HOW TO USE THIS VOLUME

NEW CHANGES

This edition contains the following significant additions:

- Updated compilation and review guidance [AAM section 2000] reflecting the issuance of SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (AR sections 100 and 400)
- 2002/2003 Audit Risk Alerts [AAM section 8000]
- New engagement checklist, addressing independence compliance
- Extensive SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AU section 316), guidance [section 3000]
- Updated State and Local Government section [AAM section 12,000] reflecting new pronouncements

Scope of the Volume . . .

This Volume, which is a reprint of the looseleaf edition, brings together for continuing reference a set of nonauthoritative audit tools and illustrations prepared by the staff of the Accounting and Auditing Publications Team of the American Institute of Certified Public Accountants.

How This Volume Is Arranged . . .

The contents of this Volume are arranged as follows:

Introduction
 Compilation and Review
 Engagement Planning and Administration
 Internal Control
 Audit Approach and Programs
 Audit Documentation
 Correspondence, Confirmations & Representations
 Audit Risk Alerts
 Supervision, Review and Report Processing
 Accountants' Reports
 Quality Control
 State and Local Governments

How to Use This Volume . . .

The arrangement of material is indicated in the general table of contents at the front of the Volume. There is a detailed table of contents covering the material within each major division.

The major divisions are subdivided into sections, each with its own section number. Each paragraph within a section is decimally numbered. For example, AAM section 7100.01 refers to the first paragraph of section 7100, *Control of Confirmations and Correspondence*. Section and paragraph numbers located on each page are provided as corner references at the bottom of each page.

The AICPA *Professional Standards* is referenced by the use of the following abbreviations: AU (Auditing), AT (Attestation Standards), AR (Accounting and Review Services), ET (Code of Professional Conduct), BL (Bylaws), QC (Quality Control), and PR (Peer Review).

The AICPA *Technical Practice Aids* is referenced by the use of the following abbreviations: AUD (Auditing and Attestation Statements of Position).

The FASB *Accounting Standards Current Text* is referenced in a similar manner by the use of the abbreviation AC before the section and paragraph numbers. The *Current Text* contains an abridged version of the currently effective financial and reporting standards, as amended.

Quotations of accounting standards in this Volume are derived from the original pronouncements and may have been editorially changed in the *Current Text*.

AAM Section 1000

Introduction

This manual has not been approved, disapproved, or otherwise acted upon by any senior technical committees of the American Institute of Certified Public Accountants or the Financial Accounting Standards Board and has no official or authoritative status.

AAM Section 1100

Introduction

.01 This manual has been prepared by the staff of the American Institute of Certified Public Accountants and issued as a nonauthoritative practice aid. The materials included in it are intended primarily as a reference source for conducting audit, review, and compilation engagements. The objective is to provide practitioners with the tools needed to help plan, perform, and report on their engagements. *The manual is not intended to serve as a complete or comprehensive quality control system.* The materials are not intended as a substitute for the professional judgments that must be applied by practitioners. The manual, where practicable, offers choices and alternatives rather than particular positions. The manual is not a substitute for the authoritative technical literature and users are urged to refer directly to applicable authoritative pronouncements for the text of technical standards.

.02 Some sections of the manual include quotations from Statements on Auditing Standards and other authoritative pronouncements. Those quotations are intended only to illustrate certain matters, not to serve as a substitute for careful study of the relevant pronouncements. References are made throughout the manual to the original authoritative pronouncements and to their section numbers in *AICPA Professional Standards* and the *FASB Accounting Standards Current Text* to help users locate those authoritative pronouncements.

.03 The authors hope that the manual will be helpful to practitioners in the conduct of their audit and accounting practice. However, no generalized material, such as that included in this manual, can be a substitute for development and implementation by a firm of a system of quality control which is appropriately comprehensive and suitably designed in relation to the firm's organizational structure, its policies, and the nature of its practice.

.04 Explanation of References:

AC =	Reference to section number in <i>FASB Accounting Standards Current Text</i>
APB =	AICPA Accounting Principles Board Opinion
AR =	Reference to section number in <i>AICPA Professional Standards</i> (vol. 2)
ARB =	AICPA Accounting Research Bulletin
AT =	Reference to section number in <i>AICPA Professional Standards</i> (vol. 1)
AU =	Reference to section number in <i>AICPA Professional Standards</i> (vol. 1)
AUD =	Reference to section number in the <i>Auditing and Attestation Statements of Position in AICPA Technical Practice Aids</i> (vol. 2)
EITF =	Emerging Issues Task Force consensus
FASBI =	FASB Interpretation
PB =	AcSEC Practice Bulletin
QC =	Reference to section number in <i>AICPA Professional Standards</i> (vol. 2)
SAS =	AICPA Statement on Auditing Standards
SFAS =	FASB Statement of Financial Accounting Standards
SOP =	AICPA Statement of Position
SQCS =	Statement on Quality Control Standards
SSAE =	Statement on Standards for Attestation Engagements
SSARS =	Statement on Standards for Accounting and Review Services

.05 The manual is in looseleaf format in anticipation of updating and expansion. Changes are expected to arise from three main sources:

- (1) Comments and suggestions from practitioners. Since this manual is a product of AICPA staff, not of a committee of practitioners, it is particularly important that practitioners advise the staff on any suggestions for material that could be improved or added.
- (2) Issuance of new official pronouncements.
- (3) Other additions to or deletions from the manual as a result of continued staff study.

Comments and suggestions should be addressed to:

Accounting and Auditing Publications
AICPA
Harborside Financial Center
201 Plaza III
Jersey City, NJ 07311-3881

or call Lori West at (201) 938-3067.

.06 For disclosure checklists and illustrative financial statements, obtain the AICPA looseleaf service entitled *Financial Statement Preparation Manual* (FSP). The FSP includes disclosure checklists and illustrative financial statements for the following:

Banks and Savings Institutions
Cash- and Tax-Basis Financial Statements
Common Interest Realty Associations
Construction Contractors
Corporations
Defined Benefit Pension Plans
Defined Contribution Pension Plans
Development Stage Enterprises
Health and Welfare Benefit Plans
Health Care Organizations
Investment Companies
Life Insurance Companies
Not-for-Profit Organizations
Oil and Gas Producers
Personal Financial Statements
Property and Liability Insurance Companies
Prospective Financial Statements
Real Estate Ventures
State and Local Governmental Units

AAM Section 1200

How to Use the Audit and Accounting Manual

Overview

.01 The Audit and Accounting Manual (AAM) is designed to provide practitioners with the tools needed to help plan, perform, and report on audit, review, and compilation engagements. *The AAM is not intended to serve as a complete or comprehensive quality control system.* The AAM is comprised of the following sections:

<u>Section No.</u>	<u>Section Name</u>
2000	Compilation and Review
3000	Engagement Planning & Administration
4000	Internal Control
5000	Audit Approach & Programs
6000	Working Papers
7000	Correspondence, Confirmations & Representations
8000	Audit Risk Alerts
9000	Supervision, Review & Report Processing
10,000	Accountants' Reports
11,000	Quality Control
12,000	State and Local Governments

Audits

.02 To perform an engagement in accordance with generally accepted auditing standards (GAAS) an auditor must comply with the General Standards, the Standards of Field Work, the Standards of Reporting, and the Quality Control Standards.

.03 The general standards are concerned with the qualifications of the auditor and the qualitative aspect of the work performed. They specifically address the auditor's training and proficiency, independence, and due care in the performance of work.

.04 The standards of field work address the manner used by the auditor to perform the audit. This standard begins with the appointment of the auditor and ends with the auditor communicating to those responsible for the oversight of financial reporting of the entity being audited.

.05 The standards of reporting are concerned with the opinion the auditor renders on the client's financial statements.

.06 The AAM will assist the auditor in performing an audit, in accordance with GAAS, in the following ways:

- a. The Quality Control section [AAM section 11,000] includes sample forms which can be used by a firm to document its adherence to the AICPA requirement for a System of Quality Control for a CPA Firm. Included in this section are forms that relate to the five elements of Quality Control:
 - Independence, Integrity, and Objectivity
 - Personnel Management
 - Acceptance and Continuance of Clients and Engagements
 - Engagement Performance
 - Monitoring
- b. The Engagement Planning & Administration section [AAM section 3000] provides guidance in the planning stage. Included in this section are various formats of audit assignment controls, engagement letters, and a planning program.
- c. The Internal Control section [AAM section 4000] conforms to the *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO report) and the Audit Guide *Consideration of Internal Control in a Financial Statement Audit*. This section provides guidance in evaluating internal control by utilizing checklists, questionnaires, and other generalized aids.
- d. The Audit Approach & Programs section [AAM section 5000] explains how the auditor should design audit programs as well as providing an illustrative audit program which can be used to assist the auditor in designing an audit program for specific clients.
- e. The Audit Documentation section [AAM section 6000] provides the auditor with a general discussion of the purpose of audit documentation.
- f. The Correspondence, Confirmations & Representations section [AAM section 7000] provides the auditor with numerous examples of confirmations, illustrative inquiries to legal counsel, representation letters, communications with audit committees, as well as a reliance letter.
- g. The Supervision, Review & Report Processing section [AAM section 9000] provides the auditor with an overview of supervision and review procedures as well as engagement review programs for the in-charge accountant and the partner responsible for the engagement. It also provides procedures for processing the report.

- h. The Accountants' Reports section [AAM section 10,000] addresses the format of the accountants' report and numerous examples of the auditor's report.

Compilation and Review Services

.07 To perform either a review or compilation engagement in accordance with Statements on Standards for Accounting and Review Services (SSARS), an accountant must comply with the standards promulgated by the Accounting and Review Services Committee. There have been nine statements issued.

.08 SSARS No. 1, *Compilation and Review of Financial Statements* (AR section 100), provides guidance to accountants concerning the standards and procedures applicable to compilation and review services for a nonpublic entity. The statement also provides examples of standard single year reports and departures from those reports.

.09 SSARS No. 2, *Reporting on Comparative Financial Statements* (AR section 200), establishes standards for reporting on comparative financial statements of a nonpublic entity when one or more prior periods have been compiled or reviewed in accordance with SSARS No. 1 (AR section 100).

.10 SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AR section 300), provides an alternative form of standard compilation report when reporting on a prescribed form calls for a departure from generally accepted accounting principles (GAAP).

.11 SSARS No. 4, *Communications Between Predecessor and Successor Accountants* (AR section 400), provides guidance to a successor accountant who communicates with a predecessor accountant regarding acceptance of an engagement to compile or review financial statements of a nonpublic entity.

.12 SSARS No. 5 (Deleted by SSARS No. 7).

.13 SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AR section 600), provides an exemption from SSARS No. 1 for personal financial plans.

.14 SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992*.

.15 SSARS No. 8, *Amendment to Statements on Standards for Accounting and Review Services No. 1, Compilation and Review of Financial Statements* (AR section 100), provides communication and performance requirements for unaudited financial statements submitted to a client that are not expected to be used by a third party.

.16 SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (AR sections 100 and 400).

.17 The AAM will assist the accountant in performing compilation and review engagements in accordance with SSARS in the following ways:

- a. The Engagement Planning and Administration section [AAM section 2200] provides guidance in the planning stage. Addressed are engagement letters, changes in the level of service for the engagement, sample acceptance form, sample information form, and sample engagement letters.
- b. The Working Papers section [AAM section 2300] provides sample procedures for both compilation and review engagements, representation letters, and checklists.
- c. The Form and Content of Financial Statements [AAM section 2400] provides guidance on the statements, notes, supplementary information, and subsequent discovery of facts.

- d. The Accountants' Reports section [AAM section 2500] includes examples of several reports for the engagement.
- e. The Special Areas section [AAM section 2600] addresses prescribed forms and specified elements.

.18 It is suggested that the accountant also review the following areas when performing compilation and review engagements for additional guidance:

Correspondence, Confirmations & Representations [AAM section 7000]

Quality Control [AAM section 11,000]

Audit Risk Alerts

.19 The Audit Risk Alerts section [AAM section 8000] is intended to provide accountants with an overview of recent economic, professional, and regulatory developments that may affect their engagements.

AAM Section 2000

Compilation and Review

This manual is a nonauthoritative practice aid and does not include extensive explanation or discussion of authoritative pronouncements. Users of this manual should refer directly to applicable authoritative pronouncements when appropriate.

The exhibits are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of reference when preparing working papers or a report for a compilation or review engagement.

AAM Section 2100

Introduction

.01 Statements on Standards for Accounting and Review Services (SSARS) are issued by the American Institute of Certified Public Accountants (AICPA) Accounting and Review Services Committee (ARSC), the senior technical committee of the AICPA designated by its Council to issue pronouncements in connection with unaudited financial statements and other unaudited financial information of nonpublic entities. (A complete listing of SSARS and the full text can be found in *AICPA Professional Standards*, vol. 2.) A nonpublic entity is defined as any entity other than (a) one whose securities trade in a public market either on a stock exchange or over the counter, (b) one that files with a regulatory agency in preparation for the sale of any class of its securities in a public market, or (c) subsidiary, corporate joint venture, or other entity controlled by an entity covered by (a) or (b). Thus, if an entity does not fall into either category (a), (b), or (c) in the above definition, it is a nonpublic entity.

.02 Although SSARS applies only to engagements involving nonpublic entities, there are circumstances when an accountant may perform a review of financial statements of a public entity under SSARS. For example, paragraph 1 of SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992*, notes that when a public entity does not have its annual financial statements audited, an accountant may review the entity's annual or interim financial statements in accordance with SSARS as permitted by footnote 4 of Statements on Auditing Standards (SAS) No. 26, *Association with Financial Statements* (AU section 504.05).

Overview of SSARS and Interpretations

.03 ARSC has issued nine Statements on Standards for Accounting and Review Services. They are

- SSARS No. 1, *Compilation and Review of Financial Statements* (December 1978)

Replaced the former unaudited engagement standards contained in SAS No. 1. The statement provides guidance to CPAs concerning the standards and procedures applicable to engagements to compile or review financial statements. It does not establish standards or procedures for other services (e.g., tax return preparation or bookkeeping services).

- SSARS No. 2, *Reporting on Comparative Financial Statements* (October 1979)

Applies to reports on any comparative financial statements that include current period compiled or reviewed financial statements of an entity that is nonpublic as of the current period. Otherwise, SASs would apply.

- SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (December 1981)

Amends SSARS Nos. 1 and 2 to provide for an alternative form of standard compilation report on prescribed forms that call for departures from GAAP. It applies to any standard, preprinted form designed or adopted by the body to which it is submitted (e.g., a bank).

- SSARS No. 4, *Communications Between Predecessor and Successor Accountants* (December 1981)

Provides guidance to a successor who decides to communicate with a predecessor. The standard does not require communication and does require the predecessor to respond if authorized by the client.

- SSARS No. 5, *Reporting on Compiled Financial Statements* (July 1982; Deleted November 1992 by the issuance of SSARS No. 7)

All of the former SSARS No. 5 requirements are now included in SSARS Nos. 1, 2, and 3.

- SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (September 1986)

Provides an optional exemption from SSARS No. 1 if the accountant establishes an understanding with the client, preferably in writing, that the financial statements:

- Will be used solely to assist the client and the client's advisors to develop the client's personal financial goals and objectives
 - Will not be used to obtain credit or for any other purpose
 - Indicate that nothing comes to the CPA's attention during the engagement that causes him to believe that the financial statements will be used to obtain credit or for other purposes
- SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992* (November 1992)
- Contains a number of technical amendments to various standards
- SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1, Compilation and Review of Financial Statements* (October 2000)
- Amends SSARS No. 1 to create a management-use-only compilation (and make other changes)
- SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (November 2002)

Contains a number of technical amendments to SSARS No. 1 and SSARS No. 4

.04 SSARS No. 1 (AR section 100) defines a compilation of financial statements and a review of financial statements. A *compilation* of financial statements is defined as presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the financial statements. A *review* of financial statements involves performing inquiry and analytical procedures to provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications that should be made to the financial statements for them to be in conformity with generally accepted accounting principles or, if applicable, with another comprehensive basis of accounting (OCBOA).

.05 Paragraph 4 of SSARS No. 1 (AR section 100.04) defines a *financial statement* as.

A presentation of financial data, including accompanying notes, derived from the accounting records intended to communicate an entity's economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles. Financial forecasts, projections, and similar presentations, and financial presentations included in tax returns are not financial statements for purposes of this statement. SSARS No. 1 also gives the following specific examples of financial statements:

- Balance sheet
- Statement of income
- Statement of comprehensive income
- Statement of retained earnings
- Statement of cash flows

- Statement of changes in owners' equity
- Statement of assets and liabilities (with or without owners' equity accounts)
- Statement on revenues and expenses
- Statement of financial position
- Statement of activities
- Summary of operations
- Statement of operations by product lines
- Statement of cash receipts and cash disbursements

.06 Paragraphs 20 and 21 of SSARS No. 1, as amended by SSARS No. 8 (AR section 100.20–.21), include guidelines regarding an accountant's communications with the client when the compiled financial statements are not expected to be used by a third party. Paragraph 4 of SSARS No. 1 (AR section 100.04), as amended, defines *third parties* as all parties except for members of management who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements. This definition by exception indicates that all parties are third parties except for certain members of management who are knowledgeable enough about the business to put the information in the proper context.

.07 SSARS No. 2 (AR section 200) establishes the standards for reporting on comparative financial statements of a nonpublic entity when the statements of one or more periods have been compiled or reviewed under SSARS No. 1 (AR section 100).

Practice Tip

If prior-period financial statements are not presented in columnar form, they do not meet the SSARS No. 2 definition of comparative financial statements and, therefore, are not subject to the reporting requirements of SSARS No. 2. In addition, the requirements of SSARS No. 2 do not apply to prior-period financial statements in a client-prepared document that are presented on separate pages from the financial statements that are reported on by the accountant. However, the document should include an indication (generally on the face of the financial statements) that the accountant has not compiled or reviewed the prior-period financial statements and assumes no responsibility for them.

.08 SSARS No. 3 (AR section 300) amends SSARS Nos. 1 and 2 (AR sections 100 and 200) to provide an alternative form of compilation report when a prescribed form calls for a departure from generally accepted accounting principles (GAAP). Paragraph 2 of SSARS No. 3 (AR section 300.02), defines a prescribed form as any standard, preprinted form designed or adopted by the body to which it is intended to be submitted (e.g., banks and governmental bodies).

.09 SSARS No. 3 (AR section 300) does not prohibit the accountant from issuing a SSARS No. 1 (AR section 100) compilation report that identifies GAAP departures in accordance with paragraphs 41 through 43 of SSARS No. 1 (AR section 100.41–.43). A SSARS No. 3 report is specifically designed to provide an alternative form of reporting when a prescribed form calls for a GAAP departure. This alternative form of reporting is available only for a compilation service and not for a review service.

.10 SSARS No. 4 (AR section 400), as amended by SSARS Nos. 7 and 9, provides guidance on required, as well as, optional communications between predecessor and successor accountants. SSARS No. 7 amended SSARS No. 4 to require the successor accountant to request the client to communicate with the predecessor accountant, if the successor accountant becomes aware of information that may require revision of financial statements reported on by the predecessor accountant. SSARS No. 9 amends SSARS No. 4 by providing

guidance on communications between accountants when the successor accountant decides to communicate with the predecessor regarding acceptance of an engagement. The amendment defines predecessor and successor accountants, provides guidance regarding acceptance of an engagement, suggests inquiries the successor accountant may decide to ask the predecessor accountant, and includes an example successor accountant acknowledgement letter, which the predecessor may want to use in connection with granting access to working papers.

.11 Under SSARS No. 6 (AR section 600.02), an accountant may submit a written personal financial plan containing unaudited personal financial statements to a client without issuing a report under SSARS No. 1 (AR section 100), as amended, when all of the following conditions exist—

- The accountant establishes an understanding with the client that the financial statements (i) will be used solely to assist the client and the client's advisors to develop the client's personal financial goals and objectives and (ii) will not be used to obtain credit or for any purpose other than developing the aforementioned goals and objectives.
- Nothing comes to the accountant's attention during the engagement that would cause him or her to believe that the financial statements will be used to obtain credit or for any purpose other than developing the client's financial goals and objectives.

.12 Examples of implementation of a personal financial plan by a client's advisors include use of the plan by—

- An insurance broker who will identify specific insurance products
- An investment adviser who will provide specific recommendations about the investment portfolio.
- An attorney who will draft a will or trust documents.

.13 An accountant following the exemption under SSARS No. 6 (AR section 600) should issue a written report stating that the unaudited financial statements—

- Are designed solely to help develop the financial plan.
- May be incomplete or contain departures from GAAP and should not be used to obtain credit or for any purpose other than developing the plan.
- Have not been audited, reviewed, or compiled.

.14 SSARS No. 7, which is an omnibus statement, among other things—

- Clarified the applicability of SSARS No. 1 (AR section 100) by indicating that, in certain circumstances, an accountant may perform a review of a public company under the provisions of SSARS.
- Eliminated the prohibition against merely typing or reproducing financial statements without modification and defined the term *submission of financial statements*.¹
- Made explicit that the accountant is not required to communicate to a client errors that are not material and fraud or illegal acts that are clearly inconsequential.
- Modified the SSARS review report to differentiate it from the review report presented in SAS No. 100 (AU section 722), *Interim Financial Information*, as well as the review and compilation report to clarify that the standards referred to in the reports are Statements on Standards for Accounting and Review Services.
- Required a client representation letter when performing a review engagement under SSARS.

¹ The term *submission of financial statements* has since been redefined by SSARS No. 8.

- Clarified the accountant's reporting responsibilities in a compilation or review engagement when he or she decides there is an uncertainty about an entity's ability to continue as a going concern.

.15 SSARS No. 8 amends SSARS No. 1 (AR section 100) to provide communication and performance requirements for unaudited financial statements submitted to a client that are not expected to be used by a third party. *Submission of financial statements* is defined as presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software. The following two actions are necessary in order to *submit* financial statements—(1) prepare financial statements, either manually or through the use of computer software, and (2) present the financial statements to a client or third party. [SSARS No. 1 sets forth the performance and communication requirements when an accountant submits unaudited financial statements of a nonpublic entity to his or her client or third parties.]

.16 SSARS No. 8 amends SSARS No. 1 (AR section 100) to create a provision for management-use-only financial statements (when an accountant submits financial statements to a client that are not reasonably expected to be used by a third party) indicating that he or she should document an understanding with the client through the use of an engagement letter or follow the requirements in SSARS No. 1 for issuing a compilation report.

.17 SSARS No. 9 is an omnibus statement. Following is a summary of the amendments included in SSARS No. 9—

- The auditing literature permits an accountant who may be associated with financial statements of a public company, but has not audited or reviewed such statements to state that he or she has not audited the unaudited information and includes illustrative report wording. This guidance is also appropriate for compilation and review engagements; however, SSARSs currently does not include illustrative wording. This amendment revises SSARS No. 1, *Compilation and Review of Financial Statements* (AR section 100.03), to include wording that may be appropriate under the circumstances.
- SSARS No. 9 includes two footnotes to SSARS No. 1 (AR section 100.14 and 100.36), stating (1) the statement of retained earnings is not a required statement and, if not presented as a separate statement, reference in the compilation and review report is not needed and (2) if the statement of comprehensive income is presented, reference should be made in the appropriate paragraphs of the report.
- SSARSs did not specifically require a signature of the accounting firm or the accountant on a review or compilation report. This amendment revises SSARS No. 1 (AR section 100.11 and 100.33) to require a signature.
- SSARS No. 9 requires the accountant to obtain specific representations from management when performing a review engagement, provides guidance on the dating of the letter, and provides guidance regarding obtaining representations from current management when they were not present during all periods covered by the accountant's report.
- SSARS No. 9 explicitly permits the accountant to issue a separate report on supplementary information in a compilation engagement, consistent with guidance on supplemental information in a review report.
- SSARS No. 9 clarifies that although an effective quality control system is conducive to compliance with SSARSs, deficiencies in or noncompliance with a firm's quality control system do not, in and of themselves, indicate that an engagement was not performed in accordance with the applicable professional standards.
- SSARS No. 9 defines predecessor and successor accountants, provides guidance regarding acceptance of an engagement, suggests inquiries the successor accountant may decide to ask the predecessor accountant, and includes an illustrative successor-accountant acknowledgment letter that the predecessor may want to use in connection with granting access to the working papers.

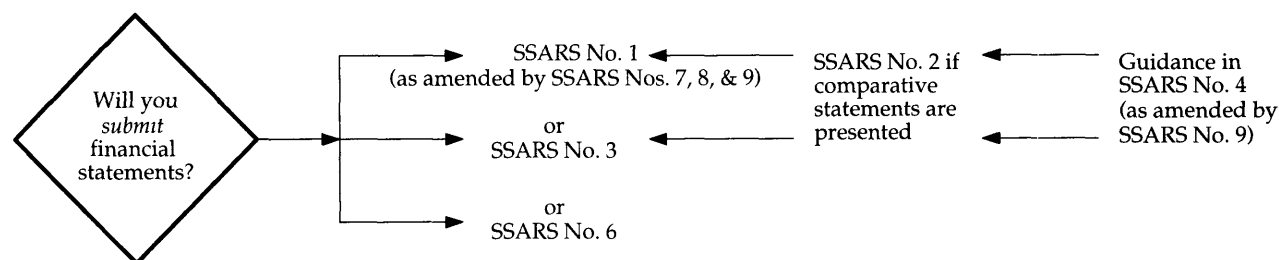

.18 Every standard does not apply to every engagement. SSARS No. 1 (AR section 100), as amended by SSARS Nos. 7, 8, and 9, generally applies to any engagement in which the accountant submits financial statements to a client or third parties (compilation or review engagement). SSARS No. 2 (AR section 200) applies to any engagement to report on comparative financial statements.

.19 SSARS No. 3 (AR section 300) and SSARS No. 6 (AR section 600) are considered optional exemptions from SSARS No. 1 (AR section 100). (SSARS No. 1 applies unless the conditions in SSARS No. 3 or SSARS No. 6 are met.) SSARS No. 3 is considered a partial exemption and applies if the engagement is to compile financial statements contained in certain prescribed forms. The performance standards in SSARS No. 1 apply, but the reporting standards are replaced by the special reporting requirements of SSARS No. 3. SSARS No. 6 is considered a complete exemption from SSARS No. 1. If the SSARS No. 6 conditions are met, SSARS No. 1 does not apply.

.20 SSARS No. 4 (AR section 400) contains recommended communication guidance for any compilation or review engagement where a change of accountants has occurred.

.21 Exhibit 2100.1 illustrates the interactions between the standards:

Exhibit 2100.1—Interaction of SSARS

.22 Illustrative reports to be issued under the provisions of SSARS Nos. 1 through 9 can be found in AAM sections 2610, 2620, and 2710.

.23 In addition to SSARS Nos. 1 through 9, interpretations issued by the staff of ARSC provide timely guidance on applying SSARS. An interpretation is not as authoritative as a SSARS, but accountants may have to justify departure from an interpretation's guidance if the quality of their work is questioned. The following interpretations have been issued by the staff.

Interpretations of SSARS No. 1

.24 No. 1—*Omission of Disclosures in Reviewed Financial Statements* (AR section 9100.01–.02, December 1979) This interpretation precludes the accountant from accepting an engagement to review financial statements that omit substantially all the disclosures required by GAAP. This interpretation gives guidance on the reporting implications if an accountant who has undertaken a review of financial statements subsequently finds that the client declines to include substantially all required disclosures.

.25 No. 2—*Financial Statements Included in SEC Filings* (AR section 9100.03–.05, December 1979) This interpretation basically concludes that a compilation or review report should not be filed with the SEC.

.26 No. 3—*Reporting on the Highest Level of Service* (AR section 9100.06–.12, December 1979; revised October 2000) This interpretation requires that if an accountant provides more than one level of service on the same financial statements, the financial statements should be accompanied by the accountant's report that is

appropriate for the highest level of service provided. This interpretation does not preclude the accountant from using procedures that go beyond those required for the level of assurance expressed. Nor does this interpretation require that the accountant “step up” the level of his or her report if the accountant uses procedures that go beyond those required for the level of assurance expressed.

.27 No. 4—*Discovery of Information After the Date of the Accountant’s Report* (AR section 9100.13–.15, November 1980) The interpretation emphasizes the need for professional judgment in determining an appropriate course of action when information becomes available after the date of the accountant’s report and that information causes the accountant to believe that the compiled or reviewed financial statements may be incorrect, incomplete, or otherwise unsatisfactory. This interpretation instructs the accountant to consider the reliability of the information and the existence of persons known to be relying on or likely to rely on the financial statements when making a decision about an appropriate course of action.

.28 No. 5—*Planning and Supervision* (AR section 9100.16–.17, August 1981) The interpretation clarifies that the audit guidance in “Planning and Supervision,” does not apply to compilation or review engagements. However, this interpretation suggests that the accountant may wish to consider SAS No. 22, *Planning and Supervision* (AU section 311), and other references when planning and supervising a compilation or review engagement.

.29 No. 6—*Withdrawal From Compilation or Review Engagement* (AR section 9100.18–.22, August 1981) The interpretation identifies circumstances in which it is appropriate for an accountant to withdraw from an engagement. Circumstances suggested include those in which the nature, extent, and probable effect of GAAP departures or departures from an OCBOA might cause the accountant to question whether the departures are a result of the preparer’s intention to mislead those who might reasonably be expected to use the financial statements. The accountant would also withdraw from a compilation or review engagement if the financial statements are not revised after the accountant requests that revisions be made, and the client refuses to accept the modified standard report that the accountant believes is appropriate.

.30 No. 7—*Reporting When There Are Significant Departures From Generally Accepted Accounting Principles* (AR section 9100.23–.26, August 1981) The interpretation indicates that a statement in a compilation or review report that the financial statements are not in conformity with GAAP or an “other comprehensive basis of accounting” would be tantamount to expressing an adverse opinion on the financial statements taken as a whole; therefore, an accountant is precluded from making such a statement. Such an opinion can be expressed only in the context of an audit engagement. This interpretation does not preclude the accountant from emphasizing the limitation of the financial statements in a separate paragraph of the report. This separate paragraph is not, however, a substitute for disclosure of the specific GAAP or OCBOA departures or the effects of the departures.

.31 No. 8—*Reports on Specified Elements, Accounts, or Items of a Financial Statement* (AR section 9100.27–.28, November 1981; revised January 2001) The interpretation clarifies that the SSARS No. 1 reporting requirements for a review do not apply to presentations of specified elements, accounts, or items of financial statements because these presentations do not meet the definition of a financial statement. This interpretation refers the accountant to SSAE No. 10, *Attestation Standards: Revision and Recodification*, chapter 2, *Agreed-Upon Procedures Engagements* (AICPA, *Professional Standards*, vol. 1, AT section 201) for guidance on reporting on the results of applying agreed-upon procedures to specified elements, accounts, or items of a financial statement. SSAE No. 10, chapter 1, *Attest Engagements* (AT section 101) provides guidance on reporting on such presentations when the accountant is engaged to express moderate assurance in a review report.

.32 No. 9—*Reporting When Management Has Elected to Omit Substantially All Disclosures* (AR section 9100.29–.30, May 1982) The interpretation allows the accountant to modify the language in the sample report in paragraph 21 of SSARS No. 1 from “Management has elected to omit substantially all disclosures.” However, this interpretation stresses that the language used should clearly indicate that the omission of

substantially all disclosures is the entity's decision, not the accountant's. The interpretation encourages the use of the language in the sample report in paragraph 21 of SSARS No. 1.

.33 No. 10—*Reporting on Tax Returns* (AR section 9100.31–.32, November 1982) SSARSs do not apply to tax returns. The interpretation exempts the accountant from compiling the financial information contained in a tax return, although the accountant may accept an engagement to compile or review such a presentation.

.34 No. 11—*Reporting on Uncertainties* (AR section 9100.33–.40, December 1982) The interpretation directs the accountant to paragraphs 10 and 11 of SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341.10–.11), for guidance in evaluating the disclosure of uncertainties. This interpretation does not require the accountant to modify his or her report if uncertainties are appropriately disclosed in the financial statements; nor does the interpretation require modification of a compilation report on financial statements that omit substantially all disclosures required by GAAP, provided the report clearly indicates the omission and says that the client's decision to omit the disclosures was not, to the accountant's knowledge, undertaken with the intention of misleading users of the statements. The interpretation suggests, but does not require, language that may be used if an accountant wishes to draw attention to an uncertainty in an emphasis paragraph of a compilation or review report.

.35 No. 12—*Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles* (AR section 9100.41–.45, December 1982; revised November 1992 and October 2000) The interpretation illustrates how the standard compilation and review reports should be modified if financial statements are prepared on another comprehensive basis of accounting. Footnotes to the financial statements should state the basis of presentation and describe how that basis differs from GAAP. If footnotes present this information, the standard compilation and review reports should be appropriately modified to identify the financial statement title (e.g., Balance Sheet—Income Tax Basis). When an accountant compiles OCBOA financial statements that omit substantially all disclosures, either a footnote or a note to those statements should disclose the basis of accounting. If that disclosure is not made, the following sentence should be added to the first paragraph of the accountant's report:

The financial statements have been prepared on the accounting basis used by the Company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

.36 No. 13—*Additional Procedures* (AR section 9100.46–.49, March 1983; revised October 2000) The interpretation permits the accountant to perform additional procedures in a compilation or review engagement without requiring the accountant to change the engagement level.

.37 No. 14—*Reporting on Financial Statements When the Scope of the Accountant's Procedures Has Been Restricted* (AR section 9100.50–.53, Withdrawn—April 1990)

.38 No. 15—*Differentiating a Financial Statement Presentation From a Trial Balance* (AR section 9100.54–.57, September 1990; revised October 2000) The interpretation identifies the attributes of a financial statement and those of a trial balance. It assists an accountant in determining whether a financial statement presentation is a financial statement, requiring compliance with the provisions of SSARS No. 1, or a trial balance, which does not require compliance with the provisions of SSARS No. 1.

.39 No. 16—*Determining if the Accountant Has "Submitted" Financial Statements Even When Not Engaged to Compile or Review Financial Statements* (AR section 9100.58–.60, Withdrawn by the issuance of SSARS No. 7—November 1992)

.40 No. 17—*Submitting Draft Financial Statements* (AR section 9100.61–.62, September 1990; revised October 2000) The interpretation prohibits an accountant from submitting draft financial statements without intending to submit those financial statements in final form accompanied by an appropriate compilation or review report. This interpretation requires that draft financial statements be so marked and suggests that an

accountant document the reasons why he or she intended to submit, but never submitted final financial statements, should that situation occur.

.41 No. 18—*Special-Purpose Financial Presentations to Comply With Contractual Agreements or Regulatory Provisions* (AR section 9100.63–.72, September 1990) The interpretation permits an accountant, if asked to report on special-purpose financial statements prepared to comply with a contractual agreement or regulatory provision that specifies a special basis of presentation, to issue a compilation or review report on those financial statements in accordance with SSARS No. 1. The interpretation describes how to report on presentations based on contractual agreements or regulatory provisions that require a financial presentation that (1) does not constitute a complete presentation of the entity’s assets, liabilities, revenues, or expenses but is otherwise prepared in conformity with GAAP or OCBOA or (2) uses a prescribed basis of accounting that does not result in a presentation in conformity with GAAP or OCBOA.

.42 No. 19—*Reporting When Financial Statements Contain a Departure From Promulgated Accounting Principles That Prevents the Financial Statements From Being Misleading* (AR section 9100.73–.75, February 1991; revised October 2000) The interpretation addresses Ethics Rule 203, *Accounting Principles* of AICPA Code of Professional Conduct (AICPA *Professional Standards*, vol. 2, ET section 203.01), which prohibits a member from expressing an opinion that financial statements are presented in conformity with GAAP if the member is aware that the statements contain a GAAP departure. If the statements contain a GAAP departure, and the member can demonstrate that due to unusual circumstances compliance with GAAP would render the financial statements misleading, the member can comply with Rule 203 by describing in the report the departure; its approximate effects, if practicable; and the reasons why compliance with GAAP would result in misleading statements. The interpretation indicates that if the circumstances contemplated by Rule 203 exist in a review engagement, the accountant’s review opinion should be unmodified, but the accountant’s review report should be modified to contain a separate paragraph, including the information required by Rule 203. The interpretation clarifies that Rule 203 does not apply to compilation engagements. If the circumstances contemplated by Rule 203 exist in a compilation engagement, an accountant should follow the guidance in paragraphs 39 through 41 of SSARS No. 1 for reporting on a compilation engagement with a GAAP departure.

.43 No. 20—*Applicability of SSARS to Litigation Services* (AR section 9100.76–.78, May 1991; revised October 2000) SSARSs do not apply to financial statements submitted in litigation services that involve pending or potential proceedings before a court, regulatory body, or governmental authority (or the agent of any of these) such as a grand jury or an arbitrator (mediator) when the

- Accountant is an expert witness or a “trier of fact” (or an agent for one).
- Accountant’s work is subject to detailed analysis and challenge by each party to the dispute.
- Accountant is engaged by the attorney and protected by the attorney’s work product privilege.

.44 *Applicability of SSARS No. 1 When Performing Controllorship or Other Management Services* (AR sections 9100.80–.84, July 2002) The interpretation clarifies that if the accountant is in the practice of public accounting as defined by the AICPA’s Code of Conduct [ET section 92.23] and is not a stockholder, partner, director, officer, or employee of the entity, the accountant is required to follow the performance and communication requirements of SSARS No. 1, including any requirement to disclose a lack of independence. The interpretation further states that if the accountant is in the practice of public accounting and is also a stockholder, partner, director, officer, or employee of the entity, the accountant may either (1) comply with the requirements of SSARS No. 1, or (2) communicate, preferably in writing, the accountant’s relationship to the entity (for example, stockholder, partner, director, officer, or employee). In addition, if an accountant is not in the practice of public accounting, the issuance of a report under SSARS would be inappropriate.

Interpretation of SSARS No. 2

.45 No. 1—*Reporting on Financial Statements That Previously Did Not Omit Substantially All Disclosures* (AR section 9200.01–.04, November 1980) If the financial statements are compiled (disclosures omitted) from

financial statements that previously did not omit disclosures, the accountant's reference to the previous reports should include a description or quotation of any report modification or emphasis matter.

Interpretation of SSARS No. 3

.46 No. 1—*Omission of Disclosures in Financial Statements Included in Certain Prescribed Forms* (AR section 9300.01–.03, May 1982) This interpretation permits an accountant who has reviewed financial statements of a nonpublic entity to issue a compilation report on financial statements for the same period in a prescribed form that calls for a departure from GAAP.

Interpretation of SSARS No. 4

.47 No. 1—*Reports on the Application of Accounting Principles* (AR section 9400.01–.05, August 1987) An accountant who has been asked to provide written or oral advice on the application of accounting principles to a client whose financial statements are compiled or reviewed by another accountant is obligated to follow SAS No. 50, *Reports on the Application of Accounting Principles* (AU section 625).

Interpretation of SSARS No. 6

.48 No. 1—*Submitting a Personal Financial Plan to Client's Advisers* (AR section 9600.01–.03, May 1991) The interpretation allows the accountant to submit a written personal financial plan, to be implemented by the client or his or her advisers, without complying with SSARS No. 1. Examples of implementation include an:

- Insurance broker to identify specific products.
- Investment adviser to provide investment portfolio recommendations.
- Attorney to draft a will or trust agreement.

Determining Applicability of SSARS No. 1

.49 SSARS No. 1 (AR section 100) is applicable whenever an accountant submits unaudited financial statements of a nonpublic entity to a client or third parties. SSARS No. 8 (AR section 100) modified the definition of "submission." *Submission of financial statements* is now defined as—

presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

.50 Two actions are necessary in order to submit financial statements:

- *Prepare* financial statements, either manually or through the use of computer software, *and*
- *Present* the financial statements to a client or third party

.51 Absent either of these actions, the financial statements have not been submitted, and SSARS No. 1 is not applicable.

.52 The term "prepared" is not defined in SSARS. Rather, professional judgment must be used to determine if financial statements will be prepared. In making this judgment, the accountant should consider the difference between mere bookkeeping services (e.g., making adjustments, corrections, accruals, etc.) and preparation of financial statements. In order to prepare financial statements the accountant must use his or her knowledge, education, and experience to create financial statements that would not have existed otherwise. In other words, if the financial statements prepared by the client's bookkeeper require only that the accountant "tweak a couple of things," then financial statements probably haven't been prepared. On the other hand, if the client gives the accountant an unadjusted trial balance and the accountant makes all of

the adjustments necessary to convert the information into financial statements, then financial statements probably have been prepared.

Practice Tip

There is no definitive line to cross that would indicate submitting financial statements. Therefore, a firm policy should be established to evaluate how certain accounting services are classified within the firm.

.53 The term “presenting” is also not defined in SSARS. Again, the accountant will have to use his or her professional judgment to determine if financial statements have been presented to a client. Obviously, physically presenting printed financial statements would meet the definition used here. Other situations, especially those involving electronic presentation (e.g., via e-mail) should be carefully considered.

.54 The issue of “submission” should be addressed early in engagement planning. This issue, along with the needs of the client and other financial statements users, is essential to determining the type of engagement to perform.

[The next page is 2201.]

AAM Section 2200

Engagement Planning and Administration

.01 It is important to remember that when engaged to provide compilation or review services, the accountant must comply with Rules 201, *General Standards*, and 202, *Compliance With Standards*, respectively, of the AICPA's *Code of Professional Conduct* (ET sections 201.01 and 202.01). Rule 201 requires that an AICPA member comply with the following standards and any interpretations thereof by bodies designated by its Council:

- *Professional Competence*—Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.
- *Due Professional Care*—Exercise due professional care in the performance of professional services.
- *Planning and Supervision*—Adequately plan and supervise the performance of professional services.
- *Sufficient Relevant Data*—Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.02 Rule 202 requires that an AICPA member who performs audit, review, compilation, management consulting, tax or other professional services comply with standards promulgated by bodies designated by Council.

Client and Engagement Selection

.03 Prior to accepting an engagement to perform a compilation or review for a prospective client, the accountant should consider if he or she wishes to be associated with the client. Factors such as the ability of the accountant to adequately serve the client, the fee arrangement, client integrity, etc., need to be considered.

.04 Although professional standards do not require consideration of the following issues, you might consider them in determining whether or not to accept a client:

- Information that might bear on the integrity of management. Is there information that gives reason to doubt the integrity of management?
- Past experience with management. Have past experiences on other engagements been positive?
- Independence considerations.

.05 Some of the following tips may be helpful when evaluating a potential client (although none of these procedures is required by professional standards):

- *Gain access to available financial information.* Review the prior year's financials, with emphasis on leverage for debt. Look at the client's assets and sources of income, as well as the current condition of accounting records.
- *Review S&P, Moodys, or other publications.* Many localities provide a local or regional "S&P" in conjunction with the *Daily Journal of Commerce* or similar business publication. There is a plethora of available information on the Web. In addition, many firms offer database searches of financial, legal, and operational information, as well as personal information about key executives. Check the court dockets (including the U.S. Bankruptcy and Tax Court dockets) in the area where the client is domiciled.

- *Meet with financial persons of the company.* Ask for a brief overview of their internal practices and procedures, the business plan, bylaws, staff turnover, and so on. Representatives from other departments may provide information as well.
- *Discuss the prospective client with former accountants* (after the client provides written authorization).

.06 It is often useful to complete a “Client Acceptance and Continuance Form” to assist in determining whether or not to accept a client. An illustrative client acceptance form can be found in AAM section 2200.58.

Client Needs

.07 Generally, the cost of a review will be more than a compilation, and the cost of a compilation with full disclosure will be more than a compilation that omits substantially all disclosures. These cost considerations should be carefully explained and evaluated with the client. In addition, special consideration should be given to the issues of independence and the demands of bankers and other creditors.

.08 Several issues must be considered in determining the best type of engagement for a particular client, including:

- *Needs of third parties.* Does a third party (for example, a bank) need financial statements on a regular basis?
- *Cost-benefit considerations.* Which engagement can be performed at a reasonable cost to the client?
- *Risk management considerations.* Some practitioners may perceive the “management-use-only” compilation as potentially more risky than a “traditional”¹ compilation. Others, however, see the specific representations and restrictions agreed to in the engagement letters for management-use-only engagements as additional protections that are not present in the report that accompanies a traditional compilation engagement.

.09 If the client does not need audited financial statements, the accountant can choose from these four types of engagements:

- A review (if the accountant is independent and the client needs a moderate level of assurance on the financial statements)
- A traditional compilation² (the minimum level of service required if third parties will use the financial statements)
- A management-use-only compilation³ (available if third parties will not use the financial statements)
- Bookkeeping services (available if the procedures do not include the submission of financial statements)

Traditional Versus Management-Use-Only Compilation

.10 SSARS No. 1 (AR section 100.04) defines a *compilation* as follows:

Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

.11 This definition does not require the accountant to test, verify, or corroborate information supplied by management, but, simply, to place the information into the form of financial statements.

¹ See paragraph .12 for more information about types of compilations.

² See paragraph .12 for more information about types of compilations.

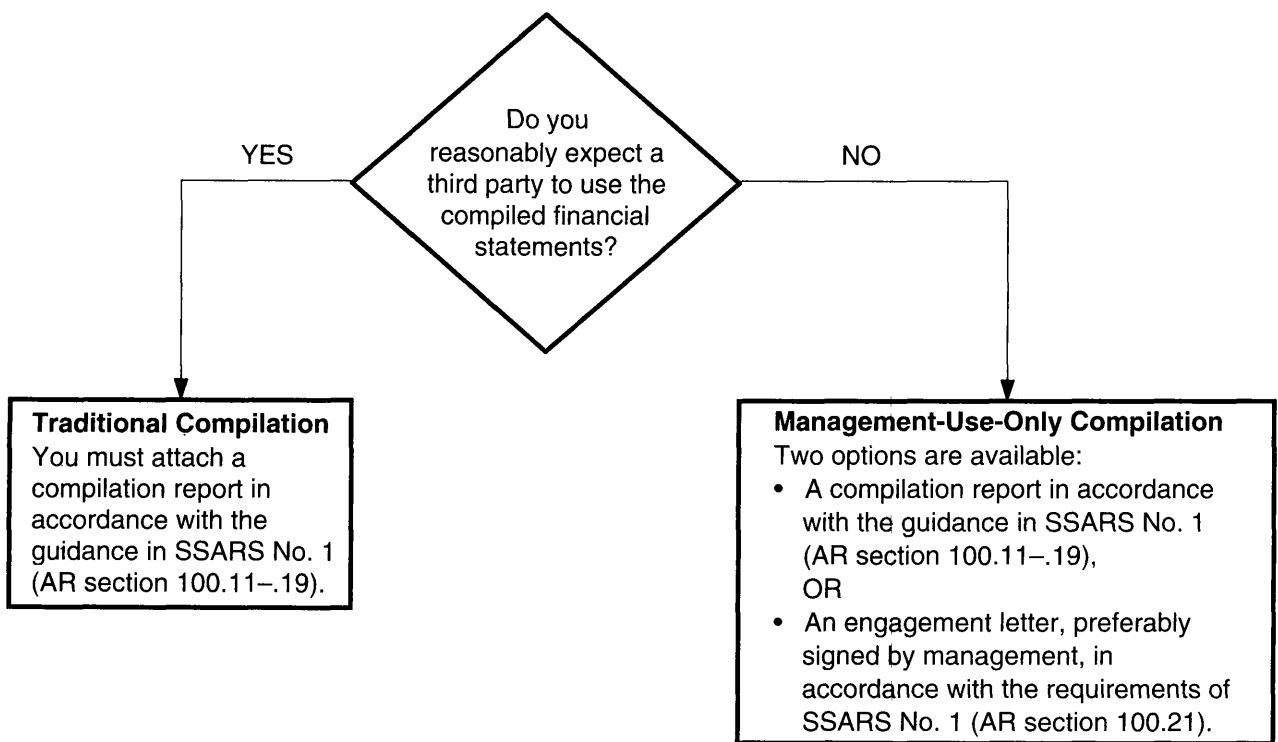

³ See paragraph .12 for more information about types of compilations.

.12 SSARS No. 1 (AR section 100), as amended, now provides for two types of compilations:

- A compilation with a report is required when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects that the financial statements may be used by a third party. This type of engagement might be referred to as a *traditional compilation*.
- A compilation without a report is available when the accountant does not reasonably expect the financial statements to be used by a third party. This type of engagement might be referred to as a *management-use-only compilation*.

.13 In either case, the engagement is a compilation requiring that the accountant comply with the performance requirements of SSARS No. 1 (AR section 100). The difference between the two options lies in the form of communication used in the engagement. See Exhibit 2200.1.

Exhibit 2200.1—Communications Options in

.14 Though not required by professional standards, you might consider making the decision about the best type of engagement for the client early in engagement planning and base that decision on a combination of (1) the needs of the client and other users, (2) knowledge of the client, and (3) the nature of the procedures that will be performed.

.15 If the client does not need compiled financial statements (taking into account the needs of the client and other users), the accountant may, instead, choose to perform only bookkeeping services. Other than the broad general ethical guidance available in ET section 201 of AICPA *Code of Professional Conduct*, there are no authoritative standards for bookkeeping services. Thus, it is wise to at least establish a written understanding with the client concerning bookkeeping services. This understanding should include:

- A description of the nature and limitations of the services.
- A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts.

Practice Tip

Bookkeeping services fall under the guidance in Statements on Standards for Consulting Services (SSCSs). SSCS No. 1, *Consulting Services: Definitions* (CS section 100), states that you should have an “understanding with the client” for any consulting engagement that you undertake. This oral or written understanding should be reached with the client about the responsibilities of the parties and the nature, scope, and limitations of the engagement to be performed. If circumstances require a significant change during the engagement, the understanding should be modified.

.16 Although not an authoritative requirement in a traditional compilation engagement, a written engagement letter for a bookkeeping services engagement could be important because there are no specific standards to follow for these types of engagements. Other professional engagements, such as audits, reviews, and compilations, include the added benefit of authoritative standards that define the engagement objectives, limitations, communication, and so on. An illustrative engagement letter for a bookkeeping service engagement can be found in AAM section 2200.62.

Independence Issues

.17 If an accountant is not independent, he or she can only issue a compilation report (with report modification). If the client needs reviewed or audited financial statements, the nonindependent CPA should refer the client to another CPA. The primary rules governing independence are found in the “Independence” section of the AICPA *Code of Professional Conduct* (ET section 101). The independence standards are contained in Rule 101, *Independence* (ET section 101.01) along with the associated interpretations and ethics rulings. Rule 101 states:

A member in public practice shall be independent in the performance of professional services as required by standards promulgated by bodies designated by Council.

.18 Independence is the foundation of the attest function. Third party users rely on the CPA’s opinion in a review engagement because they believe the conclusion is impartial and unbiased.

.19 In the final analysis, independence in mental attitude means objective consideration of facts, unbiased judgments, and honest neutrality on the part of the CPA in forming and expressing conclusions. Independence in mental attitude presumes an undeviating concern for an unbiased conclusion.

.20 The appearance of independence is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests.

.21 As with many rules and standards of the profession, the guidance for independence is continually changing to meet the developments and pressures facing the profession. Nevertheless, CPAs and their firms should take steps to ensure they meet the independence requirements before performing any review engagement service for a client.

Understanding the Engagement

.22 Paragraph 5 of SSARS No. 1 (AR section 100.05) states that the accountant should establish an understanding with the entity, preferably in writing, regarding the services to be performed. If the engagement is to compile financial statements not expected to be used by a third party, a written communication is required. (See AR section 100.20–.21.)

Establishing an Understanding With the Client

.23 As noted in the previous paragraph, SSARS No. 1 (AR section 100.05) requires the CPA to obtain an understanding with the client. This understanding should include:

- a. A description of the nature and limitations of the services.
- b. A description of the report the accountant expects to render.
- c. A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts.
- d. A statement that the accountant will inform the appropriate level of management of any material errors that come to his attention and any fraud or illegal acts that come to his attention, unless they are clearly inconsequential.

.24 If the financial statements are not expected to be used by third parties (management-use-only compilation), the documentation of understanding should include the following descriptions or statements, according to paragraph 21 of SSARS No. 1, as amended by SSARS No. 8 (AR section 100.21):

- The nature and limitations of the services to be performed.
- A compilation is limited to presenting in the form of financial statements information that is the representation of management.
- The financial statements will not be audited or reviewed.
- No opinion or any other form of assurance on the financial statements will be provided.
- Management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.
- Acknowledgement of management's representation and agreement that the financial statements are not to be used by third parties.
- The engagement cannot be relied upon to disclose errors, fraud, or illegal acts.

.25 According to paragraph 21 of SSARS No. 1, as amended by SSARS No. 8 (AR section 100.21), the documentation of understanding should also address the following additional matters, if applicable:

- Material departures from GAAP or OCBOA may exist and the effects of those departures, if any, may not be disclosed.
- Substantially all disclosures (and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted.
- Lack of independence.
- Reference to any supplementary information.

.26 A written engagement letter, though not required in a traditional compilation engagement, provides a means of formalizing the understanding between the accountant and the client concerning the services to be rendered. Engagement letters are advantageous for several reasons:

- They help to avoid client misunderstandings.
- They help to avoid staff misunderstandings.
- They reduce potential legal liability.
- They improve practice management.
- They clarify contractual obligation.

What to Include in an Engagement Letter

.27 The following items of information to include in an engagement letter are suggestions only; these items do not represent authoritative requirements:

- Identification of the client
- Record retention policy
- Description of the services to be provided
- Responses to subpoenas and outside inquiries
- Staffing of the engagement
- Explanation of how fees and costs will be billed
- Description of client responsibilities
- Payment terms
- Designation of client contacts
- Consequences of non-payment
- Timing of the work
- Alternative dispute resolution
- Consequences of extending completion deadlines
- Withdrawal and termination
- Requests for additional services
- Client signature
- Client communications required by the AICPA
- Provisions to resolve potential ethical conflicts
- Any matter or terms unique to an engagement that are agreed upon in advance of rendering services

Overcoming Client Resistance to an Engagement Letter

.28 If you should encounter a situation in which your client exhibits reluctance about or resentment to an engagement letter, presenting the engagement letter face-to-face usually is sufficient to overcome any resistance on the part of the client.

.29 As an alternative to having the client sign an engagement letter, the accountant may consider developing a letter of understanding and mailing it to the client as a confirmation of the oral understanding. If an engagement letter is not obtained, the accountant should prepare a memorandum for the working papers describing the understanding with the client.

.30 Management is not required to sign the engagement letter, but it is preferable and highly advisable. Obtaining management's signature on the engagement letter helps to ensure that management has read and understands the letter and the engagement. If the engagement letter is mailed to the client, it may be advisable to send the letter by certified mail or another means that would provide proof of receipt. In any case, a copy of the engagement letter should be included in the working papers.

Engagement Letters for Monthly, Quarterly, or Comparative Statements

.31 One engagement letter can be drafted to cover financial statements issued for a period of time, such as a year, or for comparative financial statements issued for multiple periods. It is also possible to use one engagement letter for all services to be performed (compilation, review, consulting, bookkeeping, tax services, etc.). However, care should be taken when addressing multiple levels of service (e.g., compilation and review) in one engagement letter, as this can be confusing to the client.

Minimizing Liability to Third Parties

.32 In certain cases, it may be beneficial to identify in the engagement letter any third parties that the accountant knows will rely on the compilation or review report to limit the ability of unknown third parties' use of the financial statements. For example, if the accountant knows at the time of the engagement that the client is negotiating with a bank for a loan of \$100,000, the following language might be added to the engagement letter:

We understand that you are negotiating with Last National Bank for a loan of \$100,000 and that the purpose of our report on your financial statements is to enable you to present the compiled [reviewed] financial statements to Last National Bank. We are not aware of any other persons, entities, or limited groups of persons or entities for whose use or benefit this report is intended or contemplated.

.33 The use of language such as this in engagement letters varies in practice. Some CPAs feel that the language may offend clients and/or actually increase the likelihood of litigation from the identified third party. Before adding such language, the accountant should consult with legal counsel.

.34 Illustrative engagement letters for compilation engagements are presented in AAM section 2200.59–.60.

Practice Tip

Care should be exercised in adding additional services to the engagement letter. Although it is common to address additional services such as bookkeeping, tax, payroll, and consulting in this engagement letter, it is not advisable to include both the management-use compilation and traditional (unrestricted) compilation engagements in the same engagement letter. Should the client need compiled financial statements for third party use, it is recommended that a separate engagement letter be issued in order to reduce the risk of misunderstanding and confusion about the two types of engagements.

Also, be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. You should also make sure that a final engagement letter is always issued in such circumstances.

Change in Engagement Level of Service

.35 Occasionally, during the course of an engagement, the client may request that the CPA change the nature of the engagement. The request may be for a:

- Step-up—for example, from a compilation to a review
- Change in service—for example, from a management-use-only compilation to a traditional compilation or from a traditional compilation to a review
- Step-down—for example, from an audit to a review or compilation

- Step-down—for example, from a review to a compilation
- Change in service—from a compilation with disclosures to a compilation without disclosures
- Change in service—for example, from a traditional compilation to a management-use-only compilation, or from a management-use-only compilation to bookkeeping services

Step-Ups

.36 SSARS No. 1 does not specifically address step-ups. Generally, step-ups pose no issues of great concern. The CPA must:

- Determine what additional procedures and standards are required for the level of service requested.
- Determine whether it is possible and practical to perform the procedures and comply with the standards.
- Revise the understanding with the client.

.37 If the client needs financial statements for third-party use, the accountant may compile, review, or audit the financial statements for that client and comply with the reporting requirements in SSARS No. 1 (AR section 100). The accountant may do this even if he or she has previously compiled the financial statements for management's use only.

Practice Tip

You may want to include language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use (compiled, reviewed, or audited), you can provide that service separately.

Step-Downs and Changes in Service

Step-Down From Audit to Review or Compilation

.38 SSARS No. 1 lists three reasons that might cause a client to request a change from an audit engagement to another type of engagement after an audit has begun:

- A change in circumstances affecting the entity's requirement for an audit
 - For example, a bank may no longer require an audit because a line-of-credit is reduced to a level that does not require audited financial statements.
 - Generally, a step-down in this case is acceptable.
- A misunderstanding as to the nature of an audit, review, or compilation services originally available
 - Generally, a step-down in this case is acceptable.
 - The CPA should, however, explain all of the options available to the client.
- A restriction on the scope of the audit, whether imposed by the client or caused by circumstances
 - The implications of a scope restriction need to be considered carefully.
 - SSARS No. 1 describes two circumstances that would preclude a step-down:
 - 1) The accountant has been prohibited from corresponding with the entity's legal counsel.
 - 2) The management or owner has refused to sign a client representation letter.

Step-Down From Review to Compilation

.39 SSARS No. 1 lists three reasons that might cause a client to request a change after a review has begun:

- A change in circumstances affecting the entity's requirement for a review
 - For example, a bank may no longer require a review because a line-of-credit is reduced to a level that does not require audited financial statements.
 - Generally, a step-down in this case is acceptable.
- A misunderstanding as to the nature of an audit, review, or compilation services originally available
 - Generally, a step-down in this case is acceptable.
 - The CPA should, however, explain all of the options available to the client.
- A restriction on the scope of the inquiries or analytical procedures, whether imposed by the client or caused by circumstances.
 - The implications of a scope restriction need to be considered carefully.
 - The management's or owner's refusal to sign a client representation letter would preclude a step-down.

Change in Service From Full Disclosure to Omission of Substantially All Disclosures

.40 The accountant can agree to a request to change in service from a compilation with full disclosure financial statements to a compilation with financial statements that omit substantially all disclosures only if, to the best of his knowledge, the omission of disclosures is not intended to mislead those who might reasonably be expected to use the statements.

Change in Service From a Traditional Compilation to a Management-Use-Only Compilation

.41 The accountant can agree to a request to change in service from a traditional compilation to a management-use-only compilation if (1) he or she does not reasonably expect the financial statements to be used by a third party, (2) nothing comes to the accountant's attention that contradicts management's representation that the financial statements will not be used by a third party, and (3) the accountant documents his or her understanding with the client through the use of a written engagement letter.

Step-Down From a Management-Use-Only Compilation to a Bookkeeping Engagement

.42 The accountant can agree to a request to step-down from a management-use-only compilation to bookkeeping services if the accountant feels that the services will not constitute preparing and presenting financial statements to the client or third parties.

Communications Between Predecessor and Successor Accountants

.43 SSARS No. 4, as amended (AR section 400), establishes guidance for communication between predecessor and successor accountants. Unlike SAS No. 84, *Communications Between Predecessor and Successor Auditors* (AU section 315), which requires such communication between predecessor and successor auditors, SSARS No. 4 does not require a successor accountant to communicate with a predecessor accountant in connection with acceptance of a compilation or review engagement, but he or she may believe it is beneficial to obtain information that will assist in determining whether to accept the engagement. The successor accountant may consider making inquiries of the predecessor accountant when circumstances such as the following exist:

- Information about the prospective client is limited or requires special attention.

- The change in accountants occurs substantially after the end of the accounting period for which financial statements are to be compiled or reviewed.
- The client has frequently changed accountants.

.44 The successor accountant should bear in mind that the predecessor accountant and the client may have disagreed about accounting principles, procedures applied by the predecessor accountant, or similarly significant matters.

.45 The successor accountant should request permission from the prospective client to make any inquiries of the predecessor accountant. Except as permitted by the AICPA Code of Professional Conduct, an accountant is precluded from disclosing any confidential information obtained in the course of an engagement unless the client specifically consents. Accordingly, if the successor accountant decides to communicate with the predecessor, the successor accountant should request the client to (a) permit the successor accountant to make inquiries of the predecessor accountant and (b) authorize the predecessor accountant to respond fully to those inquiries. If the prospective client refuses to permit the predecessor accountant to respond or limits the response, the successor accountant should inquire about the reasons and consider the implications of that refusal in connection with acceptance of the engagement.

Inquiries Regarding Acceptance of the Engagement

.46 If a successor accountant decides to communicate with the predecessor accountant, either orally or in writing, the inquiries should be specific and reasonable regarding matters that will assist the successor accountant in determining whether to accept the engagement. Matters subject to inquiry would include:

- Information that might bear on the honesty or integrity of management.
- Disagreements with management about accounting matters or performance of compilation or review procedures or similarly significant matters.
- Cooperation from management when additional or revised information is needed.
- Predecessor's knowledge of any fraud or illegal acts perpetrated within the client.
- Predecessor's understanding of the reason for the change of accountants.

.47 SSARS No. 4 (AR section 400) does require the predecessor accountant, when authorized by the client, to respond promptly and fully to the inquiries on the basis of known facts. If the predecessor accountant decides, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor accountant should indicate that the response is limited. (Note that unpaid fees are not considered to be an unusual circumstance for purposes of this paragraph; however, see the paragraph below.) The successor accountant should consider the reasons and consider the implications of such a response in connection with acceptance of the engagement.

.48 If authorized by the client, SSARS No. 4 (AR section 400) states that the predecessor accountant should ordinarily make available certain work papers relating to matters of continuing significance and those relating to contingencies, for example. However, valid business reasons may lead the predecessor accountant to decide not to allow access to the work papers. Unpaid fees constitute a valid business reason to deny access to the predecessor accountant's workpapers. The predecessor accountant may decide to reach an understanding with the successor accountant about the use of the working papers. Before permitting access to the working papers, the predecessor accountant may wish to obtain a written communication from the successor accountant regarding the use of the working papers. The appendix of SSARS No. 4 (AR section 400.12) contains an illustrative successor accountant acknowledgement letter presented for illustrative purposes only and is not required by professional standards. In addition, a predecessor accountant is not obligated to make himself or herself or the work papers available to more than one prospective successor accountant.

Materially Misleading Financial Statements

.49 If during the engagement, the successor accountant becomes aware of information that causes him or her to believe that the financial statements reported on by the predecessor accountant may need to be revised, the successor accountant should request the client to communicate the matter to the predecessor accountant. If the client refuses to do so or if the predecessor accountant's response is inadequate, the successor accountant should evaluate (a) possible implications for the current engagement and (b) whether to resign from the engagement. Furthermore, the successor accountant may decide to consult with legal counsel in determining an appropriate course of further action.

Subsequent Discovery of Facts

.50 After compiling or reviewing a client's financial statements and issuing a report, the accountant may become aware of facts that lead him or her to believe that information supplied by the entity may have been incorrect, incomplete, or otherwise unsatisfactory had the accountant then been aware of such facts. In this case, the accountant may wish to consider the guidance in SAS No. 1, section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AU section 561).

.51 You might consider these two factors in determining the appropriate course of action:

- *The reliability of the information.* If the accountant believes that the information is reliable and that it existed at the date of the report, and if the information indicates that the financial statements, the report, or both need revision, the accountant would ordinarily conclude that persons known to be relying on or likely to rely on the financial statements should be notified in an appropriate manner.
- *The existence of persons known to be relying on or likely to rely on the financial statements.* In evaluating the likelihood that users are currently relying on or likely to rely on the financial statements, the accountant should consider the time elapsed since the financial statements were issued.

.52 Because of the legal implications involved in these actions, the accountant should consider consulting with an attorney before proceeding.

Management-Use-Only Financial Statements Distributed to Third Parties

.53 SSARS No. 1 (AR section 100.23) states the following:

If the accountant becomes aware that the financial statements have been distributed to third parties, the accountant should discuss the situation with the client and request that the client have the statements returned. If the client does not comply with this request within a reasonable period of time, the accountant should notify known third parties that the financial statements are not intended for third-party use, preferably in consultation with his or her attorney.

.54 If the accountant determines that the financial statements were given to a third party unintentionally (for example, the client made a mistake or forgot about the restricted nature of the financial statements), then he or she should remind the client of the restricted nature of the statements and request that the client retrieve all copies from third parties. If the client complies, then there is no need for further action.

.55 However, if the accountant discovers that the client intentionally disregarded the restriction placed on the use of the financial statements, and if the client refuses to retrieve the financial statements, then he or she should notify known third parties that the financial statements are not intended for third-party use. The accountant also might consider how such an action on the client's part to intentionally disregard the distribution restriction bears on management's integrity and, as a result, on the performance of any further services for that client.

.56 Some practitioners have suggested that the potential risk of third-party distribution is high and, therefore, may avoid performing the management-use-only type of compilation. However, in our profession, there are other restricted-use professional services that are offered (for example, agreed-upon procedures engagements and projections). If the management-use-only engagement is performed correctly, including obtaining a written engagement letter and placing a legend indicating the restricted nature of the presentation on each page of the financial statements, then the risk of third-party distribution should be very low.

Practice Tip

Notification of third parties would involve legal matters beyond the scope of this Manual, therefore, you should consult with an attorney before taking any action. In order to minimize the risk of a client distributing management-use-only financial statements to third parties, the accountant may want to include language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use, that service can be provided separately (see illustrative engagement letter in AAM section 2200.59).

When to Withdraw From an Engagement

.57 The CPA should consider withdrawing from an engagement if any of the following conditions exist:

- He or she determines that he does not have and cannot obtain sufficient knowledge of the client's business or industry.
- The client refuses, or is unable, to provide additional or revised information when the accountant has become aware that information supplied is incorrect, incomplete, or otherwise unsatisfactory.
- Disclosures were omitted with an intent to mislead.
- The CPA determines that he or she is not independent with respect to the entity and reviewed financial statements are required.
- The compiled or reviewed financial statements contain departures from GAAP that the client will not correct and the CPA believes the departures were undertaken with the intention of misleading statement users.
- There have been substantial limitations in the scope of the engagement, particularly in a review engagement when management does not provide a client representation letter.
- Information comes to the accountant's attention that contradicts management's representation that financial statements compiled for management's use only will not be used by third parties.

.59 Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of my (our) engagement and the nature and limitations of the services I (we) will provide.

I (We) will perform the following services:

1. I (We) will compile, from information you provide, the *[monthly, quarterly, or other frequency]* financial statements of Gowers Drug Stores for the year 20XX. A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) will not audit or review the financial statements and accordingly, will not express an opinion or any other form of assurance on them. The financial statements will not be accompanied by a report.

Based upon my (our) discussions with you, these financial statements are for management's use only and are not intended for third-party use.

Material departures from generally accepted accounting principles (GAAP) or other comprehensive basis of accounting (OCBOA) may exist and the effects of those departures, if any, on the financial statements may not be disclosed. In addition, substantially all disclosures required by GAAP or OCBOA may be omitted. *[The accountant may wish to identify known departures.]* Notwithstanding these limitations, you represent that you have knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements that allows you to place the financial information in the proper context. Further, you represent and agree that the use of the financial statements will be limited to members of management with similar knowledge.

The financial statements are intended solely for the information and use of *[include list of specified members of management]* and are not intended to be and should not be used by any other party.—*[optional]*

2. I (We) will also *[discussion of other services—optional]*

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors that come to my (our) attention and any fraud or illegal acts that come to my (our) attention, unless clearly inconsequential.

We are not independent with respect to *[name of entity]*.—*[if applicable]*

The other data accompanying the financial statements are presented only for supplementary analysis purposes and will be compiled from information that is the representation of management, without audit or review, and I (we) will not express an opinion or any other form of assurance on such data.—*[if applicable]*

In view of the limitations described above, you agree not to take or assist in any action seeking to hold me (us) liable for damages due to any deficiency in the financial statements I (we) prepare and you agree to hold me (us) harmless from any liability and related legal costs arising from any third-party use of the financial statements in contravention of the terms of this agreement.—*[optional]*

Our fees for these services *[fill in]*

Should you require financial statements for third-party use, I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.*

Sincerely yours,

[Signature of accountant]

.60 Illustrative Engagement Letter for a Compilation of Financial Statements

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

1. I (We) will compile, from information you provide, the annual and interim balance sheets and related statements of income, retained earnings, and cash flows of Gowers Drug Stores for the year 20XX. I (We) will not audit or review such financial statements. My (Our) report on the annual financial statements of Gowers Drug Stores is presently expected to read as follows:

I (We) have compiled the accompanying balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statement on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

My (Our) report on your interim financial statements, which statements will omit substantially all disclosures, will include an additional paragraph that will read as follows:

Management has elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

If, for any reason, I am (we are) unable to complete the compilation of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

2. I (We) will also . . . (discussion of other services).

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors that come to my (our) attention and any fraud or illegal acts that come to my (our) attention, unless they are clearly inconsequential.

My (Our) fees for these services. . . .

I (We) shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).*

Sincerely yours,

[Signature of accountant]

.61 Illustrative Engagement Letter for a Review of Financial Statements

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide.

I (We) will perform the following services:

1. I (We) will review the balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. My (Our) review will consist primarily of inquiries of company personnel and analytical procedures applied to financial data, and I (we) will require a representation letter from management. A review does not contemplate obtaining an understanding of internal control or assessing control risk, tests of accounting records and responses to inquiries by obtaining corroborating evidential matter, and certain other procedures ordinarily performed during an audit.

Thus, a review does not provide assurance that I (we) will become aware of all significant matters that would be disclosed in an audit. My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors that come to my (our) attention and any fraud or illegal acts that come to our attention, unless they are clearly inconsequential. I (We) will not perform an audit of such financial statements, the objective of which is the expression of an opinion regarding the financial statements taken as a whole, and, accordingly, I (we) will not express such an opinion on them.

My (Our) report on the financial statements is presently expected to read as follows:

I (We) have reviewed the accompanying balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of Gowers Drug Stores.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

If, for any reason, I am (we are) unable, to complete our review of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

2. I (We) will also . . . [discussion of other services].

My (Our) fees for these services. . . .

I (We) shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

[Signature of accountant]

.62 Illustrative Engagement Letter for a Bookkeeping Engagement

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. So that I (we) can meet your expectations related to the services we will provide, this engagement letter clearly identifies both the services that will be provided and the frequency with which these services will be provided.

I (We) will prepare semi-monthly payroll checks and compute required withholdings based on hours worked, rates of pay, tax jurisdictions, and withholding information provided by you or your representative. You will need to review all payroll checks prior to signing them, and notify me (us) promptly of any errors. I (We) will notify you of required payroll tax deposits. Failure to make these deposits on a timely basis will subject you to penalties and interest.

I (We) will prepare quarterly and annual payroll tax returns, as well as your annual 1099 forms. You will need to review the returns prior to signing them, and notify me (us) promptly of any errors or omissions.

Any significant changes in the number of employees, various miscellaneous deductions, or other items involved could cause an increase in our fees. I (We) also require that you provide complete information in good "working order" for us, with checks and deposits coded to the proper accounts. I (We) will discuss with you in advance any proposed increase in our fees.

I (We) will also assist you with various bookkeeping functions, including consultation on recordkeeping, recording of transactions, and periodic adjustments, among others.

Our work in connection with this engagement is not intended to result in submission or issuance of financial statements by [Firm] as defined by Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A submission of financial statements, as defined by professional standards, requires that the CPA present to a client or third parties financial statements that the CPA has prepared manually or through the use of computer software. By your signature below, you understand that the submission of financial statements as defined above is outside the scope of this engagement.

Should you require financial statements (either for management use or third-party use), I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors that come to my (our) attention and any fraud or illegal acts that come to my (our) attention, unless they are clearly inconsequential.

I (We) appreciate the opportunity to be of service to you and believe that this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let me (us) know. If the foregoing

terms are in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).

Sincerely yours,

[Signature of accountant]

AAM Section 2300

Compilation Engagements

Type of Compilation

.01 SSARS No. 1 (AR section 100.04) defines a *compilation* as follows:

Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

.02 SSARS No. 1 (AR section 100), as amended, now provides for two types of compilations:

- A compilation with a report is required when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects the financial statements to be used by a third party. This might be referred to as a *traditional compilation*.
- A compilation without a report is available when the accountant does not reasonably expect the financial statements to be used by a third party. This might be referred to as a *management-use-only compilation*.

.03 In either case, the engagement is a compilation requiring that the accountant comply with the performance requirements in SSARS No. 1. The difference between the two options lies in the form of communication used in the engagement (see Exhibit 2200.1 in the previous section of this Manual for additional details.)

What's the Difference Between a Traditional Compilation and Management-Use-Only Compilation?

.04 Some practitioners have suggested that there is no real difference between the traditional compilation and the management-use-only compilation since essentially the same information is communicated in either a compilation report or an engagement letter. Although there are similarities in the two forms of communication, there are substantial differences. Both forms of communication (report and engagement letter) are used to communicate:

- *What the engagement is*—in both cases the CPA tells the user that the financial statements are compiled and explains what a compilation is (presenting in the form of financial statements information that is the representation of management).
- *What the engagement is not*—in both cases the CPA tells the user that the financial statements are not audited or reviewed and that no opinion or any other form of assurance is expressed.
- *Limitations in the financial statements*—in both cases the CPA tells the user about any limitations in the financial statements. In this area, however, the way in which limitations are communicated is very different:
 - *Traditional Compilation (Report)*—SSARS No. 1 (AR section 100.41–.42) states that if the accountant becomes aware of a measurement or disclosure departure in the financial statements, the financial statements should be revised or the report should be modified to disclose the departure. In other words, absent revision of the financial statements, the accountant should add an additional paragraph to the report to disclose the nature of the departure and disclose the effect of the departure on the financial statements (if the effect is known).

- *Management-Use-Only Compilation (Engagement Letter)*—SSARS No. 1 (AR section 100.21) states that the accountant should include in the engagement letter a statement that material departures from GAAP or OCBOA may exist and the effects of those departures on the financial statements may not be disclosed.

.05 The reason for this difference in communication is based on the intended user of the financial statements. In the case of a traditional compilation, the financial statements are intended to be used by anyone (general-use). Therefore, the limitations must be communicated in such a way as to be understood by anyone, including those not familiar with the financial matters of the entity. In the case of a management-use-only compilation, the financial statements are intended for a limited group of management (“non third parties”). By definition, these members of management have a certain level of knowledge about the business and about the engagement that the accountant is performing. For that reason, the issue of limitations can be handled in a more broad way (“departures may exist”) rather than specifically identifying each and every known departure.

.06 In an engagement to compile financial statements for management’s use only, a written engagement letter is required. (Note that in all compilation and review engagements an understanding with the client is required.) This engagement letter might address certain matters, as described in AAM section 2200.27. It is permissible to issue one engagement letter to cover multiple periods and/or multiple services. However, it is recommended that this engagement letter be updated at least annually. Because client relationships change over time, it is especially important in this type of engagement to ensure that there is a good understanding between the CPA and the client (restricted nature of the statements, limitations of the financial statements).

Performance Requirements for a Compilation Engagement

.07 SSARS No. 1 (AR section 100), as amended, states that in all compilation engagements, the performance standards in AR section 100.05 and .07–.10 should be followed.

.08 These performance standards consist of:

- *Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.*

The accountant should have a sufficient understanding of his or her client’s industry to know what the financial statements for an entity in that industry should look like and to be aware of any accounting principles or practices that are unique to that industry. The accountant does not have to be an industry expert, and he or she can obtain this general understanding if he or she does not already possess it (for example, through AICPA guides, non-authoritative industry guides, and trade publications).

- *Have or obtain a general understanding of the client’s business.*

The accountant should have a general understanding of the client’s business transactions, form of its accounting records, stated qualifications of accounting personnel, basis of accounting on which the financial statements are to be presented, and form and content of the financial statements, according to the standard. The purpose of this general understanding is to determine whether it will be necessary for the accountant to perform other accounting services (such as bookkeeping and adjustments) in order to compile the financial statements.

- *Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.*

This requirement to obtain additional or revised information has different meanings depending upon the intended use of the financial statements. For example, if the financial statements will be used by a

third party (or if the accountant reasonably expects that they might be used by a third party), any information that appears to be incomplete, incorrect, or unsatisfactory for use by that third party (for example, missing disclosures or measurement departures) should be obtained from or corrected by the client. On the other hand, if the financial statements are not intended to be used by third parties, then that same information may be sufficient for management, since they have the requisite knowledge of the business to put the information in the proper context.

- *Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.*

This final reading of the financial statements is sometimes called the “smell test.” The primary purpose of the smell test requirement is to look for mathematical or clerical errors, presentation errors (for example, incorrect titles on the financial statements), and others.

Traditional Compilation

Performance Requirements

.09 In order to perform a traditional compilation, the accountant should

- Establish an understanding with the client (See AAM section 2200.23–.34).
- Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.
- Have or obtain a general understanding of the client’s business.
- Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.
- Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Reporting Requirements

.10 If the accountant submits financial statements to a client that will be used by a third party (or if he or she reasonably expects that they might be used by a third party), the accountant must comply with the reporting requirements in SSARS No. 1, as amended (AR section 100.11–.19).

.11 Illustrative reports for compiled financial statements are included in AAM section 2610.

Management-Use-Only Compilation

Performance Requirements

.12 In order to perform a management-use-only compilation, the accountant should

- Establish an understanding with the client (See AAM section 2200.23–.34).
- Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.
- Have or obtain a general understanding of the client’s business.
- Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.

- Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Third Parties

.13 In deciding whether the financial statements are, or reasonably might be, expected to be used by a third party, the accountant may rely on management's representation without further inquiry, unless information comes to his or her attention that contradicts management's representation. SSARS No. 1 (AR section 100.04) defines *third parties* as follows:

All parties except for members of management who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

.14 This is a definition by exception. In other words, the starting point for determining who is a third party is that *all parties* are third parties, with the exception of certain members of management. Those certain members of management would be those members who are knowledgeable enough about the business to be able to put the information in the proper context. In order to not be considered a third party, the person or persons must meet two requirements:

- He or she is a member of management.
- He or she is knowledgeable enough about the business to put the information in the proper context.

.15 For guidance on determining whether or not a person is a member of management, the accountant may refer to Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 57, *Related Party Disclosures*, which includes the following definition:

Persons who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management normally includes members of the board of directors, the chief executive officer, chief operating officer, vice presidents in charge of principal business functions (such as sales, administration, or finance), and other persons who perform similar policymaking functions. Persons without formal titles also may be members of management.

.16 In Exhibit 2300.1, "Third Parties," circle C represents all potential users of an entity's financial statements (banks, bonding companies, creditors, shareholders, vendors, customers, and so on), and circle B represents all members of management. All users in circle C would be considered third parties. In addition, members of management in circle B—those without the requisite knowledge of the client's business that would allow them to place the information contained in the financial statements in the proper context—also would be considered third parties. Compiled financial statements which do not include a report should be restricted to those parties in circle A—those members of management who have the requisite knowledge of the business.

Exhibit 2300.1—Third Parties

.17 Although some judgment will be involved in making this determination, the accountant may rely on management's representation that they have the necessary knowledge of the business to put the information in the proper context.

.18 This definition does not mean that certain members of management must be thoroughly knowledgeable about technical accounting principles and procedures. Instead, management must be knowledgeable about the nature of the services the accountant is providing and understand the procedures and assumptions he or she is using. Consider these examples of third parties:

- ABC Company is a small, closely-held business, owned and managed by its sole shareholder, John. In this situation, absent evidence to the contrary, John has the requisite knowledge of his business and would not be considered a third party.
- KLM Company is a small, closely-held business, managed by one of its ten shareholders, Jane (the other nine shareholders live out of state and are not involved in the management of the business). In this situation, absent evidence to the contrary, Jane has the requisite knowledge of the business and would not be considered a third party. The other nine shareholders, however, would be considered third parties.
- XYZ Company is a small, closely-held business. The management team consists of a president, Joe; controller, Mary; operations manager, Sue; and sales manager, Jim. Joe, Mary, and Sue are all involved in the financial operation of the company and are knowledgeable about the accounting principles and practices being used. Jim, on the other hand, has no finance background and is not involved in the financial operation of the company. In this example, Joe, Mary, and Sue would not be considered third parties. Jim, although he is a member of management, does not have the requisite knowledge of the accounting practices of the business and would be considered a third party.

.19 Note that those members of management that are considered third parties (Jim in the preceding example) could be "brought into the loop" or removed from third party status. Removing management members from third-party status would occur by educating those members of management about the accounting principles and practices of the business, thereby allowing them to place the information in the proper context. This education could be accomplished by other members of management or by the accountant.

Transmittal Letter for Management-Use-Only Compilation

.20 Some practitioners have questioned whether they should include a transmittal letter with financial statements compiled for management's use only. While a transmittal letter is not required by SSARSs, it is permissible to attach such a letter to management-use-only financial statements. This letter, however, should not contain any language that resembles that found in a traditional compilation report.

Documentation Requirement

.21 SSARS No. 1 (AR section 100) does not discuss work paper documentation for a compilation engagement except in the case of the engagement letter in a management-use-only compilation.¹ Although not required, including the type of documentation noted below may be helpful from a risk management and quality control perspective:

- Engagement letter
- Trial balance information to bridge the client's records to the compiled financial statements
- Notes on how incorrect, incomplete, or unsatisfactory matters were resolved, if any
- If required by firm policy, compilation work program, procedural checklists, and disclosure checklists

.22 It's wise to document all client discussions, in person or over the phone. Notations should identify all parties to the discussion, what was said, and by whom. Entries should be initiated and dated by the practitioner. Also, consider potential consequences to the client if they ignore, misinterpret, or fail to act on advice or conclusions. If such actions could result in lost financial benefits or adverse tax consequences to the client, or if action by other professionals is recommended or required, send a follow-up letter to the client explaining the substance of the discussions and detailed recommendations.

.23 Never include unsubstantiated subjective statements in a working paper file. If documenting observations regarding questionable client ethics or possible fraud, list the objective findings that led to this observation. In addition, timesheets should reflect and accurately describe work performed during the engagement. Avoid using terms like "audit" and "review," unless the service performed fits the definitions contained in the AICPA professional standards.

Practice Tip

Remember—all relevant information is potentially subject to discovery in a lawsuit, regardless of the storage medium.

¹ SSARS No. 1, as amended by SSARS No. 8 (AR section 100), does require documentation of the understanding with the client in the form of a written engagement letter for a management-use-only compilation (if a compilation report is not to be issued).

.24 Compilation Engagement Program

Client:	Balance Sheet Date:
Completed by:	Date Completed:

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance and Continuance Form.	
2. Consider whether the firm is independent. If not independent, the compilation report should be modified to indicate that fact.	
3. Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.	
4. If the engagement was originally intended to be an audit or a review, document the appropriateness of the decision to step-down.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.	
7. If there is any indication that information supplied by the entity is incorrect, incomplete or otherwise unsatisfactory, obtain additional or revised information.	
8. Draft and read the financial statements and consider whether:	
a. The financial statements include all required disclosures, unless substantially all disclosures are omitted.	
b. Financial statements prepared in accordance with an OCBOA present proper OCBOA titles and disclose the basis of accounting either in the notes or in the compilation report.	
c. The financial statements are appropriate in form.	
d. The financial statements are free of obvious mathematical or clerical error.	
e. The financial statements are free of obvious measurement departures from GAAP or OCBOA.	
9. Draft the accountant's report.	
10. If the financial statements omit substantially all disclosures required by GAAP or OCBOA, add an additional paragraph to the report disclosing the omission.	

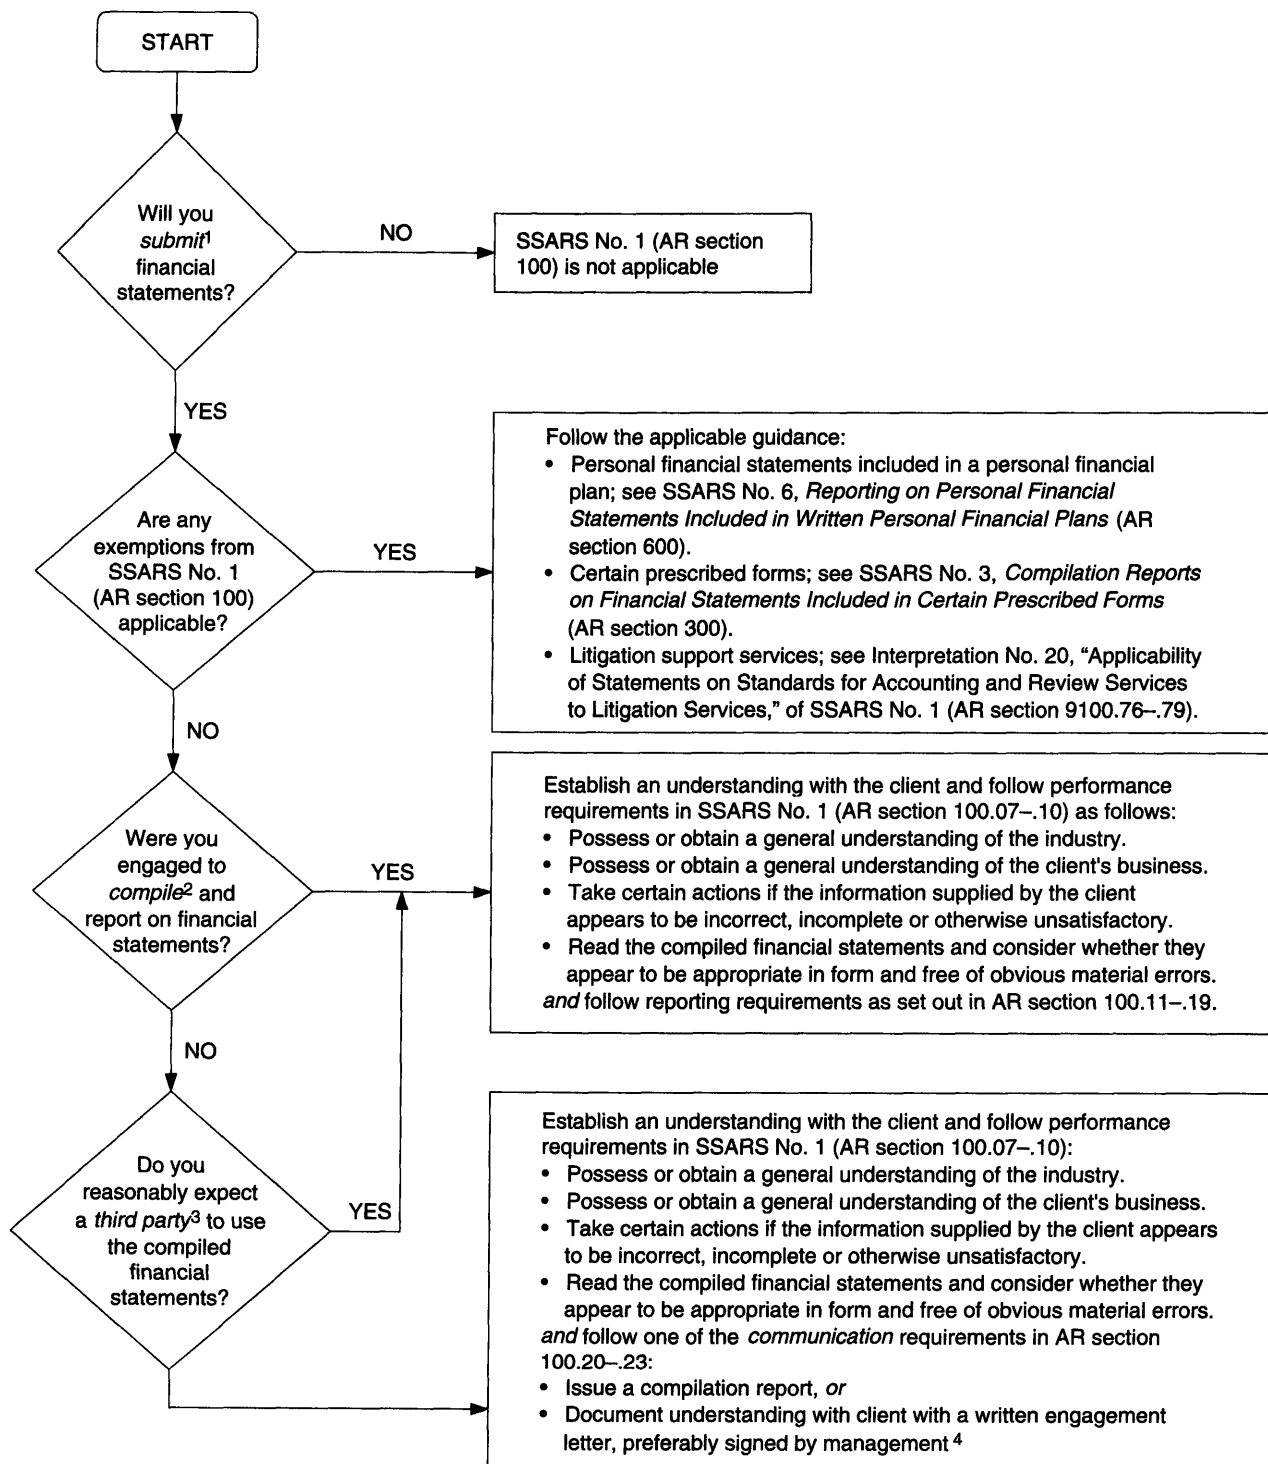

(continued)

Procedure	Completed by or N/A
11. If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:	
a. Revise the financial statements or modify the report to indicate the departure.	
b. If the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.	
c. If modification of the report is not considered adequate, consider withdrawing from the engagement.	
12. If supplementary data accompanies the financial statements, consider referring to the other data in the compilation report or issuing a separate report on the other data.	
13. Include a reference to the report on each page of the financial statements and supplementary data.	
14. Document any other procedures performed or unusual problems and their resolution.	
15. Determine that all required forms and checklists have been completed.	
16. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the work papers.	
17. Date the report as of the date the compilation was completed.	

Compilation of Financial Statements Flowchart

.25 During the initial development of SSARS No. 8 (AR section 100), the members of Accounting and Review Services Committee designed a flowchart to help guide their discussion about the proposed changes in SSARS No. 1. That flowchart, which appeared in SSARS No. 8, is also useful in explaining how compilation engagements may change due to the issuance of SSARS No. 8. We are including it here with the addition of explanatory notes following.

Exhibit 2300.2—Flowchart of Changes in SSARS No. 1 Resulting From Issuance of SSARS No. 8

¹ *Submission of financial statements*—Presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

² *Compilation of financial statements*—Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

³ *Third parties*—All parties except for management who are generally knowledgeable and understand the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

⁴ The engagement letter should include the following matters:

- A description of the nature and limitations of the services to be performed.
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management.
- A statement that the financial statements have not been audited or reviewed.
- A statement that no opinion or any other form of assurance on the financial statements will be provided.
- An acknowledgement that management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.
- An acknowledgement of management's representation and agreement that the financial statements will not be used by third parties.
- A statement that the engagement cannot be relied upon to disclose errors, fraud, or illegal acts.

The engagement letter should also include the following additional matters, if applicable:

- A statement that material departures from generally accepted accounting principles (GAAP) or an other comprehensive basis of accounting (OCBOA) may exist and the effects of those departures on the financial statements may not be disclosed.
- A statement that substantially all disclosures (and the statement of comprehensive income and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted.
- A statement that the accountant is not independent.
- A reference to any supplementary information that may be included.

.26 Management-Use-Only Compilation Engagement Checklist

Client:	Balance Sheet Date:
Completed by:	Date Completed:

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance Form.	
2. Consider whether the firm is independent. If not independent, the engagement letter should be modified to indicate that fact.	
3. Establish an understanding with the client, in writing, regarding the following and include a copy of the engagement letter in the work papers:	
a. Nature and limitations of the services.	
b. A compilation is limited to presenting in the form of financial statements information that is the representation of management.	
c. The financial statements will not be audited or reviewed.	
d. No opinion or any other form of assurance on the financial statements will be provided.	
e. Management has knowledge of the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.	
f. Management representation that financial statements are not to be used by third parties.	
g. Engagement cannot be relied upon to disclose errors, fraud, or illegal acts, and we will inform appropriate level of management of any material errors that come to our attention, unless clearly inconsequential.	
4. If the engagement was originally intended to be another type of engagement, document the appropriateness of the decision to change the engagement.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.	
7. If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.	
8. Draft and read the financial statements and consider whether:	
a. The financial statements are appropriate in form.	
b. The financial statements are free of obvious mathematical or clerical error.	

(continued)

Procedure	Completed by or N/A
9. Include a legend on each page of the financial statements and supplementary data indicating the restricted nature of the presentation.	
10. Document any other procedures performed or unusual problems and their resolution.	
11. Determine that all required forms and checklists have been completed.	
12. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the work papers.

AAM Section 2400

Review Engagements

Overview

.01 SSARS No. 1 (AR section 100.04) defines a *review* of financial statements as follows:

Performing inquiry and analytical procedures that provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications necessary that should be made to the statements in order for them to be in conformity with GAAP or OCBOA.

.02 The definition of a review assumes the existence of financial statements as a “precedent” to a review engagement. The accountant may have to perform other accounting services or a compilation prior to the review engagement.

.03 The following performance standards are applicable to a review engagement:

- Establish an understanding with the entity regarding the services to be performed and the report the accountant expects to render (See AAM section 2200.23–.34 for a discussion of engagement letters).
- Have, or obtain, knowledge of the accounting principles and practices of the entity’s industry and a general understanding of certain matters related to the entity itself.
- Consider whether it will be necessary to perform other accounting services such as assistance in adjusting the books of account, consultation on accounting matters, or compilation of the financial statements.
- Perform sufficient inquiry and analytical procedures to provide a reasonable basis for expressing limited assurance.
- Take certain actions when the accountant becomes aware that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory.
- Obtain a representation letter from management.
- Document certain items in work papers, as required by SSARS No. 1 (AR section 100.33).

Knowledge of the Industry

.04 SSARS No. 1 requires the accountant to have knowledge of the accounting principles and practices of the industry in which the entity operates. That knowledge, the sources of obtaining it, and the timing requirements are identical to the requirements for a compilation.

.05 The purpose of having that knowledge is not the same, however. In a compilation, the purpose is to “... enable [the accountant] to compile financial statements that are appropriate in form for an entity operating in that industry.” In review, an additional purpose is to assist the accountant in constructing inquiries and analytical procedures adequate to provide a reasonable basis for expressing limited assurance.

Knowledge of the Client

.06 SSARS No. 1 (AR section 100) states that the accountant must possess or obtain a certain knowledge about the entity whose financial statements he is reviewing. Since its basic purpose in a review is to enable the accountant to construct appropriate inquiries and analytical procedures, this level of understanding is more extensive than that required for a compilation engagement.

.07 The accountant who performs a review must have a general understanding of:

- Entity's organization
- Operating characteristics of that organization
- Nature of the entity's assets and liabilities
- Nature of the entity's revenues and expenses

.08 In order to obtain this understanding, the accountant would need a general knowledge of the entity's:

- Products and services
- Production, distribution, and compensation methods
- Operating locations
- Material transactions with related parties

Necessity to Perform Other Accounting Services

.09 SSARS No. 1 (AR section 100.04) states that "The accountant might consider it necessary to compile the financial statements or to perform other accounting services to enable him to perform a review."

.10 Since the definition of a review assumes the existence of financial statements as a basis for a review, if the statements do not already exist, the accountant may have to prepare books of original entry, post the ledger, prepare a trial balance, and/or compile the financial statements.

.11 In many cases the financial statements may have to be adjusted (accruals, deferrals, depreciation, etc.) before they are reviewed.

Inquiries and Analytical Procedures

.12 In a review engagement, performing inquiries and analytical procedures is the accountant's primary means of obtaining a reasonable basis for expressing limited assurance. Professional literature does not indicate how many procedures must be performed in a given engagement to achieve its reporting objective. That is a matter of professional judgment. The extent of the total knowledge the accountant possesses about an entity and the industry in which it operates is the basis for planning the extent of procedures to be performed.

Review Procedures—Inquiries

.13 SSARS No. 1 (AR section 100.28) states that the accountant's inquiry should ordinarily include:

- Inquiries concerning the entity's accounting principles and practices and the methods followed in applying them.
- Inquiries concerning the entity's procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements.

- Inquiries concerning actions taken at meetings of stockholders, board of directors, committees of the board of directors, or comparable meetings that may affect the financial statements.
- Inquiries of persons having responsibility for financial and accounting matters concerning: (1) whether the financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) consistently applied, (2) changes in the entity's business activities or accounting principles and practices, (3) matters as to which questions have arisen in the course of applying the foregoing procedures, and (4) events subsequent to the date of the financial statements that would have a material effect on the financial statements.

.14 Appendix B of SSARS No. 1 (AR section 100.58) contains illustrative inquiries for a review engagement. However, these illustrative inquiries are not intended to serve as a program or checklist in the conduct of a review. The inquiries to be made in a review engagement are a matter of the accountant's judgment. Specific inquiries should be tailored to the client, based on the accountant's understanding of the client's business and the industry in which it operates.

.15 A list of illustrative inquiries for a review engagement is included in AAM section 2400.38.

Review Procedures—Analytics

.16 SSARS No. 1 (AR section 100.28) states that the accountant's analytical procedures should ordinarily consist of procedures designed to identify relationships and individual items that appear to be unusual. For a review engagement, these procedures fall into three categories:

- Comparison of the financial statements with statements for comparable prior period(s). An example would be trend analysis, which involves the study of the change in accounts over time.
- Comparison of the financial statements with anticipated results, if available (for example, budgets and forecasts). An example would be comparing budgeted amounts to actual amounts and identifying significant variances.
- Study of the relationships of the elements of the financial statements that would be expected to conform to a predictable pattern based on the entity's experience. An example would be reasonableness tests that estimate a financial statement amount or the change in amount from the prior period.

.17 A basic premise underlying the application of analytical procedures is that relationships among data may reasonably be expected to exist and continue to exist in the absence of known conditions to the contrary.

.18 Specific analytical procedures used are a matter of the accountant's judgment. Therefore, the accountant should tailor the specific procedures to the client based on his or her understanding of the client's business and the industry in which it operates.

.19 In applying analytical procedures in a review engagement, the accountant may achieve both effectiveness and efficiency by using the following approach.

- Identify immaterial account balances or classes of transactions. Apply analytical procedures to them, if needed.
- Identify account balances or classes of transactions to which other accounting services (bookkeeping or payroll services, for example) have been applied. Consider the evidence that has been gathered and whether any material errors are likely to remain. If there is already sufficient evidence for those account balances or classes of transactions to reduce the risk of material misstatement to a moderate level, consider whether applying analytical procedures is needed.

- For the remaining account balances and classes of transactions, develop expectations (for example, using historical trends adjusted for known changes) for them. Note, however, that SSARS No. 1 (AR section 100) does not require a formal process of developing and documenting expectations.
- Consider how close the existing account balance or class of transaction comes to the expectation developed in the previous step. If the differences are small, no additional evidence may be needed.
- If the differences are large, material errors could exist. Inquire about valid business reasons for the difference. If the results of inquiry are plausible and agree with other evidence, no additional evidence may be needed.
- If additional evidence is needed, apply other analytical procedures or obtain other suitable evidence.

.20 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with the primary basis for expressing limited assurance that no material modifications should be made to the financial statements. SSARS No. 1 (AR section 100) does not specify how many procedures must be performed in order to express the limited assurance. The extent and type of procedures performed is a matter of professional judgment.

.21 SSARS No. 1 (AR section 100.31) does allow modification of inquiry and analytical procedures. For example, the accountant may have acquired knowledge about the entity in the performance of audits of the entity's financial statements, compilation of the entity's financial statements, or other accounting services (such as bookkeeping services). This acquired knowledge may be sufficient to reduce the extent of inquiries and analytical procedures, although the accountant would still have the same degree of responsibility with respect to the financial statements (expressing limited assurance that no material modifications should be made to the financial statements).

Analytical Procedures in Initial Review Engagements

.22 Accountants often question how to apply analytical procedures on initial review engagements. For example, how can the accountant evaluate the results of procedures applied for the current year if he or she is unsure whether amounts are comparable with prior years or if the company is newly formed? As stated in the previous section, SSARS No. 1 (AR section 100.31) states:

Knowledge acquired in the performance of audits of the entity's financial statements, compilation of the financial statements, or other accounting services may result in modification of the review procedures described. . . However, such modification would not reduce the degree of responsibility the accountant assumes with respect to the financial statements he has reviewed.

.23 This allows the accountant to modify his or her inquiries and analytical procedures based on knowledge acquired in the performance of other services. Although SSARS No. 1 does not cite initial engagements as a situation in which the accountant may choose to modify his or her inquiries and analytical procedures, it is reasonable to assume that these procedures could be modified in initial engagements.

.24 In initial review engagements, the accountant may have to rely on other sources of evidence. For example, the accountant may have to rely on making additional inquiries. Or, the accountant may have already compiled the financial statements, or may have provided other accounting or bookkeeping services for the client. In these cases the accountant may rely on knowledge gained from these other services to supplement the limited analytical procedures that can be performed because of insufficient history. Also, the accountant's analytical procedures may also consist of comparisons with results for similar clients or to industry statistics, and of analysis of the interrelationships between accounts in these circumstances.

When the Results of Analytical Procedures Are Unfavorable

.25 When results of analytical procedures are unfavorable (i.e., the accountant believes that fluctuations from expected amounts are significant), SSARS No. 1 (AR section 100.32) requires the accountant to apply additional procedures. The accountant must achieve limited assurance that no material modifications are necessary to conform the financial statements to GAAP. Sometimes inquiries and analytical procedures will be sufficient. However, in many cases, the accountant will combine additional inquiry or analytical procedures with preparing other accounting schedules or analyses to explain fluctuations.

.26 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with the primary basis for expressing limited assurance that no material modifications should be made to the financial statements. SSARS No. 1 (AR section 100) does not specify how many procedures must be performed in order to express the limited assurance. The extent and type of procedures performed is a matter of professional judgment.

.27 An illustrative ratio analysis worksheet is included in AAM section 2400.40, and an illustrative analytical procedures comparative report is included in AAM section 2400.41.

Awareness Concerning Information Supplied

.28 SSARS No. 1 (AR section 100.32) states that a review does not contemplate various procedures that are ordinarily performed during an audit. However, it goes on to state that “. . . if the accountant becomes aware that information coming to his attention is incorrect, incomplete, or otherwise unsatisfactory, he should perform the additional procedures he deems necessary to achieve limited assurance . . .”

.29 If the accountant is unable to perform the inquiry and analytical procedures he considers necessary to achieve limited assurance contemplated by a review, his review will be incomplete. Under these circumstances, the accountant will not have attained his original objective and accordingly cannot express limited assurance.

.30 SSARS No. 1 (AR section 100.38) also states that “when an accountant is unable to perform the inquiry and analytical procedures he or she considers necessary . . . the review will be incomplete.” A review that is incomplete is not an adequate basis for issuing a review report. In such a situation, the accountant should also consider whether it is appropriate to issue a compilation report on the financial statements.

Representation Letters

.31 Written representations are required from management for all financial statements and periods covered by the accountant’s review report. The specific written representations obtained by the accountant will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. In connection with the review of the financial statements presented in accordance with GAAP, specific representations should relate to the following matters:¹

- Management’s acknowledgement of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity generally accepted accounting principles.
- Management’s belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.
- Management’s full and truthful response to all inquiries.

¹ Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles. The specific representations to be obtained should be based on the nature and basis of representation of the financial statements being reviewed.

- Completeness of information.
- Information concerning subsequent events.

.32 Like the inquiries and analytical procedures in a review engagement, the management representation letter should be tailored to the client based on the accountant's knowledge of the client's business and the industry in which it operates. Additional representations may be added to the letter, especially if the client operates in a specialized industry (e.g., construction contractors, homeowners associations, and not-for-profit organizations). These additional representations may be found in *AICPA Industry Audit and Accounting Guides* you can obtain by contacting AICPA Member Services at 888-777-7077.

.33 The written representations should be addressed to the accountant. The representations should be made as of a date no earlier than the date of the accountant's report since the accountant is concerned with events occurring through the date of the report that may require adjustments to or disclosure in the financial statements. The letter should be signed by those members of management whom the accountant believes are responsible for and knowledgeable, directly or through others in the organization, about the matters covered in the representation letter. Normally the chief executive officer and chief financial officer or others with equivalent positions in the entity should sign the representation letter. If the current management was not present during all the periods covered by the accountant's report, the accountant should nevertheless obtain written representations from current management on all such periods.

.34 An illustrative management representation letter is provided in Appendix F of SSARS No. 1 (AR section 100.62) and is included in AAM section 2400.38.

Work Paper Documentation

.35 SSARS No. 1 (AR section 100.33) does not specify the form and content of work papers for review engagements, but it does state that they should describe the following:

- The matters covered in the accountant's inquiry and analytical procedures.
- Unusual matters that the accountant considered during the performance of the review, including their disposition.

.36 In addition, most practitioners include some or all of the following in their work papers:

- Engagement letter.
- Checklist or memorandum describing the CPA's knowledge of the client's business and industry.
- Checklist, work program, and results of analytical procedures in support of inquiries and analytical procedures, including names of persons responding to inquiries.
- Support for data in the notes to the financial statements.
- Discussion of unusual matters encountered.
- Representation letter.
- Compilation work papers, if the financial statements required compilation prior to review.
- Copies of reports from other accountants who have audited or reviewed a subsidiary, etc.
- Reasons for a step-down from an audit, if applicable.

.37 Review Engagement Program

Client:	Balance Sheet Date:
Completed by:	Date Completed:

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance and Continuance Form.	
2. Consider whether the firm is independent. If not independent, a review engagement cannot be performed.	
3. Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.	
4. If the engagement was originally intended to be an audit, document the appropriateness of the decision to step-down.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable review of the financial statements.	
7. Perform the following inquiries and analytical procedures:	
a. Inquire as to the accounting principles and practices and the methods followed in applying them.	
b. Inquire as to the procedures for recording, classifying, and summarizing transactions and accumulating information for financial statement disclosures.	
c. Identify relationships and individual items that appear to be unusual.	
d. Inquire as to actions taken at meetings of stockholders and directors.	
e. Inquire of persons having responsibility for financial and accounting matters concerning:	
1) Whether the financial statements have been prepared in accordance with GAAP (or an OCBOA) consistently applied.	
2) Changes in the client's business activities or accounting principles and practices.	
3) Matters as to which questions have arisen in the course of applying the inquiry and analytical procedures.	
4) Events subsequent to the date of the financial statements that would have a material effect on the financial statements.	
8. If there is any indication that information supplied by the entity is incorrect, incomplete or otherwise unsatisfactory, obtain additional or revised information.	

(continued)

Procedure	Completed by or N/A
9. Draft and read the financial statements and consider whether:	
a. The financial statements include all required disclosures.	
b. Financial statements prepared in accordance with an OCBOA present proper OCBOA titles and disclose the basis of accounting either in the notes or in the review report.	
c. The financial statements are appropriate in form.	
d. The financial statements are free of obvious mathematical or clerical error.	
e. The financial statements are free of obvious measurement departures from GAAP or OCBOA.	
10. Draft the accountant's report.	
11. If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:	
a. Revise the financial statements or modify the report to indicate the departure.	
b. If the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.	
c. If modification of the report is not considered adequate, consider withdrawing from the engagement.	
12. Obtain a representation letter.	
13. If supplementary data accompanies the financial statements, modify the report in accordance with AR section 100.45.	
14. Include a reference to the report on each page of the financial statements and supplementary data.	
15. Document any other procedures performed or unusual problems and their resolution.	
16. Determine that all required forms and checklists have been completed.	
17. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the work papers.	
18. Date the report as of the date the review was completed.	

.38 Review of Financial Statements—Illustrative Representation Letter

A review of financial statements consists principally of inquiries of company personnel and analytical procedures applied to financial data. As part of a review of financial statements, the accountant is required to obtain a written representation from his or her client to confirm the oral representations made to the accountant. The introductory paragraph should specify the financial statements and periods covered by the accountant's review report. If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. The following representation letter is included for illustrative purposes only. The accountant may decide, based on the circumstances of the review engagement or the industry in which the entity operates, that other matters should be specifically included in the letter and that some of the representations included in the illustrative letter are not necessary.

(Date [No earlier than the date of the Accountant's Report])

(To the Accountant)

We are providing this letter in connection with your review of the (identification of financial statements) of (name of entity) as of (dates) and for the (periods of review) for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements in order for them to be in conformity with generally accepted accounting principles.

We confirm that we are responsible for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.¹

We confirm, to the best of our knowledge and belief, (as of [a date no earlier than the date of review report, see section 100.29]), the following representations made to you during your review.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.
2. We have made available to you all:
 - a. Financial records and related data.
 - b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
4. We have no plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities.
5. There are no material losses (such as from obsolete inventory or purchase or sales commitments) that have not been properly accrued or disclosed in the financial statements.
6. There are no:
 - a. Violations or possible violations of laws or regulations, whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

¹ The qualitative discussion of materiality used in this letter is adapted from (FASB) Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

- We believe that the carrying amounts of all material assets will be recoverable.
- All agreements to repurchase assets previously sold have been properly disclosed.
- We have made provisions for losses to be sustained in the fulfillment of, or from the inability to fulfill sales commitments.

11. We have responded fully and truthfully to all inquiries made to us by you during your review.

(Name of Owner or Chief Executive Officer and Title)

(Name of Chief Financial Officer and Title, where applicable)

See SAS No. 85, *Management Representations*, Appendix B, "Additional Illustrative Representations" (AU section 333.17), for other representations that may be appropriate from management relating to matters specific to the entity's business or industry.

.39 Review of Financial Statements—Illustrative Inquiries

1. General
 - a. What are the procedures for recording, classifying, and summarizing transactions (relates to each section discussed below)?
 - b. Do the general ledger control accounts agree with subsidiary records (for example, receivables, inventories, investments, property and equipment, accounts payable, accrued expenses, noncurrent liabilities)?
 - c. Have accounting principles been applied on a consistent basis?
2. Cash
 - a. Have bank balances been reconciled with book balances?
 - b. Have old or unusual reconciling items between bank balances and book balances been reviewed and adjustments made where necessary?
 - c. Has a proper cutoff of cash transactions been made?
 - d. Are there any restrictions on the availability of cash balances?
 - e. Have cash funds been counted and reconciled with control accounts?
3. Receivables
 - a. Has an adequate allowance been made for doubtful accounts?
 - b. Have receivables considered uncollectible been written off?
 - c. If appropriate, has interest been reflected?
 - d. Has a proper cutoff of sales transactions been made?
 - e. Are there any receivables from employees and related parties?
 - f. Are any receivables pledged, discounted, or factored?
 - g. Have receivables been properly classified between current and noncurrent?
4. Inventories
 - a. Have inventories been physically counted? If not, how have inventories been determined?
 - b. Have general ledger control accounts been adjusted to agree with physical inventories?
 - c. If physical inventories are taken at a date other than the balance sheet date, what procedures were used to record changes in inventory between the date of the physical inventory and the balance sheet date?
 - d. Were consignments in or out considered in taking physical inventories?
 - e. What is the basis of valuation?
 - f. Does inventory cost include material, labor, and overhead where applicable?
 - g. Have write-downs for obsolescence or cost in excess of net realizable value been made?
 - h. Have proper cutoffs of purchases, goods in transit, and returned goods been made?
 - i. Are there any inventory encumbrances?
5. Prepaid expenses
 - a. What is the nature of the amounts included in prepaid expenses?
 - b. How are these amounts amortized?

6. Investments, including loans, mortgages, and intercorporate investments
 - a. Have gains and losses on disposal been reflected?
 - b. Has investment income been reflected?
 - c. Has appropriate consideration been given to the classification of investments between current and noncurrent, and the difference between the cost and market value of investments?
 - d. Have consolidation or equity accounting requirements been considered?
 - e. What is the basis of valuation of marketable equity securities?
 - f. Are investments unencumbered?
7. Property and equipment
 - a. Have gains or losses on disposal of property or equipment been reflected?
 - b. What are the criteria for capitalization of property and equipment? Have such criteria been applied during the fiscal period?
 - c. Does the repairs and maintenance account only include items of an expense nature?
 - d. Are property and equipment stated at cost?
 - e. What are the depreciation methods and rates? Are they appropriate and consistent?
 - f. Are there any unrecorded additions, retirements, abandonments, sales, or trade-ins?
 - g. Does the entity have material lease agreements? Have they been properly reflected?
 - h. Is any property or equipment mortgaged or otherwise encumbered?
8. Other assets
 - a. What is the nature of the amounts included in other assets?
 - b. Do these assets represent costs that will benefit future periods? What is the amortization policy? Is it appropriate?
 - c. Have other assets been properly classified between current and noncurrent?
 - d. Are any of these assets mortgaged or otherwise encumbered?
9. Accounts and notes payable and accrued liabilities
 - a. Have all significant payables been reflected?
 - b. Are all bank and other short-term liabilities properly classified?
 - c. Have all significant accruals, such as payroll, interest, and provisions for pension and profit-sharing plans been reflected?
 - d. Are there any collateralized liabilities?
 - e. Are there any payables to employees and related parties?
10. Long-term liabilities
 - a. What are the terms and other provisions of long-term liability agreements?
 - b. Have liabilities been properly classified between current and noncurrent?
 - c. Has interest expense been reflected?
 - d. Has there been compliance with restrictive covenants of loan agreements?
 - e. Are any long-term liabilities collateralized or subordinated?

11. Income and other taxes

- a.* Has provision been made for current and prior-year federal income taxes payable?
- b.* Have any assessments or reassessments been received? Are there tax examinations in process?
- c.* Are there timing differences? If so, have deferred taxes been reflected?
- d.* Has provision been made for state and local income, franchise, sales, and other taxes payable?

12. Other liabilities, contingencies, and commitments

- a.* What is the nature of the amounts included in other liabilities?
- b.* Have other liabilities been properly classified between current and noncurrent?
- c.* Are there any contingent liabilities, such as discounted notes, drafts, endorsements, warranties, litigation, and unsettled asserted claims? Are there any unasserted potential claims?
- d.* Are there any material contractual obligations for construction or purchase of real property and equipment and any commitments or options to purchase or sell company securities?

13. Equity

- a.* What is the nature of any changes in equity accounts?
- b.* What classes of capital stock have been authorized?
- c.* What is the par or stated value of the various classes of stock?
- d.* Do amounts of outstanding shares of capital stock agree with subsidiary records?
- e.* Have capital stock preferences, if any, been disclosed?
- f.* Have stock options been granted?
- g.* Has the entity made any acquisitions of its own capital stock?
- h.* Are there any restrictions on retained earnings or other capital?

14. Revenue and expenses

- a.* Are revenues from the sale of major products and services recognized in the appropriate period?
- b.* Are purchases and expenses recognized in the appropriate period and properly classified?
- c.* Do the financial statements include discontinued operations or items that might be considered extraordinary?

15. Other

- a.* Are there any events that occurred after the end of the fiscal period that have a significant effect on the financial statements?
- b.* Have actions taken at stockholder, board of directors, or comparable meetings that affect the financial statements been reflected?
- c.* Have there been any material transactions between related parties?
- d.* Are there any material uncertainties? Is there any change in the status of material uncertainties previously disclosed?

.40 Illustrative Ratio Analysis Worksheet

Below you will find 24 financial ratios. These financial ratios include liquidity, activity, and efficiency ratios. Accountants should use the ratios deemed necessary and use additional ones as needed.

Ratio Name	Formula	Calculation	Explanation
Current ratio	$\frac{\text{Current Assets}}{\text{Current Liabilities}}$		measures ability to meet short term obligations
Quick ratio (or Acid test ratio)	$\frac{\text{Current Assets} - \text{Inventory}}{\text{Current Liabilities}}$		a more conservative measure of a firm's ability to meet short term obligations
Operating cash flows to current liabilities	$\frac{\text{Cash Provided by Operations}}{\text{Average Current Liabilities}}$		liquidity calculation
Days Sales in Accounts Receivable	$\frac{\text{Net Accounts Receivable}}{\text{Net Sales}/360}$		measures length of time average sales is a receivable
Allowance for bad debts as a % of accounts receivable	$\frac{\text{Allowance for Bad Debts}}{\text{Accounts Receivable}}$		calculation is compared to prior periods and other comparable companies
Bad debt expense as a % of net sales	$\frac{\text{Bad Debt Expense}}{\text{Net Sales}}$		calculation is compared to prior periods and other comparable companies
Inventory Turnover	$\frac{\text{Cost of Sales}}{\text{Inventory}}$		activity ratio – indication of efficiency of operation
Fixed Asset Turnover	$\frac{\text{Net Sales}}{\text{Average Fixed Assets}}$		activity ratio
Receivable Turnover	$\frac{\text{Net Credit Sales}}{\text{Average Receivables}}$		activity ratio
Net Sales to Inventory	$\frac{\text{Net Sales}}{\text{Inventory}}$		activity ratio
Days in Inventory	$\frac{\text{Inventory} \times (\text{Days in a cycle})}{\text{Cost of Sales}}$		identifies how many days of inventory is available
Accounts Payable to Net Sales	$\text{Accounts Payable} \times (\text{Days in a cycle}) / \text{Net Sales} \times (\text{Days in a year})$		compares A/P balance to net sales
Return on Total Assets	$\text{Net Income} \times (\text{Days in a year}) / \text{Total Assets} \times (\text{Days in a cycle})$		measures profitability at a point in time
Return on Net Worth	$\text{Net Income} \times (\text{Days in a year}) / \text{Net Worth} \times (\text{Days in a cycle})$		profitability measure
Return on Net Sales	$\frac{\text{Net Income}}{\text{Net Sales}}$		profit margin
Net Sales to Accounts Receivable	$\frac{\text{Net Sales} \times (\text{Days in a year})}{\text{Net A/R} \times (\text{Days in a cycle})}$		identifies how many times A/R will turn over per year of the operating cycle
Net Sales to Net Fixed Assets	$\frac{\text{Net Sales} \times (\text{Days in a year})}{\text{Fixed Assets} \times (\text{Days in a cycle})}$		identifies efficiency of capital investment

Ratio Name	Formula	Calculation	Explanation
Days Payables in Cost of Sales	$\frac{A/P \times (\text{Days in a cycle})}{\text{Cost of Sales}}$		
Income Before Tax to Net Worth	$\frac{\text{EBIT} \times (\text{Days in a year})}{\text{Net Worth} \times (\text{Days in a cycle})}$		ratio of earnings to net worth per year
Gross Profit Percentage	$\frac{\text{Net Sales} - \text{Cost of Sales}}{\text{Net Sales}}$		profitability calculation
Operating Expenses as a % of Net Sales	$\frac{\text{Operating Expenses}}{\text{Net Sales}}$		efficiency calculation
Times Interest Earned	$\frac{\text{EBIT}}{\text{Interest Expense}}$		profitability calculation
Income Before Tax to Assets	$\frac{\text{EBIT} \times (\text{Days in a year})}{\text{Assets} \times (\text{Days in a cycle})}$		measure of profitability
Altman Z Score	See Below		A composite formula that is widely used to measure the financial "health" of a company. The formula takes financial ratios and multiplies each by a specific constant. The amounts computed are added together to obtain an overall score. This score is then compared to scores from other companies to rate relative financial health.

For private companies (four variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	6.56	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	3.26	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	6.72	=
$\frac{\text{Net Worth}}{\text{Total Liabilities}}$	×	1.05	=
<hr/>			
Altman Z Score			<hr/> <hr/>

For private companies (five variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	.717	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	.847	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	3.107	=
$\frac{\text{Net Worth (Book Value)}}{\text{Total Liabilities}}$	×	.420	=
$\frac{\text{Sales}}{\text{Total Assets}}$	×	.998	=
<hr/>			
Altman Z Score			<hr/> <hr/>

For public companies:

<u>Working Capital</u>	×	.012	=
Total Assets			
<u>Retained Earnings</u>	×	.014	=
Total Assets			
<u>Income before Interest and Taxes</u>	×	.033	=
Total Assets			
<u>Market Value Equity</u>	×	.006	=
Book Value of Total Liabilities			
<u>Sales</u>	×	.999	=
Total Assets			<hr/>
Altman Z Score			<hr/> <hr/>

AAM Section 2500

Form and Content of Financial Statements

.01 Preparing financial statements is both an art and a science, normally learned by trial and error or by word of mouth. The process is an art in that financial statements must be presented in a format that has eye appeal, is understandable, conveys the company's financial picture, and can be produced economically. Preparing financial statements is a science in that it requires mastery of a complex array of authoritative standards for measurement, presentation, and disclosure.

Title Page

.02 A title page is recommended for all financial statement presentations. The title page should contain the name of the entity, the title of the financial statements, and the date or period covered.

Name of the Entity

.03 The name of the entity should be presented exactly as it is listed in the charter, partnership agreement, or other appropriate legal document. When the entity is not a regular corporation, the type of entity should be disclosed. Examples of appropriate presentations are as follows:

- Corporation
- XYZ, Ltd.
- Jones Nursery
- The Estate of John Doe
- Mr. and Mrs. John Q. Public
- Jane Doe Testamentary Trust

Title of Financial Statements

.04 If the presentation includes more than one type of financial statement (e.g., Balance Sheet and Income Statement), the term "Financial Statements" is the most practical method of communicating what is included in the presentation. When only one type of statement is presented, it is more appropriate to use the exact title of the statement. When consolidated or combined statements are presented, the title page should include the words "consolidated" or "combined." When financial statements include supplementary information, the title should be modified. Some practitioners add a description of the service performed to the title of the financial statements on the title page.

Date or Period Covered

.05 When both a balance sheet and income statement are presented, the period covered by the statement should be shown, with the period ending date. When only a balance sheet is presented, the date should be the balance sheet date, alone.

Presentation of the Accountant's Report

.06 This section discusses presentation and format of the accountant's report. AAM section 2600 discusses the wording of the report and other considerations that affect the degree of responsibility assumed by the accountant.

Letterhead

.07 There is no requirement that the accountant's report be printed on the firm's letterhead (nor is there any requirement that the report be manually signed* or that the financial statements be bound).

Heading of the Accountant's Report

.08 No heading is needed for an accountant's report, although some accountants prefer to use one. This avoids any misunderstanding about the type of report. Examples of appropriate report headings would be as follows:

- Accountant's Report
- Accountant's Report on Financial Statements
- Accountant's Report on Supplementary Information

Address

.09 Generally, the accountant's report should be addressed to the Board of Directors, stockholders, or both. Reports are not intended as letters. Accordingly, addresses that include street names or zip codes are not appropriate. Examples of appropriate addresses are as follows:

- To the Board of Directors; XYZ Corporation; Greenville, SC
- To the Stockholders; XYZ Corporation
- To the Board of Directors and Shareholders; XYZ Corporation; Greenville, SC
- For small, closely-held companies: Mr. John Doe; Small Manufacturing, Inc; Greenville, SC
- For personal financial statements: Mr. And Mrs. John Doe; Greenville, SC
- For partnerships: To the Managing Partner; ABC Company; Greenville, SC or Mrs. Jane Doe; General Partner, XYZ Ltd. Partnership
- For proprietorship: Mr. John Jones; Jones Transportation; Columbia, SC
- For trusts: Mr. John Smith; Trustee; Jane Doe Testamentary Trust; Myrtle Beach, SC
- For estates: Mr. John Doe; Executor; Estate of John Smith; Hilton Head Island, SC

Salutations

.10 Common practice in the profession is to exclude such salutations as "Dear Sirs" or "Gentlemen" from the report.

* The Accounting and Review Services Committee has issued a proposed SSARS, *Omnibus—2002*. The proposed omnibus statement includes revisions to existing SSARS that have been accumulated over time, including possible revisions relating to information presented here. For a summary of the omnibus statement, see AAM section 2100.54.

Signature

.11 The compilation or review report should contain a signature of the accounting firm or the accountant as appropriate. (For example, the signature could be manual, stamped, electronic, or typed.) Some state boards and certain regulatory agencies require an individual's signature on the report.

Date of Report

.12 The dating of the report affects the responsibility assumed by the accountant and is discussed in more detail in AAM section 2600. The format of the date is rather straightforward. Firms with multiple offices often precede the date of the report with the office's location.

Basic Financial Statements

.13 The basic financial statements included in a GAAP financial statement presentation are as follows: (Note: Basic financial statements for an OCBOA presentation are discussed in AAM section 2700)

- Balance Sheet
- Income Statement
- Statement of Retained Earnings* or Changes in Stockholders' Equity
- Statement of Cash Flows

Heading

.14 The heading of each financial statement should contain the name of the entity, the title of specific statement, and the date or period covered.

Reference on Financial Statements

- .15 The type of reference/legend on the financial statements depends upon the type of engagement:
- If the financial statements are reviewed, each page of the financial statements should contain a reference, such as: *See Accountant's Review Report.*
 - If the financial statements are compiled for general-use (i.e., not restricted to management's use only), each page of the financial statements should contain a reference, such as: *See Accountant's Compilation Report.*
 - If the financial statements are compiled for management's use only, each page of the financial statements should contain a reference to the restricted nature of the financial statements, such as:
 - *Restricted for Management's Use Only, or*
 - *Solely for the information of and use by the management of XYZ Company and not intended to be and should not be used by any other party.*
 - If the financial statements are compiled and included in certain prescribed forms (according to SSARS No. 3 [AR section 300]), each page of the form should include a reference, such as: *See Accountant's Compilation Report.*
 - If the financial statements are personal financial statements prepared for inclusion in a personal financial plan (SSARS No. 6 [AR section 600]), each of the personal financial statements should contain a reference to the report, such as: *See Accountant's Report.*

* The accounting literature does not require the statement of retained earnings to be presented as a financial statement. Accounting Principles Board (APB) Opinion No. 12, *Omnibus Opinion—1967*, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.

.16 Note that, in all cases, these requirements extend to the footnotes (since the footnotes are part of the financial statements). However, there is diversity in practice as to how to meet this requirement for footnotes. Some practitioners place the reference on each page of the footnotes, and others place the reference only on the first page of the footnotes. Still others place a statement on each page of the financial statements that “the notes are an integral part of the financial statements” and, therefore, do not place the reference on the footnote pages. Any of these approaches is acceptable.

.17 Also, the references above are examples given in SSARS, and the accountant may modify the wording of the reference. SSARS No. 1 (AR section 100) requires only that the accountant refer to the report—not that he or she state the type of report (level of service) in the reference. Therefore, the reference “See Accountant’s Report” would be sufficient in all engagements that contain a report. However, most practitioners follow the wording given in the examples. Accountants may place the reference on the financial statements by installing footers in the financial statement software, by using a rubber stamp, by manually writing the reference or by any other method that is practical to use.

Use of the Term “Unaudited”

.18 Some practitioners follow the financial statement title with the term “Unaudited.” This practice is not required by SSARS and may be misleading.

Supplementary Information

.19 Financial statements of nonpublic companies often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

Presentation

.20 Normally, supplementary information is segregated from the basic financial statements, after a title page marked “Supplementary Information.” If a separate report on the supplementary information is presented, it should follow the title page.

Reporting

.21 The accountant must describe in the report on the financial statements, or in a separate report, the degree of responsibility, if any, he or she takes with regard to the supplementary information. See AAM section 2600 for information on suggested wording for compilation and review reports.

Headings

.22 Each schedule should be headed with a descriptive title that distinguishes it from the basic financial statements. Normally, supplementary schedules are not referred to as “statements” to avoid confusing them with basic financial statements.

