction.

d. Information and Communication

(1) The accounting and information system provide accurate information.

(2) Employees' duties and control responsibilities are effectively communicated.

(3) Channels of communication for people to report suspected improprieties exist.

e. Monitoring

(1) Ongoing monitoring exists through staff meeting feedback, supervisory review, and internal audits.

2. Davis-Bacon Act (Compliance Supplement)

a. Control Environment

(1) Management understands its responsibility for compliance and communicates the requirements to staff, contractors, and subcontractors.

b. Risk Assessment

(1) Contractors and subcontractors most at risk of not paying the prevailing wage rates are identified.

(2) Management has identified how compliance will be monitored.

c. Control Activities

(1) Provisions in contracts expressly require compliance with Davis-Bacon Act.

(2) Responsibility for monitoring contractors for compliance with contract terms, including the Davis-Bacon provision has been assigned.

d. Information and Communication

(1) Prevailing wage rates and the provisions of the Davis-Bacon Act are posted at job sites.

(2) Reports received include sufficient information to determine if requirements are being met.

e. Monitoring

(1) Prevailing wage rates published in the Federal Register or obtained from the Department of Labor are compared with rates paid by contractors or subcontractors based on payroll records submitted to the grantee.

(2) Contractors' or subcontractors' laborers are interviewed to verify their wage rates and to compare them to the prevailing wage rate.

3. Civil Rights (Compliance Supplement)

a. Control Environment

(1) A civil rights policy exists prohibiting discrimination.

(2) An affirmative action policy exists that encourages the use of small and minority owned firms and employment of individuals from minority groups.

b. Risk Assessment

(1) Program managers and staff understand and have identified key compliance objectives.

(2) Self-evaluation procedures to ensure compliance are in place.

c. Control Activities

(1) Policies and procedures are clearly written and communicated.

(2) A designated compliance officer receives and processes civil rights inquiries and complaints.

d. Information and Communication

(1) Data and periodic reports reflect status in achieving established goals.

(2) Policies and grievance procedures are distributed via the employee handbook.

(3) Open meetings are held to ensure the public is knowledgeable of the grantee's management philosophy and major policies.

e. Monitoring

(1) The practice of periodically requesting from the Division of Labor Standards the existence of any discriminatory practices by the grantee.

4. Cash Management (Compliance Supplement)

a. Control Environment

(1) Responsibility for requesting grant drawdowns is assigned to a knowledgeable person.

(2) Adequate and realistic cash forecasting methods are used.

b. Risk Assessment

(1) Programs that receive cash advances are identified.

(2) Management is aware of cash management requirements.

c. Control Activities

(1) Written policies and procedures exists relative to requesting and approving cash advances and other cash management activities.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

(2) Request for reimbursement is deferred until after the related expenditure is incurred.

(3) Grant drawdowns requests are reviewed and approved by a person knowledgeable of the cash management restrictions.

(4) Pertinent requirements are included in investment policies and requests for banking services.

(5) Depository agreements stipulate FDIC's Bank Insurance Fund (BIF) or Savings Association Insurance Fund (SAIF) and segregation of account requirements.

d. Information and Communication

(1) A cash log exists showing expenditures and cash balances for federal financial programs.

(2) Information is reported between a pass-through entity and subrecipients regarding cash needs.

(3) Cash reports are prepared and variances between actual and expected investigated.

e. Monitoring

(1) Subrecipient requests for federal funds are evaluated.

(2) Periodic independent evaluations and reviews of cash management activities are performed.

5. Relocation Assistance and Real Property Acquisition (Compliance Supplement)

a. Control Environment

(1) Management is committed to ensuring compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

(2) A policy statement that is compatible with federal regulations regarding relocation assistance and real property acquisition exists.

(3) Responsibility for monitoring compliance with federal requirements is assigned to a knowledgeable person.

b. Risk Assessment

(1) Management has identified the risk that relocation will not be conducted in accordance with federal requirements.

c. Control Activities

(1) Individuals who have responsibility for administering programs involving relocation or real property acquisition are properly trained and have access to copies of regulations and other procedures.

(2) Persons responsible for administering programs involving relocation or real property acquisition use checklists or other control procedures.

(3) Pamphlets are sent to persons being relocated to inform them of their rights and the prescribed procedures.

(4) Written acknowledgment is requested from persons being relocated that the required procedures and rights were made available to them.

d. Information and Communication

(1) Management has established a system to adequately document and communicate relocation assistance and real property acquisition.

e. Monitoring

(1) A review function exists over relocation assistance and real property acquisition.

6. **Federal Financial Reports (Compliance Supplement)**

   a. Control Environment

   (1) Responsibility for preparing reports (perhaps included as a duty in the employee's job description) is assigned.

   b. Risk Management

   (1) Management has identified risks of incorrect reporting.

   c. Control Activities

   (1) A tickler file exists to ensure reports (including grant closeout reports) are filed timely (preferably centralized).

   (2) Review and written approval of federal financial reports for accuracy and timeliness of submission is required.

   d. Information and Communication

   (1) An effective system exists for preparing and reporting financial and performance information.

   e. Monitoring

   (1) Periodic documented reconciliations of federal reports to the general ledger are performed.

7. **Allowable Costs/Cost Principles (OMB Circular A-87)**

   a. Control Environment

   (1) Written policies exist regarding expenditures eligible for federal reimbursements.

   (2) Responsibility for reviewing indirect cost allocations is assigned to a person knowledgeable of the requirements.

   b. Risk Assessment

   (1) A process exists for identifying and assessing risks of charging federal awards with unallowable costs and those not in accordance with the applicable cost principles.

   c. Control Activities

   (1) A person knowledgeable of the provisions of OMB Circular A-87 is involved in the grant application/budget process.

   (2) A checklist is used denoting allowable, unallowable and possibly unallowable costs by persons authorizing and/or reviewing expenditures charged to grant programs.

   (3) Person knowledgeable of indirect cost principles are utilized when preparing the plan.

   d. Information and Communication

   (1) Cost information, requirements, and training are provided to individuals preparing and reviewing cost data.

   (2) Communication lines exist between management and staff regarding costs.

   e. Monitoring

   (1) Periodic documented reconciliation of costs accumulated in the indirect cost pool to the general ledger is performed.

   (2) Independent periodic reviews are performed of the indirect cost allocation plan and other cost data.

8. **Drug-Free Workplace Act**

   a. Control Environment

   (1) A drug-free workplace policy exists.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

(2) A compliance officer has been designated.

(3) Responsibility for reporting violations to the federal government has been assigned.

b. Risk Assessment

(1) Management and staff have identified key compliance objectives and risks of noncompliance.

c. Control Activities

(1) A tickler file exists to ensure grant certifications are filed timely for each grant.

(2) Checklist or sign-off sheet exists to ensure policy is distributed to employees paid with federal funds.

d. Information and Communication

(1) Information is accumulated and communicated to those who need it.

(2) Internal and external communication channels have been established.

e. Monitoring

(1) Ongoing monitoring built in through staff meeting feedback, reviews, and internal audits.

9. Administrative Requirements (Common Rule)

a. Interest earned on advances:

(1) Control Environment

(*a*) Responsibility is assigned to remit such interest to the appropriate federal agency at least quarterly.

(2) Risk Assessment

(*a*) Management understands the objective and identified the risks of noncompliance.

(3) Control Activities

(*a*) Written policies and procedures exists relative to interest earned on advances.

(4) Information and Communication

(*a*) Cash log exists showing interest earned on advances.

(5) Monitoring

(*a*) Periodic reviews are conducted to ensure proper treatment of interest earned on advances.

b. Period of availability of funds and revolving fund repayments:

(1) Control Environment

(*a*) Management understands and is committed to complying with period of availability requirements.

(*b*) Responsibility is assigned to liquidate all obligations incurred under the award no later than 90 days after the end of the funding period.

(*c*) Policy exists that ensures revolving fund repayments are made on a timely basis.

(2) Risk Assessment

(*a*) Requirements and risks of noncompliance are identified.

(3) Control Activities

(*a*) Tickler file exists to ensure liquidation of obligations and submission of annual Financial Status Report (SF269).

(*b*) Procedures exist to ensure that repayments of revolving funds are made on a timely basis.

(4) Information and Communication

(*a*) Reports of unliquidated balances are prepared and distributed to appropriate individuals.

(*b*) Reports of period of availability and deadlines are prepared and distributed to appropriate individuals.

(*c*) Revolving fund records exist that include information necessary to track repayments.

(5) Monitoring

(*a*) Expenditures are reviewed to ensure charges result from obligations of the funding period unless carryover of unobligated balances is permitted.

c. Program income:

(1) Control Environment

(*a*) Responsibility is assigned for ensuring that current program income is deducted from current allowable costs in determining federal drawdowns or reimbursements.

(*b*) When authorized by federal agencies, responsibility is assigned for ensuring that program income is used only in authorized manner. For example:

- Program income is added to the total funds committed to the project; or
- Program income is used to meet cost sharing or matching requirements.

(2) Risk Assessment

(*a*) The risk of unrecorded or miscoded program income has been identified.

(3) Control Activities

(*a*) A grant "Master Control" sheet has been established that indicates how program income is to be used on each grant.

(4) Information and Communication

(*a*) Records exist to track program income (and costs to generate program income if federal agency authorizes netting of income and costs).

(5) Monitoring

(*a*) Variances between expected and actual income are analyzed and investigated.

d. Real property, equipment, and supplies:

(1) Control Environment

(*a*) Management is committed to providing proper stewardship for property acquired with federal awards.

(*b*) Responsibility is assigned for obtaining disposition instructions for real property and disposing of real property no longer needed for the originally authorized purpose through:

- Retention of title.
- Sale of property.
- Transfer of title.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

(c) Policy and procedures exist regarding unused and unneeded supplies and the requirement to compensate the awarding agency for its share.

(d) Manuals include documentation relating to frequency of conducting inventory (every two years), transfer, property utilization, property disposition, and accounting.

(2) Risk Assessment

(a) Risk of misappropriation or improper disposition of property acquired with federal awards have been identified.

(3) Control Activities

(a) Property, equipment, and supplies inventory records exist of acquisitions and dispositions, including sources of financing, percentage of federal ownership, cost, and other pertinent information.

(4) Information and Communication

(a) Accounting system provides for identification of property acquired with federal and non-federal funds.

(b) A channel of communication is established for reporting suspected improprieties in the use or disposition of property, equipment, and supplies.

(5) Monitoring

(a) Periodic reviews are made to ensure that property, equipment, and supplies are used for the originally authorized purposes.

(b) Purchases, maintenance, safeguarding, transfers, and dispositions are reviewed by a person knowledgeable of the requirements.

e. Procurement, suspension, and debarment:

(1) Control Environment

(a) Codes of conduct and other policies exist relative to procurements, suspension, and debarment.

(b) Responsibility is assigned for ensuring that transactions and awards are not conducted with any debarred or suspended parties.

(c) Federal procurement standards are incorporated in the grantee's purchasing policy.

(2) Risk Assessment

(a) Management understands the requirements for procurement, suspension, and debarment and has identified where noncompliance could occur.

(3) Control Activities

(a) Segregation of duties exist between employees responsible for contracting, accounts payable, and cash disbursement.

(b) Procedures exist to verify that vendors and subawardees have not been suspended or debarred.

(c) Individuals who are knowledgeable of procurement requirements and restrictions are involved in the review and award of contracts and the review of purchase requisition and/or purchase orders.

(4) Information and Communication

(a) Employees' duties and responsibilities are established and communicated.

(*b*) "Lists of Parties Excluded from Federal Procurement or Nonprocurement Programs," issued by the General Services Administration (updated for current changes) are provided to staff.

(*c*) Changes of communications exist to report suspected improprieties.

(5) Monitoring

(*a*) Periodic reviews are conducted to determine whether policies and procedures are being followed.

f. Subgrants:

(1) Control Environment

(*a*) A provision for compliance with the Common Rule and other significant provisions are included in every subgrant.

(*b*) Policy exists to make subgrantees aware of the regulations imposed on them.

(2) Risk Assessment

(*a*) Risks of possible noncompliance have been identified.

(3) Control Activities

(*a*) Procedures exist to identify and follow up on noncompliance.

(4) Information and Communication

(*a*) Record keeping system is in place to provide information to and from subgrantees.

(*b*) Award documents used included applicable compliance requirements and an understanding and acceptance statement signed by the subgrantee.

(5) Monitoring

(*a*) Periodic reviews are conducted to determine compliance by the subgrantee.

.310 B. Example of Specific Requirements

Major Program—Specific Compliance Requirements
Community Development Block Grant

Besides documenting and testing the internal control over the general compliance requirements, the internal control over program-specific requirements need to be documented and tested. The controls and control procedures may vary significantly among governments so the individual circumstances in a particular government need to be examined. This section provides an example of the types of questions that may be asked to provide information about internal control over specific program requirements.

A. Types of services allowed or unallowed

1. Control Environment

a. What control procedure does the entity have in place to ensure that activities funded by the program are for allowable purposes and meet one of the national objectives?

b. What control procedure does the entity have in place to ensure that not more than 20 percent of the total grant is expended for planning and administration?

2. Risk Assessment

a. Do controls exist to identify where unallowable activities could be charged to a federal program and not be detected?

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

3. Control Activities

   a. Do adequate segregation of duties exist between approving and recording transactions?

4. Information and Communication

   a. Are there accounting and reporting information systems in place to provide data for management's review on a timely basis?

   b. Are training programs held for employees?

   c. Are there open communication channels to report noncompliance?

5. Monitoring

   a. Are reviews and audits conducted periodically to determine compliance?

B. Eligibility

The auditor is not expected to make tests for recipient eligibility.

C. Matching, level of effort, and/or earmarking requirements

There are no matching, level of effort, or earmarking requirements.

D. Reporting requirements

1. Control Environment

   a. Do the persons preparing, reviewing, and approving the reports possess the required knowledge?

   b. Does management promote fair and accurate reporting?

2. Risk Assessment

   a. Do procedures exist to identify the risks of noncompliance with reporting requirements?

3. Control Activities

   a. What control procedure does the entity use to ensure that the grantee performance report is fully completed and submitted within two months after the end of each program year?

   b. What control procedures are in place to ensure other federal reports required by the program are identified, fully completed, and submitted on a timely basis?

4. Information and Communication

   a. Does an accounting or information system exist that provides for the reliable processing of financial and performance information for federal awards?

5. Monitoring

   a. Are internal reviews performed of performance information?

E. Special tests and provisions

1. Control Environment

   a. Does management respect and adhere to compliance requirements?

   b. Are responsibilities assigned?

2. Risk Assessment

   a. Do program managers and staff understand requirements and identified risks of noncompliance?

3. Control Activities

   a. What accounting process is used beginning with initiating a transaction to its inclusion in the financial statements, including how the computer is used to process data?

   (This understanding involves knowledge of the ways in which transactions are valued, classified, recorded, and summarized in the journals and ledgers. After gaining an understanding of the direct flow of accounting information from its origin through the processing system to its compilation in the general ledger, an understanding of the processing steps, including how transactions are valued, classified, recorded and summarized, and control points at each processing step needs to be obtained. Also, describe the financial reporting process including the extent of client procedures to prepare significant accounting and disclosure estimates. Also, describe the way in which general ledger information is summarized to arrive at the amounts and disclosures reported in the financial statements.)

   b. What control procedures exist to ensure that program funds are not obligated or expended before the receipt of HUD's approval of a Request of Funds (RROF) and environmental certification?

   c. How does the entity ensure that all projects requiring an environmental review receive one?

   d. What procedures are employed to ensure that income earned under this program, if any, is properly accounted for and utilized?

4. Information and Communication

   a. Does the reporting system provide accurate and timely information?

   b. Do internal and external communication channels exist?

5. Monitoring

   a. Are periodic reviews and audits conducted?

AAM Section 12,100
Designing the Audit Program

.01 The objective of an audit is to express an opinion on whether financial statements present fairly in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with generally accepted auditing standards. The procedures that the auditor plans to use to gather evidence are outlined in an audit program.

.02 Since the audit program describes the evidence-gathering steps to be used in the audit, it should be carefully designed. In planning the audit, the auditor should consider the nature, timing, and extent of work to be performed and should prepare a written audit program (or set of programs) for every audit. Designing an audit program involves three major considerations:

a. Deciding *what* procedures to apply—the *nature* of audit tests

b. Deciding *when* to apply the procedures—the *timing* of audit tests

c. Deciding *which* items to apply the procedures to—the *extent* of audit tests

.03 Flowchart 1 presents an overview of the structure of the audit process. To design an audit program that is efficient and effective, the auditor should—

a. Identify the client's assertions regarding each material component of the financial statements.

b. Consider the risk of material misstatement.

c. Establish specific audit objectives relating to the assertions in the financial statements.

d. Determine the audit procedures to be performed to accomplish the audit objectives.

e. Determine when to perform the audit procedures.

f. Determine which of many items to apply audit procedures to.

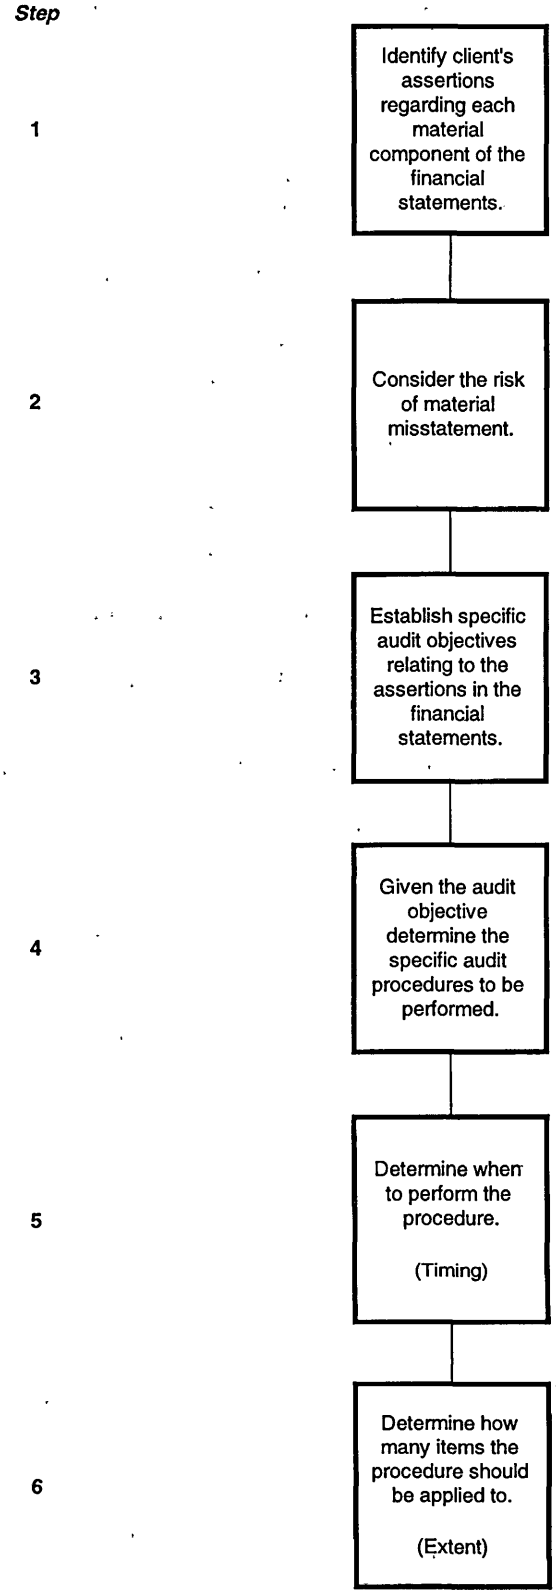
.04 The six steps illustrated in flowchart 1 result in a determination of the nature, timing, and extent of audit tests.

Financial Statement Assertions

.05 According to SAS No. 31, *Evidential Matter*, as amended by SAS No. 48 (AU section 326),* the independent auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter concerning the assertions in such financial statements. These assertions are embodied in the account balance, transaction class, and disclosure components of financial statements and are classified according to the following broad categories:

* In May 1995 the Auditing Standards Board issued a proposed amendment to SAS No. 31 (AU section 326), that would incorporate the concept of evidential matter in electronic form, including guidance on the potential audit impact of evidential matter in electronic form and a description of matters an auditor should consider in such circumstances. If approved, the final SAS would be effective for engagements beginning on or after January 1, 1997 with earlier application encouraged.

Flowchart 1
Audit Logic Process



Copyright © 1997, American Institute of Certified Public Accountants, Inc.

a. *Existence or Occurrence.* Reported assets and liabilities actually exist at the balance-sheet date, and transactions reported in the income statement actually occurred during the period covered.

b. *Completeness.* All transactions and accounts that should be included in the financial statements are included, or there are no undisclosed assets, liabilities, or transactions.

c. *Rights and Obligations.* The company owns and has clear title to assets and liabilities are obligations of the company.

d. *Valuation or Allocation.* The assets and liabilities are valued properly, and the revenues and expenses are measured properly.

e. *Presentation and Disclosure.* The assets, liabilities, revenues, and expenses are properly classified, described, and disclosed in the financial statements.

Developing Audit Objectives

.06 A misrepresentation of any of the five financial statement assertions could cause a material misstatement in the financial statements. The auditor should consider the risk of material misstatement for each assertion in the financial statements, and then obtain evidence to support the financial statement assertions to reduce the risk of material misstatement to an acceptably low level. To determine what type of evidence to obtain, the auditor develops specific audit objectives related to each assertion.

.07 In determining audit objectives, the auditor should evaluate each of the five assertions as they relate to the specific account balance or class of transactions being examined. For example, if the auditor is attempting to gather evidence on the assertion of *existence* of inventory, the auditor's objective would be to gather evidence that inventory included in the balance sheet physically existed at the date of the balance sheet.

Figure 1

Relationship of Assertions and Objectives for Inventory

Financial Statement Assertion	*Illustrative Audit Objectives*
Existence or occurrence	—Inventories included in the balance sheet physically exist.
Completeness	—Inventory quantities include all products, materials, and supplies on hand. —Inventory quantities include all products. materials, and supplies owned by the client that are in transit or stored at outside locations. —Inventory listings are accurately compiled and the totals are properly included in the inventory accounts.
Right and obligations	—The entity has legal title or similar rights of ownership to the inventory.
Valuation or allocation	—Inventories are properly stated at cost (except when market is lower).
Presentation and disclosure	—Inventories are properly classified in the balance sheet as current assets.

An example of the relationship between financial statement assertions and audit objectives is shown in Figure 1.

Audit Tests

.08 After the auditor has determined the audit objectives, the method of achieving the objectives should be selected. Although these methods are referred to by various names such as audit procedures, audit techniques, and audit tests, they represent the evidence-gathering methods auditors use. The basic requirement for determining audit procedures, according to SAS No. 31, paragraph 12 (AU section 326.13), is that:

> The procedures adopted should be adequate to achieve the audit objectives developed by the auditor, and the evidential matter obtained should be sufficient for the auditor to form conclusions concerning the validity of the individual assertions embodied in the components of financial statements.

.09 Some audit procedures can satisfy a combination of audit objectives for a given account balance or class of transactions. For example, the auditor's observation of a physical inventory count can provide evidence that inventories physically exist and that inventory quantities include all products, materials, and supplies on hand.

.10 Audit tests or procedures can be classified or categorized in a variety of ways. The most common classifications are by purpose of the test or by type of test.

Purpose of the Test

.11 According to SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78 (AU section 319), the purpose of performing audit tests are:

a. To evaluate the effectiveness of the design and operation of internal controls. These tests are referred to as tests of controls.

b. To detect material misstatements in financial statement assertions. These tests are referred to as substantive tests.

.12 Substantive tests are procedures applied to account balances or classes of transactions to determine if there are material misstatements in the financial statements. The substantive test that the auditor performs consists of tests of details of transactions and balances and analytical procedures. In assessing control risk, the auditor also may use tests of details of transactions as tests of controls. The objective of tests of details of transactions performed as substantive tests is to detect material misstatements in the financial statements. The objective of tests of details of transactions as tests of controls is to evaluate whether controls have been placed in operation. Although these objectives are different, both may be accomplished concurrently through performance of a test of details on the same transaction.

.13 If the control risk is assessed at less than the maximum level, the auditor should obtain sufficient evidential matter to support that assessed level. The evidential matter that is sufficient to support a specific assessed level of control risk is a matter of auditor judgment. The type of evidential matter obtained all bear on the degree of assurance provided. Since the auditor's substantive testing is affected by the quality of the controls, the auditor is concerned with whether the controls established are designed and operating effectively. The role of tests of controls is to justify this assertion.

.14 The nature, timing, and extent of substantive tests are generally based on the assessment of inherent and control risk made during the planning phase of the engagement. For example, the higher the assessment of control risk, the more comprehensive the substantive tests should be. If analytical procedures performed during the planning phase of the engagement suggest that some account balances are unexpectedly high or low, the auditor may determine that those balances warrant more testing. Tests' effectiveness can be modified by changing their nature (for example, tests of balances versus analytical procedures), timing (testing as of the balance-sheet date versus an interim date), or extent (testing 100 percent versus sampling). Similarly, the

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

auditor may be able to change the same factors to make audits more efficient. While the main objective is to perform an effective audit, if alternative tests are equally effective, the auditor should choose the most efficient one.

.15 Planning occurs throughout the engagement and as a result the auditor might have to reassess risk as the engagement unfolds. For example, even if tests of controls indicated that an area had low risk and the auditor planned substantive tests accordingly, information might come to the auditor's attention during the audit that requires reassessment of the risk. Such information might include, for example, unexpected deviations from control procedures, misstatements that the internal controls should have caught, or new information about transactions or balances.

.16 The most effective and efficient audit strategy for a small business engagement generally is to assess control risk at the maximum level (the greatest probability that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by an entity's internal control). In this case, the auditor will use the knowledge obtained from the understanding of internal control and the assessed level of control risk in designing substantive tests for financial statement assertions.

Type of Test

.17 Auditors perform four types of tests:

a. Analytical procedures

b. Inquiry and observation

c. Tests of transactions

d. Tests of balances

The relationship of audit tests by purpose to audit tests by type is shown in figure 2.

Analytical Procedures

.18 Analytical procedures are tests applied to the *total* recorded amounts and are based on the existence of plausible and consistent relationships among financial statement elements or between financial and nonfinancial amounts. Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures.

b. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions.

c. As an overall review of the financial information in the final review stage of the audit.

.19 Analytical procedures can be effective:

- For certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts).
- When the relationships between amounts are very predictable.
- When the data used to develop expectations based on the relationship are reliable.
- When relatively precise expectations can be developed.

.20 Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they should be used whenever practical.

.21 SAS No. 56, *Analytical Procedures* (AU section 329), describes analytical procedures as follows:

Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

a. Financial information for comparable prior period(s) giving consideration to known changes.

b. Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data.

c. Relationships among elements of financial information within the period, such as interest income in relation to the average loan balance.

d. Information regarding the industry in which the client operates—for example, cost of funds information.

e. Relationships of the financial information with relevant nonfinancial information.

.22 Whenever analytical procedures are applied as substantive tests, the auditor must apply the following procedures:

a. Consider whether the relationship is plausible and predictable.

b. Consider whether the data used for the comparison is reliable.

c. Consider whether the account balance tested is consistent with the auditor's expectations. If it is not consistent, obtain the client's explanation for the variance and get evidence to corroborate the client's explanation.

.23 SAS No. 56 (AU section 329) also requires that analytical procedures be performed at the planning and final review stages of the audit.

Inquiry and Observation

.24 Testing of control activities that leave no audit trail of documentary evidence is usually done by inquiry and observation. Auditors make inquiries of different individuals and conduct observation tests to determine who performs a particular activity or how or when the activity is done. For example, the auditor may ask different individuals about who posts to the receivables ledger, the auditor may observe who prepares the bank reconciliation, or the auditor may observe when cash is deposited in the bank.

.25 Inquiry and observation can also be used as substantive tests. For example, an audit procedure such as an observation of a *physical asset* to determine that it exists is a substantive test relating to the existence assertion. Likewise, inquiries regarding subsequent events would be a substantive test because they provide evidence regarding the adequacy of disclosures in the financial statements.

