HOW TO USE THIS VOLUME

NEW CHANGES

This edition contains the following significant additions:

- SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU section 316), has been incorporated into the Audit and Accounting Manual (the Manual), including:
  - — A new "Fraud" section (see AAM section 3145)
  - — A new "Fraud Risk Factor Memory Jogger" (see AAM section 3165)
  - — A new "Fraud Communication Checklist" (see AAM section 5400—general program)
  - — Engagement letters appropriately modified to reflect new "fraud-related" language (see AAM sections 2200 and 3175)
  - — A revised section on assessing audit risk and materiality, in light of SAS No. 82 (see AAM section 3140)
  - — Modified audit programs and planning program reflecting SAS No. 82 requirements (see AAM sections 3165 and 5400)
- SAS No. 81, *Auditing Investments*, has been incorporated into the Manual (see the "Investments and Derivatives" audit program at AAM section 5400)
- SAS No. 80, *Amendment to Statement on Auditing Standards No. 31*, Evidential Matter, has been incorporated into the Manual
- SOP 96-1, *Environmental Remediation Liabilities*, has been incorporated into the Manual (see the "Accrued Liabilities" audit program at AAM section 5400 and the "Planning Program" at AAM section 3165)
- FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, has been incorporated into the Manual (see the "Investments and Derivatives," "Trade Accounts and Notes Receivable," and "Notes Payable and Long-Term Debt" audit programs at AAM section 5400)

Scope of the Volume . . .

This Volume, which is a reprint of the looseleaf edition, brings together for continuing reference a set of nonauthoritative audit tools and illustrations prepared by the staff of the Accounting and Auditing Publications Team of the American Institute of Certified Public Accountants.

How This Volume Is Arranged . . .

The contents of this Volume are arranged as follows:

Introduction

Compilation and Review

Engagement Planning and Administration

Internal Control

Audit Approach and Programs

Working Papers

Correspondence, Confirmations & Representations
Audit Risk Alerts
Supervision, Review and Report Processing
Accountants' Reports
Quality Control
State and Local Governments

How to Use This Volume . . .

The arrangement of material is indicated in the general table of contents at the front of the Volume. There is a detailed table of contents covering the material within each major division.

The major divisions are subdivided into sections, each with its own section number. Each paragraph within a section is decimally numbered. For example, AAM section 7100.01 refers to the first paragraph of section 7100, *Control of Confirmations and Correspondence*. Section and paragraph numbers located on each page are provided as corner references at the bottom of each page.

The AICPA *Professional Standards* is referenced by the use of the following abbreviations: AU (Auditing), AT (Attestation Standards), AR (Accounting and Review Services), ET (Code of Professional Conduct), BL (Bylaws), QC (Quality Control), and PR (Peer Review).

The FASB *Accounting Standards Current Text* is referenced in a similar manner by the use of the abbreviation AC before the section and paragraph numbers. The *Current Text* contains an abridged version of the currently effective financial and reporting standards, as amended.

Quotations of accounting standards in this Volume are derived from the original pronouncements and may have been editorially changed in the *Current Text*.

AAM Section 1100
Introduction

.01 This manual has been prepared by the staff of the American Institute of Certified Public Accountants and issued as a nonauthoritative practice aid. The materials included in it are intended primarily as a reference source for conducting audit, review, and compilation engagements. The objective is to provide practitioners with the tools needed to help plan, perform, and report on their engagements. *The manual is not intended to serve as a complete or comprehensive quality control system.* The materials are not intended as a substitute for the professional judgments that must be applied by practitioners. The manual, where practicable, offers choices and alternatives rather than particular positions. The manual is not a substitute for the authoritative technical literature and users are urged to refer directly to applicable authoritative pronouncements for the text of technical standards.

.02 Some sections of the manual include quotations from Statements on Auditing Standards and other authoritative pronouncements. Those quotations are intended only to illustrate certain matters, not to serve as a substitute for careful study of the relevant pronouncements. References are made throughout the manual to the original authoritative pronouncements and to their section numbers in AICPA *Professional Standards* and the FASB *Accounting Standards Current Text* to help users locate those authoritative pronouncements.

.03 The authors hope that the manual will be helpful to practitioners in the conduct of their audit and accounting practice. However, no generalized material, such as that included in this manual, can be a substitute for development and implementation by a firm of a system of quality control which is appropriately comprehensive and suitably designed in relation to the firm's organizational structure, its policies, and the nature of its practice.

.04 Explanation of References:

AC =	Reference to section number in FASB *Accounting Standards Current Text*
APB =	AICPA Accounting Principles Board Opinion
AR =	Reference to section number in AICPA *Professional Standards* (vol. 2)
ARB =	AICPA Accounting Research Bulletin
AT =	Reference to section number in AICPA *Professional Standards* (vol. 1)
AU =	Reference to section number in AICPA *Professional Standards* (vol. 1)
EITF =	Emerging Issues Task Force consensus
FASBI =	FASB Interpretation
PB =	AcSEC Practice Bulletin
QC =	Reference to section number in AICPA *Professional Standards* (vol. 2)
SAS =	AICPA Statement on Auditing Standards
SFAS =	FASB Statement of Financial Accounting Standards
SOP =	AICPA Statement of Position
SQCS =	Statement on Quality Control Standards
SSAE =	Statement on Standards for Attestation Engagements
SSARS =	Statement on Standards for Accounting and Review Services

.05 The manual is in looseleaf format in anticipation of updating and expansion. Changes are expected to arise from three main sources:

(1) Comments and suggestions from practitioners. Since this manual is a product of AICPA staff, not of a committee of practitioners, it is particularly important that practitioners advise the staff on any suggestions for material that could be improved or added.

(2) Issuance of new official pronouncements.

(3) Other additions to or deletions from the manual as a result of continued staff study.

Comments and suggestions should be addressed to:

Accounting and Auditing Publications
AICPA
Harborside Financial Center
201 Plaza III
Jersey City, NJ 07311-3881

or call Linda Delahanty at (201) 938-3416.

.06 For disclosure checklists and illustrative financial statements, obtain the AICPA looseleaf service entitled *Financial Statement Preparation Manual* (FSP). The FSP includes disclosure checklists and illustrative financial statements for the following:

Banks and Savings Institutions
Cash- and Tax-Basis Financial Statements
Common Interest Realty Associations
Construction Contractors
Corporations
Defined Benefit Pension Plans
Defined Contribution Pension Plans
Development Stage Enterprises
Health and Welfare Benefit Plans
Health Care Organizations
Investment Companies
Life Insurance Companies
Not-for-Profit Organizations
Oil and Gas Producers
Personal Financial Statements
Property and Liability Insurance Companies
Prospective Financial Statements
Real Estate Ventures
State and Local Governmental Units

AAM Section 1200

How to Use the Audit and Accounting Manual

Overview

.01 The Audit and Accounting Manual (AAM) is designed to provide practitioners with the tools needed to help plan, perform, and report on audit, review, and compilation engagements. *The AAM is not intended to serve as a complete or comprehensive quality control system.* The AAM is comprised of the following sections:

Section No.	*Section Name*
2000	Compilation and Review
3000	Engagement Planning & Administration
4000	Internal Control
5000	Audit Approach & Programs
6000	Working Papers
7000	Correspondence, Confirmations & Representations
8000	Audit Risk Alerts
9000	Supervision, Review & Report Processing
10,000	Accountants' Reports
11,000	Quality Control
12,000	State and Local Governments

Audits

.02 To perform an engagement in accordance with generally accepted auditing standards (GAAS) an auditor must comply with the General Standards, the Standards of Field Work, the Standards of Reporting, and the Quality Control Standards.

.03 The general standards are concerned with the qualifications of the auditor and the qualitative aspect of the work performed. They specifically address the auditor's training and proficiency, independence, and due care in the performance of work.

.04 The standards of field work address the manner used by the auditor to perform the audit. This standard begins with the appointment of the auditor and ends with the auditor communicating to those responsible for the oversight of financial reporting of the entity being audited.

.05 The standards of reporting are concerned with the opinion the auditor renders on the client's financial statements.

.06 The AAM will assist the auditor in performing an audit, in accordance with GAAS, in the following ways:

a. The Quality Control section [AAM section 11,000] includes sample forms which can be used by a firm to document its adherence to the AICPA requirement for a System of Quality Control for a CPA Firm. Included in this section are forms that relate to the five elements of Quality Control:

- Independence, Integrity, and Objectivity
- Personnel Management
- Acceptance and Continuance of Clients and Engagements
- Engagement Performance
- Monitoring

b. The Engagement Planning & Administration section [AAM section 3000] provides guidance in the planning stage. Included in this section are various formats of audit assignment controls, engagement letters, and a planning program.

c. The Internal Control section [AAM section 4000] has been updated to conform to the *Internal Control—Integrated Framework,* published by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO report) and the new Audit Guide *Consideration of Internal Control in a Financial Statement Audit.* This section provides guidance in evaluating internal control by utilizing checklists, questionnaires, and other generalized aids.

d. The Audit Approach & Programs section [AAM section 5000] explains how the auditor should design audit programs as well as providing an illustrative audit program which can be used to assist the auditor in designing an audit program for specific clients.

e. The Working Papers section [AAM section 6000] provides the auditor with a general discussion of the purpose of working papers.

f. The Correspondence, Confirmations & Representations section [AAM section 7000] provides the auditor with numerous examples of confirmations, illustrative inquiries to legal counsel, representation letters, communications with audit committees, as well as a reliance letter.

g. The Supervision, Review & Report Processing section [AAM section 9000] provides the auditor with an overview of supervision and review procedures as well as engagement review programs for the in-charge accountant and the partner responsible for the engagement. It also provides procedures for processing the report.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

h. The Accountants' Reports section [AAM section.10,000] addresses the format of the accountants' report and numerous examples of the auditor's report. This section has been updated to reflect current guidance through SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508).

Compilation and Review Services

.07 To perform either a review or compilation engagement in accordance with Statements on Standards for Accounting and Review Services (SSARS), an accountant must comply with the standards promulgated by the Accounting and Review Services Committee. There have been seven statements issued.

.08 SSARS 1, *Compilation and Review of Financial Statements* (AR section 100), provides guidance to accountants concerning the standards and procedures applicable to compilation and review services for a nonpublic entity. The statement also provides examples of standard single year reports and departures from those reports.

.09 SSARS 2, *Reporting on Comparative Financial Statements* (AR section 200), establishes standards for reporting on comparative financial statements of a nonpublic entity when one or more prior periods have been compiled or reviewed in accordance with SSARS 1 (AR section 100).

.10 SSARS 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AR section 300), provides an alternative form of standard compilation report when reporting on a prescribed form calls for a departure from generally accepted accounting principles (GAAP).

.11 SSARS 4, *Communications Between Predecessor and Successor Accountants* (AR section 400), provides guidance to a successor accountant who communicates with a predecessor accountant regarding acceptance of an engagement to compile or review financial statements of a nonpublic entity.

.12 SSARS 5 (Deleted by SSARS 7).

.13 SSARS 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AR section 600), provides an exemption from SSARS 1 for personal financial plans.

.14 SSARS 7, *Omnibus Statement on Standards for Accounting and Review Services—1992.*

.15 The AAM will assist the accountant in performing compilation and review engagements in accordance with SSARS in the following ways:

a. The Engagement Planning and Administration section [AAM section 2200] provides guidance in the planning stage. Addressed are engagement letters, changes in the level of service for the engagement, sample acceptance form, sample information form, and sample engagement letters.

b. The Working Papers section [AAM section 2300] provides sample procedures for both compilation and review engagements, representation letters, and checklists.

c. The Form and Content of Financial Statements [AAM section 2400] provides guidance on the statements, notes, supplementary information, and subsequent discovery of facts.

d. The Accountants' Reports section [AAM section 2500] includes examples of several reports for the engagement.

e. The Special Areas section [AAM section 2600] addresses prescribed forms and specified elements.

.16 It is suggested that the accountant also review the following areas when performing compilation and review engagements for additional guidance:

Correspondence, Confirmations & Representations [AAM section 7000]

Quality Control [AAM section 11,000]

Audit Risk Alerts

.17 The Audit Risk Alerts section [AAM section 8000] is intended to provide accountants with an overview of recent economic, professional, and regulatory developments that may affect their engagements.

AAM Section 2000
Compilation and Review

This manual is a nonauthoritative practice aid and does not include extensive explanation or discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate.

The exhibits are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of reference when preparing working papers or a report for a compilation or review engagement.

AAM Section 2100
Introduction

.01 Statements on Standards for Accounting and Review Services (SSARS) are issued by the American Institute of Certified Public Accountants (AICPA) Accounting and Review Services Committee (ARSC), the senior technical committee of the AICPA designated by its Council to issue pronouncements in connection with unaudited financial statements and other unaudited financial information of nonpublic entities (a complete listing of SSARS and the full text can be found in AICPA *Professional Standards*, volume 2, section AR). A nonpublic entity is defined as any entity other than (*a*) one whose securities trade in a public market either on a stock exchange or over the counter, (*b*) one that files with a regulatory agency in preparation for the sale of any class of its securities in a public market, or (*c*) any entity controlled by an entity covered by (*a*) or (*b*). Thus, if an entity does not fall into either category (*a*), (*b*), or (*c*) in the above definition, it is a nonpublic entity.

.02 Although SSARS applies only to engagements involving nonpublic entities, there are circumstances when an accountant may perform a review of financial statements of a public entity under SSARS. SSARS 7, *Omnibus Statement on Standards for Accounting and Review Services—1992*, paragraph 1 (AR section 100.01), notes that when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of Statements on Auditing Standards (SAS) No. 26, *Association With Financial Statements* (AU section 504.05).

.03 As of February 1994, ARSC had issued seven Statements on Standards for Accounting and Review Services. They are:

- SSARS 1 *Compilation and Review of Financial Statements* [AR section 100] (12/78)
- SSARS 2 *Reporting on Comparative Financial Statements* [AR section 200] (10/79)
- SSARS 3 *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* [AR section 300] (12/81)
- SSARS 4 *Communications Between Predecessor and Successor Accountants* [AR section 400] (12/81)
- SSARS 5 (Deleted by SSARS 7)
- SSARS 6 *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* [AR section 600] (9/86)
- SSARS 7 *Omnibus Statement on Standards for Accounting and Review Services—1992* (11/92)

.04 SSARS 1 (AR section 100) defines a compilation of financial statements and a review of financial statements. A compilation of financial statements is defined as presenting in the form of financial statements information that is the representation of management without expressing any assurance on the statements. A review of financial statements involves performing inquiry and analytical procedures to provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications that should be made to the financial statements necessary for them to be in conformity with generally accepted accounting principles.

.05 SSARS 1, paragraph 4 (AR section 100.04) [in part, as amended by SSARS 7], defines a financial statement as:

A presentation of financial data, including accompanying notes, derived from accounting records and intended to communicate an entity's economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with generally accepted accounting principles[1] or a comprehensive basis of accounting other than generally accepted accounting principles.[2] Financial forecasts, projections and similar presentations,[3] and financial presentations included in tax returns are not financial statements for purposes of this statement. SSARSs also gives the following specific examples of financial statements:[4]

a. Balance sheet

b. Statement of income

c. Statement of retained earnings

d. Statement of cash flows

e. Statement of changes in owners' equity

f. Statement of assets and liabilities (with or without owners' equity accounts)

g. Statement of revenues and expenses

h. Summary of operations

i. Statement of operations by product lines

j. Statement of cash receipts and disbursements

.06 SSARS 2 (AR section 200) establishes the standards for reporting on comparative financial statements of a nonpublic entity when the statements of one or more periods have been compiled or reviewed under SSARS 1 (AR section 100).

Practice Tip

If prior-period financial statements are not presented in columnar form, they do not meet the SSARS 2 definition of comparative financial statements, and are not subject to the reporting requirements of SSARS 2. In addition, the requirements of SSARS 2 do not apply to prior-period financial statements in a client-prepared document that are presented on separate pages from the financial statements that are reported on by the accountant. However, the document should include an indication (generally, on the face of the financial statements) that the accountant has not compiled or reviewed the prior-period financial statements and assumes no responsibility for them.

.07 SSARS 3 (AR section 300) amends SSARS 1 and 2 (AR sections 100 and 200) to provide an alternative form of compilation report when a prescribed form calls for a departure from generally accepted accounting

---

[1] The definition of generally accepted accounting principles and the hierarchy of established accounting principles presented in SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report* (AU section 411), is also applicable to compilations and reviews of financial statements performed under SSARSs.

[2] The term *comprehensive basis of accounting other than generally accepted accounting principles* is defined in SAS No. 62, *Special Reports*, paragraph 4 (AU section 623.04) . . . reference to generally accepted accounting principles . . . includes, where applicable, another comprehensive basis of accounting . . . .

[3] Statement on Standards for Attestation Engagements No. 1, *Attestation Standards* (AT section 200), as well as the AICPA *Guide for Prospective Financial Information*, provide guidance on preparing and reporting on financial forecasts, projections, and similar presentations.

[4] SAS No. 62, paragraph 7 (AU section 623.07), provides guidance with respect to suitable titles for financial statements that are prepared in conformity with a comprehensive basis of accounting other than generally accepted accounting principles.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

principles (GAAP). SSARS 3, paragraph 2 (AR section 300.02), defines a prescribed form as any preprinted form designed or adopted by the body to which it is intended to be submitted (e.g., banks, governmental bodies, etc.).

.08 SSARS 3 (AR section 300) does not prohibit the accountant from issuing a SSARS 1 (AR section 100) compilation report which identifies GAAP departures in accordance with SSARS 1, paragraphs 39 through 41 (AR section 100.39–.41). A SSARS 3 report is specifically designed to provide an alternative form of reporting when a prescribed form calls for a GAAP departure. This alternative form of reporting is available for a compilation service only and not for a review report.

.09 SSARS 4 (AR section 400), as amended by SSARS 7, provides guidance on required as well as optional communications between predecessor and successor accountants. SSARS 7 amended SSARS 4 (AR section 400) to require the successor accountant to request the client to communicate with the predecessor accountant, if the successor accountant becomes aware of information that may require revision of financial statements reported on by the predecessor accountant.

.10 SSARS 5 (Deleted by SSARS 7).

.11 SSARS 6 (AR section 600) provides an exemption from SSARS 1 (AR section 100) for personal financial statements included in personal financial plans.

.12 Under SSARS 6 (AR section 600), an accountant may submit a written personal financial plan containing unaudited personal financial statements to a client without issuing a report under SSARS 1 (AR section 100), as amended, when—

a. The accountant establishes and understanding with the client that the financial statements (i) will be used solely to assist the client and the client's advisors to develop the client's personal financial goals and objectives and (ii) will not be used to obtain credit or for any purpose other than developing the aforementioned goals and objectives.

b. Nothing comes to the accountant's attention during the engagement that would cause him or her to believe that the financial statements will be used to obtain credit or for any purposes other than developing the client's financial goals and objectives.

.13 Examples of implementation of a personal financial plan by a client's advisers include use of the plan by—

- An insurance broker who will identify specific insurance products.
- An investment adviser who will provide specific recommendations about the investment portfolio.
- An attorney who will draft a will or trust documents.

.14 An accountant following the exemption under SSARS 6 (AR section 600) should issue a written report stating that the unaudited financial statements—

a. Are designed solely to help develop the financial plan.

b. May be incomplete or contain departures from GAAP and should not be used to obtain credit or for any purpose other than developing the plan.

c. Have not been audited, reviewed, or compiled.

.15 SSARS 7, which is an omnibus statement—

a. Clarifies the applicability of SSARS 1 [AR section 100] by indicating that, in certain circumstances, an accountant may perform a review of a public company under the provisions of SSARSs.

b. Eliminates the prohibition against merely typing or reproducing financial statements without modification and defines the phrase *submission of financial statements.*

c. Makes explicit that the accountant is not required to communicate to a client errors that are not material and irregularities or illegal acts that are clearly inconsequential.

d. Modifies the SSARS review report to differentiate it from the review report presented in SAS No. 71, *Interim Financial Information* [AU section 722], as well as modifying the review and compilation report to clarify that the standards referred to in the reports are Statements on Standards for Accounting and Review Services.

e. Requires a client representation letter when performing a review engagement under SSARS.

f. Clarifies the accountant's reporting responsibilities in a compilation or review engagement when he or she decides there is an uncertainty about an entity's ability to continue as a going concern.

.16 Illustrative reports to be issued under the provisions of SSARS 1 through 7 can be found in AAM sections 2510, 2520, and 2610.

AAM Section 2200
Engagement Planning and Administration

.01 It is important to remember that when engaged to provide compilation or review services, the accountant must comply with both Rules 201 and 202 of the AICPA's Code of Professional Conduct, *General Standards* and *Compliance With Standards*, respectively (ET sections 201.01 and 202.01). Rule 201 requires that an AICPA member comply with the following standards and any interpretations thereof by bodies designated by its Council:

a. *Professional Competence.* Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.

b. *Due Professional Care.* Exercise due professional care in the performance of professional services.

c. *Planning and Supervision.* Adequately plan and supervise the performance of professional services.

d. *Sufficient Relevant Data.* Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.02 Rule 202 requires that an AICPA member who performs auditing, review, compilation, management advisory, tax or other professional services comply with standards promulgated by bodies designated by Council.

.03 Prior to accepting an engagement to perform a compilation or review for a prospective client, the accountant should consider if he or she wishes to be associated with the client. Factors such as the ability of the accountant to adequately serve the client, the fee arrangement, client integrity, etc., need to be considered. It is often useful to complete a "Client Acceptance Form" to assist in determining whether or not to accept a client. An illustrative client acceptance form can be found in AAM section 2200.27.

Understanding the Engagement

.04 SSARS 1, paragraph 8 (AR section 100.08), states that the accountant should establish an understanding with the entity regarding the services to be performed. This understanding should include a description of the nature and limitations of the services to be performed, and a description of the report the accountant expects to render. The understanding should also include an explanation that the engagement cannot be relied upon to disclose errors, irregularities, or illegal acts but should also indicate that if any such matters, that are not inconsequential, come to the accountant's attention, the appropriate level of management will be notified. It is preferable that the understanding be in writing.

.05 It is a requirement of SSARS 1 (AR section 100) that an accountant have a knowledge of the entity's business when performing a compilation or review of its financial statements. The accountant should also possess a level of knowledge of the accounting principles and practices in the industry in which the entity operates.

Engagement Letters

.06 An engagement letter provides a means of formalizing the understanding between the accountant and the client concerning the services to be rendered. A good engagement letter helps prevent misunderstandings between the client and the accountant as to the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client, and in most states it becomes a legally binding contract. There are other good reasons to obtain an engagement letter, including the following:

- *Reduces the risk of litigation.* Misunderstandings with clients regarding the nature and limitations of the services can result in litigation with the client.
- *Avoids misunderstandings by the staff.* The staff performing the work can review the engagement letter to obtain a clear understanding of the services to be provided and the required timing of the issuance of the report.

Overcoming Client Resistance to an Engagement Letter

.07 Presenting the engagement letter face-to-face usually is sufficient to overcome any resistance on the part of the client. The AICPA publishes a brochure, entitled *The Engagement Letter*, which may be used to explain the purpose of an engagement letter to the client.

.08 As an alternative to having the client sign an engagement letter, the accountant may consider developing a letter of understanding and mailing it to the client as a confirmation of the oral understanding. If an engagement letter is not obtained, the accountant should prepare a memorandum for the working papers describing the understanding with the client.

How Often Should an Engagement Letter Be Obtained?

.09 Some firms have a policy of obtaining a new engagement letter annually. Others use an automatically renewing (evergreen) letter that is only updated when the services to be provided change or there is a significant change in management or ownership of the client. Another possibility is the use of a general service agreement with separate addendums to the agreement, issued periodically, to describe the services to be provided.

The Content of Engagement Letters

.10 The engagement letter should be tailored to the engagement, after the specific services have been agreed upon. A comprehensive engagement letter might include the following:

- A description of the nature of the services to be performed.
- A description of the client or entities involved.
- The period covered by the financial statements to which the accountant's report will relate.
- A description of the nature of the report.
- A statement of the limitations of the service in detecting errors, fraudulent financial reporting, and misappropriation of assets, with an indication that the accountant will inform the client of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to his or her attention.
- An indication of what will happen if the accountant is unable to complete the engagement.
- If applicable, a statement that management will be requested to sign a representation letter.
- A description of any other services to be performed.

.11 Sample engagement letters for compilation and review engagements are presented in AAM section 2200.28–.31.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. You should also make sure that a final engagement letter is always issued in such circumstances.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Using Engagement Letters to Minimize Liability to Third Parties

.12 The AICPA's task force on accountant's legal ability developed guidance on using engagement letters to minimize liability to third parties. The task force concluded that clarifying language added to an engagement letter may be useful in states in which the courts adhere to the privity concept of liability to third parties. This clarifying language should identify parties that are known by the accountant to be negotiating or contemplating a transaction with the client, and who will be obtaining a copy of the compiled or reviewed financial statements. An example of such language is as follows:

> We understand that you are negotiating with XYZ Bank for a loan in the amount of $25,000 and the purpose of our report on your financial statements is to enable you to present the (compiled) (reviewed) financial statements to XYZ Bank. We are not aware of any other persons, entities, or limited groups of persons or entities for whose use or benefit this report is intended or contemplated.

Practice Tip

The clarifying language in AAM section 2200.12 added to an engagement letter is of questionable effectiveness in minimizing legal liability. However, if you decide to use it, you should consult with legal counsel to get advice on the specific wording that may be effective for your particular state.

.13 Accountants should try to avoid issuing privity letters. However, this is not always practical, particularly when the client's interests will be adversely affected. With this in mind, the following are some guidelines the authors recommend for accountants who must provide a privity letter:

- Name the third party that has informed the accountant that it intends to rely on the financial statements.
- Address the third party's responsibilities to undertake an investigation and due diligence review of the financial statements and condition of the company or to retain other professionals to assist it in that effort.
- Do not merely acknowledge a third party's intended reliance, but identify the various ways in which that reliance is qualified. This can be accomplished by asking the third party to provide a letter stating that it has performed other due diligence procedures, or by stating in the privity letter that the accountant assumes that the third party has performed due diligence procedures.
- Acknowledge the third party's intention to rely, not the actual reliance. Make it clear that you do not expect the third party to rely solely on your report on the financial statements as the basis for its decision.
- Contrast the scope of the work and level of assurance provided with the level of assurance and scope of an audit.
- State, as precisely as possible, the purpose of the third party's reliance. Avoid comments about the third party's intended after-the-fact general reliance.

.14 An accountant, contemplating use of a privity letter, should consult with legal counsel regarding its effectiveness in minimizing legal liability in the accountant's particular state. Because legal requirements vary from state to state, the accountant should also consult with legal counsel regarding the appropriate content of the letter.

Change in Engagement Level of Service

.15 An accountant who has been engaged to perform audit services with respect to financial statements may be requested by his or her client to change the level of service to be performed. SSARS 1, paragraphs 44

through 49 (AR section 100.44–.49), addresses changing the level of service to a lower level. A request to change the engagement to a review or a compilation may result from a change in circumstances affecting the entity's need for an audit (review), a misunderstanding of the nature of an audit, review, or compilation or a restriction on the scope of the audit (review), whether imposed by the client or caused by the circumstances.

.16 SSARS 1, paragraph 45 (AR section 100.45), states that before an accountant who was engaged to perform an audit or a review agrees to change the engagement to a review or compilation, at least the following factors should be considered:

a. The reason given for the client's request, particularly the implications of a restriction on the scope of the audit (review).

b. The additional audit effort required to complete the audit (review).

c. The estimated additional cost to complete the audit (review).

.17 A change in circumstances affecting the entity's need for an audit (review) or a misunderstanding of the nature of an audit, review, or compilation would normally be viewed as a reasonable basis for requesting a change in the level of service.

.18 The accountant should consider the implications of a restriction on the scope of the audit (review) and should evaluate the possibility that information affected by the scope restriction may be incorrect, incomplete, or otherwise unsatisfactory. The following two circumstances would ordinarily preclude an accountant from lowering his or her level of service—

a. When the accountant has been engaged to audit an entity's financial statements and has been prohibited by the client from corresponding with the entity's legal counsel, the accountant is precluded from issuing a review or compilation report on the financial statements.

b. For either an audit or review engagement, if the client refuses to provide the accountant with a signed representation letter, the accountant would be precluded from issuing a review report on the financial statements and would ordinarily be precluded from issuing a compilation report on the financial statements.

.19 SSARS 1, paragraph 48 (AR section 100.48), states that in all circumstances, if the auditing (review) procedures are virtually complete or the cost to complete such procedures is relatively insignificant, the accountant should consider the propriety of accepting a change in the engagement.

.20 If the accountant agrees that there is reasonable justification to change the engagement and he or she complies with the standards applicable to the changed engagement, the accountant should issue an appropriate review or compilation report. The report should not include reference to:

a. the original engagement,

b. any auditing or review procedures that may been performed, or

c. scope limitations that resulted in the changed engagement.

.21 Interpretation 1 of SSARS 1, "Omission of Disclosures in Reviewed Financial Statements" (AR section 9100.01–.02), requires an accountant who undertakes to review financial statements and subsequently finds that his client declines to include substantially all required disclosures, to include the disclosures in his review report. If the disclosures are not known, the report should specifically identify the nature of the omitted disclosures. However, SSARS 1, paragraph 19 [AR section 100.19], permits an accountant to compile financial statements that omit substantially all disclosures provided the omission is not undertaken with the intent to mislead.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.22 The issue of changing the level of an engagement to a higher level of service is not specifically addressed in SSARS 1 (AR section 100). It is generally agreed that a change to a higher level of service is acceptable. In such circumstances, the accountant should be certain that it is possible to comply with the applicable standards for the revised level of service. It is also wise to revise the accountant's understanding with the client of the changed engagement, preferably by amending the engagement letter.

Predecessor and Successor Accountant

.23 SSARS 4 (AR section 400), as amended by SSARS 7, provides guidance to a successor accountant who decides to communicate with a predecessor accountant regarding acceptance of a compilation or review engagement. This statement requires the predecessor accountant to respond promptly and fully in the event of such communications.

.24 It also requires that a successor accountant who becomes aware of information that leads him or her to believe the financial statements reported on by the predecessor accountant may require revision to request that the client communicate this information to the predecessor accountant.

.25 The inquiries of the successor accountant will normally include questions concerning: (1) information that might bear on the integrity of management (owners); (2) disagreements with management (owners) about accounting principles or the necessity of performing certain procedures; (3) the cooperation of management in providing additional or revised information, when necessary; and (4) the predecessor's understanding of the reasons for the change of accountants.

.26 The predecessor accountant is expected to respond both promptly and fully to requests of the type cited above. Valid business reasons (e.g., unpaid fees) may preclude the predecessor from responding to the inquiries of the successor. The predecessor may also decide, due to unusual circumstances such as impending litigation, not to respond fully to the successor. In such an instance, the predecessor should indicate that the response is limited and the successor should consider both the reasons for and implications of such a response in deciding whether to undertake the engagement.

Client Acceptance and Continuance Form—Part I

Client: _____

Financial Statement Date: _____

INSTRUCTIONS:

Part I: This form should be completed for all prospective clients for which audit, review, or compilation services are to be performed. The date on the form should be completed by the in-charge of the engagement and approved by the engagement partner as a basis for initially accepting the client. Part I should be updated and reviewed annually as a basis for deciding to retain the client.

Part II: Part II should be completed by the engagement partner and concurring partner to document the firm's decision to either accept or reject the client.

CLIENT'S LEGAL NAME:

ADDRESS:

PHONE:	FISCAL YEAR END:

FEDERAL I.D. NO.:	STATE I.D. NO.:

1. Describe the nature of the client's business (and locations, if other than above address):

2. Identify the type of entity (e.g., corporation, proprietorship, partnership, or S corporation):

.28 Illustrative Engagement Letter for a Compilation

TRALKA & ZAWORSKI, P.S. Certified Public Accountants

[*Date*]

Mr. Samuel Kirk, President
Safari Adventures
648 Crystal Lane
Bedford, Alabama 00000

Dear Mr. Kirk:

This will confirm our understanding of the terms and objectives of our engagement and the nature and limitations of the services we will provide:

We will perform the following services:

1. We will compile, from information you provide, the annual and interim balance sheets and related statements of income, retained earnings and cash flows of Safari Adventures for the year 19XX. We will not audit or review such financial statements. Our report on the annual financial statements of Safari Adventures is presently expected to read as follows:

   > We have compiled the accompanying balance sheet of Safari Adventures as of December 31, 19XX, and the related statements of income, retained earnings and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
   >
   > A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

   Our report on your interim financial statements, which will omit substantially all disclosures, includes an additional paragraph that will read as follows:

   > Management has elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

   If, for any reason, we are unable to complete the compilation of your financial statements, we will not issue a report on such statements as a result of this engagement.

2. We will assist your bookkeeper in adjusting the books of account so that he (she) will be able to prepare a working trial balance from which financial statements can be compiled. Your bookkeeper will provide us with a detailed trial balance and any supporting schedules we require.

3. We will also prepare the federal and state [*identify states*] income tax returns for Safari Adventures for the fiscal year ended December 31, 19XX.

Our engagement cannot be relied upon to detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. The Company's management is responsible for establishing and maintaining a sound system of internal control, which is the best means of preventing or detecting errors, fraudulent financial reporting, and misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Our fees for these services will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from $X,XXX to $X,XXX.

We shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.*

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one.

Sincerely yours,

.29 Illustrative Engagement Letter for a Review

SWIFT, MARCH & COMPANY Certified Public Accountants

[*Date*]

Mr. Daniel Williams
Island Security
50 Main Street
Honolulu, Hawaii 00000

Dear Mr. Williams:

This will confirm our understanding of the terms and objectives of our engagement and the nature and limitations of the services we will provide:

We will perform the following services:

1. We will review the balance sheet of Island Security as of [*date*], and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. Our review will consist primarily of inquiries of company personnel and analytical procedures and we will require a client representation letter from you. A review does not contemplate obtaining an understanding of internal control or assessing control risk, tests of accounting records and responses to inquiries by obtaining corroborating evidential matter, and certain other procedures ordinarily performed during an audit. Thus, a review does not provide assurance that we will become aware of all significant matters that would be detected in an audit. Our engagement cannot be relied upon to detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. The Company's management is responsible for establishing and maintaining a sound system of internal control, which is the best means of preventing or detecting errors, fraudulent financial reporting, and misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention. We will not perform an audit of such financial statements, the objective of which is the expression of an opinion regarding the financial statements taken as a whole, and, accordingly, we will not express such an opinion on them.

Our report is presently expected to read as follows:

> We have reviewed the accompanying balance sheet of Island Security as of [*date*], and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of Island Security.
>
> A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly we do not express such an opinion.
>
> Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

If, for any reason, we are unable to complete our review of your financial statements, we will not issue a report on such statements as a result of this engagement.

2. We will provide your chief accountant with such consultation on accounting matters as may be required in adjusting and closing the books of account and in drafting financial statements for our review. Your

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

chief accountant also will provide us with a detailed trial balance and any supporting schedules we require.

3. We will also prepare the federal and state [*identify states*] income tax returns for Island Security for the fiscal year ended [*date*].

Our fees for these services will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from $X,XXX to $X,XXX.

We shall be pleased to discuss this letter with you at any time and appreciate the opportunity to serve you and trust that our association will be a long and pleasant one.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

_____

.30 Illustrative Engagement Letter for Compilation of Personal Financial Statements

LONGSTREET, JACKSON & COMPANY Certified Public Accountants

[*Date*]

Mr. John Henry
643 Chisum Road
Lincoln, New Mexico 00000

Dear Mr. Henry:

This will confirm our understanding of the terms and objectives of our engagement and the nature and limitations of the services we will provide:

We will perform the following service(s):

1. We will compile, from information you provide, the statement of financial condition of James and Jane Person as of [*date*], and the related statement of changes in net worth for the [*period*] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. We will not audit or review such financial statements. Our report on the financial statements is presently expected to read as follows:

   [*Standard Compilation Report*]

   If, for any reason, we are unable to complete our compilation of the financial statements, we will not issue a report on such statements as a result of this engagement.

2. We will also [*discussion of other services, if any*].

Our engagement cannot be relied upon to detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention.

Our fees for these services [*specify fees or terms*].

We shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

_____

AAM Section 2300
Working Papers

Compilation Engagements

.01 SSARS 1 (AR section 100) does not address workpaper documentation for a compilation engagement. However, many accountants prefer compilation workpapers that include all necessary documentation to verify that compilation procedures were performed. In determining what workpapers the accountant will need, he or she should consider any peer review requirements that the firm will need to meet. AAM section 11,000 offers a discussion on compliance with the AICPA's quality control standards.

Compilation Procedures

.02 The following items are generally documented in a CPA's compilation workpapers:

- Documentation of the accountant's knowledge of the client's business and the accounting principles and practices of the industry in which the entity operates
- Documentation of the understanding with the client concerning the services to be rendered, usually in the form of an engagement letter
- Documentation that the accountant has read the compiled financial statements
- Support for a change in the level of service performed, if necessary
- Working trial balance
- Reasons for omitting substantially all disclosures
- Documentation of discussions of unusual items

.03 In addition, if the CPA prepares the financial statements as well as compiles them, he or she should also include in the workpapers the following:

- Support for information in the notes to the financial statements
- Copies of preliminary client records (e.g., working trial balance and adjustments) required to arrive at final compiled financial statements

Compilation Checklists

.04 Procedural checklists can serve as means of documenting in the workpapers that all the necessary procedures have been performed. When completing a procedural checklist, the accountant should refer to the specific workpaper documenting completion of the checklist step. An illustrative procedural checklist for a compilation can be found in AAM section 2300.14.

Review Engagements

.05 As noted in AAM section 2100, a review of financial statements involves performing inquiry and analytical procedures. SSARS 1, paragraph 30 (AR section 100.30), discusses workpaper documentation for

review engagements. SSARS 1 (AR section 100) does not specify the form or content of the working papers in connection with a review engagement, but paragraph 30 does state that the working papers should describe the following:

a. The matters covered in the accountant's inquiry and analytical procedures

b. Unusual matters that the accountant considered during the performance of the review, including their disposition

Review Procedures—Inquiry

.06 SSARS 1, paragraph 27 (AR section 100.27), states that the accountant's inquiries should generally consist of the following:

a. Inquiries concerning the entity's accounting principles and practices and the methods followed in applying them.

b. Inquiries concerning the entity's procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements.

c. Inquiries concerning actions taken at meetings of stockholders, board of directors, committies of the board of directors, or comparable meetings that may affect the financial statements.

d. Inquiries of persons having responsibility for financial and accounting matters concerning (1) whether the financial statements have been prepared in conformity with generally accepted accounting principles consistently applied, (2) changes in the entity's business activities or accounting principles and practices, (3) matters as to which questions have arisen in the course of applying the foregoing procedures, and (4) events subsequent to the date of the financial statements that would have a material effect on the financial statements.

.07 SSARS 1, Appendix A (AR section 100.52), contains illustrative inquiries in connection with a review engagement. These illustrative inquiries appear in AAM section 2300.15. These inquiries do not necessarily apply to all engagements, nor are they meant to be all-inclusive.

Review Procedures—Analytical

.08 SSARS 1, paragraph 27c (AR section 100.27c), states that analytical procedures consist of the following:

a. Comparison of the financial statements with statements for a comparable prior period(s)

b. Comparison of the financial statements with anticipated results, if available

c. Study of the relationship of the elements of the financial statements that would be expected to conform to a predictable pattern based on the entity's experience

.09 Three common forms of analytical procedures are ratio analysis, trend analysis, and test for reasonableness of data. Once the accountant performs his analytical procedures, he or she must evaluate the results, usually against past historical results or industry averages. Illustrative analytical procedures workpapers can be found in AAM section 2300.16 and .17.

.10 SSARS 1, paragraph 27 (AR section 100.27), also suggests that the following review procedures be performed:

a. Reading the financial statements to consider, on the basis of information coming to the accountant's attention, whether the financial statements appear to conform with generally accepted accounting principles

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

b. Obtaining reports from other accountants, if any, who have been engaged to audit or review the financial statements of significant components of the reporting entity, its subsidiaries, and other investees

.11 The following items are usually included in the workpapers for a review engagement:

- Documentation of the accountant's knowledge of the client's business and the accounting principles and practices of the industry in which it operates
- An engagement letter
- Support for a change in the level of service, if any
- Documentation of all inquiries and respective responses
- Documentation of all analytical procedures
- A representation letter
- Documentation of discussions of unusual matters
- Copies of reports of other accountants who have performed services with respect to a subsidiary or other significant investee

Representation Letters

.12 SSARS 7 amended SSARS 1 to require representation letters in all review engagements performed under SSARS. An illustrative representation letter for a review engagement can be found in AAM sections 2300.18 and 7400.02.

Review Checklists

.13 In the same way that procedural checklists are suggested for compilation engagements, it is wise to prepare such a checklist for a review engagement. An illustrative procedural checklist for a review engagement can be found in AAM section 2300.19.

.14 Short-Form Checklist for a Compilation Engagement

	AR Ref.*	Initials
1. Obtain an engagement letter or document an understanding of the engagement in a memorandum. (See section 3175.09 for a sample engagement memorandum.)	.08	_____
2. Acquire the necessary knowledge of client's industry accounting principles and practices.	.10	_____
3. Acquire a general understanding of the client's business transactions, the form of the accounting records, the stated qualifications of the accounting personnel, the accounting basis used, and the form and content of the financial statements. (it is not necessary to make inquiries or perform other procedures unless the information supplied is questionable.)	.11–.12	_____
4. Read the financial statements and determine if they are appropriate in form and free from obvious material error.	.13	_____
5. Consider whether all disclosures required by generally accepted accounting principles (GAAP) or an acceptable comprehensive basis of accounting are provided. If they are not, go to step 6. If they are, go to step 7.	.19	_____
6. If substantially all disclosures required by GAAP or an other comprehensive basis of accounting are omitted, indicate this in a separate paragraph in your report; if a comprehensive basis of accounting other than GAAP is used, disclose this basis either in the financial statements or in your report. If the statement of cash flows is also omitted in GAAP statements, modify the scope paragraph and disclosure deficiency paragraph accordingly. If most, but not all, disclosures are omitted, notes to the financial statements should be labeled "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included."	.19–.21	_____
7. Consider whether the financial statements contain measurement departures from GAAP or other comprehensive basis of accounting. If they do, go to step 8. If they do not, go to step 9.	.39	_____
8. Get client to revise the financial statements. Failing that, consider modifying your report by adding a separate paragraph or paragraphs. If the impact of the departure has been determined by management or is known by you, disclose the dollar effects in your report. (However, uncertainties and inconsistencies are not measurement departures if they are properly disclosed. See step 5.) Withdraw from the engagement if the GAAP departures are designed to mislead statement users.	.39–.40	_____
9. Determine whether the firm is independent. If the firm is not, go to step 10. If the firm is, go to step 11.	.22	_____
10. If the firm is not independent, add a separate paragraph to your report: "I am (we are) not independent with respect to XYZ Company."	.22	_____
11. If the financial statements are accompanied by information presented for supplementary analysis purposes, include such other data in the compilation report.	.43	_____
12. Mark each page of the financial statements, including any supplemental data, "See accountant's compilation report."	.16	_____
13. Date your report using the date the compilation was completed.	.15	_____
14. Issue the financial statements and related compilation report.	.14	_____
15. If subsequent to the date of the report, facts that would possibly cause the financial statements to be misleading are discovered (and were in existence at the report date), consult SAS No. 1, section 561 (AU section 561), Interpretation No. 4 of SSARS No. 1 (AR section 9100.13–.15), and your attorney.	.42	_____

Completed by _____ Date: _____

* The abbreviation "AR Ref." in this checklist means AR section 100. All references in this checklist are to paragraphs in AR section 100.

.15 Review of Financial Statements—Illustrative Inquiries

a. General

(1) What are the procedures for recording, classifying, and summarizing transactions (relates to each section discussed below)?

(2) Do the general ledger control accounts agree with subsidiary records (for example, receivables, inventories, investments, property and equipment, accounts payable, accrued expenses, non-current liabilities)?

(3) Have accounting principles been applied on a consistent basis?

b. Cash

(1) Have bank balances been reconciled with book balances?

(2) Have old or unusual reconciling items between bank balances and book balances been reviewed and adjustments made where necessary?

(3) Has a proper cutoff of cash transactions been made?

(4) Are there any restrictions on the availability of cash balances?

(5) Have cash funds been counted and reconciled with control accounts?

c. Receivables

(1) Has an adequate allowance been made for doubtful accounts?

(2) Have receivables considered uncollectible been written off?

(3) If appropriate, has interest been reflected?

(4) Has a proper cutoff of sales transactions been made?

(5) Are there any receivables from employees and related parties?

(6) Are any receivables pledged, discounted, or factored?

(7) Have receivables been properly classified between current and noncurrent?

d. Inventories

(1) Have inventories been physically counted? If not, how have inventories been determined?

(2) Have general ledger control accounts been adjusted to agree with physical inventories?

(3) If physical inventories are taken at a date other than the balance sheet date, what procedures were used to record changes in inventory between the date of the physical inventory and the balance sheet date?

(4) Were consignments in or out considered in taking physical inventories?

(5) What is the basis of valuation?

(6) Does inventory cost include material, labor, and overhead where applicable?

(7) Have write-downs for obsolescence or cost in excess of net realizable value been made?

(8) Have proper cutoffs of purchases, goods in transit, and returned goods been made?

(9) Are there any inventory encumbrances?

e. Prepaid Expenses

(1) What is the nature of the amounts included in prepaid expenses?

(2) How are these amounts amortized?

f. Investment, Including Loans, Mortgages, and Intercorporate Investments

(1) Have gains and losses on disposal been reflected?

(2) Has investment income been reflected?

(3) Has appropriate consideration been given to the classification of investments between current and noncurrent, and the difference between the cost and market value of investments?

(4) Have consolidation or equity accounting requirements been considered?

(5) What is the basis of valuation of marketable equity securities?

(6) Are investments unencumbered?

g. Property and Equipment

(1) Have gains or losses on disposal of property or equipment been reflected?

(2) What are the criteria for capitalization of property and equipment? Have such criteria been applied during the fiscal period?

(3) Does the repairs and maintenance account only include items of an expense nature?

(4) Are property and equipment stated at cost?

(5) What are the depreciation methods and rates? Are they appropriate and consistent?

(6) Are there any unrecorded additions, retirements, abandonments, sales, or trade-ins?

(7) Does the entity have material lease agreements? Have they been properly reflected?

(8) Is any property or equipment mortgaged or otherwise encumbered?

h. Other Assets

(1) What is the nature of the amounts included in other assets?

(2) Do these assets represent costs that will benefit future periods? What is the amortization policy? Is it appropriate?

(3) Have other assets been properly classified between current and noncurrent?

(4) Are any of these assets mortgaged or otherwise encumbered?

i. Accounts and Notes Payable and Accrued Liabilities

(1) Have all significant payables been reflected?

(2) Are all bank and other short-term liabilities properly classified?

(3) Have all significant accruals, such as payroll, interest, and provisions for pension and profit-sharing plans been reflected?

(4) Are there any collateralized liabilities?

(5) Are there any payables to employees and related parties?

j. Long-Term Liabilities

(1) What are the terms and other provisions of long-term liability agreements?

(2) Have liabilities been properly classified between current and non-current?

(3) Has interest expense been reflected?

(4) Has there been compliance with restrictive covenants of loan agreements?

(5) Are any long-term liabilities collateralized or subordinated?

k. Income and Other Taxes

(1) Has provision been made for current and prior-year federal income taxes payable?

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

(2) Have any assessments or reassessments been received? Are there tax examinations in process?

(3) Are there temporary differences? If so, have deferred taxes been reflected?

(4) Has provision been made for state and local income, franchise, sales, and other taxes payable?

l. Other Liabilities, Contingencies, and Commitments

(1) What is the nature of the amounts included in other liabilities?

(2) Have other liabilities been properly classified between current and noncurrent?

(3) Are there any contingent liabilities, such as discounted notes, drafts, endorsements, warranties, litigation and unsettled asserted claims? Are there any unasserted potential claims?

(4) Are there any material contractual obligations for construction or purchase of real property and equipment and any commitments or options to purchase or sell company securities?

m. Equity

(1) What is the nature of any changes in equity accounts?

(2) What classes of capital stock have been authorized?

(3) What is the par or stated value of the various classes of stock?

(4) Do amounts of outstanding shares of capital stock agree with subsidiary records?

(5) Have capital stock preferences, if any, been disclosed?

(6) Have stock options been granted?

(7) Has the entity made any acquisitions of its own capital stock?

(8) Are there any restrictions on retained earnings or other capital?

n. Revenue and Expenses

(1) Are revenues from the sale of major products and services recognized in the appropriate period?

(2) Are purchases and expenses recognized in the appropriate period and properly classified?

(3) Do the financial statements include discontinued operations or items that might be considered extraordinary?

o. Other

(1) Are there any events that occurred after the end of the fiscal period that have a significant effect on the financial statements?

(2) Have actions taken at stockholder, board of directors, or comparable meetings that affect the financial statements been reflected?

(3) Have there been any material transactions between related parties?

(4) Are there any material uncertainties? Is there any change in the status of material uncertainties previously disclosed?

.16 Illustrative Ratio Analysis Worksheet

Below you will find 24 financial ratios. These financial ratios include liquidity, activity, and efficiency ratios. Accountants should use the ratios deemed necessary and use additional ones as needed.

Ratio Name	Formula	Calculation	Explanation
Current ratio	$\frac{\text{Current Assets}}{\text{Current Liabilities}}$		measures ability to meet short term obligations
Quick ratio (or Acid test ratio)	$\frac{\text{Current Assets - Inventory}}{\text{Current Liabilities}}$		a more conservative measure of a firm's ability to meet short term obligations
Operating cash flows to current liabilities	$\frac{\text{Cash Provided by Operations}}{\text{Average Current Liabilities}}$		liquidity calculation
Days Sales in Accounts Receivable	$\frac{\text{Net Accounts Receivable}}{\text{Net Sales/360}}$		measures length of time average sales is a receivable
Allowance for bad debts as a % of accounts receivable	$\frac{\text{Allowance for Bad Debts}}{\text{Accounts Receivable}}$		calculation is compared to prior periods and other comparable companies
Bad debt expense as a % of net sales	$\frac{\text{Bad Debt Expense}}{\text{Net Sales}}$		calculation is compared to prior periods and other comparable companies
Inventory Turnover	$\frac{\text{Cost of Sales}}{\text{Inventory}}$		activity ratio – indication of efficiency of operation
Fixed Asset Turnover	$\frac{\text{Net Sales}}{\text{Average Fixed Assets}}$		activity ratio
Receivable Turnover	$\frac{\text{Net Credit Sales}}{\text{Average Receivables}}$		activity ratio
Net Sales to Inventory	$\frac{\text{Net Sales}}{\text{Inventory}}$		activity ratio
Days in Inventory	$\frac{\text{Inventory} \times \text{(Days in a cycle)}}{\text{Cost of Sales}}$		identifies how many days of inventory is available
Accounts Payable to Net Sales	Accounts Payable × (Days in a cycle)/Net Sales × (Days in a year)		compares A/P balance to net sales
Return on Total Assets	Net Income × (Days in a year)/Total Assets × (Days in a cycle)		measures profitability at a point in time
Return on Net Worth	Net Income × (Days in a year)/Net Worth × (Days in a cycle)		profitability measure
Return on Net Sales	$\frac{\text{Net Income}}{\text{Net Sales}}$		profit margin
Net Sales to Accounts Receivable	$\frac{\text{Net Sales} \times \text{(Days in a year)}}{\text{Net A/R} \times \text{(Days in a cycle)}}$		identifies how many times A/R will turn over per year of the operating cycle
Net Sales to Net Fixed Assets	$\frac{\text{Net Sales} \times \text{(Days in a year)}}{\text{Fixed Assets} \times \text{(Days in a cycle)}}$		identifies efficiency of capital investment

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Ratio Name	Formula	Calculation	Explanation
Days Payables in Cost of Sales	$\frac{A/P \times (\text{Days in a cycle})}{\text{Cost of Sales}}$		
Income Before Tax to Net Worth	$\frac{EBIT \times (\text{Days in a year})}{\text{Net Worth} \times (\text{Days in a cycle})}$		ratio of earnings to net worth per year
Gross Profit Percentage	$\frac{\text{Net Sales - Cost of Sales}}{\text{Net Sales}}$		profitability calculation
Operating Expenses as a % of Net Sales	$\frac{\text{Operating Expenses}}{\text{Net Sales}}$		efficiency calculation
Times Interest Earned	$\frac{EBIT}{\text{Interest Expense}}$		profitability calculation
Income Before Tax to Assets	$\frac{EBIT \times (\text{Days in a year})}{\text{Assets} \times (\text{Days in a cycle})}$		measure of profitability
Altman Z Score	See Below		A composite formula that is widely used to measure the financial "health" of a company. The formula takes financial ratios and multiplies each by a specific constant. The amounts computed are added together to obtain an overall score. This score is then compared to scores from other companies to rate relative financial health.

For private companies (four variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	6.56	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	3.26	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	6.72	=
$\frac{\text{Net Worth}}{\text{Total Liabilities}}$	×	1.05	=
		Altman Z Score	

For private companies (five variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	.717	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	.847	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	3.107	=
$\frac{\text{Net Worth (Book Value)}}{\text{Total Liabilities}}$	×	.420	=
$\frac{\text{Sales}}{\text{Total Assets}}$	×	.998	=
		Altman Z Score	

For public companies:

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	.012	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	.014	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	.033	=
$\frac{\text{Market Value Equity}}{\text{Book Value of Total Liabilities}}$	×	.006	=
$\frac{\text{Sales}}{\text{Total Assets}}$	×	.999	=
		Altman Z Score	

Altman Z Score Source: Altman, Edward, Corporate Financial Distress, A Complete Guide to Predicting, Avoiding, and Dealing with Bankruptcy, 1983, John Wiley and Sons.

(Date of Accountant's Report)

(To the Accountant)

In connection with your review of the balance sheet of (*name of client*) as of (*financial statement date*) and the related statements of income, retained earnings, and cash flows for the (*period*) then ended, for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements in order for them to be in conformity with generally accepted accounting principles (or other comprehensive basis of accounting), we confirm, to the best of our knowledge and belief, the following representations made to you during your review.

1. The financial statements referred to above present the financial position, results of operations, and cash flows of (*name of client*) in conformity with generally accepted accounting principles. In that connection, we specifically confirm that—
   a. The Company's accounting principles, and the practices and methods followed in applying them, are as disclosed in the financial statements.
   b. There have been no changes during the (*period reviewed*) in the Company's accounting principles and practices.
   c. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
   d. There are no material transactions that have not been properly reflected in the financial statements.
   e. There are no material losses (such as from obsolete inventory or purchase or sales commitments) that have not been properly accrued or disclosed in the financial statements.
   f. There are no violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency, and there are no other material liabilities or gain or loss contingencies that are required to be accrued or disclosed.
   g. The Company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged.
   h. There are no related party transactions or related amounts receivable or payable that have not been properly disclosed in the financial statements.
   i. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.
   j. No events have occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the financial statements.
2. We have advised you of all actions taken at meetings of stockholders, board of directors, and committees of the board of directors (or other similar bodies) that may affect the financial statements.
3. We have responded fully to all inquiries made to us by you during your review.

(Name of Owner or Chief Executive Officer and Title)

(Name of Chief Financial Officer and Title, where applicable)

Note: This representation letter should be modified when the financial statements are prepared in accordance with an other comprehensive basis of accounting.

.19 Short-Form Checklist for a Review Engagement

	AR Ref.*	Initials
1. Obtain an engagement letter or document an understanding of the engagement in a memorandum. (See section 3175.09 for a sample engagement memorandum.)	.08*	_____
2. Determine whether your firm is independent, if the firm is not, go to step 3. If the firm is, go to step 4.	.38	_____
3. Stop. Do not issue a review report. (However, it may be possible to issue a compilation report.)	.38	_____
4. Acquire the necessary knowledge of the client's industry accounting principles and practices.	.24	_____
5. Acquire a general understanding of the nature of the client's business, including (*a*) its operating characteristics and (*b*) the nature of its assets, liabilities, revenues, and expenses.	.26	_____
6. Apply appropriate inquiry and analytical procedures in order to obtain a reasonable basis for expressing limited assurance that there are no material modifications that should be made to the financial statements.	.24 & .27	_____
7. Read the financial statements to determine whether, based on the information presented, they appear to conform to generally accepted accounting principles (GAAP) or an other comprehensive basis of accounting. Obtain reports of other accountants for subsidiaries, investee, etc., if any. Indicate division of responsibility if reference is made to other accountants.	.27	_____
8. Perform additional procedures if information appears to be incorrect, incomplete, or otherwise unsatisfactory.	.30	_____
9. Document in your workpapers matters covered in steps 6 and 7 above. Also describe unusual matters that were considered and how they were resolved (step 8).	.31	_____
10. Determine whether the inquiry and analytical procedures considered necessary to achieve limited assurance are incomplete or restricted in any way. If they are, go to step 11; if not, go to step 12.	.36	_____
11. Consider whether a compilation report should be issued rather than a review report. (A review that is incomplete or restricted is not an adequate basis for issuing a review report.) If the client has refused to provide additional or revised information, the accountant should withdraw from the engagement.	.12 & .36	_____
12. Consider whether the financial statements contain known departures from GAAP or an other comprehensive basis of accounting, including disclosure departures. If they do, go to step 13. If they do not, go to step 14.	.39	_____
13. Get client to revise the financial statements. Failing that, consider modifying your report by adding a separate paragraph or paragraphs. If the impact of the departure has been determined by management or is known by you, disclose the dollar effects in your report. (However, uncertainties and inconsistencies should not cause the report to be modified if they are properly disclosed.) Withdraw from the engagement if the departures are designed to mislead financial statement users.	.39 & .40	_____
14. Obtain a representation letter from the client.	.28	_____
15. Determine whether the basic financial statements are accompanied by information presented for supplementary analysis purposes. If they are, go to step 16. If they are not, go to step 17.	.43	_____
16. Indicate the responsibility assumed for the supplementary information in your review report or in a separate report. The report should disclose whether (*a*) the supplemental information has been reviewed (as part of the basic financial statement review) and you are not aware of any needed material modification or (*b*) the supplemental information has not been reviewed but only compiled.	.43	_____

* The abbreviation "AR Ref." in this checklist means AR section 100. All references in this checklist are to paragraphs in AR section 100.

	AR Ref.*	Initials
17. Mark each page of the financial statements, including any supplemental data, "See accountant's review report."	.34	_____
18. Date your report using the date the inquiry and analytical procedures were completed.	.33	_____
19. Issue the financial statements and related review report.	.32	_____
20. If subsequent to the date of the report, facts that would possibly cause the financial statements to be misleading are discovered (and were in existence at the report date), consult SAS No. 1, section 561 (AU section 561), Interpretation No. 4 of SSARS No. 1 (AR section 9100.13–.15), and your attorney.	.42*	_____

Completed by _____ Date: _____

AAM Section 2400
Form and Content of Financial Statements

Statements Prepared

.01 The basic financial statements for a company that presents its financial statements in accordance with generally accepted accounting principles (GAAP) are:

- Balance Sheet
- Income Statement
- Statement of Cash Flows (either direct or indirect method)
- Statement of Changes in Stockholders' Equity

Examples of financial statement presentations can be found in the AICPA Financial Statement Preparation Manual/Disclosure Checklist Series.

.02 The description of accounting policies and the notes to the financial statements are considered part of the basic financial statements.

.03 Each financial statement presented should include the name of the company, the applicable statement title, and the date or time period covered. SSARS 1, paragraph 16 (AR section 100.16), states that each page of financial statements compiled by the accountant should contain a reference such as "See Accountant's Compilation Report." Each page of reviewed financial statements should refer to the accountant's review report by containing a reference such as "See Accountant's Review Report", as required by SSARS 1, paragraph 34 (AR section 100.34).

.04 When the financial statements are either compiled or reviewed, some accountants prefer to follow the statement title with the word "unaudited." SSARS 1 (AR section 100) does not require use of the word "unaudited" when associated with compiled or reviewed statements nor does it prohibit its use.

Comparative Financial Statements

.05 There is no requirement to prepare comparative financial statements. However, Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*, chapter 2, paragraph 1, states that comparative statements in annual and other reports enhance the usefulness of such reports. ARB No. 43 also states that notes of the prior year should be repeated, or referred to, to the extent that they continue to be of significance.

.06 When comparative financial statements are presented, the accountant should issue an appropriate report for each period presented in accordance with SSARS 2 (AR section 200). Comparative financial statements may contain statements for which the level of service provided in each period is different. Oftentimes the level of service is indicated in the statement title as follows:

ABC COMPANY

BALANCE SHEETS

As of December 31, 19X2 (Reviewed) and 19X1 (Compiled)

.07 Illustrative reports on comparative financial statements can be found in AAM sections 2510.11–.16 and 2520.07–.12.

Notes to Financial Statements

.08 The notes to the financial statements, as a part of the basic statements, are the responsibility of management. The client should understand the statements and related notes in sufficient depth to take full responsibility for them. The practitioner who assists the client in preparing the financial statements or who totally prepares them must be careful in the wording of the notes. The accountant should avoid wording the notes in such a way as would imply that they are the responsibility of the accountant. For example, words such as "we," "our," and "the client," should be avoided. When referring to the client, some accountants prefer to use the terms "the Company" or "Management."

.09 All of the disclosures required by GAAP should be made either on the face of the financial statements or in the notes thereto. In a compilation engagement, the client may elect to omit substantially all disclosures; a more detailed discussion of this appears in AAM section 2500. For a list of required disclosures, the accountant and the client may wish to review the applicable AICPA disclosure checklists.

Supplementary Information

.10 The accountant's report on supplementary information is discussed in SSARS 1, paragraph 43 (AR section 100.43), which states that when the basic financial statements are accompanied by information presented for supplementary analysis purposes, the accountant should clearly indicate the degree of responsibility he or she is taking regarding the other information. The supplementary information is generally separated from the basic financial statements and many accountants believe it should be presented after the basic statements.

.11 When the accountant compiles both the basic financial statements and the other data presented for supplementary analysis purposes only, his or her compilation report should include the supplementary information.

.12 When the basic financial statements are reviewed, the accountant may indicate the degree of responsibility he or she is taking with respect to the other information by an explanation in the review report or in a separate report on the other data. The explanation should state that the review has been made for the purpose of expressing limited assurance and that there are no material modifications that should be made to the financial statements for them to be in conformity with GAAP, and either—

a. The other data accompanying the financial statements are presented for supplementary analysis purposes only and have been subjected to the inquiry and analytical procedures applied in the review of the financial statements, and the accountant did not become aware of any material modifications that should be made to such data, or

b. The other data accompanying the financial statements are presented for supplementary analysis purposes and have not been subjected to the inquiry and analytical procedures applied in the review of the financial statements, but were compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data.

.13 Illustrative accountants' reports on supplementary information accompanying compiled and reviewed financial statements can be found in AAM sections 2510.17, 2520.13, and .14, respectively.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Subsequent Discovery of Facts

.14 Subsequent to the report date for compiled or reviewed financial statements the accountant may become aware of facts that may have existed at the report date which might have caused the accountant to believe that information supplied by the client was incorrect, incomplete, or otherwise unsatisfactory. SSARS 1, paragraph 42 (AR section 100.42), states that, in those circumstances, the accountant may wish to consider the guidance in SAS No. 1, section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AU section 561), in determining the proper course of action.

.15 Interpretation 4 of SSARS 1, "Discovery of Information After the Date of the Accountant's Report" (AR section 9100.13–.15), discusses two factors the accountant might consider when determining the appropriate course of action regarding the subsequent discovery. The two factors discussed are (1) the reliability of the information and (2) the existence of persons known to be relying on or likely to rely on the financial statements. If the accountant determines that the information is reliable and there are persons known to be relying on or likely to rely on the information, the accountant would ordinarily conclude that those individuals should be notified in an appropriate manner.

.16 Both SSARS 1, paragraph 42 (AR section 100.42) and Interpretation 4 (AR section 9100.13–.15) indicate that because of the legal implications involved in actions contemplated under SAS No. 1, section 561 (AU section 561) and Interpretation 4 discussed in paragraphs .14 and .15, the accountant should consider consulting an attorney.

[*The next page is 2501.*]

AAM Section 2500
Accountants' Reports

.01 The users of financial statements should be able to easily identify the degree of responsibility that an accountant is taking with respect to a specific set of financial statements. The usual method of conveying the amount of responsibility taken is the written accountant's report. Therefore, whenever an accountant reviews or compiles financial statements, a report should be prepared in accordance with the AICPA Statements on Standards for Accounting and Review Services (SSARS).

.02 According to SSARS 1, paragraph 6, as amended by SSARS 7 (AR section 100.06), an accountant should not consent to the use of his or her name in a document or written communication containing unaudited financial statements unless

a. the accountant has compiled or reviewed the financial statements and his (her) report accompanies them,
or

b. the financial statements are accompanied by an indication that the accountant has not compiled or reviewed the financial statements and that no responsibility is assumed for them.

.03 If an accountant becomes aware that his or her name has been improperly used in a client-prepared document containing unaudited financial statements, the client should be advised that use of his or her name is inappropriate. The accountant should consider what other courses of action need to be taken, including consulting with his or her attorney.

.04 An accountant should not submit unaudited financial statements to his or her client or third parties unless, as a minimum service, the financial statements have been compiled in accordance with SSARS.

.05 Submission of financial statements under SSARS is defined as presenting to a client or others financial statements that the accountant has—

a. Generated, either manually or through the use of computer software, or

b. Modified by materially changing account classification, amounts, or disclosures directly on client-prepared financial statements. (See AR section 100.07.)

.06 If the accountant has performed more than one service, the report issued should be appropriate for the highest level of service performed. For example, if an accountant performs both a compilation and an audit of financial statements, the appropriate report to issue would be the audit report.

Compilation Report

.07 SSARS 1, paragraph 14, as amended (AR section 100.14), states that financial statements compiled by an accountant should be accompanied by a report that states—

a. A compilation has been performed in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

b. A compilation is limited to presenting in the form of financial statements information that is the representation of management.

c. The financial statements have not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on them.

Any other procedures performed by the accountant either before or during the compilation engagement should not be described in the accountant's report. An example of the accountant's standard compilation report can be found in AAM section 2510.01.

.08 Each page of the financial statements compiled by the accountant should include a reference to the accountant's report, such as, "See Accountant's Compilation Report" (SSARS 1, paragraph 16 (AR section 100.16)).

.09 The date of the completion of the compilation procedures should be used as the date of the accountant's report.

.10 An accountant may be asked to issue a compilation report on only one financial statement and not on the other related financial statements, for example, reporting on the balance sheet, but not on the related statements of income, retained earnings, and cash flows. SSARS 1, as amended (AR section 100) does not prohibit the accountant from performing such a service.

.11 If an accountant is not independent, a compilation report may still be issued, provided that the accountant has followed the appropriate authoritative literature during his engagement. The accountant should disclose the lack of independence; however, the reason should not be described. The following statement should be included as the last paragraph of the report:

I am (We are) not independent with respect to XYZ Company.

Review Report

.12 SSARS 1, paragraph 32, as amended (AR section 100.32), states that financial statements reviewed by an accountant should be accompanied by a report that states—

a. A review has been performed in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

b. All information included in the financial statements is the representation of management of the entity.

c. A review consists principally of inquiries of company personnel and analytical procedures applied to financial data.

d. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements taken as a whole and, accordingly, no such opinion is expressed.

e. The accountant is not aware of any material modifications that should be made to the financial statements in order for them to be in conformity with generally accepted accounting principles (GAAP), other than those modifications, if any, indicated in the report.

Any other procedures performed by the accountant either before or during the review engagement should not be described in the accountant's report. An example of the accountant's standard review report can be found in AAM section 2520.01.

.13 Each page of the financial statements reviewed by the accountant should include a reference to the accountant's report, such as, "See Accountant's Review Report" (SSARS 1, paragraph 34, as amended (AR section 100.34)).

.14 The date of the completion of the accountant's inquiry and analytical procedures should be used as the date of the accountant's report (SSARS 1, paragraph 33, as amended (AR section 100.33)).

.15 If an accountant is unable to perform the necessary inquiry and analytical procedures to achieve the limited assurance which is contemplated by a review, or the client does not provide the accountant with a

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

representation letter, then the review is incomplete. Therefore, he or she would not have an adequate basis for issuing a review report. If this is the case, the accountant should consider whether in this situation the incomplete review also precludes the issuance of a compilation report on the financial statements. A change in the level of service is discussed in AAM section 2200.15 through .22.

.16 An accountant may be asked to issue a review report on only one financial statement and not on the other related financial statements, for example, reporting on the balance sheet, but not on the related statements of income, retained earnings, and cash flows. According to SSARS 1, paragraph 37, as amended (AR section 100.37), the accountant may do so as long as the scope of the analytical procedures has not been limited.

.17 SSARS 1, paragraph 38, as amended (AR section 100.38), precludes the accountant from issuing a review report for an entity with respect to which the accountant is not independent.

Modifications to Standard Report

Omission of Substantially All Disclosures

.18 SSARS 1, paragraphs 19 through 21, as amended (AR section 100.19–.21), discuss reporting on financial statements that omit substantially all disclosures. An accountant may compile financial statements that omit substantially all disclosures required by GAAP, provided that this omission is clearly indicated in the report, and is not, to the accountant's knowledge, undertaken with the intention to mislead users of the financial statements. Examples of the appropriate reports under these circumstances can be found in AAM section 2510.02.

.19 If the entity wants to include disclosures about only a few matters in the form of notes to the financial statements, then that information should be clearly labeled as selected information, i.e., "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included."

.20 If the financial statements are compiled in accordance with a comprehensive basis of accounting other than GAAP and disclosure is not made of the basis used, then the basis should be disclosed in the accountant's report.

Omission of Statement of Cash Flows

.21 FASB Statement No. 95, *Statement of Cash Flows*, paragraph 3 (AC C25), requires that an entity that provides a set of financial statements that reports both financial position and results of operations should include a statement of cash flows for each period for which results of operations are reported. Therefore, omitting this statement is a departure from GAAP. A GAAP departure must be disclosed in a separate paragraph of the accountant's report. If the statement of cash flows is omitted, then the following paragraph should be added to the accountant's compilation or review report:

> A statement of cash flows for the year ended December 31, 19XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operation.

The first paragraph of the report should also be modified accordingly. Examples of the full accountant's reports, both compilation and review, can be found in AAM sections 2510 and 2520, respectively.

GAAP Departures

.22 An accountant who is engaged to compile or review financial statements may become aware of a GAAP departure that is material to the financial statements taken as a whole. The accountant should ask management to revise the financial statements. If management refuses to revise the financial statements, then the accountant should consider whether modification of the standard report is sufficient to disclose the departure.

.23 SSARS 1, paragraph 40, as amended (AR section 100.40), states that if the accountant decides that modification of the standard report is appropriate, then the departure should be disclosed in a separate paragraph of the report. This disclosure should include the effects of the departure on the financial statements if management has determined these effects or if the accountant has been able to determine the effects through other procedures performed during the engagement. The accountant is not required to determine the effects if management has not done so provided the accountant states in his report that such determination has not been made. Examples of both compilation and review reports can be found in AAM sections 2510.04, .05, and 2520.02–.04, respectively.

.24 If the accountant believes that modification of the standard compilation or review report is not sufficient to indicate the deficiencies of the financial statements taken as a whole, then according to SSARS 1, paragraph 41, as amended (AR section 100.41), the accountant should withdraw from the engagement and provide no further services with respect to that set of financial statements. The accountant may also want to contact his or her attorney.

Scope Limitations

.25 According to SSARS 1, paragraph 36, as amended (AR section 100.36), if an accountant is unable to perform the necessary inquiry and analytical procedures to achieve the limited assurance contemplated by a review or the client does not provide the accountant with a representation letter then the review is incomplete and the accountant would not have an adequate basis for issuing a review report. If this is the case, then the accountant should consider whether the incomplete review also precludes issuing a compilation report on the financial statements.

.26 In such a situation, the accountant should consider the matter discussed in SSARS 1, paragraphs 44–49, as amended (AR section 100.44–.49), in deciding whether it is appropriate to issue a compilation report on the financial statements.

Going-Concern Uncertainties

.27 In evaluating the adequacy of disclosure of going-concern uncertainties, the accountant should look to the guidance provided in SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, paragraphs 10 and 11, as amended by SAS No. 77 (AU section 341.10 and .11).

.28 Normally a going-concern uncertainty would not cause an accountant to modify the standard report provided the financial statements appropriately disclose such matters. If the accountant believes that the disclosure of an uncertainty is inadequate, he or she should consider the guidance provided in SSARS 1, paragraphs 39–41, as amended (AR section 100.39–.41).

.29 Although it is not required, an accountant may wish to add an explanatory paragraph to the compilation or review report to emphasize the existence of a going-concern uncertainty. An example of an explanatory paragraph follows:

> As discussed in Note X, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the Company be unable to continue as a going concern.

Examples of full compilation and review reports for this situation can be found in AAM sections 2510.18 and 2520.15, respectively.

AAM Section 2510

Accountants' Reports on Compilation of Financial Statements of a Nonpublic Entity

.01 Accountant's Standard Report

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

[*Signature*]

[*Date*]

[Source: SSARS 1, paragraph 17, as amended by SSARS 7 (AR section 100.17).]

Notes: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity.

Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.02 Omission of Substantially All Disclosures

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, (and cash flows)* for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the disclosures (and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures (and the statement of cash flows) were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[*Signature*]

[*Date*]

[Source: SSARS 1, paragraph 21, as amended by SSARS 7 (AR section 100.21).]

Notes: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity.

Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

This form of report is appropriate only for a compilation engagement, not for a review engagement.

---

* If the statement of cash flows is omitted, the first and third paragraphs of the report should be modified accordingly.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.03 Accountant Not Independent

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

I am (We are) not independent with respect to XYZ Company.[1]

[*Signature*]

[*Date*]

[Sources: SSARS 1, paragraph 17, as amended by SSARS 7 (AR section 100.17) and SSARS 1, paragraph 22 (AR section 100.22).]

Notes: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity.

Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

[1] In making a judgment about whether he is independent, the accountant should be guided by the AICPA Code of Professional Conduct. For example, the accountant should be aware that interpretation 101-3 (ET section 101.05) under rule 101 (ET section 101.01) of the rules of conduct indicates that independence is not necessarily impaired when an accountant provides manual or automated bookkeeping or data processing services to a client.

.04 Departure From GAAP—Omission of Statement of Cash Flows

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

A statement of cash flows for the year ended December 31, 19XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operations.

[*Signature*]

[*Date*]

[Source: SSARS 1, paragraph 40, as amended by SSARS 7 (AR section 100.40).]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.05 Departure from GAAP—Accounting Principles Not Generally Accepted

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure (certain departures) from generally accepted accounting principles that is (are) described in the following paragraph(s).

As disclosed in note X to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed me (us) that the company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders' equity would have been decreased by $500,000.

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.06 Cash Basis Statements*—Full Disclosure.

Addressee:

I (We) have compiled the accompanying statement of assets and liabilities arising from cash transactions of XYZ Company as of December 31, 19XX, and the related statement of revenue collected and expenses paid for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion on any other form of assurance on them.

.07 Cash Basis Statements—Omission of Substantially All Disclosures, With No Reference to Basis

Addressee:

I (We) have compiled the accompanying statement of assets and liabilities arising from cash transactions of XYZ Company as of December 31, 19XX, and the related statement of revenue collected and expenses paid for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the cash basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.09 Income Tax Basis Statements—Omission of Substantially All Disclosures, With No Reference to Basis

Addressee:

I (We) have compiled the accompanying statement of assets, liabilities, and equity—income tax basis of XYZ Company as of December 31, 19XX, and the related statement of revenue and expenses—income tax basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the accounting basis used by the Company for Federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.11 Continuing Accountant's Report on Comparative Statements—Current Period Compiled With Reference to Review Report on Prior-Period

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The accompanying 19X1 financial statements of XYZ Company were previously reviewed by me (us) and my (our) report dated March 1, 19X2, stated that I was (we were) not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles. I (We) have not performed any procedures in connection with that review engagement after the date of my (our) report on the 19X1 financial statements.

[*Signature*]

[*Date*]

Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.12 Continuing Accountant's Report on Comparative Statements—Both Periods Compiled With Restatement of Prior-Period Financial Statements[1]

Addressee:

I (We) have compiled the accompanying balance sheets of XYZ Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

In my (our) previous compilation report dated March 1, 19X2, on the 19X1 financial statements, I (we) referred to a departure from generally accepted accounting principles because the company carried its land at appraised values. However, as disclosed in Note X, the company has restated its 19X1 financial statements to reflect its land at cost in accordance with generally accepted accounting principles.

.15 Continuing Accountant's Report on Comparative Statements—Current Period Compiled With Reference to Audit Report on Prior Period

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The financial statements for the year ended December 31, 19X1, were audited by me (us) (other accountants) and I (we) (they) expressed an unqualified opinion on them in my (our) (their) report dated March 1, 19X2, but I (we) (they) have not performed any auditing procedures since that date.

[*Signature*]

[*Date*]

[Sources: SSARS 2, paragraph 28 (AR section 200.28) and SSARS 1, paragraph 17, as amended by SSARS 7 (AR section 100.17).]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.16 Continuing Accountant's Compilation Report on Comparative Statements—Prior Period Financial Statements That Omit Substantially All Disclosures Have Been Compiled From Previously Compiled (Reviewed) Financial Statements for the Same Period

Addressee:

I (We) have compiled the accompanying balance sheets of XYZ Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and its cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

The accompanying 19X1 financial statements were compiled by me (us) from financial statements that did not omit substantially all of the disclosures required by generally accepted accounting principles and that I (we) previously compiled (reviewed) as indicated in my (our) report dated March 1, 19X2.

[*Signature*]

[*Date*]

.17 Compilation Report—Financial Statements Accompanied by Supplementary Information

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, and the accompanying supplementary information (*identify the supplementary information, for example, schedules of cost of goods sold and selling, general and administrative expenses*), which are presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and supplementary schedules and, accordingly, do not express an opinion or any other form of assurance on them.

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.18 Compilation Report—Emphasis of a Going-Concern Uncertainty

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

As discussed in note X, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the Company be unable to continue as a going concern.*

[*Signature*]

[*Date*]

[Sources: SSARS 1, paragraph 40, as amended by SSARS 7 (AR section 100.40) and Accounting and Review Services Interpretation No. 11 of SSARS 1 (AR section 100.40 and AR section 9100.33–.40).]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

* The accountant is not required to modify his or her compilation report for a going-concern uncertainty that is appropriately disclosed in the financial statements. However, he or she may wish to draw attention to the going-concern uncertainty in an explanatory paragraph of his or her compilation report as shown above. [Source: Accounting and Review Services Interpretation No. 11 of SSARS 1 (AR section 9100.34–.38).]

.19 Interim Historical Financial Statements Accompanied by a Financial Forecast Labeled as a "Budget"

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the six months then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The accompanying budgeted balance sheet, statements of income, retained earnings, and cash flows of XYZ Company as of December 31, 19XX, and for the six months then ending, have not been compiled or examined by us and, accordingly, we do not express an opinion or any other form of assurance on them.

Management has (The owners have) elected to omit the summaries of significant assumptions and accounting policies required under established guidelines for presentation of prospective financial statements. If the omitted summaries were included in the budgeted information, they might influence the user's conclusions about the company's budgeted information. Accordingly, this budgeted information is not designed for those who are not informed about such matters.

.20 Comparative Statements—Current Year Compiled and Prior Year Audited by a Different Accountant Who Has Ceased Operations

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19X2 and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with the Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying 19X2 financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The financial statements for the year ended December 31, 19X1, were audited by other accountants who have ceased operations, and they expressed an unqualified opinion on them in their report dated March 1, 19X2, but they have not performed any auditing procedures since that date.

.21 Comparative Statements—Both Years Compiled; However, Prior Year by a Different Accountant Who Has Ceased Operations

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19X2 and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with the Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

The 19X1 financial statements of XYZ Company were compiled by other accountants who have ceased operations and whose report dated February 1, 19X2, stated that they did not express an opinion or any other form of assurance on those statements.

[*Signature*]

[*Date*]

[Sources: SSARS 1, paragraph 17, as amended by SSARS 7 (AR section 100.17), SSARS 2, paragraph 19, (AR section 200.19) and Notice to Practitioners, February 1991, *Audit, Review, and Compilation Considerations When a Predecessor Accountant Has Ceased Operations,* paragraph 8.*]

[*The next page is 2545.*]

* This Notice to Practitioners was issued by the Auditing Standards Division and is intended to provide guidance to accountants in situations in which the predecessor accountant has ceased operations. The guidance in this Notice does not apply to situations in which a firm of independent accountants assumes responsibility for the work of another firm in conjunction with, for example, a merger with, or acquisition of, the other firm.

AAM Section 2520

Accountants' Reports on Review of Financial Statements of a Nonpublic Entity

.01 Accountant's Standard Report

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SSARS 1, paragraph 35, as amended by SSARS 7 (AR section 100.35).]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.02 Departure From GAAP—Accounting Principle Not Generally Accepted

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As disclosed in note X to the financial statements, generally accepted accounting principles require that inventory cost consist of material, labor, and overhead. Management has informed me (us) that the inventory of finished goods and work in process is stated in the accompanying financial statements at material and labor cost only, and that the effects of this departure from generally accepted accounting principles on financial position, results of operations, and cash flows have not been determined.

.03 Departure From GAAP—Change in Accounting Principle Without Reasonable Justification

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standard for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As disclosed in note X to the financial statements, the company has adopted (description of newly adopted method), whereas it previously used (description of previous method). Although the (description of newly adopted method) is in conformity with generally accepted accounting principles, the company does not appear to have reasonable justification for making a change as required by Opinion No. 20 of the Accounting Principles Board.

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.04 Departure From GAAP—Omission of Statement of Cash Flows

Addressee:

I (we) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, and retained earnings, for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

A statement of cash flows for the year ended December 31, 19XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operations.

.05 Cash Basis Statements*—Full Disclosure

Addressee:

I (We) have reviewed the accompanying statement of assets and liabilities arising from cash transactions of XYZ Company as of December 31, 19XX, and the related statement of revenue collected and expenses paid for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the cash basis of accounting, as described in note X.

* When financial statements are prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the notes ordinarily would state the basis of presentation and describe how that basis differs from generally accepted accounting principles.

.06 Income Tax Basis Statements*—Full Disclosure

Addressee:

I (We) have reviewed the accompanying statement of assets, liabilities, and equity—income tax basis of XYZ Company as of December 31, 19XX, and the related statement of revenue and expenses—income tax basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements if the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the income tax basis of accounting, as described in note X.

.07 Continuing Accountant's Report on Comparative Statements—Both Periods Reviewed

Addressee:

I (We) have reviewed the accompanying balance sheets of XYZ Company as of December 31, 19X2 and 19X1, and the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) reviews, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Source: SSARS 2, paragraph 9, as amended by SSARS 7 (AR section 200.09).]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4).

.08 Continuing Accountant's Report on Comparative Statements—Current Period Reviewed and Prior Period Compiled

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the 19X2 financial statements in order for them to be in conformity with generally accepted accounting principles.

The accompanying 19X1 financial statements of XYZ Company were compiled by me (us). A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the 19X1 financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

.09 Continuing Accountant's Report on Comparative Statements—Both Periods Reviewed With Restatement of Prior-Period Financial Statements[1]

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19X2 and 19X1, the related statements of income, retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

In my (our) previous review report dated March 1, 19X2, on the 19X1 financial statements, I (we) referred to a departure from generally accepted accounting principles because the company carried its land at appraised values. However, as disclosed in Note X, the company has restated its 19X1 financial statements to reflect its land at costs in accordance with generally accepted accounting principles.

.15 Review Report—Emphasis of a Going Concern Uncertainty

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As discussed in Note X, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the Company be unable to continue as a going concern.*

.16 Comparative Statements—Both Years Reviewed; However, Prior Year by a Different Accountant Who Has Ceased Operations

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

The 19X1 financial statements of XYZ Company were reviewed by other accountants who have ceased operations and whose report dated February 1, 19X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

[*Signature*]

[*Date*]

[Sources: SSARS 1, paragraph 35, as amended by SSARS 7 (AR section 100.35), SSARS 2, paragraph 18 (AR section 200.18) and Notice to Practitioners, February 1991, *Audit, Review, and Compilation Considerations When a Predecessor Accountant Has Ceased Operations*, paragraph 8.*]

* This Notice to Practitioners was issued by the Auditing Standards Division and is intended to provide guidance to accountants in situations in which the predecessor accountant has ceased operations. The guidance in this Notice does not apply to situations in which a firm of independent accountants assumes responsibility for the work of another firm in conjunction with, for example, a merger with, or acquisition of, the other firm.

.17 Comparative Statements—Current Year Reviewed and Prior Year Audited by a Different Accountant Who Has Ceased Operations

Addressee:

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 19X2, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management (owners) of XYZ Company.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

The financial statements for the year ended December 31, 19X1, were audited by other accountants who have ceased operations, and they expressed an unqualified opinion on them in their report dated March 1, 19X2, but they have not performed any auditing procedures since that date.

[Sources: SSARS 1, paragraph 35, as amended by SSARS 7 (AR section 100.35), SSARS 2, paragraph 18 (AR section 200.18) and Notice to Practitioners, February 1991, *Audit, Review, and Compilation Considerations When a Predecessor Accountant Has Ceased Operations*, paragraph 8.*]

[*The next page is 2601.*]

* This Notice to Practitioners was issued by the Auditing Standards Division and is intended to provide guidance to accountants in situations in which the predecessor accountant has ceased operations. The guidance in this Notice does not apply to situations in which a firm of independent accountants assumes responsibility for the work of another firm in conjunction with, for example, a merger with, or acquisition of, the other firm.

AAM Section 2600
Special Areas

Prescribed Forms

.01 'SSARS 3 (AR section 300) allows an accountant to issue a compilation report when a prescribed form calls for a departure from GAAP by using a measurement principle different from GAAP or by not requiring the disclosures required by GAAP. A prescribed form is defined in SSARS 3, paragraph 2 (AR section 300.02), as "any standard preprinted form designed or adopted by a body to which it is to be submitted, for example, forms used by industry trade associations, credit agencies, banks, and governmental and regulatory bodies other than those concerned with the sale or trading of securities."

.02 Generally, it is assumed that the information required by a prescribed form meets the needs of the body that required the form to be completed, and, therefore, it is not necessary for that body to be advised of departures from GAAP that are required by the form. An example of the compilation report to be issued when the unaudited financial statements of a nonpublic entity are included in a prescribed form that calls for departures from GAAP can be found in AAM section 2610.01.

.03 If, during the compilation engagement, the accountant becomes aware of a departure from GAAP not required by the prescribed form, he should follow the guidance discussed in AAM section 2500.21 through .23 on GAAP departures. If the accountant finds that there is a departure from the requirements of the prescribed form, he or she should consider the departure to be the same as a departure from GAAP in determining the effects on the report. An example of a compilation report for a departure from GAAP which was not called for by the prescribed form can be found in AAM section 2610.02.

.04 SSARS 3, paragraph 5 (AR section 300.05), states that if the accountant is asked to sign a preprinted form that does not conform with the guidance found in SSARS 3 (AR section 300) or SSARS 1 (AR section 100), he or she should not sign the form, but should add the appropriate report to the prescribed form.

.05 If your client applies for a bank loan, the bank loan officer may request financial statements in the format prescribed in the Robert Morris Associates' Business Credit Information Package (BCIP). Those financial statements are required to be in conformity with generally accepted accounting principles, however, they do not contain all disclosures required in complete GAAP presentations. AAM section 2610.03 contains a sample prescribed-form compilation report for a BCIP presentation.

Specified Elements

.06 SSARS 1 (AR section 100) provides guidance on the compilation and review of financial statements. Some accountants are asked to issue review reports on separate presentations of specified elements, accounts or items of financial statements. Because this type of presentation is not a financial statement, guidance for this type of engagement is not found in the SSARS. This type of engagement should follow the Attestation Standards. (See AAM section 2610.04 for an illustrative review report.) If the accountant is engaged to apply agreed-upon procedures to elements, accounts, or items of a financial statement, he or she should refer to SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622).

[*The next page is 2611.*]

AAM Section 2610

Accountants' Reports on Prescribed Forms, BCIP, and Specified Elements

.01 Financial Statements Included in Certain Prescribed Forms

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form prescribed by ABC Bank information that is the representation of management (owners). I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of [*name of body*], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

[*Signature*]

[*Date*]

[Source; SSARS 3, paragraph 3, as amended by SSARS 7 (AR section 300.03).]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4). SSARS 3 (AR section 300), provides for an alternative form of standard compilation report when a prescribed form or related instructions call for departure from generally accepted accounting principles or another comprehensive basis of accounting.

.02 Financial Statements Included in Certain Prescribed Forms—Departure From GAAP Not Called for by the Prescribed Forms

Addressee:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form prescribed by ABC Trade Association information that is the representation of management (owners). I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is not called for by the prescribed form or related instructions, as described in the following paragraph.

As disclosed in note X to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed me (us) that the company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders' equity would have been decreased by $XXX,XXX.

These financial statements (including related disclosures) are otherwise presented in accordance with the requirements of [*name of body*], which also differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

[*Signature*]

[*Date*]

[Source: SSARS 3, paragraph 4, as amended by SSARS 7 (AR section 300.04.]

Note: Statements on Auditing Standards (SASs) provide guidance to the accountant who performs services in connection with the unaudited financial statements of a public entity. Statements on Standards for Accounting and Review Services (SSARS) provide guidance to the accountant who performs services in connection with unaudited financial statements or other unaudited financial information of a nonpublic entity. However, when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of SAS No. 26 (AU section 504.05, footnote 4). SSARS 3 (AR section 300), provides for an alternative form of standard compilation report when a prescribed form or related instructions call for departure from generally accepted accounting principles or another comprehensive basis of accounting.

.03 Prescribed-Form Compilation Report for BCIP, Accompanying Supplementary Information Has Been Compiled

_____

_____

_____

I (We) have compiled the [*identify financial statements and supplementary schedules, including periods presented and name of client*] included in the accompanying Business Credit Information Package in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form designed by Robert Morris Associates (the "Business Credit Information Package") and requested by [*name of bank*] information that is the representation of management. I (We) have not audited or reviewed the financial statements or supplementary information referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) and supplementary information are for the use of [*name of bank*] and are presented in accordance with the requirements of the Business Credit Information Package, which differ from generally accepted accounting principles. Accordingly, these financial statements and supplementary information are not designed for those who are not informed about such differences.

[*Firm's Signature*]

[*Report Date*]

[Sources: SSARS 3, paragraph 3, as amended by SSARS 7 (AR section 300.03) and Robert Morris Associates, Business Credit Information Package.]

.04 Review Report on Elements, Accounts, or Items of a Financial Statement Under the Attestation Standards*

_____

_____

_____

I (We) have reviewed the accompanying _____ [*identify the presentation of assertions relating to schedule(s) of elements, accounts or items*] of _____ [*client name*] for the _____ [*period*] ended _____. My (Our) review was conducted in accordance with standards established by the American Institute of Certified Public Accountants.

A review is substantially less in scope than an examination, the objective of which is the expression of an opinion on the _____ [*identify the presentation of assertions relating to schedule(s) of elements, accounts or items*]. Accordingly, I (we) do not express such an opinion.[1]

Based on my (our) review, nothing came to my (our) attention that caused me (us) to believe that the accompanying _____ [*identify the presentation of assertions relating to schedule(s) of elements, accounts or items*] is (are) not presented in conformity with generally accepted accounting principles (or other identified basis of accounting).

[*Firm's Signature*]

[*Report Date*]

[Source: Accounting and Review Services Interpretation No. 8 of SSARS 1, as amended by SSARS 7 (AR section 9100.27 and .28) and SSAE No. 1, paragraph 58 (AT section 100.58).]

_____

[*The next page is 3001.*]

* SSARS 1 (AR section 100) provides guidance concerning the standards and procedures applicable to compilations and reviews of financial statements. Presentations of specified elements, accounts, or items of a financial statement are not financial statements. SAS No. 62 (AU section 623) and Interpretations thereof (AU section 9623) provide guidance with respect to reporting on such presentations when the engagement is intended to result in the expression of an audit opinion. SAS No. 75 (AU section 622) provides guidance with respect to reporting on the results of applying agreed-upon procedures to specified elements, accounts, or items of a financial statement. SSAE No. 1 (AT section 100) provides guidance with respect to reporting on such presentations when the accountant is engaged to express moderate assurance in a review report.

[1] An additional explanatory paragraph may be added after the second paragraph to emphasize matters relating to the attest engagement or the presentation of assertions.

AAM Section 3000
Engagement Planning and Administration

Sections 3165, 3170, and 3175 include illustrative audit assignment control forms, engagement letters, and an illustrative planning program that can be used by an accountant in the planning phase of an audit engagement.

Various formats of audit assignment controls, engagement letters, and planning checklists are in use; nevertheless, inclusion of the formats in this section in no way means that they are preferable. Readers are urged to refer directly to authoritative pronouncements when appropriate.

Illustrative formats of audit assignment controls, engagement letters, and planning checklists are often helpful in developing a consistent style within a firm. However, no set of illustrative formats can cover all the situations that are likely to be encountered in practice because the circumstances of engagements vary widely.

Readers should consider other sources of illustrative presentations, such as those in authoritative pronouncements and AICPA audit and accounting guides.

AAM Section 3100
Planning the Engagement

.01 The planning phase is an important part of every engagement. During this phase, the partner and the staff review the client's business and the industry in which the client operates, then develop an overall strategy for the expected conduct and scope of the engagement.

.02 The need for planning is highlighted in Rule 201, General Standards (ET section 201.01), AICPA Code of Professional Conduct, which states: "A member shall adequately plan and supervise an engagement."

.03 The first standard of fieldwork of generally accepted auditing standards states: "The work is to be adequately planned and assistants, if any, are to be properly supervised." Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), provides authoritative interpretive guidance on the first standard of fieldwork.

.04 Proper planning also enhances the productivity of engagement personnel and should result in a more profitable engagement.

.05 The planning memo and the planning checklist are two commonly used planning documents. The style and complexity of these documents will depend on engagement needs and firm preference. The same memo or checklist may be referred to in the review process to ensure that the items highlighted in the planning phase are given adequate attention during the engagement.

.06 The steps in audit planning are as follows:

a. Understand the scope of services and the nature of reports expected to be rendered.

b. Decide whether or not to accept the engagement.

c. Assign personnel to the engagement and prepare a preliminary time budget.

d. Assess independence of firm and audit team.

e. Understand the entity's business and the industry in which it operates.

f. Assess the audibility of the entity by—

1. Gaining an adequate understanding of the internal control structure.
2. Evaluating management integrity.

g. Establish an agreement with the client, preferably with an engagement letter.

h. Assess control risks.

i. Make a preliminary judgment about materiality levels for audit purposes.

j. Estimate the level of audit risk and consider its interactive components.

k. Consider how components of audit risk relate to one another for each cycle or major account.

l. Consider cost-effectiveness of different audit strategies.

m. Write the audit program and finalize a time budget.

[*The next page is 3121.*]

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

AAM Section 3105
Understanding the Assignment

.01 The auditor should (*a*) meet with the client to understand the type, scope, and timing of the engagement; (*b*) understand if reports on compliance, internal control, or segments of the entity are required; (*c*) understand the client's expectations, both stated and implied; and (*d*) review the expectations of both the owners and managers. A sample checklist is located in AAM section 3165.

.02 To obtain an adequate understanding of any assignment, the auditor should be familiar with generally accepted accounting principles (GAAP), which includes specialized AICPA industry guides as well as Emerging Issues Task Force (EITF) consensuses.

.03 Statement on Auditing Standards (SAS) No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report*, sets forth the GAAP hierarchy. Statement on Standards for Accounting and Review Services *7 Omnibus Statement on Standards for Accounting and Review Services—1992*, indicates that the GAAP hierarchy set forth in SAS No. 69 also applies to compilation and review engagements.

.04 SAS No. 69:

a. Presents two separate but parallel hierarchies—one for state and local governments and another for nongovernmental entities, and

b. Establishes a true GAAP hierarchy—each successive category in the hierarchy is a different level of authority.

.05 The table below summarizes the pronouncements that are included in each of the five categories of GAAP for nongovernmental entities and for state and local governments.

.06

GAAP Hierarchy Summary*

	Nongovernmental Entities	*State and Local Governments*
Established Accounting Principles	10a. FASB Statements and Interpretations, APB Opinions, and AICPA Accounting Research Bulletins	12a. GASB Statements and Interpretations, plus AICPA and FASB pronouncements if made applicable to state and local governments by a GASB Statement or Interpretation
	10b. FASB Technical Bulletins, AICPA Industry Audit and Accounting Guides, and AICPA Statements of Position	12b. GASB Technical Bulletins, and the following pronouncements if specifically made applicable to state and local governments by the AICPA: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position
	10c. Consensus positions of the FASB Emerging Issues Task Force and AICPA Practice Bulletins	12c. Consensus positions of the GASB Emerging Issues Task Force‡ and AICPA Practice Bulletins if specifically made applicable to state and local governments by the AICPA
	10d. AICPA accounting interpretations, "Qs and As" published by the FASB staff, as well as industry practices widely recognized and prevalent	12d. "Qs and As" published by the GASB staff, as well as industry practices widely recognized and prevalent
Other Accounting Literature †	11. Other accounting literature, including FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; GASB Statements, Interpretations, and Technical Bulletins; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles	13. Other accounting literature, including GASB Concepts Statements; pronouncements in categories (*a*) through (*d*) of the hierarchy for nongovernmental entities when not specifically made applicable to state and local governments; FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles

[*The next page is 3141.*]

* Paragraph references correspond to the paragraphs of SAS No. 69 (AU section 411) that describe the categories of the GAAP hierarchy.

† In the absence of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances.

‡ As of the date of this Manual, the GASB had not organized such a group.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

AAM Section 3110
Assigning Personnel to the Engagement

General Comments

.01 Engagement planning should include procedures for assigning personnel to the engagement. The procedures established should provide the firm with reasonable assurance that work will be performed by persons having the degree of technical training and proficiency required in the circumstances. Generally, the more able and experienced the personnel assigned to a particular engagement, the less need for direct supervision.

.02 Some procedures regarding assignment of personnel to the engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all the procedures or be limited to those discussed. Overall firm requirements for assigning personnel to engagements are addressed in the *Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice* at AAM section 11,200. Sample quality control forms are available at AAM section 11,300, which are helpful in assigning personnel to engagements.

Engagement Planning Procedures

.03 A time budget for the engagement should generally be prepared to determine manpower requirements and to schedule field work. The engagement partner should approve the time budget prior to the beginning of field work. A time budget should have columns for budgeted time (in hours) for preliminary and final field work. Time budget forms differ depending upon firm preference and needs. Some firms use separate forms for the time budget report and the job progress report or analysis (see AAM section 3170.01 for "Audit Time Budget—Sample A"), whereas others combine these reports into one form (see AAM section 3170.02 for "Audit Time Budget—Sample B").

.04 Other alternatives include longer, more detailed sets of forms. These forms combine the features of a time budget, a source document for staff scheduling, and a job progress report that compares each assigned person's actual daily hours against the budget. Some firms use a shorter, less detailed form for jobs of less than a predetermined number of staff hours (for example, one hundred hours; see AAM section 3170.03 for "Audit Time Analysis—Short Form") and a longer form for jobs requiring more time (see AAM section 3170.04 for "Audit Time Analysis—Long Form"). Some firms use a weekly (or daily) progress report (see AAM section 3170.05, for example). This report, submitted by the accountant in charge, shows the time actually spent in relation to the estimate, the estimated additional time required, and the estimated variance from the original estimate.

.05 When the combined time budget and progress report form (sample B) is used, it must be kept current as the assignment progresses. This form is carried in the working papers file and is filled in daily by the accountant in charge, for all persons applying time on the engagement. This procedure is vital to identify and control time as it is applied so that it can be compared to the budgeted time for that phase of the engagement.

.06 The following factors should be considered in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:

a. Engagement size and complexity

b. Personnel availability

c. Special expertise

d. Timing of the work to be performed

e. Continuity and periodic rotation of personnel

f. Opportunities for on-the-job training

.07 The knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the level of risk for the engagement (see AAM section 3140). Ordinarily, higher risk requires more experienced personnel or more extensive supervision by the auditor with final responsibility for the engagement during both the planning and the conduct of the engagement.

.08 The scheduling and staffing of the engagement should be approved by the partner with final responsibility for the engagement so that the partner can consider the qualifications, experience, and training of personnel to be assigned. The experience and training of the engagement personnel should be considered in relation to the complexity or other requirements of the engagement and the extent of supervision to be provided.

.09 It is recommended that all procedures discussed in this section be documented in the accountant's work papers. A sample checklist documenting the procedures listed in this section is located in AAM section 3165.

[*The next page is 3161.*]

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

AAM Section 3115
Independence

General Comments

.01 Engagement planning should include procedures to provide the firm with reasonable assurance that persons at all organizational levels maintain independence to the extent required by the AICPA Code of Professional Conduct. Interpretation 101-1 of rule 101 of the rules of conduct (ET section 101.02), contains examples of instances wherein a firm's independence will be considered to be impaired.

.02 The procedures employed at the engagement level should be designed to ascertain whether the firm and its partners and employees have complied with all applicable independence rules, with emphasis on those related to financial interest, performance of accounting services for the client, and unpaid fees. Overall firm requirements for independence are addressed in the *Quality Control Policies and Procedures for CPA Firms,* "Establishing Quality Control Policies and Procedures," (QC section 90), paragraphs .09–.10. (See AAM section 11,500.01–.02 for independence checklists for employees and other auditors.)

.03 Some procedures regarding independence which a firm may employ in the planning phase of an engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all these procedures or be limited to those discussed.

Engagement Planning Procedures

.04 Annual independence questionnaires should be reviewed for all engagement personnel by the engagement partner to assure that those individuals assigned to the engagement are independent.

.05 Accounts receivable from the client should be reviewed to ascertain whether any outstanding amounts take on some of the characteristics of loans and may, therefore, impair the firm's independence.

.06 According to SAS No. 1, section 543, *Part of Audit Performed by Other Independent Auditors* (AU section 543), the firm, when acting as principal auditor, should obtain confirmation of the independence of another firm engaged to perform segments of the audit. Written confirmation enables the principal auditor to document his assessment of the other auditor's independence in his audit work papers.

.07 In situations in which the accountant is not independent, the type of opinion to be issued should be discussed in the planning stage. A disclaimer of opinion should be issued as discussed in SAS No. 26, *Association With Financial Statements,* paragraphs 8–10 (AU section 504.08–.10), or the engagement should be turned into a compilation.

.08 It is recommended that all procedures discussed in this section be documented in the auditor's work papers. A sample checklist documenting the procedures listed in this section is located in AAM section 3165.

[*The next page is 3181.*]

AAM Section 3120
Knowledge of the Entity's Business

.01 The accountant should obtain a level of knowledge of the entity's business that will enable the accountant to plan and perform the audit in accordance with generally accepted auditing standards. That level of knowledge should enable the accountant to obtain an understanding of the events, that may have a significant effect on the financial statements. The level of knowledge customarily possessed by management relating to managing the entity's business is substantially greater than that which is obtained by the accountant in performing the audit. Knowledge of the entity's business helps the accountant in—

a. Identifying areas that may need special consideration.

b. Assessing conditions under which accounting data and corroborating evidential matter are produced, processed, reviewed, and accumulated within the operation.

c. Evaluating the reasonableness of estimates, such as valuation of inventories, depreciation, allowances for doubtful accounts, and percentage-of-completion of long-term contracts.

d. Evaluating the reasonableness of management representations.

e. Making judgments about the appropriateness of the accounting principles applied and the adequacy of disclosures.[1]

Engagement Planning Procedures

.02 The accountant should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics. Such matters include, for example, the type of business, types of products and services, capital structure, related parties, locations and production, distribution, and compensation methods. The accountant should also consider matters affecting the industry in which the entity operates—such as economic conditions, government regulations, and changes in technology—as they relate to his or her audit. Other matters, such as accounting practices common to the industry, competitive conditions, and, if available, financial trends and ratios, should also be considered by the accountant.

.03 Knowledge of an entity's business is obtained through performing analytical procedures, prior experience with the entity or its industry, and inquiry of the entity's personnel. Working papers from prior years may contain useful information about the nature of the business, organizational structure, operating characteristics, and transactions that may require special consideration. Other sources an accountant may consult include AICPA audit and accounting guides, industry publications, financial statements of other entities in the industry, textbooks, periodicals, and individuals knowledgeable about the industry.

.04 The accountant should give thought to whether specialized skills are needed to consider the effect of computer processing on the audit, to understand the nature of controls or to design and perform audit procedures. If specialized skills are needed, the accountant should seek assistance from a professional who may be or may not be on the accountant's staff. If the use of such a professional is planned, the accountant should have sufficient computer-related knowledge to communicate the objectives of the other professional's work, to evaluate whether the specified procedures will meet the accountant's objectives, and to evaluate

[1] See SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report*, paragraphs 4 and 6 (AU section 411.04 and .06).

the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The accountant's responsibilities for using such a professional are equivalent to those for using assistants.[2]

.05 The accountant should consider the methods the entity uses to process information in planning the audit because such methods influence the design of the accounting system and the nature of control procedures. Because of the growth in the use of computers and other information technology, many entities process significant information electronically. In those circumstances, the nature, timing, and extent of audit procedures will be affected in various ways depending upon a number of factors that the auditor should consider, including:

a. The extent to which computers and other information technology are used in every significant accounting application.

b. Whether or not the application generates a financial statement line item or provides a basis for an accounting estimate.

c. The significance of the financial statement line item(s) affected by the client's use of technology.

d. The controls placed over the application or system.

e. The effectiveness of the design and operation of those controls.

f. The complexity of the entity's information technology operations, including the use of an outside service center.[3]

g. The organizational structure of the information technology activities.

h. The availability of and access to evidence. Certain electronic evidence may exist at a certain point in time. However, such evidence may not be retrievable after a specified period of time if files are changed and if backup files do not exist.

i. The use of computer-assisted audit techniques to increase the efficiency of performing audit procedures. Using computer-assisted audit techniques may also provide the accountant with an opportunity to apply certain procedures to an entire population of accounts or transactions. In addition, in some accounting systems, it may be difficult or impossible for the auditor to analyze certain data or test specific control procedures without computer assistance.

Practice Tip

The AICPA's Auditing Procedure Study entitled, *Auditing With Computers,* provides practical and helpful guidance in using technology to your advantage during an audit. Call the AICPA at 1 (800) 862-4272 and ask for product no. 021057.

In addition, certain information generated by the computer for management's internal purposes may be useful in performing substantive tests (particularly analytical procedures).[4]

---

[2] Since the use of a specialist who is effectively functioning as a member of the audit team is not covered by SAS No. 73, *Using the Work of a Specialist* (AU section 336), a computer audit specialist requires the same supervision and review as any assistant.

[3] See SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324), and the related AICPA Auditing Procedure Study, *Implementing SAS No. 70,* Reports on the Processing of Transactions by Service Organizations (product no. 021056), for guidance concerning the use of a service center for computer processing of significant accounting applications.

[4] SAS No. 56, *Analytical Procedures* (AU section 329), describes the usefulness of and guidance pertaining to such procedures.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.06 It is recommended that all procedures discussed in this section be documented in the accountant's work papers. An illustrative planning program for documenting the procedures listed in this section is located in AAM section 3165.

[*The next page is 3201.*]

AAM Section 3125
Consideration of Internal Control

Introduction

.01 Internal control is broadly defined as a process designed to provide reasonable assurance regarding the achievement of entity objectives. Internal control is accomplished by an entity's board of directors, management, and other personnel.

.02 The above definition reflects certain fundamental concepts:

- *A process.* Internal control is a process. It is not one event or circumstance, but a series of actions that permeate an entity's activities. These actions are pervasive, and are inherent in the way management runs the business.
- *People.* Internal control is effected by people. It is not accomplished by policy manuals and forms, but the people of an organization, what they do and say. People must know their responsibilities and limits of authority.
- *Reasonable assurance.* Internal control, no matter how well designed and operated, can provide only reasonable assurance to management and the board of directors regarding achievement of an entity's objectives.
- *Achievement of objectives.* Internal control is geared to the achievement of entity objectives. The definition of these objectives provides auditors with a useful framework for understanding and analyzing internal controls.

.03 Auditors are required to consider their client's internal control during the planning phase of every audit. SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit,* as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), states the following:

> A sufficient understanding of internal control is to be obtained to plan the audit and to determine the nature, timing, and extent of tests to be performed.

.04 As a practical matter, the above requirement raises the following questions.

- What constitutes a "sufficient understanding"? That is, what should an auditor know about the client's internal control?
- How should an auditor obtain this understanding?
- Once an auditor understands the client's internal control, how is that information used to plan the audit?

.05 This section provides answers to each of the above three questions.

What Auditors Should Understand About Internal Control

.06 A "sufficient" understanding of internal control means:

- An auditor should understand how controls have been designed and whether they have been placed in operation.

- This understanding is generally limited to controls that pertain to the entity's objective of preparing reliable financial statements for external purposes.
- That one objective can be broken into five components, and an auditor should obtain an understanding of each of the five components.

.07 Whether a control has been "placed in operation" is different from its "operating effectiveness." In obtaining knowledge about whether controls have been placed in operation, the auditor determines whether the entity is using them. Operating effectiveness, on the other hand, is concerned with how the control was applied, the consistency with which it was applied, and by whom.

.08 *The Jones family owns and operates several neighborhood grocery stores in Anytown. On a monthly basis, the controller of Jones Grocery performs bank reconciliations for all the bank accounts. For planning purposes, the auditor of Jones Grocery needs to understand whether the controller performs the reconciliations. Not testing, but identifying controls are a key part of audit planning.*

.09 SAS No. 55 (AU section 319), as amended, provides a framework to help auditors obtain their understanding of internal control. That framework is built on two basic concepts: objectives and components.

.10 Internal control is a process designed to provide reasonable assurance regarding the achievement of entity *objectives*. Entities generally have the following three objectives:

- *Financial reporting.* This objective relates to the preparation of reliable published financial statements.
- *Operations.* This objective relates to effective and efficient use of the entity's resources.
- *Compliance.* This objective relates to the entity's compliance with applicable laws and regulations.

.11 *The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* ***financial reporting*** *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the* ***operations*** *objective. Each store also has a small deli that prepares sandwiches and hot entrees. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the entity's* ***compliance*** *objective.*

.12 Generally, relevant controls for an audit relate to the financial reporting objective. Controls relating to operations and compliance objectives that are not relevant to an audit need not be considered.

.13 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. The auditor of Jones may wish to inquire and document these controls for client service or other purposes, but since these controls are not relevant to the audit, he or she is not required to do so.*

.14 However, if controls relating to operations and compliance objectives pertain to information the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.15 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she should consider obtaining an understanding of the following:

- Which transactions or classes of transactions are included in the report.
- How significant accounting information about those transactions are entered into and flow through the financial reporting system.
- The files that are processed.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- The nature of processing involved in producing the report.

.16 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.17 Controls designed to prevent or detect misappropriations of assets may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or passwords for limiting access to accounts receivable data files may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. An auditor's responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.18 An objective is what an entity strives to achieve. But what is needed to achieve that objective?

.19 SAS No. 55 (AU section 319), as amended, provides a framework that separates each financial reporting objective into five components. These components represent what is needed to achieve the entity's objectives. The components of internal control are briefly described as follows:

- *Control environment.* The core of any business is its people—their individual attributes, including integrity, ethical values, and competence—and the environment in which they operate. They are the engine that drives the entity and the foundation on which everything rests.
- *Risk assessment.* The entity must be aware of and deal with the risks it faces. It must set objectives, integrated with the sales, production, marketing, financial, and other activities so that the organization is operating in concert. It also must establish mechanisms to identify, analyze, and manage the related risks.
- *Control activities.* Control policies and procedures must be established and executed to help ensure the actions identified by management as necessary to address risks to achievement of the entity's objectives are effectively carried out.
- *Information and communication.* Surrounding the control activities are information and communication systems, including the financial reporting information system. These systems enable the entity's people to capture and exchange the information needed to conduct, manage, and control its operations.
- *Monitoring.* The entire process must be monitored, and modifications made as necessary. In this way, the system can react dynamically, changing as conditions warrant.

.20 Some control components, for example the control environment, will have a pervasive effect on the entity's activities. Other components, for example control activities, will be directed primarily toward the achievement of one or more of the three objectives described in AAM section 3125.10. Auditors are generally interested only in those components of internal control that have a pervasive effect on the entity and those that are directly related to the reliability of financial reporting.

.21 This internal control framework, the relationship between an entity's objectives and internal control components, is discussed in more detail in AAM section 4200.

.22 The internal control framework described here and in AAM section 4200 is only a means to help auditors consider the impact of an entity's internal control in an audit. An auditor's primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, an auditor's primary concern is whether a specific control affects financial statement assertions.

.23 *Andrea Auditor audits Jones Grocery. As on all audits, she is required to obtain an understanding of internal control sufficient to plan the audit. To achieve this, she organizes her inquiries and other procedures to understand each*

of the five components of internal control that relate to the financial reporting objective. As a result of performing her procedures, she discovers the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items. Is that considered a "monitoring" activity?

.24 *The issue of how to classify a particular control is irrelevant for Andrea's purposes. As an auditor, her primary consideration is to understand how the bank reconciliations affect financial statement assertions relating to cash.*

How an Auditor Obtains an Understanding of Internal Control

.25 An auditor often obtains an understanding of internal control through previous experience with the entity and the following:

- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of entity documents and records.
- Observation of entity activities and operations.

.26 Auditors should consider the types of misstatements that occurred in prior audits (e.g., whether they were associated with accounting estimates, whether they were routine errors that resulted from a lack of control consciousness, or whether they resulted from lack of sufficient personnel). This knowledge of prior misstatements can help an auditor focus his or her inquiries on those areas and whether changes have been made to internal control to prevent those misstatements in the future.

.27 In a continuing audit, the auditor may already have significant experience with and documentation of internal control. In these situations, this knowledge from previous audits allows the auditor to focus on system changes.

.28 *Jones Grocery purchased a commercially available software package for independent grocers. During 19X1, Jones installed the general ledger system and the cash receipts/disbursements and accounts payable modules. As part of performing her 19X1 audit, Andrea Auditor obtained an understanding of the software package and the modules that were installed. For her 19X2 audit, Andrea should focus on changes made to the system since 19X1. For example, she might inquire about the installation of other modules (such as inventory) or updated versions of the software package.*

.29 Some controls are documented in policy and procedure manuals, flowcharts, source documents, journals, and ledgers. In these cases, inspection of the documentation and inquiries of entity personnel may provide a sufficient understanding to plan the audit.

.30 *When Jones Grocery receives a bill, it is input directly into the accounts payable module of their software package. The computer generates an accounts payable aging and a cash requirements report that indicates when each bill should be paid. The accounts payable module interfaces with the general ledger system to automatically post and update the appropriate general ledger account whenever bills are received or paid. To obtain her understanding of the accounts payable system, Andrea performed a "walk-through." She made inquiries of Jones personnel and obtained copies of bills and the reports generated by the computer. She "walked through" the example bills to see how they were included in the computer reports and how totals from those reports were posted to the general ledger. She also made inquiries related to the completeness assertion, that is, how does Jones ensure that* **all** *bills are entered into the system? Andrea observed the Jones employee performing those control procedures.*

.31 Documentation may not be available for some controls. For example, the understanding of certain aspects of the control environment, such as management integrity, may be obtained through previous experience updated by inquiries of management and observation of their actions. Although documentation may not be available, the auditor is still responsible for documenting his or her understanding of the components of internal control.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.32 In obtaining an understanding of the design of computer programmed control activities and whether they have been placed in operation, the auditor may make inquiries of appropriate entity personnel and inspect relevant systems documentation to understand control activities design. The auditor may also inspect exception reports generated as a result of such control activities to determine that they have been placed in operation. In actuality, as discussed in AAM section 3125.30, it is possible that the auditor will test controls when obtaining their understanding of internal control.

.33 The auditor's assessment of inherent risk and judgments about materiality for various account balances and transaction classes also affect the nature and extent of the procedure performed to obtain the understanding. For example, the auditor may conclude that planning the audit of the prepaid insurance account does not require specific procedures to obtain an understanding of internal control.

.34 AAM sections 4300 and 4400 contain a series of forms and questionnaires to help auditors perform the procedures to obtain an understanding of internal control.

Using Internal Control Information to Plan the Audit

.35 Effective audit planning requires the auditor to know what can go wrong in the financial statements. That is, the auditor should identify the types of material misstatements that could occur and assess the risk that they will occur. Understanding the design of internal control and whether it has been placed in operation provides important information about the types and risks of potential material misstatement that could occur in financial statements. The understanding often will affect the auditor's consideration of the significance of fraud risk factors. In addition, when considering the significance of fraud risk factors (see AAM section 3145), the auditor may wish to assess whether there are specific controls that mitigate the risk or whether specific control deficiencies may exacerbate the risk.

.36 *The controller of Jones Grocery performs monthly bank reconciliations, but suppose the controller is not required to follow up on old or unusual reconciling items and that the reconciliation itself is not subject to supervisory review. This is a flaw in the design of internal controls which affects the risk of misstatements occurring in the cash accounts going undetected and increases the risk that a misstatement may not be identified timely.*

.37 Knowledge of internal control is also a primary source of information about the specific processes, methods, records, and reports used in preparing the entity's financial statements. The auditor uses this information to design substantive audit tests.

.38 *In obtaining an understanding of internal control at Jones Grocery, Andrea Auditor determines that the accounting system generates an accounts payable trial balance of all unpaid invoices. This information is useful for Andrea to plan her search for unrecorded liabilities—that is, post-balance sheet disbursements and unpaid invoices will be traced to that report to determine if they have been properly accrued at year end.*

.39 The understanding of internal control is also used by auditors to plan an overall audit *strategy*. There are generally two types of audit strategies:

- A primarily substantive approach (however, see paragraph .40 below), where control risk is assessed at or slightly below the maximum, or
- An approach where control risk is assessed below the maximum.

.40 In entities where significant information is transmitted, processed, maintained, or accessed electronically, the ability to perform an audit consisting entirely of substantive tests may be either absent or ineffective. When using electronic evidence, auditors need to question the appropriateness of the traditional approach

of increasing testing if ineffective controls exist, or if assessed control risk is at the maximum level. **If control risk is assessed at maximum, an auditor who performs only substantive tests of electronic evidence may not be able to obtain sufficient competent evidential matter.** For example, a purchase order transmitted electronically from a customer derives its credibility primarily from the controls within the electronic environment. A fraudulent or altered electronic purchase order exhibits no apparent difference, compared to a valid purchase order, when extracted from the electronic environment of the entity. Without testing the internal control surrounding the electronic evidence, a lack of credibility may not be recognized by the auditor. In such circumstances, the auditor should perform tests of controls surrounding the electronic environment to gather evidential matter to use in assessing control risk, or consider the effect on the auditor's report.

Practice Tip

The AICPA has published a practice aid entitled, *The Information Technology Age: Evidential Matter in the Electronic Environment* (product no. 021068). This publication provides valuable help for practitioners auditing in environments where electronic evidence is significant, by addressing the various issues concerning electronic evidence. Call 1 (800) 862-4272 for more information.

.41 When control risk is assessed as below the maximum and it has been determined that reliance on the controls is possible, auditors can modify the nature, timing, and extent of substantive procedures, for example, sample sizes may be reduced or substantive testwork can be performed in advance of the balance sheet date.

.42 The choice of an audit strategy is done at the *assertion* level and is not a global strategy for the entire audit. For some assertions, the auditor may choose a primarily substantive approach (however, see paragraph .40 above), and for other assertions, the auditor may plan to assess control risk below the maximum.

.43 *Andrea Auditor has been the auditor of Jones Grocery for several years. During that time she has helped Jones design and implement the procedures used for the annual inventory count. The count itself is performed by an outside inventory count company that specializes in taking inventory at grocery stores. The outside company is supervised by Jones Grocery employees. Based on this knowledge of the internal controls for the physical inventory count, Andrea plans to assess internal control risk below the maximum for the existence assertion related to inventory.*

.44 In the above example, the audit strategy was determined at the assertion level. The physical count of inventory is a control directly related to the existence assertion. It has little relevance to the valuation assertion and no relevance to the completeness assertion. Thus, the auditor is able to modify tests related to the existence assertion, for example, reducing the number of test counts or stores where inventory is observed. Substantive audit procedures related to other assertions (for example, proper pricing) should not be modified.

Choosing an Audit Strategy

.45 As described in AAM section 3125.06, on all audits, an auditor is required to understand how controls are designed and whether they have been placed in operation. This understanding is sufficient to plan a primarily substantive audit approach. Nevertheless, even with a primarily substantive approach it is usually necessary to test controls surrounding electronic evidence, given the fact that the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. See paragraph .40 above.

.46 In order to assess control risk below the maximum, the auditor must also:

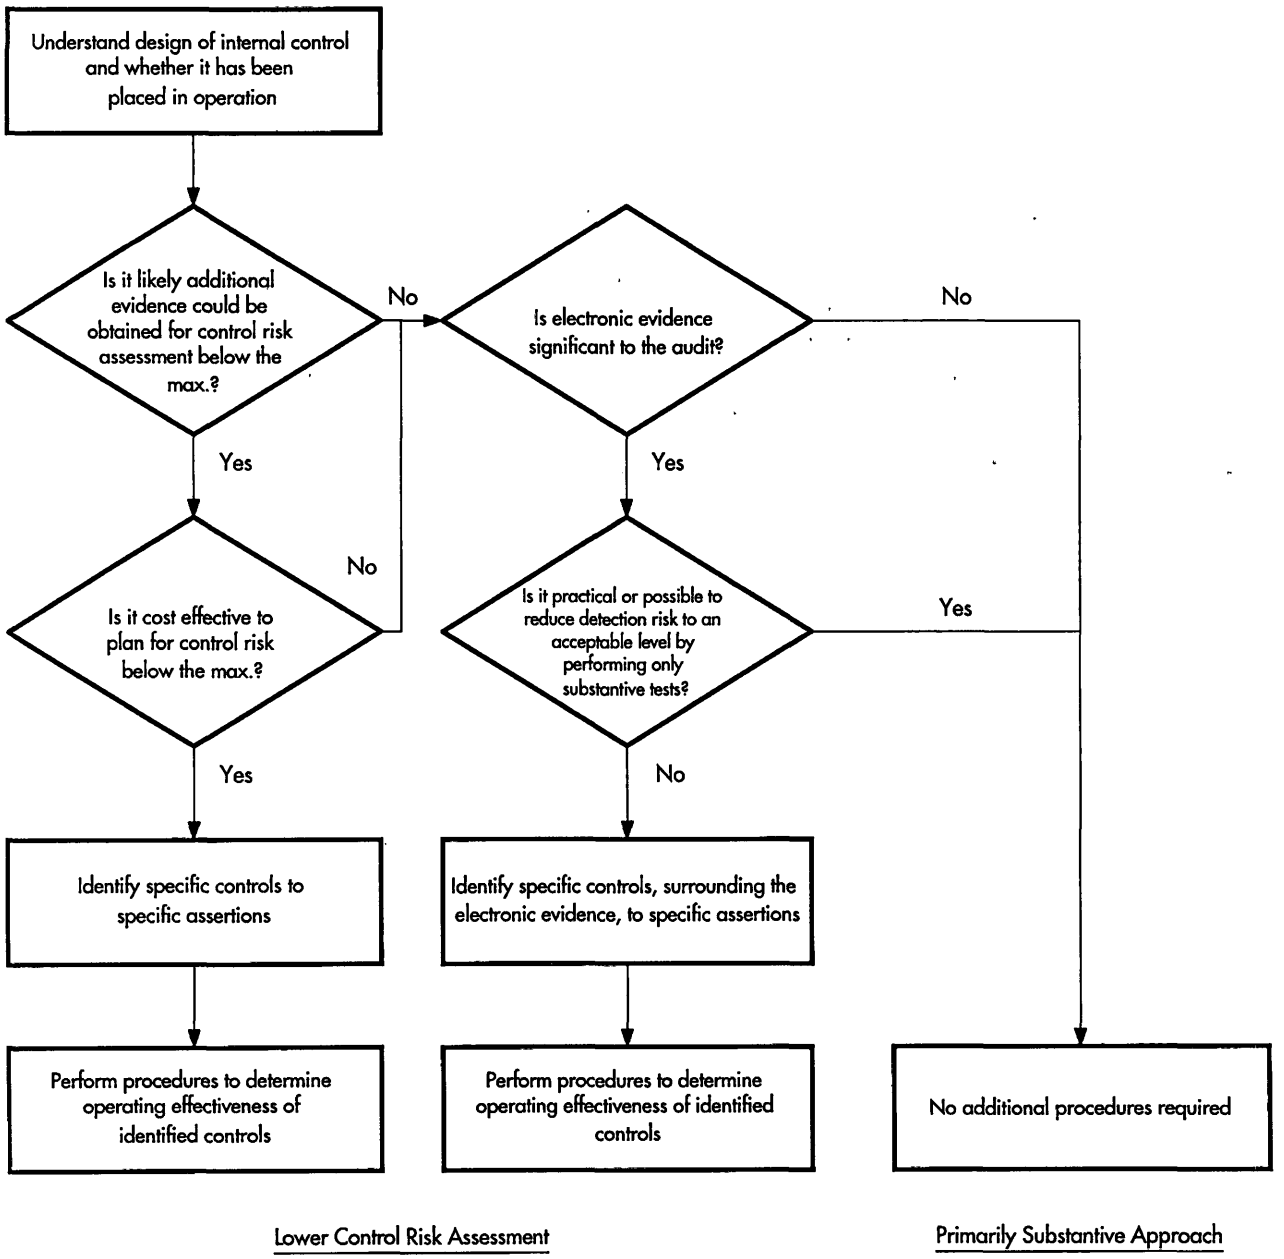
Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Identify specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions, and
- Perform tests of controls to evaluate the effectiveness of such controls.

.47 AAM section 4600 describes in more detail the steps an auditor should take in order to assess control risk below the maximum.

.48 The decision of which audit strategy to pursue is primarily one of audit efficiency. Assessing control risk below the maximum requires the auditor to perform additional procedures to evaluate the effectiveness of controls. However, as a result of assessing control risk below the maximum, the auditor is able to modify his or her substantive tests. In planning the audit, auditors should consider whether the benefits of modifying substantive tests are greater than the costs of performing additional procedures to gauge the effectiveness of controls. Furthermore, as stated above, the appropriateness of relying on substantive tests alone if control risk is assessed at maximum may not be appropriate in environments where electronic evidence is significant.

.49 The following diagram illustrates how an auditor chooses an audit approach.



[*The next page is 3221.*]

AAM Section 3130
Preparing an Engagement Letter

.01 Adequate engagement planning includes establishing an understanding with the client regarding the nature of the firm's services, timing of field work, report deadlines, responsibilities of the client, and methods of fee determination and payment. The engagement partner should annually confirm an understanding of the nature of the engagement and the extent of the reporting responsibilities before beginning field work. Such understanding will normally include an appropriate engagement letter and a pre-engagement client conference. If an engagement letter is not used, the understanding should be documented in the working papers.

.02 Currently there are no authoritative pronouncements requiring a written engagement letter for an audit, although most firms regard their completion as good business practice. An engagement letter helps to prevent misunderstandings between the client and the auditor regarding the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client, and in most states it becomes a legally binding contract on both parties. There are other good reasons to obtain an engagement letter, including the following:

- *Reduce the risk of litigation and avoid misunderstandings with the client.* In today's litigious environment an engagement letter is needed for both old and new clients. To avoid misunderstandings, the engagement letter should describe in detail the services to be rendered, the fee, and other terms and conditions of the engagement. Oral agreements may result in differences of recollection or understanding between the accountant and the client.
- *Avoid misunderstandings by the staff.* The members of the staff working on the engagement must have a complete understanding of what is required of them. A copy of the engagement letter in the working papers provides them with an authoritative reference to supplement their oral instructions.

.03 Often, entities that have never been audited resist signing a client representation letter. To avoid client resistance at the end of the audit, many firms notify the client in the engagement letter that they will be asked to sign a client representation letter.

.04 If the auditor has reason to believe the client may publish all or a portion of an audit report, he should advise the client (preferably in the engagement letter) that firm policy is to read printer's proofs of the report and any other accompanying material. This precaution will protect both the client and accountant against condensation of financial statements, omission of footnotes, erroneous layout, and other errors such as misstatement of figures used in a president's letter, other narrative, or statistics.

.05 The letter should be prepared by the in-charge before any significant work takes place on the engagement. The partner should personally present the letter to the client to ensure that a complete understanding has been achieved. The signed copy should be filed with the current engagement's working papers.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. You should always make sure that a final engagement letter is issued in such circumstances.

.06 Should the nature of an engagement change during its progress, or should the firm be engaged for additional services during the year, a new engagement letter should be prepared. A step-down to a compilation or review engagement, or a special engagement for preparing a forecast, are examples of changes that would require a new engagement letter. Such changes should be made by the engagement partner after careful consideration of the reasons justifying the change. For example, the reasons justifying a step-down from an audit to a compilation or review may prevent the firm from reporting on the lower level of service.

Special Considerations

.07 The following matters should be considered while preparing an engagement letter:

a. Whether the circumstances preclude an unqualified opinion, as in these examples:

- The auditor is retained after the beginning of the client's fiscal year, did not observe inventories or confirm receivables at the beginning of the year and was unable to gain satisfaction through application of alternative procedures.
- The client imposes restrictions on the scope of the audit. (SAS No. 58, *Reports on Audited Financial Statements*, paragraph 42 [AU section 508.42]).
- Significant litigation or other matters exist which may affect the opinion.

b. Whether fee should be stated as a range, in hourly rates, as standard per diem charges for the engagement, or as a maximum or flat fee

c. The person or persons to whom reports should be addressed

d. The number of copies needed of the report and the people to whom they are to be distributed

e. Deadlines for reports or analyses

f. Out-of-pocket costs

g. Additional work not contemplated in the original engagement

h. The condition of records or circumstances other than those contemplated in the engagement letter (for example, deficient internal controls)

i. A retainer

j. One-time engagements

k. Start-up costs when the client changes accountants

l. Underwriters' requirements in connection with public offerings

m. The part of the work to be done by other accountants

Contents of Engagement Letters

.08 The content of the engagement letter should include the following:

- Addressee

  The letter should be addressed to the board of directors, chief executive, or to whomever retained the firm. The client should be requested to return a copy of the letter indicating approval by the appropriate person.

- Nature of the engagement

  A description of the primary service and illustrative report wording should be included for all standard and modified reports. Circumstances causing modification of the standard report, subsequent to signing the engagement letter, should be discussed with the client by the partner.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Additional services

  All additional services such as income tax return preparation or consulting services should be described in the letter.

- Unexpected circumstances

  Client notification, in the event of unforeseen circumstances, should be mentioned.

- Client's responsibilities

  Client assistance such as schedules, financial statements and tax return preparation, and other clerical assistance should be included. It often is detailed in a separate attachment to the engagement letter (see AAM section 3130.09 below).

- Misstatements

  A statement that, "the audit is designed to provide reasonable assurance of detecting misstatements that, in the auditor's judgment, could have a material effect on the financial statements taken as a whole. Consequently, the audit will not necessarily detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. The Company's management is responsible for establishing and maintaining a sound system of internal control, which is the best means of preventing or detecting errors, fraudulent financial reporting, and misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention."

- Fee determination and billing methods

  The anticipated fee or fee range may be included. Estimates of fees should be based on conservative, carefully prepared estimates. The expected billing methods and payment periods should be described.

- Signatures

  The engagement partner should sign the letter on behalf of the firm. The client representative responsible for the engagement should sign the letter indicating agreement with the contract.

- Regulator's access to working papers

.09 Presented below is a list of analyses, schedules and other items that are often requested from the client prior to the start of an audit engagement. The client assistance schedule should be tailored to each specific engagement.

- The general ledger.
- A reconciliation for each bank account.
- A trade accounts receivable aging.
- Accounts receivable confirmation letters, using drafts to be provided by the accountant.
- A schedule of accounts receivable from officers and employees.
- A schedule of bad debts written off during the year.
- A schedule of notes receivable. The notes should be available for inspection.
- A schedule of transactions with affiliated enterprises.
- An inventory listing.
- An analysis of transactions affecting marketable securities.

- An insurance schedule. The policies should be available for inspection.
- A schedule of property and equipment additions and retirements.
- A depreciation schedule.
- A schedule of life insurance for officers.
- A schedule of accounts payable. The creditor's regular monthly statements for [*date*] should be retained and made available.
- A schedule of notes payable.
- The corporate stock book and minutes should be up to date and available for inspection.
- A schedule of all transactions to partners' capital and drawing accounts.
- A copy of the partnership agreement or corporate charter should be available for inspection.
- Copies of all leases, including equipment rental contracts, should be available for inspection.
- Copies of employment contracts with salesmen or executives should be available for inspection
- Copies of pension, profit-sharing, deferred compensation, and stock option agreements, and letters of acceptance from the Treasury Department, should be available for inspection.
- A schedule of repairs in excess of $ _____ .
- A schedule of each officer's salary and expense account payments.
- A schedule of contributions.
- A schedule of tax expense.
- A schedule of professional fees.

.10 An engagement letter may optionally include—

a. A description of a particular audit procedure, if requested by the client or deemed necessary for the protection of the auditor. (The detailed audit program should not be made available to client personnel, orally or otherwise.)

b. The extent and timing of interim auditing procedures.

c. The name of the client's personnel to be contacted during engagement.

d. A study and evaluation of internal control and a report thereon. (This would be a special engagement, not a part of the normal audit routine.)

e. Interim contact and cooperation with the internal auditor.

f. A list of services specifically excluded.

g. Acknowledgment by the client of its responsibility for the financial statements. (Because auditors of smaller, non-public entities often may maintain accounting records, prepare financial statements, and advise management about appropriate accounting principles, such an acknowledgment may be particularly appropriate for such clients.)

h. A statement that the client will be informed of any reportable conditions in internal control that come to the auditor's attention during the audit of financial statements. (Such a communication, either orally or in writing, is required by SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended by SAS No. 78 [AU section 325].)

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.11 Following is a list of common engagement letter deficiencies:

a. Reference in the letter to audit of the books and records rather than to audit of financial statements

b. Adverse comments about other firms

c. Failure to specify *in detail* the services to be rendered when a maximum fee is quoted

d. Inclusion of a review of internal control as one of the services when what is really intended is a consideration of internal control as required by auditing standards

e. Failure to identify accounting or other problems that may have an effect on the opinion

f. Failure to change, in writing, the terms of the engagement when conditions are found to be different (such as the inability to express an opinion without extensive additional auditing because internal control was found deficient)

g. Failure to include fee basis and payment terms

h. Failure to identify subsidiaries

i. Failure to identify specific tax returns to be prepared

Investigatory Procedures for Individuals

.12 When credit information is requested about individuals who are new clients, the investigative procedures are subject to the Fair Credit Reporting Act of 1971.

.13 An individual should be informed in writing that an investigative consumer report, including information about the individual's character, general reputation, personal characteristics, and mode of living is being made. The individual should also be advised, within three days of the time the report is requested, that he may within a reasonable time, by written request, be furnished disclosure of the nature and scope of the investigation.

Filing of Engagement Letters

.14 The signed engagement letter is a contract and should be filed in the client's permanent file. A copy may also be filed with the current working papers, if desired, because of the possible overlapping of billing and collecting as compared to the term of the actual engagement. This also permits easy access when reference to the previous year's letter is needed to prepare the letter for the following year's engagement.

.15 A sample checklist documenting procedures listed in this section is located in AAM section 3165.

.16 See AAM section 3175 for sample engagement letters.

[*The next page is 3271.*]

AAM Section 3140
Assessing Audit Risk and Materiality

General

.01 Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures. The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor that states, "Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected."[1] Audit risk is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. In other words, audit risk is the risk that the auditor will issue an unqualified opinion on financial statements that are materially incorrect.

.02 Financial statements are **materially** misstated when they contain misstatements whose effect, individually or in the aggregate, are important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles. Materiality is the criterion used by accountants and auditors to distinguish between unimportant and important matters. The auditor's consideration of materiality is a matter of professional judgment and is influenced by a perception of the needs of a reasonable person who will rely on the financial statements. The perceived needs of a reasonable person are recognized in the discussion of materiality in FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, which defines materiality as:

> "The magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement."

Material Misstatements

.03 Misstatements can result from errors or fraud.[2]

The risk that misstatements will occur results generally from weaknesses in internal control, inherent risks in certain transactions and account balances, material and unusual account balances, and the client's history of misstatements.

.04 Because the auditor's opinion is based on the concept of reasonable assurance, auditors cannot guarantee that financial statements are free from material misstatements due to errors and fraud. However, they must exercise due care in planning, performing, and evaluating the results of the audit and must apply the appropriate level of professional skepticism to achieve reasonable assurance that the material errors and fraud will be detected.

---

[1] See SAS No. 1, sections 110, *Responsibilities and Functions of the Independent Auditor*, as amended by SAS No. 82, and section 230, *Due Professional Care in the Performance of Work* (AU sections 110 and 230), for a further discussion of reasonable assurance.

[2] The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AU section 317). See AAM section 3150, *Illegal Acts*. For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts if the same as that for errors or fraud.

.05 In planning auditing procedures, the auditor should also consider the nature, cause (if known), and amount of misstatements that he is aware of from the audit of the prior period's financial statements.

Errors and Fraud

.06 The term "errors" refers to unintentional misstatements or omissions of amounts or disclosures in financial statements. Errors may involve—

- Mistakes in gathering or processing information from which financial statements are prepared.
- Unreasonable accounting estimates arising from oversight or misinterpretation of facts.
- Mistakes in the application of accounting principles relating to amount, classification, manner of presentation, or disclosure.

.07 See AAM section 3145 for a discussion on fraud.

.08 When considering the auditor's responsibility to obtain reasonable assurance that the financial statements are free from material misstatement, there is no important distinction between errors and fraud. There is a distinction, however, in the auditor's response to detected misstatements. Generally, an isolated, immaterial error in processing accounting information or applying accounting principles is not significant to the audit. In contrast, when fraud is detected, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

Consideration at the Financial Statements Level

.09 The auditor should plan the audit so that audit risk will be limited to a low level that is, in his professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms.

.10 An assessment of the risk of material misstatement (whether caused by error or fraud) should be made during planning. The auditor's understanding of internal control may heighten or mitigate the auditor's concern about the risk of material misstatement. The auditor should specifically assess the risk of material misstatement of the financial statements due to fraud (see AAM section 3145). The auditor should consider the effect of these assessments on the overall audit strategy and the expected conduct and scope of the audit.

.11 Whenever the auditor has concluded that there is significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision. Ordinarily, higher risk requires more experienced personnel or more extensive supervision. Higher risk may cause the auditor to expand the extent of procedures applied, apply procedures closer to or as of the balance-sheet date, or modify the nature of procedures.

Materiality

.12 In planning the audit, the auditor should use his or her judgment as to the appropriately low level of audit risk and his or her preliminary judgment about materiality levels in a manner that can be expected to provide, within the inherent limitations of the auditing process, sufficient evidential matter to obtain reasonable assurance about whether the financial statements are free of material misstatement. Materiality levels include an overall level for each financial statement; however, because the statements are interrelated, and for reasons of efficiency, the auditor ordinarily considers materiality for planning purposes in terms of the smallest aggregate level of misstatements that could be considered material to any one of the financial

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

statements. Accordingly, auditors should establish a preliminary materiality threshold for the purpose of planning the appropriate auditing procedures to detect material misstatements in the financial statements.

.13 The auditor plans the audit to obtain reasonable assurance of detecting misstatements that he or she believes could be large enough, individually or in the aggregate, to be quantitatively material to the financial statements. Although the auditor should be alert for misstatements that could be qualitatively material, it ordinarily is not practical to design procedures to detect them. Obviously, some misstatements could be included in the financial statements without precluding the auditor from expressing an opinion that the financial statements are fairly presented in all material respects in conformity with generally accepted accounting principles. In determining the materiality of an item, the auditor should consider the nature and amount of the item in relation to the financial statements being audited.

.14 In some situations, the auditor considers materiality for planning purposes before the financial statements to be audited are prepared. In other situations, planning takes place after the financial statements under audit have been prepared, but the auditor may be aware that they require significant modification. In both types of situations, the auditor's preliminary judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods, as long as recognition is given to the effects of major changes in the entity's circumstances and relevant changes in the economy as a whole or the industry in which the entity operates.

.15 In planning, the auditor cannot anticipate all the factors that will ultimately influence judgment about materiality in the evaluation of audit findings at the completion of the audit. Thus, materiality in planning may differ from materiality used in evaluating results at the conclusion of the audit. If the materiality amount used in evaluating audit findings is reduced significantly from the amount used in planning, the auditor should reevaluate the sufficiency of the auditing procedures that were performed.

Quantifying Materiality

.16 Although no authoritative body has established specific guidelines for materiality, there are certain rules of thumb that can be used in making a preliminary assessment of materiality.

.17 Generally, materiality guidelines should be relative rather than absolute. In other words, materiality is usually set as a percentage rather than as an absolute amount. For example, an absolute amount such as $100,000 may be immaterial to a large, multinational corporation but very material to a small, closely held company. To apply percentage guidelines, auditors must determine what base to use. Generally, auditors select a base that is relatively stable and predictable. Bases commonly used include income before taxes, revenues, and total assets. Generally, misstatements become material to income before they become material to the balance sheet. As a consequence, net income before taxes is often selected as the base.

.18 In small business audits, auditors sometimes make a number of significant audit adjustments. Thus, income before taxes may vary too much to be useful as a base. When income before taxes is not used as a base, auditors sometimes use either total revenue or an average of net income for several prior periods.

Example

.19 A common rule of thumb for materiality is 5 to 10 percent of pretax income. Some auditors apply this rule of thumb so that items less than 5 percent of normal pretax income are considered immaterial, whereas items that are more than 10 percent are material. For items between 5 and 10 percent, judgment is applied. For example, when unusual factors exist (perhaps the company is about to be sold for a multiple of audited earnings) auditors would tend to classify items between 5 and 10 percent as material. Others use 1 or 1.5 percent of the larger of total assets or revenues. (See Exhibit 1 for a sample planning materiality worksheet.)

Exhibit 1

	Initials	Date
Done	_____	_____
Reviewed	_____	_____

Client Name
Planning Materiality Worksheet
Balance Sheet Date

1.	Unaudited total assets at balance sheet date	_____
2.	Unaudited total revenues at balance sheet date	_____
3.	Select the larger of line *1* or line *2*	_____
4.	Select a multiplier if audit risk is normal, or, if better than normal, select .01	_____
5.	Multiply line *3* by line *4*	_____
6.	Unaudited pretax income (or equivalent if not a for-profit entity)	_____
7.	Select a multiplier if audit risk is normal, or, if better than normal, select .1	_____
8.	Multiply line *6* by line *7*	_____
9.	Evaluate line *5* and line *8* along with other relevant factors and determine materiality for audit planning purposes	_____

.20 Consideration of which base to use should include such factors as income variability and the nature of the client's business and industry. For a not-for-profit organization, for example, the auditor would probably use total assets or revenues as a base, since pretax income is not meaningful.

.21 A sample checklist documenting procedures listed in this section is located in AAM section 3165.

Consideration at the Individual Account-Balance or Class-of-Transactions Level

.22 The auditor needs to consider audit risk at the individual account-balance or class-of-transactions level because such consideration directly assists in determining the scope of auditing procedures for the balance or class and related assertions. The auditor should seek to restrict audit risk at the individual balance or class level in such a way that will enable him or her, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk. Auditors use various approaches to accomplish their objective.

.23 In determining the nature, timing, and extent of auditing procedures to be applied to a specific account balance or class of transactions, the auditor should design procedures to obtain reasonable assurance of detecting misstatements that he or she believes, based on the preliminary judgment about materiality,

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

could be material, when aggregated with misstatements in other balances or classes, to the financial statements, taken as a whole. Auditors use various methods to design procedures to detect such misstatements. In some cases, auditors explicitly estimate, for planning purposes, the maximum amount of misstatements in the balance or class, that, when combined with misstatements in other balances or classes, could exist without causing the financial statements to be materially misstated. In other cases, auditors relate their preliminary judgment about materiality to a specific account balance or class of transactions without explicitly estimating such misstatements.

Components of Risk

.24 At the account-balance or class-of-transaction level, audit risk consists of:

a. The risk (consisting of inherent risk and control risk) that the balance or class and related assertions contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other balances or classes, and

b. The risk (detection risk) that the auditor will not detect such misstatements.

The way the auditor considers these component risks and combines them involves professional judgment and depends on the audit approach.

.25 ***Inherent risk*** is the susceptibility of an assertion to a material misstatement, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related balances or classes than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates pose greater risks than do accounts consisting of relatively routine, factual data. External factors also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those factors that are peculiar to a specific assertion for an account balance or a class of transactions, factors that relate to several or all of the balances or classes may influence the inherent risk related to an assertion for a specific balance or class. These later factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.26 ***Control risk*** is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.27 ***Detection risk*** is the risk that the auditor will not detect a material misstatement that exists in an assertion. Detection risk is a function of the effectiveness of an auditing procedure and of its application by the auditor. It arises partly from uncertainties that exist when the auditor does not examine 100 percent of an account balance or a class of transactions and partly because of other uncertainties that exist even if he were to examine 100 percent of the balance or class. Such other uncertainties arise because an auditor might select an inappropriate auditing procedure, misapply an appropriate procedure, or misinterpret the audit results. These other uncertainties can be reduced to a negligible level through adequate planning and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards.