Reference to Report

.23 Each supplementary schedule should contain a reference to the report. Although not specifically addressed in SSARS, the reference is advisable because the report describes the degree of responsibility the accountant takes with regard to the schedules.

Disclosures

.24 In general, all financial statements should include adequate disclosures (footnotes). However, there are situations in which the accountant may omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.25 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the company’s financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.26 Note that if the financial statements are presented on a basis of accounting other than GAAP (e.g., income tax basis), this extra paragraph would be worded as follows:

Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the company’s assets, liabilities, equity, revenues and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.27 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they should not be labeled as “Notes to the Financial Statements” (this title implies full disclosure). Instead, an appropriate title would be “Selected Information—Substantially All Disclosures Required by GAAP Are Not Included.”

Referencing Notes

.28 While there is no requirement that individual notes be referenced to specific items in the financial statements, each page of the financial statements should contain a general reference to the notes. If “selected information” rather than all notes is presented in a compilation, a reference to the selected information should be included.

[The next page is 2551.]

AAM Section 2600

Reporting

Reporting Obligation

.01 SSARS No. 1 (AR section 100) discusses the accountant's reporting obligation for compilation and review engagements. In summary, it says:

- A compilation is the minimum level of service that an accountant can provide before submitting unaudited financial statements of a nonpublic entity to a client or others (AR section 100.01)
- The accountant should not consent to the use of his or her name in a document or written communication containing unaudited financial statements of a nonpublic entity unless (a) the accountant has compiled or reviewed the financial statements in compliance with the provisions of SSARS No. 1 (AR section 100), or (b) the financial statements are accompanied by an indication that the accountant has not compiled or reviewed the financial statements and that the accountant assumes no responsibility for them. For example, the indication may be worded as follows:

The accompanying balance sheet of X Company as of December 31, 20X1, the related statements of income, and cash flows for the year then ended were not audited, reviewed, or compiled by us and, accordingly, we do not express an opinion or any other form of assurance on them. (AR section 100.03, as amended by SSARS No. 9)

- The accountant should issue a report prepared in accordance with SSARS whenever he or she is engaged to compile financial statements of a nonpublic entity, or submits financial statements that are reasonably expected to be used by a third party (AR section 100.11, as amended by SSARS No. 9)
- The accountant should issue a report prepared in accordance with SSARS whenever he or she is engaged to review financial statements of a nonpublic entity (AR section 100.34, as amended by SSARS No. 9)

.02 The first item in the bulleted list above is addressed in SSARS No. 1 (AR section 100.01). Whenever the accountant prepares financial statements (manually or using a computer) and presents them to a client or third parties, he or she has submitted financial statements. When this occurs, the accountant must at least perform a compilation.

.03 The second item in the bulleted list in paragraph .01 of this section is aimed at situations when a client includes the accountant's name in a loan proposal, prospectus, or other written communication that includes client-prepared financial statements. If the client uses financial statements that were previously compiled or reviewed by the accountant, the accountant should insist that his report accompany the statements. If the financial statements are client-prepared, the accountant must insist either that the reference to his name be removed or that the statements be accompanied by an indication that he has not compiled or reviewed them and takes no responsibility for them.

.04 The third and fourth items addressed in the bulleted list in paragraph .01 above are discussed in more detail in the following sections.

Basic Compilation Reports

.05 A report on compiled financial statements should contain the following basic elements:

- A statement that a compilation has been performed in accordance with SSARS, issued by the AICPA
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management
- A statement that the financial statements have not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on them
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the compilation report (The date of completion of the compilation should be used as the date of the accountant's report.)

.06 The report should not refer to any other procedures that the accountant may have performed. To do so might lead the reader to conclude that the accountant is, in fact, offering some form of assurance.

Basic Review Reports

.07 Financial statements reviewed by an accountant should be accompanied by a report which includes the following basic elements:

- A statement that a review has been performed in accordance with SSARS, issued by the AICPA
- A statement that all information included in the financial statements is the representation of management
- A statement that a review consists primarily of inquiries of company personnel and analytical procedures applied to financial data
- A statement that a review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements taken as a whole and, accordingly, no such opinion is expressed
- A statement that the accountant is not aware of any material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, other than those modifications, if any, indicated in the report
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the review report (The date of the completion of the accountant's review procedures should be used as the date of the accountant's report.)

.08 Any other procedures that the accountant may have performed before or during the review engagement, including those performed in connection with a compilation engagement, should not be described in the report.

Reporting When Not Independent

.09 An accountant is precluded from issuing a review report on the financial statements of an entity with respect to which he is not independent. He or she may, however, issue a compilation report.

.10 The compilation report should specifically disclose the lack of independence. However, the reason for lack of independence should not be described. When the accountant is not independent, he or she should include the following as the last paragraph of the compilation report:

We are not independent with respect to XYZ Company.

Reporting on Financial Statements That Omit Disclosures

.11 In general, all financial statements should include adequate disclosures (footnotes). However, there are situations in which the accountant may omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.12 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.13 Note that if the financial statements are presented on a basis of accounting other than GAAP (e.g., income tax basis), this extra paragraph would be worded as follows:

Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's assets, liabilities, equity, revenues and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.14 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they should not be labeled as "Notes to the Financial Statements" (this title implies full disclosure). Instead, an appropriate title would be "Selected Information—Substantially All Disclosures Required by GAAP Are Not Included."

.15 Interpretation No. 1 of SSARS No. 1 (AR section 9100.01) indicates that the above modification for compiled financial statements is not appropriate for reviewed financial statements. Since the omission of substantially all disclosures is a departure from GAAP, the review report should include the omitted disclosures.

.16 When the financial statements include substantially all disclosures except one, the guidance above is not appropriate. Rather, the omission of a single disclosure should be treated in a compilation or review report like any other departure from GAAP, and the accountant should disclose the nature of the departure and its effects, if known.

Reporting on Financial Statements With Departures From GAAP

.17 Although compiled financial statements may omit substantially all disclosures required by GAAP, the omission of disclosures that are material to reviewed financial statements is a GAAP departure. As discussed previously, the accountant should include in the review report all of the omitted disclosures or, if the details to be disclosed have not been determined, the specific nature of the omitted disclosures. If, in the course of a compilation or review engagement, the accountant becomes aware of *measurement* departures from GAAP that are material to the financial statements, he or she has three alternatives:

- Persuade the client to revise the financial statements to conform to GAAP
- Refer to the departure in the report
- Withdraw from the engagement

.18 If modification of the report is appropriate, the nature of the departure from GAAP should be disclosed in a separate paragraph, and the effects (dollar amount) of the departure should be disclosed, if known. If the effects are not known, the accountant is not required to determine them, but he must state in his report that no determination of the effects of the departure has been made.

Reporting When There Are Significant Departures From GAAP

.19 According to Interpretation No. 7 of SSARS No. 1 (AR section 9100.23–.26), an accountant cannot modify a compilation or review report to indicate that the financial statements are not fairly presented in accordance with GAAP. Thus, an adverse opinion is not appropriate in a compilation or review engagement. An adverse opinion can only be expressed in an audit engagement.

.20 The interpretation indicates that the accountant may wish to emphasize the limitations of financial statements having significant GAAP departures (whether disclosure or measurement) in a separate paragraph in the report. This paragraph is in addition to the one that describes the departure. Suggested wording for such a paragraph follows:

Because the significance and pervasiveness of the matters discussed above make it difficult to assess their impact on the financial statements taken as a whole, users of these financial statements should recognize that they might reach different conclusions about the Company's financial position, results of operations, and cash flows if they had access to revised financial statements prepared in conformity with generally accepted accounting principles.

Date of Reports

.21 The date of the completion of the accountant's review procedures should be used as the date of his or her report on reviewed financial statements. The date of completion of the compilation should be used as the date of his or her report on compiled financial statements. Most accountants believe that the completion of a compilation generally takes place on the date the financial statements are "read."

Highest Level of Service

.22 If the accountant provides more than one level of service on the same financial statements (e.g., compilation and review or review and audit), the financial statements should be accompanied by a report that is appropriate for the highest level of service provided. This does not preclude the accountant from using procedures that go beyond those required for the level of assurance expressed.

.23 Interpretation No. 3 of SSARS No. 1 (AR section 9100.06–.12) provides guidance on the type of report to be issued when the accountant performs procedures that go beyond those required. It states that simply performing procedures (e.g., analytical procedures in a compilation engagement) do not require the issuance of the higher report.

.24 Interpretation No. 13 of SSARS No. 1 (AR section 9100.46–.49) addresses whether an accountant can perform audit procedures in a compilation or review engagement and still issue a compilation or review report. It states that this is acceptable. But the report should not reference the additional procedures performed.

.25 Both interpretations stress the importance of the understanding with the client.

.26 An exception to the highest level of service rule is indicated in SSARS No. 1 (AR section 100.40). If the accountant is engaged to perform an audit or a review, but finds that he or she is not independent, the auditor may issue a compilation report.

.27 SSARS No. 3 (AR section 300) permits another exception to the highest level of service rule). It allows an accountant who has reviewed financial statements to issue a compilation report on financial statements for the same period included in a prescribed form.

Performing a Lower Level of Service

.28 CPAs may be asked to perform a level of service from the one they previously performed on financial statements covering the same period, depending on the situation. Examples are:

- The client requests the CPA to compile financial statements that omit substantially all disclosures, even though the CPA has already compiled, reviewed, or audited full-disclosure financial statements for the same period
- The client requests the CPA to compile a balance sheet that omits substantially all disclosures, even though the accountant has already compiled, reviewed, or audited the complete financial statements for the same period

.29 Because professional standards are silent on this issue, practice varies. Many practitioners will consent to providing the compilation as long as they are satisfied that the client has a valid business reason for the request and is not attempting to mislead anyone. However, questions frequently arise about the form of the report. The most common question is whether the report should refer to the prior level of service performed on the statements. Again, the professional standards are silent.

Reporting When the Statement of Cash Flows and/or Comprehensive Income Information Is Omitted

.30 Financial Accounting Standards Board (FASB) Statement No. 95, *Statement of Cash Flows*, requires that a statement of cash flows be presented for each period for which an income statement is presented. Thus, omitting the statement of cash flows constitutes a departure from GAAP. Like other departures from GAAP, the accountant must disclose the departure in a separate paragraph of his report. An example wording of the separate paragraph follows:

A statement of cash flows for the year ended December 31, 20XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

.31 According to FASB Statement No. 130, *Reporting Comprehensive Income*, all business entities that have any component of comprehensive income must display information about comprehensive income in a financial statement having the same prominence as the other basic financial statements. The primary components of other comprehensive income include:

- Unrealized gains and losses arising from investments in marketable securities classified as “available for sale” (FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*).
- Foreign currency translation adjustments, and gains and losses from certain foreign currency transactions (FASB Statement No. 52, *Foreign Currency Translation*).
- Minimum pension liability adjustments (FASB Statement No. 87, *Employers’ Accounting for Pensions*).
- Unrealized gains and losses arising from certain derivative transactions (FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*).

.32 If an entity does not have components of other comprehensive income, FASB Statement No. 130 does not apply. As a result, most small business clients do not have to apply FASB Statement No. 130. The requirements of FASB Statement No. 130 do not apply to not-for-profit organizations that are required to follow the provisions of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*.

.33 FASB Statement No. 130 does not specify a format for presenting comprehensive income, although it provides three examples:

- Presenting the information in the income statement (after net income).
- Presenting the information in the statement of changes in equity.
- Presenting the information in a separate statement of comprehensive income.

.34 The wording of the introductory paragraph of the compilation or review report may have to be modified depending on how the accountant chooses to report comprehensive income. If comprehensive income is reported in the income statement, then the title of the statement will need to be modified (Statement of Income and Comprehensive Income). If comprehensive income is reported in a separate statement, then an additional statement will need to be referenced in the report. If comprehensive income is reported in the statement of changes in equity, then no modification to the report is necessary.

.35 However, in compiled financial statements, the presentation of comprehensive income may be omitted by identifying the omission (in much the same way that a statement of cash flows is omitted). Depending on the type of engagement, the omission will be identified in the report accompanying the financial statements or in the engagement letter (management-use only financial statements).

Reporting When Supplementary Information Is Included

.36 Two common questions arise when supplementary information is included with the basic financial statements:

- What is considered supplementary information, and where is it placed in the presentation?
- Does the accountant have to modify the standard compilation or review report if supplementary information is included?

.37 The term “supplementary information” is not defined in SSARS. SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AU section 551) defines this type of information as:

- Additional details of items in, or related to, the basic financial statements, unless the information has been identified as being part of the basic financial statements
- Consolidating information
- Historical summaries of items extracted from basic financial statements, including graphs prepared on a computer
- Statistical data
- Other material, some of which may be from sources outside the accounting system or outside the entity

.38 Financial statements often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses

- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

.39 Normally, supplementary information is separated from the basic financial statements. Most practitioners present supplementary information on separate pages after the basic financial statements (and footnotes, if included). It is also a good idea to separate the supplementary information from the basic financial statements by including a title page marked: "Supplementary Information." If the accountant presents a separate report on the supplementary information, it should follow the title page.

.40 SSARS No. 1, as amended by SSARS No. 9 (AR section 100.45), requires that the accountant indicate the degree of responsibility, if any, he or she is taking with respect to the supplementary information that accompanies the basic financial statements.

.41 When the accountant has compiled both the basic financial statements and other data presented only for supplementary analysis purposes, the compilation report should refer to the other data or the accountant can issue a separate report on the other data. If a separate report is issued, the report should state that the other data accompanying the financial statements are presented only for supplementary analysis purposes and that the information has been compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data. If the basic financial statements are compiled, then the compilation report can be modified as follows:

We have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings and cash flows for the year then ended, and the accompanying supplementary information contained in Schedules A and B, which are presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management. We have not audited or reviewed the accompanying financial statements and supplementary schedules and, accordingly, do not express an opinion or any other form of assurance on them.

.42 If the basic financial statements are reviewed, an explanation should be included in the review report, or in a separate report on the other data. The report should state that the review has been made primarily for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, and either:

- The other data accompanying the financial statements are presented only for supplementary analysis purposes and have been subjected to the inquiry and analytical procedures applied in the review of the financial statements, and the accountant did not become aware of any material modifications that should be made to such data (in other words the accountant is stating that he or she also *reviewed* the supplementary information), or
- The other data accompanying the financial statements are presented only for supplementary analysis purposes and have not been subjected to the inquiry and analytical procedures applied in the review of the financial statements, but were compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data (in other words, the accountant is stating that he or she reviewed the financial statements but only *compiled* the supplementary information).

.43 In any case, the important thing to remember is to clearly indicate the degree of responsibility the accountant is taking for any information accompanying the basic financial statements.

Client-Prepared Supplementary Information

.44 When the supplementary information is prepared or presented solely by the client, the reporting responsibility may not be as obvious as when the accountant assembled or assisted in assembling the information. Client-prepared supplementary information is normally included with compiled or reviewed financial statements in one of the following ways:

- the financial statements and the client-prepared information are bound by the accountant in his firm's report cover (or typed on the accountant's letterhead and stapled to the financial statements); or
- after the accountant submits the financial statements to the client, the client in turn attaches (in some manner) supplementary information and distributes the package to third parties

Client-Prepared Supplementary Information Bound in the Accountant's Report Cover

.45 When the client-prepared supplementary information is bound in the accountant's report cover, a third party would normally conclude that the accountant has some responsibility for the information. Thus, in such a situation, being silent about the accountant's responsibility for the client-prepared supplementary information is not a valid alternative. SSARS No. 1 (AR section 100.45) states, "When the basic financial statements are accompanied by information presented for supplementary analysis purposes, the accountant should clearly indicate the degree of responsibility, if any, he is taking with respect to such information."

Supplementary Information Attached by the Client

.46 The accountant's reporting responsibility for client-prepared supplementary information attached to the financial statements after they are delivered to the client is not directly addressed by SSARS. Realistically, the accountant has little control over the client's actions once he or she delivers the report. However, situations do occur when the client clearly communicates to the accountant that the financial statements will be combined with other client-prepared information and submitted by the client to third parties, e.g., to a bank as part of a loan proposal package. In fact, the accountant may accompany the client when he or she submits the package to the third party. Guidance for these situations can be inferred from SSARS No. 1 (AR section 100) and SSARS No. 2 (AR section 200), that discusses client-prepared financial statements included in a client-prepared document along with compiled or reviewed financial statements. Basically, this guidance says the client-prepared financial statements should be accompanied by a statement that they were not prepared by the accounting firm and the accounting firm assumes no responsibility for them. Absent such a statement, the accountant is advised to consult with his attorney to consider what other actions are appropriate. In such situations, the accountant should ask the client to disclose (preferably on a page immediately preceding the data) a statement such as the following:

The supplementary information on pages ____ to ____ has not been audited, reviewed or compiled by ABC Firm, and ABC Firm assumes no responsibility for this information.

.47 Alternately, the accountant may desire to add the following paragraph to the compilation or review report:

All other information that may be included with (or attached to) the financial statements (and supplementary information) identified in the preceding paragraph has not been audited, reviewed, or compiled by us (me) and, accordingly, we (I) assume no responsibility for it.

Percentages

.48 Percentages presented in the financial statements (as is commonly the case with computer-generated statements) do not constitute supplementary information for purposes of the reporting requirements of

SSARS No. 1 (AR section 100). Accordingly, the accountant should not mention the percentages in the report. A related question is whether the inclusion of such percentages implies the accountant has performed analytical procedures and, thus, must report on the financial statements as if it were a SSARS review engagement. Most would argue that this is not the case.

Forecast or Projection Included With Historical Financial Statements

.49 SSARS do not apply to any type of prospective information. The accountant is required to report separately on prospective information included with historical financial statements following the reporting rules in the Statements on Standards for Attestation Engagements. Generally, the accountant must either compile, examine, or apply agreed-upon procedures to the prospective information.

.50 An exception to this rule occurs for expired forecasts or projections, i.e., presentations that are no longer prospective in nature because the prospective period has expired. An example would be 2002 historical financial statements presented alongside an expired 2002 budget. Expired prospective information presented for comparative purposes meets the definition of supplementary information; therefore SSARS No. 1 (AR section 100) applies.

Pro Forma Information

.51 The objective of pro forma financial information is to show what the significant direct effects on historical information might have been had a consummated or proposed transaction or event occurred at an earlier date. Pro forma financial information usually is presented by applying certain pro forma adjustments to amounts in the historical financial statements. Such information is frequently used to show the effects of the following:

- Business combinations
- Changes in capitalization
- Dispositions of a significant part of a business
- Changes in the form of business organization
- Proposed sale of securities and application of the proceeds

.52 Although such future or hypothetical transactions may appear prospective in nature, pro forma presentations are essentially historical financial statements that have been recast. SSARS guidance on pro forma financial information is limited.

.53 Typically, accountants' association with pro forma financial information should be restricted to situations where the pro forma information is treated as supplementary information, and the reporting guidance in SSARS No. 1 (AR section 100) should be followed.

.54 The document presenting pro forma information should include complete historical financial statements. Usually, the pro forma information will be presented as notes or supplementary information to the historical financial statements.

Supplementary Information Presented Without Financial Statements

.55 Since stand-alone supplementary information will ordinarily not constitute a full financial statement, the accountant has no reporting responsibility under SSARS. However, the guidance above can generally be followed if the accountant is asked to report on supplementary information that is to be presented without financial statements.

Reporting on Charts and Graphs

General

.56 Common examples of charts and graphs prepared for clients include:

- Number of days sales in accounts receivable
- Sales by product line
- Operating expenses by plant
- Line of credit usage versus owned inventory

Charts and Graphs That Accompany Financial Statements

.57 When the basic financial statements are accompanied by information in the form of a chart or graph, such information should be considered supplementary information. These basic issues that should be considered:

- Accountants should check for consistency if the same information is presented numerically in the basic financial statements and graphically in supplementary information
- Accountants should consider whether the information is presented in a way that is obviously misleading
- Due to the subjective nature of graphic presentations, accountants will ordinarily elect to report on them as compiled—even when they accompany reviewed financial statements
- Each chart or graph should include a reference to the accountant's report.

Stand-Alone Charts and Graphs

.58 Unless the stand-alone chart or graph constitutes a complete financial statement (which would be rare), the accountant has no reporting responsibility. The type of financial information depicted in charts and graphs (that is, whether they are considered specified elements or condensed financial information) determines how accountants should report if they elect to do so.

Emphasis Paragraphs

.59 Footnote 23 of SSARS No. 1 (AR section 100) states, "Nothing in this statement . . . is intended to preclude an accountant from emphasizing in a separate paragraph of his or her report a matter regarding the financial statements." In other words, footnote 23 permits, but never requires, an emphasis paragraph (as long as the matter is appropriately disclosed in the financial statements). If the financial statements are deficient or do not contain a needed disclosure and the client does not correct the statements, the accountant is *required* to state, in a separate paragraph of the report, that the financial statements contain a departure from GAAP.

.60 If the accountant decides to add an emphasis paragraph, he or she should follow these guidelines:

- Emphasis paragraphs should not introduce new information about the financial statements; they should only emphasize a matter that is disclosed in the financial statements.
- If the financial statements are deficient or do not contain a needed disclosure and the client does not correct the statements, the accountant is *required* to state, in a separate paragraph of the report, that the financial statements contain a departure from GAAP. This required paragraph differs from a voluntary emphasis paragraph.

- Emphasis paragraphs should not contain information about the procedures the accountant has or has not performed.
- Emphasis paragraphs should not contain any conclusions or opinions.
- If the accountant decides to add an emphasis paragraph to highlight a going-concern disclosure in the client's financial statements, he or she should not use the term "substantial doubt" in that paragraph (Substantial doubt is an audit-evidence-based concept that should only be used in audit reports.)

Going Concern Issues

.61 According to Interpretation No. 11 of SSARS No. 1 (AR section 9100.33–.40) and footnote 23 of SSARS No. 1 (AR section 100), the accountant should consult SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341.10–.11), to evaluate the adequacy of disclosure of uncertainties caused by concern about the entity's ability to continue as a going concern. If, based on SAS No. 59, the accountant believes that the financial statement disclosure of the uncertainty is inadequate, he or she should consider modifying the report. See the preceding "Emphasis Paragraphs" section above for further information.

Full Disclosure Financial Statements

.62 As discussed earlier, footnote 23 of SSARS No. 1 (AR section 100) permits, but never requires, an emphasis paragraph (as long as the matter is appropriately disclosed in the financial statements). If the accountant decides to add a paragraph to emphasize a going concern matter, Interpretation 11 of SSARS No. 1 (AR section 9100.33) contains illustrative language that he or she may use:

As discussed in Note X, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the Company be unable to continue as a going concern.

Omission of Substantially All Disclosures

.63 The accountant may compile financial statements for a client that omit substantially all disclosures required by GAAP or OCBOA, provided that the omission is clearly indicated in the report and is not, to the accountant's knowledge, undertaken with the intention of misleading those who might reasonably be expected to use such financial statements.¹

.64 Since the user is alerted that substantially all disclosures have been omitted from the financial statements (by adding a paragraph to the compilation report to explain the omission), going concern disclosures would not be required.

.65 Although not required, the going concern matter can be disclosed. In this case, however, the disclosure should be made in the financial statements. Keep in mind that emphasis paragraphs should not introduce new information about the financial statements. Rather, they should only emphasize a matter that is already disclosed in the financial statements. If the going concern matter is the only disclosure included in the financial statements, it should be labeled as "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included," rather than "Notes to the Financial Statements." Once disclosed in the financial statements, the matter can then be emphasized, if the accountant desires, in a separate paragraph of the report.

¹ Note that the accountant cannot review financial statements that omit substantially all disclosures.

Reporting on Computer-Prepared Financial Statements

.66 Computer-prepared financial statements for interim or annual periods that contain disclosure omissions or measurement departures must be reported on in accordance with SSARS No. 1 (AR section 100). The accountant cannot place a legend on computer-prepared financial statements saying that the statements were not compiled, reviewed, or audited by an accountant and thereby avoid the reporting requirements of SSARS No. 1.

Reporting When There Is a Scope Limitation

.67 Scope limitations occur in audit engagements when the auditor is prevented from applying GAAS because of limitations imposed by the client or caused by circumstances. When an auditor encounters a scope limitation, he or she issues an “except for” opinion or disclaimer of opinion. However, SSARS No. 1 (AR section 100) does not permit such reporting.

.68 Scope limitations can occur in SSARS engagements, especially in initial review engagements. In those cases, it is not unusual for the accountant to raise questions about the reasonableness of amounts included in the financial statements. Often, due to the timing of the engagement or inadequate accounting records, he or she may also be unable to apply analytical procedures to obtain review assurance. SSARS No. 1 (AR section 100.38) notes that when an accountant is unable to perform inquiry and analytical procedures necessary for a review or when the client does not furnish a representation letter, the review will be incomplete and a review report cannot be issued. In this situation, the accountant should consider whether the scope limitation also precludes him or her from issuing a compilation report.

.69 In considering the limitations of the scope limitation, the accountant should evaluate the possibility that the information affected by the scope limitation is incorrect, incomplete, or otherwise unsatisfactory. This evaluation is a matter of professional judgment. If the client is unable to provide additional or revised information due to factors beyond his or her control, a step-down to a compilation is probably acceptable. The accountant should consider the following:

- Whether the reason for the scope limitation seems logical
- Whether the scope restriction significantly impairs the usefulness of the financial statements

.70 In deciding whether it would be appropriate to issue a compilation report when a scope restriction precludes a review report, the accountant should determine if the scope restriction is client-imposed. SSARS No. 1 (AR section 100.09) requires the accountant to withdraw from the engagement if the client refuses to provide additional or revised information. A scope restriction resulting from inadequate accounting records should normally be considered a client-imposed restriction. Although the restriction may be unintentional, the maintenance of adequate accounting records is within the client’s control. Situations where the client is unable to provide additional or revised information should be rare. One such situation may be when accounting records have been destroyed.

.71 When there has been a scope restriction that precludes a review report and the accountant decides to issue a compilation report, SSARS No. 1 (AR section 100.51) indicates he or she should issue an appropriate compilation report without any reference to the scope restriction.

.72 If the accountant is unable to obtain the limited assurance required for a review and decides it would not be appropriate to issue a compilation report, he or she should try to provide other accounting information to the client, short of submitting financial statements. For example, a working trial balance may satisfy the client’s needs.

Reporting on Financial Statements Included in MCS Reports

General

.73 Unaudited financial statements are often included in reports on findings in Management Consulting Services engagements (MCS reports). A question often arises as to what reporting responsibility the CPA has on those historical financial statements.

.74 Currently, there is no provision in SSARS to exempt historical financial statements included in MCS reports. Likewise, SSARS do not provide for different levels of service depending on the intended use of the financial statements. Consequently, SSARS currently require that only historical financial statements that the accountant submits to clients or others, including statements included in MCS reports, at least be compiled.

Financial Statements Compiled or Reviewed by Another Accountant

.75 If the MCS report contains financial statements that were compiled or reviewed by another accountant and the other accountant's report is included, the CPA is not required to mention the statements in the report. If, however, the other accountant's report is not included with the financial statements in the MCS report, the accountant should include a reference to the other accountant's report that includes:

- A statement describing the service performed by the other accountant, without disclosing that accountant's name
- The date of the other accountant's report
- A description of the standard disclaimer in a compilation report or, for a review, the standard limited assurance language included therein
- A description of any modifications of the standard compilation or review report, including any paragraphs that emphasize certain matters relating to the financial statements

.76 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard compilation report on the financial statements follows:

The 20X1 financial statements of XYZ Company were compiled by other accountants, whose report dated February 1, 20X2 stated that they did not express an opinion or any other form of assurance on those statements.

.77 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard review report on the financial statements follows:

The 20X1 financial statements of XYZ Company were reviewed by other accountants, whose report dated February 1, 20X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

Client-Prepared Financial Statements

.78 If the MCS report contains client-prepared financial statements, the accountant is not required to compile and report on those statements. In that case, professional standards do not require that the accountant mention those statements in the MCS report at all. However, most accountants would compile and report on such statements since they are included in a document (MCS report) that bears their name and because a compilation is the lowest level of service with which they would want to be associated. If the accountant decides not to compile the statements, he or she should add a statement to the MCS report to clarify his or her responsibility for the financial statements. Such a statement might be worded as follows:

We have not compiled, reviewed or audited the financial statements presented on pages ____ to ____ and, accordingly, we assume no responsibility for them.

Reporting When Only One Financial Statement Is Presented

.79 An accountant may issue a compilation report on a single financial statement, such as a balance sheet. Likewise, he or she may issue a review report on a single financial statement. Engagements to report on a single financial statement are limited reporting engagements, not scope restrictions.

Reporting on Comparative Financial Statements

.80 SSARS No. 2, *Reporting on Comparative Financial Statements* (AR section 200) sets forth the authoritative requirements that obligate the accountant to report on each period when financial statements of two or more periods are presented in columnar form. Reporting is simple unless a change of accountants has occurred, the level of service (compilation or review) differs from period to period, or a change in the nonpublic status of the entity has occurred. In these situations, the accountant may face some rather complex reporting decisions. Because the accountant may not face these complexities often, applying SSARS No. 2 can be daunting.

.81 The following definitions from SSARS No. 2 (AR section 200) may facilitate reporting on comparative financial statements.

- *Updated report*—A continuing accountant issues this kind of report, which considers new information from the current engagement and re-expresses the previous conclusions or expresses different conclusions on the prior-period financial statements as of the current report date.
- *Reissued report*—Issued subsequent to the date of the original report but bears the same date as the original report; a reissued report may need to be revised and dual-dated for the effects of specific events.

General

.82 When comparative financial statements of a nonpublic entity are presented, the accountant should issue a report covering each period presented. If the accountant becomes aware that financial statements of other periods that have not been audited, reviewed, or compiled are presented in comparative form in a document containing financial statements that he or she has reported on and the accountant's name or report is used, the accountant should advise the client that the use of his or her name or report is inappropriate. The accountant may also wish to consult with an attorney.

.83 The accountant should not report on comparative statements when statements for one or more of the periods, but not all, omit substantially all disclosures.

Practice Tip

Financial statements in columnar form with disclosures are comparative; financial statements that omit substantially all disclosures are comparative; but financial statements with disclosures are not comparative to financial statements without disclosures.

Continuing Accountant's Standard Report

.84 A continuing accountant who performs the same or higher level of service on the current period financial statements should update his or her report on the prior period financial statements.

.85 A continuing accountant who performs a lower level of service (20X2 compiled, 20X1 reviewed) should either

- Include a separate paragraph in the report describing the responsibility for the prior period financial statements.
- Reissue the report on the prior period financial statements.

.86 If the first option indicated in the paragraph above is selected, the description should include the original date of the report and should state that no review procedures were performed after that date.

.87 If the second option is selected, the report may be

- A combined compilation and reissued review report. (The combined report should state that no review procedures were performed after the date of the review report.)
- Presented separately.

Continuing Accountant's Changed Reference to GAAP

.88 The accountant should consider the effects on the prior period report of circumstances or events that came to his or her attention. When the accountant's report contains a changed reference to a GAAP departure, the report should include a separate paragraph indicating

- Date of previous report.
- Circumstances or events that caused the change.
- If applicable, that the prior period financial statements have been changed.

Predecessor's Compilation or Review Report

.89 A predecessor accountant is not required to, but may choose to reissue his or her report. If the predecessor's compilation or review report is not presented, the successor should either

- Make reference to the predecessor's report.
- Perform a compilation, review, or audit of the prior period financial statements and report thereon.

.90 If "reference to the predecessor's report" option is selected, the successor's reference should include

- A statement that the prior period financial statements were compiled or reviewed by another accountant (without identifying the predecessor by name).
- The date of prior accountant's report.
- A description of the disclaimer or limited assurance report.
- A description or quotation of any report modification or emphasis paragraphs.

.91 If the predecessor report is to be reissued, before reissuing the predecessor should consider

- The current form and presentation of the prior period financial statements.
- Subsequent events not previously known.
- Changes in the financial statements that alter modifications to the report.

.92 The predecessor should also perform the following procedures:

- Read the current period financial statements and the successor's report.
- Compare the prior period financial statements (a) with those previously issued, and (b) with the current period.
- Obtain a letter from the successor indicating whether he or she is aware of any matter that affects the prior period financial statements.

.93 If the predecessor becomes aware of any matter that affects the prior period financial statements, he or she should

- Make inquiries or perform analytical procedures similar to those that would have been applied to the information if it had been known at the report date.
- Perform other procedures considered necessary such as discussing the matter with the successor or reviewing the successor's working papers.

.94 When reissuing the report, the predecessor should use the date of the previous report. However, if the financial statements are revised, the report should be dual dated. Also, if the financial statements are revised, the predecessor should obtain a written statement from the former client describing the new information and its effect on the prior period financial statements.

.95 If the predecessor is unable to complete the reissue procedures described above, he or she should not reissue the report and may wish to consult with an attorney.

Changed Prior Period Financial Statements

.96 When the financial statements have been changed, either the predecessor (as discussed above) or the successor should report on the restated financial statements. If the successor reports on them, he or she should audit, review, or compile the financial statements and report accordingly. No references to the predecessor's report should be made in the successor's report.

Reporting When Prior Period Is Audited

.97 The accountant should issue a compilation or review report on the current period financial statements and either

- Reissue the audit report on the prior period or
- Add a separate paragraph to the current period report that includes the following information:
 - The financial statements of the prior period were audited.
 - The date of the audit report.
 - The type of opinion.
 - Substantive reasons for other than unqualified opinion.
 - No audit procedures were performed after the date of the audit report.

Reporting on Financial Statements That Previously Did Not Omit Substantially All Disclosures

.98 The accountant may report on comparative financial statements that omit substantially all disclosures even if the prior period statements were originally compiled, reviewed, or audited (with disclosures) provided that his or her report includes an additional paragraph stating the nature of the previous service and the date of the previous report.

Change of Accountants—Reporting Following a Merger or Purchase of a Firm

.99 When there has been a merger or purchase of a firm, the new firm or purchaser should report as a successor accountant and apply the guidance in SSARS No. 2 (AR section 200). Basically, it permits the successor to (a) make reference to the old or acquired firm's report or (b) assume compilation, review, or audit responsibility for the prior period financial statements. The new firm or purchaser may also indicate in the report that a merger or purchase took place if reference is made to the predecessor's report. However, the predecessor firm should not be named.

Change of Accountants—Predecessor Accountant Has Ceased Operations

.100 A February 1991 *Notice to Practitioners* issued by the AICPA states that the reporting depends on whether the prior-period financial statements have been restated.

.101 If the prior-period financial statements were compiled or reviewed and have not been restated, the Notice states that the successor accountant should add a paragraph to the report on the current-year financial statements that includes:

- A statement that the prior-period financial statements were compiled or reviewed by another accountant who has ceased operations
- The date of the predecessor accountant's report
- A description of the standard form of disclaimer or limited assurance, as applicable, included in the report
- A description or quotation of any modifications of the standard report and any paragraphs emphasizing a matter regarding the financial statements

.102 If the prior-period financial statements were audited and have not been restated, the successor accountant should add a paragraph to the report on the current-period financial statements that indicates:

- That the prior period financial statements were audited by another firm who has ceased operations
- The date of the predecessor's report
- The type of opinion issued by the predecessor
- If the opinion was other than unqualified, the substantive reasons therefor
- That no auditing procedures were performed after the date of the predecessor's report

.103 If the prior-period financial statements have been restated, the successor accountant should compile, review or audit those financial statements and report accordingly.

Change of Status—Public/Nonpublic Entity

.104 A previously issued compilation or review report should not be reissued or referred to in the current report if the entity is currently a public entity.

SSARS No. 2 Summary

.105 SSARS No. 2 (AR section 200) is rather complex. The following summary decision aid helps simplify the report decision process in SSARS No. 2. The comparative statements are for years 20X5 and 20X6.

1. If 20X6 is audited, SASs apply.
2. If the entity's current status for 20X6 is a public company, SASs apply.

3. For continuing accountant
 - a. If 20X6 level of service is equal to or higher than 20X5, update report.
 - b. If 20X6 is lower level of service, either refer to or reissue prior report.
4. For successor accountant
 - a. If predecessor does not reissue, refer to report of predecessor or perform audit, review, or compilation of 20X5.
 - b. If financial statements are restated because of an error and predecessor doesn't report on restated financials, perform audit, review, or compilation of 20X5.

Split-Level Reporting

.106 Split-level reporting involves providing different levels of assurance on a single set of financial statements (for example, auditing the balance sheet and reviewing the income statement). Although the authoritative literature does not address this situation, most believe that it should be avoided.

Reporting When Other Accountants Have Audited or Reviewed a Component

.107 If other accountants are engaged to audit or review the financial statements of a division, branch, subsidiary, or other investee, the accountant should require reports from the other accountants as a basis, in part, for his report on his review of the financial statements of the reporting entity. The accountant may decide to refer to the work of the other accountants in his review report. If such a reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants. SSARS do not contain guidance for obtaining compilation reports from other accountants, since no assurance can be derived from compilation work.

Preliminary Financial Statement Drafts

.108 Interpretation No. 17 of SSARS No. 1 (AR section 9100.61) states that an accountant can submit draft financial statements without attaching a compilation or review report as long as:

- He or she intends to submit final financial statements, and
- He or she labels each page of the draft financial statements with words such as "Draft," "Preliminary Draft," "Draft—Subject to Change," or "Working Draft."

.109 In the rare circumstances where the accountant submits drafts but never issues the final statements, the interpretation suggests that the accountant document the reasons why. The interpretation reinforces the fact that preliminary drafts should not be used as a means of circumventing the reporting standards of SSARS.

AAM Section 2610

Accountants' Reports on Compilation of Financial Statements of a Nonpublic Entity

.01 Accountants' Standard Report

Stockholders and Board of Directors
[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20XX, and the related statements of income, retained earnings,* and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X1

[Signature of CPA]

* APB Opinion No. 12, *Omnibus Opinion*—1967, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.

.02 Omission of Substantially All Disclosures

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20XX, and the related statements of income and retained earnings, for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures (and the statement of cash flows) required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

January 28, 20X1

[*Signature of CPA*]

.03 Accountants Not Independent

Stockholders and Board of Directors

[*Company*]

[*Address*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

We are not independent with respect to [*Company*].

January 28, 20X1

[*Signature of CPA*]

.04 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors
[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20XX, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

A statement of cash flows for the year ended December 31, 20XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

January 28, 20X1

[*Signature of CPA*]

.05 Departure From GAAP—Accounting Principles Not Generally Accepted

Stockholders and Board of Directors
[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management [owners]. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed me (us) that the company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders' equity would have been decreased by \$500,000.

January 28, 20X1

[Signature of CPA]

.06 Departure From GAAP—Accounting Principles Not Generally Accepted and Omission of Disclosures

Stockholders and Board of Directors
[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (We) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

Generally accepted accounting principles require that *[describe requirement]*. Management has informed me (us) that the company has *[describe departure]*, which is not in accordance with generally accepted accounting principles. Management has not determined the effect of the departure from generally accepted accounting principles on the accompanying balance sheet. The accompanying statements of income, retained earnings, and cash flows would not be affected by the departure.

Management has elected to omit substantially all disclosures required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

AAM Section 2620

Accountants' Reports on Review of Financial Statements of a Nonpublic Entity

.01 Accountants' Standard Report

Stockholders and Board of Directors
[Company]

I (We) have reviewed the accompanying balance sheet of [Company] as of December 31, 20X5, and the related statements of income, retained earnings,* and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [Company].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

January 28, 20X6

[Signature of CPA]

* APB Opinion No. 12 requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the review report is not needed.

.02 Departure From GAAP—Accounting Principle Not Generally Accepted

Stockholders and Board of Directors
[Company]

I (we) have reviewed the accompanying balance sheet of [Company] as of December 31, 20X5, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [Company].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As disclosed in Note X to the financial statements, investments in marketable equity securities should be reported at fair value. Management has informed us that the Company has stated these investments at cost, which is not in accordance with generally accepted accounting principles. If generally accepted accounting principles had been followed, the investment in marketable equity securities and stockholders' equity would have been decreased by \$70,000.

January 28, 20X6

[Signature of CPA]

.03 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X5, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

A statement of cash flows for the year ended December 31, 20X5, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operations.

AAM Section 2700

Special Areas

Other Comprehensive Bases of Accounting

.01 Bases of accounting other than GAAP (referred to as “Other Comprehensive Bases of Accounting,” or OCBOA) have become a widely used alternative to the numerous and sometimes complex accounting requirements prescribed by GAAP. Unfortunately, there is very little authoritative guidance related to applying OCBOA.

.02 The only authoritative guidance for OCBOA is found in the auditing standards. SAS No. 62, *Special Reports* (AU section 623.03) and states that “an independent auditor’s judgment concerning the overall presentation of financial statements should be applied within an identifiable framework.” Ordinarily, that framework is provided by GAAP, but SAS No. 62 allows the use of a comprehensive basis of accounting other than GAAP (SSARS No. 1 [AR section 100] also recognizes OCBOA for compiled and reviewed financial statements). SAS No. 62 recognizes the following OCBOAs:

- The basis of accounting the reporting entity uses to comply with the requirements or financial reporting provisions of a governmental regulatory agency which has jurisdiction over the entity
- The basis of accounting the reporting entity uses or expects to use to file its income tax return for the period covered by the financial statements
- The cash receipts and disbursements basis of accounting, and modifications of the cash basis having substantial support, such as recording depreciation on fixed assets or accruing income taxes
- A definite set of criteria having substantial support that is applied to all material items appearing in financial statements, such as the price-level basis of accounting

.03 SAS No. 62 (AU section 623.04) prohibits auditors from issuing the special report described in the SAS unless one of the foregoing descriptions applies to the financial statements.

Deciding When To Use an OCBOA

.04 OCBOA financial statements are beneficial to clients for many reasons. Among them is the idea that accountants do not need to consider the measurement requirements of GAAP for OCBOA financial statements and, therefore, OCBOA statements often can be prepared on a more timely and cost efficient basis.

.05 You might consider the following characteristics of entities as good candidates for cash- or tax-basis financial statements:¹

- There are no third-party users of financial statements (e.g., the entity is closely held with no third-party debt)
- The entity’s debt is secured rather than unsecured
- The entity’s creditors do not require GAAP financial statements
- The cost of complying with GAAP would exceed the benefits

¹ Source: AICPA, *Compilation and Review Alert* (1996/1997).

- The owners and managers are closely involved in the day-to-day operations of the business and have a fairly accurate picture of the entity's financial position
- The business's owners are primarily interested in cash flows
- The owners are primarily interested in the tax implications of transactions
- Capital expenditures and long-term financing are not significant
- Internal Revenue Code rules do not require the entity to prepare its tax return on the accrual basis

.06 In advising clients about the use of an OCBOA, accountants should consider the following issues:

- Does the entity have inventory? If so, the pure cash basis may not be helpful.
- What basis of accounting does the entity use in preparing its income tax return? If the accrual basis is used, preparing financial statements on the same basis makes sense.
- Is the entity highly leveraged? Lenders may require GAAP financial statements.
- Are there outside investors? GAAP financial statements may provide information required by such users.
- Does the entity's cash flow parallel its income and expenses? The pure cash basis may be appropriate.
- Does the entity anticipate going public? If so, the entity will need a history of GAAP financial statements.
- Was the entity formed for tax purposes? If yes, the owners are probably interested in the tax effects of transactions, and the income tax basis would be appropriate.
- Is the entity subject to bonding requirements? Most bonding companies will only accept GAAP financial statements.

Basic Financial Statements

.07 In an OCBOA presentation, the basic financial statements typically present financial position and results of operations as measured under the OCBOA, descriptions of accounting policies, and notes to the financial statements. However, an exception to this presentation exists for entities that use the pure cash basis of accounting. Under the pure cash basis of accounting, a statement of assets, liabilities, and equity would be needless because the cash balance would be the only item that would appear. Consequently, entities using the pure cash basis of accounting present a single statement titled "Statement of Cash Receipts and Disbursements."

Statement Titles

.08 SAS No. 62 (AU section 623.07) and Interpretation No. 12 of SSARS No. 1 (AR section 9100.41–.43) indicate that titles of OCBOA financial statements should differ from titles of similar statements prepared in accordance with GAAP. SAS No. 62 (AU section 623) and Interpretation No. 12 do not require specific titles, although they do list examples.

Table 2700.1**Suggested OCBOA Statement Titles**

<i>GAAP</i>	<i>Cash-Basis</i>	<i>Tax-Basis</i>
Balance Sheet	Statement of Assets, Liabilities, and Equity—Cash Basis	Statement of Assets, Liabilities, and Equity—Income Tax Basis
Statement of Income	Statement of Revenues and Expenses—Cash Basis	Statement of Revenues and Expenses—Income Tax Basis
Statement of Income & Retained Earnings	Statement of Revenues, Expenses, and Retained Earnings—Cash Basis	Statement of Revenues, Expenses, and Retained Earnings—Income Tax Basis
Statement of Changes in Equity	Statement of Changes in Equity—Cash Basis	Statement of Changes in Equity—Income Tax Basis
Statement of Cash Flows	Statement of Cash Flows—Cash Basis	Statement of Cash Flows—Income Tax Basis

Notes:

- These titles are only suggestions. Other titles may be derived from the suggestions in SAS No. 62 (AU section 623.07).
- The pure cash basis has a single asset and no liabilities. Accordingly, only a single statement titled “Statement of Cash Receipts and Disbursements” is normally presented.
- Although Financial Accounting Standards Board (FASB) Statement No. 95, *Statement of Cash Flows*, does not require a statement of cash flows for OCBOA financial statements, if a cash flow statement is presented, it is suggested that the basis of accounting used be added to the statement title.

Disclosures

.09 Authoritative accounting literature does not address OCBOA or the disclosures necessary in such presentations. Limited guidance on disclosures can be found in the auditing literature (which is also applicable to compilation and review engagements). SAS No. 62 (AU section 623) establishes the overriding criterion that cash, modified cash, and income tax basis financial statements should be “informative of matters that may affect their use, understanding, and interpretation.” It goes on by stating that:

- The financial statements should include a summary of significant accounting policies that discusses the basis of presentation and describes how the basis differs from GAAP
- When financial statements contain items the same as, or similar to, those in GAAP financial statements, similar disclosures are appropriate (e.g., depreciation or long-term debt)
- The auditor should also consider disclosing matters not specifically identified on the face of the statements, such as related party transactions, restrictions on assets and owners’ equity, subsequent events, and uncertainties.

.10 Nevertheless, diversity in practice has developed over the years. Accountants at one extreme believe disclosures should be included in cash, modified cash, and income tax basis financial statements that are identical to those that would be included in a GAAP presentation. Accountants at the other extreme would recommend including very little disclosure in OCBOA statements.

.11 A survey completed by the AICPA Private Companies Practice Section in the mid-1990's found that there was a great deal of diversity in the interpretation of SAS No. 62 (AU section 623) regarding the issue of disclosures. Guidance for practitioners was needed.

.12 To help clarify the issue of the disclosures related to SAS No. 62, the Audit Issues Task Force (AITF) of the Auditing Standards Board issued Interpretation No. 14 of SAS No. 62, *Evaluating the Adequacy of Disclosure in Financial Statements Prepared on the Cash, Modified Cash, or Income Tax Basis of Accounting* (AU section 9623.90–.95). The Interpretation provides the following guidance:

- The discussion of the basis of accounting required by SAS No. 62 (AU section 623) may be brief and only needs to describe the primary differences from GAAP. Quantifying differences is not required.
- If the financial statements contain amounts for which GAAP would require disclosure, the statements should either provide the relevant disclosure or provide information that communicates the substance of that disclosure.
- If GAAP sets forth requirements that apply to the presentation of financial statements, cash, modified cash, and income tax basis statements should either comply with those requirements or provide information that communicates the substance of those requirements.
- A statement of cash flows is not required in presentations on the cash, modified cash, or income tax basis of accounting. However, if a presentation of cash receipts and disbursements is presented in a format similar to a statement of cash flows or if the entity chooses to present such a statement, the statement should conform to the requirements for a GAAP presentation or communicate the substance of the GAAP requirements.
- If GAAP would require disclosure of other matters, the need for that same disclosure or disclosure that communicates the substance of those requirements should be considered.

Cash Basis of Accounting

Pure Cash Basis

.13 Under the cash receipts and disbursements basis of accounting ("pure cash basis"), only transactions that increase or decrease cash and cash equivalents are reflected in the financial statement. The pure cash basis recognizes all cash disbursements as expenses and all cash receipts as revenues. In practice, the pure cash basis of accounting is rare.

.14 Entities that use the pure cash basis of accounting would include, for example, school activity funds, civic ventures, trusts and estates, political action committees and political campaigns. Typically, those types of entities have the following characteristics:

- They are not-for-profit oriented
- Their operations are simple
- Their accounting and finance functions are unsophisticated
- There is only one major activity
- Capital expenditures and long-term debt are not significant

Modified Cash Basis

.15 SAS No. 62 (AU section 623) describes the modified cash basis of accounting as the pure cash basis incorporating modifications having substantial support. These modifications generally include the recognition

of certain transactions on an accrual basis, as entities would recognize them under GAAP. The appropriate modifications and the extent of those modifications are not clearly defined in the literature, however.

.16 Generally, entities that use the modified cash basis of accounting, such as professional association of doctors, lawyers, or CPAs, might include the following characteristics:

- They are profit oriented
- They distribute profits as collected (e.g., through bonuses and retirement plan contributions)
- They have significant inventory and credit arrangements with vendors
- They make material capital expenditures or incur material amounts of debt
- Their operations are somewhat sophisticated, and accounting for them may become complex

Income Tax Basis of Accounting

.17 The income tax basis of accounting typically is based on federal income tax laws that generally do not address financial statement presentation or disclosure considerations, however.

.18 Typically, entities that use the tax basis of accounting are either:

- Profit oriented enterprises (such as small, closely held companies for which conversion to GAAP would be costly)
- Partnerships whose partnership agreements require the use of the tax basis of accounting
- Not-for-profit organizations seeking relief from the requirements of FASB Statement Nos. 116, *Accounting for Contributions Received and Contributions Made*, and 117, *Financial Statements of Not-for-Profit Organizations*.

Nontaxed Entities

.19 SAS No. 62 (AU section 623.04) defines the income tax basis of accounting as the basis an entity uses or expects to use to file its income tax return. However, SAS No. 62 does not provide any additional guidance on what is meant by the phrase "income tax return." If taken literally, many entities would not be able to use the income tax basis under SAS No. 62 (AU section 623). Interpretation No. 14 of SAS No. 62 includes examples of not-for-profit organizations using the accounting principles followed in filing Form 990, thus acknowledging that such entities may issue income tax basis financial statements.

Other Bases of Accounting

.20 Although less common, entities may present their financial statements on a basis of accounting other than cash, tax, or GAAP. For example, insurance companies present financial statements on a regulatory basis. In addition, SAS No. 62 (AU section 623) allows entities to use other comprehensive bases if they have substantial support and are applied consistently to all items in the financial statements. At the present time, however, only the price-level basis of accounting meets that criteria, and its use is very rare.

Disclosure of Basis of Accounting

.21 SSARS No. 1 states that when the accountant reports on compiled financial statements that omit substantially all disclosures, he or she must disclose the basis of accounting in the compilation report if it is not disclosed in the financial statements. This paragraph has been interpreted by some accountants to mean that compiled or reviewed OCBOA financial statements must disclose the OCBOA in some manner, but that such statements are not required to describe the basis of accounting or to state that it is a comprehensive

basis of accounting other than GAAP. SAS No. 62 (AU section 623) requires these latter two disclosures for audited OCBOA financial statements.

.22 Interpretation No. 12 of SSARS No. 1 (AR section 9100.41–.43) clarifies the disclosure requirements of OCBOA financial statements. The interpretation states that, ordinarily, OCBOA statements would contain a note stating the basis of presentation and describing how the basis differs from GAAP. Thus, the interpretation implies that the OCBOA disclosures for a SSARS engagement and an audit engagement should be similar. However, the location of this disclosure does differ. In a SSARS engagement, the disclosure is made in the notes. In an audit engagement, SAS No. 62 (AU section 623) requires that the disclosure of the basis of presentation and a statement that it is a basis other than GAAP be made in a separate paragraph in the auditor's report, with a description of how the basis of presentation differs from GAAP in the notes. However, the difference between GAAP and the basis need not be quantified. Interpretation No. 12 of SAS No. 62 makes an exception to this disclosure requirement for compiled OCBOA financial statements that omit substantially all disclosures. In such an engagement, the report is modified by adding a sentence such as the following to the first paragraph of the report:

The financial statements have been prepared on the accounting basis used by the Company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

.23 In summary, compiled OCBOA financial statements should ordinarily contain a note that discloses the basis of presentation and describes how it differs from GAAP (This disclosure must always be made in reviewed financial statements. Otherwise, the review report would have to be modified for an OCBOA disclosure exception.) If this disclosure is included in the notes, only the financial statement titles should be modified in the report. If all disclosures are omitted from compiled financial statements, the compilation report should be modified as illustrated above.

Other Disclosures

.24 Financial statements prepared on an OCBOA require notes and other disclosures. If the statements are compiled, management may elect to omit substantially all disclosures. However, this option is not available if the statements are reviewed.

Reporting

.25 In general, the only report modification necessary when financial statements are prepared using a comprehensive basis of accounting other than GAAP is the identification of the financial statements. Since financial statements prepared using an OCBOA must contain modified titles (e.g., "Statement of Assets, Liabilities, and Equity—Income Tax Basis" instead of "Balance Sheet"), the compilation or review report should refer to the modified titles actually used on the statements (e.g., "We have compiled the accompanying statement of assets, liabilities, and equity—income tax basis . . .") However, when the accountant compiles OCBOA financial statements that omit substantially all disclosures, SSARS No. 1 (AR section 100) requires that he or she disclose the basis of accounting. This disclosure may be in an attached footnote or in a note on the face of the financial statements. If disclosure is not made as part of the financial statements, modification of the compilation report would be required.

.26 In addition, if substantially all disclosures have been omitted, the accountant must communicate this fact in the compilation report, by adding the following paragraph:

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Prescribed Forms

Background

.27 One of the major complications of prescribed form engagements has been the requirement in SSARS No. 1 (AR section 100) that the accountant's report disclose all material measurement departures from GAAP. In 1981, the ARSC issued SSARS No. 3 (AR section 300), which amends SSARS No. 1 and SSARS No. 2 (AR section 200) to provide for an alternative form of standard compilation report when the prescribed form or related instructions call for departures from GAAP.

Provisions of SSARS No. 3

.28 Any standard preprinted form designed or adopted by the body to which it is to be submitted is a prescribed form. Examples include forms used by industry trade associations, credit agencies, banks, and governmental and regulatory bodies other than those concerned with the sale or trading of securities.

.29 According to SSARS No. 3 (AR section 300.03), the following alternative form of compilation report is appropriate when the financial statements are included in a prescribed form that calls for a departure from GAAP:

I (We) have compiled the (identification of financial statements, including period covered and name of entity) included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form prescribed by (name of body) information that is the representation of management (the owners). I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of (name of body), which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.30 Note that the first two paragraphs are similar to the standard compilation report of SSARS No. 1 (AR section 100). The main differences are the references to:

- The prescribed form
- The body that prescribed the form
- The third paragraph, which indicates that the basis of accounting and disclosures required by the form are different from GAAP and cautions the reader about the limits of the financial statements.

Departures From GAAP or From the Prescribed Form

.31 The accountant is concerned with three types of departures in an engagement to compile financial statements to be included in a prescribed form:

- Departures from GAAP required by the prescribed form. This type of departure does not require disclosure in the SSARS No. 3 report.
- Departures from GAAP not required by the prescribed form. Such departures must be disclosed following the guidance in SSARS No. 1 (AR section 100).

- Departures from the requirements of the prescribed form. These departures also require disclosure following the guidance in SSARS No. 1.

.32 For the items in the second and third bullets in the preceding paragraph, the accountant must modify the compilation report to identify, in a separate paragraph the departures, including the effects, if known. If not known, the accountant must include a statement that the effects have not been determined.

Signing a Preprinted Report Form

.33 SSARS No. 3 (AR section 300.05) states that the accountant should not sign a preprinted report form unless the language in it conforms to the guidance in SSARS No. 3 (AR section 300) or SSARS No. 1 (AR section 100). If the preprinted report is not suitable, the accountant should attach an appropriate report to the prescribed form. It is advisable to type, "See accountant's report" in the prescribed form signature block.

Determining When SSARS No. 3 Is Applicable

.34 Questions involving the applicability of SSARS No. 3 (AR section 300) might pertain to the definition of a prescribed form, the type of service involved or clarification of how a form calls for a departure from GAAP. These issues are discussed in the following questions.

.35 Does SSARS No. 3 (AR section 300) establish different standards for compiling a prescribed form? No. The reporting standards of SSARS No. 1 (AR section 100) require issuing a report whenever the accountant compiles or reviews financial statements included in a prescribed form. SSARS No. 3 (AR section 300) merely provides an alternative form of standard compilation report. It does not expand the accountant's reporting responsibility, nor does it change the performance standards of SSARS No. 1.

.36 Is SSARS No. 3 (AR section 300) applicable to review engagements? No. SSARS No. 3 (AR section 300) makes no provision for an alternative review report. A review report must conform to the standards of SSARS No. 1 (AR section 100) or SSARS No. 2 (AR section 200). The report must describe any departures from GAAP (even if the departures are called for by the form). The review report must also describe each GAAP disclosure that is omitted.

.37 Is a tax return a prescribed form? No. SSARS No. 3 (AR section 300) refers to financial statements, and thus excludes financial presentations included in tax returns. Interpretation No. 10 of SSARS No. 1 (AR section 9100.31) points out that an accountant may attach a report to tax or information returns. This report should follow the guidance in SSARS No. 1 (AR section 100), since the tax return will be submitted to a user that did not design the form.

.38 Does a comprehensive set of instructions constitute a prescribed form? No. The definition of a prescribed form in SSARS No. 3 (AR section 300) specifically includes the words "standard preprinted form."

.39 Is SSARS No. 3 (AR section 300) applicable to a prescribed form that does not call for departures from GAAP? No. If the form does not call for departures from GAAP, the SSARS No. 3 alternative report is not appropriate.

.40 How does a prescribed form call for departures from GAAP? SSARS No. 3 (AR section 300) indicates that a form calls for a departure from GAAP by either:

- Specifying a measurement principle not in conformity with GAAP; or
- Failing to request disclosures required by GAAP

.41 Can a SSARS No. 1 (AR section 100) report be issued even if SSARS No. 3 (AR section 300) applies? Yes. The accountant must, however, comply with SSARS No. 1 regarding departures from GAAP.

.42 Is the SSARS No. 3 (AR section 300) report appropriate when a prescribed form is presented to other third parties? No. The SSARS No. 3 (AR section 300) alternative report presumes that the information required by a prescribed form is sufficient to meet the needs of the body that designed or adopted the form.

.43 What does a CPA do when financial statements presented on an OCBOA are included in the prescribed form and uses the terms "Balance Sheet," "Income Statement," etc.? In practice, the titles usually are not changed, and the report on the statements use the preprinted titles.

.44 What if the CPA is not independent? An accountant who is not independent can issue a SSARS No. 3 (AR section 300) report on financial statements included in a prescribed form. He or she must, however, comply with SSARS No. 1 (AR section 100) and include the following as the last paragraph of the report:

I am (We are) not independent with respect to XYZ Company.

.45 Does the CPA have to mark each page of the prescribed form with "See Accountant's Report"? Yes. SSARS No. 3 (AR section 300) does not change that requirement.

Personal Financial Statements

.46 The term "personal financial statements" refers to financial statements that present the personal assets and liabilities of an individual or group of related individuals.

.47 AICPA Statement of Position (SOP) 82-1, *Accounting and Financial Reporting for Personal Financial Statements*, is the principle source of guidance in dealing with personal financial statements. This SOP establishes the current value basis of accounting as GAAP for personal financial statements. The AICPA's *Personal Financial Statement Guide*, contains guidance on the scope of work and form of report for audits, reviews, and compilations of personal financial statements.

Personal Financial Statements Engagements

.48 Using the estimated current value basis of accounting in personal financial statements creates some unique considerations for accountants engaged to compile or review such statements.

Acceptance of Clients

.49 Before accepting the engagement, the accountant should consider his independence, the client's integrity, and circumstances that present unusual business risks.

.50 Personal financial statement engagements usually require a greater degree of client participation than do other engagements. In many cases, client interviews and telephone inquiries are an integral part of the process. Therefore, it is especially important to consider a potential client's ability and willingness to provide sufficient data and reliable estimates of current value.

Engagement Letters

.51 Both SSARS No. 1 (AR section 100) and the *Personal Financial Statements Guide* recommend, but do not require, written engagement letters. Engagement letters are especially important in personal financial statement engagements to:

- Dispel any notion that the accountant is responsible for estimates of current value
- Link the client's cooperation to the fee, since the cooperation of the client is vital to developing adequate accounting information

Client Representation Letters

.52 Although SSARS No. 1 (AR section 100) only requires that a representation letter be obtained from the client in engagements to review personal financial statements, the *Personal Financial Statements Guide* recommends obtaining written representations on all personal financial statement engagements, because:

- The informal nature of personal financial records usually requires that accountants place greater reliance on the client's representation to ensure completeness of the statements
- The estimated current values and amounts of assets and liabilities provided by the client have a significant effect on the statements
- A client representation letter can help to clarify that responsibility for the estimates of current value, even if developed by the accountant, rests with the client.

Compilation of Personal Financial Statements

.53 Standards for compilation of financial statements prescribed by SSARS No. 1 (AR section 100) are applicable to the compilation of personal financial statements in the same manner as to the compilation of other financial statements. (There is an exception for personal financial statements contained in written financial plans, if certain criteria are met (see the subsequent section in this Manual, "Exception for Personal Financial Statements Included in Written Financial Plans"). Thus, in compiling personal financial statements, the accountant must meet the same general requirements.

.54 First, the accountant should have knowledge of the accounting principles and practices applicable to personal financial statements. For instance, the accountant should understand the provisions of SOP 82-1.

.55 Second, the accountant should possess a general understanding of:

- The nature of the individual's transactions
- The form of available accounting records
- The stated qualifications of accounting personnel, if any
- The basis of accounting on which the financial statements are to be presented
- The form and content of the financial statements
- The methods used for determining estimated current values of significant assets and estimated current amounts of significant liabilities, and be able to consider whether the methods are appropriate in light of the nature of each asset or liability

.56 Third, the accountant should read the financial statements and consider whether they appear to be appropriate in form and free of obvious material errors.

.57 The standards prescribed by SSARS do not require an accountant to verify the reasonableness of information supplied to him or her in a compilation engagement. Accordingly, he or she can compile personal financial statements based on the client's estimate of current values and amounts.

.58 However, the *Personal Financial Statements Guide* warns that other factors may prevent the acceptance of the client's estimate. The Guide requires that, at a minimum, the accountant obtain an understanding of the methods by which the individual determined the estimated current values and amounts and consider whether the methods are appropriate for the asset or liability.

.59 With the exception of compiled personal financial statements that omit substantially all disclosures, the financial statements, including the notes, should disclose the method used to determine the estimated current values and amounts, even when such values or amounts are based on the individual's estimate.

.60 In many situations, particularly when the individual is unsophisticated in financial matters, the individual and the accountant will jointly develop the estimated current values and amounts. In such situations, the accountant should obtain the individual's approval and acceptance of responsibility for the values, preferably in writing.

Review of Personal Financial Statements

.61 Standards for the review of financial statements prescribed by SSARS No. 1 (AR section 100) are applicable to the review of personal financial statements in the same manner as the review of other financial statements. Accordingly, to review personal financial statements, the accountant must meet the following general requirements.

.62 The accountant should possess (a) a level of knowledge of the accounting principles and practices applicable to personal financial statements and (b) an understanding of the individual's financial activities and financial position that will provide him, through the performance of inquiry and analytical procedures, with a reasonable basis for expressing limited assurance that no material modifications are necessary to the financial statements for them to conform to GAAP. Knowledge of accounting principles and practices implies that the accountant should be thoroughly familiar with the requirements of SOP 82-1.

.63 SSARS No. 1 (AR section 100) requires accountants to obtain a representation letter in all review engagements.

Reporting

.64 In general, the only report modifications necessary when presenting personal financial statements are the identification of the financial statements and identification of the reporting entity. For example:

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20XX, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

.65 However, when the accountant compiles personal financial statements that omit substantially all disclosures, the *Personal Financial Statements Guide* requires that he or she disclose that assets are presented at their estimated current values and liabilities are presented at their estimated current amount. This disclosure may be in an attached footnote or in a note on the face of the financial statements. If disclosure is not made as part of the financial statements, modification of the compilation report would be required. For example, the following sentence could be added to the first paragraph of the standard compilation report:

The financial statement(s) is (are) intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

.66 In addition, if substantially all disclosures have been omitted, the accountant must communicate this fact in the compilation report, by adding the following paragraph:

The individuals whose financial statements are presented have elected to omit substantially all disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the individuals' assets, liabilities, and net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Exception for Personal Financial Statements Included in Written Financial Plans

.67 SSARS No. 6 (AR section 600.03) provides an exemption from SSARS No. 1 (AR section 100) for personal financial statements included in written personal financial plans when the following conditions exist:

- The accountant establishes an understanding with the client, preferably in writing, that the financial statements (1) will be used solely to assist the client and the client's advisers to develop the client's personal financial goals and objectives and (2) will not be used to obtain credit or for any purpose other than developing the financial plan
- Nothing comes to the accountant's attention during the engagement that would cause him to believe that the financial statements will be used to obtain credit or for any purpose other than developing the client's financial goals and objectives

.68 If both conditions exist, the accountant is exempt from both the performance and reporting standards in SSARS No. 1 (AR section 100). Absent both of these conditions, SSARS No. 1 would apply.

.69 As long as those same conditions are met, Interpretation No. 1 of SSARS No. 6 (AR section 9600.01) clarifies that the same exception applies when an accountant submits a written personal financial plan containing the financial statements for use by a client's advisers to help the client implement the personal financial plan. Implementing the plan includes, for example, use of the plan by an insurance broker who will recommend specific insurance products to the client, an investment adviser who will provide specific recommendations about the investment portfolio, and an attorney who will draft a will or trust document.

The Accountant's Report

.70 SSARS No. 6 (AR section 600) prescribes the following language when the conditions of the SSARS No. 1 (AR section 100) exemption are met:

The accompanying statement of financial condition of John Doe, as of December 31, 20XX, was prepared solely to help you develop your personal financial plan. Accordingly, it may be incomplete or contain departures from generally accepted accounting principles and should not be used to obtain credit or for any other purposes other than developing your personal financial plan. We have not audited, reviewed, or compiled the statement.

.71 SSARS No. 6 (AR section 600) does not require the accountant to identify specific measurement or disclosure departures in the report. As with any SSARS engagement, the accountant is required to place a notation such as "See accountant's report" on each financial statement page.

Specified Elements, Accounts, or Items of a Financial Statement

.72 Authoritative guidance for reporting on specified elements, accounts, or items of a financial statement is contained in SAS No. 62, *Special Reports* (AU section 623), SSAE No. 10, chapter 1, *Attest Engagements* (AT section 101), and Interpretation No. 8 of SSARS No. 1 (AR section 9100.27-.28). According to SAS No. 62 (AU

section 623) and Interpretation No. 8, an accountant can audit or apply agreed-upon procedures to a specified element, account or item of a financial statement that is presented separately, i.e., not presented as supplementary information with financial statements. In addition, Interpretation No. 8 allows the accountant to review such information under the Attestation Standards.

.73 In addition to the above alternatives, most believe that an accountant can issue a compilation report on a presentation of a specified element, account or item of a financial statement. However, the accountant's report should not refer to "Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants" in the first paragraph, since such standards do not exist (applicable to specified elements, accounts or items of a financial statement).

.74 An accountant may also review or compile a specified element that is presented as supplementary information to the basic financial statements and report on it in accordance with SSARS No. 1 (AR section 100).

.75 The following table summarizes the reporting responsibilities for specified elements, accounts, or items of a financial statement.

<i>Assurance Level</i>	<i>Element Presented Separately</i>	<i>Element Presented as Supplement to Financial Statements</i>
Audit	May audit under SAS No. 62	May audit under SAS No. 29
Review	Review under SSAE No. 10, chapter 1, <i>Attest Engagements</i>	May review under SSARS No. 1
Compilation	Not addressed in authoritative literature, but most believe that compilation is permissible. Report should not refer to SSARS.	May compile under SSARS No. 1
Agreed-Upon Procedures	Apply agreed-upon procedures under SSAE No. 10, chapter 2, <i>Agreed-Upon Procedures Engagements</i>	Not applicable

Relationship of Statements on Standards for Accounting and Review Services to Quality Control Standards

.76 SSARS No. 1, as amended by SSARS No. 9 (AR section 100.53–.55), states that an accountant is responsible for compliance with Statements on Standards for Accounting and Review Services (SSARSs) in a review or compilation engagement. Rule 202 [ET section 202.01] of the Code of Professional Conduct of the American Institute of Certified Public Accountants requires members to comply with such standards when associated with reviewed or compiled financial statements.

.77 An accountant has the responsibility to adopt a system of quality control in conducting an accounting practice. Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with SSARS in its review and compilation engagements. The nature and extent of a firm's quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations.

.78 SSARSs relate to the conduct on individual review and compilation engagements; Statements on Quality Control Standards (SQCSs) relate to the conduct of a firm's accounting practice. Thus, SSARSs and

SQCSs are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of an individual engagement and the firm's accounting practice as a whole. However, deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular review or compilation engagement was not performed in accordance with SSARs. This amendment is effective for review reports dated January 1, 2003, or after, by Statement on Standards for Accounting and Review Services No. 9.

Accountants' Reports on Prescribed Forms, Specified Elements, Personal Financial Statements, and OCBOA Financial Statements

.01 Compilation Report—Cash Basis Statements; Full Disclosure

Stockholders and Board of Directors
[*Company*]

We have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [*Company*] as of [*Date*], and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X6

[*Signature of CPA*]

.02 Compilation Report—Cash Basis Statements; Omission of Substantially All Disclosures, With No Reference to Basis

Stockholders and Board of Directors

[*Company*]

[*Address*]

We have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [*Company*] as of [*Date*], and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the modified cash basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.07 Financial Statements Included in Certain Prescribed Forms

[Name], President

[Company]

[Address]

We have compiled the accompanying balance sheet of [Company] as of [Date], and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (our) compilation was limited to presenting in the form prescribed by the [Name of Bank or Other Entity] information that is the representation of management. We have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of the [Name of Bank or Other Entity], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

January 28, 20X6

[Signature of CPA]

.08 Financial Statements Included in Certain Prescribed Forms—Departure From GAAP Not Called for by the Prescribed Form

[Name], President
[Company]
[Address]

We have compiled the accompanying balance sheet of [Company] as of [Date], and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (our) compilation was limited to presenting in the form prescribed by the [Name of Bank or Other Entity] information that is the representation of management. We have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them. However, we did become aware of a departure from the accounting standards prescribed by the [Name of Bank or Other Entity] that is described in the following paragraph.

The instructions that accompany the prescribed form require that [describe requirement]. Management has informed us that the company [describe deviation]. Management has not determined the effect of the departure on the accompanying financial statements.

These financial statements (including related disclosures) are presented in accordance with the requirements of the [Name of Bank or Other Entity], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.09 Compilation Report—Personal Financial Statements; GAAP Basis

[Name]

[Address]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X5, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X6

[Signature of CPA]

.10 Compilation Report—Personal Financial Statements; GAAP Basis With GAAP Departure for Omission of Provision for Income Taxes

[Name]

[Address]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X5, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying statement of financial condition and, accordingly, do not express an opinion or any other form of assurance on it. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the statement of financial condition, generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and estimated current amounts of liabilities and their tax bases. The accompanying statement of financial condition does not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

January 28, 20X6

[Signature of CPA]

.11 Compilation Report—Personal Financial Statements; Tax Basis

[Name]

[Address]

I (we) have compiled the accompanying statement of assets, liabilities, and net worth—income tax basis of James and Jane Person as of December 31, 20X5, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statement(s) has (have) been prepared on the accounting basis used by the individuals for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

AAM Section 3000

Engagement Planning and Administration

Sections 3165, 3170, and 3175 include illustrative audit assignment control forms, engagement letters, and an illustrative planning program that can be used by an accountant in the planning phase of an audit engagement.

Various formats of audit assignment controls, engagement letters, and planning checklists are in use; nevertheless, inclusion of the formats in this section in no way means that they are preferable. Readers are urged to refer directly to authoritative pronouncements when appropriate.

Illustrative formats of audit assignment controls, engagement letters, and planning checklists are often helpful in developing a consistent style within a firm. However, no set of illustrative formats can cover all the situations that are likely to be encountered in practice because the circumstances of engagements vary widely.

Readers should consider other sources of illustrative presentations, such as those in authoritative pronouncements and AICPA audit and accounting guides.

AAM Section 3100

Planning the Engagement

.01 The planning phase is an important part of every engagement. During this phase, the partner and the staff review the client's business and the industry in which the client operates, then develop an overall strategy for the expected conduct and scope of the engagement.

.02 The need for planning is highlighted in Rule 201, *General Standards* (ET section 201.01), *AICPA Code of Professional Conduct*, which states: "A member shall adequately plan and supervise an engagement."

.03 The first standard of fieldwork of generally accepted auditing standards states: "The work is to be adequately planned and assistants, if any, are to be properly supervised." Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AU section 311), provides authoritative interpretive guidance on the first standard of fieldwork.

.04 Proper planning also enhances the productivity of engagement personnel and should result in a more profitable engagement.

.05 The planning memo and the planning checklist are two commonly used planning documents. The style and complexity of these documents will depend on engagement needs and firm preference. The same memo or checklist may be referred to in the review process to ensure that the items highlighted in the planning phase are given adequate attention during the engagement.

.06 The steps in audit planning are as follows:

- a. Understand the scope of services and the nature of reports expected to be rendered.
- b. Decide whether or not to accept the engagement.
- c. Assign personnel to the engagement and prepare a preliminary time budget.
- d. Assess independence of firm and audit team.
- e. Understand the entity's business and the industry in which it operates.
- f. Assess the audibility of the entity by—
 1. Gaining an adequate understanding of the internal control structure.
 2. Evaluating management integrity.
- g. Establish an agreement with the client, preferably with an engagement letter.
- h. Assess control risks.
- i. Make a preliminary judgment about materiality levels for audit purposes.
- j. Estimate the level of audit risk and consider its interactive components.
- k. Consider how components of audit risk relate to one another for each cycle or major account.
- l. Consider cost-effectiveness of different audit strategies.
- m. Write the audit program and finalize a time budget.

AAM Section 3105

Understanding the Assignment

.01 The auditor should (a) meet with the client to understand the type, scope, and timing of the engagement; (b) understand if reports on compliance, internal control, or segments of the entity are required; (c) understand the client's expectations, both stated and implied; and (d) review the expectations of both the owners and managers. A sample checklist is located in AAM section 3165.

.02 To obtain an adequate understanding of any assignment, the auditor should be familiar with generally accepted accounting principles (GAAP), which includes specialized AICPA industry guides as well as Emerging Issues Task Force (EITF) consensuses. The auditor should also be familiar with generally accepted auditing standards (GAAS), which are promulgated by the AICPA.

.03 Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles* (AU section 411), as amended, sets forth the GAAP hierarchy. Statement on Standards for Accounting and Review Services 7, *Omnibus Statement on Standards for Accounting and Review Services—1992*, indicates that the GAAP hierarchy set forth in SAS No. 69 (AU section 411), as amended, also applies to compilation and review engagements.

.04 SAS No. 69 (AU section 411), as amended:

- a. Presents three separate but parallel hierarchies—one for state and local governments, another for nongovernmental entities, and another for federal governmental entities.
- b. Establishes a true GAAP hierarchy—each successive category in the hierarchy is a different level of authority.

.05 The table below in paragraph .06 summarizes the pronouncements that are included in each of the five categories of GAAP for nongovernmental entities, state and local governments, and federal governmental entities. This Manual does not take into account federal governmental entities.

.06 GAAP Hierarchy Summary*

Nongovernmental Entities	State and Local Governments	Federal Governmental Entities
	Established Accounting Principles	
.10a FASB Statements and Interpretations, APB Opinions, and AICPA Accounting Research Bulletins	.12a GASB Statements and Interpretations, plus AICPA and FASB pronouncements if made applicable to state and local governments by a GASB Statement or Interpretation	.14a FASAB Statements and Interpretations plus AICPA and FASB pronouncements if made applicable to federal governmental entities by a FASAB Statement or Interpretation
.10b FASB Technical Bulletins, AICPA Industry Audit and Accounting Guides, and AICPA Statements of Position	.12b GASB Technical Bulletins, and the following pronouncements if specifically made applicable to state and local governments by the AICPA: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position	.14b FASAB Technical Bulletins and the following pronouncements if specifically made applicable to federal governmental entities by the AICPA and cleared by the FASAB: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position
.10c Consensus positions of the FASB Emerging Issues Task Force and AICPA Practice Bulletins	.12c Consensus positions of the GASB Emerging Issues Task Force [†] and AICPA Practice Bulletins if specifically made applicable to state and local governments by the AICPA	.14c AICPA AcSEC Practice Bulletins if specifically made applicable to federal governmental entities and cleared by the FASAB and Technical Releases of the Accounting and Auditing Policy Committee of the FASAB
.10d AICPA accounting interpretations, "Qs and As" published by the FASB staff, as well as industry practices widely recognized and prevalent	.12d "Qs and As" published by the GASB staff, as well as industry practices widely recognized and prevalent	.14d Implementation guides published by the FASAB staff and practices that are widely recognized and prevalent in the federal government

* Paragraph references correspond to the paragraphs of SAS No. 69 (AU section 411) that describe the categories of the GAAP hierarchy.

† As of the date of this Manual, the GASB had not organized such a group.

Nongovernmental Entities	State and Local Governments	Federal Governmental Entities
Other Accounting Literature ^{††}		
<p>.11 Other accounting literature, including FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; GASB Statements, Interpretations, and Technical Bulletins; FASAB Statements, Interpretations, and Technical Bulletins; pronouncements of other professional associations or regulatory agencies; AICPA <i>Technical Practice Aids</i>, and accounting textbooks, handbooks, and articles</p>	<p>.13 Other accounting literature, including GASB Concepts Statements; pronouncements in categories (a) through (d) of the hierarchy for nongovernmental entities when not specifically made applicable to state and local governments; FASB Concepts Statements; FASAB Statements, Interpretations, Technical Bulletins, and Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; pronouncements of other professional associations or regulatory agencies; AICPA <i>Technical Practice Aids</i>; and accounting textbooks, handbooks, and articles</p>	<p>.15 Other accounting literature, including FASAB Concepts Statements; pronouncements in categories (a) through (d) of the hierarchy in paragraph .10 when not specifically made applicable to federal governmental entities; FASB Concepts Statements; GASB Statements, Interpretations, Technical Bulletins, and Concepts Statements; AICPA Issues Papers; International Accounting Standards of the International Accounting Standards Committee; pronouncements of other professional associations or regulatory agencies; AICPA <i>Technical Practice Aids</i>; and accounting textbooks, handbooks, and articles</p>

^{††} In the absence of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances.

Generally Accepted Auditing Standards

.07 An independent auditor plans, conducts and reports the results of an audit in accordance with generally accepted auditing standards (GAAS). Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

.08 SAS, *Generally Accepted Auditing Standards* (AU section 150), provides a framework of GAAS.

.09 The general, field work, and reporting standards (the 10 standards) approved and adopted by the membership of the AICPA, as amended by the AICPA Auditing Standards Board (ASB), are as follows:

General Standards

1. The audit is to be performed by a person or persons having adequate technical training and proficiency as an auditor.
2. In all matters relating to the assignment, independence in mental attitude is to be maintained by the auditor or auditors.
3. Due professional care is to be exercised in the performance of the audit and the preparation of the report.

Standards of Fieldwork

1. The work is to be adequately planned and assistants, if any, are to be properly supervised.
2. A sufficient understanding of internal control is to be obtained to plan the audit and to determine the nature, timing and extent of tests to be performed.
3. Sufficient competent evidential matter is to be obtained through inspection, observation, inquiries and confirmations to afford a reasonable basis for an opinion regarding the financial statements under audit.

Standards of Reporting

1. The report shall state whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).
2. The report shall identify those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.
3. Informative disclosure in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report.
4. The report shall contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.

.10 Rule 202, *Compliance With Standards* (ET section 202.01) of the AICPA *Code of Professional Conduct*, requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the ASB. The ASB develops and issues standards in the form of SASs through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

.11 The auditor should have sufficient knowledge of the SASs to identify those that are applicable to his audit. The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting. The auditor should be prepared to justify departures from the SASs.

.12 *Interpretive Publications* consist of auditing interpretations of the SASs, appendixes to the SASs,¹ auditing guidance included in AICPA Audit and Accounting Guides, and AICPA Auditing Statements of Position. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs.

.13 The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he complied with the SAS provisions addressed by such auditing guidance.

.14 *Other Auditing Publications* include:

- AICPA auditing publications not referred to above
- Auditing articles in the *Journal of Accountancy* and other professional journals
- Auditing articles in the *AICPA CPA Letter*
- Continuing professional education programs and other instructional materials, textbooks, guide books, audit programs and checklists; and other auditing publications from state CPA societies, other organizations and individuals.

Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

.15 If an auditor applies the auditing guidance included in an other auditing publication, he should be satisfied that, in his judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

[The next page is 3141.]

¹ Appendixes to the SASs referred to in paragraph 5 of SAS No. 95, *Generally Accepted Auditing Standards* (AU section 150.05), do not include previously issued appendixes to original pronouncements that when adopted modified other SASs.

AAM Section 3110

Assigning Personnel to the Engagement

General Comments

.01 Engagement planning should include procedures for assigning personnel to the engagement. The procedures established should provide the firm with reasonable assurance that work will be performed by persons having the degree of technical training and proficiency required in the circumstances. Generally, the more able and experienced the personnel assigned to a particular engagement, the less need for direct supervision.

.02 Some procedures regarding assignment of personnel to the engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all the procedures or be limited to those discussed. Overall firm requirements for assigning personnel to engagements are addressed in the *Guide for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice* at AAM section 11,200. Sample quality control forms are available at AAM section 11,300, which are helpful in assigning personnel to engagements.

Engagement Planning Procedures

.03 A time budget for the engagement should generally be prepared to determine manpower requirements and to schedule field work. The engagement partner should approve the time budget prior to the beginning of field work. A time budget should have columns for budgeted time (in hours) for preliminary and final field work. Time budget forms differ depending upon firm preference and needs. Some firms use separate forms for the time budget report and the job progress report or analysis (see AAM section 3170.01 for "Audit Time Budget—Sample A"), whereas others combine these reports into one form (see AAM section 3170.02 for "Audit Time Budget—Sample B").

.04 Other alternatives include longer, more detailed sets of forms. These forms combine the features of a time budget, a source document for staff scheduling, and a job progress report that compares each assigned person's actual daily hours against the budget. Some firms use a shorter, less detailed form for jobs of less than a predetermined number of staff hours (for example, one hundred hours; see AAM section 3170.03 for "Audit Time Analysis—Short Form") and a longer form for jobs requiring more time (see AAM section 3170.04 for "Audit Time Analysis—Long Form"). Some firms use a weekly (or daily) progress report (see AAM section 3170.05, for example). This report, submitted by the accountant in charge, shows the time actually spent in relation to the estimate, the estimated additional time required, and the estimated variance from the original estimate.

.05 When the combined time budget and progress report form (sample B) is used, it must be kept current as the assignment progresses. This form is carried in the working papers file and is filled in daily by the accountant in charge, for all persons applying time on the engagement. This procedure is vital to identify and control time as it is applied so that it can be compared to the budgeted time for that phase of the engagement.

.06 The following factors should be considered in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:

- a. Engagement size and complexity

- b. Personnel availability
- c. Special expertise
- d. Timing of the work to be performed
- e. Continuity and periodic rotation of personnel
- f. Opportunities for on-the-job training

.07 The knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the level of risk for the engagement (see AAM section 3140). Ordinarily, higher risk requires more experienced personnel or more extensive supervision by the auditor with final responsibility for the engagement during both the planning and the conduct of the engagement.

.08 The scheduling and staffing of the engagement should be approved by the partner with final responsibility for the engagement so that the partner can consider the qualifications, experience, and training of personnel to be assigned. The experience and training of the engagement personnel should be considered in relation to the complexity or other requirements of the engagement and the extent of supervision to be provided.

.09 It is recommended that all procedures discussed in this section be documented in the accountant's work papers. A sample checklist documenting the procedures listed in this section is located in AAM section 3165.

[The next page is 3161.]

AAM Section 3115

Independence

General Comments

.01 AICPA professional standards require independence, in accordance with Rule 101, *Independence* (ET section 101.01), of the AICPA *Code of Professional Conduct*, for all attest engagements.¹ Attest engagements are those in which your firm attests—or affirms—that a client’s financial or other information is reasonably stated. Examples of attest services are—

- Financial statement audits.
- Financial statement reviews.
- Other attest services as defined in the Statements on Standards for Attestation Engagements.

.02 Third parties—investors, creditors, and others—rely on your firm’s attestations about a client’s financial information when making various business decisions. Therefore, attest services have value for third parties only if an *independent firm* renders the services. Accordingly, AICPA professional standards require independence when your firm provides attest services; your firm may perform attest services for a client *only* when it is independent of that client. Independence is not required to perform the following services, if these are the *only* services your firm provides to a client:

1. Tax preparation and advice.
2. Consulting services (such as tax consulting or personal financial planning).

.03 One other service—a compilation of a client’s historical financial statements—does not require independence. If a nonindependent firm issues a compilation report, the report must state, “I am (we are) not independent with respect to XYZ Company.”² Therefore, if your firm provides attest services to a client, your firm—and partners and professional employees of your firm—must comply with Rule 101, *Independence* (ET section 101.01), of the AICPA *Code of Professional Conduct*. In addition to the AICPA independence rules you and others in your firm may need to comply with the independence rules of other organizations.

.04 Engagement planning should include procedures to provide the firm with reasonable assurance that persons at all organizational levels maintain independence to the extent required by the AICPA Code of Professional Conduct and the regulations of other organizations, as applicable (for example, the Securities and Exchange Commission, and the Department of Labor). The interpretations and rulings under rule 101 (ET section 101.01) of the AICPA rules of conduct contain examples of instances wherein a firm’s independence will be considered to be impaired.

.05 Firms that are members of the SEC Practice Section of the AICPA Division for CPA Firms may have additional independence requirements. In addition, the SEC Practice Section sets forth minimum requirements for a firm’s independence quality control system.

.06 Other organizations that have established other independence requirements that may be applicable to you and your firm include:

¹ There are additional requirements for public companies and companies subject to other governmental oversight.

² Statements on Standards for Accounting and Review Services No. 1, *Compilation and Review of Financial Statements*, paragraph 19 (AR section 100.19).

- State boards of Accountancy
- State CPA Societies
- Federal and State Agencies

.07 Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule. See AAM section 3115.60 for an audit engagement checklist addressing compliance with AICPA independence rules.

Maintaining Your Independence

.08 Maintaining your independence is your responsibility, not your firm's. As part of its quality control system, the firm is required to address independence matters; however, ultimately it is up to you to follow firm policies and the independence rules. Many firms require you to certify your independence on a regular basis. The following are some suggestions that will help you to complete and sign that certification in good faith.

.09 *Gain an understanding of the independence rules and firm policies.* As a prerequisite to establishing and maintaining the independence of you and your firm, you must have a good, working understanding of the basic independence rules. At a minimum, you should be aware of the circumstances in which you and your immediate family meet the definition of a covered member and of the types of relationships you may have with the firm's clients that could impair independence. If you have any questions about independence matters, you should consult with someone in your firm who is knowledgeable about such matters, or you may seek the advice of the AICPA. If your firm performs audits and other attest services for SEC registrants, you should familiarize yourself with rules promulgated by the SEC and the Public Company Accounting Oversight Board (PCAOB), too.

Covered Member

.10 Know when you meet the definition of a covered member. Whenever you are a *covered member* with respect to a particular attest client, you become subject to the highest possible level of independence restrictions (for example, restrictions on financial and business interests, and your family's employment). You are a covered member with respect to a client if you are:

1. An individual on the attest engagement team;
2. An individual in a position to influence the attest engagement;
3. A partner or manager who provides more than ten hours of nonattest services to the attest client;
4. A partner in the office in which the lead attest engagement partner primarily practices in connection with the attest engagement;
5. The firm, including the firm's employee benefit plans; or
6. An entity whose operating, financial, or accounting policies can be controlled (as defined by generally accepted accounting principles (GAAP) for consolidation purposes) by any of the individuals or entities described in (1) through (5) or by two or more such individuals or entities if they act together.

.11 However, there are two relationships that—due to their magnitude—impair independence even when you are *not* considered to be a covered member.

The following rules apply to all partners and professional employees of a firm:

- No partner or professional employee may be simultaneously employed by an attest client in any position or serve a client as a:
 - Director, officer (or any management capacity), or employee
 - Promoter, underwriter, or voting trustee
 - Trustee of any of the client's employee benefit plans
- No partner or professional employee may own greater than 5 percent of an attest client's outstanding equity securities (or other ownership interests).

Family Members

.12 The investments and employment of certain family members may impair your independence. Know which of your family members meet the definition of "immediate family" and which ones meet the definition of "close relative."

.13 If you are a covered member with respect to a client, members of your immediate family (your spouse—or equivalent—and your dependents) generally must follow the same rules as you. So, for example, your spouse's investments must be investments that you could own under the rules. This would be the case even if your spouse keeps the investments in his or her own name or with a different broker.

.14 There are two exceptions to this general rule.

1. Your immediate family member's employment with a client would not impair your firm's independence provided he or she is not in a "key position." A key position is one in which your family member
 - Has primary responsibility for significant accounting functions that support material components of the financial statements or the preparation of the financial statements;
 - Has primary responsibility for preparing the financial statements; or
 - Is able to influence the contents of the financial statements (for example, a chief executive officer, treasurer, or a member of the board of directors).
2. Immediate family members of *certain* covered members may have a financial interest in a client through an employee benefit plan (for example, retirement or savings account) provided the plan is offered equitably to all similar employees. The covered members whose families may have such interests are:
 - Partners and managers who provide only nonattest services to the client; and
 - Partners who are covered members *only* because they practice in the same office where the client's lead attest partner practices in connection with the engagement.

.15 Also note that immediate family of individuals on the attest engagement team *or* of those who can influence the attest engagement team may not apply this exception.

.16 Your immediate family is also prohibited from owning more than 5 percent of the client's outstanding equity securities.

.17 The close relatives of *certain* covered members will be subject to some employment and financial restrictions. These covered members are:

- Persons on the attest engagement team.
- Persons who can influence the attest engagement.

- Other partners in the office where the client's lead partner conducts the attest engagement.

.18 Close relatives are your:

- Nondependent children
- Siblings
- Parents

.19 So, as a covered member mentioned in Paragraph .17, your close relative's employment by a client would impair independence if your relative had a key position with the client.

.20 Rules pertaining to your close relatives' financial interests differ depending on whether you participate on the client's attest engagement as follows:

- If you participate on the client's attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either:
 - Was material to your relative's net worth, **or**
 - Enables the relative to exercise significant influence over the client.
- If you are able to influence the client's attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that:
 - Is material to your relative's net worth, **and**
 - Enables your relative to exercise significant influence over the client.

Financial Relationships

.21 There are various types of financial interests and some of those interests affect independence. Although your firm is also subject to the financial interest provisions of the independence rules (firms are included in the definition of *covered member*), here we focus on their application to individuals.

.22 As a covered member with respect to a particular client, you (and your spouse and dependents) may not have a:

- Direct financial interest in that client, regardless of how immaterial it would be to you.
- Material indirect financial interest in that client.

.23 In addition, if you commit to acquire a financial interest in a client with respect to which you are a covered member, your independence would be impaired.

.24 Examples of financial interests include shares of stock; mutual fund shares; partnership units; stock rights; options or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles.

.25 Direct financial interests—as the name implies—are ownership interests held directly in a client (for example, you own shares of the client's stock). However, direct financial interests are also deemed to exist when you have a financial interest in a client through a:

- Retirement plan (for example, a 401(k) plan).
- Investment club.
- Blind trust.

.26 You also have a direct financial interest in a client when you have a financial interest in a client through a:

- Partnership if you are a general partner.
- Estate if you serve as an executor and meet certain other criteria.
- Trust if you serve as the trustee and meet certain other criteria.

.27 Indirect financial interests arise when you have a direct financial interest in one entity, Entity A, that itself has a direct financial interest in another entity, Entity B. In that situation, you would be considered to have an *indirect* financial interest in Entity B through your interest in Entity A. In this case, if Entity B is a client, you would be considered to have an investment in the client indirectly through your investment in the intermediate entity, Entity A. Examples of such intermediate entities are:

- Mutual funds (or similar entities).
- Partnerships when you are a limited partner.

Business Relationships

.28 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as a:

- Director, officer, employee, or act in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent
- General counsel (or equivalent)
- Trustee for a client's pension or profit-sharing trust

.29 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client's operations or business affairs, independence is considered impaired.

.30 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client's governing body and therefore would be able to participate in the client's management decisions.

.31 There are two possible exceptions to this rule, as follows:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may serve that client and not impair your firm's independence if:
 - Your position is purely honorary.
 - You do not vote or participate in managing the organization.
 - Your position is clearly identified as honorary in any internal or external correspondence.
2. In addition, you are also permitted to serve on a client's advisory board provided all the following criteria are met:
 - The advisory board's function is purely advisory.
 - The advisory board does not appear to make decisions for the client.
 - The advisory board and any decision-making boards are separate and distinct bodies.
 - Common membership between the advisory board and any decision-making groups is minimal.

Fee Issues

.32 Two types of fee arrangements, contingent fees and commissions, are prohibited when the arrangement involves an attest client, even though the fee is not related to an attest service.

.33 A contingent fee is an arrangement where (1) no fee is charged unless a specified result is attained or (2) the amount of the fee otherwise depends on the results of your firm's services. Some examples of contingent fees are:

- Your firm receives a "finder's fee" for helping a client locate a buyer for one of the client's assets.
- Your firm performs a consulting engagement to decrease a client's operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

Exceptions are:

- Fees fixed by a court or other public authority.
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies.

.34 A commission is any compensation paid to you or your firm for (1) recommending or referring a third party's product or service to a client or (2) recommending or referring a client's product or service to a third party.

.35 For example, you or your firm:

- Refers a client to a financial planning firm that pays you a commission for the referral.
- Sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- Refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

.36 The rule provides an exception for *referral fees* that are related to recommending or referring the services of a CPA. That is, you may (1) receive a fee for referring the services of a CPA to any person or entity or (2) if you are a CPA, pay a fee to obtain a client provided you disclose such receipt or payment to the client. Referral fees are not considered commissions under these specific circumstances.

.37 You and your firm may not have commission or contingent fee arrangements with a client when your firm also provides one of the following services to a client:

- An audit of financial statements.
- A review of financial statements.
- Compiled financial statements when a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence.
- An examination of prospective financial statements.

.38 You and your firm may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not a client).³ For example, you or your firm may receive a commission from an officer of a client without violating the AICPA rule. Even when permitted, the existence of a commission arrangement must be disclosed to the person (or entity) to whom the commission relates.

³ Also see AICPA Ethics Ruling No. 25 under section 391 of the *Code*, "Commission and Contingent Fee Arrangements With Nonattest Client" (ET section 391.049-.050).

Restricted Entities

.39 Be familiar with the firm's restricted entities. Restricted entities are those entities for whom the firm provides attest services. You should be aware of who these entities are. Many firms maintain a formal list or database of these clients. If yours is one of these firms, you should know how to access the list.

.40 Maintain the integrity of the restricted entity list. If you perform attest services, then you need to make sure that those clients are identified as restricted entities of the firm. Certain entities that are related to your clients (for example, subsidiaries) also will be considered restricted entities, even if they are not clients of the firm.

.41 Consult the restricted entities list regularly. Get into the habit of referring to the firm's restricted entity list whenever you are considering changes in circumstances that could affect your independence. For example, you should consult the restricted entity list prior to—

- Making an investment or acquiring a financial interest in an entity
- Entering into a business relationship
- Obtaining a loan
- Having an immediate family member change employers or assume new responsibilities at an existing job

Nonattest Services

.42 Be aware of the rules relating to the performance of nonattest services. If you provide nonattest services to restricted entities, you should be familiar with Ethics Interpretation No. 101-3 (ET section 101.05) regarding the performance of nonattest services. You should be aware of the services that are permitted and prohibited under the ruling, as well as your responsibilities for establishing an understanding of the engagement with your client and documenting various aspects of the engagement. If your clients are SEC registrants, you should be aware of the more restrictive SEC rules in this area. Certain other regulators (for example, the Government Accounting Office or GAO) may have more restrictive rules concerning nonattest services, which should be reviewed depending upon the circumstances of the engagement.

.43 The term, *nonattest services*, includes accounting and consulting services that are not part of an attest engagement.⁴ Nonattest services specifically addressed in the rules are:

- Bookkeeping services
- Payroll and other disbursement services
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Corporate finance consulting or advisory
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration

⁴ Defined in the *Code of Professional Conduct*, an *attest engagement* is one that requires independence under AICPA *Professional Standards*, e.g., audits and reviews of financial statements or agreed-upon procedures performed under the attestation standards.

.44 Recently revised AICPA rules clarify the general requirements for performing nonattest services, adding a new pre-engagement documentation requirement. In addition, more restrictive rules will apply to certain services such as financial information system design and implementation and appraisal, valuation, and actuarial services. The new rules become effective on December 31, 2003, and incorporate a one-year transition period for services under contract as of that date provided the engagement is completed by December 31, 2004, and the member was in compliance with pre-existing independence requirements.

.45 One of the key principles underlying the AICPA rules on nonattest services is: You may not serve—or even appear to serve—as a member of a client’s management. For example, you may not:

- Make operational or financial decisions for the client.
- Perform management functions for the client.
- Report to the board of directors on behalf of management.

.46 In addition, the following are examples of the types of activities that impair independence:

- Authorizing or executing a transaction on behalf of a client
- Preparing the client’s source documents (for example, purchase orders)
- Having custody of a client’s assets

.47 Therefore, it is essential that your firm and the client have a clear understanding regarding your respective roles *before* performing nonattest services. The AICPA rules require you to document this understanding (e.g., in an engagement letter or internal memorandum). You are also required to document the services to be performed, objectives of the engagement and any applicable limitations, *and*, importantly, the client’s ability to effectively oversee your services.

.48 Another new addition to the AICPA rules is an explicit requirement that a member comply with more restrictive independence provisions, if applicable, of certain regulators such as state boards of accountancy, the SEC, and the GAO.

.49 *Report any apparent violations.* If you become aware of any apparent violations of the independence rules, you should report these immediately to the person in your firm responsible for independence matters.

.50 The procedures employed at the engagement level should be designed to ascertain whether the firm and its partners and employees have complied with all applicable independence rules. Overall firm requirements for independence are addressed in AICPA’s Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm’s Accounting and Auditing Practice*,^{*} paragraphs 7–10, as amended by SQCS No. 4, *System of Quality Control for a CPA Firm’s Accounting and Auditing Practice* (QC section 20.07–.10).

Independence Quality Controls

.51 The AICPA SQCSs include the following requirement.

Policies and procedures should be established to provide the firm with reasonable assurance that personnel maintain independence (in fact and in appearance) in all required circumstances. (QC section 20.13)

^{*} SQCS No. 6, *Amendment to Statement on Quality Control Standards No. 2, System of Quality Control for a CPA Firm’s Accounting and Auditing Practice*, amends SQCS No. 2 (QC section 20), to clarify that deficiencies in individual audit, attest, review, and compilation engagements do not, in and of themselves, indicate that the firm’s system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards.

The professional standards do not describe how a firm should establish compliance with these requirements. However, in regards to independence matters, a CPA firm should consider the following.

.52 *Establish “plain English” independence policies and procedures.* Written policies and procedures are an important first step toward ensuring compliance with the independence rules. These policies should be written in a manner that is easy to read and understand.

.53 *Designate a partner-in-charge.* There are two reasons why a firm might wish to designate a partner-in-charge of independence matters. First, firm members who have questions about independence matters need to have someone to turn to for answers. It helps if they know there is one person in charge. Additionally, the independence rules are complicated and subject to change. A firm is more likely to have a good understanding of the independence rules when one person is specifically assigned the responsibility.

.54 *Communication and training.* The firm’s independence policies and procedures must be communicated throughout the firm. Periodic training on these matters will help ensure understanding and compliance.

.55 *Maintain a list of restricted entities.* Firm personnel must be independent with respect to the firm’s restricted entities. It is important for the firm to maintain a database or list of all clients (and certain related entities) for whom the firm performs services requiring independence. Policies and procedures should exist for keeping the list current.

.56 *Obtain written representations from firm personnel.* Many firms require their personnel to execute and return to the firm an independence representation in which the firm member affirms that he or she is independent with respect to the firm’s restricted entities. Typically, these representations are completed annually.

.57 *Resolution of apparent independence violations.* The firm should have procedures for resolving apparent independence violations that are reported by firm personnel.

Additional Guidance

.58 It is recommended that all procedures discussed in this section be documented in the auditor’s work papers.

.59 For additional guidance practitioners should refer to the AICPA *Plain English Guide to Independence*. The Guide discusses the independence rules of the principal standard-setting bodies in plain, straightforward English so you can understand and apply them with greater confidence and ease. The Guide will also help you identify issues that may require further investigation. The AICPA *Plain English Guide to Independence* summarizes the independence rules only; therefore, when assessing your independence, you should refer directly to the applicable independence standards, in addition to your firm’s policies on independence because they may include additional details or topics relevant to your situation. To obtain the Guide, visit the AICPA web site at www.aicpa.org and click on the Professional Ethics line presented in the left-hand column.

.60 Audit Engagement Checklist—Independence Compliance

(This Checklist is not intended to be all-inclusive of the kinds of relationships that may impair independence. Also, ET section references refer to AICPA Professional Standards, volume 2.)

Question	Answer and any Necessary Explanation
<p>1. Have covered members, including the firm (see ET section 92.06), had any of the following interests or relationships with the client during the period of the professional engagement?¹</p> <ul style="list-style-type: none"> • Financial interests (e.g., shares of stock; mutual fund shares; partnership units; stock rights; options or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles) in the client, or leases, loans or other depository accounts with the client (see ET section 101.02, 101.07, 101.10, 101.13, 101.14,² and related ethics rulings in ET section 191) • Trustee or executor relationships when the trust or estate has a direct, or material indirect, financial interest in the client and the covered member had the authority to make investment decisions for the trust or estate or the interest meets other specified criteria (see ET section 101.02) • Joint, closely held investments with the client (see ET sections 92.15 and 101.02) • Immediate family (spouse, spousal equivalent, or dependent) with financial interests (including benefit plan holdings) in, or loans with, the client (see ET sections 92.11, 101.02, and 101.07) • Close relatives (sibling, nondependent child, or parent) with financial interests in the client (see ET sections 92.04 and 101.02) 	
<p>2. Have covered members, including the firm (see ET section 92.06), had any of the following interests or relationships with the client during the period of the professional engagement¹ or during the period covering the financial statements?</p> <ul style="list-style-type: none"> • Previous employment with the client and the covered member subsequently served on the client's attest engagement team or was in a position to influence the engagement, and the attest engagement covered the period when the individual was employed by the client (see ET sections 92.02, 92.12, and 101.02) • Previous service on the client's board of directors, or as a promoter, underwriter, voting trustee for the client, or as a trustee for the client's pension or profit-sharing trust and the covered member subsequently served on the client's attest engagement team or was in a position to influence the engagement, and the attest engagement covered the period when the individual was associated with the client (see ET sections 92.02, 92.12, and 101.02) • Immediate family members (spouse, spousal equivalent, or dependent) or close relatives (sibling, nondependent child, or parent) in key positions with the client (see ET sections 92.04, 92.11, 92.16, and 101.02) 	

Question	Answer and any Necessary Explanation
3. Have any partners or professional employees of the firm or the firm itself had any financial interests in the client exceeding 5 percent of the client's outstanding equity securities (or other ownership interests) during the period of the professional engagement ¹ (see ET section 101.02)?	
4. Have any partners or professional employees of the firm or the firm itself had any of the following interests or relationships with the client during the period of the professional engagement ² or during the period covering the financial statements? <ul style="list-style-type: none"> • Business relationships with the client, i.e., as an officer, director, employee, member of management, promoter, underwriter, voting trustee, trustee for client's pension or profit-sharing trust (see ET section 101.02 and related ethics rulings in ET section 191) • Cooperative arrangements with the client (see ET section 101.14) • Nonattest services engagements with the client (see ET section 101.05 and 101.15,³ and related ethics rulings in ET section 191) 	
5. Have any former partners or professional employees of the firm considered employment with the client while serving on the client's attest engagement team or while in a position to influence the attest engagement (see ET sections 92.02, 92.12, and 101.04)?	
6. Have any former partners or professional employees of the firm accepted key positions with the client (see ET sections 92.16 and 101.04)?	

The above checklist is not intended to be all-inclusive of the kinds of relationships that may impair independence.

¹ The period of the professional engagement begins when a member either signs an initial engagement letter or other agreement to perform attest services or begins to perform an attest engagement for a client, whichever is earlier. The period lasts for the entire duration of the professional relationship (which could cover many periods) and ends with the formal or informal notification, either by the member or the client, of the termination of the professional relationship or by issuance of a report, whichever is later. Accordingly, the period does not end with the issuance of a report and recommence with the beginning of the following year's attest engagement (ET section 92.24).

² ET section 101.16 relates to firms within an "alternative practice structure" only.

³ Effective December 31, 2003, Ethics Interpretation No. 101-13 guidance will be incorporated into Ethics Interpretation No. 101-3.

AAM Section 3120

Knowledge of the Entity's Business

.01 The accountant should obtain a level of knowledge of the entity's business that will enable the accountant to plan and perform the audit in accordance with generally accepted auditing standards. That level of knowledge should enable the accountant to obtain an understanding of the events, that may have a significant effect on the financial statements. The level of knowledge customarily possessed by management relating to managing the entity's business is substantially greater than that which is obtained by the accountant in performing the audit. Knowledge of the entity's business helps the accountant in—

- a. Identifying areas that may need special consideration.
- b. Assessing conditions under which accounting data and corroborating evidential matter are produced, processed, reviewed, and accumulated within the operation.
- c. Evaluating the reasonableness of estimates, such as valuation of inventories, depreciation, allowances for doubtful accounts, and percentage-of-completion of long-term contracts.
- d. Evaluating the reasonableness of management representations.
- e. Making judgments about the appropriateness of the accounting principles applied and the adequacy of disclosures.¹
- f. Identifying information that should be considered in identifying risks of material misstatement due to fraud.

Engagement Planning Procedures

.02 The accountant should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics. Such matters include, for example, the type of business, types of products and services, capital structure, related parties, locations and production, distribution, and compensation methods. The accountant should also consider matters affecting the industry in which the entity operates—such as economic conditions, government regulations, and changes in technology—as they relate to his or her audit. Other matters, such as accounting practices common to the industry, competitive conditions, and, if available, financial trends and ratios, should also be considered by the accountant.

.03 Knowledge of an entity's business is obtained through performing analytical procedures, prior experience with the entity or its industry, and inquiry of the entity's personnel. Working papers from prior years may contain useful information about the nature of the business, organizational structure, operating characteristics, and transactions that may require special consideration. Other sources an accountant may consult include AICPA audit and accounting guides, industry publications, financial statements of other entities in the industry, textbooks, periodicals, and individuals knowledgeable about the industry.

.04 The accountant should give thought to whether specialized skills are needed to consider the effect of computer processing on the audit, to understand the nature of controls or to design and perform audit procedures. If specialized skills are needed, the accountant should seek assistance from a professional who may be or may not be on the accountant's staff. If the use of such a professional is planned, the accountant should have sufficient computer-related knowledge to communicate the objectives of the other professional's work, to evaluate whether the specified procedures will meet the accountant's objectives, and to evaluate

¹ See SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, paragraphs 4 and 6 (AU section 411.04 and .06).

the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The accountant's responsibilities for using such a professional are equivalent to those for using assistants.²

.05 The accountant should consider the methods the entity uses to process information in planning the audit because such methods influence the design of the accounting system and the nature of control procedures. Because of the growth in the use of computers and other information technology, many entities process significant information electronically. In those circumstances, the nature, timing, and extent of audit procedures will be affected in various ways depending upon a number of factors that the auditor should consider, including:

- a. The extent to which computers and other information technology are used in every significant accounting application.
- b. Whether or not the application generates a financial statement line item or provides a basis for an accounting estimate.
- c. The significance of the financial statement line item(s) affected by the client's use of technology.
- d. The controls placed over the application or system.
- e. The effectiveness of the design and operation of those controls.³
- f. The complexity of the entity's information technology operations, including the use of an outside service center.⁴
- g. The organizational structure of the information technology activities.
- h. The availability of and access to evidence. Certain electronic evidence may exist at a certain point in time. However, such evidence may not be retrievable after a specified period of time if files are changed and if backup files do not exist.
- i. The use of computer-assisted audit techniques to increase the efficiency of performing audit procedures. Using computer-assisted audit techniques may also provide the accountant with an opportunity to apply certain procedures to an entire population of accounts or transactions. In addition, in some accounting systems, it may be difficult or impossible for the auditor to analyze certain data or test specific control procedures without computer assistance.

Practice Tip

The AICPA's Auditing Practice Release entitled, *Auditing With Computers*, provides practical and helpful guidance in using technology to your advantage during an audit. Call the AICPA at 1 (888) 777-7077 and ask for product number 021057.

² Since the use of a specialist who is effectively functioning as a member of the audit team is not covered by SAS No. 73, *Using the Work of a Specialist* (AU section 336), a computer audit specialist requires the same supervision and review as any assistant.

³ Paragraph 14 of SAS No. 31, *Evidential Matter*, as amended by SAS No. 80, *Amendment to Statement on Auditing Standards No. 31, Evidential Matter* (AU section 326.14), states that in entities where significant information is transmitted, processed, maintained, or accessed electronically, the auditor may determine that it is not practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. In such circumstances, the auditor should perform tests of controls to gather evidential matter to use in assessing control risk, or consider the effect on his report. Paragraph 4 of SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55*, and SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AU section 319.04), states that when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form, the auditor's ability to obtain the desired assurance only from substantive tests would significantly diminish.

⁴ See SAS No. 70, *Service Organizations*, as amended by SAS No. 88, *Service Organizations and Reporting on Consistency* (AU section 324), and the related AICPA Audit Guide, *Service Organizations. Applying SAS No. 70* (product number 012772), for guidance concerning the use of a service center for computer processing of significant accounting applications.

In addition, certain information generated by the computer for management's internal purposes may be useful in performing substantive tests (particularly analytical procedures).⁵

.06 It is recommended that all procedures discussed in this section be documented in the accountant's work papers. An illustrative planning program for documenting the procedures listed in this section is located in AAM section 3165.

[The next page is 3201.]

⁵ SAS No. 56, *Analytical Procedures* (AU section 329), describes the usefulness of and guidance pertaining to such procedures.

AAM Section 3125

Consideration of Internal Control

Introduction

.01 Internal control is broadly defined as a process designed to provide reasonable assurance regarding the achievement of objectives in the following categories: (a) reliability of financial reporting, (b) effectiveness and efficiency of operations, and (c) compliance with applicable laws and regulations. Internal control is accomplished by an entity's board of directors, management, and other personnel.

.02 The above definition reflects certain fundamental concepts:

- *A process.* Internal control is a process. It is not one event or circumstance, but a series of actions that permeate an entity's activities. These actions are pervasive, and are inherent in the way management runs the business.
- *People.* Internal control is effected by people. It is not accomplished by policy manuals and forms, but the people of an organization, what they do and say. People must know their responsibilities and limits of authority.
- *Reasonable assurance.* Internal control, no matter how well designed and operated, can provide only reasonable assurance to management and the board of directors regarding achievement of an entity's objectives.
- *Achievement of objectives.* Internal control is geared to the achievement of entity objectives. The definition of these objectives provides auditors with a useful framework for understanding and analyzing internal controls.

.03 Auditors are required to consider their client's internal control during the planning phase of every audit. SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55*, and SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AU section 319), states the following:

A sufficient understanding of internal control is to be obtained to plan the audit and to determine the nature, timing, and extent of tests to be performed.

.04 As a practical matter, the above requirement raises the following questions.

- What constitutes a "sufficient understanding"? That is, what should an auditor know about the client's internal control?
- How should an auditor obtain this understanding?
- Once an auditor understands the client's internal control, how is that information used to plan the audit?

.05 This section provides answers to each of the above three questions.

What Auditors Should Understand About Internal Control

.06 A "sufficient" understanding of internal control means:

- An auditor should perform procedures to understand the design of controls (whether manual or automated) and determine whether they have been placed in operation.
- This understanding is generally limited to controls that pertain to the entity's objective of preparing reliable financial statements for external purposes.
- That one objective can be broken into five components, and an auditor should obtain an understanding of each of the five components.

.07 Whether a control has been "placed in operation" at a point in time is different from its "operating effectiveness" over a period of time. In obtaining knowledge about whether controls have been placed in operation, the auditor determines that the entity is using them. Operating effectiveness, on the other hand, is concerned with how the control (whether manual or automated) was applied, the consistency with which it was applied, and by whom it was applied. The auditor determines whether controls have been placed in operation as part of the understanding of internal control necessary to plan the audit. The auditor evaluates the operating effectiveness of controls as part of assessing control risk. Understanding internal control and assessing control risk may be performed concurrently in an audit, and some procedures performed to obtain the understanding may provide evidential matter about the operating effectiveness of controls relevant to certain assertions.

.08 *The Jones family owns and operates several neighborhood grocery stores in Anytown. On a monthly basis, the controller of Jones Grocery performs bank reconciliations for all the bank accounts. For planning purposes, the auditor of Jones Grocery needs to understand whether the controller performs the reconciliations. Not testing, but identifying controls are a key part of audit planning.*

.09 SAS No. 55 (AU section 319), as amended, provides a framework to help auditors obtain their understanding of internal control. That framework is built on two basic concepts: objectives and components.

.10 Internal control is a process designed to provide reasonable assurance regarding the achievement of entity *objectives*. Entities generally have the following three objectives:

- *Financial reporting.* This objective relates to the preparation of reliable published financial statements.
- *Operations.* This objective relates to effective and efficient use of the entity's resources.
- *Compliance.* This objective relates to the entity's compliance with applicable laws and regulations.

.11 *The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the **financial reporting** objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the **operations** objective. Each store also has a small deli that prepares sandwiches and hot entrees. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the entity's **compliance** objective*

.12 Generally, relevant controls for an audit relate to the financial reporting objective. Controls relating to operations and compliance objectives that are not relevant to an effective audit need not be considered.

.13 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. The auditor of Jones may wish to inquire and document these controls for client service or other purposes, but since these controls are not relevant to the audit, he or she is not required to do so.*

.14 However, if controls relating to operations and compliance objectives pertain to information the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.15 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she should consider obtaining an understanding of the following:

- Which transactions or classes of transactions are included in the report.
- How significant accounting information about those transactions are entered into and flow through the financial reporting system.
- The files that are processed.
- The nature of processing involved in producing the report.

.16 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.17 Controls designed to prevent or detect misappropriations of assets may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or access controls, such as passwords that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. An auditor's responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.18 An objective is what an entity strives to achieve. But what is needed to achieve that objective?

.19 SAS No. 55 (AU section 319), as amended, provides a framework that separates each financial reporting objective into five components. These components represent what is needed to achieve the entity's objectives. The components of internal control are briefly described as follows:

- *Control environment.* The core of any business is its people—their individual attributes, including integrity, ethical values, and competence—and the environment in which they operate. They are the engine that drives the entity and the foundation on which everything rests.
- *Risk assessment.* The entity must be aware of and deal with the risks it faces. It must set objectives, integrated with the sales, production, marketing, financial, and other activities so that the organization is operating in concert. It also must establish mechanisms to identify, analyze, and manage the related risks.
- *Control activities.* Control policies and procedures must be established and executed to help ensure the actions identified by management as necessary to address risks to achievement of the entity's objectives are effectively carried out.
- *Information and communication.* Surrounding the control activities are information and communication systems, including the financial reporting information system. These systems support the ability of the entity's people to identify, capture, and exchange the information needed to conduct, manage, and control its operations.
- *Monitoring.* The entire process must be monitored, and modifications made as necessary. In this way, the system can react dynamically, changing as conditions warrant.

.20 Some control components, for example the control environment, will have a pervasive effect on the entity's activities. Other components, for example control activities, will be directed primarily toward the achievement of one or more of the three objectives described in AAM section 3125.10. Auditors are generally interested only in those components of internal control that have a pervasive effect on the entity and those that are directly related to the reliability of financial reporting.

.21 This internal control framework, the relationship between an entity's objectives and internal control components, is discussed in more detail in AAM section 4200.

.22 The internal control framework described here and in AAM section 4200 is only a means to help auditors consider the impact of an entity's internal control in an audit. An auditor's primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, an auditor's primary concern is whether a specific control affects financial statement assertions. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.23 *Andrea Auditor audits Jones Grocery. As on all audits, she is required to obtain an understanding of internal control sufficient to plan the audit. To achieve this, she organizes her inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objective. As a result of performing her procedures, she discovers the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items. Is that considered a "monitoring" activity?*

.24 *The issue of how to classify a particular control is irrelevant for Andrea's purposes. As an auditor, her primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

How an Auditor Obtains an Understanding of Internal Control

.25 An auditor often obtains a sufficient understanding of internal control through previous experience with the entity and the following:

- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of entity documents and records.
- Observation of entity activities and operations.

.26 Auditors should consider the types of misstatements that occurred in prior audits (e.g., whether they were associated with accounting estimates, whether they were routine errors that resulted from a lack of control consciousness, or whether they resulted from lack of sufficient personnel). This knowledge of prior misstatements can help an auditor focus his or her inquiries on those areas and whether changes have been made to internal control to prevent those misstatements in the future.

.27 In a continuing audit, the auditor may already have significant experience with and documentation of internal control. In these situations, this knowledge from previous audits allows the auditor to focus on system changes.

.28 *Jones Grocery purchased a commercially available software package for independent grocers. During 20X1, Jones installed the general ledger system and the cash receipts/disbursements and accounts payable modules. As part of performing her 20X1 audit, Andrea Auditor obtained an understanding of the software package and the modules that were installed. For her 20X2 audit, Andrea should focus on changes made to the system since 20X1. For example, she might inquire about the installation of other modules (such as inventory) or updated versions of the software package.*

.29 Some controls are documented in policy and procedure manuals, flowcharts, source documents, journals, and ledgers. In these cases, inspection of the documentation and inquiries of entity personnel may provide a sufficient understanding to plan the audit.

.30 *When Jones Grocery receives a bill, it is input directly into the accounts payable module of their software package. The computer generates an accounts payable aging and a cash requirements report that indicates when each*

*bill should be paid. The accounts payable module interfaces with the general ledger system to automatically post and update the appropriate general ledger account whenever bills are received or paid. To obtain her understanding of the accounts payable system, Andrea performed a "walk-through." She made inquiries of Jones personnel and obtained copies of bills and the reports generated by the computer. She "walked through" the example bills to see how they were included in the computer reports and how totals from those reports were posted to the general ledger. She also made inquiries related to the completeness assertion, that is, how does Jones ensure that **all** bills are entered into the system? Andrea observed the Jones employee performing those control procedures.*

.31 Documentation may not be available for some controls. For example, the understanding of certain aspects of the control environment, such as management integrity, may be obtained through previous experience updated by inquiries of management and observation of their actions. Although documentation may not be available, the auditor is still responsible for documenting his or her understanding of the components of internal control.

.32 In making a judgment about the understanding of internal control necessary to plan the audit, the auditor considers the knowledge obtained from other sources about the types of misstatement that could occur, the risk that such misstatements may occur, and the factors that influence the design of tests of controls, when applicable, and substantive tests. Other sources of such knowledge include information from previous audits and the auditor's understanding of the industry and market in which the entity operates. The auditor also considers his or her assessment of inherent risk, judgments about materiality, and the complexity and sophistication of the entity's operations and systems, including the extent to which the entity relies on manual controls or on automated controls.

.33 In making a judgment about the understanding of internal control necessary to plan the audit, the auditor also considers IT risks that could result in misstatements. For example, if an entity uses IT to perform complex calculations, the entity receives the benefit of having the calculations consistently performed. However, the use of IT also presents risks, such as the risk that improperly authorized, incorrectly defined, or improperly implemented changes to the system or programs performing the calculations, or to related program tables or master files, could result in consistently performing those calculations inaccurately. As an entity's operations and systems become more complex and sophisticated, it becomes more likely that the auditor would need to increase his or her understanding of the internal control components to obtain the understanding necessary to design tests of controls, when applicable, and substantive tests.

.34 The auditor should consider whether specialized skills are needed for the auditor to determine the effect of IT on the audit, to understand the IT controls, or to design and perform tests of IT controls or substantive tests. A professional possessing IT skills may be either on the auditor's staff or an outside professional. In determining whether such a professional is needed on the audit team, the auditor considers factors such as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

.35 Procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and

planning and performing tests of IT controls. If the use of a professional possessing IT skills is planned, the auditor should have sufficient IT-related knowledge to communicate the audit objectives to the professional, to evaluate whether the specified procedures will meet the auditor's objectives, and to evaluate the results of the procedures as they relate to the nature, timing, and extent of other planned audit procedures.

.36 The auditor's assessment of inherent risk and judgments about materiality for various account balances and transaction classes also affect the nature, timing, and extent of the procedure performed to obtain the understanding. For example, the auditor may conclude that planning the audit of the prepaid insurance account does not require specific procedures to obtain an understanding of internal control.

.37 AAM sections 4300 and 4400 contain a series of forms and questionnaires to help auditors perform the procedures to obtain an understanding of internal control.

Documenting the Understanding

.38 The auditor should document the understanding of the entity's internal control components obtained to plan the audit. The form and extent of this documentation is influenced by the nature and complexity of the entity's controls. For example, documentation of the understanding of internal control of a complex information system in which a large volume of transactions are electronically initiated, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity's internal control and the more extensive the procedures performed by the auditor, the more extensive the auditor's documentation should be.

Using Internal Control Information to Plan the Audit

.39 Effective audit planning requires the auditor to know what can go wrong in the financial statements. That is, the auditor should identify the types of material misstatements that could occur and assess the risk that they will occur. Understanding the design of internal control and determining whether it has been placed in operation provides important information about the types and risks of potential material misstatement that could occur in financial statements. The understanding often will affect the auditor's consideration of the significance of fraud risk factors. In addition, when considering the significance of fraud risk factors (see AAM section 3145), the auditor may wish to assess whether there are specific controls that mitigate the risk or whether specific control deficiencies may exacerbate the risk.

.40 The controller of Jones Grocery performs monthly bank reconciliations, but suppose the controller is not required to follow up on old or unusual reconciling items and that the reconciliation itself is not subject to supervisory review. This is a flaw in the design of internal controls which affects the risk of misstatements occurring in the cash accounts going undetected and increases the risk that a misstatement may not be identified timely.

.41 Knowledge of internal control is also a primary source of information about the specific processes, methods, records, and reports used in preparing the entity's financial statements. The auditor uses this information to design substantive audit tests.

.42 In obtaining an understanding of internal control at Jones Grocery, Andrea Auditor determines that the accounting system generates an accounts payable trial balance of all unpaid invoices. This information is useful for Andrea to plan her search for unrecorded liabilities—that is, post-balance sheet disbursements and unpaid invoices will be traced to that report to determine if they have been properly accrued at year end.

.43 The auditor uses the understanding of internal control to plan an audit strategy for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements. There are generally two types of audit strategies:

- A substantive approach (however, see paragraph .44 below), where control risk is assessed at or slightly below the maximum level¹, or
- An approach where control risk is assessed below the maximum level.

.44 To use a substantive approach, the auditor needs to be satisfied that performing only substantive tests would be effective in restricting detection risk to an acceptable level. **When a significant amount of information supporting one or more financial statement assertions is electronically initiated, recorded, processed, or reported, the auditor may determine that it is not possible to assess control risk at the maximum and design effective substantive tests that by themselves would provide sufficient evidence that the assertions are not materially misstated.** For such assertions, significant audit evidence may be available only in electronic form and its competence and sufficiency as evidential matter usually depend on the effectiveness of controls over its accuracy and completeness. Also, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, recorded, processed, or reported only in electronic form and appropriate controls are not operating effectively. For example, a purchase order transmitted electronically from a customer derives its credibility primarily from the controls within the electronic environment. A fraudulent or altered electronic purchase order exhibits no apparent difference, compared to a valid purchase order, when extracted from the electronic environment of the entity. Without testing the internal control surrounding the electronic evidence, a lack of credibility may not be recognized by the auditor. In such circumstances, the auditor should perform tests of controls surrounding the electronic environment to gather evidential matter to use in assessing control risk, or consider the effect on the auditor's report.

Practice Tip

The AICPA has published a practice aid entitled, *The Information Technology Age: Evidential Matter in the Electronic Environment* (product number 021068). This publication provides valuable help for practitioners auditing in environments where electronic evidence is significant, by addressing the various issues concerning electronic evidence. Call 1 (888) 777-7077 for more information.

.45 When control risk is assessed as below the maximum and it has been determined that reliance on the controls is possible, auditors can modify the nature, timing, and extent of substantive procedures, for example, sample sizes may be reduced or substantive testwork can be performed in advance of the balance sheet date.

.46 The choice of an audit strategy is done at the *assertion* level and is not a global strategy for the entire audit. For some assertions, the auditor may choose a primarily substantive approach (however, see paragraph .40 above), and for other assertions, the auditor may plan to assess control risk below the maximum.

.47 *Andrea Auditor has been the auditor of Jones Grocery for several years. During that time she has helped Jones design and implement the procedures used for the annual inventory count. The count itself is performed by an outside inventory count company that specializes in taking inventory at grocery stores. The outside company is supervised by Jones Grocery employees. Based on this knowledge of the internal controls for the physical inventory count, Andrea plans to assess internal control risk below the maximum for the existence assertion related to inventory.*

.48 In the above example, the audit strategy was determined at the assertion level. The physical count of inventory is a control directly related to the existence assertion. It has little relevance to the valuation assertion and no relevance to the completeness assertion. Thus, the auditor is able to modify tests related to the existence assertion, for example, reducing the number of test counts or stores where inventory is observed. Substantive audit procedures related to other assertions (for example, proper pricing) should not be modified.

¹ The term *maximum level* means the greatest probability that a material misstatement that could occur in a financial statement assertion will not be prevented or detected on a timely basis by an entity's internal control.

Choosing an Audit Strategy

.49 As described in AAM section 3125.06, on all audits, an auditor is required to understand how controls are designed and whether they have been placed in operation. This understanding is sufficient to plan a primarily substantive audit approach. Nevertheless, even with a primarily substantive approach it is usually necessary to test controls surrounding electronic evidence, given the fact that the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. See paragraph .44 above.