Matrix of Audit Tests by Purpose and Type *Figure 2*

		Purpose of Test	
		Substantive Test	Test of Controls
Type of Test	Analytical Procedures	Yes Example A	No
	Inquiry and Observation	Yes Example H	Yes Examples B, C
	Tests of Transactions	Yes Example D	Yes Examples E, F
	Tests of Balances	Yes Examples G, H	No

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Examples:

A—Comparison of this year's expenses with last year's expenses

B—Observation by auditor that cash is deposited daily by a specific clerk

C—Inquiry by auditor about who deposits cash and how often

D—Examination of invoices to support additions (specific transactions) to fixed assets account during year

E—Examine sales invoices to see if initials of credit manager are there to indicate a credit file and credit approval (Inspection Test)

F—Vouch from sales invoices to credit files to see if customer has a credit file and has been approved for credit (Reperformance Test)

G—Confirmation of year-end balances in accounts receivable

H—Observation of the existence of a building

Tests of Transactions

.26 Tests of transactions consist of the examination of the documents and accounting records involved in the processing of specific transactions. Such procedures can accomplish both testing of controls and substantive testing and are sometimes used concurrently.

.27 Tests of controls are accomplished when the auditor examines transaction documentation to determine if control activities have been applied as prescribed. Tests of transactions as tests of controls can be classified as either inspection tests or reperformance tests. If the auditor examines documentation, the tests of controls are classified as an inspection test. Alternatively, if the auditor repeats a control activity performed by the client, the tests of controls are classified as reperformance tests. For example, a control activity may require employees to match vendors' invoices with purchase orders and receiving reports and then initial the invoices to indicate that the procedure was performed. If the auditor tests the control by examining invoices for initials, the test is an inspection test. If the auditor tests the control by comparing vendors' invoices with purchase orders and receiving reports, the test is a reperformance test. Regardless of whether the auditor tests by inspection or reperformance, the test of control is a test of transactions.

.28 The substantive objective of tests of transactions is accomplished when the auditor examines transaction documentation to determine if dollar errors exist in a balance. For example, if the auditor examines documentation supporting individual charges (debits) to an equipment account to determine that the account balance is fairly stated, the test is classified as a substantive test of transactions.

Tests of Balances

.29 Tests of balances are procedures applied to the *individual items* that compose an account balance or class of transactions. The tests involve confirmation, inspection, or observation procedures to provide evidence about the recorded amount. Tests of balances are substantive tests designed to identify misstatements by a direct test of the ending balance rather than by testing the transactions that make up that balance.

.30 Substantive tests of transactions and tests of balances are interrelated in that each class of transactions affects a related account balance. Since financial statement amounts are the accumulation of transactions, an auditor may test the transactions that enter the account (that is, the debits and credits), the account balance itself (that is, the ending balance), or both.

Linking Audit Procedures to Objectives

.31 To design an audit program, the audit should select audit procedures that achieve specific audit objectives developed from the five broad assertions for each material account balance in the financial statements.

.32 In selecting audit procedures to achieve the audit objectives developed, an auditor considers the following, according to SAS No. 31, as amended:

a. The risk of material misstatement of the financial statements including the assessed levels of control risk.

b. The expected efficiency and effectiveness of possible audit procedures.

c. The nature and materiality of the items being tested.

d. The kinds and competence of available evidential matter.

e. The nature of the audit objective to be achieved.

The Completeness Assertion

.33 SAS No. 31, paragraph 5, as amended (AU section 326.05), discusses the completeness assertion:

> Assertions about completeness deal with whether all transactions and accounts that should be presented in the financial statements are so included. For example, management asserts that all purchases of goods and services are recorded and are included in the financial statements. Similarly, management asserts that notes payable in the balance sheet include all such obligations of the entity.

.34 Substantive tests that provide assurance regarding the completeness assertion are those that provide evidence about whether all transactions have been captured by the client's financial reporting information system and are included in the financial statements.

.35 Gathering evidence about whether all transactions have been recorded is one of the most difficult audit objectives to achieve. Evidence of completeness can be even more difficult to obtain when a client does not have good internal control or has only an informal record-keeping system. Because these two characteristics often apply to small business, satisfying the completeness objective can be difficult for the auditor in a small business engagement.

.36 Completeness relates to whether all items have been included in the financial statements. The completeness assertion is violated if a transaction or account is omitted from the financial statements. If a transaction is merely recorded in the wrong account, there is no violation of the completeness assertion since the transaction is still recorded in the financial statements. In such a situation, the accounts are not incorrect because of a completeness error; rather, they are incorrect because of a classification error. A classification error is a violation of the presentation and disclosure assertion.

.37 For many accounts, the completeness assertion is the most difficult to test. The difficulty arises because the auditor must gather evidence about potential unrecorded items. Sources of audit evidence regarding unrecorded items often are not readily available.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Lack of Evidence

.38 To give an unqualified opinion, the auditor must gather sufficient, competent evidential matter to reduce the level of audit risk to an appropriately low level. SAS No. 31, paragraph 23, as amended (AU section 326.23), provides the following guidance when the auditor is unable to gather sufficient evidence to be satisfied regarding the completeness assertion:

> To the extent the auditor remains in substantial doubt about an assertion of material significance, he must refrain from forming an opinion until he has obtained sufficient competent evidential matter to remove such substantial doubt, or he must express a qualified opinion or a disclaimer of opinion.

.39 SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities*, paragraph 8 (AU section 316.08), states:

> The auditor should exercise (*a*) due care in planning, performing and evaluating the results of audit procedures, and (*b*) the proper degree of professional skepticism to achieve reasonable assurance that material errors or irregularities will be detected. Since the auditor's opinion on the financial statements is based on the concept of reasonable assurance, the auditor is not an insurer and his report does not constitute a guarantee.

.40 SAS No. 31, as amended, requires the auditor to obtain evidence concerning inclusion in the financial statements of all types of transactions that the auditor has reason to believe has occurred based on the auditor's knowledge of the client and the industry in which it operates. The excerpt from SAS No. 53 (AU section 316), refers to transactions which the auditor has reason to believe have occurred. Utilizing professional skepticism while performing the audit, this would require the auditor to question transactions which are peculiar to the particular client or industry as well as questioning the lack of specific types of transactions.

.41 The results of a research study on audit problems encountered in small business engagements (Auditing Research Monograph No. 5) indicates that many practitioners sometimes accept client representations as sufficient audit evidence when completeness of recorded transactions cannot be substantiated.[1] Client representations are part of the evidential matter the auditor gathers, but they should not be used as a substitute for the performance of those procedures considered necessary to form an opinion on the financial statements. An auditor cannot rely on client representations alone as sufficient audit evidence to substantiate the completeness of account balances and classes of transactions. Obtaining such representations complements but does not replace other auditing procedures that the auditor should perform. [See Auditing Interpretation No. 3 of SAS No. 31, "The Auditor's Consideration of the Completeness Assertion" (AU section 9326.18–.21).] When an auditor is unable to form an opinion, even though representations from the client have been received, there is a limitation on the scope of the audit that precludes the auditor from issuing an unqualified opinion (SAS No. 19, *Client Representations*, paragraph 12 [AU section 333.12]).

Internal Control Activities Related to Completeness

.42 Internal control activities related to completeness include control activities that are designed (1) to count or otherwise identify transactions executed by the entity and (2) to provide reasonable assurance that all transactions have been accurately recorded by the accounting system. For example, completeness controls over purchases can include reconciliation of all pre-numbered receiving reports (which would be required for all goods received) to recorded purchases and investigation of receiving reports that are missing, not recorded, or not otherwise accounted for. Many auditors prefer to rely on controls when gathering evidence of completeness since extensive substantive tests for completeness may be more difficult to design than those for other SAS No. 31 assertions.

---

[1] D.D. Raiborn, Auditing Research Monograph No. 5, *Audit Problems Encountered in Small Business Engagements* (New York: AICPA, 1982), p. 74.

.43 If the auditor desires to assess control risk at less than the maximum level, tests of controls should be performed to determine that the controls are working as prescribed to make that control risk assessment. Once the control risk is assessed at less than maximum, the auditor may restrict substantive procedures designed to obtain evidential matter regarding the completeness assertion. Taken alone, the assessed level of control risk, ordinarily, is not sufficiently low to eliminate the need to perform any substantive tests. In addition, small businesses often lack segregation of duties, which usually prevents the auditor from assessing control risk at a low level. As a result, it is necessary to perform substantive tests of the completeness assertion.

Substantive Tests

.44 Many substantive tests are of limited usefulness in detecting errors of omission because they are usually applied to recorded amounts. Unrecorded transactions are not included in the account balances or classes of transactions to which the auditor applies substantive tests.

.45 Of all the financial statement assertions, only completeness involves consideration of whether there are material amounts that are not included in the account balance or class of transactions being tested. Therefore, substantive tests of the completeness assertion differ somewhat from substantive tests of other financial statement assertions. The difference is highlighted by the following excerpt from SAS No. 31, paragraph 11, as amended (AU section 326.11):

> In designing substantive tests to achieve an objective related to the assertion of existence or occurrence, the auditor selects from items contained in a financial statement amount and searches for relevant evidential matter. On the other hand, in designing procedures to achieve an objective related to the assertion of completeness, the auditor selects from evidential matter indicating that an item should be included in the relevant financial statement amount and investigates whether that item is so included.

.46 Substantive tests can be designed to provide evidential matter to support a conclusion that specific account balances are not misstated by amounts that would cause the financial statements, taken as a whole, to be materially misstated because of unrecorded transactions.

.47 Important sources of evidential matter for completeness include source documents, such as order logs, shipping and receiving documents, and checks. One common test of completeness involves tracing amounts from source documents to amounts recorded in the accounting records. For example, the auditor may vouch selected cash disbursements after the end of the audit period to test the completeness of amounts recorded as accounts payable at the balance-sheet date. Other substantive procedures that provide evidence concerning the completeness of financial statement account balances include the following:

a. Sales-and-purchases cutoff procedures that include tracing shipping and receiving documents processed after the audit period to accounting records for the proper period.

b. Analytical procedures in which the auditor investigates relationships among data that indicate a financial statement account or balance may be understated. For example, the auditor may obtain evidence that all interest-bearing debt is recorded by examining the relationship between recorded interest expense and the average balance of interest-bearing debt outstanding for the period. Disproportionate relationships based on the auditor's knowledge of interest rates should be investigated. Other examples include: a comparison of investment income to average investments for the period to test whether income earned on investments is recorded; the relationship of average pay times number of employees to payroll expense to substantiate that salaries are recorded; and the relationship of membership fee revenue to the number of members of an organization.

c. Confirmations of balances or transactions designed to identify unrecorded amounts, such as accounts payable confirmations that request the creditor to specify the amount of the client's obligation.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

d. Tests of bank reconciliations, including examination of checks clearing the bank after the audit period to identify cash disbursements processed but not recorded or inappropriately recorded in the subsequent period.

e. Reading the minutes of the meetings (of the) board of directors and stockholders and tracing transactions authorized in the minutes to amounts recorded in the accounting records.

f. Overall reconciliations using financial and nonfinancial data, such as "proofs" of cash and sales.

AAM Section 12,200

Illustrative Audit Program for State and Local Governmental Units

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent, and timing of the auditing procedures to be applied in a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

9. If client has an internal audit department:			
a. Obtain an understanding of the internal audit function sufficient to identify those internal audit activities that are relevant to planning the audit.	____	____	____
b. If the internal auditors' work is to be considered in determining the nature, timing and extent of audit procedures, assess the competence and objectivity of the internal audit function in light of the intended effect of the internal auditors' work on the audit. (SAS No. 65, paragraph 9 [AU section 322.09 et. seq.])	____	____	____
10. Obtain copies of minutes of meetings of the governing body and relevant committees and review for items of financial significance.	____	____	____
11. Obtain copy (including all amendments) of entity's current budget (for all funds legally budgeted).	____	____	____
12. Discuss the following (and other appropriate) matters with appropriate client personnel:			
a. Changes in operations, including pending/planned changes.	____	____	____
b. Changes in accounting methods or accounting principles applied.	____	____	____
c. Changes in key personnel, particularly those who can influence financial reporting.	____	____	____
d. Significant accounting or reporting problems.	____	____	____
e. Changes in data processing methods or equipment.	____	____	____
f. Significant legal matters and contingencies.	____	____	____
g. Disposition of prior year's management letter points.	____	____	____
h. Disposition of prior year's reportable conditions.	____	____	____

	Done by	Date	W/P Ref.
i. Extent of client assistance to be provided.	____	____	____
j. Timing of preliminary audit work, inventory observation, confirmation procedures, final audit work, etc.	____	____	____
k. Due dates for delivery of report(s).	____	____	____
l. Disposition of prior year findings and questioned costs.	____	____	____
m. Other matters (prepare list and attach to program).	____	____	____
13. Obtain an understanding of the client's controls over financial reporting and over compliance with laws and regulations sufficient to plan the nature, timing, and extent of audit procedures and tests.	____	____	____
a. Complete questionnaires or prepare flowcharts and/or narrative descriptions relating to the client's internal control. Consideration should be given to all five components of internal control to obtain sufficient knowledge of the control structure and the design of controls and to determine whether those controls have been placed in operation.	____	____	____
b. Assess control risk for financial statement assertions, including those related to compliance with laws and regulations that have a direct and material effect on the financial statements.	____	____	____
(1) For each assertion for which control risk is assessed at the maximum, record that conclusion in the working papers.	____	____	____
(2) For each assertion for which a lowering of control risk below the maximum is deemed feasible and efficient:			
(a) Identify the key control activities which will be subjected to audit tests.	____	____	____
(b) Conduct audit tests to determine how the policies and procedures were applied, the consistency with which they were applied and by whom they were applied. Working papers relating to the tests should describe the policies and procedures tested, test objectives, sample selection, test criteria, test results, and conclusions concerning the effectiveness of the control activity being tested.	____	____	____
(c) Document conclusions in the working papers concerning the assessed level of control risk for the assertion.	____	____	____
14. Obtain preliminary financial information from client for year under audit.	____	____	____
a. Compute planning materiality at the appropriate level for the engagement being undertaken (GPFS, individual fund, etc.).	____	____	____
b. If audit involves a single audit of federal financial assistance, compute planning materiality for each major federal financial assistance program.	____	____	____

	Done by	Date	W/P Ref.
c. Perform analytical procedures to identify unusual or unexpected transactions, amounts, ratios or trends that might have planning ramifications. Compare recorded amounts to:			
(1) Prior year amounts, adjusted for known changes from the prior year to the current year;	____	____	____
(2) Current year amounts to budgeted amounts;	____	____	____
(3) Other financial/nonfinancial information for which plausible relationships exist.	____	____	____
d. Document and explain (if explanations are available) any unusual or unexpected transactions, amounts, ratios, or trends noted in the preceding procedure; explain the disposition to be made of such variances and the effect thereof on the nature, timing, and extent of audit procedures.	____	____	____
15. Consider factors influencing the risk of errors, irregularities, or illegal acts causing financial statements to be materially misstated by evaluating the following factors:			
a. The existence of laws, rules, and regulations that may have a direct and material effect on amounts reported in the financial statements.	____	____	____
b. The existence of material accounting estimates.	____	____	____
c. The existence of many contentious or difficult accounting issues.	____	____	____
d. Recent accounting/auditing pronouncements affecting the client.	____	____	____
e. The existence of significant difficult-to-audit transactions.	____	____	____
f. Management's and elected officials' poor reputation in the governmental community.	____	____	____
g. The potential for management misrepresentation.	____	____	____
h. The susceptibility of assets to unauthorized use or disposition.	____	____	____
i. The ability of the entity to operate within approved budgets and to issue timely and accurate financial reports.	____	____	____
j. Turnover and qualifications of key personnel.	____	____	____
k. Qualifications in auditors' reports for prior years.	____	____	____
l. Decentralized or centralized records.	____	____	____
Document conclusions in the working papers and their effects on engagement staffing, extent of supervision, and overall strategy for the conduct and scope of the audit.	____	____	____
16. Use the information obtained or developed concerning materiality levels, controls over financial reporting and compliance with laws and regulations and the related assessments of control risk, the results of analytical procedures, and the evaluation of other factors impacting on audit risk to:			
a. Plan the nature, timing, and extent of substantive tests;	____	____	____

	Done by	Date	W/P Ref.
b. Determine staffing requirements and related levels of supervision;	____	____	____
c. Plan the overall strategy for the conduct and scope of audit; and	____	____	____
d. Prepare/revise the audit program.	____	____	____
17. Estimate time required to complete audit procedures and prepare appropriate planning documents (engagement time summary, scheduling and staffing summary, etc.).	____	____	____
18. Obtain and record audit partner's approval for:			
a. Documentation of internal control.	____	____	____
b. Approach used to audit computer generated records.	____	____	____
c. Use of statistical sampling methods.	____	____	____
d. Assessment of audit risk and materiality.	____	____	____
e. Audit programs.	____	____	____
f. Time budget and staffing of engagement.	____	____	____
19. Prepare listing of schedules/analyses to be prepared by client (and working paper set-ups, if considered necessary) and deliver to client.	____	____	____
B. Engagement Administration and Supervision Procedures			
1. Schedule timing of work to be done on priority basis, assigning top priorities to more significant or problem areas of engagement.	____	____	____
2. Obtain all documents and information required for the permanent file and remove superseded materials for filing in a closed file.	____	____	____
3. Accumulate all points to be included in the report on internal control, a management letter or report(s) on compliance with laws and regulations, indicating for each whether the point applies to internal control or compliance.	____	____	____
a. Review with engagement partner and determine which points are to be included in written communications and which points are to be communicated verbally to the client.	____	____	____
b. For those items to be communicated verbally to client, document the communication.	____	____	____
c. For all other items, furnish client with the findings and recommendations and request a written response regarding action client expects to take.	____	____	____
4. Ascertain that all steps in all audit programs have been considered and/or completed, and that any modifications to the programs resulting from changed conditions have been properly approved and documented.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
5. Ascertain that all working papers have been headed, indexed, cross-referenced, initialed, and dated. If they were initially prepared by client, they should be marked "Prepared by Client" or "PBC."			
6. Clear all pending items, and dispose of all follow-up or "TO DO" sheets and any other similar notations in the files.			
7. Review financial statements and notes and determine:			
a. The adequacy of evidence gathered in response to unusual or unexpected balances or transactions identified during audit planning or audit performance;			
b. The existence of unusual or unexpected balances or relationships which have not been evaluated;			
c. Whether additional evidential matter is necessary to explain unexpected differences between reported amounts and expected amounts or relationships.			
d. Investigate and explain any unusual or unexpected balances or relationships not previously evaluated and document results in the working papers.			
8. Ascertain that working papers include appropriate memoranda regarding consultations with firm specialists, outside consultations, and resolution of differences of opinion, if any, among firm personnel regarding accounting/auditing matters.			
9. Determine that differences between the accounting records and the evidential matter gathered during the application of audit procedures have been evaluated as to both their quantitative and qualitative effects.			
10. In the event that illegal acts were noted, determine that:			
a. An understanding of the nature of the acts was obtained;			
b. The circumstances in which it occurred were evaluated;			
c. The effect of the illegal act on the financial statements was considered; and			
d. Such other auditing procedures necessary in the circumstances were performed. (See SAS No. 54, paragraphs .09 through .15 [AU section 317.09–.15].)			
11. Determine that required communications, proper as to form and content, have been made to disclose irregularities and/or illegal acts noted during the course of the audit.			
12. Determine whether the audit work performed indicates that substantial doubt exists with regard to the entity's ability to continue as a going concern for a reasonable period of time.			
13. If a substantial doubt exists with regard to the entity's ability to continue as a going concern for a reasonable period of time:			

	Done by	Date	W/P Ref.
a. Obtain information about management's plans, assess the expected effectiveness of the plans, and gather evidence to evaluate pertinent provisions of those plans and to support audit conclusions concerning the government's ability or inability to continue as a going concern.	____	____	____
b. Evaluate the adequacy of the related financial statement disclosures.	____	____	____
c. Consider the effects on the auditors' report.	____	____	____
14. If the government has an audit committee or has otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee), determine that the following matters have been communicated to the appropriate committee and include documentation to that effect in the working papers:			
a. The auditors' responsibility under generally accepted auditing standards (SAS No. 61, paragraph 6 [AU section 380.06]);	____	____	____
b. Initial selection of and changes in significant accounting policies or their application (SAS No. 61, paragraph 7 [AU section 380.07]);	____	____	____
c. Significant unusual transactions and the methods used to account for them;	____	____	____
d. The effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus;	____	____	____
e. The process used by management in formulating particularly sensitive accounting estimates and the basis for the auditors' conclusions regarding the reasonableness of those estimates;	____	____	____
f. Adjustments arising from the audit that could, in the auditor's judgment, either individually or in the aggregate, have a significant effect on the entity's financial reporting process;	____	____	____
g. The auditor's responsibility for other information in documents containing audited financial statements (i.e., a CAFR);	____	____	____
h. Disagreements with management;	____	____	____
i. Consultations by management with other accountants about auditing and accounting matters;	____	____	____
j. Major issues discussed with management prior to retention;	____	____	____
k. Difficulties encountered in performing the audit;	____	____	____
l. Irregularities and/or illegal acts;	____	____	____
m. Significant deficiencies in the design or operation of controls over financial reporting and over compliance with laws and regulations ("reportable conditions"); and,	____	____	____
n. Other matters relevant to oversight responsibilities.	____	____	____

II. Budget Compliance

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. An annual budget has been adopted for all governmental funds and, if required by law, for other funds of the entity. (Assertions 1 and 2)

B. All amendments to the initially adopted budget have been properly approved. (Assertions 1 and 2)

C. Budgetary amounts shown in the financial statements include the initially adopted budget and all legally approved amendments thereto. (Assertions 1, 2, and 5)

D. The budget has been administered in accordance with laws and regulations and excesses of expenditures over appropriations (if any) do not constitute violations of laws and regulations and have been adequately disclosed in the financial statements. (Assertions 3 and 5)

E. Budgetary amounts shown in the financial statements are shown on the same basis of accounting as the actual financial statements. (Assertions 4 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Audit Procedures to Test Budgetary Information

[A] D	1. Discuss with management the applicable statutes and ordinances governing the legal status of the budget and its applicability to the various funds of the governmental entity.	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.			Done By	Date	W/P Ref.
C	2.	Determine the level of budgetary control—that is, object, department, program, or fund, and the adequacy of the financial reporting information system to operate at that level of control.			
E	3.	Determine the basis of accounting on which the budget is prepared.			
A B	4.	Consider whether the budgetary process was performed in accordance with statutes and ordinances, including required public notifications and hearings.			
A	5.	Review minutes of meetings of the governing body for proper approval of the adopted budget.			
B	6.	Determine whether amendments to the adopted budget during the audit period were approved in accordance with applicable laws and regulations.			
C	7.	Determine that final budgetary amounts reflect all approved amendments.			
	B.	**Audit Procedures to Test Budgetary Compliance**			
A B D	1.	Determine whether the monitoring process for budgetary controls leads to amendments to the budget as dictated by changing circumstances or laws and regulations.			
D	2.	For any material excess of expenditures over appropriations in individual funds:			
		a. Determine whether such excess constitutes a violation of law or contract.			
		b. Determine whether such excess has been adequately disclosed.			
E	3.	If applicable, review reconciliation of budgetary basis to GAAP basis and determine whether such reconciliation has been adequately disclosed in the financial statements.			

This audit program has been completed in accordance with firm policy.

III. Cash

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Cash balances as stated in the combined balance sheet properly represent cash and cash items on hand, in transit, or on deposit with third parties in the name of the governmental unit. (Assertions 1, 2, 3, 4, and 5)

B. Cash is properly classified in the financial statements and adequate disclosure (by segregation or otherwise) is made of restricted or committed funds or of cash not subject to immediate withdrawal. (Assertions 3, 4, and 5)

C. Deposits are properly classified as to credit risk as required by GASB Statement No. 3. (Assertions 4 and 5)

D. Applicable accounting principles have been consistently applied. (Assertions 4 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1. Review the understanding of internal control over cash transactions and the preliminary assessment of control risk. ____ ____ ____

2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk. ____ ____ ____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.			
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on cash and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.			
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.			
	C. Other Auditing Procedures			
A	1. Where material, count cash on hand, reconcile balances on hand to required amounts, and obtain signature of custodian acknowledging return of funds intact.			
A	2. Confirm cash balances with banks or other depositories as of the balance-sheet date using the *AICPA Standard Form to Confirm Account Balance Information.*			
[A]	3. Obtain copies of client's bank reconciliations at the end of the year.			
A	4. If deemed appropriate, obtain bank cutoff statements (or statements for month succeeding year end) and related supporting documents directly from the bank.			
A	5. Substantiate reconciling items as follows:			
	a. Trace deposits in transit to subsequent bank statements. Determine whether there was any extraordinary delay between the date deposit was recorded on the accounting records and the date deposited per bank.			
	b. Trace checks in excess of $_____ dated on or before balance-sheet date but clearing after the balance-sheet date to the list of outstanding checks.			
	c. Investigate checks in excess of $_____ included on the list of outstanding checks but which have not cleared in the month following year-end.			
	d. Trace any significant transfers between banks or accounts of a bank (including investment accounts) near year-end to verify both transactions have been recorded in the same accounting period.			
	e. Investigate any remaining significant reconciling items not covered above.			

Obj.		Done By	Date	W/P Ref.
[A]	6. Consider reversing old outstanding checks. (Investigate those over $_____.) Determine that such amounts have been handled properly in accordance with state or local escheat laws.			
[A]	7. Review receipts, etc., issued shortly before and shortly after year-end to determine that all cash collected has been recorded in the proper period.			
C	8. Obtain copies of all collateral agreements the local government has with depositories.			
	a. Confirm collateral with bank or agency holding the collateral securities.			
	b. Determine if the collateral complies with legal requirements for the entity.			
	c. Determine whether the market value of the collateral is adequate to secure the funds on deposit and to meet legal requirements.			
	d. Test collateralization throughout the year to determine its adequacy. Note instances in which the local government's uncollateralized deposits during the period significantly exceeded that category of credit risk at balance-sheet date.			
C [D]	*e.* Review clients classifications as to credit risk for note disclosure.			
A B	9. Identify which (if any) individual funds are required by law or other contractual agreement to maintain separate bank accounts and ascertain that separate bank accounts are maintained.			
	a. Note any withdrawal restrictions or other commitments which may exist.			
	b. Review note disclosure regarding significant restrictions or other commitments on cash funds.			
B D	10. If the government pools cash:			
	a. Determine whether pooling of cash funds is permissible under applicable laws and contractual agreements.			
	b. Obtain records from entity personnel indicating allocation of earnings on pooled cash to individual funds.			
	c. Review for reasonableness, and test accuracy of allocations.			
	d. Determine whether overdrafts by individual funds have been reported in accordance with GAAP.			

D. Overall Conclusions

1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:
   a. Cash balances as stated in the combined balance sheet properly represent cash and cash items on hand, in transit, or on deposit with third parties in the name of the governmental unit;

IV. Investments

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Investments reported in the financial statements are on hand in the name of the governmental entity or held in custody and safekeeping by others in the name of and on behalf of the entity. (Assertions 1, 2, and 3)

B. The basis on which the investments are stated is in accordance with generally accepted accounting principles. (Assertions 4 and 5)

C. Income from investments has been accounted for properly. (Assertions 4 and 5)

D. Investments and the related income are properly classified and described in the financial statements. (Assertions 4 and 5)

E. Adequate disclosure has been made of the pledging of any investments and credit risks are properly disclosed as required by GASB Statement No. 3. (Assertions 2, 3, and 5)

F. Investments are made in accordance with state and local laws and regulations. (Assertions 3 and 5)

G. Applicable accounting principles have been consistently applied. (Assertions 4 and 5)

H. Securities lending transactions are properly accounted for and reported. (Assertions 1, 2, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

	A. Evaluation of Internal Control			
	1. Review the understanding of internal control over investments and investment transactions and the preliminary assessment of control risk.			
	2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.			
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.			
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on investments and related income and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.			
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.			
	C. Other Auditing Procedures			
[F]	1. Obtain an understanding of state and local laws and regulations governing investment of idle funds.			
[A] [D]	2. Obtain a list of investments and identify ownership by fund.			
A	3. For securities held on hand:			
	a. Examine securities and trace applicable information from each security to list of investments.			
	b. Obtain signature of custodian acknowledging return of all securities.			
	c. If inspection is performed at other than the balance-sheet date, verify all changes between date of physical inspection and date of balance sheet.			
A	4. For securities held by others, confirm information pertaining to securities held by them, including name in which security is registered.			
C[D]	5. Test accrued interest to balance-sheet date.			
B C	6. Test amortization of premiums (or discount) paid, where applicable.			
D[G]	7. Obtain market values at balance-sheet date.			