.28 Inherent risk and control risk differ from detection risk in that they exist independently of the audit of financial statements. Inherent risk and control risk are functions of the client and its environment, regardless of whether an audit is conducted. Detection risk, on the other hand, relates to the auditor's procedures and can be changed at the auditor's discretion. These components of audit risk may be assessed

in quantitative terms such as percentages or in nonquantitative terms that range, for example, from a minimum to a maximum (e.g., low, moderate, high).

Risk Assessment

.29 The process of assessing risk is aimed at evaluating the risk of the financial statements being materially misstated. During planning, the auditor considers numerous factors—risk at the financial statement level and at the account-balance and class-of-transaction level, inherent risk, control risk, materiality, risk of material misstatement due to fraud, preliminary analytical review, and other matters as appropriate and in accordance with his or her judgment. An audit strategy is devised and carried out. Reliance on and testing of internal control may or may not be a part of that strategy. Based on the outcome of any internal control testing, the nature, timing and extent of substantive tests are reassessed and possibly changed. Substantive tests are performed. At the end of the audit, the auditor considers the audit procedures performed and their results and evaluates the chance that material misstatements have gone undetected by his or her audit procedures. Generally, in an audit that is adequately planned and performed, the auditor will be able to conclude that the risk of the financial statements being materially misstated is acceptably low enough for an unqualified opinion to be issued.

.30 The auditor might make separate or combined assessments of inherent risk and control risk. If the auditor considers inherent risk or control risk, separately or in combination, to be less than the maximum, he should have an appropriate basis for these assessments. This basis may be obtained, for example, through the use of questionnaires, checklists, instructions, or similar generalized materials and, in the case of control risk, the understanding of internal control and the performance of suitable tests of controls. However, professional judgment is required in interpreting, adapting, or expanding such generalized material as appropriate in the circumstances.

.31 In planning the audit engagement, the auditor should assess inherent risk and control risk to determine how much detection risk can be accepted while still restricting audit risk to an acceptably low level. As the auditor's assessment of inherent risk and control risk decreases, the acceptable level of detection risk increases. The auditor should not rely on the assessments of inherent risk and control risk to the exclusion of performing substantive tests. In fact, for a small business with limited segregation of duties, the auditor often assesses inherent risk and control risk at their maximum and relies completely on substantive tests to reduce audit risk to an acceptably low level.

Quantifying Risk

.32 The auditor's assessment of risk and its components of inherent risk, control risk, and detection risk are matters of professional judgment. The types of risk discussed above are difficult to quantify, given their subjective nature. Most auditors use ratings such as low, moderate, or high when judging risk levels.

.33 Generally accepted auditing standards do not require the auditor to quantify risks. Those standards require the auditor to plan the audit so that there is a low level of risk that an unqualified opinion will be expressed when the financial statements are materially misstated.

Evaluating Audit Findings

.34 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, the auditor should aggregate misstatements that the entity has not corrected in a way that enables him or her to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole. Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Likely Misstatements

.35 The auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined is referred to as "likely misstatements."

.36 When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she ordinarily would not specifically identify misstatements but would only obtain an indication of whether a misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor ordinarily would have to employ other procedures to enable him to estimate the likely misstatement in the balance or class.

.37 When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. For example, if a $1,000 loan receivable misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $10,000. That projected misstatement also contributes to the auditor's assessment of likely misstatement.

.38 When auditing accounting estimates (e.g., allowance for inventory obsolescence, allowance for doubtful accounts, warranty obligations, etc.) the audit evidence gathered may support an amount for an estimate different from the amount the client has recorded. That difference may be considered reasonable by the auditor inasmuch as no one accounting estimate can be considered accurate with certainty. In that case, the difference between the estimate that the audit evidence supports and the estimate recorded in the financial statements would not be considered a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

Known Misstatements

.39 "Known misstatements" are those for which the amount of the error is relatively certain. Such misstatements are often supported by highly reliable evidence, such as third-party documents. An example of a known misstatement would be a failure to record an invoice for repairs expense.

Misstatements From the Prior Year

.40 Often overlooked is the consideration of misstatements detected in the prior year that affect the current year. For example, assume last year's aggregation of uncorrected misstatements included an item representing an overstatement of prepaid insurance and an understatement of insurance expense. This item would be included in the current year's aggregation of uncorrected misstatements because it affects the current year's insurance expense. Therefore, the prior year's aggregation of uncorrected misstatements should be reviewed for any items that may have an effect on the current year's financial statements.

Summarizing and Evaluating Misstatements

.41 Most firms prepare a summary of the uncorrected misstatements identified during the audit. This summary may be called the "Summary of Misstatements," or the "Summary of Possible Journal Entries," or other names. The summary presents known, likely, and prior period misstatements separately. The summary is used in evaluating the effect of uncorrected misstatements on the financial statements at the end of the audit.

.42 Some firms establish a predetermined dollar threshold below which misstatements need not be accumulated. This amount should be set so that any such misstatements, either individually, or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

.43 Concluding on the effect of misstatements on the financial statements is a matter of judgment and generally involves considering the nature of the misstatements, overall materiality, and their impact on the financial statements taken as a whole.

.44 If the auditor concludes, based on the accumulation of sufficient evidential matter, that the aggregation of uncorrected misstatements causes the financial statements to be materially misstated, the auditor should request management to eliminate the material misstatement. If the material misstatement is not eliminated, the auditor should issue a qualified or an adverse opinion on the financial statements.

AAM Section 3145
Fraud

General

.01 SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor*, as amended by SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* [appendix A] (AU section 110), states that "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or *fraud*." Management is responsible for the prevention and detection of fraud. That responsibility is described in paragraph 3 of SAS No. 1, section 110 (AU section 110.03).

.02 An auditor's responsibilities relating to fraud are stated within the context of materiality to the financial statements taken as a whole. An auditor is not responsible for detecting fraud per se, but for obtaining reasonable assurance that *material* misstatements caused by fraud are detected. An auditor is not responsible for detecting immaterial misstatements caused by fraud. To fulfill his or her responsibilities related to fraud, an auditor is required by SAS No. 82 (AU section 316) to:

- Consider the presence of fraud risk factors during all stages of the audit process.
- Based on the risk factors present, make an assessment of the risk of material misstatement due to fraud.
- Based on that assessment, develop an appropriate response.

Description and Characteristics of Fraud

.03 The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. Fraud frequently involves a pressure or an incentive to commit fraud and a perceived opportunity to do so. Fraud may be concealed through falsified documentation, including forgery, and it may be concealed through collusion among management, employees, or third parties. Two types of misstatements are relevant to the auditor's consideration of fraud in a financial statement audit—misstatements arising from fraudulent financial reporting, and misstatements arising from misappropriation of assets.

Misstatements Arising From Fraudulent Financial Reporting

.04 Misstatements arising from fraudulent financial reporting are intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve acts such as the following:

- Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared.
- Misrepresentation in, or intentional omission from, the financial statements of events, transactions, or other significant information.
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure.

Misstatements Arising From Misappropriation of Assets

.05 Misstatements arising from misappropriation of assets involve the theft of an entity's assets where the effect of the theft causes the financial statements not to be presented in conformity with generally accepted accounting principles. Misappropriation can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services not received. Misappropriation of assets may be accompanied by false or misleading records or documents and may involve one or more individuals among management, employees, or third parties.

Considering the Presence of Fraud Risk Factors

.06 Although fraud usually is concealed, the presence of risk factors or other conditions may alert the auditor to a possibility that fraud may exist. An auditor should become familiar with these risk factors and be alert to their presence at their clients. It is important to remember that the presence of risk factors or other conditions may be the result of circumstances *other than fraud.* Also, risk factors and conditions will be present in entities where the specific circumstances do not present a risk of material misstatement. Finally, specific controls may exist which mitigate the risk of material misstatement due to fraud, even though risk factors or conditions are present.

.07 In fulfilling his or her responsibilities relating to fraud, an auditor should begin by identifying the presence of fraud risk factors. Fraud risk factors may be identified while performing procedures relating to acceptance or continuance of clients and engagements, during engagement planning or while obtaining an understanding of an entity's internal control, or while conducting fieldwork. SAS No. 82 (AU section 316) lists example fraud risk factors arranged in various categories. An auditor is not required to consider all of the risk factors listed in SAS No. 82 (AU section 316) since not all of the examples are relevant in all circumstances. Professional judgment should be used in determining which example risk factors are relevant in a specific audit engagement. An auditor *is required* to consider fraud risk factor categories that embody the substance of the categories listed in SAS No. 82 (AU section 316). These categories are:

Misstatements Arising From Fraudulent Financial Reporting

.08

- *Management's Characteristics and Influence Over the Control Environment.* These pertain to management's abilities, pressures, style, and attitude relating to internal control and the financial reporting process.
- *Industry Conditions.* These involve the economic and regulatory environment in which the entity operates.
- *Operating Characteristics and Financial Stability.* These pertain to the nature and complexity of the entity and its transactions, the entity's financial condition, and its profitability.

Misstatements Arising From Misappropriation of Assets

.09

- *Susceptibility of Assets to Misappropriation.* These pertain to the nature of an entity's assets and the degree to which they are subject to theft.
- *Controls.* These involve the lack of controls designed to prevent or detect misappropriations of assets.

Practice Tip

Identifying fraud risk factors, assessing fraud-related risk and complying with your responsibilities under SAS No. 82 (AU section 316) can be challenging. Valuable help can be found in the AICPA's practice aid, *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* (product no. 008883). This plain-speaking publication walks you through the issues likely to be encountered and provides valuable tools, such as sample documentation, descriptions of common frauds, and extended audit procedures. It also includes specific guidance on applying its concepts to eleven different industries, including specific *fraud risk factors tailored to those industries*. To obtain this worthwhile publication call the AICPA Order Department at 1 (800) 862-4272.

.10 Auditors should actively seek out the presence of fraud risk factor categories described above, or different categories with the same substance. Fraud risk factors can be identified by any audit team member at any stage of the audit. For that reason, it is important that all engagement members be properly trained to identify fraud risk factors when they are present.

Assessment of Risk of Material Misstatement Due to Fraud

.11 The auditor should specifically assess the risk of material misstatement of the financial statements due to fraud and should consider that assessment in designing the audit procedures to be performed. In making this assessment, the auditor should consider identified fraud risk factors which relate to the categories presented above. As part of the risk assessment, the auditor also should inquire of management (*a*) to obtain management's understanding regarding the risk of fraud in the entity and (*b*) to determine whether they have knowledge of fraud that has been perpetrated on or within the entity.

.12 The assessment of risk of material misstatement due to fraud, although a separate process, can be performed in conjunction with the assessments of inherent risk and control risk, since many of the example fraud risk factors listed in SAS No. 82 (AU section 316) are similar to the factors an auditor would consider when assessing inherent and control risk.

.13 Assessing the risk of material misstatement due to fraud is a cumulative process that includes a consideration of risk factors individually and in combination, using professional judgment. Fraud risk factors cannot be easily ranked in order of importance or combined into effective predictive models. The size, complexity, and ownership characteristics of the entity have a significant influence on the consideration of relevant risk factors. The auditor's understanding of the entity's internal control will also affect his or her consideration of the significance of fraud risk factors. Additionally, if the entity has established a program that includes steps to prevent, deter, and detect fraud, the auditor may consider its effectiveness.

.14 After an assessment of the risk of material misstatement due to fraud is made, other conditions (such as discrepancies in the accounting records, conflicting or missing evidential matter, or problematic or unusual relationships between the auditor and client) may be identified during fieldwork that change or support an auditor's judgment regarding that assessment.

The Auditor's Response

.15 After an assessment of the risk of material misstatement due to fraud is made, a suitable audit response must be developed. As with other risk assessments, the greater the risk, the more extensive the audit procedures need to be in order to obtain reasonable assurance that the financial statements are free of material misstatement. In some cases, even though fraud risk factors have been identified, the auditor's judgment may be that audit procedures otherwise planned are sufficient to respond to the risk factors. In other circumstances, the auditor may conclude that the conditions indicate a need to modify procedures. In these circumstances, the auditor's response can be (1) an overall response, (2) a response that is specific to a particular account balance, class of transaction, or assertion, or (3) a combination of (1) and (2).

Overall Response

.16 An auditor may perform an overall response to the risk of material misstatement due to fraud in the following ways:

- *Professional Skepticism.* An auditor may heighten his or her professional skepticism by (1) increasing sensitivity in the selection of the nature and extent of documentation to be examined, and by (2) increasing recognition of the need to corroborate management's explanations or representations.
- *Assignment of Personnel.* Decisions regarding the qualifications of the staff performing the audit work and the level of supervision required should take into account the assessment of the risk of material misstatement due to fraud.
- *Accounting Principles and Policies.* The auditor may intensify his or her consideration of the appropriateness of accounting principles selected and policies adopted by management in light of the fraud risk assessment.
- *Controls.* When a risk of material misstatement due to fraud relates to risk factors that have control implications, the auditor's ability to assess control risk below the maximum may be reduced. An auditor should understand and consider any controls (or lack thereof) the entity has in place to address the identified fraud risk factors. Management's ability to override such controls should also be considered.

.17 Additionally, in an overall response the *nature* of audit procedures performed may need to be changed to obtain evidence that is more reliable or to obtain additional corroboration. Also, the *timing* of substantive tests may need to be altered to be closer to or at year end. Finally, the *extent* of the procedures applied should reflect the assessment of the risk of material misstatement due to fraud.

Account Balance, Class of Transactions, Assertion Level Response

.18 Specific responses to the auditor's assessment of the risk of material misstatement due to fraud will vary depending upon the types or combinations of fraud risk factors or conditions identified and the account balances, classes of transactions, and assertions they may affect. If these factors or conditions indicate a particular risk applicable to specific account balances or types of transactions, audit procedures addressing these specific areas should be considered that will, in the auditor's judgment, limit audit risk to an appropriate level in light of the risk factors or conditions identified. Presented below are some examples of specific responses to the risk of material misstatement due to fraud.

- Search for and examine unusual expense account activity close to the end of an accounting period (Cash).
- Analyze and review credit memos and other accounts receivable adjustments for the period subsequent to the balance sheet date (Revenue Recognition).
- Review receiving reports and look for indications of alternative shipping sites (Inventory).
- Expand the number of test counts (Inventory).
- Determine if vendors are listed in the yellow pages of the phone book. Call vendors if considered necessary (Purchasing).

Evaluation of Audit Test Results

.19 At the completion of the audit, the auditor should consider whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

he or she made when planning the audit. This consideration may provide further insight into the risk of material misstatement due to fraud and whether there is a need for additional or different audit procedures to be performed.

.20 If audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. If the auditor has determined that misstatements are or may be the result of fraud, but the effect of the misstatements is not material, the auditor nevertheless should evaluate the implications for other aspects of the audit (e.g., nature, timing, extent of audit procedures, control effectiveness assessment).

.21 If the auditor has determined that the misstatement is, or may be, the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

- Consider the implications for other aspects of the audit.
- Discuss the matter and the approach to further investigation with an appropriate level of management.
- Attempt to obtain additional evidential matter.
- If appropriate, suggest that the client consult with legal counsel.

.22 The evaluation of audit test results may lead an auditor to consider withdrawing from the engagement due to the significance of the risk of fraud. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

Documentation

.23 In planning the audit, the auditor should document in the working papers evidence of the performance of the assessment of the risk of material misstatement due to fraud. Documentation should include:

- The risk factors identified as present.
- The auditor's response to those risk factors.
- Fraud risk factors or other conditions, if any, identified during the performance of fieldwork that caused the auditor to believe that an additional audit response is required (any additional responses should also be documented).

It is *not* required that the assessment of the risk of material misstatement due to fraud be labeled ("high," "medium," or "low" for example) *nor* is it required to describe the rationale used to make the assessment. An auditor is only required to document that a separate assessment of the risk of material misstatement due to fraud was performed.

Communication

Note: A *Fraud Communication Checklist* is provided at the end of the "General Procedures" program in AAM section 5400 to help auditors comply with their responsibilities to report fraud to management, the audit committee, and others.

.24 If the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee.

.25 If risk factors have been identified that have continuing control implications, the auditor should consider whether those risk factors represent reportable conditions relating to the entity's internal control that should be communicated to senior management and the audit committee.

.26 The auditor should recognize that in the following circumstances a duty to disclose outside the entity may exist:

- To comply with certain legal and regulatory requirements.
- To a successor auditor when the successor makes inquiries in accordance with SAS No. 7, *Communications Between Predecessor and Successor Auditors* (AU section 315).
- In response to a subpoena.
- To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may wish to consult with legal counsel before discussing matters of fraud or possible fraud with parties outside the client.

Using the AICPA *Audit and Accounting Manual* in Considering Fraud

.27 An auditor should complete the Illustrative Planning Program at AAM section 3165. That program includes steps that consider the presence of fraud risk factors, the assessment of material misstatement due to fraud, developing audit responses, and other matters related to a consideration of fraud in a financial statement audit. Included at the end of the program is a *Fraud Risk Factor Memory Jogger*, that (although its completion is not required) is helpful in identifying fraud risk factors and complying with the requirements of SAS No. 82 (AU section 316).

.28 The audit programs in AAM section 5400 require an auditor to consider the fraud risk assessment and to develop and document any additional audit procedures that may be needed. Referencing between the planning program and memory jogger at AAM section 3165 and the audit programs at AAM section 5400 will help to ensure that identified risks related to fraud are appropriately addressed.

.29 The "General Procedures" program at AAM section 5400 includes steps to evaluate the results of audit tests as they relate to fraud. Steps are also included to communicate fraud-related matters to the appropriate people. A *Fraud Communication Checklist* is presented at the end of the "General Procedures" program to help auditors comply with their communication responsibilities concerning fraud.

AAM Section 3150
Illegal Acts

General Comments

.01 The term "illegal acts" refers to violations of laws or governmental regulations. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

.02 Whether an act is illegal is a determination that is normally beyond the auditor's professional competence. The auditor's training and experience may provide a basis for recognition that some client acts coming to his or her attention may be illegal.

Direct and Material Effect Illegal Acts

.03 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies). For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

.04 The auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statement assertions rather than from the perspective of legality *per se*.

.05 The auditor's responsibility to detect and report misstatement resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for errors or fraud. (See SAS No. 47, *Audit Risk and Materiality in Conducting an Audit*, as amended by SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* [appendix C] (AU section 312), and see SAS No. 82 (AU section 316).) That is, the auditor should design the audit to provide reasonable assurance that financial statement amounts are free from material misstatement resulting from these direct-effect illegal acts.

Other Illegal Acts

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects and their financial statement effect is indirect.

.07 An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. An audit conducted in accordance with GAAS normally does not include audit procedures specifically designed to detect illegal acts having an indirect effect on financial statements.

Engagement Planning Procedures

.08 The auditor should assess the risks that the entity has not complied with laws and regulations which have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies) in the planning phase of the audit.

.09 Matters that may influence the auditor's assessment include:

a. Management's understanding of the requirements of laws and regulations pertinent to audit objectives.

b. The nature and extent of noncompliance noted in prior audits.

c. Changes in requirements since the last audit.

d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations.

e. The client's policy relative to the prevention of illegal acts.

.10 Normally, there is no need to include audit procedures specifically designed to detect illegal acts. However, if the auditor becomes aware of information that raises suspicions, he or she is obligated to apply additional procedures to determine whether an illegal act has, in fact, occurred.

.11 A sample program documenting the procedures listed in this section is located in AAM section 3165.

[*The next page is 3331.*]

AAM Section 3155
Analytical Procedures

General Comments

.01 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

.02 Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures.

b. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions.

c. As an overall review of the financial information in the final review stage of the audit.

Analytical procedures should be applied to some extent for the purposes referred to in (*a*) and (*c*) above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

.03 Analytical procedures involve comparisons of recorded amounts or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

a. Financial information for comparable prior period(s) giving consideration to known changes.

b. Anticipated results—for example, budgets or forecasts including extrapolations from interim or annual data.

c. Relationships among elements of financial information within the period.

d. Information regarding the industry in which the client operates—for example, gross margin information.

e. Relationships of financial information with relevant nonfinancial information.

Engagement Planning Procedures

.04 The purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain evidential matter for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (*a*) enhancing the auditor's understanding of the clients' business and the transactions and events that have occurred since the last audit date, and (*b*) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things

as the existence of unusual transactions and events, and amounts, ratios and trends that might indicate matters that have financial statement and audit planning ramifications.

.05 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

.06 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant non-financial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

.07 An illustrative program documenting procedures listed in this section is located in AAM section 3165.

[*The next page is 3361.*]

AAM Section 3165
Illustrative Planning Program

	Done by (or "N/A")	*Date*	*W/P Ref.**
.01 **A. Understanding the Assignment**			
1. Consider the following matters in planning the engagement:			
a. The entity's accounting policies and procedures.			
b. Financial statement items likely to require adjustment.			
c. The nature of reports expected to be rendered (for example, a report on consolidated or consolidating financial statements, reports on financial statements filed with the SEC, or special reports such as those on compliance with contractual provisions).			
2. In planning the audit:			
a. Discuss the type, scope, and timing of the audit with the entity's management, board of directors, or audit committee.			
b. Consider the effects of applicable accounting and auditing pronouncements, particularly new ones.			
c. Coordinate the assistance of entity personnel in information preparation.			
d. Determine the extent of involvement, if any, of consultants, other independent auditors, specialists, and internal auditors.			
e. Read reports and related correspondence of internal audit staff (if any) and consider the possible effect of internal audit work and findings on scope of the audit.			
3. Discuss the following matters (and others as appropriate) with client personnel:			
a. Changes in key personnel.			
b. Significant accounting or reporting problems.			
c. Changes in accounting methods or accounting principles.			
d. Principle findings of internal auditors.			
e. Changes in information processing methods or technology.			
f. Disposition of prior year's management letter points.			

* As applicable.

	Done by (or "N/A")	Date	W/P Ref.*
g. Closing information to be prepared, such as closing journal entries and post-closing trial balance.			
h. Timing of preliminary audit work, inventory observation, confirmation procedures, final audit work.			
i. Adequacy of working space for the audit team.			
j. Access to client records.			
k. Assistance to be provided by client personnel.			
4. Document engagement personnel's understanding of the assignment in the workpapers, as deemed necessary.			
.02 B. Assigning Personnel to the Engagement			
1. Prepare a time budget by audit area for the engagement to determine manpower requirements and to schedule fieldwork.			
2. Have the engagement partner approve the time budget prior to the beginning of fieldwork.			
3. Consider the following factors in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:			
a. Engagement size and complexity.			
b. Personnel availability.			
c. Special expertise required.			
d. Timing of the work performed.			
e. Continuity and periodic rotation of personnel.			
f. Opportunities for on-the-job training.			
4. Have the scheduling and staffing of the engagement approved by the partner with final responsibility for the engagement, so that the partner can consider the qualifications, experience, and training of personnel to be assigned.			
.03 C. Independence			
1. If acting as principal auditor, obtain written confirmation of the independence of other firms engaged to perform segments of the audit.			
2. Review annual independent questionnaires for all engagement personnel to assure that those individuals assigned to the engagement are independent.			
3. Review accounts receivable from the client to ascertain whether any outstanding amounts take on some of the characteristics of loans and may, therefore, impair the firm's independence.			

* As applicable.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by (or "N/A")	Date	W/P Ref.*
4. In situations in which the firm is not independent, discuss the issuance of a disclaimer of opinion in accordance with Statement on Auditing Standards (SAS) No. 26, *Association With Financial Statements*, paragraphs 8–10 (AU section 504.08–.10).			

.04 D. Knowledge of the Entity's Business

1. Obtain an initial, overall understanding of the clients' operations by—			
a. Reviewing the prior years' working papers, permanent file, auditor's report, and financial statements.			
b. Reviewing any interim financial statements or reports for the current year, including filings with regulatory agencies; or, if such statement or reports have not been prepared, by scanning the general ledger (or trial balance) to determine whether the amounts and relationships appear reasonable in comparison with the prior years.			
c. Reviewing most recent management letters.			
d. Reviewing the client correspondence file.			
e. Obtaining copies of the minutes of meetings of stockholders, the board of directors, and relevant committees.			
f. Considering possible impact of nonaudit services rendered to client on the audit.			
2. Discuss the following matters with management:			
a. Changes in operations, including planned changes.			
b. Significant legal matters and contingencies.			
3. Obtain an understanding of the effect of laws, regulations, and ordinances having a direct and material effect on the financial statements, and if necessary prepare a list of such laws for the workpapers.			
4. Obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics such as the following:			
a. The type of business.			
b. Types of products and services.			
c. Capital structure.			
d. Related parties.			
e. Locations.			
f. Production.			

* As applicable.

	Done by (or "N/A")	Date	W/P Ref.*
g. Distribution methods.			
h. Compensation methods.			
5. Obtain a knowledge of matters affecting the industry in which the entity operates, such as the following:			
a. Economic conditions.			
b. Government regulations.			
c. Changes in technology.			
d. Accounting practices common to the industry.			
e. Competitive conditions.			
f. Financial trends and ratios.			
6. As appropriate, obtain an understanding of the accounting and disclosure requirements for environmental remediation liabilities, which are set forth in chapters 5 to 7 of AICPA Statement of Position 96-1, *Environmental Remediation Liabilities.*			
7. Obtain an understanding of the potential environmental remediation liabilities to which the client may be exposed. Gaining knowledge of the following matters will help provide that understanding:			
• The industry or industries in which the client operates.			
• The types of products or services provided by the client.			
• The number and characteristics of the client's locations.			
• Applicable governmental regulations.			
• Production and distribution processes.			
Useful sources of information about such matters include industry publications, financial statements, and other publicly available information from entities in the same industry, and information available from regulatory agencies.			
8. Consider other possible indicators of increased risk of environmental remediation liability, such as:			
a. Participation in a real estate transaction or corporate merger involving properties with environmental risks.			
b. The purchase of land for a price significantly below local market prices.			
c. The acquisition of new or increased insurance coverage against environmental risks or liability to third parties.			

* As applicable.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by (or "N/A")	Date	W/P Ref.*
9. Inquire of accounting, finance, operations, environmental, compliance, or legal personnel about their knowledge of the company's exposure to environmental remediation liabilities.			
10. Consult other sources of information that relate to the entity's business, such as the following:			
a. AICPA audit and accounting guides and other publications.			
b. Industry publications.			
c. Financial statements of other entities in the industry.			
d. Textbooks, periodicals, and individuals knowledgeable about the industry.			
11. Consider methods the entity uses to process accounting information in planning the audit.			
12. Consider the following matters in evaluating the effect of the entity's information technology on the audit of financial statements:			
a. The extent to which the computers and other information technology is used in every significant accounting application.			
b. Whether or not the application generates a financial statement line item or provides a basis for an accounting estimate.			
c. The significance of the financial statement line item(s) affected by the client's use of technology.			
d. The controls placed over the application or system.			
e. The effectiveness of the design and operation of those controls.			
f. The complexity of the entity's information technology operations, including the use of an outside service center.			
g. The organizational structure of the information technology activities.			
h. The availability of, and access to, evidence.			
i. The use of computer-assisted audit techniques to increase the efficiency of performing audit procedures.			
13. Consider whether specialized skills are needed to consider the effect of information technology on the audit.			
14. Document the matters listed above relating to a knowledge of the entity's business in the workpapers, as deemed necessary.			

* As applicable.

	Done by (or "N/A")	*Date*	*W/P Ref.**

.05 **E. Assessing Auditability**

1. Assess the adequacy of the accounting records for the following factors:
   - *a.* Transactions described in sufficient detail to permit appropriate classification in financial statements. _____ ____ ____
   - *b.* Transactions described in a manner that permits the recording of monetary value in the financial statements. _____ ____ ____
   - *c.* Accounting records include the period in which the transactions occurred to permit the recording of transactions in the appropriate accounting period. _____ ____ ____
2. Obtain sufficient knowledge of the design of the relevant controls pertaining to each of the five internal control components and whether they have been placed in operation. In completing this step, complete the "Internal Control" program at AAM section 5400, as appropriate. _____ ____ ____
3. Document the understanding of the entity's five components of internal control obtained to plan the audit. _____ ____ ____
4. Reform the following procedures regarding the integrity of management:
   - *a.* Inquiries of local attorneys, bankers, and other business leaders as to the client's standing in the business community. _____ ____ ____
   - *b.* A check of the client's credit rating. _____ ____ ____
5. Document the matters listed above relating to the auditability of the entity in the workpapers, as deemed necessary. _____ ____ ____

.06 **F. Engagement Letter**

1. Include the following items in the engagement letter:
   - *a.* Name of entity (and subsidiaries, if any) and its year end. _____ ____ ____
   - *b.* Statement(s) to be audited, compiled, or reviewed. _____ ____ ____
   - *c.* Scope of services, as detailed as necessary—including limitations imposed by the client. _____ ____ ____
   - *d.* Type of report(s) to be rendered. _____ ____ ____
   - *e.* Disclaimer of responsibility for detecting all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets (see AAM section 3175). _____ ____ ____
   - *f.* Obligations of the client's staff to prepare schedule and statements. _____ ____ ____

* As applicable.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by (or "N/A")	Date	W/P Ref.*
g. Requirement that accountant read all printed material in which his report appears.			
h. Responsibility for preparation or review of tax returns and subsequent tax examinations.			
i. Fee or method of determining fee.			
j. Frequency of billing and client's obligations for payment, including retainer, if applicable.			
k. Provision for client's acceptance signature and date.			
l. Expression of thanks for being selected as auditors or to perform other services.			
m. That, in new engagements, the client should take the responsibility for getting the cooperation of the prior auditor and the successor auditor to communicate with the predecessor auditor prior to accepting the engagement.			
2. Include the following optional items in the engagement letter, as deemed necessary:			
a. Description of particular audit procedure, if requested by client or deemed necessary for protection of the auditor (The detailed audit program should not be made available to client personnel, orally or otherwise).			
b. Extent and timing of interim auditing procedures.			
c. Name of client's personnel to be contacted during engagement.			
d. Study and evaluation of internal control and report thereon (This would be a special engagement, not part of the normal audit routine).			
e. Interim contact and cooperation with internal auditor.			
f. List of services specifically excluded.			
g. Acknowledgment by the client of its responsibility for the financial statements (Because auditors of smaller, nonpublic entities often may maintain accounting records, prepare financial statements, and advise management about appropriate accounting principles, such an acknowledgment may be particularly appropriate for such clients.).			
h. A statement that the client will be informed of any reportable conditions in the internal control structure that come to the auditor's attention during his audit of financial statements. (Such a communication, either orally or in writing, is required by SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended by SAS No. 78 [AU section 325].)			

* As applicable.

	Done by (or "N/A")	*Date*	*W/P Ref.**

.07 **G. Assessing Audit Risk and Materiality**

1. Determine a preliminary judgment about the dollar amount of misstatement that would be material to the financial statements. _____ ____ ____

2. Relate that amount to tolerable error for specific account balances in planning audit procedures. _____ ____ ____

3. Assess and document inherent risk and control risk to determine how much detection risk can be accepted while still restricting audit risk to an acceptably low level. _____ ____ ____

4. Assess and document, by considering the understanding obtained of the internal control components and by considering all other matters influencing audit risk, the risk of material misstatement due to error, illegal acts, and other factors. _____ ____ ____

5. Consider the presence of fraud risk factors in the following categories:

   a. Management's characteristics. _____ ____ ____

   b. Industry conditions. _____ ____ ____

   c. Operating characteristics and financial stability. _____ ____ ____

   d. Susceptibility of assets to misappropriation. _____ ____ ____

   e. Controls over the misappropriation of assets. _____ ____ ____

6. Complete the "Fraud Risk Factor Memory Jogger" maintained at the end of this planning checklist. (Auditors may decide, based on the circumstances, that completion of the memory jogger is not necessary. However, the risk factor categories in step 5 above should be considered.) _____ ____ ____

Practice Tip

Many firms use the helpful, "plain-english" guidance contained in the AICPA's *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* practice aid. This publication includes industry-specific example risk factors that may exist on your engagement. It also includes valuable help in assessing the risk of fraud (Call 1 (800) 862-4272, product no. 008883).

7. Inquire of management about their understanding regarding the risk of fraud in the entity. _____ ____ ____

8. Inquire of management about knowledge they may have of fraud that has been perpetrated on or within the entity. _____ ____ ____

* As applicable.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by (or "N/A")	Date	W/P Ref.*
9. Inquire of management about the existence of a program at the entity that includes proactive steps to prevent, deter, and detect fraud and whether the program has identified any fraud risk factors.			
10. Assess the risk of material misstatement due to fraud.			
11. For identified fraud risk factors, develop an appropriate audit response.			
12. Document in the workpapers evidence of the performance of the assessment of the risk of material misstatement due to fraud, including the following items:			
a. Fraud risk factors identified as present.			
b. Inquiries and responses made by the auditor of management regarding the risk of fraud in the entity.			
c. Inquiries and responses made by the auditor of management whether management has knowledge of fraud that has been perpetrated.			
d. Inquiries and responses made by the auditor of management about the existence of a program at the entity that includes proactive steps to prevent, deter, and detect fraud and whether the program has identified any fraud risk factors.			
e. Audit responses to the identified fraud risk factors.			
13. Consider the risk of material misstatement (due to error, fraud, illegal acts, and other factors) assessment in determining:			
a. Overall audit strategy.			
b. The nature, timing, and extent of audit procedures.			
c. Staff assignments.			
d. Appropriate levels of supervision.			
.08 H. Assessment of Control Risk			
1. Assess control risk. In assessing control risk, complete the "Internal Control" program at AAM section 5400.			
2. Document conclusions about the control risk assessment, including the bases for assessing control risk at the maximum or below the maximum for financial statement assertions.			
3. In circumstances where electronic evidence is significant, reconsider the appropriateness of assessing control risk at the maximum and performing only substantive testing, given the usual dependency of competent electronic evidence on effective internal control.			

* As applicable.

	Done by (or "N/A")	Date	W/P Ref.*
4. Perform the following procedures in assessing control risk at below the maximum level for some or all financial statement assertions (see "Internal Control" program at AAM section 5400):			
a. Identify specific control relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions.			
b. Perform tests of controls to evaluate the effectiveness of such controls.			
5. If a further reduction in the assessed level of control risk is desired for some financial statement assertions, perform additional tests of relevant controls.			

.09 I. Illegal Acts

1. Consider the following matters in the assessment of risk that the entity has not complied with laws and regulations that have a direct and material effect on the determination of financial statement amounts:			
a. The client's policy, if any, relative to the prevention of illegal acts.			
b. Management's understanding of the requirements of laws and regulations pertinent to audit objectives.			
c. The nature and extent of noncompliance noted in prior audits.			
d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations.			

.10 J. Analytical Procedures

1. Use analytical procedures which focus on:			
a. Enhancing the auditor's understanding of the client's business and the transactions and events that have accrued since the last audit date.			
b. Identifying areas that may represent specific risks relevant to the audit.			

.11 K. Audit Strategies and the Audit Program

1. Use the information obtained or developed concerning materiality, internal control, the results of preliminary analytical procedures, risk assessments, and other matters used in assessing audit risk to plan:			
a. The overall strategy for the conduct and scope of the audit.			

* As applicable.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by (or "N/A")	Date	W/P Ref.*
b. The nature, timing, and extent of testing.			
c. Staffing requirements and related levels of supervision.			
(Utilize the audit programs maintained at AAM section 5400, as well as auditor-developed audit programs to meet specific situations.)			
2. Have the final audit programs approved by the engagement partner.			

* As applicable.

.12

Fraud Risk Factor Memory Jogger

An auditor may find this memory jogger helpful during planning and at other stages of the audit, when considering fraud risk factors and assessing the risk of material misstatement due to fraud. The example risk factors described in SAS No. 82 (AU section 316) have been included in the listing below. If used, this memory jogger should be tailored for the particular client being audited. Identified or possible risk factors should be added to the list. An auditor may also decide to remove the SAS No. 82 (AU section 316) example factors from the list, based on the circumstances. In any event, be sure to consider fraud risk factors that relate to fraudulent financial reporting and misappropriation of assets in every related category (A–E) presented below. This memory jogger will also be useful in documenting compliance with SAS No. 82 (AU section 316), as well as providing links to the workpapers and programs where responses and conclusions regarding the identified risk factors are documented. The memory jogger can be carried forward to succeeding years' audits to help assess fraud risk in those years. An auditor should feel free to use this practice aid as he or she sees fit (e.g., adding attachments, redesigning the form of the memory jogger). Finally, note that SAS No. 82 (AU section 316) does not require an auditor to use a memory jogger or checklist of fraud risk factors.

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[1]	*Audit Response Documented? (W/P Ref.)*[2]	*Additional Information*
A. Management Characteristics				
1. A significant portion of management's compensation represented by bonuses, stock options, or other incentives, the value of which is contingent upon the entity achieving unduly aggressive targets for operating results, financial position, or cash flow.				
2. An excessive interest by management in maintaining or increasing the entity's stock price or earnings trend through the use of unusually aggressive accounting practices.				
3. A practice by management of committing to analysts, creditors, and other third parties to achieve what appear to be unduly aggressive or clearly unrealistic forecasts.				
4. An interest by management in pursuing inappropriate means to minimize reported earnings for tax-motivated reasons.				
5. An ineffective means of communicating and supporting the entity's values or ethics, or communication of inappropriate values or ethics.				
6. Domination of management by a single person or small group without compensating controls such as effective oversight by the board of directors or audit committee.				
7. Inadequate monitoring of significant controls.				
8. Management failing to correct known reportable conditions on a timely basis.				
9. Management setting unduly aggressive financial targets and expectations for operating personnel.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[1]	*Audit Response Documented? (W/P Ref.)*[2]	*Additional Information*
10. Management displaying a significant disregard for regulatory authorities.				
11. Management continuing to employ an ineffective accounting, information technology, or internal auditing staff.				
12. Nonfinancial management's excessive participation in, or preoccupation with, the selection of accounting principles or the determination of significant estimates.				
13. High turnover of senior management, counsel, or board members.				
14. Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters.				
15. Unreasonable demands on the auditor including unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's reports.				
16. Formal or informal restrictions on the auditor including unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's reports.				
17. Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work.				
18. Known history of securities law violations or claims against the entity or its senior management alleging fraud or violations of securities laws.				
B. Industry Conditions				
1. New accounting, statutory, or regulatory requirements that could impair the financial stability or profitability of the entity.				
2. High degree of competition or market saturation, accompanied by declining margins.				
3. Declining industry with increasing business failures and significant declines in customer demand.				
4. Rapid changes in the industry such as high vulnerability to rapidly changing technology or rapid product obsolescence.				

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[1]	*Audit Response Documented? (W/P Ref.)*[2]	*Additional Information*
C. Operating Characteristics & Financial Stability				
1. Inability to generate cash flows from operations while reporting earnings and earnings growth.				
2. Significant pressure to obtain additional capital necessary to stay competitive considering the financial position of the entity—including need for funds to finance major research and development or capital expenditures.				
3. Assets, liabilities, revenues, or expenses based on significant estimates that involve unusually subjective judgments or uncertainties, or that are subject to potential significant change in the near term in a manner that may have a financially disruptive effect on the entity.				
4. Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.				
5. Significant unusual, or highly complex transactions, especially those close to year end, that pose difficult "substance over form" questions.				
6. Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification.				
7. Overly complex organizational structure involving numerous or unusual legal entities, managerial lines of authority, or contractual arrangements without apparent business purpose.				
8. Difficulty in determining the organization or individual(s) that control(s) the entity.				
9. Usually rapid growth or profitability, especially compared with that of other companies in the same industry.				
10. Especially high vulnerability to changes in interest rates.				
11. Unusually high dependence on debt or marginal ability to meet debt repayment requirements; debt covenants that are difficult to maintain.				
12. Unrealistically aggressive sales or profitability incentive programs.				
13. Threat of imminent bankruptcy or foreclosure, or hostile takeover.				
14. Adverse consequences on significant pending transactions, such as a business combination or contract award, if poor financial results are reported.				
15. Poor or deteriorating financial position when management has personally guaranteed significant debts of the entity.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Fraud Risk Factors Considered	*Present at Client?*	*Audit Response Developed?*[1]	*Audit Response Documented? (W/P Ref.)*[2]	*Additional Information*
D. Susceptibility of Assets to Misappropriation				
1. Large amounts of cash on hand or processed.				
2. Inventory characteristics, such as small size, high value, or high demand.				
3. Easily convertible assets, such as bearer bonds, diamonds, or computer chips.				
4. Fixed asset characteristics, such as small size, marketability, or lack of ownership identification.				
E. Controls				
1. Lack of appropriate management oversight.				
2. Lack of job applicant screening procedures relating to employees with access to assets susceptible to misappropriation.				
3. Inadequate recordkeeping with respect to assets susceptible to misappropriation.				
4. Lack of appropriate segregation of duties or independent checks.				
5. Lack of appropriate system of authorization and approval of transactions.				
6. Poor physical safeguards over cash, investments, inventory, or fixed assets.				
7. Lack of timely and appropriate documentation for transactions.				
8. Lack of mandatory vacations for employees performing key control functions.				

Practice Tip

The AICPA's publication entitled, *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82*, provides **industry-specific example fraud risk factors** that help practitioners consider the risk of material misstatement due to fraud on their engagements. Call the AICPA at 1 (800) 862-4272 and ask for product no. 008883.

[*The next page is 3381.*]

[1] Based on the assessment of risk of material misstatement due to fraud, an auditor may respond to identified risk factors individually or in combination.

[2] The auditor's response to identified risk factors should be documented. Documentation should be maintained at a place in the workpapers considered most suitable, depending upon the type of risk factor and the type of response. Generally, if a response is specific to a particular account balance or class of transactions, documentation of the audit procedures would be placed in the appropriate audit program (e.g., Cash, Investments). If it is determined that audit procedures already planned or normally carried out are a sufficient response to the identified risk factor, that fact should be documented.

Sample Engagement Letters

.01 Following are illustrative engagement letters (and one engagement memorandum). They may be used as guides in the design of specific letters, tailored to satisfy the terms of a particular engagement.

.02 Audit Engagement Leading to Opinion

LACKO, LYNCH, BROWN & COMPANY Certified Public Accountants

[*Date*]
Mr. Matt Decker, President
Anonymous Company, Inc.
Route 32
Heartland, Kansas 10000

Dear Mr. Decker:

This will confirm our understanding of the services we will provide to Anonymous Company, Inc., for the year ending December 31, 19XX.

We will audit the balance sheet of Anonymous Company, Inc., as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them. The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the creation and maintenance of internal control and proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. A report will not be issued for this engagement if we are unable to finish the audit.

We will conduct our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and banks. At the conclusion of our audit, we will request certain written representations from you about the financial statements and related matters.

Our audit is designed to provide reasonable assurance of detecting misstatements that, in our judgment, could have a material effect on the financial statements taken as a whole. Consequently, our audit will not necessarily detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. The Company's management is responsible for establishing and maintaining a sound system of internal control, which is the best means of preventing or detecting errors, fraudulent financial re-

porting, and misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention.[1]

As part of our engagement for the year ending December 31, 19XX, we will review the federal and state income tax returns for Anonymous Company, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

Our audit cannot be relied upon to disclose significant deficiencies in the design or operation of internal control ("reportable conditions"). Nevertheless, we will communicate to you all reportable conditions and potential areas for improvement that we become aware of during the course of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from $XX,XXX to $XX,XXX.

The working papers for this engagement are the property of Lacko, Lynch, Brown & Company and constitute confidential information. However, we may be requested to make certain working papers available to _____ [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such working papers will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected working papers to _____ [*name of regulator*]. The _____ [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.[2]

---

[1] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ruling No. 94 under AICPA Rule of Conduct 101 [ET section 191.188 and .189] states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and hold me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held entities also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter.

[2] This paragraph is optional depending upon the nature of the engagement.

.03 SEC Engagement: Form 10-K and Annual Report to Shareholders

RON TRACY & ASSOCIATES Certified Public Accountants

[*Date*]
Mr. Joshua Snyder
Lawnmowers & Snowblowers Unlimited
731 Nathan Road
Hatville, NJ 00000

Dear Mr. Snyder:

This letter confirms our understanding of the services we will provide to Lawnmowers & Snowblowers Unlimited for the year ended December 31, 19XX.

We will audit the balance sheet of Lawnmowers & Snowblowers Unlimited as of December 31, 19XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them. The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the creation and maintenance of internal control and proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. A report will not be issued for this engagement if we are unable to finish the audit.

We will conduct our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We also will audit the financial information necessary for the schedules required by Regulation S-X of the SEC.

Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and banks. At the conclusion of our audit, we will request certain written representations from you about the financial statements and related matters.

Our audit is designed to provide reasonable assurance of detecting misstatements that, in our judgment, could have a material effect on the financial statements taken as a whole. Consequently, our audit will not necessarily detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. .04 Change in Circumstances From Those Contemplated in Original Engagement Letter

RATZINGER & O'CONNOR, CPA'S Certified Public Accountants

[*Date*]
Mr. James Melakon, Treasurer
Nimbus Country Club
64 Eagle Road
Bethel, Ohio 10000

Dear Mr. Melakon:

As we agreed in our original engagement letter dated [*date*] we are notifying you that our audit of your December 31, 19XX financial statements requires additional procedures.

We have found that certain guest checks are held for only three months after they are paid. Thus, a substantial number of guest checks are not available for examination. Fortunately, your internal control activities allow us to use alternative procedures to satisfy ourselves on this part of the audit. However, this will require substantially more time than examining guest checks.

The fee for these additional services will be billed at our standard per diem rates and added to the fees quoted in our previous letter.

The situation has been discussed with your controller, who assured us that in the future all guest checks will be kept for two years.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Very truly yours,

RATZINGER & O'CONNOR, CPA'S

.05 Conditions Encountered Which Do Not Permit Expression of Opinion as Anticipated in Original Engagement Letter

GEROW, COLLINS & PATCH Certified Public Accountants

[*Date*]
Mrs. Helene Daestrom, President
Cohrane Manufacturing, Inc.
1234 West Street
Cedar Hill, Tennessee 10000

Dear Mrs. Daestrom:

Our March 15, 19XX letter described our present engagement as an audit for the purpose of expressing an opinion on the financial statements based on our audit. This letter is to inform you that because of the circumstances described below, we will be required to qualify our opinion on these statements.

As you know, the Internal Revenue Service has proposed total income tax assessments of approximately $XXX,XXX for the three fiscal years ended December 31, 19XX. Your tax counsel has advised us that although you have a defensible position and will protest the assessments, counsel cannot offer an opinion as to your ultimate liability. No provision for this assessment or any portion of it is included in your December 31, 19XX financial statements, nor do you feel any is necessary.

Due to an inability to obtain sufficient evidential matter to support your assertions regarding the tax assessment situation described above, we will be unable to express an unqualified opinion. Our report will state the reasons for the qualification of our opinion.

You and your tax counsel have advised that you will inform us of any new developments in the proposed assessment before our report is issued so that we may consider their effect on your financial statements and on our report.

Sincerely,

GEROW, COLLINS & PATCH

_____

[*Engagement Partner's Signature*]

Note: The client is not asked to sign this letter. Its purpose is to inform the client of the altered circumstances and the effect on the opinion. There is no change in the terms of the engagement. However, it might be desirable to have the client acknowledge receipt of this letter by signing a copy and returning it where—for example—it is a problem, or when there has been a history of misunderstandings.

.06 SEC Engagement: Initial Registration, Form S-1

BELLARMINE, PERRICONE & COMPANY Certified Public Accountants

[*Date*]
Mr. James Flood, President
Special Eyeglasses Company, Inc.
3 Bay Drive
La Mancha, California 99999

Dear Mr. Flood:

This letter confirms the arrangements for our services in connection with the registration statement Special Eyeglasses Company will file with the Securities and Exchange Commission.

We will audit the consolidated balance sheets of Special Eyeglasses Company, Inc., as of December 31, 19X1 and 19X0, and the related statements of income, retained earnings, and cash flows for the three years then ended, which will be included in a Form S-1,* registration statement. The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the creation and maintenance of internal control and proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion or we are otherwise unable to comply with the requirements of Form S-1, we will discuss the reasons with you in advance. A report will not be issued for this engagement if we are unable to finish the audit.

We will conduct our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We also will audit the financial information included in the schedules required by Regulation S-X of the SEC.

Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and banks. At the conclusion of our audit, we will request certain written representations from you about the financial statements and related matters.

We will also fulfill the portion of the underwriter's agreement directed to the independent accountants, provided the requirements are within the purview of Statement on Auditing Standards No. 72, *Letters for Underwriters and Certain Other Requesting Parties* (as amended by Statement on Auditing Standards No. 76), issued by the American Institute of Certified Public Accountants, and provided the material can properly be reported on by accountants pursuant to that Statement. In this regard, we require a copy of the tentative underwriting contract as soon as it is available.

Subsequent to issuance of our auditor's report, we will perform certain procedures required by Statement on Auditing Standards No. 37, *Filings Under Federal Securities Statutes*, issued by the American Institute of Certified Public Accountants, regarding execution of consent letters required for certain SEC filings. In connection therewith, all printer's proofs of reports to be filed with the Securities and Exchange Commission are to be submitted to us for review. This requirement extends to the entire registration statement and all other material that accompanies the financial statements.

---

* This should be modified to agree with the particular form to be filed.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Our audit is designed to provide reasonable assurance of detecting misstatements that, in our judgment, could have a material effect on the financial statements taken as a whole. Consequently, our audit will not necessarily detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. The Company's management is responsible for establishing and maintaining a sound system of internal control, which is the best means of preventing or detecting errors, fraudulent financial reporting, and misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention.

As part of our engagement for the years ending December 31, 19X0 and 19X1, we will review the federal and state income tax returns for Special Eyeglasses Company, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

Our audit cannot be relied upon to disclose significant deficiencies in the design or operation of internal control ("reportable conditions"). Nevertheless, we will communicate to you all reportable conditions and potential areas for improvement that we become aware of during the course of our audit.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from $XX,XXX to $XX,XXX.

The working papers for this engagement are the property of Bellarmine, Perricone & Company and constitute confidential information. However, we may be requested to make certain working papers available to _____ [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such working papers will be provided under the supervision of Bellarmine, Perricone & Company personnel. Furthermore, upon request, we may provide photocopies of selected working papers to _____ [*name of regulator*]. The _____ [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.[1]

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Responsibilities of client's personnel in preparation for engagement	Trial balance of G/L and completion of schedules, a list of which we will submit two weeks before beginning of engagement
Reports to be addressed to	Board of Directors (twelve copies)
Financial statements to be audited	Balance sheet at March 31, 19XX and statements of income, retained earnings, shareholders' equity and cash flows for year ended March 31, 19XX
Nature of engagement	Opinion audit and review of federal and state income tax returns for year ended March 31, 19XX
Date audit to commence	Approximately April 24, 19XX (check with controller about April 10)
Estimated time required	About three weeks
Staff requirements	Manager, supervisor, an in-charge senior, and two staff assistants
Billing arrangements	Every two weeks, at standard plus out-of-pocket costs; invoices to attention of Bob Wesley; payable on presentation
Special accounting problems	Client was involved in a substantial sale and lease-back transaction during the year Imputed interest may be required on long-term liabilities resulting from purchase of business
Other comments	Client is presently negotiating with machinists' union

.08 Audit of Personal Financial Statements

[*Firm's Letterhead*]

[*Date*]

_____

_____

_____

This letter will confirm my (our) understanding of the terms and objectives of my (our) engagement and the nature and limitations of the services we will provide.

We will perform the following services:

- I (We) will audit the statement of financial condition of _____ [*client's name*] as of [*statement of financial condition date*], (and the related statement of changes in net worth for the _____ [*period*] then ended) for the purpose of expressing an opinion on them. The financial statements are the responsibility of _____ [*client's name*]. Encompassed in that responsibility is the creation and maintenance of proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. My (Our) responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. A report will not be issued for this engagement if we are unable to finish the audit.

- I (We) will conduct our audit in accordance with generally accepted accounting standards. Those standards require that (I) we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures included in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. It also includes assessing the accounting principles used and significant estimates made by _____ [*client's name*], as well as evaluating the overall financial statement presentation.

- My (Our) audit is designed to provide reasonable assurance of detecting misstatements that, in our judgment, could have a material effect on the financial statements taken as a whole. Consequently, my (our) audit will not necessarily detect all misstatements that might exist due to error, fraudulent financial reporting, or misappropriation of assets. _____ [*client's name*] is responsible for establishing and maintaining a sound system of internal control, which is the best means of preventing or detecting errors, fraudulent financial reporting, and misappropriation of assets. We will inform you of all matters of fraud and material errors, and all illegal acts, unless they are clearly inconsequential, that come to our attention.[1]

- Our report on the financial statements is presently expected to read as follows:

  [Standard Audit Report]

- As part of my (our) engagement for the year ending _____ [*statement of financial condition date*], I (we) also will prepare the federal and state income tax returns for _____ [*client's name*].

---

[1] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ruling No. 94 under AICPA Rule of Conduct 101 [ET section 191.188 and .189] states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held entities also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter.

- If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.
- My (Our) fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. Our initial fee estimate assumes no unexpected circumstances will be encountered. I (We) will notify you immediately of any circumstances I (we) encounter that could significantly affect my (our) initial estimate of total fees, which will range from $XX,XXX to $XX,XXX.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

I (We) appreciate the opportunity to serve you and trust that my (our) association will be a long and pleasant one.

Sincerely,

_____

Internal Control

The material included in these sections on internal control is presented for illustrative purposes only. The comments and illustrations are neither all inclusive nor are they prescribed minimums. They are intended as conveniences for users of this manual who may want assistance when developing materials to meet their individual needs.

This manual is a nonauthoritative kit of practice aids and, accordingly, these sections on internal control do not include extensive explanation or discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate.

AAM Section 4100
Introduction

Overview

.01 On every audit, the auditor is required to obtain an understanding of internal control sufficient to plan the audit. A "sufficient" understanding means you should determine how internal controls are designed and whether they have been placed in operation.

.02 Statement on Auditing Standards (SAS) No. 55 (AU section 319), as amended, provides a framework to help you obtain your understanding of internal control. This framework breaks internal control into five components as identified in AAM section 4200.03, which in turn are linked to entity objectives. When planning the audit, you should obtain an understanding of each of the five internal control components that relate to objectives relevant to the audit.

.03 Your understanding of internal control is used to—

- Identify types of potential misstatement.
- Consider factors that affect the risk of material misstatement.
- Design substantive tests.

.04 Your understanding of a client's internal control should be based on your previous experience with the client and the following:

- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

.05 Once you obtain an understanding of the design of controls and whether it has been placed in operation, you should develop an overall audit strategy at the assertion level that is generally based on one of the following planned control risk assessments:

- *Control risk at or slightly below the maximum.* This will result in a primarily substantive approach to auditing the assertion. In entities where significant information is transmitted, processed, maintained, or accessed electronically, the ability to perform entirely substantive procedures may be absent or ineffective. In those cases, additional tests to determine the operating effectiveness of controls surrounding the electronic environment are necessary.
- *Control risk below the maximum.* This will require additional tests to determine the operating effectiveness of specified controls, but in return, you will be able to modify the nature, timing, and extent of substantive audit procedures.

.06 AAM section 3125 provides a more detailed description of how to consider internal control at the planning phase of an audit.

.07 The following sections provide additional guidance on how you should consider internal control.

- *AAM section 4200—Internal Control Framework.* This section provides more detail on the internal control framework described in SAS No. 55 (AU section 319), as amended.

- *AAM section 4300—Illustrative Internal Control Forms—Small Business.* The forms in this section serve two purposes: (1) to help you perform the procedures necessary to understand internal control, and (2) to document that understanding. This section is to be used for small business entities.
- *AAM section 4400—Illustrative Internal Control Forms—Medium to Large Business.* These forms are similar to the ones provided in AAM section 4300, except geared to medium to large businesses.
- *AAM section 4500—Flowcharting.* This section provides examples of how you might document your understanding of internal control using flowcharting techniques.
- *AAM section 4600—Assessing Control Risk Below the Maximum.* This section provides guidance on the procedures to be performed when you plan a control risk assessment below the maximum for a specific assertion.

AAM Section 4200
Internal Control Framework

Introduction

.01 As described in AAM section 3125, Statement on Auditing Standards (SAS) No. 55 (AU section 319), as amended, provides a framework to help you obtain an understanding of internal control. That framework is built on two concepts: objectives and components.

.02 An *objective* is what the entity is trying to achieve. Generally, an entity tries to achieve objectives in the following three categories:

- Reliability of financial reporting
- Effectiveness and efficiency of operations
- Compliance with applicable laws and regulations

.03 For each of these objectives, internal control consists of the following five interrelated components:

- *Control environment,* which sets the tone of an organization and influences the control consciousness of its people. It is the foundation for all other components of internal control and provides discipline and structure.
- *Risk assessment,* which is the entity's identification and analysis of relevant risks to achievement of its objectives. It forms a basis for determining how the risks should be managed.
- *Control activities,* which are the policies and procedures that help ensure management directives are carried out.
- *Information and communication,* which are the identification, capture, and exchange of information in a form and time frame that enables people to carry out their responsibilities.
- *Monitoring,* which is a process that assesses the quality of internal control performance over time.

.04 Although an entity's internal control addresses objectives referred to in AAM section 4200.02, not all of these objectives and related controls are relevant to the audit of an entity's financial statements. Generally, controls that are relevant to an audit pertain to the entity's objective of preparing reliable financial statements for external purposes. An entity may have controls that relate to operations and compliance with laws and regulations that are not relevant to an audit and therefore need not be considered.

.05 *The Jones family owns and operates several neighborhood grocery stores in Anytown. The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* ***financial reporting*** *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the* ***operations*** *objective. Each store has a small deli that prepares sandwiches and some hot foods. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the* ***compliance*** *objective of the entity.*

.06 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. If you*

were the auditor of Jones Grocery, you may wish to ask about and document these controls for client service or other purposes, but since these controls are not relevant to the audit, you are not required to do so.

.07 However, if controls relating to operations and compliance objectives pertain to data you evaluate or use in applying auditing procedures, then they may be relevant to the audit.

.08 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she should obtain an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting data about those transactions are entered into and flow through the financial reporting system
- The files that are processed
- The nature of processing involved in producing the report

.09 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.10 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or passwords for limiting access to accounts receivable data files may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. Your responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.11 The internal control framework described in SAS No. 55 (AU section 319), as amended, is only a means to help you consider the impact of an entity's internal control in an audit. Your primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, your primary concern is whether a specific control affects financial statement assertions.

.12 *Suppose you are the auditor of Jones Grocery. As on all audits, you are required to obtain an understanding of internal control sufficient to plan the audit. To achieve this, you organize your inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objectives. As a result of performing your procedures, you discover the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items? Is that considered a "monitoring" activity?*

.13 *These questions are rhetorical since the issue of how to classify a particular control is irrelevant for your purposes. As an auditor, your primary consideration is to understand how the bank reconciliations affect financial statement assertions relating to cash.*

.14 The purpose of this section is to provide guidance on each of the five components that comprise the internal control framework. This guidance should help you perform procedures to obtain an understanding of internal control. These procedures generally require the following steps:

- Understand internal control components that have a pervasive effect on the organization.
- Understand how computers are used to process significant accounting information.
- Understand control activities for significant account balances or transaction cycles.
- Assess the risk of management override and lack of segregation of duties.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Focus on the Small Business Entity

.15 This section emphasizes the audit of a small business entity. Small business entities are typically characterized by—

- A single owner or a small group of owners who manage the business on a day-to-day basis.
- A small number of employees involved in the accounting function.
- No outside board of directors or internal audit function.
- The use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.16 This section provides some guidance for the audits of medium to large businesses. Additional guidance is provided in the Audit Guide *Consideration of Internal Control in a Financial Statement Audit.*

Controls With a Pervasive Effect on the Organization

.17 Your client's control components consist of controls that either have a pervasive effect on the organization or are designed to address specific account balances and classes of transactions or activities. Initially, you should focus on the policies and procedures that have a pervasive effect on the organization.

Understanding the Control Environment

.18 The control environment sets the tone of an organization. It influences the control consciousness of its people and is the foundation for all other components of internal control. In obtaining an understanding of your client's control environment, you should try to understand the owner-manager's attitude, awareness, and actions concerning the control environment. The following paragraphs describe some factors you should consider when evaluating your client's control environment.

.19 ***Integrity and Ethical Values.*** The effectiveness of internal control cannot rise above the integrity and ethical values of the owner-manager. Integrity and ethical values are essential elements of the control environment because they affect the design, administration, and monitoring of other internal control components.

.20 Management may *tell you* a great deal about their integrity and ethical values. They may even commit their *words* to a *written document.* Responses to inquiries and written policies are good, but as an auditor you should focus on management's *actions* and how these actions affect the entity on a day-to-day basis.

.21 In order for management's integrity and ethical values to have a positive impact on the entity, the following must exist.

- The business owner and management must personally have high ethical and behavioral standards.
- These standards must be communicated to company personnel. In a small business, this communication is often informal.
- The standards must be reinforced.

.22 When observing and evaluating management's *actions* be alert for the following:

- *Segregation of personal from business funds and activities.* Many small business owners intermingle their personal and business activities, for example, the company may pay the owner's credit card bills even if they contain non-business expenditures. You should consider the owner's attitude and the care with which he or she separates the personal from the business activities. It's not unusual for a business

to pay the owner's credit card bills, but the more important question is "does the owner reimburse the company?" Owners who treat company assets as if they were personal assets set a bad example for employees who may be encouraged to do the same.

- *Dealing with signs of problems.* Consider how management deals with signs that problems exist, particularly when the cost of identifying and solving the problem could be high. For example, suppose your client became aware of a possible environmental contamination on their premises. How would they react? Would they try to hide it, deny its existence, or act evasively if asked about it, or would they actively seek out your advice or the advice of their attorney?

- *Removal or reduction of incentives and temptations.* Individuals may engage in dishonest, illegal or unethical acts simply because the owner-manager gives them strong incentives or temptations to do so. Removing or reducing these incentives and temptations can go a long way toward diminishing undesirable behavior.

  The emphasis on results, particularly in the short term, fosters an environment in which the price of failure becomes very high. *Incentives* for engaging in fraudulent or questionable financial reporting practices include—

  — Pressure to meet unrealistic performance targets, particularly for short-term results.

  — High performance-dependent rewards.

  — Upper and lower cutoffs on bonus plans.

  Temptations for employees to engage in improper practices include—

  — Nonexistent or ineffective controls, such as poor segregation of duties in sensitive areas, that offer temptations to steal or conceal questionable financial reporting practices.

  — Owner-managers who are unaware of actions taken by employees.

  — Penalties for improper behavior that are insignificant or unpublicized and thus lose their value as deterrents.

- *Management intervention.* There are certain situations where it is appropriate for management to intervene and overrule prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the financial reporting information system. You should consider whether management has provided guidance on the situations and frequency with which intervention of established controls is appropriate. Management intervention should be documented and explained.

.23 ***Commitment to Competence.*** Competence should reflect the knowledge and skills necessary to accomplish tasks that define an individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

.24 *Mrs. Jones has always kept the books for Jones Grocery. She is "self-taught," with no formal training in accounting or bookkeeping. There are no plans to replace Mrs. Jones with someone more "qualified." As the auditor of Jones Grocery you recognized the risk of having an untrained bookkeeper and design your audit approach to address such concerns by—*

- *"Training" Mr. and Mrs. Jones to call you whenever they have a transaction out of the ordinary.*
- *Strongly encouraging Mrs. Jones to take training classes on her accounting software package. (She has.)*
- *Explaining to Mrs. Jones the importance of key accounting records such as the accounts payable subledger and inventory reports.*

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- *Teaching Mrs. Jones important basic control functions such as bank reconciliations.*

.25 ***Management's Philosophy and Operating Style.*** Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include—

- The owner-manager's approach to taking and monitoring business risks.
- Attitudes and actions toward financial reporting and tax matters.
- Emphasis on meeting budget, profit, and other financial and operating goals.

.26 Management's philosophy and operating style have a significant influence on the control environment, particularly in a small business where the owner-manager dominates the organization, regardless of the consideration given to the other control environment factors. For example, you may be concerned about your client's unduly aggressive attitude toward financial reporting. Not only might this cause you to assess control risk at the maximum for some or all assertions, but it may heighten concerns about irregularities affecting certain assertions.

.27 However, a dominant owner-manager does not necessarily cause you to assess control risk at the maximum.

.28 *Mr. Jones dominates the management of Jones Grocery. He demonstrates a positive attitude toward the control environment and a moderate to conservative attitude toward accepting business risk such as expansion. He is more concerned about taxes than financial reporting. Mr. Jones uses information generated by the financial reporting information system to monitor the financial results of the company and compare it to prior periods. His review of the accounting reports encourages Mrs. Jones and others who help with the accounting to work with greater care. Mr. Jones also performs many control activities himself, such as the review and supervision of the physical inventory counts. Although Mr. Jones is concerned about his income tax liability, you might not view the possible bias to misstate income as a significant risk because of the otherwise positive control environment.*

.29 ***Organizational Structure.*** Your client's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and monitored.

.30 Significant aspects of establishing an organizational structure include considering key areas of authority and responsibility and appropriate lines of reporting. Small business entities usually have fairly simple organizational structures. A highly structured organization with formal reporting lines and responsibilities may be appropriate for large entities, but for a small business, this type of structure may impede the necessary flow of information.

.31 ***Assignment of Authority and Responsibility.*** The assignment of authority and responsibility includes the following:

- The establishment of reporting relationships and authorization procedures
- The degree to which individuals and groups are encouraged to use initiative in addressing issues and solving problems
- The establishment of limits of authority
- Policies describing appropriate business practices
- Resources provided for carrying out duties

.32 Alignment of authority and accountability often is designed to encourage individual initiatives, within limits. Delegation of authority means surrendering central control of certain business decisions to lower echelons, to the people who are closest to everyday business transactions.

.33 A critical challenge is to delegate only to the extent required to achieve objectives. This requires ensuring that risk acceptance is based on sound practices for identifying and minimizing risk, including sizing risks and weighing potential losses versus gains in arriving at good business decisions.

.34 Another challenge is ensuring that all personnel understand the entity's objectives. It is essential that each individual knows how his or her actions interrelate and contribute to achievement of the objectives.

.35 *Mr. Jones had to decide how to delegate authority and responsibility when he expanded Jones Grocery from the one, original store to its present eight-store chain spread out over Greater Anytown and the surrounding suburbs. One area that proved problematic was setting prices. Mr. Jones assumed that he would be able to set the prices at all the stores, just like he did for his original store. He felt this was a good procedure because it allowed him some control over profit margins. Problems arose because the competitive pressures were different in different areas of the city. A competitor in the North Suburb ran specials or lowered prices on certain items, while a competitor in the Western Suburb ran specials on different items. It became too difficult for Mr. Jones to keep up with the constantly changing price battles at eight different stores. He eventually delegated this responsibility to the individual store managers. He set a limit on how much a store manager could discount prices without his prior approval, but other than that, the store managers had the freedom to set prices to respond to the changing competitive environment.*

.36 *The responsibility for accounting information was also affected by Jones Grocery's expansion. Mr. Jones' original thought was that each store would be run as a separate business, with separate financial reporting information systems that would be "consolidated" together at the main store. Problems soon developed in several areas, most notably accounts payable. The store managers were responsible for entering vendor invoices into the computer system. But it seemed that no matter how much Mr. Jones threatened, cajoled, and begged his store managers to enter the invoices on a timely basis, they just couldn't do it consistently. The procedure had to be changed. Now, the store managers only have the responsibility to check incoming goods for quantity and condition. Vendor invoices are sent directly to Mrs. Jones at the main store, and she is responsible for maintaining the accounts payable for all the stores.*

.37 The control environment is greatly influenced by the extent to which individuals recognize that they will be held accountable. This holds true all the way to the owner-manager, who has the ultimate responsibility for all activities within the organization, including internal control.

.38 ***Human Resource Policies and Practices.*** Human resource policies and practices affect an entity's ability to employ sufficient competent personnel to accomplish its goals and objectives. Human resource policies and practices include an entity's policies and procedures for hiring, orienting, training, evaluating, counseling, promoting, compensating, and taking remedial action. In many small businesses, the policies may not be formalized but they should nevertheless exist and be communicated. The owner-manager can orally make explicit his or her expectations about the type of person to be hired to fill a particular job, and may even be active in the hiring process. Formal documentation is not always necessary for a policy to be in place and operating effectively.

.39 *When Mr. and Mrs. Jones added a second store, the hiring of a store manager was easy—they hired their daughter. Adding a third store proved to be more problematic, since the other Jones children had no interest in the family business. Mr. and Mrs. Jones talked at length about the type of person they would hire as a store manager. They finally decided it was more important to hire someone they could trust, someone they felt comfortable with on a personal level rather than someone with an extensive background in the grocery business. They felt they could teach someone the grocery business but not how to be trustworthy. That hiring policy worked, and they've been following it ever since.*

.40 Standards for hiring the most qualified individuals, with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity's commitment to competent and trustworthy people. Hiring practices that include formal, in-depth employment interviews and informative and insightful presentations on the company's history, culture, and operating style send a message that the company is committed to its people.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.41 Personnel policies that communicate prospective roles and responsibilities and that provide training opportunities indicate expected levels of performance and behavior. Rotation of personnel and promotions driven by periodic performance appraisals demonstrate the entity's commitment to advancement of qualified personnel to higher levels of responsibility. Competitive compensation programs that include bonus incentives serve to motivate and reinforce outstanding performance. Disciplinary actions send a message that violations of expected behavior will not be tolerated.

Other Control Components With a Pervasive Effect on the Organization

.42 Elements of other control components may have a pervasive effect on the organization. These are discussed in the following paragraphs.

.43 ***Risk Assessment.*** An entity should identify, analyze, and manage risks relevant to the preparation of reliable financial statements. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

.44 Risks relevant to financial reporting include events and circumstances that may adversely affect the company's ability to record, process, summarize, and report financial data. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations.

.45 Risks can arise or change due to circumstances such as the following:

- *Changes in the operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel.* New personnel may have a different focus on or understanding of internal control. When people change jobs or leave the company, management should consider the control activities they performed and who will perform them going forward. Steps should be taken to ensure new personnel understand their tasks.
- *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control. When these systems are changed, management should assess how the changes will impact control activities. Are the existing activities appropriate or even possible with the new systems? Personnel should be adequately trained when information systems are changed or replaced.
- *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls. Management should consider whether accounting and information systems are adequate to handle increases in volume.
- *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New lines, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *Accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

.46 Your procedures to assess whether a risk assessment process is placed in operation are generally of an inquiry nature. For example, you may ask accounting personnel what accounts they believe are the most difficult to become satisfied with as they prepare the financial statements. You may also consider asking the same questions of personnel outside the accounting department.

.47 *Control Activities.* Control activities are policies and procedures that help ensure necessary actions are taken to address risks to achieve the entity's objectives. Control activities have various objectives and are applied at various organizational and functional levels.

.48 At the entity-wide level, control activities may be categorized as policies and procedures that pertain to the following.

- *Performance reviews.* These control activities include reviews of actual performance versus budgets, forecasts, and prior-period performance. They may also involve relating different sets of data (for example, operating or financial) to one another, together with analyses of the relationships, investigating unusual relationships and taking corrective action. Performance reviews may also include a review of functional or activity performance.

- *Information processing.* A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are general controls and application controls. General controls commonly include controls over data center operations, system software acquisition and maintenance, and access security. Application controls apply to the processing of individual applications and help ensure that transactions are valid, properly authorized, and completely and accurately processed. These controls are discussed in more detail in AAM section 4200.64–.79.

- *Physical controls.* These activities encompass the physical security of assets, including adequate safeguards over access to assets and records such as secured facilities and authorization for access to computer programs and data files and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on the circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.

- *Segregation of duties.* Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or irregularities in the normal course of his or her duties. Segregation of duties is often a problem for small business entities. See AAM section 4200.106–.114 for further discussion and guidance.

.49 Ordinarily, audit planning does not require you to understand the control activities related to each account balance, transaction class, and disclosure component in the financial statements or to every assertion relevant to them. Your understanding of control activities is sufficient when you can identify types of potential misstatements, consider factors that affect the risk of material misstatement, and design substantive tests.

.50 ***Information and Communication.*** The information system relevant to financial reporting objectives—which includes the financial reporting information system—consists of the methods and records established to record, process, summarize, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets and liabilities.

.51 The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial statements. Thus, it is important that management receives the information they need to carry out their responsibilities and that the information is provided at the right level of detail.

.52 An information system encompasses methods and records that—

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Identify and record all valid transactions.
- Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
- Measure the value of transactions in a manner that permits recording of their proper monetary value in the financial statements.
- Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- Present properly the transactions and related disclosures in the financial statements.

.53 The financial reporting information system is an integral part of an entity's information and communication system. Your consideration of the system should be made at the individual account and classes of transaction level. See AAM section 4200.89–.105 for additional guidance.

.54 *Monitoring.* Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions.

.55 Examples of ongoing monitoring activities include the following:

- Communications from external parties corroborate internally generated information or indicate problems. Customers implicitly corroborate billing data by paying their invoices. Conversely, customer complaints about billings could indicate system deficiencies in the processing of sales transactions. Similarly, bankers, regulators or other outside parties may communicate with the company on matters of accounting significance.
- External auditors regularly provide recommendations on the way internal control can be strengthened. Auditors may identify potential weaknesses and make recommendations to management for corrective action.
- Employees may be required to "sign off" to evidence the performance of critical control functions. The sign-off allows management to monitor the performance of these control functions.

Application to Medium and Large Businesses

.56 The control environments of medium to large businesses may differ from those of small business entities in the following ways:

- The presence of a Board of Directors or audit committee
- The presence of an internal audit function
- More formalized policies and procedures

Board of Directors or Audit Committee

.57 The control consciousness of a medium or large business is influenced significantly by the entity's board of directors and audit committee. In general, the board of directors should have an appropriate degree of management, technical, and other expertise. It should also have the necessary stature and mind-set so that it can adequately perform the necessary governance, guidance, and oversight responsibilities.

.58 Factors that influence the effectiveness of the board or audit committee include—

- Its independence from management.

- The experience and stature of its members.
- The extent of its involvement and scrutiny of activities.
- The appropriateness of its actions.
- The degree to which difficult questions are raised and pursued with management.
- Its interaction with internal and external auditors.

.59 The board of directors must be prepared to question and scrutinize management's activities, present alternative views and have the courage to act in the face of obvious wrongdoing. Because of this it is necessary that the board contain at least a critical mass of outside directors. The number should suit the entity's circumstances, but more than one outside director normally would be needed for a board to have the requisite balance.

Internal Audit Function

.60 The internal audit function is established within an entity to monitor and evaluate the adequacy and effectiveness of internal control. For entities with an internal audit function, you ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'—

- Organizational status within the entity.
- Application of professional standards.
- Audit plan, including the nature, timing, and extent of audit work.
- Access to records and any limitations on the scope of their activities.

.61 After obtaining an understanding of the internal audit function you may either—

- Conclude that the internal auditors' activities are not relevant to the financial statement audit and give no further consideration to the internal audit function,
- Identify relevant internal auditor activities, but conclude that it would not be efficient to consider further the work of the internal auditors, or
- Decide that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of the audit. In this case, you should assess the competence and objectivity of the internal audit function as outlined in SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AU section 322).

.62 You may also request direct assistance from the internal auditors. If so, you should follow the guidance in paragraph 27 of SAS No. 65 (AU section 322.27).

Formal Policies

.63 Medium and large businesses may communicate their policies in formal, written documents. For example, they may have a written code of conduct or human resource policies. The existence of formal policy documents is good, but as an auditor, your primary consideration is how the policies are implemented.

Computer Applications

.64 Small business entities are typically characterized by the use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.65 *Jones Grocery has a stand-alone, state-of-the-art PC at its main store. One other store has a computer—an Apple Macintosh Mr. and Mrs. Jones' daughter used at college. The PC at the main store is used to run the accounting software, which is an off-the-shelf product developed specifically for independent grocers. The payroll is processed by an outside payroll service.*

.66 In gaining an understanding of how computers are used in the business, you should consider the following:

- The acquisition of hardware and software
- Physical access
- Logical access
- User controls over outsider service bureau applications

Acquisition of Hardware and Software

.67 Companies should take steps to ensure they have compatible hardware and software. The use of compatible software reduces the risk of error, since there will be no need to transfer data from one format into another. Even small businesses should have a coherent plan for the purchase of computer hardware and software. If the business is growing, management should plan for the upgrade of the processor, RAM, or hard-disk storage.

.68 *Mr. and Mrs. Jones did not plan for the purchase of their computers. For several years, Mrs. Jones processed the accounting applications on an old 286 PC with limited RAM and hard-disk storage. When the Jones' daughter opened the second store, she brought with her the Apple Macintosh she had in college. At first, she tried to transfer data from her store to the main store, but the software had problems converting from the Apple format, so the procedure was abandoned. At a trade show, Mr. Jones discovered a computer software program specifically designed for independent grocers. He was impressed with the program and decided that it fit his needs perfectly. However, his hardware was out of date, and so in order to run the software, he upgraded his hardware. The new software supposedly is able to handle Apple-formatted data, and the company has plans to transfer data from the second store electronically. There are no plans to install computers at the other stores.*

.69 *As the auditor of Jones Grocery, you should use this understanding of the company computer system to help plan the audit. For example, they plan to transfer data from the Apple to the PC. What sort of errors might occur in the transfer? What steps has the client taken to prevent or detect those errors? You also know that stores three through eight are on a manual system. What types of errors might occur in a manual system? What is the risk that those errors will occur?*

.70 Entities should also establish policies and procedures to mitigate the risk of computer viruses being introduced into their systems. Viruses can cause the loss of data and programs. A virus has the ability to attach itself to a program and infect other programs and systems. Although some viruses merely write messages across the screen, others can cause serious damage to disk files or shut down a network by replicating millions of times and filling all available memory or disk storage.

.71 Methods to prevent the introduction of viruses and to recover from a virus attack include the following:

- Obtain recognized software from reputable sources and only accept delivery of the software in the manufacturer's sealed package.
- Make multiple generations of backups. A virus that is not detected initially may be copied onto more recent backup copies, while the older versions may not be infected.
- Prohibit the use of unauthorized programs introduced by employees.

- Prohibit downloading of untested software from sources such as dial-up bulletin boards.
- Use virus protection software to screen for virus infections.

Physical Security

.72 Physical security—primarily backup and contingency planning—often is ignored by small businesses in a microcomputer environment. Poor backup procedures can result in the loss of important data that are very difficult, time-consuming and costly to recreate, if they can be recreated at all.

.73 Your clients should have established procedures for the periodic backup of data files and applications. Critical applications and files should be stored off-site with corresponding documentation in the event that on-site files become unavailable.

Logical Access

.74 Logical access to computer applications and data files may not be formally or rigorously controlled in a small business. This leaves the company exposed to the risk that files could be inappropriately manipulated or unauthorized transactions entered into the system. For example, without logical access controls a user may be able to enter any or all sections of a general ledger or other financial module and perform file maintenance such as changing the address of an accounts receivable customer or data used to calculate payroll.

.75 Management should identify confidential and sensitive data for which access should be restricted. Mechanisms such as password control or the use of menus should be used to limit the access to that data.

.76 In a microcomputer environment, password control may be installed over the operating system using a shell program to prevent the user from accessing menu options of a program. Even if such a restriction exists, a sophisticated user can often bypass the shell by using a utility. Therefore, the use of utility programs should be controlled or monitored carefully.

User Controls Over Computer Service Organization Applications

.77 Entities may use an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324).

.78 When using an outside computer service organization, most small businesses typically retain the responsibility for authorizing transactions and maintaining the related accountability. The computer service organization merely records user transactions and processes the related data. In these circumstances, the user (the small business) should maintain controls over the input and output to prevent or detect material misstatement.

.79 *Jones Grocery uses an outside computer service to process payroll. Time cards are gathered for each store and reviewed by the store manager before being sent to the main store. Mrs. Jones reviews the time cards for the store managers and checks to make sure all personnel have submitted time cards for the pay period. All other payroll transactions such as pay rates, withholdings, etc. are sent directly to Mrs. Jones. She forwards all information to the payroll service, which prepares the checks and produces a payroll register. Mrs. Jones reviews the register and checks for any obvious misstatements, before she distributes the checks.*

Application to Medium or Large Businesses

.80 Medium and large businesses typically have more complicated computer processing systems than small businesses. They also tend to use the computer for a greater amount of processing. For example, a small

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

business may prepare customer invoices manually by looking up prices on a master price list. A medium size business may maintain master price information on a computer file and use the computer to generate packing slips, sales invoices, and reports of unmatched documents.

.81 Medium and large businesses are also typically characterized by a separate management information services (MIS) department with formally defined job descriptions and responsibilities.

.82 Instead of using off-the-shelf, unmodified software, the medium or large business will modify standard software or develop their own applications. Their software may be more complicated than that used by the small business; for example, they may use a database management system or telecommunications software.

.83 Medium and large businesses often use a mainframe computer in conjunction with microcomputers or a local area microcomputer network. Information is frequently transferred between the mainframe and microcomputers that may be located on-site or at a remote location.

.84 Control activities in a computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up
- Computer general control activities

.85 ***User Controls.*** User control activities are manual checks of the completeness and accuracy of computer output against source documents or other input. For example, an entity may have programmed procedures in a billing system that calculate sales invoice amounts from shipping data and master-price files. The entity may also have a procedure to manually check the completeness and accuracy of the invoices. In many systems, user controls relate only to the completeness of records and not to the accuracy of processing.

.86 ***Programmed Control Activities and Manual Follow-up Activities.*** Programmed control activities are those that are built into the computer processing program; for example, the generation of an exception report. However, an exception report is useless unless the client follows up on the items listed. Thus, in addition to understanding the nature of the programmed control activities, you also need to understand the related manual follow-up procedures.

.87 ***Computer General Control Activities.*** If computer general control activities operate effectively, there is greater assurance that programmed control activities are properly designed and function consistently throughout the period. You may plan to understand computer general control activities to provide evidence that—

- Programs are properly designed and tested in development.
- Changes to programs are properly made.
- Computer operations ensure the proper use of application programs and data files.
- Adequate access controls reduce the risk of unauthorized changes to the program and data files.

.88 The following table summarizes computer general control activities.

Area	*Control Objectives*	*Example Controls*
Program Development	• Controls ensure that new applications systems are suitably authorized, designed, and tested	• Users are involved in the design and approval of systems • Checkpoints where users review the completion of various phases of the application • Development of test data and testing of the program • User involvement in the review of tests of the program • Adequate procedures to transfer programs from development to production libraries
Program Changes	• Controls over changes to existing programs and systems ensure that modifications to application programs are suitably approved, designed, tested, and implemented	• Same as systems development • User involvement • Adequate testing • Adequate transfer activities • Segregation of duties between programmers and production libraries
Computer Operations	• Controls ensure that application programs are used properly and that proper data files are used during processing	• Review of lists of regular and unscheduled batch jobs by operations management • Use of menu-driven job control instruction sets • Jobs executed only from the operator's terminal • Adequate procedures for managing and backing up data and program files
Access	• Controls should prevent or detect unauthorized changes to programs and to data files supporting the financial statements	• Programmers have limited access to production programs, live data files, and job control language • Operators have limited access to source code and individual elements of data files • Users have access only to defined programs and data files

Obtaining an Understanding of Significant Account Balances and Transaction Cycles

.89 You should obtain an understanding of the classes of transactions in your client's operations that are significant to the financial statements. For less significant classes of transactions or account balances, an understanding of controls that have a pervasive effect on the organization is usually sufficient.

.90 For significant transactions and account balances you should obtain an understanding of—

- How those transactions are initiated.
- The records, supporting documents, computer media, and specific accounts in the financial statements involved in the processing and reporting of transactions.
- The accounting processing involved from the initiation of a transaction to its inclusion in the financial statements, including how the computer is used to process data.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.91 ***Initiating Transactions.*** You should understand how transactions are initiated. Some transactions may be initiated by customers or others outside the entity. Other transactions may be initiated from inside the organization by the use of a computer program; for example, calculating depreciation expense.

.92 *At Jones Grocery, sales are initiated by customers and recorded in the cash register. At the end of the day the cash register totals are reconciled to the cash on hand, and a deposit is prepared for the day's receipts. On a weekly basis, the daily cash register tapes are batched for each store, forwarded to Mrs. Jones, and entered into the computer. The computer generates a sales register, a sales analysis report, and posts the sales totals to the general ledger.*

.93 ***Accounting Records, Supporting Documents, Computer Media, and Specific Accounts.*** In general you will want to identify the following for your client's significant accounts and transactions:

- Source documents
- The conversion of documents to computer media
- The nature of computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.94 Your client's accounting systems may create many documents, files, and reports that are useful for managing the organization, but you need to understand only those aspects that are relevant to the financial statements.

.95 *At Jones Grocery, the sales analysis report described in AAM section 4200.92 is used for management information and analysis. The documents and reports relevant to the financial statements are the daily cash register tapes and the computer-generated sales register.*

.96 ***Accounting Processing.*** You should obtain an understanding of how your client processes accounting information—from the initiation of the transaction to its inclusion in the financial statements. This understanding should include how the computer is used to process data. Your understanding involves knowledge of the ways in which transactions are valued, classified, and summarized in data files, journals, or ledgers. For some transactions, there may be several significant processing activities and accounting records, including the use of computer programs. Other transactions may involve only limited processing activities performed manually.

.97 *At Jones Grocery, the processing of inventory transactions (receipt of goods, sales, spoilage, etc.) involves several processing activities that are linked in the inventory module of the software package. On the other hand, recording depreciation expense is fairly simple. Fixed assets and the related depreciation are maintained on a computer spreadsheet, and each month, Mrs. Jones prepares a journal entry to record depreciation.*

.98 Understanding the accounting processing also involves understanding the information used for processing and when processing occurs. For example, when considering the completeness assertion, you normally should understand whether transactions entered into the computer system are processed immediately or in batches and how frequently batches are processed.

.99 The processing of accounting information may involve "end user computing." End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person.

.100 *Mrs. Jones developed and maintains the fixed asset spreadsheet that serves as the source document for her monthly depreciation expense journal entry.*

.101 In general, the product of end user computing may be used to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, the fixed-asset spreadsheet is separate from the Jones Grocery general ledger software package.
- Make significant accounting decisions. For example, a spreadsheet application may be used to generate information used to write down inventory.
- Accumulate footnote information. For example, a spreadsheet may be used to calculate the five-year debt maturity disclosure.

.102 Generally, end users have no training in the formal computer application development process. Accordingly, applications developed by end users are often inadequately tested, and the development process is often not documented. This situation can cause significant difficulties for an organization if the end user computing application is critical to making business or financial decisions.

.103 The access to end user computing applications may also be an audit concern. Many computer applications used in end user computing come with on-line systems that are capable of restricting users to specific applications, specific departments, or even specific fields. Often, however, these access restrictions facilities are not implemented.

.104 To address these concerns and to ensure the end user applications process data completely and accurately, you should generally look for control policies and procedures that—

- Require all significant end user applications to be adequately tested before use.
- Prescribe documentation standards for significant end user applications.
- Provide for adequate access controls to data.
- Provide a mechanism to prevent or detect the use of incorrect versions of data files.
- Provide for appropriate applications controls, for example, edit checks, range tests, or reasonableness checks.
- Support meaningful user reconciliations.

.105 ***Financial Reporting Process.*** When gaining an understanding of the financial reporting process, you may determine the extent of client procedures to prepare accounting estimates (when significant accounting estimates are called for) and information for significant disclosures. You also should understand the way in which general ledger information is summarized to determine how the amounts and disclosures are reported in the financial statements.

Segregation of Duties and Management Override

.106 Small businesses are typically characterized by—

- A dominant owner-manager.
- A lack of segregation of duties.

.107 If your client has these characteristics, you should be sure to address the risks they pose to the entity.

.108 In general, duties should be divided, or segregated, among different people to reduce the risk of error or inappropriate actions. For instance, responsibilities for authorizing transactions, recording them, and handling the related assets should be divided.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.109 Even small businesses with only a few employees can usually parcel out responsibilities to achieve the necessary checks and balances. If that is not possible—as may occasionally be the case—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. Thus, a dominant owner-manager may be a positive element in the design of internal controls.

.110 A dominant owner-manager may be a negative element in the design of internal control when he or she is able to override established policies and procedures.

.111 Management *override* should be distinguished from management *intervention*. Management *intervention* is discussed in AAM section 4200.22 and is described as the overrule of internal control for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the system.

.112 In contrast, management *override* is the overrule of internal control for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

.113 An owner-manager might override the control system for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

.114 When gaining an understanding of internal control, you should assess the risk of management override.

Assessing Internal Control Strengths and Weaknesses

.115 When obtaining your understanding of internal control, you should consider the *collective* effect of strengths and weaknesses in various control environment factors. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by top management to overstate earnings.

.116 Internal control strengths may indicate account balances, transaction classes or assertions where you can assess control risk below the maximum. See additional guidance in AAM section 4600. Internal control weaknesses usually indicate areas where a primarily substantive audit approach is required. However, in situations where electronic evidence (information transmitted, processed, maintained, or accessed by electronic means) is significant, testing of the related internal control generally will be necessary to obtain competent evidential matter.

.117 In rare circumstances, your understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause you to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity's records may cause you to conclude it is unlikely that sufficient competent evidential matter will be available to support an opinion on the financial statements.

.118 If you determine the entity is unauditable, you should consider withdrawing from the engagement.

[*The next page is 4301.*]

AAM Section 4300

Illustrative Internal Control Forms—Small Business

.01 The following are illustrative internal control forms you might use to document your understanding of internal control sufficient to plan an audit. The illustrative questions are numbered merely for organizational purposes. The numbers are in no way intended to infer completeness or a preferred sequence. These forms may require modifications to meet the needs, preferences and circumstances of individual firms and their clients. Whenever you use standardized forms, checklists, or questionnaires, you should recognize that important matters in a particular set of circumstances may not be covered.

Instructions

.02 The forms in AAM sections 4310 and 4320 may be used on all small business audit engagements. Small businesses are typically characterized by—

- A single owner or a small group of owners who manage the business on a day-to-day basis.
- A small number of employees involved in the accounting function.
- No outside board of directors or internal audit function.
- The use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.03 If your client does not have the characteristics of a small business, you should consider completing the internal control forms for medium to large businesses located in AAM section 4400.

.04 In every audit, you should obtain an understanding of each of the components of internal control sufficient to plan the audit. These forms should be used as a tool in documenting your understanding of internal control, how internal controls for your client are designed, and whether they have been placed in operation.

.05 These forms should be used in conjunction with other forms in certain circumstances:

- *Control Environment Checklist—Small Business Computer Applications* [AAM section 4310]. To be used whenever the client uses microcomputers or outside service organizations to process significant accounting information.
- *Financial Reporting Information Systems and Controls Checklist* [AAM section 4320]. To be used for each significant account and transactions cycle.

.06 These forms are appropriate whenever you plan a primarily substantive audit approach (see paragraph .08 below). That is, their completion generally results in control risk being assessed at or slightly below the maximum for all assertions related to account balances and transactions.

.07 If you plan a lower control risk assessment for certain assertions you are required to—

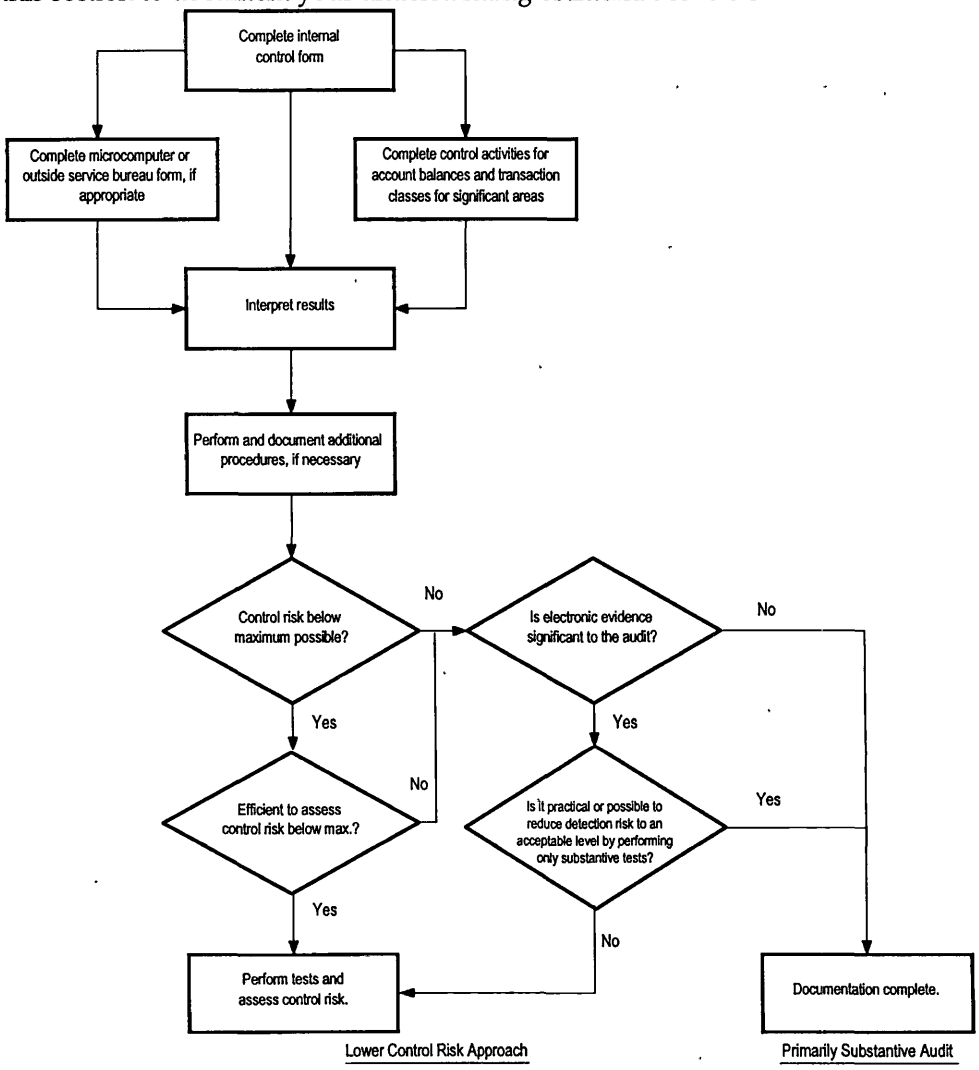
- Identify specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions, and

- Perform tests of controls to evaluate their effectiveness.

.08 In situations where a significant amount of audit evidence is transmitted, processed, maintained, or accessed electronically, it generally will be necessary to test the internal control surrounding the electronic evidence (for example, controls over generation, storage, manipulation, and transmission), even if a primarily substantive audit approach is followed. This is because the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. In these situations the auditor should perform tests of controls to gather evidence to support an assessed level of control risk below the maximum for affected assertions. If the auditor concludes control risk must be assessed at the maximum in such situations or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the scope limitation.

.09 These forms are organized to conform to the control components and overall internal control framework described in the Audit Guide *Consideration of Internal Control in a Financial Statement Audit*. This framework is only a way for you to consider the impact of internal control on an audit. The classification of any specific control into a particular component should not be your primary concern. Rather, your primary consideration is whether a specific control affects financial statement assertions.

.10 The following flowchart describes how this form can be used in conjunction with the other forms included in this section to document your understanding of internal controls.



Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Interpreting the Results

.11 When obtaining an understanding of internal control, you should consider the *collective* effect of the strengths and weaknesses in various control components. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by the owner-manager to overstate earnings.

.12 Answers that fall toward the right side of the form ("Strongly Agree" or "Somewhat Agree") indicate areas of strength in the control environment. You should consider whether these areas of strength indicate that a control risk assessment below the maximum may be possible for some assertions.

.13 Answers that fall toward the left side of the form ("Strongly Disagree" or "Somewhat Disagree") indicate areas of weakness in the entity's internal controls. You should assess how these areas of weakness affect the planning of the audit. This assessment should be documented in section V of the form. In making this assessment, you normally focus on—

- The types of material misstatements that could occur as a result of the identified weakness, and
- The risk that those misstatements will occur.

Documenting a Conclusion

.14 After completing this form, the Financial Reporting Information Systems and Controls Checklist for significant areas, and the Control Environment Checklist—Microcomputers and Outside Service Bureaus, you should document your conclusion regarding internal control. In order to perform a primarily substantive audit, you must understand the entity's internal control sufficiently—

- To assess the risk of material misstatement in assertions related to material financial statement components, and
- To design effective substantive procedures.

.15 If the completion of this form is not sufficient for you to obtain the necessary level of understanding listed in AAM section 4300.13, you should perform and document the results of additional tests to gain that level of understanding.

.16

I. Document Your Understanding of the Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
A. Control Environment Factors					
Integrity and Ethical Values					
1. The business owners and management have high ethical and behavioral standards.	____	____	____	____	____
2. Management has communicated (either formally through written policies or informally by its own behavior) the ethical and behavioral standards for the entity.	____	____	____	____	____
3. The owner effectively segregates personal funds, income, and expenses from those of the business.	____	____	____	____	____
4. Management reinforces its ethical and behavioral standards.	____	____	____	____	____
5. Management appropriately deals with signs that problems exist (e.g., defective products or hazardous waste) even when the cost of identifying and solving the problem could be high.	____	____	____	____	____
6. Management has removed or reduced incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts.	____	____	____	____	____
For example, there is generally *no*—					
• Pressure to meet unrealistic performance targets.	____	____	____	____	____
• High performance-dependent rewards.	____	____	____	____	____
• Upper and lower cutoffs on bonus plans.	____	____	____	____	____
7. Management has provided guidance on the situations and frequency with which intervention of established controls is appropriate.	____	____	____	____	____
8. Management intervention is documented and explained appropriately.	____	____	____	____	____
Commitment to Competence					
9. Management has appropriately considered the knowledge and skill levels necessary to accomplish financial reporting tasks.	____	____	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
10. Employees with financial reporting tasks generally have the knowledge and skills necessary to accomplish those tasks.					
Management's Philosophy and Operating Style					
11. Management moves carefully, proceeding only after carefully analyzing the risks and potential benefits of accepting business risks.					
12. Management is generally cautious or conservative in financial reporting and tax matters.					
13. There is relatively low turnover of key personnel.					
14. There is *no* undue pressure to meet budget, profit, or other financial and operating goals.					
Organizational Structure					
15. The entity has defined, either formally or informally, key areas of authority and responsibility.					
16. The entity has defined, either formally or informally, appropriate lines of reporting.					
Assignment of Authority and Responsibility					
17. Authority and responsibility are delegated only to the degree necessary to achieve the company's objectives.					
18. Proper resources are provided for personnel to carry out their duties.					
19. Personnel understand the entity's objectives and know how their individual actions interrelate and contribute to those objectives.					
20. Personnel recognize how and for what they will be held accountable.					
Human Resource Policies and Practices					
21. The entity generally hires the most qualified people for the job.					

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
22. Hiring practices emphasize educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior.					
23. Hiring practices include formal, in-depth employment interviews.					
24. Prospective employees are told of the entity's history, culture and operating style.					
25. The entity provides training opportunities, and employees are well-trained.					
26. Promotions and rotation of personnel are based on periodic performance appraisals.					
27. Methods of compensation, including bonuses, are designed to motivate personnel and reinforce outstanding performance.					
28. Management does not hesitate to take disciplinary action when violations of expected behavior occur.					
B. Other Internal Control Components With a Pervasive Effect on the Organization					
Risk Assessment					
1. Special action is taken to ensure new personnel understand their tasks.					
2. Management appropriately considers the control activities performed by personnel who change jobs or leave the company.					
3. Management assesses how new accounting and information systems will impact internal control.					
4. Management reconsiders the appropriateness of existing control activities when new accounting and information systems are developed and implemented.					
5. Employees are adequately trained when accounting and information systems are changed or replaced.					

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
6. Accounting and information system capabilities are upgraded when the volume of information increases significantly.					
7. Accounting and data processing personnel are expanded as needed when the volume of information increases significantly.					
8. The entity has the ability to reasonably forecast operating and financial results.					
General Control Activities					
9. The entity prepares operating budgets and cash flow projections.					
10. Operating budgets and projections lend themselves to effective comparisons with actual results.					
11. Significant variances between budgeted or projected amounts and actual results are reviewed and explained.					
12. The company has adequate safekeeping facilities for custody of the accounting records such as fireproof storage areas and restricted access cabinets.					
13. The entity has a suitable record retention plan.					
14. Periodically, personnel compare counts of assets to amounts shown on control records.					
15. There is adequate segregation of duties among those responsible for authorizing transactions, recording transactions, and maintaining custody of assets.					
Information and Communication					
16. Management receives the information they need to carry out their responsibilities.					
17. Information is provided at the right level of detail for different levels of management.					
18. Information is available on a timely basis.					

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
19. Information with accounting significance (for example, slow paying customers) is transmitted across functional lines in a timely manner.	_____	_____	_____	_____	_____
Monitoring					
20. Customer complaints about billings are investigated for their underlying causes.	_____	_____	_____	_____	_____
21. Communications from bankers, regulators, or other outside parties are monitored for items of accounting significance.	_____	_____	_____	_____	_____
22. Management responds appropriately to auditor recommendations on ways to strengthen internal controls.	_____	_____	_____	_____	_____
23. Employees are required to "sign off" to evidence the performance of critical control functions.	_____	_____	_____	_____	_____

II. Determine Other Areas for Evaluation

The completion of section I of this form is the first of several forms that may be used to document your understanding of internal control sufficiently to plan a primarily substantive audit. It is important to remember that in entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of the controls surrounding the electronic environment may not be enough. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gain competent evidential matter—even in a primarily substantive approach. In the space provided below, determine which of the following areas apply. A "Yes" answer generally indicates you should complete the related form.

	No	*Yes*	*W/P Ref.*
Microcomputers or Outside Service Bureaus			
1. The company uses microcomputers or outside computer service bureaus to process significant accounting information.	____	____	
If "yes," the Control Environment Checklist—Small Business Computer Applications can be found at—			_____
Significant Account Balances and Transaction Cycles			
2. The following account balances or transaction cycles are significant to the company's financial statements.			
a. Revenue cycle, including sales, accounts receivable, or cash receipts. (Normally considered significant for most small businesses.)	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

		No	Yes	W/P Ref.
b.	Purchasing cycle, including purchasing, accounts payable, or cash disbursements. (Normally considered significant for most small businesses.)	___	___	
	If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
c.	Inventory, including inventory and cost of sales.	___	___	
	If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
d.	Financing, including investments and debt.	___	___	
	If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
e.	Property, plant, and equipment, including fixed assets and depreciation.	___	___	
	If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
f.	Payroll.	___	___	
	If "yes," the related Financial Reporting Information Systems and Controls checklist can be found at —			_____

III. Assess Segregation of Duties

An appropriate segregation of duties often appears to present difficulties in small business organizations, at least on the surface. Even companies that have only a few employees, however, can usually parcel out their responsibilities to achieve the necessary checks and balances. But if that is not possible—as may occasionally be the case—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. For example, it is not uncommon, where there is a risk of improper cash payments, for the owner-manager to be named the only authorized check signer, or to require that monthly bank statements be delivered unopened directly to him or her for review of paid checks. In the space provided below, assess the segregation of duties for the company based on the completion of sections I and II of this form. Your comments should address—

- The person with incompatible responsibilities and the nature of those responsibilities.
- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of a lack of segregation of duties and the type of those misstatements.
- How substantive procedures will be designed to limit the risk of those misstatements to an acceptable level.

IV. Assess the Risk of Management Override

Even in effectively controlled entities—those with generally high levels of integrity and control consciousness—a manager might be able to override controls. The term "management override" means—

> Overruling prescribed policies or procedures for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

An owner-manager might override controls for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

Management override is different from management intervention, which is the overrule of prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the system.

In the space below, assess the risk of management *override* for this company. You should consider the risk that management override possibilities exist, the risk that management will take advantage of those possibilities, and any evidence that management has engaged in override practices. If the risk of management override is greater than low, indicate how planned audit procedures will reduce this risk to an acceptable level.

V. Interpret Results

You should consider the *collective* effect of the strengths and weaknesses in various control components. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by the owner-manager to overstate earnings.

A. Areas That May Allow for Control Risk to Be Assessed Below the Maximum

Based on the completion of sections I through IV of this form you may have become aware of certain accounts, transactions and assertions where it may be possible and efficient to plan a control risk assessment below the maximum. In the area below, document those accounts, transactions, and assertions and the related tests of controls.

Accounts, Transactions, and Assertions	*Test of Controls Working Paper Reference*

B. Areas of Possible Control Weakness

Based on the completion of sections I through IV of this form you may have become aware of certain areas that may indicate possible control weaknesses, *not including those areas relating to segregation of duties and management override documented in sections III and IV.*

In the space provided below, document those areas of possible weakness and the impact the identified weakness will have on the audit. Discuss—

- The nature of the identified possible weakness.
- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of the weakness and the type of those misstatements.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- How substantive procedures will be designed to reduce the risk of those misstatements to an acceptable level.

VI. Document Your Conclusion With Respect to Internal Controls

Control Environment Checklist—Small Business Computer Applications

.01 This questionnaire may be used to document your understanding of the way computers are used in the information and communication systems of a small business. This questionnaire should be used when the client uses either or both of the following to process significant accounting information.

- Microcomputers and off-the-shelf, unmodified software
- Outside computer service bureaus

.02

I. Microcomputer Hardware

Complete the form on the next page to describe the company's microcomputer hardware; for example:

CPU Model/Make:	Digital Starion 942
Processor:	133 MHZ Pentium
RAM:	16 MB
Hard-Disk Storage:	1600 MB
Operating System:	Windows 95 and DOS
Peripherals:	Dedicated printer

_____			

III. Other Microcomputer Software

List the other software products used by the company.

	Name and Version
Spreadsheet	
Word processing	
Database management	
Communications	
Other:	

IV. Local Area Network

If the company processes significant financial information in a local area network (LAN) environment, consider attaching a description of the LAN configuration, including the location of the server and workstations. Describe the following:

	Name and Version
Operating system	
Network software	
Network management software	

V. Microcomputer Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
Acquisition of Hardware

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
13. Back-up procedures include multiple generations.					
14. Back-up files are stored in a secure, off-site location.					
Logical Access					
15. Management has identified confidential and sensitive data for which access should be restricted.					
16. Procedures are in place to restrict access to confidential and sensitive data.					
17. Procedures are in place to reduce the risk of unauthorized transactions being entered into processing.					
18. The use of utility programs is controlled or monitored carefully.					
General Operations					
19. Clear job descriptions exist for the use of microcomputers.					
20. Management periodically assesses the training needs for personnel who use microcomputers to process significant accounting information.					
21. Personnel who use microcomputers to process significant accounting information are adequately trained.					

VI. Outside Computer Service Organizations

This section should be used to document your understanding of how the company uses an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324).

1. List the name of the service organization and the general types of services it provides.

2. Are the general ledger and other primary accounting records processed by an outside service organization?_____Yes_____No

   If yes, describe the source documents provided to the service organization, the reports and other documentation received from the organization, and the controls maintained by the user over input and output to prevent or detect material misstatement.

   _____

   _____

   _____

   _____

3. List the type and date of the most recent service auditor's report.

   _____

   _____

   _____

AAM Section 4320

Financial Reporting Information Systems and Controls Checklist—Small Business

Revenue Cycle

Revenue, Accounts Receivable, and Cash Receipts

.01 This checklist may be used on any small business audit engagement when the revenue cycle is significant. Normally, the revenue cycle is significant in most small businesses.

.02 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the revenue cycle should be sufficient for you to understand—

- How cash and credit sales are initiated.
- How cash receipts are recorded.
- How sales and cash receipts are processed by the financial reporting information system.
- The accounting records and supporting documents involved in the processing and reporting of sales, accounts receivable, and cash receipts.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.03 This checklist documents your understanding of how internal control over the revenue cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.04 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.05

	Personnel	N/A	No	Yes
I. Revenue and Accounts Receivable				
A. Initiating Sales Transactions				
1. Cash sales are controlled by cash registers or prenumbered cash receipts forms.				
2. Someone other than the cashier has custody of the cash register tape compartment.				
3. Someone other than the cashier takes periodic readings of the cash register and balances the cash on hand.				
4. Credit limits are established by the owner or credit manager for customers who purchase on account.				
5. Prenumbered sales orders are used and accounted for.				
6. Prenumbered shipping documents are used to record shipments.				
7. Shipping document information is verified prior to shipment.				
8. All shipping documents are accounted for.				
9. Prenumbered credit memos are used to document sales returns.				
10. All credit memos are approved and accounted for.				
11. Credit memos are matched with receiving reports for returned goods.				
B. Processing Sales Transactions				
12. Prenumbered invoices are prepared promptly after goods are shipped.				
13. Quantities on the invoices are compared to shipping documents.				
14. The prices on the invoices are current.				
15. Invoices are mailed to customers on a timely basis.				
16. Invoices are posted to the general ledger on a timely basis.				
17. Standard journal entries are used to record sales.				
18. Invoices are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.				
19. Credit memos are posted to the general ledger on a timely basis.				
20. Credit memos are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.				
21. Procedures exist for determining proper cut-off of sales at month end.				
22. The sales and accounts receivable balances shown in the general ledger are reconciled to the sales and accounts receivable subsidiary ledgers on a regular basis.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	*N/A*	*No*	*Yes*
C. Estimates and Disclosures for Sales Transactions				
23. The accounting system generates a monthly aging of accounts receivable.	_____	____	____	____
24. The owner uses the accounts receivable aging to investigate, write-off or adjust delinquent accounts receivable.	_____	____	____	____
25. The owner uses the accounts receivable aging and other information to estimate an allowance for doubtful accounts.	_____	____	____	____
26. The person responsible for financial reporting identifies significant concentrations of credit risk.	_____	____	____	____
II. Cash Receipts				
A. Initiating Cash Receipts Transactions				
1. The entity maintains records of payments on accounts by customer.	_____	____	____	____
2. Someone other than the person responsible for maintaining accounts receivable opens the mail and lists the cash receipts.	_____	____	____	____
3. Cash receipts are deposited intact.	_____	____	____	____
4. Cash receipts are deposited in separate bank accounts when required.	_____	____	____	____
B. Processing Cash Received on Account				
5. Cash receipts are posted to the general ledger on a timely basis.	_____	____	____	____
6. Cash receipts are posted to the accounts receivable subsidiary ledger on a timely basis.	_____	____	____	____
7. Standard journal entries are used to post cash receipts.	_____	____	____	____
8. Timely bank reconciliations are prepared or reviewed by the owner or manager or someone independent of the cash receipts function.	_____	____	____	____

End User Computing in the Revenue Cycle

.06 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet which shows amortization of premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.07 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the general accounting software.

.08 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet accumulates invoices for batch processing.

- Make significant accounting decisions. For example, a spreadsheet application that ages accounts receivable and helps in determining write-offs.
- Accumulate footnote information. For example, a database of customers provides information about the location of customers for possible concentration of credit risk disclosures.

.09 In the space provided below, describe how end user computing is used in the revenue cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.10 Answer the following questions relating to procedures and controls over end user computing related to the revenue cycle.

	Personnel	*N/A*	*No*	*Yes*
Revenue Cycle				
1. End user applications listed in paragraph .09 of this form have been adequately tested before use.				
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.				
3. Access controls limit access to the end user application.				
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.				
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Information Processed by Outside Computer Service Organizations

.11 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the revenue cycle.

.12 In the space below, describe the revenue cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Purchasing Cycle

Purchasing, Accounts Payable, and Cash Disbursements

.13 This checklist may be used on any small business audit engagement where the purchasing cycle is significant. Normally, the purchasing cycle is significant for most small businesses.

.14 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the purchasing cycle should be sufficient for you to understand—

- How purchases are initiated and goods received.
- How cash disbursements are recorded.
- How purchases and cash disbursements are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of purchases, accounts payable, and cash disbursements.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.15 This checklist documents your understanding of how internal control over the purchasing cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of

internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.16 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.17

	Personnel	*N/A*	*No*	*Yes*
I. Purchases and Accounts Payable				
A. Initiating Purchases and Receipt of Goods				
1. All purchases over a predetermined amount are approved by the owner.	_____	____	____	____
2. Non-routine purchases (for example, services, fixed assets, or investments) are approved by the owner.	_____	____	____	____
3. A purchase order system is used, prenumbered purchase orders are accounted for, and physical access to purchase orders is controlled.	_____	____	____	____
4. Open purchase orders are periodically reviewed.	_____	____	____	____
5. All goods are inspected and counted when received.	_____	____	____	____
6. Prenumbered receiving reports, or a log, are used to record the receipt of goods.	_____	____	____	____
7. The receiving reports or log indicate the date the items were received.	_____	____	____	____
B. Processing Purchases				
8. Invoices from vendors are matched with applicable receiving reports.	_____	____	____	____
9. Invoices are reviewed for proper quantity and prices, and mathematical accuracy.	_____	____	____	____
10. Invoices from vendors are posted to the general ledger on a timely basis.	_____	____	____	____
11. Invoices from vendors are posted to the accounts payable subsidiary ledger on a timely basis.	_____	____	____	____
12. Standard journal entries are used to post accounts payable.	_____	____	____	____
13. Accounts payable account per the general ledger is reconciled periodically to the accounts payable subsidiary ledger.	_____	____	____	____
14. Statements from vendors are reconciled to the accounts payable subsidiary ledger.	_____	____	____	____

	Personnel	N/A	No	Yes
C. Disclosures				
15. Management has the information to identify vulnerability due to concentrations of suppliers (SOP 94-6).	_____	____	____	____
II. Cash Disbursements				
A. Initiating Cash Disbursements				
1. All disbursements except those from petty cash are made by check.	_____	____	____	____
2. All checks are recorded.	_____	____	____	____
3. Supporting documentation such as invoices and receiving reports are reviewed before the checks are signed.	_____	____	____	____
4. Supporting documents are canceled to avoid duplicate payment.	_____	____	____	____
B. Processing Cash Disbursements				
5. Cash disbursements are posted to the general ledger on a timely basis.	_____	____	____	____
6. Cash disbursements are posted to the accounts payable subsidiary ledger on a timely basis.	_____	____	____	____
7. Standard journal entries are used to post cash disbursements.	_____	____	____	____
8. Timely bank reconciliations are prepared or reviewed by the owner or manager or someone independent of the cash receipts function.	_____	____	____	____

End User Computing in the Purchasing Cycle

.18 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.19 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the purchasing cycle to process significant accounting information outside of the general accounting software.

.20 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet accumulates non-routine purchases for batch processing.
- Make significant accounting decisions.
- Accumulate footnote information. For example, a database of vendors provides information for possible concentration of risk disclosures.

.21 In the space provided below, describe how end user computing is used in the purchasing cycle. Describe—

- The person or department who performs the computing.

- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.22 Answer the following questions relating to procedures and controls over end user computing related to the purchasing cycle.

	Personnel	*N/A*	*No*	*Yes*
Purchasing Cycle				
1. End user applications listed in paragraph .21 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.23 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the purchasing cycle.

.24 In the space below, describe the purchasing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Inventory

Inventory and Cost of Sales

.25 This checklist may be used on any small business audit engagement where inventory is a significant transaction cycle.

.26 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the inventory cycle should be sufficient for you to understand—

- How costs are capitalized to inventory.
- How cost is relieved from inventory.
- How inventory costs and cost of sales are processed by the financial reporting information system.
- The procedures used to take the physical inventory count.
- The accounting records and supporting documents involved in the processing and reporting of inventory and cost of sales.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.27 This checklist documents your understanding of how internal control over the inventory cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.28 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.29

	Personnel	*N/A*	*No*	*Yes*
I. Inventory and Cost of Sales				
A. Capturing Capitalizable Costs[1]				
1. The entity uses a cost accounting system to accumulate capitalizable costs.				
2. The cost accounting system distinguishes between costs that should be capitalized for GAAP purposes and those that should be capitalizable for tax purposes.				
3. The cost accounting system interfaces with the general ledger.				
4. Production cost budgets are periodically compared to actual costs, and significant differences are explained.				
B. Inventory Records				
5. The entity maintains adequate inventory records of prices and amounts on hand.				
6. Withdrawals from inventory are based on prenumbered finished inventory requisitions, shipping reports, or both.				
7. Additions to and withdrawals from inventory are posted to the inventory records and the general ledger.				
8. Standard journal entries are used to post inventory transactions to the inventory records and the general ledger.				
9. Inventory records are periodically reconciled to the general ledger.				
10. Inventory records are reconciled to a physical inventory count.				
C. Physical Inventory Counts				
11. Inventory is counted at least once a year.				
12. Physical inventory counters are given adequate instructions.				
13. Inventory count procedures are sufficient to provide an accurate count, including steps to ensure—				
• Proper cut-off.				
• Identification of obsolete items.				
• All items are counted once and only once.				
• Tag control.				
D. Estimates and Disclosures				
14. Management is able to identify excess, slow-moving, or obsolete inventory.				

[1] You should also consider completing the Financial Reporting Information Systems and Controls Checklist for the purchasing cycle to document your understanding of how the purchase of inventory is initiated.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	N/A	No	Yes
15. Excess, slow-moving, or obsolete inventory is periodically written off.				
16. Management can identify inventory subject to rapid technological obsolescence that may need to be disclosed under SOP 94-6.				

End User Computing in the Inventory Cycle

.30 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.31 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the inventory cycle to process significant accounting information outside of the general accounting software.

.32 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet calculates overhead cost allocations.
- Make significant accounting decisions. A spreadsheet application tracks slow-moving items for possible write-off.
- Accumulate footnote information.

.33 In the space provided below, describe how end user computing is used in the inventory cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.34 Answer the following questions relating to procedures and controls over end user computing related to the inventory cycle.

	Personnel	*N/A*	*No*	*Yes*
Inventory Cycle				
1. End user applications listed in paragraph .33 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.35 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the inventory cycle.

.36 In the space below, describe the inventory cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Financing

Investments and Debt

.37 This checklist may be used on any small business audit engagement where investments or debt are a significant transaction cycle.

.38 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the financing cycle should be sufficient for you to understand—

- How investment decisions are authorized and initiated.
- How financing is authorized and captured by the financial reporting information system.
- How investment and debt transactions are processed by the financial reporting system.
- The accounting records and supporting documents involved in the processing and reporting of investments and debt.
- The processes used to prepare significant accounting estimates, disclosures, and presentation.
- How management classifies investments as either trading, available-for-sale, or held to maturity.

Interpreting Results

.39 This checklist documents your understanding of how internal control over financing is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.40 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.41

	Personnel	*N/A*	*No*	*Yes*
I. Investments				
A. Authorization and Initiation				
1. Investment transactions are authorized by the owner.	_____	____	____	____
2. The owner assesses and understands the risks associated with the entity's investments.	_____	____	____	____
3. Investments are registered in the name of the company.	_____	____	____	____
4. At acquisition, investments are classified as trading, available-for-sale, or held-to-maturity.	_____	____	____	____

	Personnel	N/A	No	Yes
B. Processing				
5. Investment transactions are posted to the general ledger on a timely basis.				
6. Account statements received from brokers are reviewed for accuracy.				
7. Discounts and premiums are amortized regularly using the interest method.				
8. Procedures exist to determine the fair value of trading and available-for-sale securities.				
9. The general ledger is periodically reconciled to account statements from brokers or physical counts of securities on hand.				
C. Disclosures				
10. Management identifies investments with off-balance-sheet credit risk for proper disclosure.				
II. Debt				
A. Authorization and Initiation				
1. Financing transactions are authorized by the owner.				
2. The owner assesses and understands all terms, covenants, restrictions of debt transactions.				
B. Processing and Documentation				
3. Debt transactions are posted to the general ledger on a timely basis.				
4. Any premiums or discount are amortized using the interest method.				
5. The company maintains up-to-date files of all notes payable.				
C. Disclosure				
6. Procedures exist to determine the fair value of notes payable for proper disclosure.				
7. Management reviews their compliance with debt covenants on a timely basis.				

End User Computing in the Financing Cycle

.42 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.43 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the financing cycle to process significant accounting information outside of the general accounting software.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.44 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet application calculates the amortization of premiums and discounts on investments.
- Make significant accounting decisions.
- Accumulate footnote information. For example, a spreadsheet application calculates five-year debt maturities for footnote disclosure.

.45 In the space provided below, describe how end user computing is used in the financing cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.46 Answer the following questions relating to procedures and controls over end user computing related to the financing cycle.

	Personnel	*N/A*	*No*	*Yes*
Financing Cycle				
1. End user applications listed in paragraph .45 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.47 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the financing cycle.

.48 In the space below, describe the financing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Property, Plant, and Equipment

Fixed Assets and Depreciation

.49 This checklist may be used on any audit engagement where fixed assets are a significant transaction cycle.

.50 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the property, plant, and equipment cycle should be sufficient for you to understand—

- How fixed asset transactions are authorized and initiated. (Additional information on the acquisition of fixed assets is documented on the Accounting Systems and Control Checklist for the Purchasing Cycle.)
- How fixed asset transactions and depreciation are processed by the financial reporting information system.
- The accounting records and supporting documents involved in the processing and reporting of fixed assets and depreciation.
- The processes used to prepare significant accounting estimates and disclosures.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Interpreting Results

.51 This checklist documents your understanding of how internal control over property, plant, and equipment is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.52 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.53

	Personnel	*N/A*	*No*	*Yes*
I. Fixed Assets and Depreciation				
A. Authorization and Initiation				
1. Fixed asset acquisitions and retirements are authorized by the owner.	_____	___	___	___
B. Processing and Documentation				
2. The company maintains detailed records of fixed assets and the related accumulated depreciation.	_____	___	___	___
3. The general ledger and detailed fixed asset records are updated for fixed assets transactions on a timely basis.	_____	___	___	___
4. A process exists for the timely calculation of depreciation expense for both book and tax purposes.	_____	___	___	___
5. The general ledger and detailed fixed asset records are updated for depreciation expense on a timely basis.	_____	___	___	___
6. The general ledger is periodically reconciled to the detailed fixed asset records.	_____	___	___	___
C. Disclosure and Estimation				
7. Management identifies events or changes in circumstances that may indicate fixed assets have been impaired (SFAS 121).	_____	___	___	___
8. Management assesses and understands the risk of specialized equipment becoming subject to technological obsolescence (SOP 94-6).	_____	___	___	___

End User Computing in the Property, Plant, and Equipment Cycle

.54 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.55 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the general accounting software.

.56 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet application calculates the depreciation expense.
- Make significant accounting decisions. For example, a spreadsheet application is used to analyze lease or buy decisions.
- Accumulate footnote information.

.57 In the space provided below, describe how end user computing is used in the property, plant, and equipment cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.58 Answer the following questions relating to procedures and controls over end user computing related to the property, plant, and equipment cycle.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	N/A	No	Yes
Property, Plant, and Equipment Cycle				
1. End user applications listed in paragraph .57 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.59 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the property, plant, and equipment cycle.

.60 In the space below, describe the property, plant, and equipment cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Payroll Cycle

Payroll Expense

.61 This checklist may be used on any small business audit engagement where the payroll cycle is significant.

.62 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the payroll cycle should be sufficient for you to understand—

- How the time worked by employees is captured by the financial reporting information system.

- How salaries and hourly rates are established.
- How payroll and the related withholdings are calculated.
- The accounting records and supporting documents involved in the processing and reporting of payroll.

Interpreting Results

.63 This checklist documents your understanding of how internal control over the payroll cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.64 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

End User Computing in the Payroll Cycle

.66 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.67 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the payroll cycle to process significant accounting information outside of the general accounting software.

.68 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet accumulates time card information for batch processing.
- Make significant accounting decisions. For example, a spreadsheet application is used to accumulate payroll information by job for further analysis.
- Accumulate footnote information.

.69 In the space provided below, describe how end user computing is used in the payroll cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.70 Answer the following questions relating to procedures and controls over end user computing related to the payroll cycle.

	Personnel	N/A	No	Yes
Payroll Cycle				
1. End user applications listed in paragraph .69 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.71 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the payroll cycle.

.72 In the space below, describe the payroll cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Illustrative Internal Control Forms—Medium to Large Business

.01 The following are illustrative internal control forms you might use to document your understanding of internal controls sufficient to plan an audit. The illustrative questions are numbered merely for organizational purposes. The numbers are in no way intended to infer completeness or a preferred sequence. These forms may require modifications to meet the needs, preferences, and circumstances of individual firms and their clients. Whenever you use standardized forms, checklists, or questionnaires, you should recognize that important matters in a particular set of circumstances may not be covered.

Instructions

.02 The forms in AAM sections 4410 and 4420 may be used on all audit engagements of medium to large businesses. For audits of small businesses, see AAM section 4300.

.03 In every audit, you should obtain an understanding of each of the components of internal control sufficient to plan the audit. These forms should be used as a tool in documenting your understanding of internal control, how internal control is designed, and whether controls have been placed in operation.

.04 These forms should be used in conjunction with other forms in the following circumstances:

- *Computer Applications Checklist—Medium to Large Business* [AAM section 4410]. To be used to document your understanding of how the entity uses computers and information technology to process significant accounting information.
- *Financial Reporting Information Systems and Controls Checklist* [AAM section 4420]. To be used for each significant account and transactions cycle.

.05 These forms are appropriate whenever you plan a primarily substantive audit approach (see paragraph .07 below). That is, their completion generally results in control risk being assessed at or slightly below the maximum for all assertions related to account balances and transactions.

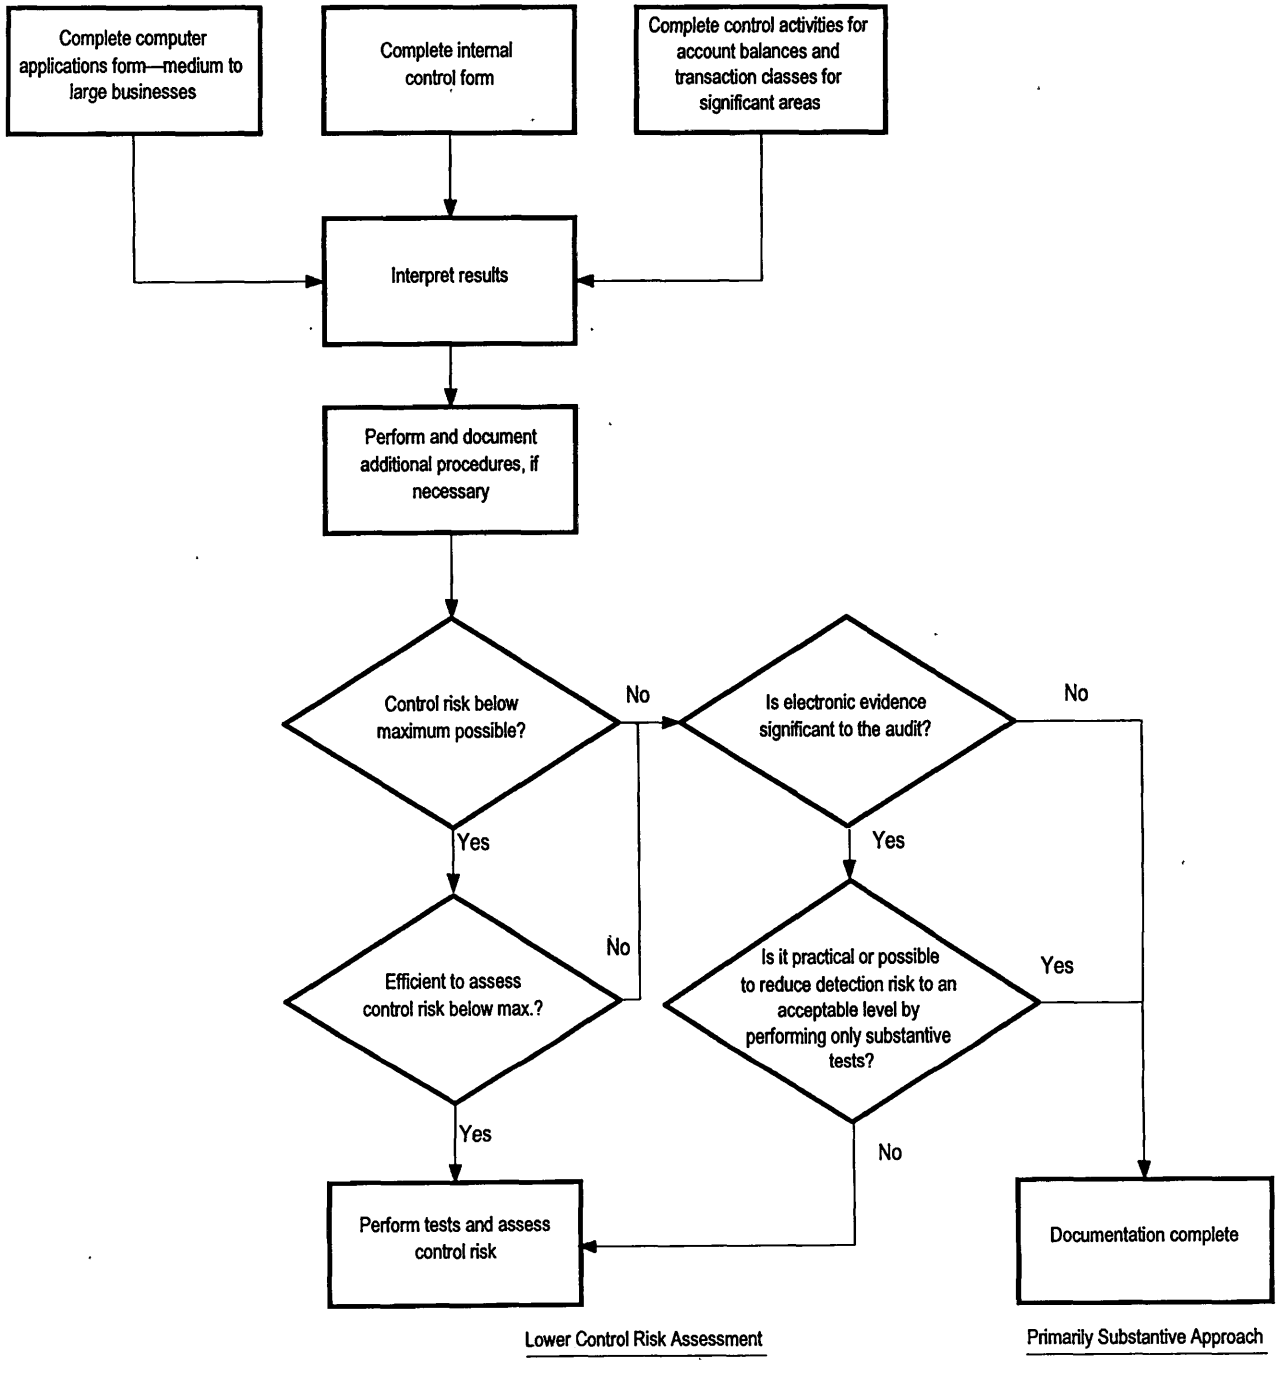
.06 If you plan a lower control risk assessment for certain assertions you are required to—

- Identify specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions, and
- Perform tests of controls to evaluate their effectiveness.

.07 In situations where a significant amount of audit evidence is transmitted, processed, maintained, or accessed electronically, it generally will be necessary to test the internal control surrounding the electronic evidence (for example, controls over generation, storage, manipulation, and transmission), even if a primarily substantive audit approach is followed. This is because the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. In these situations the auditor should perform tests of controls to gather evidence to support an assessed level of control risk below the maximum for affected assertions. If the auditor concludes control risk must be assessed at the maximum in such situations or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the scope limitation.

.08 These forms are organized to conform to the control components and overall internal control framework described in the Audit Guide *Consideration of Internal Control in a Financial Statement Audit*. This framework is a way for you to consider the impact of internal control on an audit. The classification of any specific control into a particular component should not be your primary concern. Rather, your primary consideration is whether a specific control affects financial statement assertions.

.09 The following flowchart describes how this form can be used in conjunction with the other forms included in this section to document your understanding of internal controls.



Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Interpreting the Results

.10 When obtaining an understanding of internal control, you should consider the *collective* effect of the strengths and weaknesses in various control components. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, strong management oversight may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by management to overstate earnings.

.11 Answers that fall toward the right side of the form ("Strongly Agree" or "Somewhat Agree") indicate areas of strength in the control environment. You should consider whether these areas of strength indicate that a control risk assessment below the maximum may be possible for some assertions.

.12 Answers that fall toward the left side of the form ("Strongly Disagree" or "Somewhat Disagree") indicate areas of weakness in the entity's internal controls. You should assess how these areas of weakness affect the planning of the audit. This assessment should be documented in section V of the form. In making this assessment, you normally focus on—

- The types of material misstatement that could occur as a result of the identified weakness, and
- The risk that those misstatements will occur.

Documenting a Conclusion

.13 After completing this form, the Financial Reporting Information Systems and Controls Checklist for significant areas, and the Computer Applications Checklist—Medium to Large Business, you should document your conclusion regarding internal control. In order to perform a primarily substantive audit, you must understand the entity's internal control sufficiently—

- To assess the risk of material misstatement in assertions related to material financial statement components, and
- To design effective substantive procedures.

.14 If the completion of this form is not sufficient for you to obtain the necessary level of understanding listed in AAM section 4400.13, you should perform and document the results of additional tests to gain that level of understanding.

.15

I. Document Your Understanding of the Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
A. Control Environment Factors					
Integrity and Ethical Values					
1. Management has high ethical and behavioral standards.	_____	_____	_____	_____	_____
2. The company has a written code of ethical and behavioral standards that is comprehensive and periodically acknowledged by all employees.	_____	_____	_____	_____	_____
3. If a written code of conduct does not exist, the management culture emphasizes the importance of integrity and ethical values.	_____	_____	_____	_____	_____
4. Management reinforces its ethical and behavioral standards.	_____	_____	_____	_____	_____
5. Management appropriately deals with signs that problems exist (e.g., defective products or hazardous waste) even when the cost of identifying and solving the problem could be high.	_____	_____	_____	_____	_____
6. Management has removed or reduced incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts.					
For example, there is generally *no*—					
• Pressure to meet unrealistic performance targets.	_____	_____	_____	_____	_____
• High performance-dependent rewards.	_____	_____	_____	_____	_____
• Upper and lower cutoffs on bonus plans.	_____	_____	_____	_____	_____
7. Management has provided guidance on the situations and frequency with which intervention of established controls is appropriate.	_____	_____	_____	_____	_____
8. Management intervention is documented and explained appropriately.	_____	_____	_____	_____	_____
Commitment to Competence					
9. Management has appropriately considered the knowledge and skill levels necessary to accomplish financial reporting tasks.	_____	_____	_____	_____	_____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
10. Employees with financial reporting tasks generally have the knowledge and skills necessary to accomplish those tasks.					
Board of Directors and Audit Committee					
11. The board of directors is independent from management.					
12. The board constructively challenges management's planned decisions.					
13. Directors have sufficient knowledge, industry experience and time to serve effectively.					
14. The board regularly receives the information they need to monitor management's objectives and strategies.					
15. The audit committee reviews the scope of activities of the internal and external auditors annually.					
16. The audit committee meets privately with the chief financial and/or accounting officers, internal auditors and external auditors to discuss the—					
• Reasonableness of the financial reporting process.					
• System of internal control.					
• Significant comments and recommendations.					
• Management's performance.					
17. The board takes steps to ensure an appropriate "tone at the top."					
18. The board or committee takes action as a result of its findings.					
Management's Philosophy and Operating Style					
19. Management moves carefully, proceeding only after carefully analyzing the risks and potential benefits of accepting business risks.					
20. Management is generally cautious or conservative in financial reporting and tax matters.					

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
21. There is relatively low turnover of key personnel (e.g., operating, accounting, data processing, internal audit).					
22. There is *no* undue pressure to meet budget, profit, or other financial and operating goals.					
23. Management views the accounting and internal audit function as a vehicle for exercising control over the entity's activities.					
24. Operating personnel review and "sign off" on reported results.					
25. Senior managers frequently visit subsidiary or divisional operations.					
26. Group or divisional management meetings are held frequently.					
Organizational Structure					
27. The entity's organizational structure facilitates the flow of information upstream, downstream, and across all business activities.					
28. Responsibilities and expectations for the entity's business activities are communicated clearly to the executives in charge of those activities.					
29. The executives in charge have the required knowledge, experience, and training to perform their duties.					
30. Those in charge of business activities have access to senior operating management.					
Assignment of Authority and Responsibility					
31. Authority and responsibility are delegated only to the degree necessary to achieve the company's objectives.					
32. Job descriptions, for at least management and supervisory personnel, exist.					
33. Job descriptions contain specific references to control-related responsibilities.					

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
34. Proper resources are provided for personnel to carry out their duties.					
35. Personnel understand the entity's objectives and know how their individual actions interrelate and contribute to those objectives.					
36. Personnel recognize how and for what they will be held accountable.					
Human Resource Policies and Practices					
37. The entity generally hires the most qualified people for the job.					
38. Hiring and recruiting practices emphasize educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior.					
39. Recruiting practices include formal, in-depth employment interviews.					
40. Prospective employees are told of the entity's history, culture and operating style.					
41. The entity provides training opportunities, and employees are well-trained.					
42. Promotions and rotation of personnel are based on periodic performance appraisals.					
43. Methods of compensation, including bonuses, are designed to motivate personnel and reinforce outstanding performance.					
44. Management does not hesitate to take disciplinary action when violations of expected behavior occur.					
B. Other Internal Control Components With a Pervasive Effect on the Organization					
Risk Assessment					
1. Special action is taken to ensure new personnel understand their tasks.					
2. Management appropriately considers the control activities performed by personnel who change jobs or leave the company.					

	No Opinion	Strongly Disagree	Somewhat Disagree	Somewhat Agree	Strongly Agree
3. Management assesses how new accounting and information systems will impact internal control.					
4. Management reconsiders the appropriateness of existing control activities when new accounting and information systems are developed and implemented.					
5. Employees are adequately trained when accounting and information systems are changed or replaced.					
6. Accounting and information system capabilities are upgraded when the volume of information increases significantly.					
7. Accounting and data processing personnel are expanded as needed when the volume of information increases significantly.					
8. The entity has the ability to reasonably forecast operating and financial results.					
9. Management keeps abreast of the political, regulatory, business, and social culture of areas in which foreign operations exist.					
General Control Activities					
10. The entity prepares operating budgets and cash flow projections.					
11. Operating budgets and projections lend themselves to effective comparison with actual results.					
12. Significant variances between budgeted or projected amounts and actual results are reviewed and explained.					
13. The company has adequate safekeeping facilities for custody of the accounting records such as fireproof storage areas and restricted access cabinets.					
14. The entity has a suitable record retention plan.					
15. The entity has adequate controls to limit access to computer programs and data files.					
16. Periodically, personnel compare counts of assets to amounts shown on control records.					

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
17. There is adequate segregation of duties among those responsible for authorizing transactions, recording transactions, and maintaining custody of assets.					
Information and Communication					
18. Management receives the information they need to carry out their responsibilities.					
19. Information is provided at the right level of detail for different levels of management.					
20. Information is available on a timely basis.					
21. Information with accounting significance (for example, slow-paying customers) is transmitted across functional lines in a timely manner.					
Monitoring					
22. Customer complaints about billings are investigated for their underlying causes.					
23. Communications from bankers, regulators, or other outside parties are monitored for items of accounting significance.					
24. Management responds appropriately to auditor recommendations on ways to strengthen internal controls.					
25. Employees are required to "sign off" to evidence the performance of critical control functions.					
26. The internal auditors are independent of the activities they audit.					
27. Internal auditors have adequate training and experience.					
28. Internal auditors document the planning and execution of their work by such means as audit programs and working papers.					
29. Internal audit reports are submitted to the board of directors or audit committee.					

II. Determine Other Areas For Evaluation

The completion of section I of this form is the first of several forms that may be used to document your understanding of internal controls sufficiently to plan a primarily substantive audit. It is important to remember that in entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of the controls surrounding the electronic environment may not be enough. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gain competent evidential matter—even in a primarily substantive approach. In the space provided below, determine which of the following areas apply. A "Yes" answer generally indicates you should complete the related form.

	No	*Yes*	*W/P Ref.*
Significant Account Balances and Transaction Cycles			
1. The following account balances or transaction cycles are significant to the company's financial statements.			
a. Revenue Cycle, including sales, accounts receivable, or cash receipts. (Normally considered significant for most businesses.)	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
b. Purchasing Cycle, including purchasing, accounts payable, or cash disbursements. (Normally considered significant for most businesses.)	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
c. Inventory, including inventory and cost of sales.	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
d. Financing, including investments and debt.	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
e. Property, Plant, and Equipment, including fixed assets and depreciation.	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
f. Payroll.	____	____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____

III. Assess Lack of Segregation of Duties

In the space provided below, assess risk due to a lack of segregation of duties for the company, based on the completion of sections I and II of this form. Your comments should address—

- The person with incompatible responsibilities and the nature of those responsibilities.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of a lack of segregation of duties, and the type of those misstatements.
- How substantive procedures will be designed to limit the risk of those misstatements to an acceptable level.

IV. Assess the Risk of Management Override

Even in effectively controlled entities—those with generally high levels of integrity and control consciousness—a manager might be able to override controls. The term "management override" means—

> Overruling prescribed policies or procedures for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

Management might override the control system for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

An active, involved board of directors can significantly reduce the risk of management override.

Management override is different from management intervention, which is the overrule of prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the system.

In the space below, assess the risk of management *override* for this company. You should consider the risk that management override possibilities exist, the risk that management will take advantage of those possibilities, and any evidence that management has engaged in override practices. If the risk of management override is greater than low, indicate how planned audit procedures will reduce this risk to an acceptable level.

V. Interpret Results

You should consider the *collective* effect of the strengths and weaknesses in various control components. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, management controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by management to overstate earnings.

A. Areas That May Allow for Control Risk to Be Assessed Below the Maximum

Based on the completion of sections I through IV of this form you may have become aware of certain accounts, transactions and assertions where it may be possible and efficient to plan a control risk assessment below the maximum. In the area below, document those accounts, transactions, and assertions and the related tests of controls.

Accounts, Transactions, and Assertions	*Test of Controls Working Paper Reference*

B. Areas of possible control weakness

Based on the completion of sections I through IV of this form, you may have become aware of certain areas that may indicate possible control weaknesses, not including those areas relating to segregation of duties and management override which were assessed and documented in sections III and IV.

In the space provided below, document those areas of possible weakness and the impact the identified weakness will have on the audit. Discuss—

- The nature of the identified possible weakness.
- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of the weakness and the type of those misstatements.
- How substantive procedures will be designed to reduce the risk of those misstatements to an acceptable level.

Computer Applications Checklist—Medium to Large Business

.01 This questionnaire may be used to document your understanding of the way computers are used in the information and communication systems of a medium to large business.

.02

I. Computer Hardware

Describe the computer hardware for the entity, and its configuration. Consider—

- The make and model of company's main processing computer(s).
- Input and output devices.
- Storage means and capabilities.
- Local area networks.
- Stand-alone microcomputers.

You may wish to attach a separate page to this checklist to document the entity's computer hardware.

II. Computer Software

Describe the entity's main software packages and whether they are unmodified, commercially available packages, or were developed or modified in-house. (End-user computing applications will be considered only for significant account balances and transaction cycles. See the Financial Reporting Information Systems and Control Checklist—Medium to Large Business.)

	Unmodified Commercial	*In-House*	*N/A*
Operating system			
Access control			
General accounting			
Network

_____			

III. Computer Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
Acquisition of Hardware					
1. The company has a coherent management plan for the purchase and continued investment in computer hardware.					
2. The computer hardware is sufficient to meet the company's needs.

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
3. The company's computer hardware is safely and properly installed.					
4. The company has standard, regular hardware maintenance procedures.					
Acquisition of Software					
5. The company has a coherent management plan for the purchase of and continued investment in computer software.					
6. The company researches software products to determine whether they meet the needs of the intended users.					
7. The company's application programs are compatible with each other.					
8. The company obtains recognized software from reputable sources.					
9. Company policy prohibits the use of unauthorized programs introduced by employees.					
10. Company policy prohibits the downloading of untested software from sources such as dial-up bulletin boards.					
11. The company uses virus protection software to screen for virus infections.					
Program Development					
12. Users are involved in the design and approval of systems.					
13. Users review the completion of various phases of the application.					
14. New programs are thoroughly tested.					
15. Users are involved in the review of tests of the program.					
16. Adequate procedures exist to transfer programs from development to production libraries.					
Program Changes					
17. Users are involved in the design and approval of program changes.					

	No Opinion	*Strongly Disagree*	*Somewhat Disagree*	*Somewhat Agree*	*Strongly Agree*
18. Program changes are thoroughly tested.					
19. Users are involved in the review of tests of the program changes.					
20. Adequate procedures exist to transfer changed programs from development to production libraries.					
Logical Access					
21. Management has identified confidential and sensitive data for which access should be restricted.					
22. Procedures are in place to restrict access to confidential and sensitive data.					
23. Procedures are in place to reduce the risk of unauthorized transactions being entered into processing.					
24. The use of utility programs is controlled or monitored carefully.					
25. Procedures are in place to detect unauthorized changes to programs supporting the financial statements.					
26. Programmer access to production programs, live data files, and job control language is controlled.					
27. Operator access to source code and individual elements of data files is controlled.					
28. Users have access only to defined programs and data files.					
Physical Security					
29. The company has established procedures for the periodic back-up of files.					
30. Back-up procedures include multiple generations.					
31. Back-up files are stored in a secure, off-site location.					
Computer Operations					
32. Operations management reviews lists of regular and unscheduled batch jobs.					
33. Job control instruction sets are menu-driven.					
34. Jobs are executed only from the operator's terminal.