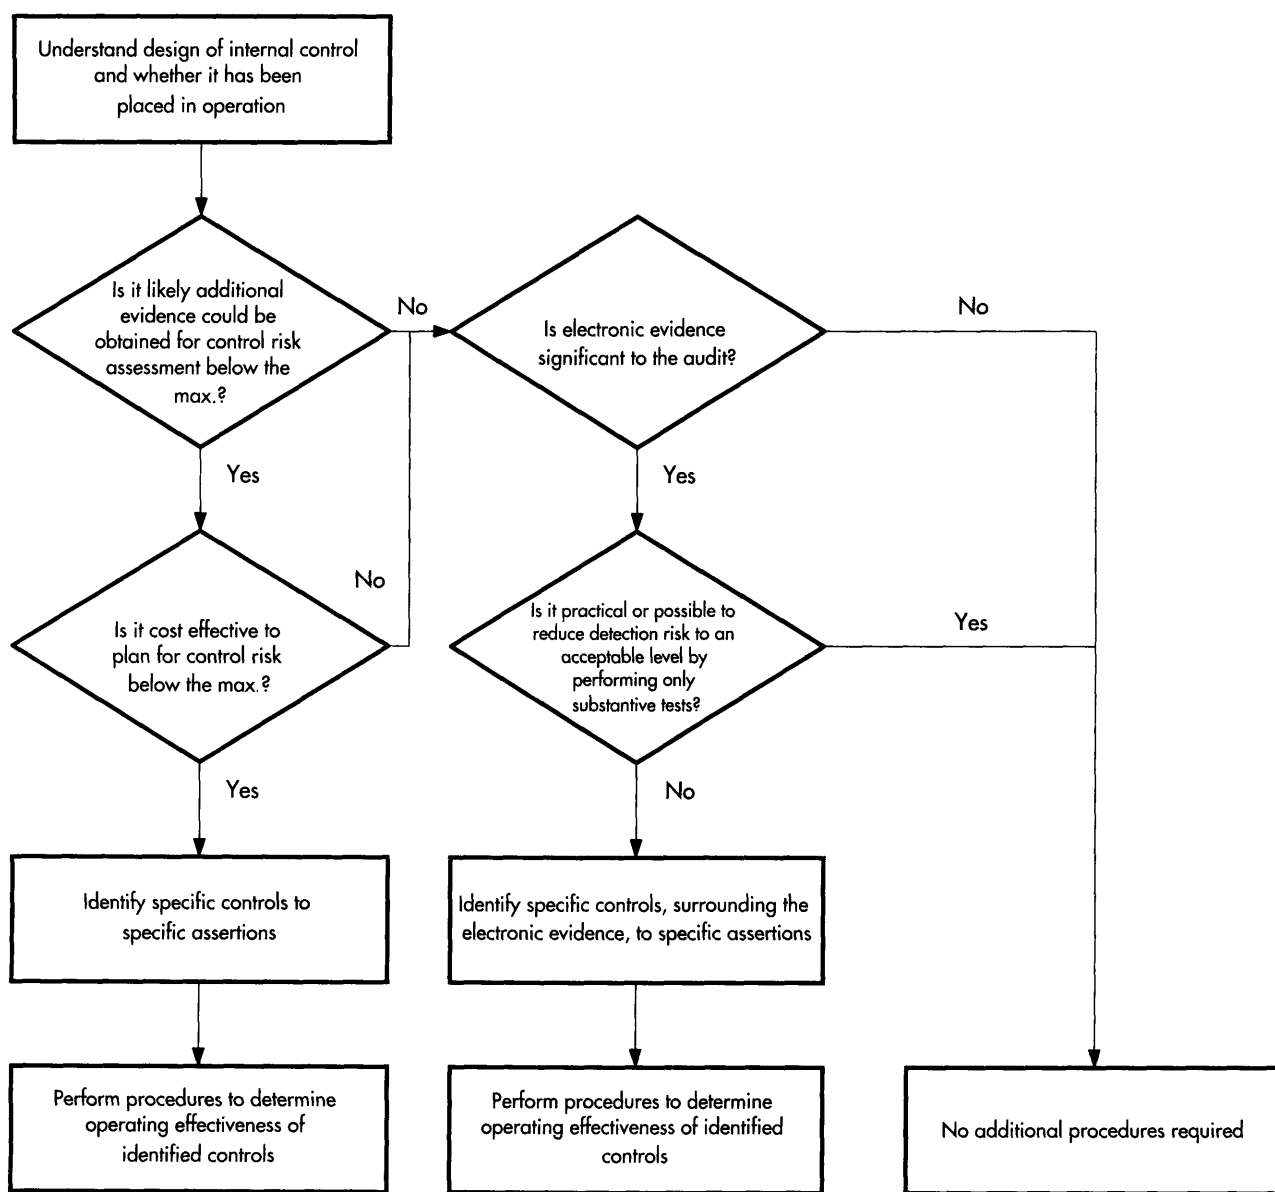

.50 In order to assess control risk below the maximum, the auditor must also:

- Identify specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions, and
- Perform tests of controls to evaluate the effectiveness of such controls.

.51 AAM section 4600 describes in more detail the steps an auditor should take in order to assess control risk below the maximum.

.52 The decision of which audit strategy to pursue is primarily one of audit efficiency. Assessing control risk below the maximum requires the auditor to perform additional procedures to evaluate the effectiveness of controls. However, as a result of assessing control risk below the maximum, the auditor is able to modify his or her substantive tests. In planning the audit, auditors should consider whether the benefits of modifying substantive tests are greater than the costs of performing additional procedures to gauge the effectiveness of controls. Furthermore, as stated above, substantive tests alone may not provide sufficient evidence in environments where electronic evidence is significant, especially when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form.

.53 The following diagram illustrates how an auditor chooses an audit approach.

Lower Control Risk Assessment

Primarily Substantive Approach

[The next page is 3221.]

AAM Section 3130

Establishing an Understanding With the Client and Preparing an Engagement Letter

.01 Statement on Auditing Standards (SAS) No. 83, *Establishing an Understanding With the Client*, as amended by SAS No. 89, *Audit Adjustments* (AU section 310), requires an auditor to gain an understanding with the client regarding the services to be performed for every engagement. The understanding should include the objectives of the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. The understanding could also include matters such as the timing of field work, report deadlines, and methods of fee determination and payment. The engagement partner should annually confirm an understanding of the nature of the engagement before beginning field work. Such understanding will normally include a pre-engagement client conference.

.02 SAS No. 83 requires the understanding with the client to be documented in the workpapers, preferably through a written communication with the client. There are no authoritative pronouncements requiring a written engagement letter for an audit, although most firms regard their completion as good business practice. An engagement letter helps to prevent misunderstandings between the client and the auditor regarding the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client, and in most states it becomes a legally binding contract on both parties. There are other good reasons to obtain an engagement letter, including the following:

- *Reduce the risk of litigation and avoid misunderstandings with the client.* In today's litigious environment an engagement letter is needed for both old and new clients. To avoid misunderstandings, the engagement letter should describe in detail the services to be rendered, the fee, and other terms and conditions of the engagement. Oral agreements may result in differences of recollection or understanding between the accountant and the client.
- *Avoid misunderstandings by the staff.* The members of the staff working on the engagement must have a complete understanding of what is required of them. A copy of the engagement letter in the working papers provides them with an authoritative reference to supplement their oral instructions.

.03 Often, entities that have never been audited resist signing a client representation letter. To avoid client resistance at the end of the audit, many firms notify the client in the engagement letter that they will be asked to sign a client representation letter.

.04 If the auditor has reason to believe the client may publish all or a portion of an audit report, he should advise the client (preferably in the engagement letter) that firm policy is to read printer's proofs of the report and any other accompanying material. This precaution will protect both the client and accountant against condensation of financial statements, omission of footnotes, erroneous layout, and other errors such as misstatement of figures used in a president's letter, other narrative, or statistics.

.05 The understanding with the client should be obtained and the letter should be prepared before any significant work takes place on the engagement. The partner should personally present the letter to the client to ensure that a complete understanding has been achieved. The understanding or a signed copy of the engagement letter should be filed with the engagement's current working papers and permanent file.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. You should always make sure that a final engagement letter is issued in such circumstances.

.06 Should the nature of an engagement change during its progress, or should the firm be engaged for additional services during the year, a new engagement letter should be prepared. A step-down to a compilation or review engagement, or a special engagement for preparing a forecast, are examples of changes that would require a new engagement letter. Such changes should be made by the engagement partner after careful consideration of the reasons justifying the change. For example, the reasons justifying a step-down from an audit to a compilation or review may prevent the firm from reporting on the lower level of service.

Special Considerations

.07 The following matters should be considered while gaining an understanding with the client and while preparing an engagement letter:

- Whether the circumstances preclude an unqualified opinion, as in these examples:
 - The auditor is retained after the beginning of the client's fiscal year, did not observe inventories or confirm receivables at the beginning of the year and was unable to gain satisfaction through application of alternative procedures.
 - The client imposes restrictions on the scope of the audit. (SAS No. 58, *Reports on Audited Financial Statements*, paragraph 42 [AU section 508.42]).
 - Significant litigation or other matters exist which may affect the opinion.
- Whether fee should be stated as a range, in hourly rates, as standard per diem charges for the engagement, or as a maximum or flat fee
- The person or persons to whom reports should be addressed
- The number of copies needed of the report and the people to whom they are to be distributed
- Deadlines for reports or analyses
- Out-of-pocket costs
- Additional work not contemplated in the original engagement
- The condition of records or circumstances other than those contemplated in the engagement letter (for example, deficient internal controls)
- A retainer
- One-time engagements
- Start-up costs when the client changes accountants
- Underwriters' requirements in connection with public offerings
- The part of the work to be done by other accountants

Contents of Engagement Letters

.08 An understanding with the client and an engagement letter regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.
- Management is responsible for making all financial records and related information available to the auditor.
- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
- The auditor is responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.
- An audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, the auditor is responsible for ensuring that the audit committee or others with equivalent authority or responsibility are aware of any reportable conditions which come to his or her attention.
- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

.09 The engagement letter should be addressed to the board of directors, chief executive, or to whomever retained the firm. The engagement partner should sign the letter on behalf of the firm. The client representative responsible for the engagement should sign the letter denoting agreement with the contract. The original letter should be maintained in the engagement documentation. A copy of the letter should be given to the client.

.10 An understanding with the client and an engagement letter may include other matters, such as the following:

- Arrangements regarding the conduct of the engagement (for example, timing, client assistance regarding the preparation of schedules, and the availability of documents). A client-assistance schedule is often prepared as a separate attachment to the engagement letter.
- Arrangements concerning involvement of specialists or internal auditors.
- Arrangements involving a predecessor auditor.
- Arrangements regarding fees and billing. Estimates of fees should be based on conservative, carefully prepared estimates. The expected billing methods and payment periods should be described.
- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators, including the Securities and Exchange Commission, may restrict or prohibit such liability limitation arrangements).

- Conditions under which access to the auditor's documentation may be granted to others.
- Additional services to be provided relating to regulatory requirements.
- Arrangements regarding other services to be provided in connection with the engagement, such as income tax return preparation or consulting services.
- A description of a particular audit procedure, if requested by the client or deemed necessary for the protection of the auditor. (The detailed audit program should not be made available to client personnel, orally or otherwise.)
- The extent and timing of interim auditing procedures.
- The name of the client's personnel to be contacted during the engagement.

.11 Presented below is a list of analyses, schedules and other items that are often requested from the client prior to the start of an audit engagement. The client assistance schedule should be tailored to each specific engagement.

- The general ledger.
- A reconciliation for each bank account.
- A trade accounts receivable aging.
- Accounts receivable confirmation letters, using drafts to be provided by the accountant.
- A schedule of accounts receivable from officers and employees.
- A schedule of bad debts written off during the year.
- A schedule of notes receivable. The notes should be available for inspection.
- A schedule of transactions with affiliated enterprises.
- An inventory listing.
- An analysis of transactions affecting marketable securities.
- An insurance schedule. The policies should be available for inspection.
- A schedule of property and equipment additions and retirements.
- A depreciation schedule.
- A schedule of life insurance for officers.
- A schedule of accounts payable. The creditor's regular monthly statements for [date] should be retained and made available.
- A schedule of notes payable.
- The corporate stock book and minutes should be up to date and available for inspection.
- A schedule of all transactions to partners' capital and drawing accounts.
- A copy of the partnership agreement or corporate charter should be available for inspection.
- Copies of all leases, including equipment rental contracts, should be available for inspection.
- Copies of employment contracts with salesmen or executives should be available for inspection.
- Copies of pension, profit-sharing, deferred compensation, and stock option agreements, and letters of acceptance from the Treasury Department, should be available for inspection.

- A schedule of repairs in excess of \$ _____.
- A schedule of each officer's salary and expense account payments.
- A schedule of contributions.
- A schedule of tax expense.
- A schedule of professional fees.

.12 Following is a list of common engagement letter deficiencies:

- Reference in the letter to audit of the books and records rather than to audit of financial statements
- Adverse comments about other firms
- Failure to specify *in detail* the services to be rendered when a maximum fee is quoted
- Inclusion of a review of internal control as one of the services when what is really intended is a consideration of internal control as required by auditing standards
- Failure to identify accounting or other problems that may have an effect on the opinion
- Failure to change, in writing, the terms of the engagement when conditions are found to be different (such as the inability to express an opinion without extensive additional auditing because internal control was found deficient)
- Failure to include fee basis and payment terms
- Failure to identify subsidiaries
- Failure to identify specific tax returns to be prepared

Investigatory Procedures for Individuals

.13 When credit information is requested about individuals who are new clients, the investigative procedures are subject to the Fair Credit Reporting Act of 1971.

.14 An individual should be informed in writing that an investigative consumer report, including information about the individual's character, general reputation, personal characteristics, and mode of living is being made. The individual should also be advised, within three days of the time the report is requested, that he or she may within a reasonable time, by written request, be furnished disclosure of the nature and scope of the investigation.

Sample Engagement Letters

.15 See AAM section 3175 for sample engagement letters.

.16 An Illustrative Planning Program, documenting procedures listed in this section, is located in AAM section 3165.

[The next page is 3271.]

AAM Section 3140

Assessing Audit Risk and Materiality

General

.01 Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures. The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. Audit risk is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. In other words, audit risk is the risk that the auditor will issue an unqualified opinion on financial statements that are materially incorrect.

.02 Financial statements are **materially** misstated when they contain misstatements whose effect, individually or in the aggregate, are important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles. Materiality is the criterion used by accountants and auditors to distinguish between unimportant and important matters. The auditor's consideration of materiality is a matter of professional judgment and is influenced by a perception of the needs of a reasonable person who will rely on the financial statements. The perceived needs of a reasonable person are recognized in the discussion of materiality in FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, which defines materiality as:

"The omission or misstatement of an item in a financial report is material if, in the light of surrounding circumstances, the magnitude of the item is such that it is probable that the judgment of a reasonable person relying upon the report would have been changed or influenced by the inclusion or correction of the item."

Material Misstatements

.03 Misstatements can result from errors or fraud.¹

The risk that misstatements will occur results generally from weaknesses in internal control, inherent risks in certain transactions and account balances, material and unusual account balances, and the client's history of misstatements.

.04 Because the auditor's opinion is based on the concept of reasonable assurance, auditors cannot guarantee that financial statements are free from material misstatements due to errors and fraud. However, they must exercise due care in planning, performing, and evaluating the results of the audit and must apply the appropriate level of professional skepticism to achieve reasonable assurance that the material errors and fraud will be detected.

.05 In planning auditing procedures, the auditor should also consider the nature, cause (if known), and amount of misstatements that he is aware of from the audit of the prior period's financial statements.

¹ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AU section 317). See AAM section 3150, *Illegal Acts*. For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors or fraud.

Errors and Fraud

.06 The term “errors” refers to unintentional misstatements or omissions of amounts or disclosures in financial statements. Errors may involve—

- Mistakes in gathering or processing information from which financial statements are prepared.
- Unreasonable accounting estimates arising from oversight or misinterpretation of facts.
- Mistakes in the application of accounting principles relating to amount, classification, manner of presentation, or disclosure.

.07 See AAM section 3145 for a discussion on fraud.

.08 When considering the auditor’s responsibility to obtain reasonable assurance that the financial statements are free from material misstatement, there is no important distinction between errors and fraud. There is a distinction, however, in the auditor’s response to detected misstatements. Generally, an isolated, immaterial error in processing accounting information or applying accounting principles is not significant to the audit. In contrast, when fraud is detected, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

Consideration at the Financial Statements Level

.09 The auditor should plan the audit so that audit risk will be limited to a low level that is, in his professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms.

.10 An assessment of the risk of material misstatement (whether caused by error or fraud) should be made during planning. The auditor’s understanding of internal control may heighten or mitigate the auditor’s concern about the risk of material misstatement. The auditor should specifically assess the risk of material misstatement of the financial statements due to fraud (see AAM section 3145). The auditor should consider the effect of these assessments on the overall audit strategy and the expected conduct and scope of the audit.

.11 Whenever the auditor has concluded that there is significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision. Ordinarily, higher risk requires more experienced personnel or more extensive supervision. Higher risk may cause the auditor to expand the extent of procedures applied, apply procedures closer to or as of the balance-sheet date, or modify the nature of procedures.

Materiality

.12 In planning the audit, the auditor should use his or her judgment as to the appropriately low level of audit risk and his or her preliminary judgment about materiality levels in a manner that can be expected to provide, within the inherent limitations of the auditing process, sufficient evidential matter to obtain reasonable assurance about whether the financial statements are free of material misstatement. Materiality levels include an overall level for each financial statement; however, because the statements are interrelated, and for reasons of efficiency, the auditor ordinarily considers materiality for planning purposes in terms of the smallest aggregate level of misstatements that could be considered material to any one of the financial statements. Accordingly, auditors should establish a preliminary materiality threshold for the purpose of planning the appropriate auditing procedures to detect material misstatements in the financial statements.

.13 The auditor plans the audit to obtain reasonable assurance of detecting misstatements that he or she believes could be large enough, individually or in the aggregate, to be quantitatively material to the financial statements. Although the auditor should be alert for misstatements that could be qualitatively material, it ordinarily is not practical to design procedures to detect them. Obviously, some misstatements could be included in the financial statements without precluding the auditor from expressing an opinion that the financial statements are fairly presented in all material respects in conformity with generally accepted accounting principles. In determining the materiality of an item, the auditor should consider the nature and amount of the item in relation to the financial statements being audited.

.14 In some situations, the auditor considers materiality for planning purposes before the financial statements to be audited are prepared. In other situations, planning takes place after the financial statements under audit have been prepared, but the auditor may be aware that they require significant modification. In both types of situations, the auditor's preliminary judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods, as long as recognition is given to the effects of major changes in the entity's circumstances and relevant changes in the economy as a whole or the industry in which the entity operates.

.15 In planning, the auditor cannot anticipate all the factors that will ultimately influence judgment about materiality in the evaluation of audit findings at the completion of the audit. Thus, materiality in planning may differ from materiality used in evaluating results at the conclusion of the audit. If the materiality amount used in evaluating audit findings is reduced significantly from the amount used in planning, the auditor should reevaluate the sufficiency of the auditing procedures that were performed.

Quantifying Materiality

.16 Although no authoritative body has established specific guidelines for materiality, there are certain rules of thumb that can be used in making a preliminary assessment of materiality.

.17 Generally, materiality guidelines should be relative rather than absolute. In other words, materiality is usually set as a percentage rather than as an absolute amount. For example, an absolute amount such as \$100,000 may be immaterial to a large, multinational corporation but very material to a small, closely held company. To apply percentage guidelines, auditors must determine what base to use. Generally, auditors select a base that is relatively stable and predictable. Bases commonly used include income before taxes, revenues, and total assets. Generally, misstatements become material to income before they become material to the balance sheet. As a consequence, net income before taxes is often selected as the base.

.18 In small business audits, auditors sometimes make a number of significant audit adjustments. Thus, income before taxes may vary too much to be useful as a base. When income before taxes is not used as a base, auditors sometimes use either total revenue or an average of net income for several prior periods.

Example

.19 A common rule of thumb for materiality is 5 to 10 percent of pretax income. Some auditors apply this rule of thumb so that items less than 5 percent of normal pretax income are considered immaterial, whereas items that are more than 10 percent are material. For items between 5 and 10 percent, judgment is applied. For example, when unusual factors exist (perhaps the company is about to be sold for a multiple of audited earnings) auditors would tend to classify items between 5 and 10 percent as material. Others use 1 or 1.5 percent of the larger of total assets or revenues. (See Exhibit 1 for a sample planning materiality worksheet.)

Exhibit 1

	<u>Initials</u>	<u>Date</u>
Done		
Reviewed		
Client Name Planning Materiality Worksheet Balance Sheet Date		
1. Unaudited total assets at balance sheet date		
2. Unaudited total revenues at balance sheet date		
3. Select the larger of line 1 or line 2		
4. Select a multiplier if audit risk is normal, or, if better than normal, select .01		
5. Multiply line 3 by line 4		
6. Unaudited pretax income (or equivalent if not a for-profit entity)		
7. Select a multiplier if audit risk is normal, or, if better than normal, select .1		
8. Multiply line 6 by line 7		
9. Evaluate line 5 and line 8 along with other relevant factors and determine materiality for audit planning purposes		
<p>.20 Consideration of which base to use should include such factors as income variability and the nature of the client's business and industry. For a not-for-profit organization, for example, the auditor would probably use total assets or revenues as a base, since pretax income is not meaningful.</p> <p>.21 A sample checklist documenting procedures listed in this section is located in AAM section 3165.</p>		

SEC Staff Bulletin on Materiality for SEC Registrants

.22 The SEC staff has released SAB No. 99, *Materiality*. This SAB addresses the application of materiality thresholds to the preparation and audit of financial statements filed with the SEC. The SAB does not create new standards or definitions for materiality, but reaffirms the concepts of materiality as expressed in the accounting and auditing literature as well as in long-standing case law.

.23 The SAB states that registrants and the auditors of their financial statements should not rely exclusively on quantitative benchmarks to determine whether an item is material to the financial statements. Equally important is a consideration of whether, in light of the surrounding circumstances, a reasonable investor would consider the item to be important. The SAB also states that management should not make intentional immaterial errors in a registrant's financial statements to "manage" earnings. It further reminds registrants of their legal responsibility to make and keep books, records, and accounts that, in reasonable detail, accurately and fairly reflect transactions and the disposition of assets. The SAB reminds auditors of their obligations to inform management and, in some cases, audit committees of illegal acts that come to the auditor's attention. The full text of the SAB can be viewed at the SEC Web site at: www.sec.gov/rules/acctreps/sab99.htm.

Consideration at the Individual Account-Balance or Class-of-Transactions Level

.24 The auditor needs to consider audit risk at the individual account-balance or class-of-transactions level because such consideration directly assists in determining the scope of auditing procedures for the balance or class and related assertions. The auditor should seek to restrict audit risk at the individual balance or class level in such a way that will enable him or her, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk. Auditors use various approaches to accomplish their objective.

.25 In determining the nature, timing, and extent of auditing procedures to be applied to a specific account balance or class of transactions, the auditor should design procedures to obtain reasonable assurance of detecting misstatements that he or she believes, based on the preliminary judgment about materiality, could be material, when aggregated with misstatements in other balances or classes, to the financial statements, taken as a whole. Auditors use various methods to design procedures to detect such misstatements. In some cases, auditors explicitly estimate, for planning purposes, the maximum amount of misstatements in the balance or class, that, when combined with misstatements in other balances or classes, could exist without causing the financial statements to be materially misstated. In other cases, auditors relate their preliminary judgment about materiality to a specific account balance or class of transactions without explicitly estimating such misstatements.

Components of Risk

.26 At the account-balance or class-of-transaction level, audit risk consists of:

- a. The risk (consisting of inherent risk and control risk) that the balance or class and related assertions contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other balances or classes, and
- b. The risk (detection risk) that the auditor will not detect such misstatements.

The way the auditor considers these component risks and combines them involves professional judgment and depends on the audit approach.

.27 **Inherent risk** is the susceptibility of an assertion to a material misstatement, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related balances or classes than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates pose greater risks than do accounts consisting of relatively routine, factual data. External factors also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those factors that are peculiar to a specific assertion for an account balance or a class of transactions, factors that relate to several or all of the balances or classes may influence the inherent risk related to an assertion for a specific balance or class. These later factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.28 **Control risk** is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.29 **Detection risk** is the risk that the auditor will not detect a material misstatement that exists in an assertion. Detection risk is a function of the effectiveness of an auditing procedure and of its application

by the auditor. It arises partly from uncertainties that exist when the auditor does not examine 100 percent of an account balance or a class of transactions and partly because of other uncertainties that exist even if he were to examine 100 percent of the balance or class. Such other uncertainties arise because an auditor might select an inappropriate auditing procedure, misapply an appropriate procedure, or misinterpret the audit results. These other uncertainties can be reduced to a negligible level through adequate planning and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards.

.30 Inherent risk and control risk differ from detection risk in that they exist independently of the audit of financial statements. Inherent risk and control risk are functions of the client and its environment, regardless of whether an audit is conducted. Detection risk, on the other hand, relates to the auditor's procedures and can be changed at the auditor's discretion. These components of audit risk may be assessed in quantitative terms such as percentages or in nonquantitative terms that range, for example, from a minimum to a maximum (e.g., low, moderate, high).

Risk Assessment

.31 The process of assessing risk is aimed at evaluating the risk of the financial statements being materially misstated. During planning, the auditor considers numerous factors—risk at the financial statement level and at the account-balance and class-of-transaction level, inherent risk, control risk, materiality, risk of material misstatement due to fraud, preliminary analytical review, and other matters as appropriate and in accordance with his or her judgment. An audit strategy is devised and carried out. Reliance on and testing of internal control may or may not be a part of that strategy. Based on the outcome of any internal control testing, the nature, timing and extent of substantive tests are reassessed and possibly changed. Substantive tests are performed. At the end of the audit, the auditor considers the audit procedures performed and their results and evaluates the chance that material misstatements have gone undetected by his or her audit procedures. Generally, in an audit that is adequately planned and performed, the auditor will be able to conclude that the risk of the financial statements being materially misstated is acceptably low enough for an unqualified opinion to be issued.

.32 The auditor might make separate or combined assessments of inherent risk and control risk. If the auditor considers inherent risk or control risk, separately or in combination, to be less than the maximum, he should have an appropriate basis for these assessments. This basis may be obtained, for example, through the use of questionnaires, checklists, instructions, or similar generalized materials and, in the case of control risk, the understanding of internal control and the performance of suitable tests of controls. However, professional judgment is required in interpreting, adapting, or expanding such generalized material as appropriate in the circumstances.

.33 In planning the audit engagement, the auditor should assess inherent risk and control risk to determine how much detection risk can be accepted while still restricting audit risk to an acceptably low level. As the auditor's assessment of inherent risk and control risk decreases, the acceptable level of detection risk increases. The auditor should not rely on the assessments of inherent risk and control risk to the exclusion of performing substantive tests. In fact, for a small business with limited segregation of duties, the auditor often assesses inherent risk and control risk at their maximum and relies completely on substantive tests to reduce audit risk to an acceptably low level.

Quantifying Risk

.34 The auditor's assessment of risk and its components of inherent risk, control risk, and detection risk are matters of professional judgment. The types of risk discussed above are difficult to quantify, given their subjective nature. Most auditors use ratings such as low, moderate, or high when judging risk levels.

.35 Generally accepted auditing standards do not require the auditor to quantify risks. Those standards require the auditor to plan the audit so that there is a low level of risk that an unqualified opinion will be expressed when the financial statements are materially misstated.

Evaluating Audit Findings

.36 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, the auditor should consider the effects, both individually and in the aggregate, of misstatements that are not corrected by the entity. In evaluating the effects of misstatements, the auditor should include both qualitative and quantitative considerations (see SAS No. 47 [AU section 312.08–.11]). The consideration and aggregation of misstatements should include the auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined (hereafter referred to as likely misstatements,² see AAM section 3140.37–.40, below), not just the amount of misstatements specifically identified, (hereafter referred to as known misstatements, see AAM section 3140.41, below). Likely misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole. Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material.

Likely Misstatements

.37 The auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined is referred to as "likely misstatements."

.38 When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she ordinarily would not specifically identify misstatements but would only obtain an indication of whether a misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor ordinarily would have to employ other procedures to enable him to estimate the likely misstatement in the balance or class.

.39 When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. For example, if a \$1,000 loan receivable misstatement is found in a sample of 10 percent of the population, the projected misstatement would be \$10,000. That projected misstatement also contributes to the auditor's assessment of likely misstatement.

.40 When auditing accounting estimates (e.g., allowance for inventory obsolescence, allowance for doubtful accounts, warranty obligations, etc.) the audit evidence gathered may support an amount for an estimate different from the amount the client has recorded. That difference may be considered reasonable by the auditor inasmuch as no one accounting estimate can be considered accurate with certainty. In that case, the difference between the estimate that the audit evidence supports and the estimate recorded in the financial statements would not be considered a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

Known Misstatements

.41 "Known misstatements" are those for which the amount of the error is relatively certain. Such misstatements are often supported by highly reliable evidence, such as third-party documents. An example of a known misstatement would be a failure to record an invoice for repairs expense.

² The term *likely misstatements* includes any known misstatements.

Misstatements From the Prior Year

.42 Often overlooked is the consideration of misstatements detected in the prior year that affect the current year. For example, assume last year's aggregation of uncorrected misstatements included an item representing an overstatement of prepaid insurance and an understatement of insurance expense. This item would be included in the current year's aggregation of uncorrected misstatements because it affects the current year's insurance expense. Therefore, the prior year's aggregation of uncorrected misstatements should be reviewed for any items that may have an effect on the current year's financial statements.

Summarizing and Evaluating Misstatements

.43 Most firms prepare a summary of the uncorrected misstatements identified during the audit. This summary may be called the "Summary of Misstatements," or the "Summary of Possible Journal Entries," or other names. The summary presents known, likely, and prior period misstatements separately. The summary is used in evaluating the effect of uncorrected misstatements on the financial statements at the end of the audit.

.44 Some firms establish a predetermined dollar threshold below which misstatements need not be accumulated. This amount should be set so that any such misstatements, either individually, or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

.45 Concluding on the effect of misstatements on the financial statements is a matter of judgment and generally involves considering the nature of the misstatements, overall materiality, and their impact on the financial statements taken as a whole.

.46 If the auditor concludes, based on the accumulation of sufficient evidential matter, that the effects of likely misstatements, individual or in the aggregate, causes the financial statements to be materially misstated, the auditor should request management to eliminate the misstatement. If the material misstatement is not eliminated, the auditor should issue a qualified or an adverse opinion on the financial statements.

Audit Documentation

.47 SAS No. 96, *Audit Documentation* (AU section 339), amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312.40). This amendment adds a requirement to SAS No. 47 (AU section 312) to document the nature and effect of misstatements that the auditor aggregates as well as the auditor's conclusion as to whether the aggregated misstatements cause the financial statements to be materially misstated.

AAM Section 3145

Fraud

General

In October 2002, the Auditing Standards Board issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AU section 316), which supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU section 316A), and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AU section 230). SAS No. 99 establishes standards and provides guidance to auditors in fulfilling their responsibility as it relates to fraud in an audit of financial statements conducted in accordance with generally accepted auditing standards. It does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. However, the statement does establish standards and provide guidance to auditors fulfilling that responsibility, as it relates to fraud. Practitioners should also be aware that the AICPA has published a Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*, to assist auditors in applying the new SAS.

.01 SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor*, as amended by SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AU section 110), states that "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud." Management is responsible for the design and implementation of programs and controls to prevent, deter, and detect fraud. That responsibility is described in paragraph 3 of SAS No. 1, section 110 (AU section 110.03).

.02 An auditor's responsibilities relating to fraud are stated within the context of materiality to the financial statements taken as a whole. An auditor is not responsible for detecting fraud per se, but for obtaining reasonable assurances that material misstatements due to fraud are detected. An auditor is not responsible for detecting immaterial misstatements caused by fraud. SAS No. 99 (AU section 316.03), describes the auditor's consideration of fraud as something that should be integrated into the overall audit process. SAS No. 99 (AU section 316) describes a process in which the auditor:

- Exercises professional skepticism
- Discusses the risks of material misstatements due to fraud with engagement personnel
- Gathers information needed to identify risks of material misstatement due to fraud
- Identifies risks that may result in a material misstatement due to fraud
- Assesses the identified risks after taking into account an evaluation of the entity's programs and controls that address the risks
- Responds to the results of the assessment
- Evaluates audit evidence
- Communicates about fraud to management, the audit committee, and others
- Documents the auditor's consideration of fraud

.03 Even though some requirements and guidance set forth in SAS No. 99 are presented in a manner that suggests a sequential audit process, auditing in fact involves a continuous process of gathering, updating, and

analyzing information throughout the audit. Accordingly, the sequence of the requirements and guidance in SAS No. 99 may be implemented differently among audit engagements.

Description and Characteristics of Fraud

.04 The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. SAS No. 99 defines fraud as an intentional act that results in a material misstatement in financial statements that are the subject of an audit.

.05 Three conditions generally are present when fraud occurs. First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Second, circumstances exist that provide an opportunity for a fraud to be perpetrated. Third, those involved are able to rationalize committing a fraudulent act.

Misstatements Arising From Fraudulent Financial Reporting

.06 Misstatements arising from fraudulent financial reporting are intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve acts such as the following:

- Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared.
- Misrepresentation in, or intentional omission from, the financial statement of events, transactions, or other significant information.
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure.

Misstatements Arising From Misappropriation of Assets

.07 Misstatements arising from misappropriation of assets involve the theft of an entity's assets where the effect of the theft causes the financial statement not to be presented, in all material respects, in conformity with generally accepted accounting principles. Misappropriation can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services not received. Misappropriation of assets may be accomplished by false or misleading records or documents, possibly created by circumventing controls, and may involve one or more individuals among management, employees, or third parties.

The Importance of Exercising Professional Skepticism

.08 Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence, and requires an ongoing assessment of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.09 SAS No. 99 requires that members of the audit team discuss the potential for material misstatement due to fraud prior to or in conjunction with his or her information-gathering procedures. The discussion should include:

- An exchange of ideas or “brainstorming” among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity’s financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated.
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud.

.10 Communication among the audit team members about the risks of material misstatement due to fraud should continue throughout the audit. See paragraphs 14 through 18 of SAS No. 99 (AU section 316.14–.18), for further guidance.

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.11 In obtaining knowledge about the entity’s business and the industry in which it operates, information may come to the auditor’s attention that should be considered in identifying risks of material misstatements due to fraud. The auditor should perform procedures to obtain information that is used to identify the risks of material misstatement due to fraud, including:

- Making inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed.
- Considering any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit.
- Considering whether one or more fraud risk factors exist.
- Considering other information that may be helpful in identifying risks of material misstatement due to fraud.

See paragraphs 19 through 34 of SAS No. 99 (AU section 316.19–.34) for further guidance.

.12 Although fraud usually is concealed and management’s intent is difficult to determine, the presence of certain risk factors or other conditions may suggest to the possibility that fraud may exist. However, these conditions may be the result of circumstances other than fraud.

.13 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or error. Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify “fraud risk factors” that do not necessarily indicate the existence of fraud, but often are present in circumstances where fraud exists. A fraud risk factor is an event or condition that indicates:

- An incentive or pressure to perpetrate fraud
- Opportunities to carry out the fraud
- Attitudes or rationalizations to justify a fraudulent action

Identifying Risks That May Result in a Material Misstatement Due to Fraud

.14 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered in the context of the three conditions present when a material misstatement

due to fraud occurs—that is, incentives/pressures, opportunities, and attitudes/rationalizations. However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks.

.15 The identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including:

- The type of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets.
- The significance of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements.
- The likelihood of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements.
- The pervasiveness of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions.

.16 SAS No. 99 identifies two new requirements for identifying risks that may result in a material misstatement due to fraud. The auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. In addition, the risk of management override of controls should be considered a fraud risk on every audit.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.17 As part of the understanding of internal control sufficient to plan the audit required by SAS No. 55 (AU section 319), the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation, and assess those risks taking into account that evaluation.

Responding to the Results of the Assessments

.18 The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence and is influenced by the nature and significance of the risks identified as being present and the entity's programs and controls that address these identified risks. The auditor's response can be (1) an overall response on how the audit is conducted, (2) a response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed, or (3) a response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur.

.19 The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action.

Overall Responses to the Risk of Material Misstatement

.20 Judgements about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

- *Assignment of personnel and supervision.* The knowledge, skill, and ability of personnel assigned significant engagement responsibility should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud.
- *Accounting principles.* The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.
- *Predictability of auditing procedures.* The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.

Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.21 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending on upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures. See paragraphs 52 through 56 of SAS No. 99 (AU section 316.52–.56) for more guidance.

Responses to Further Address the Risk of Management Override of Controls

.22 Management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. Accordingly, in addition to overall responses and responses that address specifically identified risks of material misstatement due to fraud, certain procedures should be performed to further address the risk of management override of controls, as discussed in paragraphs 58 through 67 of SAS No. 99 (AU section 316.58–.67).

Evaluating Audit Evidence

.23 The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. The auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatements due to fraud. The auditor also should evaluate whether analytical procedure that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.

.24 At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud made earlier in the audit. Such an evaluation may provide further insight into the risk of material misstatement due to fraud and whether there is a need for additional or different audit procedures to be performed.

.25 If audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. If the auditor has determined that misstatements are or may be the result of fraud, but the effect of the misstatements is not material, the auditor nevertheless should evaluate the implications, especially those dealing with the organizational position of the person(s)

involved. If the matter involves higher-level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management. In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (a) the nature, timing, and extent of the tests of balances or transactions and (b) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

.26 If the auditor believes that the misstatement is, or may be, the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

- Attempt to obtain additional evidential matter to determine whether material fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report thereon.
- Discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and the audit committee.
- Consider the implications for other aspects of the audit.
- If appropriate, suggest that the client consult with legal counsel.

.27 The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to the audit committee or others with equivalent authority and responsibility. Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (a) the implications about the integrity of management and (b) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not always possible to definitely describe when withdrawal is appropriate. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

Communicating About Possible Fraud to Management, the Audit Committee, and Others

Note: A *Fraud Communication Checklist* is provided at the end of the "General Procedures" program in AAM section 5400.20 to help auditors comply with their responsibilities to report fraud to management, the audit committee, and others.

.28 If the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee. In addition, the auditor should reach an understanding with the audit committee regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower-level employees.

.29 If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected) the auditor should consider whether these risks represent reportable conditions relating to the entity's internal control that should be communicated to senior management and the audit committee. Also the auditor should consider whether the absence

of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud represent reportable conditions that should be communicated to senior management and the audit committee.

.30 The auditor should recognize that in the following circumstances a duty to disclose outside the entity may exist:

- To comply with certain legal and regulatory requirements.
- To a successor auditor when the successor makes inquiries in accordance with SAS No. 84, *Communications Between Predecessor and Successor Auditors* (AU section 315).
- In response to a subpoena.
- To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters of fraud or possible fraud with parties outside the client.

Documenting the Auditor's Consideration of Fraud

.31 The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud
- Specific risks of material misstatement due to fraud that were identified, and a description of the auditor's response to those risks
- If the auditor has not identified in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion
- The results of the procedures performed to further address the risk of management override of controls
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions
- The nature of the communications about fraud made to management, the audit committee, and others

Using the AICPA Audit and Accounting Manual in Considering Fraud

.32 An auditor should complete the Illustrative Planning Program at AAM section 3165. That program includes steps that consider the presence of fraud risk factors, the assessment of material misstatement due to fraud, developing audit responses, and other matters related to a consideration of fraud in a financial statement audit. Included at the end of the program is a *Fraud Risk Factor Memory Jogger*, that (although its completion is not required) is helpful in identifying fraud risk factors and complying with the requirements of SAS No. 99 (AU section 316).

.33 The audit programs in AAM section 5400 require an auditor to consider the fraud risk assessment and to develop and document any additional audit procedures that may be needed. Referencing between

the planning program and memory jogger at AAM section 3165 and the audit programs at AAM section 5400 will help to ensure that identified risks related to fraud are appropriately addressed.

.34 The "General Procedures" program at AAM section 5400 includes steps to evaluate the results of audit tests as they relate to fraud. Steps are also included to communicate fraud-related matters to the appropriate people. A *Fraud Communication Checklist* is presented at the end of the "General Procedures" program [AAM section 5400.20] to help auditors comply with their communication responsibilities concerning fraud.

[The next page is 3301.]

AAM Section 3150

Illegal Acts

General Comments

.01 The term “illegal acts” refers to violations of laws or governmental regulations. Illegal acts by clients do not include personal misconduct by the entity’s personnel unrelated to their business activities.

.02 Whether an act is illegal is a determination that is normally beyond the auditor’s professional competence. The auditor’s training and experience may provide a basis for recognition that some client acts coming to his or her attention may be illegal.

Direct and Material Effect Illegal Acts

.03 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies). For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

.04 The auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statement assertions rather than from the perspective of legality *per se*.

.05 The auditor’s responsibility to detect and report misstatement resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for errors or fraud. (See SAS No. 47, *Audit Risk and Materiality in Conducting an Audit*, as amended (AU section 312).) That is, the auditor should design the audit to provide reasonable assurance that financial statement amounts are free from material misstatement resulting from these direct-effect illegal acts.

Other Illegal Acts

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity’s operating aspects than to its financial and accounting aspects and their financial statement effect is indirect.

.07 An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. An audit conducted in accordance with GAAS normally does not include audit procedures specifically designed to detect illegal acts having an indirect effect on financial statements.

Engagement Planning Procedures

.08 The auditor should assess the risks that the entity has not complied with laws and regulations which have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies) in the planning phase of the audit.

.09 Matters that may influence the auditor's assessment include:

- a. Management's understanding of the requirements of laws and regulations pertinent to audit objectives.
- b. The nature and extent of noncompliance noted in prior audits.
- c. Changes in requirements since the last audit.
- d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations.
- e. The client's policy relative to the prevention of illegal acts.

.10 Normally, there is no need to include audit procedures specifically designed to detect illegal acts. However, if the auditor becomes aware of information that raises suspicions, he or she is obligated to apply additional procedures to determine whether an illegal act has, in fact, occurred.

.11 A sample program documenting the procedures listed in this section is located in AAM section 3165.

[The next page is 3331.]

AAM Section 3155

Analytical Procedures

General Comments

.01 Analytical procedures are a natural extension of the auditor's understanding of the client's business, and add to his or her understanding because the key factors that influence the client's business may be expected to affect the client's financial information. Analytical procedures are used in all three stages of the audit. In the planning stage, the purpose of analytical procedures is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain evidential matter for specific account balances or classes of transactions.¹ In the substantive testing stage of the audit, the purpose of analytical procedures is to obtain evidence, sometimes in combination with other substantive procedures, to identify misstatements in account balances and thus to reduce the risk that misstatements will remain undetected.² In the overall review stage, the objective of analytical procedures is to assist the auditor in assessing the conclusions reached and in evaluating the overall financial statement presentation. In all cases, the effectiveness of analytical procedures lies in developing expectations that can reasonably be expected to identify unexpected relationships.

.02 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

Analytical procedures should be applied to some extent for the purposes referred to in the planning stage and the overall review stage above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

Analytical Procedures

.03 Analytical procedures are defined by SAS No. 56 (AU section 329.02), as amended, as "evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. . . . A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of conditions to the contrary." The definition implies several key concepts.

- The "evaluations of financial information" suggests that analytical procedures will be used to understand or test financial statement relationships or balances.
- The "study of plausible relationships" implies an understanding of what can reasonably be expected and involves a comparison of the recorded book values with an auditor's expectations.

¹ Analytical procedures in the planning stage of the audit may also be useful in understanding the client's business. In understanding the business, auditors can use the results from analytical procedures to assess auditors' business risk (refer to SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312)).

² The auditors' use of substantive tests to achieve an audit objective related to a particular assertion may be supported by test of details, analytical procedures, or a combination. The decision about which tests to use to reduce the risk that a material misstatement will not be detected is based on the auditor's judgment about the expected effectiveness and efficiency of the available procedures (cost/benefit).

- “Relationships among both financial and nonfinancial data” suggests that both types of data can be useful in understanding the relationships of the financial information and, therefore, in forming an expectation.

.04 Analytical procedures performed in the planning stage are used to identify unusual changes in the financial statements, or the absence of expected changes, and specific risks. During the planning stage, analytical procedures are usually focused on account balances aggregated at the financial statement level and relationships between account balances.

.05 Analytical procedures performed during the overall review stage are designed to assist the auditor in assessing that (a) all significant fluctuations and other unusual items have been adequately explained and (b) the overall financial statement presentation makes sense based on the audit results and the auditor’s knowledge of the business.

.06 During the substantive testing stage, analytical procedures are performed to obtain assurance that material misstatements are not likely to exist in financial statement account balances. To do this, the auditor focuses his or her analytical procedures on particular assertions about account balances and gives detailed attention to the underlying factors that affect those account balances through the development of an expectation independent of the recorded balance. Therefore, substantive analytical procedures generally are performed with more rigor and precision than those used for planning or overall review.

Analytical Procedure Process: Four Phases

.07 The use of analytical procedures can be considered a process that consists of four phases. The first phase is the expectation-formation process. In this phase, the auditor forms an expectation of an account balance or financial relationship. In doing so, the auditor determines the precision of the expectation and thus, in part, the effectiveness of the analytical procedure.

.08 The remaining three phases consist of the identification, investigation, and evaluation of the difference between the auditor’s expected value and the recorded book value in light of the auditor’s materiality assessment. In the second phase, identification, the auditor identifies whether an unusual fluctuation exists between the expected and recorded amounts. In the third, investigation, the auditor investigates the cause of unexpected differences by considering possible causes and searching for information to identify the most probable causes. Finally, in the evaluation phase, the auditor evaluates the likelihood of material misstatement and determines the nature and extent of any additional auditing procedures that may be required.

Expectation Formation (Phase I)

.09 Forming an expectation is the most important phase of the analytical procedure process. The more precise the expectation (that is, the closer the auditor’s expectation is to the correct balance or relationship), the more effective the procedure will be at identifying potential misstatements. Also, SAS No. 56 (AU section 329) requires the auditor to form an expectation whenever he or she applies analytical procedures.

.10 The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor’s understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

- a. Financial information for comparable prior period(s) giving consideration to known changes.
- b. Anticipated results—for example, budgets or forecasts including extrapolations from interim or annual data.
- c. Relationships among elements of financial information within the period.

- d. Information regarding the industry in which the client operates—for example, gross margin information.
- e. Relationships of financial information with relevant nonfinancial information.

.11 The effectiveness of an analytical procedure is a function of three factors related to the precision with which the expectation is developed: (a) the nature of the account or assertion, (b) the reliability and other characteristics of the data, and (c) the inherent precision of the expectation method used.

Identification and Investigation (Phases II and III)

.12 The next two phases of the analytical procedure process consist of identification and investigation. Identification begins by comparing the auditor's expected value with the recorded amount. Given that the auditor developed an expectation with a particular materiality threshold in mind, he or she then compares the unexpected differences with the threshold. In substantive testing, an auditor testing for the possible misstatement of the book value of an account determines whether the audit difference was less than the auditor's materiality threshold. If the difference is less than the acceptable threshold, taking into consideration the desired level of assurance from the procedure, the auditor accepts the book value without further investigation. If the difference is greater, the next step is to investigate the difference.

.13 In investigation, the auditor considers possible explanations for the difference. The greater the precision of the expectation (that is, the closer the expectation is to the correct amount) the greater the likelihood that the difference between the expected and recorded amounts is due to misstatement rather than nonmisstatement causes. The difference between an auditor's expectation and the recorded book value of an account (value of an account not subject to auditing procedures) can be due to any or all of the following three causes: (a) the difference is due to misstatements, (b) the difference is due to inherent factors that affect the account being audited (for example, the predictability of the account or account subjectivity), and (c) the difference is due to factors related to the reliability of data used to develop the expectation (for example, data that have been subject to auditing procedures versus data that have not been subject to auditing procedures). The greater the precision of the expectation, the more likely the difference between the auditor's expectation and the recorded value will be due to misstatements (cause a). Conversely, the less precise the expectation, the more likely the difference is due to factors related to the precision of the expectation (causes b and c).

Evaluation (Phase IV)

.14 The final phase of the analytical procedure process consists of evaluating the difference between the auditor's expected value and the recorded amount. It is usually not practicable to identify factors that explain the exact amount of a difference identified for investigation. However, the auditor should attempt to quantify that portion of the difference for which plausible explanations can be obtained and, where appropriate, corroborated and determine that the amount that cannot be explained is sufficiently small to enable him or her to conclude on the absence of material misstatement.

.15 If a reasonable explanation can not be obtained, SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312.34), as amended, requires the auditor to "consider the effects, both individually and in the aggregate, of misstatements that are not corrected by the entity." The auditor should include both qualitative and quantitative considerations in evaluating the effects of misstatements. The consideration and aggregation of misstatements should include the auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined (likely misstatements), not just the amount of misstatements specifically identified (known misstatements). Likely misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.

Engagement Planning Procedures

.16 As stated above, the purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain evidential matter for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (a) enhancing the auditor's understanding of the clients' business and the transactions and events that have occurred since the last audit date, and (b) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events, and amounts, ratios and trends that might indicate matters that have financial statement and audit planning ramifications.

.17 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

.18 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant non-financial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

.19 An illustrative program documenting procedures listed in this section is located in AAM section 3165.

Audit Documentation Requirements

.20 SAS No. 96, *Audit Documentation* (AU section 339), amends SAS No. 56, *Analytical Procedures* (AU section 329), by adding an audit documentation requirement with respect to substantive analytical procedures. When an analytical procedure is used as the principal substantive test of a significant financial statement assertion the auditor should document all of the following:

- The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development.
- Results of the comparison of the expectation to the recorded amounts or ratios developed from the recorded amounts.
- Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures.

Analytical Procedures Audit Guide

.21 For additional guidance practitioners should refer to the AICPA Audit Guide *Analytical Procedures*. The Guide provides practical guidance for auditors on the effective use of analytical procedures. Specifically, the Audit Guide includes a discussion of SAS No. 56 (AU section 329); concepts and definitions; a series of questions and answers, grouped in the following five categories: precision of the expectation, relationship of analytical procedures to the audit risk model, evaluation and investigation, purpose of analytical procedures, and fraud; and a case study illustrating the four types of expectation methods discussed in chapter 1 of the Guide: trend analysis, ratio analysis, reasonableness testing, and regression analysis.

.22 The Audit Guide also includes illustrations that demonstrate the importance of forming expectations and considering the precision of the expectation, two of the most misunderstood concepts from SAS No. 56 (AU section 329). The concepts discussed are applicable for all three stages of the audit (planning, substantive testing, and review). However, the Audit Guide focuses principally on how the concepts are applied to substantive testing because in designing substantive procedures, auditors ordinarily desire a specified level of audit assurance. To obtain the Audit Guide, call the AICPA order department at 888-777-7077.

AAM Section 3165

Illustrative Planning Program

	<i>Done by (or "N/A")</i>	<i>Date</i>	<i>W/P Ref.*</i>
.01 A. Understanding the Assignment			
1. Consider the following matters in planning the engagement:			
a. The entity's accounting policies and procedures.	_____	_____	_____
b. Financial statement items likely to require adjustment.	_____	_____	_____
c. The nature of reports expected to be rendered (for example, a report on consolidated or consolidating financial statements, reports on financial statements filed with the SEC, or special reports such as those on compliance with contractual provisions).	_____	_____	_____
2. In planning the audit:			
a. Discuss the type, scope, and timing of the audit with the entity's management, board of directors, or audit committee.	_____	_____	_____
b. Consider the effects of applicable accounting and auditing pronouncements, particularly new ones.	_____	_____	_____
c. Coordinate the assistance of entity personnel in information preparation.	_____	_____	_____
d. Determine the extent of involvement, if any, of consultants, other independent auditors, specialists, and internal auditors.	_____	_____	_____
e. Read reports and related correspondence of internal audit staff (if any) and consider the possible effect of internal audit work and findings on scope of the audit.	_____	_____	_____
3. Discuss the following matters (and others as appropriate) with client personnel:			
a. Changes in key personnel.	_____	_____	_____
b. Significant accounting or reporting problems.	_____	_____	_____
c. Changes in accounting methods or accounting principles.	_____	_____	_____
d. Principle findings of internal auditors.	_____	_____	_____
e. Changes in information processing methods or technology.	_____	_____	_____
f. Disposition of prior year's management letter points.	_____	_____	_____

* As applicable

	<i>Done by (or "N/A")</i>	<i>Date</i>	<i>W/P Ref.*</i>
g. Closing information to be prepared, such as closing journal entries and post-closing trial balance.	_____	_____	_____
h. Timing of preliminary audit work, inventory observation, confirmation procedures, final audit work.	_____	_____	_____
i. Adequacy of working space for the audit team.	_____	_____	_____
j. Access to client records.	_____	_____	_____
k. Assistance to be provided by client personnel.	_____	_____	_____

.02 B. Assigning Personnel to the Engagement

1. Prepare a time budget by audit area for the engagement to determine manpower requirements and to schedule fieldwork.	_____	_____	_____
2. Have the engagement partner approve the time budget prior to the beginning of fieldwork.	_____	_____	_____
3. Consider the following factors in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:			
a. Engagement size and complexity.	_____	_____	_____
b. Personnel availability.	_____	_____	_____
c. Special expertise required.	_____	_____	_____
d. Timing of the work performed.	_____	_____	_____
e. Continuity and periodic rotation of personnel.	_____	_____	_____
f. Opportunities for on-the-job training.	_____	_____	_____
4. Have the scheduling and staffing of the engagement approved by the partner with final responsibility for the engagement, so that the partner can consider the qualifications, experience, and training of personnel to be assigned.	_____	_____	_____

.03 C. Independence

1. If acting as principal auditor, obtain written confirmation of the independence of other firms engaged to perform segments of the audit.	_____	_____	_____
2. Review annual independence questionnaires for all engagement personnel to assure that those individuals assigned to the engagement are independent.	_____	_____	_____
3. Review accounts receivable from the client to ascertain whether any outstanding amounts take on some of the characteristics of loans and may, therefore, impair the firm's independence.	_____	_____	_____

* As applicable.

	<i>Done by (or "N/A")</i>	<i>Date</i>	<i>W/P Ref.*</i>
4. In situations in which the firm is not independent, discuss the issuance of a disclaimer of opinion in accordance with Statement on Auditing Standards (SAS) No. 26, <i>Association With Financial Statements</i> , paragraphs 8–10 (AU section 504.08–.10).	_____	_____	_____
5. Evaluate the scope of other services being performed for the client, such as nonattest services, which may impair the firm's independence.	_____	_____	_____
.04 D. Knowledge of the Entity's Business			
1. Obtain an initial, overall understanding of the clients' operations by—			
a. Reviewing the prior years' working papers, permanent file, auditor's report, and financial statements.	_____	_____	_____
b. Reviewing any interim financial statements or reports for the current year, including filings with regulatory agencies; or, if such statement or reports have not been prepared, by scanning the general ledger (or trial balance) to determine whether the amounts and relationships appear reasonable in comparison with the prior years.	_____	_____	_____
c. Reviewing most recent management letters.	_____	_____	_____
d. Reviewing the client correspondence file.	_____	_____	_____
e. Obtaining copies of the minutes of meetings of stockholders, the board of directors, and relevant committees.	_____	_____	_____
f. Considering possible impact of nonaudit services rendered to client on the audit.	_____	_____	_____
2. Discuss the following matters with management:			
a. Changes in operations, including planned changes.	_____	_____	_____
b. Significant legal matters and contingencies.	_____	_____	_____
3. Obtain an understanding of the effect of laws, regulations, and ordinances having a direct and material effect on the financial statements, and if necessary prepare a list of such laws for the workpapers.	_____	_____	_____
4. Obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics such as the following:			
a. The type of business.	_____	_____	_____
b. Types of products and services.	_____	_____	_____
c. Capital structure.	_____	_____	_____
d. Related parties.	_____	_____	_____

* As applicable.

	<u>Done by (or "N/A")</u>	<u>Date</u>	<u>W/P Ref.*</u>
e. Locations.	_____	_____	_____
f. Production.	_____	_____	_____
g. Distribution methods.	_____	_____	_____
h. Compensation methods.	_____	_____	_____
5. Obtain a knowledge of matters affecting the industry in which the entity operates, such as the following:			
a. Economic conditions.	_____	_____	_____
b. Government regulations.	_____	_____	_____
c. Changes in technology.	_____	_____	_____
d. Accounting practices common to the industry.	_____	_____	_____
e. Competitive conditions.	_____	_____	_____
f. Financial trends and ratios.	_____	_____	_____
6. Obtain an understanding of the potential environmental remediation liabilities to which the client may be exposed. Gaining knowledge of the following matters will help provide that understanding:			
• The industry or industries in which the client operates.	_____	_____	_____
• The types of products or services provided by the client.	_____	_____	_____
• The number and characteristics of the client's locations.	_____	_____	_____
• Applicable governmental regulations.	_____	_____	_____
• Production and distribution processes.	_____	_____	_____
Useful sources of information about such matters include industry publications, financial statements, and other publicly available information from entities in the same industry, and information available from regulatory agencies.			
7. Inquire of accounting, finance, operations, environmental, compliance, or legal personnel about their knowledge of the company's exposure to environmental remediation liabilities.	_____	_____	_____
8. Consult other sources of information that relate to the entity's business, such as the following:			
a. AICPA audit and accounting guides and other publications.	_____	_____	_____
b. Industry publications.	_____	_____	_____

* As applicable.

	<i>Done by (or "N/A")</i>	<i>Date</i>	<i>W/P Ref.*</i>
c. Financial statements of other entities in the industry.	_____	_____	_____
d. Textbooks, periodicals, and individuals knowledgeable about the industry.	_____	_____	_____
9. Consider methods the entity uses to process accounting information in planning the audit.	_____	_____	_____
10. Consider the following matters in evaluating the effect of the entity's information technology on the audit of financial statements:			
a. The extent to which the computers and other information technology is used in each significant accounting application.	_____	_____	_____
b. Whether or not the application generates a financial statement line item or provides a basis for an accounting estimate.	_____	_____	_____
c. The significance of the financial statement line item(s) affected by the client's use of technology.	_____	_____	_____
d. The controls placed over the application or system.	_____	_____	_____
e. The effectiveness of the design and operation of those controls.	_____	_____	_____
f. The complexity of the entity's information technology operations, including the use of an outside service center.	_____	_____	_____
g. The organizational structure of the information technology activities.	_____	_____	_____
h. The availability of, and access to, evidence.	_____	_____	_____
i. The use of computer-assisted audit techniques to increase the efficiency of performing audit procedures.	_____	_____	_____
11. Consider whether specialized skills are needed to consider the effect of information technology on the audit.	_____	_____	_____
12. Document the matters listed above relating to a knowledge of the entity's business in the workpapers, as deemed necessary.	_____	_____	_____
.05 E. Assessing Auditability			
1. Assess the adequacy of the accounting records for the following factors:			
a. Transactions described in sufficient detail to permit appropriate classification in financial statements.	_____	_____	_____
b. Transactions described in a manner that permits the recording of monetary value in the financial statements.	_____	_____	_____
c. Accounting records include the period in which the transactions occurred to permit the recording of transactions in the appropriate accounting period.	_____	_____	_____

* As applicable.

	<u>Done by (or "N/A")</u>	<u>Date</u>	<u>W/P Ref.*</u>
2. Obtain sufficient knowledge of the design of the relevant controls pertaining to each of the five internal control components and whether they have been placed in operation. In completing this step, complete the "Internal Control" program at AAM section 5400, as appropriate.	_____	_____	_____
3. Document the understanding of the entity's five components of internal control obtained to plan the audit.	_____	_____	_____
4. Reform the following procedures regarding the integrity of management:			
a. Inquiries of local attorneys, bankers, and other business leaders as to the client's standing in the business community.	_____	_____	_____
b. A check of the client's credit rating.	_____	_____	_____
5. Document the matters listed above relating to the auditability of the entity in the workpapers, as deemed necessary.	_____	_____	_____

.06 F. Understanding With the Client/Engagement Letter

1. Include the following items in the understanding obtained with the client or the engagement letter:			
a. Name of entity (and subsidiaries, if any) and its year end.	_____	_____	_____
b. Statement(s) to be audited.	_____	_____	_____
c. Scope of services, as detailed as necessary—including limitations of the engagement.	_____	_____	_____
d. Type of report(s) to be rendered.	_____	_____	_____
e. The objective of the audit.	_____	_____	_____
f. Management's responsibilities.	_____	_____	_____
g. A statement that management will provide a representation letter at the conclusion of the audit.	_____	_____	_____
h. The auditor's responsibilities, including the detection of misstatements, and the reporting of reportable conditions that come to the auditor's attention.	_____	_____	_____
i. Management's responsibility for determining the appropriate disposition of financial statement misstatements aggregated by the auditor.	_____	_____	_____
j. A statement that the auditor may decline to issue a report if, for any reason, the auditor is unable to complete the audit.	_____	_____	_____
k. A statement that the audit is not designed to provide assurance on internal control or to identify reportable conditions.	_____	_____	_____
l. Provision for client's acceptance signature and date.	_____	_____	_____
m. Expression of thanks for being selected as auditors or to perform other services.	_____	_____	_____

* As applicable.

	<u>Done by (or "N/A")</u>	<u>Date</u>	<u>W/P Ref.*</u>
2. Include the following optional items in the engagement letter, as deemed necessary:			
a. Obligations of the client's staff to prepare schedules and statements.	_____	_____	_____
b. Arrangements concerning the involvement of specialists or internal auditors.	_____	_____	_____
c. Arrangements involving a predecessor auditor.	_____	_____	_____
d. Fee or method of determining fee.	_____	_____	_____
e. Frequency of billing and client's obligations for payment, including retainer, if applicable.	_____	_____	_____
f. Any limitation of or other arrangements regarding the liability of the auditor or the client.	_____	_____	_____
g. Conditions under which access to the workpapers may be granted.	_____	_____	_____
h. Arrangements regarding other services to be provided.	_____	_____	_____
i. Description of a particular audit procedure, if requested by the client or deemed necessary for protection of the auditor.	_____	_____	_____
j. Extent and timing of interim auditing procedures.	_____	_____	_____
k. Name of client's personnel to be contacted during engagement.	_____	_____	_____
.07 G. Assessing Audit Risk and Materiality			
1. Determine a preliminary judgment about the dollar amount of misstatement that would be material to the financial statements.	_____	_____	_____
2. Relate that amount to tolerable error for specific account balances in planning audit procedures.	_____	_____	_____
3. Assess and document inherent risk and control risk to determine how much detection risk can be accepted while still restricting audit risk to an acceptably low level.	_____	_____	_____
4. Assess and document, by considering the understanding obtained of the internal control components and by considering all other matters influencing audit risk, the risk of material misstatement due to error, illegal acts, and other factors.	_____	_____	_____
5. Discuss among engagement personnel the risk of material misstatement due to fraud according to the guidelines presented in paragraphs 14–18 of SAS No. 99 (AU section 316.14–18).	_____	_____	_____
6. Consider the presence of fraud risk factors in the following categories:			
• Incentives/pressures to perpetrate fraud	_____	_____	_____
• Opportunities to carry out the fraud	_____	_____	_____
• Attitudes/rationalizations to justify a fraudulent action	_____	_____	_____

* As applicable.

	<u>Done by (or "N/A")</u>	<u>Date</u>	<u>W/P Ref.*</u>
7. Obtain information needed to identify risks of material misstatement by			
a. Inquiring of management and others within the entity about the risks of fraud and how they are addressed. (See paragraphs 20 through 27 of SAS No. 99 [AU section 316.20–.27].)	_____	_____	_____
b. Considering any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit. (See paragraphs 28 through 30 of SAS No. 99 [AU section 316.28–.30].)	_____	_____	_____
c. Consider fraud risk factors. (See paragraphs 31 through 33 and the appendix of SAS No. 99 [AU section 316.31–.33 and .85].)	_____	_____	_____
d. Considering certain other information that may be helpful in the identification of risks of material misstatement due to fraud. (See paragraph 34 of SAS No. 99 [AU section 316.34].)	_____	_____	_____
8. Identify risks that may result in a material misstatement due to fraud			
a. Use information gathered (see paragraphs 19 through 34 of SAS No. 99 [AU section 316.19–.34]) to identify risk of material misstatements due to fraud	_____	_____	_____
b. Presume that improper revenue recognition is a fraud risk	_____	_____	_____
c. Consider the risk of management of override of controls	_____	_____	_____
9. Assess the identified risks after taking into account an evaluation of the entity's programs and controls that address identified risks of material misstatement due to fraud.	_____	_____	_____
10. Develop responses to the results of the assessment of the risks of material misstatement due to fraud in one of the following three ways:			
a. A response that has an overall effect on how the audit is conducted. (See paragraph 50 of SAS No. 99 [AU section 316.50].)	_____	_____	_____
b. A response involving the nature, timing and extent of procedures to be performed. (See paragraphs 51 through 56 of SAS No. 99 [AU section 316.51–.56].)	_____	_____	_____
c. A response to further address the risk of management override of controls. (See paragraphs 57 through 66 of SAS No. 99 [AU section 316.57–.66].)	_____	_____	_____
11. Document in the workpapers the following:			
a. The discussions among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed.	_____	_____	_____

* As applicable.

	<u>Done by (or "N/A")</u>	<u>Date</u>	<u>W/P Ref.*</u>
b. The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud.	_____	_____	_____
c. Specific risks of material misstatement due to fraud that were identified.	_____	_____	_____
d. If improper revenue recognition has not been identified as a risk of material misstatement due to fraud, the reasons supporting that conclusion.	_____	_____	_____
e. The results of procedures performed to further address the risk of management override of controls.	_____	_____	_____
f. Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions.	_____	_____	_____
12. Complete the "Fraud Risk Factor Memory Jogger" maintained at the end of this planning checklist. (Auditors may decide, based on the circumstances, that completion of the memory jogger is not necessary.)	_____	_____	_____
13. Consider the risk of material misstatement (due to error, fraud, illegal acts, and other factors) assessment in determining:			
a. Overall audit strategy.	_____	_____	_____
b. The nature, timing, and extent of audit procedures.	_____	_____	_____
c. Staff assignments.	_____	_____	_____
d. Appropriate levels of supervision.	_____	_____	_____
.08 H. Assessment of Control Risk			
1. Assess control risk. In assessing control risk, complete the "Internal Control" program at AAM section 5400.	_____	_____	_____
2. Document conclusions about the control risk assessment, including the bases for assessing control risk at the maximum or below the maximum for financial statement assertions.	_____	_____	_____
3. In circumstances where electronic evidence is significant, reconsider the appropriateness of assessing control risk at the maximum and performing only substantive testing, given the usual dependency of competent electronic evidence on effective internal control.	_____	_____	_____
4. Perform the following procedures in assessing control risk at below the maximum level for some or all financial statement assertions (see "Internal Control" program at AAM section 5400):			
a. Identify specific control relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions.	_____	_____	_____

* As applicable.

<i>Done by (or "N/A")</i>	<i>Date</i>	<i>W/P Ref.*</i>
-----------------------------------	-------------	----------------------

b. Perform tests of controls to evaluate the effectiveness of such controls.		
--	--	--

5. If a further reduction in the assessed level of control risk is desired for some financial statement assertions, perform additional tests of relevant controls.		
--	--	--

.09 I. Illegal Acts

1. Consider the following matters in the assessment of risk that the entity has not complied with laws and regulations that have a direct and material effect on the determination of financial statement amounts:		
--	--	--

a. The client's policy, if any, relative to the prevention of illegal acts.		
---	--	--

b. Management's understanding of the requirements of laws and regulations pertinent to audit objectives.		
--	--	--

c. The nature and extent of noncompliance noted in prior audits.		
--	--	--

d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations.		
---	--	--

.10 J. Analytical Procedures

1. Use analytical procedures which focus on:		
--	--	--

a. Enhancing the auditor's understanding of the client's business and the transactions and events that have accrued since the last audit date.		
--	--	--

b. Identifying areas that may represent specific risks relevant to the audit.		
---	--	--

.11 K. Audit Strategies and the Audit Program

1. Use the information obtained or developed concerning materiality, internal control, the results of preliminary analytical procedures, risk assessments, and other matters used in assessing audit risk to plan:		
--	--	--

a. The overall strategy for the conduct and scope of the audit.		
---	--	--

b. The nature, timing, and extent of testing.		
---	--	--

c. Staffing requirements and related levels of supervision.		
---	--	--

(Utilize the audit programs maintained at AAM section 5400, as well as auditor-developed audit programs to meet specific situations.)

2. Have the final audit programs approved by the engagement partner.		
--	--	--

* As applicable.

.12

L. Fraud Risk Factor Memory Jogger

An auditor may find this memory jogger helpful during planning and at other stages of the audit, when considering fraud risk factors and assessing the risk of material misstatement due to fraud. The listing below contains example risk factors for small, privately-owned businesses. If used, this memory jogger should be tailored for the particular client being audited. Identified or possible risk factors should be added to the list. An auditor may also decide to remove the example factors from the list, based on the circumstances. In any event, be sure to consider fraud risk factors that relate to fraudulent financial reporting and misappropriation of assets in every related category presented below. An auditor should feel free to use this practice aid as he or she sees fit (e.g., adding attachments, redesigning the form of the memory jogger). Finally, note that SAS No. 99 (AU section 316) does not require an auditor to use a memory jogger or checklist of fraud risk factors.

Part 1—Fraudulent Financial Reporting

<i>Fraud Risk Factors Considered</i>	<i>Present at Client?</i>	<i>Audit Response Developed?</i> ¹	<i>Audit Response Documented? (W/P Ref.)</i> ²	<i>Additional Information</i>
A. Incentives/Pressures				
<i>a.</i> Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by): <ol style="list-style-type: none"> (1) High degree of competition or market saturation, accompanied by declining margins. (2) New accounting, statutory, or regulatory requirements. (3) Significant declines in customer demand and increasing business failures in either the industry or the economy in which the entity operates. (4) High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates. (5) Operating losses making the threat of bankruptcy or foreclosure, imminent. (6) Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth. (7) Rapid growth or unusual profitability especially compared to that of other companies in the same industry. 				
<i>b.</i> Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following: <ol style="list-style-type: none"> (1) Need to obtain additional debt or equity financing to stay competitive, including financing of major research and development or capital expenditures. (2) Marginal ability to meet debt repayment or other debt covenant requirements. 				
<i>c.</i> Management's personal net wealth is threatened by the entity's financial performance arising from the following: <ol style="list-style-type: none"> (1) Heavy concentrations of their personal net worth in the entity. 				

<i>Fraud Risk Factors Considered</i>	<i>Present at Client?</i>	<i>Audit Response Developed?¹</i>	<i>Audit Response Documented? (W/P Ref.)²</i>	<i>Additional Information</i>
(2) Personal guarantees of debt of the entity that are significant to their personal net worth.				
(3) Adverse consequences on significant matters if <i>good</i> financial results are reported. Specific examples include management's motivation to inappropriately reduce income taxes, to defraud a divorced spouse or a partner of his or her share of the profits or assets of a business, or to convince a judge or arbitrator that the business in dispute is not capable of providing adequate cash flow. Keep in mind that you are not required to plan your audit to discover personal information (e.g., marital status) of the owner-manager. However, if you become aware of such information, you should consider it in your assessment of risk of material misstatement due to fraud.				
d. There is excessive pressure on management or operating personnel to meet financial targets set by the owner, including sales or profitability incentive goals.				
B. Opportunities				
a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:				
(1) Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.				
(2) Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate.				
(3) Significant, unusual, or highly complex transactions, especially those close to year end that pose difficult "substance over form" questions.				
b. There is a complex or unstable organizational structure as evidenced by the following:				
(1) Difficulty in determining the organization or individuals that have controlling interest in the entity.				
(2) Overly complex organizational structure involving unusual legal entities or managerial lines of authority.				
(3) High turnover of senior management or counsel.				
c. Internal control components are deficient as a result of the following:				
(1) Inadequate monitoring of controls, including automated controls.				
(2) High turnover rates or employment of ineffective accounting staff.				
(3) Ineffective accounting and information systems including situations involving reportable conditions.				

<i>Fraud Risk Factors Considered</i>	<i>Present at Client?</i>	<i>Audit Response Developed?¹</i>	<i>Audit Response Documented? (W/P Ref.)²</i>	<i>Additional Information</i>
C. Attitudes/ Rationalizations				
1. A failure for management to display and communicate an appropriate attitude regarding internal control and the financial reporting process.				
2. Ineffective communication and support of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards.				
3. Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates.				
4. Known history of violations or claims against the entity, its owner or senior management alleging fraud or violations of laws and regulations.				
5. A practice by management of committing to, creditors, and other third parties to achieve aggressive or unrealistic forecasts.				
6. Management failing to correct known reportable conditions on a timely basis.				
7. An interest by management in employing inappropriate means to minimize reported earnings for tax motivated reasons.				
8. Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality.				
9. The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:				
a. Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters.				
b. Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report.				
c. Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or audit committee.				
d. Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of audit personnel assigned to the engagement.				

Part 2—Misappropriation of Assets

<i>Fraud Risk Factors Considered</i>		<i>Present at Client?</i>	<i>Audit Response Developed?¹</i>	<i>Audit Response Documented? (W/P Ref.)²</i>	<i>Additional Information</i>
A. Incentives/Pressures					
a.	Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.				
b.	Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:				
	(1) Known or anticipated future layoffs.				
	(2) Promotions, compensation, or other rewards inconsistent with expectations.				
B. Opportunities					
a.	Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:				
	(1) Large amounts of cash on hand or processed.				
	(2) Company issued credit cards.				
	(3) Inventory items that are small in size, of high value, or in high demand.				
	(4) Easily convertible assets.				
	(5) Fixed assets, that, are small in size, marketable, or lacking observable identification of ownership.				
b.	Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:				
	(1) Inadequate segregation of duties or independent checks. Inadequate segregation of duties is quite often understandable in a small business environment in that it's a function of the entity's size. However, you should consider it in conjunction with other risk factors and with mitigating controls.				
	(2) Inadequate management oversight of employees responsible for assets.				

<i>Fraud Risk Factors Considered</i>	<i>Present at Client?</i>	<i>Audit Response Developed?¹</i>	<i>Audit Response Documented? (W/P Ref.)²</i>	<i>Additional Information</i>
(3) Inadequate job applicant screening of employees with access to assets.				
(4) Inadequate record keeping with respect to assets.				
(5) Inadequate system of authorization and approval of transactions (for example, in purchasing).				
(6) Inadequate physical safeguards over cash, investments, inventory, or fixed assets.				
(7) Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns.				
(8) Lack of mandatory vacations for employees performing key control functions.				
(9) Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.				
(10) Inadequate access controls over automated records.				
C. Attitudes/Rationalizations				
1. Disregard for the need for monitoring or reducing risks related to misappropriations of assets.				
2. Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies.				
3. Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee.				
4. Changes in behavior or lifestyle that may indicate assets have been misappropriated.				

[The next page is 3381.]

¹ Based on the assessment of risk of material misstatement due to fraud, an auditor may respond to identified risk factors individually or in combination.

² The auditor's response to identified risk factors should be documented. Documentation should be maintained at a place in the workpapers considered most suitable, depending upon the type of risk factor and the type of response. Generally, if a response is specific to a particular account balance or class of transactions, documentation of the audit procedures would be placed in the appropriate audit program (e.g., Cash, Investments). If it is determined that audit procedures already planned or normally carried out are a sufficient response to the identified risk factor, that fact should be documented.

Sample Engagement Letters

.01 Following are illustrative engagement letters (and one engagement memorandum). They may be used as guides in the design of specific letters, tailored to satisfy the terms of a particular engagement.

.02 Audit Engagement Leading to Opinion

LACKO, LYNCH, BROWN & COMPANY

Certified Public Accountants

[Date]

Mr. Matt Decker, President
Civil War Antiques, Inc.
111 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Decker:

This will confirm our understanding of the services we will provide to Civil War Antiques, Inc. for the year ending December 31, 20XX.

We will audit the balance sheet of Civil War Antiques, Inc. as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them.

The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the establishment and maintenance of effective internal control over financial reporting, the establishment and maintenance of proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us.

Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We are responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that we obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.¹

¹ Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule of Conduct 101 (ET section 191.188 and .189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter.

An audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, we are responsible for ensuring that you are aware of any reportable conditions which come to our attention.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and banks. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

The Company's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

As part of our engagement for the year ending December 31, 20XX, we will review the federal and state income tax returns for Civil War Antiques, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from \$XX,XXX to \$XX,XXX.

The working papers for this engagement are the property of Lacko, Lynch, Brown & Company and constitute confidential information. However, we may be requested to make certain working papers available to _____ [name of regulator] pursuant to authority given to it by law or regulation. If requested, access to such working papers will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected working papers to _____ [name of regulator]. The _____ [name of regulator] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.²

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one.

² This paragraph is optional depending upon the nature of the engagement

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

.03 SEC Engagement: Form 10-K and Annual Report to Shareholders

RON TRACY & ASSOCIATES

Certified Public Accountants

[Date]

Mr. Joshua Snyder
Lawnmowers & Snowblowers Unlimited
731 Nathan Road
Hatville, NJ 00000

Dear Mr. Snyder:

This letter confirms our understanding of the services we will provide to Lawnmowers & Snowblowers Unlimited for the year ended December 31, 20XX.

We will audit the balance sheet of Lawnmowers & Snowblowers Unlimited as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them.

The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the establishment and maintenance of effective internal control over financial reporting, the establishment and maintenance of proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us.

Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We are responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that we obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.¹

An audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, we are responsible for ensuring that you are aware of any reportable conditions which come to our attention.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. .04 Change in Circumstances From Those Contemplated in Original Engagement Letter

MACARTHUR & KENNEY, CPA'S

Certified Public Accountants

[Date]

Mr. James Melakon, Treasurer
Nimbus Country Club
64 Vasily Road
Velikiye Luki, Ohio 10000

Dear Mr. Melakon:

As we agreed in our original engagement letter dated [date] we are notifying you that our audit of your December 31, 20XX financial statements requires additional procedures.

We have found that certain guest checks are held for only three months after they are paid. Thus, a substantial number of guest checks are not available for examination. Fortunately, your internal control activities allow us to use alternative procedures to satisfy ourselves on this part of the audit. However, this will require substantially more time than examining guest checks.

The fee for these additional services will be billed at our standard per diem rates and added to the fees quoted in our previous letter.

The situation has been discussed with your controller, who assured us that in the future all guest checks will be kept for two years.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Very truly yours,

MACARTHUR & KENNEY, CPA'S

.05 Conditions Encountered Which Do Not Permit Expression of Opinion as Anticipated in Original Engagement Letter

GEROW, COLLINS & PATCH

Certified Public Accountants

[Date]

Mrs. Helene Daestrom, President
Cohrane Manufacturing, Inc.
1234 West Street
Cedar Hill, Tennessee 10000

Dear Mrs. Daestrom:

Our March 15, 20XX letter described our present engagement as an audit for the purpose of expressing an opinion on the financial statements based on our audit. This letter is to inform you that because of the circumstances described below, we will be required to qualify our opinion on these statements.

As you know, the Internal Revenue Service has proposed total income tax assessments of approximately \$XXX,XXX for the three fiscal years ended December 31, 20XX. Your tax counsel has advised us that although you have a defensible position and will protest the assessments, counsel cannot offer an opinion as to your ultimate liability. No provision for this assessment or any portion of it is included in your December 31, 20XX financial statements, nor do you feel any is necessary.

Due to an inability to obtain sufficient evidential matter to support your assertions regarding the tax assessment situation described above, we will be unable to express an unqualified opinion. Our report will state the reasons for the qualification of our opinion.

You and your tax counsel have advised that you will inform us of any new developments in the proposed assessment before our report is issued so that we may consider their effect on your financial statements and on our report.

Sincerely,

GEROW, COLLINS & PATCH

[Engagement Partner's Signature]

Note: The client is not asked to sign this letter. Its purpose is to inform the client of the altered circumstances and the effect on the opinion. There is no change in the terms of the engagement. However, it might be desirable to have the client acknowledge receipt of this letter by signing a copy and returning it where—for example—it is a problem, or when there has been a history of misunderstandings.

.06 SEC Engagement: Initial Registration, Form S-1

SHERIDAN, CUSTER, AND STUART, CPAs

Certified Public Accountants

[Date]

Mr. John T. Chance, President

Skynet, Inc.

1 Wilderness Drive

Cold Harbor, Virginia 00000

Dear Mr. Chance:

This will confirm our understanding of the services we will provide in connection with the registration statement Skynet, Inc will file with the Securities and Exchange Commission.

We will audit the consolidated balance sheets of Skynet, Inc. as of December 31, 20X1 and 20X0, and the related consolidated statements of income, retained earnings, and cash flows for each of the years in the three-year period ended December 31, 20X1, which will be included in a Form S-1,¹ registration statement.

The financial statements are the responsibility of the Company's management. Encompassed in that responsibility is the establishment and maintenance of effective internal control over financial reporting the establishment and maintenance of proper accounting records, the selection of appropriate accounting principles, the safeguarding of assets, and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us.

Our responsibility is to express an opinion on the financial statements based on our audit, and is limited to the period covered by our audit. If circumstances preclude us from issuing an unqualified opinion or we are otherwise unable to comply with the requirements of Form S-1, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We are responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that we obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.²

An audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, we are responsible for ensuring that you are aware of any reportable conditions which come to our attention.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities

¹ This should be modified to agree with the particular form to be filed.

² Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule of Conduct 101 (ET section 191.188 and .189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter.

by correspondence with selected customers, creditors, legal counsel, and banks. We will also audit the financial information included in the schedules required by Regulation S-X of the SEC. At the conclusion of our audit, we will request certain written representations from you about the financial statements and related matters.

The Company's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

We will also fulfill the portion of the underwriter's agreement directed to the independent accountants, provided the requirements are within the purview of Statement on Auditing Standards No. 72, *Letters for Underwriters and Certain Other Requesting Parties* (as amended by Statement on Auditing Standards No. 76), issued by the American Institute of Certified Public Accountants, and provided the material can properly be reported on by accountants pursuant to that Statement. In this regard, we require a copy of the tentative underwriting contract as soon as it is available.

Subsequent to issuance of our auditor's report, we will perform certain procedures required by Statement on Auditing Standards No. 37, *Filings Under Federal Securities Statutes*, issued by the American Institute of Certified Public Accountants, regarding execution of consent letters required for certain SEC filings. In connection therewith, all printer's proofs of reports to be filed with the Securities and Exchange Commission are to be submitted to us for review. This requirement extends to the entire registration statement and all other material that accompanies the financial statements.

As part of our engagement for the years ending December 31, 20X0 and 20X1, we will review the federal and state income tax returns for Skynet, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which will range from \$XX,XXX to \$XX,XXX.

The working papers for this engagement are the property of Sheridan, Custer, and Stuart, CPAs and constitute confidential information. However, we may be requested to make certain working papers available to _____ [name of regulator] pursuant to authority given to it by law or regulation. If requested, access to such working papers will be provided under the supervision of Sheridan, Custer, and Stuart, CPAs personnel. Furthermore, upon request, we may provide photocopies of selected working papers to _____ [name of regulator]. The _____ [name of regulator] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.³

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

³ This paragraph is optional depending upon the nature of the engagement.

Sincerely,

SHERIDAN, CUSTER, AND STUART, CPAs

[Title]

[Date]

.07 Sample Engagement Memorandum (When No Formal Engagement Letter Is Sent)**Engagement Memorandum**

The following understanding was agreed to between Gabreski and Bong, CPAs and Kramden Bowling, Inc.

[Date]	February 18, 20XX
Client	Kramden Bowling, Inc.
Address	1 Oak Street, Winchester, Virginia 00000
Phone	(555) 555-5555
Final arrangements made with	Ralph Marshall, President
Date final arrangements made	February 15, 20XX, at a meeting in the Kramden Bowling, Inc. offices
Client's personnel responsible for accounting matters	John Sandoval, Treasurer Bob Wesley, Controller
Objective of engagement	Audit engagement. Expression of an opinion on the financial statements. Also, review of federal and state income tax returns for year ended March 31, 20XX. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report.
Management's responsibilities	Management is responsible for the entity's financial statements, establishing and maintaining effective internal control over financial reporting, identifying and ensuring that the entity complies with the laws and regulations applicable to its activities, and for making all financial records and related information available to us. At the conclusion of the engagement, management will provide us with a letter that confirms certain representations made during the audit. Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
Auditor's responsibilities	We are responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that we obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform management of all matters of fraud that come to our attention. We will also inform the client of illegal acts that come to our attention, unless they are clearly inconsequential.

Internal control	An audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, we are responsible for ensuring that management is aware of any reportable conditions which come to our attention.
Financial statements to be audited	Balance sheet at March 31, 20XX and statements of income, retained earnings, shareholders' equity, and cash flows for year ended March 31, 20XX
Responsibilities of client's personnel in preparation for engagement	Trial balance of G/L and completion of schedules, a list of which we will submit two weeks before beginning of engagement
Reports to be addressed to	Board of Directors (twelve copies)
Date audit to commence	Approximately April 24, 20XX (check with controller about April 10)
Estimated time required	Approximately three weeks
Staff requirements	Manager, supervisor, in-charge senior, and two staff assistants
Billing arrangements	Every two weeks, at standard plus out-of-pocket costs; invoices to attention of Bob Wesley; payable on presentation
Special accounting problems	Client was involved in a substantial sale and lease-back transaction during the year Imputed interest may be required on long-term liabilities resulting from purchase of business
Other comments	Client is presently negotiating with machinists' union

.08 Audit of Personal Financial Statements

[*Salutation*]

This will confirm our understanding of the arrangement for our audit of the financial statements of James and Jane Person for the [period] ended [date].

We will audit the statement of financial condition of James and Jane Person as of [date] and the related statement of changes in net worth for the [period] then ended, for the purpose of expressing an opinion on them. The financial statements are the responsibility of James and Jane Person. You are responsible for establishing and maintaining effective internal control over financial reporting, making all financial records and related information available for audit, and for identifying and ensuring compliance with the laws and regulations applicable to your activities.

You are responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements we have aggregated during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.*

We will conduct our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected.¹ Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

The audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, we are responsible for ensuring you are aware of any reportable conditions which come to our attention.

At the conclusion of our audit, you will provide us with a letter that confirms certain representations made during the audit.

We will also [*discussion of other services, if any*].

Our fees for these services [*specify fees or terms*].

We shall be pleased to discuss this letter with you at any time.

If this letter is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

* SAS No. 89, *Audit Adjustments*, among other matters, amends SAS No. 83, *Establishing an Understanding With The Client* (AU section 310), to add this new item to the list of matters generally addressed in the understanding with the client. SAS No. 89 is effective for audits of financial statements for periods beginning on or after December 15, 1999, with earlier adoption permitted.

¹ SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AU section 316), describes the auditor's responsibilities to plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free of material misstatement, whether caused by error or fraud, and provides guidance on what should be done to meet those responsibilities

Sincerely yours,

(Signature of accountant)

Acknowledged:

AAM Section 4100

Introduction

Overview

.01 On every audit, the auditor is required to obtain an understanding of internal control sufficient to plan the audit. A “sufficient” understanding means you should perform procedures to understand how internal controls are designed and determine whether they have been placed in operation. In obtaining this understanding, the auditor should consider how an entity’s use of information technology (IT) and manual procedures, may affect controls relevant to the audit. Then the auditor should assess control risk for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements.

.02 Statement on Auditing Standards (SAS) No. 55 (AU section 319), as amended, provides a framework to help you obtain your understanding of internal control. This framework breaks internal control into five components as identified in AAM section 4200.03, which in turn are linked to entity objectives. When planning the audit, you should obtain an understanding of each of the five internal control components that relate to objectives relevant to the audit.

.03 Your understanding of internal control is used to—

- Identify types of potential misstatement.
- Consider factors that affect the risk of material misstatement.
- Design tests of controls, when applicable.
- Design substantive tests.

.04 Your understanding of a client’s internal control should be based on your previous experience with the client and the following:

- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity’s activities and operations.

.05 Once you obtain an understanding of the design of controls and determine whether they have been placed in operation, you should develop an audit strategy at the assertion level that is generally based on one of the following planned control risk assessments:

- *Control risk at or slightly below the maximum level.*¹ This will result in a primarily substantive approach to auditing the assertion. When a significant amount of information supporting one or more financial statement assertions is electronically initiated, recorded, processed, or reported (especially when evidence exists only in electronic form), the auditor may determine that it is not possible to assess control risk at the maximum and design effective substantive tests that by themselves would provide sufficient evidence that the assertions are not materially misstated. In those cases, additional tests to determine the operating effectiveness of controls surrounding the electronic environment are necessary.

¹ The term *maximum level* means the greatest probability that a material misstatement that could occur in a financial statement assertion will not be prevented or detected on a timely basis by an entity’s internal control.

- *Control risk below the maximum level.* This will require additional tests to determine the operating effectiveness of specified controls, but in return, you will be able to modify the nature, timing, and extent of substantive audit procedures.

.06 AAM section 3125 provides a more detailed description of how to consider internal control at the planning phase of an audit.

.07 The following sections provide additional guidance on how you should consider internal control.

- *AAM section 4200—Internal Control Framework.* This section provides more detail on the internal control framework described in SAS No. 55 (AU section 319), as amended.
- *AAM section 4300—Illustrative Internal Control Forms—Small Business.* The forms in this section serve two purposes: (1) to help you perform the procedures necessary to understand internal control, and (2) to document that understanding. This section is to be used for small business entities.
- *AAM section 4400—Illustrative Internal Control Forms—Medium to Large Business.* These forms are similar to the ones provided in AAM section 4300, except geared to medium to large businesses.
- *AAM section 4500—Flowcharting.* This section provides examples of how you might document your understanding of internal control using flowcharting techniques.
- *AAM section 4600—Assessing Control Risk Below the Maximum.* This section provides guidance on the procedures to be performed when you plan a control risk assessment below the maximum for a specific assertion.

[The next page is 4201.]

AAM Section 4200

Internal Control Framework

Introduction

.01 As described in AAM section 3125, Statement on Auditing Standards (SAS) No. 55 (AU section 319), as amended, provides a framework to help you obtain an understanding of internal control. That framework is built on two concepts: objectives and components.

.02 An *objective* is what the entity is trying to achieve. Generally, an entity tries to achieve objectives in the following three categories:

- Reliability of financial reporting
- Effectiveness and efficiency of operations
- Compliance with applicable laws and regulations

.03 For each of these objectives, internal control consists of the following five interrelated components:

- *Control environment*, which sets the tone of an organization and influences the control consciousness of its people. It is the foundation for all other components of internal control and provides discipline and structure.
- *Risk assessment*, which is the entity's identification and analysis of relevant risks to achievement of its objectives. It forms a basis for determining how the risks should be managed.
- *Control activities*, which are the policies and procedures that help ensure management directives are carried out.
- *Information and communication*, systems support the identification, capture, and exchange of information in a form and time frame that enables people to carry out their responsibilities.
- *Monitoring*, which is a process that assesses the quality of internal control performance over time.

.04 Although an entity's internal control addresses objectives referred to in AAM section 4200.02, not all of these objectives and related controls are relevant to an effective audit of an entity's financial statements. Generally, controls that are relevant to an audit pertain to the entity's objective of preparing reliable financial statements for external purposes. An entity may have controls that relate to operations and compliance with laws and regulations that are not relevant to an audit and therefore need not be considered.

.05 The Jones family owns and operates several neighborhood grocery stores in Anytown. The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the **financial reporting** objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the **operations** objective. Each store has a small deli that prepares sandwiches and some hot foods. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the **compliance** objective of the entity.

.06 The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. If you were the auditor of Jones Grocery, you may wish to ask about and document these controls for client service or other purposes, but because these controls are not relevant to the audit, you are not required to do so.

.07 However, if controls relating to operations and compliance objectives pertain to data you evaluate or use in applying auditing procedures, then they may be relevant to the audit.

.08 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she should obtain an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting data about those transactions are entered into and flow through the financial reporting system
- The files that are processed
- The nature of processing involved in producing the report

.09 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.10 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or access controls, such as passwords that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. Your responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.11 The internal control framework described in SAS No. 55 (AU section 319), as amended, is only a means to help you consider the impact of an entity's internal control in an audit. Your primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, your primary concern is whether a specific control affects financial statement assertions. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.12 *Suppose you are the auditor of Jones Grocery. As on all audits, you are required to obtain an understanding of internal control sufficient to plan the audit. To achieve this, you organize your inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objectives. As a result of performing your procedures, you discover the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items? Is that considered a "monitoring" activity?*

.13 *These questions are rhetorical since the issue of how to classify a particular control is irrelevant for your purposes. As an auditor, your primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

Effect of Information Technology on Internal Control

.14 An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives, and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.15 The use of IT also affects the fundamental manner in which transactions are initiated, recorded, processed, and reported. In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, and reconciliations and follow-up of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

.16 IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to—

- Consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data.
- Enhance the timeliness, availability, and accuracy of information.
- Facilitate the additional analysis of information.
- Enhance the ability to monitor the performance of the entity's activities and its policies and procedures.
- Reduce the risk that controls will be circumvented.
- Enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

.17 IT also poses specific risks to an entity's internal control, including—

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both.
- Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions.
- Unauthorized changes to data in master files.
- Unauthorized changes to systems or programs.
- Failure to make necessary changes to systems or programs.
- Inappropriate manual intervention.
- Potential loss of data.

.18 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

.19 The purpose of this section is to provide guidance on each of the five components that comprise the internal control framework. This guidance should help you perform procedures to obtain an understanding of internal control. These procedures generally require the following steps:

- Understand internal control components that have a pervasive effect on the organization.
- Understand how information technology (IT) is used to process significant accounting information.
- Understand control activities for significant account balances or transaction cycles.
- Assess the risk of management override and lack of segregation of duties.

Focus on the Small Business Entity

.20 This section emphasizes the audit of a small business entity. Small business entities are typically characterized by—

- A single owner or a small group of owners who manage the business on a day-to-day basis.
- A small number of employees involved in the accounting function.
- No outside board of directors or internal audit function.
- The use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.21 This section provides some guidance for the audits of medium to large businesses.

Controls With a Pervasive Effect on the Organization

.22 Your client's control components consist of controls that either have a pervasive effect on the organization or are designed to address specific account balances and classes of transactions or activities. Initially, you should focus on the policies and procedures that have a pervasive effect on the organization.

Understanding the Control Environment

.23 The control environment sets the tone of an organization. It influences the control consciousness of its people and is the foundation for all other components of internal control. In obtaining an understanding of your client's control environment, you should try to understand the owner-manager's attitude, awareness, and actions concerning the control environment. The following paragraphs describe some factors you should consider when evaluating your client's control environment.

.24 ***Integrity and Ethical Values.*** The effectiveness of internal control cannot rise above the integrity and ethical values of the owner-manager. Integrity and ethical values are essential elements of the control environment because they affect the design, administration, and monitoring of other internal control components.

.25 Management may *tell you* a great deal about their integrity and ethical values. They may even commit their *words* to a *written document*. Responses to inquiries and written policies are good, but as an auditor you should focus on management's *actions* and how these actions affect the entity on a day-to-day basis.

.26 For management's integrity and ethical values to have a positive effect on the entity, the following must exist.

- The business owner and management must personally have high ethical and behavioral standards.
- These standards must be communicated to company personnel. In a small business, this communication is often informal.
- The standards must be reinforced.

.27 When observing and evaluating management's *actions* be alert for the following:

- *Segregation of personal from business funds and activities.* Many small business owners intermingle their personal and business activities, for example, the company may pay the owner's credit card bills even if they contain non-business expenditures. You should consider the owner's attitude and the care with which he or she separates the personal from the business activities. It's not unusual for a business to pay the owner's credit card bills, but the more important question is "does the owner reimburse the company?" Owners who treat company assets as if they were personal assets set a bad example for employees who may be encouraged to do the same.
- *Dealing with signs of problems.* Consider how management deals with signs that problems exist, particularly when the cost of identifying and solving the problem could be high. For example, suppose your client became aware of a possible environmental contamination on their premises. How would they react? Would they try to hide it, deny its existence, or act evasively if asked about it, or would they actively seek out your advice or the advice of their attorney?
- *Removal or reduction of incentives and temptations.* Individuals may engage in dishonest, illegal, or unethical acts simply because the owner-manager gives them strong incentives or temptations to do so. Removing or reducing these incentives and temptations can go a long way toward diminishing undesirable behavior.

The emphasis on results, particularly in the short term, fosters an environment in which the price of failure becomes very high. *Incentives* for engaging in fraudulent or questionable financial reporting practices include—

- Pressure to meet unrealistic performance targets, particularly for short-term results.
- High performance-dependent rewards.
- Upper and lower cutoffs on bonus plans.

Temptations for employees to engage in improper practices include—

- Nonexistent or ineffective controls, such as poor segregation of duties in sensitive areas, that offer temptations to steal or conceal questionable financial reporting practices.
- Owner-managers who are unaware of actions taken by employees.
- Penalties for improper behavior that are insignificant or unpublicized and thus lose their value as deterrents.

- *Management intervention.* There are certain situations where it is appropriate for management to intervene and overrule prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the financial reporting information system. You should consider whether management has provided guidance on the situations and frequency with which intervention of established controls is appropriate. Management intervention should be documented and explained.

.28 *Commitment to Competence.* Competence should reflect the knowledge and skills necessary to accomplish tasks that define an individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

.29 *Mrs. Jones has always kept the books for Jones Grocery. She is “self-taught,” with no formal training in accounting or bookkeeping. There are no plans to replace Mrs. Jones with someone more “qualified.” As the auditor of Jones Grocery you recognized the risk of having an untrained bookkeeper and design your audit approach to address such concerns by—*

- *“Training” Mr. and Mrs. Jones to call you whenever they have a transaction out of the ordinary.*
- *Strongly encouraging Mrs. Jones to take training classes on her accounting software package. (She has.)*
- *Explaining to Mrs. Jones the importance of key accounting records such as the accounts payable subledger and inventory reports.*
- *Teaching Mrs. Jones important basic control functions such as bank reconciliations.*

.30 ***Management’s Philosophy and Operating Style.** Management’s philosophy and operating style encompass a broad range of characteristics. Such characteristics may include—*

- *The owner-manager’s approach to taking and monitoring business risks.*
- *Attitudes and actions toward financial reporting and tax matters.*
- *Emphasis on meeting budget, profit, and other financial and operating goals.*

.31 *Management’s philosophy and operating style have a significant influence on the control environment, particularly in a small business where the owner-manager dominates the organization, regardless of the consideration given to the other control environment factors. For example, you may be concerned about your client’s unduly aggressive attitude toward financial reporting. Not only might this cause you to assess control risk at the maximum for some or all assertions, but it may heighten concerns about irregularities affecting certain assertions.*

.32 *However, a dominant owner-manager does not necessarily cause you to assess control risk at the maximum.*

.33 *Mr. Jones dominates the management of Jones Grocery. He demonstrates a positive attitude toward the control environment and a moderate to conservative attitude toward accepting business risk such as expansion. He is more concerned about taxes than financial reporting. Mr. Jones uses information generated by the financial reporting information system to monitor the financial results of the company and compare it to prior periods. His review of the accounting reports encourages Mrs. Jones and others who help with the accounting to work with greater care. Mr. Jones also performs many control activities himself, such as the review and supervision of the physical inventory counts. Although Mr. Jones is concerned about his income tax liability, you might not view the possible bias to misstate income as a significant risk because of the otherwise positive control environment.*

.34 ***Organizational Structure.** Your client’s organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and monitored.*

.35 *Significant aspects of establishing an organizational structure include considering key areas of authority and responsibility and appropriate lines of reporting. Small business entities usually have fairly simple organizational structures. A highly structured organization with formal reporting lines and responsibilities may be appropriate for large entities, but for a small business, this type of structure may impede the necessary flow of information.*

.36 ***Assignment of Authority and Responsibility.** The assignment of authority and responsibility includes the following:*

- *The establishment of reporting relationships and authorization procedures*
- *The degree to which individuals and groups are encouraged to use initiative in addressing issues and solving problems*

- The establishment of limits of authority
- Policies describing appropriate business practices
- Resources provided for carrying out duties

.37 Alignment of authority and accountability often is designed to encourage individual initiatives, within limits. Delegation of authority means surrendering central control of certain business decisions to lower echelons, to the people who are closest to everyday business transactions.

.38 A critical challenge is to delegate only to the extent required to achieve objectives. This requires ensuring that risk acceptance is based on sound practices for identifying and minimizing risk, including sizing risks and weighing potential losses versus gains in arriving at good business decisions.

.39 Another challenge is ensuring that all personnel understand the entity's objectives. It is essential that each individual knows how his or her actions interrelate and contribute to achievement of the objectives.

.40 *Mr. Jones had to decide how to delegate authority and responsibility when he expanded Jones Grocery from the one, original store to its present eight-store chain spread out over Greater Anytown and the surrounding suburbs. One area that proved problematic was setting prices. Mr. Jones assumed that he would be able to set the prices at all the stores, just like he did for his original store. He felt this was a good procedure because it allowed him some control over profit margins. Problems arose because the competitive pressures were different in different areas of the city. A competitor in the North Suburb ran specials or lowered prices on certain items, while a competitor in the Western Suburb ran specials on different items. It became too difficult for Mr. Jones to keep up with the constantly changing price battles at eight different stores. He eventually delegated this responsibility to the individual store managers. He set a limit on how much a store manager could discount prices without his prior approval, but other than that, the store managers had the freedom to set prices to respond to the changing competitive environment.*

.41 *The responsibility for accounting information was also affected by Jones Grocery's expansion. Mr. Jones' original thought was that each store would be run as a separate business, with separate financial reporting information systems that would be "consolidated" together at the main store. Problems soon developed in several areas, most notably accounts payable. The store managers were responsible for entering vendor invoices into the computer system. But it seemed that no matter how much Mr. Jones threatened, cajoled, and begged his store managers to enter the invoices on a timely basis, they just couldn't do it consistently. The procedure had to be changed. Now, the store managers only have the responsibility to check incoming goods for quantity and condition. Vendor invoices are sent directly to Mrs. Jones at the main store, and she is responsible for maintaining the accounts payable for all the stores.*

.42 The control environment is greatly influenced by the extent to which individuals recognize that they will be held accountable. This holds true all the way to the owner-manager, who has the ultimate responsibility for all activities within the organization, including internal control.

.43 **Human Resource Policies and Practices.** Human resource policies and practices affect an entity's ability to employ sufficient competent personnel to accomplish its goals and objectives. Human resource policies and practices include an entity's policies and procedures for hiring, orienting, training, evaluating, counseling, promoting, compensating, and taking remedial action. In many small businesses, the policies may not be formalized but they should nevertheless exist and be communicated. The owner-manager can orally make explicit his or her expectations about the type of person to be hired to fill a particular job, and may even be active in the hiring process. Formal documentation is not always necessary for a policy to be in place and operating effectively.

.44 *When Mr. and Mrs. Jones added a second store, the hiring of a store manager was easy—they hired their daughter. Adding a third store proved to be more problematic, since the other Jones children had no interest in the family business. Mr. and Mrs. Jones talked at length about the type of person they would hire as a store manager. They finally*

decided it was more important to hire someone they could trust, someone they felt comfortable with on a personal level rather than someone with an extensive background in the grocery business. They felt they could teach someone the grocery business but not how to be trustworthy. That hiring policy worked, and they've been following it ever since.

.45 Standards for hiring the most qualified individuals, with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity's commitment to competent and trustworthy people. Hiring practices that include formal, in-depth employment interviews and informative and insightful presentations on the company's history, culture, and operating style send a message that the company is committed to its people.

.46 Personnel policies that communicate prospective roles and responsibilities and that provide training opportunities indicate expected levels of performance and behavior. Rotation of personnel and promotions driven by periodic performance appraisals demonstrate the entity's commitment to advancement of qualified personnel to higher levels of responsibility. Competitive compensation programs that include bonus incentives serve to motivate and reinforce outstanding performance. Disciplinary actions send a message that violations of expected behavior will not be tolerated.

Other Control Components With a Pervasive Effect on the Organization

.47 Elements of other control components may have a pervasive effect on the organization. These are discussed in the following paragraphs.

.48 **Risk Assessment.** An entity should identify, analyze, and manage risks relevant to the preparation of reliable financial statements. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

.49 Risks relevant to financial reporting include events and circumstances that may adversely affect the company's ability to initiate, record, process, and report financial data. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations.

.50 Risks can arise or change due to circumstances such as the following:

- *Changes in the operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel.* New personnel may have a different focus on or understanding of internal control. When people change jobs or leave the company, management should consider the control activities they performed and who will perform them going forward. Steps should be taken to ensure new personnel understand their tasks.
- *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control. When these systems are changed, management should assess how the changes will impact control activities. Are the existing activities appropriate or even possible with the new systems? Personnel should be adequately trained when information systems are changed or replaced.
- *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls. Management should consider whether accounting and information systems are adequate to handle increases in volume.
- *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.

- *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

.51 Your procedures to assess whether a risk assessment process is placed in operation are generally of an inquiry nature. For example, you may ask accounting personnel what accounts they believe are the most difficult to become satisfied with as they prepare the financial statements. You may also consider asking the same questions of personnel outside the accounting department.

.52 Control Activities. Control activities are policies and procedures that help ensure necessary actions are taken to address risks to achieve the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.

.53 At the entity-wide level, control activities may be categorized as policies and procedures that pertain to the following.

- *Performance reviews.* These control activities include reviews of actual performance versus budgets, forecasts, and prior-period performance. They may also involve relating different sets of data (for example, operating or financial) to one another, together with analyses of the relationships, investigating unusual relationships and taking corrective action. Performance reviews may also include a review of functional or activity performance.
- *Information processing.* A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. General controls commonly include controls over data center and network operations; system software acquisition and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end-user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail. These controls are discussed in more detail in AAM section 4200.76–.80.
- *Physical controls.* These activities encompass the physical security of assets, including adequate safeguards over access to assets and records such as secured facilities and authorization for access to computer programs and data files and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.
- *Segregation of duties.* Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Segregation of duties is often a problem for small business entities. See AAM section 4200.118–.126 for further discussion and guidance.

.54 Ordinarily, audit planning does not require you to understand the control activities related to each account balance, transaction class, and disclosure component in the financial statements or to every assertion

relevant to them. Your understanding of control activities is sufficient when you can identify types of potential misstatements, consider factors that affect the risk of material misstatement, and design substantive tests.

.55 The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, record, process, and report transactions or other financial data. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

.56 Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer-produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

.57 General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition and maintenance; access security; and application system acquisition, development, and maintenance.

.58 The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

.59 **Information and Communication.** An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and automated), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems make extensive use of information technology. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by automated or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in monitoring and other functions.

.60 The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial statements. Thus, it is important that management receives the information they need to carry out their responsibilities and that the information is provided at the right level of detail. Accordingly, an information system encompasses procedures and records that—

- Identify and record all valid transactions.
- Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.

- Measure the value of transactions in a manner that permits recording of their proper monetary value in the financial statements.
- Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- Present properly the transactions and related disclosures in the financial statements.

.61 The financial reporting information system is an integral part of an entity's information and communication system. Your consideration of the system should be made at the individual account and classes of transaction level. See AAM section 4200.101–.119 for additional guidance.

.62 Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

.63 The auditor should obtain sufficient knowledge of the information system relevant to financial reporting to understand—

- The classes of transactions in the entity's operations that are significant to the financial statements.
- The procedures, both automated and manual, by which transactions are initiated, recorded, processed, and reported from their occurrence to their inclusion in the financial statements.
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions.
- How the information system captures other events and conditions that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.64 When IT is used to initiate, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

.65 In obtaining an understanding of the financial reporting process, the auditor should understand the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include—

- *The procedures used to enter transaction totals into the general ledger.* In some information systems, IT may be used to automatically transfer such information from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to automatically transfer information there may be little or no visible evidence of such intervention in the information systems.

- *The procedures used to initiate, record, and process journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements, or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more difficult to identify through physical inspection of printed documents.
- *Other procedures used to record recurring and nonrecurring adjustments to the financial statements.* These are procedures that are not reflected in formal journal entries, such as consolidating adjustments, report combinations, and reclassifications.

.66 Monitoring. Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions.

.67 Examples of ongoing monitoring activities include the following:

- Management reviews of data produced by the entity's information system. Managers are in touch with operations and may question reports that differ significantly from their knowledge of operations. However, management should have a basis for believing the data are accurate. If errors exist in the information, management may make incorrect conclusions from its monitoring activities.
- Communications from external parties corroborate internally generated information or indicate problems. Customers implicitly corroborate billing data by paying their invoices. Conversely, customer complaints about billings could indicate system deficiencies in the processing of sales transactions. Similarly, bankers, regulators or other outside parties may communicate with the company on matters of accounting significance.
- External auditors regularly provide recommendations on the way internal control can be strengthened. Auditors may identify potential weaknesses and make recommendations to management for corrective action.
- Employees may be required to "sign off" to evidence the performance of critical control functions. The sign-off allows management to monitor the performance of these control functions.

Application to Medium and Large Businesses

.68 The control environments of medium to large businesses may differ from those of small business entities in the following ways:

- The presence of a Board of Directors or audit committee
- The presence of an internal audit function
- More formalized policies and procedures

Board of Directors or Audit Committee

.69 The control consciousness of a medium or large business is influenced significantly by the entity's board of directors and audit committee. In general, the board of directors should have an appropriate degree of management, technical, and other expertise. It should also have the necessary stature and mind-set so that it can adequately perform the necessary governance, guidance, and oversight responsibilities.

.70 Factors that influence the effectiveness of the board or audit committee include—

- Its independence from management.
- The experience and stature of its members.
- The extent of its involvement and scrutiny of activities.
- The appropriateness of its actions.
- The degree to which difficult questions are raised and pursued with management.
- Its interaction with internal and external auditors.

.71 The board of directors must be prepared to question and scrutinize management's activities, present alternative views and have the courage to act in the face of obvious wrongdoing. Because of this it is necessary that the board contain at least a critical mass of outside directors. The number should suit the entity's circumstances, but more than one outside director normally would be needed for a board to have the requisite balance.

Internal Audit Function

.72 The internal audit function is established within an entity to monitor and evaluate the adequacy and effectiveness of internal control. For entities with an internal audit function, you ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'—

- Organizational status within the entity.
- Application of professional standards.
- Audit plan, including the nature, timing, and extent of audit work.
- Access to records and any limitations on the scope of their activities.

.73 After obtaining an understanding of the internal audit function you may either—

- Conclude that the internal auditors' activities are not relevant to the financial statement audit and give no further consideration to the internal audit function,
- Identify relevant internal auditor activities, but conclude that it would not be efficient to consider further the work of the internal auditors, or
- Decide that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of the audit. In this case, you should assess the competence and objectivity of the internal audit function as outlined in SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AU section 322).

.74 You may also request direct assistance from the internal auditors. If so, you should follow the guidance in paragraph 27 of SAS No. 65 (AU section 322.27).

Formal Policies

.75 Medium and large businesses may communicate their policies in formal, written documents. For example, they may have a written code of conduct or human resource policies. The existence of formal policy documents is good, but as an auditor, your primary consideration is how the policies are implemented.

Computer Applications

.76 Small business entities are typically characterized by the use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.77 *Jones Grocery has a stand-alone, state-of-the-art PC at its main store. One other store has a computer—an Apple Macintosh Mr. and Mrs. Jones' daughter used at college. The PC at the main store is used to run the accounting software, which is an off-the-shelf product developed specifically for independent grocers. The payroll is processed by an outside payroll service.*

.78 In gaining an understanding of how computers are used in the business, you should consider the following:

- The acquisition of hardware and software
- Physical access
- Logical access
- User controls over outsider service bureau applications

Acquisition of Hardware and Software

.79 Companies should take steps to ensure they have compatible hardware and software. The use of compatible software reduces the risk of error, since there will be no need to transfer data from one format into another. Even small businesses should have a coherent plan for the purchase of computer hardware and software. If the business is growing, management should plan for the upgrade of the processor, random-access memory (RAM), or hard-disk storage.

.80 *Mr. and Mrs. Jones did not plan for the purchase of their computers. For several years, Mrs. Jones processed the accounting applications on an old PC with limited RAM and hard-disk storage. When the Jones' daughter opened the second store, she brought with her the Apple Macintosh she had in college. At first, she tried to transfer data from her store to the main store, but the software had problems converting from the Apple format, so the procedure was abandoned. At a trade show, Mr. Jones discovered a computer software program specifically designed for independent grocers. He was impressed with the program and decided that it fit his needs perfectly. However, his hardware was out of date, and so in order to run the software, he upgraded his hardware. The new software supposedly is able to handle Apple-formatted data, and the company has plans to transfer data from the second store electronically. There are no plans to install computers at the other stores.*

.81 *As the auditor of Jones Grocery, you should use this understanding of the company computer system to help plan the audit. For example, they plan to transfer data from the Apple to the PC. What sort of errors might occur in the transfer? What steps has the client taken to prevent or detect those errors? You also know that stores three through eight are on a manual system. What types of errors might occur in a manual system? What is the risk that those errors will occur?*

.82 Entities should also establish policies and procedures to mitigate the risk of computer viruses being introduced into their systems. Viruses can cause the loss of data and programs. A virus has the ability to attach itself to a program and infect other programs and systems. Although some viruses merely write messages across the screen, others can cause serious damage to disk files or shut down a network by replicating millions of times and filling all available memory or disk storage.

.83 Methods to prevent the introduction of viruses and to recover from a virus attack include the following:

- Obtain recognized software from reputable sources and only accept delivery of the software in the manufacturer's sealed package.
- Make multiple generations of backups. A virus that is not detected initially may be copied onto more recent backup copies, while the older versions may not be infected.

- Prohibit the use of unauthorized programs introduced by employees.
- Prohibit downloading of untested software from sources such as dial-up bulletin boards.
- Use virus protection software to screen for virus infections.

Physical Security

.84 Physical security—primarily backup and contingency planning—often is ignored by small businesses in a microcomputer environment. Poor backup procedures can result in the loss of important data that are very difficult, time-consuming and costly to recreate, if they can be recreated at all.

.85 Your clients should have established procedures for the periodic backup of data files and applications. Critical applications and files should be stored off-site with corresponding documentation in the event that on-site files become unavailable.

Logical Access

.86 Logical access to computer applications and data files may not be formally or rigorously controlled in a small business. This leaves the company exposed to the risk that files could be inappropriately manipulated or unauthorized transactions entered into the system. For example, without logical access controls a user may be able to enter any or all sections of a general ledger or other financial module and perform file maintenance such as changing the address of an accounts receivable customer or data used to calculate payroll.

.87 Management should identify confidential and sensitive data for which access should be restricted. Mechanisms such as password control or the use of menus should be used to limit the access to that data.

.88 In a microcomputer environment, password control may be installed over the operating system using a shell program to prevent the user from accessing menu options of a program. Even if such a restriction exists, a sophisticated user can often bypass the shell by using a utility. Therefore, the use of utility programs should be controlled or monitored carefully.

User Controls Over Computer Service Organization Applications

.89 Entities may use an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in SAS No. 70, *Service Organizations*, as amended by SAS Nos. 88 and 98, *Omnibus Statement on Auditing Standards—2002* (AU section 324).

.90 When using an outside computer service organization, most small businesses typically retain the responsibility for authorizing transactions and maintaining the related accountability. The computer service organization merely records user transactions and processes the related data. In these circumstances, the user (the small business) should maintain controls over the input and output to prevent or detect material misstatement. When the service organization initiates, executes, and does the accounting processing of the user organization's transactions, it may not be practicable for the user organization to implement effective controls for those transactions.

.91 *Jones Grocery uses an outside computer service to process payroll. Time cards are gathered for each store and reviewed by the store manager before being sent to the main store. Mrs. Jones reviews the time cards for the store managers and checks to make sure all personnel have submitted time cards for the pay period. All other payroll transactions such as pay rates, withholdings, etc. are sent directly to Mrs. Jones. She forwards all information to the payroll service, which prepares the checks and produces a payroll register. Mrs. Jones reviews the register and checks for any obvious misstatements, before she distributes the checks.*

Application to Medium or Large Businesses

.92 Medium and large businesses typically have more complicated computer processing systems than small businesses. They also tend to use the computer for a greater amount of processing. For example, a small business may prepare customer invoices manually by looking up prices on a master price list. A medium size business may maintain master price information on a computer file and use the computer to generate packing slips, sales invoices, and reports of unmatched documents.

.93 Medium and large businesses are also typically characterized by a separate management information services (MIS) department with formally defined job descriptions and responsibilities.

.94 Instead of using off-the-shelf, unmodified software, the medium or large business will modify standard software or develop their own applications. Their software may be more complicated than that used by the small business; for example, they may use a database management system or telecommunications software.

.95 Medium and large businesses often use a mainframe computer in conjunction with microcomputers or a local area microcomputer network. Information is frequently transferred between the mainframe and microcomputers that may be located on-site or at a remote location.

.96 Control activities in a computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up
- Computer general control activities

.97 *User Controls.* User control activities are manual checks of the completeness and accuracy of computer output against source documents or other input. For example, an entity may have programmed procedures in a billing system that calculate sales invoice amounts from shipping data and master-price files. The entity may also have a procedure to manually check the completeness and accuracy of the invoices. In many systems, user controls relate only to the completeness of records and not to the accuracy of processing.

.98 *Programmed Control Activities and Manual Follow-up Activities.* Programmed control activities are those that are built into the computer processing program; for example, the generation of an exception report. However, an exception report is useless unless the client follows up on the items listed. Thus, in addition to understanding the nature of the programmed control activities, you also need to understand the related manual follow-up procedures.

.99 *Computer General Control Activities.* If computer general control activities operate effectively, there is greater assurance that programmed control activities are properly designed and function consistently throughout the period. You may plan to understand computer general control activities to provide evidence that—

- Programs are properly designed and tested in development.
- Changes to programs are properly made.
- Computer operations ensure the proper use of application programs and data files.
- Adequate access controls reduce the risk of unauthorized changes to the program and data files.

.100 The following table summarizes computer general control activities.

<i>Area</i>	<i>Control Objectives</i>	<i>Example Controls</i>
Program Development	<ul style="list-style-type: none"> Controls ensure that new applications systems are suitably authorized, designed, and tested 	<ul style="list-style-type: none"> Users are involved in the design and approval of systems Checkpoints where users review the completion of various phases of the application Development of test data and testing of the program User involvement in the review of tests of the program Adequate procedures to transfer programs from development to production libraries
Program Changes	<ul style="list-style-type: none"> Controls over changes to existing programs and systems ensure that modifications to application programs are suitably approved, designed, tested, and implemented 	<ul style="list-style-type: none"> Same as program development User involvement Adequate testing Adequate transfer activities Segregation of duties between programmers and production libraries
Computer Operations	<ul style="list-style-type: none"> Controls ensure that application programs are used properly and that proper data files are used during processing 	<ul style="list-style-type: none"> Review of lists of regular and unscheduled batch jobs by operations management Use of menu-driven job control instruction sets Jobs executed only from the operator's terminal Adequate procedures for managing and backing up data and program files
Access	<ul style="list-style-type: none"> Controls should prevent or detect unauthorized changes to programs and to data files supporting the financial statements 	<ul style="list-style-type: none"> Programmers have limited access to production programs, live data files, and job control language Operators have limited access to source code and individual elements of data files Users have access only to defined programs and data files

Obtaining an Understanding of Significant Account Balances and Transaction Cycles

.101 You should obtain an understanding of the classes of transactions in your client's operations that are significant to the financial statements. For less significant classes of transactions or account balances, an understanding of controls that have a pervasive effect on the organization is usually sufficient.

.102 For significant transactions and account balances you should obtain an understanding of—

- The procedures, both automated and manual, by which transactions are initiated, recorded, processed, and reported from their occurrence to their inclusion in the financial statements.

- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions.
- How the information system captures other events and conditions that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.103 Accounting Processing. You should obtain an understanding of how your client processes accounting information—from the initiation of the transaction to its inclusion in the financial statements. This understanding should include how the computer is used to process data. Your understanding involves knowledge of the ways in which transactions are valued, classified, and summarized in data files, journals, or ledgers. For some transactions, there may be several significant processing activities and accounting records, including the use of computer programs. Other transactions may involve only limited processing activities performed manually.

.104 *At Jones Grocery, sales are initiated by customers and recorded in the cash register. At the end of the day the cash register totals are reconciled to the cash on hand, and a deposit is prepared for the day's receipts. On a weekly basis, the daily cash register tapes are batched for each store, forwarded to Mrs. Jones, and entered into the computer. The computer generates a sales register, a sales analysis report, and posts the sales totals to the general ledger. Also, the processing of inventory transactions (receipt of goods, sales, spoilage, etc.) involves several processing activities that are linked in the inventory module of the software package. On the other hand, recording depreciation expense is fairly simple. Fixed assets and the related depreciation are maintained on a computer spreadsheet, and each month, Mrs. Jones prepares a journal entry to record depreciation.*

.105 Understanding the accounting processing also involves understanding the information used for processing and when processing occurs. For example, when considering the completeness assertion, you normally should understand whether transactions entered into the computer system are processed immediately or in batches and how frequently batches are processed.

.106 The processing of accounting information may involve "end user computing." End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person.

.107 *Mrs. Jones developed and maintains the fixed asset spreadsheet that serves as the source document for her monthly depreciation expense journal entry.*

.108 In general, the product of end user computing may be used to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, the fixed-asset spreadsheet is separate from the Jones Grocery general ledger software package.
- Make significant accounting decisions. For example, a spreadsheet application may be used to generate information used to write down inventory.
- Accumulate footnote information. For example, a spreadsheet may be used to calculate the five-year debt maturity disclosure.

.109 Generally, end users have no training in the formal computer application development process. Accordingly, applications developed by end users are often inadequately tested, and the development process is often not documented. This situation can cause significant difficulties for an organization if the end user computing application is critical to making business or financial decisions.

.110 The access to end user computing applications may also be an audit concern. Many computer applications used in end user computing come with on-line systems that are capable of restricting users to specific applications, specific departments, or even specific fields. Often, however, these access restrictions facilities are not implemented.

.111 To address these concerns and to ensure the end user applications process data completely and accurately, you should generally look for control policies and procedures that—

- Require all significant end user applications to be adequately tested before use.
- Prescribe documentation standards for significant end user applications.
- Provide for adequate access controls to data.
- Provide a mechanism to prevent or detect the use of incorrect versions of data files.
- Provide for appropriate applications controls, for example, edit checks, range tests, or reasonableness checks.
- Support meaningful user reconciliations.

.112 *Accounting Records, Supporting Information, and Specific Accounts.* In general you will want to identify the following for your client's significant accounts and transactions:

- Source documents
- The conversion of documents to computer media
- The nature of computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.113 Your client's accounting systems may create many documents, files, and reports that are useful for managing the organization, but you need to understand only those aspects that are relevant to the financial statements.

.114 *At Jones Grocery, the sales analysis report described in AAM section 4200.104 is used for management information and analysis. The documents and reports relevant to the financial statements are the daily cash register tapes and the computer-generated sales register.*

.115 *Other Significant Events and Conditions.* You should understand how the entity's information system captures other events and conditions that are significant to the financial statements. This might involve, for example, nonrecurring or unusual transactions or adjustments and nonrecurring estimates.

.116 *A broken water line, which is an uninsured risk, spoiled a large amount of produce and dry goods in one of the Jones Grocery stores. Based on a list of the lost inventory provided by the store manager, Mrs. Jones recorded a large spoilage loss.*

.117 *Financial Reporting Process.* When gaining an understanding of the financial reporting process, you may determine the extent of client procedures to prepare accounting estimates (when significant accounting estimates are called for) and information for significant disclosures. You also should understand the way in which general ledger information is summarized to determine how the amounts and disclosures are reported in the financial statements.

Segregation of Duties and Management Override

.118 Small businesses are typically characterized by—

- A dominant owner-manager.
- A lack of segregation of duties.

.119 If your client has these characteristics, you should be sure to address the risks they pose to the entity.

.120 In general, duties should be divided, or segregated, among different people to reduce the risk of error or inappropriate actions. For instance, responsibilities for authorizing transactions, recording them, and handling the related assets should be divided.

.121 Even small businesses with only a few employees can usually parcel out responsibilities to achieve the necessary checks and balances. If that is not possible—as may occasionally be the case—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. Thus, a dominant owner-manager may be a positive element in the design of internal controls.

.122 A dominant owner-manager may be a negative element in the design of internal control when he or she is able to override established policies and procedures.

.123 Management *override* should be distinguished from management *intervention*. Management *intervention* is discussed in AAM section 4200.27 and is described as the overrule of internal control for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the system.

.124 In contrast, management *override* is the overrule of internal control for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

.125 An owner-manager might override the control system for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

.126 When gaining an understanding of internal control, you should assess the risk of management override.

Assessing Internal Control Strengths and Weaknesses

.127 When obtaining your understanding of internal control, you should consider the *collective* effect of strengths and weaknesses in various control environment factors. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by top management to overstate earnings.

.128 Internal control strengths may indicate account balances, transaction classes, or assertions where you can assess control risk below the maximum. See additional guidance in AAM section 4600. Internal control weaknesses usually indicate areas where a primarily substantive audit approach is required. However, in situations where electronic evidence (information transmitted, processed, maintained, or accessed by electronic means) is significant, testing of the related internal control generally will be necessary to obtain competent evidential matter.

.129 In rare circumstances, your understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause you to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity's records may cause you to conclude it is unlikely that sufficient competent evidential matter will be available to support an opinion on the financial statements.

.130 If you determine the entity is unauditably, you should consider withdrawing from the engagement.

[The next page is 4301.]

AAM Section 4300

Illustrative Internal Control Forms—Small Business

.01 The following are illustrative internal control forms you might use to document your understanding of internal control sufficient to plan an audit. The illustrative questions are numbered merely for organizational purposes. The numbers are in no way intended to infer completeness or a preferred sequence. These forms may require modifications to meet the needs, preferences and circumstances of individual firms and their clients. Whenever you use standardized forms, checklists, or questionnaires, you should recognize that important matters in a particular set of circumstances may not be covered.

Instructions

.02 The forms in AAM sections 4310 and 4320 may be used on all small business audit engagements. Small businesses are typically characterized by—

- A single owner or a small group of owners who manage the business on a day-to-day basis.
- A small number of employees involved in the accounting function.
- No outside board of directors or internal audit function.
- The use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.03 If your client does not have the characteristics of a small business, you should consider completing the internal control forms for medium to large businesses located in AAM section 4400.

.04 In every audit, you should obtain an understanding of each of the components of internal control sufficient to plan the audit. These forms should be used as a tool in documenting your understanding of internal control, how internal controls for your client are designed, and whether they have been placed in operation.

.05 These forms should be used in conjunction with other forms in certain circumstances:

- *Control Environment Checklist—Small Business Computer Applications* [AAM section 4310]. To be used whenever the client uses microcomputers or outside service organizations to process significant accounting information.
- *Financial Reporting Information Systems and Controls Checklist* [AAM section 4320]. To be used for each significant account and transactions cycle.

.06 These forms are appropriate whenever you plan a primarily substantive audit approach (see paragraph .08 below). That is, their completion generally results in control risk being assessed at or slightly below the maximum for all assertions related to account balances and transactions.

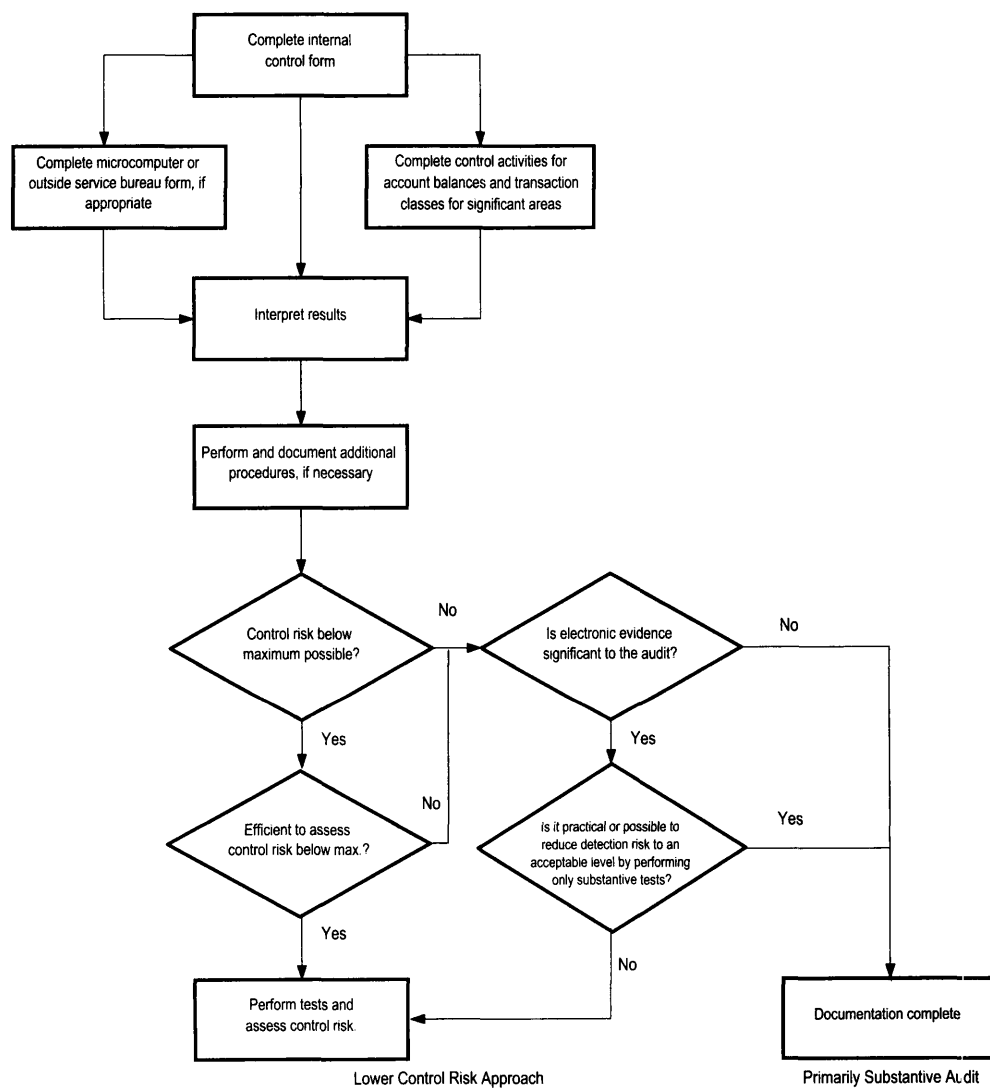

.07 If you plan a lower control risk assessment for certain assertions you are required to—

- Identify specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions, and
- Perform tests of controls to evaluate their effectiveness.