Obj.			Done By	Date	W/P Ref.
		a. Investigate significant differences from recorded values to determine if any write-downs are necessary.	____	____	____
		b. Review management's intended holding period and liquidity requirements in the case of a decline in market value.	____	____	____
F	8.	Test investment transactions during the year to determine that investments are in accordance with statutory requirements (if applicable).	____	____	____
		a. If required by local laws and regulations, trace approval for investment transactions to minutes of governing body or investment committee.	____	____	____
		b. Review for unusual transactions.	____	____	____
C[D]	9.	Test interest revenue accounts in the various funds and reconcile interest income to the investment transactions.	____	____	____
C[D]	10.	Verify that all investments and related income were applied to the proper fund of ownership.	____	____	____
C D [F]	11.	If the government pools investments:			
		a. Determine whether pooling of funds for investment purposes is permissible under applicable laws and contractual agreements.	____	____	____
		b. Obtain records from entity personnel indicating allocation of earnings on pooled investments to individual funds.	____	____	____
		c. Review allocation of earnings for reasonableness, and test accuracy of allocations.	____	____	____
E[G]	12.	Review GASB Statement No. 3 disclosures:			
		a. Identify any significant violations of state statutes, local charters, resolutions or ordinances, grant regulations, or internal policies in the investment of funds.	____	____	____
		b. Determine whether the basis of valuation (e.g., cost, market value, or lower of cost or market value) is in accordance with GAAP, and that appropriate allowances and/or write-downs have been provided.	____	____	____
		c. Identify any commitments at the balance-sheet date to resell securities under yield maintenance repurchase agreements.	____	____	____
		d. Determine types of investments made during the year but not owned as of the balance-sheet date.	____	____	____
		_____ State investment pool			
		_____ Repurchase agreement

V. Receivables and Revenues—Governmental Funds

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Revenue accounts and related income and expense accounts include all transactions that relate to the period. (Assertions 1, 2, and 5)

B. Only those revenues that are measurable and available in the fiscal period are recorded as revenue of the period. (Assertions 1, 2, 3, and 5)

C. Receivables are valid and are stated at the net realizable amount. (Assertions 1, 3, and 4)

D. Judgments as to valuations, allowances and deferral of revenue are reasonable and responsible. (Assertions 4 and 5)

E. Descriptions, classifications, and related disclosures are adequate and not misleading. (Assertion 5)

F. All loss contingencies related to revenues and receivables are identified and reported or disclosed. (Assertions 2, 3, and 5)

G. Applicable accounting principles have been consistently applied. (Assertions 4 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1. Review the understanding of internal control over revenue and receivable transactions and the preliminary assessment of control risk.

Obj.			Done By	Date	W/P Ref.
	2.	For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.			
	3.	Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.			
	B.	**Analytical Procedures**			
	1.	Review the planning procedures applicable to analytical procedures performed on revenue and receivables and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.			
	2.	If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.			
	C.	**Other Auditing Procedures—Receivables and Revenues—Governmental Funds**			
	1.	**General Property Taxes**			
[A]	*a.*	Review computation of total assessed value for property.			
[A][B][C]	*b.*	Compare current year's assessed value to that of the prior year and obtain explanations for significant changes.			
A B C	*c.*	Determine that the appropriate tax was properly levied.			
		(1) Determine that property assessments have been made in compliance with laws.			
		(2) Determine that property tax rates are in compliance with laws.			
A C	*d.*	Recalculate total tax levy and compare to recorded revenue.			
A E	*e.*	Recalculate tax levies for individual funds and compare to amounts recorded in each fund.			
A C E	*f.*	Confirm amounts of special or supplemental tax distributions and trace into proper funds relating to:			
		(1) Back taxes collected			
		(2) Tax objections overruled			
		(3) Tax settlements			
C F	*g.*	Review allowance for uncollectible taxes for reasonableness and compare to prior year's computation. Obtain explanation for any unusual changes.			
B D G	*h.*	Determine that deferred revenue accounts have been recorded in accordance with generally accepted accounting principles. Trace amounts to tax levies.			

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
A [C]	*i.* Determine that property tax sales were properly authorized for nonpayment of taxes and the major receipts were deposited on a timely basis.			
E	*j.* Determine that property taxing policies and procedures are properly disclosed in the notes to financial statements.			
	k. Consider confirming property taxes receivable where the client does its own billing and collection procedures.			
	2. Sales Taxes			
A B C	*a.* Review the methods used by the local government to reasonably assure that all taxes due have been remitted (for example, systems providing for the cross-referencing of returns to a database showing prior returns, registered corporations, etc.).			
A	*b.* Compare current year's actual revenue with the current year's budget and prior year's actual revenue; explain any unusual fluctuations or variances.			
A B C	*c.* Determine that proper accruals have been made to accrue sales taxes held by other governments at fiscal year end.			
	(1) Confirm revenues collected by collecting government and amounts not yet remitted directly with the collecting government.			
	(2) Trace receipts to subsequent accounting period.			
	d. For sales taxes collected by merchants but not yet required to be remitted to the taxing authority at the end of the fiscal year:			
A B	(1) Review methods used by the local government to estimate the amount of such sales tax collections.			
A B	(2) Compare current year accrual with prior year accrual.			
A C E	(3) Determine that proper consideration has been given to merchants' compensation and uncollectible taxes.			
C E	(4) Compare collections in subsequent period (usually the first month of the subsequent period) to amounts estimated at year end and explain any unusual differences.			
B	(5) Determine that amounts accrued at year-end were both measurable and available to finance expenditures of the fiscal period.			
A	*e.* Select a sample of returns and verify that the tax liability was computed in accordance with governing laws and regulations and that related payments were deposited and properly recorded in the accounting records.			
	3. Income and Other Self Assessed Taxes			
A B C	*a.* Review the methods used by the local government to reasonably assure that all taxes due have been remitted (for example, systems providing for the cross-referencing of returns to a database showing prior returns, registered corporations, etc.).			

Obj.			Done By	Date	W/P Ref.
A	*b.*	Compare current year's actual revenue with the current year's budget and the prior year actual revenue; explain any unusual fluctuations or variances.	____	____	____
A B C	*c.*	Determine that proper accruals have been made to accrue income and other taxes held by other governments at fiscal year end.	____	____	____
		(1) Confirm revenues collected by collecting government and amounts not yet remitted directly with the collecting government.	____	____	____
		(2) Trace receipts to subsequent accounting period.	____	____	____
	d.	For income taxes and other self-assessed taxes not yet required to be remitted to the taxing authority at the end of the fiscal year:			
[A] B [C]		(1) Review methods used by the local government to estimate the amount of such tax collections.	____	____	____
A		(2) Compare current year accruals with prior year accruals.	____	____	____
B D		(3) Determine that proper consideration has been given to uncollectible taxes and estimated refunds.	____	____	____
A C		(4) Compare collections in subsequent period to amounts estimated at year end and explain any unusual differences.	____	____	____
B		(5) Determine that amounts accrued at year-end were both measurable and available to finance expenditures of the fiscal period.	____	____	____
A	*e.*	Select a sample of returns and verify that the tax liability was computed in accordance with governing laws and regulations and that related payments were deposited and properly recorded in the accounting records.	____	____	____
	4.	**Revenue From Federal, State, and County Agencies**			
A F	*a.*	Review grant applications, agreements, contracts, budgets, and reports to determine that grant expenditures are in accordance with grant agreements.	____	____	____
A F	*b.*	Review the reasonableness of the government's indirect cost allocation plan and determine the propriety of indirect cost items allocated to grant programs.	____	____	____
D F	*c.*	Review grant records and correspondence files for material areas of noncompliance and questioned costs.	____	____	____
A	*d.*	For grant programs requiring matching funds, review supporting documentation to support the local government's contribution and determine allowability of any in-kind (goods or services) matching efforts.	____	____	____
A B	*e.*	Determine that grant revenues earned based on expenditures are properly accrued.	____	____	____
A [D]	*f.*	Confirm revenue received from federal, state, and county agencies and any revenue earned but not yet remitted directly with the appropriate agency.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
A	*g.* Determine if pass-through grants are properly accounted for.			
	5. Licenses and Permits			
[A]	*a.* Determine licenses and permits in effect and rates set by ordinance.			
A	*b.* Compare revenue from license and permits by totals to current year's budget and prior year actual revenue. Explain any unusual fluctuations or variations.			
	c. If licenses and permits constitute a material source of revenue:			
A	(1) On a test basis, trace collections from persons or businesses ordinarily required to pay fees to accounting records.			
A C	(2) On a test basis, recompute amounts of licenses and permits to determine that fees are being assessed in accordance with laws and regulations.			
A B	(3) Where appropriate, reconcile inventories of licenses and permits to revenues.			
	6. Franchise Fees			
A B	*a.* Review franchise ordinances and compare fees as indicated therein with amounts received.			
A	*b.* Compare revenue from franchise fees by totals to current year's budget and prior year actual revenue. Explain any unusual fluctuations or variations.			
A B C	*c.* For major franchise fees, determine that all fees for the fiscal year have been properly accrued.			
A	*d.* Consider confirmation of franchise fees received or receivable during the year directly with the franchisee.			
	7. Fines			
[A]	*a.* Review and test client's procedures for accounting for tickets, and determine that tickets are being properly disposed of through the collection of cash or authorized dismissal.			
A	*b.* Compare fine revenue by totals to current year's budget and prior year actual revenue. Explain any unusual fluctuations or variations.			
E	*c.* Determine that fines are distributed in accordance with governing regulations.			
	8. Sale of Property and Equipment			
[A] [C]	*a.* Review minutes of legislative body to determine authority to sell property and equipment and that such sales have been conducted in accordance with applicable state and local laws and regulations.			
A E	*b.* Determine that proceeds are credited to the proper fund as required by law and that any receivables are properly classified.			

Obj.		Done By	Date	W/P Ref.
A	c. Determine that major dispositions have been removed from the property and equipment records.			
	9. Rentals of Property and Equipment			
A C	a. Examine authorizing laws and regulations, schedules, contracts, leases, and other documents governing the use of public property by others.			
A B C	b. On a test basis, compare the amounts of billings against terms of rental agreements.			
A E	c. Trace billings to recording in proper fund in the accounting records.			
	d. Test for classification (i.e., operating, sales, and direct financing type) as well as proper accounting of leases.			
	10. Special Assessments			
[A]	a. Examine minutes of legislative body for authorization of special assessments.			
[A] [B]	b. Obtain a schedule of assessment installments.			
A B	(1) Compare current installment to revenue recorded for current year.			
D	(2) Compare total installment amounts due in subsequent years and compare to deferred revenue amounts.			
A	c. Using interest rate stated in assessment ordinance, compute interest revenue for current fiscal year and compare to recorded amounts.			
A	d. Obtain a list of all assessments receivable balances and compare the total of these balances to the general ledger control accounts.			
A C	e. Consider confirmation of unpaid assessment balances directly with property owners, especially significant or old balances.			
A D	f. Review all adjustments to the accounts for authority and propriety.			
	11. Other Revenues			
A B C D	a. Schedule any other revenue accounts of material amount and perform audit procedures determined necessary.			
	D. Other Auditing Procedures—Receivables			
	1. All Receivables			
	a. If accounts receivable are not being confirmed, document the reason. One of the following is acceptable:			
	(1) Accounts receivable are immaterial to the financial statements.			
	(2) Use of confirmations would be ineffective.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	(3) Combined assessed level of inherent risk and control risk is low, and the assessed level, in conjunction with the evidence expected to be provided by analytical procedures or other substantive tests of details, is sufficient to reduce audit risk to an acceptably low level for the applicable financial statement assertions.	____	____	____
	2. Other Receivables			
C [D]	*a.* Obtain aged listing of accounts receivable not examined in preceding audit procedures. Test accuracy of listing and reconcile balance with general ledger.	____	____	____
C	*b.* Confirm individual accounts with large or unusual balances directly with the owing party.	____	____	____
C D	*c.* Obtain or list subsequent collections of past due items to date of field work.	____	____	____
D F	*d.* Obtain list of uncollectible accounts written off during the year and of all credits issued during the year, and review for authority and propriety.	____	____	____
C F	*e.* Review collectibility of accounts with responsible personnel and determine that proper allowance is established for uncollectible accounts.	____	____	____
	E. Overall Conclusions			
	1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:			
	a. Revenue accounts and related income and expense accounts include all transactions that relate to the period;	____	____	____
	b. Only those revenues that are measurable and available in the fiscal period are recorded as revenue of the period;	____	____	____
	c. Receivables are valid and are stated at the net realizable value;	____	____	____
	d. Judgments as to valuations, allowances and deferral of revenue are reasonable and responsible;	____	____	____
	e. Descriptions, classifications, and related disclosures are adequate and not misleading;	____	____	____
	f. All loss contingencies related to revenue and receivables are identified and reported or disclosed; and	____	____	____
	g. Applicable accounting principles have been consistently applied;			
	Except as follows: _____ _____ _____	____	____	____

VI. Expenditures, Expenses, and Payables

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Expenditure/expense accounts include all costs and expenses applicable to the period and all losses and estimated future expenses that should be reflected in the period, and that classification is consistent with the accounting system and generally accepted accounting principles. (Assertions 1, 2, 4, and 5)

B. Amounts payable are properly authorized, represent the correct amounts of currently payable items and reflect all outstanding obligations. (Assertions 2, 3, and 5)

C. Prepaid and accrued accounts are properly stated. (Assertion 4)

D. Account descriptions, classifications and related disclosures are adequate and not misleading. (Assertion 5)

E. Loss contingencies other than remote, are identified and recorded or disclosed. (Assertions 2, 3, and 5)

F. The governmental entity has complied with legal requirements relating to purchasing, payrolls, and disbursements having a direct and material effect on financial statement amounts. (Assertion 3)

G. Municipal solid waste landfill closure and postclosure care costs have been reasonably estimated and are being accounted for in accordance with generally accepted accounting principles. (Assertions 1, 3, 4, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.	____	____	____
	C. Other Auditing Procedures—Expenditures/Expenses			
	1. General			
[B]D F	*a.* Review the applicable state and local laws and regulations setting forth the procedures for making purchases.	____	____	____
A[B][C]F	*b.* For selected expenditures/expenses (excluding payroll expenditures) examine supporting documents and compare to disbursement records noting:			
	(1) Authorization for disbursement and approval of supporting document.	____	____	____
	(2) Data supporting invoice such as purchase order and receiving report.	____	____	____
	(3) Evidence of compliance with purchasing laws and procedures. (Examine bid files for those items requiring competitive bids.)	____	____	____
	(4) Evidence of check of clerical accuracy.	____	____	____
	(5) Cancellation of document.	____	____	____
	(6) Evidence of duplicate payment, in whole or in part.	____	____	____
	(7) Charge to proper expenditure and appropriation account or reserve for encumbrances.	____	____	____
	(8) That discounts were taken when offered.	____	____	____

Obj.			Done By	Date	W/P Ref.
		(9) Authorized check signer.			
		(10) That purchase was recorded in the period received.			
A D	*c.*	Compare individual expenditure/expense accounts to current year's budget and prior year's actual. Explain any unusual fluctuations or variations.			
	2.	**Payrolls**			
	a.	For selected payroll disbursements:			
F		(1) Compare rate of pay used in computing payroll disbursement with applicable employee's personnel files and with the salary and appropriation ordinances or other established pay scales.			
[A] B F		(2) Examine appropriate attendance records for disbursement being examined.			
A B		(3) Recompute gross pay and compare to amount computed by client.			
[A]		(4) When applicable, verify that appropriate entries were made to the client's leave records.			
A B D		(5) Determine that payroll disbursement was charged to the proper appropriation account.			
[D] F	*b.*	Verify payment of the various payroll deductions to the proper authority.			
		(1) Review year-end accruals for reasonableness.			
		(2) Trace material liability amounts to applicable payroll reports and payment in subsequent period.			
A B [E]	*c.*	Compare payroll accounts to budgeted amounts and to prior year's actual. Explain any unusual variations or fluctuations.			
	d.	If client has a deferred compensation plan:			
B C		(1) Confirm amounts on deposit in plan directly with plan administrator and trace to appropriate agency fund.			
D		(2) Review presentation and footnote disclosure for conformity with disclosures required under GAAP.			
D	*e.*	Determine if local government pays postretirement health care or life insurance costs.			
		(1) Obtain description of policies and related costs for current year.			
		(2) Review financial statement treatment and disclosures in notes to financial statements for conformity with GAAP.			
A B	*f.*	Inquire as to whether there have been any retroactive pay increases, large overtime payments, or other unusual compensation arrangements. If so, determine authority for and propriety of such payments.			

Obj.			Done By	Date	W/P Ref.
	3.	**Other Expenditures/Expenses**			
A B	*a.*	Determine that expenditures made by or on behalf of key officials are reasonable and adhere to client's policies.	____	____	____
A	*b.*	Schedule any other expenditure/expense accounts of material amount or unusual nature and perform audit procedures determined necessary.	____	____	____
F	*c.*	Determine if on-behalf payments for salaries and fringe benefits have been accounted for in accordance with GASB Statement No. 24, *Accounting and Financial Reporting for Certain Grants and Other Financial Assistance.*	____	____	____
	D.	**Other Auditing Procedures—Liabilities**			
	1.	**Accounts or Vouchers Payable and Encumbrances**			
	a.	Obtain schedule of accounts payable and encumbrances outstanding at end of audit period.	____	____	____
A	*b.*	Reconcile detail of liabilities and encumbrances to general ledger amounts.	____	____	____
A B	*c.*	Consider confirmation of large or unusual accounts payable balances.	____	____	____
B	*d.*	For selected entries in accounts payable (those in excess of $_____), examine underlying documentation for proper support and proper inclusion in the period being audited.	____	____	____
D E	*e.*	Ascertain nature and extent of unencumbered purchase commitments at year end.	____	____	____
B	*f.*	Trace encumbrances (in excess of $_____) to unfilled purchase orders.	____	____	____
B E	*g.*	Inquire as to material commitments to purchase or construct property, equipment, etc.	____	____	____
A B	*h.*	Examine invoices received and payments made subsequent to year-end on a test basis (those in excess of $_____) to determine if any should be included in period being audited.	____	____	____
	2.	**Deposits**			
B	*a.*	If deposit liabilities are not material to the financial statements, review liability for reasonableness and explain any unusual variations from prior years. Otherwise—	____	____	____
C	*b.*	Obtain listing of deposits (with indication of purpose of deposit if not otherwise noted) and reconcile to general ledger.	____	____	____
C	*c.*	Confirm balances on a test basis.	____	____	____
	d.	If interest is paid—			
C F		(1) Examine documentation authorizing payment of interest and determine that proper rate is being paid/accrued.	____	____	____
A C		(2) Test interest payments made during the period and accrued as of the end of the period being audited.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
C F	*e.* Review the provisions of any related ordinances and test for compliance.			
A C	*f.* Determine whether deposits are refundable in full or in part.			
[F]	*g.* Determine whether records of "bid" or "good faith" deposits are maintained, including records indicating disposition of such deposits.			
	3. Taxes Levied or Collected for Other Units of Government			
B	*a.* Verify collections, payments and balances on hand and collected balances due other units of government.			
B D	*b.* Determine that such items are recorded as liabilities to other governmental units.			
B	*c.* Trace material amounts to settlement in subsequent period.			
	4. Accrued Salaries and Wages			
B	*a.* From a comparison of pay periods and salary payment dates, determine whether an accrual should be made at year end of salaries and applicable employer's payroll taxes.			
B	*b.* Obtain a copy of client's worksheets for accrual of salaries and wages and test for accuracy.			
	5. Taxes or Fees Collected in Advance			
A B D	*a.* Obtain listing of taxes or fees collected in advance and reconcile to amounts recorded as deferred revenue in general ledger.			
A B	*b.* Trace large or unusual amounts to supporting documents.			
A B	*c.* Consider confirmation of amounts (in excess of $_____).			
F	*d.* Trace disposition of items recorded as deferred revenue at beginning of period.			
	6. Compensated Absences			
	a. Obtain the entity's personnel policies and procedures and review the provisions relating to the accrual and payment of compensated absences.			
A B [C] D	*b.* Obtain client's computation of compensated absences and determine by appropriate tests that:			
	(1) The schedule is arithmetically correct;			
	(2) All qualifying employees are included and that all employees included on the schedule are qualified;			
	(3) Appropriate salary and benefit rates are applied;			
	(4) Leave balances shown on the schedule are reasonable and are consistent with leave records of selected employees;			
	(5) The schedule is correct as to the employing fund.			
A D	*c.* Determine that the current and long-term portions of the liability have been recorded in accordance with GASB Codification section C60.			

Obj.		Done By	Date	W/P Ref.
	E. Other Auditing Procedures—Prepaid Items			
[C]	1. Review the type and amount of other assets and prepaid items, such as:			
	a. Unexpired insurance	____	____	____
	b. Prepaid rent	____	____	____
	c. Supplies inventories	____	____	____
	d. Advances	____	____	____
	e. Unamortized expense	____	____	____
	f. Deposits	____	____	____
	g. Other (itemize):			
	_____			
	_____	____	____	____
C	2. Review amounts for reasonableness by comparison with balances at end of preceding period, related expense accounts, etc.	____	____	____
C	3. For material amounts, ascertain propriety of balances by review of calculations and supporting documents.	____	____	____
C	4. Consider confirmation of balances.	____	____	____
C	5. Trace selected amounts to disposition in subsequent period.	____	____	____
D	6. Determine that accounting treatment is in accordance with GAAP.	____	____	____
	F. Other Auditing Procedures—Municipal Solid Waste Landfill Closure and Postclosure Care Costs			
[D]	1. Review and document entity's policies concerning estimating and accounting for municipal solid waste landfill closure and postclosure care costs.	____	____	____
D	2. Obtain copy of client's computation of costs for the current period.	____	____	____
D	*a.* Compare to prior period's computation to determine whether assumptions or methods of calculation have changed. (If an engineer is used, SAS No. 73 [AU Section 336] must be followed.)	____	____	____
D	*b.* Trace cumulative capacity used to supporting documentation. Compare to prior year's amount and current year's additions.	____	____	____
D	*c.* Determine whether computations have been adjusted for inflation and current changes in federal, state, or local laws and regulations.	____	____	____
D F	*d.* Trace current period costs and total liability to financial statements and determine that accounting and reporting are proper for the applicable fund type (governmental or proprietary).	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
D F	3. Compare information obtained in preceding procedure with information disclosed in notes to financial statements and ascertain that disclosures are in accordance with GASB Statement No. 18, *Accounting for Municipal Solid Waste Landfill Closure and Postclosure Care Costs.*	____	____	____

G. Overall Conclusions

1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:

a.	Expenditure/expense accounts include all costs and expenses applicable to the period and all losses and estimated future expenses that should be reflected in the period and that classification is consistent with the accounting system and generally accepted accounting principles;	____	____	____
b.	Accounts payable are properly authorized, represent the correct amounts of currently payable items and reflect all outstanding obligations;	____	____	____
c.	Prepaid and accrued accounts are properly stated;	____	____	____
d.	Account descriptions, classifications, and related disclosures are adequate and not misleading;	____	____	____
e.	All loss contingencies are identified and recorded or disclosed; and,	____	____	____
f.	Legal requirements relating to purchasing, payrolls and disbursements have been complied with;	____	____	____
g.	Municipal solid waste landfill closure and postclosure care costs have been reasonably estimated and are being accounted for in accordance with generally accepted accounting principles;

VII. Inventories

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Inventories physically exist, in good condition, unencumbered by pledge or lien. (Assertions 1, 2, and 3)

B. The accounts reflect all inventory held for sale or use in the ordinary course of operations. (Assertions 3 and 5)

C. Estimates of realizable value are carefully and consistently made. (Assertion 4)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1.	Review the understanding of internal control over inventory and the preliminary assessment of control risk.	____	____	____
2.	For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.	____	____	____
3.	Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.	____	____	____

	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on inventories and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.	____	____	____
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.	____	____	____
	C. Other Auditing Procedures			
A B	1. Observe the taking of physical inventories.	____	____	____
	a. Review client's arrangements for the physical inventory, paying particular attention to controls to ensure completeness of the physical count.	____	____	____
	b. Make test counts of various items, recording description and quantities of items selected.	____	____	____
	c. Inspect inventory for evidence of damaged items and/or obsolete goods and determine that such stock has been appropriately identified in the inventory count.	____	____	____
	d. Inspect inventory for unusual concentration or overstocking of particular items, unusual storage which could cause difficult or impossible count of items, and any other unusual conditions which need to be investigated.	____	____	____
	e. Prepare a memorandum for the files describing procedures used and activities noted during the physical inventory and express some conclusion as to whether it appeared that the physical inventory was conducted in such a manner that all inventory was properly counted.	____	____	____
A B	2. Ascertain that proper cut-off is effected with respect to purchases and consumption.	____	____	____
B	3. Trace quantities and descriptions per audit test counts into final inventory sheets.	____	____	____
B C	4. Test clerical accuracy of inventories as to:			
	a. Unit prices	____	____	____
	b. Extensions	____	____	____
	c. Footings	____	____	____
	d. Totals to summaries	____	____	____
C	5. Select several items included in the inventory test counts and verify prices to determine that the inventory has been consistently valued.	____	____	____

Obj.		Done By	Date	W/P Ref.
A C	6. Review inventory issuance records for evidence of obsolete inventory.	____	____	____
A C	7. Ascertain that obsolete and damaged stock has been identified and appropriately valued.	____	____	____
B	8. Compare the dollar amount of inventory by fund to prior periods and investigate any material fluctuations. (Consider the reasonableness of the change in relation to the expected change.)	____	____	____
[C]	9. Compute and analyze turnover rates for significant inventories.	____	____	____

D. Overall Conclusions

1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:
   - *a.* Inventories physically exist, in good condition, unencumbered by pledge or lien; ____ ____ ____
   - *b.* The accounts reflect all inventory held for sale or use in the ordinary course of operations; ____ ____ ____
   - *c.* Cost of inventory items is measured in accordance with generally accepted accounting principles, consistently applied; and ____ ____ ____
   - *d.* Estimates of realizable value are carefully and consistently made; ____ ____ ____

VIII. Capital Expenditures and Related Fund and Account Group Activity (for proprietary funds, use Audit Program in AAM section 5400.090)

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Property and equipment recorded in the general fixed assets account group represent a valid listing of the capitalized cost of assets purchased, constructed, donated, or leased and physically on hand. (Assertions 1, 2, and 3)

B. Capital expenditures represent a complete and valid listing of all costs incurred by the acquiring fund of the property and equipment acquired during the period, and costs that meet the capitalization policy are excluded from repair and maintenance and similar expenditure accounts. (Assertions 2, 4, and 5)

C. Capitalized costs and, if applicable, related depreciation associated with all fixed assets no longer owned or possessed have been removed from the General Fixed Asset Account Group (GFAAG). (Assertions 1, 4, and 5)

D. Property and equipment is stated at historical or estimated historical cost. Donated assets are recorded at their estimated fair value at the date of donation. (Assertions 4 and 5)

E. Capital expenditures are accounted for properly by fund type; fixed assets capitalized are classified properly by major classes of assets and related sources of funding; and related disclosures are adequate. (Assertions 2, 4, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedures only secondarily accomplishes the objective.