IV. Outside Computer Service Organizations

This section should be used to document your understanding of how the company uses an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324).

1. List the name of the service organization and the general types of services it provides.

_____

_____

2. Are the general ledger and other primary accounting records processed by an outside service organization? _____ Yes _____ No

If "yes," describe the source documents provided to the service organization, the reports and other documentation received from the organization, and the controls maintained by the user over input and output to prevent or detect material misstatement.

_____

_____

_____

3. List the type and date of the most recent service auditor report.

_____

_____

_____

[*The next page is 4443.*]

AAM Section 4420

Financial Reporting Information Systems and Controls Checklist—Medium to Large Business

Revenue Cycle

Revenue, Accounts Receivable, and Cash Receipts

.01 This checklist may be used on any audit engagement of a medium to large company when the revenue cycle is significant. Normally, the revenue cycle is significant in most audit engagements.

.02 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the revenue cycle should be sufficient for you to understand—

- How cash and credit sales are initiated.
- How credit limits are established and maintained.
- How cash receipts are recorded.
- How sales and cash receipts are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of sales, accounts receivable, and cash receipts.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.03 This checklist documents your understanding of how internal control over the revenue cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.04 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.05

	Personnel	*N/A*	*No*	*Yes*
I. Revenue and Accounts Receivable				
A. Initiating Sales Transactions				
1. Credit limits are clearly defined.	_____	___	___	___
2. Credit limits are clearly communicated.	_____	___	___	___
3. The credit of prospective customers is investigated before it is extended to them.	_____	___	___	___
4. Credit limits are periodically reviewed.	_____	___	___	___
5. The people who perform the credit function are independent of—				
• Sales.	_____	___	___	___
• Billing.	_____	___	___	___
• Collection.	_____	___	___	___
• Accounting.	_____	___	___	___
6. Credit limits and changes in credit limits are communicated to persons responsible for approving sales orders on a timely basis.	_____	___	___	___
7. The company has clearly defined policies and procedures for acceptance and approval of sales orders.	_____	___	___	___
8. Prenumbered sales orders are used and accounted for.	_____	___	___	___
9. Prenumbered shipping documents are used to record shipments.	_____	___	___	___
10. Shipping document information is verified prior to shipment.	_____	___	___	___
11. The people who perform the shipping function are independent of—				
• Sales.	_____	___	___	___
• Billing.	_____	___	___	___
• Collection.	_____	___	___	___
• Accounting.	_____	___	___	___
12. All shipping documents are accounted for.	_____	___	___	___
13. Prenumbered credit memos are used to document sales returns.	_____	___	___	___
14. All credit memos are approved and accounted for.	_____	___	___	___
15. Credit memos are matched with receiving reports for returned goods.	_____	___	___	___
16. Cash sales are controlled by cash registers or prenumbered cash receipts forms.	_____	___	___	___
17. Someone other than the cashier has custody to the cash register tape compartment.	_____	___	___	___

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	*N/A*	*No*	*Yes*
18. Someone other than the cashier takes periodic readings of the cash register and balances the cash on hand.				
B. Processing Sales Transactions				
19. Information necessary to prepare invoices (e.g., prices, discount policies) is clearly communicated to billing personnel on a timely basis.				
20. Prenumbered invoices are prepared promptly after goods are shipped.				
21. Quantities on the invoices are compared to shipping documents.				
22. The prices on the invoices are current.				
23. The people who perform the billing function are independent of—				
• Sales.				
• Credit.				
• Collection.				
24. Invoices are mailed to customers on a timely basis.				
25. Invoices are posted to the general ledger on a timely basis.				
26. Standard journal entries are used to record sales.				
27. Invoices are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.				
28. Credit memos are posted to the general ledger on a timely basis.				
29. Credit memos are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.				
30. Procedures exist for determining proper cut-off of sales at month-end.				
31. The sales and accounts receivable balances shown in the general ledger are reconciled to the sales and accounts receivable subsidiary ledgers on a regular basis.				
C. Estimates and Disclosures for Sales Transactions				
32. The accounting system generates a monthly aging of accounts receivable.				
33. The people who prepare the aging are independent of—				
• Billing.				
• Collection.				
34. Management uses the accounts receivable aging to investigate, write off, or adjust delinquent accounts receivable.				

	Personnel	*N/A*	*No*	*Yes*
35. Management uses the accounts receivable aging and other information to estimate an allowance for doubtful accounts.				
36. The person responsible for financial reporting identifies significant concentrations of credit risk.				
II. Cash Receipts				
A. Initiating Cash Receipts Transactions				
1. The entity maintains records of payments on accounts by customer.				
2. Someone other than the person responsible for maintaining accounts receivable opens the mail and lists the cash receipts.				
3. Cash receipts are deposited intact.				
4. Cash receipts are deposited in separate bank accounts when required.				
5. People who handle cash receipts are adequately bonded.				
6. Local bank accounts used for branch office collections are subject to withdrawal only by the home office.				
B. Processing Cash Received on Account				
7. Cash receipts are posted to the general ledger on a timely basis.				
8. Cash receipts are posted to the accounts receivable subsidiary ledger on a timely basis.				
9. Standard journal entries are used to post cash receipts.				
10. The people who enter cash receipts to the accounting system are independent of the physical handling of collections.				
11. Timely bank reconciliations are prepared or reviewed by someone independent of the cash receipts function.				

End User Computing in the Revenue Cycle

.06 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet which shows amortization of premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.07 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's MIS department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the MIS department.

.08 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Process significant accounting information outside of the MIS-operated accounting application. For example, a spreadsheet accumulates invoices for batch processing.
- Make significant accounting decisions. For example, a spreadsheet application that ages accounts receivable and helps in determining write-offs.
- Accumulate footnote information. For example, a database of customers provides information about the location of customers for possible concentration of credit risk disclosures.

.09 In the space provided below, describe how end user computing is used in the revenue cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.10 Answer the following questions relating to procedures and controls over end user computing related to the revenue cycle.

	Personnel	*N/A*	*No*	*Yes*
Revenue Cycle				
1. End user applications listed in paragraph .09 of this form have been adequately tested before use.				
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.				
3. Access controls limit access to the end user application.				
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.				
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.				

Information Processed by Outside Computer Service Organizations

.11 The Computer Applications Checklist—Medium to Large Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the revenue cycle.

.12 In the space below, describe the revenue cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Purchasing Cycle

Purchasing, Accounts Payable, and Cash Disbursements

.13 This checklist may be used on any audit engagement of a medium to large business where the purchasing cycle is significant. Normally, the purchasing cycle is significant for most businesses.

.14 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the purchasing cycle should be sufficient for you to understand—

- How purchases are initiated and goods received.
- How cash disbursements are recorded.
- How purchases and cash disbursements are processed by the financial reporting information system.
- The accounting records and supporting documents involved in the processing and reporting of purchases, accounts payable, and cash disbursements.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.15 This checklist documents your understanding of how internal control over the purchasing cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.16 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.17

	Personnel	*N/A*	*No*	*Yes*
I. Purchases and Accounts Payable				
A. Initiating Purchases and Receipt of Goods				
1. All purchases over a predetermined amount are approved by management.	_____	____	____	____
2. Non-routine purchases (for example, services, fixed assets, or investments) are approved by management.	_____	____	____	____
3. A purchase order system is used, prenumbered purchase orders are accounted for, and physical access to purchase orders is controlled.	_____	____	____	____
4. Open purchase orders are periodically reviewed.	_____	____	____	____
5. The purchasing function is independent of—				
• Receiving	_____	____	____	____
• Invoice processing	_____	____	____	____
• Cash disbursements	_____	____	____	____
6. All goods are inspected and counted when received.	_____	____	____	____
7. Prenumbered receiving reports, or a log, are used to record the receipt of goods.	_____	____	____	____
8. The receiving reports or log indicate the date the items were received.	_____	____	____	____
9. The receiving function is independent of—				
• Purchasing	_____	____	____	____
• Invoice processing	_____	____	____	____
• Cash disbursements	_____	____	____	____

	Personnel	*N/A*	*No*	*Yes*
B. Processing Purchases				
10. Invoices from vendors are matched with applicable receiving reports.				
11. Invoices are reviewed for proper quantity and prices, and mathematical accuracy.				
12. Invoices from vendors are posted to the general ledger on a timely basis.				
13. Invoices from vendors are posted to the accounts payable subsidiary ledger on a timely basis.				
14. The invoice processing function is independent of—				
• Purchasing				
• Receiving				
• Cash disbursements				
15. Standard journal entries are used to post accounts payable.				
16. Accounts payable account per the general ledger is reconciled periodically to the accounts payable subsidiary ledger.				
17. Statements from vendors are reconciled to the accounts payable subsidiary ledger.				
C. Disclosures				
18. Management has the information to identify vulnerability due to concentrations of suppliers (SOP 94-6).				
II. Cash Disbursements				
A. Initiating Cash Disbursements				
1. All disbursements except those from petty cash are made by check.				
2. All checks are recorded.				
3. Supporting documentation such as invoices and receiving reports are reviewed before the checks are signed.				
4. Supporting documents are canceled to avoid duplicate payment.				
B. Processing Cash Disbursements				
5. Cash disbursements are posted to the general ledger on a timely basis.				
6. Cash disbursements are posted to the accounts payable subsidiary ledger on a timely basis.				
7. Standard journal entries are used to post cash disbursements.				
8. Timely bank reconciliations are prepared or reviewed by the owner or manager or someone independent of the cash receipts function.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

End User Computing in the Purchasing Cycle

.18 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.19 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's MIS department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the purchasing cycle to process significant accounting information outside of the MIS department.

.20 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the MIS-operated accounting application. For example, a spreadsheet accumulates non-routine purchases for batch processing.
- Make significant accounting decisions.
- Accumulate footnote information. For example, a database of vendors provides information for possible concentration of risk disclosures.

.21 In the space provided below, describe how end user computing is used in the purchasing cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.22 Answer the following questions relating to procedures and controls over end user computing related to the purchasing cycle.

	Personnel	*N/A*	*No*	*Yes*
Purchasing Cycle				
1. End user applications listed in paragraph .21 of this form have been adequately tested before use.	_____	____	____	____

	Personnel	N/A	No	Yes
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.				
3. Access controls limit access to the end user application.				
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.				
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.				

Information Processed by Outside Computer Service Organizations

.23 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the purchasing cycle.

.24 In the space below, describe the purchasing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Inventory

Inventory and Cost of Sales

.25 This checklist may be used on any audit engagement of a medium to large business where inventory is a significant transaction cycle.

.26 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the inventory cycle should be sufficient for you to understand—

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- How costs are capitalized to inventory.
- How cost is relieved from inventory.
- How inventory costs and cost of sales are processed by the accounting system.
- The procedures used to take the physical inventory count.
- The accounting records and supporting documents involved in the processing and reporting of inventory and cost of sales.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.27 This checklist documents your understanding of how internal control over the inventory cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.28 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.29

	Personnel	*N/A*	*No*	*Yes*
I. Inventory and Cost of Sales				
A. Capturing Capitalizable Costs[1]				
1. Management prepares production goals and schedules based on sales forecasts.	_____	____	____	____
2. The company budgets its planned inventory levels.	_____	____	____	____
3. All releases from storage of raw materials, supplies, and purchased parts inventory are based on approved requisition documents.	_____	____	____	____
4. Labor costs are reported promptly and in sufficient detail to allow for the proper allocation to inventory.	_____	____	____	____
5. The entity uses a cost accounting system to accumulate capitalizable costs.	_____	____	____	____

[1] You should also consider completing the Financial Reporting Information Systems and Controls Checklist for the purchasing cycle to document your understanding of how the purchase of inventory is initiated.

	Personnel	*N/A*	*No*	*Yes*
6. The cost accounting system distinguishes between costs that should be capitalized for GAAP purposes and those that should be capitalizable for tax purposes.				
7. For standard cost systems:				
a. Standard rates and volume are periodically compared to actual and revised accordingly.				
b. Significant variances are investigated.				
8. The cost accounting system interfaces with the general ledger.				
9. Transfers of completed units from production to custody of finished goods inventory are based on approved completion reports that authorize the transfer.				
10. The people responsible for maintaining detailed inventory records are independent from the physical custody and handling of inventories.				
11. Production cost budgets are periodically compared to actual costs, and significant differences are explained.				
B. Inventory Records				
12. The entity maintains adequate inventory records of prices and amounts on hand.				
13. Withdrawals from inventory are based on prenumbered finished inventory requisitions, shipping reports, or both.				
14. Additions to and withdrawals from inventory are posted to the inventory records and the general ledger.				
15. Standard journal entries are used to post inventory transactions to the inventory records and the general ledger.				
16. Inventory records are periodically reconciled to the general ledger.				
17. Inventory records are reconciled to a physical inventory count.				
C. Physical Inventory Counts				
18. Inventory is counted at least once a year.				
19. Physical inventory counters are given adequate instructions.				
20. Inventory count procedures are sufficient to provide an accurate count, including steps to ensure—				
• Proper cut-off.				
• Identification of obsolete items.				
• All items are counted once and only once.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	*N/A*	*No*	*Yes*
D. Estimates and Disclosures				
21. Management is able to identify excess, slow-moving, or obsolete inventory.	_____	____	____	____
22. Excess, slow-moving, or obsolete inventory is periodically written off.	_____	____	____	____
23. Management can identify inventory subject to rapid technological obsolescence that may need to be disclosed under SOP 94-6.	_____	____	____	____

End User Computing in the Inventory Cycle

.30 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.31 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's MIS department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the inventory cycle to process significant accounting information outside of the MIS department.

.32 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the MIS-operated accounting application. For example, a spreadsheet calculates overhead cost allocations.
- Make significant accounting decisions. A spreadsheet application tracks slow-moving items for possible write-off.
- Accumulate footnote information.

.33 In the space provided below, describe how end user computing is used in the inventory cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.34 Answer the following questions relating to procedures and controls over end user computing related to the inventory cycle.

	Personnel	*N/A*	*No*	*Yes*
Inventory Cycle				
1. End user applications listed in paragraph .33 of this form have been adequately tested before use.				
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.				
3. Access controls limit access to the end user application.				
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.				
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.				

Information Processed by Outside Computer Service Organizations

.35 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the inventory cycle.

.36 In the space below, describe the inventory cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Financing

Investments and Debt

.37 This checklist may be used on any audit engagement of a medium to large business where investments or debt are a significant transaction cycle.

.38 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the financing cycle should be sufficient for you to understand—

- How investment decisions are authorized and initiated.
- How financing is authorized and captured by the accounting system.
- How management classifies investments as either trading, available-for-sale, or held to maturity.
- How investment and debt transactions are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of investments and debt.
- The processes used to prepare significant accounting estimates, disclosures, and presentation.

Interpreting Results

.39 This checklist documents your understanding of how internal control is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.40 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.41

	Personnel	*N/A*	*No*	*Yes*
I. Investments				
A. Authorization and Initiation				
1. Investment transactions are authorized by management.	_____	____	____	____

	Personnel	*N/A*	*No*	*Yes*
2. The company has established policies and procedures for determining when board of director approval is required for investment transactions.				
3. Management and the board assess and understand the risks associated with the entity's investment strategies.				
4. Investments are registered in the name of the company.				
5. At acquisition, investments are classified as trading, available-for-sale, or held-to-maturity.				
B. Processing				
6. Investment transactions are posted to the general ledger on a timely basis.				
7. Account statements received from brokers are reviewed for accuracy.				
8. Discounts and premiums are amortized regularly using the interest method.				
9. Procedures exist to determine the fair value of trading and available-for-sale securities.				
10. The general ledger is periodically reconciled to account statements from brokers or physical counts of securities on hand.				
C. Disclosures				
11. Management identifies investments with off-balance-sheet credit risk for proper disclosure.				
12. Management distinguishes between derivatives held or issued for trading purposes and those held or issued for purposes other than trading.				
13. The entity accumulates the information necessary to make disclosures about derivatives.				
II. Debt				
A. Authorization and Initiation				
1. Financing transactions are authorized by management.				
2. The company has established policies and procedures for determining when board of director approval is required for financing transactions.				
3. Management and the board assess and understand all terms, covenants, and restrictions of debt transactions.				
B. Processing and Documentation				
4. Debt transactions are posted to the general ledger on a timely basis.				
5. Any premiums or discount are amortized using the interest method.				
6. The company maintains up-to-date files of all notes payable.				

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	N/A	No	Yes
C. Disclosure				
7. Procedures exist to determine the fair value of notes payable for proper disclosure.	_____	____	____	____
8. Management reviews their compliance with debt covenants on a timely basis.	_____	____	____	____

End User Computing in the Financing Cycle

.42 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.43 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's MIS department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the financing cycle to process significant accounting information outside of the MIS department.

.44 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the MIS-operated accounting application. For example, a spreadsheet application calculates the amortization of premiums and discounts on investments.
- Make significant accounting decisions.
- Accumulate footnote information. For example, a spreadsheet application calculates five-year debt maturities for footnote disclosure.

.45 In the space provided below, describe how end user computing is used in the financing cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.46 Answer the following questions relating to procedures and controls over end user computing related to the financing cycle.

	Personnel	*N/A*	*No*	*Yes*
Financing Cycle				
1. End user applications listed in paragraph .45 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.47 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the financing cycle.

.48 In the space below, describe the financing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Property, Plant, and Equipment

Fixed Assets and Depreciation

.49 This checklist may be used on any audit engagement where fixed assets are a significant transaction cycle.

.50 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the property, plant, and equipment cycle should be sufficient for you to understand—

- How fixed asset transactions are authorized and initiated. (Additional information on the acquisition of fixed assets is documented on the Accounting Systems and Control Checklist for the Purchasing Cycle.)
- How fixed asset transactions and depreciation are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of fixed assets and depreciation.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.51 This checklist documents your understanding of how internal control over property, plant, and equipment is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.52 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.53

	Personnel	*N/A*	*No*	*Yes*
I. Fixed Assets and Depreciation				
A. Authorization and Initiation				
1. Fixed asset acquisitions and retirements are authorized by management.	_____	____	____	____
B. Processing and Documentation				
2. The company maintains detailed records of fixed assets and the related accumulated depreciation.	_____	____	____	____

	Personnel	N/A	No	Yes
3. Responsibilities for maintaining the fixed assets records are segregated from the custody of the assets.				
4. The general ledger and detailed fixed asset records are updated for fixed assets transactions on a timely basis.				
5. A process exists for the timely calculation of depreciation expense for both book and tax purposes.				
6. The general ledger and detailed fixed asset records are updated for depreciation expense on a timely basis.				
7. The general ledger is periodically reconciled to the detailed fixed asset records.				
C. Disclosure and Estimation				
8. Management identifies events or changes in circumstances that may indicate fixed assets have been impaired (SFAS 121).				
9. Management assesses and understands the risk of specialized equipment becoming subject to technological obsolescence (SOP 94-6).				

End User Computing in the Property, Plant, and Equipment Cycle

.54 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.55 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's MIS department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the MIS department.

.56 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the MIS-operated accounting application. For example, a spreadsheet application calculates the depreciation expense.
- Make significant accounting decisions. For example, a spreadsheet application is used to analyze lease or buy decisions.
- Accumulate footnote information.

.57 In the space provided below, describe how end user computing is used in the property, plant, and equipment cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.58 Answer the following questions relating to procedures and controls over end user computing related to the property, plant, and equipment cycle.

	Personnel	*N/A*	*No*	*Yes*
Property, Plant, and Equipment Cycle				
1. End user applications listed in paragraph .57 of this form have been adequately tested before use.				
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.				
3. Access controls limit access to the end user application.				
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.				
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.				

Information Processed by Outside Computer Service Organizations

.59 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the property, plant, and equipment cycle.

.60 In the space below, describe the property, plant, and equipment cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.

- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Payroll Cycle

Payroll Expense

.61 This checklist may be used on any audit engagement of a medium to large business where the payroll cycle is significant.

.62 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the payroll cycle should be sufficient for you to understand—

- How the time worked by employees is captured by the accounting system.
- How salaries and hourly rates are established.
- How payroll and the related withholdings are calculated.
- The accounting records and supporting documents involved in the processing and reporting of payroll.

Interpreting Results

.63 This checklist documents your understanding of how internal control over the payroll cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.64 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.65

	Personnel	N/A	No	Yes
I. Payroll				
A. Initiating Payroll Transactions				
1. Wages and salaries are approved by management.				
2. Salaries of senior management are based on written authorization of the board of directors.				
3. Bonuses are authorized by the board of directors.				
4. Employee benefits and perks are granted in accordance with management's authorization.				
5. Senior management benefits and perks are authorized by the board of directors.				
6. Proper authorization is obtained for all payroll deductions.				
7. Access to personnel files is limited to those who are independent of the payroll or cash functions.				
8. Wage and salary rates and payroll deductions are reported promptly to employees who perform the payroll processing function.				
9. Changes in wage and salary rates and payroll deductions are reported promptly to employees who perform the payroll processing function.				
10. Adequate time records are maintained for employees paid by the hour.				
11. Time records for hourly employees are approved by a supervisor.				
B. Processing Payroll				
12. Payroll is calculated using authorized pay rates, payroll deductions, and time records.				
13. Payroll registers are reviewed for accuracy.				
14. Standard journal entries are used to post payroll transactions to the general ledger.				
15. Payroll cost distributions are reconciled to gross pay.				
16. Payroll information such as hours worked is periodically compared to production records.				
17. Net pay is distributed by persons who are independent of personnel, payroll preparation, time-keeping, and check preparation functions.				
18. The responsibility for custody and follow-up of unclaimed wages is assigned to someone who is independent of personnel, payroll processing, and cash disbursement functions.				
19. Procedures are in place to estimate the fair value of stock-based compensation plans.				

End User Computing in the Payroll Cycle

.66 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.67 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the payroll cycle to process significant accounting information outside of the general accounting software.

.68 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the MIS-operated accounting application. For example, a spreadsheet accumulates time card information for batch processing.
- Make significant accounting decisions. For example, a spreadsheet application is used to accumulate payroll information by job for further analysis.
- Accumulate footnote information.

.69 In the space provided below, describe how end user computing is used in the payroll cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.70 Answer the following questions relating to procedures and controls over end user computing related to the payroll cycle.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Personnel	*N/A*	*No*	*Yes*
Payroll Cycle				
1. End user applications listed in paragraph .69 of this form have been adequately tested before use.	_____	____	____	____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	____	____	____
3. Access controls limit access to the end user application.	_____	____	____	____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	____	____	____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	____	____	____

Information Processed by Outside Computer Service Organizations

.71 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the payroll cycle.

.72 In the space below, describe the payroll cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

AAM Section 4500
Flowcharting

Introduction

.01 AAM sections 4300 and 4400 provided a series of forms you may use to document your understanding of a client's internal control system. Included in those forms were several Financial Reporting Information Systems and Controls Checklists to document your understanding of the accounting system and controls for significant account balances. As an alternative or supplement to those checklists, you may wish to include a flowchart. In some instances, a flowchart may be easier to read and analyze than a checklist or memo.

.02 In general you will want to identify the following for your client's significant accounts and transactions:

- Source documents
- The conversion of documents to computer media
- The nature of computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.03 An entity's financial reporting information system may create many documents, files, and reports that are useful for managing the organization. As an auditor you need to understand and document only those aspects that are relevant to the audit of the financial statements. Documents, files, and reports that are not relevant to your audit need not be presented on a flowchart. For example, the same system that produces sales invoices and a sales journal may also produce a report of sales by salesperson. An understanding of this report may not be necessary to plan the audit.

.04 It is *not* necessary for you to understand how every copy of accounting documents may be used by the client. When the client prepares numerous copies of a document, you are concerned only with those relevant to the flow of transactions from initiation to inclusion in the financial statements.

Example: Jones Grocery

.05 *Jones Grocery is an eight-store chain of independent grocery stores in Anytown. The accounts payable cycle is described in the following paragraphs.*

.06 *When goods are received at each store, the store manager or another responsible employee counts and inspects the goods and checks them against the packing slip. A copy is retained by the store manager and the original is forwarded to the main store for processing.*

.07 *All vendor invoices are mailed directly to the main store, to the attention of Mrs. Jones. Her assistant matches the invoices to the packing slips received from individual stores. He investigates any discrepancies between quantities billed and quantities received, per the packing slips. He also follows up on any invoices received for which the store manager has not forwarded the packing slip.*

.08 *The invoices are coded and then entered into the accounts payable module of the company's accounting software system. The invoices with attached packing slips are stored in a temporary file until they are paid.*

.09 *The computer system automatically updates the general ledger. It also produces two reports: an accounts payable subledger and an accounts payable aging. When statements are received from the vendors, Mrs. Jones checks them against the accounts payable subledger and investigates any differences. Periodically, she reconciles the accounts payable subledger to the general ledger. The accounts payable aging is checked to make sure totals agree to the accounts payable subledger.*

.10 *Mr. Jones writes the checks. There is a module in the software that links the accounts payable module to the cash disbursements module and automatically prints checks, but this was too confusing to install. The volume of checks is not that great, so the company prepares them manually.*

.11 *Vendors are paid by invoice, not by statement. Payments are made monthly. Mr. Jones uses the accounts payable aging to determine which invoices should be paid. He marks these on the report and gives it to his secretary to prepare the checks. The matched vendor invoices and receiving reports that have been stored in temporary files are attached to the typed check for Mr. Jones' signature. Two check copies are retained: one is attached and filed with the invoice and a second is filed numerically.*

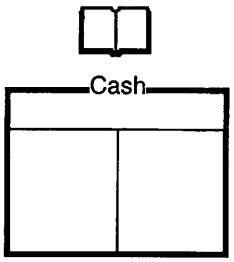
.12 *Once the checks are signed, they are coded and entered into the cash disbursements module of the accounting software package. The software updates the general ledger, the accounts payable subledger and aging, and produces a cash disbursements report. It also produces a cash management report that may be used to estimate the future cash needs of the business.*

.13 *Monthly, the cash disbursements report is used to reconcile the cash accounts to the bank statements.*

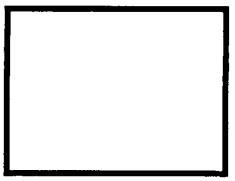
The Flowchart

.14 The flowchart on the following page illustrates how an auditor might flowchart the accounts payable system described in AAM section 4500.05 through .13. The following symbols have been used.

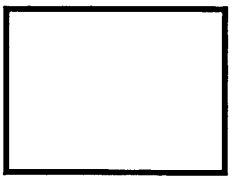
Copyright © 1996, American Institute of Certified Public Accountants, Inc.



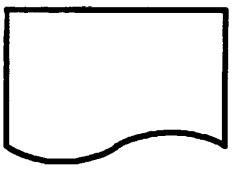
General ledger



Computer process



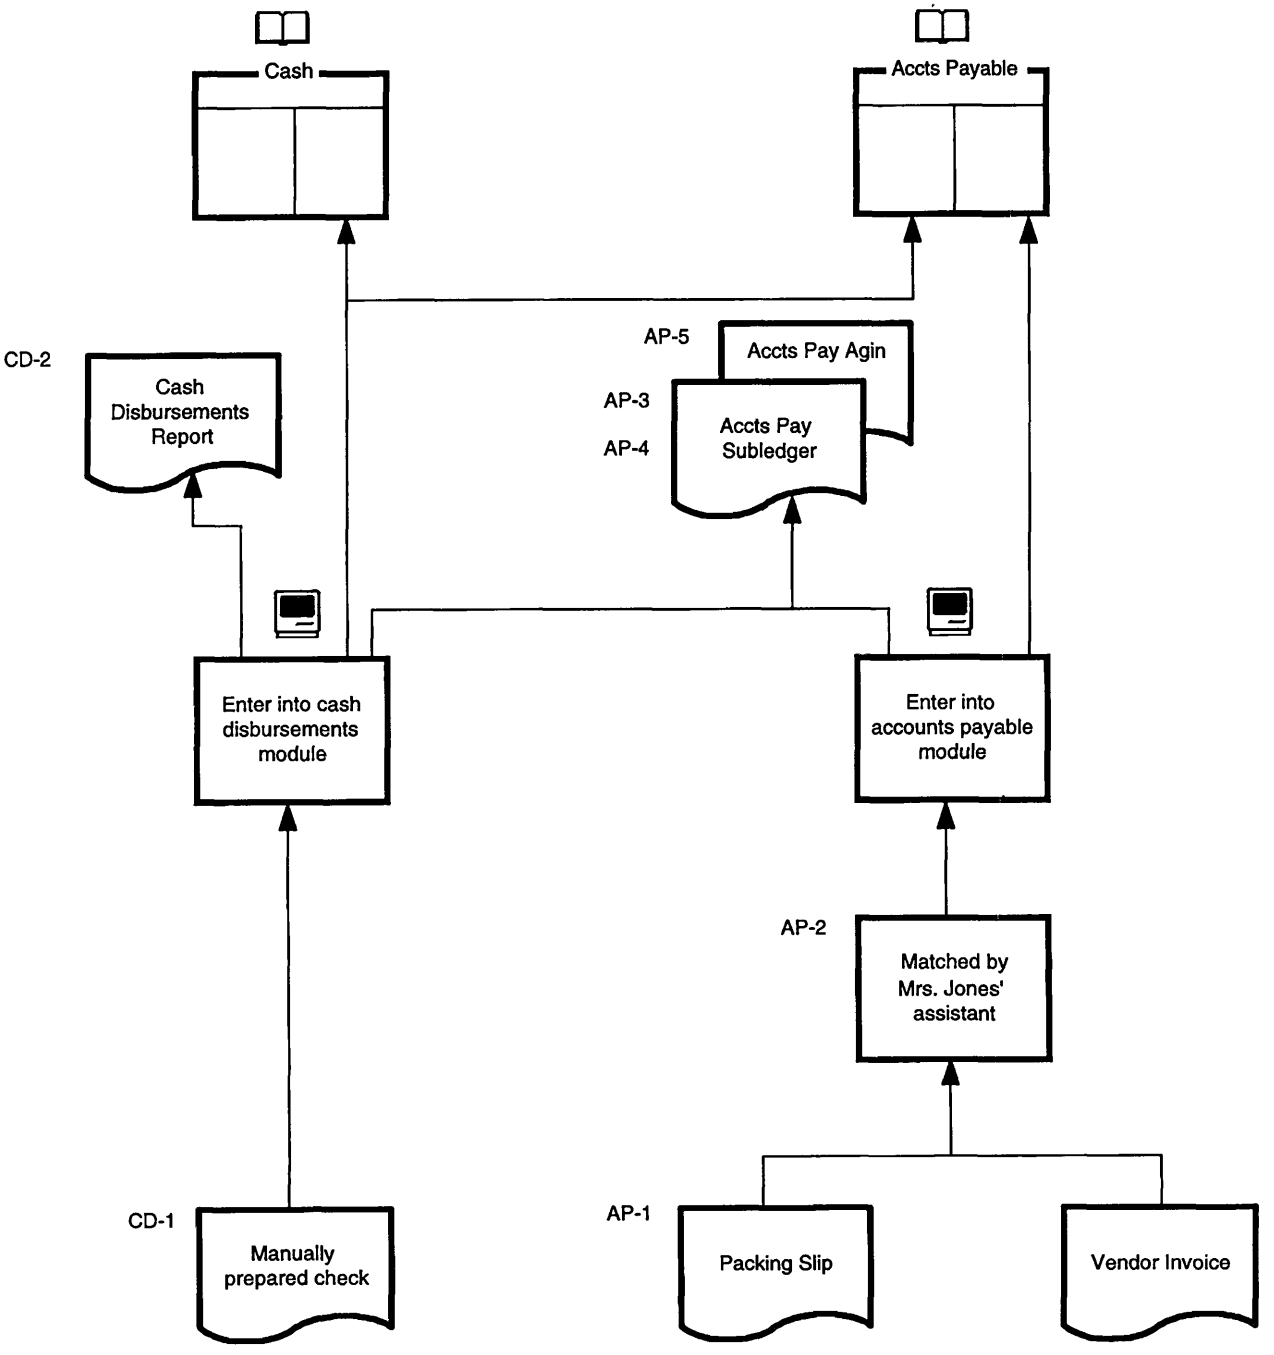
Manual process



Source document or subledger

AP-1 Control procedure

Jones Grocery
Accounts Payable



Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.15 The flowchart should be read from the bottom to the top. The initiation of transactions and related source documents are depicted at the bottom of the page. The processing is described as an upwards flow until the information reaches the general ledger at the top of the page.

.16 Following the flowchart is a brief memo describing the controls that are documented on the flowchart.

Jones Grocery
Accounts Payable

Control No.	*Description*
AP-1	Store managers count and inspect goods received and compare to the packing slip.
AP-2	Packing slips are matched to vendor invoices and discrepancies are investigated.
AP-3	Accounts payable subledger is checked against monthly statements received from vendors. Differences are investigated.
AP-4	Accounts payable subledger is reconciled to the general ledger
AP-5	Accounts payable aging is reconciled to accounts payable subledger
CD-1	Accounts payable aging is used to determine which invoices to pay. Invoices and packing slips are attached to checks ready for signature.
CD-2	Cash disbursements journal is used to reconcile cash balances to monthly bank statements.

Analysis

.17 The flowchart on the preceding page includes only those documents, records, and processes that are relevant to the audit of the financial statements. The narrative description of the system included in AAM section 4500.05 through .13 included several items that are not relevant to the audit. These items are that—

- Individual stores maintain a copy of the packing slip (AAM section 4500.06).
- Invoices and packing slips are stored in a temporary file (AAM section 4500.08).
- Two check copies are retained: one is attached and filed with the invoice and a second is filed numerically (AAM section 4500.11).
- The system generates a cash management report (AAM section 4500.12).

.18 Because the above items are not relevant to the audit, they are not included on the flowchart.

.19 The flowchart starts at the bottom of the page with the initiation of the transaction. In the case of the cash disbursement, the transaction is initiated when Mr. Jones signs and mails the checks. Reviewing the accounts payable aging and checking off invoices is not a transaction that has accounting significance. This is a control activity that is described in narrative form. It is not depicted on the flowchart.

.20 The flowchart depicts the direct flow of accounting information, from the initiation of the transaction to the inclusion in the general ledger. Documents, reports, and processes outside of this direct flow need not be documented.

[*The next page is 4601.*]

AAM Section 4600

Assessing Control Risk Below the Maximum

Introduction

.01 As described in AAM section 3125, you may choose one of two general audit strategies.

- A primarily substantive approach (however, see paragraph .03 below), where control risk is assessed at or slightly below the maximum, or
- An approach where control risk is assessed below the maximum.

.02 Control risk should be assessed at the maximum (primarily substantive approach) for some or all assertions if—

- Controls are unlikely to pertain to an assertion.
- Controls are unlikely to be effective.
- It would not be efficient for you to obtain evidential matter to evaluate the effectiveness of controls.

.03 In entities where significant information is transmitted, processed, maintained, or accessed electronically, the auditor may determine that it is not practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. The competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. (The term electronic evidence means information transmitted, processed, maintained, or accessed by electronic means and used by an auditor to evaluate financial statement assertions.) Without testing the internal control surrounding the electronic evidence, a lack of credibility may not be recognized by the auditor. Therefore, when using electronic evidence, auditors need to question the appropriateness of the approach of performing only substantive testing if ineffective controls exist, or if assessed control risk is at the maximum level. Given the nature of electronic evidence, it usually will be necessary to test the surrounding internal control (to gather evidence to support an assessed level of control risk below the maximum) if that electronic evidence is significant in supporting an auditor's conclusion regarding certain financial statement assertions. If the auditor concludes control risk must be assessed at the maximum in such circumstances, or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the scope limitation.

Practice Tip

Read the AICPA's Auditing Procedure Study entitled *The Information Technology Age: Evidential Matter in the Electronic Environment* for helpful and valuable guidance about the implications of electronic evidence on an audit. Call the AICPA at 1 (800) 862-4272 and ask for product number 021068.

You may choose to assess control risk at the maximum either for audit efficiency purposes or because of ineffective controls. If you choose a primarily substantive audit because the controls are ineffective, you may have additional concerns about the auditability of the entity and other questions. Assuming you are able to overcome auditability concerns, you may respond by heightening the degree of professional skepticism, assigning more experienced staff, and changing the nature, timing, and extent of substantive procedures.

.04 Assessing control risk below the maximum involves—

- Identifying specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions.
- Designing and performing tests of controls to evaluate the effectiveness of such controls.

.05 Controls can have either a pervasive effect on many assertions or a specific effect on an individual assertion, depending on the nature of the particular control component involved. The more direct the relationship between the control and the assertion, the more effective that control may be in reducing control risk for that assertion. For example, regular physical inventory count procedures are more likely to detect and correct misstatements than management's monitoring of gross-profit percentages.

.06 Note that the choice of an audit strategy is done at the *assertion* level and is not a global strategy for the entire audit. For some assertions, you may choose a primarily substantive approach; for other assertions, you may plan to assess control risk below the maximum.

.07 *Jones Grocery is a small chain of independent grocery stores in Anytown. Assume you have been the auditor of Jones Grocery for several years. During that time you have helped Mr. and Mrs. Jones design and implement the procedures used for the annual inventory count. The count itself is performed by an outside inventory count company that specializes in taking inventory at grocery stores. The outside company is supervised by Jones Grocery employees. Based on this knowledge of the controls for the physical inventory count, you may assess internal control risk below the maximum for the existence assertion related to inventory.*

.08 In the above example, the audit strategy was determined at the assertion level. The physical count of inventory is a control directly related to the existence assertion. It has little relevance to the valuation assertion and no relevance to the completeness assertion. Thus, you are able to modify tests related to the existence assertion, for example, reducing the number of test counts or stores where inventory is observed. Substantive audit procedures related to other assertions (for example, proper pricing) should not be modified.

Performing Tests of Controls

.09 Tests of controls are directed toward the effectiveness of either—

- The design of the control, or
- The operation of the control.

.10 Tests directed toward the effectiveness of the *design* of controls are concerned with whether the control is suitably designed to prevent or detect material misstatements in specific financial statement assertions. Tests to obtain such evidential matter ordinarily include—

- Tests performed in previous audits.
- Inquiries of appropriate personnel.
- Inspection of documents and reports.
- Observation of the application of specific controls.

.11 Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. These tests ordinarily include—

- Tests performed in previous audits.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Inquiries of appropriate personnel.
- Inspection of documents and reports indicating performance of the control.
- Observation of the application of specific controls.
- Reperformance of the application of the controls by the auditor.

.12 For controls for which documentary evidence exists, you may choose to examine the documents. For other controls (for example, segregation of duties) documentation may not exist. These controls often can be tested only by inquiry and observation.

.13 For example, you may decide to obtain evidence of the effectiveness of the design and operation of an entity's budgetary control methods. You could make inquiries of management about what variations from budget are investigated and the controls for reporting the reasons for these variances. Based solely on this inquiry, you would generally assess control risk at the maximum.

.14 The effectiveness of tests of controls may be increased by examining reports generated and asking more detailed question (such as about whether personnel follow up on budgets or about the timeliness of the investigations or the nature of the reports). By combining these inquiries with examination of written explanations of variances, the auditor can determine the operating effectiveness of these controls. This documentation may provide direct evidence for assessing the effectiveness of these controls in preventing or correcting misstatements in the financial statements.

.15 When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. Accordingly you should consider that—

- Evidence from prior audits may be affected by subsequent changes in internal control.
- Inquiry alone generally will not provide sufficient evidential matter to support a conclusion about the effectiveness of a specific control.
- Evidence from inquiry alone depends on the extent of the inquiries.
- Observation of employees in the performance of their duties may corroborate evidence obtained from other sources, but pertains only to the point in time at which the observation was made.
- Evidence from inspection of documents depends on the extensiveness of inspections made.

Evidence From Prior Audits

.16 You can use evidence from prior audits to help support your assessment of control risk in the current audit. To evaluate the use of such prior period evidential matter for the current audit, you should consider—

- The significance of the assertion involved.
- The specific controls that were evaluated during the prior audits.
- The degree to which the effective design and operation of those controls were evaluated.
- The results of the tests of controls used to make those evaluations.
- The evidential matter about design or operation that may result from substantive tests performed in the current audit.
- The time that has elapsed since the performance of the tests of controls.

.17 When using evidence from prior audits, you should consider that changes—either in the controls themselves or in personnel—may have occurred subsequent to the prior audit. You should obtain current

evidence about whether changes have occurred subsequent to the prior audit, as well as the nature and extent of any changes. You should obtain evidential matter about changes in effectiveness of design and about changes in operating effectiveness.

.18 When changes in internal control between audits are relatively minor, evidential matter obtained in prior audits may provide assurance for the current audit. Conversely, changes may be so significant that evidential matter obtained in prior audits may provide limited or no assurance for the current audit.

.19 You should also obtain evidence in the current audit about the continued operating effectiveness of controls for which the design has remained unchanged. Decisions about the degree of assurance from prior audit evidence and about additional evidential matter needed in the current audit are affected by adverse conditions that may affect whether the controls are likely to continue to operate effectively, such as—

- Changes in the nature of transactions being processed or increases in volume.
- Changes in management attitudes or reduction of supervision.
- High turnover of employees.
- Increases in responsibilities or workloads of employees.
- The effect of related controls that reinforce the continued effective operation of the controls, such as the following:
  - — Documented procedures manuals.
  - — Close management supervision, including frequent communication and responsibility reporting.
  - — Computer general control activities.

.20 You should obtain evidence in the current audit about the operating effectiveness of changed controls. If there are significant changes in design, prior evidence provides little, if any, assurance in the current audit.

Computer Applications

.21 As described in AAM section 4200, your understanding of the control activities in the computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up activities
- Computer general control activities and manual follow-up activities

.22 User controls may provide evidence that the programmed control activities operate effectively, in which case you may choose to understand and test the user controls. If these controls are designed and operating effectively, these tests may support a lower control risk assessment.

.23 You might plan an audit strategy of testing programmed control activities and the related manual follow-up. For example, you might use computer-assisted audit techniques, such as generalized audit software or the processing of test data, to test the programmed control activities that produce an exception report. These tests provide evidence about the design and operation of programmed control activities; however, they do not provide evidence about the consistent application of the control activities. Evidence is provided only about the point in time when they are performed. The use of computer-assisted audit techniques expands the ability to analyze data, recognize patterns, and test the assertions contained in the financial statements. However, evidence produced for the auditor by software may not be competent due to the functionality of and processing used by the software. When used properly, computer-assisted audit techniques enhance auditor efficiency and effectiveness.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.24 If you test programmed control activities you also need to test the related manual follow-up activities, for example the activities used to follow up on the items listed on an exception report. The effectiveness of the control activities relates to both an accurate computer produced exception report and an effective manual follow-up of the exceptions.

.25 The degree to which you may need to test programmed control activities depends on the effectiveness of computer general control activities, especially the effectiveness of controls over the development of and changes to programs.

[*The next page is 4701.*]

AAM Section 4700
The Auditor's Assessment of Control Risk

.01 Most of the auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter concerning the assertions in such financial statements. SAS No. 31, *Evidential Matter*, as amended by SAS No. 80 (AU section 326), presents assertions as representations by management that are embodied in financial statement components. In obtaining evidential matter in support of financial statement assertions, the auditor develops specific audit objectives in light of those assertions. There is not necessarily a one-to-one relationship between audit objectives and audit procedures.

.02 Assertions are classified in SAS No. 31, as amended (AU section 326), according to the following broad categories:

- *Existence or occurrence.* Reported assets and liabilities actually exist at the balance-sheet date, and transactions reported in the income statement actually occurred during the period covered.
- *Completeness.* All transactions and accounts that should be included in the financial statements are included, and there are no undisclosed assets, liabilities, or transactions.
- *Rights and obligations.* The entity owns and has clear title to assets and liabilities which are the obligations of the entity.
- *Valuation or allocation.* The assets and liabilities are valued properly and the revenues and expenses are measured properly.
- *Presentation and disclosure.* The assets, liabilities, revenues, and expenses are properly classified, described, and disclosed in the financial statements.

.03 SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319), and SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55*, state that the auditor should assess control risk in terms of assertions for material components of the financial statements. Many practitioners may consider audit objectives that relate to the assertions when assessing control risk. SAS Nos. 55 and 78 (AU section 319) do not preclude or require any specific approach as long as control risk is ultimately assessed at the assertion level. For example, an approach of identifying internal control policies and procedures and relating those to significant audit objectives for account balances or transaction classes would be appropriate. Practice aids for documenting the assessed level of control risk using this approach are illustrated in AAM section 4700.05–.10.

.04 The following working papers are to be used to document the auditor's assessment of control risk. They are to be completed when it is expected that control risk is to be assessed below maximum for certain assertions. The working papers should be modified as needed and are not meant to cover all types of controls. They are to initially be completed in the planning phase of the audit. Based on the results of tests of controls, the auditor then determines whether the initial assessment of control risk is appropriate and documents their conclusion.

AAM Section 5000
Audit Approach and Programs

The material included in these sections on audit approach and programs is presented for illustrative purposes only. The comments, illustrative audit objectives, and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent, and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

This manual is a nonauthoritative kit of practice aids. Accordingly, these sections include minimal explanation and discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate. Users should also note that this manual does not deal with specialized industry problems; reference should be made to applicable AICPA Audit and Accounting Guides.

AAM Section 5100
Designing the Audit Program

.01 The objective of an audit is to express an opinion on whether financial statements present fairly in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with generally accepted auditing standards. The procedures that the auditor plans to use to gather evidence are outlined in an audit program.

.02 Since the audit program describes the evidence-gathering steps to be used in the audit, it should be carefully designed. Designing an audit program involves three major considerations:

a. Deciding *what* procedures to apply—the *nature* of audit tests

b. Deciding *when* to apply the procedures—the *timing* of audit tests

c. Deciding *which* items to apply the procedures to—the *extent* of audit tests

.03 Flowchart 1 presents an overview of the structure of the audit process. To design an audit program that is efficient and effective, the auditor should—

a. Identify the client's assertions regarding each material component of the financial statements.

b. Consider the risk of material misstatement due to error or fraud.

c. Establish specific audit objectives relating to the assertions in the financial statements.

d. Determine the audit procedures to be performed to accomplish the audit objectives.

e. Determine when to perform the audit procedures.

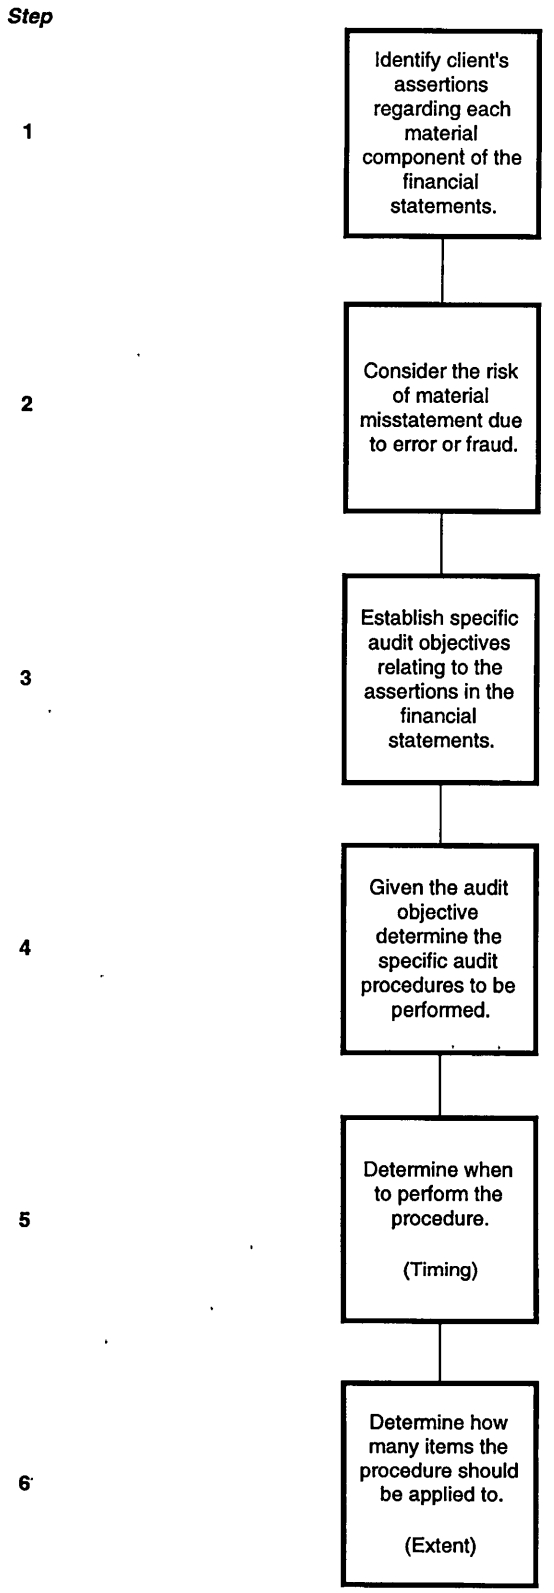
f. Determine which of many items to apply audit procedures to.

.04 The six steps illustrated in flowchart 1 result in a determination of the nature, timing, and extent of audit tests.

Financial Statement Assertions

.05 According to SAS No. 31, *Evidential Matter*, as amended by SAS No. 48 and SAS No. 80 (AU section 326), the independent auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter concerning the assertions in such financial statements. These assertions are embodied in the account balance, transaction class, and disclosure components of financial statements and are classified according to the following broad categories:

Flowchart 1
Audit Logic Process



Copyright © 1997, American Institute of Certified Public Accountants, Inc.

a. *Existence or Occurrence.* Reported assets and liabilities actually exist at the balance-sheet date, and transactions reported in the income statement actually occurred during the period covered.

b. *Completeness.* All transactions and accounts that should be included in the financial statements are included, or there are no undisclosed assets, liabilities, or transactions.

c. *Rights and Obligations.* The company owns and has clear title to assets and liabilities are obligations of the company.

d. *Valuation or Allocation.* The assets and liabilities are valued properly, and the revenues and expenses are measured properly.

e. *Presentation and Disclosure.* The assets, liabilities, revenues, and expenses are properly classified, described, and disclosed in the financial statements.

Developing Audit Objectives

.06 A misrepresentation of any of the five financial statement assertions could cause a material misstatement in the financial statements. The auditor should consider the risk of material misstatement for each assertion in the financial statements, and then obtain evidence to support the financial statement assertions to reduce the risk of material misstatement to an acceptably low level. To determine what type of evidence to obtain, the auditor develops specific audit objectives related to each assertion.

.07 In determining audit objectives, the auditor should evaluate each of the five assertions as they relate to the specific account balance or class of transactions being examined. For example, if the auditor is attempting to gather evidence on the assertion of *existence* of inventory, the auditor's objective would be to gather evidence that inventory included in the balance sheet physically existed at the date of the balance sheet.

Figure 1

Relationship of Assertions and Objectives for Inventory

Financial Statement Assertion	*Illustrative Audit Objectives*
Existence or occurrence	—Inventories included in the balance sheet physically exist.
Completeness	—Inventory quantities include all products, materials, and supplies on hand. —Inventory quantities include all products. materials, and supplies owned by the client that are in transit or stored at outside locations. —Inventory listings are accurately compiled and the totals are properly included in the inventory accounts.
Right and obligations	—The entity has legal title or similar rights of ownership to the inventory.
Valuation or allocation	—Inventories are properly stated at cost (except when market is lower).
Presentation and disclosure	—Inventories are properly classified in the balance sheet as current assets.

An example of the relationship between financial statement assertions and audit objectives is shown in Figure 1.

Audit Tests

.08 After the auditor has determined the audit objectives, the method of achieving the objectives should be selected. Although these methods are referred to by various names such as audit procedures, audit techniques, and audit tests, they represent the evidence-gathering methods auditors use. The basic requirement for determining audit procedures, according to SAS No. 31, paragraph 13, as amended (AU section 326.13), is that:

> The procedures adopted should be adequate to achieve the auditor's specific objectives and reduce detection risk to a level acceptable to the auditor. The evidential matter obtained should be sufficient for the auditor to form conclusions concerning the validity of the individual assertions embodied in the components of financial statements.

.09 Some audit procedures can satisfy a combination of audit objectives for a given account balance or class of transactions. For example, the auditor's observation of a physical inventory count can provide evidence that inventories physically exist and that inventory quantities include all products, materials, and supplies on hand.

.10 Audit tests or procedures can be classified or categorized in a variety of ways. The most common classifications are by purpose of the test or by type of test.

Purpose of the Test

.11 According to SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78 (AU section 319), the purpose of performing audit tests are:

a. To evaluate the effectiveness of the design and operation of internal controls. These tests are referred to as tests of controls.

b. To detect material misstatements in financial statement assertions. These tests are referred to as substantive tests.

.12 Substantive tests are procedures applied to account balances or classes of transactions to determine if there are material misstatements in the financial statements. The substantive test that the auditor performs consists of tests of details of transactions and balances and analytical procedures. In assessing control risk, the auditor also may use tests of details of transactions as tests of controls. The objective of tests of details of transactions performed as substantive tests is to detect material misstatements in the financial statements. The objective of tests of details of transactions as tests of controls is to evaluate whether controls operated effectively. Although these objectives are different, both may be accomplished concurrently through performance of a test of details on the same transaction.

.13 If the control risk is assessed at less than the maximum level, the auditor should obtain sufficient evidential matter to support that assessed level. The evidential matter that is sufficient to support a specific assessed level of control risk is a matter of auditor judgment. The type of evidential matter obtained all bear on the degree of assurance provided. Since the auditor's substantive testing is affected by the quality of the controls, the auditor is concerned with whether the controls established are designed and operating effectively. The role of tests of controls is to justify this assertion.

.14 The nature, timing, and extent of substantive tests are generally based on the assessment of inherent risks, control risk, and other risk assessments made during the planning phase of the engagement. For example, the higher the assessment of control risk, the more comprehensive the substantive tests should be. If analytical procedures performed during the planning phase of the engagement suggest that some account balances are unexpectedly high or low, the auditor may determine that those balances warrant more testing. Tests' effectiveness can be modified by changing their nature (for example, tests of balances versus analytical

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

procedures), timing (testing as of the balance-sheet date versus an interim date), or extent (testing 100 percent versus sampling). Similarly, the auditor may be able to change the same factors to make audits more efficient. While the main objective is to perform an effective audit, if alternative tests are equally effective, the auditor should choose the most efficient one.

.15 Planning occurs throughout the engagement and as a result the auditor might have to reassess risk as the engagement unfolds. For example, even if tests of controls indicated that an area had low risk and the auditor planned substantive tests accordingly, information might come to the auditor's attention during the audit that requires reassessment of the risk. Such information might include, for example, unexpected deviations from control procedures, misstatements that the internal controls should have caught, or new information about transactions or balances.

.16 The most effective and efficient audit strategy for a small business engagement, without a significant electronic environment, generally is to assess the control risk at the maximum level (the greatest probability that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by an entity's internal control). In this case, the auditor will use the knowledge obtained from the understanding of internal control and the assessed level of control risk in designing substantive tests for financial statement assertions. In situations where electronic evidence (i.e., information transmitted, processed, maintained, or accessed by electronic means—for example, using a computer, scanner, sensor, or magnetic media) will be significant in gaining competent evidential matter regarding financial statement assertions, the ability to rely solely on substantive tests may not be present inasmuch as the competence of electronic evidence depends on the effectiveness of internal control over its validity and completeness. In such circumstances, the auditor should perform tests of controls to gather evidence to support an assessed level of control risk below the maximum for affected assertions. If the auditor concludes control risk must be assessed at the maximum in such circumstances, or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the resulting scope limitation.

Type of Test

.17 Auditors perform four types of tests:

a. Analytical procedures

b. Inquiry and observation

c. Tests of transactions

d. Tests of balances

The relationship of audit tests by purpose to audit tests by type is shown in figure 2.

Analytical Procedures

.18 Analytical procedures are tests applied to the *total* recorded amounts and are based on the existence of plausible and consistent relationships among financial statement elements or between financial and nonfinancial amounts. Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures.

b. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions.

c. As an overall review of the financial information in the final review stage of the audit.

.19 Analytical procedures can be effective:

- For certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts).
- When the relationships between amounts are very predictable.
- When the data used to develop expectations based on the relationship are reliable.
- When relatively precise expectations can be developed.

.20 Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they should be used whenever practical.

.21 SAS No. 56, *Analytical Procedures* (AU section 329), describes analytical procedures as follows:

> Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:
>
> *a.* Financial information for comparable prior period(s) giving consideration to known changes.
>
> *b.* Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data.
>
> *c.* Relationships among elements of financial information within the period, such as interest income in relation to the average loan balance.
>
> *d.* Information regarding the industry in which the client operates—for example, cost of funds information.
>
> *e.* Relationships of the financial information with relevant nonfinancial information.

.22 Whenever analytical procedures are applied as substantive tests, the auditor must apply the following procedures:

a. Consider whether the relationship is plausible and predictable.

b. Consider whether the data used for the comparison is reliable.

c. Consider whether the account balance tested is consistent with the auditor's expectations. If it is not consistent, obtain the client's explanation for the variance and get evidence to corroborate the client's explanation.

.23 SAS No. 56 (AU section 329) also requires that analytical procedures be performed at the planning and final review stages of the audit.

Inquiry and Observation

.24 Testing of controls that leave no audit trail of documentary evidence is usually tested by inquiry and observation. Auditors make inquiries of different individuals and conduct observation tests to determine who performs a particular activity or how or when the activity is done. For example, the auditor may ask different individuals about who posts to the receivables ledger, the auditor may observe who prepares the bank reconciliation, or the auditor may observe when cash is deposited in the bank. Typically, inquiry alone is not sufficient evidence of effective operation of controls.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.25 Inquiry and observation can also be used as substantive tests. For example, an audit procedure such as observation of a *physical asset* to determine that it exists is a substantive test relating to the existence assertion. Likewise, inquiries regarding subsequent events would be a substantive test because they provide evidence regarding the adequacy of disclosures in the financial statements.

Matrix of Audit Tests by Purpose and Type *Figure 2*

		Purpose of Test	
		Substantive Test	Test of Controls
Type of Test	Analytical Procedures	Yes Example A	No
	Inquiry and Observation	Yes Example H	Yes Examples B, C, I
	Tests of Transactions	Yes Example D	Yes Examples E, F
	Tests of Balances	Yes Examples G, H	No

Examples:

A—Comparison of this year's expenses with last year's expenses

B—Observation by auditor that cash is deposited daily by a specific clerk

C—Inquiry by auditor about who deposits cash and how often

D—Examination of invoices to support additions (specific transactions) to fixed assets account during year

E—Examine sales invoices to see if initials of credit manager are there to indicate a credit file and credit approval (Inspection Test)

F—Vouch from sales invoices to credit files to see if customer has a credit file and has been approved for credit (Reperformance Test)

G—Confirmation of year-end balances in accounts receivable

H—Observation of the existence of a building

I—Extended walk-through of an application

Tests of Transactions

.26 Tests of transactions consist of the examination of the documents and accounting records involved in the processing of specific transactions. Such procedures can accomplish both testing of controls and substantive testing and are sometimes used concurrently.

.27 Tests of controls are accomplished when the auditor examines transaction documentation to determine if controls have been applied as prescribed. Tests of transactions as tests of controls can be classified as either inspection tests or reperformance tests. If the auditor examines documentation, the tests of controls are classified as an inspection test. Alternatively, if the auditor repeats controls performed by the client, the

tests of controls are classified as reperformance tests. For example, a control may require employees to match vendors' invoices with purchase orders and receiving reports and then initial the invoices to indicate that the procedure was performed. If the auditor tests the control by examining invoices for initials, the test is an inspection test. If the auditor tests the control by comparing vendors' invoices with purchase orders and receiving reports, the test is a reperformance test. Reperformance tests may also take the form of simulated processing, or processing of test data. Regardless of whether the auditor tests by inspection or reperformance, the test of control is a test of transactions.

.28 The substantive objective of tests of transactions is accomplished when the auditor examines transaction documentation to determine if dollar errors exist in a balance. For example, if the auditor examines documentation supporting individual charges (debits) to an equipment account to determine that the account balance is fairly stated, the test is classified as a substantive test of transactions.

Tests of Balances

.29 Tests of balances are procedures applied to the *individual items* that compose an account balance or class of transactions. The tests involve confirmation, inspection, or observation procedures to provide evidence about the recorded amount. Tests of balances are substantive tests designed to identify misstatements by a direct test of the ending balance rather than by testing the transactions that make up that balance.

.30 Substantive tests of transactions and tests of balances are interrelated in that each class of transactions affects a related account balance. Since financial statement amounts are the accumulation of transactions, an auditor may test the transactions that enter the account (that is, the debits and credits), the account balance itself (that is, the ending balance), or both.

Linking Audit Procedures to Objectives

.31 To design an audit program, the audit should select audit procedures that achieve specific audit objectives developed from the five broad assertions for each material account balance in the financial statements.

.32 In selecting audit procedures to achieve the audit objectives developed, an auditor considers the following, according to SAS No. 31, as amended:

a. The risk of material misstatement of the financial statements including the assessed levels of control risk.

b. The expected efficiency and effectiveness of possible audit procedures.

c. The nature and materiality of the items being tested.

d. The kinds and competence of available evidential matter.

e. The nature of the audit objective to be achieved.

The Completeness Assertion

.33 SAS No. 31, paragraph 5, as amended (AU section 326.05), discusses the completeness assertion:

> Assertions about completeness address whether all transactions and accounts that should be presented in the financial statements are so included. For example, management asserts that all purchases of goods and services are recorded and are included in the financial statements. Similarly, management asserts that notes payable in the balance sheet include all such obligations of the entity.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.34 Substantive tests that provide assurance regarding the completeness assertion are those that provide evidence about whether all transactions have been captured by the client's accounting system and are included in the financial statements.

.35 Gathering evidence about whether all transactions have been recorded is one of the most difficult audit objectives to achieve. Evidence of completeness can be even more difficult to obtain when a client does not have good internal control or has only an informal record-keeping system. Because these two characteristics often apply to small business, satisfying the completeness objective can be difficult for the auditor in a small business engagement.

.36 Completeness relates to whether all items have been included in the financial statements. The completeness assertion is violated if a transaction or account is omitted from the financial statements. If a transaction is merely recorded in the wrong account, there is no violation of the completeness assertion since the transaction is still recorded in the financial statements. In such a situation, the accounts are not incorrect because of a completeness error; rather, they are incorrect because of a classification error. A classification error is a violation of the presentation and disclosure assertion.

.37 For many accounts, the completeness assertion is the most difficult to test. The difficulty arises because the auditor must gather evidence about potential unrecorded items. Sources of audit evidence regarding unrecorded items often are not readily available.

Lack of Evidence

.38 To give an unqualified opinion, the auditor must gather sufficient, competent evidential matter to reduce the level of audit risk to an appropriately low level. SAS No. 31, paragraph 23, as amended (AU section 326.23), provides the following guidance when the auditor is unable to gather sufficient evidence to be satisfied regarding the completeness assertion:

> To the extent the auditor remains in substantial doubt about any assertion of material significance, he must refrain from forming an opinion until he has obtained sufficient competent evidential matter to remove such substantial doubt, or he must express a qualified opinion or a disclaimer of opinion.

.39 SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AU section 110.02), states:

> The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. The auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by errors or fraud, that are not material to the financial statements are detected.

.40 SAS No. 31, as amended, requires the auditor to obtain evidence concerning inclusion in the financial statements of all types of transactions that the auditor has reason to believe has occurred based on the auditor's knowledge of the client and the industry in which it operates. Utilizing professional skepticism while performing the audit, the auditor should question transactions that are peculiar to the client or industry as well as question the lack of specific types of transactions.

.41 The results of a research study on audit problems encountered in small business engagements (Auditing Research Monograph No. 5) indicates that many practitioners sometimes accept client representa-

tions as sufficient audit evidence when completeness of recorded transactions cannot be substantiated.[1] Client representations are part of the evidential matter the auditor gathers, but they should not be used as a substitute for the performance of those procedures considered necessary to form an opinion on the financial statements. An auditor cannot rely on client representations alone as sufficient audit evidence to substantiate the completeness of account balances and classes of transactions. Obtaining such representations complements but does not replace other auditing procedures that the auditor should perform. [See Auditing Interpretation No. 3 of SAS No. 31, "The Auditor's Consideration of the Completeness Assertion" (AU section 9326.18–.21).] When an auditor is unable to form an opinion, even though representations from the client have been received, there is a limitation on the scope of the audit that precludes the auditor from issuing an unqualified opinion (SAS No. 19, *Client Representations*, paragraph 12 [AU section 333.12]).

Controls for Completeness

.42 Controls for completeness are designed (1) to count or otherwise identify transactions executed by the entity and (2) to provide reasonable assurance that all transactions have been accurately recorded by the accounting system. For example, completeness controls over purchases can include reconciliation of all pre-numbered receiving reports that are missing, not recorded, or not otherwise accounted for. Many auditors prefer to rely on controls gathering evidence of completeness since extensive substantive tests for completeness may be more difficult to design than those for other SAS No. 31 assertions.

.43 If the auditor desires to assess control risk at less than the maximum level, tests of controls should be performed to determine that the controls are working as prescribed to make that control risk assessment. Once the control risk is assessed at less than maximum, the auditor may restrict substantive procedures designed to obtain evidential matter regarding the completeness assertion. Taken alone, the assessed level of control risk, ordinarily, is not sufficiently low to eliminate the need to perform any substantive tests. In addition, small businesses often lack segregation of duties, which usually prevents the auditor from assessing control risk at a low level. As a result, it is necessary to perform substantive tests of the completeness assertion.

Substantive Tests

.44 Many substantive tests are of limited usefulness in detecting errors of omission because they are usually applied to recorded amounts. Unrecorded transactions are not included in the account balances or classes of transactions to which the auditor applies substantive tests.

.45 Of all the financial statement assertions, only completeness involves consideration of whether there are material amounts that are not included in the account balance or class of transactions being tested. Therefore, substantive tests of the completeness assertion differ somewhat from substantive tests of other financial statement assertions. The difference is highlighted by the following excerpt from SAS No. 31, paragraph 11, as amended (AU section 326.11):

> In designing substantive tests to achieve an objective related to the assertion of existence or occurrence, the auditor selects from items contained in a financial statement amount and searches for relevant evidential matter. On the other hand, in designing procedures to achieve an objective related to the assertion of completeness, the auditor selects from evidential matter indicating that an item should be included in the relevant financial statement amount and investigates whether that item is so included.

.46 Substantive tests can be designed to provide evidential matter to support a conclusion that specific account balances are not misstated by amounts that would cause the financial statements, taken as a whole, to be materially misstated because of unrecorded transactions.

---

.47 Important sources of evidential matter for completeness include source documents, such as order logs, shipping and receiving documents, and checks. One common test of completeness involves tracing amounts from source documents to amounts recorded in the accounting records. For example, the auditor may vouch selected cash disbursements after the end of the audit period to test the completeness of amounts recorded as accounts payable at the balance-sheet date. Other substantive procedures that provide evidence concerning the completeness of financial statement account balances include the following:

a. Sales-and-purchases cutoff procedures that include tracing shipping and receiving documents processed after the audit period to accounting records for the proper period.

b. Analytical procedures in which the auditor investigates relationships among data that indicate a financial statement account or balance may be understated. For example, the auditor may obtain evidence that all interest-bearing debt is recorded by examining the relationship between recorded interest expense and the average balance of interest-bearing debt outstanding for the period. Disproportionate relationships based on the auditor's knowledge of interest rates should be investigated. Other examples include: a comparison of investment income to average investments for the period to test whether income earned on investments is recorded; the relationship of average pay times number of employees to payroll expense to substantiate that salaries are recorded; and the relationship of membership fee revenue to the number of members of an organization.

c. Confirmations of balances or transactions designed to identify unrecorded amounts, such as accounts payable confirmations that request the creditor to specify the amount of the client's obligation.

d. Tests of bank reconciliations, including examination of checks clearing the bank after the audit period to identify cash disbursements processed but not recorded or inappropriately recorded in the subsequent period.

e. Reading the minutes of the meetings (of the) board of directors and stockholders and tracing transactions authorized in the minutes to amounts recorded in the accounting records.

f. Overall reconciliations using financial and nonfinancial data, such as "proofs" of cash and sales.

AAM Section 5200
Timing of Substantive Audit Tests

.01 During the planning stage of the audit, the auditor should consider *when* to apply audit tests. The determination of whether substantive tests can or should be applied prior to year-end is usually based on practical considerations. In making that determination, the auditor evaluates the benefits of performing a substantive test prior to year-end against the potential costs of performing such interim work.

.02 For example, the auditor considers whether the benefits of easing pressures caused by a tight year-end reporting deadline outweigh the cost of gathering additional audit evidence necessitated by the use of a less effective test at an interim date.

.03 Substantive tests can be divided into two categories: those that can generally be applied at an interim date and those that *may be* efficient at an interim date only if certain conditions are met.

.04 If substantive testing is performed at an interim date, roll-forward work should be performed to provide evidence relating to the account balances at the balance-sheet date. In addition, if balances are tested at an interim date, the auditor should:

- Consider whether there are rapidly changing economic conditions that might predispose management to misstate the financial statements in the period after the date tested,
- Compare information concerning the balance at the balance-sheet date with comparable information at the interim date tested to identify unusual amounts,
- Apply additional tests of balances or analytical procedures to provide a reasonable basis for extending the conclusions about the balance at the interim date to the balance at the balance-sheet date, and
- Consider coordinating the tests of interrelated accounts and cutoffs.

Generally balances are tested as of an interim date only when control risk for the related assertions is assessed at below the maximum.

Substantive Tests That Can Generally Be Applied at an Interim Date

.05 Some substantive tests can generally be performed through any date prior to year-end and still be efficient and effective tests. Substantive tests that fall into this category are tests that apply to data readily available prior to year-end. Such tests include:

a. Substantive tests of transactions to support balance sheet accounts (for example, supporting the details of additions and retirements to a fixed asset account)

b. Substantive tests of transactions to support income statement accounts (for example, reviewing all charges over a certain dollar amount to the repairs-and-maintenance account)

c. Analytical procedures that include calculations on an interim basis (for example, comparing actual and budgeted expenses for each month)

.06 In each of these tests, the auditor reviews information that is already available at an interim date. Even if these tests were done at year-end, the same information would be needed and the same procedure performed. Thus, these tests generally can be efficient when performed at an interim date.

.07 For example, auditors frequently support those balance sheet accounts with low activity, such as fixed assets, by analyzing the transactions within the account during the year. Consequently, for property, plant, and equipment the auditor can audit the account by analyzing material additions and retirements rather than by testing the ending balance. To support additions the auditor may vouch material additions to invoices. Vouching such invoices may be performed before year-end without reducing the efficiency or effectiveness of the test. At year-end, the auditor still may have to vouch invoices from the interim date to year-end. However, these invoices would have to be vouched regardless of whether the interim work was performed.

Conditional Substantive Tests

.08 Other substantive tests may be efficient when applied prior to year-end only if certain conditions are met. Generally, such substantive tests should only be applied prior to year-end if substantive tests for the remaining period from the interim date to year-end can be restricted.

.09 SAS No. 45, *Omnibus Statement on Auditing Standards—1983*, "Substantive Tests Prior to the Balance Sheet Date" (AU section 313), describes several factors that should be considered before applying substantive tests to details of balance sheet accounts at interim dates. Those factors relate to the ability to control the additional risk of not detecting errors that may exist at the balance-sheet date when the balance is tested at an interim date. Factors described include:

a. Whether the effectiveness of the tests will be impaired because of the auditor's assessment of the control risk

b. Whether rapidly changing business conditions or circumstances might predispose management to misstate the financial statements between an interim date and year-end

c. Whether the year-end balances of the particular balance sheet accounts that might be selected for interim testing, are reasonably predictable with respect to amount, relative significance, and composition

.10 In many small business engagements, the cost of bringing the additional risk to an acceptably low level is too great. SAS No. 45 notes that "applying substantive tests . . . at an interim date may not be cost-effective if substantive tests to cover the remaining period cannot be restricted due to the assessment of control risk." In the case of a small business with limited segregation of duties, these substantive tests are generally not performed at an interim date because to do so would be inefficient. For example, in a small business engagement, the auditor generally audits cash, accounts receivable, inventory, and accounts payable at year-end.

AAM Section 5300
Extent of Testing

.01 Once an auditor decides what audit procedures to apply (the nature of the tests) and when to apply them (the timing of the tests), a decision must be made about how many items to apply the procedures to—that is, the extent of testing.

Authoritative Standards*

.02 SAS No. 39, *Audit Sampling* (AU section 350), addresses a variety of issues relating to the auditor's use of sampling in an audit engagement. However, SAS No. 39 does not always apply when the auditor is examining less than 100 percent of a population. There has been some confusion in practice over when SAS No. 39 applies.

When SAS No. 39 Applies

.03 Audit sampling is only one of many tools used by auditors to obtain sufficient, competent evidential matter to support an opinion on financial statements. SAS No. 39 discusses design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used—

a. In tests of controls in internal control to evaluate operating effectiveness from prescribed controls.

b. In substantive tests of details of account balances and classes of transactions.

c. In dual-purpose tests that assess control risk and test whether the monetary amount of a transaction is correct.

.04 The portion of SAS No. 39 pertaining to tests of controls applies when sampling techniques are used to assess control risk. The portion pertaining to substantive tests apply when sampling techniques are used to test details of transactions or balances.

.05 According to SAS No. 39, sampling occurs when the auditor tests less than 100 percent of a population *to make some conclusion about the population.* SAS No. 39 applies to tests of controls when such tests are performed and to tests of balances when sampling populations are material. The extent to which sampling is used in an audit depends on the size of the client and the nature of the client's internal control. Also, if the sampling populations are small, it is usually more efficient to audit individually significant items and obtain audit assurance about the remaining balance through analytical procedures than to perform audit sampling. As the size and sophistication of the client's internal control increases, the auditor is more likely to use audit sampling to perform tests of controls and tests of balances.

.06 In determining whether SAS No. 39 is applicable to circumstances in which an auditor examines less than 100 percent of the items making up an account balance or class of transactions, the auditor should consider the purpose of the test. If the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, the guidance in SAS No. 39 should be followed. For example, if the auditor intends to examine selected sales invoices to draw

* The Audit and Attest Standards Division of the AICPA is developing an Auditing Procedure Study (APS) to replace the AICPA Audit and Accounting Guide *Audit Sampling* (the Audit Sampling Guide). The APS is expected to be issued in the fourth quarter of 1996.

a conclusion about whether sales are overstated, audit sampling as described in SAS No. 39 should be applied because the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to the remaining invoices, the auditor is not sampling according to SAS No. 39—the examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the combined results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed related to overstatement of sales.

.07 The auditor should remember that the way in which the population is defined can determine whether the requirements of SAS No. 39 apply. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables, and employee receivables. Each of these populations can be tested using a different audit strategy—some using audit sampling and others not. The sampling concepts in SAS No. 39 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

Authoritative Guidance About the Application of Audit Sampling to Substantive Tests Provided by SAS No. 39

.08 There has been confusion in the accounting profession regarding what requirements are imposed by SAS No. 39. SAS No. 39 added the following seven specific provisions to professional standards.

a. The concept that some items exist for which, in the auditor's judgment, acceptance of some sampling risk is not justified, and that these should be examined 100 percent (paragraph 21 [AU section 350.21]). This simply reminds the auditor that some of the items encountered in an examination of financial statements may be so significant individually or may have such a high likelihood of being in error or misstated that *all* such items should be examined.

b. The suggestion that the efficiency of a sample may be improved by separating items subject to sampling into relatively homogeneous groups based on some characteristic (paragraph 22 [AU section 350.22]). This indicates that audit efficiency can sometimes be improved by, for example, stratifying or segregating the items constituting a balance or class of transactions into groups based on individual dollar value or some other characteristic.

c. A requirement that the auditor consider tolerable misstatement in planning audit sampling applications in the examination of account balances and classes of transactions (paragraph 18 [AU section 350.18]). This asks the auditor to consider, in the early stages of an audit, how much misstatement the auditor will be able to tolerate for each balance and class of transactions that is sampled, in combination with misstatements in other accounts, and still render an unqualified opinion on the financial statements. SAS No. 39 asks the auditor to consider tolerable misstatement and to recognize that it is one of the factors influencing sample size. There is no requirement to document or quantify tolerable misstatement.

d. A requirement that the auditor select a sample that can be expected to be representative of the population (paragraph 24 [AU section 350.24]). Simply put, this means that each item in the population being sampled should have *a chance* of being selected, not necessarily *an equal chance* of being selected. This does not mean that the auditor is required to use a random or probability sample.

e. A requirement that the auditor consider selected sample items to which the auditor is unable to apply planned audit procedures to determine their effect on the evaluation of the sample (paragraph 25 [AU section 350.25]). For example, sometimes the auditor may not be able to apply planned audit procedures to selected sample items because supporting documentation may be missing. If the auditor's

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

evaluation of the sample results would not be altered by considering those unexamined items to be in error, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class is materially in error, the auditor should consider alternative procedures that would provide sufficient evidence to form a conclusion.

f. A requirement that the auditor project the misstatement results of the sample to the items from which the sample was selected (paragraph 26 [AU section 350.26]). Since the sample is expected to be representative of the population from which it was selected, misstatements found are also expected to be representative of the population. This merely asks the auditor to measure the likely misstatement in the population from which the sample was drawn and to consider it in reaching conclusions.

g. A requirement that the auditor consider, in the aggregate, project misstatement results for all audit sampling applications and all known misstatements from nonsampling applications when evaluating whether the financial statements taken as a whole may be materially misstated (paragraph 30 [AU section 350.30]).

Documentation Requirements in SAS No. 39

.09 SAS No. 39 contains no new or specific documentation requirements. However, the documentation standards set forth in the Statements on Auditing Standards dealing with documentation apply to audit sampling applications just as they apply to other auditing procedures. For example, SAS No. 22, *Planning and Supervision* (AU section 311), states that the auditor should prepare a written audit program and SAS No. 41, *Working Papers* (AU section 339), requires the auditor to prepare working papers recording the work that the auditor has done and the conclusions that the auditor has reached concerning significant matters. Thus, with regard to audit sampling applications, the audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. Documentation might also include the definition of the population and the sampling unit, including: (1) how the auditor considered completeness of the population, (2) the definition of misstatement, (3) the method of sample selection, (4) a list of misstatements identified in the sample, (5) an evaluation of the result of the sampling application, and (6) conclusions reached by the auditor.

Determining Extent of Testing in a Small Business Without Sampling

.10 Small businesses have certain characteristics that may influence the auditor's decision to use audit sampling. Because of the limited segregation of duties common in small businesses, auditors frequently choose to assess control risk at the maximum level, so generally the auditor of a small business will not have to consider tests of controls, including sampling of documentary evidence, to determine if controls are working as prescribed.

.11 For substantive testing, small businesses frequently have small populations of accounting data in both account balances and classes of transactions. Consequently, sampling may not be as useful since there may be large populations of data.

.12 SAS No. 39, paragraph 1 (AU section 350.01), defines audit sampling: "The application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class." This definition allows some alternative approaches to sampling to determine the extent of testing in a small business engagement. These alternatives, by not using audit sampling and thus eliminating the requirements of SAS No. 39, may provide a more effective and efficient audit approach for a small business engagement.

.13 These alternative approaches include:

a. Procedures applied to 100 percent of a certain group (strata) of transactions or balances.

b. Testing unusual items without applying procedures to the remainder of the population.

c. Other tests that involve application of procedures to less than 100 percent of the items in the population without drawing a conclusion about the entire account or class of transactions.

.14 The auditor should decide what audit procedures to perform to meet the established audit objectives. Once this decision is made, the auditor needs to determine the extent of testing.

.15 An effective and efficient approach to determining the extent of testing in a small business engagement is shown in flowchart 1. This approach involves four important steps.

Identification of Individual Items to Be Examined

.16 An auditor should apply professional judgment in determining which individual items in an account balance or class of transactions need to be examined. In evaluating individual items, the auditor should consider factors such as size of the item, whether the item is unusual, prior experience with the client, and whether the item involves a related party.

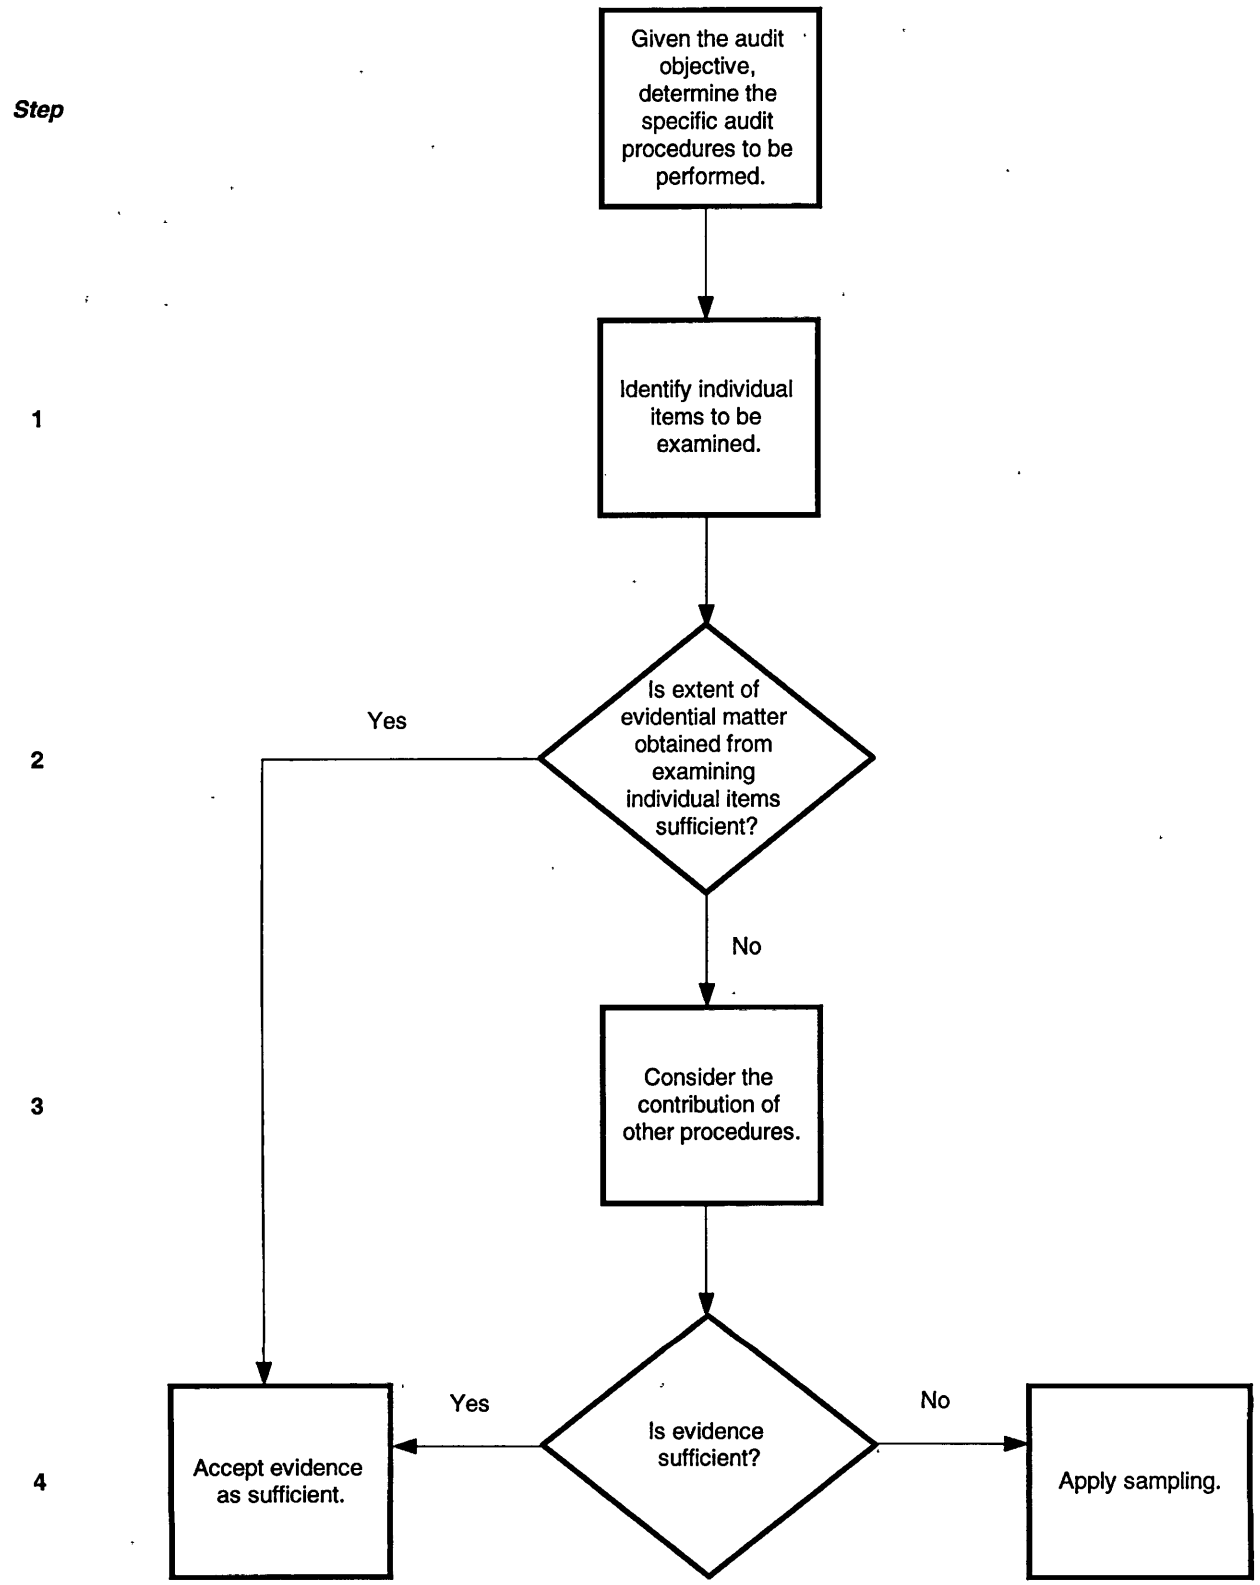
.17 For example, consider the following information for accounts receivable of a small business.

Number of Accounts	*Balances*	*Total Accounts*
4	$100,000 or more	$ 625,000
7	$25,000–99,999	375,000
62	$1–24,999	300,000
73		$1,300,000

In this case, if the eleven largest accounts are confirmed by the auditor, most of the accounts receivable balance is supported ($1,000,000 out of $1,300,000, or 77 percent). Also, the auditor may decide to confirm the receivables that have unusual characteristics (for example, receivables with either large credit balances or those that are very delinquent).

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Flowchart 1
An Audit Sampling Approach for a Small Business



Is Extent of Evidential Matter Obtained Sufficient?

.18 Some factors which have been identified in SAS No. 39 in evaluating the sufficiency of evidential matter obtained in tests of details for a particular account balance or class of transactions are:

a. The individual importance of the items examined. If the items examined, account for a high percentage of the total population, then the auditor may be reasonably assured that there is an acceptably low risk of an undetected misstatement.

b. The nature and cause of misstatements. If during the course of the audit, misstatements are discovered, those misstatements should be evaluated to determine if they are due to differences in principle or in application, are errors or irregularities or are due to misunderstanding of instructions or carelessness.

c. Possible relationship of the misstatement to other phases of the audit. If it is determined that the misstatement is an irregularity this would require a broader consideration of the possible implications than would the discovery of an error.

d. The characteristics of the sample to the population. The auditor may obtain some knowledge of the types of items in the population if the characteristics in the sample are similar in nature and the same controls are followed for processing the transactions.

.19 If an auditor has examined a substantial number of individual amounts and found no evidence of problems from the other procedures performed—and the remaining population totals less than an amount that would be material to the financial statements—there is often no need to sample the remaining population. Otherwise, the auditor should extend tests to the remaining population unless an alternative approach can be justified.

Consider Contribution of Other Procedures

.20 The auditor should also consider whether other evidence obtained contributes to conclusions regarding the account balance or class of transactions. The auditor often considers the contribution of other procedures at the same time the extent of evidential matter obtained from examining individual items is considered.

.21 The auditor may use a combination of analytical procedures and substantive tests of details to support an opinion on the financial statements. A small business audit does not typically include assessing control risk at less than the maximum level, so the auditor would rely primarily on analytical procedures and other substantive tests of details. In deciding whether other audit procedures make a contribution, the auditor should consider whether they support the audit objectives in the area, whether they indicate potential problems, and whether the evidence is consistent with the previous evidence obtained.

.22 In considering the contribution of other procedures, the auditor should use professional judgment in determining whether an unqualified opinion can be given without performing additional tests in the form of audit sampling.

Evaluation of Sufficiency of Evidence

.23 There are three factors that the auditor may consider in evaluating the sufficiency of audit evidence obtained from examining individual items and contributed by other procedures, and in determining whether the remaining items in the population should be tested.

.24 First, the auditor should consider whether the dollar amount of the remaining population is equal to or greater than an amount that would be material to the financial statements. If the remaining population is less than material, the auditor may decide that no additional testing by sampling is necessary. Second, the

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

auditor should consider the degree of risk involved (that is, how susceptible the account is to misstatement, and whether there have been problems with this area in prior audits). Third, the auditor should consider the sufficiency of all the audit evidence obtained so far (the extent of evidential matter obtained by testing individual items along with the contribution of other procedures).

Audit Sampling for Tests of Controls

.25 SAS No. 39 indicates that an auditor may use nonstatistical or statistical sampling in performing tests of controls. This section provides guidance for both approaches. Regardless of whether nonstatistical or statistical sampling is being used, audit sampling for tests of controls involves the following steps:

a. *Determine the objective of the test.* The objective of a test of control is to determine whether particular controls are being applied as prescribed. Audit sampling for tests of controls is generally appropriate when application of the controls leaves documentary evidence of performance. Normally, audit sampling for tests of controls will involve selecting a sample of documents and examining them for evidence that the relevant controls were applied. Tests of controls involving observation of performance of procedures or inquiries of the client are not normally subject to audit sampling.

b. *Define the deviation conditions.* A deviation condition is a situation that indicates that the controls were not performed. For example, if the auditor is examining purchase invoices for evidence of approval of an expenditure (e.g., the initials of the approving individual), a deviation condition would be an invoice that is not initialed by the appropriate individual. Adequate performance of controls consists of all the steps the auditor believes are necessary to support the assessed level of control risk. For example, assume that a prescribed procedure requires that support for every disbursement should include an invoice, a voucher, a receiving report, and a purchase order, all stamped "Paid." The auditor believes that the existence of an invoice and a receiving report, both stamped "Paid," is necessary to indicate adequate performance of the procedure for purposes of supporting the assessed level of control risk. Therefore, a deviation may be defined as "a disbursement not supported by an invoice and a receiving report that have been stamped 'Paid.'"

c. *Define the population.* The population selected must be appropriate for the objective being tested. For example, if the auditor is testing the operating effectiveness of control activities designed to determine if all shipments were billed, the auditor would not detect deviations by sampling from billed items. An appropriate population for detecting such deviations usually includes the record of all items shipped.

   For samples to be representative of the period under audit, the population generally should include all transactions processed during the period. However, sometimes the results of tests performed at an interim date may be sufficient to generalize about the population for the entire period. In determining whether interim tests are sufficient, the auditor should consider the results of the tests, responses to inquiries concerning the remaining period, the length of the remaining period, the nature and amounts of the transactions or balances involved, and related evidence obtained from the tests of balances. If controls have been changed during the year, the auditor will often decide that it is efficient to only test the new controls.

   For sample results to be reliable, the sample must be selected from the complete population. Completeness of the population can be determined by either physical or numerical control. Normally, the auditor can establish the completeness of the population by inspecting the documents to see that it appears that they have all been accounted for.

d. *Determine the method of selecting the sample.* Any sample that is selected should be representative of the population and all items should have an opportunity to be selected. Random-number selection should generally be used when statistical sampling is being applied. When nonstatistical sampling

is applied, random-number sampling, systematic sampling, and haphazard sampling are methods that might be used to obtain a representative sample. Methods of selecting samples are discussed beginning at AAM section 5300.61.

e. *Determine the sample size.* Sample sizes for tests of controls are affected by (*a*) the risk of assessing control risk too low, (*b*) the tolerable deviation rate, (*c*) the expected population deviation rate, and (*d*) any effects of small population sizes.

Guidance for determining sample size when performing nonstatistical sampling begins with AAM section 5300.28. A description of statistical sampling begins with AAM section 5300.31.

f. *Perform the sampling plan.* Once the sample has been selected, the auditor should examine each item for evidence of performance of the controls. If the auditor selects an item that is unused (e.g., a voided document), the auditor should select another item, at random. However, the auditor should make sure that the item really represents an unused item. If the document is valid, but cannot be found, the item should be treated as a deviation in evaluating the sample results.

g. *Evaluate the sample results.* Guidance for evaluating nonstatistical sampling results begins with AAM section 5300.30 and guidance for evaluating statistical sampling results begins with AAM section 5300.32.

h. *Document the sampling procedure.* The audit working papers should document the following matters:

- The objectives of the test.
- A description of the deviation conditions.
- The acceptable risk of assessing control risk too low.
- The tolerable deviation rate.
- The expected deviation rate.
- The sample results, including the disposition of any deviations found.
- The effect of the results on the auditors assessed level of control risk.

.26 ***Factors Affecting Sample Sizes for Tests of Controls.*** Sample sizes for tests of controls are affected by the following factors:

a. *Acceptable risk of assessing control risk too low.* The risk of assessing control risk too low is the risk that the sample supports a lower level of control risk than is in fact the case. Decreasing the risk of assessing control risk too low will increase the sample size.

b. *Expected population deviation rate.* The expected population deviation rate represents the rate of deviations the auditor expects to find in the population. As the expected population deviation rate increases, the sample size will increase.

c. *Tolerable deviation rate.* Tolerable deviation rate is the maximum rate (%) of deviations from a control procedure that the auditor is willing to accept without increasing the assessed level of control risk. Higher tolerable deviation rates will permit smaller sample sizes.

d. *Population size.* Populations over 500 items have little or no effect on sample size. For populations under 500 in size, the auditor may slightly reduce the size of the sample.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.27 The effects of these factors may be summarized as follows:

Factor	*Effect on Sample Size*
Acceptable risk of assessing control risk too low—increase (decrease)	Smaller (larger)
Tolerable deviation rate—increase (decrease)	Smaller (larger)
Expected population deviation rate—increase (decrease)	Larger (smaller)
Population size	Populations less than 500 items should be adjusted to slightly smaller sample sizes

.28 ***Sample Sizes Using Nonstatistical Sampling.*** Nonstatistical sample sizes for tests of controls may be determined using the sample size selection tables in AAM section 5300.29, or they may be selected on a purely judgmental basis. For each method of selection, the auditor should document consideration of the relevant factors. For example, the rationale for selecting tests of controls sample sizes of 30 from the first table in AAM section 5300.29 may be:

a. Control risk will be assessed at a moderate level, and

b. The expected population deviation rate is at or near zero.

.29 The following tables should be used for a nonstatistical approach to determine sample sizes for tests of controls:

Controls Testing Nonstatistical Sample Size Selection Table

Assessed Level of Control Risk	*Sample Size*
Maximum	0
Slightly below the maximum	15
Moderate	30
Low	40

The numbers in the table were determined using a risk of assessing control risk too low of 10 percent and an expected population deviation rate of 0 percent. When deviations are expected or found in a sample, the following table may be used to determine the sample size or evaluate the sample results:

Deviations (Expected or Actual)	*Assessment of Control Risk*		
	Slightly Below Maximum	*Moderate*	*Low*
0	15	30	40
1	25	50	65
2	34	67	90
3	43	85	115

.30 In evaluating the results of the sample, the auditor should consider the number of deviations found and the nature of the deviations. If the auditor uses the first table in AAM section 5300.29 to determine sample size, the discovery of one or more deviations will require the auditor to reassess the planned level of control risk. In these cases, the second table in AAM section 5300.29 may be used to evaluate the assessed level of control risk that is supported by the sample results. When looking at the nature of the deviations, the auditor is concerned with the following questions:

- Was the cause of the deviation an error or does it indicate an intentional violation of the control?
- Are there implications for other audit areas?

.31 *Sample Sizes Using Statistical Sampling.* The appropriate statistical method for tests of controls is attributes sampling, which is a technique designed to estimate qualitative characteristics of a population. Attributes sampling results may be used to estimate the frequency of deviations from performance of controls.

.32 Applying attributes sampling involves performing the following steps:

a. Decide on the attributes to test. The tests of controls may include the testing of one or more attributes. Proper evaluation of the results may require testing and evaluating each attribute separately.

b. Define the population from which the sample items should be selected. The auditor should make sure that the population is appropriate for the audit objective as described in AAM section 5300.25.

c. Specify the following factors:

- *Acceptable risk of assessing control risk too low.* The risk of assessing control risk too low is the risk the sample supports a lower level of control risk than is the case. Since sample evidence represents the only evidence typically obtained about the operating effectiveness of a particular control, the risk of assessing control risk too low is usually set at 5 percent or 10 percent.

- *Tolerable deviation rate.* Tolerable deviation rate is the maximum rate (%) of deviations from a control procedure the auditor is willing to accept without increasing the assessed level of control risk. Higher assessments of control risk will permit higher tolerable deviation rates as shown in the following table:

Planned Assessed Level of Control Risk	*Tolerable Rate*
Low	2%–7%
Moderate	6%–12%
Slightly below the maximum	11%– 20%
Maximum	Omit test

- *Expected population deviation rate.* The expected population deviation rate represents the rate of deviations the auditor expects to find in the population. The auditor's expectations may be based on prior years' experience with the client, or experience with similar clients. Sample sizes will increase significantly as the expected population deviation rate increases from zero. If the deviation rate in the sample turns out to be higher than the rate specified by the auditor in determining the sample size, the sample results will not support the auditor's planned assessed level of control risk.

d. Determine the appropriate sample size. Sample sizes are found in the tables in AAM section 5300.33 and .34. The table in AAM section 5300.35 is designed for a risk of assessing control risk too low of 5 percent, and the table in AAM section 5300.36 is designed for a 10 percent risk of assessing control risk too low. With the tolerable deviation rate and the expected deviation rate, the auditor may find the sample size from the table. The numbers in parentheses are the number of deviations that may be found in the sample and still support the auditor's planned assessed level of control risk.

e. Randomly select the sample from the population. The section beginning at AAM section 5300.61 describes the methods that may be used to select a random sample.

f. Perform the audit procedures to identify deviations in the sample.

g. Calculate the statistical results. Using the tables in AAM section 5300.35 and .36 or the appropriate risk of assessing control risk too low, determine the actual tolerable deviation rate from the sample size and the actual number of deviations found in the sample.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

h. Reassess the level of control risk. If the actual deviation rate in the sample is higher than that specified in determining the sample, the sample results will not support the auditor's planned assessed level of control risk. In these situations, the auditor should increase the assessed level of control risk. The auditor should also consider the causes of the deviations found, and whether they have implications for other audit areas.

i. Document the Sampling Procedures. The audit working papers should document the matters set forth in AAM section 5300.25 (Item No. 8).

Note: This table presents upper limits as percentages. This table assumes a large population.

Audit Sampling for Tests of Balances

.37 In planning tests of balances, the auditor should decide on the most efficient approach to performing the tests. For some recorded populations, instead of sampling, it may be more efficient to examine individually significant items comprising a majority, or near majority, of the recorded population. Audit assurance about the remaining balance may then be obtained by (1) performing analytical procedures, or (2) concluding that the risk of material misstatement of the remaining balance is low. For example, confirmation of 50 percent to 80 percent of the dollar amount of accounts receivable may be necessary when risk is high; 40 percent to 60 percent may be sufficient when risk is low.

.38 Obviously, when the remaining balance, after auditing the individually significantly items, is immaterial, no testing of the remaining balance is necessary.

.39 The decision to sample, or not to sample, should be documented in the *working papers*.

.40 Selecting all individually significant items is not considered a sampling application. Items such as large receivables are usually examined individually. Procedures used for examining such items should ordinarily be the most reliable under the circumstances, such as positive confirmation requests.

.41 When planning a sampling application for tests of balances, the in-charge should consider the financial statement assertions and audit objectives and their relationship to populations selected. For example, understatements cannot be detected by sampling recorded amounts; instead, units from populations of all existing transactions must be selected.

.42 The following is an approach to nonstatistical sampling for tests of balances.

a. Determine the sampling population by identifying and deducting the individually significant items.

b. Determine the sample size by considering the following factors:

- The amount of tolerable misstatement.
- The assessed level of inherent and control risk for the assertions being tested.
- The risk that other substantive procedures (e.g., analytical procedures) will fail to detect a material misstatement.
- Variations within the population.

c. Select the sample.

d. Perform the test procedure.

e. Evaluate the results.

- Project the misstatement.
- Consider sampling risk.
- Consider qualitative aspects of the test results.

.43 Sample selection methods should produce representative samples and may include random selection, systematic selection, or haphazard selection methods. Care should be taken to avoid bias, however, when a haphazard selection method is used. AAM section 5300.61 describes these sample selection methods.

.44 ***Determine the Sample Size for Tests of Balances.*** Sample sizes for tests of balances are affected by the following factors:

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- *Tolerable misstatement.* As the amount of tolerable misstatement increases, the sample size decreases. Conversely, larger sample sizes are required to compensate for a smaller amount of tolerable misstatement.
- *Assessed level of inherent and control risk.* As the combined level of inherent and control risk increases, the sample size increases.
- *The risk that other substantive procedures will fail to detect a material misstatement.* As the risk that other substantive procedures will fail to detect a material misstatement increases, the sample size increases. This risk is determined by considering the effectiveness of these procedures.
- *Variations within the population.* Sample sizes are smaller when the sampling population is stratified into homogeneous groups. Larger sample sizes are usually required to obtain a representative sample from sampling populations with high variations.

.45 Illustration 1 summarizes the impact of the factors above on sample size planning.

.46 ***Nonstatistical Sampling Approaches.*** At the direction of the engagement partner, either of the following nonstatistical approaches can be used for selecting tests of balances sample sizes:

a. Judgmental method.

b. Model approach.

Illustration 1

Factors Influencing Sample Sizes for Substantive Tests of Balances

	Factor	*Conditions Leading to: Smaller Sample Size*	*Larger Sample Size*
a.	Tolerable misstatement.	Larger amount	Smaller amount
b.	Assessed level of inherent and control risk	Lower	Higher
c.	Risk that other procedures will fail to detect a material misstatement.	Lower	Higher
d.	Variation within the population.	Less variation	More variation

.47 ***Judgmental Method.*** Sample sizes can be selected judgmentally after considering the influence of the factors described above. The in-charge should describe the factors that influence the sample sizes selected for substantive tests of balances. The engagement partner should approve the planned sample sizes before the substantive tests of balances work is begun.

.48 Judgmentally selected samples are considered in terms of audit coverage of a total population. Large dollar coverage generally includes individually significant items, and units from the sampling population that cover more than 50 percent of the dollar amount of the total population.

.49 The coverage of the total population will also be affected by the nature of the population and the degree of the engagement risks. For example, a large coverage of accounts receivable for confirmation in high-risk circumstances may be from 50 percent to 80 percent of the total dollar population. A large coverage for an inventory price test in the same circumstances may only be 30 percent to 40 percent of total inventory because the risk of inventory price misstatement is generally less. In low-risk circumstances, a large coverage of accounts receivable may be 40 percent to 60 percent, a large inventory coverage may be 20 percent to 30 percent. These percentages are not presented as specific guidelines for decision making, but as illustrations of the factors influencing nonsampling decisions. Since the auditor's opinion is expressed on the financial statements taken as a whole, evidence should be designed to include tests of a majority of the dollars in the financial statements, but should also be, overall, the most efficient in the circumstances.

.50 ***The Model Approach.*** The model approach is a nonstatistical sampling method that is based on Probability Proportional To-Size (PPS) Sampling. Because the approach is based on PPS theory, the overall materiality limit does not have to be allocated to each account to determine tolerable misstatements. Instead, the basic allowance for unknown misstatement, i.e., overall materiality limit minus estimates for unadjusted misstatement from nonsampling tests, expected projected misstatement from sampling tests and related allowances for imprecision, may be used in place of tolerable misstatement for each sampling application. An acceptable approach would be to use 66⅔ percent, or a smaller percentage, of the overall materiality limit for the basic allowance. Under PPS theory, the overall materiality limit does not have to be allocated to accounts because the financial statements may be viewed as one population and the basic allowance for unknown error applies to the financial statements taken as a whole. The basic allowance must also be considered, however, when measuring misstatements.

.51 It is important to recognize that when sample sizes are selected nonstatistically based on some statistical theory such as PPS, it is assumed that the population will be stratified. A simple method of stratification is as follows:

- Determine the mean of the population to be sampled.
- Select 2/3 of the sample items from those items equal to or greater than the mean.
- Select 1/3 of the sample items from those items less than the mean.

.52 If it is not practical to stratify the sampling population, the sample size should be increased by a factor of 20 percent, or multiplied by 1.2.

.53 A more time consuming, yet more accurate method would, of course, be a PPS statistical selection method. For the sake of time, however, this statistical method ordinarily is not used. When populations are unusually large and engagement risks are high, however, a PPS statistical method may be appropriate. Guidance for PPS statistical sampling may be found in the AICPA Audit and Accounting Guide *Audit Sampling**.

.54 Developed from the model in the AICPA Audit and Accounting Guide *Audit Sampling* (paragraphs 4.57 through 4.60), the Model Approach follows:

Sampling Population Tolerable Misstatement	×	Assurance Factor	=	Preliminary Sample Size (units)
Preliminary Sample Size (units)	×	Marginal Risk Factors (1.2 to 1.5)	=	Adjusted Sample Size (Units)

.55 The assurance factors, also based on PPS statistical theory, are as follows:

Assessment of Inherent and Control Risk	*Risk That Other Substantive Procedures (e.g., analytical procedures) Will Fail to Detect a Material Misstatement*		
	Maximum	*Moderate*	*Low*
Maximum	3.0	2.3	1.9
Slightly below maximum	2.7	2.0	1.6
Moderate	2.3	1.6	1.2
Low	1.9	1.2	1.0

* The Audit and Attest Standards Division of the AICPA is developing an Auditing Procedure Study (APS) to replace the AICPA Audit and Accounting Guide *Audit Sampling*. The APS is expected to be issued in the fourth quarter of 1996.

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

.56 The steps to be taken in determining the sample size using the Model Approach are as follows:

a. Assess the combination of inherent and control risk:

(1) Maximum—Control and inherent risk are assessed at the maximum for the particular assertions. No tests of controls are required to support this assessment.

(2) Slightly below the maximum—Control and inherent risk are assessed at slightly below the maximum for the particular assertions. Minimal tests of controls are required for this assessment.

(3) Moderate—Control and inherent risk are assessed at a moderate level for this particular assertion. Moderately effective tests of controls are required for this assessment.

(4) Low—Control and inherent risk are assessed at a low level for the particular assertions. Very effective tests of controls are required for this assessment.

b. Determine the basic allowance for unknown misstatements (tolerable misstatement). This is related to preliminary estimates of materiality for the engagement.

c. Assess the risk that other substantive procedures (such as analytical procedures) designed to test the same assertions will fail to detect a material misstatement in a particular assertion as follows:

(1) Maximum—No other substantive procedures are performed that are designed to test the same assertions.

(2) Moderate—Other substantive procedures to test the assertions are expected to be moderately effective in detecting material misstatements.

(3) Low—Other substantive procedures to test the assertions are expected to be highly effective in detecting material misstatements.

d. Determine the population's recorded amount after deducting any items that will be audited 100 percent (all items that are more than 1/3 of tolerable misstatement).

e. Use the appropriate assurance factor from the table in AAM section 5300.55 and the formula below to determine the initial sample size.

Calculate the initial sample size with the following formula:

Sampling Population		*Basic Allowance (Tolerable Misstatement)**		*Assurance Factor*		*Initial Sample Size*
$ _____	÷	$ _____	×	_____	=	$_____

.57 Depending on the amount of the basic allowance for unknown misstatements, sample sizes computed with this model may approximate those sizes selected judgmentally. Because the model is based on a highly stratified approach, and this approach usually will include minimal or no stratification, the sample should be somewhat larger than the preliminary size if there are significant variations in the population. If stratification is necessary and is not practical, an acceptable approach would be to multiply the preliminary sample size by a marginal risk factor of 1.2 to compensate for the sampling risk associated with not stratifying. The marginal risk factor should *not* be used when the population is stratified or when stratification is not necessary.

.58 ***Evaluating the Sample Results.*** The misstatement in the sample must be projected to the population. One method of projecting the amount of misstatement found in a sample is to divide the amount of misstatement by the fraction of total dollars in the population to total dollars included in the sample. For example, if a $1,000 misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $10,000 ($1,000/.10).

---

* Amount should be two-thirds of overall materiality limit.

.59 A second method for projecting the misstatement uses the average difference between the audited and the recorded amounts of each item included in the sample. For example, if $200 of misstatement is found in a sample of 100 items, the average difference between audited and recorded amounts for items in the sample is $2 ($200/100). An estimate of the amount of misstatement in the population may be calculated by multiplying the total number of items in the population (in this case 25,000 items) by the average difference of $2 for each sample item. The estimate of misstatement in the population is $50,000 (25,000 × 2).

.60 If the projected misstatement is less than tolerable misstatement for the account balance, consideration must be given to the risk that actual misstatement exceeds the amount of tolerable misstatement. If the projected misstatement is less than 1/3 of tolerable misstatement, it is generally safe to conclude that sampling risk is sufficiently low. If it is greater than 1/3, consideration should be given to performing additional tests of the account.

Selecting Samples

.61 SAS No. 39 permits random number selection, systematic selection with or without random starts and haphazard selection methods for nonstatistical sampling. Block sampling is not acceptable. A random number selection method should be used for statistical sampling.

.62 Random-based selection methods can be applied using random number tables or computer or calculator programs.

.63 To use a random number table:

a. Assign each element in the population a unique address that corresponds to the random number table.

b. Decide how to read the table, i.e., the number of digits and location, and if top to bottom, left to right.

c. Place a pencil on a page to determine a random starting point.

d. Modify the population numbers to the smallest possible number of digits to reduce discards.

.64 The procedure for using a program or calculator to generate random numbers varies with the programs. However, these techniques generally require the auditor to provide the smallest and largest item numbers, and the number of sample items needed.

.65 Systematic sampling requires the calculation of an interval. An interval is determined by dividing the population size by the number of sample units desired. For example:

$$N = \text{Sample Size} = 4{,}000$$
$$n = \text{Desired Units} = 50$$
$$I = \text{Interval}$$
$$I = \frac{N}{n} = \frac{4{,}000}{50} = 80$$

.66 After selecting a random number within the interval as a starting point, each 80th unit would be selected.

.67 Haphazard sampling involves selecting items on a purely judgmental basis, without any bias towards the selection of particular items.

AAM Section 5400
Illustrative Audit Program for Corporations

.010 The audit programs contained in this section have been designed to provide substantive evidence (when combined with appropriate planning and with appropriate tests of controls) that is sufficient to support the assertions in the client's financial statements. The programs should be modified to reflect overall engagement risk, risks of potential misstatements, the results of analytical procedures, and the selection of the most cost-beneficial audit approaches and procedures.

.011 The programs address the financial statement assertions discussed in SAS No. 31, *Evidential Matter*, as amended by SAS No. 80 (AU section 326):

- *Existence or occurrence.* Whether the assets or liabilities exist at a given date and whether recorded transactions have occurred during a given period.
- *Completeness.* Whether all transactions and accounts that should be presented in the financial statements are so included.
- *Rights and obligations.* Whether assets are the rights of the entity and liabilities are obligations of the entity at a given date.
- *Valuation or allocation.* Whether asset, liability, equity, revenue, and expense components have been included in the financial statements at appropriate amounts.
- *Presentation and disclosure.* Whether particular components of the financial statements are properly classified, described, and disclosed.

.012 The right mix of tests of details and analytical procedures should be made for each audit area, based on the auditor's risk assessment, and planning conclusions, the auditor's understanding of internal control components, materiality, and other relevant factors. In most cases, analytical procedures should be relied upon to the maximum extent possible, because they are often more efficient to perform than tests of details. Accordingly, all of the substantive tests listed in a program may not need to be performed.

.013 The auditor's professional judgment must be applied in deciding whether the program includes all of the procedures required in the particular circumstances. The program serves solely as a timesaver. Users of manuscript aids must remain alert to needs such as the following:

- Developing steps for required procedures which are not covered by the program.
- Excluding extraneous and unnecessary procedures which are covered by the program.
- Editing or modifying the program to suit the needs and preferences of the auditor in the circumstances.

.014 The programs that follow contain illustrative audit objectives and procedures which are numbered merely to organize the materials; the numbers are not intended to imply completeness or a prescribed sequence. This list is merely illustrative. Users of this material must use professional judgment and be alert for the important matters in a particular set of circumstances which may not be covered in the illustrative material.

.015 The illustrative audit program permits the auditor to select audit procedures to be performed based on the assessed level of risk. Based on the auditor's understanding of internal control, it may be necessary to extend testing. See AAM section 3165 for an illustrative audit planning program.

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

	Done by	*Date*	*W/P Ref.*

I. General Procedures

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Procedures:

A. Planning

1. Complete the illustrative planning program. (See AAM section 3165.)	____	____	____
2. Determine that the decision to accept the engagement (in case of new client) or to retain the client has been documented. (See AAM section 11,500.18.)	____	____	____
3. If this is a new client, ascertain that required communications with predecessor auditors, if any, have been made.	____	____	____
4. If other auditors are performing parts of the audit, ascertain that appropriate communications have been made.	____	____	____
5. Determine that a signed engagement letter covering the current engagement is on file. Read letter for any special provisions. List any special provisions and determine that the audit program addresses the provisions.	____	____	____
6. Discuss the audit plan with the engagement personnel. If considered necessary, prepare a planning memorandum for review by engagement staff.	____	____	____
7. Prepare listing of schedules/analyses to be prepared by the client (and working paper set-ups, if considered necessary) and deliver to client.	____	____	____
8. Update the permanent file(s) for new agreements, copies or extracts of minutes and other important documents.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
9. For trial balances and other schedules and analyses prepared by the client, document and perform the following (these steps can be performed during substantive testing):			
a. Trace amounts to the general ledger.	____	____	____
b. Re-perform the footings and crossfootings (test basis may be appropriate).	____	____	____
c. Trace opening balances to final balances per the working papers for the preceding year (period).	____	____	____
d. Determine that working papers are marked "Prepared by Client" or "PBC."	____	____	____
10. If considered necessary, based on the assessment of audit risk, review journal and general ledger entries made during the period for propriety and accuracy.	____	____	____

B. Conclusion of Audit

1. Perform the following analytical procedures:			
a. Re-examine the comparison of current-period amounts with amounts from prior periods, after correction of the amounts for any adjustments and reclassifications.	____	____	____
b. Perform any additional analytical procedures, such as ratio analysis, that were not performed during the planning stage because preliminary amounts were unreliable.	____	____	____
c. Identify significant or unexpected fluctuations and other unusual items.	____	____	____
d. Based on the knowledge of the client's operations and the results of audit procedures, evaluate whether all significant or unexpected fluctuations have been adequately explained.	____	____	____
2. Evaluate the effects of unadjusted misstatements on the financial statements.	____	____	____
3. If audit test results identify misstatements in the financial statements, consider whether such misstatements may be indicative of fraud.	____	____	____
4. Complete a subsequent events review. (See AAM section 5400.180.)	____	____	____
5. Based on the results on the audit procedures performed, evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time:			
a. Ascertain if any of the following negative trends exist:			
(1) Recurring operating losses	____	____	____
(2) Working capital deficiencies	____	____	____

	Done by	Date	W/P Ref.
(3) Negative cash flows from operations	____	____	____
(4) Adverse key financial ratios	____	____	____
(5) Calculate the Altman Z Score (the formula can be found in the AAM section 2300.16)	____	____	____
b. Ascertain if any of the following have occurred:			
(1) Default on loans or similar agreements	____	____	____
(2) Arrearages in dividends	____	____	____
(3) Denial of usual trade credit	____	____	____
(4) Restructuring of debt	____	____	____
(5) Noncompliance with statutory or contractual capital arrangements	____	____	____
(6) Need for new sources or methods of financing	____	____	____
(7) Need to dispose of substantial assets	____	____	____
c. Ascertain if the following internal matters have occurred:			
(1) Work stoppages	____	____	____
(2) Other labor difficulties	____	____	____
(3) Substantial dependence on a particular project or customer	____	____	____
(4) Uneconomic long-term commitments	____	____	____
(5) Need to revise operations significantly	____	____	____
d. Ascertain if the following external matters have occurred:			
(1) Legal proceedings	____	____	____
(2) Adverse legislation	____	____	____
(3) Loss of key franchise, license or plant	____	____	____
(4) Loss or principal customer or supplier	____	____	____
(5) Uninsured or underinsured catastrophe	____	____	____
6. Consider whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud made when planning the audit.	____	____	____
7. If, after considering the matters in step 4 above, a substantial doubt exists regarding the entity's ability to continue as a going concern for a reasonable period of time:			
a. Obtain information about management's plans, assess the expected effectiveness of the plans, and gather evidence to evaluate pertinent provisions of those plans and to support audit conclusions concerning the company's ability or inability to continue as a going concern;	____	____	____
b. Evaluate the adequacy of the related financial statement disclosures; and	____	____	____
c. Consider the effects on the audit report.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
8. Obtain written representation from management of the client (SAS No. 19 [AU section 333]) and the company's legal representatives.	____	____	____
9. Read the financial statements and related notes and consider the following:			
a. The adequacy of the evidence gathered in response to unusual or unexpected balances identified in planning the audit or in the course of the audit.	____	____	____
b. Unusual or unexpected balances or relationships that were not previously identified.	____	____	____
10. Determine that all applicable disclosure checklists and review programs have been completed. (See Financial Statement Preparation Manual and AAM sections 9200-9500.)	____	____	____
11. Ensure that all work performed has been properly reviewed to determine whether it was adequately performed and to determine whether the results of the work are consistent with the conclusions to be presented in the auditor's report.	____	____	____
12. Ascertain that all working papers have been headed, indexed, cross-referenced, initialed, and dated.	____	____	____
13. Accumulate all pending items in one listing, and dispose of all other follow-up or "TO DO" sheets and any other similar notations in the files.	____	____	____
14. Ascertain that all time has been posted to the daily time control records, and record totals on the engagement time summary. Write explanations for any significant variations between budgeted and actual time.	____	____	____

Note: Some firms include other matters in the general section of programs, such as disposition of proposed adjustments, report preparation and review, reconciliation of actual and estimated time, preparation of fee estimate, evaluation of staff, etc.

15. Determine that any required communications in accordance with SAS No. 61, *Communication With Audit Committees* (AU section 380), have been made, including the following matters:			
a. The auditor's responsibility under generally accepted auditing standards (e.g., matters relating to internal control, whether the financial statements are free of material misstatement, etc.).	____	____	____
b. Significant accounting policies (initial selection of and changes in significant accounting policies, or their application).	____	____	____
c. Management judgments and accounting estimates (the process followed by management in formulating sensitive			

	Done by	Date	W/P Ref.
accounting estimates and, the basis for the auditor's conclusions regarding the reasonableness of management's estimates).	____	____	____
d. Significant audit adjustments (whether recorded or not, it is a proposed correction of the financial statements, correction would not have been detected except through the auditing process).	____	____	____
e. Other information in documents containing audited financial statements.	____	____	____
f. Disagreements with management, whether or not satisfactorily resolved, about matters that could be significant individually, or in the aggregate, to the entity's financial statements or the auditor's report.	____	____	____
g. Consultation with other accountants about any accounting or auditing matters.	____	____	____
h. Major issues discussed with management prior to retention (e.g., issues relating to the application of accounting principles and auditing standards).	____	____	____
i. Difficulties encountered in performing the audit (e.g., unreasonable delays in commencement of the audit, providing information, client personnel, etc.).	____	____	____
16. Communicate internal control related matters noted (SAS No. 60 [AU section 325]).	____	____	____
17. Determine that required communications, proper as to form and content, have been made as necessary to disclose fraud and/or illegal acts noted during the course of the audit (SAS No. 82 [AU section 316.38–.40] and SAS No. 54 [AU section 317]).	____	____	____

Practice Tip

To help comply with an auditor's communication responsibilities regarding fraud-related matters (SAS No. 82 [AU section 316]), a **checklist** has been provided at the end of this program. When fraud is identified, the auditor should complete the checklist to ensure that he or she has fulfilled his or her communication responsibilities.

C. Section Completion

This audit program section has been completed in accordance with firm policy.

Fraud Communication Checklist

When fraud is identified during an audit, an auditor should complete the appropriate checklist below to facilitate compliance with communication requirements.

SAS No. 82 Communication Requirements for Material Fraud and Any Fraud Involving Senior Management

No.	*Action*	*Sign-Off or N/A*
1.	Consider implications for other aspects of the audit.	
2.	Reevaluate the assessment of the risk of fraud.	
3.	Discuss matter and the approach to further investigation with appropriate level of management.	
4.	Obtain additional evidential matter, including suggesting that client consult with legal counsel.	
5.	Consider whether any risk factors identified represent reportable conditions (SAS No. 60).	
6.	Consider withdrawing from engagement and communicating reasons to audit committee (or board of directors, etc.).	
7.	Report the fraud to audit committee.*	
8.	Insist that the financial statement be revised and, if it is not, express a qualified or adverse opinion. If precluded from obtaining needed evidence, disclaim an opinion or withdraw.	

---

* *Notes:* (A) If perpetrator controls audit committee or board of directors, go directly to client's legal counsel.

(B) If perpetrator is general partner acting against interest of limited partners, obtain legal advice and consider communicating to limited partners.

(C) If perpetrator is owner-manager of a small business, auditor has little choice but to communicate with perpetrator and has no obvious course of action but to withdraw. However, first consult with legal counsel.

SAS No. 82 Communication Requirements for Immaterial Fraud, Not Involving Senior Management

No.	*Action*	*Sign-Off or N/A*
1.	Evaluate implications for other aspects of audit, especially organizational position of persons involved.	
2.	Bring to attention of and discuss with appropriate level of management (even if inconsequential).	
3.	Communicate matter to audit committee unless auditor has reached agreement concerning communication threshold with audit committee.	
4.	Consider whether any risk factors identified represent reportable conditions (SAS No. 60).

II. Internal Control

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Procedures:

A. Understanding the Client's Internal Control Components (Control Environment, Risk Assessment, Control Activities, Information and Communication, and Monitoring)

1. Obtain sufficient knowledge of the control environment to understand management's and the board of directors' attitude, awareness, and actions concerning the control environment considering both the substance of controls and their collective effect. Knowledge of the control environment can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations. ____ ____ ____

2. In obtaining knowledge of the control environment, consider the following factors:

   a. Integrity and ethical values ____ ____ ____

   b. Commitment to competence ____ ____ ____

   c. Board of directors or audit committee participation ____ ____ ____

   d. Management's philosophy and operating style ____ ____ ____

   e. Organizational structure ____ ____ ____

   f. Assignment of authority and responsibility ____ ____ ____

   g. Human resource policies and practices ____ ____ ____

	Done by	Date	W/P Ref.
3. Obtain sufficient knowledge of the entity's risk assessment process to understand how management considers risks relevant to financial reporting objectives and decides about actions to address those risks. Knowledge of the risk assessment process can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.	____	____	____
4. In obtaining knowledge of the entity's risk assessment process, consider the following:			
a. How management identifies risks.	____	____	____
b. How management estimates the significance of the risks.	____	____	____
c. How management assesses the likelihood of the occurrence of risks.	____	____	____
d. How management relates the risks to financial reporting.	____	____	____
5. Obtain an understanding of those control activities relevant to planning the audit. Knowledge about control activities will often be derived from considering the other components of internal control, previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.	____	____	____

Note: Ordinarily, audit planning does not require an understanding of the control activities related to every account balance, transaction class, and disclosure component in the financial statements or to every assertion relevant to them.

6. In obtaining an understanding of control activities, consider policies and procedures that pertain to the following:			
a. Performance reviews	____	____	____
b. Information processing	____	____	____
c. Physical controls	____	____	____
d. Segregation of duties	____	____	____
7. Obtain sufficient knowledge of the information system relevant to financial reporting to understand:			
a. The classes of transactions in the entity's operations that are significant to the financial statements.	____	____	____
b. How those transactions are initiated.	____	____	____
c. The accounting records, supporting information, and specific accounts in the financial statements involved in the processing and reporting of transactions.	____	____	____
d. The accounting processing involved from the initiation of a transaction to its inclusion in the financial statements, inclu-			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
ding electronic means (such as computers and electronic data interchange) used to transmit, process, maintain, and access information.			
e. The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.			
Knowledge of the information system relevant to financial reporting can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.			
8. Obtain sufficient knowledge of the means the entity uses to communicate financial reporting roles and responsibilities and significant matters relating to financial reporting.			
9. Obtain sufficient knowledge of the major types of activities the entity uses to monitor internal control over financial reporting, including how those activities are used to initiate corrective actions. Knowledge of monitoring activities can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.			
B–1. Revenues, Receivables, and Receipts—Understanding and Risk Assessment			
1. Obtain and document a sufficient understanding of the design of the relevant controls that relate to the revenues and receivables account balances and transactions and whether they have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size, complexity, and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.)			
2. Assess the level of control risk:			
a. If the control risk is assessed at the maximum level, document this assessment (the basis for the assessment need not be documented) and go to section C–1. If the control risk is assessed at this level, the auditor will have to expand substantive tests to compensate for this level of control risk. Some examples of substantive tests which may be affected are shown in step 3 below.			
b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient			

	Done by	Date	W/P Ref.
evidential matter to support this assessed level of control risk. Some examples of evidential matter which can be used to support this assessed level are shown in section B–2, below—Tests of Controls.	____	____	____

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach may be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected. Consider the following matters as appropriate. Cross-reference to AAM section 5400.060.

a.	The use of confirmations.	____	____	____
b.	If confirmations are used:			
	(1) Extent and method of selection of accounts for confirmation.	____	____	____
	(2) Use of positive or negative forms of confirmation request, or a combination of both.	____	____	____
	(3) Timing of confirmation procedures.	____	____	____
	(4) Type of information needed on the confirmation request.	____	____	____
	(5) Anticipated scope of alternative procedures as to significant accounts which do not respond to confirmation requests.	____	____	____
c.	Nature and extent of tests to substantiate sales cut-off.	____	____	____
d.	Nature and extent of tests to substantiate deferral and realization of revenue in such situations as unearned subscription income or unearned finance charges on installment receivables.	____	____	____
e.	Approach to reviewing and evaluating adequacy of the allowance provided for doubtful accounts (review of allowances for specific accounts, comparison of experience relating to write-offs with sales and receivables, and the client's past and present credit policies and practices, etc.).	____	____	____

B–2. Revenues, Receivables, and Receipts—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client has controls in place which can be either inspected, observed or reperformed.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
1. Obtain the sales journal and for a selected period(s):			
a. Trace totals from the sales journal to the general ledger control accounts for revenues, receivables, and such other accounts as salesmen's commissions, provisions, and allowances for product warranties, etc.	____	____	____
b. Trace selected individual items from the sales journal to such other subsidiary records as the salesmen's commissions detail, and entries to charge cost.	____	____	____
c. Reconcile the sales journal to the entries to charge cost of sales and credit inventory.	____	____	____
d. Test the arithmetic accuracy of the footings and crossfootings of the journals.	____	____	____
2. Obtain the cash receipts journal and perform the following on a test basis for a selected period(s):			
a. Trace totals to the general ledger for both the cash account and applicable account distributions such as accounts receivable, cash sales, investment income, and additions to notes payable (re: proceeds).	____	____	____
b. Test the arithmetic accuracy of the footings and crossfootings of the cash receipts journal; reconcile total receipts to total deposits per the bank statement.	____	____	____
3. Select ____ entries from the sales journal made at various times throughout the year, obtain the supporting documents, and perform the following tests:			
a. Compare the sales invoices with the entries in the sales journal for invoice date, invoice number, identity of customer, dollar amount, and any related items such as sales tax, salesmen's commissions, etc.	____	____	____
b. Trace the sales invoice to the accounts receivable subsidiary (customers) ledger and to evidence of subsequent payment (remittance advice and cash receipts records).	____	____	____
c. If the client charges cost of sales and credits inventory as items are sold, trace detail per the sales invoice to subsidiary records for cost of sales and inventory.	____	____	____
d. Compare the sales invoice for customer identity, description of product, price, quantities, and amounts, to the applicable sales order, and customer's purchase order or job contract. Note evidence of approval of prices and credit as prescribed by management.	____	____	____
e. Compare customer identity, description of product, and quantities per the sales invoice to the documents evidencing shipment; test computations of related freight and insurance charges. Ascertain whether sales are recorded in the proper months.	____	____	____

	Done by	Date	W/P Ref.
f. Trace prices, discount, and payment terms to such sources as price lists, job quotations, and job contracts.	____	____	____
g. Test arithmetic accuracy of extensions, footings, and computation of discounts. Note evidence of performance of a clerical check by client staff, where applicable.	____	____	____
4. Review the numerical sequence file of shipping orders for a selected period and account for missing numbers.	____	____	____
5. Select ____ shipping orders prepared at various times during the year:	____	____	____
a. Obtain related sales invoices and trace them to the sales journal.	____	____	____
b. Note whether billings are timely for shipments made.	____	____	____
6. Select ____ credit memorandums issued at various times during the year.	____	____	____
a. Ascertain whether credits were authorized in accordance with prescribed procedures.	____	____	____
b. Review available supporting documentation.	____	____	____
c. Trace the memorandums to the sales journal or other appropriate journal and to the accounts receivable subsidiary ledger.	____	____	____
d. If the credit is granted for return of goods, inspect evidence of return and ascertain whether accounting for the returned goods is consistent with reported condition of the returned goods.	____	____	____
7. From the cash receipts journal, select ____ cash receipts entered during the year; obtain the supporting remittance advices and perform the following:			
a. Compare the remittance advices with applicable entries per the cash receipts journal and trace to deposits per the bank statement(s). Ascertain the promptness of the deposit and recording of the entries.	____	____	____
b. Trace detail posting of cash receipts to the accounts receivable, notes receivable, or other appropriate subsidiary ledgers. Ascertain whether cash receipts and related credits to accounts receivable are recorded consistently in the proper period.	____	____	____
B–3. Revenue, Receivables, and Receipts—Evaluation of Tests of Controls			
1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of control and:			
a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation or required memoranda, etc.).	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
b. Based on the control risk assessment, make necessary modifications to applicable sections of the program for substantive tests.	____	____	____
c. Identify and note reportable conditions in internal control to be brought to the client's attention.	____	____	____
d. Identify and note other internal control matters to be brought to the client's attention.	____	____	____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of the design and operation of controls. See AAM section 4600.15.

C–1. Purchases, Accounts Payable, and Disbursements—Understanding and Risk Assessment

1. Obtain and document a sufficient understanding of the design of relevant controls which relate to classifications of costs or expenses and charges to accounts such as property and equipment and prepaid expenses and whether assets purchased have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size and complexity and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.) ____ ____ ____

2. Assess the level of control risk:

   a. If the assessment of control risk is at the maximum level, document this assessment (the basis for the assessment need not be documented) and go to section D–1. If the control risk is assessed at this level, the auditor will have to expand substantive tests to compensate for this level of control risk. Some examples of substantive tests which may be affected are shown in step 3 below. ____ ____ ____

   b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level of control risk. Some examples of evidential matter which can be used to support this assessed level are shown in section C–2 below—Tests of Controls. ____ ____ ____

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach may be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

	Done by	Date	W/P Ref.
3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected. Consider the following matters as appropriate. Cross-reference to AAM section 5400.100 and 5400.160.			
a. Extent of analytical procedures and tests of details of transactions and balances regarding classification of costs or expenses and charges to accounts such as property and equipment and prepaid expenses.	____	____	____
b. Extent of testing of details of transactions and balances to substantiate recorded payables and search for unrecorded liabilities as of the balance-sheet date.	____	____	____
c. Need for and extent of confirmation of payables from vendors.	____	____	____
d. The number of days following the balance-sheet date for which cut-off bank statements should be obtained.	____	____	____
e. The extent to which (if any) tests of cash balances can be performed at interim dates.	____	____	____
f. The extent to which testing of outstanding checks, deposits in transit, and other reconciling items can be restricted.	____	____	____
g. The number of days before and after the balance-sheet date which should be used for the testing of bank transfers.	____	____	____
h. Whether all bank transfers during the selected period or only those over a selected dollar amount should be tested.	____	____	____
i. Whether petty cash funds should be counted or confirmed with the custodian as of the balance-sheet date.	____	____	____
j. Whether petty cash funds should be counted on a surprise basis.	____	____	____
k. The need for coordination of cash counts with inspection of marketable securities and other investments.	____	____	____

C–2. Purchases, Accounts Payable, and Disbursements—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client has controls in place which can be either inspected, observed or reperformed.

1. Obtain the voucher register and for a selected period(s):			
a. Trace postings to other subsidiary registers, if used (for example, property tax register).	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
b. Test the arithmetic accuracy of the footings and crossfootings of the voucher register for a test period(s).	____	____	____
c. Trace totals to the general ledger for both accounts (vouchers) payable and the various account distributions.	____	____	____
2. Select ____ entries from the voucher register for various months throughout the year, obtain supporting documents and perform the following tests:			
a. Compare the entry in the voucher register to the vendor's invoice as to date, payee, description, and amount and test the clerical accuracy of the invoice.	____	____	____
b. Determine that the invoice is supported by (i) an approved purchase order or payment request form and, if applicable, a properly executed purchase requisition and (ii) a signed receiving report or other evidence of receipt of services or goods, or otherwise authorized in accordance with prescribed procedures.	____	____	____
c. Determine that the account distribution in the voucher register is reasonable and in agreement with the purchase order.	____	____	____
d. Determine that purchase discounts have been properly recorded.	____	____	____
e. Determine that freight has been billed in conformity with the purchase order.	____	____	____
f. Examine the canceled check issued to payment of the invoice for date, payee, amount, signature, and endorsement. Trace to cash disbursements journal.	____	____	____
g. Inspect the voucher for evidence of clerical check, approval of payment as prescribed by management, and appropriate cancellation.	____	____	____
3. Review the numerical sequence files of receiving reports and of purchase orders and determine whether missing numbers are accounted for. (Failure by the client to do so increase the risk that unrecorded liabilities may exist.)	____	____	____
4. Obtain the cash disbursements journal and perform the following on a test basis:			
a. Trace postings for a selected period(s) to the general ledger for both the cash accounts and applicable account distributions.	____	____	____
b. Trace postings for a selected period(s) to other applicable subsidiary records, if present (for example, voucher or purchase journal, insurance and property tax registers, plant ledger, etc.).	____	____	____
c. For a selected period(s), foot and crossfoot the cash disbursements journal; reconcile total disbursements to the bank statement.	____	____	____

	Done by	Date	W/P Ref.
5. Review the numerical sequence of checks issued for a selected period and account for missing numbers as void or included on the list of outstanding checks. Select ____ checks drawn at various times during the year from the disbursements journal and obtain the paid checks and supporting detail for the disbursements:			
a. Examine the paid checks and trace identity of signatures to the list of authorized check signers. (Consider requesting confirmations from banks of authorized check signers.)	____	____	____
b. Compare identity of payee to endorsement; review checks for unusual endorsements and schedule those found for further investigation.	____	____	____
c. Compare paid check and supporting detail to the cash disbursements journal for check number, date drawn, payee, amount, and account distribution.	____	____	____
6. Review the client's bank reconciliations; for a selected period(s) perform the following tests of the bank reconciliation(s) and related listings of outstanding checks:			
a. Prove the arithmetic accuracy of the bank reconciliation, including the list of outstanding checks.	____	____	____
b. Trace the bank balance to the bank statement and the book balance to the general ledger account.	____	____	____
c. Trace the paid checks accompanying the bank statement to the cash disbursements journal and outstanding check list for the preceding month-end.	____	____	____
d. Trace deposits per the bank statement to the cash receipts journal and deposits in transit per bank reconciliations of the preceding month-end.	____	____	____
e. Trace deposits in transit to the bank statement for the following month; note whether the time interval between the dates per book and bank appear reasonable.	____	____	____
f. Trace outstanding checks to paid checks which accompany the bank statement for the month(s) subsequent to the reconciliation tested; compare paid checks to the cash disbursements journal and inspect signature(s) and endorsements.	____	____	____
g. Trace other reconciling items to supporting documents and check subsequent disposition.	____	____	____
7. Consider preparing a proof of cash for a test period including the tests described in step 6 above and the following:			
a. Trace totals per the cash receipts and disbursements journals to the general ledger cash accounts; identify and obtain explanations for significant and unusual cash entries in the general ledger during the test period. Foot the receipts and			

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
disbursements journals and prove the arithmetic between the opening and closing general ledger cash balances for the test period.	____	____	____
b. Prove the arithmetic accuracy of the bank statement by footing the deposits and disbursements, adding the opening balance and deducting the closing balance and ascertaining that the resulting differences equal total disbursements.	____	____	____
c. Account for all deposits per books as deposits per bank or deposits in transit. Determine that deposits are made on a timely basis.	____	____	____
d. Review the numerical sequence of checks issued during the period, accounting for them as paid during the period, included on the list of outstanding checks, or void. Determine that void checks have been properly mutilated.	____	____	____

Note: The working paper format for this step would present reconciliations of total receipts and disbursements per cash books to the respective total credits and charges per the bank statement(s) in addition to reconciliations of the bank and book balances at the beginning and end of the selected period. This working paper format may be used to reconcile total activity per the cash books and bank statements for various time periods such as a month or several months.

8. Select the paid check(s) to reimburse the petty cash fund(s) from the cash disbursements journal; examine the voucher and paid check for consistency with the disbursements journal and prescribed approval and account distribution, and perform the following tests:			
a. Foot supporting evidence by account distribution and trace total to reimbursement voucher.	____	____	____
b. Trace reimbursement voucher to cash disbursements journal and petty cash book.	____	____	____
c. Examine petty cash vouchers for the following:			
(1) Prepared in ink	____	____	____
(2) Approved	____	____	____
(3) Canceled after reimbursement	____	____	____
(4) Dated	____	____	____
(5) Payee	____	____	____
(6) Amount	____	____	____
(7) Signature	____	____	____
(8) Account charged	____	____	____
(9) Numbered consecutively	____	____	____
(10) Reasonableness of amount and business purpose	____	____	____

	Done by	Date	W/P Ref.

C–3. Purchases, Accounts Payable, and Disbursements—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of controls and:
   - *a.* Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation of required memoranda, etc.). ____ ____ ____
   - *b.* Based on the control risk assessment, make necessary modifications to applicable sections of the program for substantive tests. ____ ____ ____
   - *c.* Identify and note reportable conditions in internal control to be brought to the client's attention. ____ ____ ____
   - *d.* Identify and note other internal control matters to be brought to the client's attention. ____ ____ ____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. See AAM section 4600.15.

D–1. Payroll—Understanding and Risk Assessment

1. Obtain and document a sufficient understanding of the design of relevant controls which relate to the payroll account balances and transactions and whether they have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size and complexity and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.) ____ ____ ____
2. Assess the level of control risk:
   - *a.* If control risk is assessed at the maximum level, document this conclusion (the basis for the conclusion need not be documented) and go to section E–1. If the control risk is assessed at this level the auditor will have to expand substantive tests to compensate for this level of risk. Some examples of substantive tests which may be affected are shown in step 3 below. ____ ____ ____
   - *b.* If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level. Some examples of evidential matter which can be used to support this assessed level are shown in section D–2—Tests of Controls. ____ ____ ____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach made be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected. Consider the following matters as appropriate. Cross-reference to AAM section 5400.160.

   a. The extent to which analytical procedures are applied to payroll costs and expenses and the extent to which fluctuations are investigated. ____ ____ ____

   b. Whether, and to what extent, gross pay is reconciled to individual earnings records. ____ ____ ____

   c. Whether, and to what extent, a payoff is made. ____ ____ ____

   d. The extent to which labor charges to property and equipment and to inventory are tested. ____ ____ ____

   e. The extent to which payroll taxes withheld and accrued are tested. ____ ____ ____

D–2. Payroll—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client had controls in place which can be either inspected, observed or reperformed.

1. Obtain the payroll register for a selected period(s):

   a. Trace totals per the register through applicable payroll summaries to the paid check used to transfer cash for net pay to the payroll bank account, and to postings in the general ledger (and cost accounting records, if applicable) for wage and salary cost and expense distributions, and liabilities for payroll withheld and deducted. ____ ____ ____

   b. Trace payroll withheld through applicable subsidiary records to the payroll tax returns. Review the payroll tax returns; examine the check remitting withholdings to the governments (federal and state) and trace to the general ledger liability accounts. ____ ____ ____

   c. Determine whether payroll was approved in accordance with prescribed procedures. (For example, approval might be a signature on a payroll summary and request for the deposit of net pay to the payroll bank account; the signature on the check used to transfer money to the payroll bank account; approvals directly on the registers; etc.) ____ ____ ____

	Done by	Date	W/P Ref.
d. Test the arithmetical accuracy of the footings and crossfootings of the payroll register.	____	____	____
2. Select ____ entries from the payroll register made at various times throughout the year, and perform the following procedures:			
a. Examine authorization for rate of pay and evidence in support of payment (for example, time records, piece-work production reports or other documentation which has been approved as prescribed by management) and on a test basis recompute gross pay.	____	____	____
b. Examine proper authorizations for payroll withholdings such as signed W-4 forms and on a test basis recompute amounts withheld.	____	____	____
c. Test arithmetical accuracy of net pay based on gross pay less deductions.	____	____	____
d. Examine canceled checks noting date, check number, name of payee and comparing net pay to the payroll register, signature to list of authorized check signers, and endorsement to the signed W-4 forms.	____	____	____
e. Examine signed receipt for employees paid by cash, compare amount on the receipt with the payroll register and compare signature to the signed W-4 form.	____	____	____
f. Compare the individual payroll entry on the payroll register to the records used to accumulate year-to-date employee compensation for such purposes as preparation of payroll tax returns and W-2 forms.	____	____	____
3. Authorization of rate of pay. (For example, memoranda in the personnel files evidencing approval as prescribed by management, union contracts, approved rate or salary schedules, authorization of officer's salaries per minutes of board of director's meetings.)	____	____	____
4. Evidence in support of payment. For example:			
a. Time cards or records, which have been approved as prescribed, for employees paid on an hourly basis and for employees paid for overtime.	____	____	____
b. Production reports, which have been approved as prescribed, for employees paid on a piece-work basis.	____	____	____
c. Sales and commission registers, and evidence that advance drawings for commission salesmen had been approved as prescribed.	____	____	____
5. Evidence in support of payroll withholdings. (For example, signed W-4 forms or other proper authorization.)	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
6. Evidence of review of payroll for clerical accuracy, reasonableness, and account distribution, as prescribed by management.	____	____	____
7. Evidence of individual payroll records. (For example, the individual payroll entry to the records used to accumulate year to date employee compensation for such purposes as preparation of payroll, tax returns and W-2 forms.)	____	____	____
8. Consider, based on the preliminary evaluation, whether to:			
a. Observe the distribution of payroll checks or cash, including control of unclaimed wages.	____	____	____
b. Physically observe selected employees in the performance of their duties.	____	____	____

D–3. Payroll—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of control and:			
a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation of required memoranda, etc.)	____	____	____
b. Based on the control risk assessment, propose necessary modifications to applicable sections of the program for substantive tests.	____	____	____
c. Identify and note reportable conditions in internal control to be brought to the client's attention (SAS No. 55 [AU section 319]).	____	____	____
d. Identify and note other internal control matters to be brought to the client's attention.	____	____	____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. See AAM section 4600.15.

E–1. Inventories and Cost of Sales—Understanding and Risk Assessment

1. Obtain and document a sufficient understanding of the design of relevant controls which relate to the inventory, cost of sales account balances and transactions and whether they have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size, complexity, and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.)	____	____	____

	Done by	Date	W/P Ref.
2. Assess the level of control risk:			
a. If control risk is assessed at the maximum level, document this conclusion (the basis for the conclusion need not be documented). If the control risk is assessed at this level the auditor will have to expand substantive tests to compensate for this level of risk. Some examples of the substantive tests which may be affected are shown in step 3 below.	____	____	____
b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level. Some examples of evidential matter which can be used to support this assessed level are shown in section E–2—Tests of Controls.	____	____	____

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach made be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected in, for example, the following aspects:			
a. The extent to which physical inventories are observed and/or perpetual records tested.	____	____	____
b. Whether physical inventories are taken at a preliminary date or at the balance-sheet date.	____	____	____
c. The extent to which consigned inventories are confirmed.	____	____	____
d. The extent to which inventory prices are tested to supporting documentation.	____	____	____
e. The extent to which analytical procedures are applied to cost of sales and the extent to which fluctuations are investigated.	____	____	____
f. The extent to which cutoffs are tested.	____	____	____
g. The extent to which inventories are tested for obsolete or excess stock.	____	____	____

E–2. Inventories and Cost of Sales—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client has controls in place which can be either inspected, observed or reperformed.