.08 In situations where significant audit evidence is transmitted, processed, maintained, or accessed electronically, it generally will be necessary to test the internal control surrounding the electronic evidence (for example, controls over generation, storage, manipulation, and transmission), even if a primarily substantive audit approach is followed. (This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form.) This is because the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. In these situations the auditor should perform tests of controls to gather evidence to support an assessed level of control risk below the maximum for affected assertions. If the auditor concludes control risk must be assessed at the maximum in such situations or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the scope limitation.

.09 These forms are organized to conform to the control components and overall internal control framework described in the Audit Guide *Consideration of Internal Control in a Financial Statement Audit*. This framework is only a way for you to consider the impact of internal control on an audit. The classification of any specific control into a particular component should not be your primary concern. Rather, your primary consideration is whether a specific control affects financial statement assertions.

.10 The following flowchart describes how this form can be used in conjunction with the other forms included in this section to document your understanding of internal controls.

Interpreting the Results

.11 When obtaining an understanding of internal control, you should consider the *collective* effect of the strengths and weaknesses in various control components. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by the owner-manager to overstate earnings.

.12 Answers that fall toward the right side of the form ("Strongly Agree" or "Somewhat Agree") indicate areas of strength in the control environment. You should consider whether these areas of strength indicate that a control risk assessment below the maximum may be possible for some assertions.

.13 Answers that fall toward the left side of the form ("Strongly Disagree" or "Somewhat Disagree") indicate areas of weakness in the entity's internal controls. You should assess how these areas of weakness affect the planning of the audit. This assessment should be documented in section V of the form. In making this assessment, you normally focus on—

- The types of material misstatements that could occur as a result of the identified weakness, and
- The risk that those misstatements will occur.

Documenting a Conclusion

.14 After completing this form, the Financial Reporting Information Systems and Controls Checklist for significant areas, and the Control Environment Checklist—Microcomputers and Outside Service Bureaus, you should document your conclusion regarding internal control. In order to perform a primarily substantive audit, you must understand the entity's internal control sufficiently—

- To assess the risk of material misstatement in assertions related to material financial statement components, and
- To design effective substantive procedures.

.15 If the completion of this form is not sufficient for you to obtain the necessary level of understanding listed in AAM section 4300.13, you should perform and document the results of additional tests to gain that level of understanding.

.16

I. Document Your Understanding of the Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
A. Control Environment Factors					
<i>Integrity and Ethical Values</i>					
1. The business owners and management have high ethical and behavioral standards.	_____	_____	_____	_____	_____
2. Management has communicated (either formally through written policies or informally by its own behavior) the ethical and behavioral standards for the entity.	_____	_____	_____	_____	_____
3. The owner effectively segregates personal funds, income, and expenses from those of the business.	_____	_____	_____	_____	_____
4. Management reinforces its ethical and behavioral standards.	_____	_____	_____	_____	_____
5. Management appropriately deals with signs that problems exist (e.g., defective products or hazardous waste) even when the cost of identifying and solving the problem could be high.	_____	_____	_____	_____	_____
6. Management has removed or reduced incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts.	_____	_____	_____	_____	_____
For example, there is generally <i>no</i> —					
• Pressure to meet unrealistic performance targets.	_____	_____	_____	_____	_____
• High performance-dependent rewards.	_____	_____	_____	_____	_____
• Upper and lower cutoffs on bonus plans.	_____	_____	_____	_____	_____
7. Management has provided guidance on the situations and frequency with which intervention of established controls is appropriate.	_____	_____	_____	_____	_____
8. Management intervention is documented and explained appropriately.	_____	_____	_____	_____	_____
<i>Commitment to Competence</i>					
9. Management has appropriately considered the knowledge and skill levels necessary to accomplish financial reporting tasks.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
10. Employees with financial reporting tasks generally have the knowledge and skills necessary to accomplish those tasks.	_____	_____	_____	_____	_____
<i>Management's Philosophy and Operating Style</i>					
11. Management moves carefully, proceeding only after carefully analyzing the risks and potential benefits of accepting business risks.	_____	_____	_____	_____	_____
12. Management is generally cautious or conservative in financial reporting and tax matters.	_____	_____	_____	_____	_____
13. There is relatively low turnover of key personnel.	_____	_____	_____	_____	_____
14. There is <i>no</i> undue pressure to meet budget, profit, or other financial and operating goals.	_____	_____	_____	_____	_____
<i>Organizational Structure</i>					
15. The entity has defined, either formally or informally, key areas of authority and responsibility.	_____	_____	_____	_____	_____
16. The entity has defined, either formally or informally, appropriate lines of reporting.	_____	_____	_____	_____	_____
<i>Assignment of Authority and Responsibility</i>					
17. Authority and responsibility are delegated only to the degree necessary to achieve the company's objectives.	_____	_____	_____	_____	_____
18. Proper resources are provided for personnel to carry out their duties.	_____	_____	_____	_____	_____
19. Personnel understand the entity's objectives and know how their individual actions interrelate and contribute to those objectives.	_____	_____	_____	_____	_____
20. Personnel recognize how and for what they will be held accountable.	_____	_____	_____	_____	_____
<i>Human Resource Policies and Practices</i>					
21. The entity generally hires the most qualified people for the job.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
22. Hiring practices emphasize educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior.	_____	_____	_____	_____	_____
23. Hiring practices include formal, in-depth employment interviews.	_____	_____	_____	_____	_____
24. Prospective employees are told of the entity's history, culture and operating style.	_____	_____	_____	_____	_____
25. The entity provides training opportunities, and employees are well-trained.	_____	_____	_____	_____	_____
26. Promotions and rotation of personnel are based on periodic performance appraisals.	_____	_____	_____	_____	_____
27. Methods of compensation, including bonuses, are designed to motivate personnel and reinforce outstanding performance.	_____	_____	_____	_____	_____
28. Management does not hesitate to take disciplinary action when violations of expected behavior occur.	_____	_____	_____	_____	_____
B. Other Internal Control Components With a Pervasive Effect on the Organization					
<i>Risk Assessment</i>					
1. Special action is taken to ensure new personnel understand their tasks.	_____	_____	_____	_____	_____
2. Management appropriately considers the control activities performed by personnel who change jobs or leave the company.	_____	_____	_____	_____	_____
3. Management assesses how new accounting and information systems will impact internal control.	_____	_____	_____	_____	_____
4. Management reconsiders the appropriateness of existing control activities when new accounting and information systems are developed and implemented.	_____	_____	_____	_____	_____
5. Employees are adequately trained when accounting and information systems are changed or replaced.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
6. Accounting and information system capabilities are upgraded when the volume of information increases significantly.	_____	_____	_____	_____	_____
7. Accounting and data processing personnel are expanded as needed when the volume of information increases significantly.	_____	_____	_____	_____	_____
8. The entity has the ability to reasonably forecast operating and financial results.	_____	_____	_____	_____	_____
General Control Activities					
9. The entity prepares operating budgets and cash flow projections.	_____	_____	_____	_____	_____
10. Operating budgets and projections lend themselves to effective comparisons with actual results.	_____	_____	_____	_____	_____
11. Significant variances between budgeted or projected amounts and actual results are reviewed and explained.	_____	_____	_____	_____	_____
12. The company has adequate safekeeping facilities for custody of the accounting records such as fireproof storage areas and restricted access cabinets.	_____	_____	_____	_____	_____
13. The entity has a suitable record retention plan.	_____	_____	_____	_____	_____
14. Periodically, personnel compare counts of assets to amounts shown on control records.	_____	_____	_____	_____	_____
15. There is adequate segregation of duties among those responsible for authorizing transactions, recording transactions, and maintaining custody of assets.	_____	_____	_____	_____	_____
Information and Communication					
16. Management receives the information they need to carry out their responsibilities.	_____	_____	_____	_____	_____
17. Information is provided at the right level of detail for different levels of management.	_____	_____	_____	_____	_____
18. Information is available on a timely basis.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
19. Information with accounting significance (for example, slow paying customers) is transmitted across functional lines in a timely manner.	_____	_____	_____	_____	_____
Monitoring					
20. Customer complaints about billings are investigated for their underlying causes.	_____	_____	_____	_____	_____
21. Communications from bankers, regulators, or other outside parties are monitored for items of accounting significance.	_____	_____	_____	_____	_____
22. Management responds appropriately to auditor recommendations on ways to strengthen internal controls.	_____	_____	_____	_____	_____
23. Employees are required to "sign off" to evidence the performance of critical control functions.	_____	_____	_____	_____	_____

II. Determine Other Areas for Evaluation

The completion of section I of this form is the first of several forms that may be used to document your understanding of internal control sufficiently to plan a primarily substantive audit. It is important to remember that in entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of the controls surrounding the electronic environment may not be enough. This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gain competent evidential matter—even in a primarily substantive approach. In the space provided below, determine which of the following areas apply. A "Yes" answer generally indicates you should complete the related form.

	<u>No</u>	<u>Yes</u>	<u>W/P Ref.</u>
Microcomputers or Outside Service Bureaus			
1. The company uses microcomputers or outside computer service bureaus to process significant accounting information.	_____	_____	
If "yes," the Control Environment Checklist—Small Business Computer Applications can be found at—			_____

Significant Account Balances and Transaction Cycles

2. The following account balances or transaction cycles are significant to the company's financial statements.			
a. Revenue cycle, including sales, accounts receivable, or cash receipts. (Normally considered significant for most small businesses.)	_____	_____	
If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____

	<i>No</i>	<i>Yes</i>	<i>W/P Ref.</i>
b. Purchasing cycle, including purchasing, accounts payable, or cash disbursements. (Normally considered significant for most small businesses.)	_____	_____	_____
If “yes,” the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
c. Inventory, including inventory and cost of sales.	_____	_____	_____
If “yes,” the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
d. Financing, including investments and debt.	_____	_____	_____
If “yes,” the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
e. Property, plant, and equipment, including fixed assets and depreciation.	_____	_____	_____
If “yes,” the related Financial Reporting Information Systems and Controls Checklist can be found at—			_____
f. Payroll.	_____	_____	_____
If “yes,” the related Financial Reporting Information Systems and Controls checklist can be found at —			_____

III. Assess Segregation of Duties

An appropriate segregation of duties often appears to present difficulties in small business organizations, at least on the surface. Even companies that have only a few employees, however, can usually parcel out their responsibilities to achieve the necessary checks and balances. But if that is not possible—as may occasionally be the case—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. For example, it is not uncommon, where there is a risk of improper cash payments, for the owner-manager to be named the only authorized check signer, or to require that monthly bank statements be delivered unopened directly to him or her for review of paid checks. In the space provided below, assess the segregation of duties for the company based on the completion of sections I and II of this form. Your comments should address—

- The person with incompatible responsibilities and the nature of those responsibilities.
- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of a lack of segregation of duties and the type of those misstatements.
- How substantive procedures will be designed to limit the risk of those misstatements to an acceptable level.

IV. Assess the Risk of Management Override

Even in effectively controlled entities—those with generally high levels of integrity and control consciousness—a manager might be able to override controls. The term “management override” means—

Overruling prescribed policies or procedures for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity’s financial condition or compliance status.

An owner-manager might override controls for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

Management override is different from management intervention, which is the overrule of prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the system.

In the space below, assess the risk of management *override* for this company. You should consider the risk that management override possibilities exist, the risk that management will take advantage of those possibilities, and any evidence that management has engaged in override practices. If the risk of management override is greater than low, indicate how planned audit procedures will reduce this risk to an acceptable level.

V. Interpret Results

You should consider the *collective* effect of the strengths and weaknesses in various control components. Management’s strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by the owner-manager to overstate earnings.

A. Areas That May Allow for Control Risk to Be Assessed Below the Maximum

Based on the completion of sections I through IV of this form you may have become aware of certain accounts, transactions and assertions where it may be possible and efficient to plan a control risk assessment below the maximum. In the area below, document those accounts, transactions, and assertions and the related tests of controls.

<u>Accounts, Transactions, and Assertions</u>	<u>Test of Controls Working Paper Reference</u>
<hr/>	<hr/>
<hr/>	<hr/>
<hr/>	<hr/>
<hr/>	<hr/>

B. Areas of Possible Control Weakness

Based on the completion of sections I through IV of this form you may have become aware of certain areas that may indicate possible control weaknesses, *not including those areas relating to segregation of duties and management override documented in sections III and IV.*

In the space provided below, document those areas of possible weakness and the impact the identified weakness will have on the audit. Discuss—

- The nature of the identified possible weakness.
- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of the weakness and the type of those misstatements.
- How substantive procedures will be designed to reduce the risk of those misstatements to an acceptable level.

[illegible]

VI. Document Your Conclusion With Respect to Internal Controls

Control Environment Checklist—Small Business Computer Applications

.01 This questionnaire may be used to document your understanding of the way computers are used in the information and communication systems of a small business. This questionnaire should be used when the client uses either or both of the following to process significant accounting information.

- Microcomputers and off-the-shelf, unmodified software
- Outside computer service bureaus

.02

I. Microcomputer Hardware

Complete the form on the next page to describe the company's microcomputer hardware; for example:

Computer Model/Make:	Gateway Sb-4100-c
Processor	Intel Pentium 4 (2.4 GHz)
Memory and other information	512 MB memory; 80GB HD; 48x/24x/48x CD-RW/DVD combo
Software/Operating System:	Microsoft Office XP Small Business and Quicken
Peripherals:	Dedicated Printer

CONTROL ENVIRONMENT CHECKLIST
SMALL BUSINESS MICROCOMPUTER HARDWARE

<i>Person/Department</i>	<i>CPU Model/Make</i>	<i>Processor</i>	<i>RAM</i>	<i>Operating System</i>	<i>Hard-Disk Storage</i>	<i>Peripherals</i>

II. Microcomputer Accounting Software

Describe the name and version of the microcomputer accounting software package.

Which of the following modules have been implemented?

<u>Module</u>	<u>Module Implemented</u>		
	<u>Yes</u>	<u>No</u>	<u>N/A</u>
General ledger	<hr/>	<hr/>	<hr/>
Cash receipts	<hr/>	<hr/>	<hr/>
Cash disbursements	<hr/>	<hr/>	<hr/>
Accounts receivable	<hr/>	<hr/>	<hr/>
Accounts payable	<hr/>	<hr/>	<hr/>
Inventory	<hr/>	<hr/>	<hr/>
Fixed assets and depreciation	<hr/>	<hr/>	<hr/>
Other:	<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>	<hr/>

III. Other Microcomputer Software

List the other software products used by the company.

<u>Name and Version</u>
<hr/>
<hr/>
<hr/>
<hr/>
<hr/>
<hr/>
<hr/>
<hr/>

IV. Local Area Network

If the company processes significant financial information in a local area network (LAN) environment, consider attaching a description of the LAN configuration, including the location of the server and workstations. Describe the following:

<u>Name and Version</u>
Operating system
Network software
Network management software
<hr/>
<hr/>

V. Microcomputer Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
Acquisition of Hardware					
1. The company has a coherent management plan for the purchase of and continued investment in computer hardware.	_____	_____	_____	_____	_____
2. The processing chips, RAM, and hard-disk storage are sufficient to meet the company's needs.	_____	_____	_____	_____	_____
3. The company's computer hardware is safely and properly installed.	_____	_____	_____	_____	_____
4. The company has standard, regular hardware maintenance procedures	_____	_____	_____	_____	_____
Acquisition of Software					
5. The company has a coherent management plan for the purchase and continued investment in computer software.	_____	_____	_____	_____	_____
6. The company researches software products to determine whether they meet the needs of the intended users.	_____	_____	_____	_____	_____
7. The company's application programs are compatible with each other.	_____	_____	_____	_____	_____
8. The company obtains recognized software from reputable sources and only accepts delivery if the software is in the manufacturer's sealed package.	_____	_____	_____	_____	_____
9. Company policy prohibits the use of unauthorized programs introduced by employees.	_____	_____	_____	_____	_____
10. Company policy prohibits the downloading of untested software from sources such as dial-up bulletin boards.	_____	_____	_____	_____	_____
11. The company uses virus protection software to screen for virus infections.	_____	_____	_____	_____	_____
Physical Security					
12. The company has established procedures for the periodic back-up of files.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
13. Back-up procedures include multiple generations.	_____	_____	_____	_____	_____
14. Back-up files are stored in a secure, off-site location.	_____	_____	_____	_____	_____

Logical Access

15. Management has identified confidential and sensitive data for which access should be restricted.	_____	_____	_____	_____	_____
16. Procedures are in place to restrict access to confidential and sensitive data.	_____	_____	_____	_____	_____
17. Procedures are in place to reduce the risk of unauthorized transactions being entered into processing.	_____	_____	_____	_____	_____
18. The use of utility programs is controlled or monitored carefully.	_____	_____	_____	_____	_____

General Operations

19. Clear job descriptions exist for the use of microcomputers.	_____	_____	_____	_____	_____
20. Management periodically assesses the training needs for personnel who use microcomputers to process significant accounting information.	_____	_____	_____	_____	_____
21. Personnel who use microcomputers to process significant accounting information are adequately trained.	_____	_____	_____	_____	_____

VI. Outside Computer Service Organizations

This section should be used to document your understanding of how the company uses an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in SAS No. 70, *Service Organizations*, as amended (AU section 324).

1. List the name of the service organization and the general types of services it provides.

2. Are the general ledger and other primary accounting records processed by an outside service organization? _____ Yes _____ No

If yes, describe the source documents provided to the service organization, the reports and other documentation received from the organization, and the controls maintained by the user over input and output to prevent or detect material misstatement.

3. List the type and date of the most recent service auditor's report.

[The next page is 4341.]

AAM Section 4320

Financial Reporting Information Systems and Controls Checklist— Small Business

Revenue Cycle

Revenue, Accounts Receivable, and Cash Receipts

.01 This checklist may be used on any small business audit engagement when the revenue cycle is significant. Normally, the revenue cycle is significant in most small businesses.

.02 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the revenue cycle should be sufficient for you to understand—

- How cash and credit sales are initiated.
- How cash receipts are recorded.
- How sales and cash receipts are processed by the financial reporting information system.
- The accounting records and supporting documents involved in the processing and reporting of sales, accounts receivable, and cash receipts.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.03 This checklist documents your understanding of how internal control over the revenue cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.04 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.05

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Revenue and Accounts Receivable				
A. Initiating Sales Transactions				
1. Cash sales are controlled by cash registers or prenumbered cash receipts forms.	_____	_____	_____	_____
2. Someone other than the cashier has custody of the cash register tape compartment.	_____	_____	_____	_____
3. Someone other than the cashier takes periodic readings of the cash register and balances the cash on hand.	_____	_____	_____	_____
4. Credit limits are established by the owner or credit manager for customers who purchase on account.	_____	_____	_____	_____
5. Prenumbered sales orders are used and accounted for.	_____	_____	_____	_____
6. Prenumbered shipping documents are used to record shipments.	_____	_____	_____	_____
7. Shipping document information is verified prior to shipment.	_____	_____	_____	_____
8. All shipping documents are accounted for.	_____	_____	_____	_____
9. Prenumbered credit memos are used to document sales returns.	_____	_____	_____	_____
10. All credit memos are approved and accounted for.	_____	_____	_____	_____
11. Credit memos are matched with receiving reports for returned goods.	_____	_____	_____	_____
B. Processing Sales Transactions				
12. Prenumbered invoices are prepared promptly after goods are shipped.	_____	_____	_____	_____
13. Quantities on the invoices are compared to shipping documents.	_____	_____	_____	_____
14. The prices on the invoices are current.	_____	_____	_____	_____
15. Invoices are mailed to customers on a timely basis.	_____	_____	_____	_____
16. Invoices are posted to the general ledger on a timely basis.	_____	_____	_____	_____
17. Standard journal entries are used to record sales.	_____	_____	_____	_____
18. Invoices are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.	_____	_____	_____	_____
19. Credit memos are posted to the general ledger on a timely basis.	_____	_____	_____	_____
20. Credit memos are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.	_____	_____	_____	_____
21. Procedures exist for determining proper cut-off of sales at month end.	_____	_____	_____	_____
22. The sales and accounts receivable balances shown in the general ledger are reconciled to the sales and accounts receivable subsidiary ledgers on a regular basis.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
C. Estimates and Disclosures for Sales Transactions				
23. The accounting system generates a monthly aging of accounts receivable.	_____	_____	_____	_____
24. The owner uses the accounts receivable aging to investigate, write-off or adjust delinquent accounts receivable.	_____	_____	_____	_____
25. The owner uses the accounts receivable aging and other information to estimate an allowance for doubtful accounts.	_____	_____	_____	_____
26. The person responsible for financial reporting identifies significant concentrations of credit risk.	_____	_____	_____	_____
II. Cash Receipts				
A. Initiating Cash Receipts Transactions				
1. The entity maintains records of payments on accounts by customer.	_____	_____	_____	_____
2. Someone other than the person responsible for maintaining accounts receivable opens the mail and lists the cash receipts.	_____	_____	_____	_____
3. Cash receipts are deposited intact.	_____	_____	_____	_____
4. Cash receipts are deposited in separate bank accounts when required.	_____	_____	_____	_____
B. Processing Cash Received on Account				
5. Cash receipts are posted to the general ledger on a timely basis.	_____	_____	_____	_____
6. Cash receipts are posted to the accounts receivable subsidiary ledger on a timely basis.	_____	_____	_____	_____
7. Standard journal entries are used to post cash receipts.	_____	_____	_____	_____
8. Timely bank reconciliations are prepared or reviewed by the owner or manager or someone independent of the cash receipts function.	_____	_____	_____	_____

End User Computing in the Revenue Cycle

.06 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet which shows amortization of premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.07 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the general accounting software.

.08 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet accumulates invoices for batch processing.

.09 In the space provided below, describe how end user computing is used in the revenue cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.10 Answer the following questions relating to procedures and controls over end user computing related to the revenue cycle.

		<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Revenue Cycle					
1.	End user applications listed in paragraph .09 of this form have been adequately tested before use.	_____	_____	_____	_____
2.	The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3.	Access controls limit access to the end user application.	_____	_____	_____	_____
4.	A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5.	The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.11 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the revenue cycle.

.12 In the space below, describe the revenue cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Purchasing Cycle

Purchasing, Accounts Payable, and Cash Disbursements

.13 This checklist may be used on any small business audit engagement where the purchasing cycle is significant. Normally, the purchasing cycle is significant for most small businesses.

.14 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the purchasing cycle should be sufficient for you to understand—

- How purchases are initiated and goods received.
- How cash disbursements are recorded.
- How purchases and cash disbursements are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of purchases, accounts payable, and cash disbursements.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.15 This checklist documents your understanding of how internal control over the purchasing cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing

of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.16 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.17

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Purchases and Accounts Payable				
A. Initiating Purchases and Receipt of Goods				
1. All purchases over a predetermined amount are approved by the owner.	_____	_____	_____	_____
2. Non-routine purchases (for example, services, fixed assets, or investments) are approved by the owner.	_____	_____	_____	_____
3. A purchase order system is used, prenumbered purchase orders are accounted for, and physical access to purchase orders is controlled.	_____	_____	_____	_____
4. Open purchase orders are periodically reviewed.	_____	_____	_____	_____
5. All goods are inspected and counted when received.	_____	_____	_____	_____
6. Prenumbered receiving reports, or a log, are used to record the receipt of goods.	_____	_____	_____	_____
7. The receiving reports or log indicate the date the items were received.	_____	_____	_____	_____
B. Processing Purchases				
8. Invoices from vendors are matched with applicable receiving reports.	_____	_____	_____	_____
9. Invoices are reviewed for proper quantity and prices, and mathematical accuracy.	_____	_____	_____	_____
10. Invoices from vendors are posted to the general ledger on a timely basis.	_____	_____	_____	_____
11. Invoices from vendors are posted to the accounts payable subsidiary ledger on a timely basis.	_____	_____	_____	_____
12. Standard journal entries are used to post accounts payable.	_____	_____	_____	_____
13. Accounts payable account per the general ledger is reconciled periodically to the accounts payable subsidiary ledger.	_____	_____	_____	_____
14. Statements from vendors are reconciled to the accounts payable subsidiary ledger.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
C. Disclosures				
15. Management has the information to identify vulnerability due to concentrations of suppliers (SOP 94-6).	_____	_____	_____	_____
II. Cash Disbursements				
A. Initiating Cash Disbursements				
1. All disbursements except those from petty cash are made by check.	_____	_____	_____	_____
2. All checks are recorded.	_____	_____	_____	_____
3. Supporting documentation such as invoices and receiving reports are reviewed before the checks are signed.	_____	_____	_____	_____
4. Supporting documents are canceled to avoid duplicate payment.	_____	_____	_____	_____
B. Processing Cash Disbursements				
5. Cash disbursements are posted to the general ledger on a timely basis.	_____	_____	_____	_____
6. Cash disbursements are posted to the accounts payable subsidiary ledger on a timely basis.	_____	_____	_____	_____
7. Standard journal entries are used to post cash disbursements.	_____	_____	_____	_____
8. Timely bank reconciliations are prepared or reviewed by the owner or manager or someone independent of the cash receipts function.	_____	_____	_____	_____

End User Computing in the Purchasing Cycle

.18 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.19 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the purchasing cycle to process significant accounting information outside of the general accounting software.

.20 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the off-the-shelf accounting software package. For example, a spreadsheet accumulates non-routine purchases for batch processing.
- Make significant accounting decisions.
- Accumulate footnote information. For example, a database of vendors provides information for possible concentration of risk disclosures.

.21 In the space provided below, describe how end user computing is used in the purchasing cycle. Describe—

- The person or department who performs the computing.

- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.22 Answer the following questions relating to procedures and controls over end user computing related to the purchasing cycle.

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Purchasing Cycle				
1. End user applications listed in paragraph .21 of this form have been adequately tested before use.	<hr/>	<hr/>	<hr/>	<hr/>
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	<hr/>	<hr/>	<hr/>	<hr/>
3. Access controls limit access to the end user application.	<hr/>	<hr/>	<hr/>	<hr/>
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	<hr/>	<hr/>	<hr/>	<hr/>
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	<hr/>	<hr/>	<hr/>	<hr/>

Information Processed by Outside Computer Service Organizations

.23 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client’s use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the purchasing cycle.

.24 In the space below, describe the purchasing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization’s responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?

- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Inventory

Inventory and Cost of Sales

.25 This checklist may be used on any small business audit engagement where inventory is a significant transaction cycle.

.26 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the inventory cycle should be sufficient for you to understand—

- How costs are capitalized to inventory.
- How cost is relieved from inventory.
- How inventory costs and cost of sales are processed by the financial reporting information system.
- The procedures used to take the physical inventory count.
- The accounting records and supporting documents involved in the processing and reporting of inventory and cost of sales.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.27 This checklist documents your understanding of how internal control over the inventory cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.28 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.29

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Inventory and Cost of Sales				
A. Capturing Capitalizable Costs¹				
1. The entity uses a cost accounting system to accumulate capitalizable costs.	_____	_____	_____	_____
2. The cost accounting system distinguishes between costs that should be capitalized for GAAP purposes and those that should be capitalizable for tax purposes.	_____	_____	_____	_____
3. The cost accounting system interfaces with the general ledger.	_____	_____	_____	_____
4. Production cost budgets are periodically compared to actual costs, and significant differences are explained.	_____	_____	_____	_____
B. Inventory Records				
5. The entity maintains adequate inventory records of prices and amounts on hand.	_____	_____	_____	_____
6. Withdrawals from inventory are based on prenumbered finished inventory requisitions, shipping reports, or both.	_____	_____	_____	_____
7. Additions to and withdrawals from inventory are posted to the inventory records and the general ledger.	_____	_____	_____	_____
8. Standard journal entries are used to post inventory transactions to the inventory records and the general ledger.	_____	_____	_____	_____
9. Inventory records are periodically reconciled to the general ledger.	_____	_____	_____	_____
10. Inventory records are reconciled to a physical inventory count.	_____	_____	_____	_____
C. Physical Inventory Counts				
11. Inventory is counted at least once a year.	_____	_____	_____	_____
12. Physical inventory counters are given adequate instructions.	_____	_____	_____	_____
13. Inventory count procedures are sufficient to provide an accurate count, including steps to ensure—				
• Proper cut-off.	_____	_____	_____	_____
• Identification of obsolete items.	_____	_____	_____	_____
• All items are counted once and only once.	_____	_____	_____	_____
• Tag control.	_____	_____	_____	_____
D. Estimates and Disclosures				
14. Management is able to identify excess, slow-moving, or obsolete inventory.	_____	_____	_____	_____

¹ You should also consider completing the Financial Reporting Information Systems and Controls Checklist for the purchasing cycle to document your understanding of how the purchase of inventory is initiated.

Procedures and Controls Over End User Computing

.34 Answer the following questions relating to procedures and controls over end user computing related to the inventory cycle.

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Inventory Cycle				
1. End user applications listed in paragraph .33 of this form have been adequately tested before use.	_____	_____	_____	_____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3. Access controls limit access to the end user application.	_____	_____	_____	_____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.35 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client’s use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the inventory cycle.

.36 In the space below, describe the inventory cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization’s responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Financing

Investments and Debt

.37 This checklist may be used on any small business audit engagement where investments or debt are a significant transaction cycle.

.38 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the financing cycle should be sufficient for you to understand—

- How investment decisions are authorized and initiated.
- How financing is authorized and captured by the financial reporting information system.
- How investment and debt transactions are processed by the financial reporting system.
- The accounting records and supporting documents involved in the processing and reporting of investments and debt.
- The processes used to prepare significant accounting estimates, disclosures, and presentation.
- How management classifies investments as either trading, available-for-sale, or held to maturity.

Interpreting Results

.39 This checklist documents your understanding of how internal control over financing is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.40 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.41

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Investments				
A. Authorization and Initiation				
1. Investment transactions are authorized by the owner.	_____	_____	_____	_____
2. The owner assesses and understands the risks associated with the entity's investments.	_____	_____	_____	_____
3. Investments are registered in the name of the company.	_____	_____	_____	_____
4. At acquisition, investments are classified as trading, available-for-sale, or held-to-maturity.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
B. Processing				
5. Investment transactions are posted to the general ledger on a timely basis.	_____	_____	_____	_____
6. Account statements received from brokers are reviewed for accuracy.	_____	_____	_____	_____
7. Discounts and premiums are amortized regularly using the interest method.	_____	_____	_____	_____
8. Procedures exist to determine the fair value of trading and available-for-sale securities.	_____	_____	_____	_____
9. The general ledger is periodically reconciled to account statements from brokers or physical counts of securities on hand.	_____	_____	_____	_____
C. Disclosures				
10. Management identifies all the information about its securities that is necessary for proper disclosure.	_____	_____	_____	_____
II. Debt				
A. Authorization and Initiation				
1. Financing transactions are authorized by the owner.	_____	_____	_____	_____
2. The owner assesses and understands all terms, covenants, restrictions of debt transactions.	_____	_____	_____	_____
B. Processing and Documentation				
3. Debt transactions are posted to the general ledger on a timely basis.	_____	_____	_____	_____
4. Any premiums or discount are amortized using the interest method.	_____	_____	_____	_____
5. The company maintains up-to-date files of all notes payable.	_____	_____	_____	_____
C. Disclosure				
6. Procedures exist to determine the fair value of notes payable for proper disclosure.	_____	_____	_____	_____
7. Management reviews their compliance with debt covenants on a timely basis.	_____	_____	_____	_____

End User Computing in the Financing Cycle

.42 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.43 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of off-the-shelf computer software accounting applications such as the general ledger. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the financing cycle to process significant accounting information outside of the general accounting software.

Information Processed by Outside Computer Service Organizations

.47 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the financing cycle.

.48 In the space below, describe the financing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Property, Plant, and Equipment

Fixed Assets and Depreciation

.49 This checklist may be used on any audit engagement where fixed assets are a significant transaction cycle.

.50 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the property, plant, and equipment cycle should be sufficient for you to understand—

- How fixed asset transactions are authorized and initiated. (Additional information on the acquisition of fixed assets is documented on the Accounting Systems and Control Checklist for the Purchasing Cycle.)
- How fixed asset transactions and depreciation are processed by the financial reporting information system.
- The accounting records and supporting documents involved in the processing and reporting of fixed assets and depreciation.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.51 This checklist documents your understanding of how internal control over property, plant, and equipment is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.52 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.53

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Fixed Assets and Depreciation				
A. Authorization and Initiation				
1. Fixed asset acquisitions and retirements are authorized by the owner.	_____	_____	_____	_____
B. Processing and Documentation				
2. The company maintains detailed records of fixed assets and the related accumulated depreciation.	_____	_____	_____	_____
3. The general ledger and detailed fixed asset records are updated for fixed assets transactions on a timely basis.	_____	_____	_____	_____
4. A process exists for the timely calculation of depreciation expense for both book and tax purposes.	_____	_____	_____	_____
5. The general ledger and detailed fixed asset records are updated for depreciation expense on a timely basis.	_____	_____	_____	_____
6. The general ledger is periodically reconciled to the detailed fixed asset records.	_____	_____	_____	_____
C. Disclosure and Estimation				
7. Management identifies events or changes in circumstances that may indicate fixed assets have been impaired (SFAS 144).	_____	_____	_____	_____
8. Management assesses and understands the risk of specialized equipment becoming subject to technological obsolescence (SOP 94-6).	_____	_____	_____	_____

[illegible]

.58 Answer the following questions relating to procedures and controls over end user computing related to the property, plant, and equipment cycle.

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Property, Plant, and Equipment Cycle				
1. End user applications listed in paragraph .57 of this form have been adequately tested before use.	_____	_____	_____	_____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3. Access controls limit access to the end user application.	_____	_____	_____	_____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.59 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the property, plant, and equipment cycle.

.60 In the space below, describe the property, plant, and equipment cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Payroll Cycle

Payroll Expense

.61 This checklist may be used on any small business audit engagement where the payroll cycle is significant.

.62 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the payroll cycle should be sufficient for you to understand—

- How the time worked by employees is captured by the financial reporting information system.

- How salaries and hourly rates are established.
- How payroll and the related withholdings are calculated.
- The accounting records and supporting documents involved in the processing and reporting of payroll.

Interpreting Results

.63 This checklist documents your understanding of how internal control over the payroll cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.64 The processes, documents, and controls listed on this questionnaire are typical for small business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.65

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Payroll				
A. Initiating Payroll Transactions				
1. Wages and salaries are approved by the owner.	_____	_____	_____	_____
2. Proper authorization is obtained for all payroll deductions.	_____	_____	_____	_____
3. Access to personnel files is limited to the owner or someone who is independent of the payroll or cash functions.	_____	_____	_____	_____
4. Adequate time records are maintained for employees paid by the hour.	_____	_____	_____	_____
5. Time records for hourly employees are approved by a supervisor.	_____	_____	_____	_____
B. Processing Payroll				
6. Payroll is calculated using authorized pay rates, payroll deductions, and time records.	_____	_____	_____	_____
7. Payroll registers are reviewed for accuracy.	_____	_____	_____	_____
8. Standard journal entries are used to post payroll transactions to the general ledger.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Payroll Cycle				
1. End user applications listed in paragraph .69 of this form have been adequately tested before use.	_____	_____	_____	_____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3. Access controls limit access to the end user application.	_____	_____	_____	_____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.71 The Control Environment Checklist—Small Business Computer Applications was used to document your understanding of the client’s use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the payroll cycle.

.72 In the space below, describe the payroll cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization’s responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

AAM Section 4400

Illustrative Internal Control Forms— Medium to Large Business

.01 The following are illustrative internal control forms you might use to document your understanding of internal controls sufficient to plan an audit. The illustrative questions are numbered merely for organizational purposes. The numbers are in no way intended to infer completeness or a preferred sequence. These forms may require modifications to meet the needs, preferences, and circumstances of individual firms and their clients. Whenever you use standardized forms, checklists, or questionnaires, you should recognize that important matters in a particular set of circumstances may not be covered.

Instructions

.02 The forms in AAM sections 4410 and 4420 may be used on all audit engagements of medium to large businesses. For audits of small businesses, see AAM section 4300.

.03 In every audit, you should obtain an understanding of each of the components of internal control sufficient to plan the audit. These forms should be used as a tool in documenting your understanding of internal control, how internal control is designed, and whether controls have been placed in operation.

.04 These forms should be used in conjunction with other forms in the following circumstances:

- *Computer Applications Checklist—Medium to Large Business* [AAM section 4410]. To be used to document your understanding of how the entity uses computers and information technology to process significant accounting information.
- *Financial Reporting Information Systems and Controls Checklist* [AAM section 4420]. To be used for each significant account and transactions cycle.

.05 These forms are appropriate whenever you plan a primarily substantive audit approach (see paragraph .07 below). That is, their completion generally results in control risk being assessed at or slightly below the maximum for all assertions related to account balances and transactions.

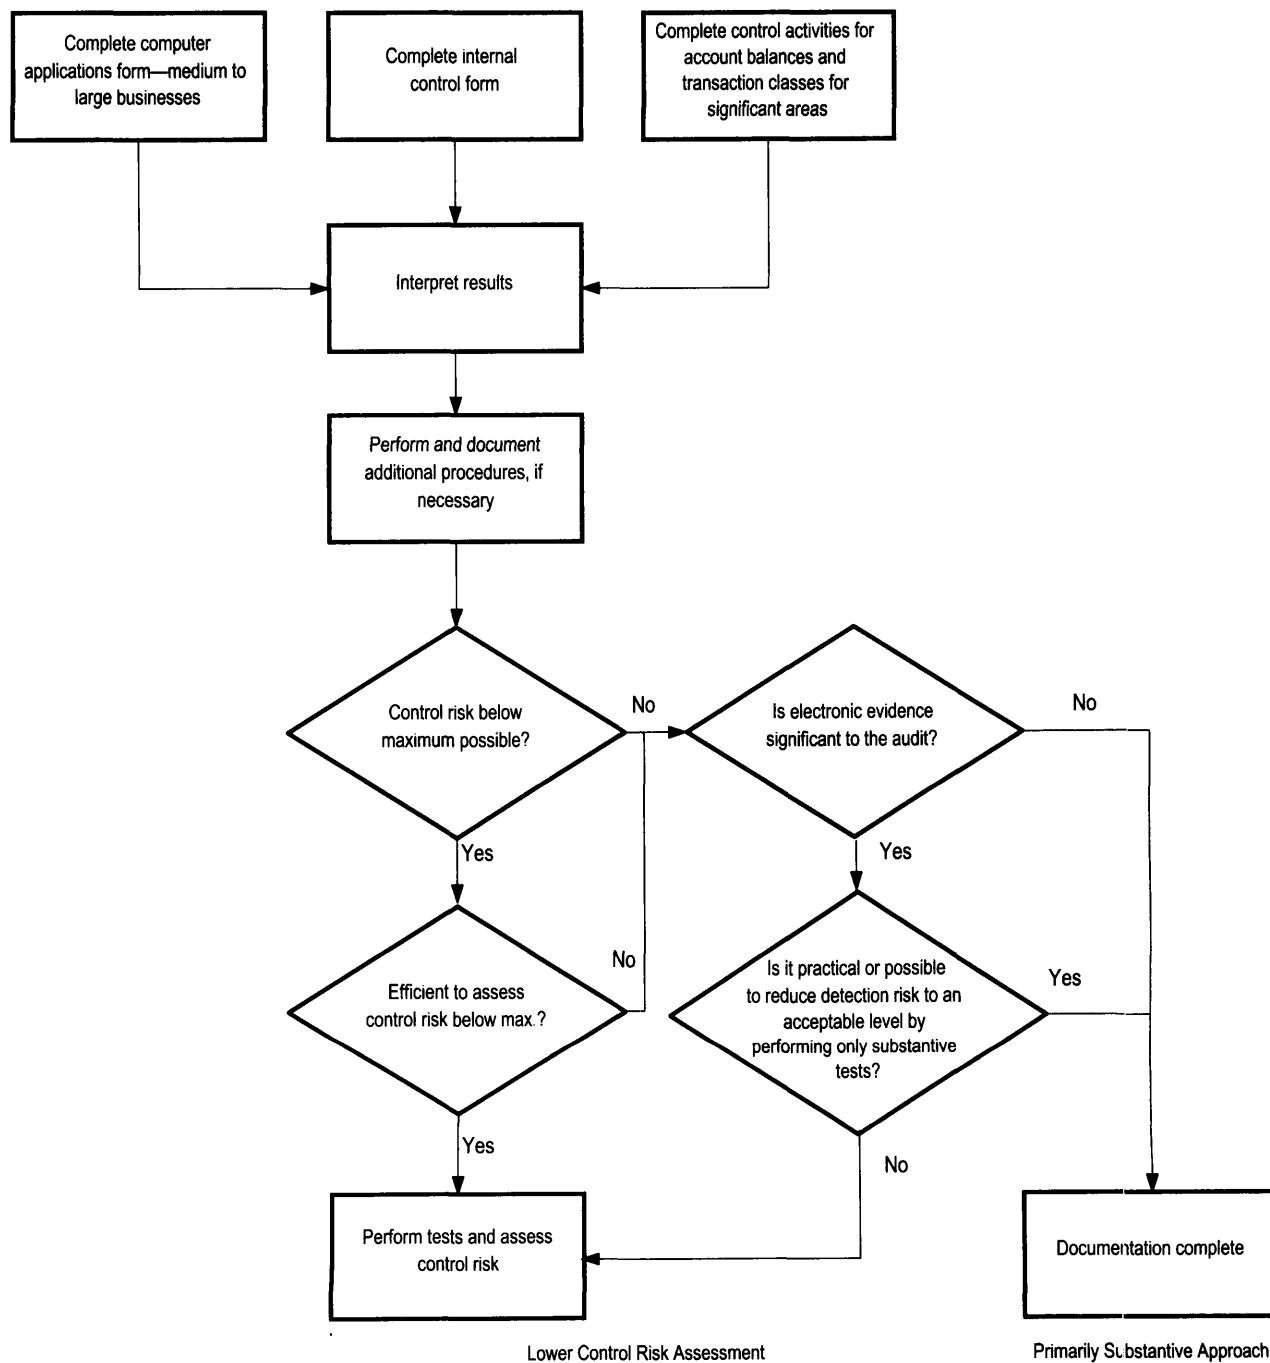

.06 If you plan a lower control risk assessment for certain assertions you are required to—

- Identify specific controls relevant to specific assertions that are likely to prevent or detect material misstatements in those assertions, and
- Perform tests of controls to evaluate their effectiveness.

.07 In situations where significant audit evidence is transmitted, processed, maintained, or accessed electronically, it generally will be necessary to test the internal control surrounding the electronic evidence (for example, controls over generation, storage, manipulation, and transmission), even if a primarily substantive audit approach is followed. (This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form.) This is because the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. In these situations the auditor should perform tests of controls to gather evidence to support an assessed level of control risk below the maximum for affected assertions. If the auditor concludes control risk must be assessed at the maximum in such situations or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the scope limitation.

.08 These forms are organized to conform to the control components and overall internal control framework described in the Audit Guide *Consideration of Internal Control in a Financial Statement Audit*. This framework is a way for you to consider the impact of internal control on an audit. The classification of any specific control into a particular component should not be your primary concern. Rather, your primary consideration is whether a specific control affects financial statement assertions.

.09 The following flowchart describes how this form can be used in conjunction with the other forms included in this section to document your understanding of internal controls.

Interpreting the Results

.10 When obtaining an understanding of internal control, you should consider the *collective* effect of the strengths and weaknesses in various control components. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, strong management oversight may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by management to overstate earnings.

.11 Answers that fall toward the right side of the form ("Strongly Agree" or "Somewhat Agree") indicate areas of strength in the control environment. You should consider whether these areas of strength indicate that a control risk assessment below the maximum may be possible for some assertions.

.12 Answers that fall toward the left side of the form ("Strongly Disagree" or "Somewhat Disagree") indicate areas of weakness in the entity's internal controls. You should assess how these areas of weakness affect the planning of the audit. This assessment should be documented in section V of the form. In making this assessment, you normally focus on—

- The types of material misstatement that could occur as a result of the identified weakness, and
- The risk that those misstatements will occur.

Documenting a Conclusion

.13 After completing this form, the Financial Reporting Information Systems and Controls Checklist for significant areas, and the Computer Applications Checklist—Medium to Large Business, you should document your conclusion regarding internal control. In order to perform a primarily substantive audit, you must understand the entity's internal control sufficiently—

- To assess the risk of material misstatement in assertions related to material financial statement components, and
- To design effective substantive procedures.

.14 If the completion of this form is not sufficient for you to obtain the necessary level of understanding listed in AAM section 4400.13, you should perform and document the results of additional tests to gain that level of understanding.

.15

I. Document Your Understanding of the Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity's activities and operations.

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
A. Control Environment Factors					
<i>Integrity and Ethical Values</i>					
1. Management has high ethical and behavioral standards.	_____	_____	_____	_____	_____
2. The company has a written code of ethical and behavioral standards that is comprehensive and periodically acknowledged by all employees.	_____	_____	_____	_____	_____
3. If a written code of conduct does not exist, the management culture emphasizes the importance of integrity and ethical values.	_____	_____	_____	_____	_____
4. Management reinforces its ethical and behavioral standards.	_____	_____	_____	_____	_____
5. Management appropriately deals with signs that problems exist (e.g., defective products or hazardous waste) even when the cost of identifying and solving the problem could be high.	_____	_____	_____	_____	_____
6. Management has removed or reduced incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts.	_____	_____	_____	_____	_____
For example, there is generally <i>no</i> —					
• Pressure to meet unrealistic performance targets.	_____	_____	_____	_____	_____
• High performance-dependent rewards.	_____	_____	_____	_____	_____
• Upper and lower cutoffs on bonus plans.	_____	_____	_____	_____	_____
7. Management has provided guidance on the situations and frequency with which intervention of established controls is appropriate.	_____	_____	_____	_____	_____
8. Management intervention is documented and explained appropriately.	_____	_____	_____	_____	_____
<i>Commitment to Competence</i>					
9. Management has appropriately considered the knowledge and skill levels necessary to accomplish financial reporting tasks.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
10. Employees with financial reporting tasks generally have the knowledge and skills necessary to accomplish those tasks.	_____	_____	_____	_____	_____
<i>Board of Directors and Audit Committee</i>					
11. The board of directors is independent from management.	_____	_____	_____	_____	_____
12. The board constructively challenges management's planned decisions.	_____	_____	_____	_____	_____
13. Directors have sufficient knowledge, industry experience and time to serve effectively.	_____	_____	_____	_____	_____
14. The board regularly receives the information they need to monitor management's objectives and strategies.	_____	_____	_____	_____	_____
15. The audit committee reviews the scope of activities of the internal and external auditors annually.	_____	_____	_____	_____	_____
16. The audit committee meets privately with the chief financial and/or accounting officers, internal auditors and external auditors to discuss the—					
• Reasonableness of the financial reporting process.	_____	_____	_____	_____	_____
• System of internal control.	_____	_____	_____	_____	_____
• Uncorrected audit adjustments.	_____	_____	_____	_____	_____
• Significant comments and recommendations.	_____	_____	_____	_____	_____
• Management's performance.	_____	_____	_____	_____	_____
17. The board takes steps to ensure an appropriate "tone at the top."	_____	_____	_____	_____	_____
18. The board or committee takes action as a result of its findings.	_____	_____	_____	_____	_____
<i>Management's Philosophy and Operating Style</i>					
19. Management moves carefully, proceeding only after carefully analyzing the risks and potential benefits of accepting business risks.	_____	_____	_____	_____	_____
20. Management is generally cautious or conservative in financial reporting and tax matters.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
21. There is relatively low turnover of key personnel (e.g., operating, accounting, data processing, internal audit).	_____	_____	_____	_____	_____
22. There is <i>no</i> undue pressure to meet budget, profit, or other financial and operating goals.	_____	_____	_____	_____	_____
23. Management views the accounting and internal audit function as a vehicle for exercising control over the entity's activities.	_____	_____	_____	_____	_____
24. Operating personnel review and "sign off" on reported results.	_____	_____	_____	_____	_____
25. Senior managers frequently visit subsidiary or divisional operations.	_____	_____	_____	_____	_____
26. Group or divisional management meetings are held frequently.	_____	_____	_____	_____	_____

Organizational Structure

27. The entity's organizational structure facilitates the flow of information upstream, downstream, and across all business activities.	_____	_____	_____	_____	_____
28. Responsibilities and expectations for the entity's business activities are communicated clearly to the executives in charge of those activities.	_____	_____	_____	_____	_____
29. The executives in charge have the required knowledge, experience, and training to perform their duties.	_____	_____	_____	_____	_____
30. Those in charge of business activities have access to senior operating management.	_____	_____	_____	_____	_____

Assignment of Authority and Responsibility

31. Authority and responsibility are delegated only to the degree necessary to achieve the company's objectives.	_____	_____	_____	_____	_____
32. Job descriptions, for at least management and supervisory personnel, exist.	_____	_____	_____	_____	_____
33. Job descriptions contain specific references to control-related responsibilities.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
34. Proper resources are provided for personnel to carry out their duties.	_____	_____	_____	_____	_____
35. Personnel understand the entity's objectives and know how their individual actions interrelate and contribute to those objectives.	_____	_____	_____	_____	_____
36. Personnel recognize how and for what they will be held accountable.	_____	_____	_____	_____	_____
<i>Human Resource Policies and Practices</i>					
37. The entity generally hires the most qualified people for the job.	_____	_____	_____	_____	_____
38. Hiring and recruiting practices emphasize educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior.	_____	_____	_____	_____	_____
39. Recruiting practices include formal, in-depth employment interviews.	_____	_____	_____	_____	_____
40. Prospective employees are told of the entity's history, culture and operating style.	_____	_____	_____	_____	_____
41. The entity provides training opportunities, and employees are well-trained.	_____	_____	_____	_____	_____
42. Promotions and rotation of personnel are based on periodic performance appraisals.	_____	_____	_____	_____	_____
43. Methods of compensation, including bonuses, are designed to motivate personnel and reinforce outstanding performance.	_____	_____	_____	_____	_____
44. Management does not hesitate to take disciplinary action when violations of expected behavior occur.	_____	_____	_____	_____	_____
B. Other Internal Control Components With a Pervasive Effect on the Organization					
<i>Risk Assessment</i>					
1. Special action is taken to ensure new personnel understand their tasks.	_____	_____	_____	_____	_____
2. Management appropriately considers the control activities performed by personnel who change jobs or leave the company.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
3. Management assesses how new accounting and information systems will impact internal control.	_____	_____	_____	_____	_____
4. Management reconsiders the appropriateness of existing control activities when new accounting and information systems are developed and implemented.	_____	_____	_____	_____	_____
5. Employees are adequately trained when accounting and information systems are changed or replaced.	_____	_____	_____	_____	_____
6. Accounting and information system capabilities are upgraded when the volume of information increases significantly.	_____	_____	_____	_____	_____
7. Accounting and data processing personnel are expanded as needed when the volume of information increases significantly.	_____	_____	_____	_____	_____
8. The entity has the ability to reasonably forecast operating and financial results.	_____	_____	_____	_____	_____
9. Management keeps abreast of the political, regulatory, business, and social culture of areas in which foreign operations exist.	_____	_____	_____	_____	_____
General Control Activities					
10. The entity prepares operating budgets and cash flow projections.	_____	_____	_____	_____	_____
11. Operating budgets and projections lend themselves to effective comparison with actual results.	_____	_____	_____	_____	_____
12. Significant variances between budgeted or projected amounts and actual results are reviewed and explained.	_____	_____	_____	_____	_____
13. The company has adequate safekeeping facilities for custody of the accounting records such as fire-proof storage areas and restricted access cabinets.	_____	_____	_____	_____	_____
14. The entity has a suitable record retention plan.	_____	_____	_____	_____	_____
15. The entity has adequate controls to limit access to computer programs and data files.	_____	_____	_____	_____	_____
16. Periodically, personnel compare counts of assets to amounts shown on control records.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
17. There is adequate segregation of duties among those responsible for authorizing transactions, recording transactions, and maintaining custody of assets.	_____	_____	_____	_____	_____
Information and Communication					
18. Management receives the information they need to carry out their responsibilities.	_____	_____	_____	_____	_____
19. Information is provided at the right level of detail for different levels of management.	_____	_____	_____	_____	_____
20. Information is available on a timely basis.	_____	_____	_____	_____	_____
21. Information with accounting significance (for example, slow-paying customers) is transmitted across functional lines in a timely manner.	_____	_____	_____	_____	_____
Monitoring					
22. Customer complaints about billings are investigated for their underlying causes.	_____	_____	_____	_____	_____
23. Communications from bankers, regulators, or other outside parties are monitored for items of accounting significance.	_____	_____	_____	_____	_____
24. Management responds appropriately to auditor recommendations on ways to strengthen internal controls.	_____	_____	_____	_____	_____
25. Employees are required to "sign off" to evidence the performance of critical control functions.	_____	_____	_____	_____	_____
26. The internal auditors are independent of the activities they audit.	_____	_____	_____	_____	_____
27. Internal auditors have adequate training and experience.	_____	_____	_____	_____	_____
28. Internal auditors document the planning and execution of their work by such means as audit programs and working papers.	_____	_____	_____	_____	_____
29. Internal audit reports are submitted to the board of directors or audit committee.	_____	_____	_____	_____	_____

II. Determine Other Areas For Evaluation

The completion of section I of this form is the first of several forms that may be used to document your understanding of internal controls sufficiently to plan a primarily substantive audit. It is important to remember that in entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of the controls surrounding the electronic environment may not be enough. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gain competent evidential matter—even in a primarily substantive approach. In the space provided below, determine which of the following areas apply. A "Yes" answer generally indicates you should complete the related form.

No Yes W/P Ref.

Significant Account Balances and Transaction Cycles

1. The following account balances or transaction cycles are significant to the company's financial statements.

- a. Revenue Cycle, including sales, accounts receivable, or cash receipts. (Normally considered significant for most businesses.)

If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—

- b. Purchasing Cycle, including purchasing, accounts payable, or cash disbursements. (Normally considered significant for most businesses.)

If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—

- c. Inventory, including inventory and cost of sales.

If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—

- d. Financing, including investments and debt.

If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—

- e. Property, Plant, and Equipment, including fixed assets and depreciation.

If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—

- f. Payroll.

If "yes," the related Financial Reporting Information Systems and Controls Checklist can be found at—

III. Assess Lack of Segregation of Duties

In the space provided below, assess risk due to a lack of segregation of duties for the company, based on the completion of sections I and II of this form. Your comments should address—

- The person with incompatible responsibilities and the nature of those responsibilities.

- Any mitigating factors or controls, such as direct management oversight.
- The risk that material misstatements might occur as a result of a lack of segregation of duties, and the type of those misstatements.
- How substantive procedures will be designed to limit the risk of those misstatements to an acceptable level.

IV. Assess the Risk of Management Override

Even in effectively controlled entities—those with generally high levels of integrity and control consciousness—a manager might be able to override controls. The term “management override” means—

Overruling prescribed policies or procedures for *illegitimate* purposes with the intent of personal gain or enhanced presentation of an entity’s financial condition or compliance status.

Management might override the control system for many reasons: to increase reported revenue, to boost market value of the entity prior to sale, to meet sales or earnings projections, to bolster bonus pay-outs tied to performance, to appear to cover violations of debt covenant agreements, or to hide lack of compliance with legal requirements. Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, and intentionally issuing false documents such as sales invoices.

An active, involved board of directors can significantly reduce the risk of management override.

Management override is different from management intervention, which is the overrule of prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with non-recurring and non-standard transactions or events that otherwise might be handled by the system.

In the space below, assess the risk of management *override* for this company. You should consider the risk that management override possibilities exist, the risk that management will take advantage of those possibilities, and any evidence that management has engaged in override practices. If the risk of management override is greater than low, indicate how planned audit procedures will reduce this risk to an acceptable level.

VI. Document Your Conclusion With Respect to Internal Controls

III. Computer Control Environment

In the space provided below, indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statements. Your answers should be based on—

- Your previous experience with the entity.
- Inquiries of appropriate management, supervisory, and staff personnel.
- Inspection of documents and records.
- Observation of the entity’s activities and operations.

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
Acquisition of Hardware					
1. The company has a coherent management plan for the purchase and continued investment in computer hardware.	_____	_____	_____	_____	_____
2. The computer hardware is sufficient to meet the company’s needs.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
3. The company's computer hardware is safely and properly installed.	_____	_____	_____	_____	_____
4. The company has standard, regular hardware maintenance procedures.	_____	_____	_____	_____	_____
Acquisition of Software					
5. The company has a coherent management plan for the purchase of and continued investment in computer software.	_____	_____	_____	_____	_____
6. The company researches software products to determine whether they meet the needs of the intended users.	_____	_____	_____	_____	_____
7. The company's application programs are compatible with each other.	_____	_____	_____	_____	_____
8. The company obtains recognized software from reputable sources.	_____	_____	_____	_____	_____
9. Company policy prohibits the use of unauthorized programs introduced by employees.	_____	_____	_____	_____	_____
10. Company policy prohibits the downloading of untested software from sources such as dial-up bulletin boards.	_____	_____	_____	_____	_____
11. The company uses virus protection software to screen for virus infections.	_____	_____	_____	_____	_____
Program Development					
12. Users are involved in the design and approval of systems.	_____	_____	_____	_____	_____
13. Users review the completion of various phases of the application.	_____	_____	_____	_____	_____
14. New programs are thoroughly tested.	_____	_____	_____	_____	_____
15. Users are involved in the review of tests of the program.	_____	_____	_____	_____	_____
16. Adequate procedures exist to transfer programs from development to production libraries.	_____	_____	_____	_____	_____
Program Changes					
17. Users are involved in the design and approval of program changes.	_____	_____	_____	_____	_____

	<u>No Opinion</u>	<u>Strongly Disagree</u>	<u>Some- what Disagree</u>	<u>Some- what Agree</u>	<u>Strongly Agree</u>
18. Program changes are thoroughly tested.	_____	_____	_____	_____	_____
19. Users are involved in the review of tests of the program changes.	_____	_____	_____	_____	_____
20. Adequate procedures exist to transfer changed programs from development to production libraries.	_____	_____	_____	_____	_____

Logical Access

21. Management has identified confidential and sensitive data for which access should be restricted.	_____	_____	_____	_____	_____
22. Procedures are in place to restrict access to confidential and sensitive data.	_____	_____	_____	_____	_____
23. Procedures are in place to reduce the risk of unauthorized transactions being entered into processing.	_____	_____	_____	_____	_____
24. The use of utility programs is controlled or monitored carefully.	_____	_____	_____	_____	_____
25. Procedures are in place to detect unauthorized changes to programs supporting the financial statements.	_____	_____	_____	_____	_____
26. Programmer access to production programs, live data files, and job control language is controlled.	_____	_____	_____	_____	_____
27. Operator access to source code and individual elements of data files is controlled.	_____	_____	_____	_____	_____
28. Users have access only to defined programs and data files.	_____	_____	_____	_____	_____

Physical Security

29. The company has established procedures for the periodic back-up of files.	_____	_____	_____	_____	_____
30. Back-up procedures include multiple generations.	_____	_____	_____	_____	_____
31. Back-up files are stored in a secure, off-site location.	_____	_____	_____	_____	_____

Computer Operations

32. Operations management reviews lists of regular and unscheduled batch jobs.	_____	_____	_____	_____	_____
33. Job control instruction sets are menu-driven.	_____	_____	_____	_____	_____
34. Jobs are executed only from the operator's terminal.	_____	_____	_____	_____	_____

IV. Outside Computer Service Organizations

This section should be used to document your understanding of how the company uses an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in SAS No. 70, *Service Organizations*, as amended (AU section 324).

1. List the name of the service organization and the general types of services it provides.

2. Are the general ledger and other primary accounting records processed by an outside service organization? ____ Yes ____ No

If "yes," describe the source documents provided to the service organization, the reports and other documentation received from the organization, and the controls maintained by the user over input and output to prevent or detect material misstatement.

3. List the type and date of the most recent service auditor report.

[The next page is 4443.]

AAM Section 4420

Financial Reporting Information Systems and Controls Checklist—Medium to Large Business

Revenue Cycle

Revenue, Accounts Receivable, and Cash Receipts

.01 This checklist may be used on any audit engagement of a medium to large company when the revenue cycle is significant. Normally, the revenue cycle is significant in most audit engagements.

.02 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the revenue cycle should be sufficient for you to understand—

- How cash and credit sales are initiated.
- How credit limits are established and maintained.
- How cash receipts are recorded.
- How sales and cash receipts are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of sales, accounts receivable, and cash receipts.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.03 This checklist documents your understanding of how internal control over the revenue cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.04 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.05

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Revenue and Accounts Receivable				
A. Initiating Sales Transactions				
1. Credit limits are clearly defined.	_____	_____	_____	_____
2. Credit limits are clearly communicated.	_____	_____	_____	_____
3. The credit of prospective customers is investigated before it is extended to them.	_____	_____	_____	_____
4. Credit limits are periodically reviewed.	_____	_____	_____	_____
5. The people who perform the credit function are independent of—				
• Sales.	_____	_____	_____	_____
• Billing.	_____	_____	_____	_____
• Collection.	_____	_____	_____	_____
• Accounting.	_____	_____	_____	_____
6. Credit limits and changes in credit limits are communicated to persons responsible for approving sales orders on a timely basis.	_____	_____	_____	_____
7. The company has clearly defined policies and procedures for acceptance and approval of sales orders.	_____	_____	_____	_____
8. Prenumbered sales orders are used and accounted for.	_____	_____	_____	_____
9. Prenumbered shipping documents are used to record shipments.	_____	_____	_____	_____
10. Shipping document information is verified prior to shipment.	_____	_____	_____	_____
11. The people who perform the shipping function are independent of—				
• Sales.	_____	_____	_____	_____
• Billing.	_____	_____	_____	_____
• Collection.	_____	_____	_____	_____
• Accounting.	_____	_____	_____	_____
12. All shipping documents are accounted for.	_____	_____	_____	_____
13. Prenumbered credit memos are used to document sales returns.	_____	_____	_____	_____
14. All credit memos are approved and accounted for.	_____	_____	_____	_____
15. Credit memos are matched with receiving reports for returned goods.	_____	_____	_____	_____
16. Cash sales are controlled by cash registers or prenumbered cash receipts forms.	_____	_____	_____	_____
17. Someone other than the cashier has custody to the cash register tape compartment.	_____	_____	_____	_____

	<i>Personnel</i>	<i>N/A</i>	<i>No</i>	<i>Yes</i>
18. Someone other than the cashier takes periodic readings of the cash register and balances the cash on hand.	_____	_____	_____	_____
B. Processing Sales Transactions				
19. Information necessary to prepare invoices (e.g., prices, discount policies) is clearly communicated to billing personnel on a timely basis.	_____	_____	_____	_____
20. Prenumbered invoices are prepared promptly after goods are shipped.	_____	_____	_____	_____
21. Quantities on the invoices are compared to shipping documents.	_____	_____	_____	_____
22. The prices on the invoices are current.	_____	_____	_____	_____
23. The people who perform the billing function are independent of—				
• Sales.	_____	_____	_____	_____
• Credit.	_____	_____	_____	_____
• Collection.	_____	_____	_____	_____
24. Invoices are mailed to customers on a timely basis.	_____	_____	_____	_____
25. Invoices are posted to the general ledger on a timely basis.	_____	_____	_____	_____
26. Standard journal entries are used to record sales.	_____	_____	_____	_____
27. Invoices are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.	_____	_____	_____	_____
28. Credit memos are posted to the general ledger on a timely basis.	_____	_____	_____	_____
29. Credit memos are posted to the sales and accounts receivable subsidiary ledgers or journals on a timely basis.	_____	_____	_____	_____
30. Procedures exist for determining proper cut-off of sales at month-end.	_____	_____	_____	_____
31. The sales and accounts receivable balances shown in the general ledger are reconciled to the sales and accounts receivable subsidiary ledgers on a regular basis.	_____	_____	_____	_____
C. Estimates and Disclosures for Sales Transactions				
32. The accounting system generates a monthly aging of accounts receivable.	_____	_____	_____	_____
33. The people who prepare the aging are independent of—				
• Billing.	_____	_____	_____	_____
• Collection.	_____	_____	_____	_____
34. Management uses the accounts receivable aging to investigate, write off, or adjust delinquent accounts receivable.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
35. Management uses the accounts receivable aging and other information to estimate an allowance for doubtful accounts.	_____	_____	_____	_____
36. The person responsible for financial reporting identifies significant concentrations of credit risk.	_____	_____	_____	_____

II. Cash Receipts

A. Initiating Cash Receipts Transactions

1. The entity maintains records of payments on accounts by customer.	_____	_____	_____	_____
2. Someone other than the person responsible for maintaining accounts receivable opens the mail and lists the cash receipts.	_____	_____	_____	_____
3. Cash receipts are deposited intact.	_____	_____	_____	_____
4. Cash receipts are deposited in separate bank accounts when required.	_____	_____	_____	_____
5. People who handle cash receipts are adequately bonded.	_____	_____	_____	_____
6. Local bank accounts used for branch office collections are subject to withdrawal only by the home office.	_____	_____	_____	_____

B. Processing Cash Received on Account

7. Cash receipts are posted to the general ledger on a timely basis.	_____	_____	_____	_____
8. Cash receipts are posted to the accounts receivable subsidiary ledger on a timely basis.	_____	_____	_____	_____
9. Standard journal entries are used to post cash receipts.	_____	_____	_____	_____
10. The people who enter cash receipts to the accounting system are independent of the physical handling of collections.	_____	_____	_____	_____
11. Timely bank reconciliations are prepared or reviewed by someone independent of the cash receipts function.	_____	_____	_____	_____

End User Computing in the Revenue Cycle

.06 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet which shows amortization of premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.07 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's IT department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the IT department.

.08 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

Information Processed by Outside Computer Service Organizations

.11 The Computer Applications Checklist—Medium to Large Business Computer Applications was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the revenue cycle.

.12 In the space below, describe the revenue cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Purchasing Cycle

Purchasing, Accounts Payable, and Cash Disbursements

.13 This checklist may be used on any audit engagement of a medium to large business where the purchasing cycle is significant. Normally, the purchasing cycle is significant for most businesses.

.14 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the purchasing cycle should be sufficient for you to understand—

- How purchases are initiated and goods received.
- How cash disbursements are recorded.
- How purchases and cash disbursements are processed by the financial reporting information system.
- The accounting records and supporting documents involved in the processing and reporting of purchases, accounts payable, and cash disbursements.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.15 This checklist documents your understanding of how internal control over the purchasing cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive

approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.16 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.17

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Purchases and Accounts Payable				
A. Initiating Purchases and Receipt of Goods				
1. All purchases over a predetermined amount are approved by management.	_____	_____	_____	_____
2. Non-routine purchases (for example, services, fixed assets, or investments) are approved by management.	_____	_____	_____	_____
3. A purchase order system is used, prenumbered purchase orders are accounted for, and physical access to purchase orders is controlled.	_____	_____	_____	_____
4. Open purchase orders are periodically reviewed.	_____	_____	_____	_____
5. The purchasing function is independent of—				
• Receiving	_____	_____	_____	_____
• Invoice processing	_____	_____	_____	_____
• Cash disbursements	_____	_____	_____	_____
6. All goods are inspected and counted when received.	_____	_____	_____	_____
7. Prenumbered receiving reports, or a log, are used to record the receipt of goods.	_____	_____	_____	_____
8. The receiving reports or log indicate the date the items were received.	_____	_____	_____	_____
9. The receiving function is independent of—				
• Purchasing	_____	_____	_____	_____
• Invoice processing	_____	_____	_____	_____
• Cash disbursements	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
B. Processing Purchases				
10. Invoices from vendors are matched with applicable receiving reports.	_____	_____	_____	_____
11. Invoices are reviewed for proper quantity and prices, and mathematical accuracy.	_____	_____	_____	_____
12. Invoices from vendors are posted to the general ledger on a timely basis.	_____	_____	_____	_____
13. Invoices from vendors are posted to the accounts payable subsidiary ledger on a timely basis.	_____	_____	_____	_____
14. The invoice processing function is independent of—				
• Purchasing	_____	_____	_____	_____
• Receiving	_____	_____	_____	_____
• Cash disbursements	_____	_____	_____	_____
15. Standard journal entries are used to post accounts payable.	_____	_____	_____	_____
16. Accounts payable account per the general ledger is reconciled periodically to the accounts payable subsidiary ledger.	_____	_____	_____	_____
17. Statements from vendors are reconciled to the accounts payable subsidiary ledger.	_____	_____	_____	_____
C. Disclosures				
18. Management has the information to identify vulnerability due to concentrations of suppliers (SOP 94-6).	_____	_____	_____	_____
II. Cash Disbursements				
A. Initiating Cash Disbursements				
1. All disbursements except those from petty cash are made by check.	_____	_____	_____	_____
2. All checks are recorded.	_____	_____	_____	_____
3. Supporting documentation such as invoices and receiving reports are reviewed before the checks are signed.	_____	_____	_____	_____
4. Supporting documents are canceled to avoid duplicate payment.	_____	_____	_____	_____
B. Processing Cash Disbursements				
5. Cash disbursements are posted to the general ledger on a timely basis.	_____	_____	_____	_____
6. Cash disbursements are posted to the accounts payable subsidiary ledger on a timely basis.	_____	_____	_____	_____
7. Standard journal entries are used to post cash disbursements.	_____	_____	_____	_____
8. Timely bank reconciliations are prepared or reviewed by the owner or manager or someone independent of the cash receipts function.	_____	_____	_____	_____

End User Computing in the Purchasing Cycle

.18 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.19 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company’s IT department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the purchasing cycle to process significant accounting information outside of the IT department.

.20 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the IT-operated accounting application. For example, a spreadsheet accumulates non-routine purchases for batch processing.
- Make significant accounting decisions.
- Accumulate footnote information. For example, a database of vendors provides information for possible concentration of risk disclosures.

.21 In the space provided below, describe how end user computing is used in the purchasing cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.22 Answer the following questions relating to procedures and controls over end user computing related to the purchasing cycle.

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Purchasing Cycle				
1. End user applications listed in paragraph .21 of this form have been adequately tested before use.				

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	<hr/>	<hr/>	<hr/>	<hr/>
3. Access controls limit access to the end user application.	<hr/>	<hr/>	<hr/>	<hr/>
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	<hr/>	<hr/>	<hr/>	<hr/>
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	<hr/>	<hr/>	<hr/>	<hr/>

Information Processed by Outside Computer Service Organizations

.23 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client’s use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the purchasing cycle.

.24 In the space below, describe the purchasing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization’s responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Inventory

Inventory and Cost of Sales

.25 This checklist may be used on any audit engagement of a medium to large business where inventory is a significant transaction cycle.

.26 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the inventory cycle should be sufficient for you to understand—

- How costs are capitalized to inventory.
- How cost is relieved from inventory.
- How inventory costs and cost of sales are processed by the accounting system.
- The procedures used to take the physical inventory count.
- The accounting records and supporting documents involved in the processing and reporting of inventory and cost of sales.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.27 This checklist documents your understanding of how internal control over the inventory cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.28 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.29

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Inventory and Cost of Sales				
A. Capturing Capitalizable Costs¹				
1. Management prepares production goals and schedules based on sales forecasts.	_____	_____	_____	_____
2. The company budgets its planned inventory levels.	_____	_____	_____	_____
3. All releases from storage of raw materials, supplies, and purchased parts inventory are based on approved requisition documents.	_____	_____	_____	_____
4. Labor costs are reported promptly and in sufficient detail to allow for the proper allocation to inventory.	_____	_____	_____	_____
5. The entity uses a cost accounting system to accumulate capitalizable costs.	_____	_____	_____	_____

¹ You should also consider completing the Financial Reporting Information Systems and Controls Checklist for the purchasing cycle to document your understanding of how the purchase of inventory is initiated.

	<i>Personnel</i>	<i>N/A</i>	<i>No</i>	<i>Yes</i>
6. The cost accounting system distinguishes between costs that should be capitalized for GAAP purposes and those that should be capitalizable for tax purposes.	_____	_____	_____	_____
7. For standard cost systems:				
a. Standard rates and volume are periodically compared to actual and revised accordingly.	_____	_____	_____	_____
b. Significant variances are investigated.	_____	_____	_____	_____
8. The cost accounting system interfaces with the general ledger.	_____	_____	_____	_____
9. Transfers of completed units from production to custody of finished goods inventory are based on approved completion reports that authorize the transfer.	_____	_____	_____	_____
10. The people responsible for maintaining detailed inventory records are independent from the physical custody and handling of inventories.	_____	_____	_____	_____
11. Production cost budgets are periodically compared to actual costs, and significant differences are explained.	_____	_____	_____	_____
B. Inventory Records				
12. The entity maintains adequate inventory records of prices and amounts on hand.	_____	_____	_____	_____
13. Withdrawals from inventory are based on prenumbered finished inventory requisitions, shipping reports, or both.	_____	_____	_____	_____
14. Additions to and withdrawals from inventory are posted to the inventory records and the general ledger.	_____	_____	_____	_____
15. Standard journal entries are used to post inventory transactions to the inventory records and the general ledger.	_____	_____	_____	_____
16. Inventory records are periodically reconciled to the general ledger.	_____	_____	_____	_____
17. Inventory records are reconciled to a physical inventory count.	_____	_____	_____	_____
C. Physical Inventory Counts				
18. Inventory is counted at least once a year.	_____	_____	_____	_____
19. Physical inventory counters are given adequate instructions.	_____	_____	_____	_____
20. Inventory count procedures are sufficient to provide an accurate count, including steps to ensure—				
• Proper cut-off.	_____	_____	_____	_____
• Identification of obsolete items.	_____	_____	_____	_____
• All items are counted once and only once.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
D. Estimates and Disclosures				
21. Management is able to identify excess, slow-moving, or obsolete inventory.	_____	_____	_____	_____
22. Excess, slow-moving, or obsolete inventory is periodically written off.	_____	_____	_____	_____
23. Management can identify inventory subject to rapid technological obsolescence that may need to be disclosed under SOP 94-6.	_____	_____	_____	_____

End User Computing in the Inventory Cycle

.30 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.31 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's IT department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the inventory cycle to process significant accounting information outside of the IT department.

.32 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the IT-operated accounting application. For example, a spreadsheet calculates overhead cost allocations.
- Make significant accounting decisions. A spreadsheet application tracks slow-moving items for possible write-off.
- Accumulate footnote information.

.33 In the space provided below, describe how end user computing is used in the inventory cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

Procedures and Controls Over End User Computing

.34 Answer the following questions relating to procedures and controls over end user computing related to the inventory cycle.

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Inventory Cycle				
1. End user applications listed in paragraph .33 of this form have been adequately tested before use.	_____	_____	_____	_____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3. Access controls limit access to the end user application.	_____	_____	_____	_____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.35 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client’s use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the inventory cycle.

.36 In the space below, describe the inventory cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization’s responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Financing

Investments and Debt

.37 This checklist may be used on any audit engagement of a medium to large business where investments or debt are a significant transaction cycle.

.38 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the financing cycle should be sufficient for you to understand—

- How investment decisions are authorized and initiated.
- How financing is authorized and captured by the accounting system.
- How management classifies investments as either trading, available-for-sale, or held to maturity.
- How investment and debt transactions are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of investments and debt.
- The processes used to prepare significant accounting estimates, disclosures, and presentation.

Interpreting Results

.39 This checklist documents your understanding of how internal control is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.40 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.41

I. Investments

A. Authorization and Initiation

1. Investment transactions are authorized by management.

Personnel N/A No Yes

	<i>Personnel</i>	<i>N/A</i>	<i>No</i>	<i>Yes</i>
2. The company has established policies and procedures for determining when board of director approval is required for investment transactions.	_____	_____	_____	_____
3. Management and the board assess and understand the risks associated with the entity's investment strategies.	_____	_____	_____	_____
4. Investments are registered in the name of the company.	_____	_____	_____	_____
5. At acquisition, investments are classified as trading, available-for-sale, or held-to-maturity.	_____	_____	_____	_____

B. Processing

6. Investment transactions are posted to the general ledger on a timely basis.	_____	_____	_____	_____
7. Account statements received from brokers are reviewed for accuracy.	_____	_____	_____	_____
8. Discounts and premiums are amortized regularly using the interest method.	_____	_____	_____	_____
9. Procedures exist to determine the fair value of trading and available-for-sale securities.	_____	_____	_____	_____
10. The general ledger is periodically reconciled to account statements from brokers or physical counts of securities on hand.	_____	_____	_____	_____

C. Disclosures

11. The entity accumulates the information necessary to make disclosures about investments and derivatives.	_____	_____	_____	_____
---	-------	-------	-------	-------

II. Debt**A. Authorization and Initiation**

1. Financing transactions are authorized by management.	_____	_____	_____	_____
2. The company has established policies and procedures for determining when board of director approval is required for financing transactions.	_____	_____	_____	_____
3. Management and the board assess and understand all terms, covenants, and restrictions of debt transactions.	_____	_____	_____	_____

B. Processing and Documentation

4. Debt transactions are posted to the general ledger on a timely basis.	_____	_____	_____	_____
5. Any premiums or discount are amortized using the interest method.	_____	_____	_____	_____
6. The company maintains up-to-date files of all notes payable.	_____	_____	_____	_____

Procedures and Controls Over End User Computing

.46 Answer the following questions relating to procedures and controls over end user computing related to the financing cycle.

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Financing Cycle				
1. End user applications listed in paragraph .45 of this form have been adequately tested before use.	_____	_____	_____	_____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3. Access controls limit access to the end user application.	_____	_____	_____	_____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.47 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client’s use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the financing cycle.

.48 In the space below, describe the financing cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization’s responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

Property, Plant, and Equipment

Fixed Assets and Depreciation

.49 This checklist may be used on any audit engagement where fixed assets are a significant transaction cycle.

.50 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the property, plant, and equipment cycle should be sufficient for you to understand—

- How fixed asset transactions are authorized and initiated. (Additional information on the acquisition of fixed assets is documented on the Accounting Systems and Control Checklist for the Purchasing Cycle.)
- How fixed asset transactions and depreciation are processed by the accounting system.
- The accounting records and supporting documents involved in the processing and reporting of fixed assets and depreciation.
- The processes used to prepare significant accounting estimates and disclosures.

Interpreting Results

.51 This checklist documents your understanding of how internal control over property, plant, and equipment is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.52 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.53

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Fixed Assets and Depreciation				
A. Authorization and Initiation				
1. Fixed asset acquisitions and retirements are authorized by management.	_____	_____	_____	_____
B. Processing and Documentation				
2. The company maintains detailed records of fixed assets and the related accumulated depreciation.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
3. Responsibilities for maintaining the fixed assets records are segregated from the custody of the assets.	_____	_____	_____	_____
4. The general ledger and detailed fixed asset records are updated for fixed assets transactions on a timely basis.	_____	_____	_____	_____
5. A process exists for the timely calculation of depreciation expense for both book and tax purposes.	_____	_____	_____	_____
6. The general ledger and detailed fixed asset records are updated for depreciation expense on a timely basis.	_____	_____	_____	_____
7. The general ledger is periodically reconciled to the detailed fixed asset records.	_____	_____	_____	_____

C. Disclosure and Estimation

8. Management identifies events or changes in circumstances that may indicate fixed assets have been impaired (SFAS 144).	_____	_____	_____	_____
9. Management assesses and understands the risk of specialized equipment becoming subject to technological obsolescence (SOP 94-6).	_____	_____	_____	_____

End User Computing in the Property, Plant, and Equipment Cycle

.54 End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person. For example, an accounting clerk prepares a spreadsheet that amortizes premiums or discounts, and the information from the spreadsheet is the source of a journal entry.

.55 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of computer applications operated by the company's IT department. In this section of the Financial Reporting Information Systems and Controls Checklist, you may document your understanding of how end user computing is used in the revenue cycle to process significant accounting information outside of the IT department.

.56 You should obtain an understanding of any spreadsheet application, database, or separate computer system that has been developed by end users to—

- Process significant accounting information outside of the IT-operated accounting application. For example, a spreadsheet application calculates the depreciation expense.
- Make significant accounting decisions. For example, a spreadsheet application is used to analyze lease or buy decisions.
- Accumulate footnote information.

.57 In the space provided below, describe how end user computing is used in the property, plant, and equipment cycle. Describe—

- The person or department who performs the computing.
- A general description of the application and its type (e.g., spreadsheet).
- The source of the information used in the application.
- How the results of the application are used in further processing or decision making.

- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
 - Controls maintained by the entity to prevent or detect material misstatement in the input or output.
-
-
-
-
-
-

Payroll Cycle

Payroll Expense

.61 This checklist may be used on any audit engagement of a medium to large business where the payroll cycle is significant.

.62 The purpose of this checklist is to document your understanding of controls for significant classes of transactions. Your knowledge of the payroll cycle should be sufficient for you to understand—

- How the time worked by employees is captured by the accounting system.
- How salaries and hourly rates are established.
- How payroll and the related withholdings are calculated.
- The accounting records and supporting documents involved in the processing and reporting of payroll.

Interpreting Results

.63 This checklist documents your understanding of how internal control over the payroll cycle is designed and whether it has been placed in operation. It should help you in planning a primarily substantive approach. In entities where significant information is transmitted, processed, maintained, or accessed electronically, just gaining an understanding of internal control may not be enough (even in a primarily substantive approach). This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. Since the competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness, an auditor may have to test the internal control surrounding that evidence to gather evidence to support an assessed level of control risk below the maximum for affected assertions. In situations where the auditor decides to rely on internal control and assess control risk below the maximum for certain assertions (including instances where the preponderance of electronic evidence necessitates it), tests of controls will need to be designed and then specific controls will need to be tested to determine the effectiveness of their design and operation.

.64 The processes, documents, and controls listed on this questionnaire are typical for medium to large business entities but are by no means all-inclusive. The preponderance of "No" or "N/A" responses may indicate that the entity uses other processes, documents, or controls in their information and communication systems. You should consider supplementing this questionnaire with a memo or flowchart to document significant features of the client's system that are not covered by this questionnaire. See AAM section 4500 for example flowcharting techniques.

.65

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
I. Payroll				
A. Initiating Payroll Transactions				
1. Wages and salaries are approved by management.	_____	_____	_____	_____
2. Salaries of senior management are based on written authorization of the board of directors.	_____	_____	_____	_____
3. Bonuses are authorized by the board of directors.	_____	_____	_____	_____
4. Employee benefits and perks are granted in accordance with management's authorization.	_____	_____	_____	_____
5. Senior management benefits and perks are authorized by the board of directors.	_____	_____	_____	_____
6. Proper authorization is obtained for all payroll deductions.	_____	_____	_____	_____
7. Access to personnel files is limited to those who are independent of the payroll or cash functions.	_____	_____	_____	_____
8. Wage and salary rates and payroll deductions are reported promptly to employees who perform the payroll processing function.	_____	_____	_____	_____
9. Changes in wage and salary rates and payroll deductions are reported promptly to employees who perform the payroll processing function.	_____	_____	_____	_____
10. Adequate time records are maintained for employees paid by the hour.	_____	_____	_____	_____
11. Time records for hourly employees are approved by a supervisor.	_____	_____	_____	_____
B. Processing Payroll				
12. Payroll is calculated using authorized pay rates, payroll deductions, and time records.	_____	_____	_____	_____
13. Payroll registers are reviewed for accuracy.	_____	_____	_____	_____
14. Standard journal entries are used to post payroll transactions to the general ledger.	_____	_____	_____	_____
15. Payroll cost distributions are reconciled to gross pay.	_____	_____	_____	_____
16. Payroll information such as hours worked is periodically compared to production records.	_____	_____	_____	_____
17. Net pay is distributed by persons who are independent of personnel, payroll preparation, time-keeping, and check preparation functions.	_____	_____	_____	_____
18. The responsibility for custody and follow-up of unclaimed wages is assigned to someone who is independent of personnel, payroll processing, and cash disbursement functions.	_____	_____	_____	_____
19. Procedures are in place to estimate the fair value of stock-based compensation plans.	_____	_____	_____	_____

	<u>Personnel</u>	<u>N/A</u>	<u>No</u>	<u>Yes</u>
Payroll Cycle				
1. End user applications listed in paragraph .69 of this form have been adequately tested before use.	_____	_____	_____	_____
2. The application has an appropriate level of built-in controls, such as edit checks, range tests, or reasonableness checks.	_____	_____	_____	_____
3. Access controls limit access to the end user application.	_____	_____	_____	_____
4. A mechanism exists to prevent or detect the use of incorrect versions of data files.	_____	_____	_____	_____
5. The output of the end user applications is reviewed for accuracy or reconciled to the source information.	_____	_____	_____	_____

Information Processed by Outside Computer Service Organizations

.71 The Computer Applications Checklist—Medium to Large Business was used to document your understanding of the client's use of an outside computer service organization to process entity-wide accounting information such as the general ledger. In this section you will document your understanding of how the entity uses an outside computer service organization to process information relating specifically to the payroll cycle.

.72 In the space below, describe the payroll cycle information processed by the outside computer service bureau. Discuss—

- The general nature of the application.
- The source documents used by the service organization.
- The reports or other accounting documents produced by the service organization.
- The nature of the service organization's responsibilities. Do they merely record entity transactions and process related data, or do they have the ability to initiate transactions on their own?
- Controls maintained by the entity to prevent or detect material misstatement in the input or output.

AAM Section 4500

Flowcharting

Introduction

.01 AAM sections 4300 and 4400 provided a series of forms you may use to document your understanding of a client's internal control system. Included in those forms were several Financial Reporting Information Systems and Controls Checklists to document your understanding of the accounting system and controls for significant account balances. As an alternative or supplement to those checklists, you may wish to include a flowchart. In some instances, a flowchart may be easier to read and analyze than a checklist or memo.

.02 In general you will want to identify the following for your client's significant accounts and transactions:

- Source documents
- The conversion of documents to computer media
- The nature of computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.03 An entity's financial reporting information system may create many documents, files, and reports that are useful for managing the organization. As an auditor you need to understand and document only those aspects that are relevant to the audit of the financial statements. Documents, files, and reports that are not relevant to your audit need not be presented on a flowchart. For example, the same system that produces sales invoices and a sales journal may also produce a report of sales by salesperson. An understanding of this report may not be necessary to plan the audit.

.04 It is *not* necessary for you to understand how every copy of accounting documents may be used by the client. When the client prepares numerous copies of a document, you are concerned only with those relevant to the flow of transactions from initiation to inclusion in the financial statements.

Example: Jones Grocery

.05 *Jones Grocery is an eight-store chain of independent grocery stores in Anytown. The accounts payable cycle is described in the following paragraphs.*

.06 *When goods are received at each store, the store manager or another responsible employee counts and inspects the goods and checks them against the packing slip. A copy is retained by the store manager and the original is forwarded to the main store for processing.*

.07 *All vendor invoices are mailed directly to the main store, to the attention of Mrs. Jones. Her assistant matches the invoices to the packing slips received from individual stores. He investigates any discrepancies between quantities billed and quantities received, per the packing slips. He also follows up on any invoices received for which the store manager has not forwarded the packing slip.*

.08 The invoices are coded and then entered into the accounts payable module of the company's accounting software system. The invoices with attached packing slips are stored in a temporary file until they are paid.

.09 The computer system automatically updates the general ledger. It also produces two reports: an accounts payable subledger and an accounts payable aging. When statements are received from the vendors, Mrs. Jones checks them against the accounts payable subledger and investigates any differences. Periodically, she reconciles the accounts payable subledger to the general ledger. The accounts payable aging is checked to make sure totals agree to the accounts payable subledger.

.10 Mr. Jones writes the checks. There is a module in the software that links the accounts payable module to the cash disbursements module and automatically prints checks, but this was too confusing to install. The volume of checks is not that great, so the company prepares them manually.

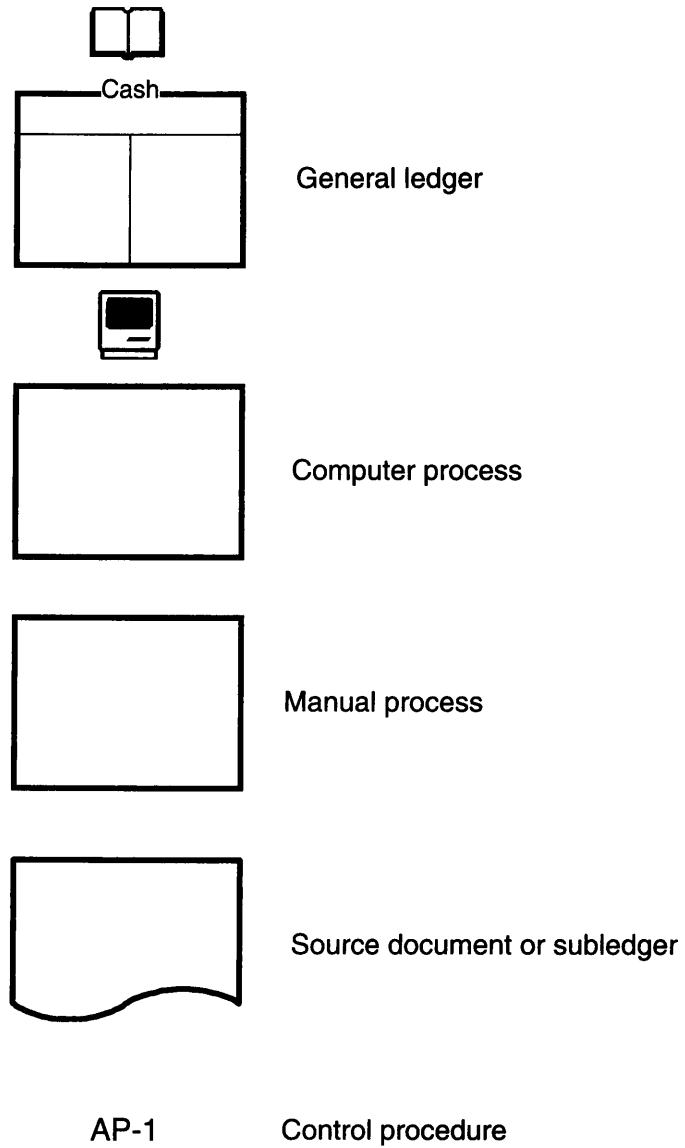

.11 Vendors are paid by invoice, not by statement. Payments are made monthly. Mr. Jones uses the accounts payable aging to determine which invoices should be paid. He marks these on the report and gives it to his secretary to prepare the checks. The matched vendor invoices and receiving reports that have been stored in temporary files are attached to the typed check for Mr. Jones' signature. Two check copies are retained: one is attached and filed with the invoice and a second is filed numerically.

.12 Once the checks are signed, they are coded and entered into the cash disbursements module of the accounting software package. The software updates the general ledger, the accounts payable subledger and aging, and produces a cash disbursements report. It also produces a cash management report that may be used to estimate the future cash needs of the business.

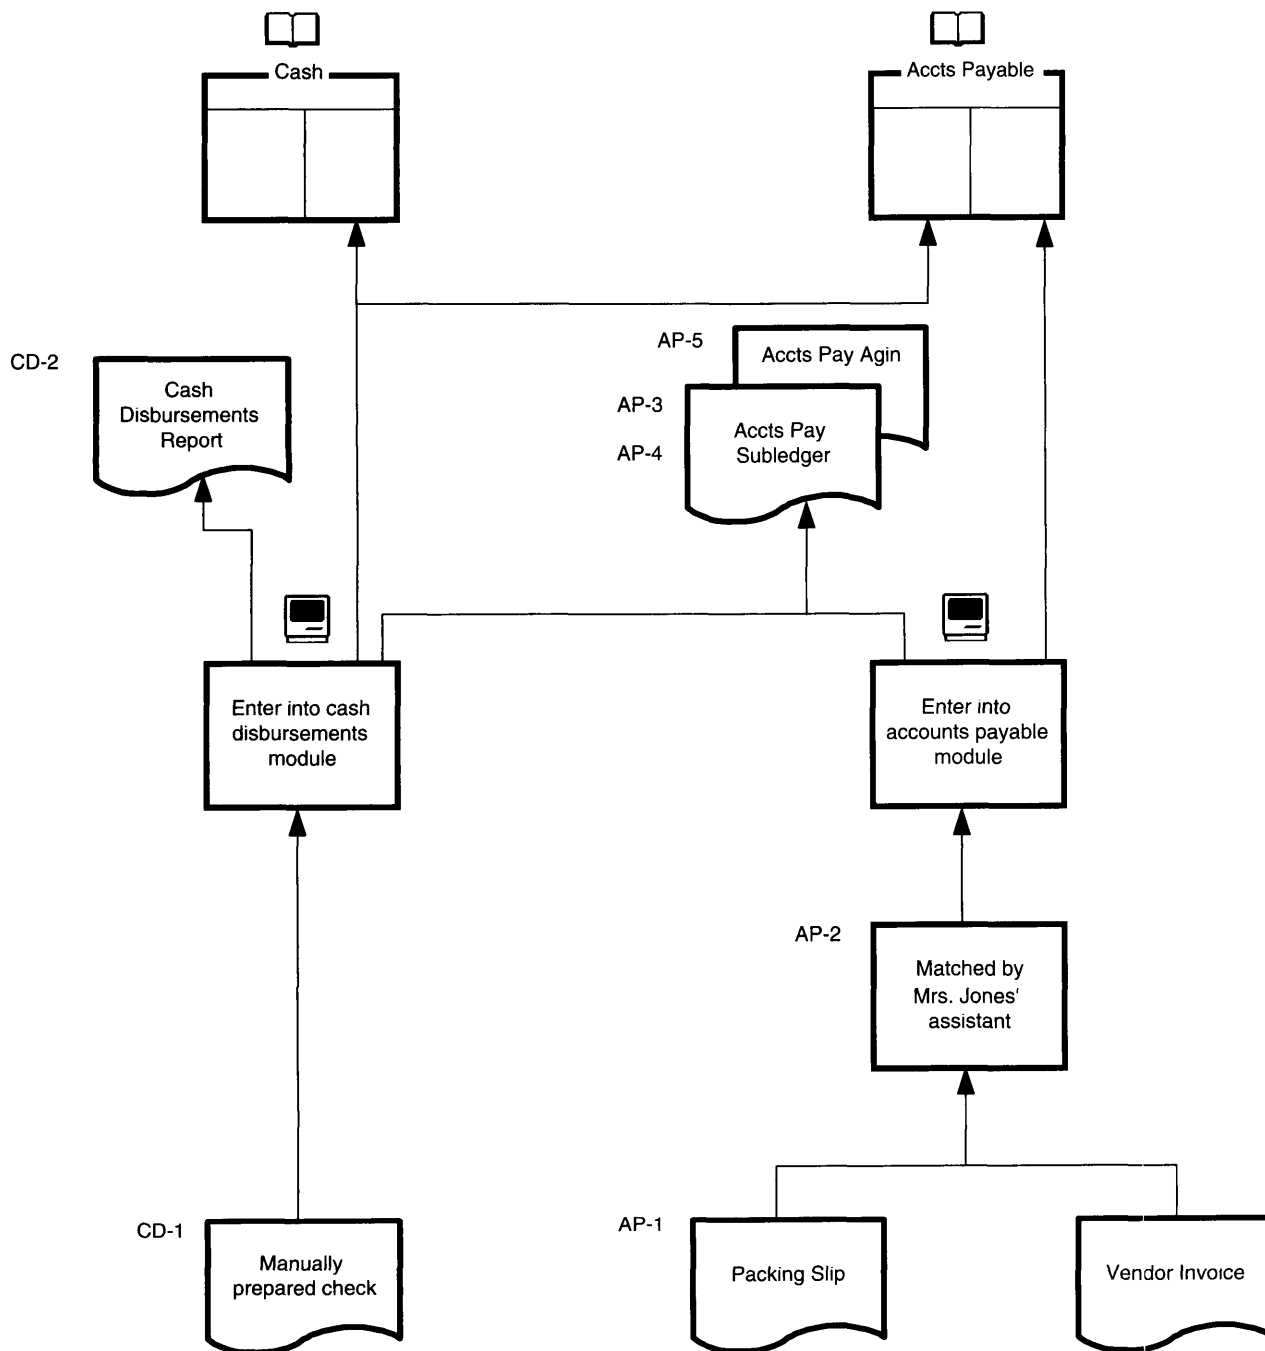

.13 Monthly, the cash disbursements report is used to reconcile the cash accounts to the bank statements.

The Flowchart

.14 The flowchart on the following page illustrates how an auditor might flowchart the accounts payable system described in AAM section 4500.05 through .13. The following symbols have been used.

Jones Grocery Accounts Payable

.15 The flowchart should be read from the bottom to the top. The initiation of transactions and related source documents are depicted at the bottom of the page. The processing is described as an upwards flow until the information reaches the general ledger at the top of the page.

.16 Following the flowchart is a brief memo describing the controls that are documented on the flowchart.

Jones Grocery Accounts Payable

<u>Control No.</u>	<u>Description</u>
AP-1	Store managers count and inspect goods received and compare to the packing slip.
AP-2	Packing slips are matched to vendor invoices and discrepancies are investigated.
AP-3	Accounts payable subledger is checked against monthly statements received from vendors. Differences are investigated.
AP-4	Accounts payable subledger is reconciled to the general ledger
AP-5	Accounts payable aging is reconciled to accounts payable subledger
CD-1	Accounts payable aging is used to determine which invoices to pay. Invoices and packing slips are attached to checks ready for signature.
CD-2	Cash disbursements journal is used to reconcile cash balances to monthly bank statements.

Analysis

.17 The flowchart on the preceding page includes only those documents, records, and processes that are relevant to the audit of the financial statements. The narrative description of the system included in AAM section 4500.05 through .13 included several items that are not relevant to the audit. These items are that—

- Individual stores maintain a copy of the packing slip (AAM section 4500.06).
- Invoices and packing slips are stored in a temporary file (AAM section 4500.08).
- Two check copies are retained: one is attached and filed with the invoice and a second is filed numerically (AAM section 4500.11).
- The system generates a cash management report (AAM section 4500.12).

.18 Because the above items are not relevant to the audit, they are not included on the flowchart.

.19 The flowchart starts at the bottom of the page with the initiation of the transaction. In the case of the cash disbursement, the transaction is initiated when Mr. Jones signs and mails the checks. Reviewing the accounts payable aging and checking off invoices is not a transaction that has accounting significance. This is a control activity that is described in narrative form. It is not depicted on the flowchart.

.20 The flowchart depicts the direct flow of accounting information, from the initiation of the transaction to the inclusion in the general ledger. Documents, reports, and processes outside of this direct flow need not be documented.

[The next page is 4601.]

AAM Section 4600

Assessing Control Risk Below the Maximum

Introduction

.01 As described in AAM section 3125, you may choose one of two general audit strategies.

- A primarily substantive approach (however, see paragraph .03 below), where control risk is assessed at or slightly below the maximum, or
- An approach where control risk is assessed below the maximum.

.02 Control risk should be assessed at the maximum (primarily substantive approach) for some or all assertions if—

- Controls are unlikely to pertain to an assertion.
- Controls are unlikely to be effective.
- It would not be efficient for you to obtain evidential matter to evaluate the effectiveness of controls.

.03 In entities where significant information is transmitted, processed, maintained, or accessed electronically, the auditor may determine that it is not practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. The competence of electronic evidence usually depends on the effectiveness of internal control over its validity and completeness. (The term electronic evidence means information transmitted, processed, maintained, or accessed by electronic means and used by an auditor to evaluate financial statement assertions.) Without testing the internal control surrounding the electronic evidence, a lack of credibility may not be recognized by the auditor. Therefore, when using electronic evidence, auditors need to question the appropriateness of the approach of performing only substantive testing if ineffective controls exist, or if assessed control risk is at the maximum level. Given the nature of electronic evidence, it usually will be necessary to test the surrounding internal control (to gather evidence to support an assessed level of control risk below the maximum) if that electronic evidence is significant in supporting an auditor's conclusion regarding certain financial statement assertions. If the auditor concludes control risk must be assessed at the maximum in such circumstances, or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the scope limitation.

Practice Tip

Read the AICPA's Auditing Procedure Study entitled *The Information Technology Age: Evidential Matter in the Electronic Environment* for helpful and valuable guidance about the implications of electronic evidence on an audit. Call the AICPA at (888) 777-7077 and ask for product number 021068.

You may choose to assess control risk at the maximum either for audit efficiency purposes or because of ineffective controls. If you choose a primarily substantive audit because the controls are ineffective, you may have additional concerns about the auditability of the entity and other questions. Assuming you are able to overcome auditability concerns, you may respond by heightening the degree of professional skepticism, assigning more experienced staff, and changing the nature, timing, and extent of substantive procedures.

.04 Assessing control risk below the maximum involves—

- Identifying specific controls relevant to specific assertions.
- Performing tests of controls.
- Concluding on the assessed level of control risk.

.05 The understanding about internal control should be used to identify the types of potential misstatements that could occur and to consider factors that affect the risk of material misstatement. When assessing control risk, controls should be identified that are likely to prevent or detect material misstatement in specific assertions. Controls can have either a pervasive effect on many assertions or a specific effect on an individual assertion, depending on the nature of the particular control component involved. The more direct the relationship between the control and the assertion, the more effective that control may be in reducing control risk for that assertion. For example, regular physical inventory count procedures are more likely to detect and correct misstatements than management's monitoring of gross-profit percentages.

.06 Note that the choice of an audit strategy is done at the *assertion* level and is not a global strategy for the entire audit. For some assertions, you may choose a primarily substantive approach; for other assertions, you may plan to assess control risk below the maximum.

.07 *Jones Grocery is a small chain of independent grocery stores in Anytown. Assume you have been the auditor of Jones Grocery for several years. During that time you have helped Mr. and Mrs. Jones design and implement the procedures used for the annual inventory count. The count itself is performed by an outside inventory count company that specializes in taking inventory at grocery stores. The outside company is supervised by Jones Grocery employees. Based on this knowledge of the controls for the physical inventory count, you may assess internal control risk below the maximum for the existence assertion related to inventory.*

.08 In the above example, the audit strategy was determined at the assertion level. The physical count of inventory is a control directly related to the existence assertion. It has little relevance to the valuation assertion and no relevance to the completeness assertion. Thus, you are able to modify tests related to the existence assertion, for example, reducing the number of test counts or stores where inventory is observed. Substantive audit procedures related to other assertions (for example, proper pricing) should not be modified.

.09 General controls relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. The need to identify not only application controls directly related to one or more assertions, but also relevant general controls should be considered.

Performing Tests of Controls

.10 Procedures directed toward evaluating the effectiveness of the *design* of controls are concerned with whether the control is suitably designed to prevent or detect material misstatements in specific financial statement assertions. Procedures to obtain such evidential matter ordinarily include—

- Tests performed in previous audits.
- Inquiries of appropriate personnel.
- Inspection of documents, reports, or electronic files.
- Observation of the application of specific controls.

.11 Tests of controls directed toward the effectiveness of the operation of a control are concerned with how the control (whether manual or automated) was applied, the consistency with which it was applied during the audit period, and by whom it was applied. These tests ordinarily include—

- Tests performed in previous audits.
- Inquiries of appropriate personnel.
- Inspection of documents, reports, or electronic files, indicating performance of the control.
- Observation of the application of specific controls.
- Reperformance of the application of the controls by the auditor.

.12 For controls for which documentary evidence exists, you may choose to examine the documents. For other controls (for example, segregation of duties) documentation may not exist. These controls often can be tested only by inquiry and observation.

.13 For example, you may decide to obtain evidence of the effectiveness of the design and operation of an entity's budgetary control methods. You could make inquiries of management about what variations from budget are investigated and the controls for reporting the reasons for these variances. Based solely on this inquiry, you would generally assess control risk at the maximum.

.14 The effectiveness of tests of controls may be increased by examining reports generated and asking more detailed question (such as about whether personnel follow up on budgets or about the timeliness of the investigations or the nature of the reports). By combining these inquiries with examination of written explanations of variances, the auditor can determine the operating effectiveness of these controls. This documentation may provide direct evidence for assessing the effectiveness of these controls in preventing or correcting misstatements in the financial statements.

.15 When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. Accordingly you should consider that—

- Evidence from prior audits may be affected by subsequent changes in internal control.
- Inquiry alone generally will not provide sufficient evidential matter to support a conclusion about the effectiveness of a specific control.
- Evidence from inquiry alone depends on the extent of the inquiries.
- Observation of employees in the performance of their duties may corroborate evidence obtained from other sources, but pertains only to the point in time at which the observation was made.
- Evidence from inspection of documents depends on the extensiveness of inspections made.

.16 In designing tests of automated controls, consider the need to obtain evidence supporting the effective operation of controls directly related to the assertions as well as other indirect controls on which these controls depend. For example, you may identify a "user review of an exception report of credit sales over a customer's authorized credit limit" as a direct control related to an assertion. In such cases, you should consider the effectiveness of the user review of the report and also the controls related to the accuracy of the information in the report (for example, the general controls).

.17 Because of the inherent consistency of IT processing, you may be able to reduce the extent of testing of an automated control. For example, a programmed application control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once you have determined that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), consider performing tests to determine that the control continues to function effectively. Such tests might include determining that changes to the program are not made without being subject to the appropriate program change controls, that the authorized version of the program is used for processing transactions, and that other relevant general controls are effective. Such tests also might include determining that changes to the programs have not been made, as may be the case when the entity uses packaged software applications without modifying or maintaining them.

.18 To test automated controls, you may need to use techniques that are different from those used to test manual controls. For example, computer-assisted audit techniques may be used to test automated controls or data related to assertions. Also, you may use other automated tools or reports produced by IT to test the operating effectiveness of general controls, such as program change controls, access controls, and system software controls. You should consider whether specialized skills are needed to design and perform such tests of controls.

Documenting the Assessed Level of Control Risk

.19 In addition to the documentation of the understanding of internal control, the auditor should document his or her conclusions about the assessed level of control risk. Conclusions about the assessed level of control risk may differ as they relate to various account balances or classes of transactions. For those financial statement assertions where control risk is assessed at the maximum level, the auditor should document his or her conclusion that control risk is at the maximum level but need not document the basis for that conclusion. For those assertions where the assessed level of control risk is below the maximum level, the auditor should document the basis for his or her conclusion that the effectiveness of the design and operation of controls supports that assessed level. The nature and extent of the auditor's documentation are influenced by the assessed level of control risk, the nature of the entity's internal control, and the nature of the entity's documentation of internal control.

Evidence From Prior Audits

.20 You can use evidence from prior audits to help support your assessment of control risk in the current audit. To evaluate the use of such prior period evidential matter for the current audit, you should consider—

- The significance of the assertion involved.
- The specific controls that were evaluated during the prior audits.
- The degree to which the effective design and operation of those controls were evaluated.
- The results of the tests of controls used to make those evaluations.
- The evidential matter about design or operation that may result from substantive tests performed in the current audit.
- The time that has elapsed since the performance of the tests of controls.

.21 When using evidence from prior audits, you should consider that changes—either in the controls themselves or in personnel—may have occurred subsequent to the prior audit. You should obtain current evidence about whether changes have occurred subsequent to the prior audit, as well as the nature and extent of any changes. You should obtain evidential matter about changes in effectiveness of design and about changes in operating effectiveness.

.22 When changes in internal control between audits are relatively minor, evidential matter obtained in prior audits may provide assurance for the current audit. Conversely, changes may be so significant that evidential matter obtained in prior audits may provide limited or no assurance for the current audit.

.23 You should also obtain evidence in the current audit about the continued operating effectiveness of controls for which the design has remained unchanged. Decisions about the degree of assurance from prior audit evidence and about additional evidential matter needed in the current audit are affected by adverse conditions that may affect whether the controls are likely to continue to operate effectively, such as—

- Changes in the nature of transactions being processed or increases in volume.
- Changes in management attitudes or reduction of supervision.

- High turnover of employees.
- Increases in responsibilities or workloads of employees.
- The effect of related controls that reinforce the continued effective operation of the controls, such as the following:
 - Documented procedures manuals.
 - Close management supervision, including frequent communication and responsibility reporting.
 - Computer general control activities.

.24 You should obtain evidence in the current audit about the operating effectiveness of changed controls. If there are significant changes in design, prior evidence provides little, if any, assurance in the current audit.

Computer Applications

.25 As described in AAM section 4200, your understanding of the control activities in the computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up activities
- Computer general control activities and manual follow-up activities

.26 User controls may provide evidence that the programmed control activities operate effectively, in which case you may choose to understand and test the user controls. If these controls are designed and operating effectively, these tests may support a lower control risk assessment.

.27 You might plan an audit strategy of testing programmed control activities and the related manual follow-up. For example, you might use computer-assisted audit techniques, such as generalized audit software or the processing of test data, to test the programmed control activities that produce an exception report. These tests provide evidence about the design and operation of programmed control activities; however, they do not provide evidence about the consistent application of the control activities. Evidence is provided only about the point in time when they are performed. The use of computer-assisted audit techniques expands the ability to analyze data, recognize patterns, and test the assertions contained in the financial statements. However, evidence produced for the auditor by software may not be competent due to the functionality of and processing used by the software. When used properly, computer-assisted audit techniques enhance auditor efficiency and effectiveness.

.28 If you test programmed control activities you also need to test the related manual follow-up activities, for example the activities used to follow up on the items listed on an exception report. The effectiveness of the control activities relates to both an accurate computer produced exception report and an effective manual follow-up of the exceptions.

.29 The degree to which you may need to test programmed control activities depends on the effectiveness of computer general control activities, especially the effectiveness of controls over the development of and changes to programs.

AAM Section 4700

The Auditor's Assessment of Control Risk

.01 Most of the auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter concerning the assertions in such financial statements. SAS No. 31, *Evidential Matter*, as amended by SAS No. 48 and SAS No. 80 (AU section 326), presents assertions as representations by management that are embodied in financial statement components. In obtaining evidential matter in support of financial statement assertions, the auditor develops specific audit objectives in light of those assertions. There is not necessarily a one-to-one relationship between audit objectives and audit procedures.

.02 Assertions are classified in SAS No. 31 (AU section 326), as amended, according to the following broad categories:

- *Existence or occurrence.* Reported assets and liabilities actually exist at the balance-sheet date, and transactions reported in the income statement actually occurred during the period covered.
- *Completeness.* All transactions and accounts that should be included in the financial statements are included, and there are no undisclosed assets, liabilities, or transactions.
- *Rights and obligations.* The entity owns and has clear title to assets and liabilities which are the obligations of the entity.
- *Valuation or allocation.* The assets and liabilities are valued properly and the revenues and expenses are measured properly.
- *Presentation and disclosure.* The assets, liabilities, revenues, and expenses are properly classified, described, and disclosed in the financial statements.

.03 SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78, *Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55*, and SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AU section 319), states that the auditor should assess control risk in terms of assertions for material components of the financial statements. Many practitioners may consider audit objectives that relate to the assertions when assessing control risk. SAS No. 55 (AU section 319), as amended, does not preclude or require any specific approach as long as control risk is ultimately assessed at the assertion level. For example, an approach of identifying internal control policies and procedures and relating those to significant audit objectives for account balances or transaction classes would be appropriate. Practice aids for documenting the assessed level of control risk using this approach are illustrated in AAM section 4700.05–.10.

.04 The following audit documentation is to be used to document the auditor's assessment of control risk. They are to be completed when it is expected that control risk is to be assessed below maximum for certain assertions. The audit documentation should be modified as needed and is not meant to cover all types of controls. They are to initially be completed in the planning phase of the audit. Based on the results of tests of controls, the auditor then determines whether the initial assessment of control risk is appropriate and documents their conclusion.

Audit Approach and Programs

The material included in these sections on audit approach and programs is presented for illustrative purposes only. The comments, illustrative audit objectives, and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent, and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

This manual is a nonauthoritative kit of practice aids. Accordingly, these sections include minimal explanation and discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate. Users should also note that this manual does not deal with specialized industry problems; reference should be made to applicable AICPA Audit and Accounting Guides.

AAM Section 5100

Designing the Audit Program

.01 The objective of an audit is to express an opinion on whether financial statements present fairly in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with generally accepted auditing standards. The procedures that the auditor plans to use to gather evidence are outlined in an audit program.

.02 Since the audit program describes the evidence-gathering steps to be used in the audit, it should be carefully designed. Designing an audit program involves three major considerations:

- a. Deciding *what* procedures to apply—the *nature* of audit tests
- b. Deciding *when* to apply the procedures—the *timing* of audit tests
- c. Deciding *which* items to apply the procedures to—the *extent* of audit tests

.03 Flowchart 1 presents an overview of the structure of the audit process. To design an audit program that is efficient and effective, the auditor should—

- a. Identify the client's assertions regarding each material component of the financial statements.
- b. Consider the risk of material misstatement due to error or fraud, and illegal acts that have a direct and material effect on the financial statements.¹
- c. Establish specific audit objectives relating to the assertions in the financial statements.
- d. Determine the audit procedures to be performed to accomplish the audit objectives.
- e. Determine when to perform the audit procedures.
- f. Determine which of many items to apply audit procedures to.

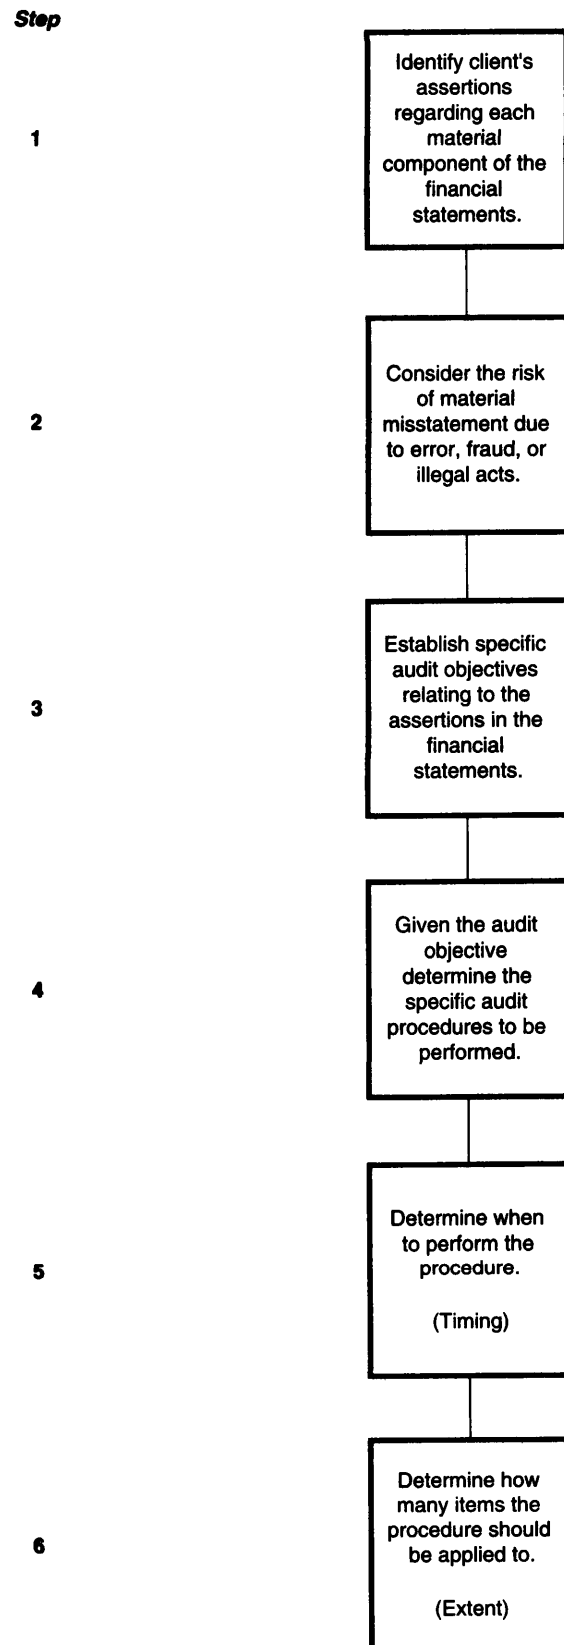

.04 The six steps illustrated in flowchart 1 result in a determination of the nature, timing, and extent of audit tests.

Financial Statement Assertions

.05 According to SAS No. 31, *Evidential Matter*, as amended by SAS No. 48 and SAS No. 80 (AU section 326), the independent auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter concerning the assertions in such financial statements. These assertions are embodied in the account balance, transaction class, and disclosure components of financial statements and are classified according to the following broad categories:

¹ Auditing interpretation No. 1 of SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 9312.01-.04), defines a misstatement as something that causes the financial statements not to be in conformity with generally accepted accounting principles (GAAP). Misstatements may consist of (1) difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under GAAP, (2) the omission of a financial statement element, account, or item, (3) a financial statement disclosure that is not presented in accordance with GAAP, or (4) the omission of information required to be disclosed in accordance with GAAP.

Flowchart 1
Audit Logic Process

- a. *Existence or Occurrence.* Reported assets and liabilities actually exist at the balance-sheet date, and transactions reported in the income statement actually occurred during the period covered.
- b. *Completeness.* All transactions and accounts that should be included in the financial statements are included, or there are no undisclosed assets, liabilities, or transactions.
- c. *Rights and Obligations.* The company owns and has clear title to assets and liabilities are obligations of the company.
- d. *Valuation or Allocation.* The assets and liabilities are valued properly, and the revenues and expenses are measured properly.
- e. *Presentation and Disclosure.* The assets, liabilities, revenues, and expenses are properly classified, described, and disclosed in the financial statements.

Developing Audit Objectives

.06 A misrepresentation of any of the five financial statement assertions could cause a material misstatement in the financial statements. The auditor should consider the risk of material misstatement for each assertion in the financial statements, and then obtain evidence to support the financial statement assertions to reduce the risk of material misstatement to an acceptably low level. To determine what type of evidence to obtain, the auditor develops specific audit objectives related to each assertion.

.07 In determining audit objectives, the auditor should evaluate each of the five assertions as they relate to the specific account balance or class of transactions being examined. For example, if the auditor is attempting to gather evidence on the assertion of *existence* of inventory, the auditor's objective would be to gather evidence that inventory included in the balance sheet physically existed at the date of the balance sheet.

Figure 1

Relationship of Assertions and Objectives for Inventory

<u>Financial Statement Assertion</u>	<u>Illustrative Audit Objectives</u>
Existence or occurrence	—Inventories included in the balance sheet physically exist.
Completeness	—Inventory quantities include all products, materials, and supplies on hand. —Inventory quantities include all products, materials, and supplies owned by the client that are in transit or stored at outside locations. —Inventory listings are accurately compiled and the totals are properly included in the inventory accounts.
Right and obligations	—The entity has legal title or similar rights of ownership to the inventory.
Valuation or allocation	—Inventories are properly stated at cost (except when market is lower).
Presentation and disclosure	—Inventories are properly classified in the balance sheet as current assets.

An example of the relationship between financial statement assertions and audit objectives is shown in Figure 1.

Audit Tests

.08 After the auditor has determined the audit objectives, the method of achieving the objectives should be selected. Although these methods are referred to by various names such as audit procedures, audit techniques, and audit tests, they represent the evidence-gathering methods auditors use. The basic requirement for determining audit procedures, according to SAS No. 31, paragraph 13, as amended (AU section 326.13), is that:

The procedures adopted should be adequate to achieve the auditor's specific objectives and reduce detection risk to a level acceptable to the auditor. The evidential matter obtained should be sufficient for the auditor to form conclusions concerning the validity of the individual assertions embodied in the components of financial statements.

.09 Some audit procedures can satisfy a combination of audit objectives for a given account balance or class of transactions. For example, the auditor's observation of a physical inventory count can provide evidence that inventories physically exist and that inventory quantities include all products, materials, and supplies on hand.

.10 Audit tests or procedures can be classified or categorized in a variety of ways. The most common classifications are by purpose of the test or by type of test.

Purpose of the Test

.11 According to SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit*, as amended by SAS No. 78 and SAS No. 94 (AU section 319), the purpose of performing audit tests are:

- a. To evaluate the effectiveness of the design and operation of internal controls. These tests are referred to as tests of controls.
- b. To detect material misstatements in financial statement assertions. These tests are referred to as substantive tests.

.12 Substantive tests are procedures applied to account balances or classes of transactions to determine if there are material misstatements in the financial statements. The substantive test that the auditor performs consists of tests of details of transactions and balances and analytical procedures. In assessing control risk, the auditor also may use tests of details of transactions as tests of controls. The objective of tests of details of transactions performed as substantive tests is to detect material misstatements in the financial statements. The objective of tests of details of transactions as tests of controls is to evaluate whether controls operated effectively. Although these objectives are different, both may be accomplished concurrently through performance of a test of details on the same transaction.

.13 If the control risk is assessed at less than the maximum level, the auditor should obtain sufficient evidential matter to support that assessed level. The evidential matter that is sufficient to support a specific assessed level of control risk is a matter of auditor judgment. The type of evidential matter obtained all bear on the degree of assurance provided. Since the auditor's substantive testing is affected by the quality of the controls, the auditor is concerned with whether the controls established are designed and operating effectively. The role of tests of controls is to justify this assertion.

.14 The nature, timing, and extent of substantive tests are generally based on the assessment of inherent risks, control risk, and other risk assessments made during the planning phase of the engagement. For example, the higher the assessment of control risk, the more comprehensive the substantive tests should be. If analytical procedures performed during the planning phase of the engagement suggest that some account balances are unexpectedly high or low, the auditor may determine that those balances warrant more testing. Tests' effectiveness can be modified by changing their nature (for example, tests of balances versus analytical

procedures), timing (testing as of the balance-sheet date versus an interim date), or extent (testing 100 percent versus sampling). Similarly, the auditor may be able to change the same factors to make audits more efficient. While the main objective is to perform an effective audit, if alternative tests are equally effective, the auditor should choose the most efficient one.

.15 Planning occurs throughout the engagement and as a result the auditor might have to reassess risk as the engagement unfolds. For example, even if tests of controls indicated that an area had low risk and the auditor planned substantive tests accordingly, information might come to the auditor's attention during the audit that requires reassessment of the risk. Such information might include, for example, unexpected deviations from control procedures, misstatements that the internal controls should have caught, or new information about transactions or balances.

.16 The most effective and efficient audit strategy for a small business engagement, without a significant electronic environment, generally is to assess the control risk at the maximum level (the greatest probability that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by an entity's internal control). In this case, the auditor will use the knowledge obtained from the understanding of internal control and the assessed level of control risk in designing substantive tests for financial statement assertions. In situations where electronic evidence (i.e., information transmitted, processed, maintained, or accessed by electronic means—for example, using a computer, scanner, sensor, or magnetic media) will be significant in gaining competent evidential matter regarding financial statement assertions, the ability to rely solely on substantive tests may not be present inasmuch as the competence of electronic evidence depends on the effectiveness of internal control over its validity and completeness. This is especially the case when evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form. In such circumstances, the auditor should perform tests of controls to gather evidence to support an assessed level of control risk below the maximum for affected assertions. If the auditor concludes control risk must be assessed at the maximum in such circumstances, or the evidence gathered through tests of controls and substantive tests is insufficient, the auditor should qualify or disclaim an opinion because of the resulting scope limitation.

Type of Test

.17 Auditors perform four types of tests:

- a. Analytical procedures
- b. Inquiry and observation
- c. Tests of transactions
- d. Tests of balances

The relationship of audit tests by purpose to audit tests by type is shown in figure 2.

Analytical Procedures

.18 Analytical procedures are tests applied to the *total* recorded amounts and are based on the existence of plausible and consistent relationships among financial statement elements or between financial and nonfinancial amounts. Analytical procedures are used for the following purposes:

- a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures.
- b. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions.
- c. As an overall review of the financial information in the final review stage of the audit.

.19 Analytical procedures can be effective:

- For certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts).
- When the relationships between amounts are very predictable.
- When the data used to develop expectations based on the relationship are reliable.
- When relatively precise expectations can be developed.

.20 Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they should be used whenever practical.

.21 SAS No. 56, *Analytical Procedures* (AU section 329), describes analytical procedures as follows:

Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

- a. Financial information for comparable prior period(s) giving consideration to known changes.
- b. Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data.
- c. Relationships among elements of financial information within the period.
- d. Information regarding the industry in which the client operates—for example, cost of funds information.
- e. Relationships of the financial information with relevant nonfinancial information.

.22 Whenever analytical procedures are applied as substantive tests, the auditor must apply the following procedures:

- a. Consider whether the relationship is plausible and predictable.
- b. Consider whether the data used for the comparison is reliable.
- c. Consider whether the account balance tested is consistent with the auditor's expectations. If it is not consistent, obtain the client's explanation for the variance and get evidence to corroborate the client's explanation.

.23 SAS No. 56 (AU section 329) also requires that analytical procedures be performed at the planning and final review stages of the audit.

Inquiry and Observation

.24 Testing of controls that leave no audit trail of documentary evidence is usually tested by inquiry and observation. Auditors make inquiries of different individuals and conduct observation tests to determine who performs a particular activity or how or when the activity is done. For example, the auditor may ask different individuals about who posts to the receivables ledger, the auditor may observe who prepares the bank reconciliation, or the auditor may observe when cash is deposited in the bank. Typically, inquiry alone is not sufficient evidence of effective operation of controls.

.25 Inquiry and observation can also be used as substantive tests. For example, an audit procedure such as observation of a *physical asset* to determine that it exists is a substantive test relating to the existence assertion. Likewise, inquiries regarding subsequent events would be a substantive test because they provide evidence regarding the adequacy of disclosures in the financial statements.

Matrix of Audit Tests by Purpose and Type**Figure 2**

		Purpose of Test	
		Substantive Test	Test of Controls
Type of Test	Analytical Procedures	Yes Example A	No
	Inquiry and Observation	Yes Example H	Yes Examples B, C, I
	Tests of Transactions	Yes Example D	Yes Examples E, F
	Tests of Balances	Yes Examples G, H	No

Examples:

A—Comparison of this year's expenses with last year's expenses giving consideration to known changes

B—Observation by auditor that cash is deposited daily by a specific clerk

C—Inquiry by auditor about who deposits cash and how often

D—Examination of invoices to support additions (specific transactions) to fixed assets account during year

E—Examine sales invoices to see if initials of credit manager are there to indicate a credit file and credit approval (Inspection Test)

F—Vouch from sales invoices to credit files to see if customer has a credit file and has been approved for credit (Reperformance Test)

G—Confirmation of year-end balances in accounts receivable

H—Observation of the existence of a building

I—Extended walk-through of an application

Tests of Transactions

.26 Tests of transactions consist of the examination of the documents and accounting records involved in the processing of specific transactions. Such procedures can accomplish both testing of controls and substantive testing and are sometimes used concurrently.

.27 Tests of controls are accomplished when the auditor examines transaction documentation to determine if controls have been applied as prescribed. Tests of transactions as tests of controls can be classified as either inspection tests or reperformance tests. If the auditor examines documentation, the tests of controls are classified as an inspection test. Alternatively, if the auditor repeats controls performed by the client, the

tests of controls are classified as reperformance tests. For example, a control may require employees to match vendors' invoices with purchase orders and receiving reports and then initial the invoices to indicate that the procedure was performed. If the auditor tests the control by examining invoices for initials, the test is an inspection test. If the auditor tests the control by comparing vendors' invoices with purchase orders and receiving reports, the test is a reperformance test. Reperformance tests may also take the form of simulated processing, or processing of test data. Regardless of whether the auditor tests by inspection or reperformance, the test of control is a test of transactions.

.28 The substantive objective of tests of transactions is accomplished when the auditor examines transaction documentation to determine if dollar errors exist in a balance. For example, if the auditor examines documentation supporting individual charges (debits) to an equipment account to determine that the account balance is fairly stated, the test is classified as a substantive test of transactions.

Tests of Balances

.29 Tests of balances are procedures applied to the *individual items* that compose an account balance or class of transactions. The tests involve confirmation, inspection, or observation procedures to provide evidence about the recorded amount. Tests of balances are substantive tests designed to identify misstatements by a direct test of the ending balance rather than by testing the transactions that make up that balance.