Obj.		Done By	Date	W/P Ref.
	F. Property transferred between GFAAG and proprietary funds is appropriately recognized.			
	A. Evaluation of Internal Control			
	1. Review the understanding of internal control over capital assets and capital expenditure transactions and the preliminary assessment of control risk.	____	____	____
	2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.	____	____	____
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.	____	____	____
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on capital expenditures and capital assets and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.	____	____	____
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.	____	____	____
	C. Other Auditing Procedures—Capital Expenditures—Equipment			
A E	1. Review minutes of governing authority for approval of purchase, if applicable, and for classification in proper fund.	____	____	____
A B D	2. Examine invoices or other documentation for capital expenditures during the period.	____	____	____
[A]	3. Where applicable, review bids for compliance with state or local bid laws and regulations.	____	____	____
	4. Document entity's capitalization policy.	____	____	____
A D E	5. Trace selected capital expenditures into the general fixed assets account group, noting agreement of description and amount, classification, and compliance with capitalization policy.	____	____	____
	D. Other Auditing Procedures—Capital Expenditures—Construction			
A E	1. Review minutes of governing authority for approval of construction contract, if applicable.	____	____	____
[A]	2. Where applicable, review bids for compliance with state or local bid laws and regulations.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.			Done By	Date	W/P Ref.
	3.	For major construction contracts:			
[B]		*a.* Review and brief contract and change orders.			
B		*b.* Examine documentary support for payments.			
B		*c.* Determine that amounts are paid in accordance with the terms of the contracts.			
B	4.	Ascertain amounts of contracts payable, including retainage withheld, which are due but unpaid and trace to liability accounts in general ledger.			
[B]	5.	Compare amounts of major contracts (including change orders) to amounts appropriated for the project. Determine if additional funds will be required for completion.			
A D E	6.	Trace completed construction to closing and transfer to GFAAG, noting proper classification by major class of assets and related sources of funding.			
	E.	**Other Auditing Procedures—Leases**			
[B]	1.	Obtain copies of major leases for equipment and/or facilities.			
A E	2.	Review minutes of governing body for approval of lease agreement.			
[A] E	3.	From a review of the lease, determine if the lease is an operating lease or capital lease.			
A B D E	4.	If lease is a capital lease:			
		a. Determine that transaction has been recorded in accordance with generally accepted accounting principles (as described in GASB Codification section L20).			
		b. Trace recording of cost of the asset to capital expenditure accounts (if lease is new in the period under audit) or to the GFAAG (if lease originated in a prior fiscal period).			
		c. Trace unpaid lease amounts to general long term debt account group (GTLDAG).			
	F.	**Other Auditing Procedures—GFAAG**			
A	1.	Obtain detailed listing of property records and reconcile with the appropriate control accounts in the general ledger.			
A B	2.	Physically inspect a sample of fixed assets and trace into detailed property records.			
	3.	Obtain a listing of fixed assets disposed of during the year.			
C		*a.* Determine that disposals were properly authorized (and, if applicable, properly advertised) and were removed from the detailed property records.			

Obj.			Done By	Date	W/P Ref.
[C]		*b.* Trace proceeds into the record of cash receipts or receivables.			
[C]		*c.* Determine that proceeds have been recorded in proper fund in accordance with state or local laws and regulations.			
D E	4.	If the entity records an allowance for depreciation on general fixed assets, review allowances for accuracy of additions and deletions during the year and reasonableness of ending balances.			
[E]	5.	Document client's policy regarding insurance of general fixed assets.			
E		*a.* If applicable, inspect major insurance policies to determine coverage and compliance with entity's policy.			
	6.	Determine that property transfers between the GFAAG and proprietary funds are appropriately recognized.			

G. Overall Conclusions

1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:
   - *a.* Property and equipment recorded in the GFAAG account group represent a valid listing of the capitalized cost of assets purchased, constructed, donated, or leased and physically on hand.
   - *b.* Capital expenditures represent a complete and valid listing of all costs incurred by the acquiring fund of the property and equipment acquired during the period, and costs that meet the capitalization policy are excluded from repair and maintenance and similar expenditure accounts.
   - *c.* Capitalized costs and, if applicable, related depreciation associated with all fixed assets no longer owned or possessed have been removed from the GFAAG.
   - *d.* The cost or other basis of recording property and equipment is in accordance with generally accepted accounting principles.
   - *e.* Capital expenditures are accounted for properly by fund type; fixed assets capitalized are classified properly by major classes of assets and related sources of funding; and related disclosures are adequate.

This audit program has been completed in accordance with firm policy.

IX. Debt and Debt Service

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Debt is authorized and recorded in the proper fund type or the GLTDAG. (Assertions 1, 2, and 3)

B. All indebtedness of the governmental unit is identified, recorded, and disclosed. (Assertions 2, 3, and 5)

C. The governmental unit has complied with the provisions of indentures and agreements related to debt, including provisions on the use of proceeds. (Assertions 3, 4, and 5)

D. Debt service expenditures (principal and interest payable) are properly recorded, classified, and disclosed for current and future periods. (Assertions 2 and 5)

E. Debt and related restrictions, guarantees, and commitments are properly presented in the combined financial statements, and related disclosures are adequate. (Assertions 2 and 5)

F. If the government is subject to the rebate calculation and refund requirement of the Tax Reform Act of 1986 (TRA):

   a. The calculation has been made as required by law or regulation (annually on the anniversary date of each bond issue);

   b. If applicable, the refund has been made as required (30 days after the end of the fifth rebate year); and

   c. Liabilities resulting from a failure to comply with rebate and refund requirements have been properly recorded as a loss or contingency and/or disclosure has been made in the notes of potential loss of tax-exempt status. (Assertions 3 and 5)

G. Conduit debt obligations and debt defeasances are recorded and disclosed in accordance with GAAP. (Assertions 2 and 5)

Obj.		Done By	Date	W/P Ref.

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1. Review the understanding of internal control over debt and debt service transactions and the preliminary assessment of control risk. ____ ____ ____

2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk. ____ ____ ____

3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests. ____ ____ ____

B. Analytical Procedures

1. Review the planning procedures applicable to analytical procedures performed on debt and debt service and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures. ____ ____ ____

2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation. ____ ____ ____

C. Other Auditing Procedures—Notes and Tax Anticipation Warrants

A 1. Determine that all obligations of this nature have been properly authorized. ____ ____ ____

B C 2. Review applicable documents to determine interest rates, collateral, liens, and security agreements, if any. ____ ____ ____

B C 3. Confirm outstanding balances and other pertinent information (see 2 above) with note holders. ____ ____ ____

A B C 4. Determine that warrants, etc., have not been issued in excess of legal limitations and confirm that payments have been made in accordance with legal requirements. ____ ____ ____

D 5. Review interest paid or accrued for reasonableness. Recompute on a test basis. ____ ____ ____

Obj.		Done By	Date	W/P Ref.
	D. Other Auditing Procedures—Loans and Advances			
A	1. Determine that all obligations of this nature have been properly authorized.	____	____	____
B C	2. Review applicable documents to determine interest rates, collateral, liens, and security agreements, if any.	____	____	____
B C	3. Confirm outstanding balances and other pertinent information (see 2 above) with note holders.	____	____	____
D	4. Review interest paid or accrued for reasonableness. Recompute on a test basis.	____	____	____
	E. Other Auditing Procedures—Bond and Interest Expenditures/Expenses			
A C	1. Examine provisions of bond ordinances and tax levies for retirement of bonds and interest and test compliance therewith.	____	____	____
	a. Compute required balances of restrictive accounts required by bond ordinance and compare to amounts actually on deposit.	____	____	____
	b. Review transactions in restrictive accounts during period under audit to determine that deposits/transfers are being made at intervals/dates required by the bond ordinance.	____	____	____
	2. Obtain maturity schedule for outstanding bonds:			
B D	*a.* Trace amounts maturing currently to expenditure/expense accounts for interest and principal.	____	____	____
B D	*b.* Trace unmatured bond principal to general long term debt account group or applicable proprietary fund(s).	____	____	____
C D	3. Confirm directly with the paying agent the amounts transmitted to the paying agent during the year, amount of bonds and interest retired during the year, and any year end balances (including canceled bonds and coupons).	____	____	____
	4. For bonds issued during the fiscal year under audit:			
A	*a.* Trace approval of issuance to minutes of governing body.	____	____	____
A	*b.* If applicable, review approval from third parties.	____	____	____
B C D	*c.* Trace proceeds from bond issuance to determine they have been handled as specified in the bond ordinance.	____	____	____
D E	*d.* Verify that bonds have been recorded in the GLTDAG or applicable proprietary fund(s).	____	____	____
D E	5. Determine that cash on hand with the paying agent is recorded as both an asset and a liability.	____	____	____
E	6. Determine that the total outstanding debt does not exceed the legal restrictions.	____	____	____

Obj.		Done By	Date	W/P Ref.
C D E	7. For advance refundings and in-substance defeasance of debt:			
	a. Determine that refunding transaction has been accounted for in accordance with generally accepted accounting principles.	____	____	____
	b. Trace applicable disclosures to supporting documentation.	____	____	____
	F. Other Auditing Procedures—Arbitrage Rebate and Refund Requirements Under the Tax Reform Act of 1986			
F	1. Obtain a listing of obligations issued since August 15, 1986, the effective date of 1986 TRA.	____	____	____
F	2. Obtain for each bond issue the certificate as to arbitrage issued by bond counsel (which is essential for an understanding of the compliance requirements relative to a bond issue).	____	____	____
F	3. Determine whether:			
	a. The foregoing bonds are subject to arbitrage rebate calculation and refund requirements of the TRA;	____	____	____
	b. The procedures adopted to ensure compliance with the arbitrage provisions of TRA are adequate, including the maintenance of accounting records by debt issue for proceeds, related investment earnings, and related rebate amounts, if any;	____	____	____
	c. Debt proceeds and bond issue reserve funds have been invested and the nature of the investment;	____	____	____
	d. The arbitrage rebate calculation has been made annually on the bond issue anniversary date and whether the rebate amount has been placed in a separate account;	____	____	____
	e. The appropriate rebate refund payment (90 percent of the calculated rebate amount and all interest earned on the rebate amount) was made to the U.S. Treasury within 30 days after the end of the fifth rebate year;	____	____	____
	f. Any penalties have been imposed by the Internal Revenue Service for failure to comply with the TRA; and,	____	____	____
	g. The government has been advised of the possible loss of tax exempt status on bond issues for failure to comply with the provisions of the TRA.	____	____	____
F	4. Obtain client's worksheets for computing arbitrage liability.	____	____	____
	a. Trace date and amount of deposits and disbursements to supporting accounting records.	____	____	____
	b. Review client's computations for reasonableness.	____	____	____
	c. Determine whether arbitrage liabilities have been recorded/disclosed in accordance with GAAP.	____	____	____
[C][F]	5. Determine whether the government's record retention policy requires records to be maintained for 6 years after the bonds are retired.	____	____	____

X. Interfund Transactions and Fund Equity

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. All recorded interfund transactions, and changes in reserved, designated, and undesignated fund balance are based on actual transactions between funds and are in accordance with any contractual or legal requirements. (Assertions 1, 2, and 4)

B. All interfund transactions and reservations and designations of fund balance are identified, recorded, and disclosed. (Assertions 2 and 5)

C. Reserves required by law or contractual agreement comply with contractual or legal restrictions. Interfund transactions are in accordance with budget, legislative, or management authorizations, as applicable. (Assertions 2, 3, and 5)

D. Interfund transactions are recorded at the correct amounts in the proper funds and are valued at appropriate amounts. (Assertions 3 and 4)

E. All balance sheet interfund balances between funds are reconciled and disclosed, and all reserves and designations are properly classified and adequately described. (Assertions 2 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1. Review the understanding of internal control over fund equity and interfund transactions and the preliminary assessment of control risk. ____ ____ ____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.	____	____	____
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.	____	____	____
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on interfund transactions and fund equity and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.	____	____	____
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.	____	____	____
	C. Other Auditing Procedures—Interfund Transactions			
[A]	1. Obtain or prepare a schedule of transfers between funds and of all interfund account balances at year end.	____	____	____
A C	2. Determine that all interfund balances are in reciprocal balance.	____	____	____
[A]	3. Review minutes of local government, adopted budget, and appropriate bond ordinances for authorization of interfund activity.	____	____	____
A C E	4. Determine that all transfers are properly classified as operating or equity and reported accordingly in the financial statements.	____	____	____
B D F	5. Review ending balances of accounts as to:			
	a. Aging of balances.	____	____	____
	b. Reason for transactions.	____	____	____
	c. Method of liquidation anticipated.	____	____	____
	d. Proper reporting classification.	____	____	____
	e. Collectibility.	____	____	____
	D. Other Auditing Procedures—Fund Equity			
A	1. Review minutes of the governing body, charter, and debt ordinances or other similar documents to identify the authorizations for reservations or designations of fund balances.	____	____	____
A B C E	2. Determine whether reservations or designations of fund balance have been made in compliance with the applicable law/regulation and are properly disclosed in the financial statements.	____	____	____

Obj.		Done By	Date	W/P Ref.
	a. If applicable, reconcile reserve for encumbrances to information on encumbrances developed at AAM section 12,200.060, "Expenditures, Expenses, and Payables," item D.1.	____	____	____
B E	3. Analyze all transactions to fund balances or retained earnings accounts for the year to determine that all such transactions are properly reported in the financial statements or notes.	____	____	____
E	4. Verify the validity of any adjustment to the fund balance/retained earnings accounts, and determine appropriate reporting.	____	____	____
	E. Overall Conclusions			
	1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:			
	a. All recorded interfund transactions, and changes in reserved, designated, and undesignated fund balance are based on actual transactions between funds and are in accordance with any contractual or legal requirements.	____	____	____
	b. All interfund transactions and reservations and designations of fund balance are identified, recorded, and disclosed.	____	____	____
	c. Reserves required by law or contractual agreement comply with contractual or legal restrictions. Interfund transactions are in accordance with budget, legislative, or management authorizations, as applicable.	____	____	____
	d. Interfund transactions are recorded at the correct amounts in the proper funds and are valued at appropriate amounts.	____	____	____
	e. All balance sheet interfund balances between funds are reconciled and disclosed, and all reserves and designations are properly classified and adequately described.	____	____	____

XI. Proprietary Funds—Special Topics

Note: Most of the audit procedures applicable to proprietary funds will be completed in connection with other audit programs. However, certain types of accounts and transactions are so unique to proprietary funds that they have been separately addressed in this program.

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Utility or enterprise revenue accounts include all transactions that relate to the period. (Assertions 1, 2, and 5)

B. Utility or enterprise receivables are valid and are stated at the net realizable amount. (Assertions 1, 3, and 4)

C. Deposits received from customers and others have been properly recorded and are being accounted for in accordance with generally accepted accounting principles. (Assertions 1, 2, and 5)

D. Contributed capital has been accounted for in accordance with generally accepted accounting principles applied on a consistent basis. (Assertions 1, 2, 4, and 5)

E. Descriptions, classifications, and related disclosures are adequate and not misleading. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1. Review the understanding of internal control over proprietary fund revenues and receivables and deposits and the preliminary assessment of control risk. ____ ____ ____

Obj.		Done By	Date	W/P Ref.
	2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.	____	____	____
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.	____	____	____
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on proprietary fund revenues, receivables, and deposits and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.	____	____	____
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.	____	____	____
	C. Other Auditing Procedures—Proprietary Fund Revenues			
A [B]	1. Obtain rate schedules for services and determine that rates have been properly authorized.	____	____	____
A [B]	*a.* Where charges are based on variable quantities or volumes of usage:			
	(1) Test records of usage, such as meter readers' reports, to determine reliability of usage data.	____	____	____
	(2) Determine reasonableness of enterprise revenues when compared to records showing the usage/consumption of goods or services.	____	____	____
	(3) Compute average revenue per unit of usage/consumption and compare to average for prior years.	____	____	____
	(4) Compare records of usage with records of production; investigate and explain any unusual differences between them.	____	____	____
A [B]	*b.* Where charges are based on direct and allocated costs:			
	(1) Determine method used by client to accumulate direct costs and/or allocated costs for each customer.	____	____	____
	(2) Trace direct costs into customers' ledger to determine that costs have been properly accumulated.	____	____	____
	(3) Recompute allocated costs to determine that they have been properly assigned to individual customers.	____	____	____
A B	*c.* If cycle billing is used, obtain client's computation of unbilled service receivables and—			
	(1) Review for accuracy of computation	____	____	____
	(2) Trace billings to subsequent periods	____	____	____

Obj.		Done By	Date	W/P Ref.
	(3) Agree total of unbilled service to general ledger account.			
A	2. For selected accounts:			
	a. Trace records of usage (such as meter reader reports) to usage shown on customer's bill.			
	b. Recompute billing, making sure that authorized rates are in use.			
	D. Other Auditing Procedures—Utility or Enterprise Receivables			
A B	1. Obtain aged listing of accounts receivable. Test accuracy of listing and reconcile balance with general ledger.			
B	2. Investigate individual accounts with large or unusual balances; trace to subsequent transactions.			
A B	3. Consider confirming accounts receivable directly with customers. If receivables are not confirmed, however, the reason for nonconfirmation must be documented. One of the following is acceptable:			
	a. Accounts receivable are immaterial to the financial statements.			
	b. Use of confirmations would be ineffective.			
	c. Combined assessed level of inherent risk and control risk is low, and the assessed level, in conjunction with the evidence expected to be provided by analytical procedures or other substantive tests of details, is sufficient to reduce audit risk to an acceptably low level for the applicable financial statement assertions.			
A B	4. Obtain or list subsequent collections of past due items to date of field work.			
B	5. Obtain list of uncollectible accounts written off during the year and of all credits issued during the year, and review for authority and propriety.			
B F	6. Review collectibility of accounts with responsible personnel and determine that proper allowance is established for uncollectible accounts.			
	E. Other Auditing Procedures—Deposits			
C	1. If deposit liabilities are not material to the financial statements, review liability for reasonableness and explain any unusual variations from prior years. Otherwise—			
C	2. Obtain listing of deposits (with indication of purpose of deposit if not otherwise noted) and reconcile to general ledger.			
C	3. Confirm balances on a test basis.			

Obj.			Done By	Date	W/P Ref.
	4.	If interest is paid—			
C		*a.* Examine documentation authorizing payment of interest and determine that proper rate is being paid/accrued.	____	____	____
C		*b.* Test interest payments made during the period and accrued as of the end of the period being audited.	____	____	____
[C] F	5.	Review the provisions of any related ordinances and test for compliance.	____	____	____
C F	6.	Determine whether deposits are refundable in full or in part.	____	____	____
	F.	**Other Auditing Procedures—Contributed Capital**			
E	1.	Analyze all changes in contributed capital during the period and determine whether recording is in accordance with GAAP.	____	____	____
E	2.	Analyze income accounts to determine whether any contributions, grants or system development fees have been received during the period and recorded as revenue. Determine the propriety of the accounting and whether any such revenues should be considered to be contributed capital.	____	____	____
E	3.	If depreciation on fixed assets financed by contributed capital is closed to contributed capital:			
		a. Determine that the government's accounting records have properly identified fixed assets financed by contributed capital.	____	____	____
		b. Review computation of depreciation on such assets and reconcile total depreciation thereon to amounts charged to contributed capital.	____	____	____
	G.	**Overall Conclusions**			
	1.	In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:			
		a. Utility or enterprise revenue accounts include all transactions that relate to the period.	____	____	____
		b. Utility or enterprise receivables are valid and are stated at the net realizable amount.	____	____	____
		c. Deposits received from customers and others have been properly recorded and are being accounted for in accordance with generally accepted accounting principles.	____	____	____
		d. Contributed capital has been accounted for in accordance with generally accepted accounting principles applied on a consistent basis.	____	____	____
		e. Descriptions, classifications, and related disclosures are adequate and not misleading.	____	____	____

XII. Risk Financing and Insurance Related Activities

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. The local government has adopted policies to provide reasonable coverage for risk of loss. (Assertion 3)

B. Self-insurance programs are properly authorized and are in accordance with state and local laws and regulations. (Assertion 3)

C. Self-insurance program premiums have been properly assessed and recorded in benefiting funds. (Assertions 3, 4, and 5)

D. Claims payable for self-insurance programs have been properly determined and recorded. (Assertions 2, 3, 4, and 5)

E. Claims paid by self-insurance programs conform to self-insurance program requirements. (Assertion 3)

F. Risk financing and insurance-related activities have been accounted for in accordance with generally accepted accounting principles. (Assertions 1, 2, and 5)

G. Note disclosures relative to the entity's insurance programs and risks provide adequate disclosure and are in accordance with disclosures required under generally accepted accounting principles. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Obj.		Done By	Date	W/P Ref.
	A. Evaluation of Internal Control			
	1. Review the understanding of internal control relative to insurance related issues and transactions and the preliminary assessment of control risk.			
	2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.			
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.			
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on insurance and risk related transactions and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.			
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.			
	C. Other Auditing Procedures—Risk Related—General			
A	1. Obtain copy of entity's adopted policy relative to risk financing and related insurance coverage.			
A	2. Determine that the policy has been considered and adopted by the applicable governing body.			
	3. Prepare a schedule showing the types of risks of loss to which the entity is exposed and how those risks are handled (for example, through commercial insurance, self-insurance, public risk pool, etc.).			
A	*a.* Consider whether material risks of loss have not been addressed in the entity's policies.			
G	*b.* Review financial statements for adequacy of disclosure regarding entity's risk policies and, if applicable, any material uninsured risks.			
	4. If the entity's policy is to purchase insurance coverage for identified risks—			
A	*a.* Determine compliance of purchased insurance with adopted policy.			
A [F]	*b.* For selected premiums, determine whether payments have been made in accordance with policy terms and whether charges have been made to the proper fund/function.			

Obj.		Done By	Date	W/P Ref.
A G	*c.* From analysis of selected policies, determine whether there has been a transfer of risks. If not, determine that premiums and claims have been properly recorded to reflect the continuing risks of refunds or assessments.	____	____	____
	5. If the entity participates in a public entity risk pool(s)—			
[A]	*a.* Determine the type of public entity risk pool (i.e., risk-sharing, insurance-purchasing, banking, or claims-servicing) and the type of entity risk handled by each pool.	____	____	____
A	*b.* Obtain copy of agreement with risk pool and determine whether all required payments have been made in accordance with the agreement and have been charged to the proper fund/function.	____	____	____
A F	*c.* Obtain copy of financial statements from public entity risk pool and determine whether audit entity has any continuing contingencies (asset or liability) relative thereto.	____	____	____
G	*d.* Review notes to financial statements for adequacy of disclosures regarding risks being handled by public entity risk pool(s).	____	____	____
	D. Other Auditing Procedures—Self Insurance Funds			
A B	1. For risks of loss retained by the entity, determine methods used to determine estimated losses from claims (including losses incurred but not reported).	____	____	____
D	*a.* If an actuarial report is used to record estimated losses, obtain copy of report and perform procedures relative thereto as required by SAS No. 73, *Using the Work of a Specialist* [AU section 336].	____	____	____
D	*b.* If an actuarial report is not used—			
	(1) Review methods used to determine estimated losses for reasonableness and logic.	____	____	____
	(2) Trace information used in computation to historical data.	____	____	____
	(3) For selected categories of loss, recompute estimated losses.	____	____	____
	(4) Consider need to obtain services of a specialist.	____	____	____
D E	2. Determine that claims and related expenditures/expenses have been recognized in accordance with GASB Codification section C50.	____	____	____
E	3. Select a representative sample of claims paid and verify that the claimed losses were documented and that the payments made conform to program provisions.	____	____	____
	4. For self-insurance programs accounted for within a general fund:			
C F	*a.* Determine that claims payable are recorded using the modified accrual basis, with the current portion recorded as an expenditure and a fund liability and the long-term portion recorded in the general long-term debt account group.	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
C F	*b.* Review method of charging losses to other funds, and determine that any amounts charged to other funds in excess of total expenditures and liabilities have been recorded as operating transfers.			
	5. For self-insurance programs accounted for within an internal service fund:			
C	*a.* Determine that premiums are:			
	(1) Recorded as charges for services in the internal service fund;			
	(2) Recorded as expenditures/expenses of the insured funds; and,			
	(3) Based on the loss experience of the internal service fund and allocated to the insured funds on a reasonable basis.			
C	*b.* Determine that total claims payable are reported as internal service funds liabilities.			
C F	*c.* Determine that consideration has been given to recording properly authorized interfund receivables and payables to eliminate internal service fund deficits.			
	(1) If receivables/payables have not been recorded, determine whether a feasible plan has been developed to eliminate the deficit within a reasonable period and whether such plan is properly disclosed.			
D	6. Correspond directly with client's attorney handling self-insurance claims regarding large or unusual claims which have not been settled.			
D	7. Examine claims paid subsequent to the close of the fiscal year to determine the existence of unrecorded payables.			
F	8. Determine that assets accumulated to pay claims are appropriately shown as reserved or designated for self insurance.			
G	9. Determine the accuracy and completeness of related note disclosures.			
	E. Overall Conclusions			
	1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:			
	a. The local government has adopted policies to provide reasonable coverage for risks of loss.			
	b. Self-insurance programs are properly authorized and are in accordance with state and local laws and regulations.			
	c. Self-insurance program premiums have been properly assessed and recorded in benefiting funds.			
	d. Claims payable for self-insurance programs have been properly determined and recorded.			
	e. Claims paid by self-insurance programs conform to self-insurance program requirements.

XIIIA. Fiduciary Funds (Other Than Pension Trust Funds)

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Agency funds have been properly established and maintained, and are reported in accordance with generally accepted accounting principles. (Assertions 1, 2, 3, 4, and 5)

B. Trust funds (other than pension trust funds) are being maintained in compliance with the applicable trust indentures and are reported in accordance with generally accepted accounting principles. (Assertions 1, 2, 3, 4, and 5)

C. Information and disclosures pertaining to PERS (other than pension trust funds administered by the entity) are in accordance with the requirements of generally accepted accounting principles. (Assertions 1, 2, and 4)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Evaluation of Internal Control

1. Review the understanding of internal control over fiduciary fund transactions and the preliminary assessment of control risk. ____ ____ ____

2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk. ____ ____ ____

Obj.		Done By	Date	W/P Ref.

XIIIB. Pension Trust Funds*

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. Investments reported in the financial statements are on hand in the name of the pension trust fund or held in custody and safekeeping by others in the name of and on behalf of the pension trust fund. (Assertions 1, 2, and 3)

B. Investments and the related income are properly valued, allocated, classified, and described in the financial statements. (Assertions 2, 4, and 5)

C. Adequate disclosure has been made of the pledging of any investments and credit risks are properly disclosed as required by GASB Statement No. 3. (Assertions 3 and 5)

D. The amounts received or due the plan have been determined in accordance with plan requirements and recorded and reported in conformity with generally accepted accounting principles. (Assertions 3, 4, and 5)

E. Benefit payment amounts conform to plan provisions. (Assertion 3)

F. Financial statement representations and disclosures are consistent with actuarial findings. (Assertions 4 and 5)

G. Applicable accounting principles have been consistently applied. (Assertions 4 and 5)

H. Required supplementary information has been presented in accordance with guidelines established for its presentation and measurement. (Assertions 2 and 5)

* This program assumes GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans*, and GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, have not been adopted. If GASB Statements No. 25 and 27 are adopted, the program must be modified.

	Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.			
	A. Evaluation of Internal Control			
	1. Review the understanding of internal control relative to pension trust funds and the preliminary assessment of control risk.			
	2. For those assertions in which the auditor seeks a further reduction in the assessed level of control risk, perform tests of the effectiveness of the control activities in order to support the reduction in assessed level of control risk.			
	3. Consider the understanding of internal control, the assessed level of control risk (together with assessment of inherent risk), and the acceptable level of detection risk to determine the nature, timing, and extent of substantive tests.			
	B. Analytical Procedures			
	1. Review the planning procedures applicable to analytical procedures performed on pension trust funds and consider the result of the procedures in determining the nature, timing, and extent of other audit procedures.			
	2. If analytical procedures are used for substantive testing purposes, document the basis for the expected relationship, the results of the comparison of the recorded amount to the expectation, and the results of the evaluation of unexpected differences between the recorded amount and the expectation.			
	C. Other Auditing Procedures—General			
B[D]F	1. Obtain copies of the following documents, if applicable:			
	a. Pension plan instruments, including amendments.			
	b. State and local laws and regulations authorizing the retirement program.			
	c. Minutes of meetings of governing board.			
	d. Agreements with trustees, investment advisers, and insurance companies.			
	e. Relevant policy and procedure manuals.			
	f. Service auditors' reports on the processing of transactions and applicable controls of service organization(s) responsible for processing data for the pension fund.			
	g. Current actuary's report on the retirement system.			
	D. Other Auditing Procedures—Investments			
[A][B] C G	1. Obtain schedule of investments and determine that investments are in accordance with the provisions of the plan.			