1. Tour the client's manufacturing or production facilities with a member of the client's organization familiar with production.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
2. Select a sample of transactions for additions and deletions of inventory from such sources as receiving reports, requisitions to place materials into production, and shipping documents. Note the reference or control number, date, description, quantity and dollar amount for each transaction selected. Trace the transactions to the perpetual inventory record and the cost accounting records, if any, used to determine unit or job costs. Perform similar tests selecting the transactions from the perpetual inventory records and/or cost accounting records and trace the transactions to receiving reports, requisitions and shipping documents.	____	____	____

Note: This testing may be coordinated with tests of controls for purchases, payables, and disbursements, and for revenues, receivables, and receipts.

3. Obtain an analysis of overhead costs charged to inventories and over- or under-absorbed overhead. Review the amounts included in the overhead pool for propriety and perform the following:			
a. Determine that overhead costs are being charged to inventory in accordance with an appropriate policy (for example, as a percent, as a percent of direct labor).	____	____	____
b. Identify disposition of variances, if any, between actual overhead costs incurred and overhead costs applied to production and inventory. Determine that variances are reasonable. Determine that no excessive costs for idle plant are being charged to inventory.	____	____	____
4. If a job order cost system is used, obtain the job order ledger (or tabulation), select a period(s) and perform the following:			
a. Trace total costs incurred to the voucher register (or cash disbursements journal), the payroll distribution, and support for overhead applied.	____	____	____
b. Test the footings of the job order ledger by refooting the detail for selected subtotals and refooting the subtotals.	____	____	____
c. Select ____ job orders for jobs in process and completed jobs and perform the following:			
(1) Examine authorization for the job order.	____	____	____
(2) Trace materials used on a test basis at various times since inception of the job order to such supporting details as requisitions, purchase orders, receiving reports, and processed invoices. (Consider coordination with compliance tests for purchases.)	____	____	____
(3) Trace direct labor costs to account distributions of the payroll registers and on a test basis to individual time			

	Done by	Date	W/P Ref.
reports or time cards. (Consider coordination with tests of controls for payroll.)	____	____	____
(4) Trace application of overhead costs to analyses used to accumulate overhead costs; test computations and review for reasonableness.	____	____	____
(5) Identify the status of the job (work in process, finished goods, or goods shipped) and trace through necessary summarization to the applicable general ledger account. Obtain explanation for any unreasonable time lag between completion and shipping dates for job orders performed for specific customers.	____	____	____
5. For process cost systems, obtain the cost of production reports for each department within the production process for a selected period(s) and:			
a. Trace quantities and dollar amounts for units received for selected departments to the quantities and dollar amounts transferred out per the preceding department in the sequence of production.	____	____	____
b. For each selected department, review the computations of total and unit costs for production transferred to the next department; on a test basis recompute unit costs and ascertain that costs for units lost in process are properly reallocated to surviving units.	____	____	____
c. Trace materials costs charged to the selected departments to appropriate journals and on a test basis to individual requisitions.	____	____	____
d. Trace labor costs incurred to account distribution analyses of the payroll registers.	____	____	____
e. Review the allocation of overhead.	____	____	____

E–3. Inventories and Cost of Sales—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of controls and:			
a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation of required memoranda, etc.).	____	____	____
b. Based on the control risk assessment, make necessary modifications to applicable sections of the program for substantive tests.	____	____	____
c. Identify and note reportable conditions in internal control to be brought to the client's attention.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

	Done by	Date	W/P Ref.
d. Identify and note other internal control matters to be brought to the client's attention.	____	____	____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. See AAM section 4600.15.

F. Section Completion

This audit program section has been completed in accordance with firm policy.

Done by	____	____	____
Reviewed by	____	____	____

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

.040

Obj.		*Done By*	*Date*	*W/P Ref.*

III. Cash

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Existence of cash—To determine that cash exists and is owned by the entity. (Assertions 1 and 3)

B. Proper cut-off—To determine that cash balances reflect a proper cut-off of cash receipts and disbursements. (Assertions 1, 2, and 4)

C. Cash complete—To determine that cash balances as presented in the balance-sheet properly reflect all cash and cash items on hand, in transit, or on deposit with third parties. (Assertions 1, 2, and 5)

D. Proper classification—To determine that cash balances are properly classified in the financial statements and any restrictions on the availability of funds are properly disclosed. (Assertions 3 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review ____ ____ ____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
[A]	**B. Substantive Analytical Procedures**			
[B] [C] [D]	1. Compare account balances with preceding year's balances (or expected balances) and investigate any significant deviations from expected balances.	____	____	____
	2. Compute quick current ratios (cash, and net receivables) and compare with preceding year's ratios or expected ratios. Investigate any significant deviations from the expected ratios.	____	____	____
	C. Cash in Banks—Detailed Tests			
A C D	1. Confirm bank balances (using standard forms to confirm account balance information with financial institutions) as of the balance-sheet date for ____ bank accounts used during the year. (Confirmation of and information about certificates of deposit and compensating balances arrangements should also be requested.)	____	____	____
B [C]	2. Arrange to obtain cut-off bank statements and related paid checks directly from the banks for ____ days following the balance-sheet date.	____	____	____
C	3. Obtain or prepare a comparative listing of the component bank account(s) and petty cash fund balances as of the closing and opening balance-sheet dates for the year (period) being audited:			
	a. Refoot the schedule and trace totals to the financial statement assembly sheets.	____	____	____
	b. Trace closing balances to the general ledger and working papers on bank reconciliations and petty cash funds.	____	____	____
	c. Trace opening balances to the working papers for the preceding audit.	____	____	____
	d. For bank accounts opened and closed during the year (period) trace to authorization in the minutes of the board of directors meetings.	____	____	____

Obj.		Done By	Date	W/P Ref.
A B C [D]	4. Obtain copies of the bank reconciliations as of the balance sheet date and perform the following:			
	a. Trace the book balance to the balance per the general ledger control account and to the working lead schedule or trial balance.	____	____	____
	b. Compare the bank balance to the cut-off bank statement and to the confirmation received from the respective bank.	____	____	____
	c. Test the clerical accuracy of the reconciliation.	____	____	____
	d. Review and explain unusual reconciling items and trace to appropriate subsequent disposition.	____	____	____
	e. Trace deposits in transit to the cut-off bank statement(s) and ascertain whether the time lag is reasonable.	____	____	____
	f. Inspect selected paid checks returned with the cut-off bank statement. Examine the cancellation date on the paid checks to identify any checks that were not recorded in the period under audit. Trace checks drawn prior to the end of the period under audit to the list of outstanding checks and to the cash disbursements journal and agree items such as date, payee, and amount.	____	____	____
	g. List and investigate any unusual checks including checks drawn to "bearer" or "cash."	____	____	____
	h. List and investigate any outstanding checks of $ ____ or over, which did not clear the banks within a reasonable period to ascertain that the disbursements are proper.	____	____	____
B C	5. Prepare a bank transfer schedule providing column headings for the following:			
	a. Name of disbursing bank	____	____	____
	b. Check number or other reference	____	____	____
	c. Amount	____	____	____
	d. Date disbursed per books	____	____	____
	e. Date disbursed per bank	____	____	____
	f. Name of receiving bank	____	____	____
	g. Date deposited per books	____	____	____
	h. Date deposited per bank	____	____	____
	i. Perform the following:			
	(1) Review the cash receipts and disbursements journals, bank statements and related paid checks (including the cut-off bank statements) for the last ____ days before			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	the first ____ days after the closing date of the year (period) and list all bank transfers (or each transfer of $ ____ or over) on the transfer schedule.	____	____	____
	(2) Review the schedule to determine that the deposit and disbursement side of each transfer is recorded in the proper period and that any time lag between book and bank entries appears reasonable. Trace incompleted transfers to the schedule of outstanding checks and/or deposits in transit.	____	____	____
B	6. If cut-off statements and related paid checks are not independently received by the auditor directly from the bank, obtain the bank statements and related paid checks for the month following the balance-sheet date and perform the following:			
	a. Inspect bank statements for erasures and prove arithmetic accuracy of the statements (opening balance plus total deposits and other credits, less the closing balance equals total disbursements and other charges).	____	____	____
	b. Examine paid date of each check and debit memo to ascertain it was paid by the bank during the period covered by the bank statements.	____	____	____
	c. Foot the paid checks and debit memos to ascertain that the total agrees with total charges per the bank statements.	____	____	____
	d. Request banks to confirm the balance at the end of the statement period.	____	____	____
A B C D	7. On receiving the bank confirmation relies:			
	a. Ascertain that all of the inquiries have been answered. If any inquires have not been answered, telephone or correspond with the bank to obtain the missing information (in writing).	____	____	____
	b. Review bank confirmations for details applicable to other areas of the financial statements such as liabilities, debt, commitments, and contingencies.	____	____	____
	c. Determine whether there are any restrictions on the account balances, including minimum balance requirements.	____	____	____
	d. Determine whether there are any guarantee arrangements.	____	____	____
	D. Cash Funds and Petty Cash—Detailed Tests			
	1. The auditor should consider performing the following procedures if cash balances on hand are deemed significant:			
A B C D	*a.* Identify all funds, including locations, custodians, amounts and purpose and decide:			
	(1) Which funds are to be counted and, if so, whether to count them simultaneously and whether simultaneous			

Obj.			Done By	Date	W/P Ref.
		control and inspection of other assets, such as negotiable securities, is also necessary.	____	____	____
		(2) Timing of counts to be at a preliminary date, the balance-sheet date or subsequent to the balance-sheet date.	____	____	____
A B C D	*b.*	Count all (or on a test basis, depending upon risk assessment) undeposited cash, petty cash, unclaimed wages, stamps, etc., in the presence of the custodian (A client's representative should be present at all times during the count.) and:			
		(1) List currency and coins counted by denomination.	____	____	____
		(2) List other items such as stamps, checks, and vouchers; examine vouchers as to date, amount, payer, authorization, signature, account charged, and documentation. Identify large or unusual amounts for possible follow-up.	____	____	____
		(3) Trace the fund balance per the count to the balance per the general ledger.	____	____	____
		(4) List all unusual items such as postdated checks or vouchers prepared in pencil for discussion with a responsible member of the client's staff.	____	____	____
		(5) If petty cash reimbursement checks are included in the fund, trace the amounts to cash book entries dated prior to the count.	____	____	____
		(6) Have the custodian sign a receipt at the conclusion of the count.	____	____	____

Practice Tip

It is often a good idea to scan petty cash vouchers to determine types of expenses that are paid out of petty cash. Be on the lookout for items that might need to be capitalized.

A B C D	3.	Consider whether to confirm funds at branch offices and other locations which are not scheduled for a physical count.	____	____	____

E. Additional Procedures (if any)

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		*Done By*	*Date*	*W/P Ref.*
F.	**Section Completion**			
1.	Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for cash balances, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for cash balances.	____	____	____
2.	The objectives of this audit program have been met.	____	____	____

This audit program section has been completed in accordance with firm policy.

IV. Investments and Derivatives

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Existence of investment—To determine that the entity owns the investments at the balance-sheet date and has physical evidence of ownership (securities, receipts from responsible custodians, etc.). (Assertions 1, 2, and 3)

B. Proper valuation—To determine that the market or other fair value of the investments has been determined as objectively as practicable. (Assertion 4)

C. Income recognition—To determine that related income from the investments is properly recorded and received. (Assertions 2, 3, and 4)

D. Restrictions identified—To determine that restrictions, pledges or liens on any of the investments and related liabilities are identified and adequately disclosed in the financial statements. (Assertions 1, 2, 3, and 5)

E. GAAP conformity—To determine that the financial statement presentation and disclosure investments, including off-balance-sheet items such as options and other derivative instruments, and related income is in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

	Procedures:			
	A. Preliminary Procedures			
	1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
	a. Preliminary analytical review	____	____	____
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
[A]	**B. Substantive Analytical Procedures**			
[B][C][D]	1. Compare investment account balances with preceding year's balances (or expected balances) and investigate any significant deviations from the expected balances.	____	____	____
	2. Compute the following ratios and compare with prior years:			
	a. Investments divided by total assets (indication of earning asset mix).	____	____	____
	b. Major categories of investments divided by total investments (measure of investments and risk portfolio mix).	____	____	____
	c. Investment income divided by average total investments, by category (measure of investment portfolio yield).	____	____	____
	C. Detailed Tests			
A B C E	1. (Some of the following information may not be necessary, depending upon the judgment of the auditor.) Obtain or prepare detailed analyses of investments showing:			
	a. Classification between held-to-maturity, available-for-sale, or trading securities, and securities accounted for under the equity or cost methods.	____	____	____
	b. Classification between current and noncurrent portfolios of held-to-maturity securities and available-for-sale securities.	____	____	____
	c. Description of the security, including any interest rate and maturity of debt, the dividend rate on cumulative preference shares, etc.	____	____	____

Obj.			Done By	Date	W/P Ref.
		d. Number of shares, par value, or face amount held at the end of the preceding period, and the balance at cost and at market or equity, if applicable, together with any unamortized premium or discount on bonds.			
		e. Additions including date, number of shares, par values or face amounts, and cost.			
		f. Sales and dispositions including date, number of shares, par value or face amounts, cost, proceeds, and realized gain or loss.			
		g. Number of shares, par values, or face amounts held at the end of the period, and the balance at cost and at fair value or equity, if applicable, together with any unamortized premium or discount on bonds.			
		h. Related holding gains and losses at the beginning and the end of the period and changes therein.			
		i. Investment income (dividends, interest, etc.) for individual investments—accrued at the end of the previous period, earned during the current period, collected during the period and accrued at the end of the current period.			
B	2.	Foot and croosfoot the analyses.			
[E]	3.	Trace ending totals to the general ledger and trace opening balances to the prior period audit working papers.			
A B [D] [E]	4.	Inspect securities on hand in the presence of the custodian (including treasury stock and securities held as collateral) at the balance-sheet date or at a date shortly before or after, and examine supporting evidence (for example, bank and broker advices) for transactions between the inspection date and balance-sheet date:			
		a. Ascertain that certificates issued in nominee names are owned by the client.			
		b. Note certificate or serial numbers, if useful.			
		c. If the investment is in the debt or equity of a nonpublic entity, consider obtaining confirmation from the issuer or trustee.			
		d. Obtain a signed receipt.			
A	5.	Obtain positive confirmation as of the balance-sheet date for investments held by independent custodian; consider whether inspection of investments held by custodians is necessary.			
A D E	6.	Read executed partnership, debt security, preferred stock and similar agreements to determine that management's assertions regarding those investments are consistent with their contractual terms.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
E	7. Ascertain whether the accounting policies adopted by the entity for investments are in conformity with generally accepted accounting principles (i.e., certain investments should be accounted for under FASB Statement No. 115, other investments may require the application of the cost or equity methods of accounting).			
E	8. Obtain an understanding of the process used by management to classify investments.			
E	9. Determine that all debt and equity securities accounted for under FASB Statement No. 115, as amended by FASB Statement No. 125, are properly classified as either held-to-maturity, available-for-sale, or trading by:			
	a. Evaluating management's intent in purchasing and holding the investment.			
	b. Considering whether the client's actual investment activities corroborate or conflict with management's stated intent. Examine, as appropriate, evidence such as:			
	(1) Written and approved records of investment strategies			
	(2) Records of investment activities			
	(3) Instructions to portfolio managers			
	(4) Minutes of meetings of the board of directors or investment committee			
	c. Evaluating the client's ability to hold a debt security to maturity. Consider, as appropriate, factors such as:			
	(1) Financial position			
	(2) Working capital needs			
	(3) Operating results			
	(4) Debt agreements			
	(5) Guarantees and other relevant contractual obligations			
	(6) Laws and regulations			
	(7) Existing operating cash flow projections or forecasts			
E	10. For investments accounted for under FASB Statement No. 115, obtain written representations from management confirming that the client has properly classified securities as held-to-maturity, trading, or available-for-sale, and, with respect to held-to-maturity debt securities, obtain a representation that management has the intent and the client has the ability to hold such investments to maturity.			
E	11. For investments accounted for under the equity method (APB Opinion No. 18), determine the appropriateness of that accounting method (investor must exercise significant influence, but not control, over an investee). Procedures should include:			

Obj.		Done By	Date	W/P Ref.
	a. Inquiry of management as to:			
	(1) Whether the client has the ability to exercise significant influence over the operating and financial policies of the investee under the criteria set forth in paragraph 17 of APB Opinion No. 18.	____	____	____
	(2) The attendant circumstances that serve as a basis for management's conclusion.	____	____	____
E	12. If the client accounts for an investment in an investee contrary to the applicable presumption contained in paragraph 17 of APB Opinion No. 18, obtain sufficient competent evidential matter about whether that presumption has been overcome and whether appropriate disclosure is made regarding the reasons for not accounting for the investment in keeping with the presumption.	____	____	____
A B C E	13. For investments accounted for under the equity method, agree the investment to the proper audited financial statements of the investee (There may be a time lag in reporting between the date of the financial statements of the investor (client) and the investee.):			
	a. If the financial statements of the investee are not audited, apply (or have the investee's auditor apply) appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor (client).	____	____	____
	b. With respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the report of the investor (client), read available interim financial statements of the investee and make appropriate inquiries of the client to identify subsequent events and transactions that are material to the client's financial statements.	____	____	____
B C E	14. For investments accounted for using the equity method, obtain evidence relating to material transactions between the investor (client) and investee and evaluate the propriety of the elimination of unrealized intercompany profits and losses and the adequacy of the disclosures about material related-party transactions.	____	____	____
	15. For investments carried at cost or amortized cost (and for disclosures regarding the cost basis of investments):			
	a. Determine that they are valued at cost. Procedures may include inspection of documentation indicating the purchase price of the security, and confirmation with the issuer or custodian.	____	____	____
	b. Recalculate the amortized cost.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
B E	16. For investments carried at fair value (and for disclosures regarding the fair value of investments), obtain evidence corroborating their fair value by performing the following procedures as applicable:			
	a. For investments listed on national exchanges or over-the-counter markets, agree the fair value to quoted market prices listed in financial publications, the exchanges, or the National Association of Securities Dealers Automated Quotations System (NASDAQ).	____	____	____
	b. For other investments, agree the fair value to quoted market prices obtained from broker-dealers who are market makers in those investments.	____	____	____
	c. For investments which do not have available quoted market prices, obtain estimates of fair value from third-party sources based on proprietary models or obtain estimates of fair value from the client based on internally developed or acquired models.	____	____	____
	d. For fair-value estimates obtained from broker-dealers and other third-party sources, consider the applicability of the guidance in SAS No. 73 or SAS No. 70.	____	____	____
	e. For investments valued by the client using a valuation model, assess the reasonableness and appropriateness of the model, and determine whether the market variables and assumptions used are reasonable and appropriately supported.	____	____	____
	f. For investments valued by the client using a valuation model, determine whether the client has made appropriate disclosures about the method(s) and significant assumptions used to estimate the fair values of such investments.	____	____	____
	g. If debt securities have collateral assigned to them and that collateral is an important factor in evaluating fair value and collectibility of the investment, obtain evidence regarding the existence, fair value, and transferability of such collateral as well as the client's rights to the collateral.	____	____	____
B C E	17. For debt and equity securities classified as available-for-sale, recalculate unrealized gains and losses and determine whether they are properly included as a separate component of stockholders' equity.	____	____	____
B C E	18. For debt and equity securities classified as trading, recalculate unrealized gains and losses and determine whether they are properly included in earnings.	____	____	____
B E	19. Evaluate management's conclusions regarding whether a decline in fair value below the amortized cost basis of investments is other than temporary. In evaluating management's conclu-			

Obj.		Done By	Date	W/P Ref.
	sions, obtain evidence about conditions, such as those listed in paragraph 32 of SAS No. 81, that tend to corroborate or conflict with such conclusions.			

Practice Tip

The FASB has published a special report entitled, *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities.* This publication may be helpful in answering questions regarding the application of FASB Statement No. 115.

[A]	20. Determine that sales and purchases were properly approved; trace transactions to minutes of the board of directors or finance committee meetings.			
A C E	21. Examine bank or broker's advices and custodian's reports in support of purchases and sales.			
C E	22. Determine that gain or loss on disposition of a security has been computed and accounted for properly.			
A C E	23. Trace payments for purchases to canceled checks and proceeds from sales to entries in cash book.			
	24. Test accrued interest on investment securities as follows:			
	a. Obtain or prepare a trial balance of accrued interest receivable on investment securities and agree to the general ledger.			
	b. Recalculate accrued interest for selected securities.			
	c. Review the client's procedures for calculating monthly accruals and:			
	(1) Test the posting of monthly accruals by tracing to applicable accounts in the general ledger.			
	(2) Test detail calculations supporting the monthly entries.			
B C E	25. Determine that the amortization of premium and discount on debt securities, where applicable, has been properly computed and accounted for.			
E	26. Determine that any transfers between categories of investments have been properly recorded.			
	27. Obtain a list of all derivative transactions.			
A D	*a.* Examine evidence of the transactions and directors' approval of the transactions.			
E	*b.* Obtain confirmations of outstanding transactions as of year end.			
A	*c.* Review subsequent transactions to determine completeness of the list.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
E	*d.* For disclosure purposes obtain and evaluate information concerning significant individual or group concentrations of credit risk.			
B E	*e.* Determine that any gains or losses have been properly recorded.			
D	28. Determine if any securities are pledged or restricted.			
A	29. Evaluate the credit quality of the investments and determine whether purchases and sales conform to policy.			
E	30. Ensure that all information needed for financial statement disclosures has been accumulated and documented in the working papers.			
E	31. In accordance with FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), obtain information about the fair value of investments, and perform the following:			

Note: Disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 are optional for nonpublic entities that meet certain criteria (see FASB Statement No. 126). Determine if the client is making FASB Statement No. 107 disclosures. Also, FASB Statement No. 107 does not apply to investments accounted for under the equity method.

	a. Determine that the fair value amounts are determined in accordance with FASB Statement No. 107 (AC F25).			
	b. Determine that the valuation principles are being consistently applied.			
	c. Determine that the fair value amounts are supported by the underlying documentation.			
	d. Determine that the method of estimation and significant assumptions used are properly disclosed.			

D. Accounting by a Transferor and Transferee for All Transfers of Financial Assets

Note: FASB Statement No. 127 has deferred for one year the effective date of FASB Statement No. 125 for repurchase agreements, dollar-rolls, securities lending, and similar transactions. See FASB Statement No. 127 for more details.

	1. Determine that the proceeds received from the transfer of financial assets have been recognized as a sale, if all of the following conditions are met:			
	a. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.			

Obj.		Done By	Date	W/P Ref.
	b. Each transferee has either obtained the right, free of conditions that constrain it from taking advantage of that right, to pledge or exchange the transferred assets, or the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right, free of conditions that constrain them from taking advantage of that right, to pledge or exchange those interests.	____	____	____
	c. The transferor does not maintain effective control over the transferred assets through either an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.	____	____	____
	2. Determine that the proceeds received from the transfer of financial assets that do not meet the aforementioned conditions of a sale have been accounted for as a secured borrowing with a pledge of collateral.	____	____	____
	3. Upon completion of any transfer of financial assets, determine that the transferor has:			
	a. Continued to carry in its statement of financial position any retained interest in the transferred assets, including, if applicable, servicing assets, beneficial interests in assets transferred to a qualifying special-purpose entity in a securitization, and retained undivided interests.	____	____	____
	b. Allocated the previous carrying amount between the assets sold, if any, and the retained interests, if any, based on their relative fair values at the date of transfer.	____	____	____
	4. Upon completion of a transfer of assets that satisfies the conditions to be accounted for as a sale (see step 1 above), determine that the *transferor* has:			
	a. Derecognized all assets sold.	____	____	____
	b. Recognized all assets obtained and liabilities incurred in consideration as proceeds of the sale, including cash, put or call options held or written (e.g., guarantee or recourse obligations), forward commitments (e.g., commitments to deliver additional receivables during the revolving periods of some securitizations), swaps (e.g., provisions that convert interest rates from fixed to variable), and servicing liabilities, if applicable.	____	____	____
	c. Initially measured at fair value assets obtained and liabilities incurred in a sale or, if it is not practicable to estimate the fair value of an asset or a liability, applied alternative measures.	____	____	____
	d. Recognized in earnings any gain or loss on the sale.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	5. If the client is the *transferee*, determine that upon the completion of a transfer of assets that satisfies the conditions to be accounted for as a sale, the *transferee* recognizes all assets obtained and any liabilities incurred and initially measures them at fair value (in aggregate, presumptively the price paid).			
	6. If it is not practicable to estimate the fair values of assets, determine that the transferor recorded those assets at zero.			
	7. If it is not practicable to estimate the fair values of liabilities, determine that the transferor recognizes no gain on the transaction and records those liabilities at the greater of:			
	a. The excess, if any, of (1) the fair values of assets obtained less the fair values of other liabilities incurred, over (2) the sum of the carrying values of the assets transferred.			
	b. The amount that would be recognized in accordance with FASB Statement No. 5, as interpreted by FASB Interpretation No. 14.			
	8. Determine that all the necessary disclosures have been made (see FASB Statement No. 125, paragraph 17).			

E. Additional Procedures (if any)

F. Section Completion

	1. Based on the results of the audit procedures performed, reassess the risk of material misstatement due to error and due to fraud, and determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for investments.			
	2. The objectives of this audit program have been met.			

This audit program section has been completed in accordance with firm policy.

V. Trade Accounts and Notes Receivable

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Existence of accounts receivable—To determine that the receivables exist, are authentic obligations owed to the entity, contain no significant amounts that should be written off, and that allowances for doubtful accounts are adequate and not excessive. (Assertions 1, 3, and 4)

B. Proper disclosure—To determine that proper disclosure is made of any pledged, discounted or assigned receivables. (Assertions 3 and 5)

C. Revenue recognition—To determine that interest on accounts and notes receivable has been properly recorded. (Assertions 2, 3, and 4)

D. GAAP conformity—To determine that presentation and disclosure of receivables is in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review ____ ____ ____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. Internal control documentation and test results			
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)			
	d. Other planning documents and risk assessments			
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.			
[A]	**B. Substantive Analytical Procedures**			
[B] [C] [D]	1. Compare receivable account balances with preceding year's balances (or expected balances) and investigate any significant deviations from the expected balances.			
	2. Analyze the relationship of receivables and sales (day's sales in accounts receivable) and compare with relationships for the preceding period(s). Investigate results as deemed necessary.			
	3. Compute the ratio of interest earned to the average notes receivable outstanding and compare with preceding year's ratio (or expected ratio). Investigate results as deemed necessary.			
	4. Compare balances in allowance for doubtful accounts, bad debts, sales returns and allowances with the preceding year's balances (or expected balances). Investigate any significant deviations from the expected balances.			
	5. Compute the following ratios and compare with the preceding year's ratios (or expected ratios). Investigate results as deemed necessary.			
	a. Sales returns and allowances as a percentage of gross sales.			
	b. Sales returns and allowances as a percentage of gross sales by product/service line.			
	c. Bad debts expense as a percentage of gross sales.			
	d. Allowance for doubtful accounts as a percentage of trade accounts receivable.			
	e. Aging categories as a percentage of total accounts receivable compared to prior year's.			
	C. Detailed Tests			
[A]	1. Review activity in the general ledger control accounts for trade accounts receivable for the period being audited and:			
	a. Note and investigate any significant entries which appear unusual in amount or source.			
	b. Compare the opening balance for the period with the final closing balances per the working papers and reports for the preceding period.			

Obj.		Done By	Date	W/P Ref.
[A]	2. Obtain or prepare an aged trial balance of trade receivables as of the date selected for confirmation procedures. (Note: In some situations, it may not be practicable to obtain an aged trial balance until after the mailing of confirmation requests, especially when confirmation procedures are coordinated with the client's regular billing cycle. In such instances obtain a trial balance (which may be an annotated tape) of trade receivables as of the confirmation date.) Perform the following:			
	a. Test the clerical accuracy of the trial balance.	____	____	____
	b. Reconcile the total per the aged trial balance to the general ledger control account and, if as of the balance-sheet date, to the lead schedule or working trial balance.	____	____	____
	Note: When the aged trial balance and the general ledger do not agree, a monthly accounts receivable reconciliation between the two reports is an essential internal control feature.			
	c. On a test basis, trace entries for individual customers on the aging analysis (totals and aging detail) to the individual accounts in the accounts receivable subsidiary ledger and select individual accounts from the subsidiary ledger and trace totals and aging detail to the aged trial balance. Test footings of individual customer accounts in the subsidiary ledger.	____	____	____
[A]	3. Select individual customer accounts for confirmation procedures from the aged trial balance (or trial balance) and arrange for the preparation of confirmation requests to be mailed under the auditor's control and tested as follows:			
	a. Positive requests on individually significant accounts with balances in excess of $ ____ .	____	____	____
	b. Positive requests on accounts from the sampling population as follows: _____ _____ _____ _____ _____	____	____	____
	Note: Due to risk assessment and planning decisions, confirmation of receivables may not be part of the audit approach. If so, complete alternative procedures as described in this program.			
	c. Trace individual confirmation requests as to balances and addresses to the subsidiary accounts receivable records. Send confirmations (using envelopes with the auditor's return address) and prepare confirmation statistics.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	d. If client requests that any accounts be excluded from the confirmation process, obtain explanations and determine if such a restriction will have a significant affect on your ability to meet the audit objectives. (Consider reviewing such records as correspondence files to substantiate the explanation.) Perform appropriate alternative procedures with respect to the amounts.			
	e. Trace confirmation replies to the trial balance and investigate and reconcile replies with differences.			

Note: The auditor may prepare a control of exceptions such as copies of replies or a list and arrange for the client's staff to investigate the differences and accumulate supporting documentation for the auditor's review. Be alert to explanations that may be evidence of overall conditions affecting the financial statements. Follow up on such conditions.

	f. Obtain new addresses for all confirmations returned by the post office and remail.			
	g. Send second requests for all unanswered positive confirmation requests. Consider sending third requests by registered or certified mail, and performing alternative auditing procedures.			
	h. Perform alternative auditing procedures for unanswered positive confirmation requests.			

Practice Tip

Be alert to large credits claimed by customers (especially close to the balance-sheet date). These credits may represent goods which were never shipped.

[A]	4. For positive confirmation requests to which no reply was received, accounts which declined to provide confirmation information and accounts which the client requested not be confirmed:			
	a. Test balances subsequently paid to remittance advices which identify the specific invoices paid.			
	b. For balances on which no payment has yet been received, examine customer's purchase orders, related invoices and shipping documents.			
	c. Establish the existence of the customer by reference to such sources as Dun and Bradstreet Reference Book.			
[A]	5. If accounts receivable were confirmed as of a date other than the balance-sheet date, obtain an analysis of transactions between the confirmation and balance-sheet dates, trace amounts to books of original entry, and review the analysis and books for significant unusual entries.			

Obj.		Done By	Date	W/P Ref.
	6. Summarize the results of the confirmation procedures.			
A B C	7. Obtain or prepare an analysis of notes receivable including the following information:			
	a. Maker			
	b. Date made/date due			
	c. Original terms of repayment			
	d. Collateral, if any			
	e. Interest rate			
	f. Balance at the end of last period			
	g. Principal—additions, payments			
	h. Interest income—at the end of the preceding period, earned during the current period, received during the current period, and accrued at the end of the current period.			
A B C	8. Foot schedule and trace totals to applicable general ledger accounts.			
A B C	9. Physically inspect all notes in possession of the client.			
A B C	10. As deemed necessary, request positive confirmation of the terms and balances of notes with makers (as of the balance-sheet date or other date). Investigate any differences.			
A B C	11. Confirm notes out for collection with collection agents as deemed necessary.			
A B C	12. Examine evidence of periodic or subsequent payments on notes not responding to confirmation requests.			
A B C	13. Reconcile any confirmation exceptions received.			
A B C	14. Inspect notes for collateral, if any, making sure that items were not included in corresponding asset accounts of the company.			
A B C	15. Recompute interest income, accrued interest and unearned discount; trace interest collections, if any, to the cash receipts journal. Ascertain that computations of interest and recognition of interest income is in conformity with APB Opinion No. 21. (AC I69)			
A B [D]	16. Ascertain whether any accounts or notes have been assigned, pledged, guaranteed, sold or discounted by reference to minutes, review of agreements, confirmation with banks, etc.			
A [D]	17. Ascertain whether any accounts or notes receivable are owed by employees or related parties such as officers, directors, shareholders and affiliates, and:			
	a. Obtain an understanding of the business purpose for the transactions which resulted in balances.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. Ascertain that transactions were properly authorized.	____	____	____
	c. Obtain positive confirmations of the balances (as the balance-sheet date or some other date) except for intercompany accounts with affiliated companies which the firm is concurrently examining.	____	____	____
	d. Determine if any notes repaid prior to the balance-sheet date have since been renewed.	____	____	____
A B C [D]	18. Obtain or prepare an analysis of the allowance for doubtful accounts for the period, and:			
	a. Review accounts written off during the period and determine that significant write-offs have been properly authorized. Examine supporting documentation, including correspondence with the customer. (Such correspondence may indicate a broader problem.)	____	____	____
	b. Review adequacy of the allowance and related provision:			
	(1) Review the aged trial balance as of the balance-sheet date with the client's credit manager or other responsible individual to identify accounts of a doubtful nature and allowances required; review correspondence files and other relevant data in support of client's representations. Items reviewed should include past due amounts and significant amounts whether or not past due.	____	____	____
	(2) Examine credit reports for delinquent and large accounts.	____	____	____
	(3) Review confirmation exceptions for indication of amounts in dispute.	____	____	____
	(4) Consider whether accounts receivable that have been connected to notes receivable pose any unusual credit risk.	____	____	____
	c. Identify differences, if any, between the book and tax basis for the allowance for doubtful accounts and related expense provision; summarize information required for determining income taxes currently payable and deferred.	____	____	____
	d. Review revenue, receivable and cash receipts transactions after the balance-sheet date including discounts taken, credits allowed, and write-offs for unusual transactions (especially concerning past-due balances and large accounts).	____	____	____
A	19. Summarize the results of the procedures above and evaluate the adequacy of the allowance for doubtful accounts.	____	____	____
D	20. Determine that accounts and notes receivable have been properly classified between current and noncurrent.	____	____	____

Obj.		Done By	Date	W/P Ref.
D	21. Determine that the following are properly presented and/or disclosed in the financial statements:			
	a. Related party receivables.	____	____	____
	b. Significant credit balances that should be reclassified.	____	____	____
A C	22. To determine if receivables are recorded in the proper period, test the sales cutoff as follows:			
	a. Trace _____entries in the sales journal for _____ days before and after the balance-sheet date to shipping documents. Based on the information provided by the shipping documents, determine whether the sales/receivables were recorded in the proper period.	____	____	____
	b. Trace _____ shipping documents for _____ days before and after the balance-sheet date to the sales journal. Based on the information provided by the shipping documents, determine whether the sales/receivables were recorded in the proper period.	____	____	____
D	23. In accordance with FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), obtain information about the fair value of notes payable and long-term debt, and perform the following:			
	Note: Disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 are optional for nonpublic entities that meet certain criteria (see FASB Statement No. 126). Determine if the client is making FASB Statement No. 107 disclosures.			
	a. Determine that the fair value amounts are determined in accordance with FASB Statement No. 107 (AC F25).	____	____	____
	b. Determine that the valuation principles are being consistently applied.	____	____	____
	c. Determine that the fair value amounts are supported by the underlying documentation.	____	____	____
	d. Determine that the method of estimation and significant assumptions used are properly disclosed.	____	____	____

Practice Tip

Normally, the carrying amount of receivables will approximate their fair values. However, factors such as extended payment terms, creditworthiness, and interest rates significantly different from market rates may lead to situations where the carrying amount of the receivables does not approximate their fair value. See FASB Statement No. 107 (AC F25) and Auditing Interpretation No. 1 of SAS No. 57, *Auditing Accounting Estimates*, titled "Performance and Reporting Guidance Related to Fair Value Disclosures (AU section 9342.01–.10)," for further guidance.

A	24. For accounts and notes receivable with terms exceeding one year, if it is probable that all of the amounts due will not be collected

Obj.		Done By	Date	W/P Ref.
	according to their contractual terms, determine that impairment of those receivables has been measured by one of the following methods:			
	a. The present value of expected future cash flows discounted at the loan's effective interest rate.	____	____	____
	Or			
	b. The receivable's observable market price.	____	____	____
	Or			
	c. The fair value of the collateral if the receivable is collateral dependent.	____	____	____

Note: See FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan,* and FASB Statement No. 118, *Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures* (AC I08), for further guidance.

D. Receivables Sold (Transferred) With Recourse

1. Determine that the proceeds received from the transfer of receivables with recourse have been recognized as a sale, if all of the following conditions are met:
   a. The receivables have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. ____ ____ ____
   b. Each transferee has either obtained the right, free of conditions that constrain it from taking advantage of that right, to pledge or exchange the transferred assets, or the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right, free of conditions that constrain them from taking advantage of that right, to pledge or exchange those interests. ____ ____ ____
   c. The transferor does not maintain effective control over the transferred assets through either an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable. ____ ____ ____
2. Determine that the proceeds received from the transfer of receivables with recourse that do not meet the aforementioned conditions of a sale have been accounted for as a secured borrowing with a pledge of collateral. ____ ____ ____
3. Upon completion of any transfer of financial assets, determine that the transferor has:
   a. Continued to carry in its statement of financial position any retained interest in the transferred assets, including, if applicable, servicing assets, beneficial interests in assets trans-

Obj.		Done By	Date	W/P Ref.
	ferred to a qualifying special-purpose entity in a securitization, and retained undivided interests.			
	b. Allocated the previous carrying amount between the assets sold, if any, and the retained interests, if any, based on their relative fair values at the date of transfer.			
	4. Upon completion of a transfer of assets that satisfies the conditions to be accounted for as a sale (see step 1 above), determine that the transferor has:			
	a. Derecognized all assets sold.			
	b. Recognized all assets obtained and liabilities incurred in consideration as proceeds of the sale, including cash, put or call options held or written (e.g., guarantee or recourse obligations), forward commitments (e.g., commitments to deliver additional receivables during the revolving periods of some securitizations), swaps (e.g., provisions that convert interest rates from fixed to variable), and servicing liabilities, if applicable.			
	c. Initially measured at fair value assets obtained and liabilities incurred in a sale or, if it is not practicable to estimate the fair value of an asset or a liability, applied alternative measures.			
	d. Recognized in earnings any gain or loss on the sale.			

E. Additional Procedures (if any)

VI. Inventories

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Inventory exists—To determine that the inventory exists and is the client's property. (Assertions 1 and 3)

B. Quantity and condition—To determine that the client has taken reasonable care in determining the physical quantities and identifying the condition (normal, slow moving, obsolete) of its inventory. (Assertions 2 and 4)

C. Clerical accuracy—To determine that the inventories are summarized and priced with clerical accuracy, and the records have been adjusted to the physical inventory. (Assertions 2 and 4)

D. GAAP conformity—To determine that inventory classifications and carrying amounts are determined and presented in the financial statements in conformity with generally accepted accounting principles consistently applied (for example, assumptions about the cost flow, such as FIFO and LIFO, and lower of cost or market considerations). (Assertion 5)

E. Encumbrances identified—To determine that any encumbrances such as pledges or liens are identified and adequately disclosed in the financial statements. (Assertion 3, 4, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Obj.		Done By	Date	W/P Ref.
	Procedures:			
	A. Preliminary Procedures			
	1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
	a. Preliminary analytical review	____	____	____
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
A B D	**B. Substantive Analytical Procedures**			
	1. Compare inventory balances with preceding year's balances (or expected balances) and investigate any significant deviations from the expected balances.	____	____	____
	2. Compare inventory classifications (i.e., raw materials, work in process, finished goods) as a percentage of total inventory with the preceding year's percentages and investigate any significant fluctuations.	____	____	____
	3. Compute gross margin and compare with preceding year's (or expected) gross margin. Investigate any significant fluctuation.	____	____	____
	4. Compute gross margin by product line or division and compare with preceding year's (or expected) gross margins. Investigate any significant fluctuations.	____	____	____
	5. Compute inventory turnover and compare with preceding year's (or expected) turnover. Investigate any significant fluctuation.	____	____	____
	6. Compute inventory turnover by major product or division and compare with preceding year's (or expected) turnover. Investigate any significant fluctuations.	____	____	____
	C. Detailed Tests—General			
	1. Identify the locations of the physical inventories and their relative materiality by location.	____	____	____
	2. Review the client's plans and instructions for taking the physical inventory and accumulating, pricing, and summarizing the results. Also review the client's plans for controlling tags and count sheets, identifying obsolete items, identifying and handling con-

Obj.		Done By	Date	W/P Ref.
	signed and customer's goods, and for controlling the movement of inventory during the count and controlling shipping and receiving during the count.			
	3. Determine whether involvement of specialists is required. If a specialist is to be involved, review and evaluate the professional qualifications and reputation of the specialist; obtain an understanding of the nature of the work to be performed by the specialist.			
A B C D E	4. For significant amounts of inventory stored at outside locations, consider performing the following procedures:			
	a. Review and test the owner's control procedures for investigating the warehouseman and evaluating the warehouseman's performance.			
	b. Obtain an independent auditor's report on the warehouseman's system of internal accounting control relevant to custody of goods and, if applicable, pledging of receipts, or apply alternative procedures at the warehouse to gain reasonable assurance that the information received from the warehouseman is reliable.			
	c. Observe physical counts of the goods, if practicable and reasonable.			
	d. If warehouse receipts have been pledged as collateral, confirm with lenders pertinent details of the pledged receipts (on a test basis, if appropriate).			
	e. Confirm goods out on consignment or at outside warehouses.			
[B] [C] [D] [E]	5. Discuss with the client and assess the impact of any changes in accounting policies regarding inventory, such as the manner in which costs are accumulated and the pricing methods used.			

D. Before Observation of the Physical Inventory

Note: Some auditing procedures may serve to accomplish the purpose of both tests of controls and substantive tests. Certain steps that are listed here as illustrative substantive tests are also listed among illustrative tests of controls for inventory. They are listed as tests of controls because they may serve to clarify and confirm the auditor's understanding of internal control for inventory and cost of sales.

	1. Tour the client's manufacturing or production facilities with a member of the client's organization familiar with production.			
A B [D]	2. On a test basis, select transactions for additions and deletions of inventory from such sources as receiving reports, requisitions to place materials into production, and shipping advices. Note the reference or control number, date, description, quantity, and dollar amount for each transaction selected. Trace the transactions to the perpetual inventory record and the cost accounting records, if any, used to determine unit or job costs. Perform simi-			

Obj.		Done By	Date	W/P Ref.
	lar tests selecting the transactions from the perpetual inventory records and/or cost accounting records and trace the transactions to receiving reports, requisitions, and shipping advices.			
	Note: This test may be coordinated with tests of controls for purchases, payables, and disbursements, and for revenues, receivables, and receipts.			
D	3. Obtain an analysis of overhead costs charged to inventories and over- and under-absorbed overhead. Review the amounts included in the overhead pool for propriety and perform the following:			
	a. Determine that overhead costs are being charged to inventory in accordance with an appropriate policy (for example, as a percent of direct labor).			
	b. Identify disposition of variances, if any, between actual overhead costs incurred and overhead costs applied to production and inventory. Determine that variances are reasonable. Determine that no excessive costs for idle plant are being charged to inventory.			
C D	4. If a job order cost system is used, obtain the job order ledger (or tabulation), select a period(s) and perform the following:			
	a. Trace total costs incurred to the voucher register (or cash disbursements journal), the payroll distribution, and support for overhead applied.			
	b. Test the footings of the job order ledger by refooting the detail for selected subtotals and refooting the subtotals.			
	c. Select ____ job orders for jobs in process and completed jobs and perform the following:			
	(1) Examine authorization for the job order.			
	(2) Trace materials used on a test basis at various times since inception of the job order to such supporting details as requisitions, purchase orders, receiving reports, and processed invoices. (Consider coordination with tests of controls for purchases.)			
	(3) Trace direct labor costs to account distributions of the payroll registers and on a test basis to individual time reports or time cards. (Consider coordination with tests of controls for payroll.)			
	(4) Trace application of overhead costs to analyses used to accumulate overhead costs; test computations and review for reasonableness.			
	(5) Identify the status of the job (work in process, finished goods, or goods shipped) and trace through necessary			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	summarization to the applicable general ledger account. Obtain explanation for any unreasonable time lag between completion and shipping dates for job orders performed for specific customers.			
C D	5. For process cost systems, obtain the cost of production reports for each department within the production process for a selected period(s) and:			
	a. Trace quantities and dollar amounts for units received for selected departments to the quantities and dollar amount transferred out per the preceding department in the sequence of production.			
	b. For each selected department, review the computations of total and unit costs for production transferred to the next department; on a test basis recompute unit costs and ascertain that costs for units lost in process are properly reallocated to surviving units.			
	c. Trace material costs charged to the selected departments to appropriate journals and on a test basis to individual requisitions.			
	d. Trace labor costs incurred to account distribution analyses of the payroll registers.			
	e. Review the allocation of overhead.			
	E. Observation of the Physical Inventory			
	1. Tour the premises on arrival and ascertain whether the inventory arrangement is conducive to a satisfactory count; if the arrangement appears obviously unsatisfactory, recommend rearrangement.			
A	2. Ascertain that items on hand which are not the property of the client are clearly identified, segregated, and excluded from the count. Note such references as descriptions, quantities, serial numbers, and shipping advice numbers so that in subsequent tests of inventory summarization the auditor may determine whether the items were excluded from the physical count.			
[A]	3. Visit the shipping and receiving departments and record the control numbers for the last shipping advice and receiving report prepared prior to the physical count for subsequent tracing to accounting department records. Consider recording a few additional shipping advice and receiving report numbers for subsequent tracing.			
A B	4. Ascertain that receiving and shipping departments are informed that receipts after and shipments before the inventory cut-off are to be excluded from the count. Ascertain that receiving reports for items not included in the count are prominently marked "after inventory."			

Obj.		Done By	Date	W/P Ref.
B	5. Observe and note client's provision for segregation and/or clear identification of slow-moving, obsolete and/or damaged items; also be alert for such items among regular stock and if present, bring to the client's attention and note for subsequent consideration.			
[A] [B]	6. Inspect representative items of inventory and ascertain the source of their identification, description, status (work in process, finished goods, etc.), basis for count or measure (volume, weight, item tally, etc.). Inquire of both production personnel and personnel involved in the count about such items.			
[A] [B]	7. Observe and ascertain that the client's inventory instructions and procedures are being followed.			
[A] [B]	8. Ascertain that prenumbered inventory tickets on count sheets are properly controlled including:			
	a. Accounting for all tickets or sheets issued to count personnel.			
	b. Accounting for return of all tickets or sheets issued including those unused and spoiled as well as those used, at completion of the inventory.			
	c. Note series of tickets or count sheet numbers used and those unused or spoiled for subsequent tracing in tests of summarization.			
[A] [B]	9. Observe the count process and make test counts ascertaining that the identifications, descriptions, and quantities are being properly noted on the inventory tickets or count sheets. If inventory count sheets are used, select some items from the floor, make test counts and trace them to the sheets; select some entries from the sheets (include some items of greater dollar value) and trace them to items on the floor.			
[C]	10. Prepare a worksheet listing some items (include some items of greater dollar value) test counted, for subsequent tracing into the client's inventory summarization. Include on the worksheet for each item the inventory ticket or count sheet number, location, description, quantity per client, quantity per your test count, and other particulars essential for subsequent tracing to the inventory summarization. Bring test count differences to the client's attention during the count so they may be resolved in a timely manner. If test count differences are not isolated, it may be necessary to request a recount of a particular area or department.			
B C	11. Observe that all items of inventory are clearly ticketed or marked when counted to avoid omissions and/or duplications of counts.			
B C	12. Observe whether any items are not being counted and obtain an adequate explanation for their omission.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
A B	13. Note any movement of inventory during the count; obtain an explanation for the movement and record details from the applicable authorizing documents for consideration in review of the cut off.			
	14. Prepare a memorandum on the observation of the physical inventory including:			
	a. Comment on the physical inventory arrangements.			
	b. Implementation of the client's inventory instructions.			
	F. Summarization—Physical Quantities			
A B C	1. Relate and trace information, noted during observations of the physical, about control number for count tickets or count sheets used, to the client's summarization of the physical for reasonable assurance that only tickets or sheets used for the physical are included in the summarization of quantities. (Summarization of quantities may consist of the quantities per the final priced inventory or an intermediate tabulation of count tickets. In some instances the original count sheets may provide for entry of prices, extensions, and summarization of dollar amounts.)			
B C	2. Trace test counts noted during the physical to the client's summarization of quantities.			
A	3. Trace quantities confirmed by third parties to the summarization of quantities.			
B C	4. Depending on the extent of the work in step 2 above and on internal control over inventory summarization, select quantities for particular items from the summarization and trace them to the count tickets or count sheets; select quantities for particular items from the count tickets or sheets and trace them to the summarization of quantities.			
A B C	5. If the client uses perpetual inventory records and the perpetuals are to be used to determine the year-end balance, trace items on a test basis to and from the physical inventory summaries; ascertain that the perpetuals were adjusted to the physical.			
B C	6. Trace notes made at the observation for slow moving, obsolete, and/or damaged items to the client's summarization of quantities and determine if they are clearly identified as such.			
B C	7. Test the cut-off information noted at the observation of the physical inventory as follows:			
	a. Select the last few shipping advices used before the count to the sales register; determine that the shipments were recorded as sales and charges to cost of sales as the dates shipped.			

Obj.		Done By	Date	W/P Ref.
	b. Select a few shipping advices used after the count to the sales register and determine that the shipments were recorded as sales in the period after the date of the inventory.			
	c. Select the last few receiving reports used before the count and determine that the related liability was recorded prior to or as of the count date.			
B C	8. If the client uses a process cost system, trace selected quantities per the physical inventory to the departmental cost of production reports and determine that quantities have been adjusted to the physical inventory as of the date of the physical count.			

G. Prices and Summarization—Monetary Units

Note: Judgment should be used in determining which of the following steps should be used when testing the cost of inventory. Depending on the system used by the client to assign costs to their inventory items, certain steps may not be applicable.

D	1. Ascertain the methods followed concerning the flow of costs (FIFO, LIFO, moving average, etc.) and compare with working papers of the preceding year to ascertain whether the methods have been consistently applied.			
CD	2. Determine client's pricing method for raw materials and purchased finished goods per the final inventory summary and make a selection of items for price testing from the sampling population as follows: _____			
C D	3. Compare prices to vendor invoices or price lists. If client uses LIFO method, additional procedures for testing base prices and computations should be designed and performed. Determine that the method is consistent.			
C D	4. Perform price tests for all individually significant items of raw materials and purchased finished goods that were included in test counts.			
C D	5. Determine client's pricing method for work-in-process and finished goods per the final inventory summary and make a selection of items for price testing from the sampling population as follows: _____			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
C D	6. Trace unit costs of work-in-process and finished goods to the cost accounting records and perform the following:			
	Note: Cost accounting records will differ depending upon the cost accounting system (e.g., process cost system, job order system , etc.). For the finished good item or work-in-process item selected for testing, cost accounting records should be obtained which present the various costs associated with the item selected.			
	a. Agree raw material quantities used in producing the finished goods or work-in-process items to supporting documents, such as bills of material.	____	____	____
	b. Agree the cost of raw materials used in producing the finished goods or work-in-process items to vendor invoices and the final inventory summary.	____	____	____
	c. Agree labor used in producing the finished goods or work-in-process items to supporting documents, such as time cards.	____	____	____
	d. Agree labor rates to payroll records.	____	____	____
	e. Recalculate the client's overhead rate and ascertain the reasonableness of the assumptions and methods used.	____	____	____
	f. Obtain and review trial balances or tabulations of detailed components of production costs incurred for the year (period) and compare with the equivalent for the preceding year (period).	____	____	____
	(1) Obtain and note explanations for apparent inconsistencies in classification and significant fluctuations in amounts.	____	____	____
	(2) Ascertain that the cost classifications accumulated as production costs and absorbed in inventory are in conformity with generally accepted accounting principles.	____	____	____
	g. Review activity in the general ledger control accounts for raw materials, supplies, work in process, and finished goods inventories; investigate any significant unusual entries or fluctuations.	____	____	____
	h. Review labor and overhead allocations to inventory and cost of sales; compare to actual labor and overhead costs incurred and ascertain that variances appear reasonable in amount and have been properly accounted for.	____	____	____
C	7. Perform the following tests for clerical accuracy of the final summarized inventory:			
	a. Recompute extensions of quantities and unit costs on a test basis.	____	____	____
	b. Refoot accumulation of dollar subtotals on a test basis.	____	____	____

Obj.		Done By	Date	W/P Ref.
	c. Refoot dollar subtotals to test total dollar amounts per the physical inventory listing for the major classifications (i.e., raw materials, work in process, finished goods, supplies, etc.).			
	d. Review the inventory listings for significant quantities and amounts that appear unusual.			
	e. Ascertain that the general ledger control accounts have been adjusted to include the findings of the physical inventory. (This may consist of tracing the totals per the physical to an analysis which supports journal entries, or an involved trail of tracing through the cost accounting records to the general ledger control accounts.)			
C	8. Review the pricing, extensions, and summarization of the physical inventory summary for items identified as slow-moving, damaged, and/or obsolete to ascertain that the items are carried at dollar amounts in conformity with the lower of cost or market principle:			
	a. Examine documentation for the proceeds of recent scrap or salvage sales.			
	b. Review client's criteria for considering items as slow-moving or obsolete and evaluate whether criteria appear reasonable and realistic. (For example, are a certain number of months used to determine when an item becomes slow-moving? Are predetermined quantities used to determine that quantities on hand are not in excess of reasonable economic need?)			
	H. Lower of Cost or Market Considerations			
B D	1. Determine whether adequate allowances have been recorded for obsolete and slow-moving inventory.			
C	2. On a test basis select items of raw materials and purchased finished goods inventory including some items with relatively significant carrying amounts (because of high unit costs or large quantities on hand) and:			
	a. Compare the inventory unit prices with prices per recent (prior to year end) vendors' invoices, vendor quotations, vendor price lists, and published market quotations.			
	b. Review purchase records and production requisitions for indications of whether items may be on hand in excess quantities, slow moving, or obsolete.			
[A] [B] C	3. On a test basis select items or classifications of finished goods and work-in-process inventories including some items with relatively significant carrying amounts (because of high unit costs or large quantities on hand) and:			
	a. Review and note current selling prices and quantities sold for the items or classifications by reference to recent sales in-			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	voices, customer orders, and published market quotations, and supplementary discussion with the client's marketing and sales executives.			
	b. Compare inventory carrying amounts and recent selling prices for the selected finished goods items or classifications noted in terms of current relationships of sales to gross profit, selling and shipping expenses; ascertain that the carrying amounts of the selected finished goods items are not in excess of net realizable value.			
	c. For the selected work-in-process items, ascertain their stage of completion and estimated cost to complete by reference to the cost accounting records, production reports, and inquiry of the client's production supervisors. Apply the estimated costs to complete to the selected work-in-process items and apply steps *a.* and *b.* above.			
	d. Compare quantities on hand for selected items with quantities noted per recent sales invoices and customer orders; be alert that quantities on hand are not in excess of the client's requirements.			
B D	4. Review the prior year working papers on obsolete inventory and compare to the current year's inventory summary and obsolete inventory listing. Determine the reasonableness of any changes in prior year valuations.			
B D	5. Based on the procedures performed, determine the results of the audit procedures as they relate to the inventory valuation.			
	I. Other			
[A]	1. If the physical count was not taken as of the balance-sheet date, analyze and reconcile the balance per the physically counted inventory to inventory per the balance sheet:			
	a. Review and analyze the general ledger control accounts for inventory from the date counted to the balance-sheet date; trace additions to such sources as the purchase journal or voucher register, the cost accounting records, and charges to cost of sales.			
	b. Compare the current activity between the count date and balance-sheet date to activity of the equivalent period in the preceding year. Investigate unusual fluctuations.			
E	2. Determine whether any inventory is pledged as collateral or subject to any liens; coordinate with work on debt payable.			
D	3. Inspect open purchase order file at the balance-sheet date for significant commitments that should be considered for disclosure.			

Obj.		Done By	Date	W/P Ref.
D	4. Determine that any intercompany or interdepartmental profit in inventory is eliminated in consolidation.	____	____	____

VII. Property, Plant, and Equipment, and Related Depreciation

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Property exists—To determine that the property exists and is owned by the entity. (Assertion 1)

B. Additions appropriate—To determine that additions to property are authentic, recorded at cost, and properly distinguished from maintenance and repairs expense. (Assertions 1, 2, and 3)

C. Retirements recorded—To determine that retirements of property together with the proceeds from salvage and related cost to remove are properly recognized. (Assertions 1, 2, and 4)

D. Depreciation appropriate—To determine that a proper amount of depreciation expense is allocated to the period based on the asset cost, estimated life and salvage, and use of acceptable methods consistently applied, and adequately presented in the financial statements. (Assertions 4 and 5)

E. Recoverable value—To determine that the net carrying value as presented in the financial statements is expected to be recoverable through the ordinary course of business. (Assertion 4)

F. Encumbrances identified—To determine that any encumbrances and liens are identified and adequately disclosed in the financial statements. (Assertion 5)

G. Proper classification—To determine that significant amounts of idle property, plant, and equipment are properly stated, classified and described. (Assertion 5)

H. Proper disclosure—To determine that significant amounts of fully depreciated assets are considered for disclosure. (Assertion 5)

Obj.		Done By	Date	W/P Ref.

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
   - *a.* Preliminary analytical review
   - *b.* Internal control documentation and test results
   - *c.* Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)
   - *d.* Other planning documents and risk assessments
2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.

B. Substantive Analytical Procedures

A B C D E 1. Compare balances in fixed assets, capitalized leased assets, accumulated depreciation, accumulated amortization, depreciation, repairs and maintenance, rents, supplies, and similar expense accounts with prior year balances or expected balances. Investigate significant deviations from expected amounts.

[A] [B] [C] [D] [E] 2. Compute the following ratios to help conclude upon the reasonableness of fixed asset balances. Investigate any unusual ratio results.
   - *a.* Fixed assets divided by total assets (indication of nonearning asset trend).
   - *b.* Fixed assets divided by equity (indication of funding source for fixed assets).

C. Detailed Tests

1. Obtain (or update) an understanding of the client's policies concerning capitalization of assets and related depreciation methods and depreciable lives.
2. Consider a tour of the client's facilities for new staff assigned to the engagement, or for the entire audit team if significant changes have occurred.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	3. Consider the extent to which it may be practicable to perform substantive tests prior to the balance-sheet date.	____	____	____
[A] [B] [C] [D]	4. Obtain or prepare the following schedules:			
	a. Summary schedule of property, plant and equipment, and related depreciation (by major asset classification) including the following:			
	(1) Beginning and ending asset balances at cost.	____	____	____
	(2) Asset additions at cost.	____	____	____
	(3) Asset retirements and dispositions.	____	____	____
	(4) Other changes.	____	____	____
	(5) Depreciation method and life.	____	____	____
	(6) Beginning and ending balances of the allowances for depreciation.	____	____	____
	(7) Additions to the allowances for depreciation accompanied by an analysis of amounts expensed, absorbed in inventory, and capitalized.	____	____	____
	(8) Reductions of the allowances for depreciation for retirements and dispositions.	____	____	____
	b. Additions at cost showing the description, date acquired, transaction reference (purchase order number, check number, work order number, etc.), estimated useful life, and cost for all additions of $_____ or over.	____	____	____
	c. Retirements and dispositions showing the description, date of acquisition, date of retirement or disposition, cost, accumulated depreciation, net carrying value, proceeds of disposition, and gain or loss on disposition.	____	____	____
	d. Analysis of maintenance expense showing each transaction of $_____ or greater (or all transactions) for the year or period.	____	____	____
[A] [B] [C]	5. Trace opening balances per the summary schedules to closing balances per the prior year's working papers.	____	____	____
B C	6. Trace amounts per the summary schedule to the general ledger, the detailed asset records, and to the schedules of additions, and retirements and dispositions; recompute the footings and crossfootings of the schedules.	____	____	____
A B [C] F	7. Perform the following tests of selected additions:			
	a. Determine the addition has been authorized by reference to such sources as minutes of the meetings of the Board of Directors or Finance Committee and/or capital asset budgets reviewed by the Board of Directors or Finance Committee or by evidence of approval by appropriate, responsible personnel, in accordance with prescribed policies.	____	____	____

Obj.			Done By	Date	W/P Ref.
	b.	Examine such supporting documents as purchase contracts, paid checks, vendors' invoices, purchase orders, receiving reports, work orders, engineers' reports, etc.			
	c.	Trace transactions to appropriate entries in the detailed records.			
	d.	For construction in progress examine supporting work orders, documentation in support of costs incurred such as contractors' invoices, reports and correspondence from engineers and/or architects regarding completion and trace transfers from the construction in progress accounts to other property accounts.			
	e.	Physically inspect selected (or all) major additions.			
	f.	Inquire about related dispositions.			
	g.	Determine whether additions conform with the company's capitalization policy.			
	h.	Determine that installment purchases, if any, are properly recorded.			
	i.	By reference to purchase contracts and contractors billings identify related liabilities to be recorded in connection with debt or other payables.			
	j.	Examine deeds and title insurance policies, as necessary.			
	k.	Review insurance policies, coinsurance clauses and coverage limits versus replacement costs, as necessary.			
	l.	Identify any indications of employees' involvement in ownership or sales interest in the asset. Ascertain the propriety of any identified employee involvement.			
A C [D]	8.	Perform the following tests of dispositions:			
	a.	Determine disposition has been properly authorized.			
	b.	Examine such supporting documents as bills of sale, contracts, delivery memoranda, etc.			
	c.	Trace retirements to the detailed property records.			
	d.	Determine that deductions from the asset accounts and related accumulated depreciation are correct.			
	e.	Determine that gain or loss on disposition has been correctly classified and recorded.			
A C G H	9.	For fully depreciated assets, determine whether the assets are still used and not retired from service. Determine whether disclosure in the financial statements is necessary.			
A C G H	10.	Determine that assets retired from service, if material, have been removed from the property, plant, equipment accounts and related accumulated depreciation accounts, and are carried at amounts which are not in excess of realizable value.

Obj.		Done By	Date	W/P Ref.
D [E]	11. Review provisions for depreciation and amortization, and:			
	a. Determine whether the methods and depreciable lives used in the current year are consistent with the preceding year and are reasonable.	____	____	____
	b. Perform a reasonableness test of depreciation and amortization by using average rates and lives and one-half year for additions and disposals.	____	____	____
	c. Test computations of depreciation and amortization. Consider deleting this step if step *b* results are acceptable.	____	____	____
	d. Determine that amounts of depreciation capitalized in construction in progress are reasonable and appropriate.	____	____	____
	e. Ascertain that obsolescence, if any, is being properly recognized by adjustments of depreciable lives.	____	____	____
	f. Trace additions to the depreciation allowance to the applicable general ledger expense accounts.	____	____	____
D E G H	12. Based on all of the procedures performed above, ascertain the reasonableness of the remaining useful lives of assets and ascertain the recoverability of the net carrying values of the client's fixed assets.	____	____	____
B	13. Review maintenance and repairs expense, supplies, small tools and other appropriate accounts for any assets that should be capitalized.	____	____	____
E H	14. Determine the investment credit and recapture on disposals. Summarize for tax return and provision computation.	____	____	____
H	15. Determine the carrying amount of assets pledged on notes or other indebtedness for possible financial statement disclosure.	____	____	____
H	16. Inquire as to any significant expansion plans and determine any need for disclosure.	____	____	____
H	17. Review rental income and expense accounts to determine leased and subleased assets.	____	____	____
A D E G H	18. In accordance with FASB Statement No. 121 (AC I08), if any events or changes in circumstances have occurred indicating that the carrying amount of a long-lived asset may not be recoverable:			
	a. Determine if an impairment loss should be recognized. [An impairment loss should be recognized if the carrying amount of an asset exceeds estimated future cash flows (undiscounted and without interest charges).]	____	____	____
	(1) Review the estimate of future cash flows for mathematical accuracy and, through discussion with management and review of any supporting documentation, determine whether assumptions used are reasonable.	____	____	____

Obj.		Done By	Date	W/P Ref.
	b. If an impairment loss should be recognized, test the calculation of the loss. [The impairment loss is measured as the amount by which the carrying amount of an asset exceeds its fair value.]	____	____	____
	(1) Test the fair value calculation by vouching to quoted market prices in active markets or by reviewing the valuation technique used.	____	____	____
	(2) If the fair value is based on the present value of estimated future cash flows, test for mathematical accuracy and ensure that the assumptions used in the present value calculation, including the discount rate, are reasonable.	____	____	____
	D. Leases			
A E	1. Review the permanent file to determine whether updated copies of lease agreements and other data of continuing application are included and that changes made during the year are appropriately noted.	____	____	____
A B D F H	2. Examine new lease agreements and significant amendments to existing lease agreements to determine whether they are accounted for in accordance with the appropriate accounting standards (properly capitalized, appropriate depreciation, etc.), determine whether they are in accordance with established policies and procedures and document the conclusions in the permanent file.	____	____	____
A F	3. *Consider the advisability* of obtaining from the lessor confirmation of compliance with restrictive covenants and other pertinent details of significant lease agreements.	____	____	____

Practice Tip

Items to be considered for leases:
- Facilities.
- Authorization and approval of terms.
- Parties.
- Location and description of premises.
- Period covered.
- Rentals.
- Contingent payments and escalator clauses.
- Payment of ownership expenses.
- Restrictions.
- Options and renewal provisions.
- Methods and terms of cancellation.
- Subleases.
- Nature and amount of related guarantees made or obligations assumed.
- Other contractual arrangements which have the economic characteristics of a lease.
- Investment tax credit.
- Criteria for lease capitalization as set forth in appropriate accounting standards.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
A B C D E F G H	4. Obtain an analysis of capitalized lease obligations, including related lease rights and interest, and:			
	a. Compare beginning balances to prior period audit work papers.	____	____	____
	b. Test the clerical accuracy of the analysis.	____	____	____
	c. Compare balances to the general ledger accounts.	____	____	____
	d. Review the general ledger accounts for the period, investigate unusual entries, and document the results of such investigation.	____	____	____
	e. Examine the lease agreements to verify the terms used in the computations.	____	____	____
	f. Test payments and examine other supporting data, where appropriate.	____	____	____
	g. Test the computations of current maturities.	____	____	____
	h. Determine whether the accounting method for lease cancellations has been applied in accordance with applicable accounting standards and that the method has been consistently applied.	____	____	____
	i. Test new leases or significant changes to existing leases as follows:			
	(1) Determine whether the accounting method has been applied in accordance with GAAP and that the method has been consistently applied.	____	____	____
	(2) Review the reasonableness of the interest rate used to discount the lease obligation. Consider the following:			
	(a) Interest rates implicit in the lease terms.	____	____	____
	(b) Interest rates applicable to the financing of purchases of similar property by the lessee at the times of entering into the lease agreements.	____	____	____
	(c) Fair value of the leased property as compared to the discounted amount of the lease obligation.	____	____	____
	(3) Determine whether proper consideration was given to noncapitalizable costs (such as taxes, insurance, maintenance) in computing the amount of lease cost capitalized.	____	____	____
	(4) Review the reasonableness of the method and period for amortization of capitalized lease rights.	____	____	____
A B C D E F G H	5. Select work paper formats that will facilitate grouping information regarding operating leases that may require disclosure in the financial statements and:			
	a. Obtain the appropriate analyses above and proceed as follows:			
	(1) Compare pertinent information to the lease agreements.	____	____	____

Obj.		Done By	Date	W/P Ref.
	(2) Test the clerical accuracy of the analyses.	____	____	____
	(3) Determine whether the calculations have been made in accordance with the lease agreements.	____	____	____
	(4) Compare prepaid and accrued rentals and rental expenses to the respective general ledger accounts.	____	____	____
	(5) Review the general ledger accounts for the period, investigate unusual entries and document the results of such investigation.	____	____	____
	(6) Test the computations of minimum rental commitments applicable to succeeding periods.	____	____	____

Practice Tip

Refer to the applicable accounting standards for a description of disclosure information, such as, rental expenses, minimum future rental payments, noncancelable sublease rentals to be received in the future, contingent rentals, sublease rentals, and general description of leasing arrangements.

b.	Review lease agreement covenants that relate to limitations and default provisions as follows:			
	(1) Review the client's correspondence file for information related to leases, such as modifications, waivers and notification of significant events.	____	____	____
	(2) Review confirmation replies for notations of known matters of noncompliance.	____	____	____
	(3) Cross-reference factors entering into the computations and compute amounts.	____	____	____
	(4) If a default appears to exist with respect to any lease agreement, determine its effect on such agreement, other agreements, the financial statements and our report thereon.	____	____	____
c.	Gather and document information for financial statement disclosure and tax return preparation.	____	____	____
d.	Consider and compute any capitalized interest.	____	____	____

Practice Tip

Consider preparing a schedule for inclusion in the permanent file that sets forth, by section and paragraph number, the limitations and each computation or item involved in the determination of whether the client is in compliance with lease covenants.

VIII. Prepaid Expenses, Deferred Charges, Intangibles, and Other Assets

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Properly recorded—To determine that the balances represent costs which are properly allocable to future periods in conformity with generally accepted accounting principles. (Assertions 1, 2, 3, and 4)

B. Additions supported—To determine that additions are adequately supported. (Assertions 1, 2, 3, and 5)

C. Amortization appropriate—To determine that amortization is determined by a rational and systematic method consistently applied. (Assertions 4 and 5)

D. Impairment recognized—To determine that any permanent impairment of balance is recognized by write-downs charged to operations. (Assertions 1, 2, 4, and 5)

E. Proper classification—To determine that balances and related expenses are properly described and classified in the financial statements. (Assertion 5)

F. Contingencies disclosed—To determine whether there are uninsured risks that should be considered for disclosure. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	Procedures:			
	A. Preliminary Procedures			
	1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
	a. Preliminary analytical review	____	____	____
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
	B. Substantive Analytical Procedures			
A B C D	1. Compare balances in prepaid expense, deferred charges, intangibles, other assets, and accumulated amortization accounts to the preceding year's balances or expected balances. Investigate any significant deviations from the expected amounts.	____	____	____
	C. Detailed Tests			
A B C E	1. Obtain or prepare an analysis for each significant classification of prepaid expenses, deferred charges, other assets or intangibles. The analysis should include adequate description of significant components and the following:			
	a. Balance at the beginning of the year (or period).	____	____	____
	b. Additions at cost.	____	____	____
	c. Deductions charged to expense, and to other accounts.	____	____	____
	d. Balance at the end of the year (or period).	____	____	____

Practice Tip

Ordinarily, extensive detailed schedules showing computations of prepaid balances or analyses of transactions for the period are not necessary, particularly in cases where the balances are not significant. A brief summary of limited reviews and comparisons of balances with prior period amounts or tests of the client's detailed records may be satisfactory.

	2. Foot analysis and trace totals to general ledger; trace opening balance to the audit working papers for the preceding year (or period).	____	____	____
A B [C] D E	3. Examine supporting documents for material charges during the year.	____	____	____
[A] C [D]	4. Review and recompute amortization; determine that the amortization period and method is reasonable.	____	____	____

Obj.			Done By	Date	W/P Ref.
A C [D]	5.	Determine that the carrying amount of the item does not exceed amounts properly allocable to future periods.			
C	6.	Trace amounts amortized during the period to the related general ledger expense accounts.			
A	7.	Confirm significant deposits and assets held by others.			
A F	8.	For prepaid insurance accounts (including life insurance) with balances of $____ or more at ____, obtain or prepare a prepaid insurance schedule and agree prepaids and expense to the general ledger; perform the following additional tests:			
		a. Examine selected policies noting identity of insurer, descriptions and amounts of coverage, premiums, and period covered; compare particulars with the analysis.			
		b. Ascertain by review of the policy and related billing advices for the insurance premiums whether the premiums are being financed and/or the policy or cash surrender value has been pledged; determine that related liabilities and finance cost have been properly recorded.			
		c. Obtain confirmation of cash surrender values; consider confirmation of policies especially if premium financing is involved to determine that payments are current and coverage is still in force.			
		d. Ascertain whether all significant insurable risks have been considered.			
		e. Recompute amortization and trace amounts to the applicable expense accounts.			

Practice Tip

Be alert to insurance confirmations indicating locations of inventory. Trace locations listed to inventory totals to determine all locations listed as covered by insurance have been included in the inventory summary.

		f. Vouch premiums of $____ or more to premium notices.			
		g. Ascertain propriety of accounting treatment for premium deposits and dividends.			
		h. Examine latest audit reports, when applicable, made by insurance companies.			
		i. For life insurance, reconcile prepaid premiums at beginning of period, premiums paid and increase in cash surrender value with life insurance expense.			
A	9.	For property taxes, where significant, obtain or prepare an analysis which relates both repayments and accruals as of the beginning and end of the period with tax expense. Examine tax billings and determine whether the timing of the period covered by the tax and the payment due dates result in prepayment or an accrual as of the balance-sheet date. Trace charges to expense to the proper expense account.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
A D	10. Obtain a list of the detail of all suspense accounts and follow-up on the clearance of all items. (Note: suspense accounts should clear in one day). Investigate any large or unusual uncleared items.	____	____	____
A B C	11. For intangible assets:			
	a. Trace authorization for major transactions to minutes of Board of Directors meetings.	____	____	____
	b. Examine supporting documents.	____	____	____
	c. Ascertain whether amortization has been properly computed in conformity with generally accepted accounting principles, and trace charges to related expense accounts.	____	____	____
A D	12. Determine that there has been no permanent impairment of value for prepaid expenses, deferred charges, intangible assets, etc.	____	____	____
E	13. Determine that balances are properly classified in the balance sheet (current v. noncurrent, etc.)	____	____	____
F	14. Determine that there have been no uninsured events which would affect the value of other assets.	____	____	____
E	15. Determine any required disclosures.	____	____	____

IX. Accounts Payable

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Payables exist—To determine that accounts payable represent authorized current obligations. (Assertions 1 and 2)

B. Proper classification—To determine that amounts included in accounts payable are properly classified. (Assertion 5)

C. Obligations complete—To determine that accounts payable include all significant current obligations. (Assertions 2, 3, and 4)

D. Proper disclosure—To determine that adequate disclosure has been made of any pledged assets. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

a.	Preliminary analytical review	____	____	____
b.	Internal control documentation and test results	____	____	____
c.	Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
d.	Other planning documents and risk assessments	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.			
	B. Substantive Analytical Procedures			
A B C	1. Compare balances in trade accounts payable and purchases with the preceding year's balances or expected balances. Investigate any significant deviations from the expected amounts.			
	C. Detailed Tests			
	1. Were the following items considered:			
	a. Whether to request positive confirmation from vendors and, if so, when and to what extent.			
	Note: Some auditors send confirmations to major vendors to obtain independent outside evidence that all liabilities have been recorded. Other auditors believe that evidential matter can be obtained more efficiently through other procedures.			
	b. Potential efficiencies to be gained from coordination of accounts payable work with substantive tests of inventory when the physical is taken at the balance-sheet date. (For example, tests of cut off, and using vouchers obtained from client's files in substantiating recent inventory prices as well as accounts payable work.)			
A B C D	2. Obtain or prepare a schedule of accounts payable (subsidiary ledger) as of the balance-sheet date.			
	a. Foot schedule/subsidiary ledger and reconcile to the general ledger control account.			
	b. Segregate amounts due to officers, employees, stockholders, affiliates and other related parties.			
	c. Discuss with client old or disputed payables.			
	d. Investigate debit balances and, if significant, consider requesting positive confirmations and propose reclassification of the amounts.			
	e. Ascertain by review of minutes, agreements and by inquiry whether any assets are pledged to collateralize payables.			
	f. Identify intercompany accounts and:			
	(1) Arrange to have balances traced to corresponding receivables in the affiliate's books if affiliate is being currently audited by the firm.			
	(2) Obtain confirmation from the affiliate.			
	(3) Investigate and reconcile differences.			

Obj.			Done By	Date	W/P Ref.
A B C [D]	3.	Consider confirmation procedures such as the following:			
		a. Obtain and review a list of major vendors, or identify major vendors by reviewing voucher registers or subsidiary accounts payable records.	____	____	____
		b. Request vendors to provide a statement of the account balance as of the date selected (ordinarily, the physical inventory date and/or balance-sheet date).	____	____	____
		c. Investigate and reconcile differences.	____	____	____

Practice Tip

Vendors should be instructed to mail confirmation replies directly to the auditor. The auditor should control the mailing of all confirmations.

A B [D]	4.	Confirm balances due to officers and employees; ascertain business purpose of the transactions and, if significant, trace to authorization in the minutes of the Board of Directors meetings.	____	____	____
A C	5.	Test selected unconfirmed balances by examination of vouchers, invoices, and receiving reports.	____	____	____
A B C	6.	Obtain the purchases journal and trace all entries over $____ for a period of ____ days after the balance-sheet date to supporting documents to determine recording in the proper period.	____	____	____
A B C	7.	Obtain the cash disbursements journal and trace all entries over $____ for a period of ____ days after the balance-sheet date to supporting documents to determine recording in the proper period.	____	____	____
A B C	8.	Review the open receiving report, open purchase order and open purchase requisition files for ____ days after the balance-sheet date for unrecorded liabilities.	____	____	____
A B C	9.	Review the open vendor invoice files for ____ days after the balance-sheet date to determine recording in the proper period and for unrecorded liabilities.	____	____	____
A C	10.	Inquire of responsible client staff about their knowledge of additional sources of unprocessed invoices, unrecorded commitments, or contingent liabilities.	____	____	____
A B C	11.	Liabilities for payroll taxes withheld:			
		a. Trace liabilities to payments made subsequent to the balance-sheet date; examine the payroll tax deposit receipts.	____	____	____
		b. Compare liability to accrued payroll taxes for reasonableness.	____	____	____
		c. Trace liabilities to summaries of the applicable payroll registers.	____	____	____

X. Accrued Liabilities Other Than Income Taxes and Deferred Credits

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Liabilities complete—To determine that expense accounts include costs and expenses applicable to the period. (Assertions 1, 2, and 5)

B. GAAP conformity—To determine that all contingencies and estimated future expenses that should be accrued in the period have been accrued, classified, and described in accordance with generally accepted accounting principles consistently applied. (Assertion 1, 2, 3, 4, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

a.	Preliminary analytical review	____	____	____
b.	Internal control documentation and test results	____	____	____
c.	Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
d.	Other planning documents and risk assessments	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
	B. Substantive Analytical Procedures			
A B	1. Compare balances in accrued expense and other liability accounts with the preceding year's balances or expected balances. Investigate any significant deviations from the expected amounts.	____	____	____
	C. Detailed Tests			
[A]	1. Obtain or prepare analysis of accrued liability accounts and agree to the general ledger.	____	____	____
A B	2. For accrued salaries, wages, vacation pay and bonus accounts:			
	a. Test the clerical accuracy of the analyses.	____	____	____
	b. Determine whether the calculations have been made in accordance with related agreements and the corporate policies established by the board of directors or other appropriate executive groups.	____	____	____
	c. Trace bonuses and similar accruals to the board of directors minutes or other proper authorizations.	____	____	____
	d. Compare amounts to subsequent payments.	____	____	____
A B	3. Test computations of accrued salaries and wages by tracing last payment date to payroll journals and estimating the accrual by reference to subsequent payrolls.	____	____	____
A B	4. Review compensation agreements for possible additional liabilities.	____	____	____
A B	5. Determine whether a liability should be accrued for employees' compensation for future absences.	____	____	____

Practice Tip

Ordinarily, a liability is accrued when all of the following conditions are met:

- The employer's obligation relating to employees' rights to receive compensation for future absences is attributable to employees' services already rendered,
- The obligation relates to rights that vest or accumulate,
- Payment of the compensation is probable, and
- The amount can be reasonably estimated.

The fact that an accrual has not been made because of an inability to meet the last condition ordinarily should be disclosed.

Obj.		Done By	Date	W/P Ref.
A B	6. Review deferred compensation agreements and the method of accounting:			
	a. Determine whether the method of accounting recognizes deferred compensation costs in accordance with FASB Statement No. 106 (AC P40).	____	____	____
	b. Consider whether individual contracts, if taken together, constitute a pension plan.	____	____	____
A B	7. Obtain an analysis of deferred compensation and:			
	a. Test the clerical accuracy of the analysis and compare balances to the general ledger.	____	____	____
	b. Verify the computations by reference to provisions of the agreements.	____	____	____
	c. Test current payments by examining appropriate supporting data.	____	____	____
	d. *Consider the advisability* of confirming unpaid balances and the terms of payment.	____	____	____
A B	8. Review the general ledger liability accounts for other accruals that may exist and proceed as follows:			
	a. Inquire into the nature and purpose of such accounts and document the results of the inquiry.	____	____	____
	b. Identify the accounts selected for further analysis. *(To be done by the in-charge.)*	____	____	____
	_____ _____ _____			
	_____ _____ _____			
	c. Verify the year-end balance of the accounts selected by computation, examination of subsequent payments or examination of other data.	____	____	____
	d. Compare recorded transactions to available supporting data on a test basis, *where deemed necessary.*	____	____	____
A B	9. Evaluate whether management has recorded all accrued liabilities (including those based on significant accounting estimates) that could be material to the financial statements. Consider:			
	a. Information from reading available minutes of meetings of stockholders, directors, and appropriate committees.	____	____	____
	b. Information contained in regulatory or examination reports, supervisory correspondence, and similar materials from applicable regulatory agencies.	____	____	____
	c. Information included on confirmation replies received from financial institutions or other entities.	____	____	____
	d. Information concerning identified litigation, claims, and assessments and other contingencies.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	e. Management replies to inquiries regarding possible accruals.			
A B	10. For those accrued liabilities based on significant accounting estimates, evaluate the reasonableness of the estimate by employing one or a combination of the following approaches:			
	a. Review and test the process used by management to develop the estimate. Consider performing the following procedures:			
	(1) Identify whether there are controls over the preparation of accounting estimates and supporting information that may be useful in the evaluation.			
	(2) Identify the sources of information that management used in forming the assumptions, and consider whether such information is relevant, reliable, and sufficient for the purpose.			
	(3) Consider whether there is additional key information or alternative assumptions about the information.			
	(4) Evaluate whether the assumptions are consistent with each other, the supporting information, relevant historical data, and industry data.			
	(5) Analyze historical data used in developing the assumptions to assess whether the data is comparable and consistent with data of the period under audit, and consider whether such data is sufficiently reliable for the purpose.			
	(6) Consider whether changes in the business or industry may cause other information to become more significant to the assumptions.			
	(7) Review available documentation of the assumptions used in developing the accounting estimates and inquire about any other plans, goals, and objectives of the client, as well as consider their relationship to the assumptions.			
	(8) Consider using the work of a specialist regarding certain assumptions.			
	(9) Test the calculations used by management to translate the assumptions and key information into the accrued liability estimate.			
	b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.			
	c. Review subsequent events or transactions occurring prior to completion of fieldwork.			
A B	11. For environmental remediation liabilities identified during planning and other stages of the engagement, perform substantive tests as follows:			

Obj.		Done By	Date	W/P Ref.
	a. Test the accounting estimate recorded by management. (See step 10 above.)	____	____	____

Practice Tip

Read AICPA Statement of Position 96-1, *Environmental Remediation Liabilities* (appendix C), for guidance in applying step 10 above to environmental remediation liabilities. When auditing environmental remediation liabilities, steps 10*a* and 10*b* above, or a combination thereof, usually will be most effective.

	b. Request information about environmental remediation liabilities and loss contingencies in the letter of inquiry sent to the client's counsel.	____	____	____
	c. Obtain, as deemed necessary, written representations from management about estimates and disclosures of environmental remediation liabilities and loss contingencies affecting the financial statements, including specific representations as to the adequacy of such disclosures and the expected outcomes of uncertainties.	____	____	____
	d. If disclosure is required of environmental remediation liabilities and loss contingencies, assess the adequacy of the disclosures, including any conclusions expressed by management regarding the expected outcome of such contingencies.	____	____	____
A B	12. Review revenue accounts and determine whether income recorded in the current period should be deferred to future periods.	____	____	____
A B	13. Obtain appropriate analyses of other deferred credits:			
	a. Review and document the nature of the account and the policies and method of accounting.	____	____	____
	b. Test computations of current additions and reductions by examination of appropriate supporting data or by analytical review of appropriate revenue and expense accounts.	____	____	____
	c. Determine whether the basis of recording and method of amortization is consistent with the prior year.	____	____	____
	d. Determine if the ending balance is reasonable.	____	____	____
[A] [B]	14. Determine that amounts accrued that are not currently deductible for income tax purposes have been identified for consideration in the computation of income taxes.	____	____	____
A B	15. Determine whether management replies to our inquiries provide adequate explanations for significant fluctuations and consider whether such replies are corroborated by our audit procedures and knowledge of the business or whether additional audit procedures are required.	____	____	____
A B	16. Obtain and verify disclosure information for multi-employer plans and vouch expense for the period.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	WIP Ref.
A B	17. For defined contribution plans:			
	a. If applicable, obtain copy of trustee's fund report. Consider confirming contents of report with trustee.	____	____	____
	b. Determine if there have been any adoptions or amendments of plans during the period and obtain copies. Note for financial statement disclosures and:			
	(1) Agree expense to minutes, when applicable.	____	____	____
	(2) Verify computations, where applicable.	____	____	____
	c. Where applicable, test employee data. Test should consist of analytical procedures, and additional procedures as considered necessary.	____	____	____
[A] [B]	18. For defined benefit plans obtain the following, where applicable:			
	a. Copy of actuarial report as of a date no earlier than three months prior to balance-sheet date.	____	____	____
	b. If applicable, copy of trustee's report.	____	____	____
	c. Form 5500 for prior year and for current year, if already prepared.	____	____	____
	d. Actuary's certificate on Schedule B for Form 5500 for prior year and for current year if already prepared.	____	____	____
	e. Plan document(s).	____	____	____
	f. Census and plan asset date given to actuary.	____	____	____
A B	19. Consider confirming contents of Trustee report with Trustee.	____	____	____
A B	20. Reconcile aggregate census data, such as number of employees covered, compensation, to amounts shown in the actuarial valuation report or if not in the report, consider obtaining confirmation of such data from the actuary.	____	____	____
A B	21. For selected employees, check census data (age, sex, marital status, current pay, term of employment, benefit election, etc.) to payroll records. [Check only that data important to the valuation. If analytical review of data and valuation report appear reasonable, a sample of 15 will generally be acceptable. If not, a sample up to 40 may be required.]	____	____	____
A B	22. Based on plan documents, make appropriate tests to determine whether all eligible employees are included in the census data provided to the actuary.	____	____	____
A B	23. Reconcile plan assets per the trustee's report to amounts shown in the actuarial valuation report.	____	____	____
[A] [B]	24. Ascertain that the actuary is professionally qualified. (Membership in the Society of Actuaries, the Conference of Actuaries in Public Practice, American Academy of Actuaries is usually sufficient to indicate that actuary is qualified.)	____	____	____

Obj.		Done By	Date	W/P Ref.
[A] [B]	25. Inquire as to any relationships between the actuary and the client that would impair independence.			
A B	26. Review the actuary's most recent certificate on Schedule B, Form 5500, and determine the reasons for qualifications expressed, if any.			
B	27. Determine if there have been any adoptions or amendments of plans during the period. Obtain copies of any and note for financial statement disclosure.			
A B	28. Review the latest plan document and compare with key provisions included in the actuarial valuation report. If the report does not include a description of key plan provisions, it may be necessary to confirm the actuary's understanding of such provisions.			
A B	29. Vouch the payment of the prior year's accrual to determine that it was paid prior to the filing of the year tax return. (If not paid at the tax return due date, or extended due date, the bank loses its tax deduction.)			
A B	30. Trace the authorization for the contribution to the plan to the board of directors' minutes, or obtain the management representation in the representation letter.			
B	31. Inquire of the client as to any intent to terminate the plan.			
B	32. Obtain and check disclosure information.			
A B	33. If not previously audited, obtain net transition obligation computations and agree amounts to actuarial report, trustees report, or other evidential sources. Recheck compensation.			
A B	34. Obtain calculation of pension cost for the current period and agree components to actuarial report or trustee's report.			
A B	35. Determine that a liability is recorded for unfunded accrued pension cost whenever the client's contribution is less than its related expense or that prepaid pension costs is recorded when the amount funded exceeds the related expenses.			
A B	36. Determine that an additional liability is recorded equal to the excess, if any, of the accumulated benefit obligation over the fair value of plan assets. (Similar assets are not recorded except when the excess follows a business combination treated as a purchase.)			
[A] [B]	37. If the work of a specialist is used in performing the audit, has the auditor documented his satisfaction concerning the following:			
	a. Review the professional certification, license, or other recognition of the competence of the specialist.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. The reputation and standing of the specialist in view of those familiar with his capability or performance.	____	____	____
	c. The specialist's experience in the type of work under consideration.	____	____	____
	d. Review the relationship, if any, of the specialist to the client.	____	____	____
	e. If the work of a specialist is used in performing the audit, obtain and document the auditor's understanding of the nature of the work to be performed.	____	____	____
[A] [B]	38. Prepare conclusion memo as to whether or not audit objectives have been met and accordingly whether or not the pension and related accounts are fairly stated for inclusion in the (consolidated, if applicable) financial statements in accordance with generally accepted accounting principles. (If not, document details of exception.)	____	____	____

XI. Income Taxes Accrued and Provided

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Amount reasonable—To determine that the provision for income taxes is reasonable. (Assertions 1, 2, 3, and 4)

B. Amount comparable to amount to be paid—To determine that the liability for accrued income taxes is adequate and not excessive in relation to amounts reasonably expected to be payable. (Assertions 3 and 4)

C. Temporary differences recognized—To determine that deferred income taxes represent the effect of temporary differences. (Assertions 1, 2, and 4)

D. Proper classification—To determine that income tax provisions, accruals and deferrals are properly described and classified in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review ____ ____ ____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
	B. Detailed Tests			
A B C [D]	1. Obtain or prepare analyses of the various current and deferred income tax liabilities and assets and related provisions showing:			
	a. Balances at the beginning of the year (period).	____	____	____
	b. Amounts provided.	____	____	____
	c. Refunds received.	____	____	____
	d. Payments made, indicating date and nature.	____	____	____
	e. Balances at the end of the year (period).	____	____	____
A	2. Compare opening balances to the prior year's working papers.	____	____	____
A B	3. Trace payments to cash books and general ledger; examine canceled checks for evidence of timely payment.	____	____	____
A B	4. Compare payments and refunds to copies of income tax returns.	____	____	____
A B C	5. Ascertain latest year that income tax returns have been examined and which periods, if any, are being contested. Examine recent Revenue Agent Reports; determine that adequate consideration has been given to items challenged in the past. Also consider disclosure of the examination.	____	____	____
A B C	6. Review or prepare a reconciliation of earnings (loss) per books with taxable income for the period.	____	____	____
A B C	7. Review or compute the provisions for federal and other income taxes.	____	____	____
D	8. Determine that the nature of any significant differences between pretax earnings and income tax expense are disclosed.	____	____	____
A B C	9. Determine that the accrual and provision is adequate considering:			
	a. Tax positions taken by the client that might be challenged by the taxing authorities or other tax contingencies.	____	____	____

Obj.		Done By	Date	W/P Ref.
	b. Possible assessments, penalties or interest indicated by tax return examinations completed during the year or in progress, including similar adjustments applicable to years not yet examined.			
A B C	10. Compute or obtain and test the client's computation of deferred tax assets and liabilities to determine conformity with FASB Statement No. 109 (AC I27). Test the reasonableness.			
A B C D	11. For deferred tax assets, determine the likelihood that all or part of the recorded amount will not be realized. In making that determination, consider all available evidence, both positive and negative.			

Practice Tip

For tax benefits to be realized, there must be adequate taxable income in the future when deductible temporary differences reverse and when net operating loss carryfowards are available.

A B C D	12. If it is determined that it is more likely than not that all or part of the deferred tax asset will not be realized, evaluate the adequacy of the valuation allowance account by performing the following:			
	a. Review and test the process used by management to develop the estimate, or develop an independent expectation of the estimate, to corroborate the reasonableness of management's estimate.			
	b. Determine whether any subsequent events or transactions have occurred prior to the completion of field work that could effect the adequacy of the valuation allowance.			

Practice Tip

See FASB Statement No. 109, paragraphs 17–26 (AC I27.116–.125), for guidance on valuation allowance computation.

D	13. Review a schedule of net operating loss carryovers and unused investment tax credits for propriety.			
A B	14. Consider additional tax liabilities to any new states in which the client does business.			
A B C	15. If the auditor is to prepare the returns, ascertain that all necessary information is obtained.			
D	16. Obtain all necessary information for disclosure in the financial statements (e.g., tax benefits of operating loss carryovers, classification of deferred taxes, etc.).			
A B C D	17. Obtain tax department review of the income tax working papers.

XII. Notes Payable and Long-Term Debt

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Payables exist—To determine that notes payable and long-term debt are authorized, properly classified, and described in the financial statements. (Assertions 3 and 5)

B. Period recorded proper—To determine that liabilities are recorded in the proper period at the correct amounts. (Assertions 1, 2, and 4)

C. Expense recognized—To determine that related interest expense (including discount or premium) is accounted for in conformity with generally accepted accounting principles consistently applied. (Assertions 2 and 5)

D. Adequate disclosure—To determine that the financial statements include adequate disclosure of restrictive covenants of loan agreements, pledged assets, etc. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review ____ ____ ____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	b. Internal control documentation and test results			
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)			
	d. Other planning documents and risk assessments			
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.			
A B C	**B. Substantive Analytical Procedures**			
	1. Compare balances in notes payable, long-term debt, and the related interest expense accounts with the preceding year's balances or expected balances. Investigate any significant deviations from the expected amounts.			
	2. Compute the following ratios and compare to preceding year's ratios or expected ratios. Investigate any significant deviations from the expected ratios.			
	a. Long-term debt to stockholders' equity.			
	b. Interest expense as a percentage of average balance of notes payable and long-term debt outstanding.			
	C. Detailed Tests			
[A] [B] [C] [D]	1. Obtain or prepare an analysis of notes payable, long-term debt, lines of credit, and other financing arrangements showing the following:			
	a. Description:			
	(1) Date of origin			
	(2) Type of debt and maturity			
	(3) Face amount			
	(4) Interest rate			
	(5) Timing and amount payments			
	b. Principal:			
	(1) Balance at the beginning of the year (period)			
	(2) Additions			
	(3) Payments			
	(4) Balance at the end of the year (period)			
	c. Related Interest:			
	(1) Accrued interest at the beginning of the year (period)			
	(2) Unamortized discount or premium at the beginning of the year (period)			
	(3) Expense incurred during the year (period)			

Obj.			Done By	Date	W/P Ref.
		(4) Amount paid during the year (period)			
		(5) Accrued at the end of the year (period)			
		(6) Unamortized discount of premium at the end of the year (period)			
[D]	2.	Foot and crossfoot analysis, and trace totals to general ledger and subsidiary ledgers for notes payable and long-term debt.			
A [D]	3.	Trace authorization for all new debt to the minutes of the Board of Directors meetings.			
A B C D	4.	Examine supporting documentation for all debt and related interest expense (for example, note and loan agreements, bond indentures, correspondence from legal counsel, etc.); obtain copies of debt agreements and highlight restrictive covenants. Note and investigate any apparent violations. Maintain copies of all notes and related agreements in the permanent file.			
A D	5.	Confirm outstanding balances, terms, conditions, and compliance with covenants with the credit grantor or independent trustee.			

Practice Tip

Confirming responses should be mailed back directly to the auditor. The auditor should always control the mailing of confirmations. Second requests should be mailed as necessary for nonreplies.

A B	6.	Examine canceled or paid notes and bonds. Consider confirming large notes paid or canceled during the year (period).			
D	7.	Determine if any assets are subject to lien and obtain carrying amount for disclosure.			
D	8.	Examine notes for guarantees. Be alert for related-party guarantees. All guarantee relationships should be disclosed.			
A B D	9.	Examine notes and debt agreements and review compliance with restrictive loan covenants. Gather information for financial statement disclosures.			
D	10.	Separate short-term notes and the current portion of long-term debt for report classification. Categorize by type of lender (related party, banks, loan company, etc.). Determine five year maturities for all long-term obligations.			
C	11.	Test interest expense and amortization of debt discount or premium by:			
		a. Performing reasonableness tests. For example, multiplying average balances of debt outstanding by average interest rates.			
		Or			
		b. Recomputing the balances.			
C	12.	Consider the need to impute interest on noninterest bearing notes.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
A B D	13. Confirm and verify line of credit agreements and gather information for financial statement disclosures.	____	____	____
D	14. In accordance with FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), obtain information about the fair value of notes payable and long-term debt, and perform the following:			
	Note: Disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 are optional for nonpublic entities that meet certain criteria (see FASB Statement No. 126). Determine if the client is making FASB No. 107 disclosures.			
	a. Determine that the fair value amounts are determined in accordance with FASB Statement No. 107 (AC F25).	____	____	____
	b. Determine that the valuation principles are being consistently applied.	____	____	____
	c. Determine that the fair value amounts are supported by the underlying documentation.	____	____	____
	d. Determine that the method of estimation and significant assumptions used are properly disclosed.	____	____	____

Practice Tip

Normally, the carrying amount of notes payable and long-term debt will approximate their fair values. However if the interest rate on the debt is significantly different from market rates, the carrying amount of the debt may not approximate their fair value. See FASB Statement No. 107 (AC F25) and Auditing Interpretation No. 1 of SAS No. 57, *Auditing Accounting Estimates*, titled "Performance and Reporting Guidance Related to Fair Value Disclosures (AU section 9342.01–.10)," for further guidance.

D. Extinguishments of Liabilities

A D	1. Determine that a liability has been derecognized if and only if it has been extinguished. A liability has been extinguished if either of the following conditions is met:			
	a. The debtor pays the creditor and is relieved of its obligation for the liability. Paying the creditor includes delivery of cash, other financial assets, goods or services, or reacquisition by the debtor of its outstanding debt securities whether the securities are canceled or held as so-called treasury bonds.	____	____	____
	b. The debtor is legally released from being the primary obligor under the liability, either judicially or by the creditor.	____	____	____
D	2. If debt was considered to be extinguished by in-substance defeasance under the provisions of FASB Statement No. 76 prior to the effective date of FASB Statement No. 125, determine that a general description of the transaction and the amount of debt that is considered extinguished at the end of the period so long as that debt remains outstanding has been disclosed.	____	____	____

Obj.		Done By	Date	W/P Ref.
D	3. If assets are set aside after the effective date of FASB Statement No. 125 solely for satisfying scheduled payments of a specific obligation, determine that a description of the nature of restrictions placed on those assets has been disclosed.	____	____	____

XIII. Stockholders' Equity

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Proper authorization and classification—To determine that all transactions and commitments (options, warrants, rights, etc.) are properly authorized and classified. (Assertions 1, 2, 3, 4, and 5)

B. Proper recognition and cut-off—To determine that all transactions and commitments are recorded at correct amounts in the proper period. (Assertions 1, 2, and 5)

C. GAAP conformity—To determine that all transactions and balances are presented in the financial statements in conformity with generally accepted accounting principles consistently applied and accompanied by adequate disclosures. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review ____ ____ ____

Obj.		Done By	Date	W/P Ref.
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
	B. Substantive Analytical Procedures			
	1. Compare balances in shareholders' equity accounts with the preceding year's balances or expected balances. Investigate any significant deviations from the expected amounts.	____	____	____
	C. Capital Stock and Additional Paid-In Capital—Detailed Tests			
[C]	1. For each class of stock, identify the number of authorized shares, par or stated value, privileges, and restrictions.	____	____	____
[C]	2. Obtain or prepare an analysis of the activity in the accounts; trace opening balances to the balance sheet as of the close of the year (period) previously audited and trace closing balances to the general ledger.	____	____	____
A B	3. Examine minutes, bylaws, and articles of incorporation for provisions relating to capital stock and support for all changes in the accounts including authorization per minutes of Board of Directors and stockholders meetings, and correspondence from legal counsel.	____	____	____
A B	4. Account for all proceeds from stock issues (including stock issued under stock option and stock purchase plans):			
	a. Recompute sales price and applicable proceeds.	____	____	____
	b. Determine that proceeds have been properly distributed between capital stock and additional paid-in capital.	____	____	____
A B [C]	5. Verify outstanding stock by agreeing open stubs in stock certificate book to the listing or confirm with the transfer agent the total issued shares and the total shares issued in the company's name. Determine that surrendered certificates have been canceled and accounted for.	____	____	____
A B [C]	6. For stock options and stock option plans, trace authorization to the minutes of the Board of Directors meetings, review the plan and the option contracts. Obtain of prepare and test analyses of stock options which include the following information:			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	a. For option plans, the date of the plan, number and class of shares reserved for option, method for determining the option price, period during which options may be granted, and identity of persons to whom options may be granted.	____	____	____
	b. For options granted, identity of persons to whom granted, date of grant, number of shares under option, option price, option period, number of shares as to which options are exercisable, and the market price and value of shares under option as of the date of grant or measurement (first date on which are known both (1) the number of shares individual is entitled to receive, and (2) the option of purchase price, if any).	____	____	____
	c. For options outstanding, number of shares subject to option at the beginning of the period, activity during the period (additional shares subjected to option, number of shares exercised under options, number of shares associated with options which expired during the period), and number of shares subject to option at the end of the year (period).	____	____	____
A B C	7. If the client has a stock-based compensation plan (such as a stock option plan mentioned in the step above, or a stock purchase plan or any arrangement by which employees receive shares of stock or other equity instruments), perform the following steps:			
	a. Determine that the appropriate accounting treatment is being applied to all transactions that result from such stock compensation plans:			
	(1) If the client is following the provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation* (AC C36), determine that the fair-value method of accounting is being properly complied with, as described in the applicable sections of FASB Statement No. 123 (AC C36).	____	____	____
	(2) If the client is following the provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees* (AC C47), determine that the intrinsic value method of accounting is being properly complied with, as described in the applicable sections of APB Opinion No. 25 (AC C47).	____	____	____
	b. Summarize in the working papers all information required for disclosure as described in the appropriate accounting guidance.	____	____	____
B C	8. Identify all stock rights and warrants outstanding as of the balance-sheet date including the number of shares involved, period during which exercisable, and exercise price; determine that the rights and warrants were authorized.	____	____	____
A B C	9. Identify any stock subscriptions receivable, and:			
	a. Determine if they were authorized.	____	____	____

Obj.		Done By	Date	W/P Ref.
	b. Obtain confirmation from subscribers.			
	c. Ascertain that subscriptions receivable are classified as a reduction of stockholders' equity on the balance sheet.			
A B C	10. Obtain or prepare an analysis of the treasury stock account and:			
	a. Inspect the paid checks and other documentation in support of the treasury stock acquisitions.			
	b. Inspect or confirm the treasury stock certificates; ascertain that the certificates are in the company's name or endorsed to the company.			
	c. Reconcile treasury stock to the general ledger.			
A B C	11. Determine that declared and unpaid dividends are properly recorded. Compare paid dividends to director's minutes.			
	D. Retained Earnings—Detailed Tests			
[B]	1. Analyze activity during the period; trace the opening balance to the balance sheet as of the end of the year (period) previously audited; trace net income and other activity to the proper general ledger accounts and cross reference to other working paper analyses.			
A B	2. Determine that dividends paid or declared have been authorized by the Board of Directors and:			
	a. Examine paid checks and supporting documents for dividends paid (selected checks to shareholders or to a dividend disbursing agent).			
	b. Recompute amounts of dividends paid and/or payable.			
B C	3. Investigate any prior period adjustments and determine if they were made in accordance with GAAP.			
A B C	4. Examine supporting documents and authorization for all other transactions in the account, considering conformity with generally accepted accounting principles.			
	E. Other			
C	1. Determine and document any restrictions on equity accounts.			
C	2. For disclosure purposes, obtain information concerning the pertinent rights and privileges of the various securities outstanding. Information includes dividend and liquidation preferences, participation rights, call prices and dates, conversion or exercise prices or rates and pertinent dates, sinking-fund requirements, unusual voting rights, significant terms of contracts to issue additional shares, and redemption requirements. Determine that such information is accurate.

XIV. Revenues and Other Income

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Proper recognition—To determine that revenue transactions represent consideration applicable to goods shipped and/or completed services rendered to customers (or clients) in the normal course of business during the year (period). (Assertions 1, 3, 4, and 5)

B. Revenue realized—To determine that revenue transactions have resulted in collections or bona fide receivables. (Assertions 1 and 2)

C. Revenue recorded—To determine that all revenues earned during the year (period) are recorded and included in the financial statements. (Assertions 1, 2, and 5)

D. Proper classification—To determine that revenues are properly classified and described in the financial statements and accompanied by adequate disclosure. (Assertions 4 and 5)

E. Proper classification of other income—To determine that other income has been properly recognized, classified and described in the statement of income. (Assertions 2 and 5)

F. GAAP conformity—To determine that the income statement is prepared in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Obj.		Done By	Date	W/P Ref.
	Procedures:			
	A. Preliminary Procedures			
	1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
	a. Preliminary analytical review	____	____	____
	b. Internal control documentation and test results	____	____	____
	c. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	d. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
	B. Substantive Analytical Procedures			
	1. Compare current year sales and other income balances to the preceding year's balances or expected balances. Balances may include gross sales, discounts granted, returns, credits allowed, and net sales. Consider disaggregating the data, such as by product line, division, seasons of the year, etc. Investigate any significant deviations from the expected balances.	____	____	____
	C. Detailed Tests			
	1. Obtain the sales journal and for a selected period(s):			
	a. Trace totals from the sales journal to the general ledger control accounts for revenues, receivables, and such other accounts as salesmen's commissions, provisions, and allowances for product warranties, etc.	____	____	____
	b. Trace selected individual items from the sales journal to such other subsidiary records as the salesmen's commissions detail, and entries to charge cost.	____	____	____
	c. Reconcile the sales journal to the entries to charge cost of sales and credit inventory.	____	____	____
	d. Test the arithmetic accuracy of the footings and crossfootings of the journals.	____	____	____
	2. Obtain the cash receipts journal and perform the following on a test basis for a selected period(s):			
	a. Trace totals to the general ledger for both the cash account and applicable account distributions such as accounts receivable, cash sales, investment income, and additions to notes payable (re: proceeds).	____	____	____

Obj.			Done By	Date	W/P Ref.
		b. Test the arithmetic accuracy of the footings and crossfootings of the cash receipts journal; reconcile total receipts to total deposits per the bank statement.			
A B C D	3.	Select (using appropriate sampling techniques) ____ shipping orders prepared during the year and vouch to related sales invoices and trace into the sales journal.			
[A] [B] [C] [D] [E] [F]	4.	Scan source journals for the period for unusual transactions. Determine that they are accounted for properly. Follow up on any unusual or related-party transactions.			
A B D	5.	Review the source journal for any large or unusual sales transactions, especially near year end. Examine invoice and shipping document.			
A F	6.	Ascertain whether the entity ships goods to be held on consignment by others, and if so:			
		a. Identify the control accounts, procedures, and entities to whom consignment shipments are made.			
		b. Examine consignment agreements.			
		c. Review subsidiary accounts for entities to whom consignment shipments are made; examine supporting detail and ascertain that shipments on consignment are properly recorded.			
		d. Review shipping advices and trace consignment shipments to the applicable subsidiary records and control accounts; ascertain that consignment shipments are correctly classified and recorded.			
		e. Investigate old or significant consignments to determine whether there are any unrecorded sales.			
A [F]	7.	Identify amounts of sales to affiliates, obtain an understanding of their business purpose, and note for disclosure and/or tracing to consolidation eliminating entries. Identify amounts of sales to other related parties.			
A B C	8.	For sales cut off as of the closing date for the year (period) and/or the date of the physical inventory:			
		a. Select sales invoices for testing from the sales register for several days before and after the year end (or at the physical inventory date) and examine shipping records and determine that they were recorded in the proper period.			
		b. Select credit memos issued after year end and examine underlying documentation (for example, record of receipt of returned goods) to determine period to which credit memo is applicable and whether it was recorded in the proper period.			

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	c. Inquire of the client if there are unprocessed sales or customer credit memos. Inspect supporting documents to determine whether they should have been recorded prior to year end.			
A C E	9. Ascertain that the following income accounts have been traced to the analysis working papers for examination of the related balance-sheet accounts:			
	a. Interest income (notes receivable, debt securities, capitalized leases, etc.).			
	b. Dividend income and realized gain (investment securities).			
	c. Increase in investments accounted for on the equity method (investments).			
	d. Gain on sale of property and equipment (property and equipment).			
	e. Other miscellaneous revenue amounts, as appropriate.			
A E	10. Obtain (or prepare) an analysis of rent and royalty income and examine supporting agreements (should be related to examination of leases and other agreements). Determine reasonableness of amounts.			
A B C D	11. Determine proper income recognition when the right of return exists.			
A B C D F	12. Determine that any product financing arrangements are accounted for properly.			
A B C D	13. Determine that sales of extended warranty and product maintenance contracts are accounted for properly.			
A	14. If earnings-per-share information is presented, determine that the computation and presentation of such amounts are in conformity with the requirements of FASB Statement No. 128, *Earnings per Share.*			

D. Additional Procedures (if any)

E. Section Completion

1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk

Obj.		*Done By*	*Date*	*W/P Ref.*
	for revenues and other income, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for revenues and other income.	____	____	____

XV. Operating and Other Expenses

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Properly recorded—To determine that reported expenses include costs which are properly allocable to the year (period) and are properly matched with revenues. (Assertions 1, 2, and 4)

B. Proper recognition—To determine that recognition has been given to all costs and expenses (including losses) which should be recognized. (Assertions 1, 2, 3, and 4)

C. Taxes properly recorded—To determine that all tax temporary differences have been accounted for. (Assertions 2 and 5)

D. Proper classification—To determine that extraordinary items have been properly classified and disclosed. (Assertions 1 and 5)

E. GAAP conformity—To determine that the income statement is prepared in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

F. Proper classification—To determine that costs and expenses are appropriately classified and described in the statement of income. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review

Obj.		Done By	Date	W/P Ref.
	b. Internal control documentation and test results	____	____	____
	c. SAS No. 70 report on service center processed transactions (payroll)	____	____	____
	d. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors)	____	____	____
	e. Other planning documents and risk assessments	____	____	____
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
ABC DEF	**B. Substantive Analytical Procedures**			
	1. Compare cost of sales and expense account balances to the preceding year's balances or expected balances. Investigate any significant deviations from the expected balances.	____	____	____
	2. While completing the procedures in step 1 above, examine the propriety of the balances in the following accounts, as deemed necessary.	____	____	____
	a. Officers' salaries and bonuses. Determine board of directors' authorization.	____	____	____
	b. Officers' expenses (for tax return).	____	____	____
	c. Contributions (eligible for deduction).	____	____	____
	d. Rents (look for potential capitalizable leases).	____	____	____
	e. Legal and professional services (look for any payments that may represent undisclosed legal matters).	____	____	____
	f. Taxes (for tax return).	____	____	____
	g. Repairs and maintenance (look for capitalizable items).	____	____	____
	h. Supplies (look for capitalizable items).	____	____	____
	i. Travel, conference, spousal travel, and entertainment expenses (look for adequate documentation and abuse).	____	____	____
	j. Property tax expense (for unrecorded property).	____	____	____
	k. Other miscellaneous expenses.	____	____	____

Practice Tip

An analysis of trial balance expense accounts can prove to be a valuable tool for both the audit and any tax engagements you have with the client: At tax time, it's beneficial to have the details of expenses required to prepare the client's tax return. It will save you time (and money) to prepare these schedules during the audit.

	3. Calculate gross profit percentages by product line (or other method as deemed appropriate). Compare percentages to the preceding year's percentages or expected percentages and investigate significant deviations from the expected percentages.	____	____	____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Obj.		Done By	Date	W/P Ref.
	4. Calculate individual expense categories as a percentage of total expenses. Compare to similar percentages for the prior year or to expected percentages. Investigate any significant deviations from expected percentages.			
	C. Detailed Tests			
	1. Obtain the cash disbursements journal and for a selected period(s):			
	a. Trace totals from the cash disbursements journal to the general ledger control account for accounts payable, cash, and such other accounts as payroll expense, rent expense, insurance expense, interest expense, etc.			
	b. Select a sample of individual expenses from the cash disbursements journal for detailed testing. Trace selected expenses to supporting documentation, such as vendor invoices, canceled checks, or other subsidiary records. Determine that expenses are recorded in the proper amount and in the proper period.			
	c. Test the arithmetic accuracy of the footings and crossfootings of the journals.			
A B D	2. Scan source journals for the period for large or unusual transactions and determine that they are properly recorded.			
A B C F	3. Determine that the following expense accounts have been traced to the analysis working papers for examination of the related asset and liability balances:			
	a. Bad debt expense (allowance for doubtful accounts—trade receivables).			
	b. Insurance expense (prepaid insurance and accrued premiums for workmen's compensation).			
	c. Property taxes (prepaid and/or accrued property taxes).			
	d. Depreciation expense (property and equipment and accumulated depreciation).			
	e. Amortization costs (intangible assets).			
	f. Interest expense (notes payable, long-term debt, capitalized leases).			
	g. Provision for income taxes (liability for income taxes currently payable, deferred income taxes).			
	h. Loss on sale or disposition of property and equipment (property and equipment).			
	i. Other expenses, as deemed appropriate.			
	4. Determine that advertising costs are accounted for in accordance with SOP 93-7, *Reporting on Advertising Costs.*			
A B	5. If the client has incurred external or internal costs associated with modifying internal-use software for the year 2000, determine that those costs have been charged to expense as incurred.			

Obj.		Done By	Date	W/P Ref.
	6. Consider whether the classification of expenses is in conformity with generally accepted accounting principles consistently applied.			
	D. Payroll			
A B F	1. Compute the following as a percentage of total revenues and compare to prior year's percentages or expected percentages. Investigate any significant deviations from the expected percentages.			
	a. Payroll (direct and indirect labor, officers' salaries)			
	b. Benefits			
	c. Commissions			
A B F	2. Compute average compensation and fringes divided by number of full-time equivalents (FTEs) and compare to prior years and peer group statistics.			
A B F	3. Calculate and investigate total payroll and benefits costs divided by average assets, compare to prior year's ratio or expected ratio, and correlate results to other analytical procedures. Investigate significant or unexpected results.			
A B F	4. Compute payroll tax expense as a percentage of total wages and salaries and compare to prior year's percentage or expected percentage. Investigate significant deviations from expected percentages.			
A B F	5. Reconcile gross wages on payroll tax returns to general ledger.			
A B F	6. Review payroll tax returns to determine that they are being properly filed; and tax liabilities are paid timely.			
A B F	7. If analytical procedures are not deemed sufficient, select a sample of payroll transactions for detailed testing as follows:			
	a. Trace selected employee to personnel records, to verify existence of employee, pay rate, legal status, etc.			
	b. Recalculate gross and net pay for propriety.			
	c. Trace pay amount into proper recording into subledgers and general ledger.			

E. Additional Procedures (if any)

XVI. Contingencies, Commitments, and Litigation

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Contingencies exist—Identify the existence of any contingencies arising from litigation, claims, and assessments; when the underlying cause occurred; the likelihood of an unfavorable outcome, and the amount or range of possible loss. (Assertions 1, 2, 3, and 4)

B. Proper recording and disclosure—The financial statements include proper accruals and/or disclosure of the contingencies. (Assertions 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

   a. Preliminary analytical review ____ ____ ____

   b. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors) ____ ____ ____

   c. Other planning documents and risk assessments ____ ____ ____

Obj.		Done By	Date	W/P Ref.
	2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work.	____	____	____
	B. Contingencies			
A B	1. If it appears the client may have engaged in any questionable or illegal acts or irregularities, obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effect on the financial statements. Procedures are to include inquiry of management at a level above those involved, if possible.	____	____	____
A B	2. If management does not provide satisfactory information that there has been no illegal acts or irregularities, consult with the client's legal counsel or other specialists about the application of relevant laws and regulations. Arrangements for such consultation with client's legal counsel should be made by the client.	____	____	____
A B	3. Review minutes of directors' meetings and discuss all pertinent items with management. Make excerpts and agree to applicable			
A B	working papers.	____	____	____
	4. Inquire of management as to the existence, amount, and accrual of contingencies, with respect to such matters as: (If none, so indicate.)			
	a. Litigation in process or threatened.	____	____	____
	b. Receivables or other assets sold or assigned with recourse.	____	____	____
	c. Discounted receivables.	____	____	____
	d. Debt guarantees of others.	____	____	____
	e. Accommodation endorsements.	____	____	____
	f. Potential tax assessments (property, sales, etc.).	____	____	____
	g. Additional federal or state income taxes.	____	____	____
	h. Governmental laws, regulations, or determinations with adverse effect (wage-hour, safety, etc.).	____	____	____
	i. Pension plans.	____	____	____
	j. Revenue subject to renegotiation.	____	____	____
	k. Self-insurance.	____	____	____
	l. Product warranties.	____	____	____
A B	5. Review legal fees for the period for indication of possible contingent liabilities.	____	____	____

Obj.		Done By	Date	W/P Ref.
A B	6. Obtain from management a description and evaluation of litigation, claims, and assessments that existed at the balance-sheet date to the date the information is furnished, including an identification of those matters referred to legal counsel.			
A B	7. Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers.			
A B	8. Obtain assurance from management, ordinarily in writing, that it has disclosed all unasserted claims that the lawyer has advised them are probable of assertion and must be disclosed in accordance with FASB Statement No. 5 (AC C59). With the client's permission, inform the lawyer that the client has given the firm this assurance.			
A B	9. Have the client prepare a letter to its lawyer(s) to respond directly to us, as of the balance-sheet date, his or her summary and opinion as to the outcome of (*a*) all claims and lawsuits, threatened or pending, (*b*) tax assessments, proposed or made, (*c*) unbilled legal fees if any, (*d*) any other contingent liabilities of which the lawyer(s) have knowledge.			

List of All Lawyer Letters Requested	*Date Requested*	*Received*

A B	10. Evaluate responses from lawyers and document conclusions:			
	a. If a response date is earlier than 2 weeks prior to date of auditors' report, obtain a written or oral update.			
	b. If update not obtained, document why. (If lawyer does not report any matters to us and management represents to us there are no litigation or unasserted claims, it *may* not be necessary to obtain an update.)			
	c. Cross-reference all recorded reported liabilities to current working papers.			
	d. Document your conclusion(s) as to the effect(s) on the financial statements and our report of matters included in the attorney letter(s).			
B	11. Consider the adequacy of financial statement disclosure for contingencies.			

C. Commitments

A B	1. Inquire of appropriate officials as to the existence and amount of commitments, with respect to such matters as: (If none, so indicate.)

XVII. Subsequent Events

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. Existence of subsequent event—Any events or transactions occurring after the balance-sheet date, but before issuance of the financial statements and auditor's report (subsequent events) which require adjustment or disclosure in the financial statements. (Assertions 1, 2, 3, and 4)

B. Proper recognition—The financial statements have been adjusted for changes in estimates resulting from evidence provided by subsequent events. (Assertions 1, 2, 3, and 4)

C. Proper disclosure—The financial statements include adequate disclosure of evidence provided by subsequent events which should not result in adjustment of the financial statements but should be disclosed. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Substantive Test Procedures

A B C 1. Perform at or near the completion of field work the following auditing procedures with respect to the period after the balance-

Obj.		Done By	Date	W/P Ref.
	sheet date for the purpose of identifying subsequent events that may require adjustment or disclosure in the financial statements:			
	a. Read the latest available interim financial statements; compare them with the financial statements being reported upon; and make any other comparisons considered appropriate in the circumstances. (Inquire of officers and other executives having responsibility for financial and accounting matters as to whether the interim statements have been prepared on the same basis as that used for the statements under audit.)	____	____	____
	b. Read the available minutes of the stockholders, directors, and appropriate committees to the date of the auditor's report. As to meetings for which minutes are not available, obtain written information regarding matters dealt with at such meetings. Indicate minutes read, persons questioned, and any significant information found.	____	____	____
	c. Scan the general ledger and journals for the period from the balance-sheet date to the date of the auditor's report and inquire into and investigate any large, unusual amounts or transactions. This test may be limited to the areas not covered in audit procedures applied in other programs, such as in the search for unrecorded liabilities.	____	____	____
A B C	2. As of the date of the auditor's report, inquire of and discuss with officers and other executives having responsibility for financial and accounting matters as to:			
	a. The client's operations and management.	____	____	____
	b. Changes in accounting/financial policies.	____	____	____
	c. New borrowings or other financing.	____	____	____
	d. Substantial contingent liabilities or commitments.	____	____	____
	e. Whether there has been any significant change in assets or liabilities.	____	____	____
	f. The current status of items in the financial statements being reported on that were accounted for on the basis of tentative, preliminary, or inconclusive data.	____	____	____
	g. Unusual adjustments made during the subsequent period.	____	____	____
	h. Commitments or plans for major purchases of capital additions or materials, and consideration of possible losses due to price trends.	____	____	____
	i. Events occurring that have caused a decline in the value of any assets or have made any significant portion of fixed assets inoperable or obsolete.	____	____	____
	j. Settlement of any liabilities for less than face value.	____	____	____

Obj.			Done By	Date	W/P Ref.
	k.	Liabilities in dispute or being contested.			
	l.	Litigation, claims, and assessments.			
	m.	Recent profit trends, losses of significant customers, unusual losses, substantial increases in costs, etc.			
	n.	Examinations or audits instituted by regulatory agencies.			
	o.	Employee benefit plans/pension plans.			
	p.	Potential losses on marketable securities, carrying amounts of equity investments, loans, or other assets not already considered.			
	q.	Regulatory commissions, governmental body requirements, or laws that could adversely affect the client.			
	r.	Related-party transactions.			
	s.	Expiration or cancellation of significant insurance coverage.			
	t.	Whether any other unusual events or transactions occurred since the balance-sheet date.			
A	3.	Assemble pertinent findings resulting from response of client's legal counsel and other auditing procedures concerning litigation, claims, and assessments.			
A B C	4.	Obtain a letter of representation, dated as of the date of the auditor's report, from appropriate officials, generally the chief executive officer and chief financial officer in accordance with SAS No. 19 (AU section 333).			
A B C	5.	Make such additional inquiries or perform such procedures deemed necessary and appropriate to dispose of questions that arise in carrying out the foregoing procedures, inquiries, and discussions.			
C	6.	Consider adjustment of year-end financial statements or disclosure of any items resulting from the above procedures.			
C	7.	Consider the possible effects on financial statements and disclosures of any matters causing substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.			

B. Section Completion

	1.	The objectives of this audit program have been met.			

This audit program section has been completed in accordance with firm policy.

XVIII. Related Parties

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

A. To identify related parties and related-party transactions. (Assertions 1 and 2)

B. To determine the substance of such transactions is reflected in the accounts. (Assertions 2, 3, and 4)

C. To obtain all information necessary for footnote and/or report disclosure. (Assertions 2 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
   a. Preliminary analytical review ____ ____ ____
   b. Assessment of risk of material misstatement (due to error, fraud, illegal acts, or other factors) ____ ____ ____
   c. Other planning documents and risk assessments ____ ____ ____
2. Based on the fraud risk assessment and the presence of fraud risk factors, determine whether additional audit procedures are needed. Consult the "Fraud Risk Factor Memory Jogger" (if utilized), and other planning documents. If additional procedures are necessary, add them to this audit program and perform the specified work. ____ ____ ____

XIX. Risks and Uncertainties

Financial Statement Assertion:

1. Presentation and disclosure.

Objective:

A. GAAP conformity—To determine that disclosure of certain significant estimates and certain concentrations is in conformity with GAAP consistently applied. (Assertion 1)

Note: The letter preceding the above audit objective serves as an identification code. This code is presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Substantive Test Procedures

A	1.	Obtain or prepare a listing of any estimates used in determining the carrying values of assets and liabilities and gain and loss contingencies that are sensitive to change. Using information obtained in other audit areas and through inquiries of management, determine that the listing is complete and accurate.	____	____	____
A	2.	Consider whether it is at least reasonably possible that a material change in the estimate will occur in the near term.	____	____	____
A	3.	If such a situation is identified, review support for the calculation of the effect of the change.	____	____	____
A	4.	Obtain or prepare a listing of the following types of concentrations, if any, that existed at the balance-sheet date and that make the entity vulnerable to risk of near-term severe impact (severe impact is a higher threshold than materiality, but less than catastrophic). Using information obtained in other audit areas and through inquiries of management, determine that the listing is complete and accurate:			
		a. Volume of business transacted with a particular customer, supplier, or lender	____	____	____

Obj.		Done By	Date	W/P Ref.
	b. Revenues from particular products or services	____	____	____
	c. Available sources of supply of materials, labor or services, or of licenses or other rights used in operations	____	____	____
	d. Market or geographic area in which the entity conducts its operations	____	____	____
A	5. Determine whether it is at least reasonably possible that an event will occur in the near term that would cause the severe impact.	____	____	____
A	6. Determine whether disclosures required by SOP 94-6 are completely and accurately included in the financial statements.	____	____	____

AAM Section 6100
Working Papers—General

.01 Working papers serve both as tools to aid the auditor in performing his work, and as written evidence of the work done to support the auditor's report. SAS No. 41, *Working Papers* (AU section 339), provides authoritative guidance on the functions and nature, general content, and ownership and custody of working papers.

General Discussion

.02 These sections present points of view on the organization and preparation of working papers.

.03 Proper planning is important in the design of specific working papers if they are to serve the objective of aiding the auditor in the conduct of his work. For example, a well-planned working paper may be designed to provide information that will be needed later in the preparation of tax returns and other required reports, such as those to regulatory bodies, and may therefore eliminate the need for examining the same documents twice to obtain necessary information. The format and content of the working papers may vary with the individual preferences of auditors and firms. These preferences may be informal common practices or expressed as part of a firm's formal written policies and procedures. A firm should consider the nature of its practice and the services commonly provided to its clients, as well as professional standards in developing its procedures and policies on working papers. Those procedures and policies should permit the flexibility necessary to meet the needs of individual engagements.

[*The next page is 6201.*]

AAM Section 6200
Basic Elements of Format

.01 Working paper formats generally include at least the following for identification purposes:

- A title or heading comprised of (*a*) the name of the client, (*b*) a caption that briefly describes the paper's contents, (*c*) the nature of the engagement, and (*d*) the applicable period or closing date covered by the engagement.
- The initials or names of the auditors who performed and reviewed the work presented in the paper and the date the paper was completed.

.02 In instances when one working paper requires more than one page, some auditors present the heading on only the lead page, fasten or staple all the applicable pages together as a unit and number each page, for example, 1 of 5, 2 of 5, and so forth. Many auditors index each working paper in some organized pre-established manner. This provides for ease in cross-referencing to other relevant papers, for more organized indexing and filing, and for a form of control over the working papers. (See AAM section 6400.)

.03 Some auditors purchase standard analysis paper that includes preprinted blocks for the initials or signature of the preparer and reviewer, and the dates on which the paper was prepared and reviewed. Others design their own signature and reference blocks and have them imprinted on all of their analysis paper and lined pads. These signature blocks may include captions such as the following:

— prepared by client and tested by

— prepared by

— date prepared

— date tested

— reviewed by

— date reviewed

— source

— work paper reference

— footed by

— extensions checked by

.04 Some auditors prefer to identify client preparation of schedules and analysis by notations or codes, such as "PBC," for prepared by client, rather than use a detailed signature and reference block.

[*The next page is 6301.*]

AAM Section 6300
Content of Working Papers

.01 The content of working papers varies with the circumstances and needs of the auditors on individual engagements. Some firms, however, include various general and specific instructions on working paper content in their policies concerning working papers.

General Considerations

.02 The following are some general considerations on working paper content that may be helpful.

- Working papers should be sufficiently intelligible, clear and neat so that another auditor who has had no previous association with the engagement can review the papers and determine the nature and extent of the work done and how the conclusions were reached that support the resulting auditor's report.
- The content of an individual working paper or group of related papers should include identification of the (1) source of the information presented (e.g., fixed assets ledger, cash disbursements journal), (2) the nature and extent of the work done and conclusions reached (by symbols and legend, narrative, or a combination of both), and (3) appropriate cross-references to other working papers.
- Before completion of the engagement, all questions or exceptions in the working papers should be resolved. If for some reason the auditor must leave the assignment without resolving all items, he should provide an open items listing on a separate temporary paper for the in-charge auditor's attention. An unresolved exception or incomplete explanation in the working papers may be construed by some as indication of an inadequate audit.
- Information and comments in the working papers generally represent statements of fact and professional conclusions. Accordingly, language should be clear and free from such vague judgmental adjectives as "good" or "bad." Conclusions should be supported by documented facts, especially if they concern the adequacy of the client's records.
- Working papers should be viewed as an integrated presentation of information. The auditor should cross-reference working papers to call attention to interaccount relationships and to reference a paper to other working papers summarizing or detailing related information.
- The preparer should view the working papers as if he were the in-charge auditor. All inferences and conclusions should be supported in the working papers and no misleading or irrelevant statements should be made.
- It is preferable to have negative figures in working papers indicated by parentheses instead of red figures to preserve their identity if the papers are photocopied or microfilmed.

Timesaving Considerations

.03 There are a number of ways to save time and avoid unnecessary detail in working paper preparation. The following examples may be helpful.

- Whenever possible, have the client's employees prepare schedules and analyses. (This, of course, presupposes that the client has the necessary personnel to prepare the materials.)

- Use of a detailed audit program may eliminate the need for lengthy comments in the working papers on the scope of audit procedures. (However, some believe that such comments are still necessary when a detailed program is used; this is a matter of individual firm judgment.)
- Analyze asset (or liability) accounts and their related expense or income accounts on the same working paper. Examples include property, plant, and equipment, accumulated depreciation and related depreciation expense; notes receivable, accrued interest receivable and interest income; notes payable, accrued or prepaid interest, and interest expense; and accrued taxes and related provisions for tax expense.
- Avoid unnecessary computations. For example, if only the totals are meaningful and can be tested by a single independent computation, check the total and avoid unnecessary checking of details.
- Consider using carryforward analyses for accounts that tend to remain constant each year or vary only in accordance with a constant predetermined formula. Examples may include long-term assets and related depreciation or amortization such as plant, equipment, and intangibles, long-term debt with predetermined payment schedules, and capital stock.
- Consider using adding machine tapes instead of writing separate lists. Enter names or explanations on the tapes, when appropriate.
- Do not manually copy a document when photographic reproduction is feasible.
- If in doubt, use a larger sheet of paper—an unused portion is less of a problem than running out of space.
- Use symbols (tick marks) whenever possible, especially when the same symbol applies to several working papers.

Symbols (Tick Marks)

.04 When using symbols, it should be helpful to consider the following basic concepts:

- Symbols are merely a shorthand means of explaining a work step performed on a particular item of data. Symbols serve as means of conserving time and space and, if properly used, may ease review of the working papers.
- For a working paper to be clear to a reviewer or other reader, each symbol must be clearly explained. The explanation may be located on the same page as the items subjected to the work step, or on a separate legend that is clearly cross-referenced to and from the page that presents the applicable items.
- Symbols should be kept simple, distinctive and clear so they can be quickly written by the preparer and easily identified by a reviewer.

.05 Applying these basic concepts is not that simple. Various auditors have conflicting notions about symbols. For example, on the matter of color, some believe all tick marks should be in color to make it easy to spot them in the working papers. Others believe it is a waste of time to keep "switching pencils" and observe that the color distinction is lost in photocopying. On another matter, some believe a set of standardized symbols can expedite preparation and review. Others believe that a set of standardized symbols is impractical because it lacks flexibility. Because it is generally agreed that symbols are an effective timesaver, it is desirable for firms to establish and communicate a policy on their use to maximize their potential effectiveness.

.06 Commonly used symbols, as noted, should be simple and distinctive, not elaborate hieroglyphics. The most common are variations on a simple checkmark—for example, a checkmark with a slash, a check-

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

mark with a circle at the end, a double checkmark, and any one of these within a circle. This abbreviated listing alone provides eight distinctive tick marks. Symbols may also include circled letters or numbers.

[*The next page is 6401.*]

AAM Section 6400
Organization and Filing (Indexing)

.01 Some auditors organize their working papers during the course of an engagement into general categories such as the following:

- Planning and administration.
- Internal control understanding and assessment of control risk.
- Substantive test working papers arranged in order of the balance sheet and income statement classifications.
- Trial balances, consolidating working papers, journal entries (adjustments, reclassifications, eliminations for consolidation), and potential entries.
- Draft reports, financial statements, and notes.
- Programs, checklists, and questionnaires (some keep these as separate units, others interfile them among working papers by statement classifications).
- General matters such as current minutes, contracts, and articles of incorporation that may apply to future engagements as well as current work.

Under this approach, actual indexing and filing would be deferred until the conclusion of the engagement.

Predetermined Indexing

.02 Other practitioners and firms may use a predetermined indexing approach so that working papers can be indexed while the field work is still in progress. This offers the following advantages:

- Better control over working papers during the performance of field work.
- Constant arrangement of working papers in logical order to aid in review.
- Less time required in assembling and binding them into indexed files.
- Quicker access to specific working papers after they are filed.

.03 Predetermined indexing involves establishing a standard code for each section of the working papers, using letters and numbers, or numbers only. For example—

	Two Possible Alternatives	
Working trial balance—assets	B/S-A	T/B-1
Working trial balance—liabilities	B/S-L	T/B-2
Working trial balance—income & expense	P/L	T/B-3
Cash summary schedule	A	10
Receivables summary schedule	B	20
Inventory summary schedule	C	30

.04 Predetermined indexing requires recognition of the need for flexibility to meet unanticipated working paper needs or specialized industry requirements and it requires care to avoid undue complexity. Excessively complex references may obstruct rather than ease working paper preparation, cross-referencing

and filing. Accordingly, it is helpful to develop an organizational plan adaptable to each section of the working papers. For example, some accountants classify working papers as lead schedules, primary detail, and secondary detail which might result in the following classification scheme for the above examples for cash:

	Using Letters and Numbers	*Using Only Numbers*
Lead schedule	(A)	(10)
Primary detail schedules	(A-1) (A-2) etc.	(10-1) (10-2) etc.
Secondary detail schedules	(A-1-1) (A-1-2) (A-1-3)	(10-1-1) (10-1-2)
	(A-2-1) (A-2-2) (A-2-3)	(10-2-1) (10-2-2)

.05 Predetermined (standardized) indexing systems may be printed on separate pages for reference during the performance of field work and insertion in the front of working paper binders or files when the work is completed. Some firms have their uniform indexing systems printed directly on their file or binder covers.

.06 A well-organized indexing system need not be too complex. On a fairly small engagement, the indexing system may be a lead schedule divider tab between each major group of accounts with the name of the account on it (e.g., cash or accounts receivable) with the related workpapers filed behind the lead schedule without being individually indexed. At the completion of the engagement, the pages can be consecutively numbered within each account group (e.g., 1 of 10, 2 of 10, etc.), since there typically are not numerous or complex layers of supporting schedules, extensive cross-referencing can be avoided.

.07 On large engagements, particularly those with detailed charts of accounts, firms may consider it necessary to develop more complex indexing systems. In one such system, standard index number series are assigned as follows:

Current workpaper file	1000—7000
Permanent file	7100—9999

.08 In this system, each index number consists of four digits, with the addition decimals if necessary. Numbers ending with double zero are reserved for lead schedules whose total agrees with a line item on the working trial balance (index 1400). Single zeros are used for specific types of accounts (such as 2010, petty cash funds).

.09 Certain index numbers can be permanently assigned to each major financial statement classification. For instance, index 2000 may be assigned to cash. If various bank accounts exist, the cash schedules are assigned index numbers 2002, 2003, etc. Documentation such as supporting confirmations and lists of outstanding checks would be assigned index numbers commencing with 2001.1, 2001.2, etc. As for the permanent workpaper file, index 9300, for example, may be assigned to internal control. Accordingly, flowcharts and related questionnaires would be assigned index numbers in that series.

Current and Permanent Files

.10 Working paper files are generally classified as current files and permanent (continuing) files. Current files contain information that is pertinent to a single engagement. Permanent files include information relevant to several recurring engagements. Some firms have their binder or file covers preprinted as current or permanent accompanied by pertinent portions of their uniform working paper indexes.

.11 A common challenge to many auditors is to keep the permanent file complete and current, and free from outdated or irrelevant materials that belong in an inactive file of superseded materials.

.12 Some auditors who have confronted one too many unwieldy permanent files believe all working papers should be classified as current with certain materials designated as matters of continuing interest to

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

be carried forward each year until they become outdated. Under this approach, a firm may preprint its complete index on one type of file or binder cover and provide space to indicate whether specific contents are continuing or carryforward in nature.

.13 The permanent files should be reviewed and updated, as needed, annually. Examples of documents that may be found in permanent files are listed in AAM section 6400.15(*p*).

Practice Tip

The work-paper files should contain copies of final executed documents. Any drafts or unsigned versions of documents should be replaced with final versions.

Work-Paper Retention

.14 Determining the proper periods for retaining records is a major decision for practitioners. Records should be preserved for only as long as they serve a useful purpose or until all legal requirements are met. Record retention periods vary among firms; however, retention periods should generally correspond with the longest statute of limitations prevailing in each state for breach of contract, breach of fiduciary duty, and professional liability claims.

.15 Work-papers may be retained permanently or for periods corresponding with the longest state statute of limitations, as noted above. Generally, certain audited financial statement work-paper data, such as accounts receivable confirmations are destroyed after ten years. Examples of workpapers that should be retained permanently include auditor's reports, reports filed with the SEC, tax returns for current clients, and audit work-papers for current clients. Some firms divide the retention period into two parts, records are first filed in the office and later placed in storage (e.g., three years in the office and then permanently in storage). Other records, such as work-paper files for former clients, may be retained for three years in the office, seven years in storage and then destroyed after the retention period. No material should be destroyed without the specific approval of the engagement partner. An annual schedule should be established for reviewing and purging firm data. Since there is substantial variation in the retention periods used by firms, each firm should carefully consider its requirements and consult with legal counsel before adopting a retention period.

.16 For further guidance on record retention, see the AICPA *Management of an Accounting Practice Handbook.*

Index Topics

.17 The following is a list of topics to consider in developing a standard index for working papers. This list is detailed, but is by no means all-inclusive. For example, specialized industries such as life insurance and banking need other specialized topics. Several of the topics may be eliminated, condensed or expanded, depending on the auditor's needs and preferences. Topics that some auditors prefer to include in both the permanent and current files or only in the permanent files are followed by the letter (P).

Planning and administration

- Time & budget data
- General correspondence & memos
- Planning memos—current
- Planning notes & confirm copies for use in next engagement
- Engagement letters

- Schedules & analyses to be prepared by client
- Minutes
- Checklist of an administrative nature if required by firm policy

Audit or work program (Note 1)

Matters of continuing concern

- Client's industry—background (P)
- Description & brief history of client (P)
- Data & ratio analysis of client's operations (P)
- Client's facilities (P)
- Articles of incorporation (P)
- Bylaws (P)
- Current contracts & agreements (P)
  - — Debt agreements (P)
  - — Leases (P)
  - — Labor contracts (P)
  - — Agreements with officers & key people (P)
  - — Pension plans (P)
  - — Profit-sharing plans (P)
  - — Stock warrants (P)
  - — Stock options (P)
  - — Other agreements (P)
- Client's accounting policies & procedures (P)
- Carryforward analyses (Note 2)

Internal control

- Internal control questionnaire, narratives, flowcharts, etc. (Note 3)
- Initial assessment of control risk memos
- Tests of controls

Reports, financial statements and footnotes, trial balances, and assembly sheets

- Reports & financial statements (including letter, if any, on reportable conditions in internal control)
- Consolidating working papers
- Consolidation eliminating entries
- Trial balance

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Adjusting journal entries
- Reclassification journal entries
- Recap of possible adjusting entries
- Assembly sheets supporting footnote disclosures (if the information is not included elsewhere in the working papers)
- Disclosure checklists (if required by firm policy)
- Supporting schedules (if required for reports to regulatory bodies or other reports)
- Tax return information & work sheets (Note 4)

Assets

- Cash
- Marketable securities (and related income)
- Notes receivable (and related interest)
- Accounts receivable
  - — Summary and analyses
  - — Confirmation procedures (Notes 2 and 5)
- Allowance for doubtful accounts & notes (Note 2)
- Inventories
  - — Summary and analyses
  - — Price tests, cost & market
  - — Obsolescence review
  - — Observation, test counts & cutoff data
  - — LIFO determinations
- Prepaid expenses
- Other current assets
- Investments
- Property, plant & equipment, and accumulated depreciation, depletion & amortization (Note 2)
- Intangible assets, deferred charges & amortization (Note 2)
- Other assets
- Intercompany accounts

Liabilities

- Notes payable (and related interest)
- Accounts payable
- Accrued liabilities other than income taxes

- Accrued income taxes (current & deferred), related provisions & credits (Note 2)
  - — Federal
  - — State & local
- Other current liabilities
- Long-term debt (including current maturities and capitalized leases) (Note 2)
- Other long-term liabilities
- Deferred income (Note 2)

Commitments and contingencies

- Attorneys' letters
- Abstracts of commitments & contingencies noted during review of minutes, contracts & agreements, confirmation responses, etc.
- Subsequent events review
- Management representation letter

Equity (capital accounts) (Note 2)

- Capital stock
- Additional paid-in capital
- Treasury stock
- Retained earnings
- Partnership capital

Revenue and expenses

- Operating revenues
- Cost of sales
- Selling, general & administrative
- Other operating expenses
- Other income
- Other expense
- Extraordinary & unusual items
- Secondary schedules
  - — Maintenance & repairs
  - — Taxes other than income taxes
  - — Rents
  - — Royalties
  - — Advertising costs
  - — Legal fees
  - — Interest expense recap

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

Notes to User:

1. Alternate practices of filing audit programs include:
   (a) Putting the program in a binder that is separate and distinct from the current and permanent files.
   (b) Putting the signed off program in the current file.
   (c) Keeping a master copy of the program in the permanent file with the signed off copies dispersed among the related working paper segments in the current file.
2. Certain classifications may lend themselves to carry-forward working papers. Examples include allowances for doubtful accounts, brief summaries of confirmation response statistics, accumulated depreciation and amortization, deferred income taxes and open tax positions, long-term debt, and capital accounts.
3. Internal control questionnaires may be filed as separate binders or as part of current of permanent files.
4. Some firms and practitioners keep tax return preparation working papers in files that are completely separate from other types of engagement working papers.
5. For situations involving voluminous confirmation responses or bulk inventory listings, the bulk materials may be filed in separate binders that are cross referenced to the pertinent working papers (for example: accounts receivable, accounts payable, and inventory).

AAM Section 7100
Control of Confirmations and Correspondence

.01 Generally, clients prepare correspondence and confirmation requests on their own letterhead and submit to the auditor the signed originals and copies. The auditor may obtain one or more copies to serve as file copies for the current working papers, second requests and manuscript copies for the next engagement.

.02 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.03 The negative form requests the recipient to respond only of he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (*a*) the combined assessed level of inherent and control risk is low, (*b*) a large number of small balances is involved, and (*c*) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration.

.04 The confirmation requests should be reviewed to the extent the auditor considers necessary. For example, the auditor may perform the following for accounts receivable confirmation requests before they are mailed:

- Compare the names and addresses to the client's records.
- Compare balances per confirmation requests to the subsidiary ledger.

.05 The requests would then be stuffed in envelopes and submitted to the post office under the auditor's control.

.06 The auditor controls the mailings and receipt of responses so that the confirmation process is independent of the client.

.07 Mailing envelopes have the auditor's office or post office box number as the return address so that undeliverable letters are returned to the auditor and not to the client. For mailings, the auditor may provide the envelopes or affix a label on the client's envelope that covers the client's return address and replaces it with the auditor's address.

.08 Reply envelopes addressed to the auditor are enclosed with the request letter. Reply envelopes generally have prepaid postage to encourage responses. Some auditors also use codes on the reply envelopes so that responses may be sorted by engagement before the mail is opened. This feature may be particularly useful when there are several engagements that involve voluminous mailings.

.09 If the client objects to use of the auditor's name and address, some auditors suggest that a post office box in the client's name be used, with the returns to be opened under the auditor's control for the confirmation process, and that the post office be instructed that after the box is closed subsequent mail be forwarded to the auditor.

[*The next page is 7201.*]

AAM Section 7200

Requests for Confirmations and Related Materials

Wording of Confirmation Request Forms

.01 Forms and correspondence used for confirmation requests should state clearly that the client is requesting that a reply be sent to the CPA. Forms and correspondence used for information requests for engagements other than audits should not refer to "an audit." They should also use the term "accountant(s)" rather than "auditors." Suggested wording follows:

> Please send the following information to our certified public accountants (*name and address of accountants*) who are performing accounting services for the company.

.02 The samples of correspondence in this section include language that refers to auditors and an audit of the client's financial statements on the assumption that an audit is being performed. This language needs to be modified if services other than an audit are being performed.