.30 Substantive tests of transactions and tests of balances are interrelated in that each class of transactions affects a related account balance. Since financial statement amounts are the accumulation of transactions, an auditor may test the transactions that enter the account (that is, the debits and credits), the account balance itself (that is, the ending balance), or both.

Linking Audit Procedures to Objectives

.31 To design an audit program, the audit should select audit procedures that achieve specific audit objectives developed from the five broad assertions for each material account balance in the financial statements.

.32 In selecting audit procedures to achieve the audit objectives developed, an auditor considers the following, according to SAS No. 31, as amended:

- a. The risk of material misstatement of the financial statements including the assessed levels of control risk.
- b. The expected efficiency and effectiveness of possible audit procedures.
- c. The nature and materiality of the items being tested.
- d. The kinds and competence of available evidential matter.
- e. The nature of the audit objective to be achieved.

The Completeness Assertion

.33 SAS No. 31, paragraph 5, as amended (AU section 326.05), discusses the completeness assertion:

Assertions about completeness address whether all transactions and accounts that should be presented in the financial statements are so included. For example, management asserts that all purchases of goods and services are recorded and are included in the financial statements. Similarly, management asserts that notes payable in the balance sheet include all such obligations of the entity.

.34 Substantive tests that provide assurance regarding the completeness assertion are those that provide evidence about whether all transactions have been captured by the client's accounting system and are included in the financial statements.

.35 Gathering evidence about whether all transactions have been recorded is one of the most difficult audit objectives to achieve. Evidence of completeness can be even more difficult to obtain when a client does not have good internal control or has only an informal record-keeping system. Because these two characteristics often apply to small business, satisfying the completeness objective can be difficult for the auditor in a small business engagement.

.36 Completeness relates to whether all items have been included in the financial statements. The completeness assertion is violated if a transaction or account is omitted from the financial statements. If a transaction is merely recorded in the wrong account, there is no violation of the completeness assertion since the transaction is still recorded in the financial statements. In such a situation, the accounts are not incorrect because of a completeness error; rather, they are incorrect because of a classification error. A classification error is a violation of the presentation and disclosure assertion.

.37 For many accounts, the completeness assertion is the most difficult to test. The difficulty arises because the auditor must gather evidence about potential unrecorded items. Sources of audit evidence regarding unrecorded items often are not readily available.

Lack of Evidence

.38 To give an unqualified opinion, the auditor must gather sufficient, competent evidential matter to reduce the level of audit risk to an appropriately low level. SAS No. 31, paragraph 23, (AU section 326.25) as amended, provides the following guidance when the auditor is unable to gather sufficient evidence to be satisfied regarding the completeness assertion:

To the extent the auditor remains in substantial doubt about any assertion of material significance, he must refrain from forming an opinion until he has obtained sufficient competent evidential matter to remove such substantial doubt, or he must express a qualified opinion or a disclaimer of opinion.

.39 SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AU section 110.02), states:

The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. The auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by errors or fraud, that are not material to the financial statements are detected.

.40 SAS No. 31, as amended, requires the auditor to obtain evidence concerning inclusion in the financial statements of all types of transactions that the auditor has reason to believe has occurred based on the auditor's knowledge of the client and the industry in which it operates. Utilizing professional skepticism while performing the audit, the auditor should question transactions that are peculiar to the client or industry as well as question the lack of specific types of transactions.

.41 Practitioners sometimes accept management representations as sufficient audit evidence when completeness of recorded transactions cannot be substantiated. Management representations are part of the

evidential matter the auditor gathers, but they should not be used as a substitute for the performance of those procedures considered necessary to form an opinion on the financial statements. An auditor cannot rely on management representations alone as sufficient audit evidence to substantiate the completeness of account balances and classes of transactions. Obtaining such representations complements but does not replace other auditing procedures that the auditor should perform. [See Auditing Interpretation No. 3 of SAS No. 31, "The Auditor's Consideration of the Completeness Assertion" (AU section 9326.18–21).] When an auditor is unable to form an opinion, even though representations from the management have been received, there is a limitation on the scope of the audit that precludes the auditor from issuing an unqualified opinion (SAS No. 85, *Management Representations*, paragraph 14 [AU section 333.14]).

Controls for Completeness

.42 Controls for completeness are designed (1) to count or otherwise identify transactions executed by the entity and (2) to provide reasonable assurance that all transactions have been accurately recorded by the accounting system. For example, completeness controls over purchases can include reconciliation of all pre-numbered receiving reports that are missing, not recorded, or not otherwise accounted for. Many auditors prefer to rely on controls gathering evidence of completeness since extensive substantive tests for completeness may be more difficult to design than those for other SAS No. 31 assertions.

.43 If the auditor desires to assess control risk at less than the maximum level, tests of controls should be performed to determine that the controls are working as prescribed to make that control risk assessment. Once the control risk is assessed at less than maximum, the auditor may restrict substantive procedures designed to obtain evidential matter regarding the completeness assertion. Taken alone, the assessed level of control risk, ordinarily, is not sufficiently low to eliminate the need to perform any substantive tests. In addition, small businesses often lack segregation of duties, which usually prevents the auditor from assessing control risk at a low level. As a result, it is necessary to perform substantive tests of the completeness assertion.

Substantive Tests

.44 Many substantive tests are of limited usefulness in detecting errors of omission because they are usually applied to recorded amounts. Unrecorded transactions are not included in the account balances or classes of transactions to which the auditor applies substantive tests.

.45 Of all the financial statement assertions, only completeness involves consideration of whether there are material amounts that are not included in the account balance or class of transactions being tested. Therefore, substantive tests of the completeness assertion differ somewhat from substantive tests of other financial statement assertions. The difference is highlighted by the following excerpt from SAS No. 31, paragraph 11, as amended (AU section 326.11):

In designing substantive tests to achieve an objective related to the assertion of existence or occurrence, the auditor selects from items contained in a financial statement amount and searches for relevant evidential matter. On the other hand, in designing procedures to achieve an objective related to the assertion of completeness, the auditor selects from evidential matter indicating that an item should be included in the relevant financial statement amount and investigates whether that item is so included.

.46 Substantive tests can be designed to provide evidential matter to support a conclusion that specific account balances are not misstated by amounts that would cause the financial statements, taken as a whole, to be materially misstated because of unrecorded transactions.

.47 Important sources of evidential matter for completeness include source documents, such as order logs, shipping and receiving documents, and checks. One common test of completeness involves tracing

amounts from source documents to amounts recorded in the accounting records. For example, the auditor may vouch selected cash disbursements after the end of the audit period to test the completeness of amounts recorded as accounts payable at the balance-sheet date. Other substantive procedures that provide evidence concerning the completeness of financial statement account balances include the following:

- a.* Sales-and-purchases cutoff procedures that include tracing shipping and receiving documents processed after the audit period to accounting records for the proper period.
- b.* Analytical procedures in which the auditor investigates relationships among data that indicate a financial statement account or balance may be understated. For example, the auditor may obtain evidence that all interest-bearing debt is recorded by examining the relationship between recorded interest expense and the average balance of interest-bearing debt outstanding for the period. Disproportionate relationships based on the auditor's knowledge of interest rates should be investigated. Other examples include: a comparison of investment income to average investments for the period to test whether income earned on investments is recorded; the relationship of average pay times number of employees to payroll expense to substantiate that salaries are recorded; and the relationship of membership fee revenue to the number of members of an organization.
- c.* Confirmations of balances or transactions designed to identify unrecorded amounts, such as accounts payable confirmations that request the creditor to specify the amount of the client's obligation.
- d.* Tests of bank reconciliations, including examination of checks clearing the bank after the audit period to identify cash disbursements processed but not recorded or inappropriately recorded in the subsequent period.
- e.* Reading the minutes of the meetings (of the) board of directors and stockholders and tracing transactions authorized in the minutes to amounts recorded in the accounting records.
- f.* Overall reconciliations using financial and nonfinancial data, such as "proofs" of cash and sales.

AAM Section 5200

Timing of Substantive Audit Tests

.01 During the planning stage of the audit, the auditor should consider *when* to apply audit tests. The determination of whether substantive tests can or should be applied prior to year-end is usually based on practical considerations. In making that determination, the auditor evaluates the benefits of performing a substantive test prior to year-end against the potential costs of performing such interim work.

.02 For example, the auditor considers whether the benefits of easing pressures caused by a tight year-end reporting deadline outweigh the cost of gathering additional audit evidence necessitated by the use of a less effective test at an interim date.

.03 Substantive tests can be divided into two categories: those that can generally be applied at an interim date and those that *may be* efficient at an interim date only if certain conditions are met.

.04 If substantive testing is performed at an interim date, roll-forward work should be performed to provide evidence relating to the account balances at the balance-sheet date. In addition, if balances are tested at an interim date, the auditor should:

- Consider whether there are rapidly changing economic conditions that might predispose management to misstate the financial statements in the period after the date tested,
- Compare information concerning the balance at the balance-sheet date with comparable information at the interim date tested to identify unusual amounts,
- Apply additional tests of balances or analytical procedures to provide a reasonable basis for extending the conclusions about the balance at the interim date to the balance at the balance-sheet date, and
- Consider coordinating the tests of interrelated accounts and cutoffs.

Generally balances are tested as of an interim date only when control risk for the related assertions is assessed at below the maximum.

Substantive Tests That Can Generally Be Applied at an Interim Date

.05 Some substantive tests can generally be performed through any date prior to year-end and still be efficient and effective tests. Substantive tests that fall into this category are tests that apply to data readily available prior to year-end. Such tests include:

- a. Substantive tests of transactions to support balance sheet accounts (for example, supporting the details of additions and retirements to a fixed asset account)
- b. Substantive tests of transactions to support income statement accounts (for example, reviewing all charges over a certain dollar amount to the repairs-and-maintenance account)
- c. Analytical procedures that include calculations on an interim basis (for example, comparing actual and budgeted expenses for each month)

.06 In each of these tests, the auditor reviews information that is already available at an interim date. Even if these tests were done at year-end, the same information would be needed and the same procedure performed. Thus, these tests generally can be efficient when performed at an interim date.

.07 For example, auditors frequently support those balance sheet accounts with low activity, such as fixed assets, by analyzing the transactions within the account during the year. Consequently, for property, plant, and equipment the auditor can audit the account by analyzing material additions and retirements rather than by testing the ending balance. To support additions the auditor may vouch material additions to invoices. Vouching such invoices may be performed before year-end without reducing the efficiency or effectiveness of the test. At year-end, the auditor still may have to vouch invoices from the interim date to year-end. However, these invoices would have to be vouched regardless of whether the interim work was performed.

Conditional Substantive Tests

.08 Other substantive tests may be efficient when applied prior to year-end only if certain conditions are met. Generally, such substantive tests should only be applied prior to year-end if substantive tests for the remaining period from the interim date to year-end can be restricted.

.09 SAS No. 45, *Omnibus Statement on Auditing Standards—1983*, “Substantive Tests Prior to the Balance Sheet Date” (AU section 313), describes several factors that should be considered before applying substantive tests to details of balance sheet accounts at interim dates. Those factors relate to the ability to control the additional risk of not detecting errors that may exist at the balance-sheet date when the balance is tested at an interim date. Factors described include:

- a. Whether the effectiveness of the tests will be impaired because of the auditor’s assessment of the control risk
- b. Whether rapidly changing business conditions or circumstances might predispose management to misstate the financial statements between an interim date and year-end
- c. Whether the year-end balances of the particular balance sheet accounts that might be selected for interim testing, are reasonably predictable with respect to amount, relative significance, and composition

.10 In many small business engagements, the cost of bringing the additional risk to an acceptably low level is too great. SAS No. 45 notes that “applying substantive tests . . . at an interim date may not be cost-effective if substantive tests to cover the remaining period cannot be restricted due to the assessment of control risk.” In the case of a small business with limited segregation of duties, these substantive tests are generally not performed at an interim date because to do so would be inefficient. For example, in a small business engagement, the auditor generally audits cash, accounts receivable, inventory, and accounts payable at year-end.

[The next page is 5301.]

AAM Section 5300

Extent of Testing

.01 Once an auditor decides what audit procedures to apply (the nature of the tests) and when to apply them (the timing of the tests), a decision must be made about how many items to apply the procedures to—that is, the extent of testing.

Authoritative Standards

.02 SAS No. 39, *Audit Sampling* (AU section 350), addresses a variety of issues relating to the auditor's use of sampling in an audit engagement. However, SAS No. 39 does not always apply when the auditor is examining less than 100 percent of a population. The AICPA Audit Guide *Audit Sampling* presents recommendations on the application of generally accepted auditing standards to audits involving the use of audit sampling methods, and provides guidance to help auditors apply audit sampling in accordance with SAS No. 39.

When SAS No. 39 Applies

.03 Audit sampling is only one of many tools used by auditors to obtain sufficient, competent evidential matter to support an opinion on financial statements. SAS No. 39 discusses design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used—

- a. In tests of controls in internal control to evaluate operating effectiveness from prescribed controls.
- b. In substantive tests of details of account balances and classes of transactions.
- c. In dual-purpose tests that assess control risk and test whether the monetary amount of a transaction is correct.

.04 The portion of SAS No. 39 pertaining to tests of controls applies when sampling techniques are used to assess control risk. The portion pertaining to substantive tests apply when sampling techniques are used to test details of transactions or balances.

.05 According to SAS No. 39, sampling occurs when the auditor tests less than 100 percent of a population for the purpose of evaluating some characteristic of an account balance or class of transactions. SAS No. 39 applies to tests of controls when such tests are performed and to tests of balances when sampling populations are material. The extent to which sampling is used in an audit depends on the size of the client and the nature of the client's internal control. Also, if the sampling populations are small, it is usually more efficient to audit individually significant items and obtain audit assurance about the remaining balance through analytical procedures than to perform audit sampling. As the size and sophistication of the client's internal control increases, the auditor is more likely to use audit sampling to perform tests of controls and tests of balances.

.06 In determining whether SAS No. 39 is applicable to circumstances in which an auditor examines less than 100 percent of the items making up an account balance or class of transactions, the auditor should consider the purpose of the test. If the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, the guidance in

SAS No. 39 should be followed. For example, if the auditor intends to examine selected sales invoices to draw a conclusion about whether sales are overstated, audit sampling as described in SAS No. 39 should be applied because the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to the remaining invoices, the auditor is not sampling according to SAS No. 39—the examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the combined results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed related to overstatement of sales.

.07 The auditor should remember that the way in which the population is defined can determine whether the requirements of SAS No. 39 apply. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables, and employee receivables. Each of these populations can be tested using a different audit strategy—some using audit sampling and others not. The sampling concepts in SAS No. 39 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

Authoritative Guidance About the Application of Audit Sampling to Substantive Tests Provided by SAS No. 39

.08 SAS No. 39 contains the following provisions regarding sampling in connection with substantive testing.

- a. The concept that some items exist for which, in the auditor's judgment, acceptance of some sampling risk is not justified, and that these should be examined 100 percent (paragraph 21 [AU section 350.21]). This simply reminds the auditor that some of the items encountered in an examination of financial statements may be so significant individually or may have such a high likelihood of being in error or misstated that *all* such items should be examined.
- b. The suggestion that the efficiency of a sample may be improved by separating items subject to sampling into relatively homogeneous groups based on some characteristic (paragraph 22 [AU section 350.22]). This indicates that audit efficiency can sometimes be improved by, for example, stratifying or segregating the items constituting a balance or class of transactions into groups based on individual dollar value or some other characteristic.
- c. A requirement that the auditor consider tolerable misstatement in planning audit sampling applications in the examination of account balances and classes of transactions (paragraph 18 [AU section 350.18]). This asks the auditor to consider, in the early stages of an audit, how much misstatement the auditor will be able to tolerate for each balance and class of transactions that is sampled, in combination with misstatements in other accounts, and still render an unqualified opinion on the financial statements. SAS No. 39 asks the auditor to consider tolerable misstatement and to recognize that it is one of the factors influencing sample size. There is no requirement to document or quantify tolerable misstatement.
- d. A requirement that the auditor select a sample that can be expected to be representative of the population (paragraph 24 [AU section 350.24]). Simply put, this means that each item in the population being sampled should have a *chance* of being selected, not necessarily an *equal chance* of being selected. This does not mean that the auditor is required to use a random or probability sample.
- e. A requirement that the auditor consider selected sample items to which the auditor is unable to apply planned audit procedures to determine their effect on the evaluation of the sample (paragraph 25 [AU section 350.25]). For example, sometimes the auditor may not be able to apply planned audit

procedures to selected sample items because supporting documentation may be missing. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative procedures that would provide sufficient evidence to form a conclusion.

- f. A requirement that the auditor project the misstatement results of the sample to the items from which the sample was selected (paragraph 26 [AU section 350.26]). Since the sample is expected to be representative of the population from which it was selected, misstatements found are also expected to be representative of the population. This merely asks the auditor to measure the likely misstatement in the population from which the sample was drawn and to consider it in reaching conclusions.
- g. A requirement that the auditor consider, in the aggregate, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications, along with other relevant audit evidence, when evaluating whether the financial statements taken as a whole may be materially misstated (paragraph 30 [AU section 350.30]).

Documentation Requirements

.09 SAS No. 39 contains no specific documentation requirements. However, the documentation standards set forth in the Statements on Auditing Standards dealing with documentation apply to audit sampling applications just as they apply to other auditing procedures. SAS No. 22, *Planning and Supervision* (AU section 311), states that the auditor should prepare a written audit program, and SAS No. 96, *Audit Documentation* (AU section 339), states that audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested. The identification of the items tested may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- When a haphazard or random sample is selected, the documentation should include identifying characteristics (for example, the specific invoice numbers of the items included in the sample).
- When all items over a specified dollar amount are selected from a listing, the documentation need describe only the scope and the identification of the listing (for example, all invoices over \$25,000 from the December sales journal).
- When a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

With regard to audit sampling applications, the audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. Examples of items that the auditor typically documents for tests of controls are discussed in AAM section 5300.25. Examples of items that the auditor typically documents for substantive tests are discussed in AAM section 5300.55.

Determining Extent of Testing in a Small Business Without Sampling

.10 Small businesses have certain characteristics that may influence the auditor's decision to use audit sampling.

.11 For substantive testing, small businesses frequently have small populations of accounting data in both account balances and classes of transactions. Consequently, sampling may not be as useful since there may be large populations of data.

.12 SAS No. 39, paragraph 1 (AU section 350.01), defines audit sampling: "The application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class." This definition allows some alternative approaches to sampling to determine the extent of testing in a small business engagement. These alternatives, by not using audit sampling and thus eliminating the requirements of SAS No. 39, may provide a more effective and efficient audit approach for a small business engagement.

.13 These alternative approaches include:

- a. Procedures applied to 100 percent of a certain group (strata) of transactions or balances.
- b. Testing unusual items without applying procedures to the remainder of the population.
- c. Other tests that involve application of procedures to less than 100 percent of the items in the population without drawing a conclusion about the entire account or class of transactions.

.14 The auditor should decide what audit procedures to perform to meet the established audit objectives. Once this decision is made, the auditor needs to determine the extent of testing.

.15 An effective and efficient approach to determining the extent of testing in a small business engagement is shown in flowchart 1. This approach involves four important steps.

Identification of Individual Items to Be Examined

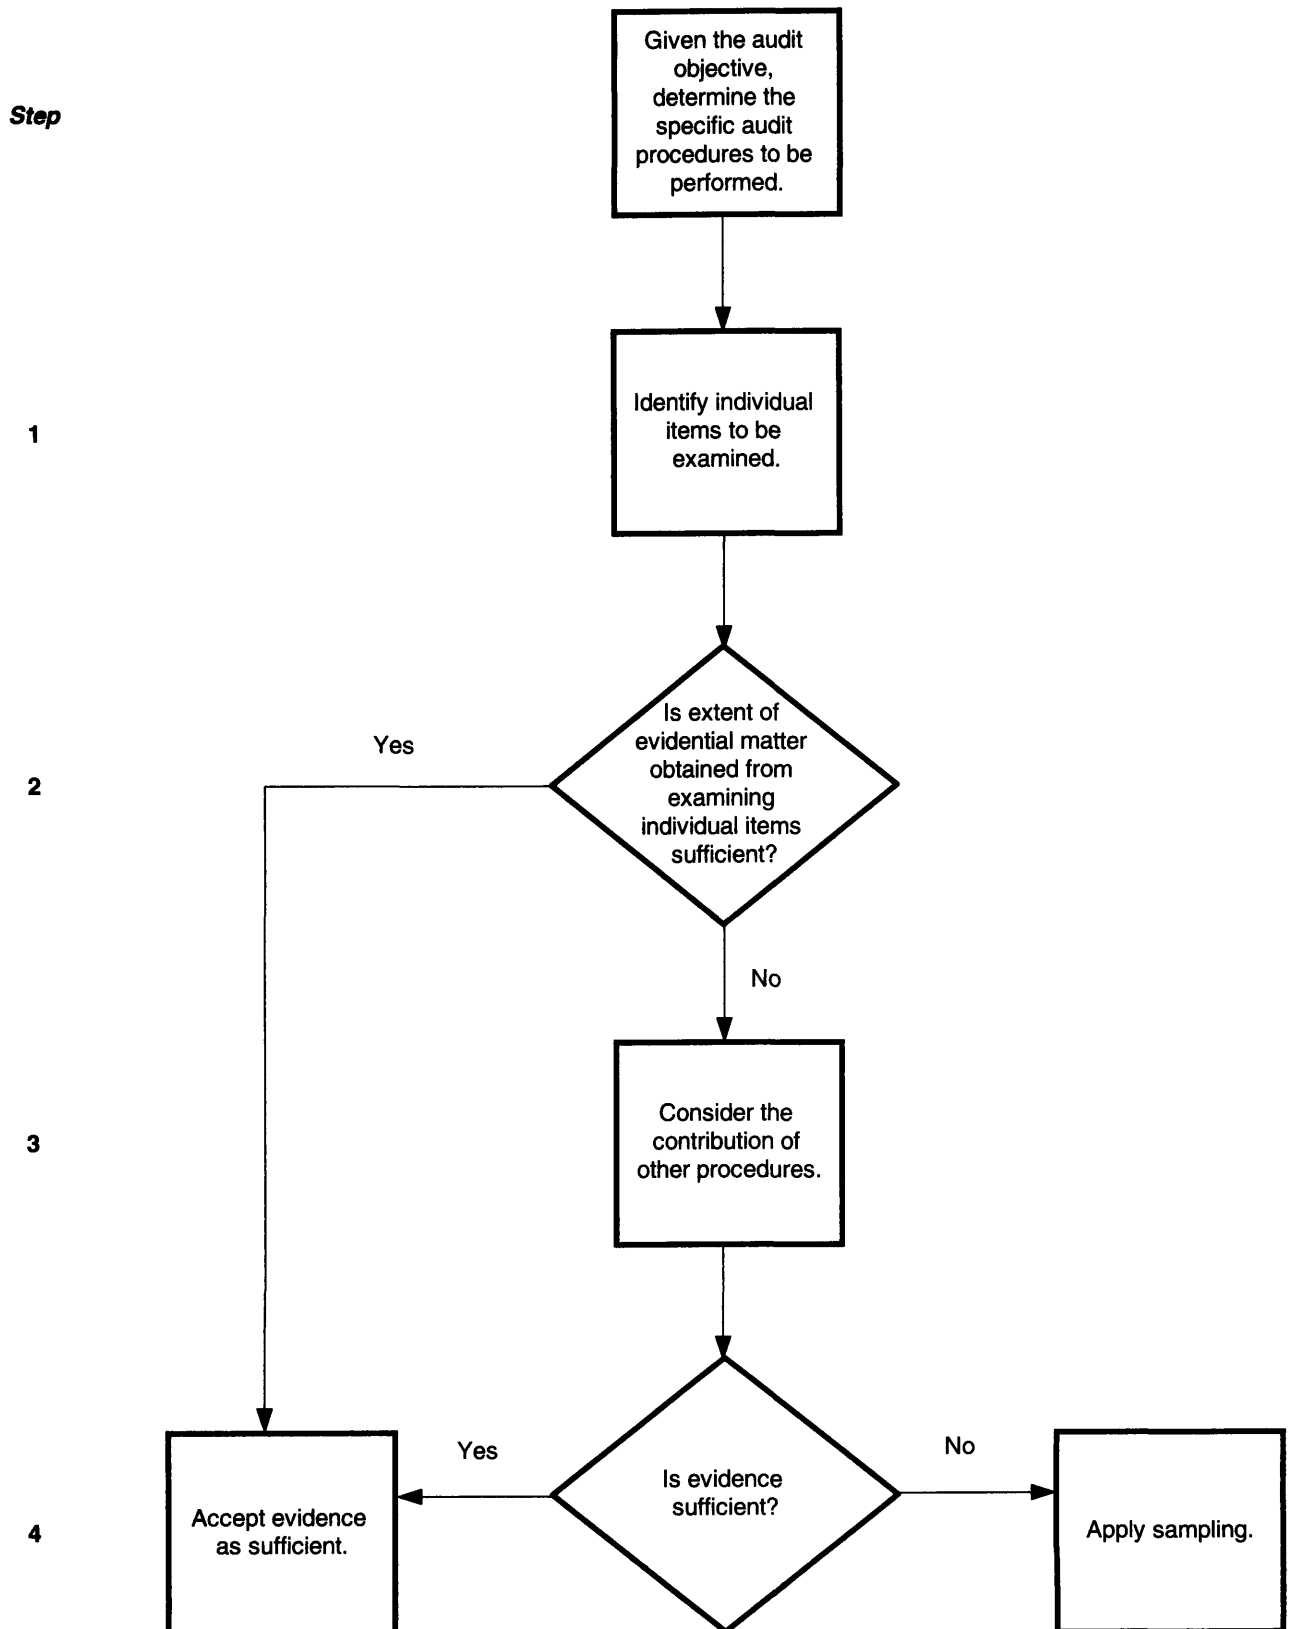

.16 An auditor should apply professional judgment in determining which individual items in an account balance or class of transactions need to be examined. In evaluating individual items, the auditor should consider factors such as size of the item, whether the item is unusual, prior experience with the client, and whether the item involves a related party.

.17 For example, consider the following information for accounts receivable of a small business.

<i>Number of Accounts</i>	<i>Balances</i>	<i>Total Accounts</i>
4	\$100,000 or more	\$ 625,000
7	\$25,000–99,999	375,000
62	\$1–24,999	300,000
<u>73</u>		<u>\$1,300,000</u>

In this case, if the eleven largest accounts are confirmed by the auditor, most of the accounts receivable balance is supported (\$1,000,000 out of \$1,300,000, or 77 percent). Also, the auditor may decide to confirm the receivables that have unusual characteristics (for example, receivables with either large credit balances or those that are very delinquent).

Flowchart 1
An Audit Sampling Approach for a Small Business

Is Extent of Evidential Matter Obtained Sufficient?

.18 Some factors in evaluating the sufficiency of evidential matter obtained in tests of details for a particular account balance or class of transactions are:

- a. The individual importance of the items examined. If the items examined, account for a high percentage of the total population, then the auditor may be reasonably assured that there is an acceptably low risk of an undetected misstatement.
- b. The nature and cause of misstatements. If during the course of the audit, misstatements are discovered, those misstatements should be evaluated to determine if they are due to differences in principle or in application, are errors or fraud or are due to misunderstanding of instructions or carelessness.
- c. Possible relationship of the misstatement to other phases of the audit. If it is determined that the misstatement is due to fraud this would require a broader consideration of the possible implications than would the discovery of an error.
- d. The characteristics of the sample to the population. The auditor may obtain some knowledge of the types of items in the population if the characteristics in the sample are similar in nature and the same controls are followed for processing the transactions.

.19 If an auditor has examined a substantial number of individual amounts and found no evidence of problems from the other procedures performed—and the remaining population totals less than an amount that would be material to the financial statements—there is often no need to sample the remaining population. Otherwise, the auditor should extend tests to the remaining population unless an alternative approach can be justified.

Consider Contribution of Other Procedures

.20 The auditor should also consider whether other evidence obtained contributes to conclusions regarding the account balance or class of transactions. The auditor often considers the contribution of other procedures at the same time the extent of evidential matter obtained from examining individual items is considered.

.21 The auditor may use a combination of analytical procedures and substantive tests of details to support an opinion on the financial statements. In deciding whether other audit procedures make a contribution, the auditor should consider whether they support the audit objectives in the area, whether they indicate potential problems, and whether the evidence is consistent with the previous evidence obtained.

.22 In considering the contribution of other procedures, the auditor should use professional judgment in determining whether an unqualified opinion can be given without performing additional tests in the form of audit sampling.

Evaluation of Sufficiency of Evidence

.23 There are three factors that the auditor may consider in evaluating the sufficiency of audit evidence obtained from examining individual items and contributed by other procedures, and in determining whether the remaining items in the population should be tested.

.24 First, the auditor should consider whether the dollar amount of the remaining population is equal to or greater than an amount that would be material to the financial statements. If the remaining population is less than material, the auditor may decide that no additional testing by sampling is necessary. Second, the

auditor should consider the degree of risk involved (that is, how susceptible the account is to misstatement, and whether there have been problems with this area in prior audits). Third, the auditor should consider the sufficiency of all the audit evidence obtained so far (the extent of evidential matter obtained by testing individual items along with the contribution of other procedures).

Audit Sampling for Tests of Controls

.25 SAS No. 39 indicates that an auditor may use nonstatistical or statistical sampling in performing tests of controls. This section provides guidance for both approaches. Regardless of whether nonstatistical or statistical sampling is being used, audit sampling for tests of controls involves the following steps:

- a. *Determine the objective of the test.* The objective of tests of controls is to provide evidence about the operating effectiveness and design of controls. Audit sampling for tests of controls is generally appropriate when application of the control leaves documentary evidence of performance. Normally, audit sampling for tests of controls will involve selecting a sample of documents and examining them for evidence that the relevant controls were applied. Tests of controls involving observation of performance of procedures or inquiries of the client are not normally subject to audit sampling.
- b. *Define the deviation conditions.* A deviation condition is a situation that indicates that the controls were not performed. For example, if the auditor is examining purchase invoices for evidence of approval of an expenditure (e.g., the initials of the approving individual), a deviation condition would be an invoice that is not initialed by the appropriate individual. Adequate performance of a control consists of all the steps the auditor believes are necessary to support the assessed level of control risk. For example, assume that a prescribed control requires that support for every disbursement should include an invoice, a voucher, a receiving report, and a purchase order, all stamped "Paid." The auditor believes that the existence of an invoice and a receiving report, both stamped "Paid," is necessary to indicate adequate performance of the control for purposes of supporting the assessed level of control risk. Therefore, a deviation may be defined as "a disbursement not supported by an invoice and a receiving report that have been stamped 'Paid.'"
- c. *Define the population.* The population selected must be appropriate for the objective being tested. For example, if the auditor is testing the operating effectiveness of a prescribed control designed to ensure that all shipments were billed, the auditor would not detect deviations by sampling from billed items. An appropriate population for detecting such deviations usually includes the record of all items shipped.
- d. *Defining the period covered by the test.* For samples to be representative of the period under audit, the population generally should include all transactions processed during the period. Often, auditors perform tests of controls during interim work. The auditor should determine what additional evidence needs to be obtained for the remaining period. Often, the auditor obtains the additional evidence by extending the test to the transactions occurring in the remaining period. However, it is not always efficient to include all transactions executed throughout the period under audit in the population to be sampled. In some cases, it might be more efficient to use alternative approaches to test the performance of the control during the remaining period. In these cases the auditor would define the population to include transactions for the period from the beginning of the year to an interim date and consider the following factors in determining what, if any, additional evidence needs to be obtained for the remaining period:
 - The significance of the assertion involved.
 - The specific controls that were tested during the interim period.
 - Any changes in controls from the interim period.

- The extent to which substantive tests were changed as a result of the controls.
- The results of the tests of controls performed during the interim period.
- The length of the remaining period.
- The evidential matter about design or operation that may result from the substantive tests performed in the remaining period.

The auditor selects sampling units from a physical representation of the population. For example, if the auditor defines the population as all customer receivable balances as of a specific date, the physical representation might be a printout of the customer accounts receivable trial balance as of that date. Making selections from a controlled source minimizes differences between the physical representation and the population. The auditor should consider whether the physical representation includes the entire population. If the auditor reconciles the selected physical representation and the population and determines that the physical representation has omitted items in the population that should be included in the overall evaluation, the auditor should select a new physical representation or perform alternative procedures on the items excluded from the physical representation.

- e. *Defining the sampling unit.* The auditor should define the sampling unit in light of the control being tested. A sampling unit may be, for example, a document, an entry, or a line item. An important efficiency consideration in selecting a sampling unit is the manner in which documents are filed and cross-referenced.
- f. *Determine the method of selecting the sample.* Any sample that is selected should be representative of the population and all items should have an opportunity to be selected. Random-number selection should generally be used when statistical sampling is being applied. When nonstatistical sampling is applied, random-number sampling, systematic sampling, and haphazard sampling are methods that might be used to obtain a representative sample. Methods of selecting samples are discussed beginning at AAM section 5300.61.
- g. *Determine the sample size.* Sample sizes for tests of controls are affected by (a) the risk of assessing control risk too low, (b) the tolerable rate, (c) the expected population deviation rate, and (d) any effects of small population sizes.

Guidance for determining sample size when performing nonstatistical sampling begins with AAM section 5300.28. A description of statistical sampling begins with AAM section 5300.31.

- h. *Perform the sampling plan.* Once the sample has been selected, the auditor should examine the selected items to determine whether they contain deviations from the prescribed control. If the auditor selects a voided item, and the auditor obtains reasonable assurance that the item has been properly voided and does not represent a deviation from the prescribed control, he or she should replace the voided item. If the auditor selects an unused item, he or she should obtain reasonable assurance that it actually represents an unused item, and not a deviation from the control, and then replace the unused item. If the auditor is unable to examine a selected item because it cannot be located or for any other reason, and the auditor is unable to apply the planned audit procedures or appropriate alternative procedures to selected items, he or she should consider the selected items to be deviations from the controls for purposes of evaluating the sample. In addition, the auditor should consider the reasons for this limitation and the effect that such a limitation might have on his or her understanding of internal control and assessment of control risk.
- i. *Evaluate the sample results.* Guidance for evaluating nonstatistical sampling results begins with AAM section 5300.30 and guidance for evaluating statistical sampling results begins with AAM section 5300.32.
- j. *Document the sampling procedure.* Examples of items that the auditor typically documents for tests of controls include the following:

- A description of the prescribed control being tested.
- The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor considered the completeness of the population.
- The definition of the deviation condition.
- The risk of assessing control risk too low, the tolerable deviation rate, and the expected population deviation rate used in the application.
- The method of sample-size determination.
- The method of sample selection (specific selection criteria).
- A description of how the sampling procedure was performed and a list of the deviations identified in the sample.
- The evaluation of the sample and a summary of the overall conclusion.

.26 Factors Affecting Sample Sizes for Tests of Controls. Sample sizes for tests of controls are affected by the following factors:

- Acceptable risk of assessing control risk too low.* The risk of assessing control risk too low is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control. Decreasing the risk of assessing control risk too low will increase the sample size.
- Expected population deviation rate.* The expected population deviation rate is an anticipation of the deviation rate in the entire population. As the expected population deviation rate increases, the sample size will increase.
- Tolerable rate.* Tolerable rate is the maximum rate (%) of deviation from a prescribed control that the auditor is willing to accept without altering the planned assessed level of control risk. Higher tolerable rates will permit smaller sample sizes.
- Population size.* The size of the population has little or no effect on the determination of sample size except for very small populations. For example, it is generally appropriate to treat any population of more than 5,000 sampling units as if it were infinite. If the population size is under 5,000 sampling units, the population size may have a small effect on the calculation of the sample size.

.27 The effects of these factors on the appropriate nonstatistical sample size may be summarized as follows:

<i>Factor</i>	<i>General Effect on Sample Size</i>
Risk of assessing control risk too low— increase (decrease)	Smaller (larger)
Tolerable rate—increase (decrease)	Smaller (larger)
Expected population deviation rate— increase (decrease)	Larger (smaller)
Population size	Virtually no effect

.28 Sample Sizes Using Nonstatistical Sampling. The auditor using nonstatistical sampling for tests of controls uses his or her professional judgment to consider the factors described in AAM section 5300.26 in determining sample sizes.

.29 Neither SAS No. 39 nor the Audit Guide *Audit Sampling*, require the auditor to compare the sample size for a nonstatistical sampling application with a corresponding sample size calculated using statistical

theory. Auditors might find it helpful to be familiar with the tables in AAM section 5300.33 through 5300.36. Auditors using these tables as an aid in understanding relative sample sizes for tests of controls will need to apply professional judgment in reviewing the risk levels and expected population deviation rates in relation to sample sizes. Also, an auditor may decide to establish guidelines for sample sizes for tests of controls based on attribute sampling tables. An example of such guidelines is illustrated in the following table:

Sample Sizes for Tests of Controls Based on Attribute Sampling Tables	
<i>Planned Assessed Level of Control Risk</i>	<i>Sample Size</i>
Slightly below the maximum	12–20
Moderate	20–35
Low	30–75

The numbers in the table were determined using a 10 percent risk of assessing control risk too low and an expected population deviation rate of 0 percent. If the auditor finds one or more deviations in the sample, he or she needs to increase the sample size or increase the assessed level of control risk.

.30 After completing the examination of the sampling units and summarizing deviations from prescribed controls, the auditor evaluates the results.

- *Calculate the deviation rate.* Calculating the deviation rate in the sample involves dividing the number of observed deviations by the sample size.
- *Consider sampling risk.* When evaluating a sample for a test of controls, the auditor should consider sampling risk.
- *Consider the qualitative aspects of deviations.* In addition to evaluating the frequency of deviations from pertinent controls, the auditor should consider the qualitative aspects of the deviations.
- *Reach an overall conclusion.* The auditor uses professional judgment to reach an overall conclusion about the effect that the evaluation of the results will have on the assessed level of control risk and on the nature, timing and extent of planned substantive tests.

.31 Sample Sizes Using Statistical Sampling. The appropriate statistical method for tests of controls is attributes sampling, which is a technique designed to estimate qualitative characteristics of a population. Attributes sampling is most commonly used in auditing to test the rate of deviation from a prescribed control to support the auditor's assessed level of control risk.

.32 Applying attributes sampling involves performing the following steps:

- Decide on the attributes to test.* The tests of controls may include the testing of one or more attributes. Proper evaluation of the results may require testing and evaluating each attribute separately.
- Define the population from which the sample items should be selected.* The auditor should make sure that the population is appropriate for the audit objective as described in AAM section 5300.25.
- Specify the following factors:
 - *Acceptable risk of assessing control risk too low.* There is an inverse relationship between the risk of assessing control risk too low and sample size. If the auditor is willing to accept only a low risk of assessing control risk too low, the sample size would ordinarily be larger than if a higher risk were acceptable.
 - *Tolerable rate.* Higher assessments of control risk will permit higher tolerable deviation rates as shown in the following table:

**Relationship Between Tolerable Rates and the Auditor's
Planned Assessed Levels of Control Risk**

<i>Planned Assessed Level of Control Risk</i>	<i>Tolerable Rate</i>
Low	3%–7%
Moderate	6%–12%
Slightly below the maximum	11%– 20%
Maximum	Omit test

- *Expected population deviation rate.* The auditor's expectations may be based on prior year's tests and the control environment. The prior year's results should be considered in light of changes in the entity's internal control and changes in personnel. Sample sizes will increase significantly as the expected population deviation rate increases from zero. If the deviation rate in the sample turns out to be higher than the rate specified by the auditor in determining the sample size, the sample results will not support the auditor's planned assessed level of control risk.
- d. *Determine the appropriate sample size.* Sample sizes are found in the tables in AAM section 5300.33 and .34. The table in AAM section 5300.33 is designed for a risk of assessing control risk too low of 5 percent, and the table in AAM section 5300.34 is designed for a 10 percent risk of assessing control risk too low. With the tolerable rate and the expected population deviation rate, the auditor may find the sample size from the table. The numbers in parentheses are the number of deviations that may be found in the sample and still support the auditor's planned assessed level of control risk.
 - e. *Randomly select the sample from the population.* The section beginning at AAM section 5300.61 describes the methods that may be used to select a random sample.
 - f. *Perform the audit procedures to identify deviations in the sample.*
 - g. *Calculate the statistical results.* Using the tables in AAM section 5300.35 and .36 or the appropriate risk of assessing control risk too low, determine the actual tolerable deviation rate from the sample size and the actual number of deviations found in the sample.
 - h. *Reassess the level of control risk.* If the sample results, along with other relevant evidential matter, support the planned assessed level of control risk, the auditor generally does not need to modify planned substantive tests. If the planned assessed level of control risk is not supported, the auditor would ordinarily either perform tests of other controls that could support the planned assessed level of control risk or increase the assessed level of control risk.
 - i. *Document the Sampling Procedures.* SAS No. 39 and the Audit Guide *Audit Sampling*, do not require specific documentation of audit sampling applications. See AAM section 5300.09 for certain documentation requirements of SAS No. 96. Examples of items that the auditor typically documents for tests of controls are discussed in AAM section 5300.25.

*Over 20 percent.

Derived from AICPA Audit Guide *Audit Sampling*, New Edition as of April 1, 2001.

Note: This table presents upper limits as percentages. This table assumes a large population.

Audit Sampling for Substantive Tests of Details

.37 The purpose of substantive tests of details of transactions and balances is to detect material misstatements in the account balance, transaction class, and disclosure components of the financial statements. An auditor assesses inherent and control risk and relies on a combination of analytical procedures and substantive tests of details for providing a basis for the opinion about whether the financial statements are materially misstated. When testing the details of an account balance or class of transactions, the auditor might use audit sampling to obtain evidence about the reasonableness of monetary amounts.

.38 The auditor uses professional judgment to determine whether audit sampling is appropriate. Sampling may not always be appropriate. For example, the auditor may decide that it is more efficient to test an account balance or class of transactions by applying analytical procedures.

.39 When an auditor plans any audit sampling application, the first consideration is the specific account balance or class of transactions and the circumstances in which the procedure is to be applied. The auditor generally identifies items or groups of items that are of individual significance to an audit objective. For example, an auditor planning to use audit sampling as part of the tests of an inventory balance as well as observing the physical inventory would generally identify items that have significantly large balances or that might have other special characteristics.

.40 The auditor considers all special knowledge about the items constituting the balance or class before designing audit sampling procedures. For example, the auditor might identify 20 items that make up 25 percent of the account balance, and decide that those items should be examined 100 percent and excluded from inventory subject to audit sampling. Any items that the auditor has decided to test 100 percent are not part of the population subject to sampling.

.41 A population for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. In some circumstances, an auditor might examine all the items that constitute an account balance or class of transactions that exceed a given amount or that have an unusual characteristic; the auditor might either (1) apply other auditing procedures (for example, analytical procedures) to items that do not exceed a given amount or possess an unusual characteristic or (2) apply no auditing procedures to them because there is an acceptably low risk of material misstatement existing in the remaining items.

.42 Once a decision has been made to use audit sampling, the auditor must choose between statistical and nonstatistical sampling. The choice is primarily a cost-benefit consideration. Statistical sampling uses the laws of probability to measure sampling risk. Any sampling procedure that does not measure the sampling risk is a nonstatistical sampling procedure.

.43 *Determining the test objectives.* A sampling plan for substantive tests of details might be designed to (1) test the reasonableness of one or more assertions about a financial statement amount (for example, the existence of accounts receivable) or (2) make an independent estimate of some amount (for example, the last in, first out (LIFO) index for a LIFO inventory). The auditor should carefully identify the characteristic of interest (for example, the misstatement) for the sampling application that is consistent with the audit objective.

.44 *Defining the population.* The population consists of the items constituting the account balance or class of transactions of interest. The auditor should determine that the population from which he or she selects the sample is appropriate for the specific audit objective because sample results can be projected only to the population from which the sample was selected.

.45 *Defining the sampling unit.* A sampling unit is any of the individual elements that constitute the population, and depends on the audit objective and the nature of the audit procedures to be applied. A sampling

unit might be a customer account balance, an individual transaction or an individual entry in a transaction. The auditor might consider which sampling unit leads to a more effective and efficient sampling application in the circumstances.

.46 *Choosing an audit sampling technique.* Either statistical or nonstatistical sampling is appropriate for substantive tests of details. The most common statistical approaches are classical variables sampling and probability-proportional-to-size (PPS) sampling.

.47 *Determining the method of selecting the sample.* The auditor should select the sample in such a way that the sample can be expected to be representative of the population or the stratum from which it is selected.

.48 *Determining the sample size.* Accounting populations tend to include a few very large amounts, a number of moderately large amounts, and a large number of small amounts. Auditors consider the variation in a characteristic when they determine an appropriate sample size for a substantive test, and, generally, the variation of the items' recorded amounts as a means of estimating the variation of the audited amounts of the items in the population. A measure of this variation, or scatter, is called the standard deviation. Sample sizes generally decrease as the variation becomes smaller. Sample sizes for unstratified populations with high variation are generally very large.

.49 In performing substantive tests of details, auditors are also concerned with two aspects of sampling risk:

- a. *Risk of incorrect acceptance*—the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.
- b. *Risk of incorrect rejection*—the risk that the sample supports the conclusion that the recorded amount is materially misstated when it is not.

.50 When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions is acceptable without causing the financial statements to be materially misstated. The maximum monetary misstatement for the balance or class is called tolerable misstatement for the sample. For a particular account balance or class of transactions, the sample size required to achieve the auditor's objective at a given risk of incorrect acceptance increases as the auditor's assessment of tolerable misstatement for that balance or class decreases.

.51 The auditor also assesses the expected amount of misstatement on the basis of his or her professional judgment after considering such factors as the entity's business, the results of prior year's tests of account balances or class of transactions, the results of any pilot sample, the results of any related substantive tests, and the results of any tests of the related controls.

.52 The effect of population size on the appropriate sample size varies according to the audit sampling method used.

.53 *Performing the sampling plan.* The auditor generally should apply auditing procedures appropriate for the particular audit objectives to each sample item.

.54 *Evaluating the sample results.* In evaluating sample results, the auditor should:

- Project the misstatements found in the sample to the population from which the sample was selected and add that amount to the misstatements discovered in any items examined 100 percent.

- Compare the tolerable misstatement for the account balance or class of transactions with the total projected misstatement, adjusted for corrected misstatements. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement for the population exceeds the tolerable misstatement. The auditor should also aggregate the projected misstatement in the balance or class, after adjustments, if any, with other known or likely misstatements in other balances or classes to evaluate whether the financial statements taken as a whole are materially misstated.
- Consider the qualitative aspects of misstatements. If the sample results suggest that the auditor's planning assumptions were in error, appropriate action is taken.

.55 *Documenting the sampling procedure.* SAS No. 39 and the Audit Guide *Audit Sampling*, do not require specific documentation of audit sampling applications. See AAM section 5300.09 for certain documentation requirements of SAS No. 96. Examples of items that the auditor typically documents for substantive tests include:

- The objectives of the test and a description of other audit procedures related to those objectives.
- The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor determined the completeness of the population.
- The definition of a misstatement.
- The risk of incorrect acceptance, the risk of incorrect rejection, and the tolerable misstatement.
- The audit sampling technique used.
- The method of sample selection (specific selection criteria).
- A description of the performance of the sampling procedures and a list of misstatements identified in the sample.
- The evaluation of the sample and a summary of the overall conclusion.

.56 *Nonstatistical Sampling for Substantive Tests of Details.* Neither SAS No. 39 nor the Audit Guide *Audit Sampling*, require the auditor to compare the sample size for a nonstatistical sampling application with a corresponding sample size calculated using statistical theory. Auditors might find familiarity with sample sizes based on statistical theory helpful when applying professional judgment and experience in considering the effect of various planning considerations on sample size.

.57 The following table "Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning" summarizes the effects of various factors on sample sizes for substantive tests of details. (The table is provided only to illustrate the relative effect of different planning considerations on sample size and is not intended as a substitute for professional judgment).

Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning

Factors	Conditions Leading to:		Related Factor for Substantive Sample Planning
	Smaller Sample Size	Larger Sample Size	
a. Assessment of inherent risk	Low assessed level of inherent risk	High assessed level of inherent risk	Allowable risk of incorrect acceptance
b. Assessment of control risk	Low assessed level of control risk	High assessed level of control risk	Allowable risk of incorrect acceptance

(continued)

Factors	Conditions Leading to:		Related Factor for Substantive Sample Planning
	Smaller Sample Size	Larger Sample Size	
c. Assessment of risk related to other substantive tests directed at the same assertion (including analytical procedures and other relevant tests of details)	Low assessment of risk associated with other relevant substantive tests	High assessment of risk associated with other relevant substantive tests	Allowable risk of incorrect acceptance
d. Measure of tolerable misstatement for a specific account	Larger measure of tolerable misstatement	Smaller measure of tolerable misstatement	Tolerable misstatement
e. Expected size and frequency of misstatements, or the estimated variance of the population	Smaller misstatements or lower frequency, or smaller population variance	Larger misstatements, higher frequency, or larger population variance	Assessment of population characteristics
f. Number of items in the population	Virtually no effect on sample size unless population is very small		

.58 The following model, based on the statistical theory underlying PPS sampling, illustrates a method of assisting an auditor in gaining an understanding of the relative size of samples for substantive tests of details. The factors presented are based on certain judgments and may differ as auditors' judgments differ in the circumstances. The model illustrates the relative effect of difference planning considerations on sample size only and is not intended as a substitute for professional judgment. (See the AICPA Audit Guide *Audit Sampling*, new edition as of April 1, 2001, paragraphs 5.17–5.22.)

.59 The steps in determining the sample size using this model are:

- a. Consider the level of inherent risk for the particular assertion(s).
- b. Consider the effectiveness of the controls in preventing and detecting material misstatements.
- c. Combine steps *a.* and *b.* using the following categories:
 1. Maximum.
 2. Slightly below minimum.
 3. Moderate.
 4. Low.
- d. Determine tolerable misstatement.
- e. Assess the risk that other substantive procedures designed to test the same assertion will fail to detect a material misstatement in the particular assertion(s).
 1. Maximum
 2. Moderate
 3. Low
- f. Estimate the population's recorded amount after deducting any items that will be examined 100 percent.

- g. Select the appropriate assurance factor from the following table:

Assurance Factors

<i>Assessment of Inherent and Control Risk</i>	<i>Risk That Other Substantive Procedures Will Fail to Detect a Material Misstatement</i>			
	<i>Maximum</i>	<i>Slightly Below Maximum</i>	<i>Moderate</i>	<i>Low</i>
Maximum	3.0	2.7	2.3	2.0
Slightly below maximum	2.7	2.4	2.0	1.6
Moderate	2.3	2.1	1.6	1.2
Low	2.0	1.6	1.2	1.0

Estimate the sample size using the following formula:

$$\text{Population's recorded amount} / \text{Tolerable misstatement} \times \text{Assurance factor} = \text{Sample size}$$

- h. Adjust the sample size estimate to reflect any differences in efficiency between the nonstatistical approach and the statistical approach underlying this model. In practice auditors typically adjust the sample size from 10 percent to 50 percent if the sample is not selected in a statistically efficient manner.

.60 Stratification is particularly important to increasing the efficiency of the sample. If the nonstatistical sample design is planned without stratification, the auditor should increase the sample size. The auditor selects the sample so that it can be expected to be representative of the population from which it has been selected. Before selecting the sample, the auditor generally identifies individually significant items, and may then select the sample from the remaining items using the systematic selection method, which automatically stratifies the sample, or stratify the remaining items into groups and allocate the sample size accordingly.

.61 Evaluating the Sample Results. The misstatement in the sample must be projected to the items from which the sample was selected. One method of projecting the amount of misstatement found in a sample is to divide the amount of misstatement in the sample by the fraction of total dollars in the population included in the sample. For example, if a \$100 misstatement is found in a sample of 10 percent of the population, the projected misstatement would be \$1,000 (\$100/.10).

.62 A second method for projecting the misstatement uses the average difference between the audited and the recorded amounts of each item included in the sample. For example, if \$200 of misstatement is found in a sample of 100 items, the average difference between audited and recorded amounts for items in the sample is \$2 (\$200/100). An estimate of the amount of misstatement in the population may be calculated by multiplying the total number of items in the population (in this case 5,000 items) by the average difference of \$2 for each sample item. The estimate of misstatement in the population is \$10,000 (5,000 × 2).

[The next page is 5401.]

AAM Section 5400

Illustrative Audit Program for Corporations

.010 The audit programs contained in this section have been designed to provide substantive evidence (when combined with appropriate planning and with appropriate tests of controls) that is sufficient to support the assertions in the client's financial statements. The programs should be modified to reflect overall engagement risk, risks of potential misstatements, the results of analytical procedures, and the selection of the most cost-beneficial audit approaches and procedures.

.011 The programs address the financial statement assertions discussed in SAS No. 31, *Evidential Matter*, as amended by SAS No. 80 (AU section 326):

- *Existence or occurrence.* Whether the assets or liabilities exist at a given date and whether recorded transactions have occurred during a given period.
- *Completeness.* Whether all transactions and accounts that should be presented in the financial statements are so included.
- *Rights and obligations.* Whether assets are the rights of the entity and liabilities are obligations of the entity at a given date.
- *Valuation or allocation.* Whether asset, liability, equity, revenue, and expense components have been included in the financial statements at appropriate amounts.
- *Presentation and disclosure.* Whether particular components of the financial statements are properly classified, described, and disclosed.

.012 The right mix of tests of details and analytical procedures should be made for each audit area, based on the auditor's risk assessment, and planning conclusions, the auditor's understanding of internal control components, materiality, and other relevant factors. Accordingly, all of the substantive tests listed in a program may not need to be performed.

.013 The auditor's professional judgment must be applied in deciding whether the program includes all of the procedures required in the particular circumstances. The program serves solely as a timesaver. Users of manuscript aids must remain alert to needs such as the following:

- Developing steps for required procedures which are not covered by the program.
- Excluding extraneous and unnecessary procedures which are covered by the program.
- Editing or modifying the program to suit the needs and preferences of the auditor in the circumstances.

.014 The programs that follow contain illustrative audit objectives and procedures which are numbered merely to organize the materials; the numbers are not intended to imply completeness or a prescribed sequence. This list is merely illustrative. Users of this material must use professional judgment and be alert for the important matters in a particular set of circumstances which may not be covered in the illustrative material.

.015 The illustrative audit program permits the auditor to select audit procedures to be performed based on the assessed level of risk. Based on the auditor's understanding of internal control, it may be necessary to extend testing. See AAM section 3165 for an illustrative audit planning program.

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
--------------------	-------------	---------------------

I. General Procedures

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Procedures:

A. Planning

1. Complete the illustrative planning program. (See AAM section 3165.)
2. Determine that the decision to accept the engagement (in case of new client) or to retain the client has been documented. (See AAM section 11,300.23.)
3. If this is a new client, ascertain that required communications with predecessor auditors, if any, have been made.
4. If other auditors are performing parts of the audit, ascertain that appropriate communications have been made.
5. Determine that a signed engagement letter covering the current engagement is on file. Read letter for any special provisions. List any special provisions and determine that the audit program addresses the provisions.
6. Discuss the audit plan with the engagement personnel. If considered necessary, prepare a planning memorandum for review by engagement staff.
7. Prepare listing of schedules/analyses to be prepared by the client (and working paper set-ups, if considered necessary) and deliver to client.
8. Update the permanent file(s) for new agreements, copies or extracts of minutes and other important documents.

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
9. For trial balances and other schedules and analyses prepared by the client, document and perform the following (these steps can be performed during substantive testing):			
a. Trace amounts to the general ledger.	_____	_____	_____
b. Re-perform the footings and crossfootings (test basis may be appropriate).	_____	_____	_____
c. Trace opening balances to final balances per the working papers for the preceding year (period).	_____	_____	_____
d. Determine that working papers are marked "Prepared by Client" or "PBC."	_____	_____	_____
10. If considered necessary, based on the assessment of audit risk, review journal and general ledger entries made during the period for propriety and accuracy.	_____	_____	_____

B. Conclusion of Audit

1. Perform the following analytical procedures:			
a. Re-examine the comparison of current-period amounts with amounts from prior periods (adjusted for expected changes), after correction of the amounts for any adjustments and reclassifications.	_____	_____	_____
b. Perform any additional analytical procedures, such as ratio analysis, that were not performed during the planning stage because preliminary amounts were unreliable.	_____	_____	_____
c. Identify significant or unexpected fluctuations and other unusual items.	_____	_____	_____
d. Based on the knowledge of the client's operations and the results of audit procedures, evaluate whether all significant or unexpected fluctuations have been adequately explained.	_____	_____	_____
2. Evaluate the effects of unadjusted misstatements on the financial statements.	_____	_____	_____
3. If audit test results identify misstatements in the financial statements, consider whether such misstatements may be indicative of fraud.	_____	_____	_____
4. Complete a subsequent events review. (See AAM section 5400.180.) If they are, follow the guidance in paragraphs 76 and 77 of SAS No. 99 (AU section 316.76-.77).	_____	_____	_____
5. Based on the results on the audit procedures performed, evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time:			
a. Ascertain if any of the following negative trends exist:			
(1) Recurring operating losses	_____	_____	_____
(2) Working capital deficiencies	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
(3) Negative cash flows from operations	_____	_____	_____
(4) Adverse key financial ratios	_____	_____	_____
(5) Calculate the Altman Z Score (the formula can be found in the AAM section 2300.16)	_____	_____	_____
b. Ascertain if any of the following have occurred:			
(1) Default on loans or similar agreements	_____	_____	_____
(2) Arrearages in dividends	_____	_____	_____
(3) Denial of usual trade credit	_____	_____	_____
(4) Restructuring of debt	_____	_____	_____
(5) Noncompliance with statutory or contractual capital arrangements	_____	_____	_____
(6) Need for new sources or methods of financing	_____	_____	_____
(7) Need to dispose of substantial assets	_____	_____	_____
c. Ascertain if the following internal matters have occurred:			
(1) Work stoppages	_____	_____	_____
(2) Other labor difficulties	_____	_____	_____
(3) Substantial dependence on a particular project or customer	_____	_____	_____
(4) Uneconomic long-term commitments	_____	_____	_____
(5) Need to revise operations significantly	_____	_____	_____
d. Ascertain if the following external matters have occurred:			
(1) Legal proceedings	_____	_____	_____
(2) Adverse legislation	_____	_____	_____
(3) Loss of key franchise, license or plant	_____	_____	_____
(4) Loss or principal customer or supplier	_____	_____	_____
(5) Uninsured or underinsured catastrophe	_____	_____	_____
6. Consider whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud made when planning the audit.	_____	_____	_____
7. If, after considering the matters in step 5 above, a substantial doubt exists regarding the entity's ability to continue as a going concern for a reasonable period of time:			
a. Obtain information about management's plans, assess the expected effectiveness of the plans, and gather evidence to evaluate pertinent provisions of those plans and to support audit conclusions concerning the company's ability or inability to continue as a going concern;	_____	_____	_____
b. Evaluate the adequacy of the related financial statement disclosures; and	_____	_____	_____
c. Consider the effects on the audit report.	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
8. Obtain written representation from management of the client (SAS No. 85, as amended by SAS No. 89 [AU section 333]) and the company's legal representatives.	_____	_____	_____
9. Read the financial statements and related notes and consider the following:			
a. The adequacy of the evidence gathered in response to unusual or unexpected balances identified in planning the audit or in the course of the audit.	_____	_____	_____
b. Unusual or unexpected balances or relationships that were not previously identified.	_____	_____	_____
10. Determine that all applicable disclosure checklists and review programs have been completed. (See Financial Statement Preparation Manual and AAM sections 9200–9500.)	_____	_____	_____
11. Ensure that all work performed has been properly reviewed to determine whether it was adequately performed and to determine whether the results of the work are consistent with the conclusions to be presented in the auditor's report.	_____	_____	_____
12. Ascertain that all working papers have been headed, indexed, cross-referenced, initialed, and dated.	_____	_____	_____
13. Accumulate all pending items in one listing, and dispose of all other follow-up or "TO DO" sheets and any other similar notations in the files.	_____	_____	_____
14. Ascertain that all time has been posted to the daily time control records, and record totals on the engagement time summary. Write explanations for any significant variations between budgeted and actual time.	_____	_____	_____
Note: Some firms include other matters in the general section of programs, such as disposition of proposed adjustments, report preparation and review, reconciliation of actual and estimated time, preparation of fee estimate, evaluation of staff, etc.			
15. Determine that any required communications in accordance with SAS No. 61, <i>Communication With Audit Committees</i> , as amended by SAS No. 89 and SAS No. 90 (AU section 380), have been made, including the following matters:			
a. The auditor's responsibility under generally accepted auditing standards (e.g., matters relating to internal control, whether the financial statements are free of material misstatement, etc.).	_____	_____	_____
b. Significant accounting policies (initial selection of and changes in significant accounting policies, or their application).	_____	_____	_____
c. Management judgments and accounting estimates (the process followed by management in formulating sensitive accounting estimates and, the basis for the auditor's conclusions regarding the reasonableness of management's estimates).	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
d. Audit adjustments arising from the audit that could, in the auditor's judgment, either individually or in the aggregate, have a significant effect on the entity's financial reporting process. The auditor should also inform the audit committee about uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole.	_____	_____	_____
e. In connection with each SEC engagement, the auditor should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the entity's accounting principles as applied in its financial reporting. The discussion should be open and frank and generally should include such matters as the consistency of the entity's accounting policies and their application, and the clarity and completeness of the entity's financial statements, which include related disclosures. The discussion should also include items that have a significant effect on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.	_____	_____	_____
f. Other information in documents containing audited financial statements.	_____	_____	_____
g. Disagreements with management, whether or not satisfactorily resolved, about matters that could be significant individually, or in the aggregate, to the entity's financial statements or the auditor's report.	_____	_____	_____
h. Consultation with other accountants about any accounting or auditing matters.	_____	_____	_____
i. Major issues discussed with management prior to retention (e.g., issues relating to the application of accounting principles and auditing standards).	_____	_____	_____
j. Difficulties encountered in performing the audit (e.g., unreasonable delays in commencement of the audit, providing information, client personnel, etc.).	_____	_____	_____
16. Communicate internal control related matters noted (SAS No. 60 [AU section 325]).	_____	_____	_____
17. Determine that required communications, proper as to form and content, have been made as necessary to disclose fraud and/or illegal acts noted during the course of the audit (SAS No. 99 [AU section 316.79-.82] and SAS No. 54 [AU section 317]).	_____	_____	_____

Practice Tip

To help comply with an auditor's communication responsibilities regarding fraud-related matters (SAS No. 99 [AU section 316]), a **checklist** has been provided at the end of this program. When fraud is identified, the auditor should complete the checklist to ensure that he or she has fulfilled his or her communication responsibilities.

Fraud Communication Checklist

An auditor may want to complete the checklist below to facilitate compliance with fraud communication requirements.

SAS No. 99 Communication Requirements

No.	Action	Sign-Off or N/A
1.	Consider implications for other aspects of the audit.	
2.	Reevaluate the assessment of the risk of fraud.	
3.	Discuss matter and the approach to further investigation, if applicable, with appropriate level of management.	
4.	If fraud involves senior management, or causes a material misstatement of the financial statements, report the matter directly to the audit committee. ^{1, 2}	
5.	If risks of material misstatement due to fraud that have continuing control implications have been identified, consider whether these risks represent reportable conditions related to the entity's internal control that should be communicated to senior management and the audit committee (See SAS No. 60, <i>Communication of Internal Control Related Matters Noted in an Audit</i> [AU section 325]).	
6.	Consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud represent reportable conditions that should be communicated to senior management and the audit committee.	
7.	Consider communicating other risks of fraud identified as a result of the assessment of the risks of material misstatements due to fraud.	
8.	Consider whether a duty to disclose possible fraud to parties outside the entity exists in the following circumstances: a. To comply with certain legal and regulatory requirements. b. To a successor auditor when the successor makes inquiries in accordance with SAS No. 84, <i>Communications Between Predecessor and Successor Auditors</i> (AU section 315). ³ c. In response to a subpoena. d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.	

¹ In addition, the auditor should reach an understanding with the audit committee regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower-level employees.

- ² If the perpetrator controls the audit committee or board of directors, you should obtain legal advice and you may need to communicate directly with the client's legal counsel. If the perpetrator is a general partner acting against the interests of limited partners, you should obtain legal advice and consider communicating with the limited partners. If the perpetrator is the owner-manager of a small business, you may have little choice but to communicate with the perpetrator and withdraw from the engagement. However, first consult with legal counsel.
- ³ Because potential conflicts between the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing possible fraud matters with parties outside the client.

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

II. Internal Control

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Procedures:

A. Understanding the Client's Internal Control Components (Control Environment, Risk Assessment, Control Activities, Information and Communication Systems, and Monitoring)

1. Obtain sufficient knowledge of the control environment to understand management's and the board of directors' attitude, awareness, and actions concerning the control environment considering both the substance of controls and their collective effect. Knowledge of the control environment can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.
2. In obtaining knowledge of the control environment, consider the following factors:
 - a. Integrity and ethical values
 - b. Commitment to competence
 - c. Board of directors or audit committee participation
 - d. Management's philosophy and operating style
 - e. Organizational structure
 - f. Assignment of authority and responsibility
 - g. Human resource policies and practices

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
3. Obtain sufficient knowledge of the entity’s risk assessment process to understand how management considers risks relevant to financial reporting objectives and decides about actions to address those risks. Knowledge of the risk assessment process can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.	_____	_____	_____
4. In obtaining knowledge of the entity’s risk assessment process, consider the following:			
a. How management identifies risks.	_____	_____	_____
b. How management estimates the significance of the risks.	_____	_____	_____
c. How management assesses the likelihood of the occurrence of risks.	_____	_____	_____
d. How management relates the risks to financial reporting.	_____	_____	_____
5. Obtain an understanding of those control activities relevant to planning the audit. Knowledge about control activities will often be derived from considering the other components of internal control, previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.	_____	_____	_____
<hr/> Note: Ordinarily, audit planning does not require an understanding of the control activities related to every account balance, transaction class, and disclosure component in the financial statements or to every assertion relevant to them. <hr/>			
6. In obtaining an understanding of control activities, consider policies and procedures that pertain to the following:			
a. Performance reviews	_____	_____	_____
b. Information processing	_____	_____	_____
c. Physical controls	_____	_____	_____
d. Segregation of duties	_____	_____	_____
7. Obtain sufficient knowledge of the information system relevant to financial reporting to understand:			
a. The classes of transactions in the entity’s operations that are significant to the financial statements.	_____	_____	_____
b. How those transactions are initiated.	_____	_____	_____
c. The accounting records, supporting information, and specific accounts in the financial statements involved in the processing and reporting of transactions.	_____	_____	_____
d. The accounting processing involved from the initiation of a transaction to its inclusion in the financial statements, includ-			

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
ing electronic means (such as computers, electronic commerce, and electronic data interchange) used to transmit, process, maintain, and access information.	_____	_____	_____
e. The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.	_____	_____	_____
Knowledge of the information system relevant to financial reporting can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.			
8. Obtain sufficient knowledge of the means the entity uses to communicate financial reporting roles and responsibilities and significant matters relating to financial reporting.	_____	_____	_____
9. Obtain sufficient knowledge of the major types of activities the entity uses to monitor internal control over financial reporting, including how those activities are used to initiate corrective actions. Knowledge of monitoring activities can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations.	_____	_____	_____
10. As part of the understanding of internal control sufficient to plan the audit, evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation. (Entity programs and controls intended to address the risks of fraud may be part of any of the five components of internal control.) These programs and controls may involve (a) specific controls designed to mitigate specific risks of fraud—for example, controls to address specific assets susceptible to misappropriation, and (b) broader programs designed to prevent, deter, and detect fraud—for example, programs to promote a culture of honesty and ethical behavior.	_____	_____	_____
11. Consider whether such programs and controls mitigate the identified risks of material misstatement due to fraud or whether specific control deficiencies may exacerbate the risks. The exhibit at the end of SAS No. 99 (AU section 316), discusses examples of programs and controls an entity might implement to create a culture of honesty and ethical behavior, and that help to prevent, deter, and detect fraud.	_____	_____	_____
12. Consider the evaluation conducted in accordance with steps 10 and 11 when assessing the risks of material misstatement due to fraud.	_____	_____	_____
13. Address the risk of management override of controls by performing the required procedures stated in paragraphs 58 through 67 of SAS No. 99 (AU section 316.58–.67).	_____	_____	_____

<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
--------------------	-------------	---------------------

B-1. Revenues, Receivables, and Receipts—Understanding and Risk Assessment

- | | | | |
|--|-------|-------|-------|
| 1. Obtain and document a sufficient understanding of the design of the relevant controls that relate to the revenues and receivables account balances and transactions and determine whether they have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size, complexity, and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.) | _____ | _____ | _____ |
| 2. Assess the level of control risk: | | | |
| a. If the control risk is assessed at the maximum level, document this assessment (the basis for the assessment need not be documented) and go to section C-1. If the control risk is assessed at this level, the auditor will have to expand substantive tests to compensate for this level of control risk. Some examples of substantive tests which may be affected are shown in step 3 below. | _____ | _____ | _____ |
| b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level of control risk. Some examples of evidential matter which can be used to support this assessed level are shown in section B-2, below—Tests of Controls. | _____ | _____ | _____ |

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach may be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

- | | | | |
|--|-------|-------|-------|
| 3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected. Consider the following matters as appropriate. Cross-reference to AAM section 5400.060. | | | |
| a. The use of confirmations. | _____ | _____ | _____ |
| b. If confirmations are used: | | | |
| (1) Extent and method of selection of accounts for confirmation. | _____ | _____ | _____ |
| (2) Use of positive or negative forms of confirmation request, or a combination of both. | _____ | _____ | _____ |
| (3) Timing of confirmation procedures. | _____ | _____ | _____ |
| (4) Type of information needed on the confirmation request. | _____ | _____ | _____ |
| (5) Anticipated scope of alternative procedures as to significant accounts which do not respond to confirmation requests. | _____ | _____ | _____ |

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
c. Nature and extent of tests to substantiate sales cut-off.	_____	_____	_____
d. Nature and extent of tests to substantiate deferral and realization of revenue in such situations as unearned subscription income or unearned finance charges on installment receivables.	_____	_____	_____
e. Approach to reviewing and evaluating adequacy of the allowance provided for doubtful accounts (review of allowances for specific accounts, comparison of experience relating to write-offs with sales and receivables, and the client's past and present credit policies and practices, etc.).	_____	_____	_____

B-2. Revenues, Receivables, and Receipts—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control (whether manual or automated) was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client has controls in place which can be either inspected, observed or reperformed.

1. Obtain the sales journal and for a selected period(s):
 - a. Trace totals from the sales journal to the general ledger control accounts for revenues, receivables, and such other accounts as salesmen's commissions, provisions, and allowances for product warranties, etc. _____
 - b. Trace selected individual items from the sales journal to such other subsidiary records as the salesmen's commissions detail, and entries to charge cost. _____
 - c. Reconcile the sales journal to the entries to charge cost of sales and credit inventory. _____
 - d. Test the arithmetic accuracy of the footings and crossfootings of the journals. _____
2. Obtain the cash receipts journal and perform the following on a test basis for a selected period(s):
 - a. Trace totals to the general ledger for both the cash account and applicable account distributions such as accounts receivable, cash sales, investment income, and additions to notes payable (re: proceeds). _____
 - b. Test the arithmetic accuracy of the footings and crossfootings of the cash receipts journal; reconcile total receipts to total deposits per the bank statement. _____
3. Select ____ entries from the sales journal made at various times throughout the year, obtain the supporting documents, and perform the following tests:
 - a. Compare the sales invoices with the entries in the sales journal for invoice date, invoice number, identity of customer, dollar amount, and any related items such as sales tax, salesmen's commissions, etc. _____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Trace the sales invoice to the accounts receivable subsidiary (customers) ledger and to evidence of subsequent payment (remittance advice and cash receipts records).	_____	_____	_____
c. If the client charges cost of sales and credits inventory as items are sold, trace detail per the sales invoice to subsidiary records for cost of sales and inventory.	_____	_____	_____
d. Compare the sales invoice for customer identity, description of product, price, quantities, and amounts, to the applicable sales order, and customer's purchase order or job contract. Note evidence of approval of prices and credit as prescribed by management.	_____	_____	_____
e. Compare customer identity, description of product, and quantities per the sales invoice to the documents evidencing shipment; test computations of related freight and insurance charges. Ascertain whether sales are recorded in the proper months.	_____	_____	_____
f. Trace prices, discount, and payment terms to such sources as price lists, job quotations, and job contracts.	_____	_____	_____
g. Test arithmetic accuracy of extensions, footings, and computation of discounts. Note evidence of performance of a clerical check by client staff, where applicable.	_____	_____	_____
4. Review the numerical sequence file of shipping orders for a selected period and account for missing numbers.	_____	_____	_____
5. Select _____ shipping orders prepared at various times during the year:	_____	_____	_____
a. Obtain related sales invoices and trace them to the sales journal.	_____	_____	_____
b. Note whether billings are timely for shipments made.	_____	_____	_____
6. Select _____ credit memorandums issued at various times during the year.	_____	_____	_____
a. Ascertain whether credits were authorized in accordance with prescribed procedures.	_____	_____	_____
b. Review available supporting documentation.	_____	_____	_____
c. Trace the memorandums to the sales journal or other appropriate journal and to the accounts receivable subsidiary ledger.	_____	_____	_____
d. If the credit is granted for return of goods, inspect evidence of return and ascertain whether accounting for the returned goods is consistent with reported condition of the returned goods.	_____	_____	_____
7. From the cash receipts journal, select _____ cash receipts entered during the year; obtain the supporting remittance advices and perform the following:	_____	_____	_____
a. Compare the remittance advices with applicable entries per the cash receipts journal and trace to deposits per the bank statement(s). Ascertain the promptness of the deposit and recording of the entries.	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Trace detail posting of cash receipts to the accounts receivable, notes receivable, or other appropriate subsidiary ledgers. Ascertain whether cash receipts and related credits to accounts receivable are recorded consistently in the proper period.	_____	_____	_____

B-3. Revenue, Receivables, and Receipts—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of control and:
 - a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation or required memoranda, etc.).
 - b. Based on the control risk assessment, make necessary modifications to applicable sections of the program for substantive tests.
 - c. Identify and note reportable conditions in internal control to be brought to the client's attention.
 - d. Identify and note other internal control matters to be brought to the client's attention.

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of the design and operation of controls. See AAM section 4600.15.

C-1. Purchases, Accounts Payable, and Disbursements—Understanding and Risk Assessment

1. Obtain and document a sufficient understanding of the design of relevant controls which relate to classifications of costs or expenses and charges to accounts such as property and equipment and prepaid expenses and determine whether those controls have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size and complexity and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.)
2. Assess the level of control risk:
 - a. If the assessment of control risk is at the maximum level, document this assessment (the basis for the assessment need not be documented) and go to section D-1. If the control risk is assessed at this level, the auditor will have to expand substantive tests to compensate for this level of control risk. Some examples of substantive tests which may be affected are shown in step 3 below.

_____	_____	_____
_____	_____	_____

- b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level of control risk. Some examples of evidential matter which can be used to support this assessed level are shown in section C-2 below—Tests of Controls.

<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
--------------------	-------------	---------------------

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach may be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected. Consider the following matters as appropriate. Cross-reference to AAM section 5400.100 and 5400.160.

- | | | | |
|---|-------|-------|-------|
| a. Extent of analytical procedures and tests of details of transactions and balances regarding classification of costs or expenses and charges to accounts such as property and equipment and prepaid expenses. | _____ | _____ | _____ |
| b. Extent of testing of details of transactions and balances to substantiate recorded payables and search for unrecorded liabilities as of the balance-sheet date. | _____ | _____ | _____ |
| c. Need for and extent of confirmation of payables from vendors. | _____ | _____ | _____ |
| d. The number of days following the balance-sheet date for which cut-off bank statements should be obtained. | _____ | _____ | _____ |
| e. The extent to which (if any) tests of cash balances can be performed at interim dates. | _____ | _____ | _____ |
| f. The extent to which testing of outstanding checks, deposits in transit, and other reconciling items can be restricted. | _____ | _____ | _____ |
| g. The number of days before and after the balance-sheet date which should be used for the testing of bank transfers. | _____ | _____ | _____ |
| h. Whether all bank transfers during the selected period or only those over a selected dollar amount should be tested. | _____ | _____ | _____ |
| i. Whether petty cash funds should be counted or confirmed with the custodian as of the balance-sheet date. | _____ | _____ | _____ |
| j. Whether petty cash funds should be counted on a surprise basis. | _____ | _____ | _____ |
| k. The need for coordination of cash counts with inspection of marketable securities and other investments. | _____ | _____ | _____ |

C-2. Purchases, Accounts Payable, and Disbursements—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control (whether manual or automated) was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client has controls in place which can be either inspected, observed or reperformed.

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
1. Obtain the voucher register and for a selected period(s):			
a. Trace postings to other subsidiary registers, if used (for example, property tax register).	_____	_____	_____
b. Test the arithmetic accuracy of the footings and crossfootings of the voucher register for a test period(s).	_____	_____	_____
c. Trace totals to the general ledger for both accounts (vouchers) payable and the various account distributions.	_____	_____	_____
2. Select _____ entries from the voucher register for various months throughout the year, obtain supporting documents and perform the following tests:			
a. Compare the entry in the voucher register to the vendor's invoice as to date, payee, description, and amount and test the clerical accuracy of the invoice.	_____	_____	_____
b. Determine that the invoice is supported by (i) an approved purchase order or payment request form and, if applicable, a properly executed purchase requisition and (ii) a signed receiving report or other evidence of receipt of services or goods, or otherwise authorized in accordance with prescribed procedures.	_____	_____	_____
c. Determine that the account distribution in the voucher register is reasonable and in agreement with the purchase order.	_____	_____	_____
d. Determine that purchase discounts have been properly recorded.	_____	_____	_____
e. Determine that freight has been billed in conformity with the purchase order.	_____	_____	_____
f. Examine the canceled check issued to payment of the invoice for date, payee, amount, signature, and endorsement. Trace to cash disbursements journal.	_____	_____	_____
g. Inspect the voucher for evidence of clerical check, approval of payment as prescribed by management, and appropriate cancellation.	_____	_____	_____
3. Review the numerical sequence files of receiving reports and of purchase orders and determine whether missing numbers are accounted for. (Failure by the client to do so increase the risk that unrecorded liabilities may exist.)	_____	_____	_____
4. Obtain the cash disbursements journal and perform the following on a test basis:			
a. Trace postings for a selected period(s) to the general ledger for both the cash accounts and applicable account distributions.	_____	_____	_____
b. Trace postings for a selected period(s) to other applicable subsidiary records, if present (for example, voucher or purchase journal, insurance and property tax registers, plant ledger, etc.).	_____	_____	_____
c. For a selected period(s), foot and crossfoot the cash disbursements journal; reconcile total disbursements to the bank statement.	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
5. Review the numerical sequence of checks issued for a selected period and account for missing numbers as void or included on the list of outstanding checks. Select ____ checks drawn at various times during the year from the disbursements journal and obtain the paid checks and supporting detail for the disbursements:			
a. Examine the paid checks and trace identity of signatures to the list of authorized check signers. (Consider requesting confirmations from banks of authorized check signers.)	_____	_____	_____
b. Compare identity of payee to endorsement; review checks for unusual endorsements and schedule those found for further investigation.	_____	_____	_____
c. Compare paid check and supporting detail to the cash disbursements journal for check number, date drawn, payee, amount, and account distribution.	_____	_____	_____
6. Review the client's bank reconciliations; for a selected period(s) perform the following tests of the bank reconciliation(s) and related listings of outstanding checks:			
a. Prove the arithmetic accuracy of the bank reconciliation, including the list of outstanding checks.	_____	_____	_____
b. Trace the bank balance to the bank statement and the book balance to the general ledger account.	_____	_____	_____
c. Trace the paid checks accompanying the bank statement to the cash disbursements journal and outstanding check list for the preceding month-end.	_____	_____	_____
d. Trace deposits per the bank statement to the cash receipts journal and deposits in transit per bank reconciliations of the preceding month-end.	_____	_____	_____
e. Trace deposits in transit to the bank statement for the following month; note whether the time interval between the dates per book and bank appear reasonable.	_____	_____	_____
f. Trace outstanding checks to paid checks which accompany the bank statement for the month(s) subsequent to the reconciliation tested; compare paid checks to the cash disbursements journal and inspect signature(s) and endorsements.	_____	_____	_____
g. Trace other reconciling items to supporting documents and check subsequent disposition.	_____	_____	_____
7. Consider preparing a proof of cash for a test period including the tests described in step 6 above and the following:			
a. Trace totals per the cash receipts and disbursements journals to the general ledger cash accounts; identify and obtain explanations for significant and unusual cash entries in the general ledger during the test period. Foot the receipts and			

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
disbursements journals and prove the arithmetic between the opening and closing general ledger cash balances for the test period.	_____	_____	_____
b. Prove the arithmetic accuracy of the bank statement by footing the deposits and disbursements, adding the opening balance and deducting the closing balance and ascertaining that the resulting differences equal total disbursements.	_____	_____	_____
c. Account for all deposits per books as deposits per bank or deposits in transit. Determine that deposits are made on a timely basis.	_____	_____	_____
d. Review the numerical sequence of checks issued during the period, accounting for them as paid during the period, included on the list of outstanding checks, or void. Determine that void checks have been properly mutilated.	_____	_____	_____
<p>Note: The working paper format for this step would present reconciliations of total receipts and disbursements per cash books to the respective total credits and charges per the bank statement(s) in addition to reconciliations of the bank and book balances at the beginning and end of the selected period. This working paper format may be used to reconcile total activity per the cash books and bank statements for various time periods such as a month or several months.</p>			
8. Select the paid check(s) to reimburse the petty cash fund(s) from the cash disbursements journal; examine the voucher and paid check for consistency with the disbursements journal and prescribed approval and account distribution, and perform the following tests:			
a. Foot supporting evidence by account distribution and trace total to reimbursement voucher.	_____	_____	_____
b. Trace reimbursement voucher to cash disbursements journal and petty cash book.	_____	_____	_____
c. Examine petty cash vouchers for the following:			
(1) Prepared in ink	_____	_____	_____
(2) Approved	_____	_____	_____
(3) Canceled after reimbursement	_____	_____	_____
(4) Dated	_____	_____	_____
(5) Payee	_____	_____	_____
(6) Amount	_____	_____	_____
(7) Signature	_____	_____	_____
(8) Account charged	_____	_____	_____
(9) Numbered consecutively	_____	_____	_____
(10) Reasonableness of amount and business purpose	_____	_____	_____

C-3. Purchases, Accounts Payable, and Disbursements—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of controls and:
- a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation of required memoranda, etc.).

b. Based on the control risk assessment, make necessary modifications to applicable sections of the program for substantive tests.

c. Identify and note reportable conditions in internal control to be brought to the client's attention.

d. Identify and note other internal control matters to be brought to the client's attention.

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. See AAM section 4600.15.

D-1. Payroll—Understanding and Risk Assessment

1. Obtain and document a sufficient understanding of the design of relevant controls which relate to the payroll account balances and transactions and determine whether they have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size and complexity and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.)
2. Assess the level of control risk:
- a. If control risk is assessed at the maximum level, document this conclusion (the basis for the conclusion need not be documented) and go to section E-1. If the control risk is assessed at this level the auditor will have to expand substantive tests to compensate for this level of risk. Some examples of substantive tests which may be affected are shown in step 3 below.

b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level. Some examples of evidential matter which can be used to support this assessed level are shown in section D-2—Tests of Controls.

_____	_____	_____
_____	_____	_____
_____	_____	_____

Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach made be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment.

3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected. Consider the following matters as appropriate. Cross-reference to AAM section 5400.160.
 - a. The extent to which analytical procedures are applied to payroll costs and expenses and the extent to which fluctuations are investigated.
 - b. Whether, and to what extent, gross pay is reconciled to individual earnings records.
 - c. Whether, and to what extent, a payoff is made.
 - d. The extent to which labor charges to property and equipment and to inventory are tested.
 - e. The extent to which payroll taxes withheld and accrued are tested.

<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>

_____	_____	_____

D-2. Payroll—Tests of Controls

Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client had controls in place which can be either inspected, observed or reperformed.

1. Obtain the payroll register for a selected period(s):
 - a. Trace totals per the register through applicable payroll summaries to the paid check used to transfer cash for net pay to the payroll bank account, and to postings in the general ledger (and cost accounting records, if applicable) for wage and salary cost and expense distributions, and liabilities for payroll withheld and deducted.
 - b. Trace payroll withheld through applicable subsidiary records to the payroll tax returns. Review the payroll tax returns; examine the check remitting withholdings to the governments (federal and state) and trace to the general ledger liability accounts.
 - c. Determine whether payroll was approved in accordance with prescribed procedures. (For example, approval might be a signature on a payroll summary and request for the deposit of net pay to the payroll bank account; the signature on the check used to transfer money to the payroll bank account; approvals directly on the registers; etc.)

_____	_____	_____
_____	_____	_____
_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
d. Test the arithmetical accuracy of the footings and crossfootings of the payroll register.	_____	_____	_____
2. Select _____ entries from the payroll register made at various times throughout the year, and perform the following procedures:			
a. Examine authorization for rate of pay and evidence in support of payment (for example, time records, piece-work production reports or other documentation which has been approved as prescribed by management) and on a test basis recompute gross pay.	_____	_____	_____
b. Examine proper authorizations for payroll withholdings such as signed W-4 forms and on a test basis recompute amounts withheld.	_____	_____	_____
c. Test arithmetical accuracy of net pay based on gross pay less deductions.	_____	_____	_____
d. Examine canceled checks noting date, check number, name of payee and comparing net pay to the payroll register, signature to list of authorized check signers, and endorsement to the signed W-4 forms.	_____	_____	_____
e. Examine signed receipt for employees paid by cash, compare amount on the receipt with the payroll register and compare signature to the signed W-4 form.	_____	_____	_____
f. Compare the individual payroll entry on the payroll register to the records used to accumulate year-to-date employee compensation for such purposes as preparation of payroll tax returns and W-2 forms.	_____	_____	_____
3. Authorization of rate of pay. (For example, memoranda in the personnel files evidencing approval as prescribed by management, union contracts, approved rate or salary schedules, authorization of officer's salaries per minutes of board of director's meetings.)	_____	_____	_____
4. Evidence in support of payment. For example:			
a. Time cards or records, which have been approved as prescribed, for employees paid on an hourly basis and for employees paid for overtime.	_____	_____	_____
b. Production reports, which have been approved as prescribed, for employees paid on a piece-work basis.	_____	_____	_____
c. Sales and commission registers, and evidence that advance drawings for commission salesmen had been approved as prescribed.	_____	_____	_____
5. Evidence in support of payroll withholdings. (For example, signed W-4 forms or other proper authorization.)	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
6. Evidence of review of payroll for clerical accuracy, reasonableness, and account distribution, as prescribed by management.	_____	_____	_____
7. Evidence of individual payroll records. (For example, the individual payroll entry to the records used to accumulate year to date employee compensation for such purposes as preparation of payroll, tax returns and W-2 forms.)	_____	_____	_____
8. Consider, based on the preliminary evaluation, whether to:			
a. Observe the distribution of payroll checks or cash, including control of unclaimed wages.	_____	_____	_____
b. Physically observe selected employees in the performance of their duties.	_____	_____	_____

D-3. Payroll—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of control and:
 - a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation of required memoranda, etc.)
 - b. Based on the control risk assessment, propose necessary modifications to applicable sections of the program for substantive tests.
 - c. Identify and note reportable conditions in internal control to be brought to the client's attention (SAS No. 55 [AU section 319]).
 - d. Identify and note other internal control matters to be brought to the client's attention.

_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. See AAM section 4600.15.

E-1. Inventories and Cost of Sales—Understanding and Risk Assessment

1. Obtain and document a sufficient understanding of the design of relevant controls which relate to the inventory, cost of sales account balances and transactions and determine whether they have been placed in operation. An understanding can be obtained from previous experience with the entity, inquiries of appropriate management, supervisory, and staff personnel, inspection of entity documents and records, and observation of entity activities and operations (the form and extent of documentation is influenced by the size, complexity, and nature of internal control). (Review AAM section 4000 for sample internal control questionnaires.)

_____	_____	_____
-------	-------	-------

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
2. Assess the level of control risk:			
a. If control risk is assessed at the maximum level, document this conclusion (the basis for the conclusion need not be documented). If the control risk is assessed at this level the auditor will have to expand substantive tests to compensate for this level of risk. Some examples of the substantive tests which may be affected are shown in step 3 below.	_____	_____	_____
b. If control risk is assessed at less than the maximum level, document the basis for this conclusion and obtain sufficient evidential matter to support this assessed level. Some examples of evidential matter which can be used to support this assessed level are shown in section E-2—Tests of Controls.	_____	_____	_____
<hr/> Remember: Assessing control risk and choosing an audit strategy is made at the assertion level, not a global level. A primarily substantive testing approach made be chosen for some assertions, while less rigorous substantive tests may be performed for other assertions due to a less than maximum control risk assessment. <hr/>			
3. Based on the assessed level of control risk the timing and extent of substantive tests may be affected in, for example, the following aspects:			
a. The extent to which physical inventories are observed and/or perpetual records tested.	_____	_____	_____
b. Whether physical inventories are taken at a preliminary date or at the balance-sheet date.	_____	_____	_____
c. The extent to which consigned inventories are confirmed.	_____	_____	_____
d. The extent to which inventory prices are tested to supporting documentation.	_____	_____	_____
e. The extent to which analytical procedures are applied to cost of sales and the extent to which fluctuations are investigated.	_____	_____	_____
f. The extent to which cutoffs are tested.	_____	_____	_____
g. The extent to which inventories are tested for obsolete or excess stock.	_____	_____	_____

E-2. Inventories and Cost of Sales—Tests of Controls

<hr/> Note: Tests directed toward the effectiveness of the operation of a control are concerned with how the control was applied, the consistency with which it was applied during the audit period, and by whom it was applied. The examples that follow assume that the client has controls in place which can be either inspected, observed or reperformed. <hr/>			
1. Tour the client's manufacturing or production facilities with a member of the client's organization familiar with production.	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
2. Select a sample of transactions for additions and deletions of inventory from such sources as receiving reports, requisitions to place materials into production, and shipping documents. Note the reference or control number, date, description, quantity and dollar amount for each transaction selected. Trace the transactions to the perpetual inventory record and the cost accounting records, if any, used to determine unit or job costs. Perform similar tests selecting the transactions from the perpetual inventory records and/or cost accounting records and trace the transactions to receiving reports, requisitions and shipping documents.	_____	_____	_____
Note: This testing may be coordinated with tests of controls for purchases, payables, and disbursements, and for revenues, receivables, and receipts.			
3. Obtain an analysis of overhead costs charged to inventories and over- or under-absorbed overhead. Review the amounts included in the overhead pool for propriety and perform the following:			
a. Determine that overhead costs are being charged to inventory in accordance with an appropriate policy (for example, as a percent, as a percent of direct labor).	_____	_____	_____
b. Identify disposition of variances, if any, between actual overhead costs incurred and overhead costs applied to production and inventory. Determine that variances are reasonable. Determine that no excessive costs for idle plant are being charged to inventory.	_____	_____	_____
4. If a job order cost system is used, obtain the job order ledger (or tabulation), select a period(s) and perform the following:			
a. Trace total costs incurred to the voucher register (or cash disbursements journal), the payroll distribution, and support for overhead applied.	_____	_____	_____
b. Test the footings of the job order ledger by refooting the detail for selected subtotals and refooting the subtotals.	_____	_____	_____
c. Select ____ job orders for jobs in process and completed jobs and perform the following:			
(1) Examine authorization for the job order.	_____	_____	_____
(2) Trace materials used on a test basis at various times since inception of the job order to such supporting details as requisitions, purchase orders, receiving reports, and processed invoices. (Consider coordination with compliance tests for purchases.)	_____	_____	_____
(3) Trace direct labor costs to account distributions of the payroll registers and on a test basis to individual time			

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
reports or time cards. (Consider coordination with tests of controls for payroll.)	_____	_____	_____
(4) Trace application of overhead costs to analyses used to accumulate overhead costs; test computations and review for reasonableness.	_____	_____	_____
(5) Identify the status of the job (work in process, finished goods, or goods shipped) and trace through necessary summarization to the applicable general ledger account. Obtain explanation for any unreasonable time lag between completion and shipping dates for job orders performed for specific customers.	_____	_____	_____
5. For process cost systems, obtain the cost of production reports for each department within the production process for a selected period(s) and:			
a. Trace quantities and dollar amounts for units received for selected departments to the quantities and dollar amounts transferred out per the preceding department in the sequence of production.	_____	_____	_____
b. For each selected department, review the computations of total and unit costs for production transferred to the next department; on a test basis recompute unit costs and ascertain that costs for units lost in process are properly reallocated to surviving units.	_____	_____	_____
c. Trace materials costs charged to the selected departments to appropriate journals and on a test basis to individual requisitions.	_____	_____	_____
d. Trace labor costs incurred to account distribution analyses of the payroll registers.	_____	_____	_____
e. Review the allocation of overhead.	_____	_____	_____

E-3. Inventories and Cost of Sales—Evaluation of Tests of Controls

1. Evaluate whether the assessed level of risk was appropriate based on the results of the tests of controls and:			
a. Document matters considered and conclusions reached in making the control risk assessment in accordance with firm policy (completion of questionnaires, checklists, preparation of required memoranda, etc.).	_____	_____	_____
b. Based on the control risk assessment, make necessary modifications to applicable sections of the program for substantive tests.	_____	_____	_____
c. Identify and note reportable conditions in internal control to be brought to the client's attention.	_____	_____	_____

	<u>Done by</u>	<u>Date</u>	<u>W/P Ref.</u>
d. Identify and note other internal control matters to be brought to the client's attention.	_____	_____	_____

Practice Tip

When performing tests of controls, caution is necessary. The tests cannot support an assessment of control risk below the maximum unless they provide evidence to evaluate the effectiveness of design and operation of controls. See AAM section 4600.15.

F. Section Completion

This audit program section has been completed in accordance with firm policy.

Done by	_____	_____	_____
Reviewed by	_____	_____	_____

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

Ref.**III. Cash****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Existence of cash—To determine that cash exists and is owned by the entity. (Assertions 1 and 3)
- B. Proper cut-off—To determine that cash balances reflect a proper cut-off of cash receipts and disbursements. (Assertions 1, 2, and 4)
- C. Cash complete—To determine that cash balances as presented in the balance-sheet properly reflect all cash and cash items on hand, in transit, or on deposit with third parties. (Assertions 1, 2, and 5)
- D. Proper classification—To determine that cash balances are properly classified in the financial statements and any restrictions on the availability of funds are properly disclosed. (Assertions 3 and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. Assessment of risk of material misstatement	_____	_____	_____
d. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
[A] B. Substantive Analytical Procedures			
[B] [C] [D]			
1. Compare account balances with expected amounts and investigate any significant deviations from expected amounts.	_____	_____	_____
2. Compute quick current ratios (cash, and net receivables) and compare with expected ratios. Investigate any significant deviations from the expected ratios.	_____	_____	_____
C. Cash in Banks—Detailed Tests			
A C D			
1. Confirm bank balances (using standard forms to confirm account balance information with financial institutions) as of the balance-sheet date for _____ bank accounts used during the year. (Confirmation of and information about certificates of deposit and compensating balances arrangements should also be requested.)	_____	_____	_____
B [C]			
2. Arrange to obtain cut-off bank statements and related paid checks directly from the banks for _____ days following the balance-sheet date.	_____	_____	_____
C			
3. Obtain or prepare a comparative listing of the component bank account(s) and petty cash fund balances as of the closing and opening balance-sheet dates for the year (period) being audited:			
a. Refoot the schedule and trace totals to the financial statement assembly sheets.	_____	_____	_____
b. Trace closing balances to the general ledger and working papers on bank reconciliations and petty cash funds.	_____	_____	_____
c. Trace opening balances to the working papers for the preceding audit.	_____	_____	_____
d. For bank accounts opened and closed during the year (period) trace to authorization in the minutes of the board of directors meetings.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B C [D]	4. Obtain copies of the bank reconciliations as of the balance sheet date and perform the following:			
	a. Trace the book balance to the balance per the general ledger control account and to the working lead schedule or trial balance.	_____	_____	_____
	b. Compare the bank balance to the cut-off bank statement and to the confirmation received from the respective bank.	_____	_____	_____
	c. Test the clerical accuracy of the reconciliation.	_____	_____	_____
	d. Review and explain unusual reconciling items and trace to appropriate subsequent disposition.	_____	_____	_____
	e. Trace deposits in transit to the cut-off bank statement(s) and ascertain whether the time lag is reasonable.	_____	_____	_____
	f. Inspect selected paid checks returned with the cut-off bank statement. Examine the cancellation date on the paid checks to identify any checks that were not recorded in the period under audit. Trace checks drawn prior to the end of the period under audit to the list of outstanding checks and to the cash disbursements journal and agree items such as date, payee, and amount.	_____	_____	_____
	g. List and investigate any unusual checks including checks drawn to "bearer" or "cash."	_____	_____	_____
	h. List and investigate any outstanding checks of \$ _____ or over, which did not clear the banks within a reasonable period to ascertain that the disbursements are proper.	_____	_____	_____
B C	5. Prepare a bank transfer schedule providing column headings for the following:			
	a. Name of disbursing bank	_____	_____	_____
	b. Check number or other reference	_____	_____	_____
	c. Amount	_____	_____	_____
	d. Date disbursed per books	_____	_____	_____
	e. Date disbursed per bank	_____	_____	_____
	f. Name of receiving bank	_____	_____	_____
	g. Date deposited per books	_____	_____	_____
	h. Date deposited per bank	_____	_____	_____
	i. Perform the following:			
	(1) Review the cash receipts and disbursements journals, bank statements and related paid checks (including the cut-off bank statements) for the last _____ days before			

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	the first ____ days after the closing date of the year (period) and list all bank transfers (or each transfer of \$ ____ or over) on the transfer schedule.	_____	_____	_____
	(2) Review the schedule to determine that the deposit and disbursement side of each transfer is recorded in the proper period and that any time lag between book and bank entries appears reasonable. Trace incompleting transfers to the schedule of outstanding checks and/or deposits in transit.	_____	_____	_____
B	6. If cut-off statements and related paid checks are not independently received by the auditor directly from the bank, obtain the bank statements and related paid checks for the month following the balance-sheet date and perform the following:			
	a. Inspect bank statements for erasures and prove arithmetic accuracy of the statements (opening balance plus total deposits and other credits, less the closing balance equals total disbursements and other charges).	_____	_____	_____
	b. Examine paid date of each check and debit memo to ascertain it was paid by the bank during the period covered by the bank statements.	_____	_____	_____
	c. Foot the paid checks and debit memos to ascertain that the total agrees with total charges per the bank statements.	_____	_____	_____
	d. Request banks to confirm the balance at the end of the statement period.	_____	_____	_____
A B C D	7. On receiving the bank confirmation replies:			
	a. Ascertain that all of the inquiries have been answered. If any inquiries have not been answered, telephone or correspond with the bank to obtain the missing information (in writing).	_____	_____	_____
	b. Review bank confirmations for details applicable to other areas of the financial statements such as liabilities, debt, commitments, and contingencies.	_____	_____	_____
	c. Determine whether there are any restrictions on the account balances, including minimum balance requirements.	_____	_____	_____
	d. Determine whether there are any guarantee arrangements.	_____	_____	_____
D. Cash Funds and Petty Cash—Detailed Tests				
	1. The auditor should consider performing the following procedures if cash balances on hand are deemed significant:			
A B C D	a. Identify all funds, including locations, custodians, amounts and purpose and decide:			
	(1) Which funds are to be counted and, if so, whether to count them simultaneously and whether simultaneous			

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B C D	control and inspection of other assets, such as negotiable securities, is also necessary.	_____	_____	_____
	(2) Timing of counts to be at a preliminary date, the balance-sheet date or subsequent to the balance-sheet date.	_____	_____	_____
	b. Count all (or on a test basis, depending upon risk assessment) undeposited cash, petty cash, unclaimed wages, stamps, etc., in the presence of the custodian (A client's representative should be present at all times during the count.) and:			
	(1) List currency and coins counted by denomination.	_____	_____	_____
	(2) List other items such as stamps, checks, and vouchers; examine vouchers as to date, amount, payer, authorization, signature, account charged, and documentation. Identify large or unusual amounts for possible follow-up.	_____	_____	_____
	(3) Trace the fund balance per the count to the balance per the general ledger.	_____	_____	_____
	(4) List all unusual items such as postdated checks or vouchers prepared in pencil for discussion with a responsible member of the client's staff.	_____	_____	_____
	(5) If petty cash reimbursement checks are included in the fund, trace the amounts to cash book entries dated prior to the count.	_____	_____	_____
	(6) Have the custodian sign a receipt at the conclusion of the count.	_____	_____	_____

Practice Tip

It is often a good idea to scan petty cash vouchers to determine types of expenses that are paid out of petty cash. Be on the lookout for items that might need to be capitalized.

A B C D	3. Consider whether to confirm funds at branch offices and other locations which are not scheduled for a physical count.	_____	_____	_____
---------	--	-------	-------	-------

E. Additional Procedures (if any)

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
F. Section Completion			
1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for cash balances, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for cash balances.	_____	_____	_____
2. The objectives of this audit program have been met.	_____	_____	_____
This audit program section has been completed in accordance with firm policy.

IV. Investments in Securities, Derivatives, Hedging Activities, and Transfers of Financial Assets

(Note: This program is based on Statement on Auditing Standards (SAS) No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AU section 332), and its companion Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*. We have redesigned this program to reflect the requirements and style of SAS No. 92 and its companion Audit Guide. Refer to the SAS and its companion Audit Guide for authoritative guidance on auditing investments in securities, derivatives, and hedging activities.)

Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review
 - b. Internal control documentation, control risk assessment, and control test results
 - c. Assessment of risk of material misstatement
 - d. Other planning documents and risk assessments
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.
3. (Some of the following information may not be necessary, depending upon the judgment of the auditor.) Obtain or prepare detailed analyses of the client's securities and derivatives. The analyses may contain the following information:
 - a. Classification between held-to-maturity, available-for-sale, or trading securities, and securities accounted for under other methods (for example, the equity method).

	_____	_____	_____
	_____	_____	_____
	_____	_____	_____
	_____	_____	_____
	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Description of the security or derivative, including any interest rate and maturity of debt, the dividend rate, etc.	_____	_____	_____
c. Classification between current and noncurrent portfolios.	_____	_____	_____
d. Balances at the end of the preceding period.	_____	_____	_____
e. Additions during the current period including dates, number of shares, etc.	_____	_____	_____
f. Sales and dispositions during the current period including dates, proceeds, realized gain or loss, etc.	_____	_____	_____
g. Balances at the end of the current period.	_____	_____	_____
h. Amounts of unrealized appreciation and depreciation at the end of the current period.	_____	_____	_____
i. Investment income (interest, dividends, etc.) earned during the current period, collected during the current period, accrued at the end of the current period, and accrued at the end of the preceding period.	_____	_____	_____
4. Foot and crossfoot the analyses.	_____	_____	_____
5. Trace ending totals to the general ledger and trace opening balances to the preceding period audit workpapers.	_____	_____	_____
B. Evaluating Managements' Intent and Ability			
1. In evaluating management's intent and ability—			
a. Obtain an understanding of the process used by management to classify securities as trading, available-for-sale, or held-to-maturity. Determine that the client's securities are classified in accordance with generally accepted accounting principles.	_____	_____	_____
b. For an investment accounted for using the equity method, inquire of management as to whether the entity has the ability to exercise significant influence over the operating and financial policies of the investee and evaluate the attendant circumstances that serve as a basis for management's conclusions.	_____	_____	_____
c. If the client accounts for the investment contrary to the presumption established by generally accepted accounting principles for use of the equity method, obtain sufficient competent evidential matter about whether that presumption has been overcome and whether appropriate disclosure is made regarding the reasons for not accounting for the investment in keeping with that presumption.	_____	_____	_____
d. Consider whether management's activities corroborate or conflict with its stated intent. For example, evaluate an assertion that management intends to hold debt securities to their maturity by examining evidence such as documentation of management's strategies and sales and other historical activities with respect to those securities and similar securities.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
e. Determine whether generally accepted accounting principles require management to document its intentions and specify the content and timeliness of that documentation. Inspect the documentation and obtain evidential matter about its timeliness. Unlike the formal documentation required for hedging activities, evidential matter supporting the classification of debt and equity securities may be more informal.	_____	_____	_____
f. Determine whether management's activities, contractual agreements, or the client's financial condition provide evidence of its ability.	_____	_____	_____
C. Financial Statement Assertion: Existence or Occurrence			
1. Confirm existence of securities with <u>issuers</u> .	_____	_____	_____
2. Confirm existence of securities, including securities in electronic form, with <u>holders</u> or with the counterparty to the derivative.	_____	_____	_____
3. Confirm settled transactions with the broker-dealer or counterparty.	_____	_____	_____
4. Confirm unsettled transactions with the broker-dealer or counterparty.	_____	_____	_____
5. Physically inspect the security or derivative contract.	_____	_____	_____
6. Read the executed partnership or similar agreements.	_____	_____	_____
7. Inspect underlying agreements and other forms of supporting documentation, in paper or electronic form, for—			
a. Amounts reported.	_____	_____	_____
b. Evidence that would preclude the sales treatment of a transfer.	_____	_____	_____
c. Unrecorded repurchase agreements.	_____	_____	_____
8. Inspect supporting documentation for subsequent realization or settlement after the end of the reporting period.	_____	_____	_____
9. Trace payments for purchases of securities and derivatives to canceled checks.	_____	_____	_____
10. Perform substantive analytical procedures.	_____	_____	_____
11. If a response to a positive confirmation request is not received, apply alternative procedures. (Alternative procedures may include examining source documents, such as invoices or broker's statements; inspecting executed agreements; examining cash receipts or disbursements subsequent to year end).	_____	_____	_____
D. Financial Statement Assertion: Completeness			
1. Request the counterparty to a derivative or the holder of a security to provide information about it, such as whether there are any side agreements or agreements to repurchase securities sold.	_____	_____	_____
2. Request counterparties or holders who are frequently used, but with whom the accounting records indicate there are presently no derivatives or securities, to state whether they are counterparties to derivatives with the client or holders of its securities.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
3. Inspect financial instruments and other agreements to identify embedded derivatives.	_____	_____	_____
4. Inspect documentation in paper or electronic form for activity subsequent to the end of the reporting period.	_____	_____	_____
5. Perform substantive analytical procedures.	_____	_____	_____
6. Compare previous and current account detail to identify assets that have been removed from the accounts and test those items further to determine that the criteria for sales treatment have been met.	_____	_____	_____
7. Read other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees.	_____	_____	_____

Note: If one or more service organizations provide services that are part of the client's information system for derivatives, the auditor may be unable to sufficiently limit audit risk for assertions about the completeness of derivatives without obtaining evidential matter about the operating effectiveness of controls at one or more of the service organizations.

E. Financial Statement Assertion: Rights and Obligations

1. Confirm significant terms with the counterparty to a derivative or the holder of a security, including the absence of any side agreements.	_____	_____	_____
2. Inspect underlying agreements and other forms of supporting documentation, in paper or electronic form.	_____	_____	_____
3. Consider whether the findings of other auditing procedures, such as reviewing minutes of meetings of the board of directors and reading contracts and other agreements provide evidence about rights and obligations, such as pledging of securities as collateral or selling securities with a commitment to repurchase them.	_____	_____	_____

F. Financial Statement Assertion: Valuation

I. Valuation Based on Cost

1. Inspect documentation of the purchase price.	_____	_____	_____
2. Confirm the purchase price with the issuer or holder.	_____	_____	_____
3. Test discount or premium amortization, either by recomputation or analytical procedures.	_____	_____	_____
4. Evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its cost that is other than temporary.	_____	_____	_____

II. Valuation Based on an Investee's Financial Results (Including but not limited to the equity method of accounting)

1. Obtain sufficient evidence in support of the investee's financial results.	_____	_____	_____
---	-------	-------	-------

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
2. Read available financial statements of the investee and the accompanying audit report, if any. (Financial statements of the investee that have been audited by an auditor whose report is satisfactory, for this purpose, to the investor's auditor may constitute sufficient evidential matter.)	_____	_____	_____
3. Review information in the investor's files that relates to the investee such as investee minutes and budgets and cash flows information about the investee.	_____	_____	_____
4. Make inquiries of investor management about the investee's financial results.	_____	_____	_____
5. If the investee's financial statements are not audited, or if the investee auditor's report is not satisfactory to the investor's auditor for this purpose, apply, or request that the investor arrange with the investee to have another auditor apply, appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor.	_____	_____	_____
6. If the carrying amount of the security reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, obtain sufficient evidence in support of these amounts.	_____	_____	_____
7. If a time lag between the date of the client's financial statements and those of the investee has a material effect on the client's financial statements, determine whether the client's management has properly considered the lack of comparability.	_____	_____	_____
8. Evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its carrying amount that is other than temporary.	_____	_____	_____
9. With respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the investor auditor's report, read available interim financial statements of the investee and make appropriate inquiries of the investor to identify subsequent events and transactions that are material to the investor's financial statements.	_____	_____	_____
10. Obtain evidence relating to material transactions between the client and the investee to evaluate the propriety of the elimination of unrealized profits and losses on transactions between the client and the investee that is required when the equity method of accounting is used to account for an investment under generally accepted accounting principles.	_____	_____	_____
11. Obtain evidence relating to material transactions between the client and the investee to evaluate the adequacy of disclosures about material related party transactions.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
III. Valuation Based on Fair Value			
1. Determine whether generally accepted accounting principles specify the method to be used to determine the fair value of the client's derivatives and securities and evaluate whether the determination of fair value is consistent with the specified valuation method.	_____	_____	_____
2. Evaluate whether the entity's method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity, or changes in accounting principles.	_____	_____	_____
3. If management has changed the method for determining fair value, consider whether management can adequately demonstrate that the method to which it has changed provides a more appropriate basis of measurement or whether the change is supported by a change in the GAAP requirements or a change in circumstances.	_____	_____	_____
4. Consider the guidance in SAS No. 101, <i>Auditing Fair Value Measurements and Disclosures</i> (AU section 328), and if the determination of fair value requires the use of estimates, consider the guidance in SAS No. 57, <i>Auditing Accounting Estimates</i> (AU section 342).	_____	_____	_____
5. If applicable, obtain evidence about an client's derivatives and securities from quoted market prices listed on national exchanges or over-the-counter markets.	_____	_____	_____
6. If applicable, obtain evidence about a client's derivatives and securities from quoted market prices obtained from broker-dealers who are market makers in them or through the National Quotation Bureau. (Using such a price quote to test valuation assertions may require special knowledge to understand the circumstances in which the quote was developed.)	_____	_____	_____
7. If quoted market prices are not available for the derivative or security, obtain estimates of fair value from broker-dealers or other third-party sources based on proprietary valuation models or from the client based on internally or externally developed valuation models.	_____	_____	_____
8. Obtain an understanding of the method used by the broker-dealer, other third-party source, or by the client, in developing the estimate, and evaluate whether the method of measurement is appropriate in the circumstances.	_____	_____	_____
9. If necessary, obtain estimates from more than one pricing source. (Examples of why this may be necessary include: (1) the pricing source has a relationship with the client that might impair its objectivity, such as an affiliate or a counterparty involved in selling or structuring the product, and (2) the valuation is based on assumptions that are highly subjective or particularly sensitive to changes in the underlying circumstances.)	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
10. For fair-value estimates obtained from broker-dealers and other third-party sources, consider the applicability of the guidance in SAS No. 73, <i>Using the Work of a Specialist</i> (AU section 336), or SAS No. 70, <i>Service Organizations</i> (AU section 324).	_____	_____	_____
11. If using the work of a specialist in auditing fair value measurements, determine whether the specialist's understanding of the definition of fair value and the method used to determine fair value are consistent with those of management and with GAAP through discussions with the specialist or by reading the specialist's report.	_____	_____	_____
12. If a derivative or security is valued by the client using a valuation model, obtain evidence supporting management's assertions about fair value by performing the following procedures, as deemed necessary. (A valuation model should not be used to determine fair value when generally accepted accounting principles require the fair value of a security be determined using quoted market prices.)			
a. Assess the reasonableness and appropriateness of the model. Determine that the valuation model is appropriate for the derivative or security to which it is applied and whether the assumptions used are reasonable and appropriately supported. (The evaluation of the appropriateness of valuation models and each of the assumptions used in the models may require considerable judgment and knowledge of valuation techniques, market factors that affect value, and actual and expected market conditions, particularly in relation to similar derivatives and securities that are traded. Accordingly, the auditor may consider it necessary to involve a specialist in assessing the model.)	_____	_____	_____
b. Evaluate the source and reliability of evidence supporting management's assumptions, including consideration of the assumptions in light of historical and market information.	_____	_____	_____
c. Evaluate whether management used relevant information that was reasonably available at the time.	_____	_____	_____
d. Consider the sensitivity of the valuation to changes in significant assumptions, including market conditions that may affect the value.	_____	_____	_____
e. Consider whether management has identified the significant assumptions and factors influencing the measurement of fair value.	_____	_____	_____
f. Where assumptions are reflective of management's intent and ability to carry out specific courses of action, consider whether they are consistent with the entity's plans and past experience.	_____	_____	_____
g. If management relies on historical financial information in the development of assumptions, consider the extent to which such reliance is justified.	_____	_____	_____
h. Test the data used to develop the fair value measurements and disclosures and evaluate whether the fair value measurements have been properly determined from such data and management's assumptions.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
i. If necessary, calculate the value, for example using a model developed by the auditor or by a specialist engaged by the auditor, to develop an independent expectation to corroborate the reasonableness of the value calculated by the client. Take into consideration all significant variables and evaluate any significant difference from management's estimate.	_____	_____	_____
j. If using a subsequent event or transaction to substantiate a fair value measurement, consider only those events or transactions that reflect circumstances existing at the balance-sheet date.	_____	_____	_____

Practice Tip

It may be useful to perform sensitivity analysis on key factors to determine how they affect the estimate of the fair value. For example, when an estimate of the fair value of a non-exchange-traded option includes an assumption about the volatility of the underlying security, the auditor may perform an analysis to determine how the fair value of the option will differ if that volatility is changed. The results of this analysis will help the auditor determine which factors and assumptions have the most significant impact on the estimate.

- | | | | |
|---|-------|-------|-------|
| 13. In situations requiring considerable judgment, consider the guidance in SAS No. 57, <i>Auditing Accounting Estimates</i> (AU section 342), and SAS No. 73, <i>Using the Work of a Specialist</i> (AU section 336). | _____ | _____ | _____ |
| 14. If collateral, such as negotiable securities, real estate, chattels, or other property, is an important factor in evaluating fair value and collectibility of a security, obtain evidence regarding the existence, fair value, and transferability of such collateral as well as the investor's rights to the collateral. | _____ | _____ | _____ |
| 15. Evaluate management's conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary. | _____ | _____ | _____ |
| 16. Gather evidential matter to support the amount of unrealized appreciation or depreciation in the fair value of a derivative that is recognized in earnings or other comprehensive income or that is disclosed because of the ineffectiveness of a hedge. (That requires an understanding of the methods used to determine whether the hedge is highly effective and to determine the ineffective portion of the hedge.) | _____ | _____ | _____ |
| 17. Evaluate the sufficiency and competence of the audit evidence obtained from auditing fair value measurements and disclosures as well as the consistency of that evidence with other audit evidence obtained and evaluated during the audit. | _____ | _____ | _____ |
| 18. Determine that the audit committee is informed about the process used by management in formulating fair value estimates, and about the conclusions regarding the reasonableness of those estimates. | _____ | _____ | _____ |

IV. Impairment Losses

1. Evaluate (a) whether management has considered relevant information in determining whether factors, such as those listed below, exist and (b) management's conclusions about the need to recognize an impairment loss.

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
a. Fair value is significantly below cost and—			
(1) The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.	_____	_____	_____
(2) The decline has existed for an extended period of time.	_____	_____	_____
(3) Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.	_____	_____	_____
b. The security has been downgraded by a rating agency.	_____	_____	_____
c. The financial condition of the issuer has deteriorated.	_____	_____	_____
d. Dividends have been reduced or eliminated, or scheduled interest payments have not been made.	_____	_____	_____
e. The client recorded losses from the security subsequent to the end of the reporting period.	_____	_____	_____
2. Obtain evidence about such factors that tend to corroborate or conflict with management's conclusions.	_____	_____	_____
3. If the client has recognized an impairment loss, gather evidence supporting the amount of the impairment adjustment recorded and determine whether the client has appropriately followed generally accepted accounting principles.	_____	_____	_____
4. If the client has recognized an impairment loss and there is agreement with that conclusion:			
a. Determine that the write-down of an investment to a new cost basis is accounted for as a realized loss.	_____	_____	_____
b. Test the calculation of the loss recorded.	_____	_____	_____
c. Determine that the new cost basis of investments previously written down is not changed for subsequent recoveries in fair value.	_____	_____	_____
d. Review a summary of investments written down for completeness and unusual items.	_____	_____	_____
e. Assess the credit rating of the counterparty.	_____	_____	_____
f. Conclude on the adequacy of impairment adjustments recorded.	_____	_____	_____
G. Financial Statement Assertion: Presentation and Disclosure			
1. Evaluate whether the presentation and disclosure of derivatives and securities are in conformity with generally accepted accounting principles.	_____	_____	_____
2. In evaluating the adequacy of presentation and disclosure, consider the form, arrangement, and content of the financial statements and their notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts reported.	_____	_____	_____
3. If an item contains a high degree of measurement uncertainty, assess whether the disclosures are sufficient to inform users of such uncertainty.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
4. When disclosure of fair value information under GAAP is omitted because it is not practicable to determine fair value with sufficient reliability, evaluate the adequacy of disclosures required in those circumstances, or whether the financial statements are materially misstated.	_____	_____	_____
5. Follow the guidance in SAS No. 32, <i>Adequacy of Disclosure in Financial Statements</i> (AU section 431), in evaluating the adequacy of disclosure that is not specifically required by generally accepted accounting principles.	_____	_____	_____

H. Other Procedures

1. Test accrued interest on investment securities as follows:			
a. Obtain or prepare a trial balance of accrued interest receivable on securities and derivatives and agree to the general ledger.	_____	_____	_____
b. Recalculate accrued interest for selected securities and derivatives.	_____	_____	_____
c. Review the client's procedures for calculating monthly accruals and:			
(1) Test the posting of monthly accruals by tracing to applicable accounts in the general ledger.	_____	_____	_____
(2) Test detail calculations supporting the monthly entries.	_____	_____	_____
2. Determine that gains or losses on dispositions of securities and derivatives have been computed and accounted for properly.	_____	_____	_____
3. Trace proceeds from sales of securities and derivatives to entries in cash book.	_____	_____	_____
4. Determine that any transfers between categories of investments have been properly made and recorded in accordance with generally accepted accounting principles.	_____	_____	_____

I. Hedging Activities

1. Gather evidential matter to determine whether management complied with the hedge accounting requirements of generally accepted accounting principles, including designation and documentation requirements.	_____	_____	_____
2. Gather evidential matter to support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by generally accepted accounting principles.	_____	_____	_____
3. In situations where the client designates a derivative as a fair value hedge, and the client adjusts the carrying amount of the hedged item for the change in the hedged item's fair value that is attributable to the hedged risk, gather evidential matter supporting the recorded change in the hedged item's fair value that is attributable to the hedged risk.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
4. Gather evidential matter to determine whether management has properly applied generally accepted accounting principles to the hedged item.	_____	_____	_____
5. For a cash flow hedge of a forecasted transaction, evaluate management's determination of whether the forecasted transaction is probable.	_____	_____	_____
6. For entities with significant derivative transactions, perform the following steps:			
a. Read loan agreements, lease agreements, insurance contracts and other relevant contracts to identify embedded derivatives. Determine whether the embedded derivatives should be accounted for separately from the host contract in accordance with FASB Statement No. 133.	_____	_____	_____
b. Confirm with counter parties or executing brokers the outstanding transactions as of the balance sheet date. Consider also confirming with counter parties or executing brokers the derivatives activity during the year. Scan derivatives activity and compare it with the description of the entity's use of derivatives provided by the client.	_____	_____	_____
c. Compare the terms of individual transactions with contracts or trade tickets.	_____	_____	_____

J. Management Representations

1. Obtain written representations from management confirming aspects of management's intent and ability that affect assertions about derivatives and securities, such as its intent and ability to hold a debt security until its maturity or to enter into a forecasted transaction for which hedge accounting is applied.	_____	_____	_____
2. Consider obtaining written representations from management confirming other aspects of derivatives and securities transactions that affect assertions about them.	_____	_____	_____
3. Obtain written representations from management regarding the reasonableness of significant assumptions, including whether they appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity where relevant to the use of fair value measurements or disclosures.	_____	_____	_____

K. Service Organization Involvement

1. If a service organization provides services that are part of a client's information system, consider how the provision of those services affects the nature, timing, and extent of substantive procedures.	_____	_____	_____
2. If necessary, inspect supporting documentation, such as derivative contracts and securities purchases and sales advices, located at the service organization's facilities. (This inspection can be performed by either the auditor of the client's financial statements, an auditor working under the direction of that auditor, or an auditor engaged by the service organization.)	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
L. Accounting by a Transferor and Transferee for All Transfers of Financial Assets			
1. Determine that the proceeds received from the transfer of financial assets have been recognized as a sale, if all of the following conditions are met:			
a. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.	_____	_____	_____
b. Each transferee (or, if the transferee is a qualifying special purpose entity (QSPE), each holder of its beneficial interests) has the right to pledge or exchange the assets (or beneficial interests) it received, and no condition both constrains the transferee (or holder) from taking advantage of its right to pledge or exchange and provides more than a trivial benefit to the transferor.	_____	_____	_____
c. The transferor does not maintain effective control over the transferred assets through either an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or the ability to unilaterally cause the holder to return specific assets, other than through a cleanup call.	_____	_____	_____
2. Determine that the proceeds received from the transfer of financial assets that do not meet the aforementioned conditions of a sale have been accounted for as a secured borrowing with a pledge of collateral.	_____	_____	_____
3. Upon completion of any transfer of financial assets, determine that the transferor has:			
a. Continued to carry in its statement of financial position any retained interest in the transferred assets, including, if applicable, servicing assets, beneficial interests in assets transferred to a qualifying special-purpose entity in a securitization, and retained undivided interests.	_____	_____	_____
b. Allocated the previous carrying amount between the assets sold, if any, and the retained interests, if any, based on their relative fair values at the date of transfer.	_____	_____	_____
4. Upon completion of a transfer of assets that satisfies the conditions to be accounted for as a sale (see step 1 above), determine that the <i>transferor</i> has:			
a. Derecognized all assets sold.	_____	_____	_____
b. Recognized all assets obtained and liabilities incurred in consideration as proceeds of the sale, including cash, put or call options held or written (e.g., guarantee or recourse obligations), forward commitments (e.g., commitments to deliver additional receivables during the revolving periods of some securitizations), swaps (e.g., provisions that convert interest rates from fixed to variable), and servicing liabilities, if applicable.	_____	_____	_____

	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
c. Initially measured at fair value assets obtained and liabilities incurred in a sale or, if it is not practicable to estimate the fair value of an asset or a liability, applied alternative measures.	_____	_____	_____
d. Recognized in earnings any gain or loss on the sale.	_____	_____	_____
5. If the client is the <i>transferee</i> , determine that upon the completion of a transfer of assets that satisfies the conditions to be accounted for as a sale, the <i>transferee</i> recognizes all assets obtained and any liabilities incurred and initially measures them at fair value (in aggregate, presumptively the price paid).	_____	_____	_____
6. If it is not practicable to estimate the fair values of assets, determine that the transferor recorded those assets at zero.	_____	_____	_____
7. If it is not practicable to estimate the fair values of liabilities, determine that the transferor recognizes no gain on the transaction and records those liabilities at the greater of:			
a. The excess, if any, of (1) the fair values of assets obtained less the fair values of other liabilities incurred, over (2) the sum of the carrying values of the assets transferred.	_____	_____	_____
b. The amount that would be recognized in accordance with FASB Statement No. 5, as interpreted by FASB Interpretation No. 14.	_____	_____	_____
8. Determine that all the necessary disclosures have been made (see FASB Statement No. 140, paragraph 17).	_____	_____	_____

M. Additional Procedures (if any)

N. Section Completion

1. Based on the results of the audit procedures performed, reassess the risk of material misstatement due to error and due to fraud, and determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for investments.	_____	_____	_____
---	-------	-------	-------

This audit program section has been completed in accordance with firm policy.

Done by _____

Reviewed by _____

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

V. Trade Accounts and Notes Receivable

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Existence of accounts receivable—To determine that the receivables exist, are authentic obligations owed to the entity, contain no significant amounts that should be written off, and that allowances for doubtful accounts are adequate and not excessive. (Assertions 1, 3, and 4)
- B. Proper disclosure—To determine that proper disclosure is made of any pledged, discounted or assigned receivables. (Assertions 3 and 5)
- C. Revenue recognition—To determine that interest on accounts and notes receivable has been properly recorded. (Assertions 2, 3, and 4)
- D. GAAP conformity—To determine that presentation and disclosure of receivables is in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review

[The next page is 5447.]

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. Assessment of risk of material misstatement	_____	_____	_____
d. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
[A] B. Substantive Analytical Procedures			
[B] [C] [D]			
1. Compare receivable account balances with expected amounts and investigate any significant deviations from the expected amounts.	_____	_____	_____
2. Analyze the relationship of receivables and sales (day's sales in accounts receivable) and compare with relationships for the preceding period(s) (adjusted for expected changes). Investigate results as deemed necessary.	_____	_____	_____
3. Compute the ratio of interest earned to the average notes receivable outstanding and compare with preceding year's ratio (or expected ratio). Investigate results as deemed necessary.	_____	_____	_____
4. Compare balances in allowance for doubtful accounts, bad debts, sales returns and allowances with the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
5. Compute the following ratios and compare with the expected ratios. Investigate results as deemed necessary.			
a. Sales returns and allowances as a percentage of gross sales.	_____	_____	_____
b. Sales returns and allowances as a percentage of gross sales by product/service line.	_____	_____	_____
c. Bad debts expense as a percentage of gross sales.	_____	_____	_____
d. Allowance for doubtful accounts as a percentage of trade accounts receivable.	_____	_____	_____
e. Aging categories as a percentage of total accounts receivable compared to prior year's.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
C. Detailed Tests				
[A]	1. Review activity in the general ledger control accounts for trade accounts receivable for the period being audited and:			
	<ul style="list-style-type: none"> a. Note and investigate any significant entries which appear unusual in amount or source. b. Compare the opening balance for the period with the final closing balances per the working papers and reports for the preceding period. 	_____	_____	_____
[A]	2. Obtain or prepare an aged trial balance of trade receivables as of the date selected for confirmation procedures. (Note: In some situations, it may not be practicable to obtain an aged trial balance until after the mailing of confirmation requests, especially when confirmation procedures are coordinated with the client's regular billing cycle. In such instances obtain a trial balance (which may be an annotated tape) of trade receivables as of the confirmation date.) Perform the following:			
	<ul style="list-style-type: none"> a. Test the clerical accuracy of the trial balance. b. Reconcile the total per the aged trial balance to the general ledger control account and, if as of the balance-sheet date, to the lead schedule or working trial balance. 	_____	_____	_____
Note: When the aged trial balance and the general ledger do not agree, a monthly accounts receivable reconciliation between the two reports is an essential internal control feature.				
[A]	<ul style="list-style-type: none"> c. On a test basis, trace entries for individual customers on the aging analysis (totals and aging detail) to the individual accounts in the accounts receivable subsidiary ledger and select individual accounts from the subsidiary ledger and trace totals and aging detail to the aged trial balance. Test footings of individual customer accounts in the subsidiary ledger. 	_____	_____	_____
	3. Select individual customer accounts for confirmation procedures from the aged trial balance (or trial balance) and arrange for the preparation of confirmation requests to be mailed under the auditor's control and tested as follows:			
	<ul style="list-style-type: none"> a. Positive requests on individually significant accounts with balances in excess of \$ ____. b. Positive requests on accounts from the sampling population as follows: 	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
Note: Due to risk assessment and planning decisions, confirmation of receivables may not be part of the audit approach. If so, complete alternative procedures as described in this program.			
c. Trace individual confirmation requests as to balances and addresses to the subsidiary accounts receivable records. Send confirmations (using envelopes with the auditor's return address) and prepare confirmation statistics.	_____	_____	_____
d. If client requests that any accounts be excluded from the confirmation process, obtain explanations and determine if such a restriction will have a significant affect on your ability to meet the audit objectives. (Consider reviewing such records as correspondence files to substantiate the explanation.) Perform appropriate alternative procedures with respect to the amounts.	_____	_____	_____
e. Trace confirmation replies to the trial balance and investigate and reconcile replies with differences.	_____	_____	_____
Note: The auditor may prepare a control of exceptions such as copies of replies or a list and arrange for the client's staff to investigate the differences and accumulate supporting documentation for the auditor's review. Be alert to explanations that may be evidence of overall conditions affecting the financial statements. Follow up on such conditions.			
f. Obtain new addresses for all confirmations returned by the post office and remail.	_____	_____	_____
g. Send second requests for all unanswered positive confirmation requests. Consider sending third requests by registered or certified mail, and performing alternative auditing procedures.	_____	_____	_____
h. Perform alternative auditing procedures for unanswered positive confirmation requests.	_____	_____	_____

Practice Tip

Be alert to large credits claimed by customers (especially close to the balance-sheet date). These credits may represent goods which were never shipped.