Obj.			Done By	Date	W/P Ref.
		a. Trace selected investment transactions to approval in minutes of governing board.			
		b. Reconcile balances to financial statements.			
A	2.	Obtain evidence (by confirmation or physical count) concerning the existence and ownership of the investments.			
B	3.	Obtain information concerning any liens, pledges, or other security interests by reviewing minutes, agreements, and confirmations.			
C G	4.	Determine that income accruing from investments has been properly allocated and recorded.			
C G	5.	Obtain market values at balance-sheet date and investigate significant differences from recorded values to determine if any write-downs are necessary.			
B	6.	Review GASB Statement No. 3 disclosures.			
A C	7.	Perform such procedures as necessary to satisfy audit objectives concerning plan investments administered by trustees.			
D	8.	For plan assets held by an insurance company:			
		a. Read the contracts between the contract holder and the insurance company.			
		b. Confirm with the insurance company:			
		(1) Contributions or premium payments.			
		(2) Interest, dividends, refunds, credits, and changes in value and whether such amounts have been charged or credited during the year on an estimated or actual basis.			
		(3) The contract value or the fair value of the funds at the plan's year-end and the basis for determining such values.			
		(4) The amount of insurance company fees and other expenses.			
		(5) Annuity purchases or benefits paid.			
		(6) Transfers between funds or accounts.			
		c. Reconcile the confirmed balances and transactions with amounts recorded and reported by the client.			
		d. Evaluate compliance with contract terms.			
		e. Evaluate reasonableness of amounts credited to the contracts.			
		f. Evaluate the sufficiency of related note disclosures.			
	E.	**Other Auditing Procedures—Contributions and Related Receivables**			
D	1.	Obtain a list of participating employers (for multi-employer plans).			

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.			Done By	Date	W/P Ref.
D	2.	Obtain a schedule showing, by employer, contributions received or receivable and compare to the list of participating employers.			
D G	3.	Test contribution reports for arithmetical accuracy, use of proper contribution rates, and use of proper payroll or salary base amount.			
D G	4.	Test posting from the employer contribution reports to participant records and from participant records to contribution reports.			
D G	5.	Reconcile contributions received to the plan's receipt records or trustee records.			
D G	6.	Confirm amounts contributed and receivable directly with selected contributors.			
D G	7.	Review accruals for conformance with generally accepted accounting principles and determine reasonableness of allowances for doubtful accounts.			
D	8.	Review note disclosures relative to pension plan contributions and related receivables.			
	F.	**Other Auditing Procedures—Benefit Payments and Payables**			
E G	1.	Obtain schedule of pension payments made during the year (including any lump sum refunds, if applicable, to members withdrawing from the plan) and reconcile to general ledger accounts.			
		a. Refer to plan provisions and recompute monthly benefits to selected employees retiring during the period under audit.			
		b. For selected employees withdrawing from the system during the year, trace refunds to supporting documentation.			
		c. Trace payments made during the year to selected employees who retired in prior years to prior year's working papers to determine that benefits have remained in accordance with plan provisions.			
E	2.	Evaluate the continued eligibility of participants or beneficiaries to whom payments have been made over an unusually long period of time.			
E	3.	Investigate benefit payment checks which have been outstanding for a long period of time.			
E G	4.	Evaluate benefit payment accruals for conformance with generally accepted accounting principles.			

Obj.		Done By	Date	W/P Ref.
	G. Other Auditing Procedures—Participants' Data and Plan Objectives			
D E	1. By reviewing pertinent sections of the pension plan instrument, statutes, or rules, identify participant data which should be tested because of its use in determining vesting, eligibility or benefit amounts (for example, demographic data, payroll data, benefit levels and options, etc.).	____	____	____
D	2. For selected participants, verify relevant participant file data by comparing it to corroborative employer records (such as payrolls, employee earnings records, personnel files, etc.).	____	____	____
	a. For selected employees, recompute vesting and compare to client's records.	____	____	____
D E	3. For selected employees, trace payroll data to participant file data.	____	____	____
F	4. With regard to actuarial valuations of defined benefit plans:			
	a. Obtain information concerning the professional qualifications and reputation of the actuarial firm and other information as required by SAS No. 73 [AU section 336].	____	____	____
	b. Obtain an understanding of the actuary's methods and assumptions.	____	____	____
	c. Submit an inquiry to the actuary concerning:			
	(1) Whether the actuarial valuation considers all pertinent provisions of the plan, including any changes to the plan or other events affecting the actuarial calculations.	____	____	____
	(2) Relationships between the actuary and the plan or an employer which may impair the actuary's objectivity.	____	____	____
	(3) Aggregate and selected individual participant data amounts used in the actuarial valuations.	____	____	____
	(4) Whether the actuary has reviewed the relevant portions of the financial statements and agrees with such information as presented.	____	____	____
	d. Verify the accuracy and completeness of the participant data used in the actuarial valuations.	____	____	____
D E	5. With respect to defined contribution plans:			
	a. Verify that employer contributions have been properly allocated.	____	____	____
	b. Verify that allocations of income or loss, investment appreciation or depreciation, administrative expenses, and forfeitures have been made in compliance with plan provisions.	____	____	____
	c. For selected participants, verify that employee contributions have been credited to the proper participant account and investment medium.	____	____	____
	d. Reconcile the sum of individual accounts to total net assets available for benefits.	____	____	____

Obj.		Done By	Date	W/P Ref.
H.	**Review Procedures—Required Supplementary Information**			
1.	With regard to historical trend information, inquire of management as to the methods used in preparing the information, including:			
a.	Whether it is measured and presented in accordance with the guidelines of GASB.	____	____	____
b.	Whether the methods of measurement or presentation have been changed from those of the prior period and the reasons for such changes, if any.	____	____	____
c.	Any significant assumptions or interpretations underlying the measurement or presentation.	____	____	____
2.	Compare the information for consistency with:			
a.	Audited financial statements.	____	____	____
b.	Other knowledge obtained during the examination of the financial statements.	____	____	____
c.	Measurement and presentation in accordance with GASB guidelines.	____	____	____
3.	Consider whether representations on required supplementary information should be included in the request for the management representation letter.	____	____	____
I.	**Overall Conclusions**			
1.	In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:			
a.	Investments reported in the financial statements are on hand in the name of the pension trust fund or held in custody and safekeeping by others in the name of and on behalf of the pension trust fund.	____	____	____
b.	Investments and the related income are properly valued, allocated, classified, and described in the financial statements.	____	____	____
c.	Adequate disclosure has been made of the pledging of any investments and credit risks are properly disclosed as required by GASB Statement No. 3.	____	____	____
d.	The amounts received or due the plan have been determined in accordance with plan requirements and recorded and reported in conformity with generally accepted accounting principles.	____	____	____
e.	Benefit payment amounts conform to plan provisions.	____	____	____
f.	Financial statement representations and disclosures are consistent with actuarial findings.	____	____	____
g.	Applicable accounting principles have been consistently applied.	____	____	____

XIV. Financial Reporting

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. The financial statements being reported upon are fairly stated in accordance with generally accepted accounting principles consistently applied (or in accordance with another comprehensive basis of accounting), including all required disclosures. (Assertions 1, 2, 3, 4, and 5)

B. The effect of any significant or unusual transactions occurring during the period from the balance-sheet date to the date of our report is adequately considered or disclosed in the financial statements. (Assertions 1, 2, 4, and 5)

C. Our report on the examination is appropriately worded, and in conformity with generally accepted auditing standards.

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Other Auditing Procedures

A	1.	Post all adjusting and reclassification journal entries that have properly been approved by firm and client personnel to the working papers, and give a copy of appropriate entries to the client for posting to the accounting records.	____	____	____
A	2.	Prepare a summary of passed adjustments which reflects the net effect of such adjustments on individual fund/fund type, account group, and discretely presented component unit assets, liabilities, equity, revenue, and expenditures.	____	____	____

Obj.			Done By	Date	W/P Ref.
		a. Determine if the overall effect on each fund type, account group, and discretely presented component unit is material and state conclusion in summary.			
		b. Consider the need for additional audit adjustments.			
A	3.	Extend trial balances and compare to amounts reported in the financial statements.			
	4.	Obtain signed management representation letter from responsible client officials. In addition to representations normally obtained in a GAAS audit, consider obtaining additional representations regarding:			
A		*a.* Acknowledging management's responsibility for entity's compliance with laws and regulations.			
A		*b.* The financial reporting entity's financial statements to be audited.			
A		*c.* The inclusion of all component units.			
A		*d.* The proper classification of funds and account groups.			
A		*e.* The proper approval of reserves or designations of fund equities.			
A		*f.* Compliance with laws and ordinances, including budget laws and ordinances.			
A B		*g.* Status of environmental related matters, including identification of any known or potential contamination requiring remediation.			
A		*h.* Representations relative to GASB-required supplementary information.			
A		*i.* Identification of all federal and state assistance programs, if applicable, and compliance with all related grant requirements.			
A B		*j.* Possible claims for disallowed costs or expenditures incurred under a federal financial assistance program.			
	5.	Review minutes of governing body and important committee meetings from audit date through _____.			
B		*a.* Consider whether any matters included in those minutes require further investigation to determine if the financial statements should be adjusted or disclosure regarding subsequent events should be made in the notes to financial statements.			
A B		*b.* Obtain signed minutes representation letter and ascertain that we have received and reviewed all minutes listed in the letter.			
A B	6.	Obtain from management a description and evaluation of litigation, claims and assessments that existed at the audit date and during the period from the audit date to the date the information is furnished, including an identification of those matters referred to legal counsel.

Obj.		Done By	Date	W/P Ref.
A B	7. Mail a letter of audit inquiry to client's attorney(s) to obtain corroboration of the information furnished by management concerning litigation, claims and assessments.			
A B	8. Ascertain that replies received from attorneys are complete and that all matters discussed therein have been considered for possible disclosure in the financial statements.			
A	9. Perform analytical procedures for overall review purposes.			

B. Other Auditing Procedures—Review of Subsequent Events

Scope of Review

From: _____ *(Audit date)*

To: _____ *(Report date—last date of significant field work)*

B	1. Review interim financial statements for period subsequent to balance-sheet date and compare them to statements being reported on as well as to statements for comparable prior periods. Investigate any significant differences, results, events, or changes in accounting method.			
B	2. Scan general ledger for subsequent period for any unusual entries or transactions and obtain explanation of entries noted.			
B	3. Inquire of responsible officials as to the following items (attach memorandum or comments regarding significant matters discussed):			
	a. Property and equipment:			
	(1) Commitments or plans for major purchases or sales of buildings/equipment.			
	(2) Loss of buildings/equipment due to fires, abandonment, etc.			
	b. New debt issuance or other borrowing, including important covenants agreed to in connection therewith.			
	c. Other matters:			
	(1) Wage negotiations or strikes in progress or pending.			
	(2) Loss of significant grant funds.			
	(3) Changes in accounting and/or financial policies.			
	(4) Illegal acts.			
	d. Others (list as applicable):

XV. Federal Financial Assistance (Single Audit)

Financial Statement Assertions

1. Existence or occurrence
2. Completeness
3. Rights and obligations
4. Valuation or allocation
5. Presentation and disclosure

Audit Objectives

A. The financial statements of the entity are presented in conformity with GAAP. (Assertions 1, 2, 3, 4, and 5)

B. The local government's internal control provides reasonable assurance that it is managing federal and state financial assistance programs in compliance with applicable laws and regulations. (Assertions 1 and 2)

C. The local government has complied with laws and regulations that have a material effect on the financial statements and on each major federal financial assistance program. (Assertions 1, 2, and 3)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

A. Audit Planning

C	1.	Review applicable laws, regulations, and other references governing performance of the single audit of federal financial assistance (see AAM section 12,210).	____	____	____
B	2.	Obtain a copy of the local government's single audit report from the preceding year. Make note of federal programs, reportable conditions relating to internal control, and any compliance findings. Obtain copy of client's corrective action plan. Determine if any state programs are to be included in the audit scope.	____	____	____
B [C]	3.	Review and discuss with responsible local government officials the procedures used to administer federal programs.	____	____	____

Obj.			Done By	Date	W/P Ref.
A C	4.	Obtain a schedule of federal financial assistance, reconcile the schedule to the general accounting records, and:			
		a. Determine that the schedule includes all types of federal assistance as defined by OMB Circular A-128, paragraph 5b.	____	____	____
		b. Determine that the schedule reports federal "programs," not individual grants. Federal programs are defined in the *Catalog of Federal Domestic Assistance.*	____	____	____
		c. Determine the "entity" for Single Audit purposes.	____	____	____
		d. Where appropriate, contact the cognizant agency and receive input on important areas.	____	____	____
		e. Determine that the schedule shows at a minimum:			
		(1) The program title and the CFDA number for each program, unless the program is not included in the *Catalog of Federal Domestic Assistance.* Those programs not included in the *Catalog* should be shown as other federal assistance;	____	____	____
		(2) Total expenditures for each federal program by grantor, department, or agency; and,	____	____	____
		(3) Total federal financial assistance expenditures.	____	____	____
	5.	Rank the federal programs in descending order by expenditure amount, determine the major program threshold, and identify the major federal financial assistance programs.	____	____	____
B	6.	For testing controls, if expenditures for all major programs do not exceed 50 percent of total federal financial assistance program expenditures, or if the local government has no major federal financial assistance programs, select the largest nonmajor programs until at least 50 percent of total federal financial assistance expenditures are included.	____	____	____
B	7.	Review samples selected during tests of internal control and the examination of the general purpose financial statements and identify nonmajor program transactions included therein.	____	____	____
A B C	8.	Prepare a working paper showing the federal programs to be subjected to further auditing procedures and indicate the nature of the procedures to be applied to each program. Such procedures may include:			
		a. Obtain an understanding of the internal control policies and procedures relevant to the programs administered (required for all federal programs: however, see PCIE Position Statement No. 3 that provides for the rotation of nonmajor programs on a 3-year basis for purposes of obtaining an understanding of internal control).	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. Internal control evaluation (required for all major programs and nonmajor programs selected pursuant to the "50 percent rule").			
	c. Program compliance review (required for all major programs to determine compliance with laws and regulations material in effect to the respective program).			
	d. Transaction compliance review (required for nonmajor program transaction selected for testing as a result of the audit of the general purpose financial statements).			
C	9. Obtain a copy of grant agreements for those programs selected for testing from the permanent file. Review the documents for unusual provisions, budgets, or other items of significance. Also, locate other sources of compliance information, for example the OMB *Compliance Supplement for Single Audits of State and Local Governments*, specific program regulations, the *Catalog of Federal Domestic Assistance*, etc.			
B [C]	10. While testing controls, obtain an understanding of the possible effects on each major program (and the largest nonmajor programs if the 50 percent rule must be applied) of applicable program laws, rules, and regulations, Document this understanding by listing those laws, rules, and regulations which may have a material effect on the allowability of program expenditures in the event of substantial noncompliance. These laws, rules, and regulations shall be considered during the evaluations of administrative controls, tests of transactions, and other procedures deemed necessary (e.g., tests of compliance with matching requirements).			
[A] C	11. Determine if the local government has an indirect cost allocation plan.			
[A] C	12. Determine the extent to which grantor funds have been disbursed to subrecipients.			
	13. Discuss with client the format desired for the Single Audit Report (included in the CAFR, separate Single Audit Report, etc.).			
	B. Internal Control Evaluation			
B	1. Identify the significant categories of internal control.			
B	2. For major and nonmajor programs, obtain an understanding of internal control policies and procedures relevant to the programs administered. (Note: PCIE Statement Nos. 2 and 3 permit obtaining an understanding of internal control for nonmajor programs on a 3-year cycle.)			
B	3. For major programs (and selected nonmajor programs selected pursuant to the "50 percent rule"), perform tests of controls to evaluate the effectiveness of the design and operation of the internal control policies and procedures relevant to preventing or detecting material noncompliance with:			

Obj.		Done By	Date	W/P Ref.
	a. Specific Requirements: For examples of common control procedures which should be evaluated as part of a basis for issuing an opinion on compliance with laws and regulations applicable to federal financial assistance programs, see AAM section 12,100.			
	(1) Types of services allowed or not allowed;	____	____	____
	(2) Eligibility;	____	____	____
	(3) Matching, level of effort, or earmarking;	____	____	____
	(4) Reporting;	____	____	____
	(5) Special tests and provisions.	____	____	____
	b. General Requirements: For examples of common control procedures which should be evaluated as part of a basis for issuing an opinion on compliance with laws and regulations applicable to federal financial assistance programs, see AAM section 12,100.			
	(1) Civil rights;	____	____	____
	(2) Political activity;	____	____	____
	(3) Cash management;	____	____	____
	(4) Davis-Bacon Act;	____	____	____
	(5) Relocation assistance and real property management;	____	____	____
	(6) Federal financial reports;	____	____	____
	(7) Allowable costs/cost principles;	____	____	____
	(8) Drug-Free Workplace Act;	____	____	____
	(9) Administrative requirements.	____	____	____
	c. Revise audit program as appropriate.	____	____	____
	C. Compliance Procedures			
A	1. For selected grants determine that grant receipts were properly recorded and classified, in compliance with grant conditions.	____	____	____
	a. Review receipts issued shortly before and shortly after year-end to determine that all cash collected has been recorded in the proper period.	____	____	____
A [C]	2. For each major federal and state program, select a sample of expenditures charged and determine whether:			
	a. Expenditures appeared reasonable and necessary for the program;	____	____	____
	b. Expenditures were for allowable charges under the terms of the program and were adequately documented;	____	____	____
	c. Expenditures were properly authorized and recorded as to program, account, amount, and period:	____	____	____
	d. Records document that those who received services or benefits were eligible to receive them;	____	____	____

Obj.		Done By	Date	W/P Ref.
	e. Expenditures were in accordance with the provisions of OMB *Compliance Supplement for Single Audits of State and Local Governments* applicable to the particular transaction;			
	f. Expenditures were in accordance with the provisions of OMB Circular A-87 applicable to the particular transaction;			
	g. Expenditures were in accordance with the provisions of OMB Circular A-102 and the "Common Rule" to the extent applicable to the grantor and the particular transaction; and,			
	h. Expenditures were in accordance with applicable state laws and program requirements.			
C	3. For each major federal and state program and selected nonmajor federal programs, as applicable, perform general (see supplemental audit program on general requirements) and specific compliance tests. List programs and attach separate work programs based on the *Compliance Supplement for Single Audits of State and Local Governments* or other sources (grants agreements, etc.):			
	a. _____			
	b. _____			
	c. _____			
	d. _____			
C	4. Determine that nonmajor program transactions tested as part of an audit of the general purpose financial statements comply with the laws and regulations applicable to each of the respective transactions. This includes the following:			
	a. Expenditures appeared reasonable and necessary for the program;			
	b. Expenditures were for allowable charges under the terms of the program and were adequately documented;			
	c. Expenditures were properly authorized and recorded as to account, amount, and period.			
	d. Records document that those who received services or benefits were eligible to receive them; and,			
	e. Amounts were determined according to Circular A-87 and Circular A-102.			
C	**D. Test of Subrecipient Compliance**			
	If the local government does not pass through federal monies to subrecipients (receiving at least $25,000) of federal programs, check here _____ and omit the balance of this section.			
	1. Determine all subrecipients receiving at least $25,000.			
	2. Review the local government's controls established to monitor that the subrecipient spent the federal funds in compliance with applicable laws and regulations. (OMB Circulars A-87, A-102, and A-128)			

Obj.		Done By	Date	W/P Ref.
	3. Determine that the local government monitored the subrecipient audit reports (the subrecipient must meet the audit requirements of A-110 or A-128) and has taken any corrective measures required.			
	E. Property			
A	1. For selected property items acquired with grant funds, review the property records to determine that the records include a description of the property, a serial number or other identification number, the source of the property, who holds title, acquisition date, cost, location, use and condition of the property, percentage of federal participation, and disposition data.			
	2. Determine that title to the property has been properly recorded in the government's name.			
	3. Determine that a physical inventory of property is taken and reconciled to the property records at least once every two years.			
	4. For property dispositions, review supporting documentation to ascertain the conditions of disposition and determine that any required settlements have been made with the awarding agency.			
	F. Reporting on Federal and State Financial Assistance			
	1. Determine that the signed management representation letter(s) contained references regarding Single Audit representations.			
	2. If the local government requests that the Report on Federal and State Financial Assistance be included with their annual financial statements, prepare the Independent Auditor's Report on such financial statements and determine that it is appropriately worded and dated.			
	3. If the client requests a separate Report on Federal and State (if applicable) Financial Assistance, prepare the Independent Auditor's Report on the schedule of Federal and State financial assistance.			
	4. Prepare the schedule of findings and questioned costs. (See AAM section 12,200.190.)			
	5. Prepare the Independent Auditor's Report on internal control based on an evaluation made as part of the audit of the general purpose financial statements.			
	6. Prepare the Independent Auditor's Report on Internal Control Used in Administering Federal Financial Assistance Programs required by the Single Audit Act.			
	7. Prepare the Independent Auditor's Report on compliance with laws and regulations that may have a material effect on the general purpose financial statements.			

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	8. Prepare the Independent Auditor's Reports on compliance required by the Single Audit Act.	____	____	____
	9. Review the Single Audit Report draft with appropriate local government officials.	____	____	____

G. Overall Conclusion

1. In our opinion, we have obtained sufficient and competent evidential matter to provide reasonable assurance that:

	a. The local government has complied with laws and regulations that may have a material effect upon the financial statements;	____	____	____
	b. The local government's internal control provides reasonable assurance that the local government is managing its federal programs according to the applicable laws and regulations;	____	____	____
	c. The local government has complied with laws and regulations that may have a material effect upon each major federal program, according to generally accepted auditing standards, the provisions of *Government Auditing Standards*, promulgated by the U.S. General Accounting Office, as they pertain to financial audits, the Single Audit Act of 1984 (Pub. Law No. 95-502) the provisions of the Office of Management and Budget's Circular No. A-128, *Audits of State and Local Governments*, and the *Compliance Supplement for Single Audits of State and Local Governments.*

XVI. Financial Assistance Supplement

A. Test of General Compliance Requirements

1. Political Activity

Compliance Requirement—Federal funds cannot be used for partisan political activity of any kind by any person or organization involved in the administration of federally-assisted programs. (Hatch Act (5 U.S.C. 1501-1508) and Intergovernmental Personnel Act of 1970 as amended by Title VI of Civil Service Reform Act (Public Law 95-454), Section 4728).

Auditing Procedures

a.	Test the expenditures and related records for indications of lobbying activities, publications, or other materials intended for influencing legislation or similar type costs.	____	____	____
b.	Test the personnel and payroll records, and identify persons whose responsibilities or activities include political activity.	____	____	____
c.	Test whether the above costs, if any exist, are charged directly or indirectly, to federally-assisted programs.	____	____	____

2. Davis-Bacon Act

Compliance Requirement—When required by the federal grant program legislation, all laborers and mechanics employed by contractors or subcontractors to work on construction projects financed by federal assistance must be paid wages not less than those established for the locality of the project by the Secretary of Labor. (40 Stat 1494, Mar. 3, 1921, Chap. 411, 40 U.S.C. 276A-276A-5)

Auditing Procedures

a.	Identify the programs involving construction activities.	____	____	____
b.	Review selected construction contracts and subcontracts and determine whether they contain provisions requiring the payment of "prevailing" wages.	____	____	____
c.	Review the Government's system for monitoring applicable contractors and subcontractors with respect to payment of prevailing wages and evaluate for adequacy.	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
d. Review the monitoring system for contracts for selected programs and determine whether there is adherence to prescribed procedures.	____	____	____
e. For Governments that have not developed a system, or for a system not operating effectively:			
(1) Obtain the "local" DOL wage determination from the recipient, the architect/engineer (A/E) managing the project, or DOL.	____	____	____
(2) Obtain from the auditee payroll registers of the construction company and test to determine whether wages paid conform to the prevailing wages.	____	____	____

3. Civil Rights

Compliance Requirement—No person shall, on the grounds of race, color, national origin, age, or handicap, be excluded from participation in or be subjected to discrimination in any program or activity funded, in whole or in part, by federal funds. Discrimination on the basis of sex or religion is also prohibited in some federal programs. (Age—42 U.S.C. 6101 et seq.; Race—42 U.S.C. 2000d; Handicap—29 U.S.C. 794.)

Auditing Procedures

a. Determine whether the governmental unit has announced a formal policy of nondiscrimination.	____	____	____
b. For recipients employing 15 or more persons, ascertain whether a person has been designated to oversee civil rights compliance.	____	____	____
c. Ascertain from the grant agreement(s) whether any of the programs contain prohibitions against discrimination on the basis of sex or religion.	____	____	____
d. Ascertain the number of complaints filed with federal, state and/or local agencies responsible for ensuring nondiscrimination in government programs during the fiscal year, the status of unresolved complaints or investigations, and the actions taken on resolved complaints or completed investigations.	____	____	____
e. Ascertain whether programs contain prohibitions against discrimination in employment; for those programs (1) review the annual report filed with the Equal Employment Opportunity Commission (EEOC), if any, (2) ascertain the number of complaints or completed investigations and (3) review the status of and actions taken on unresolved complaints or investigations.	____	____	____
f. Determine whether facilities financed by federal funds that are required to be located in a nondiscriminatory manner are so located.	____	____	____
g. Obtain representation and/or attorney letters to determine if any civil rights suits have been adjudicated or are pending.	____	____	____

	Done by	Date	W/P Ref.

4. Cash Management

Compliance Requirement—Grantee financial management systems shall include procedures to minimize the item elapsed between the transfer of funds from the U.S. Treasury and disbursement of funds by the Grantee.

Advances made by primary recipients to secondary recipients shall conform substantially to the same standards of timing and amount as apply to advances by federal agencies to primary recipient organizations.

(OMB Circular A-102; Intergovernmental Cooperations Act of 1968, P.L. 90-577 (sec. 403), as amended by P.L. 96-470, Title I, Section 10-1 (b)).

Auditing Procedures

a. Review the Government's cash forecasting process and evaluate for adequacy.[1] ____ ____ ____

b. Review the Government's system for requesting federal funds and evaluate whether it is adequate to keep federal cash disbursements limited to the Government's immediate needs. ____ ____ ____

c. For selected grant programs, determine dates and amounts for selected advances, drawdowns, and other receipts of federal funds and compare to the dates the funds were disbursed or checks were presented to the banks for payment. ____ ____ ____

d. For the same programs, evaluate the size of the balances in relation to the program's needs. ____ ____ ____

e. Review the Government's system for monitoring advances and payment requests by secondary recipients. Evaluate whether the system is sufficient to limit payments to amounts needed to meet immediate cash requirements. ____ ____ ____

f. Review selected cash reports submitted by subrecipients and determine if the reports show large amounts of excess cash. If they do, ascertain why. ____ ____ ____

5. Relocation Assistance and Real Property Acquisition

Compliance Requirements

Federal aid programs may require the acquisition of property by a public agency and subsequent displacement of households and businesses.

Grant recipients acquiring property in the administration of federal aid must carry out certain actions systematically, e.g., have property appraised in presence of owner, review appraisals, set price and negotiate settlements. Similarly, when displacement (relocations) are involved, the recipient must, for example, provide assistance systematically in locating replacement housing, assure that it meets acceptable standards and maintain re-

[1] For purposes of the Compliance Supplement, adequacy can be interpreted as providing a reasonable assurance that the system or procedures, if followed, will result in the intended event or action occurring.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
cords on all acquisitions and displacements (Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (URA) (Public Law 91-646 as amended by the Uniform Relocation Act Amendments of 1987, Title IV of Surface Transportation and Relocation Act of 1987 (1987 Amendments) Public Law 100-17, 100 Stat. 246-256 (see Common Rule Appendix B)).			
Auditing Procedures			
a. Ascertain whether the recipient is administering a federal or federally-assisted program that involves the acquisition of property or the displacement of households or businesses by a public agency.	____	____	____
b. Review the organization's system for compliance with relocation assistance and real property acquisition requirements and evaluate for adequacy.	____	____	____
c. Review the monitoring system for relocation and acquisition activity for selected programs and determine whether there is adherence to the prescribed procedures.	____	____	____

6. Federal Financial Reports

Compliance Requirement—Most federal programs require the periodic submission of financial reports that fall within one or more of the following three categories. The special requirement for each grant program is presented in the Reporting Requirements (III-D) section for that program. The suggested audit procedures are provided below to facilitate the requirements for the auditor to comment on completeness and accuracy [Section .41, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" (Common Rule) and Treasury Circular 1075, "Withdrawal of Cash from the Treasury for Advances under Federal Grant and Other Programs"]:

a. Section .41, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," list four required financial reports that apply to most of the programs described in this document.

(1) Financial Status Report (SF-269 or SF-269a)—Reports status of funds for all non-construction programs.

(2) Request for Advance or Reimbursement (SF-270)—Request funds for non-construction programs when advance letter of credit or predetermined advance payments are not used.

(3) Outlay Report and Request for Reimbursement for Construction Programs (SF-271)—Requests for reimbursements and reports status of funds for construction programs.

(4) Federal Cash Transaction (SF-272)—Reports cash transactions and balances for Grantees receiving cash by letter of credit or treasury checks.