.03 Request for Bank Cutoff Statement

[*Prepared on Client's Letterhead*]

[*Date*]

Financial Institution Official
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of (*name of client*) as of (*balance-sheet date*) and for the (*period*) then ended, we request that you send the following information directly to our auditors (*name and address of auditors*) as of close of business (*balance-sheet date*):

1. The information requested on the enclosed standard form(s) to confirm account balance information with your financial institution.
2. For the account numbers listed below, statement(s) of our account(s) and the related paid checks for the period from (*balance-sheet date*) to (*two weeks subsequent to the balance-sheet date*) inclusive.

Account Number	*Account Name*
_____	_____
_____	_____
_____	_____
_____	_____

Sincerely,

[*Name of Customer*]

_____

By: _____

_____

Notes: (A) This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

(B) The request should be sent at least ten days prior to the audit date so the bank will be able to provide the information requested and to render the cutoff statements as requested. If the request does not reach the bank before the cutoff date, the cutoff statement will include transactions after that date.

(C) The letter may also include requests for:

- Confirmation of all securities or other items held for the clients account as of the closing date for collection or safekeeping, or as agent or trustee (a listing should be provided including titles and account numbers).
- Confirmation of the list of authorized signers for the above accounts. (This may have been previously requested at a preliminary date in connection with assessment of control risk.)

STANDARD FORM TO CONFIRM ACCOUNT BALANCE INFORMATION WITH FINANCIAL INSTITUTIONS

_____
CUSTOMER NAME

Financial Institution's Name and Address [ ] [ ]

We have provided to our accountants the following information as of the close of business on _____, 19____, regarding our deposit and loan balances. Please confirm the accuracy of the information, noting any exceptions to the information provided. If the balances have been left blank, please complete this form by furnishing the balance in the appropriate space below.* Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other deposit and loan accounts we may have with you comes to your attention, please include such information below. Please use the enclosed envelope to return the form directly to our accountants.

1. At the close of business on the date listed above, our records indicated the following deposit balance(s):

ACCOUNT NAME	ACCOUNT NO.	INTEREST RATE	BALANCE*

2. We were directly liable to the financial institution for loans at the close of business on the date listed above as follows:

ACCOUNT NO./ DESCRIPTION	BALANCE*	DATE DUE	INTEREST RATE	DATE THROUGH WHICH INTEREST IS PAID	DESCRIPTION OF COLLATERAL

_____ _____
(Customer's Authorized Signature) (Date)

The information presented above by the customer is in agreement with our records. Although we have not conducted a comprehensive, detailed search of our records, no other deposit or loan accounts have come to our attention except as noted below.

_____
(Financial Institution Authorized Signature) (Date)

_____
(Title)

EXCEPTIONS AND/OR COMMENTS

Please return this form directly to our accountants:

[ ]

[ ]

* Ordinarily, balances are intentionally left blank if they are not available at the time the form is prepared.

Approved 1990 by American Bankers Association, American Institute of Certified Public Accountants, and Bank Administration Institute. Additional forms available from: AICPA—Order Department, P.O. Box 1003, NY, NY 10108-1003 D 451 5951

.05 Request for Confirmation of Petty Cash Fund and Advances to Employees

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors, (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of the petty cash fund (or amount of advances) in your possession as of December 31, 19XX which was shown by our records as $_____.

Please indicate in the space provided below whether the amount above agrees with your records. If not, please send the auditors any information you have that will help them reconcile the difference.

After signing and dating your reply, please return it directly to the auditors. A stamped, addressed enveloped is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

The foregoing information is in agreement with my records as of December 31, 19XX with the following exceptions (if any):

_____

_____

_____

Date: _____ Signed: _____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.06 Securities and Cash in Custodian or Trust Accounts

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Custodian or Trustee*]
[*Address*]

Our auditors, (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the enclosed list of securities owned at (*date*) and the amount of principal and income of cash held by you at that date for each of the following accounts [Notes (B) & (C)]:

(If a list is not obtained from the client, the auditor should complete the following for each account:

	Name of Account	Account No. [Note (A)]	Amount Held
1.	_____	_____	_____
2.	_____	_____	_____
3.	_____	_____	_____)

Please also indicate to the auditors whether to your knowledge any of the securities are pledged or otherwise encumbered.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Notes: (A) Use the custodian or trustee's account number.

(B) This letter may be expanded, if necessary, to request cutoff statements of activity (principal and interest) in the accounts.

(C) Sometimes this request is combined with a request for cutoff bank statements and the standard form to confirm account balance information with financial institutions. However, it may be more practical to send separate letters because a bank's commercial banking and trust departments are usually separate operations.

.07 Securities Held by Brokers

[*Prepared on Client's Letterhead*]

[*Date*]

[*Broker's Name*]
[*Address*]

In connection with the audit of our financial statements, please send directly to our auditors (*name and address of auditors*), a statement of our account(s) with you as of (*date*), indicating the following information:

1. Securities held by you for our account.
2. Securities out for transfer to our name.
3. Any amounts payable to or due from us.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Notes: (A) The request should be sent so it reaches the broker sufficiently in advance of the listing date for the broker to respond in a practical manner.

(B) It may be helpful to include the account number(s) used by the broker for the client's account(s).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.08 Sample Receipts for Return of Cash or Securities Counted by Auditor's Representative, and Cutoff Bank Statements Received Directly by the Auditors

Cash Count

The above detailed items were counted in my presence and returned to me intact by (*individual's name*), representative of (*auditor's firm name*).

(*Date and Time*) Custodian: _____
(*Custodian's Signature*)

Securities Count

Received intact from (*individual's name*), representative of (*auditor's firm name*), the securities listed above contained in Box _____ of the (*name of bank or custodian*) which were counted by him or her in my presence (or presented to him or her for count).

Date and Time: _____ Signed: _____

Title: _____

Cutoff Bank Statement(s)

Received intact from (*individual's name*), representative of (*auditor's firm name*), the cutoff bank statements and related paid checks for the period from _____ to _____ (*periods indicated*) for the accounts listed below:

Date and Time: _____ Signed: _____

Title: _____

Notes: (A) Receipt(s) should be written and signed in *ink*.

(B) For counts of petty cash funds, the receipt may be written directly on the bottom of the petty cash-count working paper. For security counts and returns of cutoff bank statements, the receipt may be prepared as a separate working paper.

.09 Accounts Receivable—Positive

[*Prepared on Client's Letterhead*]

[*Customer Name*]
[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors (*name and address of auditors*) the amount of your indebtedness to us which according to our records as of (*date*) amounted to $_____.

If the amount shown is in agreement with your records. Please check "A" below.

If the amount is not in agreement with your records, please check and complete "B" below.

After checking the appropriate response, please sign and date your reply and mail it directly to our auditors in the enclosed envelope. DO NOT SEND ANY PAYMENTS to our auditors.

Very truly yours,

[*Client's Authorized Signature*]

A _____ The balance above agrees with my records.

B _____ My records show a balance of $_____.

The difference may be due to the following:

_____

_____

_____

_____
[*Signed by*]

_____
[*Date*]

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.10 Accounts Receivable—Negative

[*May be a sticker or stamp used on client's statements to customers*]

PLEASE CHECK THIS STATEMENT

If this statement is *not correct* please write promptly (using the enclosed envelope), giving details of any differences, directly to our auditors,

[*Name of auditors*]

_____

[*Address of auditors*]

_____

who are now conducting an audit of our financial statements.

If you do not write to our auditors, they will consider this statement to be correct.

Remittances should NOT be sent to the auditors.

Notes: (A) A negative confirmation may also be requested in letter form using similar wording.

(B) The auditor should consider sending confirmation requests at the time of the client's regular monthly billings. Coordination of confirmation procedures with the client's routine preparation and mailing of statements may offer efficiency to both the auditor and client.

(C) Negative confirmation requests may be used as substantive procedure to reduce audit risk *only* when three conditions exist: (1) the combined assessed level of inherent and control risk is low, (2) a large number of small balances is involved, and (3) the auditor has no reason to believe that the recipients of the request are unlikely to give them consideration.

.11 Notes Receivable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors (*name and address of auditors*) are performing an audit of our financial statements. Accordingly, please confirm directly to our auditors the amount of your indebtedness due us as of (*date*), which our records show as follows:

Type of indebtedness _____
Initial date of indebtedness _____
Original amount of indebtedness _____
Unpaid principal _____
Interest rate _____
Interest paid to _____
Periodic payments required _____
Description of collateral _____

If the above information is in agreement with your records, please so indicate by signing in the place provided below and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please so note in the space provided the particulars shown in your records and any information which may help reconcile the difference from our records. **Payments should not be sent to the auditors.**

Very truly yours,

[*Client's Authorized Signature*]

The above information is correct as of (*date*) with the following exceptions (if any): _____

_____

_____

_____

_____

_____

_____

Date: _____ Signed: _____

.12 Inventories Held by Warehouses or Others When Listing Is Not Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please send directly to our auditors the following information about merchandise held in your custody for our account at (*date*):

1. Quantities on hand; for each lot please indicate the following:
   a. Lot number (list each lot separately)
   b. Date received
   c. Kind of merchandise
   d. Unit of measure or package
      (1) Number of units
      (2) Kind of units (box, can, crate, quart, pound, dozen, etc.)
2. A statement about how you determined the above requested quantities; specify whether they were determined by physical count, weight or measure, or if they represent your book record.
3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.
4. Statement of any known liens against this merchandise.
5. Amount of unpaid charges, if any, as of (*date*).

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

.13 Inventories Held by Warehouses or Others When Listing Is Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about the merchandise held by you for our account as of (*date*):

1. The correctness of the quantities shown on the enclosed listing of such merchandise prepared from our records (a second copy is enclosed for your files). If the enclosed listing differs from the quantities you held for us as of (*date*), please include details of the specific differences in your response to our auditors.

2. Your statement on how you determined the correctness of the quantities you are confirming; please specify whether determined by physical count, weight or measure, or whether the quantities are from your records.

3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.

4. Statement of any known liens against these goods.

5. Amount of any unpaid charges as of (*date*).

Please mail your reply directly to (*name and address of auditors*). A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

.15 Pension Plan Actuarial Information

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Actuary*]
[*Address*]

In connection with the audit of our financial statements for the period ending (*balance-sheet date*) by our independent auditors (*name and address of auditors*), please furnish them the information described below as it pertains to the XYZ Pension Plan, which is a defined benefit plan. For your convenience in response to those requests, you may supply pertinent sections, properly signed and dated, of your actuarial report, or pension expense report, if they are available and if they contain the requested information.

A. Please provide a brief description of the following:

1. The employee group covered.
2. The benefit provisions of the plan used in the calculation of the net periodic pension cost for the period and of the accumulated benefit obligation and the projected benefit obligation at the end of the period. Please identify any such benefit provisions that had not taken effect in the year. Please also provide the date of the most recent plan amendment included in your calculation. Please identify any participants or benefits excluded from the calculations, such as benefits guaranteed under an insurance or annuity contract.
3. The plan sponsor's funding policy for the plan.
4. Any significant liabilities other than for benefits, such as for legal or accounting fees.
5. The method and the amortization period, if any, used for the following:
   a. Calculation of a market-related value of plan assets, if different from the fair value.
   b. Amortization of any transition asset or obligation.
   c. Amortization of unrecognized prior service cost.
   d. Amortization of unrecognized net gain or loss.
6. Any substantive commitments for benefits that exceed the benefits defined by the written plan that are included in the calculations.
7. Determination of the value of any insurance or annuity contracts included in the assets.
8. Nature and effect of significant plan amendments and other significant matters affecting comparability of net periodic pension cost, funded status, and other information for the current period with that for the prior period.
9. The following information relating to the employee census data used in calculating the benefit obligations and pension cost:
   a. The source and nature of the data is _____ and the date as of which the census data was collected is _____.
   b. The following information concerning participants:

Participants	Number of Persons	Compensation (if applicable)
Currently receiving payments		
Active with vested benefits		
Terminated with deferred vested benefits		
Active without vested benefits		
Other (describe)		

Note: If information is not available for all the above categories, please indicate the categories that have been grouped and describe any group or groups of participants excluded from the above information.

c. Information for the following individuals contained in the census:

Participant's Name or Number	Age or Birth Date	Sex	Salary	Date Hired or Years of Service

Note to Auditor: The auditor should select information from employer records to compare with the census data used by the actuary. In addition, the auditor may wish to have the actuary select certain census data from his/her files to compare with the employer's records.

B. Please provide the following information on the net periodic pension cost for the period ending on _____:

1. Service cost $_____
2. Interest cost
3. Actual return on assets
4. Other components
   a. Net asset gain or (loss) during the period deferred for later recognition
   b. Amortization of net loss or (gain) from earlier periods
   c. Amortization of unrecognized prior service cost
   d. Amortization of the remaining unrecognized net obligation or (asset) existing at the date of the initial application of FASB Statement No. 87—transition obligation or (asset)
   e. Net total of components ($a + b + c + d$) $_____
5. Net periodic pension cost: ($1 + 2 - 3 + 4e$) $_____
6. The above measurement of the net periodic pension cost is based on the following assumptions:

   Weighted-average discount rate _____%
   Weighted-average rate of compensation increase _____%
   Weighted-average expected long-term rate of return on plan assets _____%

   Please describe the basis on which the above rates were selected and whether the basis is consistent with the prior period.

   Please briefly describe the other assumptions used in the above measurement.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

7. The calculations of the items shown in B1 and B5 are based on the following:
   Asset information at _____
   Census data _____
   Measurement date (must not be more than three months before the end of the last fiscal year) _____

   Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in B1 to B5.

C. Please provide the following information on the benefit obligations for disclosure in the financial statements for the period ending _____:

		Estimated
1.	Pension Benefit Obligation	
	a. Accumulated benefit obligation	
	— vested	
	— nonvested	
	— total	_____
	b. Additional benefits based on estimated future salary levels	$ _____
	c. Projected benefit obligation (a + *b*)	_____
2.	Fair Value of Plan Assets	
3.	Unfunded Projected Benefit Obligation: (1*c* – 2)	
4.	Unrecognized Prior Service Cost	
5.	Unrecognized Net Loss or (Gain)	
6.	Unrecognized Net Transition Liability or (Asset)	
7.	Additional Liability	_____
8.	Accrued or (prepaid) pension cost in the company financial statements (3 – 4 – 5 – 6 + 7)	$ _____

9. The above amount of the projected benefit obligation is measure based on the following assumptions:
   Weighted-average discount rate _____ %
   Weighted-average rate of compensation increase _____ %
   Please provide a brief description of the other assumptions used in the measurement.
10. The calculation of the items shown in C1 to C8 is based on the following:
    Asset information at _____
    Census data at _____
    Measurement date (must be not more than three months before the current fiscal year end) _____

    Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in C1 to C8.
11. Please describe any significant events noted subsequent to the current year's measurement date and as of the date of your reply to this request and the effects of those events, such as a large plant closing, which could materially affect the amounts shown in C1 to C8.

D. Please provide an analysis for the period showing beginning amounts, additions, reductions, and ending amounts of the:
   1. Projected benefit obligation,
   2. Unrecognized prior service cost,
   3. Unrecognized net loss (gain), and
   4. Net transition obligation (asset).

E. Please provide our independent auditors with descriptions and the amounts of gains or losses from set-tlements, curtailments or termination benefits during the year, such as:

1. Purchases of annuity contracts,
2. Lump-sum cash payments to plan participants,
3. Other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation, and eliminates significant risks related to the obligation and assets,
4. Any events that significantly reduced the expected years of future service of employees,
5. Any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service, or
6. Any special or contractual termination benefits offered to employees.

F. Was all of the information above determined in accordance with FASB Statements No. 87 and No. 88 (including the FASB's Guides to Implementation of Statements 87 and 88 and the American Academy of Actuaries', "An Actuary's Guide to Compliance with Statement of Financial Accounting Standards No. 87") to the best of your knowledge? If not, please describe any differences.

G. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.

Very truly yours,

_____

.16 Pension Plan Assets Held by Trustee

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Trustee or Custodian*]
[*Address*]

Our auditors (*name and address of auditor*) are conducting an audit of our financial statements. Accordingly, please provide our auditors directly with a listing of the assets including market values as of (*date*) for our employees' pension trust (*title and trustee's account number*).

Please also provide the auditors with the following information about our employees' pension trust for the period from (*beginning of period*) to (*end of period*) [see note below]:

1. Contributions by the Company during the above period.
2. Contributions by employees during the above period.
3. Payments to beneficiaries during the above period.
4. Any unpaid fees due for services rendered to (*balance-sheet date*).

Please send your reply directly to our auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Note: A listing of the assets might not be requested if one had already been received by the client. In that case, the auditor might want the trustee to confirm the total market value per the listing.

.17 Actuary of a PERS for Disclosure in Financial Reports Incorporating the PERS' Financial Statements and/or Actuary of a Single-Employer PERS or an Agent Multiple-Employer PERS for Disclosure in the Financial Reports of a Contributing Governmental Employer or Nonemployer Contributor That Does Not Include the PERS in Its Reporting Entity*

[*Prepared on PERS or Contributing Governmental Employer or Nonemployer Contributor Letterhead*]

[*Date*]

[*Name of Actuary of PERS*]
[*Address*]

Dear _____:

In connection with the audit of our financial statements for the period ending (*fiscal year end*) by our independent auditors, (*name and address of independent auditors*), please furnish directly to them the information described below as it relates to the (*name of PERS*) and participation therein of employees of the (*name of governmental employer*). Also, please provide a copy of the most recent actuarial valuation report.

For your convenience in response to these requests, you may supply pertinent sections, properly signed and dated, of your actuarial report, or pension expense report, if they are available and if they contain the requested information.

If any figures presented herein are estimates, please so indicate and briefly describe the estimation technique used.

A. Please provide a brief description of the following:

1. Types of employees covered and current membership with separate identification of the number of (*a*) retirees and beneficiaries currently receiving benefits, and terminated employees entitled to benefits but not yet receiving them and (*b*) full vested, partially vested, and nonvested active employees covered by the plan.
2. If agent or cost-sharing multiple-employer PERS, (*name of governmental employer*) current-year covered payroll.

B. Please provide, for each of the following participants, the indicated information relating to the employee census data used in performing the actuarial valuation(s) described in C1 and E2. Also, please identify the source, nature, and date as of which the census data was collected.

Participant's Name or Number	Age or Birth Date	Sex	Salary	Date Hired or Years of Service

(*Note to auditor*—Select sample participants from records and list them here.)

C. Please indicate, with respect to the actuarial present value of credited projected benefits (hereinafter referred to as the APV of CPB or "pension benefit obligation")

1. Date of the most recent actuarial valuation in which the APV of CPB was calculated and the date of any subsequent actuarial update.
2. Significant actuarial assumptions used to compute the APV of CPB, including rate of return on investment of present and future assets, projected salary increases due to (*a*) inflation and (*b*) merit or seniority, and postretirement benefit increases.

---

* Disclosures are required pursuant to GASB *Codification of Governmental Accounting and Financial Reporting Standards*, paragraphs Pe6.130–.132, P20.123–.127, and .131, as of June 15, 1987.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

3. Amount of the entire APV of CPB, for the entire PERS, in total and segregated as follows:
   a. Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them.
   b. Current employees:
      (1) Accumulated employee contributions including allocated investment income, if any.
      (2) Employer-financed vested.
      (3) Employer-financed nonvested.
4. If agent multiple-employer PERS, amount of the APV of CPB applicable to (*name of governmental employer*) participants, in total and segregated as follows:
   a. Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them. (If the pension benefit obligation applicable to retirees and beneficiaries currently receiving benefits, and related net assets available for benefits, are transferred to the PERS as a whole, please state that fact and provide here only the APV of CPB applicable to terminated employees entitled to benefits but not yet receiving them, and related net assets available for benefits.)
   b. Current employees:
      (1) Accumulated employee contributions including allocated investment income, if any.
      (2) Employer-financed vested.
      (3) Employer-financed nonvested.
5. Net assets available for benefits as of the same date as the pension benefit obligation determined in accordance with the method used to value assets for balance-sheet purposes; also identify the method used to value assets.
6. Explanation, including separate dollar effects on the APV of CPB described in C3 and C4, of any current-year changes in (*a*) actuarial assumptions or (*b*) benefit provisions.

D. Please indicate, with respect to plan assets:

1. Market value of the entire net assets available for benefits, for the entire PERS, on the same date as the APV of CPB.
2. Amortized cost value of the entire net assets available for benefits, for the entire PERS, on the same date as the APV of CPB, with disclosure of the method used to account for exchanges of "swaps" of securities.**
3. If agent or cost-sharing multiple-employer PERS that is included in the employer's reporting entity, market value of net assets available for benefits applicable to (*name of governmental employer*) participants on the same date as the APV of CPB. (Do not include net assets available for benefits applicable to retirees and beneficiaries currently receiving benefits, if pension benefit obligation applicable to them is transferred to the PERS as a whole.)
4. If agent or cost-sharing multiple-employer PERS that is included in the employer's reporting entity, amortized cost value of net assets available for benefits applicable to (*name of governmental employer*) participants on the same date as the APV of CPB, with disclosures of the method used to account

** Information on amortized cost values and the method used to account for exchanges or "swaps" of securities need be obtained only if the plan is accounted for in accordance with the requirements of National Council on Governmental Accounting Statements Nos. 1, *Governmental Accounting and Financial Reporting Principles*, or 6, *Pension Accounting and Financial Reporting: Public Employee Retirement Systems, and State and Local Government Employers*, as permitted by GASB Statement No. 5, *Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers*, paragraph 4.

for exchanges or "swaps" of securities.*** (Do not include net assets available for benefits applicable to retirees and beneficiaries currently receiving benefits, if the pension benefit obligation applicable to them is transferred to the PERS as a whole.)

E. Please indicate, with respect to contributions required and contributions made:

1. A brief description of funding policy, including the role of actuarially determined contribution requirements in carrying out that policy.

2. Date of the most recent actuarial valuation performed to compute actuarially determined contribution requirements.

3. Actuarial funding method used to compute actuarially determined contribution requirements and the period and method for amortization of any unfunded actuarial accrued liability.

4. That significant actuarial assumptions used to compute actuarially determined contribution requirements are the same as those used to compute the APV or CPB, or explain the differences.

5. Total actuarially determined contribution requirement for the entire PERS, and the amounts intended to (*a*) cover normal cost and (*b*) amortize any unfunded actuarial accrued liability, expressed in dollar amounts and as percentages of current-year covered payroll.

6. Total contributions actually made for the entire PERS by (*a*) contributing governmental employers or nonemployer contributors and (*b*) employees, expressed in dollar amounts and as percentages of current-year covered payroll.

7. If agent or cost-sharing multiple-employer PERS that is included in employer's reporting entity, actuarially determined contribution requirements applicable to (*name of governmental employer*) participants and the amounts intended to (*a*) cover normal cost and (*b*) amortize any unfunded actuarial accrued liability, expressed both in dollar amounts and as percentages of current-year covered payroll.

8. If agent or cost-sharing multiple-employer PERS that is included in employer's reporting entity, contributions actually made, applicable to (*name of governmental employer*) participants, by (*name of contributing governmental employer or nonemployer contributor*) and by (*name of governmental employer*) employees, expressed both in dollar amounts and as percentages of current-year covered payroll.

9. Explanations, including the separate dollar effects on the actuarially determined contribution requirements described in E5, E6, E7, and E8 of any current-year changes in (*a*) actuarial assumptions, (*b*) benefit provisions, (*c*) actuarial funding method, or (*d*) other significant factors.

F. Please describe any significant events noted, subsequent to the dates described in C1 and E2 and as of the date of your response to this request, that could materially affect (the auditor should indicate the amount considered material) the information described in A to E. Also describe the effects of those events.

G. Please indicate that the information you provide has been determined in accordance with the provisions of GASB Statement No. 5, or explain any exceptions.

H. Please describe the nature of any relationship you have with the (*name of PERS*) or (*name of contributing governmental employer or nonemployer contributor*) that may impair, or appear to impair, the independence and objectivity of your work.

*** Information on amortized cost values and the method used to account for exchanges or "swaps" of securities need be obtained only if the plan is accounted for in accordance with the requirements of National Council on Governmental Accounting Statements Nos. 1, *Governmental Accounting and Financial Reporting Principles*, or 6, *Pension Accounting and Financial Reporting: Public Employee Retirement Systems, and State and Local Government Employers*, as permitted by GASB Statement No. 5, *Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers*, paragraph 4.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

I. Please advise if notification has been received of a decision to partially or fully terminate the plan and explain the effect of the decision.

J. Please provide any additional information you consider necessary.

Very truly yours,

[*Name of Contributing Governmental Employer or Nonemployer Contributor*]

By [*Name and Title of Requesting Official of Contributing Governmental Employer or Nonemployer Contributor*]

.18 Actuary of a Cost-Sharing Multiple-Employer PERS, for Disclosure in Financial Reports of a Contributing Governmental Employer or Nonemployer Contributor That Does Not Include the Cost-Sharing Multiple-Employer PERS in Its Reporting Entity*

[*Prepared on Contributing Governmental Employer or Nonemployer Contributor Letterhead*]

[*Date*]

[*Name of Actuary of PERS*]
[*Address*]

In connection with the audit of our financial statements for the period ending (*fiscal year end*) by our independent auditors, (*name and address of independent auditors*), please furnish directly to them the information described below as it relates to the participation of employees of the (*name of governmental employer*) in the (*name of PERS*). Also, please provide a copy of the most recent actuarial valuation report.

For your convenience in response to these requests, you may supply pertinent sections, properly signed and dated, of your actuarial report, or pension expense report, if they are available and if they contain the requested information.

If any figures presented herein are estimates, please so indicate and briefly describe the estimation technique used.

Please provide the following:

A. (*Name of governmental employer*) current-year covered payroll.

B. For each of the following participants, the indicated information relating to the employee census data used in performing the actuarial valuation(s) in which the amounts described in C and G were computed.

Participant's Name or Number	Age or Birth Date	Sex	Salary	Date Hired or Years of Service

(*Note to auditor*—Select sample participants from records and list them here.)

C. Actuarially determined contribution requirement applicable to (*name of governmental employer*) participants, expressed both in a dollar amount and as a percentage of current-year covered payroll. Also, describe any current-year changes in actuarial assumptions, benefit provisions, actuarial funding method, or other significant factors, and the aggregate effect on the actuarially determined contribution requirement applicable to (*name of governmental employer*) participants, expressed as a percentage of current-year covered payroll.

D. The total PERS actuarial present value of credited projected benefits (APV of CPB).

E. Market value of the total PERS net assets available for benefits (as of the same date as the APV of CPB).

F. Amortized cost value of the total PERS net assets available for benefits (as of the same date as the APV of CPB).**

---

* Disclosures are required pursuant to GASB *Codification of Governmental Accounting and Financial Reporting Standards*, paragraph P20.127, as of June 15, 1987.

** Information on amortized cost values need be obtained only if the plan is accounted for in accordance with the requirements of National Council on Governmental Accounting Statements Nos. 1, *Governmental Accounting and Financial Reporting Principles*, or 6, *Pension Accounting and Financial Reporting: Public Employee Retirement Systems, and State and Local Government Employers*, as permitted by GASB Statement No. 5, *Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers*, paragraph 4.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

G. The actuarially determined contribution requirement applicable to (*name of governmental employer*) participants, expressed as a percentage of the total current-year actuarially determined contribution requirement for the PERS as a whole.

H. Please indicate that the information you provide has been determined in accordance with the provisions of GASB Statement No. 5, or explain any exceptions.

I. Please describe the nature of any relationship you have with the (*name of PERS*) or (*name of contributing governmental employer or nonemployer contributor*) that may impair, or appear to impair, the independence and objectivity of your work.

J. Please provide information relating to subsequent events that could affect the information provided herein.

K. Please advise if notification has been received of a decision to partially or fully terminate the plan and explain the effect of the decision.

L. Please provide any additional information you consider necessary.

Very truly yours,

[*Name of Contributing Governmental Employer or Nonemployer Contributor*]

By [*Name and Title of Requesting Official of Contributing Governmental Employer or Nonemployer Contributor*]

.19 Notes Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements.

Accordingly, please confirm directly to them the following information relating to our note(s) payable to you, as of (*date*):

Date of note	_____
Original amount	$_____
Unpaid principal	
Balance	$_____
Periodic payments required	$_____
Payment periods	_____
Maturity date	_____
Interest rate	_____ %
Date to which interest has been paid	_____
Amount and description of collateral	_____
Description of terms, e.g., demand provisions, prepayment penalties, etc.	_____
Any other direct or contingent liabilities to you ("None" or description)	_____

If the above information is in agreement with your records at that date, please so indicate by signing in the place provided below and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please note in the space provided the particulars shown in your records and any information which may help reconcile the difference from our records.

Very truly yours,

[*Client's Authorized Signature*]

The above information is correct as of (*date*) with the following exceptions (*if any*): _____

_____

Date: _____ Signature: _____

Title: _____

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.20 Mortgage Debt

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Creditor or Trustee*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about our mortgage indebtedness to you as of (*date*):

1. Original amount $_____
2. Date of note _____
3. Unpaid principal balance $_____
4. Interest rate _____ %
5. Terms for payment of principal _____
6. Date to which interest has been paid _____
7. Nature of mortgage and description or address of property mortgaged _____
8. Amounts on deposit with you in escrow for:
   a. Insurance $_____
   b. Real estate taxes $_____
9. Amounts paid during the period (*dates from and to*) for:
   a. Insurance $_____
   b. Taxes $_____
10. Amounts on deposit with you for the "reserve for repairs" $_____
11. The nature of defaults, if any _____
12. Description of terms, e.g., prepayment penalties, demand provisions, etc. _____

A return envelope is enclosed for your reply.

Very truly yours,

[*Client's Authorized Signature*]

Note: Many of the items requested will vary with the circumstance of the particular mortgage or other debt involved. The above sample assumes the indenture involves an escrow arrangement for insurance and real estate taxes and a deposit account for repairs.

.21 Accounts Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]
[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors (*name and address of auditors*), the amount of our liability to you as of (*date*). Please attach a statement of our account due. If no balance is due, please attach a statement of our account showing payments made.

Please mail your reply directly to (*name of auditors*). A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

Our records indicate that a balance of $_____ was from (*name of client*) at (*date*).

Date: _____ Signature: _____

Title: _____

.22 Obligation to Lessor

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessor*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements as of (*balance-sheet date*) and for the (*time period*) then ended. In connection with this audit, please provide directly to our auditors the following information as of (*balance-sheet date*) regarding the lease dated (*date lease was executed*) of (*brief identification of property under lease*) which we are leasing from you:

1. Inception and expiration dates for the lease period, from _____ to _____
2. Amount of monthly rent _____
3. Renewal options (if any):
   a. Dates of renewal period, from _____ to _____
   b. Amount of monthly rent for renewal _____
4. Purchase options (if any):
   a. Amount of purchase price _____
   b. Inception and expiration dates of option, from _____ to _____
   c. Percent of monthly rent (if any) applicable towards purchase price _____
5. Dates and descriptions of amendments or supplementary understandings, if any, to the lease mentioned above.
6. The amount of outstanding delinquent payments, if any.
7. A statement that there are no defaults, or the nature of defaults, if any.

A return envelope is enclosed for your reply.

Very truly yours,

[*Client's Authorized Signature*]

Note: The content of this type of letter will vary based on the auditor's professional judgment in the circumstances. To provide additional illustrative language, the above letter is not made parallel with the illustration at AAM section 7200.23.

.23 Property Out on Lease

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessee*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements as of (*balance-sheet date*) and for the (*time period*) then ended. In connection with this audit, please confirm directly to our auditors the following information regarding the lease dated (*execution date of lease*) of (*brief identification of property under lease*) which you are leasing from us:

1. Inception and expiration dates of lease period from _____ to _____
2. Amount of monthly rent _____
3. Total rent payments made _____
4. Date of last payment _____

A return envelope is enclosed for your reply.

[*Client's Authorized Signature*]

Notes: (A) If the leased property is of a mobile or portable nature such as a bulldozer or television camera, the confirmation may also include a request for specific serial numbers of significant equipment.

(B) In certain circumstances, the auditor may wish to consider confirming additional information such as renewal options, purchase options, and amendments or supplementary understandings.

.24 Register—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Registrar*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of the close of business (*balance-sheet date*) about each class of our preferred and common stock:

1. Authorized number of shares _____
2. Issued number of shares _____
3. Outstanding number of shares _____

Please also indicate the amount of any unpaid registrar fees due you as of (*balance-sheet date*).

A return envelope is enclosed for your convenience.

Very truly yours,

[*Client's Authorized Signature*]

The above information agrees with our records at (*balance-sheet date*) with the following exceptions:_____

_____

_____

_____

_____

Signed: _____ Date: _____

[*Name and Title*]

_____

Notes: (A) It may be helpful to include the registrar's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) The above illustration assumes the client has a separate transfer agent (see AAM section 7200.25).

.25 Transfer Agent—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Transfer Agent*]
[*Address*]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of (*balance-sheet date*) about each class of our preferred and common stock:

1. Authorized number of shares _____
2. Number of shares issued and outstanding _____
3. Number of outstanding shares registered in the name of our Company _____

Please also indicate the amount of any unpaid transfer agent fees due you as of (*balance-sheet date*).

A return envelope is enclosed for your convenience.

Very truly yours,

[*Authorized Signature for Client*]

The above information agrees with our records at (*balance-sheet date*) with the following exceptions: _____

_____

_____

_____

_____

Signed: _____ Date: _____

[*Name and Title*]

_____

Notes: (A) It may be helpful to include the transfer agent's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) Depending on the auditor's judgment in the circumstances the confirmation request may also include inquiries about such matters as (i) the number of shares issued to each of specifically mentioned officers and directors, (ii) specified information about shareholders owning more than a stated percent of the total outstanding shares, and (iii) amounts deposited during the year for the payment of dividends.

.26 Request for Confirmation of Money Market Fund

[Prepared on Client's Letterhead]

[Date]

[Name]
[Address]

Our auditors, (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of our money market fund account(s) as of (*date*).

Please indicate in the space provided below the account number(s) and balance(s) of our account(s) per your records.

Please sign and date your reply and return it directly to the auditors. A stamped, self-addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

.27 Confirmation of Contingent Liabilities

[*Date*]

Financial Institution Official*
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of (*name of customer*) as of (*balance-sheet date*) and for the (*period*) then ended, we have advised our independent auditors of the information listed below, which we believe is a complete and accurate description of our contingent liabilities, including oral and written guarantees, with your financial institution. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other contingent liabilities, including oral and written guarantees, from your financial institution comes to your attention, please include such information below.

Name of Maker	Date of Note	Due Date	Current Balance

Interest Rate	Date Through Which Interest is Paid	Description of Collateral	Description of Purpose of Note

Information related to oral and written guarantees is as follows:

_____

_____

_____

_____

Please confirm whether the information about contingent liabilities presented above is correct by signing below and returning this directly to our independent auditors (*name and address of CPA firm*).

Sincerely,
[*Name of Customer*]

_____

By: _____
[*Authorized Signature*]

* This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements. Some official institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

_____

_____
[*Name of Financial Institution*]

By: _____ _____
[*Officer*] [*Date*]

_____
[*Title*]

* If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.28 Confirmation of Compensating Balances

[*Date*]

Financial Institution Official*
First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of (*name of customer*) as of (*balance-sheet date*) and for the (*period*) then ended, we have advised our independent auditors that as of the close of business on (*balance-sheet date*) there (were) (were not) compensating balance arrangements as described in our agreement dated (*date*). Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other compensating balance arrangements between (*name of customer*) and your financial institution comes to your attention, please include such information below. Withdrawal by (*name of customer*) of the compensating balance (was) (was not) legally restricted at (*date*). The terms of the compensating arrangements at (*date*) were:

EXAMPLES:

1. The Company has been expected to maintain an average compensating balance of 20 percent of its average loan understanding, as determined from the financial institution's ledger records adjusted for estimated average uncollected funds.

2. The Company has been expected to maintain an average compensating balance of $100,000 during the year, as determined from the financial institution's ledger records without adjustment for uncollected funds.

3. The Company has been expected to maintain a compensating balance, as determined from the financial institution's ledger records without adjustment for uncollected funds, of 15 percent of its outstanding loans plus 10 percent of its unused line of credit.

4. The Company has been expected to maintain as a compensating balance noninterest bearing time deposits of 10 percent of its outstanding loans.

In determining compliance with compensating balance arrangements, the Company uses a factor for uncollected funds of ____ (business) (calendar) days.[1]

There (were the following) (were no) changes in the compensating balance arrangements during the (*period*) and subsequently through the date of this letter.

The Company (was) (was not) in compliance with the compensating balance arrangements during the (*period*) and subsequently through the date of this letter.

There (were the following) (were no) sanctions (applied or imminent) by the financial institution because of noncompliance with compensating balance arrangements.[2]

---

* This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the compensating balance arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

[1] Not applicable if compensating balances are based on the financial institution's ledger records without adjustment for uncollected funds. If some other method is used for determining collected funds for compensating balance purposes, the method used should be described.

[2] Applicable only if the financial institution has applied sanctions during the (*period*) or notified the Company that sanctions may be applied. Indicate details.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

During the (*period*), and subsequently through the date of this letter, (no) (the following) compensating balances were maintained by the Company at the financial institution on behalf of an affiliate, director, officer, or any other third party and (no) (the following) third party maintained compensating balances at the bank on behalf of the Company. (Withdrawal of such compensating balances (was) (was not) legally restricted.)

Please confirm whether the information about compensating balances presented above is correct by signing below, and returning this letter directly to our independent auditors (*name and address of CPA Firm*).

Sincerely,

[*Name of Customer*]

_____

.29 Confirmation of Lines of Credit

[*Date*]

Financial Institution Official*
First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of (*name of client*) as of (*balance-sheet date*) and for the (*period*) then ended, we have advised our independent auditors of the information listed below, which we believe is a complete and accurate description of our line of credit from your financial institution as of the close of business on (*balance-sheet date*). Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other lines of credit from your financial institution comes to your attention, please include such information below.

The Company has available at the financial institution a line of credit totaling $(*amount*). The current terms of the line of credit are contained in the letter dated (*date*). The related debt outstanding at the close of business on (*date*) was $(*amount*).

The amount of unused line of credit, subject to the terms of the related letter, at (*date*) was $(*amount*).

Interest rate at the close of business on (*date*) was _____ %.

Compensating balance arrangements are_____

_____

_____

_____

This line of credit supports commercial paper (or other borrowing arrangements) as described below:

.30 Related-Party Confirmation

[*Date*]

[*Name*]
[*Address*]

In connection with an audit of our financial statements, please furnish answers to the attached questionnaire, sign your name, and return the questionnaire in the enclosed envelope directly to our auditors (*name and address of auditors*). The questionnaire is designed to provide the auditors with information about the interests of officers, directors, and other related parties in transactions with our Company.

Please answer all questions. If the answer to any question is "yes," please explain. Certain terms used in the questions are defined at the end of the questionnaire.

Very truly yours,

_____

[*Client's Authorized Signature*]

_____

[*Title*]

[*Client Name*]

Related-Party Questionnaire

1. Have you or any related-party of yours had any material interest, direct or indirect, in any sales, purchases, transfers, leasing arrangements or guarantees or other transactions since (*beginning of period of audit*) to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?
2. Do you or any related-party of yours have any material interest, direct or indirect, in any pending or incomplete sales, purchases, transfers, leasing arrangements, guarantees or other transactions to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?
3. Have you or any related-party of yours been indebted to the Company (or specify any pension, retirement, savings, or similar plan provided by the client) at any time since (*beginning of period of audit*)? Please exclude amounts due for purchases on usual trade terms and for ordinary travel and expense advances.

The answers to the foregoing questions are correctly stated to the best of my knowledge and belief.

_____ _____

[*Signature*] [*Date*]

See definitions which follow.

Definitions

Company: Parent company and any subsidiary.

Related Party: Any (1) corporation or organization (other than the Company) of which you are an officer, director, or partner or are, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities; (2) any trust or other estate in which you have a substantial beneficial ownership or for which you serve as a trustee or in a similar fiduciary capacity; and (3) any close relative of yours or your spouse's, or other person you may significantly influence (control) or be significantly influenced by.

Control: Possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a party, whether through ownership, by contract, or otherwise.

Person: An individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or an unincorporated organization.

Beneficial Owner: Person who enjoys, or has the right to secure, benefits substantially equivalent to those of the ownership of securities, even though the securities are not registered in the person's name. Examples of beneficial ownership include securities held for the person's benefit in the name of others, such as nominees, custodians, brokers, trustees, executors and other fiduciaries; a partnership of which the person is a partner; and a corporation for which the person owns substantially all of the stock. Shares (1) held (individually or in a fiduciary capacity) by the person's spouse, the person's or his or her spouse's minor children, or a relative of the person or his or her spouse who shares the same home with the person; or (2) as to which the person can vest or revest title in himself or herself at once or at some future time are also considered as being beneficially owned.

.31 Safe Deposit Box Access Confirmation

[*Date*]

_____

_____

_____

Our auditors, _____ [*name and address of auditors*], are conducting an audit of our financial statements. Accordingly, please confirm there has been no access to our safe deposit box number ____ between ____ and ____ o'clock.

Please indicate in the space below if the above is in agreement with your records. If it is not, please furnish the auditors any details concerning access to our safe deposit box during the period indicated.

After signing and dating your reply, please mail it directly to our auditors in the enclosed envelope.

Very truly yours,

.33 Illustrative Letter To Actuary Requesting Employer's Benefit Cost Information

[*Client's Letterhead*]

[*Date*]

_____

_____

_____

In connection with the audit of our financial statements for the period ending _____ [*fiscal year end*] by our independent auditors _____ [*name, address*], please furnish them a copy of the most recent actuarial valuation report for _____ [*name of plan*]. If a complete actuarial valuation was not prepared as of _____ [*date*], please provide any reports or letters that summarize end-of-period amounts. If the information requested below is included in the valuation report, you may refer to the location in your report rather than repeating such information.

A. Please provide a brief description of the following:

1. The participant group(s) (for example, employee, retiree and dependent group[s]) covered, and the types of benefits provided.
2. The provisions of the substantive plan at the beginning of the period used in the calculation of the net periodic postretirement benefit cost for the period.
3. Any changes between the provisions of the substantive plan at the beginning of the period used in the calculation of net periodic postretirement benefit costs and the substantive plan used in the calculation of the accumulated postretirement benefit obligation (APBO) at the disclosure date. Additionally, please specify the following:
   a. The disclosure date (which cannot be more than three months prior to the end of the period).
   b. How these changes were included in the net periodic postretirement benefit costs for the period.
4. The date and description of plan amendments adopted during the period and whether the amendment(s) were included in items 2 and 3 above.
5. Any participants, benefits or plan terms excluded from the calculations and the reasons for their exclusion.
6. The funding policy for the plan if other than pay-as-you-go.
7. Any significant liabilities other than for benefits.
8. The method and the amortization period, if any, used for amortizing:
   a. Any transition asset or obligation.
   b. Unrecognized prior service cost.
   c. Unrecognized net gain or loss.
9. If the plan is funded, provide:
   a. The amounts and types of securities used to value plan assets.
   b. Calculation of fair value of plan assets.
   c. The date as of which fair value was calculated.
   d. The method of determining the value of any contracts with insurance companies and participation provisions included in the plan assets.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

10. The following information relating to the participants' demographic and compensation data used in calculating the APBO and net periodic postretirement benefit cost:

    a. The source of the demographic data and the date as of which the data were collected.

    b. The following information concerning the participants and their beneficiaries in the following (or a comparable) format. Please indicate any groups of participants excluded from the information.

Participants	Number of persons	Compensation (if applicable)
Retirees and beneficiaries eligible for benefits		
Dependents of retirees eligible for benefits		
Active employees fully eligible for benefits		
Terminated employees fully eligible for benefits		
Active employees not fully eligible for benefits		
Other (identify)		

    c. Information for the following participants:

Participants' name or number	Age or birth date	Sex	Salary	Date hired or year of initial eligibility

11. A summary of the per-capita claims costs used in the valuation and the basis for their development, including:

    a. In employer-specific claims data were used in connection with the development of per-capita claims cost by age, a description of the data, its source and the period from which it was taken.

    b. If an external data source was used in connection with the development of per-capita claims costs by age, describe the nature of the external data source and how it was used.

    c. The extent to which external data sources were used to adjust the historical claims data.

B. Please provide the following components of the net periodic postretirement benefit cost for the period (see A.2. above):

1.	Service cost		$
2.	Interest cost		
3.	Actual return on plan assets		
4.	Other components, net:		
	a. Net asset gain (loss) during the period deferred for later recognition	$	
	b. Amortization of net loss (gain) from earlier periods		
	c. Amortization of unrecognized prior service cost		
	d. Amortization of the transition obligation		
	e. Net total of other components ($a + b + c + d$)		
5.	Net periodic postretirement benefit cost (1 + 2 – 3 + 4*e*)		$

C. Please provide the following information related to the APBO as of the disclosure date (see A.3. above):

	Beginning of period (transition date)*	End of period
1. Accumulated postretirement benefit obligation (APBO)	$	$
a. Retirees and beneficiaries eligible for benefits		
b. Dependents of retirees eligible for benefits		
c. Active employees fully eligible for benefits		
d. Terminated employees fully eligible for benefits		
e. Active employees, not fully eligible for benefits		
f. Other (identify)		
g. Total (sum of 1*a*–1*f*)		
2. Fair value of plan assets		
3. Funded status (1*g*–2)		
4. Unrecognized prior service cost		
5. Unrecognized net loss (gain)		
6. Unrecognized transition obligation (asset)		
7. Accrued (prepaid) postretirement benefit cost (3 less items 4–6)	$	$

D. Please provide the following information regarding the assumptions used to compute the net periodic postretirement benefit cost and APBO. If a published standard table was used, provide its name.

ECONOMIC ASSUMPTIONS

	Net periodic cost	APBO
1. General inflation (e.g., CPI)	%	%
2. Weighted-average discount rate	%	%
3. Weighted-average rate of compensation increase	%	%
4. Weighted-average expected long-term rate of return on plan assets	%	%
5. Estimated income tax rate included in rate of return	%	%
6. Method used to determine market-related value of assets	%	%

EMPLOYEE DEMOGRAPHIC DATA

7. Employee turnover rates by age	Describe or attach table	
8. Rates of retirement by age	Describe or attach table	
9. Rates of disability by age	Describe or attach table	
10. Rates of mortality by age	Describe or attach table	
11. Percentage of employees with dependents at retirement	%	%
12. Spouse age difference	%	%

If participants in this plan are covered by a defined benefit pension plan for which expense is determined in accordance with FASB Statement No. 87, *Employers' Accounting for Pensions*, please state whether the above assumptions are consistent with those used in calculations in determining those pension amounts. If not, please explain the difference and the reasons for the difference.

* This column should be included only in the initial year of application of FASB Statement No. 106.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

SPECIFIC ASSUMPTIONS FOR RETIREE HEALTH CARE BENEFITS

	Net periodic cost	APBO
13. Weighted-average administrative (e.g., claims settlement, legal, accounting, plan administration, etc.) as a percentage of claims or other basis for assumption	%	%
14. Percentage expecting to elect coverage under the plan:		
a. Future retirees	%	%
b. Their dependents	%	%
15. Health care cost trend rates (please provide rates for each year to the ultimate rate)	Describe or attach table	

a. Please state whether these rates are applicable to gross eligible charges or net incurred claims cost. If applied to net incurred claims, please state what adjustments were made and what rates are to be shown for disclosure.

b. The effect of a one-percentage-point increase in assumed health care cost trend rate on:

(1) The aggregate of service and interest cost components of net periodic postretirement benefit costs.

(2) APBO.

16. Please state whether the above assumptions are consistent with the prior period, and, if not, explain the reason for the changes.

17. Please describe any other significant assumptions used in the above measurement and the basis on which they were determined.

E. Please provide a description and the amounts of gains or losses from settlements, curtailments or termination benefits during the year, such as:

1. Purchase of insurance contracts where the risk of benefit payments is fully assumed by the insurance company.

2. Lump-sum cash payments to plan participants.

3. Other irrevocable actions that relieved the employer, plan sponsor or the plan of primary responsibility for a postretirement benefit obligation and eliminated significant risks related to the obligation and assets.

4. Any events that significantly reduced the expected years of future service of employees.

5. Any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service.

6. Any special or contractual termination benefits offered to employees.

F. Please describe any significant events (for example, plant closings) noted subsequent to the current year's measurement date, and the effects of those events, that could materially affect the amounts shown in B or C.

G. If you have been notified of a decision by the plan to fully or partially terminate the plan, please describe the effect on the APBO and the net periodic postretirement benefit cost.

H. Was all of the information above determined in accordance with FASB Statement No. 106 to the best of your knowledge? If not, please describe any differences.

I. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.

J. Indicate your professional qualifications for performing actuarial valuations under FASB Statement No. 106.

Yours very truly,

_____

Inquiries to Legal Counsel[A]

.01 Illustrative Inquiry Letter to Legal Counsel[B]

[*Prepared on Client's Letterhead* (see Note C)]

[*Date* (see Note D)]

[*Name of Lawyer*]
[*Address of Lawyer*]

Dear _____:

In connection with an audit of our financial statements at (*balance-sheet date*) and for the (*period*) then ended, management of the Company has prepared, and furnished to our auditors (*name and address of auditors*), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (*balance-sheet date*) and during the period from that date to the date of your response.

Pending or Threatened Litigation

(excluding unasserted claims)

> [Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.]

Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments

(considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

> [Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.]

Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement dis-

closure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

> [The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

Very truly yours,

[*Authorized Signature for Client*]

Notes: (A) If a client has not needed to retain legal counsel, the auditor may express an unqualified opinion on the financial statements even though he has not obtained a letter from legal counsel of the Company. In these circumstances, the auditor should obtain written representation from the Company that legal counsel has not been retained for matters concerning business operations that may involve current or prospective litigation (see AICPA *Technical Practice Aids*, section 8340.10).

(B) Extracted from the Appendix to Statement on Auditing Standards No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* [AU section 337A]. [See Note D.]

(C) Auditors should carefully consider the provisions of SAS No. 12 [AU section 337] in drafting this letter.

(D) Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client should consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.02 Illustrative Inquiry Letter to Legal Counsel If Management Has Not Provided Details About Pending or Threatened Litigation

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lawyer*]
[*Address of Lawyer*]

In connection with an audit of our financial statements at (*balance-sheet date*) and for the (*period*) then ended, please furnish to our auditors (*name and address of auditors*), the information requested below for which you have been engaged to provide legal consultation or representation.

Pending or Threatened Litigation, Claims and Assessments

(excluding unasserted claims and assessments)

Please furnish a list of all pending or threatened litigation, claims, and assessments your firm is handling on our behalf including the following:

1. The nature of the litigation (including the amount of monetary or other damages sought).
2. The progress of the case to date.
3. How management is responding or intends to respond to the litigation (e.g., to contest the case vigorously or to seek an out-of-court settlement).
4. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.

Unasserted Claims and Assessments

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosing concerning such possible claim or assessment, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5, as a matter of professional responsibility to us. *Please specifically confirm to our auditors that our understanding is correct.*

We have represented to our auditors that there are no unasserted claims which are not specifically identified in this letter that you advised us are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5.

(If unasserted claims exist, management's listed information should include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted; and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.)

Please furnish our auditors any explanation you consider necessary to supplement the foregoing information, including an explanation of these matters as to which your views may differ from those stated.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the organization, such as guarantees of indebtedness of others.]

Very truly yours,

[*Authorized Signature for Client*]

Notes: (A) Auditors should carefully consider the provisions of SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* [AU section 337] in drafting this letter.

(B) Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client should consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

(C) If a client has not needed to retain legal counsel, an unqualified opinion may be expressed on the financial statements even though a letter from legal counsel has not been obtained. In these circumstances, a written representation should be obtained from the Company that legal counsel has not been retained for matters concerning its operations that involve current or prospective litigation (see AICPA *Technical Practice Aids*, section 8340.10).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.03 Improving Inquiry Techniques

If inquiries to legal counsel are not sufficiently detailed or specific, deficiencies in attorneys' responses may result. A conference between the auditor and the attorney may be necessary to clarify the attorney's written response and SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph 10 [AU section 337.10] provides for such a conference. However, to improve the auditor's ability to receive all of the information necessary to complete his/her audit, he/she may wish to consider the following matters in an inquiry to legal counsel:

a. A request that the attorney specify the effective date of his/her response if it is other than the date of the reply.

b. A request that the attorney mail the response so that it will be received by a certain date.

c. A request that the nature of any litigation specifically identify (i) the proceedings, (ii) the claim(s) asserted, (iii) the amount of monetary damages sought, or if no amounts are indicated in preliminary case filings, a statement to that effect, and (iv) the objectives sought by the plaintiff, if any, other than monetary or other damages, such as performance or discontinued performance of certain actions.

d. A request that the attorney avoid such vague phrases as "meritorious defenses," "without substantial merit," and "reasonable chance" in expressing an opinion on the outcome of litigation.

e. If an opinion cannot be expressed on the outcome of litigation, a request that the attorney so state together with his/her reasons for that position.

f. A request that the attorney specify to what extent potential damages are covered by insurance. (It may be possible to obtain the opinion of the insurer's counsel regarding the applicability of insurance coverage.)

g. A request that the attorney provide a summary of material litigation, claims, and assessments settled during the period.

h. A statement that confirmation of the understanding regarding disclosure of unasserted claims and assessments is an integral part of the audit inquiry and that failure to so confirm will require a follow-up contact.

i. A statement that the attorney's response will not be quoted or referred to in the financial statements without first consulting with him/her.

Representation Letters

.01 Illustrative Representation Letter—Audit of Financial Statements

Introductory Comment (Extracted from the Appendix to SAS No. 19, *Client Representations* [AU section 333A])

The following letter is presented for illustrative purposes only. The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited. The introductory paragraph should specify the financial statements and periods covered by the auditor's report, for example, "balance sheets of XYZ Company as of December 31, 19X1 and 19X0, and the related statements of income and retained earnings and cash flows for the years then ended." Similarly, representations concerning inventories and sales and purchase commitments would not be obtained if such items are not material to the company's financial position and results of operations or if they are not recorded in the financial statements under a comprehensive basis of accounting other than generally accepted accounting principles, for example, financial statements prepared on the cash basis of accounting.

The illustrative letter assumes that there are no matters requiring specific disclosure to the auditor. If such matters exist, they should be indicated by listing them following the representation, by reference to accounting records or financial statements, or by other similar means. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, item 14 could be modified as follows: "Except as discussed in Note X to the financial statements, no events have occurred. . . ." Similarly, in appropriate circumstances, item 4 could be modified as follows: "We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except that certain marketable securities have been excluded from current assets based on our intention not to dispose of them, which is supported by the minutes of December 7, 19X1, meeting of the board of directors."

Certain terms are used in the illustrative letter that are defined elsewhere in authoritative literature, for example, irregularities (SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* [AU section 316A]) and related parties (SFAS 57, *Related Party Disclosures*, paragraph 24f [AC R36.406], and SAS No. 45, *Omnibus Statement on Auditing Standards—1983*, "Related Parties" [AU section 334.01, footnote 1]). To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to the client and request that the client include the definitions in the written representations.

The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in SAS No. 19, paragraph 5 [AU section 333.05].

Illustrative Representation Letter

[*Prepared on Client's Letterhead*]

[*Date of Auditor's Report*]

[*To Independent Auditor*]

In connection with your audit of the (*identification of financial statements*) of (*name of client*) as of (*date*) and for the (*period of audit*) for the purpose of expressing an opinion as to whether the (consolidated) financial state-

ments present fairly, in all material respects, the financial position, results of operations, and cash flows of (*name of client*) in conformity with generally accepted accounting principles (other comprehensive basis of accounting), we confirm, to the best of our knowledge and belief, the following representations made to you during your audit.

1. We are responsible for the fair presentation in the (consolidated) financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles (other comprehensive basis of accounting). We are also responsible for adopting sound accounting policies, establishing and maintaining internal control, and preventing and detecting fraud.
2. We have made available to you all—
   a. Financial records and related data.
   b. Minutes of meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
   c. Information relating to all statutes, laws, or regulations that have a direct effect on our financial statements.
   d. All reports from other accountants who have been engaged to make a review of interim financial information of significant components of the reporting entity, its subsidiaries, or its other investees.
   e. All information relating to contracts with and results of work by specialists.
3. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
4. The following have been properly recorded or disclosed in the financial statements:
   a. Related party transactions and related amounts receivable or payable, including sales, purchases, loans, transfers, leasing arrangements, and guarantees.
   b. Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements.
   c. Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances and line-of-credit or similar arrangements.
   d. Agreements to repurchase assets previously sold.
   e. Security agreements under the Uniform Commercial Code.
   f. Contractual obligations for purchases of assets.
   g. Liens, encumbrances, or subordination of assets pledged as collateral in any way.
   h. Subordination of any liabilities.
   i. All lease or rental obligation under long-term leases.
   j. Information relating to risks and uncertainties existing as of the date of those statements regarding nature of operations, use of estimates in the preparation of financial statements, certain significant estimates, and current vulnerability due to certain concentrations in accordance with Statement of Position 94-6.
   k. Environmental liabilities, which must be disclosed in accordance with Statement of Financial Accounting Standards No. 5 [AC section C59] (criteria as interpreted by Statement of Position 96-1, paragraph 5.6).
5. There are no—
   a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

b. Other material liabilities or gain or loss contingencies that are required to be accrued or disclosed by Statement of Financial Accounting Standards No. 5 [AC section C59].

c. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5 [AC section C59].

d. Material transactions that have not been properly recorded in the accounting records underlying the financial statements.

e. Communications from regulatory agencies concerning noncompliance with or deficiencies in, financial reporting practices that could have a material effect on the financial statements.

6. Provision, when material, has been made to:

   a. Reduce excess or obsolete inventories to their estimated net realized value.

   b. Reduce all investments for permanent declines in value.

   c. Adjust long-lived assets, certain identifiable intangibles, and related goodwill in accordance with Statement of Financial Accounting Standards No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* [AC I08].

7. The company has satisfactory title to all owned assets, and there are no such liens or encumbrances on assets nor has any asset been pledged.

8. Provision has been made for any material loss to be sustained in the fulfillment of, or from inability to fulfill, any sales commitments.

9. Provision has been made for any material loss to be sustained as a result of purchase commitments for inventory quantities in excess of normal requirements or at prices in excess of the prevailing market prices.

10. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

11. No events have occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the financial statements.

12. We have apprised you of all (There are no) instances of fraud perpetrated on or within the Company of which we are aware.

_____

[*Name of Chief Executive Officer and Title*]

_____

[*Name of Chief Financial Officer and Title*]

Note: This illustration is only one example of a representation letter. Alternate wording is permissible and it may be advisable to tailor the letter to the needs of an engagement.

.02 Illustrative Representation Letter—Review of Financial Statements

[*Prepared on Client's Letterhead*]

[*Date of Accountant's Report*]

[*To the Accountant*]

In connection with your review of the (*identification of financial statements*) of (*name of client*) as of (*date*) and for (*period of review*) for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements in order for them to be in conformity with generally accepted accounting principles (or other comprehensive basis of accounting), we confirm, to the best of our knowledge and belief, the following representations made to you during your review.

1. The financial statements referred to above present the financial position, results of operations, and cash flows of (*name of client*) in conformity with generally accepted accounting principles. In that connection, we specifically confirm that—
   a. The company's accounting principles, and the practices and methods followed in applying them, are as disclosed in the financial statements.
   b. There have been no changes during the (*period reviewed*) in the company's accounting principles and practices.
   c. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
   d. There are no material transactions that have not been properly reflected in the financial statements.
   e. There are no material losses (such as from obsolete inventory or purchase or sales commitments) that have not been properly accrued or disclosed in the financial statements.
   f. There are no violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency, and there are no other material liabilities or gain or loss contingencies that are required to be accrued or disclosed.
   g. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged.
   h. There are no related party transactions or related amounts receivable or payable that have not been properly disclosed in the financial statements.
   i. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.
   j. No events have occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the financial statements.
2. We have advised you of all actions taken at meetings of stockholders, board of directors, and committees of the board of directors (or other similar bodies, as applicable) that may affect the financial statements.
3. We have responded fully to all inquiries made to us by you during your review.

_____

[*Name of Owner or Chief Executive Officer and Title*]

Note: This representation letter should be modified when the financial statements are prepared in accordance with an other comprehensive basis of accounting.

.03 Illustrative Representation Letter—Personal Financial Statements

[*Date of Accountant's Report*]

[*To the Accountant*]

In connection with your (*compilation, review, or audit*) of the (*identification of financial statements*) of (*client's name*) as of (*date*) for the (*period*) then ended for the purpose of (*description*), we confirm, to the best of our knowledge and belief, the following representations made to you during your (*compilation, review, or audit*).

1. We are responsible for the fair presentation in the statements of financial condition and changes in net worth in conformity with generally accepted accounting principles. All assets are presented at their estimated current values and all liabilities are presented at their estimated current amounts, which have been determined in accordance with guidelines promulgated by the American Institute of Certified Public Accountants. (Because of our limited expertise with generally accepted accounting principles, including financial statement disclosure, we have engaged you to advise us in fulfilling that responsibility.)
2. We have made all financial records and related data available to you. We have not knowingly withheld from you any financial records or related data that in our judgment would be relevant to your (*compilation, review, or audit*).
3. The following have been properly recorded or disclosed in the financial statements:
   a. Related party transactions and related amounts receivable or payable, including sales, purchases, loans, transfers, leasing arrangements, and guarantees. I understand that related parties include members of my family as well as business entities in which I, or members of my family, have an investment that allows the exercise of control or significant influence.
   b. Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances and line-of-credit or similar arrangements.
   c. Agreements to repurchase assets previously sold.
4. There are no violations or possible violations of laws or regulations that have come to our attention whose effects are regarded as significant enough to be considered for disclosure in the financial statements or as a basis for recording a loss contingency, and there are no other material liabilities or gain or loss contingencies that are required to be accrued or disclosed.
5. There are no material transactions or balances that have not been properly recorded or disclosed in the financial statements.
6. We have satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor have any assets been pledged.
7. We have not retained an attorney for matters that may involve current or prospective litigation, and we are not aware of any pending or threatened litigation, claims, or assessments that should be disclosed in the financial statements.
8. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.
9. No events have occurred subsequent to the date of the statement of financial condition that would require adjustment to, or disclosure in, the financial statements.
10. We have responded fully to all inquiries made to us by you during the engagement.

.04 Illustrative Representation Letter to Other Accountants

[Firm's Letterhead]

[Date]

_____

_____

_____

In connection with the report you have been requested to reissue on the financial statements of _____ _____ *[client's name]* for the year ended _____ *[date]*, which statements are to be included comparatively with similar statements for the year ended _____ *[date]*, we make the following representations.

We have audited (or reviewed or compiled) the balance sheet of _____ *[client's name]* as of _____ *[balance-sheet date]* and the related statements of earnings, retained earnings, and cash flows for the year then ended. Our procedures in connection with the engagement did not disclose any events or transactions subsequent to _____ *[predecessor's balance-sheet date]* which, in our opinion, would have a material effect upon the financial statements, or which would require mention in the notes to the financial statements of _____ *[client's name]* for the year then ended.

Should anything come to our attention prior to the date our report is issued which, in our judgment, would have a material effect upon the financial statements covered by your report, we shall notify you promptly.

Very truly yours,

_____

[Engagement Partner's Signature]

_____

Note: If any matters come to the firm's attention that may require revision of the previous financial statements, they should be included in a separate paragraph after approval by the engagement partner.

.05 Letter to Other Accountants Upon Whose Work We Plan to Rely

[*Firm's Letterhead*]

[*Date*]

_____

_____

_____

We are auditing the financial statements of _____ [*client's name*], _____ [*parent company*]. The financial statements of _____ [*other accountants' client's name*] that you are auditing are to be included in the financial statements of _____ [*client's name*]. We will rely on your report on the financial statements in expressing an opinion on the (consolidated) financial statements of _____ [*client's name*] (and subsidiaries). In that connection, we will refer to your report.

Please confirm to us that your firm is independent with respect to _____ [*client's name*] and _____ [*other accountant's client's name*] within the meaning of Rule 101 of the Code of Professional Conduct of the American Institute of Certified Public Accountants.

Please provide us promptly, in writing, with the following information in connection with your current examination of the financial statements of _____ [*other accountant's client's name*] with respect to:

1. Related-party transactions or other matters that have come to your attention. We are aware of the following related parties: _____ [*names of known related parties*].
2. Any limitation on the scope of your examination that is related to the financial statements of _____ _____ [*client's name*], or that limits your ability to respond to this inquiry.

Please update your letter to indicate any additional matters of the type designated above that have come to your attention through the date of your report on the financial statements of _____ [*other accountants' client's name*].

Very truly yours,

_____

[*Engagement Partner's Signature*]

AAM Section 7500
Communication With Audit Committees

.01 Illustrative Communication With Audit Committees

Addressee:*

Statement on Auditing Standards (SAS) No. 61, *Communication With Audit Committees* (AU section 380) issued by the AICPA Auditing Standards Board requires the auditor to communicate certain matters to those responsible for the oversight of the financial reporting process. The following comments regarding the scope and results of our audit of (*name of client*) for the year ended December 31, 19X2 will assist you in overseeing the financial reporting and disclosure process for which management is responsible.

Scope of Audit

Our responsibility is to express an opinion on the financial statements based on our audit. This audit is to be conducted in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation.

Results of Audit

This part of the letter would address the following:

1. Management's choice of significant accounting policies and their application. This includes methods proposed for new transactions or events, significant unusual transactions, or controversial areas such as equity investments, off-balance-sheet financing or revenue recognition;
2. Procedures used by management to determine accounting estimates and the data the auditor has considered to determine the reasonableness of the estimates;
3. Effects of audit adjustments that have or have not been recorded in the financial statements. Such adjustments, whether or not recorded, may have significant effects on current and future financial statements or on the company's internal control (i.e., a proposed adjustment may have resulted from errors detected during the audit that result from weaknesses in internal control);
4. Other information presented by management that is included with the entity's audited financial statements. The auditor should discuss the nature of his/her responsibility for such information with the audit committee,* including procedures performed, if any, and the results;
5. Nature of and circumstances surrounding any disagreements with management about the application of GAAP, the determination of accounting estimates, or scope of the audit that could be significant to the entity's annual reporting;
6. Auditor's views about any accounting or auditing matters discussed by management with other auditors (opinion shopping);
7. Major discussions by management with the auditor about the initial or continued retention of the auditor; and

* Audit Committee, or other formally designated oversight group which is equivalent to the audit committee such as a finance committee or budget committee.

8. Any serious difficulties encountered in conducting the audit.

This report is intended solely for the information and use of the audit committee,* management and others in the organization (or specified regulatory agency or other specified third party).

[*Signature*]

[*Date*]

[Source: SAS No. 61 (AU section 380)]

Note: SAS No. 61 (AU section 380), is required to be followed for (1) entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee) and (2) all Securities and Exchange Commission (SEC) engagements.

* Audit Committee, or other formally designated oversight group which is equivalent to the audit committee such as a finance committee or budget committee.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.02 Report on Reportable Conditions

[*Date of Auditor's Report on the Financial Statements*]

In planning and performing our audit of the financial statements of the _____ (*client's name*) for the year ended _____ (*financial statement date*), we considered its internal control in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on internal control. However, we noted the following matters involving internal control and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design and operation of internal control that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Bank Reconciliations

Bank reconciliations have been prepared for the operating cash account, but they have not been in agreement with the general ledger, often by as much as _____ . At _____, the general ledger balance varied from the bank reconciliation by $_____ .

In prior years, the bank reconciliations did not reconcile exactly to the general ledger; however, the variances were not as significant as in 199X. To maintain effective internal controls over cash, it is critical that bank accounts be reconciled to the general ledger monthly with differences identified and resolved immediately. At the present time, an adjusting journal entry should be made to bring the general ledger balance into agreement with the reconciled balance.

Accounts Payable

A listing of accounts payable as of _____ could not be produced to support the general ledger amount. We were able to reconcile accounts payable to the general ledger amount by reviewing computer-generated payable listings dated _____, along with examining unpaid invoices at the time of our field work.

As indicated in previous letters to the Board, accounts payable has been an ongoing problem due to the fact that the accounts payable listing is not reconciled to the general ledger monthly. Proper recording of accounts payable is a key to maintaining adequate financial statements. Whether computer-generated or manually prepared, a detailed accounts payable listing should be reconciled monthly to the general ledger balance. All reconciliations should be reviewed and approved by someone other than the preparer, with the reviewer being responsible for ensuring that all differences are resolved.

Property and Equipment

Documentation provided to support the changes in property and equipment was not in agreement with the changes in the general ledger balances, for some categories, by as much as _____. Also, the computer-generated list of property and equipment was not in agreement with the total property and equipment recorded in the general ledger; therefore, this listing was not a useful resource.

The property and equipment computer listing should be reviewed, revised, and reconciled to the general ledger. Changes in property and equipment should be recorded timely and the detailed property and equipment listing should be reconciled to the general ledger balances monthly.

The procedures for recording fixed asset additions and deletions should be reviewed to determine their adequacy. Adjusting journal entries with regard to trade-ins, sales and other retirements of fixed assets should be reviewed by the Treasurer or someone other than the person preparing the entry. Examples of problems encountered include improper capitalization of assets when a like kind exchange or trade-in is involved and improper recording of gain or loss on sale of assets.

An annual or biannual physical inventory of equipment is an effective management tool to help maintain detail property and equipment records and strengthen controls of safeguarding equipment. The Board should consider making a physical inventory a standard procedure.

This report is intended solely for the information and the use of the Board of Directors, management, and others within the entity.

Very truly yours,

_____

[*Engagement Partner*]

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.03 Report on Reportable Conditions That Also Identifies a Material Weakness

[*Date of Auditor's Report on the Financial Statements*]

In planning and performing our audit of the financial statements of the _____ (*client's name*) for the year ended _____ (*financial statement date*), we considered its internal control in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on internal control. However, we noted the following matters involving internal control and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design and operation of internal control that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Accrued Vacation

Although accrued vacation has not been recorded on the financial statements, the amount of accrued vacation must be considered in determining the fair presentation of the financial statements. The year end analysis of accrued vacation had a balance significantly lower than the prior year's balance. The details of the analysis were traced to the "attendance control cards." We found (1) the number of days earned on the listing did not agree to that recorded in the cards, (2) individuals were reported in the cards with earned vacation but were not on the listing, and (3) some of the cards appeared to not have been maintained.

Detailed records of vacation days earned and used by employees should be timely and accurately maintained. At least annually, these days should be converted to dollar amounts. Management should review the conversion and consider reporting this liability on the financial statements for complete recognition of liabilities.

Discussions with the Office Manager revealed that not all employees are required to notify her when they use vacation days. All employees should be required to inform the Office Manager of all vacation days taken. Employees should also be asked to periodically review their vacation records with the Office Manager and to indicate their agreement by signing the records.

Bad Debts

During 19XX, the Board approved the write-off of accounts receivable of about _____. The write-off was charged to revenue rather than to bad-debt expense.

Procedures for recording bad debt write-offs should be reviewed for adequacy. All adjusting entries should be reviewed by the Treasurer or a member of management other than the person preparing the journal entry.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe that the following reportable condition is a material weakness.

Blank Checks

Blank checks are maintained in an unlocked cabinet along with the check signing machine.

Blank checks and the check signing machine should be locked in separate locations so as to prevent the embezzlement of funds.

This report is intended solely for the information and use of the Board of Directors, management, and others within the entity.

Very truly yours,

_____

[*Engagement Partner*]

AAM Section 7600
Reliance Letter

.01 Illustrative Reliance Letter

Addressee:

The following is in response to your letter to our firm dated _____ .

We performed an audit of ABC Company's balance sheet dated December 31, 19X0, and the related statements of income, retained earnings, and cash flow for the year then ended. The financial statements were audited as of the financial statement date and the audit procedures performed were completed on March 28, 19X1 (*audit report date*). No additional audit procedures were performed subsequent to March 28, 19X1.

The audit was conducted in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. However, a properly designed and executed audit may not detect a material irregularity. For example, generally accepted auditing standards do not require that an auditor authenticate documents, nor is an auditor trained to do so. Also audit procedures that are effective for detecting a misstatement that is unintentional may not be effective for a misstatement that is intentional and is concealed through collusion between client personnel and third parties or among management or employees of the client.

We understand that you intend to rely on the report and associated statements in connection with (*describe as precisely as possible the transaction in connection with which the third party intends to rely on the report and statements*). It should be noted that the audit procedures performed in order to render an opinion on the financial statements of ABC Company may not be adequate or appropriate for this purpose. Because of the limitations inherent in the audit process we may not have detected all material misstatements. Accordingly, our audit was not intended for your benefit and should not be taken to supplant the inquiries and procedures that you should take to satisfy yourself as to ABC Company's credit-worthiness. We recommend that you perform your own due diligence investigation which should include but not be limited to the following steps (*itemize*). We emphasize that this list of procedures may not be all inclusive and that we cannot provide any assurance that the procedures we have mentioned will be sufficient for your purposes.

AAM Section 7700
Proposal Letter

.01 Illustrative Proposal Letter

[*Date*]

_____

_____

_____

We appreciate this opportunity to present a proposal for (*nature of services*) and a brief description of our firm and services.

Our firm was formed in 19____. We have ____ partners and ____ staff and support personnel working with clients in accounting and auditing, taxation, and various consulting services. Although we serve all size clients, our clientele consists primarily of small and medium-size businesses such as yours.

Our professional objectives are to provide the highest quality services on a timely basis. As a member of the AICPA Division for Firm's Private Companies Practice Section, our accounting and auditing practice has been subjected to a review by another firm of CPAs. We received an unqualified opinion as a result of that review. We extend our client relationships to include ongoing contact and services to achieve our services objectives.

We have extensive experience in the _____ industry. This experience and related understanding of your industry's operations permit us to design, perform, and complete engagements for your company effectively and at a reasonable cost.

Our services include the following:

- Accounting, Auditing, and Attestation Services

  Our accounting, auditing, and attestation services include annual or special audits, compilations and reviews of financial statements, and the examination and review of financial and other information under the attestation standards. We accompany our report on audited financial statements with a reportable conditions letter and a management letter that include suggestions to correct internal control weaknesses and recommendations for operational efficiencies. Our purpose in making these suggestions is to help you accomplish your operational objectives. These suggestions often result in cost savings.

- Tax Services

  We offer diversified tax services, including assistance in all phases of federal, state, and local income taxes; estate, inheritance, and gift taxes; and payroll and other taxes. These services include tax return preparation, tax research, and representation of clients at administrative proceedings before the various taxing authorities. The objectives of our tax services are to minimize taxes and potential problems.

- Consulting Services

  Our consulting services are designed to assist clients in improving efficiency and profitability. Our approach offers assistance in such areas as developing plans for problem identification or implementing more effective operating controls, evaluating information systems and installing or upgrading data processing systems.

_____, an audit partner, will be primarily responsible for your engagement.

As you requested, our proposal is for_____ (*state nature of services*).

We estimate that our fees for the proposed services will be approximately $_____, plus out-of-pocket expenses, billable as the work progresses. Our fees are based on time spent on the engagement. Should we encounter any unforeseen circumstances requiring additional time, you will be notified promptly of the situation.

Our fee estimate is based on the assumption that your personnel will prepare certain schedules and analyses for us. We also anticipate their assistance in locating invoices and other documents for our examination.

Our firm is organized and staffed to help you satisfy our business needs. Please call _____ with questions about this proposal.

Very truly yours,

_____

AAM Section 8010
Audit Risk Alert—1996/97

Introduction

.01 This Alert is intended to help auditors plan their 1996 year-end audits. Successful audits are a result of a number of factors, including the acceptance of clients with integrity; adequate partner involvement in planning, supervising, and performing audits; an appropriate level of professional skepticism; and the allocation of sufficient audit resources to high risk areas. Addressing these factors in each audit engagement requires substantial professional judgment based, in part, on a knowledge of professional standards and current developments in business and government.

.02 Throughout the audit process, from the initial consideration of whether to accept a client to the issuance of the audit report, auditors should consider overall engagement risk. Engagement risk consists of the following three components:

1. *Client's business risk*—The risk associated with the entity's survival and profitability
2. *Audit risk*—The risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated
3. *Auditor's business risk*—The risk of potential litigation costs from an alleged audit failure and the risk of other costs (whether an audit failure is alleged or not) such as fee realization and the effect on the auditor's reputation resulting from association with the client

.03 Although this Audit Risk Alert does not provide a complete list of the risk factors to be considered, and the items discussed do not affect risk in every audit, it can be used as a planning tool for considering matters that may be especially significant for a specific audit. During the conduct of all engagements, auditors must remember that their paramount responsibilities are to boards of directors, shareholders, creditors, and the public. This requires traits that are the hallmarks of auditors: independence, objectivity, and integrity.

New Auditing and Attestation Pronouncements

SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55*

.04 In December 1995, the Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319). SAS No. 78 (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997.

.05 This amendment revises the definition and description of internal control contained in SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319A), to recognize the definition and description contained in *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO Report).

.06 Internal control is a process, effected by an entity's board of directors, management, and other personnel, designed to provide reasonable assurance regarding the achievement of objectives in the following categories:

1. Reliability of financial reporting
2. Effectiveness and efficiency of operations
3. Compliance with applicable laws and regulations

.07 Internal control consists of the following five interrelated components:

1. Control environment
2. Risk assessment (the entity's, not the auditor's)
3. Control activities
4. Information and communication (including the accounting system)
5. Monitoring

.08 There is a direct relationship between objectives (what an entity strives to achieve), and components (what is needed to achieve the objectives). Not all of the objectives and components listed above are relevant to an audit of financial statements. Internal control, no matter how well designed and operated, can provide only reasonable assurance regarding the achievement of an entity's objectives.

.09 Changes in terminology introduced by the amendment to SAS No. 55 (AU section 319A) are presented in the following table.

Old Terminology	*New Terminology*
Elements (In SAS No. 55 (AU section 319A), the elements of internal control were the control environment, accounting system, and control procedures.)	Components (The five components are listed above.)
Control procedures	Control activities
Internal control structure	Internal control
Policies and procedures	Controls (other than those for control activities)

.10 At the same time that SAS No. 78 (AU section 319) was published, the ASB also issued Statement on Standards for Attestation Engagements (SSAE) No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400). Like SAS No. 78 (AU section 319), the amendment conforms the description of the elements of an entity's internal control to the components of internal control contained in COSO. SSAE No. 6 (AT section 400) is effective for examinations of management's assertion if the assertion is as of or for the period ending on December 15, 1996, or thereafter. Earlier application is encouraged.

SAS No. 79, *Amendment to Statement on Auditing Standards No. 58*, Reports on Audited Financial Statements

.11 In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58*, Reports on Audited Financial Statements (AU section 508), which eliminated the requirement that, if certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. The Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996.

.12 Before the issuance of this Statement (AU section 508), if the chance of a material loss resulting from the resolution of an uncertainty was at least reasonably possible, the auditor was required to consider adding an explanatory paragraph to an unqualified report describing the matter giving rise to the uncertainty and indicating that the outcome of the uncertainty could not be determined at the time. Now, if such a matter is presented and disclosed in the financial statements in accordance with generally accepted accounting principles (GAAP), the auditor should issue a standard report.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.13 In addition to eliminating uncertainties paragraphs, SAS No. 79 (AU section 508)—

- Clarifies the guidance concerning emphasis paragraphs to indicate that such paragraphs are never required and are always optional. Emphasis paragraphs may be added to an auditor's report to emphasize a matter disclosed in the financial statements. They point to information already disclosed in the financial statements rather than introducing new information.
- Continues to allow an auditor to disclaim an opinion on financial statements because of a matter involving an uncertainty.
- Indicates that an unresolved uncertainty in the current year that gave rise to an uncertainties paragraph in the prior year does not require the addition of such a paragraph in the current year's report or retention of the paragraph in a reissued report on the prior year's financial statements.
- Does not affect the provisions of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), which requires that an auditor add an explanatory paragraph to the auditor's report if there is substantial doubt about an entity's ability to continue as a going concern.

SAS No. 80, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter

.14 In December 1996, the ASB issued SAS No. 80 entitled *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter (AU section 326). The Statement (AU section 326) provides guidance to auditors engaged to audit the financial statements of entities for which significant information is transmitted, processed, maintained, or accessed electronically. The Statement (AU section 326) includes examples of evidential matter in electronic form and provides that an auditor should consider the period during which electronic evidential matter will be in existence or be available in determining the nature, timing, and extent of substantive tests. In addition, the Statement (AU section 326) indicates that an auditor may determine that in certain engagements for which evidential matter is in electronic form, it would not be practical or possible to reduce detection risk to an acceptable level by performing only substantive tests. The Statement (AU section 326) provides that, in such circumstances, the auditor should consider performing tests of controls to support an assessed level of control risk below the maximum for affected assertions. SAS No. 80 (AU section 326) is effective for engagements beginning on or after January 1, 1997.

.15 In the first quarter of 1997, an Auditing Procedure Study (APS) entitled *The Information Technology Age: Evidential Matter in the Electronic Environment* will be issued. The APS provides guidance to auditors in applying SAS No. 80 (AU section 326) by describing electronic evidence and illustrating the implications of electronic evidence on the audit and possible audit approaches. The APS includes two case studies that present approaches an auditor might use to audit the financial statements of entities for which the electronic environment and the use of information technology significantly affect information and transactions.

SAS No. 81, *Auditing Investments*

.16 In December 1996, the ASB issued SAS No. 81, *Auditing Investments* (AU section 332), which revises the guidance on auditing investments to make that guidance consistent with recently issued accounting standards, particularly Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80). SAS No. 81 (AU section 332) supersedes SAS No. 1, section 332, *Long-Term Investments,* which required updating because it is based on FASB Statement No. 12, *Accounting for Certain Marketable Securities,* an accounting standard that was superseded by FASB Statement No. 115 (AC I80). The new Statement (AU section 332) also deletes Interpretation No. 1 of SAS No. 1, section 332, entitled "Evidential Matter for the Carrying Amount of Marketable Securities."

.17 SAS No. 81 (AU section 332) is applicable to audits of financial statements that contain assertions about investments in debt securities and equity securities (as those terms are defined in FASB Statement No. 115 [AC I08]) and investments accounted for under Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* (AC I82). It also is applicable to audits of presentations covered by SAS No. 62, *Special Reports* (AU section 623), that contain such assertions.

.18 The new Statement (AU section 332) provides guidance to auditors on evaluating management's intent related to an investment and an entity's ability to hold a debt security to maturity. Such guidance is important because the intent and ability to hold a security to maturity affect the accounting for investments under FASB Statement No. 115 (AC I08). The Statement (AU section 332) also contains guidance on auditing assertions about the valuation of investments, including guidance on auditing investments carried at cost and fair value.

.19 Finally, the Statement (AU section 332) contains guidance on evaluating other-than-temporary impairment conditions related to an investment. The auditor considers whether evidence related to factors about other-than-temporary impairment conditions corroborates or conflicts with management's conclusions. The guidance in SAS No. 81 (AU section 332) regarding investments accounted for using the equity method of accounting is generally unchanged from the guidance contained in the previous standard.

.20 SAS No. 81 (AU section 332) is effective for audits of financial statements for periods ending on or after December 15, 1997, with early application permitted.

SAS No. 82, *Consideration of Fraud in a Financial Statement Audit*

.21 In November 1996, the AICPA's ASB voted to ballot the proposed Statement on Auditing Standards, *Consideration of Fraud in a Financial Statement Audit,* for issuance as a final Statement (AU section 316). The new standard (AU section 316) will supersede SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316A). The standard (AU section 316) will provide auditors with expanded guidance on the consideration of fraud in conducting a financial statement audit. It will strengthen the auditor's ability to fulfill his or her responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether caused by error or fraud.

.22 The standard (AU section 316) describes the types of fraud and requires the auditor to specifically assess the risk of material fraud in every audit. It also provides separate categories of risk factors for fraudulent financial reporting (management fraud) and misappropriation of assets (theft) that require auditor consideration.

.23 In addition, the new standard (AU section 316) provides procedural guidance and examples of how the auditor can respond to the presence of fraud risk factors. The standard (AU section 316) reaffirms the requirement that the auditor communicate known instances of fraud to appropriate levels of management and the audit committee and, under certain circumstances, appropriate regulators.

.24 The AICPA's current effort regarding the detection of fraud in financial statements began in 1993. The standard (AU section 316) is responsive to both the AICPA Board of Directors' 1993 policy statement, *Meeting the Financial Reporting Needs of the Future: A Public Commitment From the Public Accounting Profession,* and the Public Oversight Board's recommendations in its 1993 report, *In the Public Interest.*

.25 The ASB expects to issue the standard (AU section 316) in the first quarter of 1997. The Statement (AU section 316) is effective for audits of financial statements for periods ending on or after December 15, 1997. The following are some questions and answers that will assist in explaining the need for the new standard (AU section 316), and highlighting some of the significant changes.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

1. *Q* Why is the ASB issuing a new standard (AU section 316) on fraud?

   A The ASB is issuing the new standard (AU section 316) to enhance auditor performance. The standard (AU section 316) will provide auditors with expanded operational guidance on the consideration of material fraud in conducting a financial statement audit. It will aid the auditor in fulfilling his or her responsibility to plan and perform the audit to obtain reasonable assurance about whether financial statements are free of material misstatement, whether caused by error or fraud. The standard (AU section 316) is thus expected to drive auditor performance.

2. *Q* What does the standard (AU section 316) require?

   A The standard (AU section 316) requires the auditor to—

   - Specifically assess the risk of material misstatement due to fraud. (The standard (AU section 316) provides categories of fraud risk factors that the auditor should consider.)
   - Respond to the results of the assessment.
   - Document the fraud risk factors identified and the responses to those risk factors.

   The standard (AU section 316) also reaffirms the auditor's responsibility to communicate fraud to management, the audit committee, and, under some circumstances, appropriate regulators.

3. *Q* How will the independent auditor's responsibility for the detection of material fraud (fraud that would result in a material misstatement in an entity's financial statements) change with the new standard (AU section 316)?

   A The auditor's responsibility will not change. The standard (AU section 316) reaffirms the independent auditor's current responsibility, that is, to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. However, the ASB concluded that performance standards are needed to support the auditor in executing that responsibility.

4. *Q* How will the new standard (AU section 316) affect audit fees?

   A The effect will vary. Some organizations have very strong internal control. In these organizations, management is concerned about fraud and its effects on the entity, and there are controls that are designed to prevent and detect fraud. For these organizations, the effect on audit fees will not be significant. For organizations with fraud risk factors that are not effectively addressed by management, the costs will be greater. The profession believes that the public interest benefits will outweigh the additional cost. Also, organizations concerned about such costs can take active measures to reduce them by, for example, implementing controls designed to prevent and detect fraud.

5. *Q* In what other ways will the new standard (AU section 316) affect entities under audit?

   A The new standard (AU section 316) will require the auditor to ask management about the risk of fraud and whether management has knowledge of fraud that has been perpetrated on or within the entity. The auditor also will be expected to communicate to management any risk factors that the auditor identifies. This is expected to have the salutary effect of encouraging management to improve fraud prevention and detection techniques.

6. *Q* How will the new standard (AU section 316) help the auditor?

   A The new standard (AU section 316) describes fraud and its characteristics. It also provides examples of fraud risk factors that, when present, might indicate the existence of fraud. The standard (AU section 316) also explains how the auditor should respond to the risk of material misstatement due to fraud.

7. *Q* How does the standard (AU section 316) serve the public interest?

   A This new procedural guidance on fraud detection will help auditors better serve the public interest by increasing their ability to detect material misstatements in financial statements caused by fraud. The public interest is served by adding independent assurance to the credibility of financial statements upon which our capital and credit markets depend.

8. *Q* Is there a connection between this standard (AU section 316) and the securities litigation reform legislation passed in 1995?

   A Although the new standard (AU section 316) is not directly related to the 1995 legislation, it reminds auditors of the legislative requirements. Title III of the Private Securities Litigation Reform Act of 1995 (P.L.104-67) incorporates the auditor's present responsibility for the detection of material fraud, and shortens the time frame for reporting findings to the Securities and Exchange Commission (SEC), if such reporting is required.

.26 The AICPA recognizes its responsibility to help auditors understand and implement this standard (AU section 316) and is undertaking a major initiative to assist auditors in attaining that objective. This initiative will include the following.

- *Communication*—These initiatives will include a coordinated effort to inform the public and the business community about the new Statement (AU section 316) on fraud and a series of presentations, given by members of the ASB and the Fraud Task Force, discussing the new Statement (AU section 316) (to be held in several major United States cities in May 1997). The AICPA is also developing a video presentation of a panel of representatives from both large and small firms discussing implementation issues.
- *Implementation Guidance*—A nonauthoritative guide, to be available upon issuance of the final Statement (AU section 316) or shortly thereafter, will provide practical guidance on implementing the new Statement (AU section 316). A case study and sample nonauthoritative documentation, such as audit engagement letters and client representation letters, will be included. The guide will also identify risk factors that may be considered in assessing the risk of fraud for specific industries.
- *Training and Education*—Group and self-study courses on the auditor's consideration of fraud in a financial statement audit will be developed.
- *Additional Interpretative Guidance*—Questions and answers on issues that practitioners may face in implementing the new Statement (AU section 316) will be developed.

A complete list of AICPA implementation efforts will be published when the new Statement (AU section 316) is issued in the first quarter of 1997.

Auditing and Attestation Interpretations Issued in 1996

.27 In 1996, the AITF of the ASB issued two Interpretations and an additional Interpretation will be issued in January 1997, and all three are discussed below. Interpretations are issued by the AITF to provide timely guidance on the application of ASB pronouncements and are reviewed by the ASB. An Interpretation is not as authoritative as a pronouncement of the ASB; however, practitioners should be aware that they may have to justify departures from an Interpretation if the quality of their work is questioned.

.28 *Financial Statements for General Use Only Outside of the United States in Accordance With International Accounting Standards and International Standards on Auditing.* In May 1996, the AITF issued an auditing Interpretation of SAS No. 51, *Reporting on Financial Statements Prepared for Use in Other Countries* (AU section 534), entitled "Financial Statements for General Use Only Outside of the United States in Accordance With International Accounting Standards and International Standards on Auditing" (AU section 9534.01–.04). The

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Interpretation (AU section 9534.01–.04) indicates that an auditor practicing in the United States may report on the financial statements of a United States entity in conformity with the International Accounting Standards (IAS) for general use only outside of the United States. In addition, the Interpretation (AU section 9534.01–.04) states that an auditor may perform an audit in accordance with the International Standards on Auditing (ISA) if the financial statements are presented in conformity with the IAS provided that the general and fieldwork standards of United States generally accepted auditing standards (GAAS) and any additional requirements of the ISA are followed.

.29 *Providing Regulators Access to or Photocopies of Working Papers.* In May 1996, the AITF issued an attestation Interpretation of SSAE No. 1, *Attestation Engagements* (AT section 100), entitled "Providing Access to or Photocopies of Working Papers to a Regulator" (AT section 9100.56–.59). The Interpretation (AT section 9100.56–.59) states that Interpretation No. 1 of SAS No. 41, *Working Papers* (AU section 339), entitled "Providing Access to or Photocopies of Working Papers to a Regulator" (AU section 9339.01–.15), applies to attestation engagements if a regulator requests access to or photocopies of working papers. Illustrative letters to a regulator for an examination and agreed-upon procedures engagements are included in the Interpretation (AT section 9100.56–.59).

.30 *Lawyers' Responses to Audit Inquiry Letters.* The AITF will issue an auditing Interpretation of SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AU section 337), in January 1997, entitled "Use of Explanatory Language Concerning Unasserted Possible Claims or Assessments in Lawyers' Responses to Audit Inquiry Letters" (AU section 9337.31–.32). The Interpretation (AU section 9337.31–.32) indicates that the inclusion of certain explanatory comments to emphasize the preservation of the attorney-client privilege, in responses by lawyers to audit inquiry letters, does not result in an audit scope limitation. The Interpretation (AU section 9337.31–.32) also reminds auditors of the requirement in SAS No. 12 (AU section 337) to obtain the lawyer's acknowledgment of his or her responsibility to advise and consult with the client concerning financial statement disclosure obligations for unasserted possible claims or assessments.

Developments in Quality Control and Peer Review

New Statements on Quality Control Standards

.31 In May 1996, the ASB issued two new Statements on Quality Control Standards (SQCS), Nos. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). The new Statements (QC sections 20 and 30) supersede SQCS No. 1, *System of Quality Control for a CPA Firm* (QC section 10), and provide guidance for developing a system of quality control for a firm's accounting and auditing practice.

.32 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the Accounting and Review Services Committee (ARSC) under Rules 201, *General Standards* (ET section 201.01), and 202, *Compliance With Standards* (ET section 202.01), of the AICPA *Code of Professional Conduct*, and any other professional standards that may be issued by the aforementioned standard setters in the future. Before the issuance of SQCS No. 2 (QC section 20), attestation services were not specifically addressed in the quality control standards because the SSAEs had not been issued when SQCS No. 1 (QC section 10) was promulgated. The revised definition now makes it clear that attestation services must be included in a firm's quality control system.

.33 SQCS No. 2 (QC section 20) replaces the nine elements of quality control presented in SQCS No. 1 (QC section 10) with five broad elements of quality control. It does not establish any new elements but instead combines and renames the previous elements as shown in the following table.

Old *Nine Elements of SQCS No. 1*	*Change*	*New* *Five Elements of SQCS No. 2*
Independence	The independence element is expanded to include integrity and objectivity. Firms are now required to establish policies and procedures assuring that personnel perform all professional responsibilities with integrity and maintain objectivity while performing those responsibilities.	Independence, integrity, and objectivity
• Hiring • Advancement • Assigning personnel to engagements • Professional development	Four elements are combined into a single element. This element also adds a requirement that firms establish policies and procedures to meet the continuing professional education requirements of the AICPA and regulatory agencies.	Personnel management
Acceptance and continuance of clients	The name of this element is modified because SQCS No. 2 (QC section 20) requires that firms consider the acceptance of client engagements in addition to considering client relationships. SQCS No. 2 (QC section 20) also requires a firm to establish policies and procedures that provide reasonable assurance that a firm will accept only those engagements it can complete with due professional competence. Firms also must have policies and procedures in place requiring them to obtain an understanding with their client of the nature, scope, and limitations of the services they will perform.	Acceptance and continuance of clients and engagements
• Supervision • Consultation	These two elements are combined and referred to as activities within the new element of engagement performance.	Engagement performance
Inspection	*Monitoring* is defined as an ongoing consideration and evaluation relating to the design and application of each of the other elements of quality control. Inspection becomes subsumed under the new element of monitoring. SQCS No. 3 (QC section 30) provides guidance on how a CPA firm can monitor its accounting and auditing practice.	Monitoring

.34 SQCS Nos. 2 (QC section 20) and 3 (QC section 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997. Firms with well-established quality control systems should not have to make significant modifications to their policies and procedures as a result of the issuance of these new standards.

.35 To help firms implement the new standards, a booklet entitled *Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice* has been issued. The guide includes illustrative examples of four hypothetical firms and the suggested policies and procedures for the design and maintenance of a quality control system that is appropriate for each firm's accounting and auditing practice. A firm's policies and procedures should be sufficient for it to obtain reasonable assurance of complying with the requirements of SQCS Nos. 2 (QC section 20) and 3 (QC section 30), and the illustrative examples depict various types of policies and procedures that a firm may consider for each of the elements of quality control.

Standards for Performing and Reporting on Peer Reviews

.36 The AICPA Peer Review Board (the Board) has voted to ballot for final issuance a proposed standard that updates the *Standards for Performing and Reporting on Peer Reviews* (PR section 100) to reflect the recently issued SQCS Nos. 2 (QC section 20) and 3 (QC section 30) discussed in paragraphs .31 through .35 of this Audit Risk Alert. In addition, the Board believes there was a need to reevaluate the overall guidance provided in the standards.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.37 The following are some of the significant provisions of the new standard.

- The new standard expands the definition of an accounting and auditing practice for the purposes of performing and reporting on a peer review to include attest services on financial information if the firm audits, reviews, or compiles the historical financial statements of the client.
- A firm that performs any engagement covered by the Statement on Auditing Standards must have an on-site peer review. This means that if the only engagements performed by a firm are engagements to apply agreed-upon procedures under SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), the firm would be required to have an on-site peer review. SAS No. 75 (AU section 622) is applicable if a practitioner applies agreed-upon procedures to specified elements, accounts, or items of a financial statement, such as accounts receivable aged over thirty days, average monthly sales, or the amounts included in the property and equipment account.
- The restriction prohibiting a team captain from serving in that capacity for more than two successive reviews of the same firm is eliminated. The responsibility for determining when and whether it is appropriate to rotate reviewers is placed in the hands of the reviewed firm. As a result, the new standard does not restrict the number of successive reviews a firm or individual may perform.
- The peer review is to be planned and performed using a risk-based approach in the same way that an audit is planned and performed using a risk-based approach. Examples of factors to consider in a risk-based approach include the size of the entity, the industry in which the entity operates, the level of service being performed, entity personnel, litigation in the industry in which the entity operates, and whether the engagement is an initial engagement.

The effective date of the proposed standard is for peer reviews with year ends of December 31, 1997, or later.[1]

Responding to Peer Review Letters of Comments

.38 During fieldwork in a peer review, the reviewer will inform the reviewed firm of any deficiencies noted during the peer review, and generally will note those deficiencies on a form entitled "Matter for Further Consideration" (MFC). The reviewed firm will have the opportunity to discuss the identified deficiencies during the peer review and to respond in writing concerning the deficiencies on the response section of the MFC form. Because peer review is a subjective process, there may be differences of opinion between the reviewer and the reviewed firm as to whether a deficiency exists that is not resolved to the reviewed firm's satisfaction. In such circumstances, the reviewed firm should ask the reviewer to cite the applicable section of the professional standards or the reviewed firm's policies that support the reviewer's conclusion that a deficiency exists. Ordinarily, such matters are resolved before the exit conference. If the reviewed firm is still dissatisfied with the reviewer's conclusions, the reviewer or reviewed firm should consult with the entity administering the peer review or the AICPA Peer Review Program at (201) 938-3030. If the matter is not resolved through consultation, the reviewed firm should respond to the reviewer's letter of comments by addressing each deficiency noted and citing the section of the professional standards that supports the reviewed firm's view. The state CPA society peer review committee, or the SEC Practice Section Peer Review Committee, if applicable, will then attempt to resolve the disagreement.

.39 Many professional standards require the use of professional judgment; accordingly, a reviewed firm should not assume that the reviewer's interpretation is always the correct one. If a reviewer identifies deficiencies in an engagement, it is in the reviewed firm's best interest to read the applicable section of the standards to broaden his or her knowledge of the subject and to verify that the comment is applicable to that particular situation.

[1] This is a revised effective date. The effective date in the exposure draft of the proposed standard was for peer reviews beginning on or after January 1, 1997.

Audit Issues and Audit Problems to Watch For

Revenue Recognition

.40 Improper revenue recognition continues to be a primary cause of misstated financial statements, and sometimes these misstatements are intentional. This problem continues to arise in litigation involving high technology clients. The use of side agreements that relieve the customer of some of the customary risks and rewards of ownership is frequently associated with improper revenue recognition. Examples of such practices are shipping merchandise to customers without proper authorization from the customer, shipping merchandise to company-owned warehouses and billing fictitious customers, and making sales arrangements that obligate the customer to pay only upon resale.

.41 Because very few individuals within the client organization may be aware of side agreements, it is often difficult to discover their existence. If accounting and financial personnel are not aware of side agreements, management representations and standard audit procedures in the revenue and accounts receivable areas will not be an adequate audit response to this problem.

.42 If there is a significant risk of undisclosed side agreements, in addition to confirming account balances and material revenue transactions, the auditor should confirm relevant contract terms with customers to obtain assurance that side agreements do not exist. Such confirmations should be addressed to the contract signer and not to the accounts payable department.

Updating Legal Letters

.43 SAS No. 12 (AU section 337) requires the auditor to ask his or her client to send a letter of audit inquiry to the client's lawyer to corroborate information furnished by management concerning litigation, claims, and assessments. The latest date of the period covered by legal counsel's response should be as close to the completion of fieldwork as is practicable in the circumstances. The timing of the auditor's request should be carefully planned to assure that this is accomplished. However, if completion of the fieldwork has been delayed, or for other reasons the attorney's response date is significantly earlier than the date of the completion of fieldwork, the auditor should request that the attorney update his or her response. An oral update, documented in the audit working papers, may be acceptable if there have been no changes from the previously received letter, or if any changes that have occurred are relatively simple and straightforward (the lawsuit was dismissed or settled at no cost to the client). However, for important matters discovered in oral updates, including new litigation or significant additional matters relating to prior litigation, it is good practice to confirm these in writing.

Undisclosed Related Parties and Related-Party Transactions

.44 Auditors should be alert to indicators of undisclosed related-party transactions that may be a source for fraudulent financial reporting. Indicators of possible undisclosed related parties include the following:

- A complex corporate structure with restrictions on the disclosure of ownership or the identity of shareholders
- Entities that conduct material intercompany transactions with each other and that are audited by different firms
- Highly complex business practices that facilitate management's ability to mask their economic substance
- The existence of unique, highly complex, and material transactions that pose difficult questions relating to their business purpose

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.45 Examples of transactions that might indicate previously undisclosed related parties include the following:

- Significant and unusual transactions at or near year end, particularly those for which significant income is recognized, even if the full sales proceeds have been remitted
- Significant purchases from new suppliers or sales to new customers during the course of the year that seem unusual as to location, quantity, price, or terms
- Borrowings from unusual sources at below-market interest rates
- Sales or nonmonetary exchanges of recently acquired noncurrent assets such as wine or works of art at significant gains (Such assets, if they appreciate in value at all, tend to do so over a long period.)

.46 The AICPA's Division for CPA Firms—Professional Issues Task Force has issued Practice Alert No. 95-3 entitled *Auditing Related Parties and Related-Party Transactions*. This Practice Alert describes how related parties may be used to commit and conceal fraud, provides guidance on identifying related parties and related-party transactions that are not voluntarily disclosed by management, and provides guidance on how to respond to a heightened risk of the use of related parties to commit fraud. The Practice Alert appears in the November 1995 issue of *The CPA Letter*.

Discontinued Operations

.47 Accounting for discontinued operations with a measurement date after the balance-sheet date but before the issuance of the financial statements is controversial. Emerging Issues Task Force (EITF) Consensus Position No. 95-18 describes the appropriate GAAP accounting. In summary, the EITF concluded that the following presumptions exist if a loss is expected from the planned disposal of a segment.

1. The estimated loss, as determined in accordance with APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13), should be recognized in the not-yet-issued financial statements for the period prior to the measurement date.
2. The segment should be presented as a discontinued operation in the income statement of the not-yet-issued financial statements.

.48 If a gain is expected, or if the loss presumption is overcome, the segment's operating results should be shown as discontinued operations.

Management Reports on Internal Control Over Financial Reporting

.49 As in the past, annual reports to shareholders this year may include comments by management about its responsibility for the financial statements and internal control over financial reporting. Interpretation No. 3 of SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550), entitled "Other References by Management to the Internal Control Structure Over Financial Reporting, Including References to the Independent Auditor" (AU section 9550.12–.15), generally prohibits management from stating in its management report or elsewhere in the document that the auditor has not identified any material weaknesses in internal control in connection with the audit unless a separate, full examination of internal control has been performed and a report has been issued in accordance with SSAE No. 2, *Reporting on an Entity's Internal Control Over Financial Reporting* (AT section 400).

.50 If the annual report contains an assertion by management about the effectiveness of the entity's internal control over financial reporting that implies the auditor's endorsement of the assertion, and the auditor has not been engaged to examine that assertion, the auditor should request that management revise the wording of the assertion. In the rare instances in which the client does not agree to revise the wording,

the auditor should follow the guidance in paragraph 6 of SAS No. 8 (AU section 550.06), which indicates that the auditor should notify the client in writing about his or her concerns, and consult with legal counsel about additional actions.

Predecessor/Successor Auditor—Access to Working Papers

.51 SAS No. 7, *Communications Between Predecessor and Successor Auditors* (AU section 315), indicates that a predecessor auditor ordinarily should permit a successor auditor to review working papers relating to matters of continuing accounting significance. Frequently, predecessor auditors request that the successor auditor agree, in writing, to certain conditions concerning the use of the predecessor's working papers. Such agreements are designed to protect the predecessor auditor from litigation that may result from information obtained from the predecessor's working papers.

.52 Although the ASB has not reached a conclusion on this matter, several public accounting firms believe that the use of this type of written agreement better serves the public interest and the profession. The use of a written agreement in practice has provided successor auditors with greater access to the predecessor auditor's working papers. Greater access can assist a successor auditor in identifying and evaluating audit risk when planning a first-time audit. Also, broader access to working papers could have a favorable effect on the profession's litigation experience, particularly in light of the fact that many claims are related to audits performed in the first or second year of a client relationship.

.53 Following are examples of items that a predecessor auditor might request a successor auditor to agree to in writing concerning the use of the predecessor's working papers.

- The review of the predecessor's working papers is undertaken solely for the purpose of obtaining an understanding about the client and certain information about the predecessor's audit.
- Due to the successor's limited access to the predecessor's working papers, the successor will not comment orally or in writing to anyone as a result of the review as to whether the engagement was performed in accordance with GAAS.
- The successor will not provide expert testimony or litigation support services, or accept an engagement to comment on issues relating to the quality of the predecessor's audit, and will not use the audit procedures or results thereof documented in the predecessor's working papers as evidential matter in rendering his or her opinion except as contemplated in SAS No. 7 (AU section 315).
- The successor understands the purpose for which the working papers were prepared, and does not intend to rely upon the audit results documented therein as part of the audit evidence in rendering an opinion on the current-year financial statements.
- The successor agrees to subject any copies of the working papers obtained from the predecessor to his or her working paper retention policy.
- The successor will obtain permission before voluntarily allowing any third-party access to the working papers and information otherwise derived from them and will obtain on behalf of the predecessor any releases that the successor may have obtained by such third parties.
- The successor will provide the predecessor with copies of any subpoena, summons, or other court order for access to the working papers that include copies of the working papers provided by the predecessor auditor or information otherwise derived therefrom.

The Wrong "Tone at the Top" Can Lead to Fraudulent Financial Reporting

.54 Here is an example of how one company's pursuit of double-digit sales and earnings growth got out of hand.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.55 The company, a manufacturer and distributor, enjoyed over a decade of double-digit growth in sales and earnings. However, insistence by top management on maintaining that growth rate resulted in practices by certain divisions that appeared to have led to falsified financial statements.

.56 Apparently, the message from the top was to achieve the numbers at all costs. The pressure to achieve management's sales forecasts was fueled by unrelenting criticism of those who failed to achieve the targets, and a bonus plan that punished those who fell even slightly below budget while generously rewarding those who exceeded the budget. Bonus computations gave little weight to controlling assets such as receivables and inventories. Further, in some instances, the failure to meet the targeted goals may have resulted in dismissal. Top management and its auditors ultimately were alerted to these activities by the soaring receivables in the various divisions. Some of the alleged practices that led to inflated sales are highlighted in the following.

- In December 1993, a meeting was held with a number of the company's wholesale distributors at which they were allegedly instructed to take huge stocks of old inventory (up to two years' worth) or lose their exclusive distributorships. However, at the same time many of the distributors were told verbally that they would not have to pay for the merchandise until they in turn had sold it (a form of *side agreement*). The result—millions of dollars of sales booked in the final days of 1993, with much of the merchandise returned in 1994.
- In addition to offering extended payment terms and rebates for large orders, one division would ship merchandise that was not even ordered (there were no purchase orders) and book the shipments as sales.
- In one of the foreign locations, to achieve sales targets, the manager prepared invoices showing false sales to distributors and shipped millions of dollars of merchandise to a warehouse. This scheme unraveled when the accounts receivable jumped so significantly that the company had to investigate. The company's auditors later discovered that the goods were still on hand.

.57 A careful assessment of the control environment, particularly the emphasis that top management places on the bottom line and how management motivates lower level executives and employees to meet targeted results, coupled with a careful analysis of the financial statements, may identify a heightened risk of fraud.

Audit Communication and Reporting Issues

Going Concern

.58 As required by GAAS, auditors should assess in every audit, the entity's ability to continue as a going concern for one year from the date of the audited balance sheet. Examples of conditions or events that might raise doubts about an entity's ability to continue as a going concern include the following:

- Negative cash flow from either current operations or forecasted results for the coming year
- Declining revenues accompanied by losses from continuing operations
- Adverse key financial rations such as negative net worth or negative working capital
- Loss of or significant declines in orders from major customers
- Noncompliance with statutory capital requirements
- Lawsuits or other significant loss contingencies such as those related to environmental or uninsured catastrophic events
- Loan defaults
- Preferred dividend arrearages

- Denial of the usual trade credit from suppliers
- Departures of key personnel, for example, the departure of a top research scientist from a biotech firm.

.59 If the auditor believes that the presence of one or more conditions or events raises a question as to the validity of the going-concern assumption, ordinarily the key audit issue is whether management's plans, if any, for addressing the problem are appropriate and achievable. If management's plans relate primarily to the success of future normal operations for the coming year, the auditor should review the assumptions underlying management's forecast and become satisfied that the forecasted results are reasonable in light of past experience and that any significant differences are suitably supported. If management's plans relate primarily to the disposition of assets, or another single event (for example, signing up a major new customer), the auditor should consider whether sufficient evidence currently exists (for example, the existence of an identified financially capable and committed buyer or customer) to enable the auditor to conclude that it is more likely than not that management will be successful.

.60 If the auditor still has substantial doubt about the entity's ability to continue as a going concern, the report language should be unequivocal. Auditors should not use conditional language in expressing substantial doubt about an entity's ability to continue as a going concern. Examples of inappropriate conditional language include, "If the company continues to incur operating losses, there may be substantial doubt..." or "The company has been unable to renegotiate its expiring credit agreements; unless the company is able to obtain financial support there is substantial doubt..." Guidance on the appropriate language for a going-concern explanatory paragraph is provided in paragraphs 13 and 14 of SAS No. 59 (AU section 341.13 and .14).

Lessons From Litigation

.61 Not every financial disaster befalling a client is the result of an audit failure, even though all too frequently the auditor is sued because the audit firm is perceived to have failed to properly perform its work diligently and because the investors or creditors want to "bail out" of a bad decision. On the other hand, there are audit failures.

.62 Audit failures continue to be uncovered with startling regularity. In many cases, the presumed audit failure relates to situations in which management has decided to account for certain transactions incorrectly and to withhold that decision from the auditors. In other cases, management initiates and perpetrates a fraud for its own benefit. Auditors need to increase their diligence to uncover situations in which management is deliberately misstating the books and records.

.63 The following are some of the more common audit issues identified in litigation and audit failures:

- Willingness to accept management's representations without corroboration
- Allowing the client to unduly influence the scope of the auditing procedures
- Accepting the accounting for transactions, especially revenue recognition, without thoroughly understanding relevant GAAP or all the facts surrounding the transactions
- Failure to obtain and read contracts
- Failure to identify risky situations, or ignoring identified audit risks, by not applying professional skepticism and revising auditing procedures appropriately
- Not examining year-end transactions critically
- Ignoring or failing to understand the client's business, including its distribution channels and the environment in which it operates

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Misusing the summary of unadjusted differences to justify accounting that is wrong and should be corrected
- Not using specialists in such fields as insurance, pensions, and derivatives
- Accepting accounting estimates at the low (but acceptable) end of a range without extending auditing procedures or communicating the matter to the audit committee

.64 A number of these cases involve either management fraud or deliberate deceit by management in working with auditors. Nevertheless, there may be signs of material errors or fraud that under GAAS should lead the auditors to perform additional procedures. Perhaps, if the auditor extends the auditing procedures or takes a firmer stance earlier, many of the failures would be avoided.

Analysis of International Standards on Auditing

.65 An auditor practicing in the United States may be engaged to audit financial statements in accordance with International Standards on Auditing (ISAs) (AU sections 8100–10,090). In such circumstances, the U.S. auditor should comply with both the ISAs and the SASs. An engagement of this nature is ordinarily conducted by performing an audit in accordance with U.S. auditing standards and then performing any additional procedures required by the ISAs. To help auditors perform such engagements, an analysis has been prepared that identifies the sections and paragraphs of the ISAs that contain procedural or documentation requirements that go beyond the requirements of U.S. auditing standards or that conflict with U.S. standards. A brief description of how the international standard differs from the U.S. standard is also provided. The analysis is entitled *Analysis of International Standards on Auditing* and is AU appendix B of the "Statements on Auditing Standards" (AU appendix B).

Recent GAAP Requirements

Authoritative Pronouncements Becoming Effective in 1996

.66 A number of authoritative accounting pronouncements, issued before 1996, have delayed effective dates for certain reporting entities and will be implemented for the first time in 1996 by those entities. Following is a brief overview of a number of the pronouncements becoming effective in 1996 that auditors should be aware of. When applying these pronouncements, auditors should refer to the complete professional standard.

.67 FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), extends existing fair-value disclosure practices for some instruments by requiring all entities to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement (AC F25) requires the disclosure of descriptive information pertinent to estimating the value of a financial instrument. Appendix A of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), provides examples of instruments that are included in and excluded from the definition of a financial instrument. FASB Statement No. 107 (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1992, except for entities with less than $150 million in total assets. For those entities, the effective date is for fiscal years ending after December 15, 1995.

.68 FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC C67), and FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC No5), are both effective for fiscal years beginning after December 15, 1994, except for not-for-profit organizations with less than $5 million in total assets and less than $1 million in annual expenses. For those organizations, the effective date is for fiscal years beginning after December 15, 1995. FASB Statement No. 116 (AC C67) establishes accounting standards for contributions and applies to all entities that receive or make contributions. Generally, contri-

butions received, including unconditional promises to give, are recognized as revenues in the period received at their fair values. Contributions made, including unconditional promises to give, are recognized as expenses in the period made at their fair values. Conditional promises to give, whether received or made, are recognized when they become unconditional, that is, when the conditions are substantially met. The Statement (AC C67) allows certain exceptions for contributions of services and works of art, historical treasures, and similar assets.

.69 FASB Statement No. 117 (AC No5) establishes standards for general-purpose external financial statements provided by not-for-profit organizations. It requires that those statements include a statement of financial position, a statement of activities, and a statement of cash flows. It also requires the classification of an organization's net assets and its revenues, expenses, gains, and losses based on the existence or absence of donor-imposed restrictions. For implementation guidance on FASB Statement Nos. 116 (AC C67) and 117 (AC No5), refer to the article entitled "Implementing FASB 116 and 117," that recently appeared in the *Journal of Accountancy*.[2]

.70 FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), requires disclosures about the amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. It also amends FASB Statement Nos. 105 (AC F25) and 107 (AC F25) to require that distinction in certain disclosures required by those Statements (AC F25). FASB Statement No. 119 (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1994, except for entities with less than $150 million in total assets. For those entities, the Statement (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1995. For additional guidance on derivatives and FASB Statement No. 119 (AC F25), refer to the following:

- Winograd, Barry N., and Robert H. Herz. "Derivatives: What's an Auditor to Do?" *Journal of Accountancy* (New York: AICPA, June 1995).
- Molvar, Roger H.D., and James F. Green. "The Question of Derivatives." *Journal of Accountancy* (New York: AICPA, March 1995).
- *Derivatives—Current Accounting and Auditing Literature,* A Report Prepared by the Financial Instruments Task Force of the Accounting Standards Executive Committee, AICPA.

.71 FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08), requires that long-lived assets and certain identifiable intangibles (including goodwill) to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. In performing the review for recoverability, the entity should estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets that are covered by APB Opinion No. 30 (AC I13). Assets that are covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of carrying amount or net realizable value. FASB Statement No. 121 (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995, with earlier application encouraged. Restatement of previously issued financial statements is not

[2] Benson, Martha L, Alan S. Glazer, Henry R. Jaenicke, and Kenneth D. Williams, "Implementing FASB 116 and 117," *Journal of Accountancy* (New York: AICPA, September 1995).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

permitted. Impairment losses resulting from the application of the Statement (AC I08) should be reported in the period in which the recognition criteria are first applied and met. The initial application of the Statement (AC I08) to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.72 FASB Statement No. 122, *Accounting for Mortgage Servicing Rights* (AC Mo4), was issued in May 1995 and amends FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), to require that mortgage banking enterprises capitalize the cost of purchased and originated mortgage servicing rights as part of the cost of a mortgage loan and, for mortgage loans sold with servicing rights retained, allocate the cost of the loan between the servicing rights and the loan without the servicing rights based on the relative fair values of each of the components. The gain or loss on the sale of the loan is equal to the sales proceeds less the allocated cost of the mortgage loan; any cost allocated to the mortgage servicing rights is recognized as a separate asset. The Statement (AC Mo4) also includes guidance on estimating the fair values of the components and accounting for the impairment of the capitalized mortgage serving rights and expands the disclosure requirements of FASB Statement No. 65 (AC Mo4). The provisions of the Statement (AC Mo4) are to be applied prospectively in fiscal years beginning after December 15, 1995; special transition provisions apply.

.73 FASB Statement No. 123, *Accounting for Stock-Based Compensation* (AC C36), applies to all transactions in which an entity acquires goods or services by issuing equity instruments or by incurring liabilities to a supplier (an employee or nonemployee) in amounts based on the price of the entity's common stock or other equity instruments. The Statement (AC C36) provides a choice of accounting methods for transactions with employees that are within the scope of APB Opinion No. 25, *Accounting for Stock Issued to Employees* (AC C47). It presents a fair-value based method of accounting for employee stock options or similar equity instruments and encourages all entities to adopt that accounting method for all their employee stock compensation plans. Under the fair-value method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. Entities having transactions with employees that are within the scope of APB Opinion No. 25 (AC C47) may continue to measure compensation cost under that standard. However, if they choose that measurement option, they must make pro forma disclosures of net income and, if presented, earnings per share, as if the fair-value based method of accounting presented in FASB Statement No. 123 (AC C36) had been applied. The fair-value method is preferable to the method presented in APB Opinion No. 25 (AC C47) for purposes of justifying a change in accounting principle under APB Opinion No. 20, *Accounting Changes* (AC A06). Equity instruments issued to acquire goods and services from nonemployees should be accounted for based on the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The Statement (AC C36) is generally effective for fiscal years beginning after December 15, 1995; special transition provisions apply.

.74 FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations* (AC No5), establishes standards for accounting for certain investments held by not-for-profit organizations. It requires that investments in equity securities with readily determinable fair values and all investments in debt securities be reported at fair value with gains and losses included in a statement of activities. The Statement (AC No5) requires disclosures about investments held by not-for-profit organizations and the return on those investments. The Statement (AC No5) also establishes standards for reporting losses on investments held because of a donor's stipulation to invest a gift in perpetuity or for a specified term. The Statement (AC No5) is effective for annual financial statements issued for fiscal years beginning after December 15, 1995. Earlier application is encouraged. The Statement (AC No5) is applied either by restating the financial statements of all prior years presented or by recognizing the cumulative effect of the change in the year of the change. The expiration of restrictions on previously unrecognized net gains may be recognized prospectively.

.75 FASB Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power* (AC C67), interprets paragraph 4 of FASB Statement No. 116 (AC C67.103). Paragraph

4 of FASB Statement No. 116 (AC C67.103) states, "This Statement does not apply to transfers of assets in which the reporting entity acts as an agent, trustee, or intermediary, rather than as a donor or donee." FASB Interpretation No. 42 (AC C67) clarifies that an organization that receives assets acts as a donee and a donor, rather than as an agent, trustee, or intermediary, if a resource provider specifies a third-party beneficiary or beneficiaries and explicitly grants the recipient organization the unilateral power to redirect the use of the assets away from the specified beneficiary or beneficiaries (variance power). The Interpretation (AC C67) is effective for financial statements issued for fiscal years ending after September 15, 1996. Earlier application is encouraged. The Interpretation (AC C67) may be applied either retroactively or by reporting the cumulative effect of the change in the year of the change.

.76 Statement of Position (SOP) 94-3, *Reporting of Related Entities by Not-for-Profit Organizations*, amends and makes uniform the guidance on reporting of related entities in the AICPA Audit and Accounting Guides *Audits of Colleges and Universities* and *Audits of Voluntary Health and Welfare Organizations*, and in SOP 78-10, *Accounting Principles and Reporting Practices for Certain Nonprofit Organizations*. SOP 94-3 provides that the decision as to whether the financial statements of a reporting not-for-profit organization and those of one or several other entities (either not-for-profit organizations or business entities) are to be consolidated should be based on the nature of the relationship between the entities. That relationship also affects the disclosures that the reporting organization is required to make. The guidance in SOP 94-3 focuses on investments in majority-owned for-profit subsidiaries and financially interrelated not-for-profit organizations. SOP 94-3 is effective for financial statements issued for fiscal years beginning after December 15, 1994, except for not-for-profit organizations that have less than $5 million in total assets and less than $1 million in annual expenses. For those organizations, the effective date is for fiscal years beginning after December 15, 1995. Earlier application is permitted. For organizations that adopt FASB Statement No. 117 (AC No5) before its effective date, earlier application of the SOP is encouraged.

.77 Practice Bulletin No. 14, *Accounting and Reporting by Limited Liability Companies and Limited Liability Partnerships*, provides guidance on applying existing accounting literature to limited liability companies (LLCs) and limited liability partnerships (hereinafter referred to as limited liabilities companies or LLCs).[3] LLCs combine the limited liability aspect of corporations with the flow-through tax attributes of partnerships. Because an LLC is formed under state law, its characteristics may vary depending on the state in which it is organized. However, LLCs generally have the following characteristics:

- An LLC is an unincorporated association of two or more "persons."
- Its members have limited personal liability for the debts and obligations of the entity.
- It is classified as a partnership for federal income tax purposes and thus lacks at least two of the four corporate characteristics which include limited liability, free transferability of interests, centralized management, and continuity of life.

Practice Bulletin No. 14 is effective for financial statements issued after May 31, 1995.

Authoritative Accounting Pronouncements Issued in 1996

.78 The following tables list various authoritative accounting pronouncements issued from January 1, 1996, to November 1, 1996, and their effective dates.[4] To order copies, call the FASB at (203) 847-0700, ext. 10.

---

[3] SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report* (AU section 411), identifies AICPA practice bulletins as authoritative ("must know") accounting principles.

FASB Statements of Financial Accounting Standards and Interpretations

	Description	*Effective Date*
FASB Statement No. 125 (AC F38)	*Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*	For transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996; should be applied prospectively
FASB Interpretation No. 42 (AC C67)	*Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power*	For financial statements issued for fiscal years ending after September 15, 1996; earlier application is encouraged

EITF Consensus Positions

EITF Issue No.	*Description*	*Date of Consensus*
96-1	*Sale of Put Options on Issuer's Stock That Require or Permit Cash Settlement*	January 18, 1996
96-3	*Accounting for Equity Instruments That Are Issued for Consideration Other Than Employee Services under FASB Statement No. 123*	March 21, 1996
96-4	*Accounting for Reorganizations Involving Non-Pro Rata Split-off of Certain Nonmonetary Assets to Owners*	May 23, 1996
96-5	*Recognition of Liabilities for Contractual Termination Benefits or Changing Benefit Plan Assumptions in Anticipation of a Business Combination*	March 21, 1996
96-7	*Accounting for Deferred Taxes on In-Process Research and Development Activities Acquired in a Purchase Business Combination*	May 23, 1996
96-8	*Accounting for a Business Combination When the Issuing Company Has Targeted Stock*	May 23, 1996
96-10	*Impact of Certain Transactions on the Held-to-Maturity Classification under FASB Statement No. 115*	May 23, 1996
96-11	*Accounting for Forward Contracts and Purchased Options to Acquire Securities Covered by FASB Statement No. 115*	May 23, 1996
96-14	*Accounting for the Costs Associated with Modifying Computer Software for the Year 2000*	July 18, 1996
96-17	*Revenue Recognition under Long-Term Power Sales Contracts That Contain both Fixed and Variable Pricing Terms*	September 18–19, 1996

EITF Issue No.	Description	Date of Consensus
96-21	*Implementation Issues in Accounting for Leasing Transactions Involving Special-Purpose Entities*	September 18–19, 1996
96-22	*Applicability of the Disclosures Required by FASB Statement No. 114 When a Loan is Restructured in a Troubled Debt Restructuring into Two (or More) Loans*	September 18–19, 1996

SOP 96-1, *Environmental Remediation Liabilities*

.79 In October 1996, the AcSEC issued SOP 96-1, *Environmental Remediation Liabilities*, which provides accounting guidance for the recognition, measurement, display, and disclosure of environmental remediation liabilities. The SOP requires that environmental remediation liabilities be accrued when the criteria in FASB Statement No. 5, *Accounting for Contingencies* (AC C59), are met. The SOP includes benchmarks to aid in the determination of when environmental remediation liabilities should be recognized in accordance with FASB Statement No. 5 (AC C59). Examples of such benchmarks are when an entity is identified as a potentially responsible party (PRP) and when a feasibility study is completed. The SOP also requires that the accrual for environmental remediation liabilities include the incremental direct costs of the remediation effort and the costs of compensation and benefits for employees who are expected to devote a significant amount of time directly to the remediation effort, to the extent of the time expected to be spent directly on the remediation effort. The measurement of the liability should—

- Include the entity's allocable share of the liability for a specific site, and the entity's share of amounts that will not be paid by other PRPs or the government.
- Be based on enacted laws and existing regulations and policies, and on the remediation technology that is expected to be approved to complete the remediation effort.
- Be based on the entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed. The measurement may be discounted to reflect the time value of money if the aggregate amount of the liability or component of the liability and the amount and timing of the cash payments for the liability or component are fixed or reliably determinable.

.80 The SOP also provides guidance on the display of environmental remediation liabilities in financial statements and on the disclosures about environmental-cost-related accounting principles, environmental loss contingencies, and other loss contingency considerations. In addition to the accounting guidance, the document also contains a nonauthoritative section describing major federal legislation dealing with pollution control (responsibility) laws and environmental remediation (cleanup) laws and the need to consider various state and non-U.S. government requirements. The provisions of the SOP are effective for fiscal years beginning after December 15, 1996. Earlier application is encouraged. The effect of initially applying the SOP should be reported as a change in accounting estimate. Restatement of previously issued financial statements is not permitted.

.81 The Environmental Issues Task Force of the ASB has drafted auditing guidance on planning, performing, and reporting on an audit of financial statements as it relates to auditing environmental remediation liabilities. The guidance is included in an appendix of the SOP 96-1 that is entitled "Auditing Environmental Remediation Liabilities." The following are some of the topics included in that appendix.

- Environmental-related matters the auditor should obtain knowledge of when planning an audit, including knowledge about the industry the entity operates in, the types of products or services the entity provides, the number and characteristics of the entity's locations, applicable governmental regulations, and the entity's production and distribution processes.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Questions an auditor might ask of entity personnel to obtain an understanding of potential environmental remediation liabilities to which an entity might be exposed. Examples follow. What controls are in place to identify potential environmental remediation liabilities or related contingencies affecting the entity? Are landfills or underground storage tanks used to store or dispose of environmentally hazardous waste?
- Substantive audit procedures the auditor might perform to audit management's estimate of environmental remediation liabilities, such as, reviewing and testing the process used by management to develop the estimate, developing an independent expectation, using the work of a specialist, making inquiries of a client's lawyer, and obtaining client representations.
- The effects of various audit findings on the auditor's report.

Standards Overload Report

.82 Managing the information overload that results from the large number of standards in existence, the continuous development of new standards, and the amendment of existing standards makes the work of a CPA extremely difficult. In August 1996, the AICPA's Private Companies Practice Section Special Task Force on Standards Overload completed its report containing recommendations as to the actions that should be taken to address the problem of standards overload. The task force was composed of CPAs from small firms who provide financial-statement services primarily to small nonpublic entities. The following are some of the recommendations that were made by the task force.

1. *Increase small-firm input in the standard-setting process.* Standard-setters should be made aware of the unique problems certain standards pose for small entities, such as the high cost of capturing and generating certain financial information, and the irrelevancy of certain required financial-statement disclosures to the users of the financial statements of small entities. Small CPA firms are less likely than large firms to be able to allocate resources to the formal consideration of proposed standards and may require assistance in expressing their views on proposed standards. One way to assist small firms in expressing their views is to increase the effectiveness and visibility of the AICPA's Technical Issues Committee (TIC), which has primary responsibility for communicating the views of small CPA firms and their clients to standard setters. The task force recommends that the TIC be assigned an additional staff person to serve as a liaison between the TIC and the standard-setting bodies and to assist the TIC in expressing its views on the potential effects of specified standards on small businesses.

.83 The Financial Accounting Foundation should make a concerted effort to recruit and select trustees, FASB members, and FASB staff persons who have experience with and understanding of the needs of small nonpublic entities.

2. *Facilitate access to the professional literature and improve the understandability of that literature.* To help CPAs keep abreast of new standards as they are issued, and understand and apply those standards, the AICPA should—
   - Provide members with all of the relevant codified professional and accounting standards and other important literature, such as Emerging Issues Task Force (EITF) consensuses, and Audit and Accounting Guides, in a single CD-ROM format. The product should be reasonably priced, easy to learn, well-indexed, and contain an effective search capability so that it serves as an effective research tool.[5]

[5] Practitioners Publishing Company (PPC) and the AICPA are currently offering on one CD-ROM disk, entitled *The Practitioner's Library—Accounting and Auditing*, publications issued by PPC, the AICPA, and the FASB. The disk contains the following publications issued by the FASB: *Original Pronouncements, Current Text, Emerging Issues Task Force Abstracts,* and *FASB Implementation Guides;* and the following publications issued by the AICPA: *Professional Standards, Technical Practice Aids, Audit and Accounting Guides* (available January 1997), and *Peer Review Program Manual* (available April 1997). The disk also contains eighteen PPC engagement manuals. The disk may be customized so that purchasers pay for and receive only selected segments of the material. For more information about this product call (800) 323-8724.

- Provide members with the option of ordering a minimum library package of professional standards, in soft cover, at the time they renew their annual AICPA memberships. This could be implemented by providing a checkoff option on the annual dues statement.
- Expand the staff and hours of the AICPA Technical Information Hotline, which provides answers to accounting, auditing, and attestation questions, as well as to questions related to compilation and review engagements. The Technical Information Hotline provides important technical consultation services to CPAs in small firms, and, for many CPAs, serves as the only contact with the AICPA.
- Publish articles in the *Journal of Accountancy* that present new accounting standards in a succinct and understandable format and that contain examples and journal entries elucidating the application of the standard to situations that are relevant to small entities. Each article should be followed by a self-study examination on the new standard that may be submitted to the AICPA for CPE credit at a nominal cost.
- Enable CPAs to obtain copies of professional standards and other technical pronouncements for a fee through the AICPA 24-Hour Fax Hotline or via the computer.
- Draft standards using language that is unambiguous and easy to understand, and when accounting matters require a high degree of subjectivity, provide examples of appropriate options. Pivotal terms should always be defined and terminology should be used consistently in all standards.

3. *Sensitize peer reviewers and reviewed firms to standards-overload concerns.* The implementation of peer review has significantly improved the quality of practice. However, in some cases, peer reviewers are more demanding than the standards require and thereby become de facto standard setters. The task force believes that representatives of the AICPA's Practice Monitoring Division (Peer Review) should continue to be involved in the examination of the standards-overload problem by ensuring that peer reviewers are well qualified and do not expect firms to exceed professional standards. In addition, reviewed firms should be encouraged to request that peer reviewers cite the applicable section of the professional standards or firm policy that supports peer-reviewer recommendations for changes to the financial statements or accountant's report, or recommendations that additional procedures be performed or provided for in the firm's quality control procedures.

4. *Provide guidance on disclosure in OCBOA presentations.* Because of the complexities of GAAP, many entities elect to present their financial statements using an other comprehensive bases of accounting (OCBOA). Paragraph 9 of SAS No. 62 (AU section 623.09) indicates that OCBOA financial statements should include "all informative disclosures that are appropriate for the basis of accounting used." However, the guidance in SAS No. 62 (AU section 623) is extremely broad and practitioners find they need more specific guidance concerning disclosures in OCBOA presentations. The task force recommends that standard setters issue such guidance.

5. *Provide guidance concerning materiality and financial-statement disclosures.* A problematic area of practice is the consideration of materiality in determining whether specified financial-statement disclosures are required. Many CPAs believe that the materiality threshold is relatively low for small nonpublic entities. The task force believes that CPAs who make this assumption are overlooking the fact that materiality has a qualitative aspect in addition to a quantitative aspect. Both aspects should be considered in making decisions about the disclosures that should be included in financial statements. The AICPA should provide implementation guidance on the consideration of materiality in applying accounting standards and in making judgments about financial-statement disclosures for small nonpublic entities.

6. *Provide practice guidance concerning compilation engagements.* There is a need to provide CPAs with high-quality, practical CPE in modules that address problematic areas of practice. For example, comments from focus groups and responses to questionnaires indicate that CPAs need additional information about how to perform cost-effective compilation engagements tailored to their clients' financial-information needs. Statement on Standards for Accounting and Review Services (SSARS) 1,

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Compilation and Review of Financial Statements (AR section 100), provides for alternatives to full-disclosure GAAP financial statements, such as financial statements that omit substantially all disclosures, and financial statements prepared in accordance with an OCBOA. These engagements should enable CPAs to provide clients with a timely and cost-effective service; however, many practitioners are unaware of effective ways to use these alternatives. The task force recommends that the AICPA develop a four-hour CPE course to alert CPAs to these options and that the course be designed, coordinated, and staffed by the AICPA to ensure that the course content is technically correct, that there is consistency in the information presented, and that instructors are knowledgeable and effective communicators. This course should be offered in locations nationwide and should be reasonably priced to encourage attendance by as many practitioners as possible. It should also be available in video and, perhaps, CD-ROM format to maximize exposure.

7. *Continue to evaluate the effectiveness and relevance of financial-statement disclosures.* The task force reviewed the FASB Prospectus, *Disclosure Effectiveness*, and is aware that the FASB is currently considering modification of the disclosure requirements in certain specified standards. The task force strongly supports the FASB's project to reevaluate the information needs of financial statement users.[6]

Guides and Risk Alerts

AICPA Audit and Accounting Guides

.84 Audit and Accounting Guides summarize the practices applicable to specific industries and describe relevant matters, conditions, and procedures unique to these industries. The accounting guidance included in AICPA Audit and Accounting Guides is in the GAAP hierarchy as authoritative GAAP. Guides are available from the AICPA for the following industries:

- Agricultural Producers and Cooperatives
- Airlines
- Banks and Savings Institutions
- Brokers and Dealers in Securities
- Casinos
- Certain Nonprofit Organizations
- Colleges and Universities
- Common Interest Realty Associations
- Construction Contractors
- Credit Unions
- Employee Benefit Plans
- Entities With Oil and Gas Producing Activities
- Federal Government Contractors
- Finance Companies

[6] On September 20, 1996, the FASB issued an exposure draft of a proposed Statement entitled *Elimination of Certain Disclosures about Financial Instruments by Small Nonpublic Entities*. The proposed Statement would amend FASB Statement No. 107 (AC F25) to make the disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 (AC F25) optional for nonpublic entities that (1) have total assets of less than $10 million on the date of the financial statements, and (2) have not held or issued any derivative financial instruments, as defined in FASB Statement No. 119 (AC F25) during the reporting period.

- Health Care Organizations
- Investment Companies
- Not-for-Profit Organizations
- Property and Liability Insurance Companies
- State and Local Governmental Units
- Stock Life Insurance Companies
- Voluntary Health and Welfare Organizations

.85 The following general Audit and Accounting Guides also may be of interest to CPAs performing audit and attest engagements:

- *Consideration of Internal Control in a Financial Statement Audit*
- *Personal Financial Statements*
- *Prospective Financial Information*
- *Use of Real Estate Appraisal Information*

AICPA Annual Industry Audit Risk Alerts

.86 AICPA annual Industry Audit Risk Alerts provide information about current economic, regulatory, and professional developments in specified industries. They assist CPAs in planning and performing engagements by highlighting reporting issues, recurring peer review problems, and lessons learned from litigation. 1996/97 Audit Risk Alerts are available from the AICPA for the following industries:

- Banks and Savings Institutions [AAM section 8050]
- Construction Contractors [AAM section 8120]
- Credit Unions [AAM section 8020]
- Employee Benefit Plans [AAM section 8060]
- Health Care [AAM section 8030]
- High-Technology [AAM section 8200]
- Insurance [AAM section 8040]
- Investment Companies [AAM section 8150]
- Not-for-Profit Organizations [AAM section 8180]
- Real Estate [AAM section 8210]
- Retail Enterprises [AAM section 8230]
- Securities [AAM section 8170]
- State and Local Governments [AAM section 8070]

Publications From the Audit and Attest Standards Group

.87 The following publications are available from the AICPA. Product numbers and prices are shown in parentheses.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- *Codification of Statements on Auditing Standards* includes SAS Nos. 1 to 79 as well as SSAEs (059026, $52.00 members, $57.25 nonmembers)
- Recently published Auditing Procedures Studies are the following:
  - — *Implementing SAS No. 70,* Reports on the Processing of Transactions by Service Organizations (0210566A, $28.50 members, $31.50 nonmembers)
  - — *Audit Implications of Electronic Data Intercharge (0210606A, $19.50 members, $21.50 nonmembers)*
  - — *Auditing in a Client/Server Environment* (available end of first quarter of 1997)
  - — *Audit Implications of Electronic Document Management* (available end of first quarter of 1997)
  - — *Revised Confirmation of Accounts Receivable* (0210646A, $28.50 members, $31.50 nonmembers)
- *Codification of Statements for Accounting and Review Services* includes SSARSs 1 to 7 (0571676A, $13.00 members, $14.25 nonmembers)

Recently Published Practice Alerts

.88 The Professional Issues Task Force of the AICPA's Division for CPA Firms issued Practice Alert 95-2 entitled *Complex Derivatives.* The Practice Alert explores factors auditors should be aware of that might indicate the presence of a complex derivative structure and the risks associated with such a structure through a discussion of complex swap derivatives. This Practice Alert appears in the October 1995 issue of *The CPA Letter.*

.89 In addition, the Division for CPA Firms—Professional Issues Task Force of the AICPA recently issued Practice Alert 96-1 entitled *The Private Securities Litigation Reform Act of 1995* (the Act). The Practice Alert addresses two sections of the Act—fraud detection and disclosure and the safe harbor for forward-looking statements—and how they affect auditors in performing audits and other services. This Practice Alert appears in the May 1996 issue of *The CPA Letter.*

AICPA Services

Order Department

.90 To order AICPA products, call (800) 862-4272 (menu selection #1); write AICPA Order Department, CLA10, P.O. Box 2209, Jersey City, NJ 07303-2209; fax (800) 362-5066. Prices do not include shipping and handling. The best times to call are 8:30 to 11:30 A.M. and 2:00 to 7:30 P.M., EST.

Accounting and Auditing Technical Hotline

.91 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (800) 862-4272 (menu selection #2).

Ethics Hotline

.92 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (800) 862-4272 (menu selection #4).

World Wide Web Site

.93 The AICPA recently established a home page on the World Wide Web. "AICPA Online," the Web site (URL or uniform resource locator: http://www.aicpa.org), offers CPAs the unique opportunity to stay abreast of developments in accounting and auditing, including exposure drafts. The home page is updated daily.

AAM Section 8015
Compilation and Review Alert—1996/97

NOTICE TO READERS

This Compilation and Review Alert is intended to provide CPAs with an overview of recent practice developments and professional standards that may affect the compilations and reviews they perform. This document has been prepared by the AICPA staff. It has not been approved, disapproved, or otherwise acted upon by a senior technical committee of the AICPA.

Introduction

.01 The *Compilation and Review Alert—1996/97* is a nonauthoritative practice aid designed to help accountants plan and perform their 1996 and 1997 compilation and review engagements. It clarifies certain existing professional standards, suggests ways of implementing Statements on Standards for Accounting and Review Services (SSARSs) in special circumstances, points out pitfalls that frequently occur in compilation and review engagements, and summarizes new professional pronouncements.

Practice Problems Identified in Comment Letters on the Assembly Exposure Draft

.02 In September 1995, the Accounting and Review Services Committee (ARSC) issued an exposure draft of a proposed SSARS entitled *Assembly of Financial Statements for Internal-Use Only*. The proposed SSARS would allow CPAs to prepare financial statements for their clients without having to comply with the requirements of SSARS 1, *Compilation and Review of Financial Statements* (AR section 100), if distribution of the financial statements were restricted to internal personnel. The proposed Statement would introduce a new financial-statement service for nonpublic entities because under existing standards, an accountant is required to at least compile financial statements that he or she submits to a client or others, and report on them accordingly.

.03 The AICPA received over 500 comment letters on this highly controversial proposal, and when the ARSC met in February 1996 to discuss the comment letters, they concluded that they needed additional information about the kinds of problems CPAs encounter when performing compilation engagements under SSARSs. To obtain this information, the ARSC sent a questionnaire to all the commenters who had written letters in support of the exposure draft, called some of those commenters, and invited members of the AICPA Small Firm Advocacy Committee to the May 1996 ARSC meeting to talk about the problems practitioners are experiencing.

.04 The primary complaint expressed by supporters of the exposure draft was that performing compilation engagements is too time-consuming and too costly and that clients are reluctant to pay for these services. A careful analysis of these practitioners' comments revealed that the following factors appear to increase the time and cost entailed in performing compilation engagements.

- *Making Cosmetic Improvements to Financial Statements*—Many CPAs generate financial statements at their clients' offices using their clients' software. In some cases, limitations of the software prevent the CPA from being able to modify the statements as needed. For example, the software might not

allow the CPA to change the title of a financial statement from "Income Statement" to a title that would be appropriate for a cash-basis statement, such as "Statement of Revenue Collected and Expenses Paid." Also, the software might provide a limited amount of space for captions in the statements so that certain captions would have to be abbreviated. These limitations require that the CPA cross out inappropriate information and write in corrected information or expand on abbreviated information. CPAs find that the resulting financial statements are unprofessional-looking and are concerned that the statements do not meet professional standards. Many of these CPAs go back to their offices to reenter the financial-statement data using more sophisticated word-processing software that produces a more polished statement. These practitioners contend that the statements produced in their clients' offices are "good enough" for their clients, and when the ARSC inspected some of these computer-produced financial statements (with appropriate modifications as needed), they concurred. The additional work performed at the CPA's office delays submission of the financial statements to the client and makes the engagement more time-consuming and costly than it need be. SSARSs does not require this additional effort, and if a CPA has complied with the requirements of SSARSs and believes the financial statements are presented in accordance with the stated basis of accounting, there is no need for cosmetic improvements, especially if the financial statements are for a client's use only.

An option available to a CPA in this situation is to mark the rough financial statements with words such as, "Draft—Subject to Change" and to leave the statements with the client. The accountant may submit revised financial statements to the client with an appropriate compilation report after any additional work is completed, as provided for in Interpretation No. 17 of SSARS 1, "Submitting Draft Financial Statements" (AR section 9100.61 and .62).

- *Stationery and Signature for Compilation and Review Reports*—Many of the CPAs who wrote letters in support of the assembly exposure draft indicated that an assembly service would be helpful to them because it would enable them to submit financial statements to their clients at their clients' offices without having to go back to their own offices to print the compilation report on firm letterhead and have the compilation report manually signed by a specified individual. SSARS 1 (AR section 100) requires neither that a compilation or review report be printed on firm letterhead, nor that the report be manually signed. A compilation or review report may be printed on plain stationery, without any letterhead, and the signature on the report may be manually signed, typed, computer printed, or stamped with a signature facsimile.

- *Overlooking Simpler Options Available Under Existing Standards*—Many CPAs are unaware of the wide range of financial statement services they may provide to their clients under existing standards, such as compiling cash or tax-basis financial statements or statements that omit substantially all disclosures. They mistakenly believe that all financial statements must be full-disclosure generally accepted accounting principles (GAAP) financial statements. If a CPA compiles cash-basis interim financial statements that omit substantially all disclosures, the compilation report generally will not change from period to period because only items representing departures from the cash basis must be identified in the compilation report, and such departures are extremely rare. If a client requests that a CPA prepare monthly GAAP-basis financial statements, but does not require that the financial statements be adjusted for certain accruals and deferrals until year end, a CPA may forgo making those adjustments and may prepare standardized interim compilation reports, in advance, identifying the anticipated GAAP departures. Doing this will enable the CPA to save time in drafting the compilation report and perform a service that meets client needs.

  Another option is for the CPA to compile only one financial statement, such as the balance sheet, and not the other related financial statements, as provided for in paragraph 18 of SSARS 1 (AR section 100.18). A CPA also may provide his or her client with monthly presentations containing only selected information requested by the client. This information might consist of account balances, such as cash or accounts receivable, operating information, such as the number of meals served during a particular month, or a combination of financial and operating information. Interpretation No. 8 of SSARS 1, "Reports on Specified Elements, Accounts, or Items of a Financial Statement" (AR section 9100.27

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

and .28), excludes the presentations of elements, accounts, or items of a financial statement from the applicability of SSARS 1 (AR section 100). Thus, an accountant is not required to report on such presentations. Finally, another option is to provide a client or other users with a copy of the client's tax return, if that meets users' needs. Interpretation No. 10 of SSARS 1, "Reporting on Tax Returns" (AR section 9100.31 and .32), states that SSARS 1 (AR section 100) imposes no requirement on an accountant to report on financial information contained in a tax return. The fact that a tax return is subsequently used for purposes other than submission to taxing authorities does not affect that exception.