[A]	4. For positive confirmation requests to which no reply was received, accounts which declined to provide confirmation information and accounts which the client requested not be confirmed:			
	a. Test balances subsequently paid to remittance advices which identify the specific invoices paid.	_____	_____	_____
	b. For balances on which no payment has yet been received, examine customer's purchase orders, related invoices and shipping documents.	_____	_____	_____
	c. Establish the existence of the customer by reference to such sources as Dun and Bradstreet Reference Book.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
[A]	5. If accounts receivable were confirmed as of a date other than the balance-sheet date, obtain an analysis of transactions between the confirmation and balance-sheet dates, trace amounts to books of original entry, and review the analysis and books for significant unusual entries.	_____	_____	_____
	6. Summarize the results of the confirmation procedures.	_____	_____	_____
A B C	7. Obtain or prepare an analysis of notes receivable including the following information:			
	a. Maker	_____	_____	_____
	b. Date made/date due	_____	_____	_____
	c. Original terms of repayment	_____	_____	_____
	d. Collateral, if any	_____	_____	_____
	e. Interest rate	_____	_____	_____
	f. Balance at the end of last period	_____	_____	_____
	g. Principal—additions, payments	_____	_____	_____
	h. Interest income—at the end of the preceding period, earned during the current period, received during the current period, and accrued at the end of the current period.	_____	_____	_____
A B C	8. Foot schedule and trace totals to applicable general ledger accounts.	_____	_____	_____
A B C	9. Physically inspect all notes in possession of the client.	_____	_____	_____
A B C	10. As deemed necessary, request positive confirmation of the terms and balances of notes with makers (as of the balance-sheet date or other date). Investigate any differences.	_____	_____	_____
A B C	11. Confirm notes out for collection with collection agents as deemed necessary.	_____	_____	_____
A B C	12. Examine evidence of periodic or subsequent payments on notes not responding to confirmation requests.	_____	_____	_____
A B C	13. Reconcile any confirmation exceptions received.	_____	_____	_____
A B C	14. Inspect notes for collateral, if any, making sure that items were not included in corresponding asset accounts of the company.	_____	_____	_____
A B C	15. Recompute interest income, accrued interest and unearned discount; trace interest collections, if any, to the cash receipts journal. Ascertain that computations of interest and recognition of interest income is in conformity with APB Opinion No. 21. (AC I69)	_____	_____	_____
A B [D]	16. Ascertain whether any accounts or notes have been assigned, pledged, guaranteed, sold or discounted by reference to minutes, review of agreements, confirmation with banks, etc.	_____	_____	_____
A [D]	17. Ascertain whether any accounts or notes receivable are owed by employees or related parties such as officers, directors, shareholders and affiliates, and:			
	a. Obtain an understanding of the business purpose for the transactions which resulted in balances.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Ascertain that transactions were properly authorized.	_____	_____	_____
c. Obtain positive confirmations of the balances (as the balance-sheet date or some other date) except for intercompany accounts with affiliated companies which the firm is concurrently examining.	_____	_____	_____
d. Determine if any notes repaid prior to the balance-sheet date have since been renewed.	_____	_____	_____
A B C [D] 18. Obtain or prepare an analysis of the allowance for doubtful accounts for the period, and:			
a. Review accounts written off during the period and determine that significant write-offs have been properly authorized. Examine supporting documentation, including correspondence with the customer. (Such correspondence may indicate a broader problem.)	_____	_____	_____
b. Review adequacy of the allowance and related provision:			
(1) Review the aged trial balance as of the balance-sheet date with the client's credit manager or other responsible individual to identify accounts of a doubtful nature and allowances required; review correspondence files and other relevant data in support of client's representations. Items reviewed should include past due amounts and significant amounts whether or not past due.	_____	_____	_____
(2) Examine credit reports for delinquent and large accounts.	_____	_____	_____
(3) Review confirmation exceptions for indication of amounts in dispute.	_____	_____	_____
(4) Consider whether accounts receivable that have been connected to notes receivable pose any unusual credit risk.	_____	_____	_____
c. Identify differences, if any, between the book and tax basis for the allowance for doubtful accounts and related expense provision; summarize information required for determining income taxes currently payable and deferred.	_____	_____	_____
d. Review revenue, receivable and cash receipts transactions after the balance-sheet date including discounts taken, credits allowed, and write-offs for unusual transactions (especially concerning past-due balances and large accounts).	_____	_____	_____
A 19. Summarize the results of the procedures above and evaluate the adequacy of the allowance for doubtful accounts.	_____	_____	_____
D 20. Determine that accounts and notes receivable have been properly classified between current and noncurrent.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
D	21. Determine that the following are properly presented and/or disclosed in the financial statements:			
	a. Related party receivables.	_____	_____	_____
	b. Significant credit balances that should be reclassified.	_____	_____	_____
A C	22. To determine if receivables are recorded in the proper period, test the sales cutoff as follows:			
	a. Trace _____ entries in the sales journal for _____ days before and after the balance-sheet date to shipping documents. Based on the information provided by the shipping documents, determine whether the sales/receivables were recorded in the proper period.	_____	_____	_____
	b. Trace _____ shipping documents for _____ days before and after the balance-sheet date to the sales journal. Based on the information provided by the shipping documents, determine whether the sales/receivables were recorded in the proper period.	_____	_____	_____
D	23. In accordance with FASB Statement No. 107, <i>Disclosures about Fair Value of Financial Instruments</i> , as amended (AC F25), obtain information about the fair value of notes receivable, and perform the following:			
<hr/> Note: Disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 are optional for nonpublic entities that meet certain criteria (see FASB Statement No. 126). Determine if the client is making FASB Statement No. 107 disclosures. <hr/>				
	a. Determine that the fair value amounts are determined in accordance with FASB Statement No. 107, as amended (AC F25).	_____	_____	_____
	b. Determine that the valuation principles are being consistently applied.	_____	_____	_____
	c. Determine that the fair value amounts are supported by the underlying documentation.	_____	_____	_____
	d. Determine that the method of estimation and significant assumptions used are properly disclosed.	_____	_____	_____

Practice Tip

Normally, the carrying amount of receivables will approximate their fair values. However, factors such as extended payment terms, creditworthiness, and interest rates significantly different from market rates may lead to situations where the carrying amount of the receivables does not approximate their fair value. See FASB Statement No. 107, as amended (AC F25) and Auditing Interpretation No. 1 of SAS No. 57, *Auditing Accounting Estimates*, titled "Performance and Reporting Guidance Related to Fair Value Disclosures (AU section 9342.01-.10)," for further guidance.

- | | |
|---|--|
| A | 24. For accounts and notes receivable with terms exceeding one year, if it is probable that all of the amounts due will not be collected |
|---|--|

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
according to their contractual terms, determine that impairment of those receivables has been measured by one of the following methods:			
a. The present value of expected future cash flows discounted at the loan's effective interest rate.	_____	_____	_____
Or			
b. The receivable's observable market price.	_____	_____	_____
Or			
c. The fair value of the collateral if the receivable is collateral dependent.	_____	_____	_____
<hr/> Note: See FASB Statement No. 114, <i>Accounting by Creditors for Impairment of a Loan</i> , and FASB Statement No. 118, <i>Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures</i> (AC I08), for further guidance. <hr/>			

D. Receivables Sold (Transferred) With Recourse

1. Determine that the proceeds received from the transfer of receivables with recourse have been recognized as a sale, if all of the following conditions are met:
 - a. The receivables have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.
 - b. Each transferee (or, if the transferee is a qualifying special purpose entity (QSPE), each holder of its beneficial interests) has the right to pledge or exchange the assets (or beneficial interests) it received, and no condition both constrains the transferee (or holder) from taking advantage of its right to pledge or exchange and provides more than a trivial benefit to the transferor.
 - c. The transferor does not maintain effective control over the transferred assets through either an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or the ability to unilaterally cause the holder to return specific assets, other than through a cleanup call.
2. Determine that the proceeds received from the transfer of receivables with recourse that do not meet the aforementioned conditions of a sale have been accounted for as a secured borrowing with a pledge of collateral.
3. Upon completion of any transfer of financial assets, determine that the transferor has:
 - a. Continued to carry in its statement of financial position any retained interest in the transferred assets, including, if applicable, servicing assets, beneficial interests in assets transferred

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
to a qualifying special-purpose entity in a securitization, and retained undivided interests.	_____	_____	_____
b. Allocated the previous carrying amount between the assets sold, if any, and the retained interests, if any, based on their relative fair values at the date of transfer.	_____	_____	_____
4. Upon completion of a transfer of assets that satisfies the conditions to be accounted for as a sale (see step 1 above), determine that the transferor has:			
a. Derecognized all assets sold.	_____	_____	_____
b. Recognized all assets obtained and liabilities incurred in consideration as proceeds of the sale, including cash, put or call options held or written (e.g., guarantee or recourse obligations), forward commitments (e.g., commitments to deliver additional receivables during the revolving periods of some securitizations), swaps (e.g., provisions that convert interest rates from fixed to variable), and servicing liabilities, if applicable.	_____	_____	_____
c. Initially measured at fair value assets obtained and liabilities incurred in a sale or, if it is not practicable to estimate the fair value of an asset or a liability, applied alternative measures.	_____	_____	_____
d. Recognized in earnings any gain or loss on the sale.	_____	_____	_____

E. Additional Procedures (if any)

F. Section Completion

- Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for receivables, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for receivables.
- The objectives of this audit program have been met.

_____	_____	_____

Ref.**VI. Inventories****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Inventory exists—To determine that the inventory exists and is the client's property. (Assertions 1 and 3)
- B. Quantity and condition—To determine that the client has taken reasonable care in determining the physical quantities and identifying the condition (normal, slow moving, obsolete) of its inventory. (Assertions 2 and 4)
- C. Clerical accuracy—To determine that the inventories are summarized and priced with clerical accuracy, and the records have been adjusted to the physical inventory. (Assertions 2 and 4)
- D. GAAP conformity—To determine that inventory classifications and carrying amounts are determined and presented in the financial statements in conformity with generally accepted accounting principles consistently applied (for example, assumptions about the cost flow, such as FIFO and LIFO, and lower of cost or market considerations). (Assertion 5)
- E. Encumbrances identified—To determine that any encumbrances such as pledges or liens are identified and adequately disclosed in the financial statements. (Assertion 3, 4, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
a. Preliminary analytical review	_____	_____	_____
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. Assessment of risk of material misstatement	_____	_____	_____
d. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____

Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.

A B B. Substantive Analytical Procedures

D	1. Compare inventory balances with expected amounts and investigate any significant deviations from the expected amounts.	_____	_____	_____
	2. Compare inventory classifications (i.e., raw materials, work in process, finished goods) as a percentage of total inventory with the preceding year's percentages (adjusted for expected changes) and investigate any significant fluctuations.	_____	_____	_____
	3. Compute gross margin and compare with expected gross margin. Investigate any significant fluctuation.	_____	_____	_____
	4. Compute gross margin by product line or division and compare with expected gross margins. Investigate any significant fluctuations.	_____	_____	_____
	5. Compute inventory turnover and compare with expected turnover. Investigate any significant fluctuation.	_____	_____	_____
	6. Compute inventory turnover by major product or division and compare with expected turnover. Investigate any significant fluctuations.	_____	_____	_____

C. Detailed Tests—General

1. Identify the locations of the physical inventories and their relative materiality by location.	_____	_____	_____
2. Review the client's plans and instructions for taking the physical inventory and accumulating, pricing, and summarizing the results. Also review the client's plans for controlling tags and count sheets, identifying obsolete items, identifying and handling			

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
consigned and customer's goods, and for controlling the movement of inventory during the count and controlling shipping and receiving during the count.	_____	_____	_____
3. Determine whether involvement of specialists is required. If a specialist is to be involved, review and evaluate the professional qualifications and reputation of the specialist; obtain an understanding of the nature of the work to be performed by the specialist.	_____	_____	_____
A B C D E 4. For significant amounts of inventory stored at outside locations, consider performing the following procedures:			
a. Review and test the owner's control procedures for investigating the warehouseman and evaluating the warehouseman's performance.	_____	_____	_____
b. Obtain an independent auditor's report on the warehouseman's system of internal accounting control relevant to custody of goods and, if applicable, pledging of receipts, or apply alternative procedures at the warehouse to gain reasonable assurance that the information received from the warehouseman is reliable.	_____	_____	_____
c. Observe physical counts of the goods, if practicable and reasonable.	_____	_____	_____
d. If warehouse receipts have been pledged as collateral, confirm with lenders pertinent details of the pledged receipts (on a test basis, if appropriate).	_____	_____	_____
e. Confirm goods out on consignment or at outside warehouses.	_____	_____	_____
[B] [C] [D] [E] 5. Discuss with the client and assess the impact of any changes in accounting policies regarding inventory, such as the manner in which costs are accumulated and the pricing methods used.	_____	_____	_____

D. Before Observation of the Physical Inventory

Note: Some auditing procedures may serve to accomplish the purpose of both tests of controls and substantive tests. Certain steps that are listed here as illustrative substantive tests are also listed among illustrative tests of controls for inventory. They are listed as tests of controls because they may serve to clarify and confirm the auditor's understanding of internal control for inventory and cost of sales.

- | | | | | |
|------------|---|-------|-------|-------|
| 1. | Tour the client's manufacturing or production facilities with a member of the client's organization familiar with production. | _____ | _____ | _____ |
| A B [D] 2. | On a test basis, select transactions for additions and deletions of inventory from such sources as receiving reports, requisitions to place materials into production, and shipping advices. Note the reference or control number, date, description, quantity, and dollar amount for each transaction selected. Trace the transactions to the perpetual inventory record and the cost accounting records, if any, used to determine unit or job costs. Perform similar | | | |

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	tests selecting the transactions from the perpetual inventory records and/or cost accounting records and trace the transactions to receiving reports, requisitions, and shipping advices.	_____	_____	_____
	Note: This test may be coordinated with tests of controls for purchases, payables, and disbursements, and for revenues, receivables, and receipts.			
D	3. Obtain an analysis of overhead costs charged to inventories and over- and under-absorbed overhead. Review the amounts included in the overhead pool for propriety and perform the following:			
	a. Determine that overhead costs are being charged to inventory in accordance with an appropriate policy (for example, as a percent of direct labor).	_____	_____	_____
	b. Identify disposition of variances, if any, between actual overhead costs incurred and overhead costs applied to production and inventory. Determine that variances are reasonable. Determine that no excessive costs for idle plant are being charged to inventory.	_____	_____	_____
C D	4. If a job order cost system is used, obtain the job order ledger (or tabulation), select a period(s) and perform the following:			
	a. Trace total costs incurred to the voucher register (or cash disbursements journal), the payroll distribution, and support for overhead applied.	_____	_____	_____
	b. Test the footings of the job order ledger by refooting the detail for selected subtotals and refooting the subtotals.	_____	_____	_____
	c. Select ____ job orders for jobs in process and completed jobs and perform the following:			
	(1) Examine authorization for the job order.	_____	_____	_____
	(2) Trace materials used on a test basis at various times since inception of the job order to such supporting details as requisitions, purchase orders, receiving reports, and processed invoices. (Consider coordination with tests of controls for purchases.)	_____	_____	_____
	(3) Trace direct labor costs to account distributions of the payroll registers and on a test basis to individual time reports or time cards. (Consider coordination with tests of controls for payroll.)	_____	_____	_____
	(4) Trace application of overhead costs to analyses used to accumulate overhead costs; test computations and review for reasonableness.	_____	_____	_____
	(5) Identify the status of the job (work in process, finished goods, or goods shipped) and trace through necessary			

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	summarization to the applicable general ledger account. Obtain explanation for any unreasonable time lag between completion and shipping dates for job orders performed for specific customers.	_____	_____	_____
C D	5. For process cost systems, obtain the cost of production reports for each department within the production process for a selected period(s) and:			
	a. Trace quantities and dollar amounts for units received for selected departments to the quantities and dollar amount transferred out per the preceding department in the sequence of production.	_____	_____	_____
	b. For each selected department, review the computations of total and unit costs for production transferred to the next department; on a test basis recompute unit costs and ascertain that costs for units lost in process are properly reallocated to surviving units.	_____	_____	_____
	c. Trace material costs charged to the selected departments to appropriate journals and on a test basis to individual requisitions.	_____	_____	_____
	d. Trace labor costs incurred to account distribution analyses of the payroll registers.	_____	_____	_____
	e. Review the allocation of overhead.	_____	_____	_____
	E. Observation of the Physical Inventory			
	1. Tour the premises on arrival and ascertain whether the inventory arrangement is conducive to a satisfactory count; if the arrangement appears obviously unsatisfactory, recommend rearrangement.	_____	_____	_____
A	2. Ascertain that items on hand which are not the property of the client are clearly identified, segregated, and excluded from the count. Note such references as descriptions, quantities, serial numbers, and shipping advice numbers so that in subsequent tests of inventory summarization the auditor may determine whether the items were excluded from the physical count.	_____	_____	_____
[A]	3. Visit the shipping and receiving departments and record the control numbers for the last shipping advice and receiving report prepared prior to the physical count for subsequent tracing to accounting department records. Consider recording a few additional shipping advice and receiving report numbers for subsequent tracing.	_____	_____	_____
A B	4. Ascertain that receiving and shipping departments are informed that receipts after and shipments before the inventory cut-off are to be excluded from the count. Ascertain that receiving reports for items not included in the count are prominently marked "after inventory."	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
B	5. Observe and note client's provision for segregation and/or clear identification of slow-moving, obsolete and/or damaged items; also be alert for such items among regular stock and if present, bring to the client's attention and note for subsequent consideration.	_____	_____	_____
[A] [B]	6. Inspect representative items of inventory and ascertain the source of their identification, description, status (work in process, finished goods, etc.), basis for count or measure (volume, weight, item tally, etc.). Inquire of both production personnel and personnel involved in the count about such items.	_____	_____	_____
[A] [B]	7. Observe and ascertain that the client's inventory instructions and procedures are being followed.	_____	_____	_____
[A] [B]	8. Ascertain that prenumbered inventory tickets on count sheets are properly controlled including:			
	a. Accounting for all tickets or sheets issued to count personnel.	_____	_____	_____
	b. Accounting for return of all tickets or sheets issued including those unused and spoiled as well as those used, at completion of the inventory.	_____	_____	_____
	c. Note series of tickets or count sheet numbers used and those unused or spoiled for subsequent tracing in tests of summarization.	_____	_____	_____
[A] [B]	9. Observe the count process and make test counts ascertaining that the identifications, descriptions, and quantities are being properly noted on the inventory tickets or count sheets. If inventory count sheets are used, select some items from the floor, make test counts and trace them to the sheets; select some entries from the sheets (include some items of greater dollar value) and trace them to items on the floor.	_____	_____	_____
[C]	10. Prepare a worksheet listing some items (include some items of greater dollar value) test counted, for subsequent tracing into the client's inventory summarization. Include on the worksheet for each item the inventory ticket or count sheet number, location, description, quantity per client, quantity per your test count, and other particulars essential for subsequent tracing to the inventory summarization. Bring test count differences to the client's attention during the count so they may be resolved in a timely manner. If test count differences are not isolated, it may be necessary to request a recount of a particular area or department.	_____	_____	_____
B C	11. Observe that all items of inventory are clearly ticketed or marked when counted to avoid omissions and/or duplications of counts.	_____	_____	_____
B C	12. Observe whether any items are not being counted and obtain an adequate explanation for their omission.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B	13. Note any movement of inventory during the count; obtain an explanation for the movement and record details from the applicable authorizing documents for consideration in review of the cut off.	_____	_____	_____
	14. Prepare a memorandum on the observation of the physical inventory including:			
	a. Comment on the physical inventory arrangements.	_____	_____	_____
	b. Implementation of the client's inventory instructions.	_____	_____	_____
F. Summarization—Physical Quantities				
A B C	1. Relate and trace information, noted during observations of the physical, about control number for count tickets or count sheets used, to the client's summarization of the physical for reasonable assurance that only tickets or sheets used for the physical are included in the summarization of quantities. (Summarization of quantities may consist of the quantities per the final priced inventory or an intermediate tabulation of count tickets. In some instances the original count sheets may provide for entry of prices, extensions, and summarization of dollar amounts.)	_____	_____	_____
B C	2. Trace test counts noted during the physical to the client's summarization of quantities.	_____	_____	_____
A	3. Trace quantities confirmed by third parties to the summarization of quantities.	_____	_____	_____
B C	4. Depending on the extent of the work in step 2 above and on internal control over inventory summarization, select quantities for particular items from the summarization and trace them to the count tickets or count sheets; select quantities for particular items from the count tickets or sheets and trace them to the summarization of quantities.	_____	_____	_____
A B C	5. If the client uses perpetual inventory records and the perpetuals are to be used to determine the year-end balance, trace items on a test basis to and from the physical inventory summaries; ascertain that the perpetuals were adjusted to the physical.	_____	_____	_____
B C	6. Trace notes made at the observation for slow moving, obsolete, and/or damaged items to the client's summarization of quantities and determine if they are clearly identified as such.	_____	_____	_____
B C	7. Test the cut-off information noted at the observation of the physical inventory as follows:			
	a. Select the last few shipping advices used before the count to the sales register; determine that the shipments were recorded as sales and charges to cost of sales as the dates shipped.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	b. Select a few shipping advices used after the count to the sales register and determine that the shipments were recorded as sales in the period after the date of the inventory.	_____	_____	_____
	c. Select the last few receiving reports used before the count and determine that the related liability was recorded prior to or as of the count date.	_____	_____	_____
B C	8. If the client uses a process cost system, trace selected quantities per the physical inventory to the departmental cost of production reports and determine that quantities have been adjusted to the physical inventory as of the date of the physical count.	_____	_____	_____

G. Prices and Summarization—Monetary Units

Note: Judgment should be used in determining which of the following steps should be used when testing the cost of inventory. Depending on the system used by the client to assign costs to their inventory items, certain steps may not be applicable.

D	1. Ascertain the methods followed concerning the flow of costs (FIFO, LIFO, moving average, etc.) and compare with working papers of the preceding year to ascertain whether the methods have been consistently applied.	_____	_____	_____
CD	2. Determine client's pricing method for raw materials and purchased finished goods per the final inventory summary and make a selection of items for price testing from the sampling population as follows: _____ _____ _____	_____	_____	_____
CD	3. Compare prices to vendor invoices or price lists. If client uses LIFO method, additional procedures for testing base prices and computations should be designed and performed. Determine that the method is consistent.	_____	_____	_____
CD	4. Perform price tests for all individually significant items of raw materials and purchased finished goods that were included in test counts.	_____	_____	_____
CD	5. Determine client's pricing method for work-in-process and finished goods per the final inventory summary and make a selection of items for price testing from the sampling population as follows: _____ _____ _____	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
C D	6. Trace unit costs of work-in-process and finished goods to the cost accounting records and perform the following:			
	<p>Note: Cost accounting records will differ depending upon the cost accounting system (e.g., process cost system, job order system, etc.). For the finished good item or work-in-process item selected for testing, cost accounting records should be obtained which present the various costs associated with the item selected.</p>			
	a. Agree raw material quantities used in producing the finished goods or work-in-process items to supporting documents, such as bills of material.	_____	_____	_____
	b. Agree the cost of raw materials used in producing the finished goods or work-in-process items to vendor invoices and the final inventory summary.	_____	_____	_____
	c. Agree labor used in producing the finished goods or work-in-process items to supporting documents, such as time cards.	_____	_____	_____
	d. Agree labor rates to payroll records.	_____	_____	_____
	e. Recalculate the client's overhead rate and ascertain the reasonableness of the assumptions and methods used.	_____	_____	_____
	f. Obtain and review trial balances or tabulations of detailed components of production costs incurred for the year (period) and compare with the equivalent for the preceding year (period).	_____	_____	_____
	(1) Obtain and note explanations for apparent inconsistencies in classification and significant fluctuations in amounts.	_____	_____	_____
	(2) Ascertain that the cost classifications accumulated as production costs and absorbed in inventory are in conformity with generally accepted accounting principles.	_____	_____	_____
	g. Review activity in the general ledger control accounts for raw materials, supplies, work in process, and finished goods inventories; investigate any significant unusual entries or fluctuations.	_____	_____	_____
	h. Review labor and overhead allocations to inventory and cost of sales; compare to actual labor and overhead costs incurred and ascertain that variances appear reasonable in amount and have been properly accounted for.	_____	_____	_____
C	7. Perform the following tests for clerical accuracy of the final summarized inventory:			
	a. Recompute extensions of quantities and unit costs on a test basis.	_____	_____	_____
	b. Refoot accumulation of dollar subtotals on a test basis.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	c. Refoot dollar subtotals to test total dollar amounts per the physical inventory listing for the major classifications (i.e., raw materials, work in process, finished goods, supplies, etc.).	_____	_____	_____
	d. Review the inventory listings for significant quantities and amounts that appear unusual.	_____	_____	_____
	e. Ascertain that the general ledger control accounts have been adjusted to include the findings of the physical inventory. (This may consist of tracing the totals per the physical to an analysis which supports journal entries, or an involved trail of tracing through the cost accounting records to the general ledger control accounts.)	_____	_____	_____
C	8. Review the pricing, extensions, and summarization of the physical inventory summary for items identified as slow-moving, damaged, and/or obsolete to ascertain that the items are carried at dollar amounts in conformity with the lower of cost or market principle:			
	a. Examine documentation for the proceeds of recent scrap or salvage sales.	_____	_____	_____
	b. Review client's criteria for considering items as slow-moving or obsolete and evaluate whether criteria appear reasonable and realistic. (For example, are a certain number of months used to determine when an item becomes slow-moving? Are predetermined quantities used to determine that quantities on hand are not in excess of reasonable economic need?)	_____	_____	_____
	H. Lower of Cost or Market Considerations			
B D	1. Determine whether adequate allowances have been recorded for obsolete and slow-moving inventory.	_____	_____	_____
C	2. On a test basis select items of raw materials and purchased finished goods inventory including some items with relatively significant carrying amounts (because of high unit costs or large quantities on hand) and:			
	a. Compare the inventory unit prices with prices per recent (prior to year end) vendors' invoices, vendor quotations, vendor price lists, and published market quotations.	_____	_____	_____
	b. Review purchase records and production requisitions for indications of whether items may be on hand in excess quantities, slow moving, or obsolete.	_____	_____	_____
[A] [B] C	3. On a test basis select items or classifications of finished goods and work-in-process inventories including some items with relatively significant carrying amounts (because of high unit costs or large quantities on hand) and:			
	a. Review and note current selling prices and quantities sold for the items or classifications by reference to recent sales			

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	invoices, customer orders, and published market quotations, and supplementary discussion with the client's marketing and sales executives.	_____	_____	_____
	b. Compare inventory carrying amounts and recent selling prices for the selected finished goods items or classifications noted in terms of current relationships of sales to gross profit, selling and shipping expenses; ascertain that the carrying amounts of the selected finished goods items are not in excess of net realizable value.	_____	_____	_____
	c. For the selected work-in-process items, ascertain their stage of completion and estimated cost to complete by reference to the cost accounting records, production reports, and inquiry of the client's production supervisors. Apply the estimated costs to complete to the selected work-in-process items and apply steps <i>a.</i> and <i>b.</i> above.	_____	_____	_____
	d. Compare quantities on hand for selected items with quantities noted per recent sales invoices and customer orders; be alert that quantities on hand are not in excess of the client's requirements.	_____	_____	_____
B D	4. Review the prior year working papers on obsolete inventory and compare to the current year's inventory summary and obsolete inventory listing. Determine the reasonableness of any changes in prior year valuations.	_____	_____	_____
B D	5. Based on the procedures performed, determine the results of the audit procedures as they relate to the inventory valuation.	_____	_____	_____
I. Other				
[A]	1. If the physical count was not taken as of the balance-sheet date, analyze and reconcile the balance per the physically counted inventory to inventory per the balance sheet:			
	a. Review and analyze the general ledger control accounts for inventory from the date counted to the balance-sheet date; trace additions to such sources as the purchase journal or voucher register, the cost accounting records, and charges to cost of sales.	_____	_____	_____
	b. Compare the current activity between the count date and balance-sheet date to activity of the equivalent period in the preceding year. Investigate unusual fluctuations.	_____	_____	_____
E	2. Determine whether any inventory is pledged as collateral or subject to any liens; coordinate with work on debt payable.	_____	_____	_____
D	3. Inspect open purchase order file at the balance-sheet date for significant commitments that should be considered for disclosure.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
D	4. Determine that any intercompany or interdepartmental profit in inventory is eliminated in consolidation.	_____	_____	_____

J. Additional Procedures (if any)

K. Section Completion

1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level risk for inventory, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for inventory.

2. The objectives of this audit program have been met.

This audit program section has been completed in accordance with firm policy.

VII. Property, Plant, and Equipment, and Related Depreciation

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Property exists—To determine that the property exists and is owned by the entity. (Assertion 1)
- B. Additions appropriate—To determine that additions to property are authentic, recorded at cost, and properly distinguished from maintenance and repairs expense. (Assertions 1, 2, and 3)
- C. Retirements recorded—To determine that retirements of property together with the proceeds from salvage and related cost to remove are properly recognized. (Assertions 1, 2, and 4)
- D. Depreciation appropriate—To determine that a proper amount of depreciation expense is allocated to the period based on the asset cost, estimated life and salvage, and use of acceptable methods consistently applied, and adequately presented in the financial statements. (Assertions 4 and 5)
- E. Recoverable value—To determine that the net carrying value as presented in the financial statements is expected to be recoverable through the ordinary course of business. (Assertion 4)
- F. Encumbrances identified—To determine that any encumbrances and liens are identified and adequately disclosed in the financial statements. (Assertion 5)
- G. Proper classification—To determine that significant amounts of idle property, plant, and equipment are properly stated, classified and described. (Assertion 5)
- H. Proper disclosure—To determine that significant amounts of fully depreciated assets are considered for disclosure. (Assertion 5)

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
<p>Note: The letters preceding each of the above audit objectives serve as identification codes. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.</p>				
Procedures:				
A. Preliminary Procedures				
	1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
	a. Preliminary analytical review	_____	_____	_____
	b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
	c. Assessment of risk of material misstatement	_____	_____	_____
	d. Other planning documents and risk assessments	_____	_____	_____
	2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>				
B. Substantive Analytical Procedures				
A B C D E	1. Compare balances in fixed assets, capitalized leased assets, accumulated depreciation, accumulated amortization, depreciation, repairs and maintenance, rents, supplies, and similar expense accounts with expected amounts. Investigate significant deviations from expected amounts.	_____	_____	_____
[A] [B] [C] [D] [E]	2. Compute the following ratios to help conclude upon the reasonableness of fixed asset balances. Investigate any unusual ratio results.	_____	_____	_____
	a. Fixed assets divided by total assets (indication of nonearning asset trend).	_____	_____	_____
	b. Fixed assets divided by equity (indication of funding source for fixed assets).	_____	_____	_____
C. Detailed Tests				
	1. Obtain (or update) an understanding of the client's policies concerning capitalization of assets and related depreciation methods and depreciable lives.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	2. Consider a tour of the client's facilities for new staff assigned to the engagement, or for the entire audit team if significant changes have occurred.	_____	_____	_____
	3. Consider the extent to which it may be practicable to perform substantive tests prior to the balance-sheet date.	_____	_____	_____
[A] [B] [C] [D]	4. Obtain or prepare the following schedules:			
	a. Summary schedule of property, plant and equipment, and related depreciation (by major asset classification) including the following:			
	(1) Beginning and ending asset balances at cost.	_____	_____	_____
	(2) Asset additions at cost.	_____	_____	_____
	(3) Asset retirements and dispositions.	_____	_____	_____
	(4) Other changes.	_____	_____	_____
	(5) Depreciation method and life.	_____	_____	_____
	(6) Beginning and ending balances of the allowances for depreciation.	_____	_____	_____
	(7) Additions to the allowances for depreciation accompanied by an analysis of amounts expensed, absorbed in inventory, and capitalized.	_____	_____	_____
	(8) Reductions of the allowances for depreciation for retirements and dispositions.	_____	_____	_____
	b. Additions at cost showing the description, date acquired, transaction reference (purchase order number, check number, work order number, etc.), estimated useful life, and cost for all additions of \$_____ or over.	_____	_____	_____
	c. Retirements and dispositions showing the description, date of acquisition, date of retirement or disposition, cost, accumulated depreciation, net carrying value, proceeds of disposition, and gain or loss on disposition.	_____	_____	_____
	d. Analysis of maintenance expense showing each transaction of \$_____ or greater (or all transactions) for the year or period.	_____	_____	_____
[A] [B] [C]	5. Trace opening balances per the summary schedules to closing balances per the prior year's working papers.	_____	_____	_____
B C	6. Trace amounts per the summary schedule to the general ledger, the detailed asset records, and to the schedules of additions, and retirements and dispositions; recompute the footings and cross-footings of the schedules.	_____	_____	_____
A B [C] F	7. Perform the following tests of selected additions:			
	a. Determine the addition has been authorized by reference to such sources as minutes of the meetings of the Board of Directors or Finance Committee and/or capital asset budgets reviewed by the Board of Directors or Finance Committee or by evidence of approval by appropriate, responsible personnel, in accordance with prescribed policies.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Examine such supporting documents as purchase contracts, paid checks, vendors' invoices, purchase orders, receiving reports, work orders, engineers' reports, etc.	_____	_____	_____
c. Trace transactions to appropriate entries in the detailed records.	_____	_____	_____
d. For construction in progress examine supporting work orders, documentation in support of costs incurred such as contractors' invoices, reports and correspondence from engineers and/or architects regarding completion and trace transfers from the construction in progress accounts to other property accounts.	_____	_____	_____
e. Physically inspect selected (or all) major additions.	_____	_____	_____
f. Inquire about related dispositions.	_____	_____	_____
g. Determine whether additions conform with the company's capitalization policy.	_____	_____	_____
h. Determine that installment purchases, if any, are properly recorded.	_____	_____	_____
i. By reference to purchase contracts and contractors billings identify related liabilities to be recorded in connection with debt or other payables.	_____	_____	_____
j. Examine deeds and title insurance policies, as necessary.	_____	_____	_____
k. Review insurance policies, coinsurance clauses and coverage limits versus replacement costs, as necessary.	_____	_____	_____
l. Identify any indications of employees' involvement in ownership or sales interest in the asset. Ascertain the propriety of any identified employee involvement.	_____	_____	_____
A C [D] 8. Perform the following tests of dispositions:			
a. Determine disposition has been properly authorized.	_____	_____	_____
b. Examine such supporting documents as bills of sale, contracts, delivery memoranda, etc.	_____	_____	_____
c. Trace retirements to the detailed property records.	_____	_____	_____
d. Determine that deductions from the asset accounts and related accumulated depreciation are correct.	_____	_____	_____
e. Determine that gain or loss on disposition has been correctly classified and recorded.	_____	_____	_____
A C G H 9. For fully depreciated assets, determine whether the assets are still used and not retired from service. Determine whether disclosure in the financial statements is necessary.	_____	_____	_____
A C G H 10. Determine that assets retired from service, if material, have been removed from the property, plant, equipment accounts and related accumulated depreciation accounts, and are carried at amounts which are not in excess of realizable value.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
D [E]	11. Review provisions for depreciation and amortization, and:			
	a. Determine whether the methods and depreciable lives used in the current year are consistent with the preceding year and are reasonable.	_____	_____	_____
	b. Perform a reasonableness test of depreciation and amortization by using average rates and lives and one-half year for additions and disposals.	_____	_____	_____
	c. Test computations of depreciation and amortization. Consider deleting this step if step <i>b</i> results are acceptable.	_____	_____	_____
	d. Determine that amounts of depreciation capitalized in construction in progress are reasonable and appropriate.	_____	_____	_____
	e. Ascertain that obsolescence, if any, is being properly recognized by adjustments of depreciable lives.	_____	_____	_____
	f. Trace additions to the depreciation allowance to the applicable general ledger expense accounts.	_____	_____	_____
DEGH	12. Based on all of the procedures performed above, ascertain the reasonableness of the remaining useful lives of assets and ascertain the recoverability of the net carrying values of the client's fixed assets.	_____	_____	_____
B	13. Review maintenance and repairs expense, supplies, small tools and other appropriate accounts for any assets that should be capitalized.	_____	_____	_____
EH	14. Determine the investment credit and recapture on disposals. Summarize for tax return and provision computation.	_____	_____	_____
H	15. Determine the carrying amount of assets pledged on notes or other indebtedness for possible financial statement disclosure.	_____	_____	_____
H	16. Inquire as to any significant expansion plans and determine any need for disclosure.	_____	_____	_____
H	17. Review rental income and expense accounts to determine leased and subleased assets.	_____	_____	_____
ADEGH	18. In accordance with FASB Statement No. 144 (AC I08), if any events or changes in circumstances have occurred indicating that the carrying amount of a long-lived asset may not be recoverable:			
	a. Determine if an impairment loss should be recognized. [An impairment loss should be recognized if the carrying amount of a long-lived asset is not recoverable and exceeds its fair value. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset.]	_____	_____	_____
	(1) Review the estimate of future cash flows for mathematical accuracy and, through discussion with management and review of any supporting documentation, determine whether assumptions used are reasonable.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b.	If an impairment loss should be recognized, test the calculation of the loss. [The impairment loss is measured as the amount by which the carrying amount of an asset exceeds its fair value.]	_____	_____	_____
(1)	Test the fair value calculation by vouching to quoted market prices in active markets or by reviewing the valuation technique used.	_____	_____	_____
(2)	If the fair value is based on the present value of estimated future cash flows, test for mathematical accuracy and ensure that the assumptions used in the present value calculation, including the discount rate, are reasonable.	_____	_____	_____
D. Leases				
A E	1. Review the permanent file to determine whether updated copies of lease agreements and other data of continuing application are included and that changes made during the year are appropriately noted.	_____	_____	_____
A B D F H	2. Examine new lease agreements and significant amendments to existing lease agreements to determine whether they are accounted for in accordance with the appropriate accounting standards (properly capitalized, appropriate depreciation, etc.), determine whether they are in accordance with established policies and procedures and document the conclusions in the permanent file.	_____	_____	_____
A F	3. Consider the advisability of obtaining from the lessor confirmation of compliance with restrictive covenants and other pertinent details of significant lease agreements.	_____	_____	_____

Practice Tip

Items to be considered for leases:

- Facilities.
- Authorization and approval of terms.
- Parties.
- Location and description of premises.
- Period covered.
- Rentals.
- Contingent payments and escalator clauses.
- Payment of ownership expenses.
- Restrictions.
- Options and renewal provisions.
- Methods and terms of cancellation.
- Subleases.
- Nature and amount of related guarantees made or obligations assumed.
- Other contractual arrangements which have the economic characteristics of a lease.
- Investment tax credit.
- Criteria for lease capitalization as set forth in appropriate accounting standards.

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B C D E F G H	4. Obtain an analysis of capitalized lease obligations, including related lease rights and interest, and:			
	a. Compare beginning balances to prior period audit work papers.	_____	_____	_____
	b. Test the clerical accuracy of the analysis.	_____	_____	_____
	c. Compare balances to the general ledger accounts.	_____	_____	_____
	d. Review the general ledger accounts for the period, investigate unusual entries, and document the results of such investigation.	_____	_____	_____
	e. Examine the lease agreements to verify the terms used in the computations.	_____	_____	_____
	f. Test payments and examine other supporting data, where appropriate.	_____	_____	_____
	g. Test the computations of current maturities.	_____	_____	_____
	h. Determine whether the accounting method for lease cancellations has been applied in accordance with applicable accounting standards and that the method has been consistently applied.	_____	_____	_____
	i. Test new leases or significant changes to existing leases as follows:			
	(1) Determine whether the accounting method has been applied in accordance with GAAP and that the method has been consistently applied.	_____	_____	_____
	(2) Review the reasonableness of the interest rate used to discount the lease obligation. Consider the following:			
	(a) Interest rates implicit in the lease terms.	_____	_____	_____
	(b) Interest rates applicable to the financing of purchases of similar property by the lessee at the times of entering into the lease agreements.	_____	_____	_____
	(c) Fair value of the leased property as compared to the discounted amount of the lease obligation.	_____	_____	_____
	(3) Determine whether proper consideration was given to noncapitalizable costs (such as taxes, insurance, maintenance) in computing the amount of lease cost capitalized.	_____	_____	_____
	(4) Review the reasonableness of the method and period for amortization of capitalized lease rights.	_____	_____	_____
A B C D E F G H	5. Select work paper formats that will facilitate grouping information regarding operating leases that may require disclosure in the financial statements and:			
	a. Obtain the appropriate analyses above and proceed as follows:			
	(1) Compare pertinent information to the lease agreements.	_____	_____	_____
	(2) Test the clerical accuracy of the analyses.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
(3) Determine whether the calculations have been made in accordance with the lease agreements.	_____	_____	_____
(4) Compare prepaid and accrued rentals and rental expenses to the respective general ledger accounts.	_____	_____	_____
(5) Review the general ledger accounts for the period, investigate unusual entries and document the results of such investigation.	_____	_____	_____
(6) Test the computations of minimum rental commitments applicable to succeeding periods.	_____	_____	_____

Practice Tip

Refer to the applicable accounting standards for a description of disclosure information, such as, rental expenses, minimum future rental payments, noncancelable sublease rentals to be received in the future, contingent rentals, sublease rentals, and general description of leasing arrangements.

b. Review lease agreement covenants that relate to limitations and default provisions as follows:			
(1) Review the client's correspondence file for information related to leases, such as modifications, waivers and notification of significant events.	_____	_____	_____
(2) Review confirmation replies for notations of known matters of noncompliance.	_____	_____	_____
(3) Cross-reference factors entering into the computations and compute amounts.	_____	_____	_____
(4) If a default appears to exist with respect to any lease agreement, determine its effect on such agreement, other agreements, the financial statements and our report thereon.	_____	_____	_____
c. Gather and document information for financial statement disclosure and tax return preparation.	_____	_____	_____
d. Consider and compute any capitalized interest.	_____	_____	_____

Practice Tip

Consider preparing a schedule for inclusion in the permanent file that sets forth, by section and paragraph number, the limitations and each computation or item involved in the determination of whether the client is in compliance with lease covenants.

E. Additional Procedures (if any)

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
F. Section Completion			
1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for property, plant, and equipment, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for property, plant, and equipment.	_____	_____	_____
2. The objectives of this audit program have been met.	_____	_____	_____
This audit program section has been completed in accordance with firm policy.			
Done by _____	_____	_____	_____
Reviewed by _____	_____	_____	_____

The material included in this section is presented for illustrative purposes only. The illustrative audit objectives and illustrative audit procedures are neither all-inclusive nor are they prescribed minimums. The illustrative audit procedures are numbered merely to organize the materials; those numbers are not intended to imply completeness or a prescribed sequence. The nature, extent and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the specific facts and circumstances.

VIII. Prepaid Expenses, Deferred Charges, Intangibles, and Other Assets

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Properly recorded—To determine that the balances represent costs which are properly allocable to future periods in conformity with generally accepted accounting principles. (Assertions 1, 2, 3, and 4)
- B. Additions supported—To determine that additions are adequately supported. (Assertions 1, 2, 3, and 5)
- C. Amortization appropriate—To determine that amortization is determined by a rational and systematic method consistently applied. (Assertions 4 and 5)
- D. Impairment recognized—To determine that any permanent impairment of balance is recognized by write-downs charged to operations. (Assertions 1, 2, 4, and 5)
- E. Proper classification—To determine that balances and related expenses are properly described and classified in the financial statements. (Assertion 5)
- F. Contingencies disclosed—To determine whether there are uninsured risks that should be considered for disclosure. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
Procedures:			
A. Preliminary Procedures			
1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
a. Preliminary analytical review	_____	_____	_____
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. Assessment of risk of material misstatement	_____	_____	_____
d. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.			
B. Substantive Analytical Procedures			
A B C D 1. Compare balances in prepaid expense, deferred charges, intangibles, other assets, and accumulated amortization accounts to the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
C. Detailed Tests			
A B C E 1. Obtain or prepare an analysis for each significant classification of prepaid expenses, deferred charges, other assets or intangibles. The analysis should include adequate description of significant components and the following:			
a. Balance at the beginning of the year (or period).	_____	_____	_____
b. Additions at cost.	_____	_____	_____
c. Deductions charged to expense, and to other accounts.	_____	_____	_____
d. Balance at the end of the year (or period).	_____	_____	_____
Practice Tip			
Ordinarily, extensive detailed schedules showing computations of prepaid balances or analyses of transactions for the period are not necessary, particularly in cases where the balances are not significant. A brief summary of limited reviews and comparisons of balances with prior period amounts or tests of the client's detailed records may be satisfactory.			
2. Foot analysis and trace totals to general ledger; trace opening balance to the audit working papers for the preceding year (or period).	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B [C] D E	3. Examine supporting documents for material charges during the year.	_____	_____	_____
[A] C [D]	4. Review and recompute amortization; determine that the amortization period and method is reasonable.	_____	_____	_____
A C [D]	5. Determine that the carrying amount of the item does not exceed amounts properly allocable to future periods.	_____	_____	_____
C	6. Trace amounts amortized during the period to the related general ledger expense accounts.	_____	_____	_____
A	7. Confirm significant deposits and assets held by others.	_____	_____	_____
A F	8. For prepaid insurance accounts (including life insurance) with balances of \$_____ or more at _____, obtain or prepare a prepaid insurance schedule and agree prepaids and expense to the general ledger; perform the following additional tests:			
	a. Examine selected policies noting identity of insurer, descriptions and amounts of coverage, premiums, and period covered; compare particulars with the analysis.	_____	_____	_____
	b. Ascertain by review of the policy and related billing advices for the insurance premiums whether the premiums are being financed and/or the policy or cash surrender value has been pledged; determine that related liabilities and finance cost have been properly recorded.	_____	_____	_____
	c. Obtain confirmation of cash surrender values; consider confirmation of policies especially if premium financing is involved to determine that payments are current and coverage is still in force.	_____	_____	_____
	d. Ascertain whether all significant insurable risks have been considered.	_____	_____	_____
	e. Recompute amortization and trace amounts to the applicable expense accounts.	_____	_____	_____

Practice Tip

Be alert to insurance confirmations indicating locations of inventory. Trace locations listed to inventory totals to determine all locations listed as covered by insurance have been included in the inventory summary.

	f. Vouch premiums of \$_____ or more to premium notices.	_____	_____	_____
	g. Ascertain propriety of accounting treatment for premium deposits and dividends.	_____	_____	_____
	h. Examine latest audit reports, when applicable, made by insurance companies.	_____	_____	_____
	i. For life insurance, reconcile prepaid premiums at beginning of period, premiums paid and increase in cash surrender value with life insurance expense.	_____	_____	_____
A	9. For property taxes, where significant, obtain or prepare an analysis which relates both repayments and accruals as of the beginning and end of the period with tax expense. Examine tax billings and determine whether the timing of the period covered by the			

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	tax and the payment due dates result in prepayment or an accrual as of the balance-sheet date. Trace charges to expense to the proper expense account.	_____	_____	_____
A D	10. Obtain a list of the detail of all suspense accounts and follow-up on the clearance of all items. (Note: suspense accounts should clear in one day). Investigate any large or unusual uncleared items.	_____	_____	_____
A B C	11. For intangible assets:			
	a. Trace authorization for major transactions to minutes of Board of Directors meetings.	_____	_____	_____
	b. Examine supporting documents.	_____	_____	_____
	c. Determine that acquired intangible assets are initially recognized and measured based on its fair value.	_____	_____	_____
	d. Determine that the costs of internally developing, maintaining, or restoring intangible assets that are not specifically identifiable, that have indeterminate lives, or that are inherent in a continuing business and related to an entity as a whole are expensed when incurred.	_____	_____	_____
	e. Determine that intangible assets with finite useful lives are amortized and intangible assets with indefinite useful lives are not amortized.	_____	_____	_____
	f. Ascertain whether amortization has been properly computed in conformity with FASB Statement No. 142, and trace charges to related expense accounts.	_____	_____	_____
	g. If events or changes in circumstances indicate that the carrying amount of an intangible asset that is subject to amortization may not be recoverable, determine that the intangible asset has been tested for recoverability.	_____	_____	_____
	h. For intangible assets not subject to amortization, determine that the asset is tested for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired.	_____	_____	_____
	i. Determine that any impairment losses are properly calculated (excess of carrying amount over fair value of the asset).	_____	_____	_____
A D	12. Determine that there has been no permanent impairment of value for prepaid expenses, deferred charges, intangible assets, etc.	_____	_____	_____
E	13. Determine that balances are properly classified in the balance sheet (current v. noncurrent, etc.)	_____	_____	_____
F	14. Determine that there have been no uninsured events which would affect the value of other assets.	_____	_____	_____
E	15. Determine whether deferred advertising costs are properly accounted for in accordance with SOP 93-7 and Practice Bulletin No. 13.	_____	_____	_____
E	16. Determine any required disclosures.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
-------------	--------------------	-------------	---------------------

D. Additional Procedures (if any)

E. Section Completion

1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for prepaid expenses, deferred charges, intangibles and other assets, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for those accounts.

2. The objectives of this audit program have been met.

This audit program section has been completed in accordance with firm policy.

Ref.**IX. Accounts Payable****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Payables exist—To determine that accounts payable represent authorized current obligations. (Assertions 1 and 2)
- B. Proper classification—To determine that amounts included in accounts payable are properly classified. (Assertion 5)
- C. Obligations complete—To determine that accounts payable include all significant current obligations. (Assertions 2, 3, and 4)
- D. Proper disclosure—To determine that adequate disclosure has been made of any pledged assets. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review
 - b. Internal control documentation, control risk assessment, and control test results
 - c. Assessment of risk of material misstatement
 - d. Other planning documents and risk assessments

2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
B. Substantive Analytical Procedures			
A B C 1. Compare balances in trade accounts payable and purchases with the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
C. Detailed Tests			
1. Were the following items considered:			
a. Whether to request positive confirmation from vendors and, if so, when and to what extent.	_____	_____	_____
<p>Note: Some auditors send confirmations to major vendors to obtain independent outside evidence that all liabilities have been recorded. Other auditors believe that evidential matter can be obtained more efficiently through other procedures.</p>			
b. Potential efficiencies to be gained from coordination of accounts payable work with substantive tests of inventory when the physical is taken at the balance-sheet date. (For example, tests of cut off, and using vouchers obtained from client's files in substantiating recent inventory prices as well as accounts payable work.)	_____	_____	_____
A B C D 2. Obtain or prepare a schedule of accounts payable (subsidiary ledger) as of the balance-sheet date.			
a. Foot schedule/subsidiary ledger and reconcile to the general ledger control account.	_____	_____	_____
b. Segregate amounts due to officers, employees, stockholders, affiliates and other related parties.	_____	_____	_____
c. Discuss with client old or disputed payables.	_____	_____	_____
d. Investigate debit balances and, if significant, consider requesting positive confirmations and propose reclassification of the amounts.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
e. Ascertain by review of minutes, agreements and by inquiry whether any assets are pledged to collateralize payables.	_____	_____	_____
f. Identify intercompany accounts and:			
(1) Arrange to have balances traced to corresponding receivables in the affiliate's books if affiliate is being currently audited by the firm.	_____	_____	_____
(2) Obtain confirmation from the affiliate.	_____	_____	_____
(3) Investigate and reconcile differences.	_____	_____	_____
A B C [D] 3. Consider confirmation procedures such as the following:			
a. Obtain and review a list of major vendors, or identify major vendors by reviewing voucher registers or subsidiary accounts payable records.	_____	_____	_____
b. Request vendors to provide a statement of the account balance as of the date selected (ordinarily, the physical inventory date and/or balance-sheet date).	_____	_____	_____
c. Investigate and reconcile differences.	_____	_____	_____

Practice Tip

Vendors should be instructed to mail confirmation replies directly to the auditor. The auditor should control the mailing of all confirmations.

A B [D]	4. Confirm balances due to officers and employees; ascertain business purpose of the transactions and, if significant, trace to authorization in the minutes of the Board of Directors meetings.	_____	_____	_____
A C	5. Test selected unconfirmed balances by examination of vouchers, invoices, and receiving reports.	_____	_____	_____
A B C	6. Obtain the purchases journal and trace all entries over \$____ for a period of ____ days after the balance-sheet date to supporting documents to determine recording in the proper period.	_____	_____	_____
A B C	7. Obtain the cash disbursements journal and trace all entries over \$____ for a period of ____ days after the balance-sheet date to supporting documents to determine recording in the proper period.	_____	_____	_____
A B C	8. Review the open receiving report, open purchase order and open purchase requisition files for ____ days after the balance-sheet date for unrecorded liabilities.	_____	_____	_____
A B C	9. Review the open vendor invoice files for ____ days after the balance-sheet date to determine recording in the proper period and for unrecorded liabilities.	_____	_____	_____
A C	10. Inquire of responsible client staff about their knowledge of additional sources of unprocessed invoices, unrecorded commitments, or contingent liabilities.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B C	11. Liabilities for payroll taxes withheld:			
	a. Trace liabilities to payments made subsequent to the balance-sheet date; examine the payroll tax deposit receipts.	_____	_____	_____
	b. Compare liability to accrued payroll taxes for reasonableness.	_____	_____	_____
	c. Trace liabilities to summaries of the applicable payroll registers.	_____	_____	_____
A B C	12. Determine that credit memos received _____ days after the balance-sheet date have been recorded in the proper period.	_____	_____	_____
B C D	13. Identify any payables due after one year and consider the imputation of interest.	_____	_____	_____
D	14. Consider the need for any disclosures.	_____	_____	_____

D. Additional Procedures (if any)

E. Section Completion

- Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for accounts payable, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for accounts payable.

- The objectives of this audit program have been met.

This audit program section has been completed in accordance with firm policy.

Ref.**X. Accrued Liabilities Other Than Income Taxes and Deferred Credits****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Liabilities complete—To determine that expense accounts include costs and expenses applicable to the period. (Assertions 1, 2, and 5)
- B. GAAP conformity—To determine that all contingencies and estimated future expenses that should be accrued in the period have been accrued, classified, and described in accordance with generally accepted accounting principles consistently applied. (Assertion 1, 2, 3, 4, and 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e. [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review _____
 - b. Internal control documentation, control risk assessment, and control test results _____
 - c. Assessment of risk of material misstatement _____
 - d. Other planning documents and risk assessments _____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
	<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
	B. Substantive Analytical Procedures			
A B	1. Compare balances in accrued expense and other liability accounts with the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
	C. Detailed Tests			
[A]	1. Obtain or prepare analysis of accrued liability accounts and agree to the general ledger.	_____	_____	_____
A B	2. For accrued salaries, wages, vacation pay and bonus accounts:			
	a. Test the clerical accuracy of the analyses.	_____	_____	_____
	b. Determine whether the calculations have been made in accordance with related agreements and the corporate policies established by the board of directors or other appropriate executive groups.	_____	_____	_____
	c. Trace bonuses and similar accruals to the board of directors minutes or other proper authorizations.	_____	_____	_____
	d. Compare amounts to subsequent payments.	_____	_____	_____
A B	3. Test computations of accrued salaries and wages by tracing last payment date to payroll journals and estimating the accrual by reference to subsequent payrolls.	_____	_____	_____
A B	4. Review compensation agreements for possible additional liabilities.	_____	_____	_____
A B	5. Determine whether a liability should be accrued for employees' compensation for future absences.	_____	_____	_____

Practice Tip

Ordinarily, a liability is accrued when all of the following conditions are met:

- The employer's obligation relating to employees' rights to receive compensation for future absences is attributable to employees' services already rendered,
- The obligation relates to rights that vest or accumulate,
- Payment of the compensation is probable, and
- The amount can be reasonably estimated.

The fact that an accrual has not been made because of an inability to meet the last condition ordinarily should be disclosed.

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B	6. Review deferred compensation agreements and the method of accounting:			
	a. Determine whether the method of accounting recognizes deferred compensation costs in accordance with FASB Statement No. 106 (AC P40).	_____	_____	_____
	b. Consider whether individual contracts, if taken together, constitute a pension plan.	_____	_____	_____
A B	7. Obtain an analysis of deferred compensation and:			
	a. Test the clerical accuracy of the analysis and compare balances to the general ledger.	_____	_____	_____
	b. Verify the computations by reference to provisions of the agreements.	_____	_____	_____
	c. Test current payments by examining appropriate supporting data.	_____	_____	_____
	d. Consider the advisability of confirming unpaid balances and the terms of payment.	_____	_____	_____
A B	8. Review the general ledger liability accounts for other accruals that may exist and proceed as follows:			
	a. Inquire into the nature and purpose of such accounts and document the results of the inquiry.	_____	_____	_____
	b. Identify the accounts selected for further analysis. <i>(To be done by the in-charge.)</i>	_____	_____	_____
	_____	_____	_____	_____
	c. Verify the year-end balance of the accounts selected by computation, examination of subsequent payments or examination of other data.	_____	_____	_____
	d. Compare recorded transactions to available supporting data on a test basis, <i>where deemed necessary.</i>	_____	_____	_____
A B	9. Evaluate whether management has recorded all accrued liabilities (including those based on significant accounting estimates) that could be material to the financial statements. Consider:			
	a. Information from reading available minutes of meetings of stockholders, directors, and appropriate committees.	_____	_____	_____
	b. Information contained in regulatory or examination reports, supervisory correspondence, and similar materials from applicable regulatory agencies.	_____	_____	_____
	c. Information included on confirmation replies received from financial institutions or other entities.	_____	_____	_____
	d. Information concerning identified litigation, claims, and assessments and other contingencies.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	e. Management replies to inquiries regarding possible accruals.	_____	_____	_____
A B	10. For those accrued liabilities based on significant accounting estimates, evaluate the reasonableness of the estimate by employing one or a combination of the following approaches:			
	a. Review and test the process used by management to develop the estimate. Consider performing the following procedures:			
	(1) Identify whether there are controls over the preparation of accounting estimates and supporting information that may be useful in the evaluation.	_____	_____	_____
	(2) Identify the sources of information that management used in forming the assumptions, and consider whether such information is relevant, reliable, and sufficient for the purpose.	_____	_____	_____
	(3) Consider whether there is additional key information or alternative assumptions about the information.	_____	_____	_____
	(4) Evaluate whether the assumptions are consistent with each other, the supporting information, relevant historical data, and industry data.	_____	_____	_____
	(5) Analyze historical data used in developing the assumptions to assess whether the data is comparable and consistent with data of the period under audit, and consider whether such data is sufficiently reliable for the purpose.	_____	_____	_____
	(6) Consider whether changes in the business or industry may cause other information to become more significant to the assumptions.	_____	_____	_____
	(7) Review available documentation of the assumptions used in developing the accounting estimates and inquire about any other plans, goals, and objectives of the client, as well as consider their relationship to the assumptions.	_____	_____	_____
	(8) Consider using the work of a specialist regarding certain assumptions.	_____	_____	_____
	(9) Test the calculations used by management to translate the assumptions and key information into the accrued liability estimate.	_____	_____	_____
	b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.	_____	_____	_____
	c. Review subsequent events or transactions occurring prior to completion of fieldwork.	_____	_____	_____
A B	11. For environmental remediation liabilities identified during planning and other stages of the engagement, perform substantive tests as follows:			

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
a. Test the accounting estimate recorded by management. (See step 10 above.)	_____	_____	_____

Practice Tip

Read AICPA Statement of Position 96-1, *Environmental Remediation Liabilities* (appendix C), for guidance in applying step 10 above to environmental remediation liabilities. When auditing environmental remediation liabilities, steps 10a and 10b above, or a combination thereof, usually will be most effective.

	b. Request information about environmental remediation liabilities and loss contingencies in the letter of inquiry sent to the client's counsel.	_____	_____	_____
	c. Obtain, as deemed necessary, written representations from management about estimates and disclosures of environmental remediation liabilities and loss contingencies affecting the financial statements, including specific representations as to the adequacy of such disclosures and the expected outcomes of uncertainties.	_____	_____	_____
	d. If disclosure is required of environmental remediation liabilities and loss contingencies, assess the adequacy of the disclosures, including any conclusions expressed by management regarding the expected outcome of such contingencies.	_____	_____	_____
A B	12. Review revenue accounts and determine whether income recorded in the current period should be deferred to future periods.	_____	_____	_____
A B	13. Obtain appropriate analyses of other deferred credits:			
	a. Review and document the nature of the account and the policies and method of accounting.	_____	_____	_____
	b. Test computations of current additions and reductions by examination of appropriate supporting data or by analytical review of appropriate revenue and expense accounts.	_____	_____	_____
	c. Determine whether the basis of recording and method of amortization is consistent with the prior year.	_____	_____	_____
	d. Determine if the ending balance is reasonable.	_____	_____	_____
[A] [B]	14. Determine that amounts accrued that are not currently deductible for income tax purposes have been identified for consideration in the computation of income taxes.	_____	_____	_____
A B	15. Determine whether management replies to our inquiries provide adequate explanations for significant fluctuations and consider whether such replies are corroborated by our audit procedures and knowledge of the business or whether additional audit procedures are required.	_____	_____	_____
A B	16. Obtain and verify disclosure information for multi-employer plans and vouch expense for the period.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B	17. For defined contribution plans:			
	a. If applicable, obtain copy of trustee's fund report. Consider confirming contents of report with trustee.	_____	_____	_____
	b. Determine if there have been any adoptions or amendments of plans during the period and obtain copies. Note for financial statement disclosures and:			
	(1) Agree expense to minutes, when applicable.	_____	_____	_____
	(2) Verify computations, where applicable.	_____	_____	_____
	c. Where applicable, test employee data. Test should consist of analytical procedures, and additional procedures as considered necessary.	_____	_____	_____
[A] [B]	18. For defined benefit plans obtain the following, where applicable:			
	a. Copy of actuarial report as of a date no earlier than three months prior to balance-sheet date.	_____	_____	_____
	b. If applicable, copy of trustee's report.	_____	_____	_____
	c. Form 5500 for prior year and for current year, if already prepared.	_____	_____	_____
	d. Actuary's certificate on Schedule B for Form 5500 for prior year and for current year if already prepared.	_____	_____	_____
	e. Plan document(s).	_____	_____	_____
	f. Census and plan asset date given to actuary.	_____	_____	_____
A B	19. Consider confirming contents of Trustee report with Trustee.	_____	_____	_____
A B	20. Reconcile aggregate census data, such as number of employees covered, compensation, to amounts shown in the actuarial valuation report or if not in the report, consider obtaining confirmation of such data from the actuary.	_____	_____	_____
A B	21. For selected employees, check census data (age, sex, marital status, current pay, term of employment, benefit election, etc.) to payroll records. [Check only that data important to the valuation. If analytical review of data and valuation report appear reasonable, a sample of 15 will generally be acceptable. If not, a sample up to 40 may be required.]	_____	_____	_____
A B	22. Based on plan documents, make appropriate tests to determine whether all eligible employees are included in the census data provided to the actuary.	_____	_____	_____
A B	23. Reconcile plan assets per the trustee's report to amounts shown in the actuarial valuation report.	_____	_____	_____
[A] [B]	24. Ascertain that the actuary is professionally qualified. (Membership in the Society of Actuaries, the Conference of Actuaries in Public Practice, American Academy of Actuaries is usually sufficient to indicate that actuary is qualified.)	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
[A] [B]	25. Inquire as to any relationships between the actuary and the client that would impair independence.	_____	_____	_____
A B	26. Review the actuary's most recent certificate on Schedule B, Form 5500, and determine the reasons for qualifications expressed, if any.	_____	_____	_____
B	27. Determine if there have been any adoptions or amendments of plans during the period. Obtain copies of any and note for financial statement disclosure.	_____	_____	_____
A B	28. Review the latest plan document and compare with key provisions included in the actuarial valuation report. If the report does not include a description of key plan provisions, it may be necessary to confirm the actuary's understanding of such provisions.	_____	_____	_____
A B	29. Vouch the payment of the prior year's accrual to determine that it was paid prior to the filing of the year tax return. (If not paid at the tax return due date, or extended due date, the bank loses its tax deduction.)	_____	_____	_____
A B	30. Trace the authorization for the contribution to the plan to the board of directors' minutes, or obtain the management representation in the representation letter.	_____	_____	_____
B	31. Inquire of the client as to any intent to terminate the plan.	_____	_____	_____
B	32. Obtain and check disclosure information.	_____	_____	_____
A B	33. If not previously audited, obtain net transition obligation computations and agree amounts to actuarial report, trustees report, or other evidential sources. Recheck compensation.	_____	_____	_____
A B	34. Obtain calculation of pension cost for the current period and agree components to actuarial report or trustee's report.	_____	_____	_____
A B	35. Determine that a liability is recorded for unfunded accrued pension cost whenever the client's contribution is less than its related expense or that prepaid pension costs is recorded when the amount funded exceeds the related expenses.	_____	_____	_____
A B	36. Determine that an additional liability is recorded equal to the excess, if any, of the accumulated benefit obligation over the fair value of plan assets. (Similar assets are not recorded except when the excess follows a business combination treated as a purchase.)	_____	_____	_____
[A] [B]	37. If the work of a specialist is used in performing the audit, has the auditor documented his satisfaction concerning the following:			
	a. Review the professional certification, license, or other recognition of the competence of the specialist.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. The reputation and standing of the specialist in view of those familiar with his capability or performance.	_____	_____	_____
c. The specialist's experience in the type of work under consideration.	_____	_____	_____
d. Review the relationship, if any, of the specialist to the client.	_____	_____	_____
e. If the work of a specialist is used in performing the audit, obtain and document the auditor's understanding of the nature of the work to be performed.	_____	_____	_____
[A] [B] 38. Prepare conclusion memo as to whether or not audit objectives have been met and accordingly whether or not the pension and related accounts are fairly stated for inclusion in the (consolidated, if applicable) financial statements in accordance with generally accepted accounting principles. (If not, document details of exception.)	_____	_____	_____

D. Additional Procedures (if any)

E. Section Completion

1. Accumulate in the working papers all information required to be disclosed in the financial statements (e.g., pension plan data). _____
2. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for accrued expenses, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for accrued expenses. _____
3. The objectives of this audit program have been met. _____

This audit program section has been completed in accordance with firm policy.

Ref.**XI. Income Taxes Accrued and Provided****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Amount reasonable—To determine that the provision for income taxes is reasonable. (Assertions 1, 2, 3, and 4)
- B. Amount comparable to amount to be paid—To determine that the liability for accrued income taxes is adequate and not excessive in relation to amounts reasonably expected to be payable. (Assertions 3 and 4)
- C. Temporary differences recognized—To determine that deferred income taxes represent the effect of temporary differences. (Assertions 1, 2, and 4)
- D. Proper classification—To determine that income tax provisions, accruals and deferrals are properly described and classified in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
<ul style="list-style-type: none"> b. Internal control documentation, control risk assessment, and control test results c. Assessment of risk of material misstatement d. Other planning documents and risk assessments 	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
B. Detailed Tests			
A B C [D] 1. Obtain or prepare analyses of the various current and deferred income tax liabilities and assets and related provisions showing:			
a. Balances at the beginning of the year (period).	_____	_____	_____
b. Amounts provided.	_____	_____	_____
c. Refunds received.	_____	_____	_____
d. Payments made, indicating date and nature.	_____	_____	_____
e. Balances at the end of the year (period).	_____	_____	_____
A 2. Compare opening balances to the prior year's working papers.	_____	_____	_____
A B 3. Trace payments to cash books and general ledger; examine canceled checks for evidence of timely payment.	_____	_____	_____
A B 4. Compare payments and refunds to copies of income tax returns.	_____	_____	_____
A B C 5. Ascertain latest year that income tax returns have been examined and which periods, if any, are being contested. Examine recent Revenue Agent Reports; determine that adequate consideration has been given to items challenged in the past. Also consider disclosure of the examination.	_____	_____	_____
A B C 6. Review or prepare a reconciliation of earnings (loss) per books with taxable income for the period.	_____	_____	_____
A B C 7. Review or compute the provisions for federal and other income taxes.	_____	_____	_____
D 8. Determine that the nature of any significant differences between pretax earnings and income tax expense are disclosed.	_____	_____	_____
A B C 9. Determine that the accrual and provision is adequate considering:			
a. Tax positions taken by the client that might be challenged by the taxing authorities or other tax contingencies.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	b. Possible assessments, penalties or interest indicated by tax return examinations completed during the year or in progress, including similar adjustments applicable to years not yet examined.	_____	_____	_____
A B C	10. Compute or obtain and test the client's computation of deferred tax assets and liabilities to determine conformity with FASB Statement No. 109 (AC I27). Test the reasonableness.	_____	_____	_____
A B C D	11. For deferred tax assets, determine the likelihood that all or part of the recorded amount will not be realized. In making that determination, consider all available evidence, both positive and negative.	_____	_____	_____

Practice Tip

For tax benefits to be realized, there must be adequate taxable income in the future when deductible temporary differences reverse and when net operating loss carryforwards are available.

A B C D	12. If it is determined that it is more likely than not that all or part of the deferred tax asset will not be realized, evaluate the adequacy of the valuation allowance account by performing the following:			
	a. Review and test the process used by management to develop the estimate, or develop an independent expectation of the estimate, to corroborate the reasonableness of management's estimate.	_____	_____	_____
	b. Determine whether any subsequent events or transactions have occurred prior to the completion of field work that could effect the adequacy of the valuation allowance.	_____	_____	_____

Practice Tip

See FASB Statement No. 109, paragraphs 17–26 (AC I27.116–.125), for guidance on valuation allowance computation.

D	13. Review a schedule of net operating loss carryovers and unused investment tax credits for propriety.	_____	_____	_____
A B	14. Consider additional tax liabilities to any new states in which the client does business.	_____	_____	_____
A B C	15. If the auditor is to prepare the returns, ascertain that all necessary information is obtained.	_____	_____	_____
D	16. Obtain all necessary information for disclosure in the financial statements (e.g., tax benefits of operating loss carryovers, classification of deferred taxes, etc.).	_____	_____	_____
A B C D	17. Obtain tax department review of the income tax working papers.	_____	_____	_____

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
C. Additional Procedures (if any)			
D. Section Completion			
1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for income taxes, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for income taxes.			
2. The objectives of this audit program have been met.			
This audit program section has been completed in accordance with firm policy.

XII. Notes Payable and Long-Term Debt

Financial Statement Assertions:

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Payables exist—To determine that notes payable and long-term debt are authorized, properly classified, and described in the financial statements. (Assertions 3 and 5)
- B. Period recorded proper—To determine that liabilities are recorded in the proper period at the correct amounts. (Assertions 1, 2, and 4)
- C. Expense recognized—To determine that related interest expense (including discount or premium) is accounted for in conformity with generally accepted accounting principles consistently applied. (Assertions 2 and 5)
- D. Adequate disclosure—To determine that the financial statements include adequate disclosure of restrictive covenants of loan agreements, pledged assets, etc. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Preliminary Procedures

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. Assessment of risk of material misstatement	_____	_____	_____
d. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
A B B. Substantive Analytical Procedures			
C			
1. Compare balances in notes payable, long-term debt, and the related interest expense accounts with the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
2. Compute the following ratios and compare to expected ratios. Investigate any significant deviations from the expected ratios.			
a. Long-term debt to stockholders' equity.	_____	_____	_____
b. Interest expense as a percentage of average balance of notes payable and long-term debt outstanding.	_____	_____	_____
C. Detailed Tests			
[A] [B]			
[C] [D]			
1. Obtain or prepare an analysis of notes payable, long-term debt, lines of credit, and other financing arrangements showing the following:			
a. Description:			
(1) Date of origin	_____	_____	_____
(2) Type of debt and maturity	_____	_____	_____
(3) Face amount	_____	_____	_____
(4) Interest rate	_____	_____	_____
(5) Timing and amount payments	_____	_____	_____
b. Principal:			
(1) Balance at the beginning of the year (period)	_____	_____	_____
(2) Additions	_____	_____	_____
(3) Payments	_____	_____	_____
(4) Balance at the end of the year (period)	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	c. Related Interest:			
	(1) Accrued interest at the beginning of the year (period)	_____	_____	_____
	(2) Unamortized discount or premium at the beginning of the year (period)	_____	_____	_____
	(3) Expense incurred during the year (period)	_____	_____	_____
	(4) Amount paid during the year (period)	_____	_____	_____
	(5) Accrued at the end of the year (period)	_____	_____	_____
	(6) Unamortized discount of premium at the end of the year (period)	_____	_____	_____
[D]	2. Foot and crossfoot analysis, and trace totals to general ledger and subsidiary ledgers for notes payable and long-term debt.	_____	_____	_____
A [D]	3. Trace authorization for all new debt to the minutes of the Board of Directors meetings.	_____	_____	_____
A B C D	4. Examine supporting documentation for all debt and related interest expense (for example, note and loan agreements, bond indentures, correspondence from legal counsel, etc.); obtain copies of debt agreements and highlight restrictive covenants. Note and investigate any apparent violations. Maintain copies of all notes and related agreements in the permanent file.	_____	_____	_____
A D	5. Confirm outstanding balances, terms, conditions, and compliance with covenants with the credit grantor or independent trustee.	_____	_____	_____

Practice Tip

Confirming responses should be mailed back directly to the auditor. The auditor should always control the mailing of confirmations. Second requests should be mailed as necessary for nonreplies.

A B	6. Examine canceled or paid notes and bonds. Consider confirming large notes paid or canceled during the year (period).	_____	_____	_____
D	7. Determine if any assets are subject to lien and obtain carrying amount for disclosure.	_____	_____	_____
D	8. Examine notes for guarantees. Be alert for related-party guarantees. All guarantee relationships should be disclosed.	_____	_____	_____
A B D	9. Examine notes and debt agreements and review compliance with restrictive loan covenants. Gather information for financial statement disclosures.	_____	_____	_____
D	10. Separate short-term notes and the current portion of long-term debt for report classification. Categorize by type of lender (related party, banks, loan company, etc.). Determine five year maturities for all long-term obligations.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
C	11. Test interest expense and amortization of debt discount or premium by:			
	a. Performing reasonableness tests. For example, multiplying average balances of debt outstanding by average interest rates.	_____	_____	_____
	Or			
	b. Recomputing the balances.	_____	_____	_____
C	12. Consider the need to impute interest on noninterest bearing notes.	_____	_____	_____
A B D	13. Confirm and verify line of credit agreements and gather information for financial statement disclosures.	_____	_____	_____
D	14. In accordance with FASB Statement No. 107, <i>Disclosures about Fair Value of Financial Instruments</i> , as amended (AC F25), obtain information about the fair value of notes payable and long-term debt, and perform the following:			
<hr/>				
<i>Note:</i> Disclosures about the fair value of financial instruments prescribed in FASB Statement No. 107 are optional for nonpublic entities that meet certain criteria (see FASB Statement No. 126). Determine if the client is making FASB No. 107 disclosures.				
<hr/>				
	a. Determine that the fair value amounts are determined in accordance with FASB Statement No. 107, as amended (AC F25).	_____	_____	_____
	b. Determine that the valuation principles are being consistently applied.	_____	_____	_____
	c. Determine that the fair value amounts are supported by the underlying documentation.	_____	_____	_____
	d. Determine that the method of estimation and significant assumptions used are properly disclosed.	_____	_____	_____

Practice Tip

Normally, the carrying amount of notes payable and long-term debt will approximate their fair values. However if the interest rate on the debt is significantly different from market rates, the carrying amount of the debt may not approximate their fair value. See FASB Statement No. 107, as amended (AC F25) and Auditing Interpretation No. 1 of SAS No. 57, *Auditing Accounting Estimates*, titled "Performance and Reporting Guidance Related to Fair Value Disclosures (AU section 9342.01-.10)," for further guidance.

D. Extinguishments of Liabilities

- | | | | | |
|-----|---|-------|-------|-------|
| A D | 1. Determine that a liability has been derecognized if and only if it has been extinguished. A liability has been extinguished if either of the following conditions is met: | | | |
| | a. The debtor pays the creditor and is relieved of its obligation for the liability. Paying the creditor includes delivery of cash, other financial assets, goods, or services or reacquisition by the debtor of its outstanding debt securities whether the securities are canceled or held as so-called treasury bonds. | _____ | _____ | _____ |

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	b. The debtor is legally released from being the primary obligor under the liability, either judicially or by the creditor.	_____	_____	_____
D	2. If debt was considered to be extinguished by in-substance defeasance under the provisions of FASB Statement No. 76 prior to the effective date of FASB Statement No. 125, determine that a general description of the transaction and the amount of debt that is considered extinguished at the end of the period so long as that debt remains outstanding has been disclosed.	_____	_____	_____
D	3. If assets are set aside after the effective date of FASB Statement No. 125 solely for satisfying scheduled payments of a specific obligation, determine that a description of the nature of restrictions placed on those assets has been disclosed.	_____	_____	_____

E. Additional Procedures (if any)

F. Section Completion

1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for notes payable and long-term debt, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for notes payable and long-term debt.

2. The objectives of this audit program have been met.

This audit program section has been completed in accordance with firm policy.

Ref.**XIII. Stockholders' Equity****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Proper authorization and classification—To determine that all transactions and commitments (options, warrants, rights, etc.) are properly authorized and classified. (Assertions 1, 2, 3, 4, and 5)
- B. Proper recognition and cut-off—To determine that all transactions and commitments are recorded at correct amounts in the proper period. (Assertions 1, 2, and 5)
- C. GAAP conformity—To determine that all transactions and balances are presented in the financial statements in conformity with generally accepted accounting principles consistently applied and accompanied by adequate disclosures. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review _____
 - b. Internal control documentation, control risk assessment, and control test results _____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	c. Assessment of risk of material misstatement	_____	_____	_____
	d. Other planning documents and risk assessments	_____	_____	_____
	2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>				
B. Substantive Analytical Procedures				
	1. Compare balances in shareholders' equity accounts with the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
C. Capital Stock and Additional Paid-In Capital—Detailed Tests				
[C]	1. For each class of stock, identify the number of authorized shares, par or stated value, privileges, and restrictions.	_____	_____	_____
[C]	2. Obtain or prepare an analysis of the activity in the accounts; trace opening balances to the balance sheet as of the close of the year (period) previously audited and trace closing balances to the general ledger.	_____	_____	_____
A B	3. Examine minutes, bylaws, and articles of incorporation for provisions relating to capital stock and support for all changes in the accounts including authorization per minutes of Board of Directors and stockholders meetings, and correspondence from legal counsel.	_____	_____	_____
A B	4. Account for all proceeds from stock issues (including stock issued under stock option and stock purchase plans):			
	a. Recompute sales price and applicable proceeds.	_____	_____	_____
	b. Determine that proceeds have been properly distributed between capital stock and additional paid-in capital.	_____	_____	_____
A B [C]	5. Verify outstanding stock by agreeing open stubs in stock certificate book to the listing or confirm with the transfer agent the total issued shares and the total shares issued in the company's name. Determine that surrendered certificates have been canceled and accounted for.	_____	_____	_____
A B [C]	6. For stock options and stock option plans, trace authorization to the minutes of the Board of Directors meetings, review the plan and the option contracts. Obtain or prepare and test analyses of stock options which include the following information:			

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	a. For option plans, the date of the plan, number and class of shares reserved for option, method for determining the option price, period during which options may be granted, and identity of persons to whom options may be granted.	_____	_____	_____
	b. For options granted, identity of persons to whom granted, date of grant, number of shares under option, option price, option period, number of shares as to which options are exercisable, and the market price and value of shares under option as of the date of grant or measurement (first date on which are known both (1) the number of shares individual is entitled to receive, and (2) the option of purchase price, if any).	_____	_____	_____
	c. For options outstanding, number of shares subject to option at the beginning of the period, activity during the period (additional shares subjected to option, number of shares exercised under options, number of shares associated with options which expired during the period), and number of shares subject to option at the end of the year (period).	_____	_____	_____
A B C	7. If the client has a stock-based compensation plan (such as a stock option plan mentioned in the step above, or a stock purchase plan or any arrangement by which employees receive shares of stock or other equity instruments), perform the following steps:			
	a. Determine that the appropriate accounting treatment is being applied to all transactions that result from such stock compensation plans:			
	(1) If the client is following the provisions of FASB Statement No. 123, <i>Accounting for Stock-Based Compensation</i> , as amended by FASB Statement No. 148, <i>Accounting for Stock-Based Compensation—Transition and Disclosure</i> (AC C36), determine that the fair-value method of accounting is being properly complied with, as described in the applicable sections of FASB Statement No. 123, as amended (AC C36).	_____	_____	_____
	(2) If the client is following the provisions of APB Opinion No. 25, <i>Accounting for Stock Issued to Employees</i> (AC C47), determine that the intrinsic value method of accounting is being properly complied with, as described in the applicable sections of APB Opinion No. 25 (AC C47).	_____	_____	_____
	b. Summarize in the working papers all information required for disclosure as described in the appropriate accounting guidance.	_____	_____	_____
B C	8. Identify all stock rights and warrants outstanding as of the balance-sheet date including the number of shares involved, period during which exercisable, and exercise price; determine that the rights and warrants were authorized.	_____	_____	_____
A B C	9. Identify any stock subscriptions receivable, and:			
	a. Determine if they were authorized.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	b. Obtain confirmation from subscribers.	_____	_____	_____
	c. Ascertain that subscriptions receivable are classified as a reduction of stockholders' equity on the balance sheet.	_____	_____	_____
A B C	10. Obtain or prepare an analysis of the treasury stock account and:			
	a. Inspect the paid checks and other documentation in support of the treasury stock acquisitions.	_____	_____	_____
	b. Inspect or confirm the treasury stock certificates; ascertain that the certificates are in the company's name or endorsed to the company.	_____	_____	_____
	c. Reconcile treasury stock to the general ledger.	_____	_____	_____
A B C	11. Determine that declared and unpaid dividends are properly recorded. Compare paid dividends to director's minutes.	_____	_____	_____
D. Retained Earnings—Detailed Tests				
[B]	1. Analyze activity during the period; trace the opening balance to the balance sheet as of the end of the year (period) previously audited; trace net income and other activity to the proper general ledger accounts and cross reference to other working paper analyses.	_____	_____	_____
A B	2. Determine that dividends paid or declared have been authorized by the Board of Directors and:			
	a. Examine paid checks and supporting documents for dividends paid (selected checks to shareholders or to a dividend disbursing agent).	_____	_____	_____
	b. Recompute amounts of dividends paid and/or payable.	_____	_____	_____
B C	3. Investigate any prior period adjustments and determine if they were made in accordance with GAAP.	_____	_____	_____
A B C	4. Examine supporting documents and authorization for all other transactions in the account, considering conformity with generally accepted accounting principles.	_____	_____	_____
E. Other				
C	1. Determine and document any restrictions on equity accounts.	_____	_____	_____
C	2. For disclosure purposes, obtain information concerning the pertinent rights and privileges of the various securities outstanding. Information includes dividend and liquidation preferences, participation rights, call prices and dates, conversion or exercise prices or rates and pertinent dates, sinking-fund requirements, unusual voting rights, significant terms of contracts to issue additional shares, and redemption requirements. Determine that such information is accurate.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
C	3. Obtain an analysis of transactions affecting other comprehensive income for the period, relate the beginning and ending balances to the trial balance, and review the propriety of classifications.	_____	_____	_____

F. Additional Procedures (if any)

G. Section Completion

1. Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for shareholders' equity, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions for shareholders' equity.	_____	_____	_____
2. The objectives of this audit program have been met.	_____	_____	_____

Ref.**XIV. Revenues and Other Income****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Proper recognition—To determine that revenue transactions represent consideration applicable to goods shipped and/or completed services rendered to customers (or clients) in the normal course of business during the year (period). (Assertions 1, 3, 4, and 5)
- B. Revenue realized—To determine that revenue transactions have resulted in collections or bona fide receivables. (Assertions 1 and 2)
- C. Revenue recorded—To determine that all revenues earned during the year (period) are recorded and included in the financial statements. (Assertions 1, 2, and 5)
- D. Proper classification—To determine that revenues are properly classified and described in the financial statements and accompanied by adequate disclosure. (Assertions 4 and 5)
- E. Proper classification of other income—To determine that other income has been properly recognized, classified and described in the statement of income. (Assertions 2 and 5)
- F. GAAP conformity—To determine that the income statement is prepared in conformity with generally accepted accounting principles consistently applied. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. <u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
Procedures:			
A. Preliminary Procedures			
1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:			
a. Preliminary analytical review	_____	_____	_____
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. Assessment of risk of material misstatement	_____	_____	_____
d. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
<p>Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.</p>			
B. Substantive Analytical Procedures			
1. Compare current year sales and other income balances to the expected amounts. Balances may include gross sales, discounts granted, returns, credits allowed, and net sales. Consider disaggregating the data, such as by product line, division, seasons of the year, etc. Investigate any significant deviations from the expected amounts.	_____	_____	_____
C. Detailed Tests			
1. Obtain the sales journal and for a selected period(s):			
a. Trace totals from the sales journal to the general ledger control accounts for revenues, receivables, and such other accounts as salesmen's commissions, provisions, and allowances for product warranties, etc.	_____	_____	_____
b. Trace selected individual items from the sales journal to such other subsidiary records as the salesmen's commissions detail, and entries to charge cost.	_____	_____	_____
c. Reconcile the sales journal to the entries to charge cost of sales and credit inventory.	_____	_____	_____
d. Test the arithmetic accuracy of the footings and crossfootings of the journals.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	2. Obtain the cash receipts journal and perform the following on a test basis for a selected period(s):			
	a. Trace totals to the general ledger for both the cash account and applicable account distributions such as accounts receivable, cash sales, investment income, and additions to notes payable (re: proceeds).	_____	_____	_____
	b. Test the arithmetic accuracy of the footings and crossfootings of the cash receipts journal; reconcile total receipts to total deposits per the bank statement.	_____	_____	_____
A B C D	3. Select (using appropriate sampling techniques) _____ shipping orders prepared during the year and vouch to related sales invoices and trace into the sales journal.	_____	_____	_____
[A] [B] [C] [D] [E] [F]	4. Scan source journals for the period for unusual transactions. Determine that they are accounted for properly. Follow up on any unusual or related-party transactions.	_____	_____	_____
A B D	5. Review the source journal for any large or unusual sales transactions, especially near year end. Examine invoice and shipping document.	_____	_____	_____
A F	6. Ascertain whether the entity ships goods to be held on consignment by others, and if so:			
	a. Identify the control accounts, procedures, and entities to whom consignment shipments are made.	_____	_____	_____
	b. Examine consignment agreements.	_____	_____	_____
	c. Review subsidiary accounts for entities to whom consignment shipments are made; examine supporting detail and ascertain that shipments on consignment are properly recorded.	_____	_____	_____
	d. Review shipping advices and trace consignment shipments to the applicable subsidiary records and control accounts; ascertain that consignment shipments are correctly classified and recorded.	_____	_____	_____
	e. Investigate old or significant consignments to determine whether there are any unrecorded sales.	_____	_____	_____
A [F]	7. Identify amounts of sales to affiliates, obtain an understanding of their business purpose, and note for disclosure and/or tracing to consolidation eliminating entries. Identify amounts of sales to other related parties.	_____	_____	_____
A B C	8. For sales cut off as of the closing date for the year (period) and/or the date of the physical inventory:			
	a. Select sales invoices for testing from the sales register for several days before and after the year end (or at the physical inventory date) and examine shipping records and determine that they were recorded in the proper period.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	b. Select credit memos issued after year end and examine underlying documentation (for example, record of receipt of returned goods) to determine period to which credit memo is applicable and whether it was recorded in the proper period.	_____	_____	_____
	c. Inquire of the client if there are unprocessed sales or customer credit memos. Inspect supporting documents to determine whether they should have been recorded prior to year end.	_____	_____	_____
A C E	9. Ascertain that the following income accounts have been traced to the analysis working papers for examination of the related balance-sheet accounts:			
	a. Interest income (notes receivable, debt securities, capitalized leases, etc.).	_____	_____	_____
	b. Dividend income and realized gain (investment securities).	_____	_____	_____
	c. Increase in investments accounted for on the equity method (investments).	_____	_____	_____
	d. Gain on sale of property and equipment (property and equipment).	_____	_____	_____
	e. Other miscellaneous revenue amounts, as appropriate.	_____	_____	_____
A E	10. Obtain (or prepare) an analysis of rent and royalty income and examine supporting agreements (should be related to examination of leases and other agreements). Determine reasonableness of amounts.	_____	_____	_____
A B C D	11. Determine proper income recognition when the right of return exists.	_____	_____	_____
A B C D F	12. Determine that any product financing arrangements are accounted for properly.	_____	_____	_____
A B C D	13. Determine that sales of extended warranty and product maintenance contracts are accounted for properly.	_____	_____	_____
A	14. If earnings-per-share information is presented, determine that the computation and presentation of such amounts are in conformity with the requirements of FASB Statement No. 128, <i>Earnings per Share</i> .	_____	_____	_____

D. Additional Procedures (if any)

Ref.**XV. Operating and Other Expenses****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Properly recorded—To determine that reported expenses include costs which are properly allocable to the year (period) and are properly matched with revenues. (Assertions 1, 2, and 4)
- B. Proper recognition—To determine that recognition has been given to all costs and expenses (including losses) which should be recognized. (Assertions 1, 2, 3, and 4)
- C. Taxes properly recorded—To determine that all tax temporary differences have been accounted for. (Assertions 2 and 5)
- D. Proper classification—To determine that extraordinary items have been properly classified and disclosed. (Assertions 1 and 5)
- E. GAAP conformity—To determine that the income statement is prepared in conformity with generally accepted accounting principles consistently applied. (Assertion 5)
- F. Proper classification—To determine that costs and expenses are appropriately classified and described in the statement of income. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
b. Internal control documentation, control risk assessment, and control test results	_____	_____	_____
c. SAS No. 70 report on service center processed transactions (payroll)	_____	_____	_____
d. Assessment of risk of material misstatement	_____	_____	_____
e. Other planning documents and risk assessments	_____	_____	_____
2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____

Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.

A B C B. Substantive Analytical Procedures

D E F

1. Compare cost of sales and expense account balances to the expected amounts. Investigate any significant deviations from the expected amounts.	_____	_____	_____
2. While completing the procedures in step 1 above, examine the propriety of the balances in the following accounts, as deemed necessary.	_____	_____	_____
a. Officers' salaries and bonuses. Determine board of directors' authorization.	_____	_____	_____
b. Officers' expenses (for tax return).	_____	_____	_____
c. Contributions (eligible for deduction).	_____	_____	_____
d. Rents (look for potential capitalizable leases).	_____	_____	_____
e. Legal and professional services (look for any payments that may represent undisclosed legal matters).	_____	_____	_____
f. Taxes (for tax return).	_____	_____	_____
g. Repairs and maintenance (look for capitalizable items).	_____	_____	_____
h. Supplies (look for capitalizable items).	_____	_____	_____
i. Travel, conference, spousal travel, and entertainment expenses (look for adequate documentation and abuse).	_____	_____	_____
j. Property tax expense (for unrecorded property).	_____	_____	_____
k. Other miscellaneous expenses.	_____	_____	_____

Practice Tip

An analysis of trial balance expense accounts can prove to be a valuable tool for both the audit and any tax engagements you have with the client. At tax time, it's beneficial to have the details of expenses required to prepare the client's tax return. It will save you time (and money) to prepare these schedules during the audit.

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	3. Calculate gross profit percentages by product line (or other method as deemed appropriate). Compare percentages to the expected percentages and investigate significant deviations from the expected percentages.	_____	_____	_____
	4. Calculate individual expense categories as a percentage of total expenses. Compare to expected percentages. Investigate any significant deviations from expected percentages.	_____	_____	_____
C. Detailed Tests				
	1. Obtain the cash disbursements journal and for a selected period(s):			
	a. Trace totals from the cash disbursements journal to the general ledger control account for accounts payable, cash, and such other accounts as payroll expense, rent expense, insurance expense, interest expense, etc.	_____	_____	_____
	b. Select a sample of individual expenses from the cash disbursements journal for detailed testing. Trace selected expenses to supporting documentation, such as vendor invoices, canceled checks, or other subsidiary records. Determine that expenses are recorded in the proper amount and in the proper period.	_____	_____	_____
	c. Test the arithmetic accuracy of the footings and crossfootings of the journals.	_____	_____	_____
A B D	2. Scan source journals for the period for large or unusual transactions and determine that they are properly recorded.	_____	_____	_____
A B C F	3. Determine that the following expense accounts have been traced to the analysis working papers for examination of the related asset and liability balances:			
	a. Bad debt expense (allowance for doubtful accounts—trade receivables).	_____	_____	_____
	b. Insurance expense (prepaid insurance and accrued premiums for workmen's compensation).	_____	_____	_____
	c. Property taxes (prepaid and/or accrued property taxes).	_____	_____	_____
	d. Depreciation expense (property and equipment and accumulated depreciation).	_____	_____	_____
	e. Amortization costs (intangible assets).	_____	_____	_____
	f. Interest expense (notes payable, long-term debt, capitalized leases).	_____	_____	_____
	g. Provision for income taxes (liability for income taxes currently payable, deferred income taxes).	_____	_____	_____
	h. Loss on sale or disposition of property and equipment (property and equipment).	_____	_____	_____
	i. Other expenses, as deemed appropriate.	_____	_____	_____
	4. Determine that advertising costs are accounted for in accordance with SOP 93-7, <i>Reporting on Advertising Costs</i> .	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	5. Consider whether the classification of expenses is in conformity with generally accepted accounting principles consistently applied.	_____	_____	_____
D. Payroll				
A B F	1. Compute the following as a percentage of total revenues and compare to prior year's percentages or expected percentages. Investigate any significant deviations from the expected percentages. a. Payroll (direct and indirect labor, officers' salaries) b. Benefits c. Commissions	_____	_____	_____
A B F	2. Compute average compensation and fringes divided by number of full-time equivalents (FTEs) and compare to prior years and peer group statistics.	_____	_____	_____
A B F	3. Calculate and investigate total payroll and benefits costs divided by average assets, compare to prior year's ratio or expected ratio, and correlate results to other analytical procedures. Investigate significant or unexpected results.	_____	_____	_____
A B F	4. Compute payroll tax expense as a percentage of total wages and salaries and compare to prior year's percentage or expected percentage. Investigate significant deviations from expected percentages.	_____	_____	_____
A B F	5. Reconcile gross wages on payroll tax returns to general ledger.	_____	_____	_____
A B F	6. Review payroll tax returns to determine that they are being properly filed; and tax liabilities are paid timely.	_____	_____	_____
A B F	7. If analytical procedures are not deemed sufficient, select a sample of payroll transactions for detailed testing as follows: a. Trace selected employee to personnel records, to verify existence of employee, pay rate, legal status, etc. b. Recalculate gross and net pay for propriety. c. Trace pay amount into proper recording into subledgers and general ledger.	_____	_____	_____
E. Additional Procedures (if any)

Ref.**XVI. Contingencies, Commitments, and Litigation****Financial Statement Assertions:**

1. Existence or occurrence.
2. Completeness.
3. Rights and obligations.
4. Valuation or allocation.
5. Presentation and disclosure.

Objectives:

- A. Contingencies exist—Identify the existence of any contingencies arising from litigation, claims, and assessments; when the underlying cause occurred; the likelihood of an unfavorable outcome, and the amount or range of possible loss. (Assertions 1, 2, 3, and 4)
- B. Proper recording and disclosure—The financial statements include proper accruals and/or disclosure of the contingencies. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:**A. Preliminary Procedures**

1. Review the results of applicable sections of the following to determine the nature, timing, and extent of procedures:
 - a. Preliminary analytical review _____
 - b. Assessment of risk of material misstatement _____
 - c. Other planning documents and risk assessments _____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	2. Based on the risk assessment made during planning, determine whether additional procedures, beyond those included in this program, are necessary. Consult all relevant planning documents when making this decision. If additional procedures are necessary, add them to this program.	_____	_____	_____
	Note: Use the assessed levels of inherent risk and control risk to determine the nature, timing, and extent of the substantive procedures to be performed. Listed below are examples of substantive procedures that an auditor may decide to perform, based on the assessment of risk. An auditor should select which procedures below need to be performed and should add additional procedures to those listed below, as necessary.			
	B. Contingencies			
A B	1. If it appears the client may have engaged in any questionable or illegal acts or irregularities, obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effect on the financial statements. Procedures are to include inquiry of management at a level above those involved, if possible.	_____	_____	_____
A B	2. If management does not provide satisfactory information that there has been no illegal acts or irregularities, consult with the client's legal counsel or other specialists about the application of relevant laws and regulations. Arrangements for such consultation with client's legal counsel should be made by the client.	_____	_____	_____
A B	3. Review minutes of directors' meetings and discuss all pertinent items with management. Make excerpts and agree to applicable working papers.	_____	_____	_____
A B	4. Inquire of management as to the existence, amount, and accrual of contingencies, with respect to such matters as: (If none, so indicate.)			
	a. Litigation in process or threatened.	_____	_____	_____
	b. Receivables or other assets sold or assigned with recourse.	_____	_____	_____
	c. Discounted receivables.	_____	_____	_____
	d. Debt guarantees of others.	_____	_____	_____
	e. Accommodation endorsements.	_____	_____	_____
	f. Potential tax assessments (property, sales, etc.).	_____	_____	_____
	g. Additional federal or state income taxes.	_____	_____	_____
	h. Governmental laws, regulations, or determinations with adverse effect (wage-hour, safety, etc.).	_____	_____	_____
	i. Pension plans.	_____	_____	_____
	j. Revenue subject to renegotiation.	_____	_____	_____
	k. Self-insurance.	_____	_____	_____
	l. Product warranties.	_____	_____	_____
A B	5. Review legal fees for the period for indication of possible contingent liabilities.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
A B	6. Obtain from management a description and evaluation of litigation, claims, and assessments that existed at the balance-sheet date to the date the information is furnished, including an identification of those matters referred to legal counsel.	_____	_____	_____
A B	7. Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers.	_____	_____	_____
A B	8. Obtain assurance from management, ordinarily in writing, that it has disclosed all unasserted claims that the lawyer has advised them are probable of assertion and must be disclosed in accordance with FASB Statement No. 5 (AC C59). With the client's permission, inform the lawyer that the client has given the firm this assurance.	_____	_____	_____
A B	9. Have the client prepare a letter to its lawyer(s) to respond directly to us, as of the balance-sheet date, his or her summary and opinion as to the outcome of (a) all claims and lawsuits, threatened or pending, (b) tax assessments, proposed or made, (c) unbilled legal fees if any, (d) any other contingent liabilities of which the lawyer(s) have knowledge.	_____	_____	_____
<i>List of All Lawyer Letters Requested</i>		<i>Date Requested</i>	<i>Received</i>	
_____		_____	_____	
_____		_____	_____	
_____		_____	_____	
_____		_____	_____	
_____		_____	_____	
A B	10. Evaluate responses from lawyers and document conclusions:			
	a. If a response date is earlier than 2 weeks prior to date of auditors' report, obtain a written or oral update.	_____	_____	_____
	b. If update not obtained, document why. (If lawyer does not report any matters to us and management represents to us there are no litigation or unasserted claims, it <i>may</i> not be necessary to obtain an update.)	_____	_____	_____
	c. Cross-reference all recorded reported liabilities to current working papers.	_____	_____	_____
	d. Document your conclusion(s) as to the effect(s) on the financial statements and our report of matters included in the attorney letter(s).	_____	_____	_____
B	11. Consider the adequacy of financial statement disclosure for contingencies.	_____	_____	_____
C. Commitments and Guarantees				
A B	1. Inquire of appropriate officials as to the existence and amount of commitments, and determine that such commitments are accounted for and disclosed of as appropriate. Consider such matters as: (If none, so indicate.)			

<u>Obj.</u>	<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
a. Unfilled purchase commitments in excess of normal requirements or at prices materially in excess of prevailing market prices.	_____	_____	_____
b. Contractual obligations for purchase or sale of property, plant, and equipment or other investments.	_____	_____	_____
c. Unused letters of credit.	_____	_____	_____
d. Long-term leases.	_____	_____	_____
e. Assets pledged as collateral for loans or deposits.	_____	_____	_____
f. Cumulative preferred stock dividends in arrears.	_____	_____	_____
g. Mergers or acquisitions pending.	_____	_____	_____
h. Capital stock repurchase agreements.	_____	_____	_____
i. Futures contracts.	_____	_____	_____
j. Other.	_____	_____	_____
2. Determine that guarantees have been identified, accounted for, and disclosed in accordance with GAAP, including FASB Statement Nos. 5, 57, 107, and FASB Interpretation No. 45.	_____	_____	_____

D. Additional Procedures (if any)

E. Section Completion

- Based on the initial planning conclusions, on the results of the audit procedures performed, and upon the assessed level of risk for contingencies, commitments, and litigation, determine whether additional procedures need to be performed to obtain sufficient evidence regarding the financial statement assertions regarding those areas.
- The objectives of this audit program have been met.

This audit program section has been completed in accordance with firm policy.

XVII. Subsequent Events

Financial Statement Assertions:

- 1. Existence or occurrence.
- 2. Completeness.
- 3. Rights and obligations.
- 4. Valuation or allocation.
- 5. Presentation and disclosure.

Objectives:

- A. Existence of subsequent event—Any events or transactions occurring after the balance-sheet date, but before issuance of the financial statements and auditor’s report (subsequent events) which require adjustment or disclosure in the financial statements. (Assertions 1, 2, 3, and 4)
- B. Proper recognition—The financial statements have been adjusted for changes in estimates resulting from evidence provided by subsequent events. (Assertions 1, 2, 3, and 4)
- C. Proper disclosure—The financial statements include adequate disclosure of evidence provided by subsequent events which should not result in adjustment of the financial statements but should be disclosed. (Assertion 5)

Note: The letters preceding each of the above audit objectives serve as identification codes. These codes are presented in the objective column when the audit step accomplishes the specific objective. If the letter appears in brackets, i.e., [A], [B], etc., the audit procedure only secondarily accomplishes the objective.

Procedures:

A. Substantive Test Procedures

- A B C 1. Perform at or near the completion of field work the following auditing procedures with respect to the period after the balance-

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	sheet date for the purpose of identifying subsequent events that may require adjustment or disclosure in the financial statements:			
	a. Read the latest available interim financial statements; compare them with the financial statements being reported upon; and make any other comparisons considered appropriate in the circumstances. (Inquire of officers and other executives having responsibility for financial and accounting matters as to whether the interim statements have been prepared on the same basis as that used for the statements under audit.)	_____	_____	_____
	b. Read the available minutes of the stockholders, directors, and appropriate committees to the date of the auditor's report. As to meetings for which minutes are not available, obtain written information regarding matters dealt with at such meetings. Indicate minutes read, persons questioned, and any significant information found.	_____	_____	_____
	c. Scan the general ledger and journals for the period from the balance-sheet date to the date of the auditor's report and inquire into and investigate any large, unusual amounts or transactions. This test may be limited to the areas not covered in audit procedures applied in other programs, such as in the search for unrecorded liabilities.	_____	_____	_____
A B C	2. As of the date of the auditor's report, inquire of and discuss with officers and other executives having responsibility for financial and accounting matters as to:			
	a. The client's operations and management.	_____	_____	_____
	b. Changes in accounting/financial policies.	_____	_____	_____
	c. New borrowings or other financing.	_____	_____	_____
	d. Substantial contingent liabilities or commitments.	_____	_____	_____
	e. Whether there has been any significant change in assets or liabilities.	_____	_____	_____
	f. The current status of items in the financial statements being reported on that were accounted for on the basis of tentative, preliminary, or inconclusive data.	_____	_____	_____
	g. Unusual adjustments made during the subsequent period.	_____	_____	_____
	h. Commitments or plans for major purchases of capital additions or materials, and consideration of possible losses due to price trends.	_____	_____	_____
	i. Events occurring that have caused a decline in the value of any assets or have made any significant portion of fixed assets inoperable or obsolete.	_____	_____	_____
	j. Settlement of any liabilities for less than face value.	_____	_____	_____

<u>Obj.</u>		<u>Done By</u>	<u>Date</u>	<u>W/P Ref.</u>
	k. Liabilities in dispute or being contested.	_____	_____	_____
	l. Litigation, claims, and assessments.	_____	_____	_____
	m. Recent profit trends, losses of significant customers, unusual losses, substantial increases in costs, etc.	_____	_____	_____
	n. Examinations or audits instituted by regulatory agencies.	_____	_____	_____
	o. Employee benefit plans/pension plans.	_____	_____	_____
	p. Potential losses on marketable securities, carrying amounts of equity investments, loans, or other assets not already considered.	_____	_____	_____
	q. Regulatory commissions, governmental body requirements, or laws that could adversely affect the client.	_____	_____	_____
	r. Related-party transactions.	_____	_____	_____
	s. Expiration or cancellation of significant insurance coverage.	_____	_____	_____
	t. Whether any other unusual events or transactions occurred since the balance-sheet date.	_____	_____	_____
A	3. Assemble pertinent findings resulting from response of client's legal counsel and other auditing procedures concerning litigation, claims, and assessments.	_____	_____	_____
A B C	4. Obtain a letter of representation, dated as of the date of the auditor's report, from appropriate officials, generally the chief executive officer and chief financial officer in accordance with SAS No. 85 (AU section 333), as amended.	_____	_____	_____
A B C	5. Make such additional inquiries or perform such procedures deemed necessary and appropriate to dispose of questions that arise in carrying out the foregoing procedures, inquiries, and discussions.	_____	_____	_____
C	6. Consider adjustment of year-end financial statements or disclosure of any items resulting from the above procedures.	_____	_____	_____
C	7. Consider the possible effects on financial statements and disclosures of any matters causing substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.	_____	_____	_____

B. Section Completion

1. The objectives of this audit program have been met.

Suggested Supplemental Reference Materials for Use With Illustrative Audit Program for Corporations

.01 Suggested Supplemental Reference Materials

The following publications are useful in helping to determine the nature, timing, and extent of audit procedures. To order AICPA products, call 1-888-777-7077.

- **Audit and Accounting Guides (AICPA)**

Each guide describes relevant matters, conditions, and procedures unique to a particular industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- **Audit Risk Alerts (AICPA)**

Audit Risk Alerts complement the guidance provided in many of the Audit and Accounting Guides by describing current economic, regulatory, and professional developments that can have a significant impact on engagements.

- **Professional Standards (AICPA)**

The publication features the outstanding pronouncements on professional standards issued by the AICPA, including standards for audits, compilations, and reviews.

- **Accounting Standards—Original Pronouncements (FASB)**

This publication contains the original text of accounting standards pronouncements with superseded sections and amendments clearly noted.

- **Accounting Standards—Current Text (FASB)**

This publication is organized as follows: General Standards—generally applicable to all enterprises; Industry Standards—applicable to enterprises operating in specific industries. It includes comprehensive summaries of each subject, plus applicable standards, illustrations and examples.

- **Financial Statement Preparation Manual (AICPA)**

This publication provides sample statements and checklists for a variety of business enterprises and governmental units.

- **Disclosure Checklist series (AICPA)** (individual paperback versions of sections of the Financial Statement Preparation Manual)

The practice aids are invaluable to anyone who prepares financial statements and reports. The material has been updated to reflect AICPA, FASB, and GASB pronouncements and interpretations as well as SEC regulations.

- **Auditing Estimates and Other Soft Accounting Information (AICPA)**

This practice guide provides nonauthoritative guidance for handling the audit problems related to the audit of soft accounting information, including how SAS No. 57, Auditing Accounting Estimates, may be applied by practicing auditors.

- **Accounting Trends & Techniques (AICPA)**

This publication contains reporting methods, based on a cumulative survey; significant accounting presentations, discussions and trends. By following the lead of these industry front-runners, you can apply the latest techniques and improve your own reporting performance.

- **Technical Practice Aids (AICPA)**

This publication contains all outstanding AICPA Statements of Position and Practice Bulletins and offers carefully thought-out responses to selected inquiries received by the AICPA Technical Hotline and AICPA Technical and Industry Committees.

- **Auditing Practice Releases (AICPA)**

These publications are intended to provide practitioners with non-authoritative practical assistance concerning auditing procedures. Topics include: Confirmation of accounts receivable and audits of inventories.

- **Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools (AICPA)**

By focusing on unique reporting and auditing matters of commodity entities, this publication gives you nonauthoritative practical guidance on reporting on and auditing these financial statements.

- **Audit Implications of Electronic Document Management and The Information Technology Age: Evidential Matter (AICPA)**

These two Auditing Procedures Studies contain helpful and valuable guidance about the implications of electronic evidence on an audit.

- **Standard Confirmation Forms (AICPA)**

This form may be used to request a full report on credit balance, liabilities and contingent liabilities. It may also be used for a confirmation of bank balance only.

- **EITF Abstracts—A Summary of Proceedings of the FASB Emerging Issues Task Force**

- **Accountants' Handbook by Carmichael, Lilien & Mellman (Wiley)**

- **Montgomery's Auditing by O'Reilly, Hirsch, Defliese, and Jaenicke (Wiley)**

- **Handbook of Modern Accounting by Davidson & Weil (McGraw-Hill)**

- **Kohler's Dictionary for Accountants by Coopers & Ijiri (Prentice-Hall)**

AAM Section 6100

Audit Documentation—General

.01 Audit documentation¹ is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. SAS No. 96, *Audit Documentation* (AU section 339), provides authoritative guidance on the functions and nature, general content, and ownership and confidentiality of audit documentation.

.02 Other SASs contain specific documentation requirements and can be found in Appendix A of SAS No. 96 (AU section 339.15). Additionally, specific documentation requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement. Furthermore, SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, paragraph 83 (AU section 316.83), includes documentation requirements regarding the auditor's consideration of fraud and SAS No. 100, *Interim Financial Information*, paragraph 51 (AU section 722.51), includes documentation requirements the auditor should be aware of.

.03 The auditor should prepare and maintain audit documentation, the form and content of which should be designed to meet the circumstances of the engagement. Audit documentation serves mainly to provide the principal support for the auditor's report, including the representation regarding observation of the standards of fieldwork, which is implicit in the reference in the report to generally accepted auditing standards, and aid the auditor in the conduct and supervision of the audit.

.04 SAS No. 96 (AU section 339) provides authoritative guidance on audit documentation. SAS No. 96 supersedes SAS No. 41, *Working Papers*, and amends the following Statements:

- SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU section 312)
- SAS No. 56, *Analytical Procedures* (AU section 329)
- SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341)

General Discussion

.05 These sections present points of view on the organization and preparation of audit documentation.

.06 Proper planning is important in the design of specific audit documentation if they are to serve the objective of aiding the auditor in the conduct of his work. For example, a well-planned working paper may be designed to provide information that will be needed later in the preparation of tax returns and other required reports, such as those to regulatory bodies, and may therefore eliminate the need for examining the same documents twice to obtain necessary information. The quality, type, and content of the audit documentation are matters of the auditor's professional judgment. The individual preferences of auditors and firms may be informal common practices or expressed as part of a firm's formal written policies and procedures. A firm should consider the nature of its practice and the services commonly provided to its clients, as well as professional standards in developing its procedures and policies on audit documentation. Those procedures and policies should permit the flexibility necessary to meet the needs of individual engagements.

[The next page is 6201.]

¹ Audit documentation also may be referred to as working papers.

AAM Section 6200

Basic Elements of Format

.01 Audit documentation formats generally include at least the following for identification purposes:

- A title or heading comprised of (a) the name of the client, (b) a caption that briefly describes the paper's contents, (c) the nature of the engagement, and (d) the applicable period or closing date covered by the engagement.
- The initials or names of the auditors who performed and reviewed the work presented in the paper and the date the paper was completed.

.02 In instances when audit documentation requires more than one page, some auditors present the heading on only the lead page, fasten or staple all the applicable pages together as a unit and number each page, for example, 1 of 5, 2 of 5, and so forth. Many auditors index each working paper in some organized pre-established manner. This provides for ease in cross-referencing to other relevant papers, for more organized indexing and filing, and for a form of control over the audit documentation. (See AAM section 6400.)

.03 Some auditors purchase standard analysis paper that includes preprinted blocks for the initials or signature of the preparer and reviewer, and the dates on which the paper was prepared and reviewed. Others design their own signature and reference blocks and have them imprinted on all of their analysis paper and lined pads. These signature blocks may include captions such as the following:

- prepared by client and tested by
- prepared by
- date prepared
- date tested
- reviewed by
- date reviewed
- source
- audit documentation reference
- footed by
- extensions checked by

.04 Some auditors prefer to identify client preparation of schedules and analysis by notations or codes, such as "PBC," for prepared by client, rather than use a detailed signature and reference block.

[The next page is 6301.]

AAM Section 6300

Content of Audit Documentation

.01 The content of audit documentation varies with the circumstances and needs of the auditors on individual engagements. Some firms, however, include various general and specific instructions on audit documentation content in their policies concerning the working papers.

.02 Audit documentation should be sufficient to show that standards of fieldwork have been observed as follows:

- a. The work has been adequately planned and supervised.
- b. A sufficient understanding of internal control has been obtained to plan the audit and to determine the nature, timing, and extent of tests to be performed.
- c. Sufficient competent evidential matter has been obtained through the auditing procedures applied to afford a reasonable basis for an opinion.

.03 Examples of audit documentation are audit programs, analyses, memoranda, letters of confirmation and representation, abstracts or copies of entity documents, and schedules or commentaries prepared or obtained by the auditor. Audit documentation may be in paper form, electronic form or other media.

.04 The audit documentation should be sufficient to (a) enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent and results of auditing procedures performed, and the evidence obtained; (b) indicate the engagement team member(s) who performed and reviewed the work; and (c) show that the accounting records agree or reconcile with the financial statements or other information being reported on.

.05 In determining the nature and extent of the documentation for a particular audit area or auditing procedure, the auditor should consider the following factors:

- Risk of material misstatement associated with the assertion, or account or class of transactions
- Extent of judgment involved in performing the work and evaluating the results.
- Nature of the auditing procedure
- Significance of the evidence obtained to the assertion being tested
- Nature and extent of exceptions identified
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed

General Considerations

.06 The following are some general considerations on audit documentation content that may be helpful.

- Audit documentation should be sufficiently intelligible, clear and neat so that another auditor who has had no previous association with the engagement can review the papers and determine the nature and extent of the work done and how the conclusions were reached that support the resulting auditor's report.

- The content of an individual working paper or group of related papers should include identification of the (1) source of the information presented (e.g., fixed assets ledger, cash disbursements journal), (2) the nature and extent of the work done and conclusions reached (by symbols and legend, narrative, or a combination of both), and (3) appropriate cross-references to other working papers.
- Before completion of the engagement, all questions or exceptions in the working papers should be resolved. If for some reason the auditor must leave the assignment without resolving all items, he should provide an open items listing on a separate temporary paper for the in-charge auditor's attention. An unresolved exception or incomplete explanation in the working papers may be construed by some as indication of an inadequate audit.
- Information and comments in the audit documentation generally represent statements of fact and professional conclusions. Accordingly, language should be clear and free from such vague judgmental adjectives as "good" or "bad." Conclusions should be supported by documented facts, especially if they concern the adequacy of the client's records.
- Working papers should be viewed as an integrated presentation of information. The auditor should cross-reference working papers to call attention to interaccount relationships and to reference a paper to other working papers summarizing or detailing related information.
- The preparer should view the working papers as if he were the in-charge auditor. All inferences and conclusions should be supported in the working papers and no misleading or irrelevant statements should be made.
- It is preferable to have negative figures in audit documentation indicated by parentheses instead of red figures to preserve their identity if the papers are photocopied or microfilmed.

Specific Considerations

.07 Audit documentation should include abstracts or copies of significant contracts or agreements that were examined to evaluate the account for significant transactions. Additionally, audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested.

.08 Furthermore, the auditor should document audit findings or issues that in his or her judgment are significant, actions taken to address them (including additional evidence obtained), and the basis for the final conclusions reached. Significant audit findings or issues include the following:

- Matters that are both (a) significant and (b) involve issues regarding the appropriate selection, application and consistency of accounting principles with regard to the financial statements, including related disclosures. These matters often relate to accounting for complex or unusual transactions. In addition, these matters may refer to estimates and uncertainties, and if applicable the related management assumptions.
- Results of auditing procedures that indicate that the financial statements or disclosures could be materially misstated or auditing procedures need to be significantly modified.
- Circumstances that cause significant difficulty in applying auditing procedures that the auditor considered necessary.
- Other findings that could result in modification of the auditor's report.

.09 SAS No. 96 (AU section 339) amends SAS No. 59, *The Auditors' Consideration of an Entity's Ability to Continue as a Going Concern* (AU section 341). The amendment adds a requirement for the auditor to document:

- The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern.

- The work performed in connection with the auditors evaluation of management's plans
- The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated
- The consideration and effect of that conclusion on the financial statements, disclosures, and the audit report.

Timesaving Considerations

.10 There are a number of ways to save time and avoid unnecessary detail in audit documentation preparation. The following examples may be helpful.

- Whenever possible, have the client's employees prepare schedules and analyses. (This, of course, presupposes that the client has the necessary personnel to prepare the materials.)
- Use of a detailed audit program may eliminate the need for lengthy comments in the audit documentation on the scope of audit procedures. (However, some believe that such comments are still necessary when a detailed program is used; this is a matter of individual firm judgment.)
- Analyze asset (or liability) accounts and their related expense or income accounts on the same working paper. Examples include property, plant, and equipment, accumulated depreciation and related depreciation expense; notes receivable, accrued interest receivable and interest income; notes payable, accrued or prepaid interest, and interest expense; and accrued taxes and related provisions for tax expense.
- Avoid unnecessary computations. For example, if only the totals are meaningful and can be tested by a single independent computation, check the total and avoid unnecessary checking of details.
- Consider using carryforward analyses for accounts that tend to remain constant each year or vary only in accordance with a constant predetermined formula. Examples may include long-term assets and related depreciation or amortization such as plant, equipment, and intangibles, long-term debt with predetermined payment schedules, and capital stock.
- Consider using adding machine tapes instead of writing separate lists. Enter names or explanations on the tapes, when appropriate.
- Use symbols (tick marks) whenever possible, especially when the same symbol applies to several working papers.

Symbols (Tick Marks)

.11 When using symbols, it should be helpful to consider the following basic concepts:

- Symbols are merely a shorthand means of explaining a work step performed on a particular item of data. Symbols serve as means of conserving time and space and, if properly used, may ease review of the audit documentation.
- For a working paper to be clear to a reviewer or other reader, each symbol must be clearly explained. The explanation may be located on the same page as the items subjected to the work step, or on a separate legend that is clearly cross-referenced to and from the page that presents the applicable items.
- Symbols should be kept simple, distinctive and clear so they can be quickly written by the preparer and easily identified by a reviewer.

.12 Applying these basic concepts is not that simple. Various auditors have conflicting notions about symbols. For example, some believe a set of standardized symbols can expedite preparation and review. Others believe that a set of standardized symbols is impractical because it lacks flexibility. Because it is generally agreed that symbols are an effective timesaver, it is desirable for firms to establish and communicate a policy on their use to maximize their potential effectiveness.

.13 Commonly used symbols, as noted, should be simple and distinctive, not elaborate hieroglyphics. The most common are variations on a simple checkmark—for example, a checkmark with a slash, a checkmark with a circle at the end, a double checkmark, and any one of these within a circle. This abbreviated listing alone provides eight distinctive tick marks. Symbols may also include circled letters or numbers.

AAM Section 6400

Organization and Filing (Indexing)

.01 Some auditors organize their audit documentation during the course of an engagement into general categories such as the following:

- Planning and administration.
- Internal control understanding and assessment of control risk.
- Substantive test audit documentation arranged in order of the balance sheet and income statement classifications.
- Trial balances, consolidating working papers, journal entries (adjustments, reclassifications, eliminations for consolidation), and potential entries.
- Draft reports, financial statements, and notes.
- Programs, checklists, and questionnaires (some keep these as separate units, others interfile them among working papers by statement classifications).
- General matters such as current minutes, contracts, and articles of incorporation that may apply to future engagements as well as current work.

Under this approach, actual indexing and filing would be deferred until the conclusion of the engagement.

Predetermined Indexing

.02 Other practitioners and firms may use a predetermined indexing approach so that working papers can be indexed while the field work is still in progress. This offers the following advantages:

- Better control over audit documentation during the performance of field work.
- Constant arrangement of audit documentation in logical order to aid in review.
- Less time required in assembling and binding them into indexed files.
- Quicker access to specific audit documentation after it is filed.

.03 Predetermined indexing involves establishing a standard code for each section of the audit documentation, using letters and numbers, or numbers only. For example—

	<i>Two Possible Alternatives</i>	
Working trial balance—assets	B/S-A	T/B-1
Working trial balance—liabilities	B/S-L	T/B-2
Working trial balance—income & expense	P/L	T/B-3
Cash summary schedule	A	10
Receivables summary schedule	B	20
Inventory summary schedule	C	30

.04 Predetermined indexing requires recognition of the need for flexibility to meet unanticipated audit documentation needs or specialized industry requirements and it requires care to avoid undue complexity. Excessively complex references may obstruct rather than ease audit documentation preparation, cross-referencing and filing. Accordingly, it is helpful to develop an organizational plan adaptable to each section of the audit documentation. For example, some accountants classify working papers as lead schedules, primary detail, and secondary detail which might result in the following classification scheme for the above examples for cash:

	<i>Using Letters and Numbers</i>	<i>Using Only Numbers</i>
Lead schedule	(A)	(10)
Primary detail schedules	(A-1) (A-2) etc.	(10-1) (10-2) etc.
Secondary detail schedules	(A-1-1) (A-1-2) (A-1-3) (A-2-1) (A-2-2) (A-2-3)	(10-1-1) (10-1-2) (10-2-1) (10-2-2)

.05 Predetermined (standardized) indexing systems may be printed on separate pages for reference during the performance of field work and insertion in the front of audit documentation binders or files when the work is completed. Some firms have their uniform indexing systems printed directly on their file or binder covers.

.06 A well-organized indexing system need not be too complex. On a fairly small engagement, the indexing system may be a lead schedule divider tab between each major group of accounts with the name of the account on it (e.g., cash or accounts receivable) with the related workpapers filed behind the lead schedule without being individually indexed. At the completion of the engagement, the pages can be consecutively numbered within each account group (e.g., 1 of 10, 2 of 10, etc.), since there typically are not numerous or complex layers of supporting schedules, extensive cross-referencing can be avoided.

.07 On large engagements, particularly those with detailed charts of accounts, firms may consider it necessary to develop more complex indexing systems. In one such system, standard index number series are assigned as follows:

Current audit documentation.	1000—7000
Permanent file	7100—9999

.08 In this system, each index number consists of four digits, with the addition decimals if necessary. Numbers ending with double zero are reserved for lead schedules whose total agrees with a line item on the working trial balance (index 1400). Single zeros are used for specific types of accounts (such as 2010, petty cash funds).

.09 Certain index numbers can be permanently assigned to each major financial statement classification. For instance, index 2000 may be assigned to cash. If various bank accounts exist, the cash schedules are assigned index numbers 2002, 2003, etc. Documentation such as supporting confirmations and lists of outstanding checks would be assigned index numbers commencing with 2001.1, 2001.2, etc. As for the permanent audit documentation file, index 9300, for example, may be assigned to internal control. Accordingly, flowcharts and related questionnaires would be assigned index numbers in that series.

Current and Permanent Files

.10 Audit documentation files are generally classified as current files and permanent (continuing) files. Current files contain information that is pertinent to a single engagement. Permanent files include information relevant to several recurring engagements. Some firms have their binder or file covers preprinted as current or permanent accompanied by pertinent portions of their uniform audit documentation indexes.

.11 A common challenge to many auditors is to keep the permanent file complete and current, and free from outdated or irrelevant materials that belong in an inactive file of superseded materials.

.12 Some auditors who have confronted one too many unwieldy permanent files believe all audit documentation should be classified as current with certain materials designated as matters of continuing interest to be carried forward each year until they become outdated. Under this approach, a firm may preprint its complete index on one type of file or binder cover and provide space to indicate whether specific contents are continuing or carryforward in nature.

.13 The permanent files should be reviewed and updated, as needed, annually. Examples of documents that may be found in permanent files are listed in AAM section 6400.15(p).

Practice Tip

The audit documentation files should contain copies of final executed documents. Any drafts or unsigned versions of documents should be replaced with final versions.

Audit Documentation Retention

.14 Determining the proper periods for retaining records is a major decision for practitioners. Records should be preserved for only as long as they serve a useful purpose or until all legal requirements are met. Record retention periods vary among firms; however, retention periods should generally correspond with the longest statute of limitations prevailing in each state for breach of contract, breach of fiduciary duty, and professional liability claims.

.15 Audit documentation may be retained permanently or for periods corresponding with the longest state statute of limitations, as noted above. Generally, certain audited financial statement work-paper data, such as accounts receivable confirmations are destroyed after ten years. Examples of audit documentation that should be retained permanently include auditor's reports, reports filed with the SEC, tax returns for current clients, and audit documentation for current clients. Some firms divide the retention period into two parts, records are first filed in the office and later placed in storage (e.g., three years in the office and then permanently in storage). Other records, such as audit documentation files for former clients, may be retained for three years in the office, seven years in storage and then destroyed after the retention period. No material should be destroyed without the specific approval of the engagement partner. An annual schedule should be established for reviewing and purging firm data. Since there is substantial variation in the retention periods used by firms, each firm should carefully consider its requirements and consult with legal counsel before adopting a retention period.

.16 For further guidance on record retention, see the *AICPA Management of an Accounting Practice Handbook*.

Ownership and Confidentiality of Audit Documentation

.17 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes.

.18 The auditor has an ethical and in some situations a legal obligation to maintain the confidentiality of client information. Because audit documentation contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

.19 The auditor should adopt reasonable procedures to prevent unauthorized access to the audit documentation.

.20 Certain audit documentation may sometimes serve as a useful reference source for the client, but it should not be regarded as part of, or a substitute for, the client's accounting records.

Index Topics

.21 The following is a list of topics to consider in developing a standard index for audit documentation. This list is detailed, but is by no means all-inclusive. For example, specialized industries such as life insurance and banking need other specialized topics. Several of the topics may be eliminated, condensed or expanded, depending on the auditor's needs and preferences. Topics that some auditors prefer to include in both the permanent and current files or only in the permanent files are followed by the letter (P).