	Done by	Date	W/P Ref.

b. Treasury Circular 1075 list two alternative cash management reports, one of which applies to each program financed through letters-of-credit:

(1) Request for Payment on Letter of Credit and Status of Funds Report (SF-183)

(2) Payment Voucher on Letter of Credit (TFS 5041)

c. Certain Federal agencies have received OMB approval to adapt the above reports or require other financial reports to meet their particular program needs.

Auditing Procedures

(1) Review the procedures for preparing the federal financial reports and evaluate for adequacy. ____ ____ ____

(2) Sample federal financial reports for each material program and review for completeness of submission. ____ ____ ____

(3) Trace data to the supporting documentation, i.e., worksheets, ledgers, etc. ____ ____ ____

(4) Review adjustments made to the general ledger amounts in the report affecting Federal programs and evaluate for propriety. ____ ____ ____

7. Allowable Costs/Cost Principles

Compliance Requirement (Direct and Indirect Costs)

The cost of a federally-supported program is comprised of the allowable direct cost of the program plus its allocable portion of allowable indirect costs less applicable credits. Federal cost principles are designed to provide that federally-assisted programs bear their fair share of recognized costs as determined by allowable cost principles. No provision for profit or other increment above cost is intended.

OMB Circular No. A-87, "Cost Principles for State and Local Governments," establishes principles and standards for determining costs applicable to grants, contracts, and other agreements with state and local governments and federally-recognized Indian Tribal Governments. A cost is allowable for federal reimbursement only to the extent of benefits received by federal programs, and costs must meet the basic guidelines of allowability, reasonableness, allocability and remain the net of all applicable credits.

[OMB Circular No. A-87 is issued under the authority of the Budget and Accounting Act of 1921, as amended; the Budget and Accounting Procedures Act of 1950, as amended; Reorganization Plan No. 2 of 1920; and Executive Order 11541.]

Auditing Procedures

For transactions selected by the auditor which involve federal funds, determine whether the costs meet the criteria set forth in the "Basic Guidelines" of Circular A-87, Attachment A, paragraph C, i.e., that the cost is:

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
a. Necessary and reasonable for the performance and administration of the federal program and be allocable thereto under the provisions of the Circular.	____	____	____
b. Authorized or not prohibited under state or local laws or regulations. Certain costs require specific approval by the grantor agency while some costs are not allowable as set forth in Circular A-87, Attachment A.	____	____	____
c. Conforms to any limitations or exclusions set forth in Circular A-87, or limitations in the program agreement or specific requirements in the program regulations.	____	____	____
d. Given consistent treatment with policies, regulations and procedures applied uniformly to federal and non-federal activities of the governmental unit.	____	____	____
e. Given consistent accounting treatment within and between accounting periods and not allocable to or included as a direct cost of a federal program if the same or similar costs are allocated to the federal program as an indirect cost.	____	____	____
f. Determined in accordance with generally accepted accounting principles.	____	____	____
g. Not included as a cost or used to meet cost sharing requirements of other federally-supported activity of the current or prior period.	____	____	____
h. Net of all applicable credits, e.g., volume or cash discounts, refunds, rental income, trade-ins, scrap sales, direct billings (in the case of indirect cost), etc.	____	____	____
i. Supported by underlying documentation, e.g., time and attendance payroll records, time and effort records for employees charged to more than one activity, approved purchase orders, receiving reports, vendor invoices, canceled checks, etc., as appropriate, and is correctly charged as to program, account, amount and period.	____	____	____

Compliance Requirement (Indirect Costs Only)

In order to get reimbursed for indirect costs or centralized services, recipients must prepare cost allocation plans (CAP) and/or indirect cost rate proposals (IDCRP) that provide a basis for allocating indirect costs to federal programs. Each state, state department and major local unit of government, as well as any other organization specifically requested to do so, must submit its CAP/IDCRP to its cognizant agency for approval. Other unlisted organizations must prepare the appropriate plans/proposals and maintain them on file for later review but may use their results in the mean time.

CAPs and IDCRPs are usually prepared on a prospective basis using actual financial data from a prior year or budgeted data for the current year. When the actual costs for the year are determined the difference between the originally-proposed costs and the actual costs are either carried forward to a subsequent CAP/IDCRP or adjusted with the granting federal agency on a

	Done by	Date	W/P Ref.

retroactive basis. In cases where fixed rates are determined and approved by the cognizant federal agency, subsequent adjustments are not made.

There are three types of plans/proposals:

a. *State and Local-Government-wide Cost Allocation Plans*—which describe the methods to be used for billing centralized services (such as computer centers, fringe benefits, motor pools, etc.) to individual user organizations/activities (referred to as Section II costs) and which allocate the costs of unbilled central services (such as accounting, personnel, etc.) to the individual user departments or activities (Section I costs).

b. *Departmental or Local Indirect Cost Rate Proposals*—which combine the billed or allocated costs (if any) from the state- or local-wide plan with the departmental or local level indirect costs and compute an indirect cost rate(s) to be used in charging indirect costs to direct programs and activities.

c. *Public Assistance Cost Allocations Plans*—which describe the methods to be used to allocate state- or local-wide allocated or billed indirect costs and departmental indirect, administrative, and operating costs of state or local welfare or human services organizations to the Medicaids, Food Stamps, Child Welfare programs, etc. These plans are required by the terms of 45 CFR Part 95 which incorporates Circular A-87 by reference and are required to be revised and submitted to the federal government whenever an organizational or programmatic change invalidates the currently approved approach.

Audit procedures must be tailored according to the size and type of organization being reviewed.

Auditing Procedures (General)

Determine whether indirect costs or centralized or administrative services are being charged to federal awards. If not, the rest of this section does not apply. If such costs are being charged, the following guidelines should be followed:

a. Obtain and read the current CAP and or Negotiation Agreement and determine the types of rates and procedures required. ____ ____ ____

b. Select a sample of claims for reimbursement submitted to the federal agency and determine if the amounts charged and rates used are in accordance with the plan and if rates are being properly applied to the appropriate base. ____ ____ ____

c. Determine whether the CAPs or IDCRPs have been approved by the appropriate federal agency and whether or not the resultant rates or amounts charged are final or are still open to adjustment or revision, either immediately or as a carryover adjustment in a future period. If approved and final, the results of the audit work shall be reflected, if appropriate, in recommendations for future procedural improvements. ____ ____ ____

d. Review on a test basis supporting documentation to determine whether:			
(1) The indirect cost pool or centralized service costs contain only items that are consistent with the applicable cost principles and negotiated agreements.	____	____	____
(2) The methods of allocating the costs are in accordance with the provisions of Circular A-87, other applicable regulations and negotiated agreements.	____	____	____
(3) Statistical data (e.g., square footage, population, operating time, miles driven, case counts, salaries and wages) in the proposed allocation or rate bases are reasonable, updated as necessary and do not contain any material omissions.	____	____	____
(4) Time studies or time and effort reports (where and if utilized) are mathematically and statistically accurate, are implemented as approved, and are based on the actual effort devoted to the various functional and programmatic activities to which the salary and wage costs are charged.	____	____	____
(5) The indirect costs charged to federal programs are supported by amounts recorded in the accounting records from which the most recently-issued financial statements were prepared.	____	____	____
(6) Other adjustments are made to compensate for differences between actual and estimated costs of fiscal years.	____	____	____
Auditing Procedures—State-Wide and Local-Wide Plans			
a. For Section II (direct billed) services, determine whether:			
(1) The rate base includes all users and treats them in a consistent manner.	____	____	____
(2) Any retained earning or unexpended earnings (including reserves) are present and, if so, determine: (*a*) if they have been computed in accordance with the applicable cost principles, (*b*) if they are excessive in amount, and (*c*) whether a refund has been made to the federal government for its fair share of any amounts thereof which have been removed (transferred out) or borrowed from the fund.	____	____	____
(3) Fringe benefit allocations, charges or rates deal fairly with differing levels, if any, of benefits provided to different classes of employees.	____	____	____
(4) Independent actuarial studies appropriate for self-insurance programs and certain types of fringe benefit programs are performed and, if so, are kept current.	____	____	____
b. Costs chargeable directly to federal grants or any other direct activity (including any costs required for matching or cost sharing) have been excluded from the pool of indirect costs and have been included in the base.	____	____	____

	Done by	Date	W/P Ref.
c. The users of services are billed in a consistent manner and billing rates (or charges) have been adjusted to eliminate profits and unallowable costs.	____	____	____

8. **Drug-Free Workplace Act**

Compliance Requirement

All grantees receiving grants, including cooperative agreements, from any federal agency must certify that they will provide a drug-free workplace, or, in the case of a grantee who is an individual, certify to the agency that his or her conduct of grant activity will be drug-free. Making the required certification has been a precondition of receiving a grant from a federal agency since March 18, 1989. Every grantee, except a state or state agency, is required to make this certification for each grant. A state or state agency may elect to make a single annual certification to each federal agency from which it obtains grants if the federal agency has designated a central location for submission.

The grantee certifies that it will provide a drug-free workplace by:

a. Publishing a policy statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

b. Establishing an ongoing drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and,

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

c. Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph *a*;

d. Notifying the employee in the statement required by paragraph *a* that, as a condition of employment under the grant, the employee will:

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of any criminal drug statute conviction for a violation occurring in the workplace no later than five calendar days after such conviction;

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.

e. Notifying the agency in writing within ten calendar days after receiving notice under subparagraph *d*(2) from an employee or otherwise receiving actual notice of such conviction;

f. Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph *d*(2), with respect to any employee who is so convicted:

(1) Taking appropriate personnel action against such an employee, up to and including termination; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a federal, state, or local health, law enforcement, or other appropriate agency.

[Public Law 100-690 Title V, Subtitle D, 41 USC 701 et seq.]

Auditing Procedures

a. Determine through discussions with employees and written communications to employees whether the grantee has taken action to provide a copy of the policy statement to each employee engaged in the performance of a grant.	____	____	____
b. Ascertain whether the statement contains all the necessary notifications.	____	____	____
c. Determine whether the grantee had established an ongoing drug-free awareness program which meets the requirements outlined above.	____	____	____
d. Determine whether the report made to federal grantor agencies on convictions of employees is filed and complete.	____	____	____
e. Test a sample of employee files and determine whether the report made to federal grantor agencies on convictions of employees is complete and if convictions were reported within 10 calendar days after the employer received any notice of an employee's conviction.	____	____	____
f. Ascertain whether the grantee took the required personnel or treatment referral action within 30 calendar days after receiving notice of an employee conviction.	____	____	____

9. Administrative Requirements

Federal assistance programs, with certain exceptions, are subject to the provisions of "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" (Common Rule). The Common Rule does not apply to grants and subgrants to state and local institutions of higher education or state and local hospitals; block grants authorized by the Omnibus Budget Reconciliation Act of 1981;

	Done by	Date	W/P Ref.

entitlement grants and other grants or payment programs specified in the Common Rule. These exceptions are specified in the Common Rule under the Applicability provisions of Subpart A.

Three Common Rule administrative requirements, financial reporting, cost principles and cash management principles, are covered elsewhere in this section. The auditor should also consider those common agency administrative requirements listed below from Subpart C of the Common Rule. Agency regulations for those grant program requirements not covered by the Common Rule are addressed in departmental regulations.

a. Interest earned on advances
b. Period of availability of funds
c. Program income
d. Real property
e. Equipment
f. Supplies
g. Subawards to debarred and suspended parties
h. Procurement
i. Subgrants
j. Revolving fund repayments

Auditing Procedures

a.	Determine the applicable administrative requirements that are material to the federal awards.	____	____	____
b.	Review and evaluate internal controls in the administrative areas selected for review.	____	____	____
c.	Test transactions for compliance.	____	____	____

This audit program has been completed in accordance with firm policy.

.170 XVII. Appendix A—Auditing and Reporting Concerns

During an audit engagement, the auditor should be aware that often there are signals that may indicate a potential audit or reporting problem. Some signals or indicators may suggest the need to modify audit procedures.

Listed below are examples of indicators the auditor may encounter in an audit of a governmental unit. It should be noted that the existence of a particular indicator does not necessarily mean there is a problem requiring extended audit procedures. The list, however, should be considered by the auditor in performing analytical procedures and in designing his/her audit procedures.

Items Highlighted Through Review of Financial Ratios or Statistics

- Revenue-based indicators:
  - — Decreasing value of taxable property.
  - — Increasing ratios of delinquent taxes to total tax levy.
  - — Increasing ratios of maximum legal tax rates.
  - — Increasing ratios of actual revenue below budgets.
  - — Litigation relative to equalization of assessment actions.
- Expenditure-based indicators:
  - — Increasing excesses of expenditures over revenues.
  - — Increasing incidence of actual expenditures in excess of budgets.
  - — Continuing increases in amount of unfunded vested benefits of pension programs.
- Cash management indicators:
  - — Increasing amounts of aggregate short-term investments.
  - — Increasing amounts of unpaid current obligations.
  - — Decreasing income from short-term investments (that are not a result of falling interest rates).
- Debt Indicators:
  - — Increasing ratio of bond indebtedness to total property value.
  - — Increasing need to borrow to meet debt service requirements.
  - — Increasing use of long-term debt to fund current expenditures.
  - — Increasing amount of short-term borrowing remaining unpaid at the end of the fiscal year.

Nonfinancial Indicators

- Client Personnel:
  - — Rapid turnover.
  - — Management changes.
  - — Weak financial personnel.
  - — Unfilled positions due to budget limitations.

- — Internal auditors performing "special tasks" rather than auditing.

- Client relationships with auditors:
  - — Accounting and reporting disputes.
- Weaknesses in accounting information system.
  - — Lack of controls.
  - — Poor cutoffs.
  - — Reports not issued on a timely basis.
  - — Inability to reconcile detailed records to general ledger balances.
  - — Large number of exceptions in transactions or confirmations.
  - — Client's inability to prepare meaningful analyses of activity.
  - — Lack of timely or no budget status reports.
- External Considerations (e.g., economy, industry):
  - — Large industrial plant closing or moving from community.
  - — Environmental legislation or pressures.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.180 XVIII. Appendix B—Federal Transaction Test Criteria

The following criteria are those that often are applied during the audit of federal transactions. Those criteria are presented as examples only. Judgment must be used to determine the test criteria to be applied to a particular federal program or transaction.

1. Was the expenditure contemplated in the approved budget?
2. Were only costs applicable to the Federal Financial Assistance Program charged?
3. Was the expenditure made in accordance with specific program compliance requirements and other limitations or exclusions in the federal assistance agreement?
4. Was the classification of direct or indirect charges in accordance with cost allocation plan(s) or grant agreements?
5. Was prior approval obtained from the federal granting agency, if appropriate?
6. Was there adequate documentation supporting the expenditure, including all authorization signatures, evidence of preaudits, etc.?
7. Does the expenditure appear to be necessary and reasonable and "benefit" or assist in the accomplishment of the goals of the federally assisted program?
8. Was the expenditure properly coded and recorded?
9. Were capital expenditures properly recorded in the property records and identified as required by federal administrative guidelines, specific program compliance requirements, and federal assistance agreements?
10. Do assets acquired with the sample federal expenditure exist and are they being used for the purpose for which they were acquired?
11. Was the expenditure given consistent accounting treatment and applied uniformly and equitably to all benefiting activities/programs, both federally assisted and otherwise?
12. Was the expenditure net of any applicable credits?
13. Was the expenditure incurred during the authorized grant period or authorized extension thereto?
14. Were the charges incurred in accordance with competitive purchasing procedures, if applicable?
15. If an expenditure was a violation of any federal regulations or grant agreement terms and the auditee has asserted that such violations were approved by the federal grantor agency, was such approval documented in writing by the federal agency?

.190 XIX. Appendix C—Criteria for Determining Questioned Costs

Criteria established to determine and report questioned costs vary from one federal agency to another. Many of the criteria are imposed by Congress at the time programs are authorized and funds are provided; however, other criteria are established through federal agency regulations. Generally, the criteria for determining and reporting questioned costs are as follows:

- *Unallowable costs.* Certain costs are specifically unallowable under the general and special award conditions or agency instructions. (They include, but are not limited to, pregrant and postgrant costs and costs in excess of the approved grant budget either by category or in total.)
- *Undocumented costs.* Costs are charged to the grant for which adequate detailed documentation does not exist, for example, to demonstrate their relationship to the grant or the amounts involved.
- *Unapproved costs.* Costs that are not provided for in the approved grant budget, or costs for which the grant or contract provisions or applicable cost principles require the awarding agency's approval, but for which the auditor finds no evidence of approval.
- *Unreasonable costs.* Costs incurred that may not reflect the actions that a prudent person would take in the circumstances, or assigning an unreasonably high valuation to in-kind contributions.

AAM Section 12,300

Partner's Engagement Review Program Supplement for Local Governmental Units

To be completed in conjunction with Partner's Engagement Review Program [AAM section 9210]

	Yes	No	N/A
I. General Audit Procedures			
A. .010 General			
1. In planning the audit engagement, were the following matters properly considered?			
a. Matters affecting the government, such as specialized accounting practices, economic conditions, federal and state laws and regulations, and technological changes. (SAS No. 22 [AU section 311])	____	____	____
b. Definition of the reporting entity indicating the related organizations, functions, and activities which are either included or excluded from the financial statements in accordance with GASB Cod. Sec. 2100.	____	____	____
c. Factors affecting the continued functioning of the government, such as legal limitations on revenue, expenditures, or debt service.	____	____	____
2. If statistical or nonstatistical sampling was used for tests of applicable laws and regulations, if appropriate (SAS No. 39, paragraphs 15 through 30 [AU section 350.15–.30]):			
a. Was consideration given, in planning the sampling application, to the relationship of the sample to the audit objective, preliminary judgments about materiality levels, auditor's allowable level of risk of incorrect acceptance, and characteristics of the population?	____	____	____
b. Was the sample selected in such a way that it could be expected to be representative of the population?	____	____	____
c. Were the misstatement results of the sample projected to the items from which the sample was selected?	____	____	____
d. Was consideration given, in evaluating the sample, to items for which the planned substantive tests or appropriate alternate procedures could not be performed?	____	____	____
e. Was consideration given, in the aggregate, to projected misstatement results from all audit sampling applications and to all known misstatements from nonsampling applications in evaluating material misstatements in the financial statements?	____	____	____

	Yes	No	N/A
f. Was the documentation of the foregoing considerations in accordance with firm policy?	____	____	____
3. If applicable, were adequate tests of controls with applicable laws and regulations made?	____	____	____
4. Were all reportable conditions in the internal control structure, all identified instances of noncompliance with applicable laws and regulations, and all illegal acts:			
a. Adequately evaluated and documented?	____	____	____
b. Appropriately reported in accordance with applicable standards? (SAS No. 60 [AU section 325]; GAO's *Government Auditing Standards*, paragraphs 5-26 through 5-28; OMB Circular A-128, paragraph 13)	____	____	____

II. Working Paper Areas

A. .020 Cash

1. Do the working papers indicate that the following were considered:			
a. Confirmation of liabilities and contingent liabilities to banks?	____	____	____
b. Approval of interfund cash transactions?	____	____	____
c. Verification of collateral required of depository institutions for public funds?	____	____	____
d. Compliance with the laws and regulations governing the deposit of public funds?	____	____	____
e. Determination that all cash accounts have been identified and appropriately recorded?	____	____	____
f. Review of repurchase security transactions for consistency with the disclosures of the terms or circumstances of the transactions?	____	____	____

B. .030 Receivables

1. Was a summary classifying receivables prepared or obtained (i.e., notes and accounts receivable, tax revenues, interfund transactions, and other related party receivables, etc.)?	____	____	____
2. Were procedures performed to provide evidence that taxes receivable and the related revenues have been recorded in the correct period in accordance with GASB Cod. Sec. P70?	____	____	____
3. Was the reasonableness of allowances for doubtful accounts covered in the working papers and collectibility for receivables, including interfund receivables, adequately considered?	____	____	____
4. Was receivable work coordinated with tests of revenues, including cutoff tests?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
C. .040 Investments			
1. Was a review made to determine whether the investments are of the types authorized by law or comply with the applicable statutes and investment policy?	____	____	____
2. Were income, gains and losses from investments examined for proper allocation to the individual funds?	____	____	____
3. For repurchase and reverse repurchase agreements, were appropriate audit procedures performed (e.g., confirmation, inspection of collateral, etc.)?	____	____	____
D. .050 Property, Plant, and Equipment			
1. Was a review made to determine that capital expenditures are classified in the proper fund accounts and made in accordance with budgetary requirements?	____	____	____
E. .060 Liabilities			
1. Were liabilities properly classified as current or included in the general long-term debt account group?	____	____	____
2. Was consideration given to expenditures and expenses that might require accrual (e.g., pensions, compensated absences—see GASB Cod. Sec. 1600), and to whether accrued expenses were reasonably stated?	____	____	____
3. Were procedures performed to determine whether deferred compensation plans are appropriately disclosed or reported? (GASB Statement No. 2)	____	____	____
4. Do the working papers include evidence regarding compliance with loan restrictions?	____	____	____
5. Was an examination made to determine that:			
a. New debt issues are properly issued as required by the state constitution or state/local statute and are recorded in the correct fund and/or account group?	____	____	____
b. Debt restrictions, guarantees, and other debt commitments are properly disclosed?	____	____	____
6. Do the tests of interfund borrowings appear adequate with respect to:			
a. Legal restrictions, if any, on such borrowings?	____	____	____
b. Authorization?	____	____	____
c. Classification?	____	____	____
d. Appropriateness of interest accruals and payments?	____	____	____
F. .070 Deferred Revenue			
1. Do the working papers reflect consideration of whether the basis of deferring revenue is reasonable and consistent with restrictions imposed by the grantor or by the special assessment?	____	____	____

	Yes	No	N/A
2. Was consideration given to matching requirements, if any?	____	____	____

G. .080 Commitments and Contingencies

1. Do the working papers include indication of the following?			
a. Inspection of minutes of meetings of the governmental body and key committees thereof, provisions of the governmental unit's charter, and applicable statutes and changes therein.	____	____	____
b. Inspection of long-term contracts with non-governmental entities, such as construction contractors.	____	____	____
2. Have all material contingencies been properly considered, documented, and reported (SFAS No. 5 [AC C59]; GASB Cod. Sec. C50)?	____	____	____

H. .090 Fund Equity

1. Were authorizations of changes in reserves and designated balances examined?	____	____	____
2. Do the working papers indicate that there were inquiries, where appropriate, as to proper classification, description, and disclosures of components of fund equity?	____	____	____
3. Do the working papers indicate that fund transfers were properly approved and recorded?	____	____	____
4. Based on the assessed level of control risk, do the substantive tests of fund equity appear adequate?	____	____	____

I. .100 Revenues and Expenditures/Expenses

1. Were revenues and expenditures and/or expenses for the period compared with those of the preceding period and reviewed for reasonableness and were significant fluctuations explained?	____	____	____
2. Was adequate consideration given to the entity's revenue recognition policy?	____	____	____
3. Do the working papers indicate that revenues and interfund transactions have been recognized in the accounting period in which they became available and measurable under the applicable basis of accounting?	____	____	____
4. Do the working papers indicate that the auditor considered the effect of program income on federal grants and any related activities?	____	____	____
5. Has it been determined that:			
a. Expenditures are in accordance with the approved budget as to amounts and purpose?	____	____	____
b. Encumbrances are properly identified, supported, and recorded?	____	____	____
6. Were tests of payrolls performed, including account distribution?	____	____	____

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
7. With regard to pension plans, do tests of expenditures and liabilities appear adequate?	____	____	____
8. If the entity is reimbursed by a third party for costs incurred in connection with providing services to others:			
a. Were pertinent sections of significant third party contracts reviewed to determine the basis for reimbursement?	____	____	____
b. Were cost reimbursement reports and the underlying support reviewed?	____	____	____
c. Were appropriate allocations made of indirect costs among the entity's programs?	____	____	____
d. Was the effect of audits, either required or performed by third party grantors, considered?	____	____	____
9. If grants are awarded to other organizations, did the auditor review:			
a. The classification of the grants?	____	____	____
b. The effects of the grantees' compliance or noncompliance with performance requirements?	____	____	____
10. Based upon the assessed level of control risk, did the substantive tests (review, analysis, and testing) of revenues and expenditures/expense appear adequate?	____	____	____
J. .110 Other			
1. Have leases been examined to determine that capital, sales, and direct financing leases have been properly accounted for? (GASB Cod. Sec. L20)	____	____	____
III. Compliance With the Requirements of the Single Audit Act of 1984			
A. .120 The Single Audit Act			
1. If required or deemed necessary, is there any indication that the firm discussed and agreed on the scope of the engagement with the auditee?	____	____	____
2. Did the firm, by reviewing contract files and receipts and disbursements, obtain reasonable assurance that the auditee appropriately identified all federal financial assistance and included that assistance within the audit scope?	____	____	____
3. If required, does the schedule of federal financial assistance program expenditures present the following?			
a. Identification of each program as indicated in the *Catalog of Federal Domestic Assistance* (CFDA).	____	____	____
b. Other federal assistance from programs not included in the CFDA.	____	____	____
c. Total expenditures for each federal financial assistance program by grantor, department, or agency.	____	____	____

	Yes	No	N/A
d. Total federal financial assistance.	____	____	____
e. Other information, required by federal program managers or otherwise deemed appropriate.	____	____	____
4. Was consideration given to the accounting and auditing guidance issued by the Office of Management and Budget, including Circulars A-128 (*Audits of State and Local Governments*), A-87 (*Cost Principles Applicable to Grants and Contracts*), and A-102 (*Uniform Requirements for Assistance to State and Local Governments*)?	____	____	____
5. Did the firm obtain an understanding of the internal control structure policies and procedures, as it relates to:			
a. Administering major federal financial assistance programs, comparable to that which the auditor would perform if control risk was assessed at below the maximum level? (SAS No. 55 [AU section 319])	____	____	____
b. Administering non-major programs to the same extent as in question 5*a.* above so that over 50 percent of total federal assistance program expenditures are considered?	____	____	____
c. Other non-major federal financial assistance programs? (SOP 90-9)	____	____	____
6. For those programs where the control risk is assessed at the maximum level, is the firm's understanding of the internal control structure, as well as the conclusion of the control risk, documented? (SAS No. 55 [AU section 319])	____	____	____
7. For categories of controls for which the control risk is below the maximum level:			
a. Do the working papers document the firm's understanding of the internal control structure?	____	____	____
b. Were tests of controls performed for the internal control structure?	____	____	____
c. Was the nature and extent of testing sufficient to enable the firm to determine if the control procedures were being applied as described?	____	____	____
d. Did the auditor examine the recipient's control structure for ensuring subrecipients' compliance and obtaining and acting on subrecipients' audit reports?	____	____	____
e. Do the working papers adequately document the work performed and the conclusions reached? (GAO, paragraphs 4-34 through 4-38; SAS No. 41, paragraph 5 [AU section 339.05])	____	____	____
8. Were all reportable conditions in the internal control structure disclosed in the auditor's reports?	____	____	____
9. In determining whether the entity has complied with applicable laws and regulations that may have a material effect on each major federal financial assistance program, did the auditor:			
a. Consult appropriate sources, such as the Compliance Supplement for Single Audits of State and Local Governments, statutes, regu-			

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Yes	No	N/A
lations, and agreements covering individual programs, in order to identify the compliance requirements that apply to each major program and to determine which requirements to test?	____	____	____
b. Select a representative number of charges from each major program?	____	____	____
c. Perform tests to determine whether:			
(1) The amounts reported as expenditures were allowable under federal regulations and contracts?	____	____	____
(2) Only eligible persons or organizations received services or benefits?	____	____	____
(3) Matching requirements were met?	____	____	____
(4) Federal financial reports and claims for advances and reimbursements were supported by the records supporting the financial statements?	____	____	____
(5) The entity complied with each of the general requirements contained in the compliance supplement concerning:			
(a) Political activity?	____	____	____
(b) Civil rights?	____	____	____
(c) Davis-Bacon Act?	____	____	____
(d) Cash management?	____	____	____
(e) Relocation of assistance and real property acquisition?	____	____	____
(f) Federal financial reports?	____	____	____

Auditors' Reports on Basic or General-Purpose Financial Statements for State and Local Governmental Units

.01 Unqualified Opinion on General-Purpose Financial Statements[1]

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[3]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.1, with conforming changes as of May 1, 1995.]