- *Performing More Work Than Is Required Because of Concerns About Peer Review*—CPAs are distressed about the time and cost entailed in peer review, especially if they only perform compilation engagements for one or very few clients. Some practitioners perform more work than is required in a compilation engagement in anticipation of peer review. The ARSC has been meeting with representatives of the AICPA Peer Review Program in an effort to reconcile some of the differences that might exist between the expectations of some peer reviewers and the requirements of SSARSs for compilation engagements. Although many CPAs use procedural and disclosure checklists to assist them in performing compilation engagements, SSARSs does not require the use of checklists or any other working paper documentation in a compilation engagement.

.05 In addition to factors that increase the time and cost of performing compilation engagements, supporters of the exposure draft also indicated that they are concerned about the following matters.

- *CPAs Providing Controllership Services to Clients*—Many CPAs are engaged to provide part-time or full-time controllership services to their clients. They maintain the accounting books and records, prepare financial statements, and perform significant management functions for their clients, such as hiring employees, authorizing purchases, investing idle cash, and signing checks. They contend that the services they perform are the same as those performed by management and that they are well beyond being *nonindependent*. They believe that SSARSs should not be applicable to the financial statements they prepare because a compilation report is used by an outside accountant to report on financial statements that are the representations of another party. The ARSC agrees that SSARSs probably should not be applicable to such financial statements; however, the ARSC is struggling with the problem of differentiating between services that impair an accountant's independence and those that are equivalent to management. Under existing standards, an accountant whose independence is impaired may compile financial statements for a client as long as the accountant indicates his or her lack of independence in the compilation report. If a CPA were deemed to be performing significant management functions for a client, the CPA would no longer be able to compile financial statements for that client.

- *Submission of Financial Statements*—The definition of the term *submission of financial statements* is very important in SSARS 1 (AR section 100) because if an accountant submits financial statements to a client or others, he or she is required to at least compile those statements. Paragraph 7 of SSARS 1 (AR section 100.07) defines the submission of financial statements and specifies which acts trigger the requirement to compile financial statements. Submission of financial statements is currently defined as presenting to a client or others financial statements that the accountant has—

  1. Generated, either manually or through the use of computer software, or

  2. Modified by materially changing account classification, amounts, or disclosures directly on client-prepared financial statements

  Some CPAs are uncertain about whether they have "generated" financial statements when they perform certain services for a client, especially in the context of computer-generated financial statements. For example, consider a situation in which a CPA prepares adjusting journal entries for a client and enters them into a client's computerized financial-statement database using software that automatically updates the existing data to produce revised financial statements. The CPA may not have intended to generate financial statements, but the computer automatically performs this func-

tion. Has the CPA generated financial statements if the statements exist in the computer's memory or on the screen of the computer's monitor, or does generation require that the statements be printed? (Additional examples of submission-related scenarios are presented in the article, "When Has a CPA Submitted Financial Statements," in this Alert.) The ARSC is wrestling with this issue and may have to amend SSARS 1 (AR section 100) to clarify the guidance on this topic. In addition, an AICPA task force is studying the impact of electronic transmission on financial statements and accountants' reports, and is addressing issues related to reporting on compiled financial statements that are produced and transmitted electronically.

- *Status of the Exposure Draft*—The ARSC is grappling with the aforementioned issues with the expectation that a substantial number of the problems encountered by practitioners in performing compilation engagements will disappear once the ARSC has provided solutions to these problems. The ARSC is examining the pros and cons of various options before deciding whether to develop a modified version of the exposure draft or whether to abandon the concept of an assembly service. If the ARSC decides not to issue the exposure draft as a final standard, it will need to amend or interpret SSARSs to address the problems identified in the comment letters. A conclusion that most parties agree on is that there is a need to make the guidance on how to perform cost-effective compilation engagements readily available to all CPAs, and especially to individual practitioners and others practicing in small firms. It has been suggested that this guidance be provided in the form of low-cost or free continuing professional education (CPE) programs or presented in brief installments in *The CPA Letter.*

When Has a CPA Submitted Financial Statements?

.06 The article, "Practice Problems Identified in Comment Letters on the Assembly Exposure Draft," in this Alert, notes that many CPAs are uncertain about whether the services they perform for their clients constitute a submission of financial statements. The term *submission of financial statements* is pivotal in SSARS 1 (AR section 100) because if an accountant submits financial statements to a client or others, he or she is required to at least compile the financial statements. If a CPA has not submitted financial statements, SSARSs is not applicable to the engagement. As noted in paragraph .05 of this Alert, paragraph 7 of SSARS 1 (AR section 100.07) defines the submission of financial statements as presenting financial statements to a client or others that the accountant has—

1. Generated, either manually or through the use of computer software, or
2. Modified by materially changing account classification, amounts, or disclosures directly on client-prepared financial statements

.07 In most situations, the applicability of SSARSs is fairly clear; however, the applicability may become blurry in certain situations, especially those involving computer-generated financial statements. At its September 1996 meeting, the members of the ARSC focused on this problem by describing various scenarios they have encountered involving the submission of financial statements and offering conclusions as to whether each situation is subject to the requirements of SSARSs. The following are some of the scenarios that were described and the conclusions reached by the members of the ARSC, based on existing standards.

1. The CPA prepares financial statements for a client and attaches them to a tax return. The financial-statement information correlates with the information requested on the tax return. The CPA gives the returns and the statements to the client who submits them to the taxing authority.

   Conclusion: This engagement is excluded from the applicability of SSARSs based on Interpretation No. 10 of SSARS 1 (AR section 9100.31 and .32) which states that SSARS 1 (AR section 100) imposes no requirement on an accountant to report on financial information contained in a tax return.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

2. The CPA performs the services described in the preceding situation. The client informs the CPA that he or she intends to submit the tax return packet to parties other than the taxing authority.

   Conclusion: This engagement is excluded from the applicability of SSARSs based on Interpretation No. 10 of SSARS 1 (AR section 9100.31 and .32), which states that the fact that a tax return is subsequently used for purposes other than submission to taxing authorities does not affect that exception.

3. The CPA attaches interim financial statements to an annual tax return. Since the financial statements are for only an interim period, they will not be submitted to the taxing authority.

   Conclusion: SSARSs is applicable to this engagement. Although not specifically stated, Interpretation No. 10 of SSARS 1 (AR section 9100.31 and .32) is predicated on the assumption that the financial information entered on a tax return or attached to a tax return correlates with the financial information requested on the tax return, and that the return will be filed with a taxing authority. Attaching a financial statement to a tax return that does not dovetail with the information requested on the tax return, and that will not be filed with the taxing authority, violates Interpretation No. 10 (AR section 9100.31 and .32).

4. A client gives client-prepared financial statements to a CPA. The CPA posts adjustments to the client's financial statements in a worksheet format (either manually or via computer) to reflect the tax closing, and carries the adjusted balances forward. The CPA gives the client the financial-statement worksheet so that the client can enter the adjustments into the client's accounting system to reflect the tax closing.

   Conclusion: SSARSs is applicable to this engagement for the following reasons.

   a. The worksheet that the CPA gives to the client includes adjusted financial statements; therefore, the accountant has generated financial statements.

   b. The accountant has materially modified the client's financial statements. This would be covered under paragraphs 7a and 7b of SSARS 1 (AR section 100.07).

5. On a separate sheet of paper, the CPA prepares adjustments to client-prepared financial statements and gives the adjustments to the client. The client posts the adjustments to the financial statements and sends the adjusted financial statements to the CPA for his or her consideration.

   Conclusion: SSARSs is not applicable to this engagement. Paragraph 7 of SSARS 1 (AR section 100.07) identifies the following service as one that does not constitute a submission of financial statements.

   > Proposing correcting journal entries or disclosures to the financial statements, either orally or in written form, that materially change client-prepared financial statements, *as long as the accountant does not directly modify the client-prepared financial statements*

6. The CPA enters adjustments to the client's financial-statement database using the client's computer, prints the adjusted financial statements, and takes the financial statements with him or her. The CPA does not give the statements to the client. The client has the ability to access the adjusted financial statements by viewing them on the computer monitor or printing them.

   Conclusion: SSARSs is applicable to this engagement because by causing the computer to create adjusted financial statements, the accountant has generated financial statements. Although the CPA did not "present" them to the client, the accountant made them available to the client.

7. The CPA is engaged to compile the client's financial statements. The CPA prepares the financial statements and shows them to the client for his or her review. The client or CPA notes a problem in the statements and the CPA adjusts the statements and shows a revised draft of the statements to the client. Several additional versions of the financial statements are prepared for the client's review.

   Conclusion: Interpretation No. 17 of SSARS 1 (AR section 9100.61 and .62), provides guidance for this situation. It states that an accountant should not submit draft financial statements without intending

to submit those financial statements in final form, accompanied by an appropriate compilation or review report. As long as the accountant intends to submit the financial statements in final form and labels each page of the draft financial statements with words such as "Draft," "Preliminary Draft," "Draft—Subject to Changes," or "Working Draft," the accountant is not required to comply with the reporting provisions of SSARS 1 (AR section 100) for the draft financial statements. Based on this Interpretation (AR section 9100.61 and .62), the accountant would not be required to report on the draft financial statements and would only be required to report on the final financial statements.

8. The CPA meets with the client's bookkeeper to discuss client-prepared financial statements. The CPA notes a problem in the statements and communicates the required adjusting entries to the bookkeeper, either orally or in writing, but not directly on the client-prepared financial statements. The bookkeeper enters the adjusting entries into the computer, prints the revised financial statements, and shows them to the CPA. The CPA reads the financial statements and informs the bookkeeper that no further adjustments are required. The bookkeeper gives the CPA and the client a copy of the financial statements, which the CPA discusses with the client.

   Conclusion: SSARSs is not applicable to this engagement. Based on paragraph 7 of SSARS 1 (AR section 100.07), none of the procedures performed by the CPA constitutes a submission of financial statements.

9. The client sends the CPA a computer disk that contains client-prepared financial statements. The CPA adjusts the financial statements on the disk resulting in revised financial statements. The CPA returns the disk to the client.

   Conclusion: SSARS is applicable to this engagement because the CPA has materially modified client-prepared financial statements and generated revised financial statements.

Using Staff in a Compilation or Review Engagement

.08 Many practitioners are uncertain about whether they may delegate to a staff person, including a paraprofessional, the performance of a compilation or review engagement. Interpretation No. 5 of SSARS 1, "Planning and Supervision" (AR section 9100.16 and .17), notes that SSARSs is silent on this topic and that Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), provides guidance on the use of staff in an audit engagement and on the auditor's responsibility for supervising staff. The Interpretation (AR section 9100.16 and .17) states that an accountant is not required to follow the guidance in SAS No. 22 (AU section 311) when performing a compilation or review engagement. However, the Interpretation (AR section 9100.16 and .17) also states that an accountant may wish to consider SAS No. 22 (AU section 311) or other reference sources, such as textbooks and articles, as sources of information about planning and supervising a compilation or review engagement.

.09 The Interpretation's (AR section 9100.16 and .17) reference to SAS No. 22 (AU section 311) as a source of information about planning and supervising a compilation or review engagement, and the fact that SSARSs does not preclude a CPA from delegating the performance of such engagements to a staff person causes the authors of this Alert to conclude that a CPA may delegate the performance of a compilation or review engagement to staff persons, including paraprofessionals, as long as the staff person is qualified to perform the work. In all cases, the owners, partners, or shareholders of the accounting firm retain responsibility for the engagement and the representations in the compilation or review report.

Legends on Compiled or Reviewed Financial Statements

.10 Paragraphs 16 and 34 of SSARS 1 (AR section 100.16 and .34) require that each page of compiled (reviewed) financial statements bear the legend, "See Accountant's Compilation (Review) Report." The following are questions that are frequently asked about the use of legends in compiled and reviewed financial statements and suggestions for implementing this requirement.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

1. *Question.* Must the legend, "See Accountant's Compilation (Review) Report" be placed on pages of the financial statements that contain footnote disclosures?

   Answer. Paragraph 4 of SSARS 1 (AR section 100.04) defines a financial statement as a presentation of financial data, including accompanying notes. Since the accompanying notes are part of the financial statements, the legend should be placed on those pages as well. However, if each page of the financial statements contains a statement indicating that the footnotes to the financial statements are an integral part of the statements, it may not be necessary to include the reference to the accountant's report on the footnote pages.

2. *Question.* Should the legend, "See Accountant's Compilation (Review) Report" be placed on pages of the financial-statement package that contain supplementary information?

   Answer. Yes. Although the paragraph 4 (AR section 100.04) definition of a financial statement referred to above does not include supplementary information as a component of a financial statement, the authors of this Alert believe that the pages containing supplementary information should bear the legend as well. Paragraph 43 of SSARS 1 (AR section 100.43) states that if the basic financial statements are accompanied by supplementary information, the accountant should clearly indicate the degree of responsibility he or she is taking for that information. Since the accountant's compilation or review report must identify the level of service that has been performed on the supplementary information, the most effective way of communicating that information to the user is to refer the user to the accountant's report.

3. *Question.* How should the legend on the financial statements be worded in the event of either of the following?

   a. The financial statements have been reviewed and the supplementary information has been compiled.

   b. Comparative financial statements are being presented and one year has been reviewed and the other year has been compiled.

   Answer. The legend on the pages of such financial statements may read, "See Accountant's Report." Although this approach is less precise because it does not identify the level of service in the legend, it does refer the reader to the report that will clearly state the level of service performed on each component of the financial statements and each year presented.

Compiling Pro Forma Financial Information

.11 A client who is considering entering into an important transaction, such as acquiring another entity, may find it helpful to have a CPA compile pro forma financial information related to that transaction. The objective of pro forma financial information is to present historical financial information as if a proposed or consummated transaction had occurred at the date of the historical financial information. The pro forma financial information may consist of financial statements or selected elements of a financial statement. Pro forma financial information is prepared by making pro forma adjustments to the historical financial information. The adjustments are based on management's assumptions and should reflect all of the significant effects that would be directly attributable to the proposed transaction or event. For example, in 1996, Company A may be considering acquiring Company B and would like to determine what the December 31, 1995, financial statements would have looked like had that acquisition occurred during 1995. The client, with the assistance of the CPA, would prepare pro forma financial statements that reflect all of the significant factors that would have affected the historical financial statements, such as increased labor costs if the acquisition involves the use of employees covered by a collective bargaining agreement, or the tax effects of operating in a new locality. Other situations for which pro forma financial information may be useful are to show the effects of transactions such as the following:

- The disposition of a significant portion of a business, such as the sale of a division
- A change in the form of a business organization, such as the incorporation of a sole proprietorship

- The sale of securities and the application of the proceeds, such as the issuance of debt or equity securities and the use of the proceeds to purchase additional manufacturing equipment

.12 Statement on Standards for Attestation Engagements (SSAE) No. 1, *Attestation Standards*, "Reporting on Pro Forma Financial Information" (AT section 300), establishes standards for examining or reviewing pro forma financial information. However, that standard does not apply to the compilation of pro forma financial information. In Technical Practice Aids (TPA) *Other Reporting Problems*, No. 9, "Compilation of Pro Forma Information" (TIS section 9900.09), an inquiry is made as to whether an accountant may compile pro forma financial information if the related historical financial statements have been compiled. The TPA (TIS section 9900.09) states that an accountant may compile pro forma financial information because the SSAE (AT section 300) does not proscribe such a service. Although there is no authoritative guidance for compiling such information, the authors of this Alert recommend that CPAs who compile such information

- Obtain a general understanding of the underlying transaction or event that created the need for the pro forma financial information.
- Consider whether management's assumptions underlying the pro forma adjustments are disclosed in the notes to the pro forma financial information and whether the pro forma adjustments appear to be consistent with each other and with the data used to develop them.

.13 If the historical financial statements have been compiled, the pro forma financial information may be presented as supplementary information accompanying the historical financial statements and the accountant may report on the pro forma financial information in accordance with the guidance on supplementary information presented in paragraph 43 of SSARS 1 (AR section 100.43).

Use of Emphasis and Going-Concern Paragraphs in Compilation and Review Reports

.14 Practitioners frequently ask whether they may add a paragraph to a compilation or review report to emphasize a matter regarding the financial statements, especially if they are concerned about an entity's ability to continue as a going concern. The second line in footnote 18 of SSARS 1 (AR section 100.40) states, "Nothing in this statement is intended to preclude an accountant from emphasizing in a separate paragraph of his or her report a matter regarding the financial statements." Although SSARS 1 (AR section 100) does not discuss the use of emphasis paragraphs, the important rule to remember about such paragraphs is that they should not introduce new information to the reader of the financial statements. They should only highlight or emphasize a matter disclosed in the financial statements. If a CPA believes that certain information should be disclosed in the financial statements to conform with the basis of accounting used, and the client refuses to disclose that information, the accountant is required to state, in a separate paragraph of the report, that the disclosure has been omitted and that the omission represents a departure from the basis of accounting used. This kind of paragraph is different from an emphasis paragraph because its purpose is to make the reader aware of a deficiency in the financial statements—it lets the reader know there is something wrong with the statements. Whereas, the tone and purpose of an emphasis paragraph is nonjudgmental; the paragraph simply points to information that is already disclosed in the financial statements. The financial statements are management's statements, not the accountant's, and it is management's responsibility to disclose the appropriate information in the statements. It is the accountant's responsibility to function as a referee and to report problems noted in the financial statements.

.15 Emphasis paragraphs should never contain information about procedures the accountant has or has not performed or about the CPA's conclusions or opinions concerning the entity's status as a going concern. Footnote 18 of SSARS 1 (AR section 100.40) points out that paragraphs 10 and 11 of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341.10 and .11), provide guidance on evaluating the adequacy of going-concern disclosures in financial statements. The disclosure guidance in

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

those paragraphs (AU section 341.10 and .11) applies to compiled, reviewed, and audited financial statements. The following are examples of information related to going concern that might need to be disclosed in the financial statements:

- Pertinent conditions and events giving rise to the going-concern matter
- The possible effects of such condition
- Management's evaluation of the significance of those conditions and events and any mitigating factors
- Possible discontinuance of operations
- Management's plans (including relevant prospective financial information)
- Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities

.16 If full-disclosure financial statements need the going-concern disclosure required by SAS No. 59 (AU section 341) and the disclosure has been omitted, the accountant should add a paragraph to the report describing the departure from GAAP, as required by paragraphs 39 and 40 of SSARS 1 (AR section 100.39 and .40). If financial statements include appropriate disclosure about a going-concern matter, the accountant is *not* required to modify the standard compilation or review report. However, the accountant may add an emphasis paragraph highlighting the disclosures in the financial statements. Interpretation No. 11 of SSARS 1, "Reporting on Uncertainties" (AR section 9100.33–.40), suggests the following sample paragraph as one that might be used to emphasize going-concern disclosure included in compiled or reviewed financial statements.

> As discussed in Note X, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the Company be unable to continue as a going concern.

.17 SAS No. 59 (AU section 341) requires that the terms *substantial doubt* and *going concern* be used in the explanatory paragraph if the auditor concludes that substantial doubt exists. The auditor determines that there is substantial doubt on the basis of evidence obtained from procedures performed in an audit, not from compilation or review procedures. Accordingly, the phrase "substantial doubt about the entity's ability to continue as a going concern" is reserved for audit reports and should not be used in an emphasis paragraph of a compilation or review report.

Incomplete Information

.18 Paragraphs 39 and 40 of SSARS 1 (AR section 100.39 and .40) note that an accountant who is engaged to compile or review financial statements may become aware of a departure from GAAP, or an other comprehensive basis of accounting (OCBOA), that is material to the financial statements. Paragraph 12 of SSARS 1 (AR section 100.12) indicates some of the ways in which potential financial-statement misstatements may come to the accountant's attention, such as through inquiries the accountant may have made, procedures the accountant may have performed, knowledge gained from prior engagements, and the appearance of the financial statements on their face. Paragraph 12 (AR section 100.12) states that an accountant is not required to make inquiries or perform other procedures in a compilation engagement to verify, corroborate, or review information supplied by the entity. However, it also states that if information comes to the accountant's attention that causes him or her to conclude that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, the accountant is required to obtain additional or revised information. Practitioners have asked about the extent of their responsibility in a compilation engagement for determining the

existence of potential suspected financial statement misstatements if not all of the information needed to make such a determination is available. How much work must a CPA perform in a compilation engagement to discharge his or her responsibility for identifying financial statement misstatements?

.19 Consider the following situation. A CPA who is compiling financial statements for a client notes that the client's cash disbursements journal shows monthly disbursements for several pieces of leased equipment. When the CPA asks the client whether the equipment is rented or whether the client is making payments on purchased equipment, the client indicates that he is uncertain. The client does not have documentation concerning the leased equipment, and telephone calls to the lessor do not readily elucidate the matter. This is the first year of the engagement and the CPA does not have information from prior years. Paragraph 12 of SSARS 1 (AR section 100.12) directs the accountant to obtain additional information if the accountant concludes that information supplied by the entity is incomplete.

.20 In this situation, the CPA should explain to the client why the information is needed and request that the client contact the lessor to obtain copies of the lease agreements. Making the client aware of the reason why the information is needed is important because a compilation is defined as presenting in the form of financial statements information that is the representation of management, and management must take responsibility for the representations in the financial statements.

.21 As a practical solution, for the current financial statements that the CPA is compiling, the CPA has several options. Interpretation No. 17 of SSARS 1 (AR section 9100.61 and .62) permits the accountant to prepare the financial statements with the existing information and not to report on them as long as the CPA marks the statements with words such as "Draft—Subject to Change," and intends to submit final financial statements, with an appropriate compilation report, when the information needed to complete the compilation becomes available. Another alternative is to prepare the financial statements using the cash basis of accounting, if that meets the client's temporary needs, until the required information is obtained.

.22 A CPA should *not* issue a compilation report indicating that management has not determined the appropriateness of the accounting treatment used in the financial statements and that any potential departures from GAAP have not been determined. The use of such language is inappropriate because it permits the accountant to evade his or her responsibility for identifying material departures from the basis of accounting used.

Deciding When to Use OCBOA Financial Statements

.23 The article, "Practice Problems Identified in Comment Letters on the Assembly Exposure Draft," in this Alert, recommends that practitioners consider preparing OCBOA financial statements for their clients as a cost-effective alternative when GAAP financial statements are not needed or required. SAS No. 62, *Special Reports* (AU section 623), defines an OCBOA as one of the following four:

1. A basis of accounting used to comply with the requirements of a governmental regulatory agency, such as a basis of accounting used by insurance companies to comply with the rules of a state insurance commission[1]
2. A basis of accounting that the entity uses to file its income tax return
3. The cash receipts and disbursements basis of accounting and modifications of the cash basis having substantial support, such as recording depreciation on fixed assets or accruing income taxes

[1] An accountant's report on financial statements prepared using a basis of accounting that complies with the requirements of a governmental regulatory agency should include a paragraph restricting distribution of the report to those within the entity and to the regulatory agency.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

4. A definite set of criteria having substantial support that is applied to all material items appearing in financial statements, such as the price-level-basis of accounting.

.24 Preparing OCBOA financial statements is generally less costly than preparing GAAP financial statements because OCBOA financial statements generally do not require the extensive disclosures required by GAAP. It should be noted that the use of an OCBOA does not necessarily eliminate the need for disclosures in financial statements,[2] unless the CPA prepares financial statements that omit substantially all disclosures, as provided for in paragraphs 19 through 21 of SSARS 1 (AR section 100.19–.21).

.25 In determining whether OCBOA financial statements are appropriate for a client, a CPA should consider who the users of the financial statements will be and whether the client is bound by contractual agreement or regulatory provisions to prepare GAAP financial statements. Characteristics of entities that generally are good candidates for cash or tax-basis financial statements are the following.

- The entity has no third-party users of the financial statements, for example, the entity is a small closely held business with no third-party debt.
- The entity only has secured debt rather than unsecured debt.
- Creditors of the entity do not require GAAP financial statements.
- The entity's cost of complying with GAAP would exceed the benefits, for example, a small construction contractor who would be required to account for long-term contracts using the percentage-of-completion method and would be required to compute deferred taxes.
- The business is owned by a manager who is closely involved in the day-to-day operations of the business and carries in his or her mind a fairly accurate picture of the entity's financial position.
- The owners of the entity are primarily interested in cash flows, for example, a professional corporation of physicians that distributes its cash-basis earnings through salaries, bonuses, and retirement plan contributions.
- The owners of the entity are primarily interested in the tax implications of transactions, for example, partners in a partnership who are concerned about the tax effects of transactions that will be reflected on their personal tax returns.
- Capital expenditures and long-term financing are not significant to the entity.
- The entity is not subject to Internal Revenue Code rules that would require the entity to prepare its tax return on the accrual basis of accounting, for example, the entity does not have inventory that is material to the business or does not have average annual gross receipts that exceed $5 million for the prior three tax years.

Obtaining a Representation Letter for All Periods Covered by a Review Report

.26 Paragraph 28 of SSARS 1 (AR section 100.28) requires that a client provide a CPA with a representation letter in a review engagement. According to Interpretation No. 2 of SAS No. 19, *Client Representations* (AU section 333), entitled "Management Representations When Current Management Was Not Present During the Period Under Audit" (AU section 9333.05 and .06), representation letters should cover all periods covered by the auditor's report and should be signed by the current owner/manager. Although the Interpretation (AU section 9333.05 and .06) only addresses audit engagements, the authors of this Alert

[2] Footnote 4 of SSARS 1 (AR section 100.04) indicates that the source of guidance for evaluating the adequacy of disclosure in OCBOA financial statements is paragraphs 9 and 10 of SAS No. 62 (AU section 623.09 and .10).

believe that this requirement also is applicable to review engagements. If a CPA is reviewing comparative financial statements (financial statements covering two or more periods), the CPA should obtain a representation letter that covers all periods covered by the review report.

.27 Paragraph 28 of SSARS 1 (AR section 100.28) requires that the representation letter in a review engagement be obtained from members of management "whom the accountant believes are responsible for and knowledgeable, directly or through others in the organization, about the matters covered in the representation letter." Because a representation letter must cover all periods covered by the review report, a problem may arise if ownership/management of the entity has changed during the period covered by the report. For example, there may have been a different owner/manager in the first year of the two-year period for which comparative financial statements are presented or a new owner/manager may have joined the entity in the latter part of a single year under review. In these circumstances, the new owner/manager may be reluctant to sign the representation letter because he or she is not sufficiently familiar with the events that occurred during the period prior to his or her tenancy.

.28 In such circumstances, it may be possible to obtain a representation letter from the previous owner/manager; however, this is highly unlikely. The accountant may point out to the client that the sample representation letter for a review engagement, presented in appendix D of SSARS 1 (AR section 100.55), limits the confirmant's response to his or her "best knowledge or belief" concerning the representations in the representation letter. If the current owner/manager refuses to sign a representation letter, the review will be considered incomplete and is not an adequate basis for issuing a review report. Paragraph 47 of SSARS 1 (AR section 100.47) states that if, in an audit or review engagement, a client does not provide the accountant with a signed representation letter, the accountant is precluded from issuing a review report on the financial statements and would ordinarily be precluded from issuing a compilation report on the financial statements. Thus, the client would not be able to step down to a compilation engagement.

How an On-Site Peer Review Differs From an Off-Site Peer Review

.29 Firms that perform even one compilation, review, or audit of historical financial statements, or compilation or examination of prospective financial statements are required to undergo peer review; however, the type of peer review the firm receives depends on the types of engagements the firm performs. Firms that perform audit engagements or examinations of prospective financial statements (even one such engagement) are required to have an *on-site* peer review.[3] In an on-site peer review, a cross section of the firm's accounting and auditing engagements are reviewed to evaluate the adequacy of the firm's quality control system. Procedures performed during an on-site peer review include reviewing the reports, financial statements, and working papers for specified engagements; interviewing firm personnel, and testing the administrative files. The objective of an on-site peer review is to report on whether the firm's system of quality control for its accounting and auditing practice met the objectives of the quality control standards established by the AICPA and was complied with during the period under review to provide the firm with reasonable assurance of conforming with professional standards.

.30 If a firm performs no audit engagements or examinations of prospective financial statements, and only performs compilations or reviews, the firm may have an *off-site* peer review.[4] Prior to an off-site peer review, the reviewed firm completes a form that requests information about the types of engagements the firm performs, such as the number and nature of the compilation and review clients served, and the industries in which those clients operate. Based on that information, the administering entity or the assigned reviewer advises the reviewed firm as to the types of engagements that will be selected for review. For each engage-

[3] In certain circumstances, sole practitioners who perform audit engagements are permitted to have their on-site review at a location other than their office.

[4] The SEC Practice Section Peer Review Program has certain requirements that are different from those of the AICPA Peer Review Program and does not offer off-site peer reviews. For additional information about peer review, call (201) 938-3030.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

ment selected, the reviewed firm submits a copy of the financial statements and accountant's report as well as a completed engagement questionnaire. The engagement questionnaire requests information about the client as well as information about accounting matters that may have arisen during the engagement. During the off-site peer review, the reviewer reads the accountant's compilation or review report, the related financial statements, and the engagement questionnaire for the engagements selected for review. The objective of an off-site peer review is to provide the reviewer with a reasonable basis for expressing limited assurance that the engagements submitted for review do not materially depart from the requirements of professional standards. An off-site peer review does *not* include a review of working papers, tests of the firm's administrative and personnel files, or interviews with firm personnel. In certain circumstances, if a firm has relinquished its audit clients, the firm may be able to change from an on-site peer review to an off-site peer review. In such situations, the firm should call or write to the entity administering its peer review to determine whether it qualifies for such a change.

Responding to Peer Review Letters of Comments

.31 During fieldwork in an on-site peer review, the reviewer will inform the reviewed firm of any deficiencies noted during the peer review, and generally will note those deficiencies on a form entitled, "Matter for Further Consideration" (MFC). The reviewed firm will have the opportunity to discuss the identified deficiencies during the peer review and to respond in writing concerning the deficiencies on the response section of the MFC form. In an off-site peer review, any identified deficiencies are communicated to the reviewed firm either by telephone or in writing on the MFC form. Because peer review is a subjective process, there may be differences of opinion between the reviewer and the reviewed firm as to whether a deficiency exists that are not resolved to the reviewed firm's satisfaction. In such circumstances, the reviewed firm should ask the reviewer to cite the applicable section of the professional standards (or the reviewed firm's policy for on-site reviews) that supports the reviewer's conclusion that a deficiency exists. Ordinarily, such matters are resolved by the exit conference in an on-site peer review and before the peer review report and letter of comments are issued in an off-site peer review. If the reviewed firm is still dissatisfied with the reviewer's conclusions, the reviewer or reviewed firm should consult with the entity administering the peer review. [5] If the matter is not resolved through consultation, the reviewed firm should respond to the reviewer's letter of comments by addressing each deficiency noted and citing the section of the professional standards that supports the reviewed firm's view. The state CPA society peer review committee will then attempt to resolve the disagreement.

.32 Many professional standards require the use of professional judgment; accordingly, a reviewed firm should not assume that the reviewer's interpretation is always the correct one. If a reviewer identifies deficiencies in an engagement, it is in the reviewed firm's best interest to read the applicable section of the standards to broaden his or her knowledge of the subject and to verify that the comment is applicable to that particular situation.

Recurring Deficiencies Noted in Compilation and Review Engagements

.33 Certain deficiencies in compilation and review engagements recur frequently and are noted by peer reviewers in letters of comments on those engagements. The following is a list of some of those deficiencies and, where applicable, a reference to the appropriate professional standard.

Common Reporting Deficiencies

.34 The accountant's report—

[5] This guidance is applicable to firms enrolled in the AICPA Peer Review Program. If a firm is a member of the SEC Practice Section, it should contact the staff of the SEC Peer Review Committee at the AICPA by calling (201) 938-3030.

- Departs from the revised report wording established in SSARS 7, *Omnibus Statement on Standards for Accounting and Review Services*. SSARS 7 revised the wording of the SSARSs compilation and review reports to indicate that the standards referred to in these reports are the SSARSs. Guidance on the appropriate wording for compilation and review reports is presented in paragraphs 14 and 32 of SSARS 1 (AR section 100.14 and .32), respectively.

- Does not disclose the accountant's lack of independence in a compilation engagement when the prior year's accounting fees were not paid. Ethics Ruling No. 52, *Unpaid Fees* (ET section 191.103 and .104), states that a firm's independence is impaired if, when the report on the client's current year is issued, fees remain unpaid, whether billed or unbilled, for any professional services provided more than one year prior to the date of the report.

- Does not disclose the basis of accounting used when the financial statements are prepared using a comprehensive basis of accounting other than GAAP and the financial statements do not disclose the basis, as required by paragraph 20 of SSARS 1 (AR section 100.20).

- Does not refer to all periods presented in the financial statements. Paragraph 2 of SSARS 2, *Reporting on Comparative Financial Statements* (AR section 200.02), requires that the accountant's report cover each period presented if comparative financial statements are presented.

- Does not indicate that substantially all disclosures have been omitted from the financial statements. Paragraph 21 of SSARS 1 (AR section 100.21) provides an example of a paragraph that should be added to the accountant's report if management has elected to omit substantially all of the disclosures required by GAAP.

- For GAAP-basis financial statements, does not indicate that a statement of cash flows has been omitted. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 95, *Statement of Cash Flows* (AC C25), requires a statement of cash flows as part of a full set of financial statements for all business enterprises.

- Does not refer to the accompanying supplementary information. Paragraph 43 of SSARS 1 (AR section 100.43) requires that the accountant clearly indicate in his or her report the degree of responsibility he or she is taking with respect to supplementary information accompanying the financial statements.

- Contains financial-statement titles that are not the same as the titles in the financial statements presented.

- Is not dated. Paragraph 15 of SSARS 1 (AR section 100.15) states that the date of completion of the compilation should be used as the date of the accountant's compilation report, and paragraph 33 of SSARS 1 (AR section 100.33) indicates that the date of the completion of the accountant's inquiry and analytical procedures should be used as the date of the accountant's review report.

Common Financial-Statement Deficiencies

.35

- OCBOA financial statements contain unmodified GAAP-basis titles such as "Balance Sheet" and "Income Statement." Footnote 6 of SSARS 1 (AR section 100.04) refers the reader to paragraph 7 of SAS No. 62 (AU section 623.07) for guidance on suitable titles for OCBOA financial statements.

- Each page of compiled or reviewed financial statements does not include a reference to the accountant's report. Paragraphs 16 and 43, respectively, of SSARS 1 (AR section 100.16 and .43), require that each page of compiled or reviewed financial statements include a reference such as, "See Accountant's Compilation (Review) Report."

- Interim GAAP-basis financial statements omit a provision for income taxes and the accountant's compilation or review report does not identify the omission.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- The notes to financial statements containing only selected disclosures are not appropriately labeled. Paragraph 19 of SSARS 1 (AR section 100.19) states, "When the entity wishes to include disclosures about only a few matters in the form of notes to such financial statements, such disclosures should be labeled, "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included."

Common Financial-Statement Disclosure Deficiencies

.36 Financial-statement disclosures concerning the following matters are missing or incomplete:

- Leases
- Concentrations of credit risk
- Off-balance-sheet risk
- Long-term debt commitments for the five years following the date of the latest balance sheet
- Related-party transactions
- Disclosures for each of the periods presented, if comparative financial statements are presented
- Accounting policies

Other Deficiencies

.37

- The accountant fails to report on financial statements that he or she has submitted to a client, as required by paragraph 7 of SSARS 1 (AR section 100.07).
- In a review engagement, the accountant's working papers do not include information about matters covered in the accountant's inquiry and analytical procedures or about unusual matters that the accountant considered during the performance of the review, including their disposition, as required by paragraph 31 of SSARS 1 (AR section 100.31).
- The accountant fails to obtain a representation letter from the client in a review engagement, as required by paragraph 28 of SSARS 1 (AR section 100.28).
- The accountant submits draft financial statements to a client without submitting final financial statements and reporting on them accordingly, as required by Interpretation No. 17 of SSARS 1 (AR section 9100.61 and .62).

Performance Measurement Engagements—An Engagement Expansion Opportunity

.38 A CPA who compiles or reviews financial statements for a client on a monthly or quarterly basis is in a strategic position to provide other services to that client as well. The CPA's regular visits to a client's office and discussions with management enable the CPA to develop a thorough knowledge of the client's business and its personnel. Also, by performing financial-statement services for many clients, a CPA develops a broad knowledge of business practices, including the use of technology, financial services, and outsourcing organizations, such as payroll services. The CPA's wide network of clients enables him or her to observe, firsthand, what works for businesses and what does not.

.39 The AICPA's Special Committee on Assurance Services, which was created in 1994, reports that the market for traditional accounting and auditing services is flat, and that the future will hold even greater

challenges to the profession if it is unwilling to embrace new services. The Special Committee on Assurance Services has been focusing on developing new engagement opportunities for CPAs, such as CPA association with information that may be useful to clients and unavailable or unreliable without that association. One such engagement that may be especially suited to CPAs performing compilation and review engagements is providing clients with information about their businesses in the form of performance measures that tell management whether it is achieving its objectives and enable it to monitor its progress toward achieving those objectives. Performance measures are specific quantifiable operational or financial measures that individuals can control and work to improve. For example, an objective that a company might establish is to reduce accounts receivable collection time from an average of 90 days to 60 days by selling only to customers who meet certain specified criteria. The performance measure would be the number of days required to collect accounts receivable.

.40 In a performance measurement engagement, the client must determine what its current performance measures are and whether they are consistent with its overall business strategy and primary objectives. The CPA may have to help the client to articulate its business strategy and primary objectives. For example, management must decide whether its primary objective is to maximize cash flows and current earnings or to build the value of the entity through the reinvestment of profits. Management may be uncertain about its business strategy and may need help in developing it.

.41 To develop performance measures, the CPA will need to analyze the client's business by identifying all of its processes and focusing on key indicators for that business such as revenue (volume and price), collections, cash flow, quality of the product, customer satisfaction, relationships with suppliers, product promotion, and financing. The CPA also will have to develop an understanding of the entity's strengths, weaknesses, opportunities, and threats. After a thorough analysis of the business, the CPA assists management in developing an action plan for achieving its objectives that includes the required actions needed, the individuals responsible for those actions, the timing of those actions, and the required resources (including outside specialists or advisers). Finally, the CPA helps the client to develop performance measures that are best suited for monitoring the success of the action plan. The data used for the performance measures must be reliable and relevant to the achievement of the entity's goals. CPAs should be particularly alert for measures that are counterproductive in that they encourage actions that actually hinder the achievement of the entity's overall goals and objectives. For example, consider a situation in which salespeople sell by telephone. It would be counterproductive to measure performance by measuring the number of hours salespeople spend on the telephone if the entity's objective is high sales, not high telephone bills. In addition, sales alone would not be a good performance measure if another entity objective is to avoid sales returns because the goods being sold have a high cost and are fragile and subject to breakage when returned through the mail. In those circumstances, management should focus on net sales (sales less returns) as a performance measure, rather than on sales alone. The CPA will also have to determine whether the current accounting system captures the information needed for the performance measure. For example, the accounting system would have to segregate sales returns from gross sales and sales allowances to capture the information needed for the performance measure in the previous example. Finally, the performance measure must reflect actions that the specified individual can control. If management's primary objective is to increase net sales per hour spent on the telephone, management needs to develop information, in the form of customer profiles, about the customers who are best suited to the product being sold. Providing salespeople with relevant data about customers enables salespeople to select customers who are more likely to purchase a product and to decrease the number of unproductive hours spent on the telephone.

Standards Overload

.42 Managing the information overload that results from the large number of standards in existence, the continuous development of new standards, and the amendment of existing standards makes the work of a CPA extremely difficult. In August 1996, the AICPA's Private Companies Practice Section Special Task Force on Standards Overload issued its report containing recommendations as to the actions that should be taken

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

to address the problem of standards overload. The task force was composed of CPAs from small firms who provide financial-statement services primarily to small nonpublic entities. The following are some of the recommendations that were made by the task force.

1. *Increase small-firm input in the standard-setting process.* Standard setters should be made aware of the unique problems certain standards pose for small entities, such as the high cost of capturing and generating certain financial information, and the irrelevancy of certain required financial-statement disclosures to the users of the financial statements of small entities. Small CPA firms are less likely than large firms to be able to allocate resources to the formal consideration of proposed standards and may require assistance in expressing their views on proposed standards. One way to assist small firms in expressing their views is to increase the effectiveness and visibility of the AICPA's Technical Issues Committee (TIC), which has primary responsibility for communicating the views of small CPA firms and their clients to standard setters. The task force recommends that the TIC be assigned an additional staff person to serve as a liaison between the TIC and the standard-setting bodies and to assist the TIC in expressing its views on the potential effects of specified standards on small businesses.

   The Financial Accounting Foundation should make a concerted effort to recruit and select trustees, FASB members, and FASB staff persons who have experience with and understanding of the needs of small nonpublic entities.

2. *Facilitate access to the professional literature and improve the understandability of that literature.* To help CPAs keep abreast of new standards as they are issued, and understand and apply those standards, the AICPA should—

   a. Provide members with all of the relevant codified professional and accounting standards and other important literature, such as Emerging Issues Task Force (EITF) consensuses, and Audit and Accounting Guides, in a single CD-ROM format. The product should be reasonably priced, easy to learn, well-indexed, and contain an effective search capability so that it serves as an effective research tool. [6]

   b. Provide members with the option of ordering a minimum library package of professional standards, in soft cover, at the time they renew their annual AICPA memberships. This could be implemented by providing a checkoff option on the annual dues statement.

   c. Expand the staff and hours of the AICPA Technical Information Hotline, which provides answers to accounting, auditing, and attestation questions, as well as questions related to compilation and review engagements. The Technical Information Hotline provides important technical consultation services to CPAs in small firms, and for many CPAs serves as their only contact with the AICPA.

   d. Publish articles in the *Journal of Accountancy* that present new accounting standards in a succinct and understandable format and that contain examples and journal entries elucidating the application of the standard to situations that are relevant to small entities. Each article should be followed by a self-study examination on the new standard that may be submitted to the AICPA for CPE credit at a nominal cost.

   e. Enable CPAs to obtain copies of professional standards and other technical pronouncements for a fee through the AICPA 24-Hour Fax Hotline or via the computer.

   f. Draft standards using language that is unambiguous and easy to understand, and when accounting matters require a high degree of subjectivity, provide examples of appropriate options. Pivotal terms should always be defined and terminology should be used consistently in all standards.

---

[6] Practitioners Publishing Company (PPC) and the AICPA are currently offering on one CD-ROM disk, titled *The Practitioner's Library—Accounting and Auditing*, publications issued by PPC, the AICPA, and the FASB. The disk contains the following publications issued by the FASB: *Original Pronouncements, Current Text, Emerging Issues Task Force Abstracts*, and *FASB Implementation Guides*; and the following publications issued by the AICPA: *Professional Standards, Technical Practice Aids, Audit and Accounting Guides* (available January 1997), and *Peer Review Program Manual* (available April 1997). The disk also contains 18 PPC engagement manuals. The disk may be customized so that purchasers pay for and receive only selected segments of the material. For more information about this product call (800) 323-8724.

3. *Sensitize peer reviewers and reviewed firms to standards-overload concerns.* The implementation of peer review has significantly improved the quality of practice. However, in some cases, peer reviewers are more demanding than the standards require and thereby become *de facto* standard setters. The task force believes that representatives of the AICPA's Practice Monitoring Division (Peer Review) should continue to be involved in the examination of the standards-overload problem by ensuring that peer reviewers are well qualified and do not expect firms to exceed professional standards. In addition, reviewed firms should be encouraged to request that peer reviewers cite the applicable section of the professional standards or firm policy that supports peer-reviewer recommendations for changes to the financial statements or accountant's report, or recommendations that additional procedures be performed or provided for in the firm's quality control procedures.

4. *Provide guidance on disclosure in OCBOA presentations.* Because of the complexities of GAAP, many entities elect to present their financial statements using an OCBOA. Paragraph 9 of SAS No. 62 (AU section 623.09) indicates that OCBOA financial statements should include "all informative disclosures that are appropriate for the basis of accounting used." However, the guidance in SAS No. 62 (AU section 623) is extremely broad and practitioners find they need more specific guidance concerning disclosures in OCBOA presentations. The task force recommends that standard setters issue such guidance.

5. *Provide guidance concerning materiality and financial-statement disclosures.* A problematic area of practice is the consideration of materiality in determining whether specified financial-statement disclosures are required. Many CPAs believe that the materiality threshold is relatively low for small nonpublic entities. The task force believes that CPAs who make this assumption are overlooking the fact that materiality has a qualitative aspect in addition to a quantitative aspect. Both aspects should be considered in making decisions about the disclosures that should be included in financial statements. The AICPA should provide implementation guidance on the consideration of materiality in applying accounting standards and in making judgments about financial-statement disclosures for small nonpublic entities.

6. *Provide practice guidance concerning compilation engagements.* There is a need to provide CPAs with high-quality, practical, CPE in modules that address problematic areas of practice. For example, comments from focus groups and responses to questionnaires indicate that CPAs need additional information about how to perform cost-effective compilation engagements tailored to their clients' financial-information needs. SSARS 1 (AR section 100) provides for alternatives to full-disclosure GAAP financial statements, such as financial statements that omit substantially all disclosures, and financial statements prepared in accordance with an OCBOA. These engagements should enable CPAs to provide clients with a timely and cost-effective service; however, many practitioners are unaware of effective ways to use these alternatives. The task force recommends that the AICPA develop a four-hour CPE course to alert CPAs to these options and that the course be designed, coordinated, and staffed by the AICPA to ensure that the course content is technically correct, that there is consistency in the information presented, and that instructors are knowledgeable and effective communicators. This course should be offered in locations nationwide and should be reasonably priced to encourage attendance by as many practitioners as possible. It should also be available in video and, perhaps, CD-ROM format to maximize exposure.

7. *Continue to evaluate the effectiveness and relevance of financial-statement disclosures.* The task force reviewed the FASB Prospectus, *Disclosure Effectiveness*, and is aware that the FASB is currently considering modification of the disclosure requirements in certain specified standards. The task force strongly supports the FASB's project to reevaluate the information needs of financial statement users.[7]

---

[7] On September 20, 1996, the FASB issued an exposure draft of a proposed Statement entitled *Elimination of Certain Disclosures about Financial Instruments by Small Nonpublic Entities.* The proposed Statement would amend FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), to make the disclosures about fair value of financial instruments prescribed in FASB Statement No. 107 (AC F25) optional for nonpublic entities that (1) have total assets of less than $10 million on the date of the financial statements, and (2) have not held or issued any derivative financial instruments, as defined in FASB Statement No. 119, *Disclosures about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), during the reporting period.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Modifying Engagements for SOP 94-6

.43 Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*, was issued by the Accounting Standards Executive Committee (AcSEC) in December 1994 and is effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which the SOP is first applied. Pronouncements issued by the AcSEC are in the GAAP hierarchy and are applicable to audited, reviewed, and compiled financial statements. Accordingly, SOP 94-6 must be considered when compiling or reviewing financial statements. The SOP is applicable to all nongovernmental entities that prepare financial statements in conformity with GAAP. [8] The SOP requires disclosure of the following information:

- The nature of an entity's operations
- Its major products or services
- Its principal markets and the locations of those markets
- The relative importance of its operations in each business, and the basis for that determination, if the entity operates in more than one business
- An explanation that the preparation of financial statements in conformity with GAAP requires the use of management's estimates

.44 The SOP also requires disclosure of information about sensitive estimates in the financial statements if known information available prior to the issuance of the financial statements indicates that (1) it is at least reasonably possible that the estimate of the effect on the financial statements of a condition, situation, or set of circumstances that existed at the date of the financial statements will change in the near term (within one year of the balance-sheet date) due to one or more future confirming events, and (2) the effect of the change would be material to the financial statements. Examples of such items are recorded amounts or disclosures that are based on estimates particularly sensitive to change in the near term, such as inventory and equipment subject to rapid technological obsolescence, valuation allowances for commercial and real estate loans, litigation-related obligations, and amounts reported for long-term obligations, such as amounts reported for pensions and postemployment benefits. If the criteria are met, the disclosure must describe the nature of the uncertainty and indicate that it is reasonably possible that the estimate will change in the near term. If the estimate involves a contingency covered by FASB Statement No. 5, *Accounting for Contingencies* (AC C59), the disclosure also should include an estimate of the possible loss or range of loss, or state that an estimate cannot be made.

.45 The final disclosure requirement of the SOP concerns risks and uncertainties that arise from an entity's current vulnerability due to certain concentrations. An example of a concentration is a manufacturer who depends on a single supplier for materials and whose business would be significantly disrupted by the loss of that supplier. Disclosure of concentrations is required if, based on information known to management prior to the issuance of the financial statements, the following conditions exist.

1. The concentration existed at the date of the financial statements
2. The concentration makes the enterprise vulnerable to the risk of a near-term severe impact (a significant financially disruptive effect on the normal functioning of the entity)
3. It is at least reasonably possible that the events that could cause the severe impact will occur in the near term.

The content of the disclosure is not generally specified; however, the disclosure should inform users of the nature of the risk involved. For concentrations of labor subject to collective bargaining agreements, and for operations outside an entity's home country, certain specified information must be disclosed.

[8] The applicability of the SOP to financial statements prepared using an OCBOA is not clear. Paragraph B-47 of the SOP indicates that the issue of the SOP's applicability to financial statements prepared using an OCBOA is a pervasive one that goes beyond the scope of the SOP.

.46 The following are some additional inquiries that may be added to the list of illustrative inquiries for a review of financial statements, presented in appendix A of SSARS 1 (AR section 100.52), to provide for the consideration of SOP 94-6 in a SSARSs review engagement.

- Do the financial statements include estimates that may be subject to a material change within the next year? If such estimates exist, what is the probability that the change will occur within the next year?
- Do individual or group concentrations exist for any of the following?
  - — Customers
  - — Suppliers
  - — Lenders
  - — Products or services
  - — Sources of labor
  - — Sources of material
  - — Licenses or other rights
  - — Operating areas or markets
  - — Grantors, contributors, or fund-raising events (for not-for-profit organizations)
- Do concentrations exist at the date of the financial statements that will make the company vulnerable to the risk of a severe near-term impact?

.47 CPAs also should consider adding the following item to the client representation letter in a review engagement:

> We have no knowledge of concentrations existing at the date of the financial statements that make the company vulnerable to the risk of a near-term severe impact, that have not been properly disclosed in the financial statements. We understand that concentrations include individual or group concentrations of customers, suppliers, lenders, products, services, sources of labor or materials, licenses or other rights, or operating areas or markets. We further understand that severe impact means a significant financially disruptive effect on the normal functioning of the company.

New Statements on Quality Control Standards

.48 In May 1996, the Auditing Standards Board (ASB) issued two new Statements on Quality Control Standards (SQCS), SQCS No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), and SQCS No. 3, *Monitoring a CPA Firm's Accounting and Auditing Practice* (QC section 30). The new Statements (QC sections 20 and 30) supersede SQCS No. 1, *System of Quality Control for a CPA Firm* (QC section 10), and provide guidance for developing a system of quality control for a firm's accounting and auditing practice.

.49 SQCS No. 2 (QC section 20) redefines a firm's accounting and auditing practice to include all audit, attest, and accounting and review services for which professional standards have been established by the ASB or the ARSC under Rules 201, *General Standards* (ET section 201.01), and 202, *Compliance With Standards* (ET section 202.01), of the AICPA *Code of Professional Conduct*, and any other professional standards that may be issued by the aforementioned standard setters in the future. Prior to the issuance of SQCS No. 2 (QC section 20), attestation services were not specifically addressed in the quality control standards because

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Statements on Standards for Attestation Engagements had not been issued when SQCS No. 1 (QC section 10) was promulgated. The revised definition now makes it clear that attestation services must be included in a firm's quality control system.

.50 SQCS No. 2 (QC section 20) replaces the nine elements of quality control presented in SQCS No. 1 (QC section 10) with five broad elements of quality control. It does not establish any new elements but instead combines and renames the previous elements as shown in the following table.

Old *Nine Elements of SQCS No. 1*	*Change*	*New* *Five Elements of SQCS No. 2*
Independence	The independence element is expanded to include integrity and objectivity. Firms are now required to establish policies and procedures assuring that personnel perform all professional responsibilities with integrity, and maintain objectivity while performing those responsibilities.	Independence, integrity, and objectivity
• Hiring • Advancement • Assigning personnel to engagements • Professional development	These four elements are combined into a single element.	Personnel management
Acceptance and continuance of clients	The name of this element has been modified because SQCS No. 2 (QC section 20) requires that firms consider the acceptance of client engagements in addition to considering client relationships. SQCS No. 2 (QC section 20) also requires a firm to establish policies and procedures that provide reasonable assurance that a firm will accept only those engagements it can complete with due professional competence. Firms also must have policies and procedures in place requiring them to obtain an understanding with their client of the nature, scope, and limitations of the services they will perform.	Acceptance and continuance of clients and engagements
• Supervision • Consultation	These two elements are combined and referred to as activities within the new element of engagement performance.	Engagement performance
Inspection	Inspection becomes subsumed under the new element of monitoring. SQCS No. 3 (QC section 30) provides guidance on how a CPA firm can monitor its accounting and auditing practice.	Monitoring

.51 SQCS Nos. 2 (QC section 20) and 3 (QC section 30) are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 1997. To help firms implement the new standards, a booklet entitled *Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice* has been issued by the AICPA. The guide includes illustrative examples of four hypothetical firms and the suggested policies and procedures for the design and maintenance of a quality control system that is appropriate for each firm's accounting and auditing practice. One of the hypothetical firms is a sole owner without any professional staff who occasionally hires per diem professionals. Her accounting practice consists of only engagements subject to SSARSs. A firm's policies and procedures should be sufficient for it to obtain reasonable assurance of complying with the requirements of SQCS Nos. 2 (QC section 20)

and 3 (QC section 30), and the illustrative examples depict various types of policies and procedures that a firm may consider for each of the elements of quality control.

GAAP for Compiled and Reviewed Financial Statements

.52 Although there are different reporting and performance standards for compilation, review, and audit engagements, the accounting principles to be followed for compiled or reviewed financial statements are the same as those for audited financial statements.

.53 An exception to that rule is found in SSARS 1 (AR section 100), which permits an accountant to compile financial statements that omit substantially all of the disclosures required by GAAP. If the accountant compiles such financial statements, a special compilation report is issued that alerts readers to the fact that the disclosures have been omitted.

.54 Footnote 3 of SSARS 1 (AR section 100.04) states that the GAAP hierarchy presented in SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report* (AU section 411), is also applicable to compilations and reviews of financial statements performed under SSARSs. A summarization of the GAAP hierarchy is reproduced in the following table.

Nongovernmental Entities	*State and Local Governments*
Established Accounting Principles	
a. FASB Statements and Interpretations, APB Opinions, and AICPA Accounting Research Bulletins	a. GASB Statements and Interpretations, plus AICPA and FASB pronouncements if made applicable to state and local governments by a GASB Statement or Interpretation
b. FASB Technical Bulletins, AICPA Industry Audit and Accounting Guides, and AICPA Statements of Position	b. GASB Technical Bulletins, and the following pronouncements if specifically made applicable to state and local governments by the AICPA: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position
c. Consensus positions of the FASB Emerging Issues Task Force and AICPA Practice Bulletins	c. Consensus positions of the GASB Emerging Issues Task Force* and AICPA Practice Bulletins if specifically made applicable to state and local governments by the AICPA
d. AICPA accounting interpretations, "Qs and As" published by the FASB staff, as well as industry practices widely recognized and prevalent	d. "Qs and As" published by the GASB staff, as well as industry practices widely recognized and prevalent
Other Accounting Literature †	
Other accounting literature, including FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; GASB Statements, Interpretations, and Technical Bulletins; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids;* and accounting textbooks, handbooks, and articles	Other accounting literature, including GASB Concepts Statements; pronouncements in categories (a) through (d) of the hierarchy for nongovernmental entities when not specifically made applicable to state and local governments; FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids;* and accounting textbooks, handbooks, and articles

*As of the date of this section, the GASB had not organized such a group.
† In the absence of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances.

.55 Because several standard-setting bodies establish GAAP, there is no single publication that contains all of the GAAP pronouncements. Each of the following publications contains certain pronouncements included in levels *a* through *d* of the GAAP hierarchy (must know GAAP).

FASB Original Pronouncements—Accounting Standards

.56 This two-volume set contains the original text of accounting pronouncements. It includes FASB Statements of Financial Accounting Standards and Interpretations, APB Opinions, AICPA Accounting Research Bulletins, FASB Technical Bulletins, and AICPA Accounting Interpretations. The pronouncements are arranged chronologically and the text includes a topical index (available from the AICPA).

AICPA Technical Practice Aids (Including Statements of Position)

.57 Statements of Position and Practice Bulletins issued by the AcSEC are included in this text. This publication also contains a selection of nonauthoritative audit, review, compilation, and accounting questions answered by the AICPA's Technical Information Service (available from the AICPA).

FASB Emerging Issues Task Force Abstracts

.58 This text contains a summary of the proceedings of the FASB's EITF. Each abstract summarizes the accounting issues involved and the results of the discussion, including any consensus reached on the issue (available from the FASB).

FASB Implementation Guides (Qs and As)

.59 Implementation guides are published by the FASB staff and provide guidance, in the form of questions and answers, on the implementation of FASB Statements. The following implementation guides are available from the FASB.

- *A Guide to the Implementation of Statement 87 on Employers' Accounting for Pensions*
- *A Guide to the Implementation of Statement 88 on Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*
- *A Guide to the Implementation of Statement 91 on Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*
- *A Guide to the Implementation of Statement 96 on Accounting for Income Taxes*
- *A Guide to the Implementation of Statement 106 on Employers' Accounting for Postretirement Benefits other than Pensions*
- *A Guide to the Implementation of Statement 109 on Accounting for Income Taxes*
- *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities*

Codification of Governmental Accounting and Financial Reporting Standards

.60 Practitioners who compile or review the financial statements of state and local governmental entities should supplement their professional libraries with the *Codification of Governmental Accounting and Financial Reporting Standards*. This text contains current authoritative accounting and financial reporting standards for

state and local governmental entities. GASB Statements, Interpretations, and Technical Bulletins are included (available from the FASB).

AICPA Audit and Accounting Guides

.61 Audit and Accounting Guides summarize the practices applicable to specific industries and describe relevant matters, conditions, and procedures unique to these industries. The accounting guidance included in AICPA Audit and Accounting Guides is in the GAAP hierarchy as authoritative GAAP. When an accountant compiles or reviews the financial statements of an entity, SSARS 1 (AR section 100) requires that the accountant have or acquire a level of knowledge of the accounting principles and practices of the industry in which the entity operates. Although the audit guidance included in the Audit and Accounting Guides may not be relevant to practitioners performing compilation and review engagements, the accounting guidance, illustrative financial statements, and industry background that is provided should help accountants to acquire knowledge of a specific industry. The following industry Audit and Accounting Guides are available from the AICPA:

Agricultural Producers and Cooperatives

Airlines

Banks and Savings Institutions

Brokers and Dealers in Securities

Casinos

Certain Nonprofit Organizations

Colleges and Universities

Common Interest Realty Associations (CIRAs) (This Audit and Accounting Guide contains a chapter on compilations and reviews of CIRAs.)

Construction Contractors

Credit Unions

Employee Benefit Plans

Entities With Oil and Gas Producing Activities

Federal Government Contractors

Finance Companies

Health Care Organizations

Investment Companies

Not-for-Profit Organizations

Property and Liability Insurance Companies

State and Local Governmental Units

Stock Life Insurance Companies

Voluntary Health and Welfare Organizations

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.62 The following general Audit and Accounting Guides also may be of interest to CPAs performing compilation and review engagements:

Personal Financial Statements

Prospective Financial Information

Use of Real Estate Appraisal Information

Ordering Information

.63 To order FASB products, call (203) 847-0700, ext. 10.

.64 To order AICPA products, call: (800) 862-4272 (menu selection #1); write: AICPA Order Department, P.O. Box 2209, Jersey City, NJ 07303-2209; fax: (800) 362-5066.

Recent GAAP Pronouncements

Authoritative Accounting Pronouncements Becoming Effective in 1996

.65 As noted in paragraph .52 of this Alert, the accounting principles to be followed for compiled or reviewed financial statements are the same as those for audited financial statements. A number of authoritative accounting pronouncements, issued prior to 1996, have delayed effective dates for certain reporting entities and will be implemented for the first time in 1996 by those entities. Following is a brief overview of some of the pronouncements becoming effective in 1996 that practitioners performing compilation and review engagements should be aware of. When applying these pronouncements, practitioners should refer to the complete professional standard.

- FASB Statement No. 107, *Disclosure about Fair Value of Financial Instruments* (AC F25), extends existing fair-value disclosure practices for some instruments by requiring all entities to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. If estimating fair value is not practicable, the Statement (AC F25) requires the disclosure of descriptive information pertinent to estimating the value of a financial instrument. Appendix A of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25.117-132), provides examples of instruments that are included in and excluded from the definition of a financial instrument. FASB Statement No. 107 (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1992, except for entities with less than $150 million in total assets. For those entities, the effective date is for fiscal years ending after December 15, 1995.
- FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made* (AC C67), and FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations* (AC No5), are both effective for fiscal years beginning after December 15, 1994, except for not-for-profit organizations with less than $5 million in total assets and less than $1 million in annual expenses. For those organizations, the effective date is for fiscal years beginning after December 15, 1995. FASB Statement No. 116 (AC C67) establishes accounting standards for contributions and applies to all entities that receive or make contributions. Generally, contributions received, including unconditional promises to give, are recognized as revenues in the period received at their fair values. Contributions made, including unconditional promises to give, are recognized as expenses in the period made at their fair values. Conditional promises to give, whether received or

made, are recognized when they become unconditional, that is, when the conditions are substantially met. The Statement (AC C67) allows certain exceptions for contributions of services and works of art, historical treasures, and similar assets.

- FASB Statement No. 117 (AC No5) establishes standards for general-purpose external financial statements provided by not-for-profit organizations. It requires that those statements include a statement of financial position, a statement of activities, and a statement of cash flows. It also requires classification of an organization's net assets and its revenues, expenses, gains, and losses based on the existence or absence of donor-imposed restrictions. For implementation guidance on FASB Statements No. 116 (AC C67) and No. 117 (AC No5), refer to "Implementing FASB 116 and 117," by Martha L. Benson, Alan S. Glazer, Henry R. Jaenicke, and Kenneth D. Williams, *Journal of Accountancy* (New York: AICPA, September 1995).

- FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), requires disclosures about the amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. It also amends FASB Statement No. 105 (AC F25) and No. 107 (AC F25) to require that distinction in certain disclosures required by those Statements (AC F25). FASB Statement No. 119 (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1994, except for entities with less than $150 million in total assets. For those entities, the Statement (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1995. For additional guidance on derivatives and FASB Statement No. 119 (AC F25), refer to the following:
  - — Winograd, Barry N., and Robert H. Herz. "Derivatives: What's an Auditor to Do?" *Journal of Accountancy* (New York: AICPA, June 1995).
  - — Molvar, Roger H.D., and James F. Green. "The Question of Derivatives." *Journal of Accountancy* (New York: AICPA, March 1995).
  - — *Derivatives—Current Accounting and Auditing Literature,* A Report Prepared by the Financial Instruments Task Force of the Accounting Standards Executive Committee, AICPA.

- FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08), requires that long-lived assets and certain identifiable intangibles (including goodwill) to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. In performing the review for recoverability, the entity should estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets that are covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets that are covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of carrying amount or net realizable value. FASB Statement No. 121 (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995, with earlier application encouraged. Restatement of previously issued financial statements is not permitted. Impairment losses resulting from the application of the Statement (AC I08) should be reported in the period in which the recognition criteria are first applied and met. The initial application of the Statement (AC I08) to assets that are being held

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

- FASB Statement No. 122, *Accounting for Mortgage Servicing Rights* (AC Mo4), was issued in May 1995 and amends FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), to require that mortgage banking enterprises capitalize the cost of purchased and originated mortgage servicing rights as part of the cost of a mortgage loan and, for mortgage loans sold with servicing rights retained, allocate the cost of the loan between the servicing rights and the loan without the servicing rights based on the relative fair values of each of the components. The gain or loss on the sale of the loan is equal to the sales proceeds less the allocated cost of the mortgage loan; any cost allocated to the mortgage servicing rights is recognized as a separate asset. The Statement (AC Mo4) also includes guidance on estimating the fair values of the components and accounting for the impairment of the capitalized mortgage serving rights and expands the disclosure requirements of FASB Statement No. 65 (AC Mo4). The provisions of the Statement (AC Mo4) are to be applied prospectively in fiscal years beginning after December 15, 1995; special transition provisions apply.

- FASB Statement No. 123, *Accounting for Stock-Based Compensation* (AC C36), applies to all transactions in which an entity acquires goods or services by issuing equity instruments or by incurring liabilities to a supplier (an employee or nonemployee) in amounts based on the price of the entity's common stock or other equity instruments. The Statement (AC C36) provides a choice of accounting methods for transactions with employees that are within the scope of APB Opinion No. 25, *Accounting for Stock Issued to Employees* (AC C47). It presents a fair-value based method of accounting for employee stock options or similar equity instruments and encourages all entities to adopt that accounting method for all their employee stock compensation plans. Under the fair-value method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. Entities having transactions with employees that are within the scope of APB Opinion No. 25 (AC C47) may continue to measure compensation cost under that standard. However, if they choose that measurement option, they must make pro forma disclosures of net income and, if presented, earnings per share, as if the fair-value based method of accounting presented in FASB Statement No. 123 (AC C36) had been applied. The fair-value method is preferable to the method presented in APB Opinion No. 25 (AC C47) for purposes of justifying a change in accounting principle under APB Opinion No. 20, *Accounting Changes* (AC A06). Equity instruments issued to acquire goods and services from nonemployees should be accounted for based on the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The Statement (AC C36) is generally effective for fiscal years beginning after December 15, 1995; special transition provisions apply.

- FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations* (AC No5), establishes standards for accounting for certain investments held by not-for-profit organizations. It requires that investments in equity securities with readily determinable fair values and all investments in debt securities be reported at fair value with gains and losses included in a statement of activities. The Statement (AC No5) requires disclosures about investments held by not-for-profit organizations and the return on those investments. The Statement (AC No5) also establishes standards for reporting losses on investments held because of a donor's stipulation to invest a gift in perpetuity or for a specified term. The Statement (AC No5) is effective for annual financial statements issued for fiscal years beginning after December 15, 1995. Earlier application is encouraged. The Statement (AC No5) is applied either by restating the financial statements of all prior years presented or by recognizing the cumulative effect of the change in the year of the change. The expiration of restrictions on previously unrecognized net gains may be recognized prospectively.

- FASB Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power* (AC C67), interprets paragraph 4 of FASB Statement No. 116 (AC C67.103).

Paragraph 4 of Statement No. 116 (AC C67.103) states, "This Statement does not apply to transfers of assets in which the reporting entity acts as an agent, trustee, or intermediary, rather than as a donor or donee." Interpretation No. 42 (AC C67) clarifies that an organization that receives assets acts as a donee and a donor, rather than as an agent, trustee, or intermediary, if a resource provider specifies a third-party beneficiary or beneficiaries and explicitly grants the recipient organization the unilateral power to redirect the use of the assets away from the specified beneficiary or beneficiaries (variance power). The Interpretation (AC C67) is effective for financial statements issued for fiscal years ending after September 15, 1996. Earlier application is encouraged. The Interpretation (AC C67) may be applied either retroactively or by reporting the cumulative effect of the change in the year of the change.

- SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations*, amends and makes uniform the guidance on reporting of related entities in the AICPA Audit and Accounting Guides, *Audits of Colleges and Universities* and *Audits of Voluntary Health and Welfare Organizations*, and in SOP 78-10, *Accounting Principles and Reporting Practices for Certain Nonprofit Organizations*. SOP 94-3 provides that the decision as to whether the financial statements of a reporting not-for-profit organization and those of one or several other entities (either not-for-profit organizations or business entities) are to be consolidated should be based on the nature of the relationship between the entities. That relationship also affects the disclosures that the reporting organization is required to make. The guidance in SOP 94-3 focuses on investments in majority-owned for-profit subsidiaries and financially interrelated not-for-profit organizations. SOP 94-3 is effective for financial statements issued for fiscal years beginning after December 15, 1994, except for not-for-profit organizations that have less than $5 million in total assets and less than $1 million in annual expenses. For those organizations, the effective date is for fiscal years beginning after December 15, 1995. Earlier application is permitted. For organizations that adopt FASB Statement No. 117 (AC No5) before its effective date, earlier application of the SOP is encouraged.

- SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*—See paragraphs .43 through .47 of this Alert for a discussion of SOP 94-6.

- Practice Bulletin 14,[9] *Accounting and Reporting by Limited Liability Companies and Limited Liability Partnerships*, provides guidance on applying existing accounting literature to limited liability companies and limited liability partnerships (hereinafter referred to as limited liabilities companies or LLCs). LLCs combine the limited liability aspect of corporations with the flow-through tax attributes of partnerships. Because an LLC is formed under state law, its characteristics may vary depending on the state in which it is organized. However, LLCs generally have the following characteristics:

  — An LLC is an unincorporated association of two or more "persons."

  — Its members have limited personal liability for the debts and obligations of the entity.

  — It is classified as a partnership for federal income tax purposes and thus lacks at least two of the four corporate characteristics which include limited liability, free transferability of interests, centralized management, and continuity of life.

  Practice Bulletin 14 is effective for financial statements issued after May 31, 1995.

Authoritative Accounting Pronouncements Issued in 1996

.66 Following is a list of various authoritative accounting pronouncements issued from January 1, 1996 to October 1, 1996, and their effective dates.

[9] SAS No. 69 (AU section 411) identifies AICPA practice bulletins as authoritative (meaning, "must know") accounting principles.

Statements of Financial Accounting Standards and Interpretations Issued by the FASB[10]

	Description	*Effective Date*
FASB Statement No. 125 (AC F38)	*Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*	For transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996; should be applied prospectively.
FASB Interpretation No. 42 (AC C67)	*Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power.*	For financial statements issued for fiscal years ending after September 15, 1996; earlier application is encouraged.

To order copies, call the FASB at (203) 847-0700, ext. 10.

EITF Consensus Positions

EITF Issue No.	*Description*	*Date of Consensus*
96-1	*Sale of Put Options on Issuer's Stock That Require or Permit Cash Settlement*	January 18, 1996
96-3	*Accounting for Equity Instruments That Are Issued for Consideration Other Than Employee Services under FASB Statement No. 123*	March 21, 1996
96-4	*Accounting for Reorganizations Involving Non-Pro Rata Split-off of Certain Nonmonetary Assets to Owners*	May 23, 1996
96-5	*Recognition of Liabilities for Contractual Termination Benefits or Changing Benefit Plan Assumptions in Anticipation of a Business Combination*	March 21, 1996
96-7	*Accounting for Deferred Taxes on In-Process Research and Development Activities Acquired in a Purchase Business Combination*	May 23, 1996
96-8	*Accounting for a Business Combination When the Issuing Company Has Targeted Stock*	May 23, 1996
96-10	*Impact of Certain Transactions on the Held-to-Maturity Classification under FASB Statement No. 115*	May 23, 1996
96-11	*Accounting for Forward Contracts and Purchased Options to Acquire Securities Covered by FASB Statement No. 115*	May 23, 1996
96-14	*Accounting for the Costs Associated with Modifying Computer Software for the Year 2000*	July 18, 1996

[10] See the Audit Risk Alert *State and Local Governmental Industry Developments—1996* [AAM section 8070] for recently issued Statements of the Governmental Accounting Standards Board.

EITF Issue No.	*Description*	*Date of Consensus*
96-17	*Revenue Recognition under Long-Term Power Sales Contracts That Contain both Fixed and Variable Pricing Terms*	September 18–19, 1996
96-21	*Implementation Issues in Accounting for Leasing Transactions Involving Special-Purpose Entities*	September 18–19, 1996
96-22	*Applicability of the Disclosures Required by FASB Statement No. 114 When a Loan is Restructured in a Troubled Debt Restructuring into Two (or More) Loans*	September 18–19, 1996

To order copies call the FASB at (203) 847-0700, ext. 10.

SOP 96-1, *Environmental Remediation Liabilities*

.67 In October 1996, the AcSEC issued SOP 96-1, *Environmental Remediation Liabilities*, which provides accounting guidance for the recognition, measurement, display, and disclosure of environmental remediation liabilities. The SOP requires that environmental remediation liabilities be accrued when the criteria in FASB Statement No. 5 (AC C59) are met. The SOP includes benchmarks to aid in the determination of when environmental remediation liabilities should be recognized in accordance with FASB Statement No. 5 (AC C59). Examples of such benchmarks are when an entity is identified as a potentially responsible party (PRP) and when a feasibility study is completed. The SOP also requires that the accrual for environmental remediation liabilities include the incremental direct costs of the remediation effort and the costs of compensation and benefits for employees who are expected to devote a significant amount of time directly to the remediation effort, to the extent of the time expected to be spent directly on the remediation effort. The measurement of the liability should—

- Include the entity's allocable share of the liability for a specific site, and the entity's share of amounts that will not be paid by other PRPs or the government.
- Be based on enacted laws and existing regulations and policies, and on the remediation technology that is expected to be approved to complete the remediation effort.
- Be based on the entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed. The measurement may be discounted to reflect the time value of money if the aggregate amount of the liability or component of the liability and the amount and timing of the cash payments for the liability or component are fixed or reliably determinable.

.68 The SOP also provides guidance on the display of environmental remediation liabilities in financial statements and on the disclosures about environmental-cost-related accounting principles, environmental loss contingencies, and other loss contingency considerations. In addition to the accounting guidance, the document also contains a nonauthoritative section describing major federal legislation dealing with pollution control (responsibility) laws and environmental remediation (cleanup) laws and the need to consider various state and non-U.S. government requirements. The provisions of the SOP are effective for fiscal years beginning after December 15, 1996. Earlier application is encouraged. The effect of initially applying the SOP should be reported as a change in accounting estimate. Restatement of previously issued financial statements is not permitted.

Other AICPA Publications Relevant to SSARS Engagements

Codification of Statements on Standards for Accounting and Review Services

.69 *Statements on Standards for Accounting and Review Services* (SSARSs) are the standards by which compilation and review engagements are performed.

Codification of Statements on Auditing Standards

.70 *Codification of Statements on Auditing Standards* includes SAS Nos. 1 to 79 and SSAE Nos. 1 to 6. Practitioners performing compilation and review engagements may need to consult the auditing standards because the SASs are the only source of authoritative accounting guidance in areas such as subsequent events and evaluation of the adequacy of going-concern disclosure. In addition, SSARSs sometimes refer the reader to the SASs for amplification of topics mentioned in SSARSs.

AICPA Annual Audit Industry Risk Alerts

.71 AICPA annual Audit Industry Risk Alerts provide information about current economic, regulatory, and professional developments in specified industries. They assist CPAs in planning and performing engagements by highlighting reporting issues, recurring peer review problems, and lessons learned from litigation. The following 1996/97 Audit Risk Alerts are available from the AICPA:

- Banks and Savings Institutions [AAM section 8050]
- Construction Contractors [AAM section 8120]
- Credit Unions [AAM section 8020]
- Employee Benefit Plans [AAM section 8060]
- Health Care [AAM section 8030]
- High-Technology [AAM section 8200]
- Insurance [AAM section 8040]
- Investment Companies [AAM section 8150]
- Not-for-Profit Organizations [AAM section 8180]
- Real Estate [AAM section 8210]
- Retail Enterprises [AAM section 8230]
- Securities [AAM section 8170]
- State and Local Governmental Developments [AAM section 8070]

AICPA Services

Order Department

.72 To order AICPA products, call: (800) 862-4272 (menu selection #1); write: AICPA Order Department, P.O. Box 2209, Jersey City, NJ 07303-2209; fax: (800) 362-5066. Prices do not include shipping and handling.

Technical Hotline

.73 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call: (800) 862-4272 (menu selection #2).

Ethics Hotline

.74 Members of the AICPA's Professional Ethics Division answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call: (800) 862-4272 (menu selection #4).

Appendix

Compilation and Review Quiz

Answer each question by circling either *True* or *False*. Answers appear following question number 10.

1. SSARS 1 (AR section 100) requires a "minimum" set of working papers in a compilation engagement.

   True False

2. SSARS 1 (AR section 100) requires that a CPA perform a compilation only when the financial statements will be submitted to third-party users.

   True False

3. SSARS 1 (AR section 100) does not require a CPA to perform a compilation if the financial statements are for interim periods.

   True False

4. SSARS 1 (AR section 100) requires that a compilation report be—

   a. Manually signed.

   True False

   b. Printed on the CPA's letterhead.

   True False

5. A CPA may delegate responsibilities, such as reading the financial statements and signing the compilation report, to a staff person of the accounting firm.

   True False

6. A CPA in public practice who is engaged as a controller (one who is authorized to hire and fire the bookkeeper and sign checks) for a client does not have to attach a compilation report to financial statements that he or she generates.

   True False

7. SSARS 1 (AR section 100) requires a CPA to perform a compilation if—

   a. The CPA does all of the work necessary to generate the financial statements, but permits the client to actually generate the financial statements on the computer by "pushing the print button."

   True False

   b. The CPA proposes adjustments to the client's books and records, either orally or in writing, that materially change client-prepared financial statements, and such adjustments are posted by the client.

   True False

   c. The CPA makes material changes to the client's financial statements by changing account classifications, amounts, or disclosures directly on the financial statements.

   True False

8. A CPA may perform a compilation engagement even though he or she is not independent as long as the CPA discloses his or her lack of independence in the compilation report.

   True False

9. A CPA who compiles financial statements using an OCBOA, such as the cash basis or income tax basis, must also disclose all the significant measurement departures from GAAP in the compilation report.

   True False

10. Accounting pronouncements issued by the FASB are applicable to audited financial statements but not to compiled or reviewed financial statements.

    True False

Answers to the Compilation and Review Quiz

1. SSARS 1 (AR section 100) requires a "minimum" set of working papers in a compilation engagement.

   False—Paragraph 31 of SSARS 1 (AR section 100.31) requires that an accountant prepare working papers for a review engagement but contains no such requirement for a compilation engagement.

2. SSARS 1 (AR section 100) requires that a CPA perform a compilation only when the financial statements will be submitted to third-party users.

   False—Paragraph 7 of SSARS 1 (AR section 100.07) states, "An accountant should not submit unaudited financial statements of a nonpublic entity *to his or her client or others* unless, as a minimum, he or she complies with the provisions of this statement applicable to a compilation engagement."

3. SSARS 1 (AR section 100) does not require a CPA to perform a compilation if the financial statements are for interim periods.

   False—The sentence from paragraph 7 of SSARS 1 (AR section 100.07), cited in item 2, uses no qualifying language as to which types of unaudited financial statements (interim or annual) are meant here. Also, the idea of excluding interim financial statements from the applicability of SSARSs has been considered and rejected by the ARSC several times.

4. SSARS 1 (AR section 100) requires that a compilation report be—

   a. Manually signed.

   False

   b. Printed on the CPA's letterhead.

   False

   SSARS 1 (AR section 100) contains no such requirements.

5. A CPA may delegate responsibilities, such as reading the financial statements and signing the compilation report to a staff person of the accounting firm.

   True—SSARS 1 (AR section 100) does not preclude a CPA from delegating responsibilities to staff persons in a compilation or review engagement, as long as the staff person is qualified to perform the procedures.

6. A CPA in public practice who is engaged as a controller (one who is authorized to hire and fire the bookkeeper and sign checks) for a client does not have to attach a compilation report to financial statements that he or she generates.

   True—A compilation report is used by an outside accountant to report on financial statements that are the representations of another party. If an accountant performs services for a client that are equivalent to those performed by management, including making management decisions, the financial statements would be deemed to be the accountant's representations.

7. SSARS 1 (AR section 100) requires a CPA to perform a compilation if—

   a. The CPA does all of the work necessary to generate the financial statements, but permits the client to actually generate the financial statements on the computer by "pushing the print button."

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

True—Paragraph 7 of SSARS 1 (AR section 100.07) requires that an accountant compile financial statements if he or she submits them to a client or others. One aspect of submission is generating the financial statements. The term *generating* is not defined in SSARS 1 (AR section 100) and some accountants believe that if the client "pushes the button," the client has generated the financial statements and the CPA is not required to comply with SSARS 1 (AR section 100). The authors of this Alert strongly believe that having the client push the button simply to avoid having to compile the financial statements is inappropriate and does not reflect the substance of SSARS 1 (AR section 100).

b. The CPA proposes adjustments to the clients books and records, either orally or in writing, that materially change client-prepared financial statements, and such adjustments are posted by the client.

False—SSARSs is not applicable to this engagement because paragraph 7 of SSARS 1 (AR section 100.07) identifies the following service as one that does not constitute a submission of financial statements.

> Proposing correcting journal entries or disclosures to the financial statements, either orally or in written form, that materiality change client-prepared financial statements, as long as the accountant does not directly modify the client-prepared financial statements

c. The CPA makes material changes to the client's financial statements by changing account classifications, amounts, or disclosures directly on the financial statements.

True—See the answer to item *7b.*

8. A CPA may perform a compilation engagement even though he or she is not independent as long as the CPA discloses his or her lack of independence in the compilation report.

   True—Paragraph 22 of SSARS 1 (AR section 100.22) provides for this type of engagement.

9. A CPA who compiles financial statements using an OCBOA, such as the cash basis or income tax basis, must also disclose all the significant measurement departures from GAAP in the compilation report.

   False—Only departures from the basis of accounting used in the financial statements must be identified in the accountant's compilation report.

10. Accounting pronouncements issued by the FASB are applicable to audited financial statements but not to compiled or reviewed financial statements.

    False—Although there are different reporting and performance standards for compilation, review, and audit engagements, the accounting principles to be followed for compiled or reviewed financial statements are the same as those for audited financial statements.

AAM Section 8020

Credit Union Industry Developments—1996/97

Industry and Economic Developments

Financial Trends

.01 *Natural Person Credit Unions.* Much of the rapid growth experienced by credit unions in 1995 continued in the first half of 1996. According to credit union call reports submitted in the first half of 1996, assets and shares grew by approximately 5.5 percent and 5.6 percent, respectively, while loans grew by 4.6 percent, and capital grew by 4.1 percent. Savings growth exceeded loan growth resulting in investment gains of 6.9 percent in the first half of 1996. Deposits in corporate credit unions increased nearly $1.6 billion or 6.4 percent, compared to $2.5 billion or a 10.3 percent increase last year.

.02 Many credit unions have begun offering more nontraditional services, such as electronic tax filing services with the Internal Revenue Service (IRS) for their members, and the sale of noninsured investment products to members through credit union service organizations (CUSOs).

.03 *Corporate Credit Unions.* Corporate credit unions (total of 41 as of June 1996) experienced a slight growth in investments in the first half of 1996 to $50.9 billion, a 1 percent increase from December 1995. Loans decreased by 14.2 percent during the same period to $852 million, and equity increased by 2.4 percent to approximately $1.19 billion. Income from operations decreased by 1.4 percent because of an increase (7.9 percent) in operating expenses largely for office operation and outside professional services, and a decrease (.9 percent) in total gross revenues principally due to a reduction of interest earned on loans.

Consolidation and Restructuring

.04 Consolidation and restructuring within the industry have continued during 1996 as credit unions attempt to control costs. Related reductions in staff or the elimination or merger of duties increase the potential for weaknesses in knowledge of or adherence to internal controls. Such changes also may result in a lack of personnel to carry out control procedures. Auditors should be alert to such matters when considering a credit union's internal control structure.

.05 Credit unions also continue to achieve efficiency and reduce operating expenses through shared-branch networks. Under shared-branch arrangements, credit unions are able to minimize the cost of doing business as well as provide their members with multiple locations by sharing branch facilities and staff with other, unrelated credit unions. Certain audit risks may arise from shared-branch arrangements. See the "Audit Issues and Developments" section of this Audit Risk Alert for a further discussion of the audit risks related to shared branches.

Regulatory Developments

.06 Laws and implementing regulations affect the areas and ways in which credit unions operate by creating standards with which those credit unions must comply. Also, a number of laws and regulations

directly address the responsibilities of auditors. Auditors should be generally familiar with certain laws and regulations that affect the following:

- Acceptance of engagements in the industry
- Development of the expected conduct and scope of an engagement
- Responsibility for the detection of errors, irregularities, and illegal acts
- Evaluation of contingent liabilities and related disclosures
- Consideration of a credit union's ability to continue as a going concern

.07 Also, AICPA Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), requires that auditors consider matters, such as government regulations, affecting the industry in which the entity operates. For that purpose, being familiar with the nature and purpose of regulatory examinations—including the differences and the relationship between examinations and financial statement audits—is helpful for auditors. An understanding of the regulatory environment in which credit unions operate also is necessary to complement the auditor's knowledge of existing regulatory requirements. Because the regulatory environment is continually changing, the auditor should be aware of relevant regulatory changes and consider their implications in the audit process.

.08 Following are regulatory developments of particular significance in audits of the financial statements of credit unions. Other legislative and regulatory matters covering other policy areas, such as regulations for fair lending practices or the Truth in Savings Act, are outside the scope of this document. Auditors should be alert to the effect of legislative and regulatory developments on contingent liabilities, and planned mergers or acquisitions, and the direct and material effects of such developments on the determination of amounts in the credit union's financial statements. This Audit Risk Alert does not provide a comprehensive discussion of each issue. Readers should not substitute a reading of this Audit Risk Alert for a complete reading of related laws, regulations, rulings, or other documents where appropriate (see the "Information Sources" section herein). This Audit Risk Alert refers to related publications of the National Credit Union Administration (NCUA) and other entities as appropriate.

New and Proposed Regulations

.09 The NCUA insures 7,329 Federal credit unions and insures members deposits of an additional 4,358 state-chartered credit unions. Over the past several years, the NCUA has moved toward deregulation while, at the same time, increasing the role and responsibilities of credit union boards of directors and supervisory committees, especially relating to the credit union's investment activity and audit responsibilities. The NCUA also has announced plans to conduct a top-to-bottom review of all regulations older than three years and all interpretative rulings and policy statements (IRPS) to identify rules that can be eliminated and areas that can be streamlined.

.10 *Revised Supervisory Committee Audit Regulations.* In July 1996, the NCUA revised Supervisory Committee Regulation (Part 701.12), "Audits and Verifications" (*Federal Register*, August 8, 1996). The new regulations specify the requirements for performing annual credit union supervisory committee audits, and expand the audit scope responsibilities if the supervisory committee audit is performed by an independent compensated auditor. The new regulations are effective for audits conducted for and covering the audit period ending December 31, 1996, and thereafter.

.11 According to the new regulations, the requirement for Federal and Federally insured state chartered credit unions to have an annual supervisory committee audit may be satisfied by one or a combination of the following:

1. An audit of the credit union's financial statements performed by an independent auditor in accordance with generally accepted auditing standards (GAAS).

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

2. An agreed-upon procedures engagement performed by an independent, licensed certified public accountant (CPA).
3. A supervisory committee audit performed by a compensated auditor (as defined) other than a CPA in accordance with applicable GAAS (as defined).
4. A supervisory committee audit performed by the supervisory committee or its designated, uncompensated representative in accordance with applicable GAAS.

With respect to either of the first two of the above options, the regulations require the independent auditor to certify in an engagement letter whether the contracted scope of the audit satisfies the requirements of a complete supervisory committee audit. If the auditor performs procedures that exclude any of the financial statement elements, accounts, or items and attributes listed in parts 701.12(c)(3) and (4) of the NCUA regulations, the auditor must state in the engagement letter that the procedures performed by the auditor will not, by themselves, fulfill the scope of a supervisory committee audit, and the auditor must caution the supervisory committee that the supervisory committee will remain responsible for fulfilling the scope of a supervisory committee audit with respect to the elements, accounts, or items and attributes not tested by the independent auditor.

.12 Practitioners are cautioned that the Audit Issues Task Force (AITF) of the AICPA Auditing Standards Board (ASB) concluded that an agreed-upon procedures engagement performed pursuant to SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), or Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600), cannot, by itself, satisfy all of the objectives of a supervisory committee audit as specified in parts 701.12(c)(3) and (4) of the NCUA regulations. The AITF concluded that a CPA can only satisfy the supervisory committee requirement in its entirety by performing an audit of the credit union's financial statements in accordance with GAAS. See the "Audit Issues and Developments" section of this Audit Risk Alert for further discussion.

.13 The rule requires that the auditor prepare an engagement letter that, among other things, must—

- Specify the terms, conditions, and objectives of the engagement;
- Identify the basis of accounting to be used, for example, generally accepted accounting principles (GAAP) or regulatory accounting practices (RAP);
- Certify that NCUA staff or its designated representative will be provided unconditional access to the complete set of original work papers either at the credit union or at a mutually agreeable location, for purposes of inspection;
- Certify whether the procedures performed satisfies the requirements of a complete supervisory committee audit (see related discussion above);
- Acknowledge that working papers will be retained for a minimum of three years from the date of the written audit report.

.14 *Community Development Credit Unions—Secondary Capital.* In January 1996, the NCUA issued regulations that authorized credit unions having a low-income designation from the NCUA or the appropriate state regulator to offer secondary capital accounts to immediately boost their capital levels. Previously, low-income credit unions (LICUs) were allowed to accept public and private deposits from nonmember sources such as foundations, corporations, and other financial institutions. The new regulations allow LICUs to raise additional funds from these sources for use as secondary capital. This secondary capital would not be treated as share deposits, but as subordinated debt, and would be available to LICUs to absorb any losses. The regulations also established several safety and soundness conditions that Federal and state-chartered LICUs must follow prior to issuing the secondary capital accounts, including adopting a written plans and submitting it to the appropriate NCUA regional director and/or state supervisor.

.15 The NCUA rule states that, for regulatory capital purposes, the secondary capital accounts should be recorded in the equity section in the balance sheet. The amount to be treated as capital decreases as the deposit reaches maturity based on a sliding scale. The portion not treated as capital is to be reported in a liability account according to regulatory guidance. See the "Audit Issues and Developments" section of this Audit Risk Alert for further discussion of the auditor's consideration of the presentation of secondary capital accounts in a credit union's financial statements.

.16 *Natural Person Credit Union Investments.* In November 1995, the NCUA proposed regulations (Part 703) affecting investment and deposit activity of natural person credit unions (*Federal Register*, November 29, 1995). The proposed regulations were based, in part, on an NCUA survey of 300 credit unions with investments in collateralized mortgage obligations (CMOs) and real estate mortgage investment conduits (REMICs) in excess of capital. The study revealed that more than one-third of the credit unions did not understand the risks of CMOs and REMICs, that more than a quarter of the credit unions were taking unacceptable risks, and that almost half did not have acceptable asset-liability management policies.

.17 The proposed rule would allow a credit union to operate on one of three levels of investment activity. At the most conservative level, a credit union could invest in fully insured certificates of deposit (CDs) and shares and deposits in corporate credit unions.

.18 At the next level, a credit union could invest in potentially more risky securities in an amount up to capital and would have to comply with most of the proposed rule's policy and reporting requirements.

.19 Finally, at the most sophisticated level, a credit union investing in potentially more risky securities in an amount exceeding capital would be subject to all of the proposed rule's policy and reporting requirements.

.20 The proposed rule makes several changes to the current regulations in Part 703, including—

- Expanding the current requirements for written investment policies consistent with the Federal Credit Union Act, the NCUA Rules and Regulations, and other applicable laws and regulations to address CMO/REMIC prepayment models, concentration limits, trading activities, and the knowledge and experience of persons granted investment authority;
- Prohibiting certain investment activities such as purchasing stripped mortgage-backed securities, residual interests in CMO/REMICs, and interest-rate swap contracts;
- Limiting delegation of authority to an outside party up to 100 percent of capital;
- Establishing minimum credit ratings for financial institutions and municipal bonds;
- Requiring that the index for variable rate investments be tied to domestic interest rates only.

.21 The comment period on the proposed rule was extended to November 18, 1996.

.22 *Corporate Credit Unions.* In June 1996, The NCUA proposed changes to NCUA regulations (Part 704) related to factors affecting the safety and soundness of the existing forty-one corporate credit unions. These include proposed changes to capital requirements, asset/liability management, investments, lending, membership eligibility, borrowings, internal audits, and expanded authorities (*Federal Register*, June 4, 1996).

.23 Specifically, the rule proposes the following:

- Require that each corporate to maintain a 4-percent minimum capital level, unless expanded authorities are granted;
- Alter the definition of capital to include the sum of a corporate's reserves and undivided earnings, paid-in capital, and membership capital;

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Substitute membership capital share deposits with membership capital accounts, which would require three-years notice of withdrawal, instead of the current one-year notice period;
- Require corporate boards to approve comprehensive written investment and asset/liability management plans and policies, and to oversee senior management to ensure that all activities are conducted in a safe and sound manner and consistent with the board's risk management philosophy;
- Require that corporates invest in instruments of high quality and limited risk. Permissible investments would include bank deposits, mutual funds, Treasury and agency securities, Fed funds, asset-backed and mortgage-backed securities, repurchase agreements, commercial paper, corporate notes/bonds, CUSOs, and deposits in other corporate credit unions. Investments that fall out of compliance with the regulation would have to be divested within twenty-five business days, unless an acceptable work plan is submitted to NCUA;
- Establish guidelines for managing the interest rate risk on the corporate's balance sheet;
- Require an internal audit function for corporates with assets greater than $400 million.

.24 The proposed rule retains the requirement for corporate credit unions to have an annual financial statement audit by an independent, licensed CPA. In addition, the proposed rule would require that all correspondence provided to a corporate credit union by the external auditor be made available to NCUA. This provision is subject to broad interpretation of the term *correspondence*. The AICPA asked the NCUA to clarify that such correspondence be related only to the auditor's findings based on the audit.

.25 The comment period on the proposed rule was extended to October 19, 1996.

.26 Auditors should be alert for issuance of final regulations and consider the effect on audit risk. Auditors should also be aware of the financial difficulties encountered by certain corporate credit unions and ensure that their credit union clients are monitoring the financial strength of the corporate credit unions in which they invest and are evaluating those investments for impairment on a timely basis. See the "Audit Issues and Developments" section of this Audit Risk Alert for further discussion of noncompliance with regulatory requirements.

.27 *Unrelated Business Income Taxes.* Credit unions are exempt from Federal income taxes; however, they may realize income from certain activities that may be subject to unrelated business income taxes. In a December 1995 technical advice memorandum, the IRS ruled that the sale of credit life and disability insurance to member borrowers by a state-chartered credit union should be treated as unrelated business taxable income under section 511 of the Internal Revenue Code (IRC). Auditors should consider whether the financial statements include appropriate provisions for taxes on unrelated business income.

Other Regulatory Matters

.28 *NCUA World Wide Web Home Page.* The NCUA has over 600 documents available on its website (http://ncua.gov or http://www.ncua.gov). The NCUA website includes information on the NCUA organization and many reference materials affecting credit unions, including rules and regulations, the Federal Credit Union Act, accounting bulletins, legal opinion letters, accounting manual, regulatory alerts, interpretative rulings, and letters to credit unions. The site also includes credit union data from call reports and financial performance reports. Much of this information is useful to the auditor in planning and performing the audit, and performing analytic review of a credit union compared to industry trends and statistics.

.29 *AIRES.* NCUA examiners have been using the automated integrated regulatory examination system (AIRES) to conduct examinations of credit unions. NCUA expects to release in early 1997, an AIRES version for credit unions (Aires "lite") that would be available to credit unions as a management tool to analyze loan

and shared data. Recently, AIRES was used to detect a twenty-year fraud in a cover-up scheme by running a loan concentration query and finding numerous loans with a credit union's address. Auditors may find AIRES to be a useful tool in performing audit planning, such as in considering industry financial trends and ratios, and performing analytical review procedures.

.30 *Educational Loans.* Auditors should be alert that the Higher Education Act requires compliance engagements for Federal Family Education Loan (FFEL) program lenders and third-party servicers. The United States Department of Education's Office of the Inspector General (OIG) developed detailed requirements for lender engagements in its March 1995 guide, *Compliance Audits (Attestation Engagements) of Federal Family Education Loan Program at Participating Lenders*, in March 1995.

.31 In June 1996, the Department extended the due date for reports from lenders with portfolios equal to or less than $5 million (as defined) until June 30, 1997 (Dear Colleague Letter 96-L-188).

.32 The OIG plans to issue a guide in late 1996 that will supersede the March 1995 lender guide and will introduced detailed requirements for servicer engagements. The new guide likely will become effective within six months of issuance.

Audit Issues and Developments

Supervisory Committee Audits

.33 The NCUA's revised supervisory committee audit regulations (Part 701.12 of Title 12 of the Code of Federal Regulations) provide that a credit union's supervisory committee may satisfy the requirements of a supervisory committee audit by, among other approaches, engaging an independent CPA to perform an audit of the credit union's financial statements in accordance with GAAS or to perform an agreed-upon procedures engagement. As discussed below, the AITF of the AICPA's Auditing Standards Board concluded that an agreed-upon procedures engagement performed pursuant to SAS No. 75 (AU section 622) (or SSAE No. 4 [AT section 600]), cannot, by itself, satisfy all of the objectives of a supervisory committee audit as specified in parts 701.12(c)(3) and (4) of the NCUA regulations. The AITF concluded that a CPA can only satisfy the supervisory requirement in its entirety by performing an audit of the credit union's financial statements in accordance with GAAS. Practitioners requested to perform an agreed-upon engagement should advise their clients of this issue. (See the "Regulatory Developments" section of this Audit Risk Alert for further discussion of the new supervisory committee audit regulations.)

.34 The supervisory committee audit regulations state that the scope of a supervisory committee audit (whether such audit is satisfied by a GAAS audit or an agreed-upon procedures engagement) consists of—

1. Attaining an understanding of the internal control structure;
2. Assessing the level of control risk;
3. Based on the level of risk, determining the nature, timing, and extent of substantive testing necessary to confirm the assertions made by management regarding each of assets, liabilities, equity, income, and expenses for the following attributes (assertions):
   - Existence or occurrence
   - Completeness
   - Valuation or allocation

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Rights and obligations
- Presentation and disclosures

.35 In addition, a supervisory committee audit performed by an independent, compensated auditor which includes any of the following areas must, with respect to audit scope but not with respect to reporting, satisfy GAAS for expressing an opinion on the financial statements taken as a whole:

1. Internal controls
2. Cash
3. Loans and interest thereon
4. Investments and interest thereon
5. Shares and dividends and/or interest thereon
6. Related party transactions
7. The reporting of identified errors and irregularities with regard to each of items 1 through 6 above

.36 The AITF concluded that the required audit objectives for each of the above areas can only be met by exercising professional judgment within the context of an audit performed in accordance with GAAS (the overall objective of which is the expression of an opinion on the fairness of a financial presentation *taken as a whole*). Procedures directed at fulfilling the complete scope and audit objectives would fail the conditions for an agreed-upon procedures engagement in paragraph 9 of SAS No. 75 (AU section 622.09). Procedures to "attain an understanding of an entity's internal control structure" and to "assess the level of control risk" are inappropriate procedures in an agreed-upon procedures engagement. (See paragraphs 17 through 20 of SAS No. 75 [AU section 622.17–.20] for a discussion of appropriate procedures.)

.37 Auditors may be able to perform certain agreed-upon procedures related to a financial statement element, account, or item and attributes (for example, test loans and interest thereon for valuation or allocation attributes) in accordance with SAS No. 75 (AU section 622). Auditors who perform an agreed-upon procedures engagement should clearly communicate to the client in the engagement letter the scope of work to be performed and state that the scope of the procedures does not meet the full supervisory committee audit scope requirements.

.38 The auditor should also ensure that the conditions in SAS No. 75 (AU section 622) for an agreed-upon procedures engagement are met. Paragraph 9 of SAS No. 75 (AU section 622.09) states that accountants may perform an agreed-upon procedures engagement provided that—

a. The accountant is independent.

b. The accountant and the specified users agree upon the procedures performed or to be performed by the accountant.

c. The specified users take responsibility for the sufficiency of agreed-upon procedures for their purposes.

d. The procedures to be performed are expected to result in reasonably consistent findings.

e. The basis of accounting of the specified elements, accounts, or items of a financial statement is clearly evident to the specified users and the accountant.

f. The specified subject matter to which the procedures are to be applied is subject to reasonably consistent estimation or measurement.

g. Evidential matter related to the specific subject matter to which the procedures are applied is expected to exist to provide a reasonable basis for expressing the findings in the accountant's report.

h. Where applicable, the accountant and the specified users agree on any materiality limits for reporting purposes.

i. Use of the report is restricted to the specified users.

.39 The auditor should also consider whether, in the particular facts and circumstances of the engagement, there are parties other than the credit union supervisory committee, such as the NCUA or state regulator, that should be included as specified users. The auditor should restrict the report to the specified users and obtain representations from all specified users that they take responsibility for the sufficiency of the agreed-upon procedures for their purposes.

.40 Auditors should discuss with the client the approach to be taken to satisfy the supervisory committee audit. Auditors should also consider obtaining representations from the supervisory committee on its responsibility for fulfilling the scope of the supervisory committee audit.

.41 With respect to the requirement to provide NCUA with access to the auditor's working papers, auditors should refer to Interpretation No. 1 of SAS No. 41, *Working Papers*, titled "Providing Access to or Photocopies of Working Papers to a Regulator" (AU section 9339.01–.15).

Secondary Capital Accounts

.42 Auditors of credit unions that have a low-income designation from the NCUA or the appropriate state regulator and that offer secondary capital accounts should give special consideration to the propriety of the presentation of secondary capital accounts in GAAP financial statements. See the "Regulatory Developments" section of this Audit Risk Alert for further discussion of community development (low-income designated) credit unions. Credit union regulations require secondary capital accounts to be recorded in the equity section account in the balance sheet for regulatory capital purposes. The amount to be treated as capital decreases as the deposit reaches maturity based on a sliding scale. The portion not treated as capital is to be reported in a liability account according to regulatory guidance. Such a regulatory reporting requirement may be inconsistent with GAAP and may present misleading information about a credit union's financial position. Based on the characteristics of the secondary capital account outlined in NCUA regulations, GAAP would likely require secondary capital accounts to be classified as debt not equity. Auditors should consider the effect on audit risk of differences between RAP used to prepare regulatory financial reports and GAAP, and should consider modification of the auditor's report if the financial statements are not fairly presented.

Noncompliance With Regulatory Requirements

.43 Events of noncompliance with regulatory requirements, such as participation in impermissible activities or investments, expose credit unions to regulatory action, such as the forced disposition of those impermissible investments. Events of noncompliance may be brought to the auditor's attention during the application of normal auditing procedures, during the review of regulatory examination reports, or because of actions required by regulators.

.44 SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), states in paragraph 2 that "the auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited." Events of noncompliance with laws and regulations or the need to dispose of substantial assets are conditions, when considered with other factors,

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

that could indicate substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. SAS No. 59 (AU section 341) identifies examples of other factors that the auditor may evaluate.

Warning Flags and Fraud Indicators

.45 In 1995, the National Credit Union Share Insurance Fund (NCUSIF) took charges of $11.4 million, of which $10.3 million was due to fraud, weak management or recordkeeping, or planned closings or loss of sponsor. Factors identified in those cases included the following:

- Inadequate internal controls
- No independent audit or insufficient audit procedures
- Fictitious loans
- Hidden delinquency
- Insider dealings
- Fictitious shares
- Unauthorized disbursements
- Lack of segregation of duties
- Improper salary advance loans
- Overdraft scheme (negative shares)
- Required reports not provided to Federal examiners

.46 Recent cases of employee embezzlement have taken the form of employees stealing from their employers because of financial needs arising from personal or medical problems. Some methods used to steal money include the following:

- Alter or create member accounts, such as using the account of a customer with a bad credit rating to conceal stolen funds so that nothing would look out of the ordinary when a delinquent loan appears on their credit report;
- Make loan advances using unauthorized or inappropriate disbursement procedures;
- Manipulate or delete important computer records;
- Steal small amounts from dormant accounts over several years.

Auditing Pronouncements

.47 Four new Statements on Auditing Standards, which are discussed in the following exhibit, have been issued recently that may affect audits of financial statements of credit unions.

.48

Exhibit

Significant Provisions of Newly Issued SAS

Pronouncement	Pronouncements Affected	Key Provisions
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	• Prohibits negative assurance. • Provides guidance concerning the following conditions for performing agreed-upon procedures engagements: — the nature, timing, and extent of the procedures — the responsibilities of practitioners and specified users — reporting on agreed-upon procedures.
SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623)	SAS Nos. 22, 59, and 62	• Clarifies that a written audit program should be prepared. • Precludes the use of conditional language in a going concern report.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319)	SAS No. 55	• Recognizes the COSO definition of internal control.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58	• Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59 [AU section 341]).

.49 *SAS No. 75.* In September 1995, the ASB of the AICPA issued SAS No. 75 (AU section 622), which provides guidance to an accountant concerning performance and reporting in all engagements to apply agreed-upon procedures to specified elements, accounts, or items of a financial statement, except in certain circumstances, as discussed in the Statement (AU section 622). The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.

.50 *SAS No. 77.* In November 1995, the AICPA ASB issued SAS No. 77, *Amendments to SAS No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, 544, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77 is effective for engagements beginning after December 15, 1995.

.51 *SAS No. 78.* In December 1995, the ASB issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission, formed to address the Report of the National Commission on Fraudulent Financial Reporting. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

.52 *SAS No. 79.* In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report. SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58, *Reports on Audited Financial Statements* (AU section 508), concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. This Statement (AU section 508) does not affect SAS No. 59 (AU section 341) nor preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements. This Statement (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted. Auditors are permitted to delete the uncertainties paragraph in their audit reports for year-end audits.

SAS No. 70 Auditing Procedure Study

.53 The AICPA issued an auditing procedure study that provides guidance to auditors on implementing SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324). The study provides guidance to a service auditor engaged to issue a report on the control structure policies and procedures of a service organization and to user auditors engaged to audit the financial statements of an entity that uses a service organization. An example of a service organization is a computer service center that provides the information system needs for a credit union.

Accounting Issues and Developments

Mortgage Servicing Rights

.54 Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 122, *Accounting for Mortgage Servicing Rights* (AC Mo4), amends FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), to require that a mortgage banking enterprise recognize as separate assets rights to service mortgage loans for others, however those servicing rights are acquired. A mortgage banking enterprise may acquire mortgage servicing rights through either the purchase or origination of mortgage loans. Auditors of Federally chartered credit unions should be aware that the NCUA regulations prohibit Federal credit unions from purchasing mortgage servicing rights. A credit union that acquires mortgage servicing rights through the origination of mortgage loans and sells or securitizes those loans with servicing rights retained is required by FASB Statement No. 122 (AC Mo4) to allocate the total cost of the mortgage loans to the mortgage servicing rights and the loans (without the mortgage servicing rights) based on their relative fair values if it is practicable to estimate those fair values. If it is not practicable to estimate the fair values of the mortgage servicing rights and the mortgage loans (without the mortgage servicing rights), the Statement (AC Mo4) requires that the entire cost of purchasing or originating the loans should be allocated to the mortgage loans (without the mortgage servicing rights) and no cost should be allocated to the mortgage servicing rights.

.55 FASB Statement No. 122 (AC Mo4) requires that a credit union assess its capitalized mortgage servicing rights for impairment based on the fair value of those rights. The Statement (AC Mo4) requires that a credit union should stratify its mortgage servicing rights that are capitalized after the adoption of the Statement (AC Mo4) based on one or more of the predominant risk characteristics of the underlying loans. The Statement (AC Mo4) requires that impairment should be recognized through a valuation allowance for each impaired stratum.

.56 FASB Statement No. 122 (AC Mo4) applies prospectively in fiscal years beginning after December 15, 1995, to transactions in which a credit union sells or securitizes mortgage loans with servicing rights retained and to impairment evaluations of all amounts capitalized as mortgage servicing rights, with earlier application encouraged. The Statement (AC Mo4) prohibits the retroactive capitalization of mortgage servicing rights retained in transactions in which a credit union originates mortgage loans and sells or securitizes those loans before the adoption.

.57 In July 1995, the FASB staff announced that the Board agreed to clarify the transition provisions of FASB Statement No. 122 (AC Mo4), noting in FASB's Action Alert No. 95-21 that earlier application is encouraged as of the beginning of a fiscal year for which annual financial statements or annual financial information has not been issued or as of the beginning of an interim period within that fiscal year for which interim financial statements or interim financial information has not been issued. For example, Public Company X issued financial information for the first quarter. In the second quarter, management of Public Company X has two choices for early adoption: (1) adopt as of the beginning of the fiscal year because annual financial statements or annual financial information has not been issued for that fiscal year or (2) adopt as of the beginning of the second quarter because interim financial statements or interim financial information has not been issued for that quarter.

Transfers and Servicing of Financial Assets

.58 FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, is effective for transfers and servicing of financial assets and the extinguishment of liabilities occurring after December 31, 1996. The Statement is to be applied prospectively, and earlier or retroactive application is not permitted. Auditors should be alert that FASB Statement No. 125 significantly affects accounting for (and disclosures about) sales of partial interests in financial assets, securitization of loans, servicing assets and liabilities, securities lending transactions, repurchase agreements, wash sales, loan syndications and participations, factoring arrangements, transfers of receivables with recourse, and the extinguishment of liabilities. On November 15, 1995, the FASB published a FASB Special Report, *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities*. Among various questions and answers about the implementation of FASB Statement No. 115, *Accounting for Certain Investment in Debt and Equity Securities* (AC I80), the answer to Question 61 explains that the FASB directed its staff to provide guidance, in part, that is concurrent with the initial adoption of this implementation guidance but no later than December 31, 1995, an enterprise may reassess the appropriateness of the classifications of all securities held at that time and account for any resulting reclassifications at fair value in accordance with paragraph 15 of FASB Statement No. 115 (AC I80).

.59 The FASB staff also announced at the November 15-16, 1995, meeting of the Emerging Issues Task Force (EITF) that the FASB intends that the initial application of the Special Report and any resulting one-time reclassifications will occur as a single date between November 15, 1995, and December 31, 1995, not over a number of days throughout the period.

Impairment of Long-Lived Assets

.60 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the credit union estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.

.61 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.62 Paragraph 16 of FASB Statement No. 121 (AC I08) states that assets to be disposed of that are within the scope of that Statement (AC I08), such as other real estate owned, should "not be depreciated (amortized) while they are held for disposal."

.63 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Earlier application is encouraged. Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle. (See "Foreclosed Assets" in the "Accounting Issues and Developments" section herein.)

.64 Auditors of credit unions should be aware that the current industry climate of consolidations and mergers has increased the likelihood that events or changes in circumstances that indicate that assets have been impaired may have occurred. For example, a merger may result in duplication of branch locations within certain geographic areas that would compete for member business. In these instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.65 In considering a credit union's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

Disclosures About Derivatives

.66 In October 1994, the FASB issued Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25). FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments—futures; forward, swap, and option contracts; and other financial instruments with similar characteristics. Although Federal credit unions are prohibited from investing in derivative financial instruments as defined by FASB Statement No. 119 (AC F25), fixed-rate loan commitments and

certain variable-rate loan commitments have characteristics similar to options and, therefore, fall within the scope of that Statement (AC F25).

.67 The Statement (AC F25) also amends existing requirements of FASB Statement No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), and FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25). The Statement (AC F25) requires disclosures about the amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. Paragraph 12 of FASB Statement No. 119 (AC F25) encourages, but does not require, entities to disclose quantitative information about risks associated with derivatives.

.68 FASB Statement No. 119 (AC F25) was effective for financial statements issued for fiscal years ending after December 15, 1994, except for organizations with less than $150 million in total assets. For those organizations, the Statement (AC F25) is effective for financial statements issued for fiscal years ending after December 15, 1995.

.69 The FASB Special Report, *Illustrations of Financial Instrument Disclosures*, contains illustrations of the application of FASB Statement Nos. 105 (AC F25), 107 (AC F25), and 119 (AC F25).

Consensus Decisions of the FASB's Emerging Issues Task Force

.70 The FASB's EITF frequently discusses accounting issues involving financial instruments, real estate, or transactions of similar importance to credit unions. A description of issues discussed during the year follows; readers should consult detailed minutes for additional information.

.71 EITF Issue No. 96-10, *Impact of Certain Transactions on the Held-to-Maturity Classification under FASB Statement No. 115*, Accounting for Certain Investments in Debt and Equity Securities. Consensus was reached that transactions involving held-to-maturity securities that are not accounted for as sales, such as wash sales and bond swaps, would not contradict an entity's stated intent to hold a security to maturity and, therefore, do not call into question the entity's intent to hold other debt securities to maturity. The EITF observed that unless the debt instrument received or retained as a result of the transaction is held to maturity, the transaction would call into question the entity's intent to hold other debt securities to maturity.

.72 Appendix D to the *EITF Abstracts* contains EITF discussions of technical matters that have long-term relevance and do not relate specifically to a numbered EITF Issue. Readers should be alert to the following topic of recent discussion:

> Appendix D-48, *The Applicability of FASB Statement No. 65 to Mortgage-Backed Securities that Are Held-to-Maturity*, which relates to questions about the applicability of FASB Statement No. 65 (AC Mo4) to transactions in which an enterprise securitizes mortgage loans and classifies the resulting mortgage-backed securities as held-to-maturity in accordance with FASB Statement No. 115 (AC I80).

Risks and Uncertainties

.73 In December 1994, the AICPA's Accounting Standards Executive Committee (AcSEC) issued Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. SOP 94-6 requires credit unions to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

requires credit unions to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.74 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Besides valuation allowances for business and real estate loans, examples of similar estimates that may be included in financial statements of credit unions include, but are not limited to, the following:

- Impairment of long-lived assets, for example, marginal branches
- Estimates involving assumed prepayments, for example, discounts or premiums on financial assets (such as securities or loans), mortgage servicing rights and excess servicing receivables, and mortgage-related derivatives
- Lives of goodwill and identifiable intangible assets

.75 Examples of concentrations that may meet the criteria that require disclosure in the financial statements of credit unions in accordance with paragraph 21 of the SOP include the following:

- Sale of a substantial portion of or all receivables, or loan products to a single customer
- Loss of approved status as a seller of loans or mortgages to a third party
- Concentration of revenue from mortgage banking activities

.76 The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.77 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

Foreclosed Assets

.78 Certain provisions of SOP 92-3, *Accounting for Foreclosed Assets*, are inconsistent with provisions of FASB Statement No. 121 (AC I08). AcSEC is considering actions that it should take on SOP 92-3; however, FASB Statement No. 121 (AC I08) takes precedence for transactions within its scope.

Information Sources

.79 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.80 Fax services allow users to follow voice cues and request that selected documents be sent by fax. Some fax services require the user to call from the handset of the fax machine; others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.81 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.82 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.83 All telephone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8030

Health Care Industry Developments—1996/97

Industry and Economic Developments

.01 Although comprehensive health care reform legislation has not been passed by Congress, health care remains at the forefront of the national debate. Washington continues to debate the most far-reaching reform of Medicare and Medicaid since these programs were created as part of the Great Society of the 1960s. For the first time since the inception of these entitlement programs, lawmakers have offered budgets to curb long-term spending increases. Although it is unclear whether substantive reform legislation will be passed by Congress during an election year, one thing is certain—changes to Medicare and Medicaid could have significant effects on the financial results of health care providers.

.02 Market-driven changes continue to outpace federal initiatives. Market pressures to provide quality health care at reasonable costs have sustained the movement toward a managed care environment, resulting in an increasing number of mergers, acquisitions, and other affiliations among health care providers. As these providers come together to form integrated delivery systems and establish new alliances within a managed care structure, many are accepting more of the financial risk of treating patients. Furthermore, these transactions typically are the subject of close regulatory scrutiny. As a result, these transactions subject health care providers to new areas of financial and business risk. Health care providers are developing integrated delivery systems and establishing new alliances to gain operating and functional efficiencies. Specific auditing issues that have arisen from these market-driven changes are discussed in both the "Audit Issues and Developments" section of this Audit Risk Alert (see the discussion entitled "Risk-Related Issues in a Managed Care Environment") as well as the "Accounting Issues and Developments" section (see the discussion entitled "Accounting for Transfers Among Health Care Organizations").

.03 In addition to these industry and economic developments, the federal government is increasing its efforts to identify and prosecute fraudulent and abusive activities involving health care entities. The government's focus stems from United States Department of Justice estimates that health care fraud and abuse costs the national economy as much as $100 billion annually. This investigative activity, combined with the increased number of affiliations in the industry, raises the awareness of fraud and abuse, and other regulatory concerns. In this environment, auditors should be alert to potential issues raised by investigative activities.

.04 These and other developments that may affect audits of financial statements of health care organizations are discussed in this Audit Risk Alert.

Regulatory, Legislative, and Other Developments

Revisions to the Single Audit Act and OMB Single Audit Circulars

.05 Thus far in 1996, the following two important developments have occurred with respect to the Single Audit Act (the Act) and the United States Office of Management and Budget (OMB) Single Audit Circulars:

1. Legislation amending the Act was signed into law.

2. Revisions to OMB Circular A-133 were issued by the OMB.

The most significant effect of these developments on the health care industry is the fact that applicability of the Act and OMB Circular A-133 has been extended to all nonprofit hospitals.

Single Audit Act Amendments

.06 On July 5, 1996, legislation amending the Single Audit Act was signed into law by President Clinton. The new law (P.L. 104-156) makes several important changes to the Single Audit Act of 1984, which established audit requirements for non-federal entities receiving federal financial assistance. Highlights of important changes include the following:

- Extension of the Act's coverage to nonprofit organizations
- Implementation of a risk-based approach for auditors to select major federal programs to be audited
- Increase of the dollar threshold for single audit coverage to $300,000
- The requirement that auditors provide a summary of the results of their work concerning the audited entity's financial statements, internal controls, and compliance with laws and regulations
- Reduction of the audit report due date to nine months

The new law is effective for fiscal years beginning after June 30, 1996. An electronic version of the Single Audit Act Amendments of 1996 is available on the U.S. Government Accounting Office (GAO) Office of Policy Bulletin Board (in the Single Audit—GAO Conference), which can be accessed by dialing (202) 512-4286 via modem. Both ASCII and PDF versions are available. An electronic version is also available via the Internet at *http://thorplus.lib.purdue.edu/gpo/* in the Public Laws section (click on the box marked "104 Congress"). A copy of the Act is also available on the AICPA's Fax Hotline. To access the hotline, dial (201) 938-3787 from a fax machine, follow the voice cues, and select document number 402.

OMB Circular A-133 Revisions

.07 The OMB is moving forward on a project to combine the audit requirements under OMB Circulars A-128, *Audits of State and Local Governments*, and A-133, *Audits of Institutions of Higher Education and Other Nonprofit Institutions*. As the first step in this project, the OMB issued proposed revisions to OMB Circular A-133 in March 1995. A revised Circular A-133 was finalized on April 22, 1996, and will be effective for audits of fiscal years ending on or after June 30, 1997. The revised Circular contains the following revisions:

- The definition of *nonprofit organization* has been revised to include all nonprofit hospitals.
- Auditors will now determine *major programs*, as defined in Circular A-133, on the basis of risk assessment, considering prior audit experience, oversight performed by federal agencies and others, and the inherent risk of the program, rather than solely on the basis of federal expenditures, as currently required.
- The required level of testing of the internal control structure over major programs has been clarified as being based on auditors' planning for a low assessed level of control risk.
- Minimum requirements for the Schedule of Federal Awards have been provided.
- Guidance is included concerning the following:
  1. Reporting audit findings concerning federal awards in a single schedule of findings and questioned costs, which includes a summary of the auditor's results
  2. Thresholds for determining which audit findings should be included in the audit report
  3. Descriptions of what information auditors should include in an audit finding

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

4. Required follow-up on audit findings, including providing a corrective action plan for current audit findings and a summary schedule of prior audit findings

- Guidance has been included concerning the assignment of cognizant agencies.
- Restrictions have been imposed on auditor selection whereby auditors who also prepare the indirect cost proposal or cost allocation plan are prohibited from being selected as the auditor if the indirect costs recovered in the prior year are greater than $1 million in total.

It is expected that the OMB will publish a notice of its intent to rescind OMB Circular A-128 and further revise OMB Circular A-133 to be applicable to state and local governments, colleges and universities, and not-for-profit organizations in the *Federal Register* in September 1996.

.08 A copy of the Circular may be obtained from any of the following:

- *Federal Register* notice (April 30, 1996, 61 FR 19134)
- The OMB fax information line is (202) 395-9063, document number 1133
- The OMB home page on the Internet which is located at *http://www.whitehouse.gov/WH/EOP/omb*
- The Office of Administration, Publications Office, Room 2200, New Executive Office Building, Washington, DC 20503 (202) 395-7332

Internal Revenue Service Developments

General

.09 Auditors should be aware of relevant tax laws and regulations and their potential effect on health care organizations and their financial statements. A not-for-profit health care organization's failure to maintain its tax-exempt status could have serious tax consequences and affect both its financial statements and related disclosures, and it could possibly require modification of the auditor's report. Failure by both for-profit and not-for-profit health care organizations to comply with tax laws and regulations could have either a direct effect on the determination of financial statement amounts (for example, the result of an incorrect accrual for taxes on unrelated business income) or an indirect effect on the financial statements that would require appropriate disclosures. AICPA Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients* (AU section 317), discusses the nature and extent of the consideration an auditor should give to the possibility of illegal acts and provides guidance on the auditor's responsibilities if a possible illegal act is detected.

Intermediate Sanctions

.10 On July 30, 1996, the Taxpayer Bill of Rights (H.R. 2337) was enacted into law. This legislation established intermediate sanctions in the form of excise taxes that can be assessed against individuals for any non-fair-market-value payment, including excessive compensation by public charities (such as tax-exempt hospitals) to a disqualified person. A *disqualified person* is defined as any individual who is in a position to exercise substantial influence over the affairs of the tax-exempt organization, whether by virtue of being an organization manager or otherwise. The new penalty taxes generally apply retroactively to transactions occurring on or after September 14, 1995, subject to certain transaction rules.

.11 Health care organizations subject to these new provisions should be aware that the income tax law now provides for potential monetary sanctions against individuals who may be considered related to an organization. In addition, excess benefit transactions entered into by tax-exempt health care organizations may have additional significant implications with respect to the health care organization's compliance with other regulations, such as Medicare fraud and abuse provisions.

Focus of IRS Attention

.12 With respect to *tax-exempt* health care provider systems, the Internal Revenue Service (IRS) is paying particular attention to tax exemption issues that arise in conjunction with the development of an integrated delivery system. Such issues include the following:

- Valuation issues with respect to the purchase of physician practices
- Reasonableness of physician compensation
- Private inurement concerns relating to both the formation and operation of physician hospital organizations (PHO) and other managed care entities

Other areas and issues that may be subject to close scrutiny by the IRS include the following:

- Joint venture affiliations between exempt health care organizations and for-profit entities
- Physician recruitment activities
- Classification issues with regard to workers as independent contractors/employees
- Proper unrelated business income reporting

For *taxable* health care organizations, the current areas of focus for the IRS include the following:

- Possible incorrect utilization of the cash method of accounting
- Incorrect application of the nonaccrual experience method for service providers (This special method of accounting allows a service provider to not accrue income which, based on experience, is not expected to be collected.)
- Proper timing of deductions with regard to capitation holdbacks that may occur with managed care entities
- Proper tax treatment of HMOs and circumstances that may indicate that they might more appropriately be considered insurance companies for tax purposes

Issues such as the preceding can have a material effect on the tax provisions and liabilities recorded in the financial statements of health care providers and, therefore, require close scrutiny by auditors.

Governmental Investigations Relating to Fraud and Abuse Violations

.13 Although Medicare and Medicaid Anti-Fraud and Abuse legislation has been in existence for nearly twenty years, regulatory developments, legal interpretations, and enforcement activities have heightened the risk of penalties for providers. A broadening interpretation in the application of the laws addressing false claims for Medicare and Medicaid payments, in conjunction with civil legislation such as the False Claim Act have opened the door for significant new civil penalty risks. Such civil penalties can be assessed on a per claim basis at rates in excess of $5,000 per false claim plus treble damages, and relate to each service claim submitted for payment or entry in a cost report. Broad interpretations of false claims are exposing ordinary billing mistakes to scrutiny and penalty consideration. Both federal and state law enforcement agencies have redirected substantial enforcement resources from other areas for the investigation and prosecution of health care fraud. In addition, a whistle-blower statute that rewards private parties for false claim identification has further spurred enforcement activity and provider risk.

.14 In 1995, the President announced a two-year federal fraud and abuse project ("Operation Restore Trust") aimed at five states: New York, Florida, Illinois, Texas, and California. The entities affected are nursing homes, home health agencies, hospices, and durable medical equipment suppliers. Operation Restore Trust includes the following:

- The issuance of special fraud alerts to notify the public about fraud schemes

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- The establishment of a new fraud and waste report hotline
- The creation of a fund to recycle fines
- A voluntary disclosure program

The voluntary disclosure program, the centerpiece of the project, allows companies to come forward with evidence of fraud or errors within their own organizations in consideration for reduced penalties, according to the Federal Inspector General (IG).

.15 One area of recent concern in teaching settings has been the IG and United States Attorney's attention devoted to the billing practices and billing patterns of physician clinical practice plans to determine whether attending physician services billed by the plans or hospitals were for services actually rendered by interns and residents. If the services are deemed to be rendered by interns and residents, they are not eligible for Medicare billing.

.16 Other areas of current interest to the IG include the following:

- Violations of the 72-hour diagnosis-related group (DRG) billing window
- Kickbacks
- Improper outpatient billing
- Non-arms-length transactions
- Credit balance reporting
- Outpatient lab billing
- Illegal DRG upcoding
- Billing for services not rendered
- Managed care underutilization

.17 In addition to the preceding investigative and enforcement activities, a number of recent legislative developments have expanded the legal force behind the government's fraud and abuse prevention efforts. Effective January 1, 1995, the Stark II anti-referral law was extended to practically all Medicare and Medicaid services. In addition, President Clinton signed the Health Insurance Portability and Accountability Act of 1996 (H.R. 3103) into law on August 21, 1996. This legislation will expand the role of the government in looking for, investigating, and prosecuting private health care fraud. The legislation also creates several new programs, increases funding, increases fines and penalties, and coordinates government efforts to fight fraud and abuse. A summary of the legislation can be obtained from the United States House Committee on Ways and Means Web Site, which can be accessed at *http://www.house.gov/ways_means/fc-29a.htm*. A copy of the text of the new law is available at *http://thomas.loc.gov/cgi-bin/query/z?c104:H.R.3103.ENR:*

.18 The auditor's procedures relating to fraud and abuse violations will vary based on his or her assessment of the risk of material misstatement resulting from such illegal acts. SAS No. 54 (AU section 317) states that the auditor should plan and perform the audit to provide reasonable assurance of detecting illegal acts having a direct and material effect on the determination of financial statement amounts. SAS No. 54 (AU section 317) also notes that an audit in accordance with generally accepted auditing standards (GAAS) does not include audit procedures specifically designed to detect illegal acts that have only an indirect effect on the financial statements (for example, illegal acts that have a material effect as the result of fines or penalties that may be imposed on the entity). The Statement (AU section 317) also provides guidance on the auditor's responsibilities if specific information concerning the possible existence of this kind of illegal act comes to the auditor's attention. Whether an act is actually illegal is a determination that is normally beyond the auditor's professional competence.

.19 Auditors of health care providers should consult Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies* (AC C59), SAS No. 54 (AU section 317), and paragraphs 2.37 through 2.41 of the AICPA Audit and Accounting Guide *Health Care Organizations* when evaluating the accounting and reporting implications of fraud and abuse issues. Auditors should also be aware that the far-reaching nature of alleged fraud and abuse violations may represent a significant risk and uncertainty that would require disclosures in accordance with Statement of Position (SOP) 94-6, *Disclosure of Certain Risks and Uncertainties.*

.20 Circumstances have been noted in practice in which Assistant Inspector Generals have stated that the independent auditor has the obligation to report any identified fraud to the IG. In responding to such requests, auditors should consider the guidance in paragraph 29 of SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316A.29), which states:

> Disclosure of irregularities to parties other than the client's senior management and its audit committee or board of directors is not ordinarily part of the auditor's responsibility, and would be precluded by the auditor's ethical or legal obligation of confidentiality unless the matter affects his opinion on the financial statements. The auditor should recognize, however, that in the following circumstances a duty to disclose outside the client may exist:
>
> *a.* When the entity reports an auditor change under the appropriate securities law on Form 8-K [9]
>
> *b.* To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors* [10]
>
> *c.* In response to a subpoena
>
> *d.* To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive financial assistance from a government agency
>
> Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may wish to consult with legal counsel before discussing irregularities with parties outside the client.
>
> [9] Disclosure to the Securities and Exchange Commission may be necessary if, among other matters, the auditor withdraws because the board of directors has not taken appropriate remedial action. Such failure may be a reportable disagreement on Form 8-K.
>
> [10] In accordance with section 315, communications between predecessor and successor auditors require the specific permission of the client.

.21 Auditors should be aware that the requirements in item (*a*) above also include reports that may be required, under certain circumstances, pursuant to the Private Securities Litigation Reform Act of 1995 (codified in section 10A(b)1 of the Securities Exchange Act of 1934) relating to an illegal act that has a material effect on the financial statements.

Audit Issues and Developments

Risk-Related Issues in a Managed Care Environment

.22 In an effort to respond to market pressures to provide quality health care at reasonable costs, many health care providers at all levels (for example, physicians and hospitals) are entering into managed care contracts. These contracts usually result in the providers assuming a greater share of the risk associated with underwriting health care services. Auditors should be aware of the following implications that result if health care providers enter into the managed care environment:

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- As health care organizations shift from fee-for-service medicine into capitation contracting, significant changes in their revenue and expense recognition policies follow, resulting in issues similar to those faced by prepaid health plans. For example, in many cases, revenues are generated as a result of an agreement to provide health care services rather than the actual provision of services.
- The costs of providing health care services under the terms of the contract should be accrued as services are rendered, including estimates of the costs of services rendered but not yet reported.
- Close attention should be given to the effect of managed care contracts on an entity's liability for incurred but not reported (IBNR) accruals, risk pool settlements, and risks and uncertainties disclosures.
- If hospitals and physician groups subcapitate to other provider organizations, consideration should be given to the viability of the capitated providers, as the contracting entity may be obligated in the event of financial failure of subcapitated entities.
- Retroactive changes to covered (or enrolled) members generally have corresponding impact on revenues and expenses.

.23 Guidance on accounting and financial reporting issues associated with capitation contracts is found in chapter 13 of the AICPA Audit and Accounting Guide *Health Care Organizations* (the Guide). Auditors of health care providers that participate in managed contract arrangements should carefully consider whether management is properly applying the accounting treatment set forth in the Guide. Auditors may also find the guidance in SAS No. 57, *Auditing Accounting Estimates* (AU section 342), useful in auditing the accounting estimates (such as IBNR accruals and risk pool settlements) that relate to participation in such arrangements.

.24 Many of the characteristics of the business transactions resulting from the movement towards capitated or other risk-based contracts are very similar to transactions resulting from insurance contracts, which follow guidance under specific industry-related authoritative literature. Additionally, ongoing structural and operational changes occurring throughout both the health care and insurance industries have created a need for additional accounting guidance in order to establish common guidance to resolve current divergent accounting practices for similar transactions. A project has been undertaken by a joint task force of the AICPA Health Care Committee and the AICPA Insurance Companies Committee to develop a Statement of Position (SOP) addressing the emerging accounting issues for organizations entering into certain predetermined health care arrangements. The proposed SOP would apply to the accounting for contractual arrangements that administer, assume, or transfer the risk for cost of health care services for a predetermined payment regardless of the services rendered.

Obligated Group Financial Statements

.25 Obligated group financial statements often exclude entities that are required to be consolidated by generally accepted accounting principles (GAAP). Although the AICPA Audit and Accounting Guide *Health Care Organizations* (paragraph 12.06) does not preclude the issuance of such financial statements, because they are not prepared in accordance with GAAP, they cannot be used as the reporting entity's general-purpose external statements. However, such financial statements may be issued as special-purpose financial statements. As such, the statements should include disclosures about the nature of the reporting entity (for example, the fact that the reporting entity is comprised of various entities that form an obligated group, as defined in certain debt agreements) and the auditor's report should be modified to reflect the fact that the financial statements are special-purpose financial statements and are not intended to be a presentation in conformity with GAAP. Furthermore, the distribution of special-purpose financial statements is limited to specified users (i.e., parties to an agreement and other specified parties-in-interest to whom the special-purpose nature of the presentation has been explained). The auditors' report on the special-purpose financial statements includes a paragraph indicating that the financial statements are intended solely for the informa-

tion and use of those named users. Auditors should be aware that the limited distribution requirement of obligated group financial statements that are not prepared in conformity with GAAP presents an issue for health care organizations issuing debt. Because distribution of the accountant's report on the special-purpose financial statements is limited to only the company and other parties to the debt agreement, it cannot be included in broadly distributed documents (for example, offering statements).

Auditing Pronouncements

.26 The following exhibit and discussion summarizes five new SASs that have been recently issued.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.27

Exhibit

Pronouncement	Pronouncements Affected	Key Provisions	Effective Date
SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622)	SAS No. 35	Prohibits negative assurance. Provides guidance concerning the conditions for performing agreed-upon procedures engagements; the nature, timing, and extent of the procedures; the responsibilities of practitioners and specified users; and reporting on agreed-upon procedures.	The Statement (AU section 622) is effective for reports on engagements to apply agreed-upon procedures dated after April 30, 1996, with earlier application encouraged.
SAS No. 76, *Amendments to Statement on Auditing Standards No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634)	SAS No. 72 (AU section 634)	Specifies the form of letter to be provided by the accountant in circumstances in which a comfort letter is requested but the requesting party has not provided a representation letter.	The Statement (AU section 634) is effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.
SAS No. 77, *Amendments to Statement on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, and 623)	SAS Nos. 22 (AU section 311), 59 (AU section 341), and 62 (AU section 623)	Clarifies that a written audit program should be prepared. Precludes the use of conditional language in a going concern report.	The Statement (AU sections 311, 341, and 623) is effective for engagements beginning after December 15, 1995.
SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to Statement on Auditing Standards* No. 55 (AU section 319)	SAS No. 55 (AU section 319A)	Recognizes the COSO definition of internal control.	The Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application encouraged.
SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508)	SAS No. 58 (AU section 508)	Eliminates the requirement to add an uncertainties paragraph to the auditor's report (does not affect SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* [AU section 341]).	The Statement (AU section 508) is effective for reports issued on or after February 29, 1996, with earlier application permitted.

Accounting Issues and Developments

Health Care Audit Guide Project

.28 In July 1996, the AICPA Health Care Committee issued the Audit and Accounting Guide *Health Care Organizations* that supersedes the existing Audit and Accounting Guide *Audits of Providers of Health Care Services* as well as SOP 89-5, *Financial Accounting and Reporting by Providers of Prepaid Health Care Services,* and SOP 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities.* The Guide incorporates the guidance in FASB Statement Nos. 116, *Accounting for Contributions Received and Contributions Made* (AC C67), and 117, *Financial Statements of Not-for-Profit Organizations* (AC C25 and No5).

.29 The Guide applies to organizations whose principal operations consist of providing or agreeing to provide health care services and that derive all or almost all of their revenues from the sale of goods and services; it also applies to organizations whose primary activities are the planning, organization, and oversight of such organizations, such as parent or holding companies of health care providers. The Guide applies to health care organizations that are one of the following:

1. Investor-owned businesses
2. Not-for-profit organizations that have no ownership interest and are essentially self-sustaining from fees charged for goods and services
3. Governmental

.30 The Guide contains a number of significant changes in the accounting and reporting requirements for health care providers. The most significant changes relate to the following:

1. The scope of the Guide
2. Accounting for investments
3. Accounting for contributions
4. Accounting for business combinations and consolidations
5. Financial statement display

The Guide is effective for financial statements for periods beginning after June 15, 1996. Earlier application is permitted.

Securities and Exchange Commission Issues and Developments

.31 In recent months, the Securities and Exchange Commission (SEC) has issued a number of comments to health care registrants on issues pertaining to purchase accounting, the reporting entity, and third-party reserves. Auditors of health care providers should be aware of the staff's concerns if they audit health care companies that are registered with the SEC.

Purchase Price Allocation

.32 In reviewing business combinations involving publicly traded health care providers, the SEC continues to focus on whether registrants are complying with the requirements of Accounting Principles Board (APB) Opinion No. 16, *Business Combinations* (AC B50), and APB Opinion No. 17, *Intangible Assets* (AC I60), to allocate a portion of the purchase price to specifically identifiable intangible assets rather than solely to goodwill. The SEC is concerned that in certain sectors of the health care industry (such as in the physician practice management sector), identifiable assets such as customer lists, workforce in place, and covenants not to compete are not being valued separately and amortized. As a result, the SEC staff may raise questions on filings in which most or all of any excess purchase price is allocated to goodwill. As they evaluate the

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

propriety of accounting and reporting of intangibles, auditors should focus on allocations to purchased intangibles such as management contracts, workforce in place, and covenants not to compete.

Amortization of Intangibles

.33 Another frequent area of comment pertains to the period of amortization used for intangible assets, particularly with regard to the assignment of longer lives to goodwill. Although the SEC's formal position of challenging goodwill lives that are longer than twenty years has not changed, it should be noted that longer lives of up to forty years continue to be sustained in filings by health care companies when the company's facts and circumstances demonstrate that a longer life is appropriate. Auditors of health care entities undergoing purchase acquisitions should be aware of the SEC staff's concerns when reviewing amortization lives assigned to goodwill.

Contingent Consideration

.34 In acquisitions involving health care providers, the SEC is carefully scrutinizing contingent considerations/ "earn-out" arrangements in situations where the owners of the selling company are physicians or other health care professionals who continue to be employed by, and provide health care services on behalf of, the combined entity after the acquisition. FASB Emerging Issues Task Force (EITF) 95-8, *Accounting for Contingent Consideration Paid to the Shareholders of an Acquired Company in a Purchase Business Combination,* provides factors to consider in determining whether earn-outs should be accounted for as additional purchase price or as compensation expense. Auditors should carefully analyze the facts and circumstances of the contingent consideration arrangement, including the various indicators described in the EITF consensus, in assessing management's judgment as to whether payments are additional consideration or compensation.

Consolidation of Medical Practice Management Companies

.35 In states that prohibit the direct employment of or control over physicians/dentists by non-physicians/dentists (for example, by a physician management company), companies desiring to merge these functions frequently form two separate companies—an administrative company (AC) and a medical company (MC)—solely to comply with these "corporate practice of medicine" laws and regulations. Although neither company has legal ownership of the other, in substance they exist and operate for the exclusive mutual benefit of one another. The SEC staff has been raising issues in conjunction with filings by physician management companies in which the AC and MC are presented as a consolidated/combined entity unless it is clear that the management company exerts unilateral and perpetual control over the medical practices. Auditors should be aware of the staff's concerns, as well as the requirements in chapter 11 of the Audit and Accounting Guide *Health Care Organizations,* if they audit physician management companies that have formed medical practice management companies.

Medicare/Medicaid Reserves

.36 The SEC staff has expressed concern that providers may in some cases use reserves for Medicare and Medicaid settlements as discretionary reserves to manage the amount of income that is reported in a particular year. For example, if a provider involved in an acquisition accrues excess third-party reserves at the acquisition date, the later release of the excess reserve would result in an overstatement of income. Consequently, in certain situations, the SEC may require provider registrants to provide information pertaining to third-party reserves and environmental reserves (for example, significant detail about reserve movements, the timing of the movements and the rationale behind the movements) in the registrant's financial statements and/or Management's Discussion and Analysis (MD&A). As auditors evaluate the propriety of reserves reported by health care organizations, they should pay particular attention to third-party reserves and environmental reserves and carefully consider the evidential matter supporting the amount of the liability.

.37 Auditors of health care organizations that register with the SEC should also be aware that on July 31, 1996, the SEC staff issued Staff Accounting Bulletin (SAB) No. 97, *The Inappropriate Application of Staff Ac-*

counting Bulletin No. 48, Transfers of Nonmonetary Assets by Promoters or Shareholders, *to Purchase Business Combinations Consummated Just Prior to or Concurrent With an Initial Public Offering, and the Identification of an Accounting Acquirer in Accordance With APB Opinion No. 16,* Business Combinations, *for Purchase Business Combinations Involving More Than Two Entities.* The SAB expresses the views of the SEC staff regarding (1) the inappropriate application of SAB No. 48, *Transfers of Nonmonetary Assets by Promoters or Shareholders,* to purchase business combinations consummated just prior to or concurrent with an initial public offering, and (2) the identification of an accounting acquirer in accordance with APB Opinion No. 16 (AC B50) for purchase business combinations involving more than two entities. A copy of the SAB may be obtained from the SEC's World Wide Web home page at *http://www.sec.gov.*

Classification of Net Appreciation on Investments of Donor-Restricted Endowment Funds

.38 A donor's stipulation that requires a gift to be invested in perpetuity or for a specified term creates a donor-restricted endowment fund. The Uniform Management of Institutional Funds Act (Uniform Act), which has been adopted in varying forms in at least twenty-nine states since its development in 1972, requires that in appropriating appreciation in an endowment fund, members of a governing board exercise ordinary business care and prudence.

.39 Where the Uniform Act is in force, there has been some uncertainty regarding whether the requirement to exercise ordinary business care and prudence allows the governing board the authority to designate a portion of investment income as permanently restricted to preserve the purchasing power of endowment funds. At the March 21, 1996, meeting of the EITF, the FASB staff commented on this issue and concluded that "a legal limitation that requires a governing board to exercise ordinary business care and prudence when appropriating net appreciation is not the equivalent of a law that extends a donor-imposed restriction and, therefore, does not result in classification of net appreciation as donor-restricted, either permanently or temporarily."

.40 There may be exceptions to this conclusion in states in which the Uniform Act has been modified. To determine what the law in a particular state requires, a practitioner may request the opinion of legal counsel. In general, legal counsel's advice on what constitutes "ordinary business care and prudence" would only be helpful if case law applicable to the Uniform Act was being interpreted. In the absence of the interpretation of case law, or modification to the Uniform Act through state legislation, the provisions of the Uniform Act would be interpreted in the manner noted above by the FASB staff.

.41 When reviewing a health care organization's classification of net appreciation on investments of donor-restricted endowment funds, auditors should consider the guidance in FASB Statements No. 117 (AC C25 and No5) and No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations* (AC No5) as well as the status of the applicable state's legal requirements related to donor-restricted gifts.

Agency Transactions

.42 In December 1995, the FASB released an exposure draft of a proposed Interpretation, *Transfers of Assets in Which a Not-for-Profit Organization Acts as an Agent, Trustee, or Intermediary (An Interpretation of FASB Statement No. 116).* The exposure draft would clarify the use of the terms *agent, trustee,* or *intermediary* in paragraph 4 of FASB Statement No. 116 (AC C67.103). The exposure draft provides that an organization would be presumed to be acting as an agent or trustee in the event of any of the following:

1. A resource provider specifies a third-party beneficiary or beneficiaries and does not explicitly grant the recipient organization the unilateral power to redirect the use of assets provided away from the specified beneficiary or beneficiaries
2. The recipient organization exists to raise, hold, or invest assets for another organization
3. The recipient organization is directed by the resource provider to invest assets provided in perpetuity and return the income from those assets to the resource provider or its affiliates

The period for commenting on the proposal has expired.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.43 After considering the comments received on the exposure draft, the FASB has decided to split this project into two separate pieces: one to address situations in which the recipient organization has the unilateral power to redirect the use of the assets away from the specified beneficiary (FASB Interpretation No. 42, *Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power, (An Interpretation of FASB Statement No. 116)* (AC C67), issued in September 1996, addresses this piece) and another to address other situations in which a donor specifies a third-party beneficiary, including accounting by that beneficiary for the contribution received.

.44 Auditors should consider the wording used in solicitations or gift agreements to determine whether resources received by not-for-profit organizations are received in agency transactions. This issue is particularly pertinent for audits of institutional foundations and fund-raising foundations. Auditors should consider discussing these matters with clients as soon as possible, to avoid misunderstandings between clients and auditors concerning accounting for such transactions.

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.45 In June 1996, the FASB issued Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (AC F38). This Statement (AC F38) provides accounting and reporting standards for transfers and servicing of financial assets and the extinguishments of liabilities. Those standards are based on consistent application of a *financial-components approach* that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets if control has been surrendered, and derecognizes liabilities when extinguished. This Statement (AC F38) provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.46 This Statement (AC F38) requires the following:

- Liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets must be initially measured at fair value, if practicable
- Servicing assets and other retained interests in the transferred assets must be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer
- Servicing assets and liabilities must be subsequently measured by the following:
  - — Amortization in proportion to and over the period of estimated net servicing income or loss
  - — Assessment for asset impairment or increased obligation based on their fair values
- Debtors must reclassify financial assets pledged as collateral and secured parties must recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.
- A liability must be derecognized if and only if either of the following occur.
  - — The debtor pays the creditor and is relieved of its obligation for the liability
  - — The debtor is legally released from being the primary obligor under the liability either judicially or by the creditor.

Therefore, a liability is not considered extinguished by an in-substance defeasance.

.47 FASB Statement No. 125 (AC F38) supersedes FASB Statements No. 76, *Extinguishment of Debt (an amendment of APB Opinion No. 26)*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse.*

.48 It also amends FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement (AC F38) amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights*. This Statement (AC F38) also supersedes Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)*, and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*.