Planning and administration

- Time & budget data
- General correspondence & memos
- Planning memos—current
- Planning notes & confirm copies for use in next engagement
- Engagement letters
- Schedules & analyses to be prepared by client
- Minutes
- Checklist of an administrative nature if required by firm policy

Audit or work program (Note 1)

Matters of continuing concern

- Client's industry—background (P)
- Description & brief history of client (P)
- Data & ratio analysis of client's operations (P)
- Client's facilities (P)
- Articles of incorporation (P)
- Bylaws (P)
- Current contracts & agreements (P)
 - Debt agreements (P)
 - Leases (P)
 - Labor contracts (P)
 - Agreements with officers & key people (P)
 - Pension plans (P)
 - Profit-sharing plans (P)
 - Stock warrants (P)
 - Stock options (P)
 - Other agreements (P)

- Client's accounting policies & procedures (P)
- Carryforward analyses (Note 2)

Internal control

- Internal control questionnaire, narratives, flowcharts, etc. (Note 3)
- Initial assessment of control risk memos
- Tests of controls

Reports, financial statements and footnotes, trial balances, and assembly sheets

- Reports & financial statements (including letter, if any, on reportable conditions in internal control)
- Consolidating working papers
- Consolidation eliminating entries
- Trial balance
- Adjusting journal entries
- Reclassification journal entries
- Recap of possible adjusting entries
- Assembly sheets supporting footnote disclosures (if the information is not included elsewhere in the audit documentation)
- Disclosure checklists (if required by firm policy)
- Supporting schedules (if required for reports to regulatory bodies or other reports)
- Tax return information & work sheets (Note 4)

Assets

- Cash
- Marketable securities (and related income)
- Notes receivable (and related interest)
- Accounts receivable
 - Summary and analyses
 - Confirmation procedures (Notes 2 and 5)
- Allowance for doubtful accounts & notes (Note 2)
- Inventories
 - Summary and analyses
 - Price tests, cost & market
 - Obsolescence review
 - Observation, test counts & cutoff data
 - LIFO determinations
- Prepaid expenses
- Other current assets

- Investments
- Property, plant & equipment, and accumulated depreciation, depletion & amortization (Note 2)
- Intangible assets, deferred charges & amortization (Note 2)
- Other assets
- Intercompany accounts

Liabilities

- Notes payable (and related interest)
- Accounts payable
- Accrued liabilities other than income taxes
- Accrued income taxes (current & deferred), related provisions & credits (Note 2)
 - Federal
 - State & local
- Other current liabilities
- Long-term debt (including current maturities and capitalized leases) (Note 2)
- Other long-term liabilities
- Deferred income (Note 2)

Commitments and contingencies

- Attorneys' letters
- Abstracts of commitments & contingencies noted during review of minutes, contracts & agreements, confirmation responses, etc.
- Subsequent events review
- Management representation letter

Equity (capital accounts) (Note 2)

- Capital stock
- Additional paid-in capital
- Treasury stock
- Retained earnings
- Partnership capital

Revenue and expenses

- Operating revenues
- Cost of sales
- Selling, general & administrative
- Other operating expenses
- Other income

- Other expense
- Extraordinary & unusual items
- Secondary schedules
 - Maintenance & repairs
 - Taxes other than income taxes
 - Rents
 - Royalties
 - Advertising costs
 - Legal fees
 - Interest expense recap

Notes to User:

1. Alternate practices of filing audit programs include:
 - (a) Putting the program in a binder that is separate and distinct from the current and permanent files.
 - (b) Putting the signed off program in the current file.
 - (c) Keeping a master copy of the program in the permanent file with the signed off copies dispersed among the related audit documentation segments in the current file.
2. Certain classifications may lend themselves to carry-forward audit documentation. Examples include allowances for doubtful accounts, brief summaries of confirmation response statistics, accumulated depreciation and amortization, deferred income taxes and open tax positions, long-term debt, and capital accounts.
3. Internal control questionnaires may be filed as separate binders or as part of current of permanent files.
4. Some firms and practitioners keep tax return preparation working papers in files that are completely separate from other types of engagement working papers.
5. For situations involving voluminous confirmation responses or bulk inventory listings, the bulk materials may be filed in separate binders that are cross referenced to the pertinent audit documentation (for example: accounts receivable, accounts payable, and inventory).

Correspondence, Confirmations & Representations

These samples are presented for illustrative purposes only. They are intended as mere conveniences for users of this Manual who may want points of departure when designing their own formats to meet their individual needs. These illustrations are neither all inclusive nor are they prescribed minimums. Auditors and accountants are to rely on professional standards and their individual professional judgment in determining what may be needed in the circumstances.

AAM Section 7100

Control of Confirmations and Correspondence

.01 Generally, clients prepare correspondence and confirmation requests on their own letterhead and submit to the auditor the signed originals and copies. The auditor may obtain one or more copies to serve as file copies for the current audit documentation, second requests and manuscript copies for the next engagement.

.02 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.03 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (a) the combined assessed level of inherent and control risk is low, (b) a large number of small balances is involved, and (c) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration.

.04 The confirmation requests should be reviewed to the extent the auditor considers necessary. For example, the auditor may perform the following for accounts receivable confirmation requests before they are mailed:

- Compare the names and addresses to the client's records.
- Compare balances per confirmation requests to the subsidiary ledger.

.05 The requests would then be stuffed in envelopes and submitted to the post office under the auditor's control.

.06 The auditor controls the mailings and receipt of responses so that the confirmation process is independent of the client.

.07 Mailing envelopes have the auditor's office or post office box number as the return address so that undeliverable letters are returned to the auditor and not to the client. For mailings, the auditor may provide the envelopes or affix a label on the client's envelope that covers the client's return address and replaces it with the auditor's address.

.08 Reply envelopes addressed to the auditor are enclosed with the request letter. Reply envelopes generally have prepaid postage to encourage responses. Some auditors also use codes on the reply envelopes so that responses may be sorted by engagement before the mail is opened. This feature may be particularly useful when there are several engagements that involve voluminous mailings.

.09 If the client objects to use of the auditor's name and address, some auditors suggest that a post office box in the client's name be used, with the returns to be opened under the auditor's control for the confirmation process, and that the post office be instructed that after the box is closed subsequent mail be forwarded to the auditor.

[The next page is 7201.]

AAM Section 7200

Requests for Confirmations and Related Materials

Wording of Confirmation Request Forms

.01 Forms and correspondence used for confirmation requests should state clearly that the client is requesting that a reply be sent to the CPA. Forms and correspondence used for information requests for engagements other than audits should not refer to “an audit.” They should also use the term “accountant(s)” rather than “auditors.” Suggested wording follows:

Please send the following information to our certified public accountants (*name and address of accountants*) who are performing accounting services for the company.

.02 The samples of correspondence in this section include language that refers to auditors and an audit of the client’s financial statements on the assumption that an audit is being performed. This language needs to be modified if services other than an audit are being performed.

.03 Request for Bank Cutoff Statement*[Prepared on Client's Letterhead]**[Date]*

Financial Institution Official
 First United Bank
 Anytown, USA 00000

In connection with an audit of the financial statements of *(name of client)* as of *(balance-sheet date)* and for the *(period)* then ended, we request that you send the following information directly to our auditors *(name and address of auditors)* as of close of business *(balance-sheet date)*:

1. The information requested on the enclosed standard form(s) to confirm account balance information with your financial institution.
2. For the account numbers listed below, statement(s) of our account(s) and the related paid checks for the period from *(balance-sheet date)* to *(two weeks subsequent to the balance-sheet date)* inclusive.

<i>Account Number</i>	<i>Account Name</i>
_____	_____
_____	_____
_____	_____
_____	_____

Sincerely,

[Name of Customer]

By: _____

Notes: (A) This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

(B) The request should be sent at least ten days prior to the audit date so the bank will be able to provide the information requested and to render the cutoff statements as requested. If the request does not reach the bank before the cutoff date, the cutoff statement will include transactions after that date.

(C) The letter may also include requests for:

- Confirmation of all securities or other items held for the clients account as of the closing date for collection or safekeeping, or as agent or trustee (a listing should be provided including titles and account numbers).
- Confirmation of the list of authorized signers for the above accounts. (This may have been previously requested at a preliminary date in connection with assessment of control risk.)

.04

STANDARD FORM TO CONFIRM ACCOUNT BALANCE INFORMATION WITH FINANCIAL INSTITUTIONS

CUSTOMER NAME

Financial [_____]
Institution's
Name and
Address [_____]

] We have provided to our accountants the following information as of the close of business on _____, 20____, regarding our deposit and loan balances. Please confirm the accuracy of the information, noting any exceptions to the information provided. If the balances have been left blank, please complete this form by furnishing the balance in the appropriate space below * Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other deposit and loan accounts we may have with you comes to your attention, please include such information below Please use the enclosed envelope to return the form directly to our accountants.

1. At the close of business on the date listed above, our records indicated the following deposit balance(s):

ACCOUNT NAME	ACCOUNT NO.	INTEREST RATE	BALANCE*

2. We were directly liable to the financial institution for loans at the close of business on the date listed above as follows:

ACCOUNT NO / DESCRIPTION	BALANCE*	DATE DUE	INTEREST RATE	DATE THROUGH WHICH INTEREST IS PAID	DESCRIPTION OF COLLATERAL

(Customer's Authorized Signature)

(Date)

The information presented above by the customer is in agreement with our records. Although we have not conducted a comprehensive, detailed search of our records, no other deposit or loan accounts have come to our attention except as noted below.

(Financial Institution Authorized Signature)

(Date)

(Title)

EXCEPTIONS AND/OR COMMENTS

Please return this form directly to our accountants:

[_____]

* Ordinarily, balances are intentionally left blank if they are not available at the time the form is prepared.

[_____]

.05 Request for Confirmation of Petty Cash Fund and Advances to Employees*[Prepared on Client's Letterhead]**[Date]**[Name]**[Address]*

Our auditors, *(name and address of auditors)* are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of the petty cash fund (or amount of advances) in your possession as of December 31, 20XX which was shown by our records as \$_____.

Please indicate in the space provided below whether the amount above agrees with your records. If not, please send the auditors any information you have that will help them reconcile the difference.

After signing and dating your reply, please return it directly to the auditors. A stamped, addressed enveloped is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

The foregoing information is in agreement with my records as of December 31, 20XX with the following exceptions (if any):

Date: _____ Signed: _____

.06 Securities and Cash in Custodian or Trust Accounts*[Prepared on Client's Letterhead]**[Date]**[Name of Custodian or Trustee]**[Address]*

Our auditors, *(name and address of auditors)* are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the enclosed list of securities owned at *(date)* and the amount of principal and income of cash held by you at that date for each of the following accounts [Notes (B) & (C)]:

(If a list is not obtained from the client, the auditor should complete the following for each account:

	Name of Account	Account No. [Note (A)]	Amount Held
1.	_____	_____	_____
2.	_____	_____	_____
3.	_____	_____	_____)

Please also indicate to the auditors whether to your knowledge any of the securities are pledged or otherwise encumbered.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

Notes: (A) Use the custodian or trustee's account number.

(B) This letter may be expanded, if necessary, to request cutoff statements of activity (principal and interest) in the accounts.

(C) Sometimes this request is combined with a request for cutoff bank statements and the standard form to confirm account balance information with financial institutions. However, it may be more practical to send separate letters because a bank's commercial banking and trust departments are usually separate operations.

.07 Securities Held by Brokers

[Prepared on Client's Letterhead]

[Date]

[Broker's Name]

[Address]

In connection with the audit of our financial statements, please send directly to our auditors (*name and address of auditors*), a statement of our account(s) with you as of (*date*), indicating the following information:

1. Securities held by you for our account.
2. Securities out for transfer to our name.
3. Any amounts payable to or due from us.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

Notes: (A) The request should be sent so it reaches the broker sufficiently in advance of the listing date for the broker to respond in a practical manner.

(B) It may be helpful to include the account number(s) used by the broker for the client's account(s).

.08 Sample Receipts for Return of Cash or Securities Counted by Auditor's Representative, and Cutoff Bank Statements Received Directly by the Auditors

Cash Count

The above detailed items were counted in my presence and returned to me intact by *(individual's name)*, representative of *(auditor's firm name)*.

(Date and Time)

Custodian: _____

(Custodian's Signature)

Securities Count

Received intact from *(individual's name)*, representative of *(auditor's firm name)*, the securities listed above contained in Box _____ of the *(name of bank or custodian)* which were counted by him or her in my presence (or presented to him or her for count).

Date and Time: _____

Signed: _____

Title: _____

Cutoff Bank Statement(s)

Received intact from *(individual's name)*, representative of *(auditor's firm name)*, the cutoff bank statements and related paid checks for the period from _____ to _____ *(periods indicated)* for the accounts listed below:

Date and Time: _____

Signed: _____

Title: _____

Notes: (A) Receipt(s) should be written and signed in *ink*.

(B) For counts of petty cash funds, the receipt may be written directly on the bottom of the petty cash-count working paper. For security counts and returns of cutoff bank statements, the receipt may be prepared as a separate working paper.

.09 Accounts Receivable—Positive*[Prepared on Client's Letterhead]**[Customer Name]**[Address]*

In connection with the audit of our financial statements, please confirm directly to our auditors (*name and address of auditors*) the amount of your indebtedness to us which according to our records as of (*date*) amounted to \$_____.

If the amount shown is in agreement with your records. Please check "A" below.

If the amount is not in agreement with your records, please check and complete "B" below.

After checking the appropriate response, please sign and date your reply and mail it directly to our auditors in the enclosed envelope. DO NOT SEND ANY PAYMENTS to our auditors.

Very truly yours,

[Client's Authorized Signature]

A _____ The balance above agrees with my records.

B _____ My records show a balance of \$_____.

The difference may be due to the following:

[Signed by]

[Date]

.10 Accounts Receivable—Negative

[May be a sticker or stamp used on client's statements to customers]

PLEASE CHECK THIS STATEMENT

If this statement is *not correct* please write promptly (using the enclosed envelope), giving details of any differences, directly to our auditors,

[Name of auditors]

[Address of auditors]

who are now conducting an audit of our financial statements.

If you do not write to our auditors, they will consider this statement to be correct.

Remittances should NOT be sent to the auditors.

Notes: (A) A negative confirmation may also be requested in letter form using similar wording.

(B) The auditor should consider sending confirmation requests at the time of the client's regular monthly billings. Coordination of confirmation procedures with the client's routine preparation and mailing of statements may offer efficiency to both the auditor and client.

(C) Negative confirmation requests may be used as substantive procedure to reduce audit risk *only* when three conditions exist: (1) the combined assessed level of inherent and control risk is low, (2) a large number of small balances is involved, and (3) the auditor has no reason to believe that the recipients of the request are unlikely to give them consideration.

.11 Notes Receivable*[Prepared on Client's Letterhead]**[Date]**[Name]**[Address]*

Our auditors (*name and address of auditors*) are performing an audit of our financial statements. Accordingly, please confirm directly to our auditors the amount of your indebtedness due us as of (*date*), which our records show as follows:

Type of indebtedness	_____
Initial date of indebtedness	_____
Original amount of indebtedness	_____
Unpaid principal	_____
Interest rate	_____
Interest paid to	_____
Periodic payments required	_____
Description of collateral	_____

If the above information is in agreement with your records, please so indicate by signing in the place provided below and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please so note in the space provided the particulars shown in your records and any information which may help reconcile the difference from our records. **Payments should not be sent to the auditors.**

Very truly yours,

[Client's Authorized Signature]

.12 Inventories Held by Warehouses or Others When Listing Is Not Provided by Client

[Prepared on Client's Letterhead]

[Date]

[Name of Warehouse]

[Address]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please send directly to our auditors the following information about merchandise held in your custody for our account at (*date*):

1. Quantities on hand; for each lot please indicate the following:
 - a. Lot number (list each lot separately)
 - b. Date received
 - c. Kind of merchandise
 - d. Unit of measure or package
 - (1) Number of units
 - (2) Kind of units (box, can, crate, quart, pound, dozen, etc.)
2. A statement about how you determined the above requested quantities; specify whether they were determined by physical count, weight or measure, or if they represent your book record.
3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.
4. Statement of any known liens against this merchandise.
5. Amount of unpaid charges, if any, as of (*date*).

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

.13 Inventories Held by Warehouses or Others When Listing Is Provided by Client

[Prepared on Client's Letterhead]

[Date]

[Name of Warehouse]

[Address]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about the merchandise held by you for our account as of (*date*):

1. The correctness of the quantities shown on the enclosed listing of such merchandise prepared from our records (a second copy is enclosed for your files). If the enclosed listing differs from the quantities you held for us as of (*date*), please include details of the specific differences in your response to our auditors.
2. Your statement on how you determined the correctness of the quantities you are confirming; please specify whether determined by physical count, weight or measure, or whether the quantities are from your records.
3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.
4. Statement of any known liens against these goods.
5. Amount of any unpaid charges as of (*date*).

Please mail your reply directly to (*name and address of auditors*). A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

.15 Pension Plan Actuarial Information

FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits* (AC P16 and P40), provides reduced disclosure requirements for nonpublic companies. Part C of this letter assumes companies have elected the reduced disclosures allowed by that statement. Paragraph 8 of FASB Statement No. 132 describes the reduced disclosure requirements. For companies not electing the reduced disclosures, information required for disclosure can be obtained from Parts B and D of the letter.

[Prepared on Client's Letterhead]

[Date]

[Name of Actuary]

[Address]

In connection with the audit of our financial statements for the period ending (*balance-sheet date*) by our independent auditors (*name and address of auditors*), please furnish them the information described below as it pertains to the XYZ Pension Plan, which is a defined benefit plan. For your convenience in response to those requests, you may supply pertinent sections, properly signed and dated, of your actuarial report, or pension expense report, if they are available and if they contain the requested information.

A. Please provide a brief description of the following:

1. The employee group covered.
2. The benefit provisions of the plan used in the calculation of the net periodic pension cost for the period and of the accumulated benefit obligation and the projected benefit obligation at the end of the period. Please identify any such benefit provisions that had not taken effect in the year. Please also provide the date of the most recent plan amendment included in your calculation. Please identify any participants or benefits excluded from the calculations, such as benefits guaranteed under an insurance or annuity contract.
3. The method and the amortization period, if any, used for the following:
 - a. Calculation of a market-related value of plan assets, if different from the fair value.
 - b. Amortization of any transition asset or obligation.
 - c. Amortization of unrecognized prior service cost.
 - d. Amortization of unrecognized net gain or loss.
4. Any substantive commitments for benefits that exceed the benefits defined by the written plan that are included in the calculations.
5. Determination of the value of any insurance or annuity contracts included in the assets.
6. Nature and effect of significant plan amendments and other significant matters affecting comparability of net periodic pension cost, funded status, and other information for the current period with that for the prior period.
7. The following information relating to the employee census data used in calculating the benefit obligations and pension cost:
 - a. The source and nature of the data is _____ and the date as of which the census data was collected is _____.
 - b. The following information concerning participants:

<u>Participants</u>	<u>Number of Persons</u>	<u>Compensation (if applicable)</u>
Currently receiving payments	_____	_____
Active with vested benefits	_____	_____
Terminated with deferred vested benefits	_____	_____
Active without vested benefits	_____	_____
Other (describe)	_____	_____

Note: If information is not available for all the above categories, please indicate the categories that have been grouped and describe any group or groups of participants excluded from the above information.

c. Information for the following individuals contained in the census:

<u>Participant's Name or Number</u>	<u>Age or Birth Date</u>	<u>Sex</u>	<u>Salary</u>	<u>Date Hired or Years of Service</u>
---	------------------------------	------------	---------------	---

Note to Auditor: The auditor should select information from employer records to compare with the census data used by the actuary. In addition, the auditor may wish to have the actuary select certain census data from his/her files to compare with the employer's records.

B. Please provide the following information on the net periodic pension cost for the period ending on _____:

1. Service cost^{*} \$ _____
2. Interest cost^{*} _____
3. Expected return on assets^{*} _____
4. Other components^{*} _____
 - a. Amortization of unrecognized net loss or (gain) from earlier periods _____
 - b. Amortization of unrecognized prior service cost _____
 - c. Amortization of the remaining unrecognized net obligation or (asset) existing at the date of the initial application of FASB Statement No. 87—transition obligation or (asset) _____
 - d. Amount of loss (or gain) recognized due to a settlement or curtailment. _____
 - e. Net total of components
(a + b + c + d) \$ _____
5. Net periodic pension cost:
(1 + 2 – 3 + 4e) \$ _____

6. The above measurement of the net periodic pension cost is based on the following assumptions:

Weighted-average discount rate	_____ %
Weighted-average rate of compensation increase	_____ %
Weighted-average expected long-term rate of return on plan assets	_____ %

Please describe the basis on which the above rates were selected and whether the basis is consistent with the prior period.

Please briefly describe the other assumptions used in the above measurement.

^{*} This information (or parts thereof) is required for disclosure by companies that do not elect the reduced disclosures permitted by FASB Statement No. 132. In addition, the information may be needed for any company to determine that the accounting for the plan is in accordance with FASB Statement No. 87, *Employers' Accounting for Pensions*, and FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*.

7. The calculations of the items shown in B1 and B5 are based on the following:

Asset information at _____

Census data _____

Measurement date (must not be more than three months before the end of the last fiscal year) _____

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in B1 to B5.

- C. Please provide the following information for disclosure in the financial statements for the period ending _____:

- | | <i>Estimated</i> |
|---|------------------|
| 1. Projected Benefit Obligation | \$ _____ |
| 2. Fair Value of Plan Assets | _____ |
| 3. Funded Status of the Plan (2-1) | _____ |
| 4. Employer Contributions to the Plan | _____ |
| 5. Participant Contributions to the Plan | _____ |
| 6. Benefits Paid | _____ |
| 7. (Accrued) or prepaid pension cost in the company financial statements | _____ |
| 8. The amount of any intangible asset recognized in accordance with paragraph 37 of FASB Statement No. 87, as amended. | _____ |
| 9. The amount of accumulated other comprehensive income recognized in accordance with paragraph 37 of FASB Statement No. 87, as amended. | _____ |
| 10. The amount included in other comprehensive income for the period arising from a change in the minimum pension liability recognized in accordance with paragraph 37 of FASB Statement No. 87, as amended. | _____ |
| 11. The above amount of the projected benefit obligation is measured based on the following assumptions: | |
| Weighted-average discount rate | _____ % |
| Weighted-average rate of compensation increase | _____ % |
| Please provide a brief description of the other assumptions used in the measurement. | |
| 12. The calculation of the items shown in C1 to C10 is based on the following: | |
| Asset information at _____ | |
| Census data at _____ | |
| Measurement date (must be not more than three months before the current fiscal year end) _____ | |
| Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in C1 to C10. | |
| 13. Please describe any significant events noted subsequent to the current year's measurement date and as of the date of your reply to this request and the effects of those events, such as a large plant closing, which could materially affect the amounts shown in C1 to C10. | |
| 14. Please describe any significant transactions between the employer or related parties and the plan during the period, including, if applicable, the amounts and types of securities of the employer and related parties included in plan assets and the amount of future annual benefits covered by insurance contracts issued by the employer or related parties. | |

- D. Please provide an analysis for the period showing beginning amounts, additions, reductions, and ending amounts of the:
1. Projected benefit obligation,
 2. Fair value of plan assets,
 3. Unrecognized prior service cost,
 4. Unrecognized net loss (gain),
 5. Net transition obligation (asset), and
 6. Accumulated benefit obligation (ending amount only).
- E. Please provide our independent auditors with descriptions and the amounts of gains or losses from combinations, divestitures, settlements, curtailments or termination benefits during the year, such as:
1. Purchases of annuity contracts,
 2. Lump-sum cash payments to plan participants,
 3. Other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation, and eliminates significant risks related to the obligation and assets,
 4. Any events that significantly reduced the expected years of future service of employees,
 5. Any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service, or
 6. Any special or contractual termination benefits offered to employees.
- F. Was all of the information above determined in accordance with FASB Statement Nos. 87, 88, and 89 (including the FASB's Guides to Implementation of Statements 87 and 88 and the American Academy of Actuaries', "An Actuary's Guide to Compliance with Statement of Financial Accounting Standards No. 87") to the best of your knowledge? If not, please describe any differences.
- G. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.

Please mail your response directly to [Audit Firm's Name and Address] in the enclosed return envelope as soon as possible, but no later than [Date].

Very truly yours,

[Client's Authorized Signature]

* This information (or parts thereof) is required for disclosure by companies that do not elect the reduced disclosures permitted by FASB Statement No. 132. In addition, the information may be needed for any company to determine that the accounting for the plan is in accordance with FASB Statement No. 87, *Employers' Accounting for Pensions*, and FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*.

.16 Pension Plan Assets Held by Trustee

[Prepared on Client's Letterhead]

[Date]

[Name of Trustee or Custodian]

[Address]

Our auditors (*name and address of auditor*) are conducting an audit of our financial statements. Accordingly, please provide our auditors directly with a listing of the assets including market values as of (*date*) for our employees' pension trust (*title and trustee's account number*).

Please also provide the auditors with the following information about our employees' pension trust for the period from (*beginning of period*) to (*end of period*) [see note below]:

1. Contributions by the Company during the above period.
2. Contributions by employees during the above period.
3. Payments to beneficiaries during the above period.
4. Any unpaid fees due for services rendered to (*balance-sheet date*).

Please send your reply directly to our auditors. A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

Note: A listing of the assets might not be requested if one had already been received by the client. In that case, the auditor might want the trustee to confirm the total market value per the listing.

.17 Notes Payable*[Prepared on Client's Letterhead]**[Date]**[Name]**[Address]*

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements.

Accordingly, please confirm directly to them the following information relating to our note(s) payable to you, as of (*date*):

Date of note	_____
Original amount	\$ _____
Unpaid principal	
Balance	\$ _____
Periodic payments required	\$ _____
Payment periods	_____
Maturity date	_____
Interest rate	_____ %
Date to which interest has been paid	_____
Amount and description of collateral	_____
Description of terms, e.g., demand provisions, prepayment penalties, etc.	_____
Any other direct or contingent liabilities to you ("None" or description)	_____

If the above information is in agreement with your records at that date, please so indicate by signing in the place provided below and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please note in the space provided the particulars shown in your records and any information which may help reconcile the difference from our records.

Very truly yours,

[Client's Authorized Signature]

The above information is correct as of (*date*) with the following exceptions (*if any*): _____

Date: _____

Signature: _____

Title: _____

.18 Mortgage Debt

[Prepared on Client's Letterhead]

[Date]

[Name of Creditor or Trustee]

[Address]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about our mortgage indebtedness to you as of (*date*):

1. Original amount \$ _____
2. Date of note _____
3. Unpaid principal balance \$ _____
4. Interest rate _____ %
5. Terms for payment of principal _____
6. Date to which interest has been paid _____
7. Nature of mortgage and description or address of property mortgaged _____
8. Amounts on deposit with you in escrow for:
 - a. Insurance \$ _____
 - b. Real estate taxes \$ _____
9. Amounts paid during the period (*dates from and to*) for:
 - a. Insurance \$ _____
 - b. Taxes \$ _____
10. Amounts on deposit with you for the "reserve for repairs" \$ _____
11. The nature of defaults, if any _____
12. Description of terms, e.g., prepayment penalties, demand provisions, etc. _____

A return envelope is enclosed for your reply.

Very truly yours,

[Client's Authorized Signature]

Note: Many of the items requested will vary with the circumstance of the particular mortgage or other debt involved. The above sample assumes the indenture involves an escrow arrangement for insurance and real estate taxes and a deposit account for repairs.

.19 Accounts Payable

[Prepared on Client's Letterhead]

[Date]

[Name]

[Address]

In connection with the audit of our financial statements, please confirm directly to our auditors (*name and address of auditors*), the amount of our liability to you as of (*date*). Please attach a statement of our account due. If no balance is due, please attach a statement of our account showing payments made.

Please mail your reply directly to (*name of auditors*). A stamped, addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

Our records indicate that a balance of \$_____ was from (*name of client*) at (*date*).

Date: _____

Signature: _____

Title: _____

.20 Obligation to Lessor

[Prepared on Client's Letterhead]

[Date]

[Name of Lessor]

[Address]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements as of (*balance-sheet date*) and for the (*time period*) then ended. In connection with this audit, please provide directly to our auditors the following information as of (*balance-sheet date*) regarding the lease dated (*date lease was executed*) of (*brief identification of property under lease*) which we are leasing from you:

1. Inception and expiration dates for the lease period, from _____ to _____
2. Amount of monthly rent _____
3. Renewal options (if any):
 - a. Dates of renewal period, from _____ to _____
 - b. Amount of monthly rent for renewal _____
4. Purchase options (if any):
 - a. Amount of purchase price _____
 - b. Inception and expiration dates of option, from _____ to _____
 - c. Percent of monthly rent (if any) applicable towards purchase price _____
5. Dates and descriptions of amendments or supplementary understandings, if any, to the lease mentioned above.
6. The amount of outstanding delinquent payments, if any.
7. A statement that there are no defaults, or the nature of defaults, if any.

A return envelope is enclosed for your reply.

Very truly yours,

[Client's Authorized Signature]

Note: The content of this type of letter will vary based on the auditor's professional judgment in the circumstances. To provide additional illustrative language, the above letter is not made parallel with the illustration at AAM section 7200.23.

.21 Property Out on Lease

[Prepared on Client's Letterhead]

[Date]

[Name of Lessee]

[Address]

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements as of (*balance-sheet date*) and for the (*time period*) then ended. In connection with this audit, please confirm directly to our auditors the following information regarding the lease dated (*execution date of lease*) of (*brief identification of property under lease*) which you are leasing from us:

1. Inception and expiration dates of lease period from _____ to _____
2. Amount of monthly rent _____
3. Total rent payments made _____
4. Date of last payment _____

A return envelope is enclosed for your reply.

[Client's Authorized Signature]

Notes: (A) If the leased property is of a mobile or portable nature such as a bulldozer or television camera, the confirmation may also include a request for specific serial numbers of significant equipment.

- (B) In certain circumstances, the auditor may wish to consider confirming additional information such as renewal options, purchase options, and amendments or supplementary understandings.

.22 Register—Capital Stock*[Prepared on Client's Letterhead]**[Date]**[Name of Registrar]**[Address]*

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of the close of business (*balance-sheet date*) about each class of our preferred and common stock:

1. Authorized number of shares _____
2. Issued number of shares _____
3. Outstanding number of shares _____

Please also indicate the amount of any unpaid registrar fees due you as of (*balance-sheet date*).

A return envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

The above information agrees with our records at (*balance-sheet date*) with the following exceptions: _____

Signed: _____ Date: _____

[Name and Title]

Notes: (A) It may be helpful to include the registrar's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) The above illustration assumes the client has a separate transfer agent (see AAM section 7200.25).

.23 Transfer Agent—Capital Stock*[Prepared on Client's Letterhead]**[Date]**[Name of Transfer Agent]**[Address]*

Our auditors (*name and address of auditors*) are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of (*balance-sheet date*) about each class of our preferred and common stock:

1. Authorized number of shares _____
2. Number of shares issued and outstanding _____
3. Number of outstanding shares registered in the name of our Company _____

Please also indicate the amount of any unpaid transfer agent fees due you as of (*balance-sheet date*).

A return envelope is enclosed for your convenience.

Very truly yours,

[Authorized Signature for Client]

The above information agrees with our records at (*balance-sheet date*) with the following exceptions: _____

Signed: _____ Date: _____

[Name and Title]

Notes: (A) It may be helpful to include the transfer agent's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) Depending on the auditor's judgment in the circumstances the confirmation request may also include inquiries about such matters as (i) the number of shares issued to each of specifically mentioned officers and directors, (ii) specified information about shareholders owning more than a stated percent of the total outstanding shares, and (iii) amounts deposited during the year for the payment of dividends.

.24 Request for Confirmation of Money Market Fund*[Prepared on Client's Letterhead]**[Date]**[Name]**[Address]*

Our auditors, *(name and address of auditors)* are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of our money market fund account(s) as of *(date)*.

Please indicate in the space provided below the account number(s) and balance(s) of our account(s) per your records.

Please sign and date your reply and return it directly to the auditors. A stamped, self-addressed envelope is enclosed for your convenience.

Very truly yours,

[Client's Authorized Signature]

Dear CPA Firm:

The above information listing contingent liabilities, including oral and written guarantees, agrees with the records of this financial institution.* Although we have not conducted a comprehensive, detailed search of our records, no information about other contingent liabilities, including oral and written guarantees, came to our attention. [Note exceptions below or in an attached letter.]

[Name of Financial Institution]

By:

[Officer]

[Date]

[Title]

* If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.26 Confirmation of Compensating Balances

[Date]

Financial Institution Official*
First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of *(name of customer)* as of *(balance-sheet date)* and for the *(period)* then ended, we have advised our independent auditors that as of the close of business on *(balance-sheet date)* there *(were)* *(were not)* compensating balance arrangements as described in our agreement dated *(date)*. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other compensating balance arrangements between *(name of customer)* and your financial institution comes to your attention, please include such information below. Withdrawal by *(name of customer)* of the compensating balance *(was)* *(was not)* legally restricted at *(date)*. The terms of the compensating arrangements at *(date)* were:

EXAMPLES:

1. The Company has been expected to maintain an average compensating balance of 20 percent of its average loan understanding, as determined from the financial institution's ledger records adjusted for estimated average uncollected funds.
2. The Company has been expected to maintain an average compensating balance of \$100,000 during the year, as determined from the financial institution's ledger records without adjustment for uncollected funds.
3. The Company has been expected to maintain a compensating balance, as determined from the financial institution's ledger records without adjustment for uncollected funds, of 15 percent of its outstanding loans plus 10 percent of its unused line of credit.
4. The Company has been expected to maintain as a compensating balance noninterest bearing time deposits of 10 percent of its outstanding loans.

In determining compliance with compensating balance arrangements, the Company uses a factor for uncollected funds of ____ *(business)* *(calendar)* days.¹

There *(were the following)* *(were no)* changes in the compensating balance arrangements during the *(period)* and subsequently through the date of this letter.

The Company *(was)* *(was not)* in compliance with the compensating balance arrangements during the *(period)* and subsequently through the date of this letter.

There *(were the following)* *(were no)* sanctions *(applied or imminent)* by the financial institution because of noncompliance with compensating balance arrangements.²

* This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the compensating balance arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

¹ Not applicable if compensating balances are based on the financial institution's ledger records without adjustment for uncollected funds. If some other method is used for determining collected funds for compensating balance purposes, the method used should be described.

² Applicable only if the financial institution has applied sanctions during the *(period)* or notified the Company that sanctions may be applied. Indicate details.

During the (*period*), and subsequently through the date of this letter, (no) (the following) compensating balances were maintained by the Company at the financial institution on behalf of an affiliate, director, officer, or any other third party and (no) (the following) third party maintained compensating balances at the bank on behalf of the Company. (Withdrawal of such compensating balances (was) (was not) legally restricted.)

Please confirm whether the information about compensating balances presented above is correct by signing below, and returning this letter directly to our independent auditors (*name and address of CPA Firm*).

Sincerely,

[*Name of Customer*]

By: _____
[*Authorized Signature*]

* If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.27 Confirmation of Lines of Credit

[Date]

Financial Institution Official*
First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of *(name of client)* as of *(balance-sheet date)* and for the *(period)* then ended, we have advised our independent auditors of the information listed below, which we believe is a complete and accurate description of our line of credit from your financial institution as of the close of business on *(balance-sheet date)*. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other lines of credit from your financial institution comes to your attention, please include such information below.

The Company has available at the financial institution a line of credit totaling \$(*amount*). The current terms of the line of credit are contained in the letter dated *(date)*. The related debt outstanding at the close of business on *(date)* was \$(*amount*).

The amount of unused line of credit, subject to the terms of the related letter, at *(date)* was \$(*amount*).

Interest rate at the close of business on *(date)* was ____ %.

Compensating balance arrangements are _____

This line of credit supports commercial paper (or other borrowing arrangements) as described below:

* This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the lines of credit. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

Please confirm whether the information about lines of credit presented above is correct by signing below and returning this letter directly to our independent auditors (*name and address of CPA Firm*).

Sincerely,

[*Name of Client*]

By: _____
[*Authorized Signature*]

Dear CPA Firm:

The above information regarding the line of credit arrangements agrees with the records of this financial institution.* Although we have not conducted a comprehensive, detailed search of our records, no information about other lines of credit came to our attention. [Note exceptions below or in an attached letter.]

[*Name of Financial Institution*]

By: _____
[*Officer*] [Date]

[*Title*]

* If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.28 Related-Party Confirmation

[Date]

[Name]

[Address]

In connection with an audit of our financial statements, please furnish answers to the attached questionnaire, sign your name, and return the questionnaire in the enclosed envelope directly to our auditors (*name and address of auditors*). The questionnaire is designed to provide the auditors with information about the interests of officers, directors, and other related parties in transactions with our Company.

Please answer all questions. If the answer to any question is "yes," please explain. Certain terms used in the questions are defined at the end of the questionnaire.

Very truly yours,

[Client's Authorized Signature]

[Title]

[Client Name]

Related-Party Questionnaire

1. Have you or any related-party of yours had any material interest, direct or indirect, in any sales, purchases, transfers, leasing arrangements or guarantees or other transactions since (*beginning of period of audit*) to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?
2. Do you or any related-party of yours have any material interest, direct or indirect, in any pending or incomplete sales, purchases, transfers, leasing arrangements, guarantees or other transactions to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?
3. Have you or any related-party of yours been indebted to the Company (or specify any pension, retirement, savings, or similar plan provided by the client) at any time since (*beginning of period of audit*)? Please exclude amounts due for purchases on usual trade terms and for ordinary travel and expense advances.

The answers to the foregoing questions are correctly stated to the best of my knowledge and belief.

[Signature]

[Date]

See definitions which follow.

Definitions

Company: Parent company and any subsidiary.

Related Party: Any (1) corporation or organization (other than the Company) of which you are an officer, director, or partner or are, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities; (2) any trust or other estate in which you have a substantial beneficial ownership or for which you serve as a trustee or in a similar fiduciary capacity; and (3) any close relative of yours or your spouse's, or other person you may significantly influence (control) or be significantly influenced by.

Control: Possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a party, whether through ownership, by contract, or otherwise.

Person: An individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or an unincorporated organization.

Beneficial Owner: Person who enjoys, or has the right to secure, benefits substantially equivalent to those of the ownership of securities, even though the securities are not registered in the person's name. Examples of beneficial ownership include securities held for the person's benefit in the name of others, such as nominees, custodians, brokers, trustees, executors and other fiduciaries; a partnership of which the person is a partner; and a corporation for which the person owns substantially all of the stock. Shares (1) held (individually or in a fiduciary capacity) by the person's spouse, the person's or his or her spouse's minor children, or a relative of the person or his or her spouse who shares the same home with the person; or (2) as to which the person can vest or revert title in himself or herself at once or at some future time are also considered as being beneficially owned.

.29 Safe Deposit Box Access Confirmation

[Date]

Our auditors, _____ [name and address of auditors], are conducting an audit of our financial statements. Accordingly, please confirm there has been no access to our safe deposit box number ____ between ____ and ____ o'clock.

Please indicate in the space below if the above is in agreement with your records. If it is not, please furnish the auditors any details concerning access to our safe deposit box during the period indicated.

After signing and dating your reply, please mail it directly to our auditors in the enclosed envelope.

Very truly yours,

[Client's Authorized Signature]

According to our records, there has been no access to the above described safe deposit box during the period specified, except as follows: _____

Signed: _____ Date: _____

Inquiries to Legal Counsel^A

.01 Illustrative Inquiry Letter to Legal Counsel^B

[Prepared on Client's Letterhead (see Note C)]

[Date (see Note D)]

[Name of Lawyer]
[Address of Lawyer]

Dear _____ :

In connection with an audit of our financial statements at (*balance-sheet date*) and for the (*period*) then ended, management of the Company has prepared, and furnished to our auditors (*name and address of auditors*), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (*balance-sheet date*) and during the period from that date to the date of your response.

Pending or Threatened Litigation

(excluding unasserted claims)

[Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.]

Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments

(considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

[Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.]

Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement dis-

closure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

Very truly yours,

[Authorized Signature for Client]

Notes: (A) If a client has not needed to retain legal counsel, the auditor may express an unqualified opinion on the financial statements even though he has not obtained a letter from legal counsel of the Company. In these circumstances, the auditor should obtain written representation from the Company that legal counsel has not been retained for matters concerning business operations that may involve current or prospective litigation.

(B) Extracted from the Appendix to Statement on Auditing Standards No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* [AU section 337A]. [See Note D.]

(C) Auditors should carefully consider the provisions of SAS No. 12 [AU section 337] in drafting this letter.

(D) Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client should consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

.02 Illustrative Inquiry Letter to Legal Counsel If Management Has Not Provided Details About Pending or Threatened Litigation

[Prepared on Client's Letterhead]

[Date]

[Name of Lawyer]

[Address of Lawyer]

In connection with an audit of our financial statements at *(balance-sheet date)* and for the *(period)* then ended, please furnish to our auditors *(name and address of auditors)*, the information requested below for which you have been engaged to provide legal consultation or representation.

Pending or Threatened Litigation, Claims and Assessments

(excluding unasserted claims and assessments)

Please furnish a list of all pending or threatened litigation, claims, and assessments your firm is handling on our behalf including the following:

1. The nature of the litigation (including the amount of monetary or other damages sought).
2. The progress of the case to date.
3. How management is responding or intends to respond to the litigation (e.g., to contest the case vigorously or to seek an out-of-court settlement).
4. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.

Unasserted Claims and Assessments

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosing concerning such possible claim or assessment, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5, as a matter of professional responsibility to us. *Please specifically confirm to our auditors that our understanding is correct.*

We have represented to our auditors that there are no unasserted claims which are not specifically identified in this letter that you advised us are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5.

(If unasserted claims exist, management's listed information should include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted; and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.)

Please furnish our auditors any explanation you consider necessary to supplement the foregoing information, including an explanation of these matters as to which your views may differ from those stated.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the organization, such as guarantees of indebtedness of others.]

Very truly yours,

[Authorized Signature for Client]

Notes: (A) Auditors should carefully consider the provisions of SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* [AU section 337] in drafting this letter.

(B) Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client should consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

(C) If a client has not needed to retain legal counsel, an unqualified opinion may be expressed on the financial statements even though a letter from legal counsel has not been obtained. In these circumstances, a written representation should be obtained from the Company that legal counsel has not been retained for matters concerning its operations that involve current or prospective litigation.

.03 Improving Inquiry Techniques

If inquiries to legal counsel are not sufficiently detailed or specific, deficiencies in attorneys' responses may result. A conference between the auditor and the attorney may be necessary to clarify the attorney's written response and SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph 10 [AU section 337.10] provides for such a conference. However, to improve the auditor's ability to receive all of the information necessary to complete his/her audit, he/she may wish to consider the following matters in an inquiry to legal counsel:

- a. A request that the attorney specify the effective date of his/her response if it is other than the date of the reply.
- b. A request that the attorney mail the response so that it will be received by a certain date.
- c. A request that the nature of any litigation specifically identify (i) the proceedings, (ii) the claim(s) asserted, (iii) the amount of monetary damages sought, or if no amounts are indicated in preliminary case filings, a statement to that effect, and (iv) the objectives sought by the plaintiff, if any, other than monetary or other damages, such as performance or discontinued performance of certain actions.
- d. A request that the attorney avoid such vague phrases as "meritorious defenses," "without substantial merit," and "reasonable chance" in expressing an opinion on the outcome of litigation.
- e. If an opinion cannot be expressed on the outcome of litigation, a request that the attorney so state together with his/her reasons for that position.
- f. A request that the attorney specify to what extent potential damages are covered by insurance. (It may be possible to obtain the opinion of the insurer's counsel regarding the applicability of insurance coverage.)
- g. A request that the attorney provide a summary of material litigation, claims, and assessments settled during the period.
- h. A statement that confirmation of the understanding regarding disclosure of unasserted claims and assessments is an integral part of the audit inquiry and that failure to so confirm will require a follow-up contact.
- i. A statement that the attorney's response will not be quoted or referred to in the financial statements without first consulting with him/her.

[The next page is 7401.]

AAM Section 7400

Management Representations and Representation Letters

.01 Statement on Auditing Standards (SAS) No. 85, *Management Representations*, as amended by SAS Nos. 89 and 99 (AU section 333), requires an auditor to obtain written representations from management for all financial statements and periods covered by the auditor's report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.

.02 Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. Such representations from management are part of the evidential matter the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit.

Specific Representations

.03 In connection with an audit of financial statements presented in accordance with generally accepted accounting principles, specific representations should relate to the following matters:

Financial Statements

- a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.
- b. Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.

Completeness of Information

- c. Availability of all financial records and related data.
- d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.
- e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
- f. Absence of unrecorded transactions.

Recognition, Measurement, and Disclosure

- g. Management's belief that the effects of any uncorrected financial statement misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are

immaterial, both individually and in the aggregate, to the financial statements taken as a whole.* (A summary of such items should be included in or attached to the letter.)"

- h. Management's acknowledgement of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.
- i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.
- j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
- k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.
- l. Information concerning related-party transactions and amounts receivable from or payable to related parties.
- m. Guarantees, whether written or oral, under which the entity is contingently liable.
- n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.
- o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
- p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies* (AC C59).***
- q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.
- r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.
- s. Compliance with aspects of contractual agreements that may affect the financial statements.

Subsequent Events

- t. Information concerning subsequent events.

The representation letter ordinarily should be tailored to include additional appropriate representations from management concerning matters specific to the entity's business or industry.

Materiality Considerations

.04 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an

* If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example,

"We do not agree that items XX and XX constitute misstatements because [description of reasons]."

** SAS No. 47 states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated.

*** If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see Auditing Interpretation No. 6, *Client Has Not Consulted a Lawyer* (AU section 9337.15-17).

understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements.

Addressing and Dating

.05 The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of a date no earlier than the date of the auditor's report.

Management's Signatures

.06 The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity.

Scope Limitations

.07 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or withdraw from the engagement. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

Illustrative Representation Letter—Audit of Financial Statements

.08 The following letter, which relates to an audit of financial statements prepared in conformity with generally accepted accounting principles, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report, for example, "balance sheets of XYZ Company as of December 31, 20X1 and 20X0, and the related statements of income and retained earnings and cash flows for the years then ended." The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited.

.09 If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . ." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allocations discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

.10 The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

.11 Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AU section 316), and related parties, in SAS No. 45, *Related Parties*, footnote 1 (AU section 334). To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

.12 The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph 8 of SAS No. 85.

.13 Illustrative Representation Letter

[Prepared on Client's Letterhead]

[Date]

To *[Independent Auditor]*

We are providing this letter in connection with your audit(s) of the *[identification of financial statements]* of *[name of entity]* as of *[dates]* and for the *[periods]* for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of *[name of entity]* in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the (consolidated) financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, (as of *[date of auditor's report]*), the following representations made to you during your audit(s):

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted the United States of America.
2. We have made available to you all—
 - a. Financial records and related data.
 - b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
 - a. Management,
 - b. Employees who have significant roles in internal control, or
 - c. Others where the fraud could have a material effect on the financial statements.
8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
10. The following have been properly recorded or disclosed in the financial statements—
 - a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

- b. Guarantees, whether written or oral, under which the company is contingently liable.
- c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. (Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.)

11. There are no—

- a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
- b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*.¹
- c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

[Add additional representations that are unique to the entity's business or industry. (See paragraph 7 and Appendix B, "Additional Illustrative Representations," of SAS No. 85).]

[Add any representations related to new accounting or auditing standards that are being implemented for the first time.]

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[Name of Chief Executive
Officer and Title]

[Name of Chief Financial
Officer and Title]

Notes: Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about:

- The appropriateness of the measurement methods, including related assumptions used by management in determining the fair value and the consistency in application of the methods.
- The completeness and adequacy of disclosures related to fair values.
- Whether subsequent events require adjustments to the fair value measurements and disclosures included in the financial statements.

¹ In the circumstances discussed in footnote 7 of SAS No. 85, this representation might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with FASB Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

[Source: SAS No. 101, paragraph 49 (AU section 328.49)]

See Appendix C, of SAS No. 100, *Interim Financial Information*, for Illustrative Management Representation Letters for a Review of Interim Financial Information.

[Source: SAS No. 100, Appendix C (AU section 722.56)]

.14 Illustrative Representation Letter—Audit of Personal Financial Statements

[Date]

[To the Independent Auditor]

We are providing this letter in connection with your audit of the statement of financial condition of James and Jane Person as of [date] and the related statement of changes in net worth for the [period] then ended for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the financial condition and changes in the net worth, of James and Jane Person in conformity with generally accepted accounting principles. We confirm that we are responsible for the fair presentation in the statement of financial condition and changes in net worth in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [as of (date of auditor's report),] the following representations made to you during your audit.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.
2. We have made available to you all financial records and related data.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
4. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
5. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
6. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
 - a. Us.
 - b. Others where the fraud could have a material effect on the financial statements.
7. We have no knowledge of any allegations of fraud or suspected fraud affecting us received in communications from analysts, regulators, short sellers, or others.
8. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
9. The following have been properly recorded or disclosed in the financial statements:
 - a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
 - b. Guarantees, whether written or oral, under which we are contingently liable.
 - c. Significant estimates and material concentrations known to us that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. [Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]

10. There are no—

- a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
 - b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*.¹
 - c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.
11. We have satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.
12. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

To the best of our knowledge and belief, no events have occurred subsequent to the statement of financial condition date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

(James Person)

(Jane Person)

¹ Footnote 7 of SAS No. 85, *Management Representations*, states that if a lawyer has not been consulted regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments. In the circumstances discussed in footnote 7 to SAS No. 85, this representation might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

.15 Illustrative Representation Letter to Other Accountants

[Firm's Letterhead]

[Date]

In connection with the report you have been requested to reissue on the financial statements of _____ [client's name] for the year ended _____ [date], which statements are to be included comparatively with similar statements for the year ended _____ [date], we make the following representations.

We have audited (or reviewed or compiled) the balance sheet of _____ [client's name] as of _____ [balance-sheet date] and the related statements of earnings, retained earnings, and cash flows for the year then ended. Our procedures in connection with the engagement did not disclose any events or transactions subsequent to _____ [predecessor's balance-sheet date] which, in our opinion, would have a material effect upon the financial statements, or which would require mention in the notes to the financial statements of _____ [client's name] for the year then ended.

Should anything come to our attention prior to the date our report is issued which, in our judgment, would have a material effect upon the financial statements covered by your report, we shall notify you promptly.

Very truly yours,

[Engagement Partner's Signature]

Note: If any matters come to the firm's attention that may require revision of the previous financial statements, they should be included in a separate paragraph after approval by the engagement partner.

.16 Letter to Other Accountants Upon Whose Work We Plan to Rely

[Firm's Letterhead]

[Date]

We are auditing the financial statements of _____ [client's name], _____ [parent company]. The financial statements of _____ [other accountants' client's name] that you are auditing are to be included in the financial statements of _____ [client's name]. We will rely on your report on the financial statements in expressing an opinion on the (consolidated) financial statements of _____ [client's name] (and subsidiaries). In that connection, we will refer to your report.

Please confirm to us that your firm is independent with respect to _____ [client's name] and _____ [other accountant's client's name] within the meaning of Rule 101 of the Code of Professional Conduct of the American Institute of Certified Public Accountants.

Please provide us promptly, in writing, with the following information in connection with your current examination of the financial statements of _____ [other accountant's client's name] with respect to:

1. Related-party transactions or other matters that have come to your attention. We are aware of the following related parties: _____ [names of known related parties].
2. Any limitation on the scope of your examination that is related to the financial statements of _____ [client's name], or that limits your ability to respond to this inquiry.

Please update your letter to indicate any additional matters of the type designated above that have come to your attention through the date of your report on the financial statements of _____ [other accountants' client's name].

Very truly yours,

[Engagement Partner's Signature]

.17 Illustrative Updating Management Representation Letter

The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph 12 of SAS No. 85. Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

[Firm's Letterhead]

[Date]

To [Auditor]

In connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the auditor] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

Communication With Audit Committees

.01 Illustrative Communication With Audit Committees

Addressee:^{*}

Statement on Auditing Standards (SAS) No. 61, *Communication With Audit Committees*, as amended by SAS No. 89, *Audit Adjustments*, and SAS No. 90, *Audit Committee Communications*, (AU section 380) issued by the AICPA Auditing Standards Board requires the auditor to communicate certain matters to those responsible for the oversight of the financial reporting process. The following comments regarding the scope and results of our audit of (*name of client*) for the year ended December 31, 20X2 will assist you in overseeing the financial reporting and disclosure process for which management is responsible.

Scope of Audit

Our responsibility is to express an opinion on the financial statements based on our audit. This audit is to be conducted in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation.

Results of Audit

This part of the letter would address the following:

1. Management's choice of significant accounting policies and their application. This includes methods proposed for new transactions or events, significant unusual transactions, or controversial areas such as equity investments, off-balance-sheet financing or revenue recognition;
2. Procedures used by management to determine accounting estimates and the data the auditor has considered to determine the reasonableness of the estimates;¹
3. Adjustments arising from the audit that could, in his judgment, either individually or in the aggregate, have a significant effect on the entity's financial reporting process.
4. Uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole.
5. In connection with an SEC engagement, the auditor's judgments about the quality, not just the acceptability, of the entity's accounting principles as applied in its financial reporting. (See SAS No. 90 (AU section 380.11) for further information.)

^{*} Audit Committee, or other formally designated oversight group which is equivalent to the audit committee such as a finance committee or budget committee.

¹ In January 2003, the Auditing Standards Board issued SAS No. 101, *Auditing Fair Value Measurements and Disclosures* (AU section 328), which states that certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. According to SAS No. 101, paragraph 50 (AU section 328.50), the auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.

6. Other information presented by management that is included with the entity's audited financial statements. The auditor should discuss the nature of his/her responsibility for such information with the audit committee,* including procedures performed, if any, and the results;
7. Nature of and circumstances surrounding any disagreements with management about the application of GAAP, the determination of accounting estimates, or scope of the audit that could be significant to the entity's annual reporting;
8. Auditor's views about any accounting or auditing matters discussed by management with other auditors (opinion shopping);
9. Major discussions by management with the auditor about the initial or continued retention of the auditor; and
10. Any serious difficulties encountered in conducting the audit.

This report is intended solely for the information and use of the audit committee,* management and others in the organization (or specified regulatory agency) and is not intended to be and should not be used by anyone other than these specified parties.

[Signature]

[Date]

[Source: SAS No. 61, as amended by SAS Nos. 87, 89, and 90 (AU section 380)]

Note: SAS No. 61 (AU section 380), is required to be followed for (1) entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee) and (2) all Securities and Exchange Commission (SEC) engagements.

* Audit Committee, or other formally designated oversight group which is equivalent to the audit committee such as a finance committee or budget committee.

.02 Report on Reportable Conditions

[Date of Auditor's Report on the Financial Statements]

In planning and performing our audit of the financial statements of the _____ (client's name) for the year ended _____ (financial statement date), we considered its internal control in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on internal control. However, we noted the following matters involving internal control and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design and operation of internal control that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Bank Reconciliations

Bank reconciliations have been prepared for the operating cash account, but they have not been in agreement with the general ledger, often by as much as _____. At _____, the general ledger balance varied from the bank reconciliation by \$_____.

In prior years, the bank reconciliations did not reconcile exactly to the general ledger; however, the variances were not as significant as in 20XX. To maintain effective internal controls over cash, it is critical that bank accounts be reconciled to the general ledger monthly with differences identified and resolved immediately. At the present time, an adjusting journal entry should be made to bring the general ledger balance into agreement with the reconciled balance.

Accounts Payable

A listing of accounts payable as of _____ could not be produced to support the general ledger amount. We were able to reconcile accounts payable to the general ledger amount by reviewing computer-generated payable listings dated _____, along with examining unpaid invoices at the time of our field work.

As indicated in previous letters to the Board, accounts payable has been an ongoing problem due to the fact that the accounts payable listing is not reconciled to the general ledger monthly. Proper recording of accounts payable is a key to maintaining adequate financial statements. Whether computer-generated or manually prepared, a detailed accounts payable listing should be reconciled monthly to the general ledger balance. All reconciliations should be reviewed and approved by someone other than the preparer, with the reviewer being responsible for ensuring that all differences are resolved.

Property and Equipment

Documentation provided to support the changes in property and equipment was not in agreement with the changes in the general ledger balances, for some categories, by as much as _____. Also, the computer-generated list of property and equipment was not in agreement with the total property and equipment recorded in the general ledger; therefore, this listing was not a useful resource.

The property and equipment computer listing should be reviewed, revised, and reconciled to the general ledger. Changes in property and equipment should be recorded timely and the detailed property and equipment listing should be reconciled to the general ledger balances monthly.

The procedures for recording fixed asset additions and deletions should be reviewed to determine their adequacy. Adjusting journal entries with regard to trade-ins, sales and other retirements of fixed assets should be reviewed by the Treasurer or someone other than the person preparing the entry. Examples of problems encountered include improper capitalization of assets when a like kind exchange or trade-in is involved and improper recording of gain or loss on sale of assets.

An annual or biannual physical inventory of equipment is an effective management tool to help maintain detail property and equipment records and strengthen controls of safeguarding equipment. The Board should consider making a physical inventory a standard procedure.

This report is intended solely for the information and the use of the Board of Directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

[Engagement Partner]

.03 Report on Reportable Conditions That Also Identifies a Material Weakness

[Date of Auditor's Report on the Financial Statements]

In planning and performing our audit of the financial statements of the _____ (client's name) for the year ended _____ (financial statement date), we considered its internal control in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on internal control. However, we noted the following matters involving internal control and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design and operation of internal control that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

Accrued Vacation

Although accrued vacation has not been recorded on the financial statements, the amount of accrued vacation must be considered in determining the fair presentation of the financial statements. The year end analysis of accrued vacation had a balance significantly lower than the prior year's balance. The details of the analysis were traced to the "attendance control cards." We found (1) the number of days earned on the listing did not agree to that recorded in the cards, (2) individuals were reported in the cards with earned vacation but were not on the listing, and (3) some of the cards appeared to not have been maintained.

Detailed records of vacation days earned and used by employees should be timely and accurately maintained. At least annually, these days should be converted to dollar amounts. Management should review the conversion and consider reporting this liability on the financial statements for complete recognition of liabilities.

Discussions with the Office Manager revealed that not all employees are required to notify her when they use vacation days. All employees should be required to inform the Office Manager of all vacation days taken. Employees should also be asked to periodically review their vacation records with the Office Manager and to indicate their agreement by signing the records.

Bad Debts

During 20XX, the Board approved the write-off of accounts receivable of about _____. The write-off was charged to revenue rather than to bad-debt expense.

Procedures for recording bad debt write-offs should be reviewed for adequacy. All adjusting entries should be reviewed by the Treasurer or a member of management other than the person preparing the journal entry.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe that the following reportable condition is a material weakness.

Blank Checks

Blank checks are maintained in an unlocked cabinet along with the check signing machine.

Blank checks and the check signing machine should be locked in separate locations so as to prevent the embezzlement of funds.

This report is intended solely for the information and use of the Board of Directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

[Engagement Partner]

AAM Section 7600

Reliance Letter

.01 Illustrative Reliance Letter

Addressee:

The following is in response to your letter to our firm dated _____.

We performed an audit of ABC Company's balance sheet dated December 31, 20X0, and the related statements of income, retained earnings, and cash flow for the year then ended. The financial statements were audited as of the financial statement date and the audit procedures performed were completed on March 28, 20X1 (*audit report date*). No additional audit procedures were performed subsequent to March 28, 20X1.

The audit was conducted in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. However, a properly designed and executed audit may not detect a material irregularity. For example, generally accepted auditing standards do not require that an auditor authenticate documents, nor is an auditor trained to do so. Also audit procedures that are effective for detecting a misstatement that is unintentional may not be effective for a misstatement that is intentional and is concealed through collusion between client personnel and third parties or among management or employees of the client.

We understand that you intend to rely on the report and associated statements in connection with (*describe as precisely as possible the transaction in connection with which the third party intends to rely on the report and statements*). It should be noted that the audit procedures performed in order to render an opinion on the financial statements of ABC Company may not be adequate or appropriate for this purpose. Because of the limitations inherent in the audit process we may not have detected all material misstatements. Accordingly, our audit was not intended for your benefit and should not be taken to supplant the inquiries and procedures that you should take to satisfy yourself as to ABC Company's credit-worthiness. We recommend that you perform your own due diligence investigation which should include but not be limited to the following steps (*itemize*). We emphasize that this list of procedures may not be all inclusive and that we cannot provide any assurance that the procedures we have mentioned will be sufficient for your purposes.

AAM Section 7700

Proposal Letter

.01 Illustrative Proposal Letter

[Date]

We appreciate this opportunity to present a proposal for (*nature of services*) and a brief description of our firm and services.

Our firm was formed in 20____. We have ____ partners and ____ staff and support personnel working with clients in accounting and auditing, taxation, and various consulting services. Although we serve all size clients, our clientele consists primarily of small and medium-size businesses such as yours.

Our professional objectives are to provide the highest quality services on a timely basis. As a member of the AICPA Division for Firm's Private Companies Practice Section, our accounting and auditing practice has been subjected to a review by another firm of CPAs. We received an unqualified opinion as a result of that review. We extend our client relationships to include ongoing contact and services to achieve our services objectives.

We have extensive experience in the _____ industry. This experience and related understanding of your industry's operations permit us to design, perform, and complete engagements for your company effectively and at a reasonable cost.

Our services include the following:

- Accounting, Auditing, and Attestation Services

Our accounting, auditing, and attestation services include annual or special audits, compilations and reviews of financial statements, and the examination and review of financial and other information under the attestation standards. We accompany our report on audited financial statements with a reportable conditions letter and a management letter that include suggestions to correct internal control weaknesses and recommendations for operational efficiencies. Our purpose in making these suggestions is to help you accomplish your operational objectives. These suggestions often result in cost savings.

- Tax Services

We offer diversified tax services, including assistance in all phases of federal, state, and local income taxes; estate, inheritance, and gift taxes; and payroll and other taxes. These services include tax return preparation, tax research, and representation of clients at administrative proceedings before the various taxing authorities. The objectives of our tax services are to minimize taxes and potential problems.

- Consulting Services

Our consulting services are designed to assist clients in improving efficiency and profitability. Our approach offers assistance in such areas as developing plans for problem identification or implementing more effective operating controls, evaluating information systems and installing or upgrading data processing systems.

_____, an audit partner, will be primarily responsible for your engagement.

As you requested, our proposal is for _____ (*state nature of services*).

We estimate that our fees for the proposed services will be approximately \$_____, plus out-of-pocket expenses, billable as the work progresses. Our fees are based on time spent on the engagement. Should we encounter any unforeseen circumstances requiring additional time, you will be notified promptly of the situation.

Our fee estimate is based on the assumption that your personnel will prepare certain schedules and analyses for us. We also anticipate their assistance in locating invoices and other documents for our examination.

Our firm is organized and staffed to help you satisfy our business needs. Please call _____ with questions about this proposal.

Very truly yours,

[Firm Signature]

Audit Risk Alert—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant business risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and current accounting, auditing, and professional developments.

.02 If you understand what is happening in the business environment and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that knowledge and understanding it.

The U.S. Business Environment

Weak Recovery and an Uncertain Future

.03 The United States economy is experiencing a mild recovery after weathering a mild recession. Its future is uncertain, and some economic indicators point to further weakness. Corporate earnings reports for the first three quarters of 2002 were weak in many sectors. In addition, consumer confidence is showing signs of weakening. The federal funds rate is at 1.25 percent, the lowest level in over forty years.

.04 According to the Commerce Department's figures, the economy was actually shrinking for the first three quarters of 2001. The United States was in a recession long before 11-September. Undoubtedly, the impact of the terrorist attacks will ripple through the economy for some time. It cost the U.S. economy thousands upon thousands of jobs, and somewhere between \$75 billion and \$100 billion in reduced output. A number of industries, such as airlines and tourism, suffered tremendously and have not fully recovered.

.05 Although the 2001 recession lasted six months longer than originally thought, it is still considered a mild recession by historical standards. Unfortunately, the recovery has been equally weak. Large inventory adjustments caused the gross domestic product (GDP) to soar in the first quarter of 2002 to an annual average growth of 5 percent. Many had expected a slowdown after that level of growth, but few expected a second-quarter number of 1.3 percent. The economy rebounded in the third quarter of 2002 and grew at a 3.1-percent annual rate. However, excluding motor vehicles, third-quarter growth was 1.5 percent. Economists expect the economy to grow at about 2 percent in the fourth quarter. The historical average for economic growth at this stage of the recovery is in excess of 5 percent.

.06 Attempts to forecast future economic conditions are muddled by the probability of military intervention in Iraq by the United States. Experts tend to believe that if the war is short, no serious economic harm will occur; in fact, a quick victory in Iraq could prove beneficial to the economy. A protracted war, however, could depress business, consumer, and investor confidence, sending the economy into a recession.

.07 This recovery is not typical of recoveries the country has experienced since World War II. In the past, job growth would have been sizable. Although unemployment fell to 5.6 percent in September of 2002, the trend for most of 2002 has been flat. The government created most of the new jobs, and the private sector actually decreased slightly. Employers are reluctant to hire new employees because of the tumbling stock market and uncertainty over the economy's health.

Stock Market Woes

.08 The downward slide of the Dow Jones Industrial Average (DJIA), the National Association of Securities Dealers Automated Quotation (NASDAQ) Composite Index, and the Standard & Poor's 500 Stock Index (S&P 500) that began in 2000 continued through the first three quarters of 2002. Throughout the year, analysts were evaluating economic conditions and drastic declines in stock market indices, comparing them to prior periods in an attempt to determine whether the economy had finally reached rock bottom. But the stock market kept surprising everyone with further declines that sent various indices to record lows. The DJIA ended the third quarter of 2002 at 7591.93, sinking to a four-year low; the NASDAQ ended at 1172.06, reaching a six-year low; while the S&P 500 fell to 815.28, which is less than 20 points above a five-year low it hit in July 2002. All of these indicators are significantly below the low levels triggered by panic immediately following the events of 11-September.

Falling Dollars

.09 The currency markets, too, have experienced nail-biting dips. Like stocks, the dollar was hit hard by the forecasts of weak growth. The dollar went into a nosedive against the euro, sinking 18 percent from mid January to mid July of 2002. In the third quarter of 2002, however, the dollar rebounded and strengthened.

.10 Many experts believe that the U.S. dollar cannot remain strong much longer and that a decline in the dollar's exchange rate will occur either in an orderly or a chaotic fashion in the near future. A falling dollar could slow real GDP growth, consumption growth, and investment growth. Moreover, a falling dollar could lead to increased interest rates and higher inflation. On the flip side, however, a weakening dollar would boost U.S. exports and lessen the nation's dependence on foreign investment.

Consumer Spending, Home Buying, Federal Outlays, and Technology Investment Help Economy

.11 Consumer spending and housing posted nice gains in the first two quarters of 2002, which was important inasmuch as consumption is two-thirds of American economic output. Businesses have been posting modest increases in spending on computers, software, and equipment, suggesting that the rut in technology investment may be drawing to an end. In addition, car sales were at near-record levels, thanks to the cheap financing offered by Detroit. A strong housing market has also fueled consumption. Falling interest rates raised house prices and refinancing activity allowed consumers to put some extra cash into their wallets. No doubt, low interest rates have sparked the demand for housing and cars, which has helped support growth this year. Nevertheless, some economists are concerned that the current strong demand for autos amounts to borrowing from future demand.

.12 The volatility in the stock markets has sapped consumer confidence, but the way consumers spend does not always reflect how they feel. Data released during the third quarter of 2002 indicate that outstanding consumer debt rose, but forecasts of consumer spending are somewhat pessimistic. Household real income, after taxes and inflation, has grown 5 percent during the past year. Tax breaks and falling inflation have offset labor-market weakness. In fact, real income is growing faster than the pace of real consumer spending.

Big Government Is Back

.13 Not only have consumers been spending; so too has the U.S. government. Just two years ago, Washington was looking at a \$5.6 trillion budget surplus through 2010. Now, fiscal 2002 will post a deficit and the federal government is engaged in a tremendous spending spree. To be sure, the attacks of 11-September demanded a much-needed increase in spending on national defense and homeland security. But most of the increase in federal spending has nothing to do with rebuilding the military or shoring homeland defense. Rather, massive amounts of tax dollars are being spent on a large and varied number of programs favored by Congress, including farm subsidies, unemployment compensation, education and health care programs.

Risk of Deflation Could Harm Economic Future

.14 Falling inflation is certainly welcome news for most consumers. Americans are benefiting from the lower prices of a variety of goods and services. For example, personal computer prices fell 28.9 percent. However, if deflation extends into other segments of the economy, it could be a major problem. Falling prices squash corporate profits, forcing companies to fire employees and tighten salaries. Both the Great Depression of the 1930s and the Japanese economic slump since 1990 were accompanied by severe deflation. Although most economists are not predicting the doom and gloom of the 1930s, the risk of deflation is real. The risk will become more real if the high housing prices in the United States begin to fall. Some economists and real estate experts are concerned that home prices have risen too fast and could fall.

Resiliency of American Economy

.15 It is important to be able to see the forest through the trees. Terror attacks, accounting scandals, and falling stock prices notwithstanding, the American economy has proven to be quite resilient. Much of the economic data remain well within the realm of the “slow but steady” recovery theme; and although the economic future is weighed down with uncertainty, the underpinnings of the U.S. economy remain strong.

Accounting Scandals and Audit Failures—Lessons Learned

.16 2002 will be remembered as an infamous year for corporate America and the accounting profession. We are all familiar with the news stories that have been dominating the financial headlines—accounting irregularities, fraud, audit shortcomings, out-of-control business executives, bankruptcies, crashing stock market valuations, Enron, Worldcom, Arthur Andersen, congressional hearings, Sarbanes-Oxley. The revelations of financial abuse and high-profile business failures were a traumatic blow to the accounting profession, corporate America, and the stock market.

.17 Business executives, accounting professionals, and regulators are all still digesting the business scandals of 2002 and their ramifications, as a different business environment and accounting profession emerge. Already, businesses are shying away from complex financial structuring and complicated off-balance-sheet arrangements as investors punish companies with heavy loads of off-balance-sheet debt or even the slightest indication of accounting chicanery. Moreover, new legislation has been enacted, unleashing sweeping reforms in corporate America and the accounting profession (See the “Professional Issues” section of this Alert.)

What Auditors Need to Do

Maintain the Mind-Set That Manipulating Financial Reporting Is Not Uncommon

.18 In light of what has been transpiring in the business world and the accounting profession, auditors need to come to an awareness that many, many companies massage their financial reporting by using creative, aggressive, or inappropriate accounting techniques. In an effort to meet earnings targets, live up to the expectations of the marketplace and third parties, and increase personal compensation, management may:

1. Commit fraudulent financial reporting.
2. Unreasonably stretch accounting rules to significantly enhance financial results.
3. Follow appropriate accounting rules, but use loopholes to manage financial results.

Auditors most frequently encounter items 2 and 3 in the preceding list. The auditor’s report expresses an opinion as to whether the financial statements “present fairly . . . in conformity with generally accepted accounting principles.” It seems that in many places, the “present fairly” criterion has become subordinate

to “in conformity with GAAP.” That is, whether some entities make a case that since generally accepted accounting principles (GAAP) do not prohibit a particular accounting method, it must be acceptable, without considering whether the accounting will result in a fair presentation of the financial position, results of operations, and cash flows. The quality of financial statements becomes eroded when accounting choices are made to achieve a predetermined result other than improving the usefulness of the information to decision makers. Thus, the *choice* of accounting principles, in addition to their application, becomes crucial for auditors to consider. Besides checking off all of the GAAP boxes, one must determine whether the financial reporting ultimately reflects economic reality.

Reach Back to Core Values on Every Engagement

.19 In addition to maintaining a mind-set that managing earnings and engineering financial reporting is not uncommon, auditors need to approach their engagements with:

- A responsibility to the public interest
- A rigorous commitment to integrity
- A passion for getting it right
- A commitment to principles and a zeal for applying them
- The willingness to say *no* to unsound accounting practices

Rediscover Professional Skepticism on Every Audit

.20 Due professional care requires the auditor to exercise professional skepticism. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. Auditors may be tempted to put professional skepticism in the back of their minds, making it a concept that gets inadequate attention because its practical application is difficult. But an auditor must rediscover professional skepticism and carry it into each and every audit. An auditor’s attitude can increase the likelihood of finding misstatements.

.21 ***Acknowledge and Challenge Assumptions.*** Many auditors are inclined to assume good intent and tend to rely too heavily on what management tells them. In fact, many audit failures do not stem from an auditor’s inability to uncover a problem, but rather, from an auditor’s willingness to accept a client’s rationalization as to why they should pass on the problem. Assumptions can limit awareness. Assumptions are not inherently bad and are absolutely essential to functioning in the real world. Nevertheless, they hold a danger; an auditor who is faced with information that conflicts with his or her assumptions is apt to resolve the inconsistency by resisting the new information. If information does not fit with what we “know,” we look for a way to make it fit. The auditor must instead set aside existing beliefs about management’s integrity and honesty by periodically challenging the assumptions he or she has made about a client’s management, business, and financial reporting. Use the brainstorming session during the planning phase of the audit to identify assumptions about the client and sensitize engagement team members to their preconceived notions and possible alternative realities.

.22 ***Critically Evaluate Evidence.*** Auditors must also remember to identify and challenge their own assumptions when evaluating audit evidence. Professional skepticism must be rediscovered when assessing the competency and sufficiency of audit evidence. For instance, the auditor should not accept draft contracts or rely on copies of key documents. Auditors should reconcile evidence that is inconsistent and corroborate key assumptions in estimates.

.23 ***Guidance on Professional Skepticism.*** Excellent practical guidance on professional skepticism can be found in the AICPA Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*. Additional guidance can also be found in the AICPA Practice Alert 98-2, *Professional Skepticism and Related Topics*.

Attention-Grabbers for Auditors: Spotting the Early Warning Signs

.24 Auditors can learn valuable lessons from the recent accounting scandals and audit failures. These lessons serve to improve the quality of financial statement audits by helping auditors identify possible warning signs and risks of accounting chicanery, fraud, inaccurate financial reporting, and business failure. In addition, these lessons serve to improve audit quality by fostering an awareness of what audit procedures may be key to addressing the risks and issues that were prevalent in the recent accounting scandals.

.25 The section of this Alert entitled “Audit and Accounting Issues Arising From Current Risks” presents important guidance on accounting and auditing issues stemming from the recent business scandals as well as those stemming from the current economic and business environment. You should familiarize yourself with the items discussed in that section.

.26 One could fill pages and pages listing situations, factors, events, and circumstances indicative of fraud, aggressive accounting, and possible business failure. Such lists can be found in countless professional publications and Web sites. Indeed, SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), and its accompanying Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*, provide first-rate knowledge about fraud risk factors. Auditors should avail themselves of that knowledge by reading SAS No. 99, its accompanying practice aid, and the many other existing sources of guidance that exist.

.27 In addition, presented below is a list of circumstances and observations that should grab the attention of an auditor if he or she observes these situations at a client. These “attention-grabbers” have been compiled based on an assessment of the recent accounting scandals and business failures that have occurred.

Key Attention-Grabbers

.28

1. *A company culture of arrogance.* Management that engages in deceptive accounting practices or fraudulent financial reporting often exhibits high levels of arrogance, pride, greed, and hubris. They often have a reputation for being unusually aggressive, for taking high risks, living close to the edge, and swinging for the fences in business dealings. Effective internal control starts with a proper “tone at the top.” Culture and values are critical elements of control because all other controls are derived from them. Culture drives behavior. A few bad apples will flourish in a culture of arrogance, excessive risk taking, and little accountability. And a few bad apples can cause a company to come crashing down.
2. *Accounting policies that rely heavily on management’s judgment or seem too aggressive.* The manner in which accounting principles are selected and applied affect the accuracy, transparency, understandability, and usefulness of the financial statements. If the accounting methodology for a transaction or event involves different alternatives or a good degree of estimating and judgment, or represents an evolving area in accounting, or is unclear, unusual, or not fully supportable, then management has the tools and the temptation to manipulate financial reporting. These tools, stemming from the selection and application of accounting principles, can be used to tweak earnings and manipulate other accounts and transactions to report the financial results desired by management and conceal critical information. Abusing the selection and application of accounting principles can lead to a situation in which an entity’s financial statements do not reflect the underlying economic condition. The accounting principles selected by management should enhance the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.
3. *Ineffective audit committees and board governance.* The audit committee is the ultimate monitor of the financial reporting process. It therefore stands to reason that an ineffective committee or its equivalent, or the lack of one, can seriously undermine proper financial reporting. Be on the lookout for audit committees that are not independent of the company, meet infrequently, lack adequate financial

expertise, do not hear *directly* from internal auditors, and do not closely monitor sensitive company programs, such as a corporate loan program for senior management.

4. *Overly centralized control over financial reporting.* If one member of senior management or a small group of senior management holds a tight grip over the financial reporting process and goes to extremes to exclude prying eyes, internal control suffers and the opportunity for fraudulent or questionable financial reporting emerges.
5. *Ratios and benchmarks significantly different from industry averages.* An auditor needs to ask why an entity's financial results are markedly different from other entities in its industry. This kind of benchmarking research and analysis may not be readily available or apparent. However, this kind of information can point to a possible business failure or going-concern problem or to the manipulation of the accounting and financial reporting process.
6. *Cash flow from operations that bears little relationship to reported earnings.* If reported earnings do not correspond to the actual cash flowing into an entity, auditors should take note. If management is manipulating the accounting process to manage earnings, it may show up in the disparity between operating cash flow and income statement earnings. Also, companies go bankrupt because they run out of cash. Keep an eye on the cash-flow statement when assessing an entity's ability to continue as a going concern.
7. *Compensation plans geared toward enriching executives rather than generating profits.* With their own compensation tied to operating or financial targets, management can push hard on personnel throughout the company to meet what may be overly optimistic goals. A high-pressure environment can create an incentive to adopt practices that may be too aggressive or inconsistently applied. At some point, the motivation driving earnings management can be strong enough to encourage individuals with the right opportunity to move beyond acceptable practices. Don't underestimate greed. If greed is evident and management is focused on how much money they are going to make, auditors should heighten their sense of professional skepticism and adjust their audit procedures accordingly.
8. *Significant insider trading.* A significant sell-off of company stock by senior management may indicate that they believe the stock is overvalued, the financial reporting does not portray the true economic value of the entity, or that the company may be heading toward failure.
9. *Difficulty explaining how the company actually makes money.* Simply put, it may be unclear exactly how a company derives its profits and its cash. Or, at the end of the day, it may be the case that a company just does not make very much money. In some cases, an entity may be involved in numerous businesses and complicated operations, and yet after looking at all that activity, one is hard-pressed to explain how the entity generates cash.
10. *Predictions by management are at odds with industry trends.* Management may base their assumptions, estimates, accounting principles, business decisions, and explanations to auditors on predictions, forecasts, and beliefs about the current and future business environment that contradict actual industry trends, credible research, and what other entities in the industry are doing or predicting.
11. *Undisciplined acquisition growth.* Senior management may acquire businesses and assets more for the sake of accumulating assets than for the overall good of the company. Acquiring businesses and assets too rapidly can lead to many challenges and risks, including integrating disparate operations, melding internal control processes, and meeting expanded financing needs. In addition, rapid acquisition growth may outstrip the ability of a company's financial systems to remain under effective internal control. If management cares more about acquiring new assets than about making the existing ones perform properly, serious business, liquidity, and financial reporting problems can arise.
12. *Departure of key senior management personnel.* If key people leave a company suddenly or if a number of senior management personnel have resigned, this may be a warning sign of possible trouble at the entity. Are these resignations unexplained? Is the suddenness or number of resignations unusual? Do these key people know something about the company's financial future that is causing them to jump ship? An auditor needs to pay attention to significant or unusual management departures.

13. *Relationships and credibility with customers, creditors, and other third parties declining.* Information pointing to a deterioration in a company's business relationship with its customers, creditors, suppliers, or other parties may signal financial difficulties or inappropriate activities at the company.
14. *Prolonged periods of success.* Yes, even too much success can be a dangerous thing. Many of the big-name companies experiencing difficulties today ran into trouble after long periods of financial success and business growth. As the years of prosperity add up, management may become set in its ways. Assumptions about the future of the industry and the company may be severely clouded by the past experience of uninterrupted success. Management may let its guard down and become incapable of envisioning an environment of subsiding financial prosperity. Does management face reality or merely explain it away or ignore it? Assumptions and estimates used in financial reporting, and assumptions and projections used in business decisions need to be questioned and examined with a clear perception of the true conditions of the economy, the industry, and the company.
15. *Failure to listen to key people within the company.* Senior management may be so focused on achieving stock price and earnings goals that they may fail to heed the advice of key employees warning them of troubling consequences and developments. Whether it be accounting personnel, or employees involved in operations, or those working in research and development, these people may be aware of inappropriate situations or risky developments that result from management's aggressive efforts to meet certain financial goals. Management may dismiss warnings from these people, lest the financial targets not be achieved.

Auditing and Accounting Issues Arising From Current Risks

.29 The economic and business environment is a factor affecting the accuracy of your client's financial statements, and affecting issues of fraud and going concern. Understanding the economic and business environment in which your client operates should constitute a large part of your audit planning. You should understand your client's specific business environment and how the overall economic situation and business issues described in this Alert are affecting your client. Economic performance varies across geographic regions and industries, and among companies, even within the same industry. Therefore, auditors need to focus specifically on the business environment of each client and address each client's particular risks accordingly.

Identifying Risks That May Result in Material Misstatements

.30 The current economic and business environment lead to challenging conditions for companies due to the potential deterioration of operating results, increased external scrutiny, and reduced access to capital. These conditions can result in increased incentives for companies to adopt practices that may be incorrect or inconsistently applied in an effort to address perceived expectations of the capital markets, creditors, or potential investors. In addition, a declining business environment can contribute toward the impairment of assets and deterioration in the value of assets.

.31 Moreover, financial reporting scandals and the high-profile failures of major corporations have rocked the business and accounting world. Fraudulent financial reporting, and aggressive or questionable accounting seem to be on the rise. Auditors appear to be facing risks from many different quarters. During such times, professional skepticism should be heightened and the status quo should be challenged.

.32 As you plan your audits, you should obtain an understanding of each client's internal controls and its business environment sufficient to assess what significant risks give rise to problems that may cause misstatements in the financial statements.

.33 The general economic and business environment, along with the recent spate of business failures and accounting scandals, give rise to certain audit and accounting issues and concerns that could affect an entity's financial statements. Some of the more significant ones are presented in the following table and are discussed below.

Fraudulent Financial Reporting

.34 Many of the issues, topics, and risks discussed in this Alert involve matters of fraudulent financial reporting. As such, auditors should read the individual topics within this Alert to obtain an awareness of matters of fraud that may need to be addressed on their audits. The weak economic and business environment can generate increased pressure on management at many companies. The stress of achieving earnings goals and battling fierce competition during weak economic periods can motivate management to fraudulently report financial results. Consequently, an increased risk of fraudulent financial reporting may exist at many entities.

New Fraud Standard and Implementation Guide Issued

.35 In September 2002, the AICPA Auditing Standards Board (ASB) issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, which gives auditors expanded guidance for detecting material fraud. SAS No. 99 supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU secs. 110, 230, 312, and 316A), and while the new standard may carry the same title as SAS No. 82, auditors need to recognize that it is clearly more far-reaching than its predecessor. SAS No. 99 should substantially change auditor performance, thereby improving the likelihood that auditors will detect material misstatements due to fraud. See the section of this Alert entitled “New Auditing, Attestation, Quality Control Pronouncements, and Other Guidance,” for more detailed information about SAS No. 99.

.36 SAS No. 99 is extremely comprehensive and touches on many elements of the audit process. It cannot be reduced to a checklist or form. The effective implementation of SAS No. 99 will require auditors to *audit smarter* and think more creatively when they audit. Engagement teams who plan to implement the new

standard by obtaining an updated version of a generic audit program will be doing themselves and their clients an injustice. The effective implementation of SAS No. 99 will force you to rethink how you plan and perform your audits. With that in mind, the AICPA has developed a practice aid to help practitioners implement SAS No. 99. The practice aid is entitled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*. See the “New Auditing, Attestation, Quality Control Pronouncements, and Other Guidance,” section of this Alert for more information.

Viability and Liquidity Risks

.37 An entity’s sensitivity to negative changes in economic conditions, such as reductions in consumer spending and business investment, layoffs, and a declining stock market, can often result in business failure. In addition, fraudulent and criminal activities engaged in by management, partnered with deceptive accounting methods, can remain hidden at companies and eventually lead to business failure. Accordingly, you should be alert to conditions and events which, when considered in the aggregate, indicate that there could be substantial doubt about your client’s ability to continue as a going concern.

.38 For example, such conditions and events could include (1) negative trends, such as recurring operating losses or working capital deficiencies, (2) financial difficulties, such as loan defaults or denial of trade credit from suppliers, (3) internal matters, such as substantial dependence on the success of a particular product line, or (4) external matters, such as legal proceedings or loss of a principal supplier. Another condition that may raise doubt about an entity’s ability to continue as a going concern could be excessive and unusual reliance on external financing, rather than money generated from the company’s own operations. In such circumstances, auditors will have to consider whether, based on such conditions and events, there is substantial doubt about the entity’s ability to continue as a going concern.

Auditor’s Responsibilities Related to a Going-Concern Issue

.39 You should be aware of your responsibilities pursuant to SAS No. 59, *The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341). SAS No. 59 provides guidance to auditors in conducting an audit of financial statements in accordance with generally accepted auditing standards (GAAS) for evaluating whether there is substantial doubt about a client’s ability to continue as a going concern for a period not to exceed one year from the date of the financial statements being audited.

.40 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption relates to the entity’s inability to continue to meet its obligations as they become due without the substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity’s ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.41 If there is substantial doubt about the entity’s ability to continue as a going concern, you should consider whether it is likely that existing conditions and events can be mitigated by management plans and whether those plans can be effectively implemented. If you obtain sufficient competent evidential matter to alleviate doubts about going-concern issues, then consideration should be given to the possible effects on the financial statements and the adequacy of the related disclosures. In particular, the auditor should consider the adequacy of the disclosures of those circumstances and events that originally gave rise to the auditor’s concern. If, however, after considering identified conditions and events, along with management’s plans, you conclude that substantial doubt about the entity’s ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, you should refer to the specific guidance set forth in SAS No. 59.

Using Cash-Flow Analysis to Help Assess Going Concern

.42 To fully understand a company's viability as an ongoing concern, an auditor would do well to calculate a few simple ratios from data on the client's cash-flow statement. When it comes to liquidity analysis, cash-flow information is more reliable than balance-sheet or income statement information. Balance-sheet data are static—measuring a single point in time—while the income statement contains many arbitrary noncash allocations. In contrast, the cash-flow statement records the changes in the other statements and nets out the bookkeeping artifice, focusing on what shareholders and other interested parties really care about, that is, the cash available for operations and investments.

.43 Numerous cash-flow ratios are available to help assess a client's solvency, liquidity, and the viability of a client as a going concern. Presented below are two ratios that help spotlight a company's viability as a going concern.

.44 **Funds Flow Coverage Ratio.** The numerator of the funds flow coverage (FFC) ratio consists of earnings before interest and taxes plus depreciation and amortization (EBITDA). The denominator consists of interest plus tax-adjusted debt repayment plus tax-adjusted preferred dividends. To adjust for taxes, divide by the complement of the tax rate. All of the figures in the denominator are unavoidable commitments.

.45 An auditor can use the FFC ratio as a tool to evaluate the risk that a company will default on its most immediate financial commitments, that is, interest payments, short-term debt, and preferred dividends. If the FFC ratio is at least 1.0, the company can meet its commitments—but just barely. If a company's FFC ratio is less than 1.0, the company must raise additional funds to meet current operating commitments. To avoid bankruptcy, it must keep raising fresh capital.

.46 **Cash interest coverage ratio.** The numerator consists of cash flow from operations, plus interest paid, plus taxes paid. The denominator includes all interest paid—short term and long term. The resultant multiple indicates the company's ability to make the interest payments on its entire debt load. A highly leveraged company will have a low multiple, and a company with a strong balance sheet will have a high multiple. Any company with a cash interest multiple less than 1.0 runs the immediate risk of potential default.

Special Advice on Related Parties and Recent Accounting Scandals

.47 The recent spate of business failures and accounting scandals in the news often involved related party issues, including:

- Multimillion dollar conflicts of interest between officers and senior management of a company and the company itself
- Conflicts of interest at firms that manage both hedge funds and mutual funds
- Undisclosed loan guarantees to outside parties closely related to the company
- Self-dealing by company officials who used the company as a personal bank
- Transactions serving no apparent business purpose but to enrich company insiders
- Hiding huge sums of debt and underperforming assets in controlled entities, such as partnerships

.48 Fraudulent financial reporting and misappropriation of assets are frequently perpetrated through the use of related parties. Moreover, financial statements can often be misleading and distorted without adequate disclosure of material related-party transactions. Related parties, such as controlled entities, principal stockholders, or management, can execute transactions that improperly inflate earnings by masking their economic substance or distort reported results through lack of disclosure, or can even defraud the company by transferring funds to conduit related parties and ultimately to the perpetrators.

Accounting and Auditing Guidance

.49 Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 57, *Related Party Disclosures*, defines related parties and provides guidance on the disclosure of transactions with related parties. Transactions between related parties commonly occur in the normal course of business. Generally, financial statements must include disclosures of material related-party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. SAS No. 45, *Related Parties* (AICPA, *Professional Standards*, vol. 1, AU sec. 334), provides guidance on procedures that should be considered with respect to related parties when performing an audit of financial statements. Other important sources of authoritative accounting and auditing guidance exist regarding related parties.

Refer to the AICPA Toolkit

.50 The AICPA toolkit, *Accounting and Auditing for Related Parties and Related Party Transactions*, provides considerable in-depth guidance on accounting for and auditing related-party transactions. The toolkit describes the numerous sources of relevant accounting and auditing literature, including applicable Securities and Exchange Commission (SEC) regulation requirements. The toolkit can be obtained for free on the AICPA Web site at www.aicpa.org/public/download/news/relpty_toolkit.doc.

Specific Auditing Advice

.51 Given the prominent role of related-party transactions in many of the recent accounting scandals, this section includes specific advice to help auditors address and prevent similar related-party scandals in the future. Of course, auditors should consider the guidance discussed in the aforementioned toolkit and the guidance in the pronouncements discussed in that toolkit.

.52 The auditor should consider procedures to identify related-party relationships and transactions, and satisfy himself or herself that such relationships and material transactions are properly accounted for and adequately disclosed in the financial statements. The auditor should consider the possibility that related-party transactions might have been motivated by a desire to improve reported earnings or financial position or might have been motivated by fraud. Remember that related-party transactions lack the independent negotiations as to structure and price that are present in transactions with unrelated parties.

Special Advice on Identifying Related Parties and Related-Party Transactions

.53 SAS No. 45 includes specific audit procedures to help determine the existence of related parties. Auditors should follow that guidance. Remember that the number one rule for potentially identifying related parties and related-party transactions that management does not disclose to the independent auditor is simply to be alert to that possibility. As indicated in SAS No. 99, entities intent on fraudulently reporting financial results may use related-party transactions to perpetrate or conceal the fraud.

.54 The following examples of events may be indicative of transactions with undisclosed related parties and are commonly used in fraudulent financial reporting:

- Sales without substance, including funding the other party to the transaction so that the sales price is fully remitted
- Borrowing or lending on an interest-free basis or at a rate of interest significantly above or below the market rates prevailing at the time of the transaction
- Selling real estate at a price that differs significantly from its appraised value
- Exchanging property for similar property in a nonmonetary transaction
- Making loans with no scheduled terms for when or how the funds will be repaid

- Sales with a commitment to repurchase that, if known, would preclude recognition of all or part of the revenue
- Accruing interest at above-market rates on loans
- Loans to parties that do not possess the ability to repay
- Advancing company funds that are subsequently transferred to a debtor and used to repay what would otherwise be an uncollectible loan or receivable
- Services or goods purchased from a party at little or no cost to the entity
- Loans advanced ostensibly for a valid business purpose and later written off as uncollectible
- Payments for services never rendered or billed at inflated prices
- Sales at below-market rates to an unnecessary “middle-man” related party, who in turn sells to the ultimate customer at a higher price while the related party (and ultimately its principals) retain the difference
- Purchases of assets at prices in excess of fair-market value
- Sales arrangements in which the seller has a concurrent obligation to the buyer to purchase goods or services or provide other benefits
- Sale of land with arranged financing
- Sales of marketable securities at a significant discount from quoted market prices
- Agreements under which one party pays expenses on behalf of another party

In addition to the items above, also be aware that a company may recognize revenue on large, unusual transactions with another party conducted close to quarter-end. Consideration should be given to whether or not the two parties might be related in some way.

.55 Procedures that can be performed to help identify potential related parties and related-party transactions include the following:

- Review material cash disbursements, advances, and investments to consider whether the company provided funds to a related party.
- Discuss with tax and consulting personnel who have provided services to the client their knowledge of the client’s relationships and knowledge of related parties.
- Discuss with intermediaries (such as lawyers, predecessor auditors, and others providing professional services to the client) their knowledge of the identity of principal parties to material transactions.
- Use sources of information about principal parties to material transactions (such as newspapers, phone books, industry or trade publications, and the Internet) to search for information about key members of management and the company. For example, the Internet can be used to search for corporation and limited partnership records in which a particular person’s name appears.

.56 *Identification of an Unidentified Related Party.* When an undisclosed related party has been identified, the audit team should assess whether management’s failure to disclose was merely an oversight or a deliberate attempt to hide the relationship. If the latter, the auditor should reassess the overall audit scope and the ability to rely on management’s representations in other areas. If the auditor believes management can no longer be trusted, the best course of action, after consulting others in the firm designated as consultants in accounting and auditing matters, as well as legal counsel, may be to withdraw from the engagement.

Special Advice on Examining Related-Party Transactions

.57 In one recent, well-publicized, and particularly egregious case of management fraud, the company's board and the company's auditors failed to spot and examine loans to officers of the company that proved to be exorbitant and unauthorized. Once related parties are identified, the auditor should place emphasis on testing material transactions with parties known to be related or associated with the reporting entity. The auditor should apply the audit procedures he considers appropriate to determine the purpose, nature, and extent of the related-party transaction and the effect on the financial statements. In obtaining sufficient competent evidential matter, the auditor should extend the procedures beyond just inquiry of management. Procedures that should be considered include the following:

1. Obtain an understanding of the business purpose of the transaction.
2. Examine invoices, executed copies of agreements, contracts, and other pertinent documents, such as receiving reports and shipping documents.
3. Determine whether the transaction has been approved by the board of directors or other appropriate officials.
4. Test for reasonableness the compilation of amounts to be disclosed, or considered for disclosure, in the financial statements.
5. Arrange for the audits of intercompany account balances to be performed as of concurrent dates, even if the fiscal years differ, and for the examination of specified, important, and representative related-party transactions by the auditors for each of the parties, with appropriate exchange of relevant information.
6. Inspect or confirm and obtain satisfaction concerning the transferability and value of collateral.

In addition, the auditor may determine that extended procedures should be performed in order to fully understand the transactions. If so, the auditor should consider the following procedures:

1. Confirm transaction amount and terms, including guarantees and other significant data, with the other party or parties to the transaction.
2. Inspect evidence in possession of the other party or parties to the transaction.
3. Confirm or discuss significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.
4. Refer to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
5. With respect to material uncollected balances, guarantees, and other obligations, obtain information about the financial capability of the other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies. The auditor should decide on the degree of assurance required and the extent to which available information provides such assurance.

Special Advice on Auditing Related-Party Disclosures

.58 Some of the recent accounting scandals and business failures involved related-party disclosures that were virtually indecipherable to investors. Furthermore, in one of the larger business failures, the notes to the financial statements asserted that related-party transactions were arm's-length, yet apparently the auditor failed to perform any procedures to test the reasonableness of that statement. Reliable and transparent financial reporting is particularly important in this troubled environment. This requires the special attention of CPAs to work with management and audit committees, when appropriate, to ensure that management's disclosure of related-party transactions are appropriately and completely disclosed in conformity with GAAP.

.59 If representations are made by management in their financial statement disclosures about transactions with related parties, the representations should not imply that the related-party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated. If such representations do imply this and the engagement team believes that the representation is unsubstantiated by management, it should, depending on materiality, express a qualified or adverse opinion because of a departure from GAAP. Remember that paragraphs 29 and 30 of Financial Accounting Standards Board (FASB) Statement No. 13, *Accounting for Leases*, and SEC regulation S-X 4-08(k) require disclosure of the nature and extent of leasing transactions between related parties.

Revenue Recognition

.60 Faced with an uncertain economic and business climate, management at some companies will be hard-pressed to generate profits and report favorable financial results. Accounting practices relating to revenue recognition may become more aggressive or even fraudulent as a result. Remember that many of the accounting scandals occurring of late involve accounting practices designed to artificially inflate revenues.

.61 Such improper accounting treatment ranges from stretching the accounting rules (for example, recognizing revenues before they are earned) to falsifying sales in an effort to manage earnings. Therefore, auditors need to pay attention to warning signals that may indicate increased audit risk with respect to revenue recognition and respond with appropriate professional skepticism and additional audit procedures.

.62 Because material misstatements due to fraudulent financial reporting often result from an overstatement or understatement of revenues, SAS No. 99 states that you should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition.

Accounting Considerations

.63 The fundamental revenue recognition concept is that a company should not recognize revenue until realized or realizable and earned by the company. FASB Statement of Accounting Concepts No. 6, *Elements of Financial Statements*, defines revenue as:

Inflows or other enhancements of assets of an entity or settlements of its liabilities (or a combination of both) from delivering or producing goods, rendering services, or other activities that constitute the entity's ongoing major or central operations.

Additional guidance with respect to revenue recognition is found in the following pronouncements:

- Accounting Research Bulletin (ARB) No. 45, *Long-Term Construction-Type Contracts*
- FASB Statement No. 48, *Revenue Recognition When Right of Return Exists*
- SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*
- SOP 97-2, *Software Revenue Recognition*, and SOP 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions*
- *Technical Practice Aids*, Section 5100, "Revenue Recognition"
- SOP 00-2, *Accounting by Producers or Distributors of Films*
- Numerous Emerging Issues Task Force (EITF) Issues
- SEC Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*

.64 **Criteria for Revenue Recognition.** Transactions should meet the following criteria before revenue is recognized:

- There is persuasive evidence of an arrangement.
- Delivery has occurred or services have been rendered.
- The seller's price to the buyer is fixed or determinable.
- Collectibility is reasonably assured.

Although these criteria are general, they provide guidance for revenue recognition relating to most traditional business models. For public companies that do not employ traditional business models, such as e-commerce companies, SAB No. 101 provides additional guidance on these revenue recognition issues:

- Timing of approval for sales agreements
- "Side" arrangements to the master contract
- Consignment or financing arrangements
- Criteria for delivery (bill and hold sale)
- Layaway programs
- Nonrefundable, up-front fees
- Cancellation or termination provisions
- Membership fees or services
- Contingent rental income
- Right of return

.65 SAB No. 101 and the SEC's *SAB No. 101 Frequently Asked Questions (FAQ)* (www.sec.gov/info/accountants/sab101faq.htm) are valuable and comprehensive sources of guidance on revenue recognition.

.66 *FASB Project.* The FASB has initiated a major project on the recognition of revenues that would lead to a new comprehensive accounting standard. The project would (1) eliminate the inconsistencies in the existing authoritative literature and accepted practices, (2) fill the voids that have emerged in revenue recognition guidance in recent years, and (3) provide guidance for addressing issues that arise in the future.

.67 Also, the EITF currently is in the process of addressing four issues related to revenue recognition:

- EITF Issue No. 00-21, "Accounting for Revenue Arrangements with Multiple Deliverables" EITF Issue No. 00-22, "Accounting for 'Points' and Certain Other Time-Based or Volume-Based Sales Incentive Offers"
- EITF Issue No. 00-24, "Revenue Recognition: Sales Arrangements That Include Specified-Price Trade-In Rights"
- EITF Issue No. 02-G, "Recognition of Revenue from Licensing Arrangements on Intellectual Property"

Auditing Considerations

.68 Given the current economic environment, in which companies are struggling to achieve revenue forecasts, auditors need to conduct adequate and appropriate audit procedures on revenues. Be aware of certain factors or conditions that may indicate increased audit risk of improper, aggressive, or unusual revenue recognition practices. For instance, during 2002, some of the revenue recognition scandals involved the questionable use of sales incentives, the backdating of sales contracts, and the recording of cost overruns on construction projects as revenue before the customer agreed to pay for the overruns.

.69 Management may be aware they are overstating revenue or may simply believe they are reflecting economic substance from their perspective. Be alert for significantly unusual or complex transactions, especially those that occur at or near the end of a reporting period. Revenue recognition principles are sometimes difficult to apply and often vary by industry. A high level of care is always required in this area.

.70 *Extensive Audit Guidance Available.* Chapter 6 of the AICPA Practice Aid, *Fraud Detection in a GAAS Audit—An Auditor's Field Guide*, provides in-depth practical guidance for auditing the risky area of revenue recognition. Moreover, you can turn to the AICPA Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510) for further guidance.

Issuing Stock for Notes Receivable

.71 The accounting improprieties related to a recent business failure included increasing shareholder equity for a note receivable. As a reminder, the generally accepted practice is to offset the notes and stock in the equity section. See EITF Issue No. 85-1, *Classifying Notes Receivable Received for Capital Stock*, for further information.

Accelerating Revenues Through Improper Lease Accounting

.72 Some of the recent instances of inappropriate accounting and earnings management involved a significant case of accelerating revenue through the use of improper accounting for leases by the lessor. Auditors may want to acquaint themselves with the following risks, and understand the accounting requirements of FASB Statement No. 13, as amended.

Manipulation of Sales-Type Lease Components

.73 Management, as a lessor, can accelerate revenues in a sales-type lease by improperly estimating the fair value of the leased asset, and improperly estimating the interest or finance components of the lease. By using these techniques, management can improperly allocate more revenue to the leased asset and recognize that revenue up front when initially recording the lease as opposed to properly reflecting that revenue as part of the interest/finance component of the lease, which would be recognized in the future over the life of the lease. Management may use creative methods in calculating the components of its sales-type leases in an attempt to manage earnings. Auditors should be aware of this possibility and should determine, as appropriate, that management has complied with the requirements of FASB Statement No. 13.

Improper Increases in Residual Values

.74 FASB Statement No. 13 states that an upward adjustment of the estimated residual value in a lease shall not be made. Auditors should be alert to any improper increases in residual values when auditing clients who are lessors. Management may attempt to manage earnings through improper adjustments to the residual values associated with leases of which they are the lessors.

Price Increases and Extensions to Existing Leases

.75 FASB Statement No. 13 requires that additional income realized from the renegotiation of existing leases be recognized over the remaining life of the lease by the lessor. In an attempt to accelerate revenues, management may violate these provisions by recognizing immediately the revenue from price increases and lease extensions. Auditors should be alert to this possibility when auditing clients who are lessors.

Changes to Accounting Principles and Methods

.76 The management of an entity may change their methods of accounting for certain transactions in an attempt to manage earnings or otherwise engineer financial reporting. Auditors should be alert to any changes in accounting principles and methods and determine whether the changes are appropriate and

contribute to the accuracy, quality, and transparency of the financial reporting. Management needs to comply with the requirements of Accounting Principles Board (APB) Opinion No. 20, *Accounting Changes*, including the requirement to disclose significant changes in accounting principles and methods.

Layoffs—Staff Reductions—Internal Control Risks

.77 Large layoffs, staff reductions, and notifications to employees of impending termination can affect internal control over financial accounting and reporting systems. Key people and key controls may be lost during a downsizing. In addition, remaining employees may feel overwhelmed by their workloads, lack time to complete tasks and consider decisions, and may suffer from low morale. As such, internal control may become less effective or ineffective.

.78 Auditors should be aware of any layoffs or staff reductions occurring on their audit engagements and consider the following:

- Attention to internal control may not have been maintained.
- As a result of unfilled positions, key control procedures may no longer be performed, may be performed less frequently, or may be performed by individuals lacking proper understanding to identify and correct errors.
- Layoffs of information technology personnel may have a negative effect on the entity's ability to initiate, process, or record its transactions, or maintain the integrity of the information generated by the information technology system.
- Key functions that should be segregated may now be performed by one person.
- Changes to the control environment have altered control effectiveness and potentially resulted in a material control weakness.
- Changes in internal control caused by past or pending layoffs or staff reductions may create an opportunity for fraudulent activities.

Special-Purpose Entities

.79 One of the key issues connected to the recent accounting and business scandals is the use of and financial reporting of off-balance-sheet arrangements, specifically special-purpose entities (SPEs). Companies began using SPEs in the late 1980s to conduct financing, access capital, and hedge risk. Today, SPEs are essential components of modern finance and are commonly used to securitize assets such as consumer loans and credit card receivables, facilitate leasing, research and development, and reinsurance. Companies engaged in specialized tasks and large projects that generate significant risks utilize SPEs to isolate financial risk and spread it among other entities. Large construction projects, the purchasing of a fleet of airplanes, and other large-scale undertakings frequently involve SPEs. SPEs are a type of joint venture in which the sponsoring company can spread the enormous debt load required for the undertaking among the various parties to the SPE. Currently, numerous corporations and financial institutions house trillions of dollars of debt in off-balance-sheet entities, like SPEs.

.80 By using SPEs, such as limited partnerships with outside parties, a company is permitted to increase leverage and ROA without having to report debt on its balance sheet. The company contributes hard assets and related debt to an SPE in exchange for an interest. The SPE then borrows large sums of money from a financial institution to purchase assets or conduct other business without the debt or assets showing up on the sponsoring company's financial statements. (For example, a company building a pipeline could create an SPE, in which the SPE owns the pipeline assets and issues debt to finance the project, using the pipeline assets as collateral.) To avoid classification of the SPE as a subsidiary (thereby forcing the sponsoring entity to include the SPE's financial position and results of operations in its financial statements), certain conditions must be met, including that only 3 percent of the SPE be owned by an outside investee. (This requirement will change under a soon-to-be-released FASB Interpretation. See below for further information.)

Many Companies Ultimately Are Responsible for the Losses Incurred by Their Special-Purpose Entities

.81 Financial institutions or other investors are willing to buy bonds issued by SPEs because the debt often possesses a higher rating than normal corporate debt issuances. The higher rating stems from the belief that the SPE's bonds will retain their value because the assets that support them are legally separate from the parent company and are presumed to be of adequate value.

.82 However, if those assets that were transferred to the SPE prove to be less valuable than originally thought, the sponsoring company of the SPE often is required to make up the shortfall. These off-balance-sheet arrangements may result in contractual or other commitments by the sponsoring company, such as requirements to fund losses, provide additional funding, or purchase capital stock or assets, or may otherwise have financial impacts resulting from the performance or nonperformance of the other party. If the SPE falls into financial trouble, the sponsoring company could be faced with a tremendous crisis since it has guaranteed the debt and performance of the SPE (sometimes called credit enhancements). It was these types of triggers that led to a number of recent business failures and scandals.

Misuses of Special-Purpose Entities

.83 Although SPEs and off-balance-sheet arrangements are used to perform legal and necessary business transactions, these financial tools have been misused to deceive shareholders, enrich management of the sponsoring company, conceal troubled assets, hide debt, and keep other pertinent information from investors and interested parties. Other misuses, questionable practices, and risks involving SPEs include:

- Management may attempt to park underperforming assets on the books of an SPE to keep the losses off the company's financial statements.
- An unscrupulous company may sell suspect assets to an SPE at inflated prices and then recognize the proceeds as revenue.
- Management may design an SPE to create the appearance that the SPE's investors and debt holders bear most of the risk of loss, when in fact the sponsoring company retains most or all of the risks.
- In an attempt to ensure the nominal owners of an SPE reach a required percentage of outside equity investment in the SPE, the sponsoring company may use other SPEs it controls to make the necessary equity investments.
- Importantly, a company may fail to provide adequate and clear disclosures about their off-balance-sheet arrangements in the financial statements.

Another major risk, and one that figured prominently in a recent business failure, is the failure of a sponsoring company to consolidate the results of the operations, assets, and liabilities of an SPE when the conditions required for nonconsolidation are not met.

The Market and Washington Respond

.84 Given the prominent place of SPEs in the recent headlines about business failures, investors, politicians, regulators, and other professionals have clamored for a change in the way SPEs are used, accounted for, and reported in financial statements. In particular, attention is focused on (1) bringing these off-balance-sheet transactions back onto a sponsoring company's balance sheet and (2) requiring companies to make full and comprehensive disclosures about their off-balance-sheet activities.

New Accounting Guidance for SPEs

.85 The existing accounting literature related to SPEs is fragmented and incomplete. SPEs engaged in activities other than leasing or securitizations generally are not addressed by existing accounting literature.

In an attempt to clarify, add to, and improve that literature, the FASB has issued an exposure draft of a proposed interpretation of ARB No. 51, *Consolidated Financial Statements*. The title of the proposed Interpretation is *Consolidation of Certain Special Purpose Entities*, and it would apply to public and private companies, but not nonprofit organizations, with an ownership interest in, or a contract or other business relationship with an SPE. The proposal aims not to restrict businesses' use of SPEs but to improve the financial reporting on them.

.86 Current accounting standards require businesses to report, in their consolidated financial statements, on subsidiaries in which they have a controlling financial interest. But ARB No. 51 focuses on parent-subsidiary relationships based on voting ownership interests, which has led businesses to use the existence of such interests as the criterion for determining whether they must report on certain SPEs.

.87 Consolidate If You Are the Primary Beneficiary. There is, however, another way to test for the presence of a controlling financial interest. If a company does not control an SPE through a voting ownership interest, the FASB Interpretation would require it to determine whether it supports the SPE through a variable interest (which may arise from financial instruments, service contracts, nonvoting ownership interests, or other arrangements). If the company holds a majority of such interests in the SPE, that company would be the *primary beneficiary*. The Interpretation would require that enterprise to include in its consolidated financial statements the results of the SPE's activities as well as its assets and liabilities.

.88 The above paragraph addressed situations in which a company does not control an SPE through a voting ownership interest. The proposed Interpretation states that if one or more parties hold equity investments and five specific conditions are met, that would subject an SPE to consolidation based on an evaluation of voting interests as provided in ARB No. 51, instead of by the proposed Interpretation. The absence of any one of those conditions indicates that the nominal owners of an SPE do not control the SPE, and, therefore, the equity investment is a variable interest subject to the provisions of the proposed Interpretation.

.89 Equity Investment Up From 3 Percent to 10 Percent. One of those five conditions is that the amount of the equity investment is sufficient to allow the SPE to finance its activities without relying on financial support from variable interest holders. The proposed Interpretation includes a presumption that an equity investment is insufficient to allow an SPE to finance its activities unless the investment is equal to at least 10 percent of the SPE's total assets. The FASB established that presumption as a benchmark to emphasize that the old requirement for 3 percent equity in EITF Issue No. 90-15, *Impact of Nonsubstantive Lessors, Residual Value Guarantee, and Other Provisions in Leasing Transactions*, will be nullified and that an equity investment as small as 3 percent is not likely to be sufficient for most SPEs. The FASB intends that presumption to apply in one direction only; that is, an equity investment of less than 10 percent is presumed to be insufficient, but an equity investment of 10 percent is not presumed to be sufficient.

.90 Disclosure Required. The proposed Interpretation also would require disclosure of information about the assets, liabilities, and activities of consolidated SPEs by the primary beneficiaries and similar information about unconsolidated SPEs by enterprises that act as administrators of those SPEs.

.91 This new guidance aims to ensure that unconsolidated SPEs are truly independent of their sponsoring companies. The FASB believes that the proposed Interpretation would require existing unconsolidated SPEs to be consolidated by primary beneficiaries if they do not effectively disperse risks among parties involved. SPEs that effectively disperse risks would not be consolidated unless a single party holds an interest or combination of interests that effectively recombines risks that were previously dispersed.

.92 Qualifying SPEs. Qualifying special-purpose entities (QSPEs), as described in FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, and other SPEs with similar characteristics are examples of SPEs that disperse risks. The proposed Interpretation states that

no party would be required to consolidate a QSPE unless a party has rights or obligations or both that would have prevented it from derecognizing the assets had it been the transferor.

.93 *Effect of Proposed Interpretation on EITF Issues.* The proposed Interpretation would nullify the consensuses reached in EITF Issue No. 90-15; EITF Issue No. 96-20, *Impact of FASB Statement No. 125 on Consolidation of Special Purpose Entities*; and EITF Topic No. D-14, *Transactions Involving Special Purpose Entities*. The provisions of the proposed Interpretation would partially nullify the consensuses reached in EITF Issue No. 96-21, *Implementation Issues in Accounting for Leasing Transactions Involving Special Purpose Entities*, and EITF Issue No. 97-1, *Implementation Issues in Accounting for Lease Transactions, including Those Involving Special Purpose Entities*.

.94 *Effective Date.* The proposed Interpretation is expected to be issued by the end of 2002. Its provisions would be applied immediately to SPEs created after the issuance date of the final interpretation. For SPEs created before that date, the provisions of the proposed Interpretation would be applied to those SPEs still existing as of the beginning of the first fiscal year or interim period beginning after June 15, 2003.

Auditing SPEs and Off-Balance-Sheet Arrangements

.95 Auditors should be alert to the existence or creation of SPEs. SPEs may be in the form of corporations, partnerships, limited liability companies, trusts, structured finance entities, or other kinds of agreements, relationships, or understandings. If an SPE has been identified, auditors should ensure that they understand the ownership structure of the entity, all significant terms of the transactions between the entity and the SPE and that management's conclusions regarding nonconsolidation and off-balance-sheet treatment are appropriate under GAAP. Companies may take SPEs to new heights of complexity and sophistication, capitalizing them with not only a variety of hard assets and liabilities, but also extremely complex derivative financial instruments, its own restricted stock, rights to acquire its stock, and related liabilities. As a result of the complexity of these structures and the scrutiny that this area of accounting is currently undergoing, auditors may need to consult with their national office or other technical experts regarding these kinds of structures and related transactions to ensure the appropriateness of accounting and disclosures.

.96 These arrangements may present exposures to the company for which the company's maximum possible liability is not reflected in the financial statements. The exposure can consist of exposures arising from contractual or other commitments as well as economic or legal compulsions to fund losses, provide additional funding, purchase capital stock or assets, or otherwise be financially effected by the performance or nonperformance of the other party.

.97 *Some Incremental Procedures to Perform.* In light of the unique nature of SPEs, the auditor should carefully consider whether transactions entered into with the SPE represent related-party transactions. Incremental procedures, as appropriate, may be necessary to understand the nature of the arrangements and to ascertain whether they represent related-party transactions. This is particularly the case if an entity enters into transactions with SPEs that are outside the company's normal course of business. Incremental procedures that the auditor may wish to consider include:

- Determining whether the issuer of loans or investments held or the primary obligor of debt guarantees issued indicate that an SPE may be involved
- Inquiring as to the nature and terms of any SPE or structured financial arrangements
- Reviewing significant documents and agreements related to significant transactions involving SPEs
- Inquiring about any modifications to existing SPEs that may have been made in the current period that could affect the accounting determined at the date of the transaction

.98 *Making Sure Enough Evidence Is Obtained.* In some circumstances, different auditors may exist for the SPE, or the SPE may not be audited. Situations may also exist in which the auditor is denied access to the

books and records of the SPE because of a lack of an entity interest in the SPE or other legal right to demand such access. Particularly in view of recent events and the risk of material misstatement of the financial statements due to fraud, auditors should consider conducting further procedures with respect to the books and records of the SPE, particularly focusing on whether the requisite outside investment in the SPE existed at the time of the transaction and continues to exist in subsequent periods. If the auditor is not allowed to confirm that GAAP has been followed, either through testing of the SPE's accounting records or through confirmation with other investors, auditors, or other third parties, the auditor should consider whether there is a scope limitation.

.99 If the auditor determines that off-balance-sheet arrangements and transactions represent related-party transactions, the auditor should refer to the related-party standards and guidance (see the topic entitled "Special Advice on Related Parties and Recent Accounting Scandals" of this section). Additionally, the auditor should consider tailoring the management representation letter to include specific representations on critical issues and assumptions related to SPE transactions and confirming that all relevant information and documents have been provided. When warranted, representations should also confirm that no side agreements exist that would materially affect the accounting.

Synthetic Leases

.100 Synthetic lease structures allow a company to treat a business arrangement as an operating lease for financial reporting purposes and yet gain the benefits of deducting interest and depreciation for tax purposes. Differences between the criteria for an operating lease under GAAP and under tax regulations create the opportunity for synthetic leasing to occur. SPEs are normally used to facilitate these transactions. Basically, a company establishes an SPE to own property. That SPE leases the property back to the company that created the SPE. In this manner, a company can gain the benefits of having real estate, without having to report any related assets or liabilities (i.e., heavy mortgage) in its financial statements. And, as stated above, it reaps certain tax benefits.

Accounting for Synthetic Leases

.101 The accounting for synthetic leasing is mainly contained in EITF Issue No. 90-15. Further guidance is contained in EITF Issue No. 96-21, *Implementation Issues in Accounting for Leasing Transactions Involving Special-Purpose Entities*; EITF Issue No. 97-1, *Implementation Issues in Accounting for Lease Transactions, Including Those Involving Special-Purpose Entities*; and EITF Issue No. 97-10, *The Effect of Lessee Involvement in Asset Construction*. EITF Issue No. 90-15 lists three conditions that, if met, would require a company to consolidate the lessor SPE. These conditions essentially indicate that the lessee is bearing substantially the risks and returns of the leased property. If the conditions are not met, the company would have a synthetic lease which they would treat as an off-balance-sheet arrangement.

.102 The proposed Interpretation of ARB No. 51, discussed above in the section entitled "Special Purpose Entities," would make it much more difficult for lessees to avoid consolidating the lessor SPE. In many cases, the lessee in the synthetic lease is the primary beneficiary of the lessor SPE. The proposed Interpretation would have the primary beneficiary consolidate the SPE into its financial statements. FASB's proposed Interpretation would nullify some of the EITF Issues listed above and would change the accounting for synthetic leases.

Risks to Watch for

.103 If the economy weakens, synthetic leases may become a trouble spot for entities engaged in such arrangements. Normally, the large amounts of debt that finance the SPE's acquisition of real estate in a synthetic lease becomes due in a short time (three to seven years). In poor economic times, the borrower SPE may run into difficulty refinancing that debt or selling the property. Companies that are the lessees in these arrangements (basically, the company that sponsored the SPE) may be on the hook for guaranteeing the debt or lease obligation.

Tips for Auditors

.104 Auditing advice related to synthetic leases is similar to the guidance presented in the “Special-Purpose Entities” section of this Alert, and you should read that section for auditing information. In some cases, synthetic leases and the related guarantees may be hidden and difficult to identify. Be on the lookout for terms that may point to the existence of a synthetic lease, such as:

- Tax-retention operating leases
- Residual value guarantees
- Restricted cash (meaning that the company may be guaranteeing lease obligations)

FASB Statement No. 142 Accounting Reminder

.105 Auditors should be alert to the proper implementation of FASB Statement No. 142, *Accounting for Goodwill and Intangible Assets*, at their clients. FASB Statement No. 142 requires substantially different accounting for goodwill and intangible assets than was previously required under accounting principles. Ensuring that an entity’s financial reporting properly reflects the requirements of FASB Statement No. 142 will be a challenge for management. These challenges include measuring fair value, determining useful lives, determining amortization methods, estimating residual values, ascertaining reporting units, and performing impairment testing. Auditing goodwill and intangible assets under these new principles may present challenges to auditors. You should be familiar with the accounting requirements of FASB Statement No. 142 and carefully plan the nature, timing, and extent of your audit procedures related to goodwill and intangible assets.

Reminder About Asset Retirement Obligations

.106 FASB Statement No. 143, *Accounting for Asset Retirement Obligations*, changes the measurement approach for asset retirement obligations and is effective for financial statements issued for fiscal years beginning after June 15, 2002. Auditors are reminded that FASB Statement No. 143 differs from previous practice in several significant respects:

- Under FASB Statement No. 19, *Financial Accounting and Reporting by Oil and Gas Producing Companies*, and most current practice, an amount for an asset retirement obligation was recognized using a cost-accumulation measurement approach. Under FASB Statement No. 143, the amount initially recognized is measured at fair value.
- Under FASB Statement No. 19 and most current practice, amounts for retirement obligations were not discounted and, therefore, no accretion expense was recorded in subsequent periods. Under FASB Statement No. 143, the liability is discounted and accretion expense is recognized using the credit-adjusted risk-free interest rate in effect when the liability was initially recognized.
- Under FASB Statement No. 19, dismantlement and restoration costs were taken into account in determining amortization and depreciation rates. Consequently, many entities recognized asset retirement obligations as a contra asset. Under FASB Statement No. 143, those obligations are recognized as a liability. Also, under FASB Statement No. 19, the obligation was recognized over the useful life of the related asset. Under FASB Statement No. 143, the obligation is recognized when the liability is incurred.

Some current practice views a retirement obligation as a contingent liability and applies FASB Statement No. 5, *Accounting for Contingencies*, in determining when to recognize a liability. The measurement objective in FASB Statement No. 143 is fair value, which is not compatible with a FASB Statement No. 5 approach. A fair-value measurement accommodates uncertainty in the amount and timing of settlement of the liability, whereas under FASB Statement No. 5, the recognition decision is based on the level of uncertainty.

Declines in the Value of Securities

.107 The declining stock market and uncertain business environment raise issues about the valuation and impairment of securities. Various market indexes have fallen significantly and near-term recovery is uncertain. Securities need to be evaluated to determine whether there has been a decline in value that is other than temporary. FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, establishes accounting standards for both marketable equity and debt securities. Regardless of the valuation method used, GAAP might require recognizing in earnings an impairment loss for a decline in fair value that is other than temporary (note that in the case of trading securities, unrealized holding gains and losses are included in earnings).

.108 Management should determine whether a decline in fair value below amortized cost basis is other than temporary. If the decline in fair value is judged to be other than temporary, the cost basis of the individual security should be written down to fair value as a new cost basis and the amount of the write-down should be included in earnings. The new cost basis shall not be changed for subsequent recoveries in fair value.

Investigating Declines in Value

.109 Management should investigate declines in the value of investments in securities caused by general market conditions or specific information pertaining to an industry or an individual company. Acting upon the premise that a write-down may be required, management should consider all available evidence to evaluate the fair value of its investment. Therefore, in conducting its investigation, management should consider the possibility that each decline may be other than temporary and reach its determination only after consideration of all available evidence relating to the fair value of the security.

.110 *Other than temporary* does not mean permanent. Thus, the point at which management deems the decline to no longer be temporary triggers the obligation to write down the investment. This point may precede a determination that an investment is permanently impaired.

Factors Indicating a Decline Is Other Than Temporary

.111 Judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors:

- Fair value is significantly below cost and:
 - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
 - The decline has existed for an extended period of time.
 - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

Determining the Fair Value of a Security

.112 Management's assessment of the fair value of a security should begin with its contemporaneous market price because that price reflects the market's most recent evaluation of the total mix of available

information. Objective evidence is required to support a fair value in excess of a contemporaneous market price. Such information may include:

- The issuer's financial performance including such factors as:
 - Earnings trends
 - Dividend payments
 - Asset quality
 - Specific events
- The near-term prospects of the issuer
- The financial condition and prospects of the issuer's region and industry
- Management's investment intent

Management should employ a systematic methodology that includes the documentation of the factors considered. Such methodology should ensure that all available evidence concerning declines in market values below cost will be identified and evaluated in a disciplined manner by responsible personnel.

Audit Implications

.113 SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), provides guidance on auditing investments in securities. The companion AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* provides essential guidance on how to apply SAS No. 92 to your audits. You should familiarize yourself with the guidance in these publications.

.114 The auditor should evaluate (1) whether management has considered relevant information in determining whether factors such as those listed above exist and (2) management's conclusions about the need to recognize an impairment loss. That evaluation requires the auditor to obtain evidence about such factors that tend to corroborate or conflict with management's conclusions. If the entity has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the entity has appropriately followed GAAP.

.115 The auditor is not responsible for designing procedures to detect the presence of these factors per se. Rather, the auditor should consider whether management has considered information that would be relevant in determining whether such factors exist. For example, the auditor would not be responsible for determining whether the financial condition of the issuer of a security has deteriorated, but instead, would ask management how it considered the issuer's financial condition. Once the auditor has determined that the entity considered relevant information, the auditor is responsible for evaluating management's conclusion about the need to recognize an impairment loss. To perform this evaluation, the auditor should gather evidence about factors that tend to corroborate or conflict with management's conclusions.

.116 If the entity has recognized an impairment loss, and the auditor agrees with that conclusion, the auditor should:

- Determine that the write-down of an investment to a new cost basis is accounted for as a realized loss.
- Test the calculation of the loss recorded.
- Determine that the new cost basis of investments previously written down is not changed for subsequent recoveries in fair value.
- Review a summary of investments written down for completeness and unusual items.

- Assess the credit rating of the counterparty.
- Conclude on the adequacy of impairment adjustments recorded.

Round-Trip Transactions

.117 The business community and the accounting profession have been witnessing numerous news stories of late concerning “round-trip” or “wash” transactions. These practices have been connected to the energy-trading and dot-com industries, most recently. The goal of these inappropriate accounting practices is to artificially inflate revenues by creating a circular flow of money that comes back to the company.

.118 Round-trip transactions can take many forms depending upon the industry and the circumstances involved. As an example of how these practices may be conducted in the dot-com sector, an arrangement is put in place by which Company A pays inflated sums to various vendors for services or products; in turn the vendors use these funds to buy online advertising from Company B. Company B then buys online advertising from Company A either on their own behalf or as agents for other advertisers. Company A records the funds it received from Company B as revenue in its financial statements, in violation of GAAP.

.119 In the energy industry, round-trip transactions or wash trades essentially involve passing power back and forth. Companies swap the same amounts of power at the same prices to boost revenue totals.

.120 Auditors should be alert to the possible existence of round-trip trading at their clients and perform audit procedures, as deemed necessary, to identify and test transactions that may point to round-trip accounting. If your client engages in advertising barter transactions, the guidance established in EITF Issue No. 99-17, *Accounting for Advertising Barter Transactions*, should be applied.

Deferring or Eliminating Current Expenses

.121 A major method of managing earnings, and one that has garnered major headlines lately, consists of not recording or deferring current expenses. Questionable or fraudulent accounting practices related to the recognition of expenses is nothing new; however, given the recent rise in reported inquiries and investigations concerning questionable or fraudulent expense recognition practices, auditors should heighten their awareness of this risk and be alert to how management often uses expense accounting to manage earnings. Methods in the news recently include:

- Capitalizing costs that should be expensed
- Inflating the salvage values and useful lives of depreciable assets
- Failing to record accrued expenses
- Failing to write off capitalized costs on projects that are no longer viable (For instance, costs related to the construction of a major asset, which were capitalized, remained as capitalized assets after the construction project was canceled.)
- Reversing the recording of expenses in one period and re-recording them in the next period (Thus, expenses that have been incurred, paid, and recorded in a period are removed from the accounting records and reinstated in the next period, thus violating the matching principle and GAAP.)
- Failing to record adequate asset valuation allowances like inventory shrinkage and doubtful receivable accounts
- Netting expenses with unrelated income
- Improperly classifying expenses on the income statement

Expenditures Related to Existing Assets

.122 Often, one may encounter difficulty in determining whether an expenditure is a capital expenditure or a normal expense. In general, costs incurred that increase the future benefits of an asset or increase its useful life should be capitalized and costs incurred that maintain an existing level of benefit or service should be expensed. Said again, costs that do not increase an asset's future benefits should be expensed.

.123 Ordinary repairs and maintenance expenses should be expensed in the period they are incurred. If the repair is a major repair that will benefit several future periods, consideration should be given to treating the major repair as an improvement. Improvements to and replacements of existing assets may be difficult to differentiate from normal repairs. Judgment must be applied in determining whether the costs incurred actually increase the future service/benefit potential of the asset. If they do, those costs should generally be capitalized.

Disclosure of Factoring Arrangements

.124 Auditors are reminded that factoring arrangements that exist at their clients may need to be disclosed in the financial statements. Factoring arrangements are a means of discounting accounts receivable on a nonrecourse, notification basis. Accounts receivable are sold outright, usually to a transferee (the *factor*) that assumes the full risk of collection, without recourse to the transferor in the event of a loss. Debtors are directed to send payments to the transferee. Factoring arrangements that meet the criteria in paragraph 9 of FASB Statement No. 140, should be accounted for as sales of financial assets because the transferor surrenders control over the receivables to the factor. FASB Statement No. 140 provides guidance on required disclosures.

Cookie-Jar Accounting—Manipulation of Accounting Estimates and Accruals

.125 The increased difficulty in reporting positive or improving financial results during difficult economic times may raise pressure on management to adopt aggressive accounting practices that may improve operating results. Accounting estimates and accruals, by their nature, are easily subject to aggressive accounting practices and therefore are a means to manage earnings. Some of the financial reporting scandals in the news of late involved the use of *cookie-jar* reserves to manage earnings. Simply put, cookie jar accounting consists of overstating accruals, allowances, and other reserves in one period and then reversing them in a subsequent period to boost reported earnings. Auditors may need to pay special attention to this risk on their engagements.

.126 Preparers of financial statements should understand the economic substance of a transaction, and then reflect it properly in the books and records of the company. However, this is not always easy, as accounting rules are not simply black and white, and the nature of transactions is ever more complex.