---

[1] The financial statements of a component unit should acknowledge that the component unit is a component unit of another government; for example, "We have audited the accompanying general-purpose financial statements of Sample County School District, component unit of Sample County, as of and for the year ended June 30, 19X1." In addition, the notes to the component unit's financial statements should identify the primary government of the financial reporting entity and the component unit's relationship to the primary government. For reporting on the financial statements of a primary government that omit the financial data of each component unit, see AAM section 12,400.04, "Report on Primary Government Financial Statements That Omit the Financial Data of Each Component Unit."

[2] When the report on the financial statements is submitted to comply with a legal, regulatory, or contractual requirement for an audit in accordance with *Government Auditing Standards*, insert the phrase "and *Government Auditing Standards* issued by the Comptroller General of the United States."

[3] When the report on the financial statements is submitted to comply with a legal, regulatory, or contractual requirement for an audit in accordance with *Government Auditing Standards*, a paragraph similar to the following should be added after the opinion paragraph:

> In accordance with *Government Auditing Standards*, we have also issued a report dated [*date of report*] on our consideration of City of Example's internal control structure and a report dated [*date of report*] on its compliance with laws and regulations.

.02 Unqualified Opinion on General-Purpose Financial Statements Submitted Together With Combining, Individual Fund, and Account Group Financial Statements and Supporting Schedules as Supplementary Data

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[3]

Our audit was made for the purpose of forming an opinion on the general-purpose financial statements taken as a whole. The combining and individual fund and account group financial statements and schedules listed in the table of contents are presented for purposes of additional analysis and are not a required part of the general-purpose financial statements of City of Example, Any State. Such information has been subjected to the auditing procedures applied in the audit of the general-purpose financial statements and, in our opinion, is fairly presented in all material respects in relation to the general-purpose financial statements taken as a whole.[4]

[*Signature*]

[*Date*]

Note: As of the date of this publication, the AICPA Federal Government Division was in the process of revising this auditor's report to conform it to the requirements of the 1994 revision of *Government Auditing Standards* (the Yellow Book). Auditors should ascertain the status of those revisions before issuing this report.

.03 Unqualified Opinion on General-Purpose Financial Statements and Combining, Individual Fund, and Account Group Financial Statements, Presented Together With Supporting Schedules Reported on as Supplementary Data

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements and the combining and individual fund and account group financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles. Also, in our opinion, the combining and individual fund and account group financial statements referred to above present fairly, in all material respects, the financial position of each of the individual funds and account groups of City of Example, Any State, as of June 30, 19X1, and the results of operations of such funds and the cash flows of individual proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[3]

Our audit was made for the purpose of forming an opinion on the general-purpose financial statements taken as a whole and on the combining and individual fund and account group financial statements. The accompanying financial information listed as supporting schedules in the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements of City of Example, Any State. Such information has been subjected to the auditing procedures applied in the audit of the general-purpose, combining and individual fund and account group financial statements and, in our opinion, is fairly presented in all material respects in relation to the financial statements of each of the respective individual funds and account groups taken as a whole.[4]

.04 Report on Primary Government Financial Statements That Omit the Financial Data of Each Component Unit

Independent Auditor's Report

Addressee:

We have audited the accompanying primary government financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[1] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

A primary government is a legal entity or body politic and includes all funds, organizations, institutions, agencies, departments, and offices that are not legally separate. Such legally separate entities are referred to as component units. In our opinion, the primary government financial statements present fairly, in all material respects, the financial position of the primary government of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.

However, the primary government financial statements, because they do not include the financial data of component units of City of Example, Any State, do not purport to, and do not, present fairly the financial position of the City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[2]

.05 Qualified Opinion on General-Purpose Financial Statements That Omit One or More, But Not All, Component Units of the Financial Reporting Entity

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The general-purpose financial statements referred to above do not include financial data of the [*identify the component unit(s) omitted*], which should be included in order to conform with generally accepted accounting principles. If the omitted component unit(s) had been included,[3] the assets and revenues of the [*identify fund type(s), e.g., special revenue fund type—or component unit columns*] would have been increased by $XXX,XXX and $XXX,XXX, respectively, there would have been an excess of expenditures over revenues in that fund type [*or component unit(s)*] of $XXX,XXX for the year, and the [*identify fund type(s) or discretely presented component unit column*] fund balance would have been a deficit of $XXX,XXX.

In our opinion, except for the effects on the financial statements of the omission described in the preceding paragraph, the general-purpose financial statement referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[4]

---

[1] See AAM section 12,400.01, footnote 1.

[2] See AAM section 12,400.01, footnote 2.

[3] If the amounts applicable to the omitted component unit have not been audited, insert the phrase "based on unaudited information."

[4] See AAM section 12,400.01, footnote 3.

.06 Adverse Opinion on General-Purpose Financial Statements That Omit One or More, But Not All, Component Units of the Reporting Entity

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose financial statements[1] of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The general-purpose financial statements referred to above do not include financial data of the [*identify the component unit(s) omitted*], which should be included in order to conform with generally accepted accounting principles.

Because of the departure from generally accepted accounting principles identified above, as of June 30, 19X1, the assets and revenues of the [*identify fund type(s), e.g., special revenue fund type—or component unit column(s)*] would have increased by $XXX,XXX and $XXX,XXX, respectively, there would have been an excess of expenditures over revenues in that fund type [*or component unit(s)*] for the year of $XXX,XXX, and the [*identify fund type(s) or component unit(s)*] fund balance would have been a deficit of $XXX,XXX.

In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the general-purpose financial statements referred to above do not present fairly, in conformity with generally accepted accounting principles, the financial position of City of Example, Any State as of June 30, 19X1, or the results of its operations or cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended.

.07 Qualified Opinion on General-Purpose Financial Statements That Omit a Fund Type or Account Group[1]

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[2] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[3] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The general-purpose financial statements referred to above do not include the [*identify the fund type (account group) omitted*], which should be included in order to conform with generally accepted accounting principles. The omitted fund type[4] has assets, liabilities, revenues, and expenditures of $XXX,XXX, $XXX,XXX, $XXX,XXX, and $XXX,XXX, respectively. [*The amount that should be recorded in the (identify account group) is not known.*]

In our opinion, except for the effect on the financial statements of the omission described in the preceding paragraph, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.6.]

---

[1] There may be circumstances when, based on professional judgment, the auditor may determine that an adverse opinion on the general-purpose financial statements is appropriate. In such a case, a separate explanatory paragraph should state all the substantive reasons for the adverse opinion and the principal effects of those matters. If an adverse opinion is to be rendered, the last two paragraphs of this report should be replaced with the following paragraphs:

> The general-purpose financial statements referred to above do not include financial data of the [*identify the component unit(s) omitted*], which should be included in order to conform with generally accepted accounting principles.
>
> Because of the departure from generally accepted accounting principles identified above, as of June 30, 19X1, the assets and revenues of the [*identify fund type(s), for example, special revenue fund type—or component unit column(s)*] would have increased by $XXX,XXX and $XXX,XXX, respectively, there would have been an excess of expenditures over revenues in the fund type [*or component unit(s)*] for the year of $XXX,XXX and the [*identify fund type(s) or component unit(s)*] fund balance would have been a deficit of $XXX,XXX.
>
> In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the general-purpose financial statements referred to above do not present fairly, in conformity with generally accepted accounting principles, the financial position of City of Example, Any State, as of June 30, 19X1, or the result of its operations or the cash flows of its proprietary fund types and nonexpendable trust funds of the year then ended.

[2] See AAM section 12,400.01, footnote 1.

[3] See AAM section 12,400.01, footnote 2.

[4] If the amounts applicable to the omitted fund type have not been audited, insert the phrase "based on unaudited information."

.08 Qualified Opinion on General-Purpose Financial Statements That Omit a Fund From a Fund Type[1]

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[2] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[3] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The general-purpose financial statements referred to above do not include the [*identify the omitted fund*], which should be included in order to conform with generally accepted accounting principles. If the omitted fund[4] had been included, the [*identify fund type*] assets, liabilities, revenues, and expenditures would have increased $XXX,XXX, $XXX,XXX, $XXX,XXX, and $XXX,XXX, respectively.

In our opinion, except for the effect on the general-purpose financial statements of the omission described in the preceding paragraph, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[5]

.09 Unqualified Opinion on General Fund Financial Statements With an Explanatory Paragraph Calling Attention to the Fact That the Financial Statements Do Not Represent the Financial Position and Results of Operations of the Financial Reporting Entity

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of the general fund of City of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[1] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note X, the financial statements present only the general fund and are not intended to present fairly the financial position and results of operations of City of Example, Any State, in conformity with generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the general fund of City of Example, Any State, as of June 30, 19X1, and the results of its operations for the year then ended in conformity with generally accepted accounting principles.[2]

.10 Unqualified Opinion on an Enterprise Fund's Financial Statements With an Explanatory Paragraph Calling Attention to the Fact That the Financial Statements Do Not Represent the Financial Position and Results of Operations of the Financial Reporting Entity

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of [*identify enterprise fund*] of City of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[1] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note X, the financial statements present only the [*identify enterprise fund*] and are not intended to present fairly the financial position of City of Example, Any State, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds in conformity with generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of [*identify enterprise fund*] of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows for the year then ended in conformity with generally accepted accounting principles.[2]

.11 Unqualified Opinion on General-Purpose Financial Statements With an Explanatory Paragraph Calling Attention to a Financial Reporting Entity's Ability to Meet its Debts as They Come Due[1]

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[2] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[3] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.

As discussed in Note X, [*include description of reason that a question has arisen about the ability of the governmental unit to meet its debts as they come due*]. The general-purpose financial statements do not include any adjustment relating to the amounts and classification of liabilities that might be necessary if City of Example, Any State, is not able to meet its debts as they come due or if such debts are adjusted under the provisions of chapter 9 of the Federal Bankruptcy Code.[4]

.12 Qualified Opinion on General-Purpose Financial Statements That Include an Unaudited Organization, Function, or Activity

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

Except as discussed in the following paragraph, we conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

We were unable to obtain the audited financial statements supporting the financial activities of the [*identify the organization, function, or activity*] nor were we able to satisfy ourselves as to those financial activities by other auditing procedures. Those financial activities are included in the [*identify fund type, account group, or component unit column(s)*] and represent XX percent and XX percent of the assets and revenues, respectively, of [*identify fund type, account group, or component unit column*].

In our opinion, except for the effects of such adjustment, if any, as might have been determined to be necessary had we been able to obtain the audited financial statements of [*identify the organization, function, or activity*], the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[3]

.13 Unqualified Opinion on General-Purpose Financial Statements With Reference to an Audit of an Organization, Function, or Activity by Other Auditors

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit. We did not audit the financial statements of the [*identify organization, function, or activity*], which represent XX percent and XX percent, respectively, of the assets and revenues of the [*identify fund type, account group, or component unit column(s)*]. Those financial statements were audited by other auditors whose report has been furnished to us, and our opinion on the general-purpose financial statements, insofar as it relates to the amounts included for the [*identify organization, function, or activity*], is based on the report of the other auditors.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the report of other auditors, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[3]

.14 Unqualified Opinion on General-Purpose Financial Statements and Combining, Individual Fund, and Account Group Financial Statements When One Fund or Component Unit Representing Less Than All of a Fund Type Has Been Audited by Other Auditors

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements and the combining and individual fund and account group financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit the financial statements of the [*identify fund or component unit*] which statements reflect total assets of $XXX,XXX as of June 30, 19X1, and total revenues of $XXX,XXX for the year then ended. Those financial statements were audited by other auditors whose report has been furnished to us, and our opinion on the general-purpose financial statements, insofar as it relates to the amounts included for the [*identify fund or component unit*] in the [*identify fund type or component unit column(s)*], is based on the report of the other auditors.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the report of other auditors, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles. Also, in our opinion, the combining, individual fund, and account group financial statements referred to above (other than than the [*identify fund or component unit*], whose financial statements were audited by other auditors whose report expressed an unqualified opinion) present fairly, in all material respects, the financial position of each of the individual funds and account groups of City of Example, Any State, at June 30, 19X1, and the results of operations of such funds and the cash flows of individual proprietary fund types and nonexpendable trust funds for the year then in conformity with generally accepted accounting principles.[3]

.15 Unqualified Opinion on General-Purpose Financial Statements with Reference to an Audit of All of a Fund Type by Other Auditors

Independent Auditor's Report

Addressee:

We have audited the accompanying general-purpose[1] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These general-purpose financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit. We did not audit the financial statements of the [*identify fund type*]. Those financial statements were audited by other auditors whose report has been furnished to us, and our opinion on the general-purpose financial statements, insofar as it relates to the amounts included for the [*identify fund type*], is based on the report of the other auditors.

We conducted our audit in accordance with generally accepted auditing standards.[2] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general-purpose financial statement presentation. We believe that our audit and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the report of other auditors, the general-purpose financial statements referred to above present fairly, in all material respects, the financial position of City of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows of its proprietary fund types and nonexpendable trust funds for the year then ended in conformity with generally accepted accounting principles.[3]

.16 Unqualified Opinion on Financial Statements Prepared in Accordance With a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of City of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[1] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note X, City of Example, Any State, prepares its financial statements on the cash basis which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the cash and unencumbered cash balances of City of Example, Any State, as of June 30, 19X1, and the revenues it received and expenditures it paid for the year then ended on the basis of accounting described in Note X.[2,3]

.17 Unqualified Opinion on Financial Statements of a Department Constituting Less Than a Fund

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of Department of Example, Any State, as of and for the year ended June 30, 19X1. These financial statements are the responsibility of Department of Example, Any State, management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards.[1] Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note X, the financial statements of the Department of Example, Any State, are intended to present the financial position and results of operations and cash flows of proprietary fund types of only that portion of the financial reporting entity of the State that is attributable to the transactions of the Department.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Department of Example, Any State, as of June 30, 19X1, and the results of its operations and cash flows for the year then ended in conformity with generally accepted accounting principles.[2]

.18 Unqualified Opinion on Supplementary Schedule of Federal Financial Assistance

Independent Auditor's Report

Addressee:

We have audited the general-purpose[1] financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[2] These general-purpose financial statements are the responsibility of City of Example, Any State's management. Our responsibility is to express an opinion on these general-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Our audit was made for the purpose of forming an opinion on the general-purpose financial statements of City of Example, Any State, taken as a whole. The accompanying Schedule of Federal Financial Assistance is presented for purposes of additional analysis and is not a required part of the general-purpose financial statements. The information in that schedule has been subjected to the auditing procedures applied in the audit of the general-purpose financial statements and, in our opinion, is fairly presented in all material respects in relation to the general-purpose financial statements taken as a whole.[3]

.19 Unqualified Report on Compliance Based on an Audit of General-Purpose Financial Statements Performed in Accordance With *Government Auditing Standards*—No Reportable Instances of Noncompliance

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We conducted our audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to City of Example, Any State, is the responsibility of City of Example, Any State's management. As part of obtaining reasonable assurance about whether the general-purpose financial statements are free of material misstatement, we performed tests of City of Example, Any State's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our audit of the general-purpose financial statements was not to provide an opinion on overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance that are required to be reported herein under *Government Auditing Standards*.[2,3]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.17(A), with conforming changes as of May 1, 1995.]

---

[1] Describe any departure from the standard report.

[2] See *Government Auditing Standards*, Chapter 5, paragraphs 5.18 and 5.19, for reporting criteria.

[3] If the auditor has issued a separate letter to communicate irregularities, illegal acts, or other noncompliance that do not meet the criteria for reporting in paragraph 5.18 of *Government Auditing Standards*, this paragraph should be modified to include a statement such as the following:

> We noted certain immaterial instances of noncompliance that we have reported to the management of [*name of entity*] in a separate letter dated August 15, 19X1.

.20 Qualified Report on Compliance Based on an Audit of General-Purpose Financial Statements Performed in Accordance With *Government Auditing Standards*—Reportable Instances of Noncompliance and Uncertainty About Noncompliance Exists

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We conducted our audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to City of Example, Any State, is the responsibility of City of Example, Any State, management. As part of obtaining reasonable assurance about whether the general-purpose financial statements are free of material misstatement, we performed tests of City of Example, Any State's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our audit of the general-purpose financial statements was not to provide an opinion on overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed the following instances of noncompliance that are required to be herein reported under *Government Auditing Standards* for which the ultimate resolution cannot presently be determined.[2] Accordingly, no provision for any liability that may result has been recognized in City of Example, Any State's 19X1 financial statements.[3]

[*Include paragraphs describing the instances of noncompliance noted.*]

We considered these instances of noncompliance in forming our opinion on whether City of Example, Any State's 19X1 general-purpose financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, and this report does not affect our report dated August 15, 19X1, on those general-purpose financial statements.

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.17(B).]

---

[1] Describe any departure from the standard report.

[2] See *Government Auditing Standards*, Chapter 5, paragraphs 5.18 and 5.19, for reporting criteria.

[3] The impact of the instance of noncompliance is considered when reporting on the general-purpose financial statements and, if material to the general-purpose financial statements, an explanatory paragraph similar to the following should be added in the auditor's report on the general-purpose financial statements after the opinion paragraph:

> As discussed in note X, City of Example, Any State, failed to comply with certain statutory requirements to obtain competitive bids on capital projects in amounts over $X,XXX that may be material to the capital projects fund. The general-purpose financial statements do not include an adjustment for any liability that may result from the actions of the entity in relation to not obtaining competitive bids.

Auditors should be aware that instances of noncompliance may be material, either individually or in the aggregate, warranting expression of other than an unqualified opinion on the general-purpose financial statements.

.21 Single Audit Unqualified Opinion on Compliance With Specific Requirements Applicable to Major Federal Financial Assistance Programs

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We have also audited City of Example, Any State's compliance with the requirements governing [*list specific requirements tested*—see paragraph 23.40 of the Audit and Accounting Guide *Audits of State and Local Governmental Units*] that are applicable to each of its major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance,[2] for the year ended June 30, 19X1. The management of City of Example, Any State, is responsible for City of Example, Any State's compliance with those requirements. Our responsibility is to express an opinion on compliance with those requirements based on our audit.

We conducted our audit of compliance with those requirements in accordance with generally accepted auditing standards; *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-128, *Audits of State Local Governments*. Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about City of Example, Any State's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

The results of our audit procedures disclosed immaterial instances of noncompliance with the requirements referred to above, which are described in the accompanying Schedule of Findings and Questioned Costs. We considered these instances of noncompliance in forming our opinion on compliance, which is expressed in the following paragraph.[3]

In our opinion, City of Example, Any State, complied, in all material respects, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs for the year ended June 30, 19X1.

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.18(A).]

---

[1] Describe any departure from the standard report.

[2] Major programs need to be clearly identified in the Supplementary Schedule of Federal Financial Assistance.

[3] When there are no instances of noncompliance, this paragraph should be deleted.

.22 Single Audit Qualified Opinion on Compliance With Specific Requirements Applicable to Major Federal Financial Assistance Programs—Uncertainties

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We have also audited City of Example, Any State's compliance with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance,[2] for the year ended June 30, 19X1. The management of City of Example, Any State, is responsible for City of Example, Any State's compliance with those requirements. Our responsibility is to express an opinion on compliance with those requirements based on our audit.

We conducted our audit of compliance with those requirements in accordance with generally accepted auditing standards; *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments*. Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about City of Example, Any State's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

The results of our audit procedures for the U.S. Department of Education's Impact Aid—Maintenance and Operations program disclosed that City of Example, Any State, did not comply with the requirements that the number of children in the program equal at least 400, or 3 percent of the total number of children in average daily attendance. In our opinion, City of Example, Any State's compliance with this requirement is necessary for City of Example, Any State, to comply with the requirements applicable to the Impact Aid—Maintenance and Operations program.

In addition, the results of our audit procedures disclosed immaterial instances of noncompliance with the requirements referred to in the second paragraph of this report, which are described in the accompanying Schedule of Findings and Questioned Costs. We considered these instances of noncompliance in forming our opinion on compliance, which is expressed in the following paragraph.[3]

In our opinion, except for those instances of noncompliance with requirements applicable to the U.S. Department of Education's Impact Aid—Maintenance and Operations program referred to in the fourth paragraph of this report and identified in the accompanying Schedule of Findings and Questioned Costs, City of Example, Any State, complied, in all material respects, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs for the year ended June 30, 19X1.

Resolving instances of noncompliance identified in the fourth paragraph of this report is the responsibility of the U.S. Department of Education. The determination of whether the identified instances of noncompliance will ultimately result in a disallowance of costs cannot presently be made. Accordingly, no adjustment for any disallowances that may result has been made to the federal program amounts listed in the accompanying Schedule of Federal Financial Assistance and no provision for any liability that may result has been recognized in City of Example, Any State's 19X1 financial statements.

---

[1] Describe any departure from the standard report.

[2] Major programs need to be clearly identified in the Supplementary Schedule of Federal Financial Assistance.

[3] If there are no immaterial instances of noncompliance relating to major programs noted, this paragraph should be deleted.

.23 Single Audit Qualified Opinion on Compliance With Specific Requirements Applicable to Major Federal Financial Assistance Programs—Scope Limitation

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We have also audited the compliance of City of Example, Any State, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance,[2] for the year ended June 30, 19X1. The management of City of Example, Any State, is responsible for City of Example, Any State's compliance with those requirements. Our responsibility is to express an opinion on compliance with those requirements based on our audit.

Except as discussed in the following paragraph, we conducted our audit of compliance with those requirements in accordance with generally accepted auditing standards; *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments*. Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about City of Example, Any State's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

We were unable to obtain sufficient documentation supporting compliance of City of Example, Any State, with the requirements of Major Program ABC governing types of services allowed or unallowed; nor were we able to satisfy ourselves as to City of Example, Any State's compliance with those requirements of Major Program ABC by other auditing procedures.

In addition, the results of our audit procedures disclosed immaterial instances of noncompliance with the requirements referred to above, which are described in the accompanying Schedule of Findings and Questioned Costs. We considered these instances of noncompliance in forming our opinion on compliance, which is expressed in the following paragraph.

In our opinion, except for the effects of such noncompliance, if any, as might have been determined had we been able to examine sufficient evidence regarding City of Example, Any State's compliance with the requirements of Major Program ABC governing types of services allowed or unallowed, City of Example, Any State, complied, in all material respects, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs for the year ended June 30, 19X1.

This report is intended for the information of the audit committee, management and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

.24 Single Audit Disclaimer of Opinion on Compliance With Specific Requirements Applicable to Major Federal Financial Assistance Programs—Scope Limitation

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We were also engaged to audit the compliance of City of Example, Any State, with the requirements governing [*list requirements to have been tested*] that are applicable to each of its major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance,[2] for the year ended June 30, 19X1. The management of City of Example, Any State, is responsible for City of Example, Any State's compliance with those requirements.

The management of City of Example, Any State, has refused to provide us with written representations that generally accepted auditing standards require us to obtain.

Because of the matter described in the preceding paragraph, the scope of our audit work was not sufficient to enable us to express, and we do not express, an opinion on City of Example, Any State's compliance with the requirements governing [*list requirements to have been tested*] that are applicable to each of its major federal financial assistance programs for the year ended June 30, 19X1.

This report is intended for the information of the audit committee, management and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[1] Described any departure from the standard report.

[2] Major programs need to be clearly identified in the Supplementary Schedule of Federal Financial Assistance.

.25 Single Audit Qualified Opinion on Compliance With Specific Requirements Applicable to Major Federal Financial Assistance Programs—Noncompliance

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We have also audited the compliance of City of Example, Any State, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance,[2] for the year ended June 30, 19X1. The management of City of Example, Any State, is responsible for City of Example, Any State's compliance with those requirements. Our responsibility is to express an opinion on compliance with those requirements based on our audit.

We conducted our audit of compliance with those requirements in accordance with generally accepted auditing standards; *Government Auditing Standards,* issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments.* Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about City of Example, Any State's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

The results of our audit procedures for Major Program ABC disclosed that City of Example, Any State, did not comply with the requirement that City match the funds received from Major Program ABC. In our opinion, City of Example, Any State's matching of funds received from Major Program ABC is necessary for City of Example, Any State, to comply with the requirements applicable to Major Program ABC.

In addition, the results of our audit procedures disclosed immaterial instances of noncompliance with the requirements referred to in the third paragraph, which are described in the accompanying Schedule of Findings and Questioned Costs. We considered these instances of noncompliance in forming our opinion on compliance, which is expressed in the following paragraph.

In our opinion, except for those instances of noncompliance with the requirements applicable to Major Program ABC referred to in the fourth paragraph of this report and identified in the accompanying Schedule of Findings and Questioned Costs, City of Example, Any State, complied, in all material respects, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs for the year ended June 30, 19X1.

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

.26 Single Audit Adverse Opinion on Compliance With Specific Requirements Applicable to Major Federal Financial Assistance Programs

Independent Auditor's Report

Addressee:

We have audited the financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We have also audited the compliance of City of Example, Any State, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance,[2] for the year ended June 30, 19X1. The management of City of Example, Any State, is responsible for City of Example, Any State's compliance with those requirements. Our responsibility is to express an opinion on compliance with those requirements based on our audit.

We conducted our audit of compliance with those requirements in accordance with generally accepted auditing standards; *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments*. Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about City of Example, Any State's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

[*Add a paragraph describing reasons for the adverse opinion.*]

In addition, the results of our audit procedures disclosed immaterial instances of noncompliance with the requirements referred to above, which are described in the accompanying Schedule of Findings and Questioned Costs. We considered these instances of noncompliance in forming our opinion on compliance, which is expressed in the following paragraph.

In our opinion, because of those instances of noncompliance referred to in the fourth paragraph, City of Example, Any State, did not comply, in all material respects, with the requirements governing [*list requirements tested*] that are applicable to each of its major federal financial assistance programs for the year ended June 30, 19X1.

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[2] Major programs need to be clearly identified in the Supplementary Schedule of Federal Financial Assistance.

.27 Single Audit Unqualified Report on Compliance With the General Requirements Applicable to Federal Financial Assistance Programs

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[1]

We have applied procedures to test City of Example, Any State's compliance with the following requirements applicable to its federal financial assistance programs, which are identified in the Schedule of Federal Financial Assistance, for the year ended June 30, 19X1 [*list the general requirements tested*].

Our procedures were limited to the applicable procedures described in the Office of Management and Budget's *Compliance Supplement for Single Audits of State and Local Governments [or describe alternative procedures performed*]. Our procedures were substantially less in scope than an audit, the objective of which is the expression of an opinion on City of Example, Any State's compliance with the requirements listed in the preceding paragraph. Accordingly, we do not express such an opinion.

With respect to the items tested, the results of those procedures disclosed no material instances of noncompliance with the requirements listed in the second paragraph of this report. With respect to items not tested, nothing came to our attention that caused us to believe that City of Example, Any State, had not complied, in all material respects, with those requirements. However, the results of our procedures disclosed immaterial instances of noncompliance with those requirements, which are described in the accompanying Schedule of Findings and Questioned Costs.[2]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

.28 Single Audit Qualified Report on Compliance With the General Requirements Applicable to Federal Financial Assistance Programs—Material Noncompliance[1]

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of [*name of entity*] as of and for the year ended June 30, 19X1, and have issued our report thereon dated August 15, 19X1.[2]

We have applied procedures to test City of Example, Any State's compliance with the following requirements applicable to its federal financial assistance programs, which are identified in the Schedule of Federal Financial Assistance, for the year ended June 30, 19X1 [*list general requirements tested*].

Our procedures were limited to the applicable procedures described in the Office of Management and Budget's *Compliance Supplement for Single Audits of State and Local Governments [or describe alternative procedures performed*]. Our procedures were substantially less in scope than an audit, the objective of which is the expression of an opinion on City of Example, Any State's compliance with the requirements listed in the preceding paragraph. Accordingly, we do not express such an opinion.

Material instances of noncompliance consist of failures to follow the general requirements that caused us to conclude that the misstatements resulting from those failures are material [*indicate program(s) or financial statements*]. The results of our tests of compliance disclosed material instances of noncompliance that are described in the accompanying Schedule of Findings and Questioned Costs.[3]

We considered these material instances of noncompliance in forming our opinion on whether City of Example, Any State's 19X1 general-purpose financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, and this report does not affect our report dated August 15, 19X1, on those financial statements.

Except as described above, the results of our procedures to determine compliance indicate that, with respect to the items tested, City of Example, Any State, complied, in all material respects, with the requirements listed in the second paragraph of this report. With respect to items not tested, nothing came to our attention

---

[1] See paragraph 23.81 of the Audit and Accounting Guide *Audits of State and Local Governmental Units*, which discusses materiality with respect to the general requirements.