.49 This Statement (AC F38) is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Developments Related to Governmental/Nongovernmental Issues Affecting Health Care Entities

.50 In recent years, the AICPA and the Governmental Accounting Standards Board (GASB) have issued a number of documents that clarify accounting and reporting requirements for governmental and nongovernmental entities. This section summarizes these documents and provides a road map to applicable guidance for various accounting and reporting issues facing investor-owned, not-for-profit nongovernmental and not-for-profit governmental health care organizations.

.51 In January 1992, the AICPA issued SAS No. 69, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles *in the Independent Auditor's Report* (AU section 411), which redefined the GAAP hierarchy between FASB and GASB. The provisions of SAS No. 69 (AU section 411) establish two separate hierarchies, one for governmental entities and one for nongovernmental entities.

.52 In September 1993, the GASB issued Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and other Governmental Entities That Use Proprietary Fund Accounting*, that clarifies how GASB statements affect governmental entities that use business type accounting and financial reporting. Alternative approaches are available to a governmental health care provider, although the alternative selected must be used consistently. One alternative is to follow the GASB hierarchy exclusively regarding pronouncements issued after November 30, 1989. The other alternative is to follow the FASB hierarchy regarding pronouncements issued after November 30, 1989, unless GASB pronouncements conflict.

.53 This additional authoritative guidance for governmental and nongovernmental entities had some limitation because there was no precise definition of government. In March of 1996, the FASB and GASB agreed to the following definition of *governmental entity*, which is included in paragraph 1.02 of the AICPA Audit and Accounting Guide *Health Care Organizations*:

> Public corporations and bodies corporate and politic are governmental entities. Other organizations are governmental entities if they have one or more of the characteristics listed below:
>
> - Popular election of officers or appointment (or approval) of a controlling majority of the members of the organization's governing body by officials of one or more state or local governments
> - The potential for unilateral dissolution by a government with the net assets reverting to a government
> - The power to enact and enforce a tax levy
>
> Furthermore, organizations are presumed to be governmental if they have the ability to issue directly (rather than through a state or municipal authority) debt that pays interest exempt from federal

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

taxation. However, organizations possessing only that ability (to issue tax-exempt debt) and none of the other governmental characteristics may rebut the presumption that they are governmental if their determination is supported by compelling, relevant evidence.

.54 An entity meeting any of the preceding criteria is classified a governmental entity and as such is subject to the rules promulgated by the GASB. The following matrix illustrates how an organization's classification as investor-owned, not-for-profit nongovernmental, and not-for-profit governmental determines the appropriate authoritative guidance to be applied to various accounting and reporting issues.

Area	Investor-Owned For-Profit	Not-for-Profit Nongovernment	Not-for-Profit Government
Pensions	FASB Statement No. 87, *Employers' Accounting for Pensions* (AC P16)	FASB Statement No. 87 (AC P16)	GASB Statement No. 5, *Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employees;* GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers,* for years beginning after June 15, 1997
Post Retirement Benefits	FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions* (AC P40)	FASB Statement No. 106 (AC P40)	GASB Statement No. 12, *Disclosure of Information on Postemployment Benefits Other Than Pension Benefits by State and Local Governmental Employers;* supplemented by GASB Statement No. 27
Cash Flows	FASB Statement No. 95, *Statement of Cash Flows* (AC C25)	FASB Statement No. 95 (AC C25)	GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*

Governmental Not-for-Profit Accounting Developments

.55 The following accounting pronouncements and projects of the GASB were recently released and may affect governmental health care organizations.

GASB Statements Effective During 1996

- GASB Statement No. 24, *Accounting and Financial Reporting for Certain Grants and Other Financial Assistance*
- GASB Statement No. 29, *The Use of Not-for-Profit Accounting Principles*

GASB Statements Effective After 1996, With Early Application Encouraged

- GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*
- GASB Statement No. 26, *Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Plans*
- GASB Statement No. 27, *Accounting for Pensions by State and Local Government Employers*
- GASB Statement No. 28, *Accounting and Financial Reporting for Securities Lending Transactions*
- GASB Statement No. 30, *Risk Financing Omnibus*

GASB Interpretations Effective After 1996, With Early Application Encouraged

- GASB Interpretation No. 2, *Disclosure of Conduit Debt Obligations*
- GASB Interpretation No. 3, *Financial Reporting for Reverse Repurchase Agreements*
- GASB Interpretation No. 4, *Accounting and Financial Reporting for Capitalization Contributions to Public Entity Risk Pools*

Recent GASB Exposure Drafts Issued

- *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*
- *The Financial Reporting Entity—Affiliated Organizations*

A detailed summary of these documents can be found in the Audit Risk Alert *State and Local Governmental Developments—1996* [AAM section 8070]. This Audit Risk Alert also contains valuable information on current issues and audit risks facing governmental entities.

Accounting for Transfers Among Health Care Organizations

.56 In response to the pressure to contain health care costs, health care providers are developing integrated delivery systems and establishing new alliances to gain operating and functional efficiencies. As a result, transfers of resources between organizations frequently occur within the health care industry. The accounting treatment for such transfers in practice has been varied. With the issuance of the new Audit and Accounting Guide *Health Care Organizations* (see the section of this Audit Risk Alert entitled "Health Care Audit Guide Project"), additional guidance has been provided with respect to these kinds of transactions. Auditors of health care providers should be alert to the new guidance set forth in chapter 11 (paragraphs 19–24) of the Guide which differentiates and defines the various kinds of transfers among health care organizations and provides guidance on the appropriate accounting for each kind of transfer.

Accounting for Exchange Transactions in Health Care Organizations

.57 Foundations, business organizations, and other entities may provide resources to health care organizations under programs referred to as grants, awards or sponsorships. Confusion has arisen in practice with respect to the appropriate classification of these resources as either contributions or exchange transactions. FASB Statement No. 116 (AC C67) provides the following guidance:

- *Contributions.* Contributions are (*a*) *nonreciprocal* transfers, (*b*) are transfers to or from entities acting other than as owners, and (*c*) are made or received voluntarily (paragraph 48).
- *Exchange Transactions.* Exchange transactions are *reciprocal* transfers in which each party receives and sacrifices approximately equal value (paragraph 48).

Proper classification based on the preceding guidance is essential as it determines the appropriate accounting treatment the entity must follow (i.e., contributions must be accounted for in accordance with the provisions of FASB Statement No. 116 (AC C67); exchange transactions do not). Auditors of not-for-profit health care organizations should be familiar with the factors that distinguish a contribution from an exchange transaction. The AICPA Audit and Accounting Guide *Not-for-Profit Organizations* (chapter 5, table 5.1) includes a chart of indicators that are useful in distinguishing the two kinds of transactions.

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.58 The AICPA Audit and Accounting Guide *Health Care Organizations* is available through the AICPA's loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of Audit and Accounting Guides as they appear in the service are printed annually. Copies may be obtained by calling the AICPA Order Department at (800) TO-AICPA, Department No. 1, and asking for product no. 012429.

Health Care Financial Reporting Checklist

.59 The AICPA's Technical Information Service has published a revised version of *Checklists and Illustrative Financial Statements for Health Care Providers*, a nonauthoritative practice aid for preparers or reviewers of financial statements of health care entities. Copies may be obtained by calling the AICPA Order Department at (800) TO-AICPA, Department No. 1, and asking for product no. 008639.

Technical Practice Aids Publication

.60 *Technical Practice Aids* is an AICPA publication that includes questions received by the AICPA's Technical Information Service on various subjects and the service's response to those questions. Section 6400 of *Technical Practice Aids* contains questions and answers specifically pertaining to health care entities. *Technical Practice Aids* is available both as a subscription service and in hardback form. Ordering information may be obtained by calling the AICPA Order Department at (800) TO-AICPA, Department No. 1, and asking for product no. 005055. Auditors should be aware that the next subscription service update of *Technical Practice Aids* (due out in November) will include two new questions and answers relating to joint operating agreements and the use of the pooling-of-interests method of accounting.

National Health Care Conference

.61 Each summer the AICPA and the Healthcare Financial Management Association cosponsor a National Health Care Conference that is specifically designed to update practitioners and health care finan-

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

cial executives on significant accounting, legal, financial, and tax developments affecting the health care industry. Information on the conference may be obtained by calling the AICPA Continuing Professional Education Division at (201) 938-3534.

Information Sources

.62 The following are publications pertaining to health care industry trends and statistics that may be of interest to auditors of health care entities (see the table entitled "Information Sources" that follows). The list is not all-inclusive and is presented for informational purposes only. It is not to be construed as an endorsement of any of the following publications or organizations. Many nongovernment and some government publications and services involve a charge or membership requirement.

.63 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.64 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.65 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.66 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8040

Insurance Industry Developments—1996/97

Industry and Economic Developments

.01 Economic conditions in the United States have exhibited signs of improvement and growth in 1996. In 1996, the bond and stock markets were strong; the U.S. dollar strengthened; mergers, consolidations, and reorganizations continued; and U.S. companies expanded their operations into foreign markets. Generally, U.S. economic developments have various implications on audit risk of insurance enterprises.

.02 Because the assets of an insurance company consist mainly of investments, which include bonds, stocks, mortgage loans, and real estate, fluctuations in these markets have a direct effect on an insurance enterprise's investment income. In addition, for most life and health insurers, profits are indirectly affected by interest rates. Changes in general interest rates may prompt contractholders to withdraw funds prematurely (referred to as *disintermediation*) or result in prepayment of fixed income securities (referred to as *reinvestment risk*). Enterprises attempt to manage interest rate risk by adjusting crediting rates and dividend scales. Auditors should be alert to companies' interest crediting strategies. Further, stock market fluctuations could adversely affect sales and surrenders of variable annuity life products, leading to unplanned fluctuations in company cash flows. Auditors should be aware that certain economic circumstances may have an indirect effect on the sales and surrenders of certain products.

.03 With the continuation of soft market conditions and increased competition between insurer and financial service companies, the insurance industry has been extremely active in an attempt to seek economies of scale. The insurance industry is looking for various vehicles to position itself in the marketplace. During 1996, insurers continued to enter the international market. Although entering into the international market has its advantages, some accounting issues between U.S. generally accepted accounting principles (GAAP) and other countries' GAAP may arise when consolidating a subsidiary which uses a different reporting basis than the parent's reporting basis. Exploration into new markets also occurred predominately in fast-growing sectors such as managed care.

Competitive Market

.04 The insurance industry is dramatically changing as a result of fierce competition. Because of this competition, companies are redefining their strategic focus. Internal and external competition continues to reshape the industry. For life and health insurers, increased competition from banks, mutual funds, and other financial institutions for investable consumer dollars has been a factor contributing to suppressed premium growth. The Clinton Administration, through the Glass-Steagall reform bill, is calling for legislation to allow commercial banks, securities firms, and insurance companies to merge, creating giant financial service companies that could offer everything from checking accounts to mutual funds and life insurance. Lobbying efforts against the proposed legislation have been strong. Currently, insurers have been losing ground to mutual fund products that invest directly in stocks and bonds; a change in legislation may accelerate this movement. Furthermore, competitive pressures have made expense reduction and consolidation high priorities for many life and health insurers.

Mergers and Acquisitions

.05 The number of mergers and acquisitions continues to increase. Consolidation appears to be taking place in more mature sectors of the insurance industry such as traditional life and property and casualty lines of business. The trend in 1996 has been for insurers to concentrate on a few areas and grow those areas internally and through acquisitions. In 1996 there was heightened activity in reinsurance company mergers. For further discussion, see the section entitled "Mergers, Acquisitions, and Consolidations" under "Audit Issues" in this Audit Risk Alert.

Property and Casualty Insurers

.06 *Underwriting.* Another year of stagnant growth for property casualty insurers reflected stiff rate competition and the industry's slowing financial pace resulting from catastrophes, emerging environmental and asbestos claims, loss reserve strengthening, and declining profitability in a number of lines of business. Underwriting performance of the commercial and private passenger automobile and homeowner lines of business, however, has improved during the past year. Many companies respond to low premium growth by increasing their retentions in core lines of business, purchasing less reinsurance, or both. Ongoing expense reductions, improved underwriting efficiencies, and concentration of capital on more profitable lines of business provide some relief from the stagnant premium growth in the industry. Others pursue acquisitions and consolidations to enhance their results while providing significant cost savings.

.07 *Environmental and Asbestos-Related Liabilities.* During 1995 and continuing into 1996, the industry witnessed significant increases in reported liabilities related to environmental and asbestos claims due to improved capabilities to develop estimates in this area. In response, some companies have restructured their business into active and inactive entities. Active entities house continuing operations and the inactive entities house the entity's discontinued lines of business, which could include asbestos and environmental claims. Readers should be alert that generally restructuring the lines of business within to separate companies does not give rise to an accounting event. However, the reader should refer to the FASB's Emerging Issues Task Force (EITF) Issue No. 94-3, *Liability Recognition for Certain Employee Termination and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)* for guidance on accounting for restructuring costs. For further discussion, see the section entitled "Liabilities for Unpaid Claims" under "Audit Issues" in this Audit Risk Alert.

.08 *Catastrophes.* In the first eight months of 1996 there were several costly catastrophes, including the blizzard that swept across the East Coast and Hurricane Bertha. Many believe catastrophe losses are not an abnormal event anymore and may now in fact be a normal occurrence. Auditors should consider significant concentrations of coverage in a specific geographic location or line of business when performing the audit and determine if the company has adequate financial resources, reinsurance coverage, or both, particularly as pressures on profit margins have caused some enterprises to reduce the amount of reinsurance obtained.

.09 An issue that property casualty insurers face is catastrophe financing. In the aftermath of high catastrophe losses which occurred several years ago, as well as large catastrophes occurring each year over the past eight years, property catastrophe reinsurance coverage has been difficult to obtain. To alleviate this problem an evolving class of reinsurance arrangements is emerging. Some of these new variations of traditional reinsurance contracts address the perceived lack of capital currently deployed in certain sectors of the reinsurance market (particularly catastrophe coverages). Such new products have characteristics of derivative financial instruments. Examples of these products include catastrophe-linked structured notes and traded catastrophe options and futures. Auditors should carefully evaluate the instruments being used in lieu of traditional catastrophe coverage in order to determine the proper accounting treatment as well as any potential audit risks. See the sections entitled "Investments in Derivatives" and "Reinsurance Arrangements" under "Audit Issues" in this Audit Risk Alert.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Life and Health Insurers

.10 *Underwriting.* Sluggish premium growth continues in various sectors of the life and health insurance industry. Capital adequacy and general business conduct issues, predominately sales practices and ethical market conduct, are making it more difficult for insurers to maintain or improve financial results. Insurers are reacting to flat results by cutting staff, merging with competitors, and developing innovative distribution strategies. Weak sales of traditional ordinary life products continued but were partially offset by expanded annuity volume and increased sales of variable products. Other issues currently facing the life insurance industry include: operational efficiency, revenue generation from new products, continuing fallout from mortgage and real estate investments, shifting consumer demographics and preferences, and adverse tax legislation.

.11 *Expansion Into the Managed Care Sector.* Considerable debate is currently occurring over the future of the nation's health care system and its ability to provide quality health care to citizens at affordable prices. This debate has sensitized health-care providers to the need for maintaining high levels of efficiency and quality while also maintaining strict control over costs. Perhaps the most notable response to pressures to control costs is a movement toward a managed care environment in which physicians, insurers, and other health care providers create integrated delivery systems and networks that combine inpatient, outpatient, and physician services into a single contracting organization. The managed care-insurance industry merger trend is creating strategic alliances likely to revolutionize and reshape health delivery systems. As the health care environment continues to develop, insurance companies are entering this sector and are seeking competitive advantages by striving to attain critical mass and the technology necessary to compete in a cost effective manner in the marketplace.

.12 *Market Conduct.* The negative publicity from allegations of improper sales practices and potentially misleading policyholder illustrations may have handicapped insurers' efforts to sustain strong premium growth. As negative public perceptions persist, downward pressure on sales will continue to challenge life insurers' viability in the marketplace. The industry is taking steps to change consumers' negative perceptions and deal with factors that encourage market misconduct. Many companies are considering changes to their compensation systems. The American Council of Life Insurance (ACLI), the largest life insurance trade organization, has designed a Code of Life Insurance Ethical Market Conduct (the Code) in response to the recent regulatory and political focus on the life insurance industry's sales and marketing practices. The Code consists of six principles that member life insurance companies would adhere to within their normal course of operations.

.13 To assess the life insurance company's compliance with the Code, the ACLI is developing a Questionnaire for Assessment of Compliance With the Principles of Ethical Market Conduct (the Questionnaire). The Questionnaire is designed to provide the insurer with a means of evaluating its compliance with the Code consistently relative to other members of the ACLI, and is in a format of providing questions, framework criteria, and indicators for each of the principles listed above. The ACLI is in the process of determining how the Code will be adopted, and how companies will measure their compliance with the Code. The ACLI would like insurers to use the Questionnaire to self-certify their compliance with the Code and then obtain a third-party assessment of that compliance on a triannual basis. The process would be entirely voluntary.

Regulatory Developments

.14 The regulatory developments contained in this section include matters that may affect audits of statutory financial statements. Regulation of the insurance industry is the responsibility of the individual states. All states require domiciled insurance entities to submit to the state insurance commissioner an annual statement on forms developed by the National Association of Insurance Commissioners (NAIC). The states also require that audited statutory financial statements be provided as a supplement to the annual statements. Currently, statutory financial statements are prepared using accounting principles and practices "prescribed or permitted by the insurance department of the state of domicile."

Reinsurance Accounting on a Statutory Basis

.15 *Property and Casualty Insurers.* Chapter 22 of the NAIC's *Accounting Practices and Procedures Manual* applies the risk transfer and most of the accounting concepts of Financial Accounting Standards Board (FASB) Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts* (AC In6), to statutory accounting for prospective reinsurance contracts. Prospective reinsurance contracts need to be signed within nine months of the effective date or the contract will be deemed to be retroactive, with certain exceptions.

.16 Chapter 22 also provides accounting guidance for funded covers, as described in the FASB consensus decision in EITF Issue No. 93-6, *Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises.* The guidance provided by the NAIC differs from EITF Issue No. 93-6 in that the NAIC's guidance for accruing liabilities in certain circumstances is more conservative. This accounting provision is effective January 1, 1996, but applies to all contracts entered into, renewed, or amended on or after January 1, 1994.

.17 *Life and Health Insurers.* The NAIC Accounting Practices and Procedures Task Force revised the reinsurance section (chapter 24) of the NAIC's *Accounting Practices and Procedures Manual.* The revised chapter 24 provides guidance on accounting and reporting of life reinsurance by ceding and assuming companies and on assessing risk transfer. If a reinsurance contract does not provide for sufficient transfer of risk, amounts paid are to be accounted for as deposits. The revised accounting and reporting practices were adopted on December 4, 1995 and are effective for all accounting periods beginning after January 1, 1996. The provisions apply to reinsurance agreements entered into or amended on or after January 1, 1996; however, they do not apply to reinsurance agreements in force on January 1, 1996.

.18 Auditors should be aware of these regulatory accounting provisions.

Significant Changes to the NAIC Annual Statement Instructions

.19 *Lloyd's of London.* Auditors should be aware that for 1996 statutory annual statements, credit will only be permitted for cessions to Lloyd's of London syndicates who participate in the Lloyd's of London new reinsurance trust fund arrangement.

.20 *Derivatives.* Insurers must disclose in their 1996 statutory annual statements the following information by category of derivative financial instruments:

1. A description of the company's objectives for holding or issuing derivative financial instruments, the context needed to understand those objectives, and the company's strategies for achieving those objectives, including the classes of derivative financial instruments held
2. The nature and terms of derivative financial instruments, including, at a minimum, a discussion of (*a*) the credit and market risk of those instruments, and (*b*) the cash requirements of those instruments (including the effects of possible termination payments).

Codification of Statutory Accounting Principles

.21 The NAIC is in the process of codifying statutory accounting practices (the codification) for certain insurance enterprises in recognition of the fact that prescribed or permitted statutory accounting practices vary widely—not only from state to state, but also for insurance enterprises within a state. The codification is expected to result in a hierarchy of statutory accounting practices that will provide a comprehensive basis of accounting that can be applied consistently to all insurance enterprises. Current statutory accounting practices are considered an other comprehensive basis of accounting (OCBOA) under Statement on Auditing Standards (SAS) No. 62, *Special Reports* (AU section 623). When codification is complete, it is anticipated that a statutory basis of accounting for insurance enterprises other than NAIC-codified statutory accounting will be considered neither GAAP nor OCBOA. It is expected that the states will require that statutory financial statements be prepared using accounting practices "prescribed in the NAIC's *Accounting Practices and Procedures Manual.*" When codification is complete, certain amendments to SAS No. 62 (AU section 623) would be required.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.22 As part of the codification project, the NAIC is exposing a series of issue papers for public comment. As of August 31, 1996, a total of seventy-six issue papers had been released for public comment. An exposure draft of the statements of statutory accounting principles is scheduled for release in March 1997. A six-month comment period will be provided. A tentative effective date for applying the new statutory accounting practices would be for 1998 financial statements, with specified transitional provisions. Because the codification will not be effective for 1996 statutory financial statements, auditors will continue to report on statutory financial statements prepared in conformity with accounting practices prescribed or permitted by the insurance department of the state of domicile.

Change in Florida Department of Insurance Requirements

.23 Often, state insurance departments implement or amend regulations. A significant change in state regulations effective for 1996 audits affects certified public accountants (CPAs) who audit insurance companies authorized to transact business in the state of Florida. The Florida Department of Insurance adopted Statute 624.424 Section 8(d) in 1991. The statute states that the rotation period for CPAs who audit an insurance company (authorized to transact business in the state of Florida) is every five years. This deviates from the Model Audit Rule and all other state requirements, which require a rotation period of seven years. The effective date is for audits of statutory financial statements performed for periods ending on or after December 31, 1996. Auditors should be aware of this change and plan their engagements accordingly. Auditors should also monitor other state regulatory developments to determine whether they are applicable to their engagement.

Audit Issues

Mergers, Acquisitions, and Consolidations

.24 The insurance industry continued to see a number of mergers, acquisitions, consolidations, and sales of certain lines of business, driven by a variety of factors including company strategic objectives, cost control and reduction, and products diversification. Historically, most of the mergers and acquisitions came from smaller companies, which are most vulnerable to unexpected losses and have the greatest difficulty complying with minimum state capital requirements. However, the recent trend is for substantial deals by some of the larger insurers, concentrating on core lines of business and growth through acquisition. For property and casualty insurers, problems stem from tougher regulations, stagnant growth, declining profitability in some lines of business, and huge claims related to catastrophes, asbestos, and pollution (environmental liabilities). For life and health insurers, mergers appear to be driven primarily by the need to reduce costs. In addition, heightened competition, health care reform, shifting regulatory requirements, and new technology are significant contributors.

.25 Many of the problems facing life insurance companies can be traced back to the early 1980s. To boost investors' returns, insurance companies started buying real estate, junk bonds, and other higher risk investments. Real estate devaluations throughout regions of the United States and losses in the volatile junk-bond market reduced substantially the average return on a number of these investments. Some insurers were obligated on guaranteed investment contracts, which gave investors guaranteed returns for extended periods. In addition, life insurers are facing competition from other segments of the financial services industry, such as banks and mutual funds.

.26 Usually, when consolidation occurs, an entity changes its organizational structure and control methods. Auditors should be alert to possible changes in the entity's internal control structure and the implications of any change in control risk on the nature, timing, and extent of audit procedures. Auditors should also consider the propriety of accounting for transactions such as proper asset valuations, the amortization of goodwill, and other accounts directly affected by the streamlining transaction. In addition, auditors should maintain a heightened sense of awareness and an attitude of professional skepticism to merger candidates. Further, auditors should also be alert to the increased risk of material misstatement by enterprises attempting to appear more attractive to potential buyers.

Investments in Derivatives

.27 Recent years have seen a growing use of innovative financial instruments, commonly referred to as derivatives, that often are very complex and can involve a substantial risk of loss. Insurance enterprises have been entering into forward contracts, futures contracts, swaps, and options as risk management tools (hedges) or speculative investment vehicles. As interest rates, commodity prices, and numerous other market rates and indices from which derivative financial instruments obtain their value have increased in volatility, a number of financial institutions have incurred significant losses as a result of their use. The use of derivatives creates unique audit concerns and may increase audit risk. Although the financial statement assertions about derivatives are generally similar to assertions about other transactions, the auditors' approach to achieving related audit objectives may differ because certain derivatives are not generally recognized in the financial statements.

.28 It is essential that auditors understand both the economics of derivatives used by their clients and the nature and business purpose of their clients' derivatives activities. In addition, auditors should carefully evaluate their client's accounting for any such instruments, especially those carried at other than market value. To the extent the derivatives qualify as financial instruments as defined in FASB Statements No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, No. 107, *Disclosures about Fair Value of Financial Instruments*, and No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), the disclosure requirements set forth in those Statements (AC F25) must be met. When derivatives are accounted for as hedges of on-balance-sheet assets or liabilities or of anticipated transactions, auditors should carefully review the appropriateness of the use of hedge accounting, particularly considering whether the criteria set forth in applicable accounting literature are met. In addition, auditors may wish to refer to the FASB's Special Report, *Major Issues Related to Hedge Accounting*, issued in October 1995. The SEC issued a proposal on comprehensive disclosure requirements for derivatives and other financial instruments for public comment in early 1996, and anticipates a final staff bulletin to be issued on this topic by December 31, 1996.

Liabilities for Unpaid Claims

.29 The liability for unpaid claims is inherently a high-risk audit area for several reasons. First, the liability is significant to property and casualty insurers' balance sheets and earnings. Second, estimating the amount to report is usually highly subjective. Finally, history shows that these estimates will continuously change for long-tailed business.

.30 A number of factors may be particularly indicative of a higher risk audit. The following include those that may exist for a number of companies.

.31 *Exposure to Environmental and Asbestos-Related Claims.* The ultimate exposure of insurers to environmental and asbestos-related claims is subject to an unusually high degree of uncertainty. Since the early 1980s, certain environmental and asbestos exposures have been a major concern for insurance enterprises. Throughout 1995 and 1996, the press reported that many insurance companies significantly increased their environmental and asbestos-related loss reserves due to improved capabilities to develop estimates in this area. Some insurance enterprises increased loss reserves for certain environmental and asbestos exposures as a result of improvements in actuarial techniques, while others have experienced increasing pressure from various sources such as rating agencies, the SEC, and shareholders to improve methodologies used to quantify and record an estimate of the insurance enterprise's obligation. Competitive market pressures as well as ownership changes also contributed to significant reserving actions. As a result of recent improvements in actuarial techniques, more insurance enterprises are likely to increase reserves for certain environmental and asbestos exposures in the near-term. However, there is still significant uncertainty surrounding defendant activity, unresolved coverage issues, and policy and claim data availability issues for many insurers.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.32 FASB Statement No. 113 (AC In6) requires that the assets and liabilities relating to reinsured contracts be recorded on a gross basis without netting of reinsurance receivables against claim reserves. FASB Statement No. 5, *Accounting for Contingencies* (AC C59), and SEC SAB No. 92, *Accounting and Disclosures Relating to Loss Contingencies*, provide that if there is at least a reasonable possibility that a loss exceeding amounts already recognized may have been incurred and the amount of the loss would be material, then the enterprise must disclose the estimated additional loss, or range of loss, or state that it cannot be estimated. Disclosure of the gross amounts of reasonably possible losses is required. Disclosure of the gross amounts of the reasonably possible reinsurance recoveries may be made, but care should be exercised to avoid misleading implications as to the likelihood of realization of such recoveries. Auditors of insurance enterprises that face such claims should carefully evaluate whether the accounting and disclosure requirements of FASB Statement No. 5 (AC C59) and SEC SAB No. 92 have been met.

.33 *Estimating Environmental Claim Losses.* As indicated in SEC SAB No. 92, when estimating reserves for environmental contamination claims, an insurance enterprise should consider available evidence including a particular policyholder's prior experience in remediation of contaminated sites, other companies' clean-up experience, and data released by the Environmental Protection Agency or other organizations. The continued expansion of environmental databases has resulted in the availability of significantly more information to support a reasonable estimate of the amount of loss or range of loss. When evaluating an insurance enterprise's reserves for environmental contamination claims, the auditor should consider the evidence currently provided by the expanded environmental databases.

.34 Furthermore, the auditors of publicly held insurance companies should consider whether the disclosures are in accordance with the requirements of SEC SABs No. 87, *Views on Contingency Disclosures on Property-Casualty Insurance Reserves for Unpaid Claim Costs*, and No. 92.

.35 *Statutory Environmental Disclosure Requirements.* The NAIC requires environmental disclosure for property and casualty annual statement filings. The disclosure requirements specify that environmental and asbestos liabilities should be disclosed separately and that the following should be disclosed in a prescribed table:

1. Five-year history, including incurred losses and calendar year payments on both a gross and net basis segregated between current accident year and prior accident year
2. Incurred but not reported (IBNR) reserves on a gross and net basis as of the year end
3. Allocated loss adjustment expense (LAE) reserves as of the year end

.36 *Exposure to Breast-Implant Claims.* Some reports indicate that claims related to injuries from defective breast implants could exceed $7 billion.

.37 *Long-Term Exposures.* Long-term exposures (commonly referred to as mass tort exposures) involve bodily injury or property damage which arise from and are related to exposure over time to any alleged toxic, harmful, or defective material, device, substance, agent, activity or condition including but not limited to chemicals, drugs, petroleum-based products, pharmaceutical products, medical devices, radiation, noise, electromagnetic fields, or repetitive motion. Recent reports indicate that insurers may be liable to cover certain long-term exposures that range from tobacco-related illnesses to injuries caused by use of computer equipment, such as carpal tunnel syndrome.

.38 *Changes in Product Mix to More Long-Tail Lines of Business.* This factor would usually indicate more uncertainty in determining the ultimate exposure to claims.

.39 *Intense Price Competition and Unexplained Premium Growth.* Intense price competition may lead to unsound pricing, crediting, or dividend policies that may be evidenced in unexplained premium growth. Market pressures may lead insurers to accept unanticipated risks or to price risks inappropriately, which also could affect the recoverability of deferred acquisition costs and result in premium deficiencies.

.40 *Participation in Involuntary Pools.* Insurance enterprises continue to be exposed to large amounts of claims through their participation in involuntary pools and associations. This factor may indicate increased exposure to loss development from previously reported results.

.41 SAS No. 57, *Auditing Accounting Estimates* (AU section 342), provides guidance to auditors on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates in an audit of financial statements in accordance with generally accepted auditing standards. AICPA Statement of Position (SOP) 92-4, *Auditing Insurance Entities' Loss Reserves,* provides guidance to help auditors understand the loss reserving process and to develop an effective audit approach when auditing loss reserves of insurance entities.

.42 *Purchase Accounting.* In purchase business combinations involving acquisitions of property and casualty insurance companies, the Securities and Exchange Commission (SEC) staff has taken the position that needed changes in liabilities for claim losses and loss adjustment expenses of an acquired insurance company ordinarily should be made through losses incurred in the income statement rather than through purchase accounting adjustments (see the SEC's Staff Accounting Bulletin [SAB] No. 61 for further discussion).

Reinsurance Arrangements

.43 Reinsurance is an important part of many insurance companies' businesses, and accordingly, it is important for auditors to obtain an understanding of the reinsurance programs of the insurance companies they audit. The lack of an adequate reinsurance program may expose an insurance enterprise to risks that can jeopardize its financial stability, particularly if its risks are concentrated by type or geographic area. In contrast, excessive reinsurance coverage can significantly reduce the margins available to cover fixed expenses. In the aftermath of high catastrophe losses caused by Hurricane Hugo, Hurricane Andrew, and the Northridge earthquake, which occurred several years ago, as well as large catastrophes occurring each year over the past eight years, property catastrophe coverage has been difficult to obtain. Many believe catastrophe losses are not an abnormal event anymore and may now in fact be a normal occurrence. A number of insurers, both primary insurers and reinsurers, have been forced to retain a higher portion of the risk and may be stimulated to enter into financial reinsurance arrangements. Significant changes in an insurer's reinsurance programs or retention limits may indicate increased audit risk.

.44 The industry has also been witnessing an evolving class of reinsurance agreements that have the characteristics of derivative financial instruments. Such contracts raise significant accounting issues, including (1) whether the insurance risk-transfer criteria of FASB Statement No. 113 (AC In6) have been met (see the next section of this Audit Risk Alert for further discussion); (2) whether and how to apply deposit accounting to such contracts (the AICPA's Accounting Standards Executive Committee [AcSEC] currently has a project on its agenda to provide guidance on how to apply deposit accounting, if appropriate; and (3) whether the substance of the contract is that of a derivative financial instrument and which accounting is therefore appropriate. A number of these new variations of traditional reinsurance contracts are perceived to be vehicles for insurance companies to better manage or fund their catastrophe exposures. Auditors should be aware that these types of reinsurance arrangements may also indicate increased audit risk.

.45 *Risk-Transfer Issues.* Paragraph 9 of FASB Statement No. 113 (AC In6.172) provides the following two risk-transfer conditions, *both* of which must be met for short-duration reinsurance contracts to be accounted for as reinsurance:

1. The reinsurer assumes significant insurance risk under the reinsured portions of the underlying insurance contracts.
2. It is reasonably possible that the reinsurer may realize a significant loss from the transaction.

.46 Generally, contracts that do not meet the conditions for reinsurance accounting should be accounted for as deposits.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.47 The SEC staff has expressed concern that preparers of financial statements and their auditors may not be appropriately considering the provisions of paragraph 9(a) of FASB Statement No. 113 (AC In6.172) in their assessment of whether a reinsurance contract provides indemnification of insurance risk. Insurance risk is the risk arising from uncertainties about both (1) the ultimate amount of net cash flows from premiums, commissions, claims, and claim settlement expenses paid under a contract (often referred to as underwriting risk) and (2) the timing of the receipt and payment of those cash flows (often referred to as timing risk). The paragraph 9(a) (AC In6.172) criterion must be met independently of the paragraph 9(b) (AC In6.172) criterion. Timing risk alone does not allow paragraph 9(a) (AC In6.172) to be met. Furthermore, satisfying paragraph 9(b) (AC In6.172) is not sufficient justification that paragraph 9(a) (AC In6.172) has been satisfied. Auditors should analyze carefully the entirety of an insurance enterprise's arrangements with its reinsurer, including provisions of the reinsurance contracts and any other related agreements, and the impact of any adjustable features on cash flows. Auditors should apply judgment in determining whether there is sufficient competent audit evidence supporting risk transfer under both paragraphs 9(a) and 9(b) of FASB Statement No. 113 (AC In6.172).

.48 For many reinsurance contracts, a great deal of judgment is involved in determining whether the risk-transfer conditions are met, particularly for multiple-year retrospectively rated reinsurance contracts with one or more adjustable features and contracts with undefined terms. Such contracts have become increasingly complex, containing many varieties of terms and features that may impact the assessment of risk transfer. Auditors should consider the guidance in EITF Issues No. 93-6 and No. 93-14, *Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprises.*

.49 *Reinsurance Recoverables.* Continued publicity about defaults by a Lloyd's of London syndicate underscores that the credit risk related to ceded reinsurance arrangements continues to concern the insurance industry. The evaluation of credit risk is important in assessing audit risk related to reinsurance recoverables. The AICPA Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* discusses the controls or procedures that ceding companies should implement to evaluate and monitor the financial stability of assuming companies. *Auditing Life Reinsurance,* guidance on auditing reinsurance for life and health insurance enterprises.

.50 *Disclosures About Reinsurance.* Auditors should also consider whether the disclosures of concentrations of credit risk associated with reinsurance receivables and prepaid reinsurance premiums are adequate as required by the provisions of FASB Statement No. 105 (AC F25). Furthermore, auditors of financial statements of publicly held insurance companies should be aware that the SEC staff has expressed concern about the adequacy of disclosures regarding reinsurance arrangements. The SEC staff expects registrants with material reinsurance recoverables to disclose information about the composition and quality of the asset balances. Meeting the SEC staff expectations may involve the identification of individually material reinsurers and may also require disclosure of the reinsurers' related balances. If the aggregate recoverable consists primarily of numerous small balances, breakdowns of the aggregate according to claims-paying ratings also may be necessary. Significant delinquent balances and allowances for uncollectible amounts should be disclosed, as should significant transactions and balances with related parties. If a reinsurer is a promoter of a registered offering, SEC filings may also have to include financial information about that reinsurer.

.51 *Reinsurance Arrangements and Statutory Capital and Surplus.* Paragraph 60(h) of FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises* (AC In6.166), requires that the financial statements contain disclosures regarding the amount of statutory capital and surplus of insurance enterprises that are calculated pursuant to state-mandated statutory accounting practices. Auditors of insurance enterprises should carefully review reinsurance agreements and correspond directly with state insurance departments to obtain sufficient evidence that material amounts of reserve credits used to reduce statutory reserves and increase the insurance enterprise's statutory capital and surplus have been properly computed in accordance with state laws. Most state insurance laws prohibit insurance enterprises from recognizing reserve credits pursuant to reinsurance agreements that do not transfer a sufficient amount of risk to the reinsurer. If material amounts of reserve credits associated with reinsurance arrangements do not qualify under state law, statu-

tory capital and surplus may be materially misstated. Further, failure to meet the state's minimum capital and surplus requirements can lead to state-imposed restrictions on the enterprise's ability to sell insurance products in the state and its ability to distribute dividends and may call into question an enterprise's ability to operate as a going concern. Auditors should consult SOP 94-1, *Inquiries of State Insurance Regulators*, for further guidance.

Asset Quality and Valuation Issues

.52 Though real estate markets have improved in many areas of the country and total amounts of nonperforming real estate assets and noninvestment grade bonds have declined, some insurance companies may still have asset quality problems. Credit quality issues associated with mortgage loans, real estate portfolios, troubled debt restructurings, foreclosures and in-substance foreclosures, noninvestment grade bonds, and other assets continue to require careful attention in audits of the financial statements of insurers. The subjectivity of determining asset valuation allowances, combined with continued uncertainty regarding the recoverability of the carrying value of certain assets, reinforces the need for the careful planning and the execution of audit procedures in this area.

.53 Auditors also should be alert to valuation issues related to classification and impairment of securities. Paragraph 16 of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I08.120 and I80.115) requires that for individual securities classified as either available for sale or held-to-maturity (as defined), an entity shall determine whether a decline in fair value below the amortized cost basis is other than temporary and provides related guidance.

.54 Paragraph 69 of FASB Statement No. 115 states, "if the sale of a held-to-maturity security occurs without justification, the materiality of that contradiction of the enterprise's previously asserted intent must be evaluated." The SEC staff has indicated that if held-to-maturity securities are sold for reasons other than those listed in paragraph 8 of FASB Statement No. 115 (AC I80.105), the SEC staff will challenge management's—

- Assertions regarding the classification of other held-to-maturity securities, and,
- Future assertions regarding the classification of securities purchased subsequently for an extended period of time, but no less than one year.

Audit Developments

Elimination of Uncertainty Reporting

.55 In December 1995, the Auditing Standards Board (ASB) issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508), which eliminates the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report.

.56 SAS No. 79 (AU section 508) also clarifies and reorganizes the guidance in SAS No. 58, *Reports on Audited Financial Statements* (AU section 508), concerning emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion.

.57 SAS No. 79 (AU section 508) does not affect the provisions of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), nor does it preclude the auditor from adding a paragraph to the auditor's report to emphasize a matter disclosed in the financial statements.

.58 Ordinarily, the auditor of a property and liability insurance company would look to historical data to obtain evidential matter that will provide reasonable assurance that management's estimate of loss reserves

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

is reasonable in the circumstances. The AICPA Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* indicates that auditors of the financial statements of property and liability enterprises may consider it necessary to add an uncertainty explanatory paragraph to their reports when available historical data is not sufficient to resolve an uncertainty about the reasonableness of management's estimate of loss reserves for certain new companies, companies writing significant amounts of new lines of business, or companies with low volumes of claims. The Guide is currently being revised to eliminate any indications that this is a requirement. When historical data is not sufficient to resolve uncertainty about the reasonableness of management's estimate of loss reserves and the auditor is unable to resolve the uncertainty through other means, the auditor should consider whether management has adequately disclosed the uncertainty in the notes to the financial statements as required by FASB Statement No. 5 (AC C59), paragraphs 4 and 6 of FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss (an interpretation of FASB Statement No. 5)* (AC C59.124 and 126), and SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. A matter involving an uncertainty is one that is expected to be resolved at a future date at which time conclusive evidential matter concerning its outcome would be expected to become available. Conclusive evidential matter concerning the ultimate outcome of uncertainties cannot be expected to exist at the time of the audit because the outcome and related evidential matter are prospective. In these circumstances, management is responsible for estimating the effect of future events on the financial statements, or determining that a reasonable estimate cannot be made and making the required disclosures, all in accordance with GAAP, based on management's analysis of existing conditions. Absence of the existence of information related to the outcome of an uncertainty does not necessarily lead to a conclusion that the evidential matter supporting management's assertion is not sufficient. Rather, the auditor's judgment regarding the sufficiency of the evidential matter is based on the evidential matter that is, or should be, available. If, after considering the existing conditions and available evidence, the auditor concludes that sufficient evidential matter supports management's assertion about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate. If the auditor is unable to obtain sufficient evidential matter to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. A qualification or disclaimer of opinion because of a scope limitation is appropriate if sufficient evidential matter related to an uncertainty does or did exist but was not available to the auditor for reasons such as management's record retention policies or a restriction imposed by management.

.59 SAS No. 79 (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

Internal Control

.60 In December 1995, the ASB issued SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319), which revises the definition and description of internal control contained in the Statements on Auditing Standards to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission, formed to address the Report of the National Commission on Fraudulent Financial Reporting. This Statement (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.

Planning, Supervision, and Going Concern

.61 In November 1995, the ASB issued SAS No. 77, *Amendments to Statements on Auditing Standards No. 22,* Planning and Supervision, *No. 59,* The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, *and No. 62,* Special Reports (AU sections 311, 341, and 623), which, among other things, clarifies that a written audit program should be prepared in every audit and precludes the use of conditional language in the auditor's explanatory paragraph to indicate that there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 77 (AU sections 311, 341, and 623) is effective for engagements beginning after December 15, 1995.

Letters for Underwriters

.62 The ASB released SAS No. 76, *Amendments to Statement on Auditing Standards No. 72,* Letters for Underwriters and Certain Other Requesting Parties (AU section 634). SAS No. 76 (AU section 634) provides reporting guidance and an example letter for situations in which one of the parties identified in paragraph 3, 4, or 5 of SAS No. 72, *Letters for Underwriters and Certain Other Requesting Parties* (AU section 634.03, .04, or .05), other than an underwriter or other party with a due diligence defense under section 11 of the Securities Act of 1933, requests a letter but does not meet the criteria in SAS No. 72 (AU section 634). The amendments in this Statement (AU section 634) are effective for letters issued pursuant to paragraph 9 of SAS No. 72 (AU section 634.09) after April 30, 1996.

Agreed-Upon Procedures

.63 Auditors of insurance entities are often engaged to perform certain agreed-upon procedures. The ASB has observed that there is diversity in practice in performing and reporting on these engagements, and that the existing guidance does not address a number of issues that practitioners and accountants should consider.

.64 In September 1995, the ASB released SAS No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), and Statement on Standards for Attestation Engagements (SSAE) No. 4, *Agreed-Upon Procedures Engagements* (AT section 600). SAS No. 75 (AU section 622) supersedes SAS No. 35, *Special Reports—Applying Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement.*

.65 Both SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600) provide guidance on performing and reporting on applying agreed-upon procedures, including—

- The conditions for performing agreed-upon procedures engagements.
- The nature, timing, and extent of the procedures.
- The responsibilities of practitioners and specified users.
- The reporting on procedures performed and related findings.

.66 The primary difference between the two Standards (AU section 622 and AT section 600) is that SAS No. 75 (AU section 622) is applicable when a practitioner applies agreed-upon procedures to specified elements, accounts, or items of a financial statement, and SSAE No. 4 (AT section 600) is generally applicable when a practitioner applies agreed-upon procedures to nonfinancial statement subject matter. Another difference between the two Standards (AU section 622 and AT section 600) is that SSAE No. 4 (AT section 600) requires a *written* assertion from management as a condition of engagement performance and SAS No. 75 (AU section 622) does not have such a requirement because assertions are effectively embodied in the elements, accounts, or items of a financial statement, where the basis of accounting is clearly evident.

.67 Both SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600) prohibit the practitioner from expressing negative assurance in agreed-upon procedures reports by stating that the practitioner should present the results of applying agreed-upon procedures in the form of findings. (The predecessor agreed-upon procedures standards permitted practitioners to provide negative assurance in agreed-upon procedures reports.) The Statements (AU section 622 and AT section 600) prohibit the expression of negative assurance in agreed-upon procedures reports because such language could cause users to conclude that the practitioner was communicating assurance beyond the findings in his or her report. Also, the ASB believes that negative assurance should be reserved for review-level engagements.

.68 Both SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600) are effective for reports dated after April 30, 1996.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Auditor's Reports on Statutory Financial Statements

.69 The AICPA issued SOP 95-5, *Auditor's Reporting on Statutory Financial Statements of Insurance Enterprises,* which addresses auditor's considerations in reporting on statutory financial statements of insurance enterprises. This SOP should be applied to audits of statutory financial statements for years ended on or after December 31, 1996. The SOP—

- Supersedes SOP 90-10, *Reports on Audited Financial Statements of Property and Liability Insurance Companies.*
- Discusses matters auditors should include in their reports when issuing limited or general distribution reports on statutory financial statements.
- Discusses matters auditors should evaluate when considering issuing limited or general distribution reports on statutory financial statements.
- Discusses auditor's reporting on the statutory financial statements of mutual life insurance enterprises. See the section entitled "Mutual Life Insurance Enterprises" in the "Accounting Developments" section of this Audit Risk Alert.

Letters for State Insurance Regulators to Comply With the NAIC Model Audit Rule

.70 The AICPA issued SOP 95-4, *Letters for State Insurance Regulators to Comply With the NAIC Model Audit Rule,* which provides guidance to auditors on the form and content of communications with state insurance regulators, required by the NAIC *Annual Statement Instructions Requiring Annual Audited Financial Statements,* which incorporates the January 1991 *Model Rule (Regulation) Requiring Annual Audited Financial Reports* (reissued in July 1995). This SOP amends chapter 9, "Auditor's Reports," of the AICPA Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* and chapter 11, "Auditors' Reports," of the AICPA Industry Audit Guide *Audits of Stock Life Insurance Companies.* This SOP should be applied to audits of statutory financial statements performed for periods ending on or after December 31, 1995.

Risk-Based Capital

.71 The AICPA incorporated the guidance of SOP 93-8, *The Auditor's Consideration of Regulatory Risk-Based Capital for Life Insurance Enterprises,* into the Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* in response to the NAIC's implementation of a risk-based capital program for property and casualty insurance enterprises. SOP 93-8 provides guidance on the consideration of risk-based capital in the planning stage of the audit, as well as guidance on auditors' reports. Auditors should be aware of this guidance.

Accounting Developments

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

.72 In June 1996, the FASB issued FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* (AC F38). This Statement (AC F38) provides accounting and reporting standards for transfers and servicing of financial assets and extinguishment of liabilities. Those standards are based on consistent application of a financial-components approach that focuses on control. Under that approach, after a transfer of financial assets, an entity recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished. This Statement (AC F38) provides consistent standards for distinguishing transfers of financial assets that are sales from transfers that are secured borrowings.

.73 A transfer of financial assets in which the transferor surrenders control over those assets is accounted for as a sale to the extent that consideration other than beneficial interest in the transferred assets is received in exchange. The transferor has surrendered control over transferred assets if and only if all of the following conditions are met:

1. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.
2. Either (*a*) each transferee obtains the right—free of conditions that constrain it from taking advantage of that right—to pledge or exchange the transferred assets or (*b*) the transferee is a qualifying special-purpose entity and the holders of beneficial interests in that entity have the right—free of conditions that constrain them from taking advantage of that right—to pledge or exchange those interests.
3. The transferor does not maintain effective control over the transferred assets through (*a*) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (*b*) an agreement that entitles the transferor to repurchase or redeem transferred assets that are not readily obtainable.

.74 FASB Statement No. 125 (AC F38) requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interest in transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.75 FASB Statement No. 125 (AC F38) requires that servicing assets and liabilities be subsequently measured by (1) amortization in proportion to and over the period of estimated net servicing income or loss and (2) assessment for asset impairment or increased obligation based on their fair values.

.76 FASB Statement No. 125 (AC F38) requires that debtors reclassify financial assets pledged as collateral and that secured parties recognize those assets and their obligation to return them in certain circumstances in which the secured party has taken control of those assets.

.77 FASB Statement No. 125 (AC F38) requires that a liability be derecognized if and only if either (1) the debtor pays the creditor and is relieved of its obligation for the liability or (2) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.

.78 FASB Statement No. 125 (AC F38) provides implementation guidance for assessing isolation of transferred assets and for accounting for transfers of partial interest, servicing of financial assets, securitizations, transfers of sales-type and direct financial lease receivables, securities lending transactions, repurchase agreements including "dollars rolls," "wash sales," loan syndications and participations, risk participations in banker's acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishment of liabilities.

.79 FASB Statement No. 125 (AC F38) supersedes FASB Statements No. 76, *Extinguishment of Debt*, and No. 77, *Reporting by Transferors for Transfers of Receivables with Recourse*. This Statement (AC F38) amends FASB Statement No. 115 (AC I80) to clarify that a debt security may not be classified as held-to-maturity if it can be prepaid or otherwise settled in such a way that the holder of the security would not recover substantially all of its recorded investment. This Statement (AC F38) amends and extends to all servicing assets and liabilities the accounting standards for mortgage servicing rights now in FASB Statement No. 65, *Accounting for Certain Mortgage Banking Activities* (AC Mo4), and supersedes FASB Statement No. 122, *Accounting for Mortgage Servicing Rights*. This Statement (AC F38) also supersedes FASB Technical Bulletins No. 84-4, *In-Substance Defeasance of Debt*, No. 85-2, *Accounting for Collateralized Mortgage Obligations (CMOs)*, and No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*.

.80 FASB Statement No. 125 (AC F38) is effective for transfers and servicing of financial assets and extinguishment of liabilities occurring after December 31, 1996, and is to be applied prospectively. Earlier or retroactive application is not permitted.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

Stock-Based Compensation

.81 In October 1995, the FASB issued Statement No. 123, *Accounting for Stock-Based Compensation* (AC C36), which establishes financial accounting for stock-based employee compensation plans. The Statement (AC C36) encourages companies to account for stock compensation awards using a fair value method. Fair value is determined based on the stock price at the date the awards are granted. The resulting compensation cost would be recognized as an expense in the income statement over the service period. FASB Statement No. 123 (AC C36) also applies to equity instruments issued for goods or services provided by persons other than employees. The accounting requirements of this Statement (AC C36) are effective for transactions entered into in fiscal years that begin after December 15, 1995, though they may be adopted on issuance.

Long-Lived Assets

.82 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08), which establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) applies to financial statements for fiscal years beginning after December 15, 1995.

.83 The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstance indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the enterprise should estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. This Statement (AC I08) does not apply to deferred policy acquisition costs under FASB Statements No. 60 and No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments* (AC In6). The Statement (AC I08) amends several FASB statements including FASB Statement No. 61, *Accounting for Title Plant* (AC Ti7).

.84 The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets that are covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets that are covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of carrying amount or net realizable value.

.85 The Statement (AC I08) specifies that impairment losses resulting from its application be reported in the period in which the recognition criteria are first met. The initial application of the Statement (AC I08) to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle. (Certain provisions of SOP 92-3, *Accounting for Foreclosed Assets*, are inconsistent with provisions of FASB Statement No. 121 (AC I08). AcSEC is considering actions to take on SOP 92-3; however, FASB Statement No. 121 (AC I08) takes precedence for transactions within its scope.) Auditors should be aware that the provisions of FASB Statement No. 121 (AC I08) may be material to certain insurance enterprises. Some examples of events or changes in circumstances that may indicate that the recoverability of the carrying amount of an asset should be assessed are as follows:

- A significant decrease in the market value of an asset
- A significant change in the extent or manner in which an asset is used or a significant physical change in an asset

- A significant adverse change in legal factors or in the business climate that could affect the value of an asset or an adverse action or assessment by a regulator
- An accumulation of costs significantly in excess of the amount originally expected to acquire or construct an asset
- A current period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with an asset used for the purpose of producing revenue

Mutual Life Insurance Enterprises

.86 In April 1993, the FASB issued Interpretation No. 40, *Applicability of Generally Accepted Accounting Principles to Mutual Life Insurance and Other Enterprises* (AC In6). The Interpretation (AC In6) clarifies that companies, including mutual life companies, that issue financial statements described as prepared "in conformity with generally accepted accounting principles." are required to apply all applicable authoritative accounting pronouncements in preparing those statements. The Interpretation (AC In6) concludes that mutual life insurance companies that prepare financial statements based on regulatory accounting practices that differ from GAAP, and distribute those financial statements to regulators, should not describe these financial statements as prepared "in conformity with generally accepted accounting principles."

.87 In January 1995, the FASB issued Statement No. 120, *Accounting and Reporting by Mutual Life Insurance Enterprises and by Insurance Enterprises for Certain Long-Duration Participating Contracts* (AC In6). This Statement (AC In6) amends FASB Interpretation No. 40 (AC In6) to defer the effective date of the general provisions of that Interpretation (AC In6) to fiscal years beginning after December 15, 1995. Nevertheless, this Statement (AC In6) does not change the disclosure and other transition provisions of FASB Interpretation No. 40 (AC In6).

.88 FASB Statement No. 120 (AC In6) extends the requirements of FASB Statements No. 60 (AC In6), No. 97 (AC In6), and No. 113 (AC In6), to mutual life insurance enterprises, assessment enterprises, and fraternal benefit societies.

.89 FASB Statement No. 120 (AC In6) also permits stock life insurance enterprises to apply the accounting provisions of the SOP 95-1, *Accounting for Certain Insurance Activities of Mutual Life Insurance Enterprises*, which is discussed in the next paragraph, to participating life insurance contracts that meet the conditions in this Statement (AC In6). The Statement (AC In6) is effective for financial statements issued for fiscal years beginning after December 15, 1995.

.90 The AICPA issued SOP 95-1 on January 18, 1995. The SOP will be effective for financial statements issued for fiscal years beginning after December 15, 1995. The SOP, which was issued jointly with FASB Statement No. 120 (AC In6), provides accounting guidance and establishes accounting for certain participating insurance contracts of mutual life insurance enterprises with the following characteristics:

- They are long-duration participating contracts that are expected to pay dividends to policyholders based on actual experience of the insurance enterprise.
- Annual policyholder dividends are paid in a manner that identifies divisible surplus and distributes that surplus in approximately the same proportion as the contracts are considered to have contributed to divisible surplus (commonly referred to in actuarial literature as the contribution principle).

.91 *Auditor's Reports.* Prior to the effective date of FASB Statement No. 120 (AC In6), mutual life insurance enterprises issued statutory financial statements and described those financial statements as being in conformity with GAAP. This practice is no longer permitted. Financial statements prepared in conformity with statutory accounting practices for periods prior to the effective date of FASB Statement No. 120 (AC

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

In6) are not considered GAAP presentations when presented in comparative form with financial statements for periods subsequent to the effective date of FASB Statement No. 120 (AC In6). General distribution reports on an insurance company's statutory financial statements must express either an adverse or qualified opinion as to conformity with GAAP. An additional paragraph in the auditor's report, auditors also may express an opinion on whether the statutory financial statements are presented in conformity with the statutory basis of accounting (see SAS No. 1, section 544, *Lack of Conformity With Generally Accepted Accounting Principles* [AU section 544]).

.92 A mutual life insurance enterprise may want a general distribution independent auditor's report on its 1996 statutory financial statements presented in comparative form with its 1995 statutory financial statements (which were considered to be in conformity with GAAP in 1995). In this situation, the auditor may have issued an unqualified opinion on the 1995 financial statements when they were first issued, and he or she is precluded from updating and issuing the same opinion on the 1995 financial statements that are presented in comparative form with the 1996 statements. SAS No. 58 (paragraph 69, as amended by SAS No. 79 [AU section 508.69]) states that if, in an updated report, the opinion is different from the opinion previously expressed on the financial statements of a prior period, the auditor should disclose all of the substantive reasons for the different opinion in a separate explanatory paragraph proceeding the opinion paragraph.

.93 The following is an illustration of an independent auditor's report on the general distribution comparative statutory financial statements of an insurance enterprise prepared in conformity with prescribed or permitted statutory accounting practices, which contains an explanatory paragraph disclosing all the substantive reasons for the different opinion, an adverse opinion as to conformity with GAAP, and an unqualified opinion as to the conformity with the statutory basis of accounting. In this illustrative report, it is assumed that the effects on the statutory financial statements of the differences between GAAP and the statutory basis of accounting are not reasonably determinable.

Independent Auditor's Report

To the Board of Directors
Example Insurance Company

We have audited the accompanying statutory statements of admitted assets, liabilities, and surplus of Example Insurance Company as of December 31, 19X6 and 19X5, and the related statutory statements of income and changes in capital and surplus, and cash flow for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our report dated March 1, 19X6, we expressed an opinion that the 19X5 financial statements, prepared using accounting practices prescribed or permitted by the Insurance Department of the State of [*state of domicile*], presented fairly, in all material respects, the financial position of Example Insurance Company as of December 31, 19X5, and the results of its operations, and its cash flows for the year then ended in conformity with generally accepted accounting principles. As described in Note Y to these financial statements, pursuant to the pronouncements of the Financial Accounting Standards Board, the 19X5 financial statements of Example Insurance Company, prepared using accounting practices prescribed or permitted by insurance regulators (statutory financial statements) are not considered presentations in conformity with generally accepted accounting principles when presented for comparative purposes with the company's financial

statements for periods beginning after December 15, 19X5. Accordingly, our present opinion on the presentation of the 19X5 financial statements in accordance with GAAP, as presented herein, is different from that expressed in our previous report.

In our opinion, because of the effects of the matter discussed in the third paragraph, the financial statements referred to above do not present fairly, in conformity with generally accepted accounting principles, the financial position of Example Insurance Company as of December 31, 19X6 and 19X5, or the results of its operations or its cash flows for the years then ended.

As described more fully in Note X to these financial statements, the Company prepared these financial statements using accounting practices prescribed or permitted by the Insurance Department of the State of [*state of domicile*], which practices differ from generally accepted accounting principles. The effects on the financial statements of the variances between the statutory basis of accounting and generally accepted accounting principles, although not reasonably determinable, are presumed to be material.

Also, in our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and surplus of Example Insurance Company as of December 31, 19X6 and 19X5, and the results of its operations and its cash flow for the years then ended, on the basis of accounting described in Note X.

.94 The following is an example of Note Y which is referred to in the above illustration of an independent auditor's report.

Note Y - Statement of Financial Accounting Standards No. 120 and Interpretation No. 40

Statement of Financial Accounting Standards (Statement) No. 120, *Accounting and Reporting by Mutual Life Insurance Enterprises and by Insurance Enterprises for Certain Long-Duration Participating Contracts*, extends the requirements of Statements No. 60, *Accounting and Reporting by Insurance Enterprises*, No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*, and No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, to mutual life insurance enterprises. It also provides the effective date for implementation of FASB Interpretation (Interpretation) No. 40, *Applicability of Generally Accepted Accounting Principles to Mutual Life Insurance and Other Enterprises*. Statement No. 120 is effective for financial statements for fiscal years beginning after December 15, 1995, and requires restatement of all previously issued annual financial statements presented for comparative purposes for fiscal years beginning after December 15, 1992.

In 1995, prior to the effective date of Interpretation No. 40 and Statement No. 120, mutual life insurance enterprises could issue financial statements prepared using accounting practices prescribed or permitted by the Insurance Department of the State of [*state of domicile*], (statutory financial statements) and describe those financial statements as being in conformity with generally accepted accounting principles (GAAP). Pursuant to the provisions of Interpretation No. 40 and Statement No. 120, statutory financial statements of mutual life insurance enterprises for periods ending on or before December 15, 1996, are no longer considered presentations in conformity with generally accepted accounting principles when presented for comparative purposes with the enterprise's financial statements for periods subsequent to the effective date of Interpretation No. 40 and Statement No. 120. Accordingly, the 1995 statutory financial statements presented herein are no longer considered presentations in conformity with generally accepted accounting principles.

.95 Auditors should be aware of this guidance when auditing a mutual life insurance enterprise and enterprises with participating life insurance contracts.

AcSEC Conforming Changes

.96 In February 1996, AcSEC updated its technical guidance in certain SOPs and practice bulletins to conform with pronouncements issued recently by the FASB. AcSEC made conforming changes to the following SOPs and practice bulletins:

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- SOP 75-2, *Accounting Practices of Real Estate Investment Trusts*, and the related SOP 78-2, *Accounting Practices of Real Estate Investment Trusts*
- SOP 76-3, *Accounting Practices for Certain Employee Stock Ownership Plans*
- SOP 78-9, *Accounting for Investments in Real Estate Ventures*
- SOP 90-11, *Disclosure of Certain Information by Financial Institutions About Debt Securities Held as Assets*
- SOP 93-7, *Reporting on Advertising Costs*
- AICPA Practice Bulletin 1, *Purpose and Scope of AcSEC Practice Bulletin and Procedures for Their Issuance*—Exhibit F—Accounting and Disclosure for Reinsurance Transactions
- AICPA Practice Bulletin 9, *Disclosure of Fronting Arrangements by Fronting Companies*

Auditors should be aware of these changes.

Exposure Draft—Accounting by Insurance and Other Enterprises for Guaranty-Fund and Certain Other Insurance-Related Assessments

.97 Insurance enterprises are subject to a variety of assessments, including those by state guaranty funds and workers' compensation second-injury funds. Current accounting practice by insurance enterprises for assessments and related recoveries is diverse. The AICPA expects to issue an exposure draft of an SOP, *Accounting by Insurance and Other Enterprises for Guaranty-Fund and Certain Other Insurance-Related Assessments*, by the end of 1996. The exposure draft will provide:

- Guidance for determining when an insurance or other enterprise should recognize a liability for guaranty-fund and other assessments.
- Guidance on how to measure the liability and will allow for the discounting of the liability, if the amount and timing of the cash payments are fixed and reliably determinable.
- Criteria for when an asset may be recognized for a portion or all of the assessment liability or paid assessment that can be recovered through premium tax offsets or policy surcharges.
- Requirements for disclosure of certain information.

AcSEC anticipates to finalize this SOP in 1997 and to issue an SOP that would be effective for financial statements for fiscal years beginning after December 15, 1997. Early adoption would be encouraged.

Accounting by the Issuer of Surplus Notes

.98 The AICPA plans to issue a practice bulletin on accounting by the issuer of surplus notes in the first quarter of 1997. The practice bulletin will apply to insurance enterprises that issue surplus notes. A surplus note is a financial instrument issued by mutual and stock insurance enterprises that is includable in surplus for statutory accounting purposes as prescribed or permitted by state laws and regulations. The practice bulletin will provide guidance on accounting, financial statement presentation, and disclosure for surplus notes. It will require surplus notes to be recorded as liabilities in the financial statements of the issuer. The accounting for surplus notes by the issuer, including the accrual of interest, would be consistent with that of other debt.

Certain FASB Statement No. 115 Implementation Issues

.99 As a result of inquiries and comments by SEC registrants and their auditors, at the July 21, 1994 EITF meeting, the SEC staff made an announcement regarding the effects of adopting FASB Statement No. 115 (AC I80) on certain assets and liabilities. The SEC staff would expect registrants to comply with the guidance in this announcement when they adopt FASB Statement No. 115 (AC I80) and FASB Interpretation No. 40

(AC In6). Auditors should be aware that the FASB staff believes that both public and nonpublic entities should comply with the guidance in this announcement. The text of this announcement is as follows:

> Currently, SEC registrants are evaluating the effect on their financial statements of adopting FASB Statement No. 115. The SEC staff has been asked whether certain assets and liabilities, such as minority interests, certain life insurance policyholder liabilities, deferred acquisition costs, and the present value of future profits, should be adjusted with a corresponding adjustment to shareholders' equity at the same time unrealized holding gains and losses from securities classified as available-for-sale are recognized in shareholders' equity. That is, should the carrying value of these assets and liabilities be adjusted to the amount that would have been reported had unrealized gains and losses been realized?
>
> This issue is not addressed specifically in the literature. However, paragraph 36(b) of FASB Statement No. 109 addresses specifically the classification of the deferred tax effects of unrealized holding gains and losses reported in a separate component of shareholders' equity. Paragraph 36(b) of FASB Statement No. 109 requires that the tax effects of such gains and losses be reported as charges or credits directly to the related component of shareholders' equity. That is, the recognition of unrealized holding gains and losses in shareholders' equity may create temporary differences for which deferred taxes would be recognized, the effect of which would be reported in a separate component of shareholders' equity along with the related unrealized holding gains and losses. Therefore, FASB Statement No. 109 requires that deferred tax assets and liabilities be recognized for the temporary differences relating to unrealized holding gains and losses as though these gains and losses actually had been realized, except the corresponding charges or credits are reported in a separate component of shareholders' equity rather than charges or credits to income in the statement of income.
>
> By analogy to the requirements of FASB Statement No. 109, the SEC staff believes that, in addition to deferred tax assets and liabilities, registrants should adjust other assets and liabilities that would have been adjusted if the unrealized holding gains and losses from securities classified as available-for-sale actually had been realized. That is, to the extent that unrealized holding gains or losses from securities classified as available-for-sale would result in adjustments of minority interest, policyholder liabilities, deferred acquisition costs that are amortized using the gross-profits method, or amounts representing the present value of future profits that are amortized using the gross-profits method had those gains or losses actually been realized, the SEC staff believes that such balance sheet amounts should be adjusted with corresponding credits or charges reported directly to shareholders' equity. As a practical matter, the staff, at this time, would not extend such adjustments to other accounts such as liabilities for compensation to employees. The adjustments to asset accounts should be accomplished by way of valuation allowances that would be adjusted at subsequent balance sheet dates.
>
> For example, SEC registrants should adjust minority interest for a portion of the unrealized holding gains and losses from securities classified as available-for-sale if those gains and losses relate to securities that are owned by a less-than-wholly-owned subsidiary whose financial statements are consolidated. Certain policyholder liabilities also should be adjusted to the extent that liabilities exist for insurance policies that, by contract, credit or charge the policyholders for either a portion or all of the realized gains or losses of specific securities classified as available-for-sale. Further, certain asset amounts that are amortized using the gross-profits method, such as deferred acquisition costs accounted for under FASB Statement No. 97, and the present value of future profits recognized as a result of acquisitions of life insurance entities accounted for as purchase business combinations, should be adjusted to reflect the effects that would have been recognized had the unrealized holding gains and losses actually been realized. Further, capitalized acquisition costs associated with

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

insurance contracts covered by FASB Statement No. 60 should not be adjusted for an unrealized holding gain or loss unless a "premium deficiency" would have resulted had the gain or loss actually been realized.

.100 This announcement should not affect reported net income. It addresses only the adjustment of certain assets and liabilities and the reporting of unrealized holding gains and losses from securities classified as available-for-sale.

Special Report on FASB Statement No. 115

.101 The FASB staff issued a Special Report, *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities*, which provides implementation guidance in a question and answer format.

Consensus Decisions of the FASB's Emerging Issues Task Force

.102 The EITF frequently discusses accounting issues involving financial instruments, real estate, or insurance contracts that are important to insurance companies. To order copies of the following publication, call the FASB at (203) 847-0700, ext. 10.

- EITF Issue No. 94-7, *Accounting for Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*
- EITF Issue No. 95-5, *Determination of What Risks and Rewards, If Any, Can Be Retained and Whether Any Unresolved Contingencies May Exist in a Sale of Mortgage Loan Servicing Rights*
- EITF Issue No. 95-11, *Accounting for Derivative Instruments Containing Both a Written Option-Based and a Forward-Based Component*
- EITF Issue No. 96-10, *Impact of Certain Transactions on the Held-to-Maturity Classification under FASB Statement No. 115*
- EITF Issue No. 96-12, *Recognition of Interest Income and Balance Sheet Classification of Structured Notes*
- EITF Issue No. 96-14, *Accounting for the Costs Associated with Modifying Computer Software for the Year 2000*
- EITF Issue No. 96-15, *Accounting for the Effects of Changes in Foreign Currency Exchange Rates on Foreign-Currency-Denominated Available-For-Sale Debt Securities*

.103 Appendix D to the *EITF Abstracts* contains EITF discussions of technical matters that have long-term relevance and do not relate specifically to a numbered EITF Issue. Readers should be alert to the following topics of recent discussion:

- Appendix D-34, *Accounting for Reinsurance: Questions and Answers about FASB Statement No. 113*
- Appendix D-35, *FASB Staff Views on Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises"*
- Appendix D-44, *Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value*
- Appendix D-45, *Implementation of FASB Statement No. 121 for Assets to Be Disposed Of*

Information Sources

.104 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed in the table at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.105 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine; others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.106 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols. In 1996 many organizations have established Web Sites on the World Wide Web.

.107 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.108 All telephone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed for data lines.

AAM Section 8050

Banks and Savings Institutions Industry Developments—1996/97

Industry and Economic Developments

.01 Banks and savings institutions showed continued profitability during 1996. However, auditors should be alert to the following circumstances that may increase the audit risk associated with related financial information or internal control:

- Personnel reductions that result in a single employee performing duties previously divided among a number of employees
- The increased use of technology that is complicated by difficulty in making data secure
- The reclassification of amounts used in operating ratios and other financial measures to improve these measures
- Rapid expansion into nontraditional activities (such as insurance and mutual fund sales) or increase in volumes of high-risk, new products
- Weak information supporting mortgage servicing rights and the volatility of fair value information (both at origination and when impairment is measured)

.02 Also, steady growth in residential real estate and consumer lending have been accompanied by record-setting levels of delinquency, increasing audit risk with respect to the valuation of related assets. In some circumstances, institutions may have increased origination volumes by easing credit standards or loosening contractual terms. Institutions may be—

- Lending to weaker borrowers or reducing the scrutiny of credit risk.
- Originating loans with longer repayment periods, lower down payments, or with periods in which no payment is required.
- Failing to enforce loan covenants, to follow established loan policies, or to obtain guarantees on small business loans.

Such actions may increase credit risk and, by that, affect the audit risk associated with the institution's valuation of related assets or incurrence of liabilities for credit losses.

Audit and Accounting Guide

.03 In April 1996, the AICPA issued an AICPA Audit and Accounting Guide *Banks and Savings Institutions* (Guide). The Guide supersedes the AICPA Industry Audit Guide *Audits of Banks* and the AICPA Audit and Accounting Guide *Audits of Savings Institutions*. The Guide discusses those aspects of accounting and auditing unique to banks and savings institutions and was developed to help preparers and auditors of financial statements of banks and savings institutions. The Guide incorporates new accounting and financial reporting requirements issued by the Financial Accounting Standards Board (FASB) and the AICPA's Accounting Standards Executive Committee (AcSEC) and new auditing standards issued by the AICPA's Auditing Standards Board (ASB).

.04 The Guide establishes new requirements for disclosures about regulatory matters effective for financial statements issued for fiscal years ending after June 15, 1996, and for interim financial statements issued after initial application. The auditing provisions of the Guide are required to be applied prospectively to audits of financial statements for fiscal years ending after June 15, 1996.

Legislative and Regulatory Developments

.05 Chapter 2 of the Guide explains why and how auditors should consider legislative and regulatory matters. Following is a summary of developments that involve accounting and auditing matters. Auditors should be alert also to the effect of laws and regulations on planned mergers or acquisitions.

.06 This Audit Risk Alert does not provide a comprehensive discussion of each issue, but refers to laws, regulations, rulings, or other documents and related publications of the Federal Deposit Insurance Corporation (FDIC), the Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (FRB), and the Office of Thrift Supervision (OTS), which collectively are referred to as the agencies. Readers should consult the "Information Sources" section of this Audit Risk Alert to find out how to get copies of the referenced documents.

Legislative Matters

.07 Enacted September 30, 1996, the Deposit Insurance Funds Act requires that the FDIC assess a special premium on deposits insured by the Savings Association Insurance Fund. The premium will raise the ratio of SAIF insurance funds to insured deposits to 1.25 percent. The Act also amends Section 162 of the Internal Revenue Code to make the assessment deductible in the year paid.

.08 The FASB staff addressed related accounting questions in an announcement at the November 15, 1995, meeting of the FASB's Emerging Issues Task Force (EITF). In part, the FASB staff said that when legislation requiring the special assessment was enacted, "a liability should be accrued and a charge should be reported as a component of operating income in the period that includes the enactment date. The charge to income should not be reported as an extraordinary item." Further guidance is provided in FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (AC C59).

.09 Also enacted September 30, 1996, the Economic Growth and Regulatory Paperwork Reduction Act repealed Section 36(e) of the Federal Deposit Insurance Act. That section required auditors to report on agreed-upon procedures relative to insured institutions' compliance with specified safety and soundness laws and regulations. (The Federal Deposit Insurance Act continues to require that management make a written assertion about compliance.)

.10 The Small Business Job Protection Act was signed into law, which includes provisions that repeal the bad-debt-reserve method for savings institutions' income taxes and addresses the potential recapture by savings institutions of percentage-of-taxable-income deductions of bad debts for tax purposes. These changes will affect the recognition and measurement of taxes in certain institutions' financial statements.

.11 During 1996, Congress continued to pursue, but did not pass, legislation to—

- Amend the Higher Education Act of 1965 to exempt certain originators of student loans from related audit requirements.
- Reform the Glass-Steagall Act (which effectively prohibits commercial banks from underwriting securities or otherwise engaging in investment banking activities).

Regulatory Capital Matters

.12 Capital regulations are complex and their application requires an understanding of specific requirements. Chapter 2 of the Guide explains how auditors consider regulatory capital matters and required disclosures about regulatory matters. The potential impact of noncompliance—particularly if an institution is involved in complex transactions, investments, or parent-subsidiary relationships—also should be understood. Highlights of major changes in capital regulations follow. Readers should consult the specific requirements for full definitions of the terms used.

.13 *Interest-Rate Risk.* Risk-based capital standards of the FDIC, OCC, and FRB explicitly identify concentrations of interest-rate risk as qualitative factors to be considered in examiner assessments of an institution's overall capital adequacy; however, the standards require no specific quantitative measure of such risks. Paragraph 2.36 of the Guide explains OTS requirements.

.14 The FDIC, OCC, and FRB augmented their requirements through a joint policy statement that explains how examiners will assess institutions' interest-rate risk exposure (OCC Bulletin 96-36; FDIC Financial Institutions Letters [FILs] 52-96 and 54-96; *Federal Register*, June 26, 1996). The policy statement suggests that institutions with complex systems for measuring interest-rate risk may seek assurance about the institution's risk management process from external auditors.

.15 *Market Risk.* The FRB, OCC, and FDIC amended their respective risk-based capital requirements to for market risk (FDIC FIL-84-96).

.16 *RAP-GAAP Differences.* Paragraphs 2.82 through 2.85 of the Guide explain the effect on audit risk of differences between the regulatory accounting practices (RAP) used to prepare regulatory financial reports and the generally accepted accounting principles (GAAP) used to prepare general-purpose financial statements. Also, paragraph 2.86 of the Guide explains that certain balances and transactions accounted for in conformity with GAAP for regulatory reporting purposes receive different treatment in regulatory capital calculations.

.17 The Federal Financial Institutions Examination Council (FFIEC) issued an optional worksheet for reporting regulatory capital amounts in regulatory financial reports (FDIC FIL-20-96). Auditors may find the worksheet helpful in auditing disclosures about regulatory matters.

Other Regulatory Matters

.18 *Bank Secrecy Act Compliance.* The FDIC revised its guidelines for banks' self-monitoring of compliance with the Bank Secrecy Act. Included are minimum requirements that independent testing be conducted at least annually by internal auditors, external auditors, or consultants (FDIC FIL-29-96). Auditors engaged to provide independent assurance should consider the guidance in AICPA Statement on Standards for Attestation Engagements (SSAE) No. 3, *Compliance Attestation* (AT section 500).

.19 *HUD Recertifications.* The United States Department of Housing and Urban Development (HUD) requires financial institution subsidiaries and affiliates and other mortgagees under HUD's mortgage insurance programs to be recertified annually. HUD Mortgagee Letter 95-6 sets out the recertification criteria, which include the filing of audited financial statements, independent accountants' reports on internal control and compliance, and a schedule of the mortgagee's adjusted net worth (as defined). HUD has reported that recertification requests frequently include net worth schedules that are deficient because the mortgagee has not used new calculations specified in HUD Mortgagee Letter 95-6.

.20 *FHA Mortgagee Requirements.* HUD revised its requirements for Federal Housing Administration (FHA) loan correspondents (*Federal Register*, July 10, 1996). HUD eliminated certain compliance and internal

control reporting requirements and announced its intention to eliminate the requirement that audits of financial statements of loan correspondents comply with *Government Auditing Standards* issued by the Comptroller General of the United States.

.21 *Student Loans.* The Higher Education Act requires compliance engagements for Federal Family Education Loan (FFEL) program lenders and third-party servicers. The United States Department of Education's Office of the Inspector General (OIG) developed detailed requirements for lender engagements in its March 1995 guide, *Compliance Audits (Attestation Engagements) of Federal Family Education Loan Program at Participating Lenders.*

.22 In June 1996, the department extended until June 30, 1997, the due date for reports from lenders with portfolios equal to or less than $5 million, as defined (Dear Colleague Letter 96-L-188).

.23 The OIG plans to issue a guide in late 1996 that will supersede the March 1995 lender guide and will introduce detailed requirements for engagements at third-party servicers. The new guide likely will become effective within six months of its issuance.

.24 The OIG is also working on a guide addressing management and auditor reports to be provided by lenders and lender servicers voluntarily seeking the department's special designation rewarding the entity's exceptional performance collecting delinquent and defaulted FFEL program loans.

.25 *Asset Quality Standards.* The agencies issued qualitative standards for asset quality and earnings (FDIC FIL-79-96; *Federal Register,* August 27, 1996). Auditors may wish to familiarize themselves with the standards during planning (as part of understanding regulatory matters and the institution's business).

.26 *Agricultural Loans.* The FDIC gave examiners information on analyzing and classifying agricultural loans (FDIC FIL-61-96). Auditors of the financial statements of institutions that engage in material agricultural lending may find the memorandum's background and risk information helpful for planning purposes.

.27 *Credit Derivatives.* The FDIC and OCC issued guidance to bankers and examiners on credit derivatives (FDIC FIL-62-96; OCC Bulletin 96-43). Credit derivatives are financial instruments that allow counterparties to transfer credit risk. Auditors may find the background information helpful for identifying and understanding credit derivatives.

Audit Issues and Developments

Agreed-Upon Procedures Engagements

.28 AICPA Statement on Auditing Standards (SAS) No. 75, *Engagements to Apply Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement* (AU section 622), and SSAE No. 4, *Agreed-Upon Procedures Engagements* (AT section 600), became effective for reports dated after April 30, 1996. SAS No. 75 (AU section 622) superseded SAS No. 35, *Special Reports—Applying Agreed-Upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement.* Also, SSAE No. 4 (AT section 600) amends SSAE No. 3 (AT section 500).

.29 The new Standards affect various industry-related engagements, including those to report on agreed-upon procedures relating to management assertions about the following:

- Collateral for Federal Home Loan Bank advances
- Compliance with electronic funds transfer (EFT) association requirements

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Compliance with student loan program requirements (see the section, "Other Regulatory Matters")
- Compliance with bonding company requirements
- Compliance with safety and soundness laws and regulations designated in 12 CFR Part 363 (see the section, "Other Regulatory Matters")
- Compliance with bond-selling-group agreements
- Officers' expenses
- Trust activities

.30 Auditors should be alert to the requirements of SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600) on these and similar engagements. Among other significant provisions, the Statements—

- Prohibit reporting of negative assurance about whether management's assertion is fairly stated.
- Clarify that SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AU section 322), does not apply to agreed-upon procedures engagements.
- State that the concept of materiality does not apply to agreed-upon procedures engagements unless the specified users have agreed to the definition of materiality.
- Require that specified users take responsibility for the sufficiency of the agreed-upon procedures for their purposes.

SSAE No. 4 (AT section 600) further requires a written management assertion as a condition of engagement performance.

.31 In June 1995, the AICPA asked the FDIC to update or withdraw its January 16, 1990, *Statement of Policy Providing Guidance on External Auditing Procedures for State Nonmember Banks*, because of changes in FDIC reporting requirements effected by the Federal Deposit Insurance Corporation Improvement Act of 1991 and the anticipated changes introduced by SAS No. 75 (AU section 622) and SSAE No. 4 (AT section 600). For example, many of the policy statement's proposed procedures are overly subjective and open to varying interpretations.

.32 Until the FDIC policy statement is revised, auditors should agree with affected institutions and specified users on the procedures to be performed. This includes working with specified users to modify the FDIC's suggested procedures as necessary to ensure they are not overly subjective or open to varying interpretations (see paragraphs 17 through 19 of SSAE No. 4 [AT section 600.17–.19]).

.33 As required by paragraph 11 of SSAE No. 4 (AT section 600.11) and paragraph 10 of SAS No. 75 (AU section 622), if the practitioner cannot obtain agreement from a party (such as the FDIC) on the procedures to be performed or the party's acceptance of responsibility for sufficiency of the agreed-upon procedures for the party's purposes, the practitioner should not include that party as a specified user. Further, those standards say practitioners should not report on an engagement when specified users do not agree upon the procedures to be performed and do not take responsibility for the sufficiency of the procedures for their purposes.

SAS No. 70 Auditing Procedure Study

.34 The AICPA published an Auditing Procedure Study, *Implementing SAS No. 70*, Reports on the Processing of Transactions by Service Organizations (product no. 021056). The study provides guidance to service auditors engaged to issue reports on the internal control policies and procedures of a service organization. It also provides guidance to user auditors engaged to audit the financial statements of entities that use service organizations. Examples of service organizations include (*a*) bank trust departments that invest and hold assets for employee benefit plans and (*b*) entities that service loans for others.

Elimination of Uncertainty Reporting

.35 In December 1995, the ASB issued SAS No. 79, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements (AU section 508). SAS No. 79 (AU section 508) eliminates the requirement that the auditor add an uncertainties explanatory paragraph to the auditor's report, if certain criteria are met. SAS No. 79 (AU section 508) also clarifies and reorganizes SAS No. 58 (AU section 508) guidance on emphasis paragraphs, matters involving uncertainties, and disclaimers of opinion. This SAS does not affect SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), which requires that the auditor add an explanatory paragraph to the auditor's report when there is substantial doubt about the entity's ability to continue as a going concern. SAS No. 79 (AU section 508) is effective for reports issued or reissued on or after February 29, 1996, with earlier application permitted.

Other Newly Effective Auditing Pronouncements

.36 Auditors should be alert to provisions of the following pronouncements, which are discussed in the Guide.

- SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment of SAS No. 55* (AU section 319), is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted.
- SSAE No. 6, *Reporting on an Entity's Internal Control Structure Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400), is effective for an examination of management's assertion when the assertion is as of or for the period ending on December 15, 1996, or thereafter, with earlier application permitted.

Accounting Developments

Transfers and Servicing of Financial Assets

.37 In June 1996, the FASB issued FASB Statement of Financial Accounting Standards No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.* The Statement is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after December 31, 1996. The Statement is to be applied prospectively and earlier or retroactive application is not permitted.

.38 Auditors should be alert that FASB Statement No. 125 significantly affects accounting for (and disclosures about) many bank and savings institution transactions, including the following:

- Sales of partial interests in financial assets
- Assets subject to prepayment risk (including interest-only securities)
- Collateral controlled by an institution as a secured party
- Securitization of loans or other financial assets
- Servicing assets and liabilities
- Securities lending transactions
- Repurchase and reverse-repurchase agreements
- Wash sales
- Loan syndications and participations

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Risk participations in banker's acceptances
- Factoring arrangements
- Transfers of receivables with recourse
- Extinguishment of liabilities

Because the Statement's criteria focus on control, conclusions about accounting will depend increasingly on elements of underlying legal agreements. For example, paragraph 76 of the Statement explains that, if a loan participation agreement constrains participating institutions from pledging or exchanging their participations, the originating institution "has not relinquished control over the loan and shall account for the transfers as secured borrowings." Auditors may wish to encourage client institutions to analyze the potential effect on the institution's transactions so that the institution can make any desired changes in legal agreements or otherwise plan for application of the Statement's requirements to transfers occurring on January 1, 1997, and thereafter.

Debt and Equity Securities

.39 On November 15, 1995, the FASB published a FASB Special Report, *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities*. Among various questions and answers about the implementation of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), the answer to Question 61 explains that the FASB directed its staff to provide guidance, in part, that

> concurrent with the initial adoption of this implementation guidance but no later than December 31, 1995, an enterprise may reassess the appropriateness of the classifications of all securities held at that time and account for any resulting reclassifications at fair value in accordance with paragraph 15 [of FASB Statement No. 115].

.40 The FASB staff also made the following announcement at the November 15-16, 1995 meeting of the EITF.

> The FASB intends that the initial application of the Special Report and any resulting one-time reclassifications will occur as a single date between November 15, 1995, and December 31, 1995, not over a number of days throughout the period.

Other Newly Effective Accounting Pronouncements

.41 Auditors should be alert to the effective dates of the following pronouncements, the provisions of which are addressed in the referenced sections the Guide.

- FASB Statement No. 122, *Accounting for Mortgage Servicing Rights* (AC Mo4). See paragraphs 8.21 through 8.31 of the Guide. FASB Statement No. 125 supersedes FASB Statement No. 122.
- FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). See paragraphs 9.08 through 9.10 of the Guide.
- AICPA Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*, is effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years after the year for which SOP 94-6 is first applied. See paragraphs 1.31 through 1.45 of the Guide.

.42 The AICPA Audit and Accounting Guide *Banks and Savings Institutions* explains that certain provisions of AICPA SOP No. 92-3, *Accounting for Foreclosed Assets*, are inconsistent with the provisions of FASB Statement No. 121 (AC I08) and notes that, though AcSEC and the FASB are considering actions that should be taken to resolve the inconsistencies, FASB Statement No. 121 (AC I08) takes precedence for transactions within its scope.

Discussions of the FASB's EITF

.43 The EITF frequently discusses accounting issues involving financial instruments, real estate, or transactions of similar importance to banks and savings institutions. A description of new issues discussed during the year follows; readers should consult detailed minutes for additional information.

- EITF Issue No. 96-22, *Applicability of the Disclosures Required by FASB Statement 114 When a Loan Is Restructured in a Troubled Debt Restructuring into Two (or More) Loans*
- EITF Issue No. 96-20, *Impact of FASB Statement 125 on Consolidation of Special-Purpose Entities*
- EITF Issue No. 96-15, *Accounting for the Effects of Changes in Foreign Currency Exchange Rates on Foreign-Currency-Denominated Available-for-Sale Debt Securities*
- EITF Issue No. 96-13, *Accounting for Sales of Call Options or Warrants on Issuer's Stock with Various Forms of Settlement*
- EITF Issue No. 96-12, *Recognition of Interest Income and Balance Sheet Classification of Structured Notes* (This addresses (1) whether investments in structured notes may be classified as held-to-maturity under FASB Statement No. 115, (2) how an investor in a structured note should estimate the cash flows that will be received, (3) how changes in those cash flow estimates should be recognized and measured in interest income.)
- EITF Issue No. 96-11, *Accounting for Forward Contracts and Purchased Options to Acquire Securities Covered by FASB Statement No. 115* (This addresses how to account for forward contracts and purchased options with no intrinsic value at acquisition that will be accounted for under FASB Statement No. 115 (AC I80) during the period that the forward or option is outstanding and when the securities are acquired.)
- EITF Issue No. 96-10, *Impact of Certain Transactions on the Held-to-Maturity Classification under FASB Statement No. 115* (This discusses whether certain transactions involving held-to-maturity securities that are not accounted for as sales, such as wash sales and bond swaps, contradict the institution's stated intent to hold a security to maturity and, therefore, call into question or "taint" the entity's intent to hold other debt securities to maturity.)

.44 Appendix D to the *EITF Abstracts* contains EITF discussions of technical matters that have long-term relevance and do not relate specifically to a numbered EITF Issue. Readers should be alert to the following recent discussions:

- Appendix D-50, *Classification of Gains and Losses from Determination of an Interest Rate Swap Designated to Commercial Paper* (which contains Securities and Exchange Commission staff views)
- Appendix D-48, *The Applicability of FASB Statement No. 65 to Mortgage-Backed Securities that are Held-to-Maturity* (which contains FASB staff views)
- Appendix D-47, *Accounting for the Refund of Bank Insurance Fund and Savings Association Insurance Fund Premiums* (which contains FASB staff views)

.45 Readers also should be aware that FASB Statement No. 125 affected various consensuses reached by the EITF before issuance of the Statement. The FASB staff has issued an analysis entitled *Impact of FASB Statement No. 125,* Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, *on EITF Issues.*

Ethics Developments

.46 The AICPA Professional Ethics Executive Committee issued the following ethics rulings and interpretation under Rule 101 (ET section 101.01), which relate to extended audit services, including those performed for clients that are banks and thrifts:

Copyright © 1996, American Institute of Certified Public Accountants, Inc.

- Ruling No. 103, *Member Providing Attest Report on Internal Controls* (ET section 191.206 and .207)
- Ruling No. 104, *Member Providing Operational Audit Services* (ET section 191.208 and .209)
- Ruling No. 105, *Frequency of Performance of Extended Audit Procedures* (ET section 191.210 and .211)
- Interpretation 101-13, *Extended Audit Services* (ET section 101.15)

The rulings were published in the August 1996 *Journal of Accountancy*.

Information Sources

.47 Further information on matters addressed in this Audit Risk Alert is available through various publications and services listed at the end of this document. Many nongovernment and some government publications and services involve a charge or membership requirement.

.48 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow the user to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.49 Many private companies, professional and trade associations, and government agencies allow users to read, copy, and exchange information electronically through the Internet's world wide web.

.50 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.51 All telephone numbers listed are voice lines, unless otherwise designated as fax (f) lines.

* * * *

.52 This Audit Risk Alert supersedes *Banks and Savings Institutions Industry Developments—1995/96.*

* * * *

.53 Practitioners should also be aware of the economic, industry, regulatory, and professional developments described in *Audit Risk Alert—1996/97* [AAM section 8010] and *Compilation and Review Alert—1996/97* [AAM section 8015].

AAM Section 8060

Employee Benefit Plans Industry Developments—1997

Industry and Economic Developments

.01 Plan sponsors increasingly continue to offer 401(k) and other defined contribution plan options in lieu of traditional defined benefit plans and to offer more investment options for participants. The following list is based on a survey conducted by Buck Consultants, *401(k) Plans—Employer Practices & Policies, September 1996 Survey Results*, eighth edition:

- 95 percent of all 401(k) plans offer four or more investment options.
- Voice response systems are used in 76 percent of all respondents' plans, as opposed to 35 percent in 1993 and 58 percent in 1995.
- 86 percent of all 401(k) plans offer a participant loan feature, whereas in 1984 only 39 percent did.
- 53 percent of plans surveyed allowed for daily changes in investment elections, whereas in 1989 only 4 percent did.
- 49 percent of plans surveyed allow participants to change investment of new monies every pay period, whereas in 1989 only 4 percent did.

Regulatory and Legislative Developments

Regulatory Developments

.02 *Department of Labor Nonenforcement of GAAP Disclosures of Postretirement Benefit Obligations by Multiemployer Health and Welfare Benefit Plans.* On March 13, 1997, the Department of Labor (DOL) published in the *Federal Register* a notice and request for comment on an annual enforcement policy pursuant to which the DOL would not reject the Form 5500 annual report, filed for the 1996 and 1997 plan years, of a multiemployer welfare benefit plan solely because the accountant's opinion accompanying such report is qualified or adverse due to a failure to account and report for postretirement benefit obligations in accordance with the financial statement disclosure requirements of AICPA Statement of Position (SOP) 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans*. The AICPA is on record opposing the DOL's nonenforcement position. The DOL's action does not affect generally accepted accounting principles (GAAP) for multiemployer health and welfare benefit plans. However, if a plan decides not to fully comply with the requirements of SOP 92-6, then the auditor must consider the effect of a GAAP departure on his or her audit report. See related discussion under Audit Issues and Developments section of this alert.

.03 *Final Regulation Relating to Definition of Plan Assets: Participant Contributions.* On August 7, 1996, the DOL published in the *Federal Register* final rules that lower the maximum period that employers may hold contributions to contributory employee benefit pension plans (both defined benefit and defined contribution plans). These new regulations amend an existing regulation, adopted in 1988, as to when participant contributions become plan assets.

.04 Previous rules required employers to remit money withheld from employees to their plans as soon as reasonably possible, but in no event longer than ninety days. However, some employers misinterpreted

the prior rule to mean that contributions could be held for ninety days even though these contributions could have been remitted to the plan in a shorter period.

.05 The new regulation, effective February 3, 1997, includes the following changes:

- For pension plans (both defined benefit and defined contribution plans), the maximum period for remittance of employee contributions to the plan has been reduced to fifteen business days after the month in which the participant contribution was withheld or received by the employer.
- To accommodate the special situation of employers who, on occasion and for good cause, cannot remit participant contributions to pension plans within the fifteen business day limit, the DOL has established a procedure by which an employer may obtain an extension of the limit for an additional ten business days.
- For welfare plans, the maximum period for remittance of employee contributions to the plan was not changed, remaining ninety days after the day the contribution was withheld or received by the employer.

.06 Failure to remit, or untimely remittance of, participant contributions may constitute a prohibited transaction (either a use of plan assets for the benefit of the employer or a prohibited extension of credit) and, in certain circumstances, may constitute embezzlement of plan assets. Additionally, such information should be properly presented on the required Form 5500 supplemental schedule of nonexempt transactions with parties in interest. When plan administrators have failed to disclose this information, plan auditors should consider the effect on the independent auditors' opinion on the required supplemental schedule accompanying the plan's financial statements. When auditing contributions for defined contribution plans, auditors should consider inquiring about the timing of employee contribution remittances to the plan. Consideration should also be given to expanding the client representation letter to include specific prohibited transactions, such as the untimely remittance of employee contributions. (See paragraph A.14 for further discussion of the remittance rules, and paragraph 11.09 for a discussion of prohibited transactions, in the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans* (the Guide), with conforming changes as of May 1, 1997.)

.07 For collectively bargained plans, there is a special effective date of the later of February 3, 1997, or the first day of the plan year that begins after the end of any collectively bargained agreement in effect on February 3, 1997. To accommodate the special situation of employers who, for good cause, need additional time to complete their benefit system changes, the DOL has established a procedure by which an employer may obtain an extension of the effective date of up to ninety days. (For questions or further information, contact the Office of Regulations and Interpretations at the DOL at (202) 219-7461.)

.08 *PWBA Review of Plan Audits and Related Peer Review Developments.* The PWBA has established an ongoing quality review program to insure the quality of audit work performed by independent auditors in audits of plan financial statements that are required by the Employee Retirement Income Security Act of 1974 (ERISA). Practitioners deemed by the PWBA to have performed significantly substandard audit work are referred to either state licensing boards or the AICPA Professional Ethics Division for further investigation. As of December 31, 1996, 69 referrals had been made to state licensing boards and 286 referrals had been made to the AICPA Professional Ethics Division; of the 286, the Professional Ethics Division has resolved 223 cases. Of those resolved cases, 71 were referred to the AICPA's Trial Board or were settled without a Trial Board hearing, 110 resulted in letters of recommended corrective action,[1] 11 were found to contain no deficiencies, and 31 were closed for other reasons. Common deficiencies noted in the referrals included the following:

[1] Disciplinary actions available to the Professional Ethics Executive Committee include termination or suspension of membership in the AICPA (and possibly in the state society), publicizing such actions in the *CPA Letter*, completion of specified continuing professional education, review of additional work product, imposition of mandatory independent preissuance review of some or all financial statements and accountant's reports, and accelerated quality review. The action taken is determined by the severity of the violations of the Code of Professional Conduct.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Inadequate or no audit program or planning[2]
- Inadequate or no documentation of the auditor's understanding of the internal control structure
- Inadequate or no documentation supporting the audit work performed[3]
- Deficiencies in the auditor's report[4]
- Deficiencies in the note disclosures[5]

.09 Because ERISA holds plan administrators responsible for assuring that plans' financial statements are audited in accordance with generally accepted auditing standards (GAAS), deficient audit work can also expose plan administrators to significant penalties under ERISA section 502(c)(2). The PWBA will continue to conduct periodic working paper review, and, in time, will conduct another assessment of the level and quality of audit work performed by independent auditors.

.10 The AICPA, working with the PWBA, has made a concerted effort to improve the guidance and training available to auditors of employee benefit plans. Such efforts include issuing annual Audit Risk Alerts, conducting annual national conferences on employee benefit plans, developing continuing professional education courses and technical checklists, and issuing accounting and auditing pronouncements aimed at improving plan financial reporting and providing guidance for plan auditors. Also, the AICPA has consulted with the PWBA on additional actions the AICPA and PWBA can take to strengthen the quality of ERISA audits. These actions include communicating to AICPA members the findings noted in the PWBA's report and the importance of ERISA audits; developing additional audit programs, manuals, checklists, or other technical practice aids; strengthening additional technical support for auditors through the AICPA technical hotline; offering additional training programs on employee benefit plan audits; identifying ways the AICPA can work with state CPA societies to enhance training opportunities in employee benefit plan audits; and improving the AICPA's peer review process in ERISA audits.

.11 Also, the AICPA self-regulatory teams continue to be concerned about deficiencies noted on audits of employee benefit plans. The common GAAS and GAAP deficiencies noted by the AICPA are the same as those already listed in this section. In the spirit of protecting the public interest and in response to the high rate of noncompliance, both the SEC Practice Section (SECPS) and AICPA Peer Review Programs have special criteria for selecting audits of employee benefit plans for review during a peer review. The SECPS Peer Review Program requires that such audits be reviewed if the firm plans to continue performing these engagements. Effective for peer review years beginning on or after January 1, 1997, the AICPA Peer Review

---

[2] Such deficiencies included lack of a specific audit program tailored to the audit of employee benefit plans; failure to obtain or review relevant documents such as plan agreements, summary plan descriptions, annual reports, and investment advisor agreements; and failure to determine the operations of the plan or current developments affecting the plan.

[3] Such deficiencies included failure to perform sufficient audit work related to participant data, benefit payments, plan obligations, or all three. Also, in certain instances the auditor did not test the fair market valuations, investment transactions, or authorizations for investment transactions. In limited-scope engagements, the auditor did not obtain the proper certification from the bank or insurance company or the certification did not cover all of the plan assets. The audit program used by the auditor did not address the area of prohibited transactions. In the audit of multi/multiple-employer plans, the auditor performed inadequate work relating to the contributions received from contributing employers. In participant-directed plans, the auditor did not test the allocation of employee contributions to selected investment options.

[4] Such deficiencies included failure to reflect a departure from GAAP and failure to report on all the years presented.

[5] Such deficiencies included failure to disclose—
- The investments that represent 5 percent or more of the plan's net assets available for benefits.
- Information as to whether or not the plan has received a favorable tax determination ruling from the IRS.
- The priorities upon termination of the plan.
- The basis for determining contributions of the plan.
- The funding policy of the plan.
- Information regarding the method and significant assumptions used to determine the actuarial present value of the plan's accumulated plan benefits as required by Financial Accounting Standards Board (FASB) Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans* (AC Pe5).

Program will require reviewers to assess employee benefit plan audits at a higher level of peer review risk. If the firm performs such audits, and at least one is not selected for review, the reviewer will be required to document his or her justification for such omission in the summary review memorandum. Under both programs, peer review teams performing a review of employee benefit plan audits, must have experience in audits of employee benefit plans, as well as knowledge about current rules and regulations of ERISA.

.12 This is a serious effort by the PWBA and AICPA. Practitioners need to understand that severe consequences, including loss of membership in the AICPA and loss of license, can result from inadequate plan audits.

.13 *PWBA Reporting Compliance Program.* The PWBA continues its aggressive reporting compliance program to ensure that plan administrators comply with ERISA's reporting and disclosure requirements. In 1996 the PWBA rejected over fifty-one hundred filings, many for audit reporting deficiencies, and imposed over $64 million in civil penalties under ERISA section 502(c)(2), which provides for penalties of up to $1,000 per day against plan administrators who fail to file acceptable annual reports on a timely basis.

.14 In addition, the PWBA continues to actively identify and target both late filers and nonfilers. More than 980 late filers and nonfilers have been identified and assessed over $56 million in late filing and nonfiling penalties. The following penalties may be assessed by the DOL against late filers or nonfilers:

- *Late filers*—Plan administrators who voluntarily file annual reports for 1988 and subsequent reporting years after the due date and are subsequently identified by the PWBA will be considered late filers. They may be assessed $50 per day, per plan filing, for the period for which they failed to file timely.
- *Nonfilers*—Plan administrators who fail to file required reports for 1988 and subsequent reporting years and are subsequently identified by the PWBA will be considered nonfilers. They may be assessed a penalty of $300 per day, per plan filing, with the penalty continuing to accrue up to $30,000 per year for each plan year until a filing is submitted.

.15 The Internal Revenue Service (IRS) may also impose penalties, including a late filing penalty of $25 a day, up to $15,000 for not filing returns for certain plans of deferred compensation, certain trusts and annuities, and bond purchase plans.

.16 *PWBA Outreach and Customer Service Efforts.* PWBA continues to encourage auditors and plan filers to call its Division of Accounting Services at (202) 219-8794 with ERISA-related accounting and auditing questions. Questions concerning the filing requirements and preparation of Form 5500 should be directed to the Division of Reporting Compliance at (202) 219-8770. In addition to handling technical telephone inquiries, PWBA is involved in numerous outreach efforts designed to provide information to practitioners to help their clients comply with ERISA's reporting and disclosure requirements. Questions regarding these outreach efforts should be directed to the Office of the Chief Accountant at (202) 219-8818. Practitioners and other members of the public may also wish to contact PWBA at their website—*Internet: http://www.dol.gov/dol/pwba.* The website provides information on PWBA's organizational structure, current regulatory activities, and customer service and public outreach efforts.

.17 *Delinquent Filer Voluntary Compliance Program.* In April 1995, the PWBA initiated an ongoing Delinquent Filer Voluntary Compliance (DFVC) program designed to encourage filer compliance by allowing plan administrators who failed to file or who filed their Form 5500 Series annual reports late to apply for relief from full delinquency penalties. Auditors should be aware of this program if their clients' plan reports have not been filed or have been filed late and they qualify for this program.

.18 This program was designed to be less burdensome for small plans and to balance the PWBA's limited resources between enforcement and compliance objectives. Participation in the DFVC program constitutes a waiver by plan administrators to receive notice of assessment of civil penalties under ERISA section 502(c)(2) and to contest the DOL's assessment of the penalty amount. Participation in the DFVC program

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

does not preclude assessment of nonfiling or late-filing penalties by the IRS. The IRS has recommended that plan administrators participating in the DFVC program attach a reasonable-cause statement to their original Form 5500 Series filing with the IRS. In the case of Form 5500 filings which are filed on or before twelve months after the due date (without regard to any extensions), plan administrators who qualify for the DFVC program will be assessed a penalty of $50 per day, up to a maximum of $2,500 per Form 5500 filing. The maximum penalty for Form 5500-C filings who file under these circumstances is $1,000. In the case of Form 5500 filings which are filed more than twelve months after the due date (without regard to any extensions), plan administrators who qualify for the DFVC program will be assessed a penalty of $5,000 per filing. Form 5500-C filers will be assessed a penalty of $2,000 per filing.

.19 In addition, plan administrators of certain employee benefit plans for highly compensated individuals (known as *top hat* plans) and apprenticeship and training plans who missed their filing deadlines may submit statements and elect an alternative method of compliance in lieu of making annual report filings. Participation by these filers in the DFVC program will be assessed $2,500 per statement.

.20 To date, participation in the DFVC program by plan administrators has been successful. As of December 31, 1996, the DOL has received 5,607 annual report filings and 288 statements by top hat plans and apprenticeship and training plans, totaling $17.3 million in reduced penalties.

.21 Questions concerning the DFVC program should be directed to the PWBA's Division of Reporting Compliance at (202) 219-8770.

.22 *Revision of the Form 5500 Series and Related Regulations Under the Employee Retirement Income Security Act of 1974.* The Form 5500 Series of reports are filed annually by pension and health and welfare benefit plans to provide information about plan operations to plan participants and the regulatory agencies. Since 1976, the forms have been processed by the IRS which provides the data to the respective agencies.

.23 As part of the President's Pension Simplification proposal, the regulatory agencies are undertaking a comprehensive review of the annual return report forms in an effort to streamline the information required to be reported and the methods by which such information is filed and processed. The proposed revision to the Form 5500 Series is being coordinated among the DOL, the IRS, and the Pension Benefit Guaranty Corporation.

Legislative Developments

.24 *Pension Audit Legislation.* Several bills aimed at repealing the limited-scope audit exemption that currently exists under Section 103(a)(3)(C) of the ERISA are expected to be introduced in the 105th Congress. The DOL and the U.S. General Accounting Office have recommended that Congress repeal the limited-scope audit exemption that, according to the DOL, is utilized in about half of the approximately 70,000 audits of employee benefit plans subject to ERISA. The AICPA supports repeal of the limited-scope audit exemption. Further, the proposed legislation would require auditors to report certain significant events to the DOL and to establish additional educational and quality control review requirements for plan auditors. As of the date of this Alert, two bills (S.14, Retirement Security Act of 1997, and H.R.83, Comprehensive Pension and Retirement Security Act of 1997) have been introduced. Senator Jim Jeffords (R-VT), chair of the Senate Labor and Human Resources Committee, and other Senate and House members are expected to introduce pension audit legislation. The DOL is also expected to have its recommendations introduced in proposed legislation. Pension audit legislation, if enacted, would be effective for plan years beginning after the date of enactment of the legislation.

.25 *Other Legislation Affecting Plans.* Employee benefit plan issues continue to receive emphasis by Washington policy makers and regulators. 1996 was a busy year for legislation affecting employee benefit plans. Following is some of the legislation passed in 1996:

- The *Health Insurance Portability and Accountability Act of 1996* (HIPAA) was signed into law on August 21, 1996. HIPPA includes important new protections for an estimated 26 million Americans who move from one job to another, who are self-employed, or who have preexisting medical conditions, and places requirements on employer-sponsored group health plans, insurance companies, and health maintenance organizations (HMOs).
- The *Newborns' and Mothers' Health Protection Act of 1996* (NMHPA) was signed into law on September 26, 1996. NMHPA includes important new protection for mothers and their newborn children regarding the length of the hospital stays following the birth of a child. The requirements under NMHPA apply to group health plans, insurance companies, and HMOs for plan years beginning on or after January 1, 1998.
- The *Mental Health Parity Act of 1996* (MHPA) was signed into law on September 26, 1996. MHPA provides for parity in the application of limits to certain mental health benefits. Under MHPA, group health plans, insurance companies, and HMOs will no longer be allowed to set annual or lifetime limits on mental health benefits that are lower than any such limits for medical and surgical benefits. Generally, these requirements apply to group health plans for plan years beginning on or after January 1, 1998, that meet certain requirements.

Further information regarding the above legislation can be obtained from the Pension and Welfare Benefits Administration (PWBA), U.S. Department of Labor, 200 Constitution Avenue, N.W., Room N-5625, Washington, D.C. 20210, 202/219-8776 (*Internet: http://www.dol.gov/dol/pwba*).

Audit and Accounting Developments

Audit Issues and Developments

.26 *Multiemployer Health and Welfare Benefit Plan Accounting for Postretirement Benefit Obligations.* Employee health and welfare benefit plans that prepare financial statements in accordance with GAAP must follow the accounting and reporting requirements set forth in chapter 4 of the AICPA Audit and Accounting Guide, *Audits of Employee Benefit Plans*, which incorporates the guidance of SOP 92-6. SOP 92-6 is effective for all single-employer plans, and became effective for multiemployer plans for plan years beginning after December 15, 1995.

.27 Among other requirements, SOP 92-6 required plans that provide postretirement benefits to include in their financial statements the amount of the accumulated postretirement benefit obligation representing the actuarial present value of all future benefits attributed to plan participants' services rendered to date. Because accumulated benefit obligations are not reported on Form 5500 submitted to the DOL, plans adopting SOP 92-6 should include a note to their financial statements reconciling the amounts reported in the financial statements to amounts reported on Form 5500.

.28 As noted in the Regulatory Developments section of this alert, the DOL will not enforce the postretirement benefit obligation disclosure requirements in SOP 92-6 for multiemployer health and welfare benefit plans for plan years 1996 and 1997. If a plan does not adopt all of the provisions of SOP 92-6, including presenting the postretirement benefit obligation amount in the statement of plan's benefit obligations and statement of changes in plan's benefit obligations, which is required to fairly present the plan's financial statements in conformity with GAAP, the auditor should consider the effect of this departure from GAAP on his or her report. AICPA Statement on Auditing Standards (SAS) No. 58, *Reports on Audited Financial Statements* (AU section 508), describes the circumstances that may require a qualified or adverse opinion when the financial statements contain departure from GAAP (AU section 508.35–.60). A qualified opinion is expressed when the auditor believes, on the basis of his or her audit, that the financial statements contain a departure from GAAP, the effect of which material, and he or she has concluded not to express an adverse

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

opinion. An auditor should express an adverse opinion when, in the auditor's judgment, the financial statements taken as a whole are not presented fairly in conformity with GAAP.

.29 *Trend Toward Outsourcing and the Use of SAS No. 70 Reports.* With the trend toward daily valuation of 401(k) plans, more benefit plans are using service providers to execute transactions and maintain accountability on behalf of the plan administrator. For example, outside service organizations such as bank trust departments, data processing service bureaus, insurance companies, and benefits administrators may keep records and process benefit payments. Often the plan does not maintain independent accounting records of transactions executed by the service provider. For example, many plan sponsors no longer maintain participant enrollment forms detailing the contribution percentage and the allocation by fund option. In these situations, the auditor may not be able to obtain a sufficient understanding of internal control relevant to transactions executed by the service organization to plan the audit and to determine the nature, timing, and extent of testing to be performed without considering those components of internal control maintained by the service organization. This understanding can be efficiently achieved by obtaining and reviewing a report prepared in accordance with SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324), for the service organization that addresses the controls at the service organization that are relevant to the audit of the plan.

.30 If the independent auditor determines that the service organization had effective controls in place for processing plan transactions during the reporting period, the auditor generally would conclude that it is not necessary to visit or perform additional procedures at the service organization. However, in some situations, the auditor may conclude that additional audit work should be performed at the service organization. Following are some examples of such situations. (See chapter 6 of the Guide for audit guidance on the situations listed below.)

- The service organization issued a SAS No. 70 (AU section 324) report describing the controls placed in operation ("Type I" report) and the auditor wishes to determine whether to reduce the assessed level of control risk at the service organization.
- The service organization's SAS No. 70 (AU section 324) report covers a reporting period different from the plan's fiscal year.
- The service organization's SAS No. 70 (AU section 324) report covers only some of the services used by the plan (for example, the report might cover custodial services but not allocation services) or the report does not cover activities performed by subservice organizations.
- The service organization's SAS No. 70 (AU section 324) report identifies instances of noncompliance with the service organization's controls.

.31 If the SAS No. 70 (AU section 324) report is unavailable, the auditor should consider other appropriate procedures to obtain sufficient evidence to achieve the audit objectives. For example, if participant enrollment forms are unavailable from the plan sponsor, the auditor may wish to confirm the information directly with the participants. Alternatively, the auditor could consider requesting the enrollment forms from the service provider or visiting the service provider to perform the necessary testing.

.32 *Auditing in a Mutual Fund Environment.* Many employee benefit plans, particularly 401(k) plans and profit sharing plans, hold investments in mutual funds (also known as *registered investment companies*). Typically, a plan holds units of the mutual funds which are valued at quoted market prices that may fluctuate daily, representing the net asset value of the units held by the plan.

.33 When auditing mutual fund investments, difficulties are often encountered with daily valuations, participant-directed automated transactions (for example, voice-activated telephone systems), and other "paperless transactions." In such circumstances, the plan is often unable to maintain independent records of such transactions, necessitating that the auditor obtain an understanding of internal control of the service

organization in order to plan the audit in accordance with SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55* (AU section 319). This understanding can be efficiently achieved by obtaining and reviewing a report prepared in accordance with SAS No. 70 (AU section 324) on the relevant controls of the service organization (typically the record keeper, which in certain circumstances may be a service division of the mutual fund organization). (See paragraphs 6.07 through 6.14 in the Guide for a further discussion of SAS No. 70 [AU section 324].) The auditor should consider the areas and findings addressed in the SAS No. 70 (AU section 324) report, and whether the SAS No. 70 (AU section 324) report is a Type I or Type II report, to determine the extent of substantive procedures to perform.

.34 Many of the audit procedures discussed in chapter 7 of the Guide are applicable for mutual funds. Such procedures may include the following:

1. Confirming transactions (contributions, transfers, and withdrawals) account balances, or both, with individual participants
2. Tracing contributions and withdrawals from the plan record keeper's records to the mutual fund's activity statements for the applicable time period
3. Confirming directly with the mutual fund the number of units of participation held by the plan
4. Testing the fair value of the investments in mutual funds by agreeing per-unit values as of year end to market quotations
5. Obtaining a copy of the mutual fund's recent financial statements (or alternative source of yield information, such as business journals) and analytically comparing for reasonableness the information in the mutual fund's financial statements to the information recorded by the plan for its units of participation, including market values and the net change in fair value of investments (that is, realized and unrealized gains and losses) for the period under audit. The mutual fund's financial statements need not cover the exact period covered by the plan's financial statements; they should, however, be sufficiently recent to satisfy the plan auditor's objectives (The financial statements of mutual funds are typically readily available.)

.35 *Synthetic GICs.* Many plans hold guaranteed investment contracts (GICs) in their investment portfolio. Normally issued through the general account, in its simplest form a GIC is a contract between an insurance company and a plan that provides for a guaranteed return on principal invested over a specified time period. For defined contribution plans, one variation of a GIC is commonly referred to as a *synthetic GIC*. A synthetic GIC is an investment contract that simulates the performance of a traditional GIC through the use of financial instruments. A key difference between a synthetic GIC and a traditional GIC is that the plan owns the assets underlying the synthetic GIC. (With a traditional GIC, the plan owns only the investment contract that provides the plan, with a call on the contract issuer's assets in the event of default.) Those assets may be held in a trust owned by the plan, and typically consist of government securities, private and public mortgage-backed and other asset-backed securities, and investment-grade corporate obligations. To enable the plan to realize a specific known value for the assets if it needs to liquidate them to make benefit payments, synthetic GICs utilize a benefit-responsive "wrapper" contract issued by a third party that provides market and cash flow risk protection to the plan. (The third-party issuer of the wrapper is an entity other than the plan sponsor, administrator, or trustee, and could be the entity that issues the investment contract.) Synthetic GICs are unallocated and are to be included as plan assets at their contract or fair values, as appropriate. (See paragraphs 3.17 and 4.24 of the Guide for a further discussion of measuring and valuing investment contracts.) Because the assets underlying a synthetic GIC are owned by the plan, those assets and the wrapper should be separately valued and disclosed in the Form 5500 *Schedule of Assets Held for Investment Purposes.* The value of the benefit responsive wrapper would be the difference between the fair value of the underlying trust assets and the contract value attributable by the wrapper to those assets. (See example 5 in the appendix to SOP 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans*, found in appendix I, paragraphs I.12 and I.13, in the Guide, for a discussion of synthetic GICs.)

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

.36 For defined contribution plans for which the "wrapper" is benefit responsive, the auditing procedures to be applied to synthetic GICs should include tests of the individual securities or other investments that constitute the assets underlying a synthetic GIC and tests of the related wrapper contract to ascertain the fairness of the values of each to be disclosed by the plan in the Form 5500 *Schedule of Assets Held for Investment Purposes.*

.37 *Limited-Scope Audit Exemption.* ERISA section 103(a)(3)(C) allows auditors to limit the scope of their testing of investment information prepared and certified by a qualified trustee or custodian, such as a bank, trust company, or similar institution or an insurance company. However, this limited-scope audit exemption does not apply to information prepared and certified by broker-dealers and investment companies or to noninvestment information, such as benefit payments, employer-employee contributions, loans, and receivables.

.38 Auditors should also be aware that the limited-scope audit exemption does not apply to assets held by a broker-dealer or an investment company unless the company owns a subsidiary bank that can certify the investment information. The exemption also does not apply to investment information other than that certified by a qualified trustee or custodian or to other noninvestment information. Plan investments not held by a qualified trustee or custodian, and all noninvestment related information (for example, contributions receivable, benefits paid, other expenses), should be subjected to full-scope audit procedures. The auditor's responsibilities in limited-scope engagements are discussed in detail in paragraphs 7.51 and 7.52 of the Guide.

.39 *Limited-Scope Audits (When Only a Portion of the Investments Are Certified).* Plan investments not held by a qualified trustee or custodian that meets the limited-scope exemption criteria set forth in the DOL regulations (see paragraphs A.57 and A.58 of the Guide, for a discussion of such criteria) should be subjected to appropriate audit procedures. Plans may hold investment assets of which only a portion are covered by certification by a qualified trustee or custodian. In that case, the balance of the investments are not eligible for the limited-scope exemption and should be subjected to auditing procedures by the plan auditor. In these circumstances, the limited-scope audit report would be required if the plan's assets that are not audited (that is, those assets covered by the trustee or custodian's certification) are material to the plan's financial statements taken as a whole. See paragraph 13.26 of the Guide for limited-scope reporting guidance.)

.40 *Auditing Funded Welfare Plans.* A trust may be established to hold the assets of an employee welfare benefit plan; it may or may not be tax-exempt. A common form of tax-exempt trust is a an Internal Revenue Code (IRC) Section 501(c)(9) trust, referred to as a voluntary employee beneficiary association (VEBA). The audit requirement for a health and welfare plan that utilizes a VEBA trust applies to the plan, not to the VEBA trust. VEBA trusts generally have no language covering the plan's operations. The governing instrument is limited to the investment and management of plan assets. Disbursements are made as authorized by the plan administrator. Operational attributes of the related plan must still be audited in accordance with chapter 4 of the Guide. However, the tax status is unique to the VEBA and, for the trust to be tax-exempt, the tax requirements of the IRC must be satisfied.

.41 Paragraph 4.09 of the Guide explains that a VEBA is one of several arrangements available to hold plan assets of an employee welfare plan. Key considerations in auditing VEBAs arise from the distinct tax regulations associated with VEBAs, and often assets of several welfare plans are commingled into a single VEBA.

.42 The audit and reporting issues for a VEBA that holds the assets of a single plan of a single sponsor are discussed fully in chapter 4 of the Guide. When the VEBA holds the assets of several plans of a single employer, additional audit issues are present. If the VEBA qualifies as a master trust, the master trust rules discussed in paragraph 4.09 of the Guide will apply. In cases in which the underlying welfare plans have no assets other than those held by the VEBA, Form 5500 schedules are generally attached to the master trust filing and need not be included with the separate filing of each participating plan. (See the instructions to

Form 5500 for guidance on master trust filing information.) If the VEBA does not qualify as a master trust, Form 5500 schedules should be prepared for each plan. (See appendix A of the Guide for a discussion of Form 5500 schedules.)

.43 *Claims Incurred but not Reported.* Paragraph 39 of SOP 92-6 requires that self-funded health and welfare benefit plans measure the cost of claims incurred but not reported (IBNR) at the present value, as applicable, of the estimated ultimate cost to the plan of settling the claims (paragraph 4.43 of the Guide). However, financial statement preparers and auditors often are unclear about what the estimated ultimate cost should include. In some cases, plans may only be using a "lag" approach (recording known amounts that relate to the period covered by the financial statements that are reported subsequent to year end but prior to the issuance of the financial statements) to estimate the ultimate cost of IBNR claims and without considering any future obligations of the plan relating to conditions that existed as of the end of the period but that had not been reported prior to the issuance of the financial statements.

.44 SOP 92-6 states that the estimated ultimate cost of IBNR claims should reflect the plan's obligation to pay claims to or for participants, regardless of status of employment, beyond the financial statement date pursuant to the plan provisions or regulatory requirements. (See paragraph 4.43 in the Guide.) For example, a participant contracts a terminal disease or has a catastrophic accident in December. The claim is reported to the plan subsequent to the plan's calendar year end. Treatment is ongoing and is expected to continue throughout the next year. The plan does not require any return to work and fully covers all services. The actuarial present value of the obligation for all future payments to be made as of the plan year end (December) should be included in the IBNR calculation.

.45 Auditors should be aware that the calculation of IBNR amounts is often quite complex and may require the use of actuarial estimates. In such cases, the auditor should discuss with the plan administrator the need for the plan to engage an actuary and should consider the guidance in SAS No. 73, *Using the Work of a Specialist* (AU section 336).

New Pronouncements[6]

.46 There are no new auditing standards affecting 1996 plan audits; however early adoption of the following pronouncements is permitted.

.47 *SAS No. 78.* In December 1995 the Auditing Standards Board (ASB) issued SAS No. 78 (AU section 319), which revises the definition and description of internal control contained in the SASs to recognize the definition and description contained in *Internal Control—Integrated Framework* (the COSO report), published by the Committee of Sponsoring Organizations of the Treadway Commission. SAS No. 78 (AU section 319) is effective for audits of financial statements for periods beginning on or after January 1, 1997, with earlier application permitted. In March 1997 the ASB issued conforming changes to SAS No. 70 (AU section 324) to reflect the issuance of SAS No. 78 (AU section 319) and to conform the SAS No. 70 (AU section 324) reports to COSO terminology.

.48 *SAS No. 82.* In February 1997 the ASB issued SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU section 316), which describes the auditor's responsibilities relating to fraud in a financial statement audit and provides guidance on what should be done to meet those responsibilities. SAS No. 82 (AU section 316) supersedes SAS No. 53,[7] *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU

[6] Practitioners should also be aware that SAS No. 80, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter (AU section 326), was issued in December 1996 and is effective for engagements beginning on or after January 1, 1997; and SAS No. 81, *Auditing Investments* (AU section 332), was issued in December 1996 and is effective for audits of financial statements for periods ending on or after December 15, 1997.

[7] SAS No. 82 (AU section 316) also amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312), and SAS No. 1, sections 110, *Responsibilities and Functions of the Independent Auditor,* and 230, *Due Care in the Performance of Work* (AU sections 110 and 230).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

section 316A), and is effective for audits of financial statements for periods ending on or after December 15, 1997. Early application is permitted. (See the appendix, "Fraud Risk Factors for Employee Benefit Plans" [paragraph .62], in this Alert for further guidance on SAS No. 82 [AU section 316].)

Accounting Issues and Developments

.49 *401(h) Plans.* A number of employers have amended defined benefit pension plans that they sponsor to provide for the payment of certain health benefits for retirees, their spouses, and dependents in addition to the normal retirement benefits. The IRC permits defined benefit pension plan sponsors to fund (subject to certain restrictions and limitations) all or a portion of their postretirement medical obligations through a 401(h) account in their defined benefit pension plans. Contributions to a 401(h) account may be used only to pay health benefits. Auditors should be aware that the plan assets set aside in a 401(h) account are not assets available to pay pension benefits and should not be characterized as such in the plan's financial statements.

.50 The AICPA Employee Benefit Plans Committee currently has an SOP project under way to provide guidance on the accounting for and disclosure of 401(h) features of both defined benefit pension plans and health and welfare benefit plans. The committee expects to issue an exposure draft by the end of 1997. This exposure draft will be a three-part SOP that will also include a proposed SOP on accounting for and reporting on certain health and welfare benefit plan transactions, and a proposed SOP on accounting for and reporting of certain employee benefit plan investments (including amending paragraph 3.28*k* of the Guide). This project would not affect plan accounting and reporting for 1996 plan year-end reporting; however, auditors should be alert for further developments on this project.

.51 *Health and Welfare Benefit Plans.* In August 1992 the AICPA Employee Benefit Plans Committee issued SOP 92-6, which clarified several accounting and reporting requirements set forth in chapter 4 of the Guide and updated this chapter to incorporate Statements issued by the FASB.

.52 SOP 92-6 is now effective for all employee benefit plans. It was effective for single-employer plans with more than five hundred participants for plan years beginning after December 15, 1992; for single-employer plans with no more than five hundred participants for plan years beginning after December 15, 1994; and for multiemployer plans for plan years beginning after December 15, 1995. When a plan adopts SOP 92-6, the plan must adopt it in its entirety.

.53 Accounting changes adopted to conform to the provisions of the SOP should be made retroactively. When there has been a change in accounting principles that has a material effect on the comparability of the plan's financial statements, SAS No. 58, *Reports on Audited Financial Statements* (AU section 508), states that auditors should refer to the change in an explanatory paragraph of their report. Because ERISA requires comparative statements of net assets available for plan benefits, it will be necessary to restate the prior year's statement of net assets in the year of adoption in an ERISA audit to comply with the provisions of the SOP. In addition, because accumulated benefit obligations are not reported on Form 5500, plans should include a note to their financial statements reconciling the amounts reported in the financial statements to amounts reported on Form 5500, as described in paragraphs 12.21 and A.51 of the Guide.

.54 If a plan does not adopt the provisions of SOP 92-6, including presenting a statement of plan benefit obligations and a statement of changes in plan benefit obligations, which are required to present fairly the plan's financial statements in conformity with GAAP, the auditor should consider the effect of this departure from GAAP on his or her report. SAS No. 58 (AU section 508) describes the circumstances that may require a qualified or adverse opinion when the financial statements contain a departure from GAAP (specifically AU section 508.35–.60). A qualified opinion is expressed when the auditor believes, on the basis of his or her audit, that the financial statements contain a departure from GAAP, the effect of which is material and he or she has concluded not to express an adverse opinion. An auditor should express an adverse opinion when, in the auditor's judgment, the financial statements taken as a whole are not presented fairly in conformity with GAAP.

.55 Some plan administrators prepare plan financial statements on a modified cash basis or an other comprehensive basis of accounting (OCBOA) rather than in conformity with GAAP. Paragraph 5 of SOP 92-6 (see also paragraph 4.05 of the Guide), states that the presentation of a plan's benefit obligation information in GAAP-basis financial statements, as required by paragraph 20 of SOP 92-6, (see also paragraph 4.20 of the Guide), is consistent with the disclosures required in OCBOA financial statements (as defined by the requirements of financial reporting to the DOL). If such disclosures are not made, the auditor should comment in his or her report on the lack of such disclosures and should express a qualified or an adverse opinion on the financial statements. (See paragraphs 9 and 10 of SAS No. 62, *Special Reports* [AU section 623.09 and .10], for guidance on evaluating the adequacy of disclosures prepared in conformity with an other comprehensive basis of accounting. See also paragraph 13.22 of the Guide for further guidance on non-GAAP-basis financial statements.)

.56 *Valuation of Insurance and Investment Contracts.* In September 1994 the AICPA Employee Benefit Plans Committee issued SOP 94-4, which provides guidance on how those plans should report investment contracts issued by insurance companies, banks, thrift institutions, and others. In addition, SOP 94-4 provides guidance for determining the fair value of investment contracts held by all types of plans. SOP 94-4 was effective for financial statements for plan years beginning after December 15, 1994, except that the application of the SOP to investment contracts entered into before December 31, 1993, was delayed to plan years beginning after December 15, 1995.

.57 As discussed in paragraph 4 of SOP 94-4, certain fully benefit responsive investment contracts that are held by health and welfare plans and defined contribution pension plans may be reported at contract value. In the current economic environment, some of those contracts may have been issued by what are now troubled insurers. In those cases, the auditor should be aware that continuing to carry the assets at contract value may not be appropriate, because the plan may not recover the entire contractual amount. When addressing contracts issued by troubled insurers, auditors should consider the guidance in FASB Statement No. 5, *Accounting for Contingencies* (AC C59) and SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties.*

New Pronouncements

.58 *FASB Statement No. 126.* In December 1996 FASB issued FASB Statement No. 126, *Exemption from Certain Required Disclosures about Financial Instruments for Certain Nonpublic Entities* (AC F25). FASB Statement No. 126 (AC F25) amends FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), to make the disclosures about fair value of financial instruments prescribed in FASB Statement No. 107 (AC F25) optional for (1) entities that are nonpublic entities, (2) entities whose total assets are less than $100 million on the date of the financial statements, and (3) entities that have not held or issued any derivative financial instruments, as defined in FASB Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), other than loan commitments, during the reporting period. FASB Statement No. 126 (AC F25) is effective for fiscal years ending after December 15, 1996, with earlier application permitted for financial statements not previously issued. Plans filing a Form 11-K under the Securities Exchange Act of 1934 (the 1934 Act) with the Securities Exchange Commission would not meet this disclosure exemption even when plans elect to file ERISA financial statements in lieu of financial statements filed in accordance with the 1934 Act filing requirements.

Appendix

Fraud Risk Factors for Employee Benefit Plans

The following section is based on material from the AICPA publication *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82.*

Instructions: Statement on Auditing Standards (SAS) No. 82 (AU section 316) describes the auditor's responsibilities relating to fraud in a financial statement audit and provides guidance on what should be done to meet those responsibilities. There are two types of misstatements relevant to the auditor's consideration of fraud in a financial statement audit: material misstatements arising from fraudulent financial reporting, and material misstatements arising from misappropriation of assets. Misstatements of fraudulent financial reporting refer to intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Misstatements arising from misappropriation of assets involves the theft of an entity's assets, in which the effect of the theft is that the financial statements are not presented in conformity with generally accepted accounting principles. Although fraud usually is concealed, the presence of risk factors or other conditions may alert the auditor to a possibility that fraud exists. SAS No. 82 (AU section 316) describes fraud and its characteristics in more detail and requires the auditor to specifically assess the risk of material misstatement due to fraud and provides categories of fraud risk factors that should be considered in the auditor's assessment. The SAS (AU section 316) also provides guidance on how the auditor should respond to the results of the assessment and on the evaluation of audit test results as they relate to the risk of material misstatement due to fraud. In addition, the SAS (AU section 316) describes related documentation requirements and provides guidance regarding the auditor's communication about fraud to management, the audit committee, and others.

Fraud risk factors may be identified throughout the entire engagement process (for example, during client acceptance or continuance procedures, planning, fieldwork, or review). Other conditions, which may support or alter an auditor's judgment about the risk of material misstatement due to fraud, may be identified during audit fieldwork. The following fraud risk factors and other conditions are intended to help auditors of employee benefit plans tailor the five broad risk factor categories defined in SAS No. 82 (AU section 316). This list is intended to supplement the risk factors, other conditions, and related guidance found in the SAS (AU section 316). (It is a companion to but not a substitute for the guidance in the SAS [AU section 316].)

Also, the presence of these example risk factors and other conditions identified during the engagement do not necessarily indicate the existence of fraud.

When fraud risk factors or other conditions are found to be present during the engagement, professional judgment should be exercised when assessing their significance and relevance. As the auditor assesses the risk of material misstatement, it is important to keep in mind that the presence of a risk factor or condition should not be considered in isolation, but rather in combination with other risk factors and conditions or mitigating circumstances.

The Auditor Responses sections include some suggested alternative procedures to consider when fraud risk factors and other conditions are present. Like the fraud risk factors and conditions, these suggestions supplement the responses already described in SAS No. 82 (AU section 316).

The following list should be used in conjunction with SAS No. 82 (AU section 316) because not every example risk factor in paragraphs 17 and 19 of the SAS (AU section 316.17 and .19) have been tailored, interpreted, or reprinted here and some of the example risk factors not reprinted may be applicable to the engagement.

Fraudulent Financial Reporting

An auditor's interest specifically relates to fraudulent acts that cause a material misstatement of financial statements. Some of the following factors and conditions will be present in entities where the specific circumstances *do not present a risk of material misstatement.* Also, specific controls may exist which mitigate the risk of material misstatement due to fraud, even though risk factors or conditions are present. When identifying risk factors and other conditions, you should assess whether those risk factors and conditions, individually and in combination, present a risk of material misstatement of the financial statements.

A. RISK FACTORS AND OTHER CONDITIONS RELATING TO MANAGEMENT CHARACTERISTICS AND INFLUENCE OVER THE CONTROL ENVIRONMENT

- *A motivation for management to engage in fraudulent financial reporting.*
  - — Senior management of the plan sponsor appoints itself trustee of the plan and uses that position to benefit the plan sponsor—for example, uses the plan's money to do speculative investing or to support the company through buying employer assets or supporting a supplier.
- *A failure by management to display and communicate an appropriate attitude regarding internal control and the financial reporting process.*
  - — Failure by management to have adequate valuations performed, including actuarial valuations.
  - — The plan administrator lacks an understanding of the major regulations that govern the plans (ERISA, IRS Code, and so forth).
- *Management displaying a significant disregard for regulatory authorities.*
  - — Management displaying a significant disregard toward compliance with ERISA, IRS Code, and Department of Labor regulations.
  - — The plan administrator or trustees have been investigated by the Department of Labor or IRS for fiduciary violations in operating the plan.
- Lack of management candor in dealing with plan participants, claimants, actuaries, and auditors regarding decisions that could have an impact on plan assets, including restructuring or downsizing arrangements.
- The plan has participated in a voluntary compliance program in conjunction with the IRS or DOL. (Such participation could be an indication of ineffective management of the plan or controls over the plan.)

B. RISK FACTORS AND OTHER CONDITIONS RELATING TO INDUSTRY CONDITIONS

- *Declining industry, with increasing business failures and significant declines in customer demand.*
  - — The plan sponsor is in an industry that is declining in stability. This could lead to difficulties in meeting financial commitments to the plan, including contributions.
- The plan holds employer securities and the employer is in an industry in which the value of the securities is subject to significant volatility or is not readily determinable.
- The plan has limited investment options or the plan has invested significantly in employer securities or other employer assets (for example, owning franchise stores).

C. RISK FACTORS AND OTHER CONDITIONS RELATED TO OPERATING CHARACTERISTICS AND FINANCIAL STABILITY

- *Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.*

— Indications of significant or unusual parties-in-interest transactions not in the ordinary course of operations.

— Excessive or unusual transactions with the plan sponsor/administrator.

D. AUDITOR RESPONSES

In addition to the sample responses presented in SAS No. 82 (AU section 316), an auditor in an employee benefit plan audit engagement may want to consider the following responses.

- *Investment Results.* Obtain the requisite investment information directly from the plan trustee, and obtain the same information from the party named as having discretion to make investment decisions, such as the plan administrator, the plan's investment committee, or the plan's investment advisor (the directing party) and review and reconcile the directing party's reports (investment position and activity) with those of the trustee.
- *Claim Reserves.* Confirm, with third parties, the historical and statistical information that is being used to prepare the reserves. Review the qualifications of the individuals preparing the reserves.
- Apply the following procedures to fully understand a party-in-interest transaction:[1]
  - — Confirm transaction amount and terms, including guarantees and other significant data, with the other party or parties to the transaction.
  - — Inspect evidence in possession of the other party or parties to the transaction.
  - — Confirm or discuss significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.
  - — Refer to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
  - — With respect to material uncollected balances, guarantees, and other obligations, obtain information about the financial capability of the other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies. The auditor should decide on the degree of assurance required and the extent to which available information provides such assurance.
- For single-employer plans, obtain the most recent financial statements of the plan sponsor and review for indicators of financial difficulties. For multiple-employer plans, obtain an understanding of the industry.

Misappropriation of Assets

An auditor's interest specifically relates to fraudulent acts that cause a material misstatement of financial statements. Some of the following factors and conditions will be present in entities where the specific circumstances *do not present a risk of material misstatement.* Also, specific controls may exist which mitigate the risk of material misstatement due to fraud, even though risk factors or conditions are present. When identifying risk factors and other conditions, you should assess whether those risk factors and conditions, individually and in combination, present a risk of material misstatement of the financial statements.

A. RISK FACTORS AND OTHER CONDITIONS RELATED TO CONTROLS

- *Lack of appropriate management oversight.*

[1] See chapter 11 of the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans* for further audit guidance.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

— Lack of review of investment transactions by trustees, sponsor, or investment committee.

- *Lack of appropriate segregation of duties or independent checks.*
  - — Lack of independent preparation and review of reconciliations of trust assets to participant accounts or accounting records of the plan.
  - — Lack of segregation of duties related to benefit payments, contributions, investment transactions, and loans.
  - — No independent records of the plan are maintained to enable the plan administrator to periodically check the information to the custodian.
- *Lack of appropriate system of authorization and approval of transactions.*
  - — Insufficient approval over transactions with parties-in-interest that could lead to prohibited transactions.
- *Lack of timely and appropriate documentation for transactions.*
  - — Trustee does not prepare required supplemental information (for example, historical cost records not maintained.)
- Lack of controls surrounding benefit payments, including the termination of payments in accordance with plan provisions.
- Lack of appropriate segregation of plan assets from the sponsors assets or inappropriate access to plan assets by plan sponsor.
- SAS No. 70 (AU section 324) report indicating a lack of adequate controls at an outside service provider.
- Use of a service provider that does not provide a SAS No. 70 (AU section 324) report.
- Unreconciled differences between net assets available for benefits per the trustee/custodian records and the recordkeeping amounts for a defined contribution plan (unallocated assets or liabilities).

B. AUDITOR RESPONSES

In addition to the sample responses presented in SAS No. 82 (AU section 316), an auditor in an employee benefit plan audit engagement may want to consider the following responses.

- Review reconciliations of the assets held by the trust with participant records throughout the year. Review any reconciling adjustments for propriety.
- Review the account activity for participants who have access to plan assets or assist in administering the plan.
- The auditor may have concluded that a risk of material misstatement exists with regard to a lack of a qualified outside service provider acting as trustee, custodian, or both for plan assets. In these instances, the auditor should physically inspect assets and examine other evidence relating to ownership. In addition, the fair value of investments should be tested by reference to market quotations or other evidence of fair value in accordance with SAS No. 57, *Auditing Accounting Estimates* (AU section 342).
- The auditor may have concluded that a risk of material misstatement exists with regard to unreconciled differences between net assets available for benefits per the trustee/custodian records and the recordkeeping amounts for a defined contribution plan. If the trustee/custodian records are higher than the recordkeeping totals (excluding accrual adjustments), an unallocated asset exists that should be allocated to participant accounts. If the trustee/custodian records are lower than the recordkeeping totals (excluding accrual adjustments), plan assets may have been misappropriated, requiring

further investigation by the auditor (for example, reconciliation of monthly trustee/custodian activity to the record keeper).

- The auditor may have concluded that a risk of material misstatement exists with regard to remittance of employee contributions for a defined contribution plan with a sponsor experiencing cash flow problems. In this instance, the auditor may perform a reconciliation of total employee contributions per the payroll register to the recordkeeping report for the year. In addition, the auditor may select certain months to test for the timely remittance of employee contributions in accordance with regulations.
- The auditor may have concluded that a risk of material misstatement exists with regard to expenses being paid by an overfunded defined benefit plan on behalf of an underfunded plan. In this instance, the auditor might select expense amounts paid by the overfunded plan and trace them to specific invoices, noting that the expense pertained to the proper plan. Alternatively, the auditor could ask to review expense invoices pertaining to the underfunded plan paid by the company to make sure the overfunded plan did not pay them.
- Review the timeliness of contributions from the plan sponsor throughout the year.
- Compare canceled checks to disbursement records. Where benefits are paid by check disbursements, compare the signature on the canceled check to participant signatures on other employee documents.
- Confirm benefit payments with participants or beneficiaries.
- Confirm medical bills directly with service providers.

Fraud Examples

Listed below are actual instances of fraudulent activity on employee benefit plan engagements. They are presented to help auditors become better acquainted with fraudulent activities. Although none of these particular examples resulted in a material misstatement of the financial statements, similar fraudulent activity at other benefit plans may cause a material misstatement of the financial statements, depending upon the circumstances.

- A pension plan notifies participants who have reached the age of seventy and one half that they must, under law, take their distributions from the plan. An employee of the company is responsible for notifying the participants and providing distribution forms. Once the forms are completed, they are provided to a supervisor for approval and submitted to the insurance company (custodian) for payment. For all participants reaching the age of seventy and one half, the employee decides to forge the distribution forms and not notify the participants of the distributions. The forged forms are provided to the supervisor, who approves them, and the insurance company is directed to make lump sum distributions via wire transfers into an account set up with the employee's name as a relative for the beneficiary. The fraud continues for several months until a participant notifies the supervisor that he would like to receive his distribution, and the supervisor notices that a lump sum was already distributed.
- A long-time employee at a company is responsible for reporting loan repayments (for loans not paid off by automatic payroll deduction) to the record keeper by providing copies of the face of the repayment checks to the record keeper. The employee is also a participant in the plan and currently has a $20,000 loan from her account. The employee decides to take a second loan but, under plan provisions, cannot do it until her first loan is paid off. The employee makes out a check to pay off the $20,000 loan from her personal account and provides a copy of the check to the record keeper. A second loan for $25,000 is taken out for the employee. However, the first loan is never paid off because the employee never deposits the $20,000 check into the plan. Cash reconciliations continually show immaterial unreconciled items that are not followed up in a timely manner and the fraud is not discovered for months.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- A company has two defined benefit plans; one is overfunded and one is underfunded. In past years, administrative expenses were paid from each plan's assets. However, this year the company decides it will pay the expenses for the underfunded plan. The overfunded plan continues to pay its own expenses. Because of an administrative error, the overfunded plan ends up paying the expenses for both plans. When management discovers this fact, a decision is made not to reimburse the plan that paid the expenses because it is fully funded.

AAM Section 8070

State and Local Governmental Developments—1997

Industry and Economic Developments

.01 The steady growth of the economy has been favorable to most state and local governments. The trend in recent years toward generally good fiscal conditions will likely continue in 1997. On the revenue side, state tax revenues grew 5.4 percent in fiscal 1996 according to the Center for the Study of the States. This growth was stronger than budgeted for in many states and contributed to year-end balances that were higher than at any time since the early 1980s. Similar trends have been noted in many local governments. Personal income taxes generated the largest gains with increases in sales tax revenues a close second. Going forward, the myriad of complex issues involved in state taxation of electronic commerce will dominate the picture for state revenue agencies. The use of the Internet is exploding, and a number of difficult tax issues will have to be sorted out.

.02 Many state and local governments approved tax cuts during the past year, however, most of the cuts were relatively small. The modest size of the tax cuts reflects a general concern that federal deficit reduction activity could end up shifting costly responsibilities to state and local governments. In addition to federal budget cuts, state and local officials are also concerned about proposed federal tax changes that could have a revenue impact at the state and local level. For instance, there has been much recent discussion in Washington, DC, about a potential cut in the capital gains tax rate. Such a change would likely alter the federal definition of adjusted gross income, to which a majority of state and local governments tie their own income tax. Until these issues are resolved, any new tax cuts enacted in 1997 will probably be small and, state and local officials will likely continue to develop budgets that are conservative.

.03 In the future, it will become more difficult for state and local governments to increase taxes. Voters in several states passed referendums during the November 1996 election making it more difficult for state legislatures to raise taxes. This reflects a trend toward more taxpayer control of the tax levy process.

.04 One of the more significant developments for state and local governments in 1997 will be welfare reform. In the wake of the recently passed Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193), state and local governments will have to move quickly to address a wide range of issues to implement sweeping changes in services to poor families and children. The new law eliminates the automatic entitlement to welfare benefits for mothers and children who qualify. Instead, beginning October 1, 1996, states gained broad authority over their own welfare programs, and the form of federal funding was changed to block grants. These changes will shift the entitlement burden to the states and likely have a bearing on the economic outlook and future spending priorities of state and local governments. Although the law provides states with more flexibility to implement policies and provisions that promote self-sufficiency and personal responsibility, it will also challenge state and local governments, particularly in meeting new work participation rates.

.05 Like organizations in the private sector, many governments are scrutinizing their operations and looking for reengineering opportunities. There has also been a trend toward privatizing functions and services that have traditionally been performed by governments. These activities have resulted in deep structural changes for many state and local governments. Auditors should consider the effects of these changes on their consideration of internal control.

Industry Conferences

.06 The AICPA will hold its fourteenth annual National Governmental Accounting and Auditing Update Conference on August 25–26, 1997, in Washington, DC, and again on September 29–30, 1997, in Denver, CO. This high-level conference is designed for practitioners; officials working in federal, state, or local governmental finance and accounting; and recipients of federal awards. It is the premier forum for the discussion of important governmental accounting and auditing developments. Participants will receive updates on current issues, practical advice, and timely guidance on recent developments from experts. The AICPA also offers an annual training program called the National Governmental Training Program. This year's program will be held on October 20–22, 1997, in Phoenix, AZ. It is designed for practitioners or accountants, auditors, and other staff in government who want in-depth, hands-on training in government accounting and auditing. For more information about the conference or the training program, please call the AICPA CPE Conference Hotline at (800) 862-4272.

Regulatory, Legislative, and Other Developments

Major Changes to Single Audits of Federal Awards

.07 The promise of major change in single audit policy became a reality during 1996. These changes continue to be finalized during the first half of 1997. Auditors performing audits of federal awards should follow developments in this area closely to ensure that the appropriate guidance is followed. The sections below summarize four key pieces of guidance which have been or are currently being revised for single audits and program-specific audits of federal awards. The latter three, U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, the *Compliance Supplement*, and the AICPA Statement of Position, were not completed at the time of publication of this Audit Risk Alert. Information on the status of these documents will be published in the *Journal of Accountancy* and *The CPA Letter* and will be made available on the AICPA Fax Hotline and home page (http://www.aicpa.org). See the section of this Audit Risk Alert entitled "References for Additional Guidance" under the heading "AICPA" for further information on the AICPA Fax Hotline and home page.

.08 *Single Audit Act Amendments of 1996 (1996 Amendments).* On July 5, 1996, President Clinton signed into law legislation amending the Single Audit Act of 1984 (Public Law 104-156), which is effective for fiscal years beginning after June 30, 1996. The 1996 Amendments extend the act's jurisdiction to not-for-profit organizations, raise the dollar threshold for audit coverage to $300,000 from $25,000, implement a risk-based approach to identify the major federal programs to be audited, and shorten the audit report due date to nine months after a transition period of two years. The 1996 Amendments are discussed further in a November 1996 *Journal of Accountancy* article entitled "Auditing Federal Awards, A New Approach." A copy of the 1996 Amendments is also available on the AICPA Fax Hotline; dial (201) 938-3787 from a fax machine and select document number 402. The full text of the 1996 Amendments is located on IGnet at http://www.sbaonline.sba.gov/ignet/ under the listing "Single Audit."

.09 *OMB Circular A-133.* A revised OMB Circular A-133, applicable only to not-for-profit organizations, was issued on April 22, 1996. Once the 1996 Amendments were passed (see above), it became necessary for the OMB to propose another revision to OMB Circular A-133 to add states and local governments to the scope of the Circular and to comply with certain other aspects of the 1996 Amendments. This proposed revision was issued in the November 5, 1996, *Federal Register* (61 FR 57231) and a final document is expected to be issued before June 30, 1997. The OMB intends to rescind OMB Circular A-128, *Audits of State and Local Governments*, which is the existing regulation governing audits of federal awards for states and local governments once OMB Circular A-133 is issued in final form.

.10 Once finalized, OMB Circular A-133 will establish audit requirements that apply to not-for-profit organizations (including hospitals and colleges and universities) and state, local, and Indian tribal govern-

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

ments, and will be effective for fiscal years beginning after June 30, 1996. Provisions of the revised Circular include the following:

- The threshold for audit is raised to $300,000 from $25,000.
- Auditors are required to identify major programs on the basis of a risk assessment, considering prior audit experience, oversight performed by federal agencies and others, and the inherent risk of the program, rather than solely on the basis of federal expenditures. Due to the timing of the issuance of the final Circular and related audit guidance, auditors may want to consider a provision in the Circular that allows auditors to determine major programs solely on the basis of federal expenditures for first-year audits. First-year audits are defined as the first year that an entity is audited under the new Circular or the first year of a change of auditors. As an example, if an auditor has a client with a June 30, 1997, fiscal year-end, the use of the risk-based approach to determine major programs is optional for that year because it would be the first audit under the new Circular.
- Major program coverage is required to be a minimum of 50 percent (or 25 percent for low-risk auditees) of the federal awards expended.
- The required level of testing of internal control over major programs is clarified as being based on auditors' planning for a low assessed level of control risk.
- Guidance is included for conducting program-specific audits covering those situations in which a federal grantor agency has not issued a program-specific audit guide, as well as those situations in which a program-specific audit guide has been issued by the grantor agency.
- Minimum requirements for the Schedule of Expenditures of Federal Awards are provided.
- Guidance is included concerning the following:
  1. Reporting audit findings in a single schedule of findings and questioned costs, which includes a summary of the auditor's results, and findings and questioned costs related to the financial statement audit as well as to federal awards.
  2. Thresholds for determining which audit findings should be included in the schedule of findings and questioned costs.
  3. Descriptions of what information auditors should include in an audit finding.
  4. Required follow-up on audit findings.
- Auditee management is required to provide a corrective action plan for current year audit findings and a summary schedule reporting the status of prior year audit findings.
- The definition of *nonprofit organization* is revised to include nonprofit hospitals.
- Restrictions are imposed on auditor selection whereby auditors who prepare the indirect cost proposal or cost allocation plan are prohibited from being selected as the auditor if the indirect costs recovered in the prior year are greater than $1 million in total. This provision is not effective until audits of fiscal years beginning after June 30, 1998.
- The due date is shortened for submitting reports to nine months from thirteen months, after a two-year transition period. The transition period is for fiscal years beginning on or before June 30, 1998, during which auditees will have thirteen months after the end of the audit period to complete the audit and submit the reporting package. The provision for a cognizant or oversight agency to grant an extension is retained. Also the report submission process is streamlined, including incorporating a data collection form, and expanding the role of the federal clearinghouse.

Auditors should note that the November 1996 proposed revisions to OMB Circular A-133 included two significant changes from the earlier revision concerning the data collection form and audit coverage of indirect cost pools. In summary, the proposal would require auditors to prepare and sign the data collection

form, and test and report on the allowability of costs charged to cost pools. Because the final resolution of these issues is unknown at this time, auditors should carefully review the final Circular for any new requirements.

.11 As noted in the preceding paragraphs, the 1996 Amendments are effective for fiscal years beginning after June 30, 1996, and OMB expects to issue the revised OMB Circular A-133 before June 30, 1997. OMB will instruct federal agencies to adopt OMB Circular A-133 in codified regulations within six months after publication of the final OMB Circular A-133 in the *Federal Register* so that it will apply to audits of fiscal years beginning after June 30, 1996. Therefore, the revised OMB Circular A-133 should be followed for audits of years beginning after June 30, 1996. Until such time as OMB publishes the final revision of OMB Circular A-133, auditors are encouraged to use the November 5, 1996, proposed revision of OMB Circular A-133 for planning purposes.

.12 Last, as a result of the issuance of the 1996 Amendments and revisions to OMB Circular A-133, questions have arisen with regard to the status of position statements issued by the President's Council on Integrity and Efficiency (PCIE). These position statements were originally developed to address issues related to audits conducted under the Single Audit Act of 1984, OMB Circular A-128, and the March 1990 version of OMB Circular A-133. Therefore, with the exception of PCIE Statement No. 4, none of the remaining position statements is applicable to audits conducted under the 1996 Amendments or the new OMB Circular A-133 requirements. (See the section of this Audit Risk Alert entitled "PCIE Audit Committee Guidance" under "References for Additional Guidance" for a listing of all PCIE position statements.)

.13 Upon publication, a copy of the final revision to Circular A-133 may be obtained from the *Federal Register*; the OMB fax information line (202) 395-9068, document number 1133; the OMB home page on the Internet, which is currently located at http://www.whitehouse.gov/WH/EOP/OMB/html/ombhome.html; or by calling or writing the Office of Administration, Publications Office, Room 2200, New Executive Office Building, Washington, DC 20503, telephone (202) 395-7332.

.14 *Compliance Supplement.* A revised OMB Compliance Supplement which is currently under development will set forth the material compliance requirements that are to be included in an audit in accordance with OMB Circular A-133. It will cover states, local governments, and not-for-profit organizations. The OMB is expected to issue a Provisional Compliance Supplement before June 30, 1997, to replace the existing Compliance Supplements entitled *Compliance Supplement for Single Audits of State and Local Governments* (issued in September 1990) and *Compliance Supplement for Institutions of Higher Learning and Other Non-Profit Institutions* (issued in October 1991), which are no longer current. It is expected that a notice will be provided in the *Federal Register* of the Provisional Supplement's availability along with a request for public comment. Auditors should use the Provisional Supplement until the public comment process is completed and OMB issues a Final Supplement. OMB anticipates issuing a Final Supplement in 1998.

.15 The most significant changes to the revised Compliance Supplement will include the following:

- A compliance matrix, which provides an overview of the compliance requirements applicable to the programs listed in the supplement
- Replacement of the classifications of general requirements and specific requirements with the following fourteen types of compliance requirements, all of which are covered by the auditor's opinion on compliance:
  - — Activities Allowed or Unallowed
  - — Allowable Costs/Cost Principles
  - — Cash Management
  - — Davis–Bacon Act

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

  - — Eligibility
  - — Equipment and Real Property Management
  - — Matching, Level of Effort, Earmarking
  - — Period of Availability of Federal Funds
  - — Procurement and Suspension and Debarment
  - — Program Income
  - — Real Property Acquisition and Relocation Assistance
  - — Reporting
  - — Subrecipient Monitoring
  - — Special Tests and Provisions
- Audit objectives and suggested audit procedures for each type of compliance requirement
- Expanded guidance on allowable costs and cost principles, which includes a comparison of the requirements between the common rule, OMB Circular A-87, *Cost Principles Applicable for State, Local, and Indian Tribal Governments;* OMB Circular A-21, *Cost Principles for Educational Institutions;* and OMB Circular A-122, *Cost Principles for Non-Profit Organizations*
- Detailed guidance on how to determine applicable compliance requirements, control objectives, and audit objectives for programs not listed in the Compliance Supplement
- Characteristics of internal control over compliance presented in the format included in *Internal Control—Integrated Framework* (the COSO Report), published by the Committee of Sponsoring Organizations of the Treadway Commission

.16 Initially, the Provisional Supplement will include approximately twenty-five federal programs. This is far less than what was included in the Compliance Supplements that are being replaced. However, the OMB has made a commitment to continue working on the Provisional Supplement and to include additional programs in the Final Supplement. As noted above, the OMB will be adding guidance to the Compliance Supplement that instructs auditors on the appropriate steps to take when a program is not included. The Compliance Supplement will be available from the Government Printing Office (see the section of this Audit Risk Alert entitled "References for Additional Guidance" under the heading "PCIE Audit Committee Guidance" for information on how to contact the Government Printing Office) and the OMB home page on the Internet, which is currently located at http://www.whitehouse.gov/WH/EOP/OMB/html/ombhome.html. Once the Supplement has been issued, more detailed guidance on how to obtain copies will be included in the AICPA's *CPA Letter* and posted on the OMB and AICPA home pages.

.17 *AICPA Statement of Position.* With the changes described in the preceding three sections, Statement of Position (SOP) 92-9, *Audits of Not-for-Profit Organizations Receiving Federal Awards,* and certain sections of the Audit and Accounting Guide *Audits of State and Local Governmental Units* (the Guide) have become outdated. In response, the AICPA is in the process of developing a new SOP that will supersede SOP 92-9 and the sections of the Guide that are outdated. The new SOP is expected to be issued during the summer of 1997 (assuming that the previously described OMB guidance is issued on the dates planned) and will provide auditors of states, local governments, and not-for-profit organizations with guidance on the work performed and the reports issued for audits under the 1996 Amendments, and OMB Circular A-133. It will also include revised simplified illustrative audit reports. The new illustrative simplified reports will include one report on the financial statements, one report that will meet the requirements for reporting on compliance and internal control under *Government Auditing Standards* (GAS; also known as the Yellow Book), and one report that will meet the requirements of the 1996 Amendments and OMB Circular A-133 for reporting on single audits of federal awards.

Status of Interim Compliance Supplements for Housing Agencies and Authorities and Certain Department of Education Programs

.18 Two federal agencies have issued interim guidance to address the unique requirements of certain agency programs. These two agencies are the U.S. Department of Housing and Urban Development (HUD) and the U.S. Department of Education. OMB ultimately plans to include the programs covered by this interim guidance in the OMB Compliance Supplement. However, these programs, with the exception of one HUD program (the Section 8 Program Cluster) and one Department of Education Program (84.010), will not be included in the upcoming issuance of the OMB Provisional Compliance Supplement (see the preceding discussion) and will be added at a later date. Additional details are discussed below.

.19 *Housing Authorities.* Interim guidance for agency program requirements (which would otherwise be listed in Part 4 of the OMB Provisional Compliance Supplement) for public and Indian housing (PIH) authorities is contained in the *Public and Indian Housing Compliance Supplement for Annual Audits of Public Housing Agencies and Indian Housing Authorities by Independent Auditors* (PIH Supplement). The PIH Supplement was developed by the HUD Office of Public and Indian Housing and the Office of Inspector General. It was originally issued in May 1995 and reissued in May 1996. The PIH Supplement is available on the HUD Office of Inspector General home page at: http://www.hud.gov/oig/oigguide.html, under the listing of "Audit Guides." A copy may be requested by sending a fax to (202) 401-3963.

.20 *U.S. Department of Education Programs.* In June 1996, the U.S. Department of Education published interim guidance that includes the agency program requirements (which would otherwise be listed in Part 4 of the OMB Provisional Compliance Supplement) for the following programs: (1) 84.010 Title I Grants to Local Education Agencies, (2) 84.011 Migrant Education—Basic State Grant Program, (3) 84.281 Eisenhower Professional Development State Grants, (4) 84.186 Safe and Drug-Free Schools—State Grants, (5) 84.298 Innovative Education Program Strategies, (6) 84.288, 84.291, and 84.290 Bilingual Educations, and (7) 84.041 Impact Aid. The Title I (84.010) program will also be included in the OMB Provisional Compliance Supplement (see the discussion of the Compliance Supplement above). Each of the other programs included in the Department of Education interim guidance will also ultimately be included in the OMB Compliance Supplement. In the interim, audits in accordance with OMB Circular A-133 should use the Department of Education interim guidance as agency program requirements in testing compliance with the requirements of the programs included therein. However, if Title I (84.010) is a major program and none of the other Department of Education programs listed above are major programs, the OMB Compliance Supplement should be used. This Department of Education guidance is currently available on the Internet at the ED/OIG Non-Federal Audit Team home page (http://home.gvi.net/~edoig/) under the listing for "Compliance Supplement for ESEA Programs ASCII text format or WP 5.2 format." A copy may also be requested by sending a fax to the ED/OIG Non-Federal Team at (202) 205-8238.

OMB Circular A-21

.21 Auditors involved with audits of federal awards for governmental colleges and universities should be aware that the OMB issued revisions to OMB Circular A-21 in May 1996 (*Federal Register*, May 8, 1996), which are effective for fiscal years beginning after May 8, 1996. The revisions incorporate four cost accounting standards issued by the Cost Accounting Standards Board (CASB) applicable to all sponsored agreements subject to OMB Circular A-21 and extend the applicability of the CASB disclosure statement to universities that receive more than $25 million in federally funded sponsored agreements. It also amends the definition of equipment; eliminates the use of special cost studies to allocate utility, library, and student services costs (effective for fiscal years beginning on or after July 1, 1998); requires the use of fixed facilities and administrative cost rates for the life of sponsored agreements; establishes cost negotiation cognizant agency responsibilities; clarifies the policy for a change from use allowance to depreciation; adds criteria to interest allowability; and disallows tuition benefits for employee family members for fiscal years beginning on or after September 30, 1998. In performing audits in accordance with OMB Circular A-133, auditors should consider whether organizations subject to Circular A-21 have complied with the CASB Standards and disclosure requirements incorporated therein.

U.S. Department of Education Issues New Drawdown Procedures for Grant Payments

.22 Auditors with clients that receive grants from the U.S. Department of Education should be aware of changes in the procedures for grant payments accounting and reporting. A letter was issued in July 1996, notifying program recipients of the new drawdown procedures to take effect in 1997 between July and September. The fundamental change is that recipients will have to request Department of Education dollars by individual program when drawdowns are made. In the past, recipients were allowed to pool their drawdowns into a single amount without identifying the specific programs being funded. The new procedure may require many recipients to change their internal processes and systems. Auditors should consider this change when testing cash management in conjunction with single audits. Contact Charles L. Coleman, Director of Cash Management, U.S. Department of Education, for further information at (202) 401-1776.

SEC Municipal Bond Disclosure Requirements

.23 In response to concerns about the municipal securities market, the Securities and Exchange Commission (SEC) issued a final rule entitled *Municipal Securities Disclosure* that became effective on July 3, 1995 (Section 17, Code of Federal Regulations (CFR), Part 240, Release No. 34-34961). The final rule amends Rule 15c2-12 under the Securities Exchange Act of 1934 and attempts to deter fraud and manipulation in the municipal securities market by prohibiting the underwriting and subsequent recommendation of securities for which adequate information is not available. Auditors should also be aware that the SEC issued Interpretive Release No. 33-7049 (Section 17, CFR, Parts 211, 231, and 241) *Statement of the Commission Regarding Disclosure Obligations of Municipal Securities Issuers and Others.* This interpretive release is cited in the above-described final rule as a source of guidance on the disclosure obligations of issuers of municipal securities and is intended to assist municipal securities issuers, brokers, and dealers in meeting their obligations under the antifraud provisions of the securities laws.

.24 As a result of the additional attention on municipal bonds, there is certain to be an increased focus on official statements and, hence, potentially higher exposure for auditors. The Audit and Accounting Guide *Audits of State and Local Governmental Units*, chapter 19, "Association With Financial Statements Included in Official Statements," discusses the requirements of AICPA Statement on Auditing Standards (SAS) No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550), and contains guidance for auditors associated with financial statements included in official statements.

.25 Further, the SEC's actions will lead to contractual requirements for issuers that may govern, among other things, required financial information and audit requirements. Therefore, auditors should be alert for potential compliance issues in this area.

Recent IRS Activities

.26 *Internal Revenue Service Audits.* The Internal Revenue Service (IRS) continues to increase its enforcement activities regarding tax-exempt municipal bonds. Currently, the IRS is reportedly auditing about 150 to 200 targeted municipal bond issues for possible tax law violations. Most of these audits involve questions relating to arbitrage, which is earned in the municipal bond market by investing tax-exempt bond proceeds in higher yielding obligations and is prohibited in certain cases. The IRS is also beginning a random audit program to determine the overall level of compliance in municipal bond offerings. If the IRS determines that municipal bond issuers did not comply with laws and regulations, the IRS will likely work with the issuers to reach a settlement. However, if such a settlement cannot be reached, the IRS has the authority to tax bondholders on their interest earnings.

.27 One of the abuses that the IRS has recently been targeting is yield-burning. This is the purchase by a governmental issuer of securities for an advance refunding escrow at artificially inflated prices. If the price

of a security increases, the yield decreases—hence the term *yield-burning*. Yield burning may be done without the knowledge of the issuer by others involved in the transaction. Nonetheless, the issuer is the one responsible under current tax laws. Revenue Procedure 96-41, *Compliance With Tax-Exempt Bond Arbitrage Requirements*, was issued by the IRS in mid 1996 as a possible remedy for yield burning in advance refunding escrows. Recently, however, the IRS has stated that it is considering withdrawing the procedure because many issuers have indicated that it is doubtful that they would utilize this remedy. Because of the IRS interest in yield-burning, issuers should examine past advance refundings. If open market securities were used to fund an escrow (as opposed to state and local government securities), the yield on the escrow is slightly below the bond yield, and the securities were not purchased using a legitimate bidding process, yield-burning may have occurred. Auditors should consider suggesting that bond counsel be consulted in such cases.

.28 The calculation of arbitrage rebate, as well as other aspects of arbitrage law, are complex and continue to be an area of concern for all entities that issue tax-exempt debt. Because a violation in the calculation of arbitrage rebate could result in a liability, auditors should become familiar with the arbitrage rebate regulations issued by the IRS and the regulations for calculating rebate earnings in connection with the accounting for bond proceeds, refunding issues, and proceeds that are commingled with other funds for investment purposes. Regulations regarding the calculation of arbitrage rebate, as well as other aspects of arbitrage law, can be found in Section 148 of the Internal Revenue Code (IRC). Due to the complexity of this area, increased audit scrutiny may be warranted on arbitrage rebate liability computations.

.29 With respect to compliance matters, paragraph 11.34 of the Guide states that auditors should consider obtaining evidence that governmental entities have complied with the provisions of indentures and agreements relating to indebtedness, particularly on the use of proceeds, including any restrictions on the use of those proceeds before expenditure for their intended purpose.

.30 *Section 403(b) Tax-Sheltered Annuities.* Certain governmental entities offer Section 403(b) tax-sheltered annuities to their employees. The IRS has developed an examination program for employers that offer these annuities. To date, examinations have uncovered many deficiencies in employers' plans. These deficiencies have included exceeding the various contribution limits, noncompliance with distribution requirements, inadequate salary reduction agreements, and failure to offer universal availability of salary reduction programs (due to impermissible eligibility restrictions, mandatory contributions, and participant exclusions). Sizable assessments against these employers have been common as a remedy to prevent the programs from being declared taxable. Auditors should be alert to potential liabilities and compliance problems in this area, especially since the IRS has recently confirmed that it will be auditing governmental entities.

.31 The IRS's Tax-Sheltered Annuity Voluntary Correction (TVC) program, which began in 1995, gives plan sponsors of Section 403(b) annuity plans the opportunity to voluntarily correct any plan defects. The program was scheduled to conclude October 1996. However, the IRS has recently announced that the program has been extended until December 31, 1998. Use of the TVC program may result in significantly reduced settlements with the IRS, compared to assessments based on deficiencies discovered during audits performed by the IRS.

.32 *Classification of Employees Versus Independent Contractors.* Many governments, in their efforts to reengineer and streamline operations, are using independent contractors more frequently. Auditors should be aware that the IRS has identified *employee—independent contractor* classification as an area with significant compliance problems. In 1988, the IRS began a nationwide Employment Tax Examination Program to increase compliance by requiring organizations, including state and local governmental entities, to treat misclassified independent contractors as employees subject to withholding taxes. Employers classifying workers as employees must withhold federal income and Social Security taxes (including Medicare) from employees' pay and match the Social Security and Medicare taxes. Further, the reclassification of a worker from an independent contractor to employee for federal purposes is likely to cause a similar reclassification

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

for state tax purposes. Auditors should be alert to such misclassifications by employers, which can result in compliance problems and potential tax liabilities.

.33 There were three significant developments in this area during 1996. First, the IRS issued guidance to its agents regarding worker classification. This guidance provides practical instruction to IRS agents to help resolve questions regarding who is an employee and who is an independent contractor. Auditors should encourage their clients to consider this IRS guidance when making worker classification decisions. Second, the Small Business Job Protection Act of 1996 (Public Law 104-188) modified Section 530 of the Revenue Act of 1978, a relief provision sometimes invoked to enable individuals who are really employees to continue to be treated as independent contractors without consequence to employers. The changes made to Section 530 were generally favorable. Last, the IRS introduced a Classification Settlement Program to provide a streamlined tax settlement for situations in which Section 530 relief is not available (meaning that its requirements are not met), but an employer has at least consistently reported the affected individuals as independent contractors. In such a case, a reduced tax assessment may be available. This program is currently scheduled to be open for two years, beginning March 5, 1996.

IRC Section 457 Deferred Compensation Plans

.34 Many state and local governments have established deferred compensation plans for their employees under the provisions of IRC Section 457. The recently passed Small Business Job Protection Act of 1996 includes a provision that will require these plans to hold all assets in trust for the exclusive benefit of participants and their beneficiaries. This new requirement generally is effective for assets and income held by IRC Section 457 plans on or after August 20, 1996. However, for plans in existence before August 20, 1996, a trust need not be established before January 1, 1999.

.35 Before this new legislation, the amounts deferred under an IRC Section 457 plan were legally the property of the governmental employer, subject only to the claims of the employer's creditors. Governmental Accounting Standards Board (GASB) Statement No. 2, *Financial Reporting of Deferred Compensation Plans Adopted Under Provisions of Internal Revenue Code Section 457*, is based on this premise and, therefore, it generally requires that IRC Section 457 plans be displayed in an agency fund. Because the guidance in GASB Statement No. 2 was based on the Internal Revenue Code in effect at that time, the GASB has added a project to its technical agenda to amend GASB Statement No. 2 to adapt it to the new legislation. Auditors should be alert for guidance from the GASB in this area. In the meantime, if a governmental employer establishes a new plan or decides to set up a trust for an existing plan that would be subject to the new law, auditors should refer to GASB Statement No. 2, paragraph 3, which states that GASB Statement No. 2 does not apply to plans in which the deferred amounts are not required to be considered assets of the employer government and are not subject to the claims of the employer's general creditors.

Financial Assurance Mechanisms for Local Government Landfills

.36 Auditors should note that the U.S. Environmental Protection Agency (EPA) recently issued final regulations on the financial assurance provisions for local government owners and operators of municipal solid waste landfill facilities (*Federal Register*, November 27, 1996). The EPA rule allows local government landfill owners and operators that meet certain financial, public notice, and record keeping and reporting requirements to use a financial test to demonstrate financial assurance for closure, postclosure, and corrective action cost up to a specified maximum limit. If a local government meets the financial test, it must also place in an operating record the following:

- A certification by the local government's chief financial officer that the local government satisfies the requirements of the financial test
- Independently audited year-end financial statements for the latest year prepared in conformity with generally accepted accounting principles (GAAP), including an unqualified opinion by the independent auditor

- A report by an independent CPA or appropriate state agency based on performing a agreed-upon procedures engagement relative to the local government's financial ratios required by the EPA rule

Airport Revenue Diversion

.37 Auditors of public airports should be aware that the Federal Aviation Administration (FAA) issued a notice of proposed policy entitled *Policy and Procedures Concerning the Use of Airport Revenue* (*Federal Register*, February 26, 1996). More recently, the FAA issued a supplemental notice of proposed policy under the same title (*Federal Register*, December 18, 1996) to address additional issues that were raised in the comments received on the February notice. The proposed policy relates to federal grants received by public airports under the Airport Improvement Program (AIP). Among other things, the AIP requires that revenue generated by a public airport is to be expended for the capital or operating costs of the airport. The proposed policy is being issued to alleviate confusion by airports as to how to define the term *airport revenue* and also in response to reports that certain airports have appeared to be diverting revenue in ways that are not lawfully permitted. The proposed policy defines airport revenue and *revenue diversion* and discusses the permitted and prohibited uses of airport revenue and the procedures for monitoring compliance with the revenue use requirement.

.38 The proposal indicates that the FAA will be amending the OMB Compliance Supplement to address the use of airport revenue. However, auditors should be aware that the proposal also states that even though the policy statement is not yet effective, public airports should assume that the FAA would act consistently with the views expressed in the documents in any enforcement action for revenue diversion.

Audit Issues and Developments

Investment Policy Compliance

.39 Investment activity for governmental entities is generally governed by legal or contractual provisions and, in many cases, governments are precluded from purchasing certain investments, including derivatives. These legal provisions include those arising from constitutions, charters, ordinances, resolutions, governing body orders, and intergovernmental grant or contract regulations. Auditors should be aware that in response to the highly publicized investment problems encountered at various governments, many state and local governments have recently passed legislation regarding investment policies and/or the kinds of investments that are allowable.

.40 SAS No. 54, *Illegal Acts by Clients* (AU section 317), requires an auditor to consider laws and regulations that, if noncompliance occurs, could have a direct and material effect on the financial statement amounts. *Government Auditing Standards* also requires auditors to test and report on compliance with laws and regulations. Since many governments are legally precluded from purchasing certain investments, auditors should be alert to possible violations of laws and regulations in this area. The Audit and Accounting Guide *Audits of State and Local Governmental Units*, states in paragraph 7.25, that auditors should consider performing procedures, as appropriate, relative to whether there is compliance with the following:

- Legal or official authority for all depositories and investments
- Laws, regulations, and investment policies governing the deposit, investment, and collateralization of public funds

Going Concern

.41 Although it is generally believed that governmental entities will continue as going concerns because of their ability to raise revenues to meet obligations, this is not always the case. Taxpayer initiatives and limitations due to the lack of taxpayer resources have placed limits on some governments' taxing power. In

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

addition, many special-purpose governments do not have the power to raise fees or taxes without the support of some other governmental body. SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), and the Audit and Accounting Guide *Audits of State and Local Governmental Units*, paragraphs 17.08 through 17.13, provide guidance concerning the auditor's consideration of an entity's ability to continue as a going concern.

.42 A more frequent occurrence in a governmental environment is for an auditor to conclude that a government will likely continue as a going concern, even though the government is experiencing financial difficulties. In this situation, auditors should consider the need for disclosure of the financial difficulties in the government's financial statements.

Recent Auditing Pronouncements Issued

.43 *SAS No. 80.* In December 1996, the AICPA Auditing Standards Board (ASB) issued SAS No. 80, *Amendment to Statement on Auditing Standards No. 31,* Evidential Matter (AU section 326). The Statement (AU section 326) amends SAS No. 31, *Evidential Matter* (AU section 326), to recognize that evidential matter may exist only in electronic form. It also provides guidance to auditors engaged to audit the financial statements of entities for which significant information is transmitted, processed, maintained, or accessed electronically. SAS No. 80 (AU section 326) recognizes that, in certain entities, some of the accounting data and corroborating evidential matter are available only in electronic form. Source documents such as purchase orders, bills of lading, invoices, and checks might be replaced with electronic messages. In image-processing systems, source documents are scanned and converted into electronic images to facilitate storage and reference, and the source documents may not be retained after conversion. SAS No. 80 (AU section 326) also states that, in entities in which significant information is transmitted, processed, maintained, or accessed electronically, the auditor may determine that it is not practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. For example, the potential for the improper initiation or alteration of information to occur and not be detected may be greater if information is produced, maintained, or accessed only in electronic form. In such circumstances, the auditor should perform tests of controls to gather evidential matter to use in assessing control risk, or consider the effect on his or her report. SAS No. 80 (AU section 326) is effective for engagements beginning on or after January 1, 1997.

.44 *SAS No. 81.* In December 1996, the ASB issued SAS No. 81, *Auditing Investments* (AU section 332), which supersedes SAS No. 1, section 332, *Long Term Investments.* The Statement (AU section 332) revises the guidance on auditing assertions about the valuation of investments, including guidance on auditing investments carried at cost and fair value. This guidance will be particularly useful to auditors of governmental entities with the recent issuance of GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools,* that will require many investments to be carried at fair value (see the separate discussion of this Statement in the section of this Audit Risk Alert entitled "Accounting Issues and Developments"). SAS No. 81 (AU section 332) is effective for audits of financial statements for periods ending on or after December 15, 1997, with early application permitted.

.45 *SAS No. 82.* In February 1997, the ASB issued SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU section 316). The new Statement (AU section 316) will supersede SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316A). SAS No. 82 (AU section 316) provides auditors with expanded guidance on the consideration of fraud in conducting a financial statement audit. It strengthens the auditor's ability to fulfill his or her responsibility to plan and perform the audit in order to obtain reasonable assurance about whether the financial statements are free of material misstatements, whether caused by error or fraud.

.46 The new Statement (AU section 316) describes the types of fraud and requires auditors to specifically assess the risk of material fraud in every audit. It also provides separate categories of risk factors for fraudul-

ent financial reporting (management fraud) and misappropriation of assets (theft) that require auditor consideration.

.47 In addition, the new Statement (AU section 316) provides procedural guidance and examples of how auditors can respond to the presence of fraud risk factors. The new Statement (AU section 316) reaffirms the requirement that auditors communicate known instances of fraud to the appropriate levels of management and the audit committee and, under certain circumstances, appropriate regulators.

.48 The new Statement (AU section 316) is effective for audits of financial statements for periods ending on or after December 15, 1997.

.49 The AICPA is undertaking a major initiative to assist auditors in understanding and implementing SAS No. 82 (AU section 316). Implementation efforts include the following:

- A Practice Aid entitled *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82*, walks auditors through issues likely to be encountered in applying the new SAS (AU section 316) to audits, with valuable tools, such as sample documentation. It also provides specific guidance on applying the concepts of the SAS (AU section 316) to various industries, including government. To obtain this publication (No. 008883) auditors should contact the AICPA Order Department at (800) 862-4272 or fax a request to (800) 362-5066.
- A self-study continuing professional education (CPE) course (No. 732045) entitled *Consideration of Fraud in a Financial Statement Audit: The Auditor's Responsibilities Under SAS No. 82* offers intermediate level information in text format and eight hours of recommended CPE. To obtain the CPE course auditors should contact the AICPA Order Department.
- Helpful guidance about the new SAS (AU section 316), including a press release, speech outline, and a comparison of SAS No. 82 (AU section 316) with SAS No. 53 (AU section 316A), are available on the AICPA's home page at: http://www.aicpa.org/members/div/auditstd/index.htm.

Audit Quality

.50 The AICPA and the President's Council on Integrity and Efficiency (PCIE) are involved in a cooperative effort in which Federal Inspectors General (IGs) of government agencies refer to the AICPA Professional Ethics Division audits of entities receiving federal awards that the IGs consider to be of a substandard nature. Also, the PCIE issues periodic reports on the results of IG desk reviews and quality control reviews of work performed by independent auditors. Information gathered during these investigations and reviews about the most common deficiencies can be useful to auditors when undertaking, planning, and conducting audit engagements of entities receiving federal awards. Some of the more common deficiencies include the following:

- Deficient audit reports (incorrect reports on internal control or compliance, not all required information included, incorrect presentation of financial information without proper qualification, improper or missing opinion, incorrect or missing findings, no disclosure of reportable conditions)
- Inadequate working papers (failure to adequately support opinion, no documentation of required procedures such as internal control evaluation, analytical procedures, or subsequent events review)
- Failure to perform all procedures required in agency audit guide or compliance supplement (no compliance testing, no study and evaluation of internal control)

The risks and ramifications to auditors of issuing deficient audit reports or performing inadequate audits are significant. AICPA-required corrective actions and sanctions can include mandatory CPE in specified subjects, mandatory work product preissuance reviews, preclusion from performing quality reviews, and suspension or expulsion from the AICPA and state CPA society. Substandard audit work can also result in actions by state boards of accountancy such as fines and loss of license or certification.

Financial Statements on the Internet

.51 It has become more common for governmental entities to make information available on the Internet or electronic bulletin boards (electronic sites). Information in electronic sites may include financial statements and other financial information, press releases, and other promotional material. Auditors should be aware that an Interpretation of SAS No. 8 (AU section 550) entitled "Other Information in Electronic Sites Containing Audited Financial Statements" (AU section 9550.16–.18) has been issued to address an auditor's responsibility with respect to other information included in an electronic site if the audited financial statements and the independent auditor's report thereon are also included. The Interpretation (AU section 9550.16–.18) appeared in the March 1997 *Journal of Accountancy* and was effective upon publication.

.52 The Interpretation (AU section 9550.16–.18) concludes that electronic sites are a means of distributing information and are not documents in the sense that the term *documents* is used in SAS No. 8 (AU section 550). Therefore, auditors are not required by SAS No. 8 (AU section 550) to consider the consistency of information in electronic sites with the original documents or to read other information contained in electronic sites. The Interpretation (AU section 9550.16–.18) also addresses the situation in which auditors are asked by their clients to consider information in electronic sites. It advises auditors that such consideration, which might take different forms, is not a service contemplated by SAS No. 8 (AU section 550). However, other auditing or attestation standards may apply, for example, agreed-upon procedures.

.53 Auditors should also note that the AICPA issued a nonauthoritative Practice Alert entitled *Financial Statements on the Internet*, which describes the distribution of audited financial statements and the related auditor's report on the Internet and speaks to several concerns for the auditor community. The Practice Alert is available on the AICPA's Fax Hotline at (201) 938-3787, document number 1566, and the AICPA's home page at: http://www.aicpa.org/pubs/cpaltr/jan97/suppl/prac.htm.

Modifying Computer Systems for the Year 2000

.54 Many computer systems process transactions based on storing two digits for the year of a transaction (for example, *97* for the year 1997), rather than a full four digits. A significant number of computer systems based on two-digit years are not programmed to consider the start of a new century, unless they have been recently modified. Systems that process year 2000 transactions with the year *00* may encounter significant processing inaccuracies and even inoperability. The potential impact of the year 2000 problem on governments is that date-sensitive calculations would be based on erroneous data or could cause a system failure. All forms of financial accounting, including interest computations, due dates, pensions, personnel benefits, investments, and legal commitments will be affected. It can also affect record keeping, such as inventory, maintenance, and file retention.

.55 Fixing this problem will likely be a very long, involved, and expensive process for many governments, requiring computer coding changes that will affect millions of lines of program code. Costs specifically associated with modifying software for the year 2000 should generally be charged to expenditure or expense as incurred. It may be advisable for auditors to consider discussing this matter with their clients to determine whether it is an issue and to determine whether the costs incurred to date have been accounted for properly.

Lawyers' Letters

.56 An interpretation of SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AU section 337), was issued in January 1997. The Interpretation, entitled "Use of Explanatory Language Concerning Unasserted Possible Claims or Assessments in Lawyers' Responses to Audit Inquiry Letters" (AU section 9337.31 and .32), addresses a concern that the inclusion of certain explanatory comments in responses by lawyers to audit inquiry letters may result in a limitation on the scope of the audit. The Interpretation (AU section 9337.31 and .32) appeared in the January 1997 issue of the *Journal of Accountancy* and was effective upon publication.

.57 A number of lawyers include explanatory comments in their responses to audit inquiry letters that are intended to emphasize the preservation of the attorney-client privilege with respect to unasserted possible claims or assessments. These comments might include the following: "It would be inappropriate for this firm to respond to a general inquiry relating to the existence of unasserted possible claims or assessments involving the organization." The Interpretation (AU section 9337.31 and .32) states that the inclusion of this or similar wording in a lawyer's response does not result in a limitation on the scope of the audit. The Interpretation (AU section 9337.31 and .32) also reminds auditors of the requirement pursuant to SAS No. 12 (AU section 337) to obtain the lawyer's acknowledgment of his or her responsibility to advise and consult with the client concerning financial statement disclosure obligations with respect to unasserted possible claims or assessments.

Pre-Award Surveys

.58 As part of the process of applying for a government grant or contract, state and local governments may be required to submit a written preaward assertion (survey) by management about the effectiveness of the design of an entity's internal control or a portion thereof, together with an auditor's report thereon. An interpretation of AICPA Statement on Standards for Attestation Engagements No. 6, *Reporting on an Entity's Internal Control Over Financial Reporting: An Amendment to Statement on Standards for Attestation Engagements No. 2* (AT section 400), entitled "Pre-Award Surveys" (AT section 9400.01–.08), was issued in February 1997. The Interpretation (AT section 9400.01–.08) appeared in the February 1997 *Journal of Accountancy* and was effective upon publication. This Interpretation (AT section 9400.01–.08) was issued to clarify that there are certain things that an auditor should not do in conjunction with a client's preaward survey. The Interpretation (AT section 9400.01–.08) states that the consideration of internal control in a financial statement audit does not provide a sufficient basis for auditors to issue a report expressing any assurance about the effectiveness of the design of internal control or any portion thereof. Other questions that are answered in the Interpretation (AT section 9400.01–.08) include how auditors can report on the design effectiveness of an entity's internal control or a portion thereof, what auditors' responsibilities are if they are requested to sign a form prescribed by a government agency in connection with a preaward survey, and whether auditors can issue reports on an entity's ability to establish suitably designed internal control.

Accounting Issues and Developments

.59 The GASB has issued several new financial accounting or reporting standards applicable to state and local governments. Some of these standards are effective for the first time in 1997. Other standards will not be effective until after 1997; however, the GASB encourages early application. Auditors should determine which standards a state or local government is either required to adopt in the current year or has elected to adopt early.

GASB Statements Effective During 1997[1]

.60 *Pension Accounting.* In November 1994, the GASB issued the following three pension-related Statements:

- GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*
- GASB Statement No. 26, *Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans*

[1] Note that GASB Statement No. 29, *The Use of Not-for-Profit Accounting and Financial Reporting Principles by Governmental Entities*, is not included in this Audit Risk Alert because it was effective in 1996. Auditors should refer to the Statement for further information or the summary that appeared in last year's Audit Risk Alert, *State and Local Governmental Developments—1996*.

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*

GASB Statement Nos. 25 and 27 supersede most of the existing standards for reporting pension information in governmental financial reports. GASB Statement No. 25 addresses the information that should be reported for a pension plan, whether the plan (or the public employee retirement system that administers the plan) issues a separate report or is included as a pension trust fund in the financial report of the plan sponsor or participating employer. GASB Statement No. 27 includes reporting requirements for an employer's expenditures/expense for contributions to a pension plan. GASB Statement No. 26 is an interim Statement pending completion of GASB's project on other postemployment benefits and includes the reporting requirements for defined benefit plans that administer postemployment health-care plans. GASB Statement Nos. 25 and 26 are effective for periods beginning after June 15, 1996. GASB Statement No. 27 is effective for periods beginning after June 15, 1997, with early implementation encouraged. The GASB is working on the development of an Implementation Guide that is expected to be issued by mid 1997.

.61 Also, the GASB issued Technical Bulletin 96-1, *Application of Certain Pension Disclosure Requirements for Employers Pending Implementation of GASB Statement No. 27*, in August 1996. The Technical Bulletin clarifies some implementation issues associated with the new pension-related Statements and is effective for years beginning after June 15, 1996 or when a defined benefit pension plan adopted GASB Statement No. 25, if earlier. The provisions terminate when GASB Statement No. 27 becomes effective or when an employer implements GASB Statement No. 27, if earlier.

.62 *Securities Lending Transactions.* In May 1995, the GASB issued GASB Statement No. 28, *Accounting and Financial Reporting for Securities Lending Transactions*, which is effective for financial statements for periods beginning after December 15, 1995. GASB Statement No. 28 establishes accounting and financial reporting standards for securities lending transactions. In these transactions, governmental entities lend their securities to broker-dealers and other entities for collateral—which may be cash, securities, or letters of credit—and simultaneously agree to return the collateral for the same securities in the future.

.63 GASB Statement No. 28 requires governmental entities to report their loaned securities as assets. If cash is received as collateral on the loan, it would also be reported as an asset, along with any investments made with the cash. Securities received as collateral would be reported as assets if the governmental entity is able to pledge or sell them without a borrower default. Liabilities resulting from these transactions should also be reported in the balance sheet. Securities lending transactions collateralized by letters of credit or by securities that the governmental entity does not have the ability to pledge or sell unless the borrower defaults should not be reported as assets and liabilities. GASB Statement No. 28 also requires that the costs of securities lending transactions, such as borrower rebates (interest costs) and agent fees be reported as expenditures or expenses. These costs should not be netted with interest revenue or income from the investment of cash collateral, any other related investments, or loan premiums or fees.

.64 In addition, GASB Statement No. 28 requires disclosure of the source of legal or contractual authorization for the use of securities lending transactions, any significant violations of those provisions during the period, whether the maturities of the investments made with cash collateral generally match the maturities of the securities loans, and summary information about the credit risk associated with the transactions at the balance sheet date. Disclosure of general information about the transactions is required, as well as the carrying amount and market or fair values of underlying securities at the balance sheet date.

.65 GASB Statement No. 28 also provides guidance for classifying securities lending collateral and the underlying securities in the categories of custodial credit risk required by GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements.*

.66 *Risk Financing Omnibus.* In February 1996, the GASB issued GASB Statement No. 30, *Risk Financing Omnibus*, an amendment of GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and*

Related Insurance Issues, that is effective for financial statements for periods beginning after June 15, 1996, with early application encouraged. For public entity risk pools, GASB Statement No. 30 modifies the method for calculating a premium deficiency, and it requires recognition of a premium deficiency liability and expense for the amount by which the premium deficiency exceeds unamortized acquisition costs. It also requires disclosure in the notes to the financial statements about the type of reinsurance or excess insurance coverage for certain claims costs, and requires presentation of gross, ceded, and net premiums and claims costs in the ten-year revenue and claims development information. Furthermore, GASB Statement No. 30 provides that claims development information should be reported consistently on an accident-year basis, a report-year basis, or a policy-year basis. It also allows presentation of additional percentage information.

.67 For entities other than pools, GASB Statement No. 30 includes specific, incremental claim adjustment expenditures/expenses, and estimated recoveries (such as salvage and subrogation) in the determination of the liability for unpaid claims. Also, it requires disclosure of whether other claim adjustment expenditures/expenses are included in the liability for unpaid claims.

GASB Statements Effective After 1997, With Early Application Encouraged

.68 *Investments.* In March 1997, the GASB issued GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, which is effective for financial statements for periods beginning after June 15, 1997, with early application encouraged. For most governmental entities, GASB Statement No. 31 establishes fair value standards for investments in the following:

1. Participating interest-earning investment contracts
2. External investment pools
3. Open-end mutual funds
4. Debt securities
5. Equity securities, option contracts, stock warrants, and stock rights that have readily determinable fair values

However, governmental entities other than external investment pools are permitted to report certain money market investments and *participating* interest earning investment contracts at amortized cost, provided that the investment has a remaining maturity of one year or less at the time of purchase. Also, *nonparticipating* investment contracts (which includes most certificates of deposit) should be reported using a cost-based measure.

.69 GASB Statement No. 31 also establishes fair value accounting and financial reporting standards for all investments held by governmental external investment pools. An exception, however, is that external investment pools are permitted to report short-term debt investments at amortized cost, provided that the fair value of those investments is not significantly affected by the impairment of the credit standing of the issuer or other factors. For that purpose, a pool's short-term investments are those with remaining maturities of up to 90 days.

.70 For defined benefit pension plans and IRC Section 457 deferred compensation plans, GASB Statement No. 31 provides guidance for applying fair value to certain investment transactions.

GASB Interpretations Effective in 1997

.71 *Disclosures of Conduit Debt Obligations.* In August 1995, the GASB issued GASB Interpretation No. 2, *Disclosure of Conduit Debt Obligations*, which is effective for financial statements for periods beginning after December 15, 1995. This Interpretation provides disclosure requirements for conduit debt obligations. Con-

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

duit debt obligations are certain limited-obligation revenue bonds, certificates of participation, or similar debt instruments issued by a state or local governmental entity for the express purpose of providing capital financing for a specific third party that is not part of the issuer's financial reporting entity. Although conduit debt obligations bear the name of the governmental issuer, the issuer has no obligation for such debt beyond the resources provided by a lease or loan with the third party on whose behalf they are issued. The required disclosures include a general description of the conduit debt transactions, the aggregate amount of all conduit debt obligations outstanding at the balance sheet date, and a clear indication that the issuer has no obligation for the debt beyond the resources provided by related leases or loans.

.72 *Reverse Repurchase Agreements.* In January 1996, the GASB issued GASB Interpretation No. 3, *Financial Reporting for Reverse Repurchase Agreements*, which is effective for financial statements for periods beginning after December 15, 1995. The purpose of the Interpretation is to reconcile the differences between certain reporting requirements of GASB Statement No. 3 for reverse repurchase agreements and GASB Statement No. 28 for securities lending transactions. It provides guidance for reporting reverse repurchase agreements balances and transactions among participating funds in investment pools and for disclosing whether the maturities of the investments made with the proceeds of the agreements generally match the maturities of the agreements.

.73 *Capitalization Contributions.* In February 1996, the GASB issued GASB Interpretation No. 4, *Accounting and Financial Reporting for Capitalization Contributions to Public Entity Risk Pools*, an Interpretation of GASB Statement Nos. 10 and 14, that applies to capitalization contributions made to and received by public entity risk pools, both with and without the transfer or pooling of risk. The Interpretation is effective for financial statements for periods beginning after June 15, 1996, with early application encouraged. GASB Interpretation No. 4 requires entities to report capitalization contributions made to public entity risk pools with transfer of risk as deposits if a return of those contributions is probable. Otherwise, entities should report the contributions as prepaid insurance (an asset) to be allocated as expenditures/expenses over future periods (not to exceed ten years under certain circumstances) or, alternatively, in governmental funds, as expenditures in the period made. In neither case should entities report those capitalization contributions (or any participation in those pools) as equity interests in joint ventures. Furthermore, entities should continue to report capitalization contributions to public entity risk pools without the transfer or pooling of risk as deposits or reductions of claims liabilities. The Interpretation also provides guidance for public entity risk pools that make capitalization contributions to other pools (such as excess pooling arrangements) in which they participate.

.74 This Interpretation requires public entity risk pools with the transfer or pooling of risk to report capitalization contributions received as liabilities if a return of those contributions is probable. Otherwise, those pools should report the contributions as unearned premiums to be allocated as premium revenue over future periods (not to exceed ten years under certain circumstances). Public entity risk pools without the transfer or pooling of risk should net capitalization contributions with other amounts and report assets or liabilities, as appropriate.

GASB Exposure Drafts Outstanding

.75 *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments.* Issued in January 1997, this exposure draft would make sweeping changes to the financial reporting standards for state and local governments. The GASB is expected to issue a final Statement by mid 1998.

.76 *Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities.* Issued in April 1997, this exposure draft would make sweeping changes to the financial reporting standards for public colleges and universities. The GASB is expected to issue a final Statement by mid 1998.

.77 *Accounting and Financial Reporting for Nonexchange Transactions.* Issued in March 1997, this exposure draft would establish accounting and financial reporting standards for nonexchange transactions. Nonex-

change transactions are those in which a government gives (or receives) value without directly receiving (or giving) equal value in exchange. The GASB is expected to issue a final Statement by mid 1998.

.78 *The Financial Reporting Entity: Affiliated Organizations.* Issued in December 1994, this exposure draft would establish standards to determine whether an organization should be classified as an affiliated organization and, if so, would establish criteria to determine whether that affiliated organization is a component unit of a primary government's financial reporting entity. The GASB is expected to issue a final Statement by late 1997.

Other Accounting Matters

.79 *Accounting for the Costs of Joint Activities.* In February 1997, a proposed SOP, *Accounting for Costs of Activities of Not-for-Profit Organizations and State and Local Governmental Entities That Include Fund Raising,* was cleared for final issuance by the Financial Accounting Standards Board (FASB) and GASB, subject to certain revisions. The proposed SOP would be applied by not-for-profit organizations and state and local governmental entities in determining fund-raising costs. It would require entities to report the costs of all materials and activities that include a fund-raising appeal as fund-raising costs, including costs that otherwise might be considered program or management and general costs if they had been incurred in a different activity, unless the criteria of purpose, audience, and content, as defined in the SOP, are met. If the criteria of purpose, audience, and content are met, the joint costs of those activities would be allocated and costs that are clearly identifiable with fund-raising, program, or management and general functions would be charged to that cost objective.

.80 The proposed SOP would be effective for years beginning on or after December 15, 1997. The AICPA is in the process of drafting those revisions and expects to issue the final SOP in the summer of 1997.

References for Additional Guidance

AICPA

.81 *Publications.* The following are some AICPA publications that may be of interest to auditors of state and local governmental units.

- Audit and Accounting Guide *Audits of State and Local Governmental Units* (No. 012056)
- *Checklists and Illustrative Financial Statements for State and Local Governmental Units* (No. 008697)
- *Internal Control—Integrated Framework* (No. 990009)—This report was commissioned by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) to establish a common definition of internal control that serves the needs of different parties for not only assessing their control systems, but also determining how to improve them; also available as a software package on WordPerfect (No. 990003) to help users identify and report on potential control deficiencies.

.82 *AICPA Continuing Professional Education Courses.* The AICPA offers continuing professional education (CPE) in the form of both group study and self-study courses. Group study courses include the following:

- Audits of HUD Regulated Lenders
- Audits of HUD-Assisted Projects
- Advanced Auditing of HUD-Assisted Projects
- Compliance Auditing
- Cost Principles for Nonprofit Organizations under OMB Circular A-133

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

- Governmental Auditing and Accounting Update
- How to Perform an Audit of a State or Local Government
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations
- Single Audit Requirements for Nonprofit and Government Organizations
- Workpaper Preparation Techniques for Government and Nonprofit Organizations
- Yellow Book: *Government Auditing Standards*

.83 Self-study courses include the following:

- Introduction to Governmental Accounting
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations
- Single Audit Requirements for Nonprofit and Governmental Organizations
- How to Perform an Audit of a State and Local Government
- Understanding Federal Audit Policies and Procedures
- Working With the Revised Yellow Book on Government Auditing Standards
- HUD Audits: A Comprehensive Guide
- Governmental Auditing and Accounting Update
- Introduction to OMB Circular A-87
- Compliance Auditing
- Audits of Rural Development and Housing Programs
- Communicating Material Noncompliance and Internal Control Weaknesses

- Effective Yellow Book Auditing
- 1997 Government Auditing and Accounting

.85 For more information about AICPA CPE courses, call the AICPA information hotline at (800) 862-4272.

.86 *AICPA Home Page.* The AICPA has established a home page on the World Wide Web. "AICPA Online," the AICPA's Web site (http://www.aicpa.org), offers members a unique opportunity to obtain AICPA and accounting-related material when they need it. CPAs can benefit tremendously by using online resources such as professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, and exposure drafts, among other things. There is also a "Talk to Us" section for members who want to send E-mail messages directly to AICPA representatives or teams. Also, with a comprehensive list of links to other accounting- and finance-related sites, "AICPA Online" serves as a gateway to additional Internet resources.

.87 *Fax Hotline.* The AICPA has a 24-Hour Fax Hotline that enables members to obtain pertinent information from a fax machine twenty-four hours a day, seven days a week. Current AICPA comment letters, conference brochures and registration forms, CPE information, AICPA Accounting Standards Executive Committee actions, and legislative news are some of the kinds of documents that can be retrieved on the

Fax Hotline. To access the hotline, simply dial (201) 938-3787 from a fax machine, follow the voice cues, and when prompted, provide the number(s) of the document(s) desired. A list of all items available through this service may be obtained via the Fax Hotline by entering document number 1.

Governmental Accounting Standards Board

.88 The GASB offers the following publications and services:

- *Codification of Governmental Accounting and Financial Reporting Standards*, as of June 30, 1996 (GCD96)—An edition as of June 30, 1997, is expected to be issued in late summer 1997.
- *GASB Original Pronouncements*, as of June 30, 1996 (GOP96)—An edition as of June 30, 1997, is expected to be issued in late summer 1997.
- *GASB Implementation Guides*—These question-and-answer special reports are an occasional service containing implementation guidance for GASB standards. To date, the GASB has issued Implementation Guides for GASB Statement Nos. 3, 9, 10, and 14. The GASB is also expected to issue implementation guidance on its Pension Statements (GASB Statement Nos. 25, 26, and 27) by mid 1997.
- *GASB Home Page*—Information about the GASB can be found on a World Wide Web home page site. The GASB address is http://www.financenet.gov/gasb.htm. Items that can be found include "Facts about GASB," summaries of all final GASB documents and of current due process documents, a list of publications, a list of Board members and staff with their E-mail addresses, and the technical plan for the current quarter.
- *Fax Information System*—The GASB has a twenty-four-hour fax system that enables interested persons to obtain information on upcoming meetings, the current technical plan, and "Facts about GASB." To access the system, dial (203) 847-0700, extension 14 from a fax machine, and follow the voice cues.
- GASB *Action Report*—This is a monthly newsletter.
- Governmental Accounting Research System (GARS)—This information-based software package allows research on GASB literature.

GASB publications and services can be obtained by calling the GASB Order Department at (203) 847-0700, extension 10.

Federal Agencies—Administrative Regulations

.89 Most federal agencies issue general administrative regulations that apply to their programs. These regulations provide general rules on how to apply for grants and contracts, how grants are made, the general conditions that apply to and the administrative responsibilities of grantees and contractors, and the compliance procedures used by the various agencies. The regulations are included in the *Code of Federal Regulations.*

.90 In 1988, a final rule, *Uniform Administrative Requirements for Grants and Cooperative Agreements with State and Local Governments*, was published, establishing a common rule to create consistency and uniformity among federal agencies in the administration of grants to and cooperative agreements with state, local, and federally recognized Indian tribal governments. The common rule has been codified in each federal agency's portion of the *Code of Federal Regulations.*

.91 Auditors should also be aware that many agencies have program-specific and other audit requirements that are not covered by OMB Circular A-133. Such requirements may relate to certain programs (such as student financial assistance or HUD-insured mortgage programs), as well as to contract audit requirements. Auditors may want to refer to the PCIE's *Revised Program Audit Guide Listing* for a summary of federal programs that have separate audit guides (see the section herein entitled "PCIE Audit Committee Guidance" for more details).

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

General Accounting Office

.92 General Accounting Office (GAO) publications include the following:

- *Government Auditing Standards, 1994 Revision*—These standards, also referred to as the Yellow Book, relate to audits of government organizations, programs, activities, and functions, and of government funds received by contractors, nonprofit organizations, and other nongovernment organizations. The standards incorporate the AICPA Statements on Auditing Standards for fieldwork and reporting, and prescribe the additional standards needed to meet the more varied interests of users of reports on governmental audits. These standards are available from the Government Printing Office (GPO), Superintendent of Documents, Washington, DC 20401; telephone (202) 783-3238; telefax (202) 512-2250; Stock No. 020-000-00-265-4.

- *Interpretation of Continuing Education and Training Requirements*—This provides guidance to audit organizations and individual auditors on implementing the CPE requirements of *Government Auditing Standards* (April 1991, 020-000-00250-6). This Interpretation is available from the GPO, Superintendent of Documents, Washington, DC 20401.

- *Assessing the Reliability of Computer-Processed Data*—This guidebook is intended mainly for auditors and evaluators, not for experts in data processing. It provides some guidelines on what auditors must do to satisfy the requirements of *Government Auditing Standards* (September 1990, GAO/OP-8.1.3).

- *Guide to Federal Agencies' Procurement of Audit Services from Independent Public Accountants*—This booklet provides a basic understanding of how independent public accountant (IPA) contracts should be awarded to officials unfamiliar with federal procurement. It discusses the special requirements of the Chief Financial Officers (CFO) Act (April 1991, GAO/AFMD-12.19.3).

- *How to Get Action on Audit Recommendations*—This guide is intended to help auditors get more action and better results from their audit work on governmental programs and operations (July 1991, GAO/OP-9.2.1).

- *Assessing Risks and Returns: A Guide for Evaluating Federal Agencies' IT Investment Decision-making*—This guide provides a structure for evaluating and assessing how well a federal agency is selecting and managing its information technology resources and to identify specific areas where improvements can be made (February 1997, GAO/AIMD-10.1.13).

- *Executive Guide: Improving Mission Performance Through Strategic Information Management and Technology*—This guide focuses on what agencies can do to improve performance by using new approaches to managing information and their related technologies (May 1994, GAO/AIMD-94-115).

- *Executive Guide: Effectively Implementing the Government Performance and Results Act*—This guide identifies key steps that agencies need to take towards the implementation of performance measurement, along with practices that can make implementation a success (June 1996, GAO/GGD-96-118).

Unless otherwise noted above, requests for copies of these publications should be sent to the GAO, P.O. Box 6015, Gaithersburg, MD 20884-6015. The telephone number is (202) 512-6000. Orders may also be placed by using the fax number (301) 258-4066. For copies of GAO reports and testimony, the status of GAO's open recommendations, and GAO's audit policy, check the GAO home page at: http://www.gao.gov. The GAO home page also contains the electronic version of *Government Auditing Standards*. For information on how to access GAO reports or other documents on the Internet, send an E-mail message to info@www.gao.gov.

Office of Management and Budget

.93 *Circulars.* OMB issues grants management circulars to establish uniform policies and rules to be observed by federal agencies for the administration of federal grants. Federal agencies then adopt these circulars in their regulations. The process for issuing grants management circulars includes due process with a notice of any proposed changes in the *Federal Register*, a comment period, and careful consideration of all

responses before issuance of final circulars. Circulars and other documents relevant to audits of state and local governmental units are listed below. For copies of circulars and bulletins, write or call the Office of Administration, Publications Office, Room 2200, New Executive Office Building, Washington, DC 20503; telephone (202) 395-7332 or check the OMB home page at http://www.whitehouse.gov/WH/EOP/OMB/html/ombhome.html. An alternate address is http://www.sbaonline.sba.gov/ignet/.

OMB Circulars Relevant to Audits of State and Local Governments and Not-for-Profit Organizations

Circular Number	*Applicability*	*Issue Date*
A-21 (Revised)	Cost principles for educational institutions	May 1996
A-87 (Revised)	Cost principles for state, local, and Indian tribal governments	May 1995
A-102 (Revised)	Grants and cooperative agreements with state and local governments	October 1994
A-122 (Revised)	Cost principles for nonprofit organizations	October 1995
A-133 (Revised)	Audits of states, local governments, and nonprofit organizations	Revision expected before June 30, 1997

.94 *OMB Circular A-133 Compliance Supplement.* The OMB Compliance Supplement sets forth the major federal compliance requirements that should be considered in an audit of states, local governments, and nonprofit organizations that receive federal assistance. It supplements OMB Circular A-133. A revision to the Supplement is expected to be issued before June 30, 1997. For a separate discussion of the Compliance Supplement, see the section of this Audit Risk Alert entitled "Regulatory, Legislative, and Other Developments."

.95 *Other Guidance.* The *Catalog of Federal Domestic Assistance (CFDA)* is a government-wide compendium of federal programs, projects, services, and activities that provide assistance or benefits to the American public. The General Services Administration (GSA) is responsible for the dissemination of federal domestic assistance information through the catalog and maintains the information database from which program information is obtained. A searchable version of the CFDA is available on the GSA home page, which is currently located at http://www.gsa.gov/fdac.

.96 Program information provided by the catalog includes authorizing legislation and audit requirements. The GSA makes copies available to certain specified national, state, and local government offices. Catalog staff may be contacted at (202) 708-5126. The catalog may be purchased from the GPO by calling (202) 783-3238.

.97 Program information is also available on machine-readable magnetic tape. The tape may be purchased by writing the Federal Domestic Assistance Catalog Staff (WKU), General Services Administration, Ground Floor, Reporters Building, 300 Seventh Street, SW, Washington, DC 20407, or calling (202) 708-5126.

PCIE Audit Committee Guidance

.98 The PCIE Audit Committee publishes supplemental, nonauthoritative guidance for federal officials addressing issues arising from the implementation of the Single Audit Act and related OMB Circulars.

.99 The PCIE Audit Committee (or its predecessors) has issued the position statements listed in the following. These position statements were developed to address issues related to audits conducted under

Copyright © 1997, American Institute of Certified Public Accountants, Inc.

the Single Audit Act of 1984, OMB Circular A-128, and the March 1990 version of OMB Circular A-133. With the exception of PCIE Statement No. 4, none of the position statements are applicable to audits conducted under the Single Audit Act Amendments of 1996 or the April 1996 OMB Circular A-133 (or subsequent versions).

- PCIE Statement No. 1 provides guidance on determining whether a series of audits of individual federal departments, agencies, and establishments may be considered an audit for purposes of the Single Audit Act.
- PCIE Statement No. 2 provides guidance to cognizant agencies on determining whether an audit report that does not meet the 50-percent rule on internal control coverage prescribed in the AICPA Audit and Accounting Guide *Audits of State and Local Governmental Units* should be accepted.
- PCIE Statement No. 3 provides guidance on using a cyclical approach to internal control reviews of nonmajor programs.
- PCIE Statement No. 4 establishes uniform procedures for referrals of substandard audits to state boards of accountancy and the AICPA.
- PCIE Statement No. 5 provides guidance for certain not-for-profit entities other than institutions of higher education or hospitals not covered by OMB Circular A-110, *Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.* This statement is obsolete since it covers issues regarding audits of not-for-profit organizations prior to the issuance of OMB Circular A-133.
- PCIE Statement No. 6 provides clarifications and additional practical working guidance to Inspectors General and others participating in audits of not-for-profit organizations performed under OMB Circular A-133. It contains questions and answers on OMB Circular A-133 and was developed from questions frequently asked.

PCIE Statement Nos. 1 through 5 are available from the U.S. Department of Education, Office of the Inspector General, Technical and Nonfederal Audit Staff, 600 Independence Avenue, SW, Washington, DC 20202-1510; telefax (202) 205-8238. PCIE Statement No. 6 (stock number 041-1-374-6) is available from the GPO, Superintendent of Documents, Mail Stop: SSOP, Washington, DC 20402-9328; telephone (202) 783-3238. All PCIE position statements are available on IGnet, the Inspectors General Internet site. The Internet address is http://www.sbaonline.sba.gov/ignet/. The position statements are located in the Single Audit Library.

.100 The PCIE has also issued the following:

- *Uniform Desk Review Guide of A-128 Single Audits* (last published in 1991) (PCIE-6-56)
- *Uniform Quality Control Review Guides for A-128 Single Audits* (last published in 1991) (PCIE-6-57)
- *Revised Program Audit Guide Listing* (July 1993) (stock number 065-0-585-9)
- *Study on Improving the Single Audit Process* (September 1993) (stock number 065-0-615-4)

Copies of the *Uniform Desk Review Guide* and the *Uniform Quality Control Guide* are available from the U.S. Department of Education, Office of Inspector General, at the preceding address and telefax number. The *Revised Program Audit Guide Listing* and the *Study on Improving the Single Audit* are available from the GPO at the above address. All of the above documents are also available for download from the Single Audit Library of IGnet, at the preceding Internet address.

Government Finance Officers Association

.101 The address, telephone number, and fax number of the Government Finance Officers Association (GFOA) are 180 N. Michigan Avenue, Suite 800, Chicago, IL 60601-7476; phone (312) 977-9700, fax (312) 977-4806, Internet address: http://www.financenet.gov/gfoa.htm. GFOA publications include the following:

- *Governmental Accounting, Auditing, and Financial Reporting* (GAAFR)—The 1994 GAAFR provides detailed professional guidance on the practical application of GAAP to state and local governments. Discussions cover both the implementation of authoritative standards and current practice. Chapters are accompanied by detailed journal entries that tie to a complete illustrative comprehensive annual financial report. Special chapters are devoted to auditing, state governments, and special entities. An extensive glossary and model chart of accounts are also provided, along with both a general index and an index of journal entries. (The *GAAFR Study Guide* is also available to assist those wishing to use the GAAFR for instructional or self-study purposes.)
- *The GAAFR Review Guide to GASB Pronouncements*—This book presents edited articles from the GFOA newsletter *GAAFR Review* that cover all of the statements and interpretations issued by the GASB. It also includes relevant articles from the newsletter on the proper application of the provisions of GASB pronouncements.
- *A Preparer's Guide to Note Disclosures*—This guide compiles all current authoritative guidance on thirty-six key disclosure topics for state and local government financial statements.
- *An Elected Official's Guide to Auditing*—This guide provides elected officials, management, and other nonaudit professionals with practical information concerning the audit process for state and local governments.
- *Audit Management Handbook*—This handbook on audit management is intended for state and local governments and CPA firms that are involved in obtaining or performing financial audits. It provides information on all aspects of the audit management process, including establishing the scope of the audit, audit procurement (including a model request for proposal), monitoring the audit, and the resolution of audit findings.
- *An Elected Official's Guide to Internal Control and Fraud Prevention*—This booklet explains the nature and purpose of internal controls and how those controls can be made more effective at all levels. It also presents examples of some of the types of fraud encountered in the public sector.
- *A Guide to Arbitrage Requirements for Governmental Bond Issues* and *1994 Supplement*—These two publications present a comprehensive overview of federal arbitrage requirements.
- *Financial Reporting Series*—This set of books contains information and creative examples of how governments present specific financial reporting information. It includes the following:
  - *Illustrations of Statistical Sections of Comprehensive Annual Financial Reports of State and Local Governments*
  - *Illustrations of Interim Financial Statements of State and Local Governments*
  - *How to Understand Local Government Financial Statements: A User's Guide*
  - *Illustrations of Combined, Combining, and Individual Fund and Account Group Financial Statements of State and Local Governments*
  - *Suggested Solutions to Governmental Accounting and Financial Reporting Practice Problems in Applying Authoritative Standards*
  - *Illustrations of Popular Reports of State and Local Governments*

* * * *

.102 This Audit Risk Alert supersedes *State and Local Governmental Developments—1996.*

* * * *

.103 Auditors should also be aware of the economic, regulatory, and professional developments in *Audit Risk Alert—1996/97* [AAM section 8010].

AAM Section 8080
Agribusiness Industry Developments—1995/96

Industry and Economic Developments

.01 The agricultural industry accounts for a significant portion of U.S. economic activity. During 1995, the industry is expected to produce output of $258 billion while employing 3.82 million workers. Agricultural activities include producing, processing, distributing, or merchandising a wide range of commodities such as wheat, vegetables, fruits, and nuts as well as breeding and feeding cattle, hogs, and sheep; operating dairies and poultry facilities; breeding horses; raising mink and chinchilla; and so forth. Although the industry includes all forms of business organizations, smaller farmers and ranchers generally view the sole proprietorship as the preferred form. And while most agricultural entities are small sole proprietorships, there is a continuing trend toward larger farms, incorporation, and specialization.

.02 Based on the assumption of favorable weather conditions, 1995 was expected to be a year of overabundance for many U.S. farmers. The U.S. Department of Agriculture initially estimated that 1994-1995 corn crop would exceed 10 billion bushels—up 58 percent from flood-ravaged 1993-1994. Soybean and wheat crops were also expected to exceed 1994 levels with production topping 2.5 billion bushels and 2.3 billion bushels, respectively. These expected record harvests, along with excess supplies of inexpensive feed for livestock, were to create downward pressures on prices and, therefore, farm revenues. However, after spring downpours and a summer heat wave, the midyear assessment is that this has been a poor growing season for some corn and soybean farmers. Therefore, a meager fall harvest is expected. While weather conditions initially pushed corn and soybean prices up, mass selling by commodity traders and mutual fund managers put extreme pressure on prices. By early August, prices had fallen from previous levels by almost 10 percent.

.03 Encouraged in part by declining feed prices, many livestock producers overbred their herds. As a result, industry analysts believe that unless there are substantial increases in prices, even the most efficient producers will have a hard time making a profit. Mitigating this situation, to an extent, is the expectation of strong exports due to a rise in global demand for agricultural products, along with the new foreign markets opened by the ratification of the General Agreement on Tariffs and Trade and the North American Free Trade Agreement. Exports to the Pacific Rim are expected to increase. China, whose consumption of U.S. farm products tripled in 1994, is likely to import in excess of $1 billion—with heavy buying of cotton and vegetable oil. Meat exports are also expected to rise along with an 11 percent increase in poultry shipments. In spite of these export gains, overall farm income for 1995 is expected to remain flat at an estimated $55 billion.

.04 The implementation of technological advances (for example, improved varieties of seeds and animal feed and improved techniques for applying fertilizer and pesticide), which have contributed to increased productivity for many U.S. farmers, is expected to continue in 1995. Great strides have also been made in adapting information technology to farming. (Refer to the "Audit Issues and Developments" section of this Audit Risk Alert for a discussion of the audit implications of computerized accounting systems.) Technological advances adopted by the industry include crop harvesting that incorporates satellite navigation systems and electronic tags worn by cows that ration feed and record levels of milk output. Advances such as these bring new precision to agricultural activities that have historically been dependent on educated guesses and good fortune.

.05 Technologically driven efficiencies will generate higher production levels from fewer farms. In 1992, the number of U.S. farms fell below 2 million for the first time since 1850. This decline is expected to continue in 1995 as farmers take advantage of emerging technologies. Agricultural entities failing to implement such advances are likely to be overwhelmed by competitive pressures and may well face extinction. Accordingly, auditors should be alert to conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about an entity's ability to continue as a going concern. Such conditions and events include, for example, (1)

negative trends such as recurring operating losses or working capital deficiencies, (2) financial difficulties such as loan defaults or denial of trade credit from suppliers, (3) internal matters such as labor difficulties, or (4) external matters such as legal proceedings or legislation that jeopardize the entity's ability to operate. In such circumstances, auditors will have to consider whether, based on conditions and events, there is substantial doubt about the entity's ability to continue as a going concern. Refer to the "Audit Issues and Developments" section of this Audit Risk Alert for further discussion of this matter.

.06 The availability and pricing of agricultural commodities are subject to significant fluctuations given the unpredictability of many factors including weather conditions, governmental farm programs and policies, changes in global demand due to population growth, and the production of similar and competitive crops. It is, therefore, fairly common for agricultural entities to offset or minimize such price risks by hedging commodity transactions. This matter is discussed further in the "Accounting Issues and Developments" section of this Audit Risk Alert.

Legislative and Regulatory Developments

.07 The federal government has a significant impact on the agricultural industry. With various objectives such as ensuring adequate production levels and stabilizing prices, the government has established loan programs that, for example, lend funds to producers that are collateralized by security interests in their crops. These crops may ultimately be used to repay the indebtedness. Programs also exist to provide agricultural producers with income replacements and subsidies in the event of natural disasters or declining price levels. Cost-sharing programs exist whereby the government provides reimbursement for the cost of certain production-related expenses. Additionally, the Internal Revenue Code affords special treatment to many agricultural entities in areas such as the choice of accounting and valuation methods. In evaluating the entity's tax accrual, auditors should be aware that such special elections may create temporary differences between pretax accounting income and taxable income pursuant to Financial Accounting Standards Board (FASB) Statement No. 109, *Accounting for Income Taxes* (AC I27).

.08 Given the recent philosophical shift in the congressional landscape, a change in the role of the federal government in the agricultural arena appears likely. With a mandate to reduce the federal budget deficit and bureaucracy, farm subsidy programs will probably face some reductions and perhaps even elimination. Auditors should be alert to the impact of such changes and the response by agricultural entities to reduced revenues and increased expenses. Testing of sales cutoff and inventory valuation, along with the evaluation of revenue recognition policies and deferred costs, may take on increased significance in such an environment.

Audit Issues and Developments

Compliance Auditing Considerations in Audits of Recipients of Governmental Financial Assistance

.09 With the intent of stabilizing prices and production of domestic agricultural output, the federal government provides direct subsidies and loans, as well as sponsoring cost-sharing and income replacement programs to agricultural producers and cooperatives. Agricultural entities that receive such governmental assistance may be subject to audit requirements associated with some of those programs. Auditors of such entities should consider the guidance set forth in AICPA Statement on Auditing Standards (SAS) No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AU section 801). SAS No. 74 (AU section 801), which supersedes SAS No. 68, *Compliance Auditing Applicable to Governmental Entities and Other Recipients of Governmental Financial Assistance,* is effective for audits of financial statements and of compliance with laws and regulations for fiscal periods ending after December 31, 1994. SAS No. 74 (AU section 801) provides general guidance to practitioners engaged to perform compliance audits of recipients of governmental financial assistance.

.10 SAS No. 74 (AU section 801) continues to recognize three levels of audits—generally accepted auditing standards (GAAS), *Government Auditing Standards,* and certain other federal requirements—of recipients of

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

governmental financial assistance. SAS No. 74 (AU section 801) is applicable when the auditor is engaged to perform an audit under GAAS, and under *Government Auditing Standards,* and in certain other circumstances involving governmental financial assistance, such as single or organization-wide audits or program-specific audits under certain federal or state audit regulations.

.11 SAS No. 74 (AU section 801) also provides general guidance to the auditor to—

- Apply the provisions of SAS No. 54, *Illegal Acts by Clients* (AU section 317), relative to detecting misstatements resulting from illegal acts related to laws and regulations that have a direct and material effect on the determination of financial statement amounts in audits of the financial statements of governmental entities and other recipients of governmental financial assistance.
- Perform a financial audit in accordance with *Government Auditing Standards,* issued by the Comptroller General of the United States.
- Perform a single or organization-wide audit or a program-specific audit in accordance with federal audit requirements.
- Communicate with management if the auditor becomes aware that the entity is subject to an audit requirement that may not be encompassed in the terms of his or her engagement.

.12 Auditors of agricultural producers or cooperatives that receive governmental financial assistance should also be alert to the 1994 Revision of *Government Auditing Standards,* commonly referred to as the "Yellow Book", as issued by the Comptroller General of the U.S. The 1994 Revision provides guidance (rather than requirements) on the auditor's consideration of internal controls for the control environment, safeguarding controls, controls over compliance with laws and regulations, and control risk assessment. It does not establish new responsibilities for testing controls. Some of the more important changes made in the 1994 Revision deal with the following:

- Submission of peer review reports
- Commenting on the status of prior year control weaknesses and other matters
- Responsibility for detection of noncompliance with contract or grant agreement provisions
- Working paper documentation
- Communication of additional services available on controls and compliance
- Report content
- Direct reporting of irregularities and illegal acts
- Applicability of the Yellow Book to other attest engagements

The Audit Risk Alert *State and Local Governmental Developments—1995* [AAM section 8070] contains a detailed discussion of the revisions to the Yellow Book.

Illegal Acts by Clients

.13 During 1995, the Federal Bureau of Investigation initiated an investigation of a major agricultural producer and a number of its competitors to determine the extent of their possible involvement in a conspiracy to fix prices on an animal feed additive. While the auditor does not ordinarily have a sufficient basis for recognizing possible violations of laws and regulations when the financial statement effect is indirect, this event, though not suggestive of an industry-wide problem, should serve as a reminder to auditors of their responsibilities with regard to possible illegal acts by clients. Auditors should design their audits to provide reasonable assurance of detecting material misstatements resulting from illegal acts that have a direct and material effect on the determination of

financial statement amounts. However, an audit performed in accordance with GAAS does not include procedures specifically designed to detect illegal acts that would have only an indirect effect on the financial statements (such as the alleged price-fixing scheme noted above). Auditors should, however, be aware of the possibility that such illegal acts may have occurred. Specific guidance in this area is set forth in SAS No. 54 (AU section 317).

Going-Concern Issues

.14 Competitive pressures and anticipated reductions in federal farm subsidies, along with declining prices, may result in increased farm failures. Auditors should be aware of their responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). SAS No. 59 (AU section 341) provides guidance to auditors in conducting an audit of financial statements in accordance with GAAS for evaluating whether there is substantial doubt about a client's ability to continue as a going-concern for a period not to exceed one year from the date of the financial statements being audited.

.15 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 (AU section 341) does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.16 If there is substantial doubt about the entity's ability to continue as a going concern, the auditor should consider whether it is likely that existing conditions and events can be mitigated by management plans and whether those plans can be effectively implemented. If the auditor obtains sufficient competent evidential matter to alleviate doubts about going-concern issues, then consideration should be given to the possible effects on the financial statements and the adequacy of the related disclosures. If, however, after considering identified conditions and events, along with management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, auditors should refer to the specific guidance set forth under SAS No. 59 (AU section 341).

Inventory

.17 Inventory is generally one of the most significant assets on the balance sheet of an agricultural producer or cooperative. Auditors should be aware that inventories of agricultural producers or cooperatives often have higher inherent risk and produce greater complexities for auditors than do inventories of other businesses.

.18 AICPA Statement of Position (SOP) 85-3, *Accounting by Agricultural Producers and Agricultural Cooperatives,* provides specific guidance on the generally accepted accounting principles (GAAP) relating to accounting for inventories of agricultural producers and cooperatives. Auditors should pay special attention to the following areas of inventory accounting that may affect audit risk:

- Whether the agricultural producer or agricultural cooperative has established an adequate internal control structure over the inventory—for example, a control structure that safeguards physical quantities and provides accurate quantity and cost data
- Whether all purchases and receipts are properly authorized and recorded
- Whether payroll records are sophisticated enough to allow labor costs to be allocated to the appropriate inventory component

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- Whether all direct and indirect costs of developing animals raised for a productive function are accumulated until the animals reach maturity and are transferred to a productive function, at which point the accumulated development costs are depreciated over the animals' estimated productive life
- Whether all direct and indirect costs of developing animals raised for sale are accumulated and the animals are accounted for at the lower of cost or market until they are available for sale. SOP 85-3 provides that agricultural producers should report animals available and held for sale (*a*) at the lower of cost or market or (*b*) in accordance with established industry practice at sales price, less estimated costs of disposal, when all of the following conditions exist:
  - — There are reliable, readily determinable, and realizable market prices for the animals.
  - — The costs of disposal are relatively insignificant and predictable.
  - — The animals are available for immediate delivery.
- Whether agricultural cooperatives are appropriately determining the passing of title for products received from patrons without payment of a set price to the patron
- Whether permanent land development costs are being appropriately capitalized by the agricultural producer or agricultural cooperative
- Whether limited-life development costs and direct and indirect development costs of orchards, groves, vineyards, and intermediate-life plants are appropriately capitalized during the development period and depreciated over the estimated useful life of the land development or of the tree, vine, or plant

.19 Auditors of agricultural producers and cooperatives may consider engaging a specialist to evaluate the quality or value of inventory. In these cases, auditors should follow the guidance of SAS No. 73, *Using the Work of a Specialist* (AU section 336). Other general guidance on auditing inventory can be found in the AICPA Auditing Procedure Study *Audit of Inventories* (Product No. 021045).

Research and Development Costs

.20 Some agricultural producers may be involved in research and development (R&D) programs in attempts to create new products or improve existing product lines. Auditors of these entities should consider whether costs related to such efforts have been appropriately accounted for and disclosed. FASB Statement No. 2, *Accounting for Research and Development Costs* (AC R50), requires that R&D costs be charged to expense when incurred. In evaluating the adequacy of disclosure of the entity's financial statements (see SAS No. 32, *Adequacy of Disclosure of Financial Statements* [AU section 431]) auditors should be aware that FASB Statement No. 2 (AC R50) requires disclosure in the financial statements of the total R&D costs charged to expense in each period for which an income statement is presented.

Derivatives

.21 Recent years have seen a growing use of innovative financial instruments, commonly referred to as derivatives, that often are very complex and can involve a substantial risk of loss. Both agricultural producers and cooperatives regularly enter into forward contracts, futures contracts, and options in order to hedge against losses related to the effect of changing prices and other uncertainties. As interest rates, commodity prices, and numerous other market rates and indices from which derivative financial instruments obtain their value have increased in volatility, a number of entities have incurred significant losses as a result of their use. The use of derivatives almost always increases audit risk. Although the financial statement assertions about derivatives are generally similar to assertions about other transactions, the auditors' approach to achieving related audit objectives may differ because certain derivatives are not generally recognized in the financial statements.

.22 It is essential that auditors understand both the economics of derivatives used by the entities whose financial statements they audit and the nature and business purpose of their entities' derivatives activities. In addition, auditors should carefully evaluate their clients' accounting for any such instruments, especially those carried at other than market value. To the extent the derivatives qualify as financial instruments as defined in FASB Statements No. 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk* (AC F25), No. 107, *Disclosures about Fair Value of Financial Instruments* (AC F25), and No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25), the disclosure requirements set forth in those statements must be met. When derivatives are accounted for as hedges of on-balance-sheet assets or liabilities or of anticipated transactions, auditors should carefully review the appropriateness of the use of hedge accounting, particularly considering whether the criteria set forth in applicable accounting literature are met.

.23 The Securities and Exchange Commission (SEC) staff has indicated in public speeches and letters of comment to registrants during the past year that publicly held companies should disclose the nature and purpose of certain commodity-based derivatives activities, the nature and terms of certain commodity-based derivatives used, and the accounting methods used even when such derivatives do not meet the definition of financial instruments set forth in the FASB Statements cited above.

.24 Many of the unique audit risk considerations presented by the use of derivatives are discussed in detail in *Audit Risk Alert—1995/96* [AAM section 8010]. Also, see in the "Accounting Issues and Developments" section—"Disclosures about Derivatives" of this Audit Risk Alert. The AICPA publication *Derivatives—Current Accounting and Auditing Literature* (Product No. 014888) summarizes current authoritative accounting and auditing guidance and provides background information on basic derivatives contracts, risks, and other general considerations.

Environmental Issues

.25 Environmental remediation liability laws, written at all levels of government, have exposed agricultural producers and cooperatives to an increased vulnerability to environmental claims. The Resource, Conservation and Recovery Act, Superfund, along with various clean air and water acts, may be used to hold agricultural entities liable for the remediation of environmental contamination. Superfund, for example, legally empowers the U.S. Environmental Protection Agency to seek recovery from current and previous owners or operators of a particular contaminated site, or anyone who generated or transported hazardous substances to such a site. The use of herbicides and pesticides by agricultural entities as well as the maintenance of underground storage tanks for hazardous fuel and chemical substances used in agricultural activities may create environmental cleanup issues.

.26 The accounting literature applicable to accounting for environmental remediation liabilities includes FASB Statement No. 5, *Accounting for Contingencies* (AC C59), FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (AC C59), and FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10). In addition, guidance is included in the consensuses reached by the Emerging Issues Task Force (EITF) of the FASB in EITF Issue No. 89-13, *Accounting for the Cost of Asbestos Removal*, Issue No. 90-8, *Capitalization of Costs to Treat Environmental Contamination*, and Issue No. 93-5, *Accounting for Environmental Liabilities*.

.27 Auditors of publicly held agricultural producers should be aware of the SEC's Staff Accounting Bulletin (SAB) No. 92, *Accounting and Disclosures Relating to Loss Contingencies*. The SAB provides the SEC staff's interpretation of current accounting literature related to the following:

- The inappropriateness of offsetting probable recoveries against probable contingent liabilities.
- Recognition of liabilities for costs apportioned to other potential responsible parties.
- Uncertainties in the estimation of the extent of environmental liabilities.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- The appropriate discount rate for environmental liabilities, if discounting is appropriate.
- Financial statement disclosures of exit costs and other items and disclosure of certain information outside the basic financial statements.

Audit Risk Alert—1995/96 [AAM section 8010] contains further discussion of issues relating to environmental remediation matters. Also, refer to the "Accounting Issues and Developments" section of this Audit Risk Alert for information on AICPA Exposure Draft: *Proposed Statement of Position on Environmental Remediation Liabilities.*

Service-Center Produced Records

.28 Many agricultural producers and agricultural cooperatives use outside service organizations to perform tasks requiring expertise or technology that do not exist within the organization. Service organizations provide various levels of services, ranging from performing a specific task under the direction of an agricultural producer or agricultural cooperative to replacing entire business units or functions. SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324), provides guidance to auditors of agricultural producers or cooperatives and to service auditors performing procedures and reporting on the control policies and procedures at service organizations.

.29 When an agricultural entity uses a service organization, the functions or processing performed by the service organization may have a significant effect on the entity's financial statements. Because the processing may be subjected to control policies and procedures that are physically and operationally separate from the entity, the internal control structure of the entity may include a component that is not directly under the control and monitoring of its management. SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319), requires auditors to obtain a sufficient understanding of an entity's internal control structure to plan an audit. For this reason, planning the audit of an agricultural producer or cooperative may require that auditors gain an understanding of the control policies and procedures performed by service organizations. When an agricultural producer or agricultural cooperative relies on a service organization's control policies and procedures over the processing of transactions that are material to their financial statements, those control procedures should be considered by the auditors.

.30 One method of obtaining information about a service center's policies and procedures is to obtain a service auditor's report as described in SAS No. 70 (AU section 324). However, the fact that an entity uses such an organization does not, in itself, require that such a report be obtained. In certain situations, the agricultural producer or cooperative may implement control policies and procedures that will make it unnecessary to obtain a service auditor's report. For example, an entity using a payroll service may routinely compare the data submitted to the service organization with reports received from the service organization to check the completeness and accuracy of the data processed. The agricultural producer or cooperative may also recompute a sample of the payroll checks for clerical accuracy and review the total payroll for reasonableness. In such circumstances, the agricultural producer or cooperative is not relying on the service organization's controls.

.31 Other factors that may be considered in determining whether to obtain a service auditor's report include—

- Whether the transactions or accounts affected by the service organization are material to the agricultural producer or cooperative's financial statements.
- The extent to which the user organization retains responsibility for authorizing the transactions and maintaining the related accountability.
- The availability of other information (for example, user manuals, system overviews, and technical manuals) that may provide the auditors with sufficient information to plan the audit.

Interpretation No. 1 of SAS No. 70, titled "Describing Tests of Operating Effectiveness and the Results of Such Tests" (AU section 9324.01—.03) and Interpretation No. 2 of SAS No. 70, titled "Service Organizations That Use

the Services of Other Service Organizations (Subservice Organizations)" (AU section 9324.04—.18) may also be relevant in this area. *Audit Risk Alert—1995/96* [AAM section 8010] contains additional information on these Interpretations.

.32 Additionally, a task force of the AICPA's Auditing Standards Board has drafted an APS that provides guidance to auditors on implementing SAS No. 70 (AU section 324). The APS provides guidance to a service auditor engaged to issue a report on the control structure policies and procedures of a service organization. It also provides guidance to user auditors engaged to audit the financial statements of an entity that uses a service organization. The task force expects to issue the APS by the end of 1995.

Computerized Accounting Systems

.33 The continuing trend by agricultural enterprises of implementing technological advances includes the computerization of in-house accounting and information systems. In the planning stage, auditors should consider the methods used by the enterprises to process accounting information since those methods will have an impact on the design of the entity's internal control structure. The extent to which computer processing is used in significant accounting applications, along with the complexity of such processing, is likely to influence the nature, timing, and extent of audit procedures. While specific audit objectives will not change, regardless of whether the processing of accounting information is automated or performed manually, the methods of applying audit procedures to gather sufficient competent evidential matter may be influenced by the method of data processing used. General guidance on how computer technologies employed by clients will affect audits can also be found in the APSs, *Auditing in Common Computer Environments* (Product No. 021059) and *Consideration of the Internal Control Structure in a Computer Environment: A Case Study* (Product No. 021055).

Agricultural Producers' Financial Statements

.34 In July 1995, the Farm Financial Standards Council issued a revised version of *Financial Guidelines for Agricultural Producers,* the purpose of which is to standardize financial reporting for agricultural producers that do not maintain their accounting records in accordance with GAAP. Auditors should be aware that these guidelines do not constitute GAAP, nor do they have the substantial support required to constitute a comprehensive basis of accounting other than GAAP.

.35 The guidelines set forth guidance that deviates from GAAP in accounting for—

- Raised breeding stock
- Deferred taxes
- Capital assets
- Inventories of grain and livestock
- Items held for resale
- Growing crops
- Government loan programs
- Depreciation

Auditors who report on financial statements prepared in conformity with such guidelines should consider whether, because of the GAAP departures, a qualified or adverse opinion should be issued as described in SAS No. 58, *Reports on Audited Financial Statements,* paragraphs 49 through 69 (AU section 508.49—.69).

Accounting Issues and Developments

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Impairment of Long-Lived Assets

.36 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the entity estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. (The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.)

.37 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.38 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. (Earlier application is encouraged.) Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.39 Given the capital intensive nature of the agricultural industry, auditors should be alert to those events or changes in circumstances which indicate that an impairment of an asset may have occurred. For example, as agricultural producers continue toward the adoption of technologically advanced farming techniques, traditional long-lived agricultural assets may be rendered obsolete. Additionally, environmental regulations may impose restrictions upon the use of a long-lived asset used in crop cultivation, thus significantly reducing its ability to generate future cash flows. In such instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.40 In considering an agricultural entity's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

Hedging Activities

.41 Agricultural entities may enter into futures contracts as a means of reducing their exposure to certain financial risks. In order to qualify as a hedge in accordance with FASB Statement No. 80, *Accounting for Futures Contracts* (AC F80), (1) the item or group of items intended to be hedged must contribute to the price or interest rate risk of the agricultural producer or cooperative and (2) there must be a high correlation of changes in the market value of the futures contracts and the fair value of, or interest income or expense associated with, the hedged items so the results of the futures contracts will substantially offset the effects of price or interest changes

[The next page is 8203-3.]

on the exposed items. Auditors should consider whether management's accounting for futures contracts, designated as hedges, is appropriate in light of the criteria set forth in FASB Statement No. 80 (AC F80).

.42 In evaluating the propriety of presentation and disclosure of hedging activities in the financial statements, auditors should also be aware that FASB Statement No. 104, *Statement of Cash Flows—Net Reporting of Certain Cash Receipts and Cash Payments and Classification of Cash Flows from Hedging Transactions* (AC C25), provides that the cash flows from hedging transactions be classified as operating cash items in the statement of cash flows and disclosed as a separate line item if material.

Disclosures About Derivatives

.43 As previously discussed, agricultural producers and agricultural cooperatives regularly employ derivative financial instruments as risk management tools (hedges). Derivatives are complex financial instruments whose values are affected by the volatility of interest rates, foreign currency indices, and commodity and other prices.

.44 In October 1994, the FASB issued Statement No. 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments* (AC F25). FASB Statement No. 119 (AC F25) requires disclosures about derivative financial instruments—futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. It also amends existing requirements of FASB Statements No. 105 (AC F25) and No. 107 (AC F25).

.45 The Statement requires disclosures about amounts, nature, and terms of derivative financial instruments that are not subject to FASB Statement No. 105 (AC F25) because they do not result in off-balance-sheet risk of accounting loss. It requires that a distinction be made between financial instruments held or issued for trading purposes (including dealing and other trading activities measured at fair value with gains and losses recognized in earnings) and financial instruments held or issued for purposes other than trading. Paragraph 12 of FASB Statement No. 119 (AC F25.115P) encourages, but does not require, entities to disclose quantitative information about risks associated with derivatives.

.46 FASB Statement No. 119 (AC F25) was effective for financial statements issued for fiscal years ending after December 15, 1994, except for organizations with less than $150 million in total assets. For those organizations, the Statement is effective for financial statements issued for fiscal years ending after December 15, 1995.

.47 The FASB Special Report, *Illustrations of Financial Instrument Disclosures*, contains illustrations of the application of FASB Statements No. 105 (AC F25), No. 107 (AC F25), and No. 119 (AC F25).

Risks and Uncertainties

.48 In December 1994, the AICPA's Accounting Standards Executive Committee issued SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. SOP 94-6 requires nongovernmental entities to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires entities to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.49 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Examples of similar estimates that may be included in the financial statements of agricultural producers and cooperatives include:

- Impairment of long-lived assets used in crop cultivation
- Estimates of environmental remediation liabilities resulting from the use of pesticides, herbicides, or fungicides

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of agricultural producers in accordance with paragraph 21 of the SOP include the following:

- Volume of business with a particular cooperative or governmental program
- Revenue from a particular crop or livestock
- Processing, distributing, or marketing agricultural products in a particular geographic area

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.50 Auditors should be alert to the requirements of the new SOP and its impact upon the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

AICPA Exposure Draft: Proposed Statement of Position on Environmental Remediation Liabilities

.51 In June 1995, the AICPA issued an exposure draft of a proposed SOP, *Environmental Remediation Liabilities*. The exposure draft provides that—

- Environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5 (AC C59) are met, and it includes benchmarks to aid in determining when those criteria are met.
- Accruals for environmental remediation liabilities should include (1) incremental direct costs of the remediation effort, as defined, and (2) costs of compensation and benefits for employees to the extent the employees are expected to devote time to the remediation effort.
- Measurement of the liabilities should include (1) the entity's specific share of the liability for a specific site, and (2) the entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- Measurement of the liability should be based on enacted laws and existing regulations, policies and remediation technology.
- Measurement should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed, and may be discounted to reflect the time value of money if the aggregate amount of the obligation and the amount and timing of cash payments for a site are fixed or reliably determinable.

The exposure draft also includes guidance on display in the financial statements of environmental remediation liabilities and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations. A separate, nonauthoritative section of the exposure draft discusses major federal environmental pollution responsibility and clean-up laws and the need to consider various individual state and other non-United States government requirements.

.52 Comments on the exposure draft were due by October 31, 1995.

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.53 The AICPA Audit and Accounting Guide *Audits of Agricultural Producers and Agricultural Cooperatives* is available through the AICPA loose-leaf subscription service. In the loose-leaf service, conforming changes

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

(those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the Guides as they appear in the service are printed annually.

Agricultural Cooperatives' Financial Reporting Checklist

.54 The AICPA Technical Information Service has published a revised version of *Checklists and Illustrative Financial Statements for Agricultural Cooperatives* as a tool for preparers and reviewers of financial statements of agricultural cooperatives.

Technical Practice Aids

.55 *Technical Practice Aids* is an AICPA publication that, among other things, contains questions received by the AICPA Technical Information Service on various subjects and the service's responses to those questions. *Technical Practice Aids,* which contains questions and answers specifically pertaining to agricultural cooperatives, is available both as a subscription service and in a paperback edition. Order information may be obtained from the AICPA Order Department.

Information Sources

.56 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.57 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.58 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.59 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.60 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

AAM Section 8090
Airline Industry Developments—1995/96

Industry and Economic Developments

.01 After incurring losses totaling $13 billion over the past five years, the airline industry is expected to show a significant profit for 1995. Industry-wide cost cutting measures, higher air fares, more passenger traffic resulting from stronger than anticipated summer travel, and increases in foreign tourism due to the weak dollar, have all contributed to making 1995 a profitable year, thus far, for the airline industry. Moreover, for the first time since 1988, no major carriers are operating under bankruptcy protection. By midyear, planes had been flying at an average capacity of 72 percent while air fares had risen approximately 6 percent over 1994 levels. Airline stock prices, bolstered by expectations of continued profitability, have appreciated by approximately 52 percent so far this year.

.02 Many airlines are attempting to solidify their positions of profitability by continuing efforts to reduce costs. Currently the focus of these efforts is travel agent commissions, which are typically the third largest expense behind labor and fuel. Led by a major carrier, most airlines are now cutting commissions by approximately 10 percent, capping them at $50 for domestic round trip tickets. As a result, analysts expect industry-wide savings of over $400 million. On the other side of the equation, the commission cap may have an adverse effect on travel agents. Some agencies may be unable to absorb a 10 percent decrease in commission revenue. Accordingly, auditors should be alert to the possibility that reduced commissions may call into question the collectibility of certain accounts receivable arising from travel agency sales.

.03 Airlines continue to seek wage and work-rule concessions from unions representing transport workers, flight attendants, and pilots. However, industry profitability along with strong demand has strengthened the unions' resolve to resist further give-backs. In response, some airlines have established employee stock programs in lieu of salary increases, to compensate for salary reductions, or as productivity incentives. See "Stock-Based Compensation" in the "Accounting Issues and Developments" section of this Audit Risk Alert for further discussion.

.04 One of the significant factors contributing to the moderate profitability experienced by the airline industry in 1994 was a decrease in fuel costs over the prior year (approximately 13 per- cent lower than 1993). However, this year the industry faces rising fuel prices (10 percent to 15 percent over 1994 prices) in addition to the impending expiration of the gasoline tax exemption. The industry is attempting to lobby Congress to extend the deadline for the exemption from the 4.3 cents per gallon tax increase imposed by the current administration. The Budget Reconciliation Bill before the House of Representatives is expected to include a provision extending the exemption for two more years. However, if the exemption, which expired in October 1995, is not extended, industry profits could be reduced by as much as $700 million. Auditors should be alert to the impact of the tax increase on those carriers with fleets comprised of older, less fuel-efficient aircraft. Smaller, undercapitalized carriers, that are unable to ground these planes, will be forced to absorb significant cost increases unless such increases can be passed on to passengers through fare increases. As such, their ability to continue as going concerns may be called into question (see the following section "Competitive Environment" for discussion of this topic).

Competitive Environment

.05 AICPA Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), requires that, in planning their audits, auditors consider matters relating to the entity's business and the industry in which it operates. One such matter for airlines is the intensely competitive environment in which the industry operates. For example, major carriers constantly face the threat of deep fare discounting from low cost rivals. In

response, carriers generally lower their own ticket prices to match the competition (a practice that leads to what are commonly referred to as fare wars) thus driving down air traffic revenues. These smaller carriers, some of which are expanding operations, typically maintain lower costs by employing a non-unionized work force, offering low-fare no-frills air travel, and by flying older aircraft which are generally less expensive to own or lease (however, see "Stage II Aircraft" in the "Regulatory Developments" section of this Audit Risk Alert). In contrast, many major carriers are saddled with the higher costs associated with unionized labor and the higher depreciation and interest expense generated by fleets of newer, more expensive aircraft. As a result, the larger carriers are more vulnerable to the effects of fare wars. Many airlines have responded to such competitive pressures by implementing restructuring programs (see "Restructurings" in the "Audit Issues" section of this Audit Risk Alert) to reduce costs. Additionally, some airlines are facing competition from unlikely sources. Carriers that rely heavily on the business traveler are beginning to see that market segment shrink. As businesses cut costs and continue to implement advanced telecommunications technologies there has been a corresponding reduction in their need to incur the expense of air travel.

.06 Despite expected industry profitability for the current year, these competitive pressures, along with higher fuel prices and costly regulatory requirements (see the following section, "Regulatory Developments"), may raise going-concern issues. Auditors should be alert to conditions and events such as those described which, when considered in the aggregate, indicate there could be substantial doubt about the airline's ability to continue as a going concern for a reasonable period of time not to exceed one year from the date of the financial statements being audited. In such circumstances, auditors should be aware of their responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). SAS No. 59 (AU section 341) provides guidance to auditors for evaluating whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time not to exceed one year from the date of the financial statements being audited.

Regulatory Developments

Passenger Facility Charges

.07 The Federal Aviation Administration (FAA) has in place a passenger facility charge (PFC) program that permits local airport authorities to impose specified per-passenger charges at commercial service airports in order to finance airport improvements. Airlines collecting PFCs under Sections 9110 and 9111 of the Aviation Safety and Capacity Expansion Act of 1990 have the responsibility for remitting such funds and, those carriers that have at least 50,000 passengers annually, are required to have annual audits of their PFCs collected, withheld, refunded/exchanged, and remitted by the carrier for the year and each quarter ended during the year. Further, implementing regulations in Part 158 of FAA regulations outlining policies and procedures for the PFC program require the airlines to obtain a report from their independent auditors on "the fairness and reasonableness of the airline's procedures for receiving, holding, and disbursing PFC revenues." These requirements are satisfied as follows:

1. An audit in accordance with generally accepted auditing standards of a schedule of PFC charges collected, withheld, refunded/exchanged, and remitted by the carrier for the year and each quarter ended during the year

2. An internal control structure examination attestation engagement in accordance with AICPA Statement on Standards for Attestation Engagements (SSAE) No. 2, *Reporting on an Entity's Internal Control Structure Over Financial Reporting* (AT section 400)

The AICPA has worked with the FAA and industry representatives to develop the following illustrative reports that satisfy both existing professional literature and the FAA's requirements.

.08

Illustrative Report on Audit of PFC Schedules

Independent Auditor's Report

XYZ Airline Inc.:

We have audited the accompanying Schedules of Passenger Facility Charges Collected, Withheld, Refunded/ Exchanged, and Remitted by XYZ Airline, Inc. (the Company) for the year and each quarter during the year ended December 31, 199X (the Schedules). The Schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on the Schedules based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Schedules are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Schedules. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Schedules. We believe that our audit provides a reasonable basis for our opinion.

The Schedules were prepared for the purpose of complying with the regulations issued by the Federal Aviation Administration of the U.S. Department of Transportation to implement Section 9110 and 9111 of the Aviation Safety and Capacity Expansion Act of 1990. Those regulations define collection as the point when agents or other intermediaries remit passenger facility charges to the airlines. Accordingly, our audit did not encompass tests of the underlying documentation supporting the report submitted by such agencies and intermediaries to the Company.

In our opinion, the Schedules referred to above present fairly, in all material respects, the passenger facility charges collected, withheld, refunded/exchanged, and remitted by XYZ Airline, Inc., for the year and each quarter during the year ended December 31, 199X, as defined in regulations issued by the Department of Transportation.

This report is intended solely for the information of the Board of Directors and management of XYZ Airline, Inc., and the appropriate airport authorities. However, this report is a matter of public record, and its distribution is not limited.

Illustrative Report on Internal Control Structure Used in Administering PFC's

Independent Auditor's Report

XYZ Airline, Inc.:

We have examined management's assertion included in its representation letter, dated February 15, 19XX, that XYZ Airline, Inc., maintained an effective internal control structure over administering passenger facility charges collected, withheld, refunded/exchanged, and remitted during the year ended December 31, 19XX, for the purpose of complying with the regulations issued by the Federal Aviation Administration of the Department of Transportation to implement sections 9110 and 9111 of the Aviation Safety and Capacity Expansion Act of 1990.

Our examination was made in accordance with standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of the internal control structure over financial reporting, testing and evaluating the design and operating effectiveness of the internal control structure, and such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control structure, errors and irregularities may occur and not be detected. Also, projections of any evaluation of the internal control structure over financial reporting to future periods are subject to the risk that the internal control structure may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion that XYZ Airline, Inc., maintained an effective internal control structure over administering passenger facility charges collected, withheld, refunded/exchanged, and remitted during the year ended December 31, 19XX, is fairly stated, in all material respects, based upon criteria established by the Committee of Sponsoring Organizations of the Treadway Commission.

This report is intended solely for the information and use of the Board of Directors and management of XYZ Airline, Inc., and the appropriate airport authorities. However, this report is a matter of public record, and its distribution is not limited.

[Date]

Passenger Facility Charges - Internal Control Examination Guide

.10 The FAA has expressed interest in developing a guide for use by independent accountants in conducting the internal control structure examination attestation engagement relative to the airline's procedures for receiving, holding, and disbursing PFC revenues. Practitioners should be alert for issuance of a final guide from the FAA.

Stage II Aircraft

.11 The FAA has issued regulations that require airlines to eliminate certain aircraft from their passenger fleets by the end of 1999. These aircraft, referred to as Stage II aircraft, include Boeing 727s, 737-100s/200s, and 747-100s; McDonnell Douglas DC-9s (except 80s) and certain DC-10s; BAC-111s; Fokker 28s; and any Boeing 707s or DC-8s that have been retrofitted to Stage II. The regulations provide airlines with the option to adopt one of the following compliance schedules:

1. Reduce their base-year fleet of Stage II aircraft (determined as of the end of 1990) by 25 percent by the end of 1994, another 25 percent by the end of 1996, another 25 percent by the end of 1998, and the remaining 25 percent by the end of 1999.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

2. Increase their percentage of Stage III airplanes to a minimum of 55 percent by the end of 1994, 65 percent by the end of 1996, 75 percent by the end of 1998, and 100 percent by the end of 1999.

The FAA's regulations provide that Stage II aircraft can qualify as Stage III if carriers fit those older model aircraft with so called hush-kits which reduce the excess noise levels they generate. These kits could cost up to $2 million each. Auditors should consider management's assessment of the impact of Stage II regulations on the carrying and residual values of existing aircraft. For a related discussion, see "Impairment of Long-Lived Assets" in the "Accounting Issues and Developments" section of this Audit Risk Alert.

Audit Issues

Ticketless Travel

.12 The continuing trend toward "ticketless" travel raises an issue to be considered by auditors. Under this system, an airline passenger can book a flight over the telephone and be assigned a reservation number (in a manner similar to the way hotel reservations are made) rather than being issued a ticket. Since no ticket is issued, there is no ticket stub available to the auditor as a source of evidential matter. Accordingly, the auditor's consideration of the internal control structure relating to ticketless travel and the performance of analytical procedures on the related revenues and receivables, will take on increased importance.

Code Sharing Agreements

.13 Airlines are increasingly becoming involved in marketing alliances known as code sharing agreements. These agreements may involve the coordination of flight schedules or sharing of seats on a common aircraft to the mutual benefit of the parties to the agreement. For example—

- A code sharing agreement between a regional and international carrier might require the coordination of their flight schedules so that the regional carrier could feed air traffic to the international carrier. The international carrier, in turn, would reciprocate by providing frequent flier miles to customers of the regional carrier.
- A carrier seeking to withdraw from an unprofitable route without losing a significant portion of that customer base, can continue to provide service to that market through a code sharing agreement with another carrier.
- A carrier may enter into a code sharing agreement to gain access to an international market from which it was excluded due to restrictive bilateral agreements between the U.S. and a particular foreign government. This can be accomplished by allocating seats on an airplane, along with the related ticket revenue, between the two carriers.

Such arrangements may give rise to a number of audit and accounting issues. In auditing the financial statements of airlines that are party to these agreements, auditors should become familiar with the provisions of code sharing agreements that may affect financial statement amounts and consider their accounting ramifications. For example, there may be a need to consider the propriety of amounts and timing of revenue to be recognized under the agreement and whether potential liabilities and related costs, have been properly recorded.

Restructurings

.14 To reverse the massive losses incurred over the past few years, many airlines implemented restructuring programs aimed at reducing costs. By revamping route systems and the frequency of flights, redeploying aircraft, obtaining labor concessions, grounding inefficient aircraft, or downsizing overall operations, many airlines have made significant progress in attaining profitability in 1995. Some carriers are likely to continue restructuring efforts in part due to the competitive pressures driving revenues down and regulatory requirements pushing costs up. When airlines restructure, auditors' should consider the impact of reductions in personnel on operations and

on the internal control structure; the appropriateness and completeness of recorded liabilities relating to current restructuring plans; the carrying value of aircraft and intangibles (such as route acquisition costs); and the appropriate period for reporting the costs associated with restructurings.

.15 In considering restructuring liabilities and costs, auditors should be aware of Financial Accounting Standards Board (FASB) Emerging Issues Task Force (EITF) Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*, for authoritative guidance on the appropriate accounting for restructurings. EITF Issue No. 94-3 also provides guidance on the types of costs that should be accrued and the timing of recognition of restructuring charges. It also prescribes disclosures that should be included in the financial statements.

.16 *Internal Control Structure Implications.* If, after obtaining an understanding of an airline's internal control structure, the auditor concludes that the effects of restructuring have had a detrimental impact on the ability of the structure to function, an increased level of control risk may be assessed. Auditors should, therefore, adjust the scope of their audits accordingly. Documentation of the understanding of the airline's internal control structure is required by SAS No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319). If that understanding reveals that the internal control structure is weak, there is increased risk that material errors and irregularities will result in misstatements in the financial statements, and a reportable condition, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist.

.17 *Publicly Held Airlines.* Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 67 (Topic 5P), *Income Statement Presentation of Restructuring Charges,* requires that restructuring charges be reported as a component of income from continuing operations.

Environmental Issues

.18 Environmental remediation liability laws, written at all levels of government, have exposed airlines to an increased vulnerability to environmental claims. The Resource, Conservation and Recovery Act, Superfund, along with various clean air and water acts, may be used to hold airlines liable for the remediation of environmental contamination. Superfund, for example, legally empowers the U.S. Environmental Protection Agency to seek recovery from current and previous owners or operators of a particular contaminated site, or anyone who generated or transported hazardous substances to such a site. An airline carrier's use, storage, and disposal of significant amounts of fossil fuels may raise issues relating to environmental contamination and, therefore, the possibility of enforced remediation.

.19 The accounting literature applicable to accounting for environmental remediation liabilities includes FASB Statement No. 5, *Accounting for Contingencies* (AC C59), FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (AC C59), and FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10). In addition, guidance is included in the consensuses reached by the EITF in Issue No. 89-13, *Accounting for the Cost of Asbestos Removal,* Issue No. 90-8, *Capitalization of Costs to Treat Environmental Contamination,* and Issue No. 93-5, *Accounting for Environmental Liabilities.*

.20 Auditors of publicly held airlines should be aware of the SEC's SAB No. 92, *Accounting and Disclosures Relating to Loss Contingencies.* The SAB provides the SEC staff's interpretation of current accounting literature related to the following:

- The inappropriateness of offsetting probable recoveries against probable contingent liabilities.
- Recognition of liabilities for costs apportioned to other potential responsible parties.
- Uncertainties in the estimation of the extent of environmental liabilities.
- The appropriate discount rate for environmental liabilities, if discounting is appropriate.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

- Financial statement disclosures of exit costs and other items and disclosure of certain information outside the basic financial statements.

Audit Risk Alert—1995/96 [AAM section 8010] contains further discussion of issues relating to environmental remediation matters. Also, refer to the "Accounting Issues and Developments" section of this Audit Risk Alert for information on AICPA Exposure Draft: *Proposed Statement of Position on Environmental Remediation Liabilities.*

Accounting Issues and Developments

Stock-Based Compensation

.21 As part of continuing cost cutting measures, some airlines have attempted to reduce payroll costs or increase productivity through the issuance of stock to employees in lieu of cash.

.22 In October 1995, the FASB issued Statement No. 123, *Accounting for Stock-Based Compensation.* The Statement encourages companies to adopt a new fair value based method of accounting for employee stock compensation plans. However, it also allows companies to continue to measure compensation cost for such plans using the intrinsic value based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees* (AC C47).

.23 The Statement also requires certain disclosures about stock-based employee compensation arrangements regardless of the method used to account for them. Companies that do not adopt the new fair value based method of accounting are required to make pro forma disclosures of net income and, if presented, earnings per share, determined as if the company had applied the new method.

.24 The accounting requirements of FASB Statement No. 123 are effective for transactions entered into in fiscal years that begin after December 15, 1995, though they may be adopted on issuance of the Statement. The disclosure requirements of the Statement are effective for financial statements for fiscal years beginning after December 15, 1995, or for an earlier fiscal year for which the Statement is initially adopted for recognizing compensation cost. Pro forma disclosures required for entities that elect to continue to measure compensation cost using APB Opinion No. 25 (AC C47) must include the effects of all awards granted in fiscal years that begin after December 15, 1994. Pro forma disclosures for awards granted in the first fiscal year beginning after December 15, 1994, need not be included in financial statements for that fiscal year but should be presented subsequently whenever financial statements for that year are presented for comparative purposes with financial statements for a later fiscal year.

.25 Auditors of airlines that issue options and warrants to their employees should consider carefully whether the accounting principles for stock-based compensation plans have been properly applied and whether financial statement disclosures are adequate.

Impairment of Long-Lived Assets

.26 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the entity estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity

expects to hold and use should be based on the fair value of the asset. (The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.)

.27 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.28 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Earlier application is encouraged. Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.29 Aircraft carrying values, and their revenue-generating ability, may be affected by economic, regulatory, and physical factors. Such factors might include the price of fuel, air-worthiness directives, required aircraft modifications, and costly maintenance procedures. For example, the increase in fuel prices this year, along with the possible expiration of the gasoline tax exemption, may hasten the obsolescence of less fuel-efficient aircraft. High fuel prices and updated air-worthiness directives may cause airlines to decide that certain types of aircraft should be temporarily grounded. Additionally, regulatory requirements such as the elimination of Stage II aircraft in an airline's fleet may negatively affect the carrying and residual values of flight equipment. In such instances, the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 121 (AC I08) may need to be applied.

.30 In considering an airline's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

Risks and Uncertainties

.31 In December 1994, the AICPA's Accounting Standards Executive Committee issued Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* SOP 94-6 requires nongovernmental entities to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires entities to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.32 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to change in the near term. Examples of similar estimates that may be included in the financial statements of airlines include, but are not limited to:

- Useful lives and residual values of flight equipment
- Amortization period of route acquisition costs
- Allowance for obsolescence of expendable parts inventory
- Estimates of liabilities for frequent flier programs

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of airlines in accordance with paragraph 21 of the SOP include the following:

- Routes of regional carriers limited to a particular geographical area
- Revenue derived from flights along a particular route
- Unionized labor subject to collective bargaining agreements
- Flights along international routes

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.33 Auditors should be alert to the requirements of the new SOP and its impact upon the financial statements of the entity being audited. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

AICPA Exposure Draft: Proposed Statement of Position on Environmental Remediation Liabilities

.34 In June 1995, the AICPA issued an exposure draft of a proposed SOP, *Environmental Remediation Liabilities*, which may be relevant to airlines. The proposed SOP provides that:

- Environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5 (AC C59) are met, and it includes benchmarks to aid in determining when those criteria are met.
- Accruals for environmental remediation liabilities should include (1) incremental direct costs of the remediation effort, as defined, and (2) costs of compensation and benefits for employees to the extent the employees are expected to devote time to the remediation effort.
- Measurement of the liabilities should include (1) the entity's specific share of the liability for a specific site, and (2) the entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- Measurement of the liability should be based on enacted laws and existing regulations, policies and remediation technology.
- Measurement should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed, and may be discounted to reflect the time value of money if the aggregate amount of the obligation and the amount and timing of cash payments for a site are fixed or reliably determinable.

The exposure draft also includes guidance on display in the financial statements of environmental remediation liabilities and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations. A separate, nonauthoritative section of the exposure draft discusses major federal environmental pollution responsibility and clean-up laws and the need to consider various individual state and other non-United States government requirements.

.35 Comments on the exposure draft were due by October 31, 1995.

Frequent Travel Award Programs

.36 Since frequent travel award programs were created in the early 1980s, methods of accounting for the programs have been the subject of considerable discussion. Currently, airlines account for frequent travel awards

by the incremental cost method, under which the airline identifies an amount based on the incremental cost associated with transporting a passenger in an otherwise empty seat, and establishes an accrual for the future obligation to provide free travel awards.

.37 In a letter sent to publicly held airlines in 1991, the SEC staff requested that the following disclosures concerning frequent travel award programs be included in SEC filings:

- The significant terms of any frequent flyer and other free travel award programs sponsored by the airline.
- The method of accounting for the programs, including the method of accounting for nontravel awards redeemed under the programs.
- If the incremental cost method is used, each material category of cost included in its measurement. In addition, a clear description of when the accrual is made and how the cost is estimated should be provided. If the liability established for provision of future services under the programs does not include a margin representing contribution to overhead and profit, that fact should be disclosed. The amount of the recorded liability or expense should be disclosed if it is material.
- The number of free travel awards outstanding at each balance-sheet date (expressed in terms of mileage, equivalent revenue value, points, trips, or any other similar measure). If the number of awards outstanding does not include partially earned awards, the effect of this exclusion should be quantified.
- The number of awards expected to be redeemed for purposes of estimating the liability recorded by the airline at each balance-sheet date. This may be expressed as a percentage of total awards outstanding. This disclosure should be accompanied by a description of the factors accounting for the difference between awards outstanding and awards expected to be redeemed, quantified to the extent practicable. The discussion should explain any material change in the ratio of expected redemptions to total outstanding awards that has occurred or may reasonably be expected to occur.
- The number of awards actually redeemed in the periods presented.
- The amount of free travel award usage expressed as a percentage of passenger miles flown for each period presented.
- If the displacement of revenue customers is reasonably likely and may materially affect liquidity or operating results, emerging trends should be described in the Management's Discussion and Analysis (MD&A) section of the annual report.

These disclosures may be included in the financial statements, in the MD&A section, or in the description-of-the-business section of the airline's SEC filings. Material changes in frequent travel awards in interim periods should be disclosed in quarterly reports on Form 10-Q.

SEC Accounting Guidance

.38 The SEC has indicated in various public speeches and in letters of comment to registrants during the year that publicly held airlines that are experiencing, or are reasonably likely to experience, liquidity constraints should carefully analyze the adequacy of their MD&A disclosures regarding liquidity. Item 303 of Regulation S-K requires that publicly held companies identify in MD&A any known trends, demands, commitments, events, or uncertainties that will result in, or that are reasonably likely to result in the company's liquidity increasing or decreasing in any material way. Further, if a material deficiency is identified, such companies should indicate the course of action that they have taken or plan to take to remedy the deficiency. Auditors should consider the consistency of the MD&A discussion of liquidity and financial condition with the company's financial statement disclosures and the auditor's report on the company's financial statements.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

.39 In regard to the required MD&A discussion of liquidity, in 1994 the SEC issued an Accounting and Auditing Enforcement Release (No. 562) relative to the alleged MD&A deficiencies of an airline. According to the release, the MD&A in certain of the airline's periodic reports failed to describe uncertainties surrounding the company's efforts to obtain additional financing and its ability to meet its existing capital commitments that were conditioned on such financing. In addition, the release states that the MD&A failed to objectively evaluate how the known uncertainties could impact the financial viability of the airline.

.40 In considering MD&A, auditors should be aware of their responsibilities pursuant to SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AU section 550). The auditor's responsibility with respect to information in a document does not extend beyond the financial information identified in the auditor's report, and the auditor has no obligation to perform any procedures to corroborate other information contained in a document, such as that presented in MD&A. However, the auditor should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. Auditors should refer to SAS No. 8 (AU section 550) for further specific guidance.

AICPA Audit and Accounting Literature

Industry Audit Guide

.41 The AICPA Industry Audit Guide *Audits of Airlines* is available through the AICPA loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the Guides as they appear in the service are printed annually.

Information Sources

.42 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

.43 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.44 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.45 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.46 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.

* * * *

.47 This Audit Risk Alert supersedes *Airline Industry Developments—1992.*

* * * *

.48 Practitioners should also be aware of the economic, industry, regulatory, and professional developments described in *Audit Risk Alert—1995/96* [AAM section 8010] and *Compilation and Review Alert—1995/96* [AAM section 8015].

Common Interest Realty Associations Industry Developments—1995/96

Industry and Economic Developments

.01 The term *common interest realty association* (CIRA) is generally used to describe an organization of real estate property owners principally responsible for serving the collective needs of the owners by providing certain services (for example, security and waste removal) as well as managing and maintaining common property that they all share or own. CIRAs are separate legal entities providing the owners, who generally agree to be bound by restrictive covenants, with a means for self-governing.

.02 The major types of CIRAs include condominiums, cooperatives, homeowner associations, and timeshares. Since their emergence during the 1960s, these forms of real estate ownership—especially homeowner associations and condominiums—have grown significantly. Currently, more than thirty million Americans live in some form of development governed by a CIRA. In a number of the country's larger urban centers, including the surrounding suburban areas, CIRA home sales comprised almost 50 percent of all sales for new homes during 1995. It should also be noted that the concept of CIRA developments is not limited to personal residences. Increasingly, common ownership arrangements have spread to resort condominiums in the form of timeshare developments; industrial/commercial condominiums, such as shopping centers and professional offices; and mixed-use developments such as hotels, offices, and residential units.

.03 The current popularity of CIRA developments arises from both the supply and demand side of the economic equation. Those in the construction industry are faced with increasing costs for land, building materials, and financing. Building high-density planned community projects allows developers to spread higher costs over a greater number of units, and increase the likelihood of profitability. Prospective home buyers also face economic constraints. The costs of single-family home ownership (including purchase price, operation, and maintenance) are prohibitive for many buyers. Additionally, market studies have shown that aging baby-boomers and families with two wage earners generally have neither the time nor the inclination to maintain and operate single-family residences. Many of these individuals seek the lower-cost, lower-maintenance features of CIRA developments.

.04 Given current demographic trends, the increasing costs of the construction and ownership of single-family homes, along with life-style preferences, industry observers expect that by the end of the century, almost one-half of the country's population will live in some form of CIRA development.

Legislative Issues

.05 Legislation governing CIRAs is primarily developed at the state level. Most states have adopted the principles set forth in the model legislation drafted by the National Conference of Commissioners of Uniform State Laws, which include the Uniform Condominium Act, the Uniform Planned Community Act, and the Model Real Estate Cooperative Act. The intent of these uniform state laws is to encourage consistency among statutes and to address the conflicting interests of developers, sponsors, buyers, lenders, and others involved in CIRAs. Most states use the uniform laws as models for the development of their own statutes, modifying them to meet individual needs.

.06 All fifty states have adopted legislation governing the management and development of condominiums, generally requiring the formation of CIRAs to manage the common use areas of condominium projects. These laws typically address such issues as the following:

- Financial management and operations

- Governing covenants
- Transference of property
- Owners' rights and obligations

At the local level, some jurisdictions are requiring the formation of CIRAs prior to their approval of site plans submitted by developers in order to ensure that the responsibility to maintain the common area does not fall on the locality.

Audit Issues and Developments

Internal Control Structure

.07 CIRAs tend to be small, financially unsophisticated organizations. As such, the internal control structures of CIRAs may include characteristics that affect an auditor's assessment of control risk. Characteristics that may increase control risk include the following:

- In a number of cases, smaller CIRAs have opted for self-management as a cost-saving measure. In such entities, an inadequate segregation of duties may result because the entire accounting function is the responsibility of one or a few individuals. Additionally, the accounting function may be undertaken by volunteer property owners who do not possess the requisite accounting skills or who are unable to devote adequate time and effort to the job.
- Ownership by sponsors and financial institutions, increased awareness of litigation and the potential for personal liability, along with personal demands, may impede the ability of some CIRAs to find qualified officers, directors, and other volunteers willing to handle the accounting, finance, and administration functions of the organization.
- Smaller CIRAs may be managed by small, understaffed, and frequently inexperienced, management companies. These factors are likely to contribute to an unreliable accounting and reporting function.
- The limited resources of some CIRAs may engender informal accounting systems with inadequate control procedures.

If the internal control structure of a CIRA includes the preceding characteristics, control risk might be assessed at a higher level. Auditors should adjust the scope of their audits accordingly, and should document the understanding of the entity's internal control structure as required by AICPA Statement on Auditing Standards (SAS) No. 55, *Consideration of the Internal Control Structure in a Financial Statement Audit* (AU section 319). If that understanding reveals that the oversight function is weak, there is increased risk that material errors and irregularities will result in misstatements in the financial statements, and reportable conditions, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AU section 325), may exist. In such circumstances, there is a greater need to recognize the increased potential for fraud. Accordingly, auditors may wish to consider the guidance set forth under SAS No. 53, *The Auditor's Responsibility to Detect and Report Errors and Irregularities* (AU section 316).

Related Parties

.08 Financial Accounting Standards Board (FASB) Statement No. 57, *Related Party Disclosures* (AC R36), defines related parties as ". . . parties with which the enterprise may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. Another party also is a related party if it can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests." In a CIRA environ-

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

ment, members of the organization's management, the developer, the sponsor, along with the governing board and their families, are generally considered to be related parties. Transactions occurring between the CIRA and such parties may be fairly common. For example, a sponsor or developer may provide managerial, maintenance, insurance, or other services to the CIRA.

.09 FASB Statement No. 57 (AC R36) sets forth the requirements for related-party disclosures. Although certain accounting pronouncements may prescribe a specific accounting treatment for related-party transactions, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis other than that which would be appropriate if the parties were not related. Auditors should view related-party transactions within the framework of existing pronouncements, placing emphasis on the adequacy of disclosure. SAS No. 45, *Omnibus Statement on Auditing Standards—1983*, "Related Parties" (AU section 334), provides guidance on procedures auditors should consider to identify related-party relationships and transactions when they are performing an audit of financial statements in accordance with generally accepted auditing standards (GAAS). Auditors should satisfy themselves concerning the required financial statement disclosures.

Interfund Receivable/Payable or Transfer?

.10 When a CIRA uses fund accounting, a payment made by one fund on behalf of another should be recognized as an interfund receivable and payable. However, if that interfund borrowing is permanent, it should instead be recorded as a transfer. The sole distinction between an interfund receivable/payable and an interfund transfer is the ability as well as the intent of the borrowing fund to repay its debt to the disbursing fund. Auditors will need to consider whether such interfund receivables/payables are borrowings or in fact transfers that will not be repaid. In addressing the appropriate accounting for this transaction, auditors may wish to consider the following—

- The manner in which the transaction is reflected in the CIRA's budget
- Whether there is a written promissory note outlining the terms of the borrowing
- The manner in which the board of director's minutes characterizes the transaction
- Whether the reserve study has been modified to reflect the altered cash flow

Information Accompanying a CIRA's Basic Financial Statements

.11 A CIRA's financial statements commonly present additional details or explanations of items in, or related to, the basic financial statements that are not required to be presented. Typically such information might include the following:

- Additional details of a particular revenue or category of expense
- Comparison of actual balances to budgeted amounts
- Details of disbursements from a special fund

When auditors submit a document containing audited financial statements to a CIRA client, auditors have a responsibility to report on all the information included in the document. The auditor's objective in this circumstance is to describe clearly the character of the auditor's work and the degree of responsibility the auditor is taking with regard to the information accompanying the basic financial statements. In such circumstances, auditors should refer to the guidance set forth under SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AU section 551).

Independence

.12 An engagement to audit a CIRA in accordance with GAAS requires independence. Auditors may face unique issues in this regard and should therefore be alert to those circumstances that may impair independence with respect to the CIRA. The AICPA *Code of Professional Conduct* sets forth guidance on matters relating to independence for auditors of CIRAs. Auditors may need to be alert to circumstances that include but are not limited to the following—

- A CIRA might look to a unit owner who is also a CPA to provide necessary services, possibly including an audit. It should be noted that the ownership of a unit in a CIRA is considered to cause an impairment of independence. In such a circumstance, consideration should be given to the guidance set forth under Ethics Ruling No. 31, *Financial Interest in a Cooperative, Condominium Association, Planned Unit Development, Homeowners Association, Timeshare Development, or Other Common Interest Realty Association* (ET section 191.061—.062).
- Smaller, unsophisticated CIRAs may look to their auditors to assist with the day to day accounting of business transactions. It should be noted that auditor independence may be impaired if the auditor is also providing manual or automated bookkeeping or data processing services to CIRA audit clients. Ethics Interpretation No. 101-3, *Accounting Services* (ET section 101.05), sets forth specific criteria that must be met in order to be considered independent.

Additional areas of consideration relevant to an audit of CIRAs might include but are not limited to the following ethics rulings:

- Ethics Ruling No. 3, *Member as Signer or Cosigner of Checks* (ET section 191.005—.006).
- Ethics Ruling No. 4, *Payroll Preparation Services* (ET section 191.007—.008).
- Ethics Ruling No. 6, *Member's Spouse as Accountant of Client* (ET section 191.011—.012).
- Ethics Ruling No. 7, *Member Providing Contract Services* (ET section 191.013—.014).
- Ethics Ruling No. 8, *Member Providing Advisory Services* (ET section 191.015—.016).
- Ethics Ruling No. 72, *Member on Advisory Board of Client* (ET section 191.144—.145).

Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance

.13 Through the Federal Housing Administration, the United States Department of Housing and Urban Development (HUD) regulates the development and operation of all housing projects, some of which include CIRAs, for which it insures mortgages or provides rent subsidies. CIRAs that receive financial assistance from HUD may be required to submit audited financial statements to HUD annually. HUD programs covering CIRAs include the following:

- Section 202, Supportive Housing for the Elderly
- Section 213, Cooperative Housing
- Section 234(c), (d), Condominium Housing
- Section 236, Interest Reduction Program for Lower and Moderate Income Housing
- Section 811, Supportive Housing for Persons with Disabilities

Auditors of these CIRAs should consider the guidance set forth in SAS No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AU section 801).

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

SAS No. 74 (AU section 801), which supersedes SAS No. 68, *Compliance Auditing Applicable to Governmental Entities and Other Recipients of Governmental Financial Assistance,* is effective for audits of financial statements and of compliance with laws and regulations for fiscal periods ending after December 31, 1994. SAS No. 74 (AU section 801) provides general guidance to practitioners engaged to perform compliance audits of recipients of governmental financial assistance.

.14 SAS No. 74 (AU section 801) reduces the level of detail provided at the auditing standard level. The detailed audit and reporting guidance previously in SAS No. 68 is now provided in AICPA Statement of Position (SOP) 92-9, *Audits of Not-for-Profit Organizations Receiving Federal Awards,* or will be included in the AICPA Audit and Accounting Guide *Not-For-Profit Organizations* which is expected to be issued in the Spring of 1996 (an exposure draft of this proposed Guide was issued on April 14, 1995).

.15 SAS No. 74 (AU section 801) continues to recognize three levels of audits—GAAS, *Government Auditing Standards,* and certain other federal requirements of recipients of governmental financial assistance. SAS No. 74 (AU section 801) is applicable when the auditor is engaged to perform an audit under GAAS, and under *Government Auditing Standards,* and in certain other circumstances involving governmental financial assistance, such as single or organization-wide audits or program-specific audits under certain federal or state audit regulations.

.16 SAS No. 74 (AU section 801) also provides general guidance to the auditor to:

1. Apply the provisions of SAS No. 54, *Illegal Acts by Clients* (AU section 317), relative to detecting misstatements resulting from illegal acts related to laws and regulations that have a direct and material effect on the determination of financial statement amounts in audits of the financial statements of governmental entities and other recipients of governmental financial assistance.

2. Perform a financial audit in accordance with *Government Auditing Standards,* issued by the Comptroller General of the United States.

3. Perform a single or organization-wide audit or a program-specific audit in accordance with federal audit requirements.

4. Communicate with management if the auditor becomes aware that the entity is subject to an audit requirement that may not be encompassed in the terms of his or her engagement.

Elimination of Uncertainty Reporting

.17 In certain instances the outcome of future events that may affect a CIRA's financial statements, including required disclosures, may not be susceptible to reasonable estimation by management. A material uncertainty relating to possible regulatory sanctions, for example, for a CIRA's failure to comply with restrictions against conveying units and common property separately is one such instance. This situation may be regarded as an uncertainty for purposes of considering the need for an explanatory paragraph in the auditor's report. Auditors of CIRAs should therefore note that the Auditing Standards Board (ASB) has issued an exposure draft of a proposed SAS, *Amendment to Statement on Auditing Standards No. 58,* Reports on Audited Financial Statements, that would eliminate the requirement that, when certain criteria are met, the auditor add an uncertainties explanatory paragraph to the auditor's report.

.18 The amendment also would expand the guidance in paragraph 37 of SAS No. 58, *Reports on Audited Financial Statements* (AU section 508.37), to indicate that "unusually important risks or uncertainties associated with contingencies, significant estimates, or concentrations" are matters that auditors may wish to emphasize in their reports. The amendment retains the option allowing auditors to disclaim an opinion on financial statements due to uncertainties.

.19 The proposal does not affect the provisions of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341), which requires that the auditor add an explanatory paragraph to the auditor's report when there is substantial doubt about the entity's ability to continue as a going concern.

.20 The ASB hopes to finalize this SAS late this year and to issue a SAS that would be effective for reports issued on or after June 30, 1996. Comments on the proposed SAS were due on October 20, 1995.

Environmental Issues

.21 Environmental remediation liability laws, written at all levels of government, have exposed entities such as CIRAs to an increased vulnerability to environmental claims. The Resource, Conservation and Recovery Act of 1976, Superfund, and various clean air and water acts may be used to hold CIRAs liable for the remediation of environmental contamination. Superfund, for example, legally empowers the United States Environmental Protection Agency to seek recovery from current and previous owners or operators of a particular contaminated site, or anyone who generated or transported hazardous substances to such a site. Real estate developments such as CIRAs may be subject to environmental cleanup issues on the basis of circumstances such as whether:

- The project area contains wetlands.
- Past activities could have adversely affected the soil or groundwater.
- Current waste disposal practices are appropriate.

The accounting literature applicable to accounting for environmental remediation liabilities includes FASB Statement No. 5, *Accounting for Contingencies* (AC C59), FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (AC C59), and FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts* (AC B10). In addition, guidance is included in the consensuses reached by the Emerging Issues Task Force (EITF) of the FASB in EITF Issue No. 89-13, *Accounting for the Cost of Asbestos Removal,* Issue No. 90-8, *Capitalization of Costs to Treat Environmental Contamination,* and Issue No. 93-5, *Accounting for Environmental Liabilities.*

.22 *Audit Risk Alert—1995/96* [AAM section 8010] contains further discussion of issues relating to environmental remediation matters. Also, refer to the "Accounting Issues and Developments" section of this Audit Risk Alert for information on AICPA Exposure Draft, *Proposed Statement of Position on Environmental Remediation Liabilities.*

Service-Center Produced Records

.23 Many CIRAs contract with others to perform tasks requiring expertise or technology that do not exist within the organization. For example, a CIRA's board of directors may retain a managing agent to provide services such as bookkeeping and accounting. Such services may have an impact on the nature, timing, and extent of the audit procedures to be performed. In such circumstances, the auditor should consider SAS No. 70, *Reports on the Processing of Transactions by Service Organizations* (AU section 324). SAS No. 70 (AU section 324) provides guidance to auditors of CIRAs and to service auditors performing procedures and reporting on the control policies and procedures at service organizations.

.24 When a CIRA uses a service organization, the functions or processing performed by the service organization may have a significant effect on the CIRA's financial statements. Because the processing may be subjected to control policies and procedures that are physically and operationally separate from the entity, the internal control structure of the entity may include a component that is not directly under the control and monitoring of its management. SAS No. 55 (AU section 319), requires auditors to obtain a sufficient understanding of an entity's internal control structure to plan an audit. For this reason, planning the audit of a CIRA may require that auditors gain an understanding of the control policies and procedures performed by service organiza-

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

tions. When a CIRA relies on a service organization's control policies and procedures over the processing of transactions that are material to their financial statements, those control procedures should be considered by the auditors.

.25 One method of obtaining information about a service center's policies and procedures is to obtain a service auditor's report, as described in SAS No. 70 (AU section 324). However, the fact that an entity uses such an organization does not, in itself, require that such a report be obtained. In certain situations, the CIRA may implement control policies and procedures that will make it unnecessary to obtain a service auditor's report. For example, an entity using a payroll service may routinely compare the data submitted to the service organization with reports received from the service organization to check the completeness and accuracy of the data processed. The CIRA may also recompute a sample of the payroll checks for clerical accuracy and review the total payroll for reasonableness. In such circumstances, the CIRA is not relying on the service organization's controls.

.26 Other factors that may be considered in determining whether to obtain a service auditor's report include the following:

- Whether the transactions or accounts affected by the service organization are material to the CIRA's financial statements
- The extent to which the user organization retains responsibility for authorizing the transactions and maintaining the related accountability
- The availability of other information (for example, user manuals, system overviews, and technical manuals) that may provide the auditors with sufficient information to plan the audit

Interpretation No. 1 of SAS No. 70, titled "Describing Tests of Operating Effectiveness and the Results of Such Tests" (AU section 9324.01—.03) and Interpretation No. 2 of SAS No. 70, titled "Service Organizations That Use the Services of Other Service Organizations (Subservice Organizations)" (AU section 9324.04-.18), may also be relevant in this area. *Audit Risk Alert—1995/96* [AAM section 8010] contains additional information on these Interpretations. Additionally, a task force of the ASB has drafted an Auditing Procedure Study (APS) that provides guidance to auditors on implementing SAS No. 70 (AU section 324). The APS provides guidance to a service auditor engaged to issue a report on the control structure policies and procedures of a service organization. It also provides guidance to user auditors engaged to audit the financial statements of an entity that uses a service organization. The task force expects to issue the APS in early 1996.

Accounting Issues and Developments

Impairment of Long-Lived Assets

.27 In March 1995, the FASB issued Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of* (AC I08). FASB Statement No. 121 (AC I08) establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The Statement (AC I08) requires that long-lived assets and certain identifiable intangibles to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, the Statement (AC I08) requires that the entity estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized. Otherwise, an impairment loss is not recognized. Measurement of an impairment loss for long-lived assets and identifiable intangibles that an entity expects to hold and use should be based on the fair value of the asset. (The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties.)

.28 The Statement (AC I08) also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less cost to sell, except for assets covered by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions* (AC I13). Assets covered by APB Opinion No. 30 (AC I13) will continue to be reported at the lower of the carrying amount or the net realizable value.

.29 The Statement (AC I08) is effective for financial statements for fiscal years beginning after December 15, 1995. Restatement of previously issued financial statements is not permitted by the Statement (AC I08). The Statement (AC I08) requires that impairment losses resulting from its application be reported in the period in which the recognition criteria are first applied and met. The Statement (AC I08) requires that initial application of its provisions to assets that are being held for disposal at the date of adoption should be reported as the cumulative effect of a change in accounting principle.

.30 In considering a CIRA's implementation of FASB Statement No. 121 (AC I08), auditors should obtain an understanding of the policies and procedures used by management to determine whether all impaired assets have been properly identified. Management's estimates of future cash flows from asset use and impairment losses should be evaluated pursuant to the guidelines set forth in SAS No. 57, *Auditing Accounting Estimates* (AU section 342).

Risks and Uncertainties

.31 In December 1994, the AICPA's Accounting Standards Executive Committee issued SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* SOP 94-6 requires nongovernmental entities to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of financial statements. In addition, if specified criteria are met, SOP 94-6 requires organizations to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.32 Paragraph 18 of SOP 94-6 gives examples of items that may be based on estimates that are particularly sensitive to changes in the near term. Examples of similar estimates that may be included in the financial statements of CIRAs include, but are not limited to estimates of the following:

- Liabilities arising from lawsuits against the CIRA
- The collectibility of assessments receivable
- Liabilities arising from environmental remediation

Examples of concentrations that may meet the criteria that require disclosure in the financial statements of CIRAs in accordance with paragraph 21 of the SOP include concentrations in the following:

- The available sources of supply of materials, labor, or services
- The number and amount of loans obtained from a particular lender
- The geographic area in which the CIRA is located

The provisions of SOP 94-6 are effective for financial statements issued for fiscal years ending after December 15, 1995, and for financial statements for interim periods in fiscal years subsequent to the year for which SOP 94-6 is first applied.

.33 Auditors should be alert to the requirements of the new SOP and its impact on the financial statements they audit. Auditors should carefully consider whether all significant estimates and concentrations have been identified and considered for disclosure.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

CIRA Investments in Debt and Equity Securities

.34 A CIRA's governing documents may limit the kind of investments that can be made with surplus funds, or that decision may be left to the CIRA's board of directors. CIRAs may choose to invest in marketable securities such as debt securities (for example, U.S. Treasury or municipal securities) or equity securities (for example, common stock, stock rights and warrants). In that CIRA accounting is set forth primarily by the same literature that applies to commercial businesses, FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (AC I80), should be considered when accounting for a CIRA's investments in marketable securities. It should be noted that while FASB Statement No. 115 (AC I80) does not apply to nonprofit organizations, it is applicable to CIRAs.

.35 FASB Statement No. 115 (AC I80) addresses the accounting and reporting for investments in equity securities that have readily determinable fair values (previously addressed by FASB Statement No. 12, *Accounting for Certain Marketable Equity Securities*) and for all investments in debt securities. Statement No. 115 (AC I80) does not cover securities accounted for by the equity method and investments in consolidated subsidiaries. Statement No. 115 (AC I80) establishes three categories of reporting for debt and marketable equity securities:

- Held-to-maturity securities (debt securities that the entity has the positive intent and ability to hold to maturity), to be reported at amortized cost with realized gains and losses reported in the CIRA's statement of revenues and expenses
- Trading securities (debt and equity securities that are bought and held principally for the purpose of selling them in the near future), to be reported at fair value, with unrealized gains and losses reported in the CIRA's statement of revenues and expenses
- Available-for-sale securities (debt and equity securities not classified as either held-to-maturity or trading), to be reported at fair value with unrealized gains and losses excluded from earnings and reported in a separate component of member's equity until realized

Given the nature of the purpose of CIRAs, it is likely that the securities they hold will be classified either as held-to-maturity or available-for-sale.

.36 FASB Statement No. 115 (AC I80) also requires CIRAs to determine whether declines in the fair value of individual securities classified as either held-to-maturity or available-for-sale below their amortized cost bases are other than temporary. For example, if it is probable that a CIRA will be unable to collect all amounts due, according to the contractual terms of a debt security not impaired at acquisition, an other-than-temporary impairment is considered to have occurred. If such a decline is judged to be other than temporary, the cost basis of the individual security should be written down to fair value as the new cost basis, with the amount of the write-down included in earnings (that is, accounted for as a realized loss). The Statement (AC I80) also specifies the accounting treatment for transfers between categories.

.37 Auditors should be aware of some of the issues that are likely to arise when the Statement (AC I80) is applied. Auditing financial statements involving the classification of investments in debt and equity securities pursuant to FASB Statement No. 115 (AC I80) may involve a high degree of judgment about such matters as the following:

- How auditors should evaluate subjective exceptions for sales of securities designated as held-to-maturity (including the interpretation of restrictive terms such as *isolated, nonrecurring,* and *unusual*)
- How auditors should evaluate the ability of a CIRA to hold securities to maturity, particularly when going-concern issues arise
- Whether cash flow projections are needed in conjunction with assessing a CIRA's ability to hold securities to maturity

- How to evaluate whether declines in the value of investments are other than temporary (Refer to Auditing Interpretation No. 1 of SAS No. 1, section 332, *Long-Term Investments* titled "Evidential Matter for the Carrying of Marketable Securities" [AU section 9332.01—.14], for guidance in this area.)

It should also be noted that the FASB has recently released an implementation guide for FASB Statement No. 115 (AC I80) that addresses some of the issues noted above.

AICPA Exposure Draft: Proposed Statement of Position on Environmental Remediation Liabilities

.38 In June 1995, the AICPA issued an exposure draft of a proposed SOP, *Environmental Remediation Liabilities*. The exposure draft provides that—

- Environmental remediation liabilities should be accrued when the criteria of FASB Statement No. 5 (AC C59) are met, and it includes benchmarks to aid in determining when those criteria are met.
- Accruals for environmental remediation liabilities should include (1) incremental direct costs of the remediation effort, as defined, and (2) costs of compensation and benefits for employees to the extent the employees are expected to devote time to the remediation effort.
- Measurement of the liabilities should include (1) the entity's specific share of the liability for a specific site, and (2) the entity's share of amounts related to the site that will not be paid by other potentially responsible parties or the government.
- Measurement of the liability should be based on enacted laws and existing regulations, policies, and remediation technology.
- Measurement should be based on the reporting entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed, and may be discounted to reflect the time value of money if the aggregate amount of the obligation and the amount and timing of cash payments for a site are fixed or reliably determinable.

The exposure draft also includes guidance on display in the financial statements of environmental remediation liabilities and on disclosures about environmental-cost-related accounting principles, environmental remediation loss contingencies, and other loss contingency disclosure considerations. A separate, nonauthoritative section of the exposure draft discusses major federal environmental pollution responsibility and cleanup laws and the need to consider various individual state and other non-United States government requirements. Comments on the exposure draft were due by October 31, 1995.

AICPA Audit and Accounting Literature

Audit and Accounting Guide

.39 The AICPA Audit and Accounting Guide *Common Interest Realty Associations* is available through the AICPA loose-leaf subscription service. In the loose-leaf service, conforming changes (those necessitated by the issuance of new authoritative pronouncements) and other minor changes that do not require due process are incorporated periodically. Paperback editions of the Guides as they appear in the service are printed annually.

Information Sources

.40 Further information on matters addressed in this risk alert is available through various publications and services listed in the table at the end of this document. Many non-government and some government publications and services involve a charge or membership requirement.

 Copyright © 1995, American Institute of Certified Public Accountants, Inc.

.41 Fax services allow users to follow voice cues and request that selected documents be sent by fax machine. Some fax services require the user to call from the handset of the fax machine, others allow users to call from any phone. Most fax services offer an index document, which lists titles and other information describing available documents.

.42 Electronic bulletin board services allow users to read, copy, and exchange information electronically. Most are available using a modem and standard communications software. Some bulletin board services are also available using one or more Internet protocols.

.43 Recorded announcements allow users to listen to announcements about a variety of recent or scheduled actions or meetings.

.44 All phone numbers listed are voice lines, unless otherwise designated as fax (f) or data (d) lines. Required modem speeds, expressed in bauds per second (bps), are listed data lines.