[2] Describe any departure from the standard report.

[3] If, individually or collectively, the instances of noncompliance are also material to the general-purpose financial statements, the report on compliance required by *Government Auditing Standards* is modified as follows:

> [*First three paragraphs are the same as in the report illustrated in AAM section 12,400.18*].
> Material instances of noncompliance are failures to follow requirements, or violations of prohibitions, contained in laws, regulations, contracts, or grants, that cause us to conclude that the aggregation of the misstatements resulting from those failures or violations is material to the general-purpose financial statements. The results of our tests of compliance disclosed the following material instances of noncompliance, the effects of which have been corrected in the 19X1 general-purpose financial statements of City of Example, Any State.
> [*Include paragraphs describing the material instances of noncompliance noted.*]
> We considered these material instances of noncompliance in forming our opinion on whether the 19X1 general-purpose financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, and this report does not affect our report dated August 15, 19X1, on those general-purpose financial statements.
> Except as described above, the results of our tests of compliance indicate that, with respect to the items tested, City of Example, Any State, complied, in all material respects, with the provisions referred to in the third paragraph of this report, and with respect to items not tested, nothing came to our attention that caused us to believe that City of Example, Any State, had not complied, in all material respects, with those provisions.
> This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.
> [*Signature*]
> [*Date*]

that caused us to believe that City of Example, Any State, had not complied, in all material respects, with those requirements.[4] However, the results of our procedures also disclosed immaterial instances of noncompliance with those requirements, which are described in the accompanying Schedule of Findings and Questioned Costs.[5]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.23(B).]

[4] The following is an illustration of the auditor's report when the auditor determines noncompliance is pervasive and the auditor is not able to provide negative assurance on general requirements.

> [*First three paragraphs and last paragraph are the same as in the report illustrated above*].
> With respect to the items tested, City of Example, Any State, complied with the requirements listed in the second paragraph, except as described in the attached schedule. However, the extent of noncompliance noted in our testing indicates that, with respect to items that were not tested by us, there is more than a relatively low risk that City of Example, Any State, may not have complied with the requirements referred to in the second paragraph. These matters were considered by us in evaluating whether the general-purpose financial statements are presented fairly in conformity with generally accepted accounting principles.

[5] When there are no immaterial instances of noncompliance noted, this sentence should be deleted.

.29 Single Audit Qualified Report on Compliance With the General Requirements Applicable to Federal Financial Assistance Programs—Scope Limitation

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX.[1]

We have applied procedures to test City of Example, Any State's compliance with the following requirements applicable to its federal financial assistance programs, which are identified in the Schedule of Federal Financial Assistance, for the year ended June 30, 19XX [*list general requirements tested*].

Except as described in the following paragraph, our procedures were limited to the applicable procedures described in the Office of Management and Budget's *Compliance Supplement for Single Audits of State and Local Governments [or describe alternative procedures performed]*. Our procedures were substantially less in scope than an audit, the objective of which is the expression of an opinion on City of Example, Any State's compliance with the requirements listed in the preceding paragraph. Accordingly, we do not express such an opinion.

We were unable to obtain sufficient documentation of City of Example, Any State's compliance with the cash management and relocation assistance and real property acquisition requirements of Program ABC, nor were we able to satisfy ourselves by alternative procedures as to City of Example, Any State's compliance with those requirements of Program ABC.

With respect to the items tested, except for the effects of such noncompliance, if any, as might have been determined had we been able to examine sufficient evidence regarding City of Example, Any State's compliance with the cash management and relocation assistance and real property acquisition requirements of Program ABC, City of Example, Any State, complied, in all material respects, with the requirements listed in the first paragraph of this report. With respect to items not tested, nothing came to our attention that caused us to believe that City of Example, Any State, had not complied, in all material respects, with those requirements. The results of our procedures disclosed immaterial instances of noncompliance with those requirements, which are described in the accompanying Schedule of Findings and Questioned Costs.[2]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited..

[1] Describe any departure from the standard report.

[2] If there is pervasive noncompliance and negative assurance cannot be provided, the standard report should be modified as shown in AAM section 12,400.28, footnote 4.

.30 Single Audit Unqualified Report on Compliance With Specific Requirements Applicable to Nonmajor Federal Financial Assistance Programs Transactions[1]

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX.[2]

In connection with our audit of the general-purpose financial statements of City of Example, Any State, and with our consideration of City of Example, Any State's control structure used to administer federal financial assistance programs, as required by Office of Management and Budget Circular A-128, *Audits of State and Local Governments*, we selected certain transactions applicable to certain nonmajor federal financial assistance programs for the year ended June 30, 19XX. As required by OMB Circular A-128, we have performed auditing procedures to test compliance with the requirements governing [*list requirements tested*] that are applicable to those transactions. Our procedures were substantially less in scope than an audit, the objective of which is the expression of an opinion on City of Example, Any State's compliance with these requirements. Accordingly, we do not express such an opinion.

With respect to the items tested, the results of those procedures disclosed no material instances of noncompliance with the requirements listed in the preceding paragraph. With respect to items not tested, nothing came to our attention that caused us believe that City of Example, Any State, had not complied, in all material respects, with those requirements.[3] However, the results of our procedures disclosed immaterial instances of noncompliance with those requirements, which are described in the accompanying Schedule of Findings and Questioned Costs.[4]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[*Signature*]

[*Date*]

---

[1] See AAM section 12,400.28, footnote 3, for modification when material noncompliance is detected.

[2] Describe any departure from the standard report.

[3] The following is an illustration of the auditor's report when the auditor determines noncompliance for nonmajor program transactions is pervasive and the auditor is not able to provide negative assurance.

> [*First two paragraphs and last paragraph are the same as in the report illustrated above.*]
> The results of our tests indicate that, with respect to the items tested, City of Example, Any State, complied with those requirements, except as described in the attached schedule. However, the extent of noncompliance noted in our testing indicates that, with respect to nonmajor program transactions not tested by us, there is more than a relatively low risk that City of Example, Any State, may not have complied with the requirements referred to in the preceding paragraph. These matters were considered by us in evaluating whether the general-purpose financial statements are presented fairly in conformity with generally accepted accounting principles.

[4] If there are no instances of noncompliance, this sentence should be deleted.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.31 Report on the Internal Control Structure Based on an Audit of General-Purpose Financial Statements Performed in Accordance With *Government Auditing Standards*

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX.[1]

We conducted our audit in accordance with generally accepted auditing standards and *Government Auditing Standards,* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles.[2] Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

In planning and performing our audit of the general-purpose financial statements of City of Example, Any State, for the year ended June 30, 19XX, we obtained an understanding of the internal control structure. With respect to the internal control structure, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation, and we assessed control risk in order to determine our auditing procedures for the purpose of expressing our opinion on the general-purpose financial statements and not to provide an opinion on the internal control structure. Accordingly, we do not express such an opinion.

We noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the general-purpose financial statements.

[*Include paragraphs to describe the reportable conditions noted.*]

A material weakness is a reportable condition in which the design or operation of one or more of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the general-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

---

[1] Describe any departure from the standard report.

[2] If the financial statements are on a basis other than GAAP (for example, cash basis in accordance with the U.S. Department of Housing and Urban Development [HUD] Accounting Manual), the phrase "generally accepted accounting principles" should be modified.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe none of the reportable conditions described above is a material weakness.[3]

We also noted other matters involving the internal control structure and its operation that we have reported to the management of City of Example, Any State, in a separate letter dated August 15, 19XX.[4]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record, and its distribution is not limited.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.25(A), with conforming changes as of May 1, 1995.]

[3] If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention. The last sentence of this paragraph should be modified as follows:

> However, we noted the following matters involving the internal control structure and its operation that we consider to be material weaknesses as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures to be performed in our audit of the financial statements of City of Example, Any State for the year ended June 30, 19XX.
> [*A description of the material weaknesses that have come to the auditor's attention would follow.*]

[4] If a separate letter has not been issued, this paragraph should be omitted.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.32 Report on the Internal Control Structure Based on an Audit of General-Purpose or Basic Financial Statements Performed in Accordance With *Government Auditing Standards*—No Material Weaknesses When There Are No Reportable Conditions

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX.[1]

We conducted our audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement.

In planning and performing our audit of the general-purpose financial statements of City of Example, Any State, for the year ended June 30, 19XX, we considered its internal control structure in order to determine our auditing procedures for the purpose of expressing our opinion on the general-purpose financial statements and not to provide assurance on the internal control structure.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles.[2] Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the purpose of this report, we have classified the significant internal control structure policies and procedures in the following categories:

[*Identify internal control categories here.*]

For all of the internal control structure categories listed in the preceding paragraph, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation, and we assessed control risk.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that errors and irregularities in amounts that would be material in relation to the general-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control structure and its operations that we consider to be material weaknesses as defined above.

---

[1] Describe any departure from the standard report.

[2] If the financial statements are on a basis other than GAAP, the phrase "generally accepted accounting principles" should be modified.

However, we noted certain matters involving the internal control structure and its operation that we have reported to the management of City of Example, Any State, in a separate letter dated August 15, 19XX.[3]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

[*Signature*]

[*Date*]

Note: As of the date of this publication, the AICPA Federal Government Division was in the process of revising this report to conform it to the requirements of the 1994 revision of *Government Auditing Standards* (the Yellow Book). Auditors should ascertain the status of those revisions before issuing this report.

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.25(B).]

[3] If a separate letter has not been issued, this paragraph should be omitted.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.33 Single Audit Report on the Internal Control Structure Used in Administering Federal Financial Assistance Programs

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX.[1] We have also audited the compliance of City of Example, Any State, with requirements applicable to major federal financial assistance programs and have issued our report thereon dated August 15, 19XX.

We conducted our audits in accordance with generally accepted auditing standards; *Government Auditing Standards,* issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments.* Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement and about whether City of Example, Any State, complied with laws and regulations, noncompliance with which would be material to a major federal financial assistance program.

In planning and performing our audits for the year ended June 30, 19XX, we considered the internal control structure of City of Example, Any State, in order to determine our auditing procedures for the purpose of expressing our opinions on the general-purpose financial statements of City of Example, Any State, and on the compliance of City of Example, Any State, with requirements applicable to major programs, and to report on the internal control structure in accordance with OMB Circular A-128. This report addresses our consideration of internal control structure policies and procedures relevant to compliance with requirements applicable to federal financial assistance programs. We have addressed internal control structure policies and procedures relevant to our audit of the general-purpose financial statements in a separate report dated August 15, 19XX.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles,[2] and that federal financial assistance programs are managed in compliance with applicable laws and regulations. Because of inherent limitations in any internal control structure, errors, irregularities, or instances of noncompliance may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the purpose of this report, we have classified the significant internal control structure policies and procedures used in administering federal financial assistance programs in the following categories: [*identify internal control structure categories*].[3]

---

[1] Describe any departure from the standard report.

[2] If the financial statements are on a basis other than GAAP, the phrase "generally accepted accounting principles" should be modified.

[3] Following are examples of different ways in which internal control structure policies and procedures used in administering federal financial assistance programs might be classified. The auditor should modify these examples or use other classifications as appropriate for the particular circumstances on which the auditor is reporting. However, there is no need to present detailed internal control structure policies and procedures, even though test work may be performed at that level.

Activity Cycles

- Treasury or financing

For all of the internal control structure categories listed above, we obtained an understanding of the design of relevant policies and procedures and determined whether they have been placed in operation, and we assessed control risk.[4]

During the year ended June 30, 19XX, City of Example, Any State, expended X percent of its total federal financial assistance under major federal financial assistance programs.

(*Footnote continued*)

- Revenue/receipts
- Purchases/disbursements
- External financial reporting
- Payroll/personnel

Financial Statement Captions

- Cash and cash equivalents
- Receivables
- Inventory
- Property and equipment
- Payables and accrued liabilities
- Debt
- Fund balance

Accounting Applications

- Billings
- Receivables
- Cash receipts
- Purchasing and receiving
- Accounts disbursements
- Payroll
- Inventory control
- Property and equipment
- General ledger

General Requirements

- Political activity
- Davis-Bacon Act
- Civil rights
- Cash management
- Relocation assistance and real property management
- Federal financial reports
- Allowable costs/cost principles
- Drug-free workplace
- Administrative requirements

Specific Requirements

- Types of services
- Eligibility
- Matching, level of effort, or earmarking
- Reporting
- Cost allocation
- Special requirements, if any
- Monitoring subrecipients

Claims for Advances and Reimbursements

Amounts Claimed or Used for Matching

[4] If a cyclical approach is used, this paragraph should be modified, and a paragraph that clearly describes the coverage provided for nonmajor programs should be added after it as follows:

> Because of the large number of nonmajor programs and the decentralized administration of these programs, we performed procedures to obtain an understanding of the internal control structure policies and procedures relevant to nonmajor programs on a cyclical basis. Our procedures during the current year covered X percent of the nonmajor programs administered by City of Example, Any State, as a whole. The nonmajor programs not covered during the current year have been or are expected to be subject to such procedures at least once during the X year cycle.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

We performed tests of controls, as required by OMB Circular A-128, to evaluate the effectiveness of the design and operation of internal control structure policies and procedures that we considered relevant to preventing or detecting material noncompliance with specific requirements, general requirements, and requirements governing claims for advances and reimbursements and amounts claimed or used for matching that are applicable to each of City of Example, Any State's major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance. Our procedures were less in scope than would be necessary to render an opinion on these internal control structure policies and procedures. Accordingly, we do not express such an opinion.

We noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect City of Example, Any State's ability to administer federal financial assistance programs in accordance with applicable laws and regulations.

[*Include paragraphs to describe the reportable conditions noted.*]

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that noncompliance with laws and regulations that would be material to a federal financial assistance program may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure policies and procedures used in administering federal financial assistance would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe none of the reportable conditions described above is a material weakness.[5]

We also noted other matters involving the internal control structure and its operation that we have reported to the management of City of Example, Any State, in a separate letter dated September 8, 19XX.[6]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record, and its distribution is not limited.

[*Signature*]

[*Date*]

[Source: AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*, Appendix A, Example A.26(A).]

---

[5] If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention and may state that these weaknesses do not affect the report on the audit of compliance with requirements applicable to major federal financial assistance programs. The last sentence of this paragraph should be modified as follows:

> However, we noted the following matters involving the internal control structure and its operation that we consider to be material weaknesses as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures to be performed in our audit of the compliance of City of Example, Any State, with requirements applicable to its major federal financial assistance programs for the year ended June 30, 19XX, and this report does not affect our report thereon dated September 8, 19XX. [*A description of the material weaknesses that have come to the auditor's attention would follow.*]

[6] If a separate letter has not been issued, this paragraph should be omitted.

.34 Single Audit Report on the Internal Control Structure Used in Administering Federal Financial Assistance Programs—No Material Weaknesses When There Are No Reportable Conditions[1]

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX. We have also audited the compliance of City of Example, Any State, with requirements applicable to major federal financial assistance programs and have issued our report thereon dated August 15, 19XX.

We conducted our audits in accordance with generally accepted auditing standards; *Government Auditing Standards,* issued by the Comptroller of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments.* Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement and about whether City of Example, Any State, complied with laws and regulations, noncompliance with which would be material to a major federal financial assistance program.

In planning and performing our audits for the year ended June 30, 19XX, we considered the internal control structure of City of Example, Any State, in order to determine our auditing procedures for the purpose of expressing our opinions on the general-purpose financial statements of City of Example, Any State, and on the compliance of City of Example, Any State, with requirements applicable to major programs, and to report on the internal control structure in accordance with OMB Circular A-128. This report addresses our consideration of internal control structure policies and procedures relevant to compliance with requirements applicable to federal financial assistance programs. We have addressed internal control structure policies and procedures relevant to our audit of the general-purpose financial statements in a separate report dated August 15, 19XX.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles, and federal financial assistance programs are managed in compliance with applicable laws and regulations. Because of inherent limitations in any internal control structure, errors, irregularities, or instances of noncompliance may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the purpose of this report, we have classified the significant internal control structure policies and procedures used in administering federal financial assistance programs into the following categories.

[*Identify internal control structure categories.*]

For all of the internal control structure categories listed above, we obtained an understanding of the design of relevant policies and procedures and determined whether the have been placed in operation, and we assessed control risk.

During the year ended June 30, 19XX, City of Example, Any State, expended X percent of its total federal financial assistance under major federal financial assistance programs.

---

We performed test of controls, as required by OMB Circular A-128, to evaluate the effectiveness of the design and operation of internal control structure policies and procedures that we considered relevant to preventing or detecting material noncompliance with specific requirements, general requirements, and requirements governing claims for advances and reimbursements and amounts claimed or used for matching that are applicable to each of the major federal financial assistance programs of City of Example, Any State, which are identified in the accompanying Schedule of Federal Financial Assistance. Our procedures were less in scope than would be necessary to render an opinion on these internal control structure policies and procedures. Accordingly, we do not express such an opinion.

Our consideration of the internal control structure policies and procedures used in administering federal financial assistance would not necessarily disclose all matters in the internal control structure that might constitute material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that noncompliance with laws and regulations that would be material to a federal financial assistance program may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control structure and its operations that we consider to be material weaknesses as defined above.

However, we noted certain matters involving the internal control structure and its operation that we have reported to the management of City of Example, Any State, in a separate letter dated August 15, 19XX.

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record and its distribution is not limited.

.35 Single Audit Report on the Internal Control Structure Used in Administering Federal Financial Assistance Programs—No Tests of Controls Are Performed for Certain Compliance Requirements[1]

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX. We have also audited the compliance of City of Example, Any State, with requirements applicable to major federal financial assistance programs and have issued our report thereon dated August 15, 19XX.

We conducted our audits in accordance with generally accepted auditing standards; *Government Auditing Standards,* issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments.* Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement and about whether City of Example, Any State, complied with laws and regulations, noncompliance with which would be material to a major federal financial assistance program.

In planning and performing our audits for the year ended June 30, 19XX, we considered the internal control structure of City of Example, Any State, in order to determine our auditing procedures for the purpose of expressing our opinions on the general-purpose financial statements of City of Example, Any State, and on the compliance of City of Example, Any State, with requirements applicable to major federal financial assistance programs, and to report on the internal control structure in accordance with OMB Circular A-128. This report addresses our consideration of internal control structure policies and procedures relevant to compliance with requirements applicable to federal financial assistance programs. We have addressed internal control structure policies and procedures relevant to our audit of the general-purpose financial statements in a separate report dated August 15, 19XX.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles, and that federal financial assistance programs are managed in compliance with applicable laws and regulations. Because of inherent limitations in any internal control structure, errors, irregularities, or instances of noncompliance may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the purpose of this report, we have classified the significant internal control structure policies and procedures into the following categories: [*identify internal control structure categories*].

For all of the internal control structure categories listed above, we obtained an understanding of the design of relevant policies and procedures and determined whether they have been placed in operation, and we assessed control risk.

During the year ended June 30, 19XX, City of Example, Any State, expended X percent of its total federal financial assistance under major federal financial assistance programs.

---

[1] See footnotes to AAM section 12,400.33.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Except as discussed in the following paragraph, we performed tests of controls, as required by OMB Circular A-128, to evaluate the effectiveness of the design and operation of internal control structure policies and procedures that we considered relevant to preventing or detecting material noncompliance with specific requirements, general requirements, and requirements governing claims for advances and reimbursements and amounts claimed or used for matching that are applicable to each of City of Example, Any State's major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance. Our procedures were less in scope than would be necessary to render an opinion on these internal control structure policies and procedures. Accordingly, we do not express such an opinion.

For [*identify relevant federal financial assistance programs*], we performed no tests of controls to evaluate the effectiveness of the design and operation of internal control structure policies and procedures that could be relevant to preventing or detecting material noncompliance with [*identify relevant compliance requirements*]. We did not perform such tests because the results of procedures we performed to obtain an understanding of the design of internal control structure policies and procedures and whether they have been placed in operation indicated that [*describe the absence of relevant policies and procedures or the circumstances that cause the auditor to conclude that policies and procedures are unlikely to be effective*]. We consider this condition to be a reportable condition under standards established by the American Institute of Certified Public Accountants.

Reportable conditions involve matters coming to our attention concerning significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect City of Example, Any State's ability to administer federal financial assistance programs in accordance with applicable laws and regulations. In addition to the reportable conditions identified in the preceding paragraph, we noted other matters involving the internal control structure and its operation that we consider to be reportable conditions.

[*Include paragraphs to describe the reportable conditions noted.*]

A material weakness is a reportable condition in which in the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that noncompliance with laws and regulations that would be material to a federal financial assistance program may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe that none of the reportable conditions described above is a material weakness.

We also noted other matters involving the internal control structure and its operations that we have reported to the management of City of Example, Any State, in a separate letter dated August 15, 19XX.

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record, and its distribution is not limited.

.36 Single Audit Report on the Internal Control Structure Used in Administering Federal Financial Assistance Programs—Total Assistance Expended Under Major Programs Is Less Than 50 Percent of Federal Financial Assistance

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated August 15, 19XX.[1] We have also audited the compliance of City of Example, Any State, with requirements applicable to major federal financial assistance programs and have issued our report thereon dated August 15, 19XX.

We conducted our audits in accordance with generally accepted auditing standards; *Government Auditing Standards,* issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments.* Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement and about whether City of Example, Any State, complied with laws and regulations, noncompliance with which would be material to a major federal financial assistance program.

In planning and performing our audits for the year ended June 30, 19XX, we considered the internal control structure of City of Example, Any State, in order to determine our auditing procedures for the purpose of expressing our opinions on the general-purpose financial statements of City of Example, Any State, and on the compliance of City of Example, Any State, with requirements applicable to major programs, and to report on the internal control structure in accordance with OMB Circular A-128. This report addresses our consideration of internal control structure policies and procedures relevant to compliance with requirements applicable to federal financial assistance programs. We have addressed internal control structure policies and procedures relevant to our audit of the general-purpose financial statements in a separate report dated August 15, 19XX.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles,[2] and that federal financial assistance programs are managed in compliance with applicable laws and regulations. Because of inherent limitations in any internal control structure, errors, irregularities, or instances of noncompliance may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the purpose of this report, we have classified the significant internal control structure policies and procedures used in administering federal financial assistance programs in the following categories: [*identify internal control structure categories*].[3]

---

[1] Describe any departure from the standard report.

[2] If the financial statements are on a basis other than GAAP, the phrase "generally accepted accounting principles" should be modified.

[3] Following are examples of different ways in which internal control structure policies and procedures used in administering federal financial assistance programs might be classified. The auditor should modify these examples or use other classifications as appropriate for the particular circumstances on which the auditor is reporting. However, there is no need to present detailed internal control structure policies and procedures, even though test work may be performed at that level.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

For all of the internal control structure categories listed above, we obtained an understanding of the design of relevant policies and procedures and determined whether they have been placed in operation, and we assessed control risk.[4]

During the year ended June 30, 19XX, City of Example, Any State, expended X percent of its total federal financial assistance under major federal financial assistance programs and the following nonmajor federal

[4] If a cyclical approach is used, this paragraph should be modified, and a paragraph that clearly describes the coverage provided for nonmajor programs should be added after it as follows:

> Because of the large number of nonmajor programs and the decentralized administration of these programs, we performed procedures to obtain an understanding of the internal control structure policies and procedures relevant to nonmajor programs on a cyclical basis. Our procedures during the current year covered X percent of the nonmajor programs administered by City of Example, Any State, as a whole. The nonmajor programs not covered during the current year have been or are expected to be subject to such procedures at least once during the X year cycle.

financial assistance programs: [*list appropriate nonmajor federal financial assistance programs*]. However, we believe none of the reportable conditions described above is a material weakness.

We performed tests of controls, as required by OMB Circular A-128, to evaluate the effectiveness of the design and operation of internal control structure policies and procedures that we considered relevant to preventing or detecting material noncompliance with specific requirements, general requirements, and requirements governing claims for advances and reimbursements and amounts claimed or used for matching that are applicable to each of City of Example, Any State's major federal financial assistance programs, which are identified in the accompanying Schedule of Federal Financial Assistance, and the aforementioned nonmajor programs. Our procedures were less in scope than would be necessary to render an opinion on these internal control structure policies and procedures. Accordingly, we do not express such an opinion.

We noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect City of Example, Any State's ability to administer federal financial assistance programs in accordance with applicable laws and regulations.

[*Include paragraphs to describe the reportable conditions noted.*]

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that noncompliance with laws and regulations that would be material to a federal financial assistance program may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure policies and procedures used in administering federal financial assistance would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe none of the reportable conditions described above is a material weakness.[5]

We also noted other matters involving the internal control structure and its operation that we have reported to the management of City of Example, Any State, in a separate letter dated September 8, 19XX.[6]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of a public record, and its distribution is not limited.

.37 Single Audit Report on the Internal Control Structure Used in Administering Federal Financial Assistance Programs—No Major Programs[1]

Independent Auditor's Report

Addressee:

We have audited the general-purpose financial statements of City of Example, Any State, as of and for the year ended June 30, 19XX, and have issued our report thereon dated September 8, 19XX.

We conducted our audit in accordance with generally accepted auditing standards; *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget Circular A-128, *Audits of State and Local Governments*. Those standards and OMB Circular A-128 require that we plan and perform the audit to obtain reasonable assurance about whether the general-purpose financial statements are free of material misstatement.

In planning and performing our audit for the year ended June 30, 19XX, we considered the internal control structure of City of Example, Any State, in order to determine our auditing procedures for the purpose of expressing our opinion on City of Example, Any State's general-purpose financial statements and to report on the internal control structure in accordance with OMB Circular A-128. This report addresses our consideration of internal control structure policies and procedures relevant to compliance with requirements applicable to federal financial assistance programs. We have addressed internal control structure policies and procedures relevant to our audit of the general-purpose financial statements in a separate report dated August 15, 19XX.

The management of City of Example, Any State, is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of general-purpose financial statements in accordance with generally accepted accounting principles, and that federal financial assistance programs are managed in compliance with applicable laws and regulations. Because of inherent limitations in any internal control structure, errors, irregularities, or instances of noncompliance may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the purpose of this report, we have classified the significant internal control structure policies and procedures used in administering federal financial assistance programs into the following categories: [*identify internal control structure categories*].

For all of the internal control structure categories listed above, we obtained an understanding of the design of relevant policies and procedures and determined whether they have been placed in operation, and we assessed control risk.

During the year ended June 30, 19XX, City of Example, Any State, had no major federal financial assistance programs and expended X percent of its total federal financial assistance under the following nonmajor federal financial assistance programs: [*list appropriate nonmajor federal financial assistance programs*].

We performed tests of controls, as required by OMB Circular A-128, to evaluate the effectiveness of the design and operation of internal control structure policies and procedures that we have considered relevant to pre-

[1] See footnotes in AAM section 12,400.33.

venting or detecting material noncompliance with specific requirements, general requirements, and requirements governing claims for advances and reimbursements and amounts claimed or used for matching that are applicable to the aforementioned nonmajor programs. Our procedures were less in scope than would be necessary to render an opinion on these internal control structure policies and procedures. Accordingly, we do not express such an opinion.

We noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect City of Example, Any State's ability to administer federal financial assistance programs in accordance with applicable laws and regulations.

[*Include paragraphs to describe the reportable conditions noted.*]

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that noncompliance with laws and regulations that would be material to a federal financial assistance program may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure policies and procedures used in administering federal financial assistance would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe none of the reportable conditions described above is a material weakness.[2]

We also noted other matters involving the internal control structure and its operation that we have reported to the management of City of Example, Any State, in a separate letter dated September 8, 19XX.[3]

This report is intended for the information of the audit committee, management, and [*specify legislative or regulatory body*]. However, this report is a matter of public record, and its distribution is not limited.

.38 Report on Separately Issued Summary Financial Information Prepared in Accordance With the Guidance Provided in Paragraph 18.23 of the AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units*

Independent Auditor's Report

Addressee:

We have audited, in accordance with generally accepted auditing standards, the general-purpose financial statements of City of Example as of and for the year ended June 30, 19XX (not presented herein), and have issued our report thereon dated August 15, 19XX.[1]

As explained in Note X, the accompanying summary financial information of City of Example, as of and for the year ended June 30, 19XX, is not a presentation in conformity with generally accepted accounting principles. In our opinion, however, the accompanying summary financial information is fairly stated, in all material respects, in relation to the general-purpose financial statements from which it has been derived.