.127 Changes in estimates may be acceptable when supported by real economic facts, but changing estimates if the underlying economics of the business do not support the change, and without any disclosure, is inappropriate. Auditors may need to review changes in estimates to determine that they are appropriate, timely, and adequately supported with sufficient competent evidential matter. In addition, the company's disclosures need to comply with the requirements of APB Opinion No. 20, *Accounting Changes*, regarding the need to disclose material changes in accounting estimates. Paragraph 33 of APB Opinion No. 20 specifically requires companies to disclose the effect on income and per share amounts for a change that affects several future periods.

.128 Similarly, as required by Item 303 of Regulation S-K, SEC registrants should also disclose in Management's Discussion and Analysis (MD&A) changes in accounting estimates that have a material effect on the financial condition or results of operations of the company, or trends in earnings, or would cause reported financial information to be not necessarily indicative of future operating results or of future financial condition.

SAS No. 57 and Auditing Guidance

.129 Accruals and other estimates are highly subjective and difficult for auditors to verify. When auditing accounting estimates, auditors should give close attention to the underlying assumptions used by management. SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), provides guidance on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates used in a client's financial statements. The guidelines set by SAS No. 57 include:

- Identifying the circumstances that require accounting estimates
- Considering internal control related to developing accounting estimates
- Evaluating the reasonableness of management's estimate by reviewing and testing the process used and the assumptions made
- Developing an independent expectation about the estimate

As discussed in SAS No. 57, auditors should carefully consider the effects of postbalance-sheet events on the estimation process. Auditors should refer to SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), which provides guidance on events or transactions that have a material effect on financial statements and that occur subsequent to the balance-sheet date but before the issuance of the financial statements and the auditor's report. Such events or transactions may require adjustment or disclosure in the financial statements.

Evaluating the Support for Management's Assumptions

.130 Management can easily manage and boost earnings by changing the assumptions underlying key accounting estimates. For example, management can change the expected life of some long-term assets to reduce depreciation expense, or management can decide to become more optimistic about when customers will pay their debts and thus reduce bad debt expense on the company's books. When evaluating the support for the assumptions underlying an accounting estimate, you will probably have to rely on evidence that is persuasive, not convincing. Rarely will you be able to obtain enough evidence to be convinced beyond all reasonable doubt.

.131 In order for you to be persuaded, there should be a preponderance of information to support each significant assumption. Preponderance does not mean that a statistical majority of available information points to a specific assumption. Rather a preponderance of information exists when the weight of available information tends to support the assumption.

.132 Remember, as an auditor, you are not trying to conclude that any one given outcome is expected. What you are trying to do is to determine whether certain assumptions are supportable and in turn provide a reasonable basis for the development of the soft accounting information.

.133 When evaluating the support for assumptions you should consider whether:

- Sufficient pertinent sources of information about the assumptions have been considered.
- The assumptions are consistent with the sources from which they were derived.
- The assumptions are consistent with each other.
- The assumptions are consistent with management's plans.
- The information used to develop the assumptions is reliable.
- The logical arguments or theory, considered with the data supporting the assumptions, are reasonable.

.134 Practical guidance on auditing estimates is available in the AICPA Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk). This publication includes information on how

to plan effectively for the audit of soft accounting information, gather and assess relevant audit evidence, and present and disclose proper financial statements. Case examples and information sources necessary to conduct general business and industry research are also included.

Spring-Loading and Premerger Outlays

.135 An entity acquiring another entity may try to worsen the reported financial performance of the purchased company during the period immediately preceding the acquisition date, the *stub period*. By worsening the financial performance of the acquired company before the acquisition, management will find it much easier to report “improved” performance after the acquisition, thus demonstrating the positive effects of the business combination and providing a pop in reported earnings. This practice is often referred to as *spring-loading*. Generally, the practice involves accelerating the purchased company’s payment of payables and other obligations, and writing down investments and other assets on the purchased company’s books. These practices may not necessarily violate the letter of any GAAP standard.

Inappropriately Large Reserves

.136 However, this sort of financial engineering may involve the deliberate inflation of reserves and allowances recorded on the acquired company’s books. These inflated reserves are then reversed in the period following the acquisition providing a generous burst of earnings growth. Accounts that can be manipulated like this include:

- Reserves for merger costs
- Inventory obsolescence allowance
- Pension allowances
- Restructuring reserves
- Reserves for worker’s compensation and medical insurance

Auditors should be on the lookout for these kinds of accounting practices and determine that appropriate GAAP is being followed. Refer to the section of this Alert entitled “Cookie-Jar Reserves” for guidance on accounting for estimates and auditing those amounts.

Overvaluing Equity Investments and the Fair Value of Derivative Instruments

.137 The business and accounting scandals in the news lately revealed accounting improprieties related to investment valuation and derivative instrument valuation. Trouble spots consisted of overvaluing equity investments and overestimating the fair value of derivative contracts; specifically, derivative contracts involved in energy trading. By over-valuing a derivative instrument or an investment, gains result which enhance reported earnings. Auditors should be on the lookout for inflated investment and derivative valuations.

Accounting for Investments in Equity Securities

.138 Generally speaking, FASB Statement No. 115 provides the accounting for investments in equity securities in which the investor holds less than a 20-percent interest in the investee. APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, provides the accounting for investments in which the investor exercises significant influence over the investee (usually 20- to 50-percent ownership interest). When an investor owns over 50 percent of an investee, then consolidation of the investee into the investor’s financial statements is usually required as described in ARB No. 51, as amended by FASB Statement No. 94, *Consolidation of All Majority-Owned Subsidiaries*.

Accounting for Derivatives at Fair Value

.139 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, requires all derivatives reported in the statement of financial position to be measured at fair value. The more complex a

derivative, the more difficult it is to determine its fair value. The fair values of derivatives that are exchange-traded are available from independent pricing sources, such as financial publications. The fair values of other derivatives and securities may be available through broker-dealers not affiliated with the entity. Determining fair value can be particularly difficult, however, if a transaction has been customized to meet individual user needs. Valuation risk exists whenever models (as opposed to quoted market prices) are used to determine the fair value of a derivative or security.

Additional Accounting Information on Energy Trading Contracts

.140 EITF Issues No. 98-10, *Accounting for Contracts Involved in Energy Trading and Risk Management Activities*, and No. 00-17, *Measuring the Fair Value of Energy-Related Contracts in Applying Issue No. 98-10*, and EITF Topic No. D-105, *Accounting in Consolidation for Energy Trading Contracts between Affiliated Entities When the Activities of One but Not Both Affiliates Are within the Scope of Issue No. 98-10*, address various aspects of the accounting for contracts involved in energy trading and risk management activities. EITF Issue No. 02-3, *Issues Related to Accounting for Contracts Involved in Energy Trading and Risk Management Activities*, has been developed to codify and reconcile the EITF consensuses on those Issues, and identify other related interpretive issues that have not yet been addressed by the EITF.

.141 At their October 2002 meeting, the EITF reached a consensus to rescind EITF Issue No. 98-10, the impact of which is to preclude mark-to-market accounting for all energy trading contracts not within the scope of FASB Statement No. 133. The EITF also reached a consensus that gains and losses on derivative instruments within the scope of FASB Statement No. 133 should be shown net in the income statement if the derivative instruments are held for trading purposes. The consensuses reached effectively supersede the consensuses reached on EITF Issue No. 02-3 at the June 19-20, 2002, EITF meeting. The consensus regarding the rescission of EITF Issue No. 98-10 is applicable for fiscal periods beginning after December 15, 2002. Energy trading contracts not within the scope of FASB Statement No. 133 purchased after October 25, 2002, but prior to the implementation of the consensus are not permitted to apply mark-to-market accounting.

Auditing Investment and Derivative Valuation

.142 The auditor should obtain evidence supporting management's assertions about the fair value of derivatives and securities measured or disclosed at fair value. The auditor should determine whether GAAP specify the method to be used to determine the fair value of the entity's derivatives and evaluate whether the determination of fair value is consistent with the specified valuation method. GAAP may require that an investment or derivative be valued based on cost, the investee's financial results, or fair value. GAAP may also require disclosures about the value of an investment or derivative. Auditors should follow the guidance in SAS No. 92, as appropriate. Auditors should also read chapter 6 of the AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, which contains a wealth of guidance on auditing valuation assertions and other related matters.

Valuation Models Can Be Easy to Tweak

.143 The valuation problems in the news concerned the use of a valuation model and the ease with which it was manipulated by management to bump up the value of investments and derivative contracts, and increase reported income. If the client uses a model to estimate the fair value of an investment or derivative, the auditor may assess the reasonableness and appropriateness of the model by testing the procedures used by management. A valuation model may be easy to adjust in various ways to inflate the reported valuation of an investment or derivative. Consider the following auditing procedures:

1. Identify whether there are controls over the preparation of accounting estimates and supporting data that may be useful in the evaluation.
2. Identify the sources of data and factors that management used in forming the assumptions, and consider whether such data and factors are relevant, reliable, and sufficient for the purpose based on information gathered in other audit tests.

3. Consider whether there are additional key factors or alternative assumptions about the factors.
4. Evaluate whether the assumptions are consistent with each other, the supporting data, relevant historical data, and industry data.
5. Analyze historical data used in developing the assumptions to assess whether the data are comparable and consistent with data of the period under audit, and consider whether such data are sufficiently reliable for the purpose.
6. Consider whether changes in the business or industry may cause other factors to become significant to the assumptions.
7. Review the available documentation of the assumptions used in developing the accounting estimates and inquire about any other plans, goals, and objectives of the entity, as well as consider their relationship to the assumptions.
8. Consider using the work of a specialist regarding certain assumptions.
9. Test the calculations used by management to translate the assumptions and key factors into the accounting estimate.

Exchanges of Nonmonetary Assets

.144 Several recent financial reporting scandals involved the business practices of telecommunications companies “swapping” network capacity. Many of these articles suggest that the companies entering into these transactions may have inappropriately inflated their operating results by recognizing revenue for the network capacity sold, and recording long-term fixed assets for the capacity purchased.

Getting the Accounting Right

.145 In general, APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, requires that the accounting for the exchange of nonmonetary assets be based on the fair value of the asset received or given up, whichever is more reliably determinable. One of the exceptions to this general principle is an asset exchange that does not represent the culmination of the earnings process. For example, an exchange of an asset held for sale in the ordinary course of business (such as inventory) for an asset to be sold in the same line of business. Furthermore, the exchange of a productive asset not held for sale for a similar productive asset also is not viewed as the culmination of the earnings process. These types of nonmonetary exchange transactions are required to be accounted for based upon the recorded amount, or book value, of the asset relinquished.

.146 The simultaneous exchange of nonmonetary assets along with equal amounts of cash consideration between the parties to an exchange would raise significant questions about *substance over form*. If cash consideration is exchanged between the parties to a transaction concurrently with an asset exchange, questions may arise as to the substance or business purpose of the transaction structure, and whether that structure has an economic purpose or is designed solely to remove the transaction from the scope of the accounting literature governing nonmonetary asset exchanges.

.147 In these situations, a careful analysis of the specific facts and circumstances surrounding the transaction would have to be made. To the extent that the “check swapping” between the parties lacks economic substance, such a practice should not alter the accounting for such exchange transactions. In other words, the accounting rules for nonmonetary asset exchanges should be followed.

.148 In addition to APB Opinion No. 29, accounting guidance concerning nonmonetary exchanges is discussed in EITF Issues No. 01-2, *Interpretations of APB Opinion No. 29*; No. 98-3, *Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business*; No. 93-11, *Accounting for Barter Transactions Involving Barter Credits*; No. 99-17, *Accounting for Advertising Barter Transactions*; No. 84-39, *Transfers of Monetary and Nonmonetary Assets among Individuals and Entities under Common Control*; and No. 91-5, *Nonmonetary Exchange of Cost-Method Investments*.

Financial Statement Disclosures

.149 Companies that engage in material nonmonetary transactions during a reporting period are required, under APB Opinion No. 29, to disclose, in the footnotes to the financial statements, the nature of the transactions, the basis of accounting for the assets transferred (that is, fair value or book value), and gains or losses recognized. FASB Statement No. 95, *Statement of Cash Flows*, requires that information about all investing and financing activities of an enterprise that affect recognized assets or liabilities but that do not result in cash receipts or payments, such as nonmonetary asset exchanges, be disclosed in the footnotes to the financial statements.

.150 Furthermore, the SEC's rules require registrants to include in their MD&A, a discussion of the known trends, demands, events, commitments, and uncertainties that are reasonably likely to materially affect a registrant's liquidity, capital resources, and the results of operations. To the extent that nonmonetary exchange transactions have a significant impact on a registrant's liquidity, capital resources, or results of operations, the disclosure of these transactions in MD&A would be required.

Accounting for Telecommunications Capacity Swaps

.151 The expansion of fiber optic communications increased the frequency of transactions involving the "sale" of network capacity. The granting of an indefeasible right to use such network capacity is often referred to as an *IRU*. Pursuant to an *IRU*, an entity purchasing network capacity has the exclusive right to use a specified amount of capacity for a period of time.

.152 As mentioned above, some telecommunications entities swap network capacity. The SEC staff has concluded that all *IRU* capacity swaps consisting of the exchange of leases should be evaluated within paragraph 21 of APB Opinion No. 29. That is, if a swap involves leases that transfer the right to use similar productive assets, the exchange should be treated as the exchange of similar productive assets, irrespective of whether the "outbound" lease is classified as a sales-type lease, direct financing lease, or operating lease and irrespective of whether the "inbound" lease is classified as a capital lease or an operating lease. The SEC staff believes that the lease classification criteria of FASB Statement No. 13, are not an appropriate basis for an entity to "filter" a determination of whether the exchange involves similar productive assets. This conclusion is based on the thought that the right to use an asset, i.e., a lease, is in fact an asset and not a service contract, irrespective of whether such asset is recognized in a company's balance sheet.

.153 This conclusion would require that *IRU* capacity swaps involving the exchange of leases be recognized based on the carrying value of the assets exchanged, rather than at fair value. The SEC staff did point out that exchanges involving sufficient boot would still be treated as part monetary and part nonmonetary as per EITF Issue No. 01-2.

.154 The SEC staff expects that registrants will apply this guidance historically to *IRU* capacity swap transactions that occurred in prior years and, if appropriate, restate their financial statements.

Expensing Stock Options

.155 As a rash of accounting scandals has put the spotlight on companies' financial statements, the accounting treatment of stock options has come under scrutiny. During the second half of 2002, several major U.S. companies have announced their intentions to change their method of accounting for employee stock options to an approach that recognizes an expense for the fair value of the options granted in arriving at reported earnings.

Pros and Cons of Expensing Stock Options

.156 The debate to expense or not to expense stock options rages on. Proponents of expensing stock options argue that stock options represent a large percentage of executive pay. Since all other types of compensation

must be deducted from earnings, they say options should be no exception. Supporters of expensing stock options insist that there has always been a cost for issuing options. When options are exercised, they add to the shares outstanding, in turn driving down earnings per share. To combat this dilutive effect, many companies buy back large number of shares that their executives have exercised. The cash required to buy back these shares is no longer available for use in running and improving the company. Moreover, these companies are not able to use the funds they otherwise would have received by selling those shares in the open market. Therefore, those who support expensing options argue that such costs should be reflected in earnings. Finally, in today's scandalous climate, many more companies are choosing to expense stock options in the hopes of regaining the public's confidence in financial reporting.

.157 But there are many who disagree. Granting options requires no cash outlay, like salaries. Since there is no real cost for companies to deduct, opponents argue that expensing them will unfairly affect earnings. In addition, there is no universal standard for expensing options and all valuation methods require assumptions and estimates. Expensing options could reduce the accuracy of the income statement and leave them open to manipulation. Thus, those who oppose expensing stock options believe that expensing options will undermine the very transparency that the investors are demanding.

FASB Statement No. 123 or APB Opinion No. 25

.158 FASB Statement No. 123, *Accounting for Stock Based Compensation*, defines a fair-value-based method of accounting for employee stock options and encourages all entities to adopt that method of accounting for all of their employee stock option plans. When the Statement was developed in the mid 1990s, it met with significant opposition from the business community. Therefore, while FASB Statement No. 123 provides that expense recognition for the fair value of employee stock options granted is the *preferable* approach, it allows companies to continue to measure compensation cost using the intrinsic value-based method of accounting prescribed by APB Opinion No. 25. Those companies that elect to remain with the accounting in APB Opinion No. 25 must make pro forma disclosures of net income and, if presented, earnings per share, as if the fair-value method of accounting as defined by FASB Statement No. 123 has been used.

.159 Under the fair-value-based method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. Under the intrinsic-value-based method, compensation cost is the excess, if any, of the quoted market price of the stock at grant date over the amount an employee must pay to acquire the stock.

FASB Project to Reconsider Transition and Disclosure Provisions of FASB Statement No. 123

.160 As more and more companies are adopting the preferable approach of FASB Statement No. 123, *Accounting for Stock-Based Compensation*, the FASB has undertaken a limited scope project to reconsider the transition and disclosure provisions of FASB Statement No. 123. This proposal does *not* require companies to adopt the fair-value recognition provisions of FASB Statement No. 123.

.161 The FASB proposal, as it is currently written, would allow those companies who decide to voluntarily adopt the fair-value method to choose from one of three transition methods. Disclosure requirements would be amended also under the proposal to require disclosure of the following information in the accounting policy note of annual and interim financial reports:

- The method of accounting for stock options used in each period presented
- Until such time as stock compensation expense recognized in each period has been measured under the fair-value recognition provisions of FASB Statement No. 123, tabular presentation of:
 - Total stock compensation cost included in net income each period
 - Additional stock compensation cost that would have been included in net income had the fair-value recognition provisions of FASB Statement No. 123 been adopted as of its effective date

- Pro forma net income and earnings per share that would have been reported had fair-value recognition provisions of FASB Statement No. 123 been adopted as of its effective date

The FASB expects to issue an exposure draft of these proposed changes to FASB Statement No. 123 in late 2002.

Potential Future Audit and Business Risks

.162 Auditors should keep alert to the following matters that may be lurking as potential future risks at certain entities.

Off-Balance-Sheet Commitments

.163 Entities, particularly financial institutions, maintain binding commitments to loan substantial sums of money to other parties. These commitments may not be adequately disclosed in the financial statements. If the economy and business environment worsens, and businesses find themselves in trouble and in need of cash, the institutions and other entities that entered into these loan commitments will be forced to send good money after bad, providing significant funds to those troubled businesses. Fulfilling these promises to provide additional funding can be a bad proposition, since collection from a troubled borrower is questionable. One need only look at the examples of Enron and Kmart to understand the risks involved; institutions were required to extend loans to those entities at the very time they were spiraling downward.

.164 Adequate allowances for these commitments may be insufficient or nonexistent. Auditors may need to determine the extent of these commitments at their clients and determine whether they have been properly accounted for, whether any necessary allowance has been established, and whether adequate disclosure of such commitments is made.

Underfunded Pensions

.165 As the stock market has plummeted, so has the value of pension plan assets. Suddenly, entities are faced with the prospect of pouring money into underfunded pension plans. These contributions will reduce earnings, perhaps significantly. In addition, companies with underfunded pension plans face the risk of technically defaulting on the debt they carry. Thus, a going-concern problem can arise. Auditors should be aware of this risk in this current economic environment and determine whether this risk exists at their clients. Audit procedures may need to be designed and performed to address liabilities for underfunded pensions and any going-concern risks. In addition, auditors may need to determine whether disclosure in the financial statements is warranted, based on the pension circumstances at each client.

Unrealistic Pension and Other Postretirement Plan Assumptions

.166 The uncertainty of the current business environment, the falling market values of many investments, and the significant drops in interest rates could contribute to a risk that key assumptions used by management in recording accounting estimates related to their company's pension plan and other postretirement plans may be unrealistic and lead to material misstatement in the financial statements.

.167 Management needs to continually monitor the key assumptions used in measuring pension benefit obligations, returns on plan assets, and periodic service cost. Principal actuarial assumptions include discount rates, participation rates, and factors affecting the amount and timing of future benefit payments. FASB Statements No. 87, *Employers' Accounting for Pensions*, and No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, indicate that each assumption shall reflect the best estimate solely with respect to that individual assumption on the applicable measurement date.

.168 Furthermore, if activity within an existing plan, such as earnings or returns on invested plan assets, has a material impact on the company's liquidity, capital resources, or results of operations, that activity should be discussed in MD&A.

Synthetic Leases

.169 As stated earlier in this Alert, if the economy weakens, synthetic leases may become a trouble spot for entities engaged in such arrangements. Normally, the large amounts of debt that finance the SPE's acquisition of real estate in a synthetic lease becomes due in a short time (three to seven years). In poor economic times, the borrower SPE may run into difficulty refinancing that debt or selling the property. Companies that are the lessees in these arrangements (basically, the company that sponsored the SPE) may be on the hook for guaranteeing the debt or lease obligation. Auditors should read the section above about synthetic leases for further guidance.

Professional Issues

The Sarbanes-Oxley Act of 2002

.170 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (the Act). The Act dramatically affects the accounting profession and affects not just the largest accounting firms, but any CPA actively working as an auditor of or for a publicly traded company or any CPA working in the financial management area of a public company. The Act contains some of the most far-reaching changes that Congress has ever introduced to the business world. Although most of the provisions of this legislation are specific to auditors of public companies, even practitioners not performing audits may be affected by the Act. Therefore, all CPA firms should become familiar with the provisions of the Act.

Timetable

.171 For a timetable of key actions to be taken in response to the Act and for knowledge about what auditors need to know for 2002 audits, 2003, and beyond, go to www.aicpa.org/sarbanes/index.asp.

Major Provisions

.172 Major provisions of the Act include:

- A new Public Company Accounting Oversight Board (PCAOB) of five members has been appointed and is overseen by the SEC. This private-sector regulatory structure will be funded by public companies through mandatory fees.
- Auditors of public companies will be required to register with the board.
- The board has the authority to set and enforce auditing, attestation, ethics, and quality control standards for audits of public companies.
- The Act requires the board to include in auditing standards certain requirements such as:
 - Retention of the audit working papers for a seven-year period
 - A concurring or second partner review of audit reports
 - A description, in the auditor's report of the scope of the auditor's testing of the internal control structure and procedures of the issuer
- Inclusion in the auditor's report or in a separate report of (1) the findings of the auditor's testing of internal controls; (2) an evaluation of (a) whether the internal control structure and procedures include maintenance by the issuer of records that accurately and fairly reflect the transactions and disposition of assets and (b) whether the issuer's internal controls provide reasonable assurance that transactions are recorded in conformity with GAAP, and that receipts and expenditures are being made only in accordance with authorizations of management and directors; (3) a description, at a minimum, of material weaknesses in internal controls.

- The board is empowered to inspect the auditing operations of public accounting firms and to investigate violations of securities laws, standards, competency, and conduct.
- The board can impose disciplinary or remedial sanctions for violations of the board's rules, securities laws related to public company audits, and professional accounting standards. The board will perform annual quality reviews (inspections) for the largest audit firms (more than 100 issuers); smaller firms must be inspected every three years.
- The Act restricts the consulting work auditors may perform for a public company it audits. Banned nonaudit services include bookkeeping, information systems design and implementation, appraisals or valuation services, actuarial services, internal audits, management and human resources services, broker/dealer and investment banking services, legal or expert services unrelated to audit services, and other services the board determines by rule is impermissible. Nonaudit services not banned are allowed if preapproved by the audit committee.
- Audit committees of the company's board of directors are responsible for the hiring, compensation, and oversight of the independent auditor.
- CEOs and CFOs are required to certify company financial statements, with criminal (up to 20 years) and civil (up to \$5 million) penalties for false certification. In the event of a restatement of financial statements arising from securities fraud, CEOs and CFOs must forfeit trading profits and bonuses received prior to the restatement.
- Document altering or destroying in a federal or bankruptcy investigation is now a felony with penalties of up to 20 years. Key audit documents and e-mail must be preserved for five years. It is a felony, with penalties of up to 10 years, to destroy such documents. There is also a provision that requires retention of key audit documents, as defined by the SEC, for seven years.
- The statute of limitations for the discovery of fraud is extended to two years from the date of discovery and five years after the act. (It was previously one year from discovery and three from the act.)

To read a detailed description of the Sarbanes-Oxley Act, go to http://www.aicpa.org/info/sarbanes_oxley_summary.htm.

Ramifications and Rulemaking

.173 The ramifications of some of the provisions in the Sarbanes-Oxley Act will become known only as the SEC and the new PCAOB begin implementing the law. In response to the Act, the SEC has issued a number of rulings, including but not limited to the following:

- The SEC adopted amendments to accelerate the filing deadlines for quarterly reports on Form 10-Q, and annual reports on Form 10-K, required under the Securities Exchange Act. Certain exceptions exist for newer and smaller issuers.
- The SEC adopted rules that require an issuer's principal executive officer and principal financial officer to certify the contents of the issuer's quarterly and annual reports. In addition, officers will need to make representations about the company's disclosure controls and procedures. Changes in internal controls and corrective actions to address significant deficiencies and weaknesses in internal controls are also to be addressed.
- Insider trading reports will need to be filed within two days.

Furthermore, as of the writing of this Alert, the SEC has issued proposed rules regarding improper influence on conduct of audits, code of ethics for senior financial officers, audit committee financial experts, internal control reports, the disclosure of off-balance-sheet activities in MD&A, auditor independence, the retention of audit records, and pro forma financial information. The SEC is expected to also propose rules regarding numerous other provisions of the Act.

Implications for CPAs With Tax Practices

.174 *Expert services* are not defined in the Act and we do not know how broadly the board or the SEC will define this term. It is conceivable that some tax services viewed as traditional may be construed as expert services, and not permitted by any firm providing audit services to publicly held audit clients. In addition, tax services performed by an auditor for a publicly held company would require preapproval by the client's audit committee.

.175 In early December 2002, the SEC proposed rules that address the selling of tax strategies by accounting firms to their audit clients. You can find more information about this recent SEC activity by visiting the SEC web site at www.sec.gov/rules/proposed/33-8154.htm.

Additional Responsibilities for CPAs in Business and Industry

.176 CPAs working in the financial management areas of public companies will be directly affected by the Act. These CPAs need to be aware of the new responsibilities of CEOs and CFOs. They also have a greater duty to communicate and coordinate with corporate audit committees. There are new requirements regarding enhanced financial disclosures as well. CPAs in nonpublic companies should be aware of the possibility that other federal and state regulators may consider adopting similar corporate governance and audit requirements for nonpublic companies.

Loans to Directors and Officers and Insider-Trading Reports

.177 The Act prohibits SEC registrants from making many types of personal loans to their directors and executive officers. In accordance with the Act, corporate insiders of public companies must file reports of transactions in the companies' securities by the second day after the execution of the transaction.

Cascade Effect

.178 Of particular concern is just how far down the Act will cascade, affecting the nation's small and midsized accounting firms of nonpublic companies. A major concern is that the new legislation by Congress may become the template for parallel federal and state legislative or rule changes that directly affect both nonpublic companies that are subject to other regulations and the CPAs that provide services to them.

.179 Section 209 of the Act states:

In supervising nonregistered public accounting firms and their associated persons, appropriate State regulatory authorities should make an independent determination of the proper standards applicable, particularly taking into consideration the size and nature of the business of the accounting firms they supervise and the size and nature of the business of the clients of those firms.

As we write, several states are moving forward with legislation that could result in additional burdens for CPAs and possibly conflict with federal laws. The AICPA and the state CPA societies are monitoring this situation closely and will continue to keep you informed.

Audit Engagement Changes Resulting From Sarbanes-Oxley

.180 Currently, the AICPA ASB is considering the provisions of the Act and its audit implications. Issues being addressed include:

1. A possible amendment to SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), to address the audit working paper retention provisions of the Act
2. Revisiting the attestation standards in light of the Act's provisions regarding internal control reporting

3. Making changes to the quality control standards to respond to the Act's provisions concerning audit partner rotation, concurring review partner reviews, and quality control
4. Looking at communication and reporting needs of audit committees

.181 Internal Control Reports. As mentioned above, the SEC has issued proposed rules that would require a company to file an annual internal control report as part of its annual report. This report would address management's responsibility to establish internal controls and procedures for financial reporting and require management to evaluate the effectiveness of those controls and procedures as of the last day of the company's fiscal year. Under Section 404(b) of the Act, the company's auditor must attest to and report on management's assertions in the internal control report. The company must state this fact and file the auditor's attestation in its annual report.

.182 The ASB has a task force working on providing guidance to auditors for performing this new requirement. It is expected that Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), of the Attestation Standards will serve as a good standard (with some possible modifications) for providing this service. It is also expected that the ASB will enable the auditor to provide, in one report, their opinion on the financial statements and the effectiveness of the internal controls over financial statements.

.183 Quality Control Inspections. The Act, in setting forth quality control requirements, uses the term *internal inspections*. The existing joint quality control task force of the ASB is addressing whether the quality control standards will go back to inspection as an element rather than the current element of monitoring. It is unclear to us why the legislation uses the term *internal inspection* rather than *monitoring*. The current quality control standards recognize that internal inspections are one way to monitor a firm's practice and are used by many firms, including all larger firms. We expect that the quality control standards may be amended to state that firms auditing public companies conduct annual internal inspections as part of their monitoring procedures.

.184 Concurring Partner Review. The new Act requires a concurring partner review. The ASB is currently considering this requirement. It is expected that any guidance will look very similar to the existing SEC Practice Section (SECPs) membership requirement in terms of the concurring reviewer's responsibilities and competencies.

.185 Audit Committees. Section 204 of the Act sets forth certain items that will be required to be reported to the audit committee. It is not clear whether this needs to be a written report or whether oral reports will be acceptable. The ASB has formed a new task force to look at all of the auditor/audit committee aspects of the Act. It is too early to determine the direction of the task force in providing new standards. The task force will need to discuss some of these issues with the board (once it is has been formed) and SEC before making any conclusions. The task force will focus not only on the auditor/audit committee relationship but also how best to communicate with audit committees and how to make certain that audit committees are discharging their responsibilities appropriately.

Your Professional Resource

.186 To help you understand the ramifications of the Sarbanes-Oxley Act and to help you comply with its provisions, the AICPA is developing several resources, including:

1. A new toll-free number is available for any questions your firm or company may have about the legislation, how it will be implemented, and how to comply. The hotline will be staffed Monday through Friday for the remainder of 2002. Call (866) 265-1977, and select the option that is most appropriate for your firm or company. You will receive a response within 24 hours.
2. The AICPA has established the "Sarbanes-Oxley Act Implementation Central" at AICPA Online at www.aicpa.org/sarbanes/index.asp to keep you up-to-date on important developments.

3. Periodic Webcasts will be conducted to brief members on issues as they emerge, as well as short video clips and news alerts that will be sent to members through e-mail.
4. A one-hour CPE training course on the legislation has been developed.
5. Updates and information will be published in numerous newsletters and other communication channels, including AICPA Online, the CPA Letter, and the Journal of Accountancy.

Reaudit Engagements

.187 An auditor may be engaged to reaudit and report on financial statements that have been previously audited and reported on by another auditor (the predecessor auditor). The auditor conducting a reaudit engagement, defined in SAS No. 84, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1, AU sec. 315), as the successor auditor but hereinafter referred to as the reauditor, should not place reliance on the work of the predecessor auditor. Even when a reputable firm has already audited the financial statements, the reaudit work performed and the conclusions reached are solely the responsibility of the reauditor. The reauditor should be aware of the audit guidance provided in paragraphs 14 through 20 of SAS No. 84, and in AICPA Practice Alert 02-3, *Reauditing Financial Statements*.

FASB Statement No. 142 Valuation Services

.188 In light of the substantial accounting changes introduced by FASB Statement No. 142, practitioners may become involved in assisting management with determining methodologies for calculating various fair-value measurements, and impairment valuation. Auditors should be aware of and comply with all applicable independence rules (AICPA, SEC, regulatory bodies, etc.) related to the performance of such services.

.189 The AICPA Code of Professional Conduct (Code), states, in Rule 101, *Independence, Interpretation* No. 101-3, "Performance of Other Services" (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05):

A member in public practice or his or her firm ("member") who performs for a client services requiring independence ("attest services") may also perform other nonattest services ("other services") for that client. Before a member performs other services for an attest client, he or she must evaluate the effect of such services on his or her independence. In particular, care should be taken not to perform management functions or make management decisions for the attest client, the responsibility for which remains with the client's board of directors and management.

Interpretation No. 101-3 of the Code goes on to provide much more guidance on this topic. Practitioners should be familiar with these rules. Be aware that an AICPA Ethics task force is currently considering changes to these rules, especially in the areas of bookkeeping, payroll, and business valuation. You can keep abreast of any developments by accessing AICPA Online at www.aicpa.org or by reading various AICPA publications such as the Journal of Accountancy and the CPA Letter.

SEC Guidelines

.190 Under the SEC's current independence rules, an accountant is deemed to lack independence when providing appraisal or valuations services, fairness opinions, or contribution-in-kind reports for audit clients. However, the current rules contain certain exemptions that the SEC is proposing to eliminate in a December 2, 2002, proposed ruling. These proposals would provide that the auditor is not independent if the auditor provides appraisal or valuation services, or contribution-in-kind reports, and there is a reasonable likelihood that the results of the service will be subject to audit procedures by the auditor because the auditor is in a position of auditing his or her own work. Additionally, an auditor is not independent under the proposal if he or she provides a fairness opinion because to do so requires the auditor to function as a part of management and may require the auditor to audit the results of his or her own work.

.191 For further information about the recent SEC proposals, visit the AICPA web site at www.aicpa.org/sarbanes/secproposesrules.asp.

Document Retention Policies

.192 Given the recent obstruction of justice charges leveled against a large accounting firm for destroying documentation related to a client, auditing firms should assess their document retention policies and determine whether they are adequate and formally adopted. SAS No. 96 states that “the auditor should adopt reasonable procedures to retain audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention.”

Sarbanes-Oxley Rules and SEC Proposal

.193 Section 802 of the Sarbanes-Oxley Act is intended to address the destruction or fabrication of evidence and the preservation of financial and audit records. In connection with the requirements of section 802, on December 2, 2002, the SEC proposed rules to amend Regulation S-X to require accountants who audit or review an issuer’s financial statements to retain certain records relevant to that audit or review for a period of five years from the end of the fiscal year in which an audit or review was concluded. These records would include working papers and other documents that form the basis of the audit or review, and memoranda, correspondence, communications, other documents, and records (including electronic records), which are created, sent, or received in connection with the audit or review, and contain conclusions, opinions, analyses, or financial data related to the audit or review. Records described in the proposed rules would be retained whether the conclusions, opinions, analyses, or financial data in the records would support or cast doubt on the final conclusions reached by the auditor.

.194 Section 103 of the Sarbanes-Oxley Act directs the PCAOB to require auditors to retain for seven years audit working papers and other materials that support the auditor’s conclusions in any audit report. There may be fewer documents retained pursuant to Section 103, which focuses more on working papers that support the auditor’s conclusions, than under Section 802, which includes not only working papers but also other documents that meet the criteria noted in this release. Many documents, however, may be covered by both retention requirements.

.195 Readers should keep abreast of the status of these proposed rules by visiting AICPA Online at www.aicpa.org/sarbanes/secproposesrules.asp.

Record Retention Policy Advice

.196 Determining the proper periods for retaining records is a major decision for practitioners. Records should be preserved for only as long as they serve a useful purpose or until all legal requirements are met. It is a good practice to document the firm’s retention policy and ensure that the policy is uniformly enforced firm-wide. Once established, the firm should share its record retention policy with its clients. When creating a record retention policy, consider the following:

- State regulations and statutes
- Federal laws and regulations
- Historical information regarding the firm
- Clients’ historical information
- Customer service
- Asset protection
- Risk management
- Disaster planning and vital record protection

.197 Before establishing a record retention policy, it is wise to consult with legal counsel to gain an understanding of any relevant statutes. The policy should be reviewed annually and updated, if necessary, in light of changing government or professional regulations and the cost of retaining records.

.198 When developing your record retention periods, determine whether others are using your work product in neighboring states. Accounting firms that operate in more than one state must comply with the statutes and regulations of all the states in which they are doing business.

Professional Ethics and Independence-Related Developments

.199 This section of the Alert highlights some of the more important developments in the area of professional ethics and independence.

General Accounting Office Issues New Independence Standard

.200 In January 2002 the Government Accounting Office (GAO) amended *Government Auditing Standards* (GAS, also referred to as the Yellow Book), significantly tightening its auditor independence provisions. In issuing the new standard, the comptroller general stated that protecting the public interest and ensuring public confidence in the independence of auditors of government financial statements, programs and operations, both in form and substance, were the overriding considerations. The updated standard is required reading for auditors of government entities and of organizations receiving government funds.

.201 The GAO originally scheduled the new provisions, Amendment No. 3, *Independence*, to take effect October 1, 2002, but many practitioners said certain of the provisions were ambiguous, especially with respect to nonaudit services. AICPA members and others also worried about the cumbersome nature of some of the new standard's independence "safeguards" that, for example, mandated separate engagement teams for audit and nonaudit services.

.202 In response, the GAO helped in two ways. In July, it made the standard effective for all audits pertaining to periods beginning on or after January 1, 2003. At the same time, it issued a series of questions and answers (Q&A) aimed at clarifying the new provisions and facilitating compliance with them. The supplemental guidance explains the standard's underlying concepts, how to make the transition from the old standard to the new and how to apply the standard in specific nonaudit circumstances.

Whom The New Standard Affects

.203 Because government auditing standards apply to a wide variety of entities, the many practitioners who audit their financial statements—CPAs, non-CPAs, government financial auditors and performance auditors—will have to comply with the new standard. Such entities include federal, state, and local governments, as well as not-for-profit and for-profit recipients of federal (and some state) grant and loan assistance, such as:

- Colleges, universities, and trade schools
- Hospitals
- Charitable organizations
- Cities and counties
- School and utility districts
- Small businesses with Small Business Administration loans
- Housing and Urban Development projects and lenders and public housing authorities
- Many state-administered programs and contracts

Understanding What The New Standard Covers

.204 The standard addresses three types of independence impairments, namely, personal, external, and organizational. But it is particularly important that practitioners comprehend the standard's most important change, which involves personal independence impairments such as those discussed below.

.205 *New standard for nonaudit services.* To comply with the provisions governing nonaudit services, auditors must clearly understand two overarching principles. The first bars firms from performing management functions or making management decisions for their clients; the second prohibits auditors from auditing their own work or providing nonaudit services when the services are material or significant to the subject matter of the audit. If a nonaudit service does not conflict with either principle, a firm may perform the service as long as the firm complies with each of a number of safeguards.

.206 *Routine activities.* It is important to note that under the standard, practitioners can perform routine activities for clients without impairing their independence—provided the practitioners neither make management decisions nor perform management functions. Such ordinary services do not violate the overarching principles and are not subject to the safeguards mentioned above. For example, practitioners can participate on a client's committees or task forces *in an advisory capacity*. Auditors can share their skills and knowledge with clients, as long as the clients make all decisions. Practitioners may also give clients routine advice to help:

- Establish internal controls.
- Implement audit recommendations.
- Answer technical questions.
- Provide training.
- Provide tools and methodologies, such as best practice guides, benchmarking studies, and internal-control-assessment methodologies.
- Prepare tax returns.
- Assist with preparing tax deposits.
- Represent audited entities in Internal Revenue Service (IRS) matters.

.207 *Examples of prohibited and permitted nonaudit services.* Both the new standard and subsequent Q&A guidance include specific examples of nonaudit services that are expressly prohibited and others that are permissible (as long as the auditor complies with the two overarching principles and all required safeguards).

.208 *Clarification on providing accounting assistance.* The GAO's Q&A guidance says a practitioner may prepare a trial balance based on management's chart of accounts, as well as draft financial statements and note disclosures as long as the client's management reviews and approves them. This is so because these activities constitute technical assistance and are part of the audit. Therefore, the engagement team that performed these services also could perform the financial statement audit *provided it observes all other safeguards*.

.209 Similarly, the engagement team that converted the client's cash-based financial statements to the accrual basis also could perform the audit because this service is roughly equivalent to proposing adjusting entries to the client's books. In all cases, the standard requires the client's management to specify, in its representation letter, the audit firm's role in providing these services. The letter also must state that management reviews, approves, and is responsible for the services.

.210 In addition, the Q&A guidance describes several types of accounting services, including some that would impair independence and others that would not. The GAO standard permits certain bookkeeping services *if the audit organization does not reconstruct the books and records of the audited entity and management is sufficiently knowledgeable to evaluate, approve, and take responsibility for the services the auditor performs*.

.211 *De minimis exception.* The Q&A guidance provides an exception for nonaudit services that involve a de minimis amount of time. If a firm provides *no more than 40 hours of nonaudit services relating to a specific audit engagement*, the safeguard requiring separate engagement teams is waived. But all other safeguards apply and the nonaudit service still must comply with the overarching principles. When determining the total number of hours they spent on performing nonaudit services, practitioners should include all related services in their calculations.

.212 *Other personal impairments.* Similar to the AICPA, the SEC and the International Federation of Accountants (IFA), the GAO adopted an *engagement-team-focused approach* to auditor independence for matters such as a practitioner's financial interests. The GAO standard requires all individuals participating in the audit engagement, and others within the firm who can directly influence the outcome of the audit, to be free from personal impairments. If the personal impairment affects only an individual on a particular engagement, the audit firm can cure it by requiring the individual to eliminate the impairment. For example, the individual could sell the financial interest that created the independence impairment or remove himself or herself from the audit engagement.

.213 *External and organizational impairments.* The standard lists external factors that may, by interfering with an audit or with a practitioner's ability to form independent and objective opinions and conclusions, constitute an external impairment. This could consist of pressure from management and employees of the audit client or from oversight organizations. For example, interference by management to limit or modify the scope of the audit or pressure to reduce the extent of work performed in order to reduce fees could threaten independence.

.214 The standard also addresses organizational impairments, which, due to the government auditor's place within government and the structure of the government entity the auditor audits, hinder a government audit organization's ability to perform work and report results impartially. The standard specifically describes ways (for example, where the audit organization is assigned to a level of government other than the one to which the audited entity is assigned, such as a federal auditor auditing a state government program) that government audit organizations can be free from organizational impairments when reporting externally to third parties or when reporting internally to management.

Making the Transition to the New Standard

.215 The Q&A guidance clarifies that nonaudit services performed prior to January 25, 2002, in compliance with preexisting professional standards are deemed compliant with the new rules as well. The GAO also will exempt or grandfather from the standard all nonaudit services initiated, agreed to, or performed by June 30, 2002, provided the work is completed no later than June 30, 2003. However, any extensions or change orders to such contracts would result in new contracts, making the overarching principles and safeguards applicable.

Certain Services Can Be Performed as Performance Audits

.216 The GAO realizes firms can perform certain services as either performance audits or consulting engagements. During performance audits—which do not evaluate a business's financial records and statements, but rather assess how a particular activity implements company policy and procedures—a firm would *not* be subject to the independence standard but would have to comply with the performance audit standards under GAAS, including the general, fieldwork, and reporting provisions.

Educational Tools and Links

.217 To help members and others better understand the new standard, the AICPA has developed the following educational tools, which are available on the Institute's Web site (www.aicpa.org/members/div/ethics/index.htm):

- GAO independence standard
- AICPA-GAO comparison of independence rules governing nonaudit services

In addition, the GAO issued a series of questions and answers relating to the standard (www.gao.gov/govaud/d02870g.pdf).

Recent Revisions to AICPA Ethics Interpretations and Rulings

.218 In July 2002, the Professional Ethics Executive Committee (PEEC) revised the following rulings and Interpretations of the AICPA Code of Professional Conduct; see the July 2002 issue of the Journal of Accountancy for the revisions:

- Interpretation No. 101-1, “Interpretation of Rule 101,” of rule 101, subheading titled *Application of the Independence Rules to Covered Members Formerly Employed by a Client or Otherwise Associated With the Client* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02)
- Interpretation No. 101-1, “Interpretation of Rule 101,” of rule 101, subheading titled *Application of the Independence Rules to a Covered Member’s Immediate Family* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02)
- Ethics Ruling No. 10 under rule 203 of the Code, titled “Submission of Financial Statements by a Member in Public Practice”

In November 2002, the PEEC made certain revisions to the following ruling and Interpretation; see the November 2002 issue of the Journal of Accountancy for the revisions:

- Interpretation No. 101-5, “Loans From Financial Institution Clients and Related Terminology,” of rule 101
- Ethics Ruling No. 107 under rule 101 of the Code, titled “Participation in Health and Welfare Plan Sponsored by Client”

SEC Proposes Rules on Auditor Independence

.219 The SEC has proposed rules on auditor independence to implement provisions of the Sarbanes-Oxley Act of 2002. The new independence rules would require certain disclosures and reports by auditors and set conditions under which auditing firms would not be considered independent for purposes of performing audits of public company financial statements. The SEC is proposing rules to:

- Revise its regulations related to the nonaudit services that, if provided to an audit client, would impair an accounting firm’s independence (based on the nine prohibited services listed in Sarbanes-Oxley).
- Require that an issuer’s audit committee preapprove all audit and nonaudit services provided to the issuer by the auditor of an issuer’s financial statements.
- Prohibit partners on the audit engagement team from providing audit services to the issuer for more than five consecutive years and from returning to audit services with the same issuer within five years.
- Prohibit an accounting firm from auditing an audit client’s financial statements if certain members of management of that client had been members of the accounting firm’s audit engagement team within the one-year period preceding the commencement of audit procedures.
- Require that the auditor of an issuer’s financial statements report certain matters to the issuer’s audit committee, including “critical” accounting policies used by the issuer.
- Require disclosures to investors of information related to the audit and nonaudit services provided by, and fees paid by the issuer to, the auditor of the issuer’s financial statements. The disclosures, to be made in issuers’ annual reports, would include fees paid by issuers for audits, tax preparation, and all other fees. The proposal would require disclosure of fees for the year covered by the filing and for the previous year.

In addition, under the proposed rules, an accountant would not be independent from an audit client if any partner, principal, or shareholder of the accounting firm who is a member of the engagement team received compensation based directly on any service provided or sold to that client other than audit, review, and attest services. Readers should keep abreast of these developments by visiting AICPA Online at www.aicpa.org/sarbanes/secproposesrules.asp.

Overview of Foreign Economies

Western Europe

.220 Economic growth throughout much of Europe has been stymied. Although the European economy is starting to show signs of recovery, some experts are predicting a double-dip recession. European equity and debt markets have tumbled, tracking the U.S. markets. Inflation and interest rates are low, however, unemployment remains high, and consumer spending is sluggish.

.221 Germany, Western Europe's largest economy, continues to have economic problems. Both consumer spending and business investment have declined. Experts predict Germany's economy will struggle to grow 1 percent this year. German banks are experiencing difficult times, too. Analysts predict that loan-loss charges could increase by 40 percent. Tens of thousands of German companies are expected to fail in the coming year, so banks are hesitant to make new business loans for fear of not being repaid. Although there is no indication that the large German banks will fail, steps are needed to restructure and improve their performance. This task will be difficult as the poor equity and bond markets gnaw at bank's investment revenues. Inflation has been kept in check because of weak domestic demand and falling oil prices.

.222 The French economy is gathering momentum and is expected to grow 1.5 percent to 2 percent this year. However, the French are plagued by a budget deficit that it has pledged to its fellow euro zone members to eliminate by 2004. Moreover, the French unemployment rate rose by more than expected in June 2002 to 9 percent.

.223 Unfortunately, Europe faced the worst flooding in more than a century during the summer months of 2002. The economic impact of the disaster will affect manufacturing, tourism, and farming. The price tag on the clean-up is expected to top \$10 billion for the German government alone. To pay for the clean-up, the government may postpone a \$7 billion package of tax cuts that were scheduled to take effect on January 1, 2003. Postponing these tax cuts could adversely affect Germany's already sluggish economy. Slovakia; Hungary; and parts of Italy and Britain, the Ukraine, and southern Russia have also been badly hurt by flooding. The total bill for the clean-up could be as much as \$25 billion, making this one of the costliest natural disasters to ever hit Europe.

The Euro

.224 Real euro notes and coins made their debut in 12 European countries on January 1, 2002. Effective March 1, 2002, the national currencies in these 12 countries ceased to be valid. The hope is that the euro and the European economy will create stable money based on a wider economic area. The euro slid against the dollar and hit an all-time low in October 2000 of 82.25 cents. However, the euro rallied in the third quarter of 2002 and became worth scantily more than the U.S. dollar for the first time in more than two years. A stronger Euro helps strengthen the European economy by making it easier for the European central bank to control inflation without raising interest rates.

The Americas

.225 The Latin American economy remains weak largely in part to the continuing decline of the Argentinean economy. Mexico and Chile are, for the most part, insulated from the web of the Latin American decline.

Venezuela

.226 At the end of 2002, Venezuela was suffering economic and political chaos. A general strike, and violent unrest was crippling the country. The U.S. State Department has advised U.S. citizens to avoid traveling to Venezuela.

Argentina

.227 The Argentinian economy remains in recession, and economic indicators are poor. A reduction in the gross domestic product of approximately 16 percent is expected in 2002. Inflation is skyrocketing at about 28.4 percent on an annual basis and it could exceed 100 percent by the end of the year. The Argentinian government is also in flux and cannot provide the leadership to salvage the economy.

Brazil

.228 In the past year, the Brazilian economy has weakened. The Brazilian currency, the real, is declining in value and the country's debt burden is increasing. The International Monetary Fund (IMF) gave Brazil a \$30 billion loan in the third quarter of 2002, in an effort to ease some of the country's economic woes. Although Brazil's government is more stable than neighboring Argentina's, policymakers will have to work hard to ensure a strong and stable economy.

Mexico

.229 Although Mexico may be insulated from economic pressures of Argentina, it mirrors the economic volatility of the United States. The Mexican economy is largely driven by exports to the United States. As the U.S. economy sputters, so too does the Mexican economy. The Mexican Finance Ministry reported in August 2002 that industrial output fell 0.7 percent in June 2002. This is another indicator that recovery in the economy will be slow.

Canada

.230 For the first six months of 2002, the Canadian economy had been strong. In spite of the weak stock market and corporate scandal, the Canadian economy was impressive. The housing market was strong, unemployment was low, and consumer confidence was high. By the third quarter of 2002, the stock market had plunged and the Canadian dollar had weakened. Nevertheless, the Bank of Canada is optimistic about the future of the economy. The central bank expects the economy to grow between 3 and 4 percent for the remainder of 2002. This trend is also expected to continue in 2003. Interest rates, however, are likely to rise because of this economic expansion. Some economists are surprised by this optimistic view in light of global market volatility.

Russia

.231 The upswing in the Russian economy continues. The Russian Trading System Index is up 27 percent in 2002 thus far. Although inflation is at 17 percent, it is considerably lower than the triple digit inflation in the early 1990s. Private investment has been spurred by the passing of the recent legislation that authorizes the private ownership of farmland. Furthermore, the government is considering breaking up the monopolies in natural gas, utilities, railroads, and banks. These moves could provide an influx of both domestic and foreign investment.

Asia

.232 Asia has seen some economic improvement. The Chinese economy continues to grow. The economies of other countries, such as South Korea and Indonesia, whose economies were slumping in the prior year, are now gaining steam. However, the area's future is heavily dependent on the U.S. economy. Exports to America make up 10 percent of Asia's gross domestic product.

Japan

.233 Economic trends in Japan remain grim. In the third quarter of 2002, the Japanese Cabinet Office reported some signs of recovery, but it has forecast flat growth for 2002. Unemployment is 5.2 percent, which is high by Japanese standards. Deflation continues in Japan and domestic demand is weak. Still troubling the Japanese is the bad debt carried by the nation's banks. Bad debts total almost 11 percent of their loan portfolios. Reforms in banking are essential to turning the economy around.

South Korea

.234 The South Korean economy grew 5.7 percent in the first quarter of 2002. They boast of a budget surplus, \$107 billion in foreign currency reserves, and an unemployment rate of 3.1 percent. Although these figures are impressive, signs of the weaknesses in the American and European economies make some experts wonder whether South Korea will be able to maintain this pace of growth.

China

.235 Economic indicators from China continue to be impressive. According to official data, real gross domestic product in the second quarter of 2002 rose 8 percent from a year ago. Growth is expected to continue but not at such a feverish pace. Unemployment persists and many experts contend that the unemployment rate is far higher than the official count. December 2001 marked the entry of China into the World Trade Organization (WTO). The most significant effect of their entry has been deflation as the Chinese have encountered new import competition. Consumer prices fell 0.8 percent in the first half of 2002. This trend is not expected to continue as China's central bank is allowing the money supply to grow.

New Auditing, Attestation, Quality Control Pronouncements, and Other Guidance

.236 Presented below is a list of auditing, attestation, and quality control pronouncements, guides, and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and the quarterly electronic newsletter, In Our Opinion, issued by the AICPA Auditing Standards team and available at www.aicpa.org.

SAS No. 95, *Generally Accepted Auditing Standards*

.238 In December 2001, the ASB issued SAS No. 95, *Generally Accepted Auditing Standards*, which supersedes section 150, *Generally Accepted Auditing Standards*, of SAS No. 1. SAS No. 95 establishes a hierarchy of GAAS consisting of auditing standards, interpretive publications, and Other Auditing Publications. SAS No. 95 is effective for audits of financial statements for periods beginning on or after December 15, 2001.

SAS No. 96, *Audit Documentation*

.239 In January 2002, the ASB issued SAS No. 96. SAS No. 96 (AICPA, *Professional Standards*, vol. 1, AU sec. 339) supersedes SAS No. 41, *Working Papers* (AICPA, *Professional Standards*, vol. 1, AU sec. 339A), and amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312); SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329); and SAS No. 59. SAS No. 96 is effective for audits of financial statements for periods beginning on or after May 15, 2002. Earlier application is permitted.

.240 Among other things, SAS No. 96:

- Lists factors that the auditor should consider in determining the nature and extent of the audit documentation to be prepared for a particular audit area or auditing procedure.
- Requires audit documentation to include abstracts or copies of significant contracts or agreements examined and, for tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation, requires audit documentation to include an identification of the items tested.
- Requires documentation of audit findings or issues that in the auditor's judgment are significant, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. (SAS No. 96 includes a list of types of significant audit findings and issues.)
- Requires the auditor to adopt reasonable procedures to prevent unauthorized access to the audit documentation.

SAS No. 97, *Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles*

.241 This amendment, SAS No. 97, *Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 625), revises SAS No. 50, *Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 625), to prohibit an accountant from providing a written report on the application of accounting principles not involving facts and circumstances of a specific entity.

.242 This Statement is effective for written reports issued or oral advice provided on or after June 30, 2002. Earlier application of the provisions of this Statement is permissible.

SAS No. 98, *Omnibus Statement on Auditing Standards—2002*

.243 In September 2002, the ASB issued SAS No. 98, *Omnibus Statement on Auditing Standards—2002*, which makes various amendments to existing SASs, including SAS No. 95; SAS No. 25, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 161.02 and .03); SAS No. 47, *Audit Risk and Materiality in Conducting an Audit*; SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324); SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508.65); SAS No. 8, *Other Information in Documents Containing Audited Financial Statements*; SAS No. 52, *Required Supplementary Information*; and SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.244 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82 (AICPA, *Professional Standards*, vol. 1, AU sec. 316A), amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230). The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02). However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.

.245 The following is an overview of the content of SAS No. 99:

- *Description and characteristics of fraud.*
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present.

- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to (1) consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and (2) reinforce the importance of adopting an appropriate mindset of professional skepticism.
- *Obtaining the information needed to identify the risks of material misstatement due to fraud.* This section requires the auditor to gather the information necessary to identify the risks of material misstatement due to fraud, by:
 1. Inquiries of management and others within the entity about the risks of fraud
 2. Considering the results of the analytical procedures performed in planning the audit
 3. Considering fraud risk factors
 4. Considering certain other information
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered above to identify risks that may result in a material misstatement due to fraud.
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation.
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risk of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence. The section requires the auditor to respond to the results of the risk assessment in three ways:
 1. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned
 2. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed
 3. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate, at the completion of the audit, whether the accumulated results of auditing procedures and other observations affect the assessment. It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications.
- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others.
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements.

In addition, SAS No. 99 includes an amendment to SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333.06 and Appendix A), since SAS No. 99 requires the auditor to make inquiries of management about fraud and risk of fraud. In support of and consistent with these inquiries, the amendment revises the guidance for management representations about fraud currently found in SAS No. 85, paragraph 6*h* and Appendix A.

.246 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

Implementation Guide Available

.247 The AICPA will issue in December 2002 a Practice Aid, *Fraud Detection in a GAAS Audit*—SAS No. 99 *Implementation Guide*, to help implement SAS No. 99. See below for further information.

SAS No. 100, *Interim Financial Information*

.248 The ASB has voted to issue SAS No. 100, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722), which replaces SAS No. 71, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722A), as amended. The revised SAS will provide additional guidance on performing reviews of interim financial information and incorporate the requirement of the SEC for timely filings of interim financial information. The standard is applicable to an accountant performing a review of interim financial information of:

- An SEC registrant
- A non-SEC registrant that makes a filing with a regulatory agency in preparation for a public offering or listing, if the entity's latest annual financial statements have been or are being audited.

The SAS is effective for interim periods within fiscal years beginning after December 15, 2002. Earlier application of the provisions of the Statement is permitted.

SQCS No. 6, *Amendment to Statement on Quality Control Standards No. 2, System of Quality Control for a CPA Firm's Accounting and Auditing Practice*

.249 In September 2002, the ASB issued Statement on Quality Control Standards (SQCS) No. 6, *Amendment to Statement on Quality Control Standards No. 2, System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (AICPA, *Professional Standards*, vol. 2, QC sec. 20). SQCS No. 6 clarifies that deficiencies in individual audit, attest, compilation, and review engagements do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards. This amendment is effective upon issuance.

SOP 02-1, *Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code*

.250 In May 2002, the ASB issued this SOP, which was developed to provide practitioners with guidance on performing agreed-upon procedures engagements that address annual claims prompt payment reports as required by the New Jersey Administrative Code. Practitioners should note that the engagement described in this SOP is designed only to satisfy the requirements of the Code. The procedures, as set forth in this SOP, are not necessarily appropriate for use in any other engagement.

SSAE No. 11, *Attest Documentation*

.251 This amendment to SSAE No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT secs. 101.100–[.108], 201[.27–.30], and 301[.32]), reflects the concepts and terminology used in SAS No. 96, *Audit Documentation*.

.252 SSAE No. 11 is effective for attest engagements when the subject matter or assertion is as of or for a period ending on or after December 15, 2002. Earlier application is permitted.

SSAE No. 12, *Amendment to Statement on Standards for Attestation Engagements No. 10, Attestation Standards: Revision and Recodification*

.253 This Amendment to SSAE No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101.17–.18), clarifies the relationship between the SQCSs and engagements

performed under the SSAEs. The amendment clarifies that although an effective quality control system is conducive to compliance with attestation standards, deficiencies in or noncompliance with a firm's quality control system do not, in and of themselves, indicate that an engagement was not performed in accordance with the applicable professional standards. This amendment is effective upon issuance.

Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*

.254 This Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012772kk) provides guidance to service auditors engaged to issue reports on a service organization's controls that may be part of a user organization's information system in the context of an audit of financial statements. It also provides guidance to user auditors engaged to audit the financial statements of entities that use service organizations. Guidance on performing service auditors' engagements and using service auditors' reports in audits of financial statements is provided in SAS No. 70, *Service Organizations*.

Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*

.255 This new Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)* (product no. 012662kk) addresses the audits of basic financial statements and consideration of required supplementary information (RSI) and supplementary information (SI) other than RSI prepared in conformity with the new governmental financial reporting model required by Government Accounting Standards Board (GASB) Statement No. 34, and its related pronouncements.

.256 The new Guide is to be effective for audits of a state or local government's financial statements for the first fiscal period ending after June 15, 2003, in which the government does apply or is required to apply the provisions of GASB Statements No. 34 or No. 35, *Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities*. Earlier application will be encouraged if a government issues financial statements that apply GASB Statements No. 34 or No. 35 after the Guide is issued. The AICPA's 1994 Audit and Accounting Guide *Audits of State and Local Governmental Units (Non-GASB 34 Edition)* (updated annually for conforming changes) will remain effective for audits of state and local governments for which the auditor is not required to apply or has not elected to early apply the provisions of the new Guide in accordance with its effective date provisions.

.257 The new Guide, like the previous guide, applies to *all* state and local governmental entities. That scope requires an auditor to consult two guides when performing audits of governmental entities in certain industries. Specifically, the new Guide applies to public entity risk pools and hospitals and other health care providers, even though the audits of those entities also are subject to the guidance in the Audit and Accounting Guides *Audits of Property and Liability Insurance Companies* and *Health Care Organizations*, respectively. The new Guide explains how auditors of those entities should use the auditing guidance in both of the guides that apply to those entities. The new Guide also provides an expanded section on auditing public colleges and universities.

Auditing Interpretations

.258 In February 2002, the ASB issued two interpretations of SAS No. 70, *Service Organizations*:

- Interpretation No. 4, "Responsibilities of Service Organizations and Service Auditors With Respect to Forward-Looking Information in a Service Organization's Description of Controls," of SAS No. 70 (AICPA, *Professional Standards*, vol. 1, AU sec. 9324.35–.37)
- Interpretation No. 5, "Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods," of SAS No. 70 (AICPA, *Professional Standards*, vol. 1, AU sec. 9324.38–.40)

.259 In March 2002, the ASB issued Interpretation No. 14, "Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With

International Standards on Auditing,” of SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508.56–.59), which provides guidance to the auditor that SAS No. 58 does not prohibit the auditor from indicating in the auditor’s report that the audit was also conducted in accordance with another set of auditing standards.

.260 In April 2002, the ASB issued Interpretation No. 12, “The Effect on the Auditor’s Report of an Entity’s Adoption of a New Accounting Standard That Does Not Require the Entity to Disclose the Effect of the Changes in the Year of Adoption,” of SAS No. 1, section 420, “Consistency of Application of Generally Accepted Accounting Principles” (AICPA, *Professional Standards*, vol. 1, AU sec. 9420.69–.72), which provides guidance to the auditor in determining materiality for purposes of applying the consistency standard when an accounting standard does require the entity to disclose, and the entity has not disclosed or determined, the effect of the change in accounting principle in the year of adoption.

.261 In November 2002, the ASB issued Interpretation No. 15, “Reporting as Successor Auditor When Prior-Period Audited Financial Statements Were Audited by a Predecessor Auditor Who Has Ceased Operations” of SAS No. 58 (AICPA, *Professional Standards*, vol. 1, AU sec. 9508.60–.75).

Related-Party Toolkit

.262 The AICPA staff has developed an electronic document, *Accounting and Auditing for Related Parties and Related Party Transactions: A Toolkit for Accountants and Auditors*, to provide accountants and auditors of private-sector business enterprises with an overview of selected authoritative accounting and auditing literature, SEC requirements, and nonauthoritative best practice guidance concerning related parties and related-party transactions. The related-party toolkit is available on the AICPA Web site at www.aicpa.org/public/download/news/relpty_toolkit.doc.

Practice Alert 02-1, *Communications With the Securities and Exchange Commission*

.263 The AICPA Securities and Exchange Commission Practice Section (SECPS) Executive Committee established a Professional Issues Task Force (PITF) which formulates guidance based on issues arising in peer reviews, firm inspections, and litigation to facilitate the resolution of emerging audit practice issues. This guidance takes the form of Practice Alerts. The information contained in these Practice Alerts is nonauthoritative. It represents the views of the members of the PITF and does not represent official positions of the AICPA.

.264 Practice Alert 02-1, *Communications With the Securities and Exchange Commission*, provides registrants and their auditors with the most up-to-date information about when, why, and how they may wish to discuss SEC accounting, financial reporting and disclosure issues and questions with the staff at the SEC. In addition, this Alert is intended to provide professionals with references to other resources that may be useful when working with SEC registrants.

Practice Alert 02-2, *Use of Specialists*

.265 Auditors may encounter difficulty in determining the appropriate situations in which to utilize a specialist and, in those cases in which a specialist is appropriately utilized, understanding the findings of the specialist. The purpose of Practice Alert 02-2, *Use of Specialists*, is to assist auditors in understanding their responsibilities both with respect to the use of specialists that have been engaged or employed by the audit client and the use of specialists engaged or employed by the audit firm.

Practice Alert 02-3, *Reauditing Financial Statements*

.266 An auditor may be engaged to reaudit and report on financial statements that have been previously audited and reported on by another auditor (the predecessor auditor). The purpose of Practice Alert 02-3,

Reauditing Financial Statements, is to provide practitioners with additional factors to consider when performing a reaudit engagement.

Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*

.267 In connection with the issuance of SAS No. 99, the AICPA has developed a practice aid to help practitioners implement the new fraud guidance. The practice aid is entitled *Fraud Detection in a GAAS Audit—An Auditor's Field Guide* (product no. 006613) and will be available in December 2002. The Practice Aid includes topics such as:

- How the new SAS changes audit practice
- Developing an implementation plan
- Audit issues in revenue recognition
- Inquiries of entity personnel
- Practice aids such as:
 - Specialized industry fraud risk factors
 - Common frauds and extended audit procedures

Practice Aid, *New Standards, New Services: Implementing the Attestation Standards*

.268 Issued in January 2002, the Practice Aid, *New Standards, New Services: Implementing the Attestation Standards* (product no. 006601), helps practitioners understand and implement the major provisions of the attestation standards. Essential guidance contained in the publication includes pre-engagement considerations, gathering evidential matter, the attestation risk model, types and extent of procedures, and reporting considerations.

Practice Aid, *Assessing the Effect on a Firm's System of Quality Control Due to a Significant Increase in New Clients and/or Experienced Personnel*

.269 In a move to ensure that even greater attention is paid to audit firm quality control systems, the SEC Practice Section of the AICPA issued guidance entitled, *Assessing the Effect on a Firm's System of Quality Control Due to a Significant Increase in New Clients and/or Experienced Personnel*, for U.S. audit firms. The special guidance is directed toward audit firms taking on increased numbers of new publicly traded clients and/or professional staff. The practice aid is available on the AICPA's website at http://www.aicpa.org/download/secps/020508_practaid.pdf.

Booklet, *Understanding Audits and the Auditor's Report: A Guide for Financial Statement Users*

.270 The AICPA has published a booklet (product no. 058516) titled, *Understanding Audits and the Auditor's Report: A Guide for Financial Statement Users*, that explains the meaning of the auditor's report on financial statements and the assurance it provides. The booklet is particularly useful to existing and potential audit clients, investors, creditors, and, students who need to understand audit reports.

New Accounting Pronouncements and Other Guidance

.271 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated with Exit or Disposal Activities</i>
FASB Statement No. 147	<i>Acquisitions of Certain Financial Institutions</i>
FASB Interpretation No. 45	<i>Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others</i>
SOP 01-5	<i>Amendment to Specific AICPA Pronouncements for Changes Related to the NAIC Codification</i>
SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>
Technical Practice Aids	<i>Software Revenue Recognition</i>
Questions & Answers	<i>FASB Statement No. 87, Employers' Accounting for Pensions</i>

.272 The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org.

FASB Statement No. 145, *Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections*

.273 The FASB issued its Statement No. 145 in April 2002 which rescinds FASB Statement No. 4, *Reporting Gains and Losses from Extinguishment of Debt*, and an amendment of that Statement, FASB Statement No. 64, *Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements*, thereby eliminating the requirement that gains and losses from debt extinguishments be classified as extraordinary items. Instead, those entities should use the provisions of APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, as amended and interpreted, to report debt extinguishments in fiscal years beginning after May 15, 2002, with earlier application encouraged. Other effective dates apply to the other provisions of FASB Statement No. 145. This Statement also rescinds FASB Statement No. 44, *Accounting for Intangible Assets of Motor Carriers*. This Statement amends FASB Statement No. 13, as well, to eliminate an inconsistency between the required accounting for sale-leaseback transactions and the required accounting for certain lease modifications that have economic effects that are similar to sale-leaseback transactions. This Statement also amends other existing authoritative pronouncements to make various technical corrections, clarify meanings, or describe their applicability under changed conditions. Refer to the Statement for effective date information.

FASB Statement No. 146, *Accounting for Costs Associated With Exit or Disposal Activities*

.274 This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)."

.275 This Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. The board concluded in this Statement that an entity's commitment to a plan, by itself, does not create a present obligation to others that meets the definition of a liability. Therefore, this Statement eliminates the definition and requirements for recognition of exit costs in EITF Issue No. 94-3. This Statement also establishes that fair value is the objective for initial measurement of the liability. Refer to the Statement for effective date and transition information.

FASB Statement No. 147, *Acquisitions of Certain Financial Institutions*

.276 FASB Statement No. 147, *Acquisitions of Certain Financial Institutions*, addresses guidance on accounting for the acquisition of a financial institution and applies to all acquisitions except those between two or more mutual enterprises (the combination of which is currently being discussed as a separate board topic this year.) See the AICPA Audit Risk Alert, *Banks, Credit Unions, and Other Lenders and Depository Institutions—2002/03* [AAM section 8010], for further information.

FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*

.277 This Interpretation elaborates on the existing disclosure requirements for most guarantees, including loan guarantees such as standby letters of credit. It also clarifies that at the time a company issues a guarantee, the company must recognize an initial liability for the fair value, or market value, of the obligations it assumes under that guarantee and must disclose that information in its interim and annual financial statements. Before this Interpretation was issued, many entities did not recognize a liability for a guarantee until honoring the guarantee became likely.

.278 This guidance does not apply to certain guarantee contracts, such as those issued by insurance companies or for a lessee's residual value guarantee embedded in a capital lease. The provisions related to recognizing a liability at inception of the guarantee for the fair value of the guarantor's obligations would not apply to product warranties or to guarantees accounted for as derivatives.

.279 The initial recognition and initial measurement provisions apply on a prospective basis to guarantees issued or modified after December 31, 2002, regardless of the guarantor's fiscal year-end. The disclosure requirements in the Interpretation are effective for financial statements of interim or annual periods ending after December 15, 2002.

SOP 01-5, *Amendment to Specific AICPA Pronouncements for Changes Related to the NAIC Codification*

.280 This AICPA Statement of Position (SOP) amends AICPA SOP 94-5, *Disclosures of Certain Matters in the Financial Statements of Insurance Enterprises*, as a result of the completion of the National Association of Insurance Commissioners (NAIC) Codification of statutory accounting practices for certain insurance enterprises.

.281 This SOP also includes auditing guidance that has been updated as a result of the completion of the NAIC Codification, namely, AICPA SOP 95-5, *Auditor's Reporting on Statutory Financial Statements of Insurance Enterprises*; SOP 94-1, *Inquiries of State Insurance Regulators*; and AICPA Auditing Interpretation No. 12, "Evaluation of the Appropriateness of Information Disclosures in Insurance Enterprises' Financial Statements Prepared on a Statutory Basis," of SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 9623.60–.77).

.282 This SOP is effective for annual financial statements for fiscal years ending on or after December 31, 2001, and complete sets of interim financial statements for periods beginning on or after that date and audits of those financial statements.

SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*

.283 This SOP applies to any entity that lends to or finances the activities of others. For example, that arrangement may be a secured mortgage loan, an unsecured commercial loan or a financing arrangement that only involves extending credit to trade customers resulting in trade receivables. Those financing activities of all entities are included in the scope of this SOP. The SOP provides specific guidance for other types of transactions, such as securities purchases, for certain financial institutions listed in the scope

paragraphs of the SOP. To the extent an entity is not considered such a financial institution, as described in those paragraphs, the other guidance provided is not applicable. In other words, only the guidance in this SOP related to the financial and lending activities is applicable for entities not considered to be financial institutions.

.284 SOP 01-6 reconciles and conforms, as appropriate, the accounting and financial reporting provisions established by the AICPA Audit and Accounting Guides *Banks and Savings Institutions*, *Audits of Credit Unions*, and *Audits of Finance Companies*. The SOP also explicitly incorporates mortgage companies, corporate credit unions, and certain activities of insurance companies in its scope. This SOP will be incorporated in a new AICPA Audit and Accounting Guide, which will supersede the three aforementioned Guides. The new Guide is expected to be issued during the first quarter of 2003. See the SOP for effective date and transition information.

Software Revenue Recognition Technical Practice Aids Issued

.285 The AICPA staff, helped by industry experts, released a fifth set of technical questions and answers (Q&As) on financial accounting and reporting issues related to SOP 97-2, *Software Revenue Recognition*. Q&As will be housed in the AICPA publication titled *Technical Practice Aids*, copies of which are available through the AICPA order department at (888) 777-7077 or online at CPA2BIZ.com.

New FASB Statement No. 87 Q&A—*Impact of the Sunset Provision of the Economic Growth and Tax Relief Reconciliation Act*

.286 FASB staff members issued implementation guidance (www.fasb.org/q&a87.pdf) on FASB Statement No. 87, *Employers' Accounting for Pensions*. The advisory addresses the anticipated impact of the expiration of the Economic Growth and Tax Relief Reconciliation Act after 2010 on the temporary exceptions the legislation permitted to IRC section 415(b) limits on the amount of payments a qualified defined benefit plan could make to its participants.

On the Horizon

.287 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.288 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below. Readers should refer to information provided by the various standard-setting bodies for further information.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/auditstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

.289 The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Auditing Pipeline

Exposure Draft on Auditing Fair Value Measurements and Disclosures

.290 The AICPA's ASB has issued an exposure draft of a proposed SAS entitled *Auditing Fair Value Measurements and Disclosures*. The proposed SAS addresses auditing considerations relating to the measurement, presentation, and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. The ASB will discuss a revised draft of the proposed SAS at its December 2002 meeting. If approved at that meeting, the SAS will be issued by February 2002.

New Framework for the Audit Process

.291 The ASB has voted to expose a suite of seven proposed SASs relating to the auditor's risk assessment process. The ASB believes that the requirements and guidance provided in the proposed SASs, if adopted, would result in a substantial change in audit practice and in more effective audits. The primary objective of the proposed SASs is to enhance the auditor's application of the audit risk model in practice by requiring:

- A more in-depth understanding of the entity and its environment, including its internal control, that would better enable the auditor to identify the risks of material misstatement in the financial statements and any steps the entity is taking to mitigate them
- A more rigorous assessment of the risks of material misstatement of the financial statements based on that understanding
- A better linkage between the assessed risks of material misstatement and the nature, timing, and extent of audit procedures performed in response to those risks

.292 The exposure draft consists of the following proposed SASs:

- *Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards*
- *Audit Evidence*, which will supersede SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)
- *Audit Risk and Materiality in Conducting an Audit*, which will supersede SAS No. 47
- *Planning and Supervision*, which will supersede SAS No. 1, section 310, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 310), and SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)
- *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (Assessing Risks)
- *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, which will supersede SAS No. 45, and, together with the proposed SAS, *Assessing Risks*, will supersede SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319)
- *Amendment to SAS No. 39, Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350)

You should keep abreast of the status of these projects and exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

Consolidation of Certain Special-Purpose Entities

.293 The FASB has issued an exposure draft of a proposed Interpretation of ARB No. 51, *Consolidation of Certain Special-Purpose Entities*. This proposed Interpretation would address consolidation by business enterprises of SPEs to which the usual condition of consolidation described in ARB No. 51, *Consolidated Financial Statements*, does not apply because the SPEs have no voting interest or otherwise are not subject to control through ownership of voting interests. A final Statement is expected to be issued during the fourth quarter of 2002.

Amendment of Statement 133 on Derivative Instruments and Hedging Activities

.294 The FASB has issued an exposure draft of a proposed Statement, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This proposed Statement would amend the definition of a derivative in paragraph 6(b) of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This proposed Statement also would amend Statement 133 for various decisions made as part of the Derivatives Implementation Group process. A final Statement is expected to be issued during the fourth quarter of 2002.

Exposure Draft on Liabilities and Equity

.295 The FASB has issued an exposure draft of a proposed Statement, *Accounting for Financial Instruments with Characteristics of Liabilities, Equity, or Both*. This proposed Statement would establish standards for issuers' classification in the statement of financial position of financial instruments with characteristics of liabilities, equity, or both. The FASB also issued an exposure draft of a proposed amendment to FASB Concepts Statement No. 6 entitled *Proposed Amendment to FASB Concepts Statement No. 6 to Revise the Definition of Liabilities*. This proposed amendment would revise the definition of liabilities to also include as liabilities certain obligations that require or permit settlement by issuance of the issuer's equity shares and that do not establish an ownership relationship. Final Statements are expected to be issued during the fourth quarter of 2002.

Exposure Draft on Loans and Certain Debt Securities Acquired in a Transfer (Formerly Known as Purchased Loans and Securities)

.296 AcSEC has issued an exposure draft of a proposed SOP titled *Accounting for Loans and Certain Debt Securities Acquired in a Transfer*. This proposed SOP considers whether Practice Bulletin (PB) No. 6, *Amortization of Discounts on Certain Acquired Loans*, continues to be relevant given a number of FASB pronouncements issued subsequent to PB No. 6. The proposed SOP excludes originated loans from its scope. Readers should be alert to any final pronouncement.

Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.297 Proposed AICPA SOP, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*, and proposed FASB Statement, *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment—an amendment of APB Opinions No. 20 and 28 and FASB Statements No. 51 and 67 and a rescission of FASB Statement No. 73*, were issued simultaneously for public comment. Principally, the proposed FASB Statement would amend FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to exclude from its scope the accounting for acquisition, development, and construction costs of real estate developed and used by an entity for subsequent rental activities. The accounting for those costs would be subject to the guidance in the proposed SOP. It also would amend APB Opinion No. 28, *Interim Financial Reporting*, to require that those costs that the proposed SOP would require be expensed as incurred on an annual basis also be expensed as incurred in interim periods.

.298 The proposed SOP addresses accounting and disclosure issues related to determining which costs related to property, plant, and equipment should be capitalized as improvements and which should be charged to expense. The proposed SOP also addresses capitalization of indirect and overhead costs and component accounting for property, plant, and equipment. Final Statements are expected to be issued during the first half of 2003.

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.299 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- Audit Guide *Auditing Derivative Instruments, Hedging Activities and Investments in Securities* (product no. 012520kk)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk)
- Audit and Accounting Guide *Audit Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012551kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- *Accounting Trends & Techniques—2002*
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Practice Aid *Fraud Detection in a GAAS Audit* (product no. 006613kk)
- Audit Risk Alert *E-Business Industry Developments—2002/03* [AAM section 8210]

Audit and Accounting Manual

.300 The *Audit and Accounting Manual* (product no. 005131kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditor's reports; checklists; engagement letters, and management representation letters, and confirmation letters.

AICPA's reSOURCE Online Accounting and Auditing Literature

.301 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (all 23), *Audit Risk Alerts* (all 19), and *Accounting Trends & Techniques*. To subscribe to this essential service, go to cpa2biz.com.

reSOURCE CD-ROM

.302 The AICPA is currently offering a CD-ROM product entitled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to AICPA Professional Literature products in a Windows format, namely, *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related Audit Risk Alerts, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Online CPE

.303 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) will offer unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

Member Satisfaction Center

.304 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.305 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.306 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2BIZ

.307 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2BIZ.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the professional standards, and CPE courses.

Other Helpful Web Sites

.308 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of the Alert.

.309 This Audit Risk Alert replaces the AICPA *Audit Risk Alert—2001/02*. The general *Audit Risk Alert* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share those with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to rdurak@aicpa.org, or write to:

AAM Section 8015

Compilation and Review Alert—2002/03

NOTICE TO READERS

The *Compilation and Review Alert—2002/03* is intended to provide CPAs with an update on recent practice issues and professional standards that affect compilation and review engagements. The document has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the AICPA.

How This Alert Will Help You

.01 The *Compilation and Review Alert—2002/03* is a nonauthoritative practice aid designed to help you as you plan and perform your 2002 and 2003 compilation and review engagements. The Alert clarifies certain existing Statements on Standards for Accounting and Review Services (SSARS), suggests ways of implementing those standards in special circumstances, points out pitfalls that frequently occur in compilation and review engagements, and addresses emerging practice issues.

.02 The knowledge the Alert delivers can assist you in achieving a more robust understanding of the business and economic environment in which your clients operate. Also, this Alert delivers information about emerging practice issues, such as controllership services and information about responsibilities for fraud and internal control, in addition to valuable current accounting, auditing, and regulatory developments.

Help Desk—Use this Alert in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

The U.S. Business Environment

.03 As of the third quarter of 2002, anxious economists are downgrading their forecasts, and some crucial sectors of the economy are pushing the likelihood of a rebound into next year because of the abrupt slowdown in the economic recovery.

.04 For now, the overall economy is expanding, but sluggishly. Jobs are growing, but barely. And with a depressed stock market and reactions to and further fears of terrorist strikes weighing on the national psyche, there is none of the exuberance that marked the recovery in the late 1990s.

.05 Analysts argue over whether the summer slump was just a pause in the rebound—perhaps as companies obsess about making sure their financial reports are accurate—or something more ominous. Even optimists say the once-slim chances of a double-dip recession, meaning a recession followed by a short period of growth, only to be followed by another recession, are now up to 20 percent or more.

.06 The economy appears to be in a struggle between declining business confidence and strong consumer spending. Eventually, consumer demand should overcome business wariness unless cautious businesses cut so many jobs that consumers finally give up. The same dynamic was at work during the fall of 2001. After September 11, the business sector froze, but the consumer sector did not, and eventually consumer demand jump-started the economy.

Effect of the Sarbanes-Oxley Act of 2002 on Compilation and Review Engagements

.07 The corporate-governance and accounting-oversight bill signed into law by President Bush in late July 2002 will have major consequences for executives, accountants, shareholders, and regulators. The new law creates the Public Company Accounting Oversight Board (PCAOB) to oversee the audit of public companies that are subject to the securities laws of the Securities and Exchange Commission (SEC), beefs up penalties for corporate wrongdoers, forces faster and more extensive financial disclosure, and creates avenues of recourse for aggrieved shareholders.

.08 Most of the provisions of the Sarbanes-Oxley Act apply directly to publicly held companies and their auditors. Since compilation and review engagements can only be performed on the financial statements of nonpublic entities, the act, generally, will not directly affect these engagements. However, one provision, Section 209: "Consideration by Appropriate State Regulatory Authorities," directs state regulators (such as state boards of accountancy) to make an independent determination of the proper standards applicable to small- and mid-sized nonregistered accounting firms. In light of this provision, you may want to stay abreast of further developments related to this Act. You can find a summary of the Sarbanes-Oxley Act of 2002 at www.aicpa.org/info/sarbanes_oxley_summary.htm.

Current SSARS Developments

New SSARS Interpretation on Controllorship and Other Management Services

.09 Many CPAs in public practice perform services for clients that are equivalent to some services ordinarily performed by management. These services may entail making management decisions for a client and could include actions such as the following:

- Hiring and terminating employees
- Authorizing purchases or expenditures
- Disbursing funds
- Making investment decisions
- Having custody of assets
- Making credit decisions
- Signing contracts
- Serving as an officer of the entity

Performance of these services, typically called *controllorship services*, by a CPA for a client has fueled a debate. If a CPA performs such services, should he or she comply with SSARS No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), when submitting financial statements in connection with these services? On one hand, it can be argued that the CPA is, in substance, part of management and, therefore, should not perform a compilation on the financial statements that he or she prepares. (CPAs in industry are not required to comply with SSARS No. 1.) On the other hand, it can be argued that the CPA is in public practice and should, therefore, perform a compilation.

New Interpretation

.10 In April 2002, the Accounting and Review Services Committee (ARSC) issued an interpretation to help clarify issues involved in the debate described in the preceding paragraph. Interpretation No. 21 of

SSARS No. 1, "Applicability of SSARS No. 1 When Performing Controllorship or Other Management Services" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.80–.84), states that, if you are in the practice of public accounting as defined by the AICPA's Code of Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 92.25), and are not a stockholder, partner, director, officer, or employee of the entity, you are required to follow the performance and communication requirements of SSARS No. 1, including following any requirement to disclose a lack of independence.

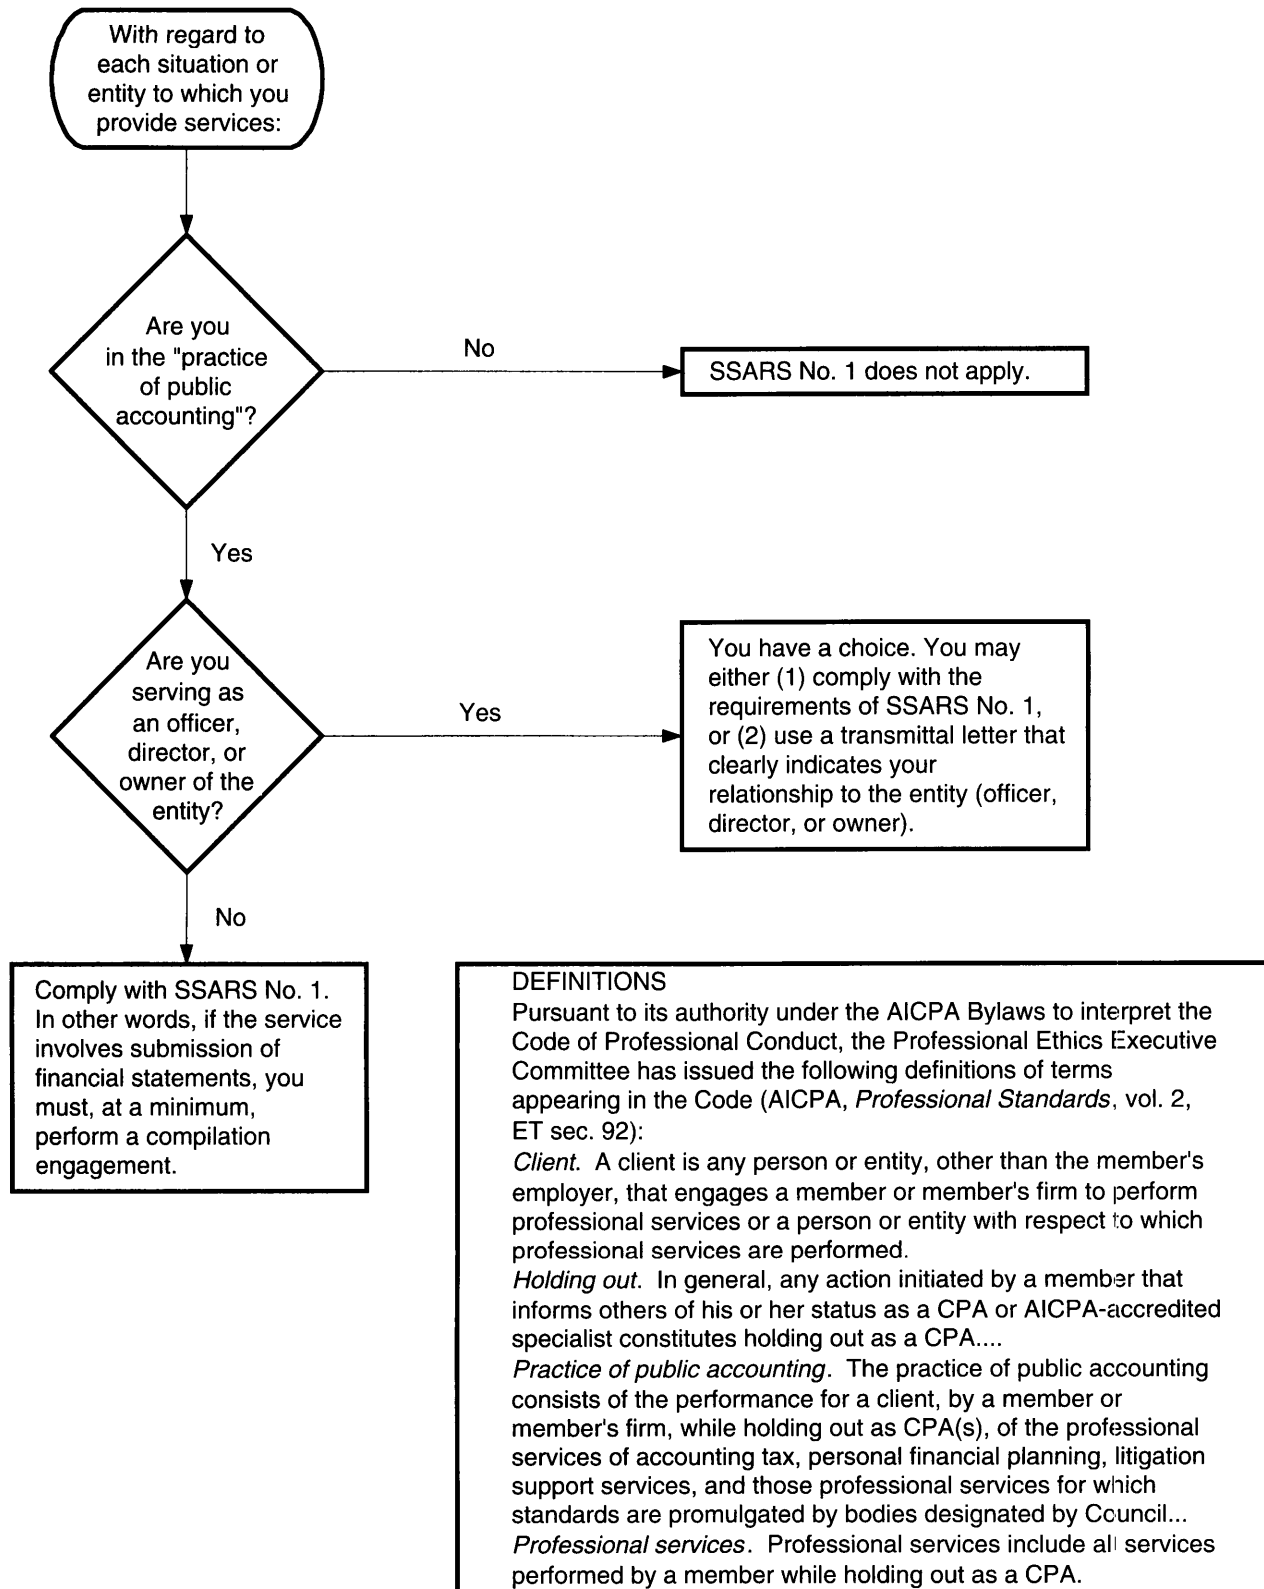

.11 If you are in the practice of public accounting and are also a stockholder, partner, director, officer, or employee of the entity, you may either (1) comply with the requirements of SSARS No. 1 or (2) communicate, preferably in writing, your relationship to the entity (for example, stockholder, partner, director, officer, or employee). The following is an example of the type of communication that you may use:

The accompanying balance sheet of Company X as of December 31, 20XX, and the related statements of income and cash flows for the year then ended have been prepared by [*Name of accountant*], CPA. I (We) have prepared such financial statements in my (our) capacity [*Describe capacity, for example, as a director*] of Company X.

.12 If you are not in the practice of public accounting, the issuance of a report under SSARS would be inappropriate; however, you can use the communication just presented above.

.13 The decision tree in Exhibit 1, "Interpretation No. 21 of SSARS No. 1, 'Applicability of SSARS No. 1 When Performing Controllorship or Other Management Services,'" may help you understand the application of this new interpretation.

Exhibit 1—Interpretation No. 21 of SSARS No. 1, "Applicability of SSARS No. 1 When Performing Controllorship or Other Management Services"

Management-Use-Only Financial Statements in Controllarship Engagements

.14 If you are in the practice of public accounting, submitting management-use-only financial statements may be a useful option to consider for your controllarship engagements. The requirements for a management-use-only compilation include the option of preparing a written engagement letter and following the compilation performance standards for any financial statements that you submit while performing these controllarship services. (See the next section of this Alert for related information.) Keep in mind, however, that the financial statements would be restricted to management's use only and would not be available to third parties. In addition, because of the nature of the services performed, you would need to add an item to the engagement letter noting your lack of independence.

SSARS No. 8 and the "Management-Use-Only" Compilation

.15 In 2000 ARSC completed work on SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1, Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100.01–.23), the first major revision to SSARS in over 20 years.

.16 SSARS No. 8 makes fundamental changes to the way in which accountants view the compilation engagement. Rather than simply trying to exempt certain financial statement engagements, ARSC rewrote SSARS No. 1, which resulted in SSARS No. 8, a standard that retains the best of what SSARS No. 1 has always offered. In fact, the standard does not change professional standards for review engagements; nor does it change the performance standards for compilation engagements. Rather, SSARS No. 8 adds new options to make SSARS No. 1 more flexible.

Review of Significant Changes: Submission of Financial Statements and an Added Communications Options

.17 As you may know, these two things have changed as a result of SSARS No. 8:

- The definition of *submission of financial statements* (which "triggers" the application of SSARS No. 1)
- The addition of communication options in certain circumstances

.18 *Submission of financial statements* is now defined in AR sec. 100.04 as "presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software." This substantial change from the previous definition that referred to "generating financial statements or modifying client-prepared financial statements" is important to understand.

.19 Note that the following two actions on the part of the practitioner are necessary in order to *submit* financial statements:

- Prepare financial statements, either manually or through the use of computer software.
- Present the financial statements to a client or third party.

.20 Absent either of these actions, the financial statements have not been submitted, and SSARS No. 1 is not applicable. Let's look more closely at what these terms imply.

.21 SSARS No. 1 does not define the term *prepared*. Rather, you must use your professional judgment to determine whether you are going to prepare a financial statement. In making this judgment, you should consider the difference between bookkeeping services (for example, making adjustments, corrections, and accruals) and the preparation of financial statements. There is no definitive line that, when crossed, would indicate that you are submitting financial statements. Therefore, you should establish a firm policy to evaluate how certain accounting services are classified within your firm.

.22 The term *presenting* is also not defined in SSARS No. 1. Again, you will have to use your professional judgment to determine whether you are going to present financial statements to a client. Obviously, physically presenting printed financial statements would meet the definition used here. Other situations, however, warrant careful consideration.

.23 The second change involves communications options. The compilation report has long been the vehicle by which you communicate, among other things, your degree of responsibility for the financial statements to the financial statement user. However, for engagements in which the financial statements are *not expected to be used by third parties*, you can now compile the financial statements and choose between the communications options of (1) the standard compilation report or (2) an engagement letter.

.24 There are other important requirements that you need to understand in order to compile management-use-only financial statements. Before offering this service to your clients, make sure you completely understand the issues related to this type of engagement, such as third parties and required legends on the financial statements, among others.

.25 The changes were effective for financial statements submitted after December 31, 2000

Help Desk—The AICPA published a Practice Aid to assist practitioners in implementing changes related to SSARS into their practice. You can obtain the AICPA Practice Aid, *Understanding and Implementing SSARS No. 8* (product no. 006612kk) by calling the AICPA Order Department at (888) 777-7077.

New SSARS Exposure Draft: Omnibus—2002

.26 Periodically, ARSC issues an omnibus statement if the significance of the issues and cost/benefit considerations does not, in and of itself, warrant the issuance of separate standards. The proposed omnibus statement includes proposed revisions to existing SSARS that have been accumulated over a period of time and addresses the following issues:

- The auditing literature allows an accountant who may be associated with the financial statements of a public company, but has not audited or reviewed such statements, to state that he or she has not audited the unaudited information and includes example report wording. This guidance is also appropriate for compilation and review engagements; however, SSARSs currently do not include example wording. This amendment will revise SSARS No. 1 (AR sec. 100.03) to include wording that may be appropriate in the circumstances.
- The accounting literature does not require the statement of retained earnings to be presented as a financial statement. Accounting Principles Board (APB) Opinion No. 12, *Omnibus Opinion—1967*, requires the disclosure of a change in capital. The disclosure can be accomplished by the preparation of a separate statement in the notes to the financial statements or as a presentation as part of another basic statement. In addition, the example reports in SSARS currently do not refer to the statement of comprehensive income. This amendment will include two footnotes to SSARS No. 1 (AR sec. 100.14 and .36), stating (1) the statement of retained earnings is not a required statement and, if not presented as a separate statement, reference in the compilation and review report is not needed, and (2) if the statement of comprehensive income is presented, reference should be made in the appropriate paragraphs of the report.
- SSARS currently do not specifically require a signature of the accounting firm or the accountant on a review or compilation report. This proposed amendment will revise SSARS No. 1 (AR sec. 100.11 and .33) to require a signature (which may be manual, electronic, stamped, or typed).
- The current guidance found in SSARS No. 1 (AR sec. 100.29) requires the accountant to obtain a representation letter from management. The guidance is not specific about the content of the letter,

the dating of the letter, and current management's responsibility regarding previous years. This amendment will require specific representations for the accountant to receive from management when performing a review engagement and will provide guidance on the dating of the letter and guidance regarding obtaining representations from current management when they were not present during all periods covered by the accountant's report.

- SSARS No. 1 (AR sec. 100.44) includes guidance on reporting on supplementary information. Currently, the guidance is unclear with respect to separate reporting on supplementary information in a compilation engagement. This proposed amendment would explicitly allow for a separate report on supplementary information in a compilation engagement, consistent with guidance on supplementary information in a review report.
- SSARS currently do not refer to the Statements on Quality Control Standards (SQCS) and how those standards interact with SSARS. The proposed amendment will clarify the idea that, although an effective quality control system is conducive to compliance with SSARS, deficiencies in or noncompliance with a firm's quality control system do not, in and of themselves, indicate that an engagement was not performed in accordance with the applicable professional standards. This amendment would be included as the last section of SSARS No. 1.
- SSARS No. 4, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2, AR sec. 400), provides guidance on communications between accountants if the successor accountant decides to communicate with the predecessor regarding the acceptance of an engagement. Among other things, this amendment defines predecessor and successor accountants, provides guidance regarding the acceptance of an engagement, suggests inquiries that the successor accountant may decide to direct toward the predecessor accountant, and includes an example of a successor accountant acknowledgment letter, which the predecessor may want to use in connection with granting access to the working papers.

Current Practice Issues

Bookkeeping Services Versus Compilation of Financial Statements

.27 SSARS No. 1 is applicable whenever you submit unaudited financial statements of a nonpublic entity to your client or third parties. SSARS No. 8 modified the definition of *submission*. Submission of financial statements is now defined as follows (AR sec. 100.04):

Presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

[See the "SSARS No. 8 and the 'Management-Use-Only' Compilation" section earlier in this Alert for a more detailed discussion of this definition.]

.28 If the client does not need audited or reviewed financial statements, you can choose from these three types of engagements:

- A "traditional" compilation (required if third parties will use the financial statements)
- A "management-use-only" compilation (available if third parties will not use the financial statements)
- Bookkeeping services (available if the procedures do not include the submission of financial statements)

.29 You should consider making the decision about the best type of engagement for your client early in the engagement planning process and base the decision on a combination of factors, including (1) the needs of the client and other users, (2) your knowledge of the client, and (3) the nature of the procedures you will perform.

.30 If your client does not need compiled financial statements you may, instead, choose to perform only bookkeeping services. Other than the broad general ethical guidance available in the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 201), there are no authoritative standards for bookkeeping services. Thus, it is wise to at least establish a written understanding with the client concerning bookkeeping services. This understanding should include:

- A description of the nature and limitations of the services
- A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts

.31 Although not an authoritative requirement, a written engagement letter for a bookkeeping services engagement could be important because there are no specific standards to follow for these types of engagements. (Appendix A, "Bookkeeping Services—Illustrative Engagement Letter," includes an example.) Other professional engagements, such as audits, reviews, and compilations, include the added benefit of authoritative standards that define the engagement objectives, limitations, communications, and so on.

Documentation Requirements for SSARS Engagements

Compilation Engagement Documentation

.32 SSARS No. 1 does not require any specific documentation in a compilation engagement. However, SSARS No. 1, as amended by SSARS No. 8, does require documentation of the understanding with the client in the form of a written engagement letter for a management-use-only compilation (if a compilation report is not to be issued). Although not required (except for the engagement letter as just indicated), including the types of documentation noted below may be helpful from a risk management and quality control perspective:

1. Engagement letter
2. Trial balance information to bridge the client's records to the compiled financial statements
3. Notes on how incorrect, incomplete, or unsatisfactory matters were resolved, if any
4. If required by firm policy, compilation work program, procedural checklists, and disclosure checklists

Review Engagement Documentation

.33 SSARS No. 1 states that, in a review engagement, the accountant should have documentation to describe the following (AR sec. 100.29 and .32):

1. Matters covered in your inquiry and analytical procedures
2. Unusual matters (incorrect, incomplete, or unsatisfactory information) that you considered and how those matters were resolved
3. Management representation letter (SSARS No. 1 requires that the client provide you with a representation letter in a review engagement.)

.34 Accountants typically include the following additional items in their review engagement documentation:

1. Engagement letter
2. A working trial balance
3. If required by firm policy, review work program, procedural checklists, and disclosure checklists

Responsibility for Fraud

.35 You are not required to document your assessment of fraud or gain an understanding of internal control in a compilation or review engagement. Further, you are not required to plan or perform a compilation or review engagement to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Nor are you required to gain an understanding of the client's internal control when conducting a compilation or review engagement. This does not, however, relieve you of responsibility if incorrect, incomplete, or otherwise unsatisfactory information comes to your attention during the engagement.

.36 SSARS No. 1 (AR sec. 100.09) requires you to obtain additional or revised information if you become aware, while conducting a compilation engagement, that information supplied by the client is incorrect, incomplete, or otherwise unsatisfactory. If the client refuses to provide additional or revised information, you should withdraw from the engagement.

.37 In a review engagement, if you become aware that information supplied by the client is incorrect, incomplete, or otherwise unsatisfactory, you should perform the additional procedures you deem necessary to achieve limited assurance that there are no material modifications that should be made to the financial statements for them to be in conformity with generally accepted accounting principles (GAAP).

.38 Although management is responsible for the prevention and detection of fraud and the maintenance of internal control, many small business clients do not understand management's responsibility. These clients may have unrealistic expectations and may assume that you are providing a higher level of assurance than you were engaged to do, including detecting fraud and internal control weaknesses. We present here some ways for you to clarify for your client each party's responsibility.

.39 Paragraph 5 of SSARS No. 1 (AR sec. 100.05) states:

The accountant should establish an understanding with the entity, preferably in writing, regarding the services to be performed . . . the understanding should include a description of the nature and limitations of the services to be performed and a description of the report, if a report is to be issued. The understanding should also provide (a) that the engagement cannot be relied upon to disclose errors, fraud, or illegal acts and (b) that the accountant will inform the appropriate level of management of any material errors that come to his or her attention and fraud or illegal acts that come to his or her attention, unless they are clearly inconsequential.

.40 A written engagement letter, though not required in a compilation or review engagement (except in the case of a management-use-only compilation), may be helpful in clarifying and documenting your understanding with the client about your responsibility regarding fraud and internal control weaknesses. The language suggested for use in the review engagement letter is illustrated in Appendix E of SSARS No. 1 (AR sec. 100.57) as follows:

A review does not contemplate obtaining an understanding of internal control or assessing control risk, tests of accounting records and responses to inquiries by obtaining corroborating evidential matter, and certain other procedures ordinarily performed during an audit. Thus, a review does not provide assurance that we will become aware of all significant matters that would be disclosed in an audit. Our engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, we will inform the appropriate level of management of any material errors that come to our attention and any fraud or illegal acts that come to our attention, unless they are clearly inconsequential.

.41 Similarly, the language illustrated in Appendix C and D of SSARS No. 1 (AR sec. 100.55 and 100.56) for an engagement letter for a compilation engagement is as follows:

Our engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, we will inform the appropriate level of management of any material errors that come to our attention and any fraud or illegal acts that come to our attention, unless clearly inconsequential.

.42 Language can also be added to a compilation engagement letter to indicate that a compilation does not require you to obtain an understanding of the entity's internal control or identify internal control weaknesses.

.43 In addition to providing a clearly expressed engagement letter, a second way to minimize misunderstandings is to make clear to your client his or her responsibility to prevent and detect fraud. An effective way to do this is to educate your client as to the importance of internal control in the prevention of fraud. You are then in a position to work with the client in a separate consulting engagement to improve the client's internal control. This exercise results in several benefits for both you and the client. One benefit is the client's increased awareness of the importance of internal control in the prevention and detection of fraud. In addition, this exercise clarifies management's responsibility to prevent and detect fraud, thereby reducing your legal risk. Finally, in the process of offering this type of consulting services to the client, you have the opportunity to gain knowledge of the client's business, thereby becoming more valuable to the client.

Political Campaign Reporting

.44 Candidates running for elected office generally are required by state or federal law to file a report with the applicable state or federal regulatory agency indicating amounts and sources of contributions received and the amounts and purposes of expenditures made during a specified period. Many campaign reports include, in addition to several other preprinted forms, a form requiring the following information:

- Subtotals of each type of receipt and a total of all receipts
- Subtotals of each type of disbursement and a total of all disbursements
- A financial summary beginning with funds on hand at the beginning of the period, adding total receipts for the period, subtracting total disbursements for the period, and ending with total funds on hand at the end of the period

.45 Paragraph 4 of SSARS No. 1 (AR sec. 100.04) defines a *financial statement* as:

A presentation of financial data, including accompanying notes, derived from accounting records and intended to communicate an entity's economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with generally accepted accounting principles (GAAP) or a comprehensive basis of accounting other than GAAP.

.46 Further, paragraph 2 of SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AR sec. 300.02) defines a *prescribed form* as follows:

Any standard preprinted form designed or adopted by the body to which it is to be submitted, for example, forms used by industry trade associations, credit agencies, banks, and governmental and regulatory bodies other than those concerned with the sale or trading of securities. A form designed or adopted by entity whose financial statements are to be compiled is not considered to be a prescribed form.

.47 Based on these two definitions, the financial presentation described above is a prescribed-form financial statement that must be compiled in accordance with SSARS No. 3 (AR sec. 300).¹ However, if you

¹ The requirements of SSARS No. 1 are applicable when the unaudited financial statements of a nonpublic entity are included in a prescribed form. SSARS No. 3 amended SSARS No. 1 to provide for an alternative form of standard compilation report.

are serving as treasurer for the candidate or campaign committee, you have the option of communicating, preferably in writing, your relationship to the candidate or campaign, instead of issuing a SSARS No. 3 report. (See the previous section of this Alert entitled “New SSARS Interpretation on Controllorship and Other Management Services.”) The following is an example of the type of communication that you may use:

The accompanying (identification of financial statements, including period covered and name of entity) included in the accompanying prescribed form have been prepared by [Name of accountant], CPA. I have prepared such financial statements in my capacity as Treasurer of (identify candidate or campaign).

.48 Also, keep in mind that Ethics Ruling No. 82, “Campaign Treasurer” of Rule 101, *Independence*, of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 191.164–.165), addresses independence considerations for campaign treasurers. The Ruling states that if a member serves as the campaign treasurer of a mayoral candidate, independence would not be considered to be impaired with respect to the political party or municipality. However, if *any* partner or professional employee of the firm served as campaign treasurer, independence would be considered to be impaired with respect to the campaign organization.

Quality Control Standards

.49 Statements on Quality Control Standards are a framework for quality control in a CPA firm that apply to both compilation and review engagements and to many areas beyond these two types of engagements.

.50 The standards established by SQCS apply to a firm’s accounting and auditing practice, which SQCS No. 2, *System of Quality Control for a CPA Firm’s Accounting and Auditing Practice* (AICPA, *Professional Standards*, vol. 2, QC sec. 20), defines as follows:

Accounting and auditing practice refers to all audit, attest, accounting and review, and other services for which standards have been established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct.

.51 Although SSARS No. 1 currently does not refer to the SQCS, ARSC is amending SSARS No. 1 to refer to the SQCS and explain how those standards interact with SSARS. (See the previous section of this Alert entitled “New SSARS Exposure Draft: Omnibus—2002.”) The proposed amendment will clarify that, although an effective quality control system is conducive to compliance with SSARS, deficiencies in or noncompliance with a firm’s quality control system do not in and of themselves indicate that an engagement was not performed in accordance with the applicable professional standards.

Tailoring the Representation Letter

.52 SSARS No. 1 requires that, in a review engagement, you obtain a representation letter from members of management whom you believe are responsible for and knowledgeable about the matters covered in the representation letter. A management representation letter is not required in a compilation engagement. (However, the AICPA’s *Personal Financial Statements* Guide recommends that practitioners obtain a representation letter in all personal financial statement engagements, even in a compilation.)

.53 Normally, the chief executive officer and chief financial officer would sign the management representation letter. Appendix F of SSARS No. 1 (AR sec. 100.58) provides an illustrative management representation letter for a review engagement.

.54 You should tailor the management representation letter to the client based on your knowledge of the client’s business and the industry in which it operates. You may add additional representations to the letter,

especially if the client operates in a specialized industry (e.g., construction contractors, homeowners associations, or not-for-profit organizations.). These additional representations may be found in various AICPA Industry Audit and Accounting Guides that you can obtain by calling the AICPA Order Department at (888) 777-7077.

.55 ARSC has issued an omnibus exposure draft that will, among other things, require specific representations from management and provide guidance on both dating the representation letter and obtaining representations from current management if they were not present during all periods covered by the review report. (See the previous section of this Alert, "New SSARS Exposure Draft: Omnibus—2002.") Some of the following issues, although they are only recommended at this time, may become requirements if the omnibus statement is adopted.

.56 Obtain written representations from management for all financial statements and periods covered by your report. For example, if comparative financial statements are reported on, the representations obtained at the completion of the most recent review should address all periods being reported. The specific written representations obtained will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. In connection with a review of financial statements presented in accordance with GAAP, specific representations should relate to the following matters:

- a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with GAAP
- b. Management's belief that the financial statements are fairly presented in conformity with GAAP
- c. Management's full and truthful response to all inquiries
- d. Completeness of information
- e. Information concerning subsequent events

.57 The written representations should be addressed to the accountant. Because you are concerned with events occurring through the date of the report that may require adjustment to or disclosure in the financial statements, the representations should be made as of a date no earlier than the date of your report. The letter should be signed by those members of management who you believe are responsible for and knowledgeable, directly or through others in the organization, about the matters covered in the representation letter. Normally, the chief executive officer and chief financial officer or others with equivalent positions in the entity should sign the representation letter. If current management was not present during all periods covered by your report, you should nevertheless obtain written representations from current management on all such periods.

.58 Paragraph 48 of SSARS No. 1 (AR sec. 100.48) states that if, in an audit or review engagement, a client does not provide you with a signed representation letter, you are precluded from issuing a review report on the financial statements and would ordinarily be precluded from issuing a compilation report on the financial statements. Thus, you would not be able to step down to a compilation engagement.

Current Accounting and Reporting Issues

Accounting for Goodwill

.59 In June 2001, the FASB issued Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*, which supersedes APB Opinion No. 17, *Intangible Assets*, and drastically changes the accounting for goodwill. FASB Statement No. 142 changes the

unit of account for goodwill and takes a very different approach to how to account for goodwill and other intangible assets subsequent to their initial recognition. Because goodwill and some intangible assets will no longer be amortized, the reported amounts of goodwill and intangible assets will not decrease at the same time and in the same manner as under previous standards. Specifically, FASB Statement No. 142 changes the subsequent accounting for goodwill and other intangible assets in the following respects:

- FASB Statement No. 142 adopts a more aggregate view of goodwill and bases the accounting for goodwill on the units of the combined entity into which an acquired entity is integrated. Those units are referred to as reporting units.
- APB Opinion No. 17 presumed that goodwill and all other intangible assets were wasting assets (that is, finite lived). FASB Statement No. 142 does not presume that those assets are wasting assets. Instead, goodwill and other intangible assets that have indefinite useful lives will not be amortized but, rather, will be tested at least annually for impairment.
- FASB Statement No. 142 provides specific guidance for testing goodwill for impairment. The annual test for goodwill impairment uses a two-step process that begins with an estimation of the fair value of a reporting unit. However, if certain criteria are met, the requirement to test goodwill for impairment annually can be satisfied without a remeasurement of the fair value of the reporting unit.

.60 The provisions of FASB Statement No. 142 are required to be applied, starting with fiscal years beginning after December 15, 2001. This Statement is required to be applied to all goodwill and other intangible assets recognized in the financial statements at that date. Goodwill and intangible assets acquired after June 30, 2001, are subject immediately to the nonamortization provisions of FASB Statement No. 142.

.61 Many accountants have voiced concern that the cost of complying with FASB Statement No. 142 may exceed the benefits for many small businesses which need compiled or reviewed financial statements. FASB Statement No. 142 requires that companies test goodwill for impairment at least annually. This impairment test involves estimating the fair value of all assets and liabilities and comparing the resulting net assets to the fair value of the reporting unit (or entity). This estimation and comparison procedure can be costly in terms of time and personpower.

.62 If your client chooses not to implement FASB Statement No. 142, you should modify your compilation or review report to disclose the GAAP departure. You also should disclose the dollar effects of the departure in the report if the client has determined them or if they are known as a result of your procedures. SSARS No. 1 (AR sec. 100.42) provides guidance when any amounts are believed so material that a GAAP exception is not enough. However, you are not required to determine the effects of the departure if the client has not determined and provided them. In those cases, include in the report a statement that the effects of the departure have not been determined. The following reports illustrate how you might communicate this departure.

Compilation Report With a GAAP Departure

.63

We have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles described in the following paragraph.

Generally accepted accounting principles require that goodwill be tested for impairment and not be amortized. Management has informed me (us) that the Company has not tested goodwill for impairment and is continuing to amortize goodwill. The effects of this departure from generally accepted accounting principles have not been determined.

Review Report With a GAAP Departure

.64

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of management.

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on our review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

Generally accepted accounting principles require that goodwill be tested for impairment and not be amortized. Management has informed me (us) that the Company has not tested goodwill for impairment and is continuing to amortize goodwill. The effects of this departure from generally accepted accounting principles have not been determined.

Statement of Retained Earnings

.65 Some practitioners question whether a statement of retained earnings is required in a financial statement presentation. This confusion arises, partly, because all of the example reports in SSARS No. 1 refer to a statement of retained earnings.

.66 The accounting literature does not require the statement of retained earnings to be presented as a financial statement. However, APB Opinion No. 12, *Omnibus Opinion—1967*, does require disclosure of a change in capital. This disclosure can be made in a separate financial statement, in the notes to the financial statements, or as part of another basic statement (such as the income statement or balance sheet).

.67 SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623), contains the requirements for a presentation of financial statements prepared on a comprehensive basis of accounting other than GAAP. We refer to this basis of presentation as an other comprehensive basis of accounting (OCBOA). Generally, two financial statements—one that presents the financial position of the entity and one that presents the results of operations of the entity—will constitute a complete presentation. However, financial statements prepared using an OCBOA, such as cash basis or tax basis, should include disclosures similar to those included in GAAP presentations. Therefore, disclosure of a change in capital, as required by APB Opinion No. 12, would be appropriate for cash- or tax-basis financial statements.

.68 In general, you have three options for presenting information about retained earnings or changes in capital:

- Present a separate statement of retained earnings.
- Include a disclosure of the change in capital (retained earnings) in the notes to the financial statements.
- Present the change in capital (retained earnings) on the face of the income statement or in the equity section of the balance sheet.

Reporting When Supplementary Information Is Included

.69 Two common questions arise when supplementary information is included with the basic financial statements:

1. What is considered supplementary information, and where do I place it in the presentation?
2. Do I have to modify the standard compilation or review report if supplementary information is included?

What Is Supplementary Information?

.70 The term *supplementary information* is not defined in SSARS. SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551), defines this type of information as:

- Additional details of items in or related to the basic financial statements, unless the information has been identified as being part of the basic financial statements
- Consolidating information
- Historical summaries of items extracted from basic financial statements, including graphs prepared on a computer
- Statistical data
- Other material, some of which may be from sources outside the accounting system or outside the entity

Presentation of Supplementary Information

.71 Financial statements often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

.72 Normally, supplementary information is separated from the basic financial statements. Most practitioners present supplementary information on separate pages after the basic financial statements (and footnotes, if included). It is also a good idea to separate the supplementary information from the basic financial statements by including a title page marked "Supplementary Information." If you present a separate report on the supplementary information, it should follow the title page.

.73 SSARS No. 1 requires that you indicate the degree of responsibility, if any, you are taking with respect to the supplementary information that accompanies the basic financial statements.

.74 If the basic financial statements are compiled, then the compilation report should be modified, as follows:

I (We) have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, and the accompanying supplementary information contained in Schedules A and B, which are presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and supplementary schedules and, accordingly, do not express an opinion or any other form of assurance on them.

.75 If the basic financial statements are compiled for management's use only, then the engagement letter should include the following language:

The other data accompanying the financial statements are presented only for supplementary analysis purposes and will be compiled from information that is the representation of management, without audit or review, and I (we) will not express an opinion or any other form of assurance on such data.

.76 If the basic financial statements are reviewed, the degree of responsibility you are taking is indicated either in your review report on the basic financial statements or in a separate report on the other data. Specifically, the explanation should state that the review was made primarily for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, and, according to SSARS No. 1 (AR sec. 100.44) either:

- The other data accompanying the financial statements are presented only for supplementary analysis purposes and have been subjected to the inquiry and analytical procedures applied in the review of the financial statements, and you did not become aware of any material modifications that should be made to such data (in other words you are stating that you also *reviewed* the supplementary information), or
- The other data accompanying the financial statements are presented only for supplementary analysis purposes and have not been subjected to the inquiry and analytical procedures applied in the review of the financial statements, but were compiled from information that is the representation of management, without audit or review, and you do not express an opinion or any other form of assurance on such data (in other words, you are stating that you reviewed the financial statements but only *compiled* the supplementary information).

.77 In any case, the important thing to remember is to clearly indicate the degree of responsibility you are taking for any information accompanying the basic financial statements.

.78 The ARSC has issued an exposure draft that will allow for a separate report on supplementary information. SSARS No. 1 currently implies that the reference to the supplementary information should be made only in the compilation report on the financial statements. (See the previous section of this Alert, "New SSARS Exposure Draft: Omnibus—2002.")

Financial Statements Submitted in Litigation Support Services

.79 Accountants who provide litigation support services may be asked to prepare financial presentations for their client's submission to the court. Ordinarily, the submission of such financial statements would require that you at least compile the financial statements in accordance with SSARS No. 1. However, Interpretation No. 20 of SSARS No. 1, "Applicability of Statements on Standards for Accounting and Review Services to Litigation Services" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.76-.79), exempts such financial statements from the applicability of SSARS if the following apply:

1. The statements are submitted in conjunction with litigation services that involve pending or potential formal legal or regulatory proceedings before a trier of fact.
2. The services are in connection with the resolution of a dispute between two or more parties.
3. One of the following criteria must be met:
 - a. The service consists of being an expert witness.
 - b. The service consists of being a trier of fact or acting on behalf of one.
 - c. The accountant's work under the rules of the proceedings is subject to detailed analysis and challenge by each party to the dispute.
 - d. The accountant is engaged by an attorney to do work that will be protected by the attorney's work product privilege and such work is not intended to be used for other purposes.

.80 In legal proceedings, other parties are provided with access to the financial statements submitted to the court and also have the opportunity to analyze and challenge the financial statements. This would meet the criteria in item 3c above, and because the first two requirements (items 1 and 2, above) are also met, would exempt the financial statements from the applicability of SSARS No. 1.

.81 It should be noted that SSARS No. 1 would be applicable to financial statements submitted in connection with litigation services if, under the rules of the proceedings (1) the parties did not have the opportunity to analyze and challenge the accountant's work or (2) if the accountant was specifically engaged to compile and report on the financial statements.

.82 The AICPA Litigation and Dispute Resolution Subcommittee has issued an exposure draft Statement on Responsibilities (SOR) for Litigation Services No. 1. The exposure draft sets forth the responsibilities of a litigation service practitioner in a litigation service consulting engagement. The SOR analyzes the scope of litigation services, provides a comparative analysis of standards and responsibilities, and describes the scope of standards and responsibilities for the litigation service practitioner.

.83 The SOR is based upon an Interpretation of the Statement on Standards for Consulting Services and incorporates special reports that have previously been issued by the AICPA (*Application of AICPA Professional Standards in the Performance of Litigation Services, Consulting Services Special Report 93-1*) as well as elements of other special reports that have been issued by the AICPA.

Compiling or Reviewing Under a Different Basis of Accounting

.84 A client may engage you to compile GAAP financial statements in one year (for example, 2002) because such statements are needed to obtain bank financing, and in the following year (2003) when the client is no longer applying for credit, engage you to compile comparative tax-basis financial statements for the current and prior years (2002 and 2003). If such an engagement is performed, two financial statements with different bases of accounting will have been issued for the same period (2002).

.85 Although SSARS does not address this question, nothing in SSARS precludes you from performing such an engagement. Relevant guidance in this area may be gleaned from SAS No. 62, *Special Reports*, which

provides guidance on reporting on financial statements prepared in conformity with an OCBOA other than GAAP, as noted previously in this Alert. Footnote 35 of SAS No. 62 primarily addresses situations in which GAAP financial statements have been issued in previous years and the entity changes the basis of accounting used in the current year. Footnote 35 indicates that, in such situations, the auditor is not required to add an explanatory paragraph to the report describing the change. However, the auditor may add an explanatory paragraph to the report to highlight (1) a difference in the basis of presentation used from that in prior years or (2) that another report has been issued on the entity's financial statements prepared in conformity with another basis of accounting. Drawing a parallel from the guidance in the audit literature, it would appear that you need not modify your compilation report in this situation; however, if you wish to, you may add a paragraph to the report indicating that another report has been issued on the entity's financial statements prepared in conformity with another basis of accounting.

.86 If two sets of financial statements with different bases of accounting have been issued for the same period, it is particularly important that readers be aware of the basis of accounting used in each set of financial statements. Ordinarily, the basis of accounting is disclosed in the notes to the financial statements. However, in financial statements that omit substantially all disclosures required by GAAP or OCBOA, the basis of accounting may not be disclosed in the financial statements. Interpretation No. 12 of SSARS No. 1, "Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.41–45), ensure that the basis of accounting is disclosed to financial statement users by requiring that it be disclosed in the compilation report if it is not disclosed in the financial statements.

Pro Forma Information

.87 A client who is considering entering into an important transaction, such as acquiring another entity, may ask you to compile pro forma financial information related to that transaction. The objective of pro forma financial information is to present historical financial information as if a proposed or consummated transaction had occurred at the date of the historical financial information. The pro forma financial information may consist of financial statements or selected elements of a financial statement. Pro forma financial information is prepared by making pro forma adjustments to historical financial information. The adjustments are based on management's assumptions and should reflect all of the significant effects that would be directly attributable to the proposed transaction or event. For example, in 2002, Company A may be considering acquiring Company B and would like to determine what the December 31, 2001, financial statements would have looked like had that acquisition occurred during 2001. The client, with your assistance, would prepare pro forma financial statements that reflect all of the significant factors that would have affected the historical financial statements. These factors might include items such as increased labor costs if the acquisition involves the use of employees covered by a collective bargaining agreement, or the tax effects of operating in a new locality. In other situations, such as the following, pro forma financial information may be useful to show the effects of transactions:

- The disposition of a significant portion of a business, such as the sale of a division
- A change in the form of a business organization, such as the incorporation of a sole proprietorship
- The sale of securities and the application of the proceeds, such as the issuance of debt or equity securities and the use of the proceeds to purchase additional manufacturing equipment

.88 Chapter 4, "Reporting on an Entity's Internal Control Over Financial Reporting," of Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 401), establishes standards for examining or reviewing pro forma financial information. However, that standard does not apply to the compilation of pro forma financial information. In Technical Practice Aid (TPA) No. 9, "Compilation of Pro Forma Information" (AICPA, *Technical Practice Aids*, vol. 1, sec. 9160.09), an inquiry is made as to whether an accountant may compile pro forma financial information if the related historical financial statements have been compiled. The TPA states that

an accountant may compile pro forma financial information because AT sec. 401 does not prohibit such a service. Although there is no authoritative guidance for compiling such information, you should consider the importance of the following:

- Obtaining a general understanding of the underlying transaction or event that created the need for the pro forma financial information
- Considering whether management's assumptions underlying the pro forma adjustments are disclosed in the notes to the pro forma financial information and whether the pro forma adjustments appear to be consistent with each other and with the data used to develop them

.89 If the historical financial statements have been compiled, the pro forma financial information may be presented as supplementary information accompanying the historical financial statements, and you may report on the pro forma financial information in accordance with the guidance on supplementary information presented in paragraph 44 of SSARS No. 1 (AR sec. 100.44). (Also, see the discussion in the previous section of this Alert, "Reporting When Supplementary Information Is Included.")

Split-Level Reporting

.90 Split-level reporting involves providing different levels of assurance on a single set of financial statements for the same year. For example, this type of reporting would include auditing the balance sheet and reviewing the income statement.

.91 Neither the SSARS nor the SAS address whether you can audit a balance sheet and review an income statement for the same set of financial statements. Many practitioners believe that an engagement involving an audit of one statement and a review of another statement should be avoided.

.92 Consider the case of a first-year audit in which you have not observed the beginning inventory. You sometimes find that you cannot express an opinion on the statements of income and cash flows in these circumstances. You may, however, be able to express an unqualified opinion on the balance sheet. In such a situation, is it permissible to audit the balance sheet and compile or review the statements of income and cash flows?

.93 If you encounter such a situation, follow the guidance in SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508), and indicate that you do not express an opinion on the statements of income and cash flows. Because you have applied audit procedures to the results of operations and the statement of cash flows, except for beginning inventory, best practice suggests that you should avoid engagements that combine SAS and SSARS requirements.

.94 What about an engagement involving a reviewed balance sheet and a compiled statement of income? Is this type of split approach appropriate for practitioners to consider? Again, this is not addressed in the SSARS; thus, it is not prohibited. However, most practitioners believe that it is sound practice to avoid this type of engagement. Another determining factor to consider is that, if one statement has been reviewed, the additional work necessary to review the other statement (instead of compiling the other statement) is minimal.

Reporting on Financial Statements That Omit Substantially All Disclosures

.95 Your client may request you to compile financial statements that omit substantially all disclosures. You may compile financial statements that omit substantially all disclosures, provided you disclose the omission in the compilation report and the omission is not, to your knowledge, an attempt to mislead anyone. Since the omission of disclosures is a departure from GAAP, the report must clearly indicate the departure. SSARS No. 1 (AR sec. 100.16–.18) indicates that the following should be included GAAP financial statements:

Management has elected to omit substantially all disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.96 For OCBOA financial statements, the following should be included:

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.97 If the client wishes to include disclosures about only a few matters in the form of notes to the compiled financial statements, such disclosures should be labeled "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included." In this case, the third paragraph is still necessary in the report.

.98 Interpretation No. 1 of SSARS No. 1 (AR sec. 9100.01) indicates that the above modification for compiled financial statements is not appropriate for reviewed financial statements. Since the omission of material disclosures is a departure from GAAP, the review report should include the omitted disclosures.

.99 When the financial statements include all disclosures except one or two, the guidance above is not appropriate. Rather, the omission of a single note should be treated in a compilation or review report like any other departure from GAAP, and you should disclose the nature of the departure and its effects, if known. In addition, the paragraphs above should not be used in situations in which substantially all disclosures are included. In other words, these paragraphs are not intended to be a form of protection for forgetting to include one or more disclosures.

Current Peer Review Issues

Review of Documentation Expected in an Engagement

.100 In 1999, the AICPA Peer Review Board adopted revisions to the AICPA Standards for Performing and Reporting on Peer Reviews (Standards) and Interpretations that became effective for peer reviews commencing on or after January 1, 2001. There are now three types of peer reviews, per the AICPA Standards for Performing and Reporting on Peer Reviews:

- *System review.* This kind of review is for firms that perform engagements under the SAS, *Governmental Auditing Standards* (GAS, also referred to as the Yellow Book), and examinations of prospective financial information under the SSAE. The system review is essentially the same as the former on-site peer review with only a name change.
- *Engagement review.* This kind of review is for firms that are not required to have a system review (and who are not eligible to have a report review discussed below). The engagement review is similar to the former off-site peer review (with a separate report and letter of comments, technical review, committee acceptance, monitoring actions, and so on). In an engagement review, the two objectives are to provide the peer reviewer with a reasonable basis for expressing limited assurance of the following:
 - The financial statements or information and the related accountant's report on the accounting, review, and attestation engagements submitted for review conform in all material respects with professional standards (same as in the former off-site review).

- The reviewed firm's documentation on the engagements submitted for review conforms to the requirements of the SSARS and the SSAE, as applicable, in all material respects. In an engagement review, there is no opinion on the reviewed firm's system of quality control and, therefore, the reviewer is not opining on the firm's design of or compliance with its own quality control policies and procedures or with quality control standards.
- *Report review.* Firms that only perform compilations that omit substantially all disclosures will have a report review.

.101 Many accountants who perform only compilation and review engagements will be subject to the engagement review discussed above. In this case, you will be expected to submit selected engagements to the peer reviewer, including financial statements, reports, and documentation. However, since SSARS does not require any specific documentation in a compilation engagement, none should be expected to be submitted (see the discussion in the "Documentation Requirements in SSARS Engagements" section earlier in this Alert). The one exception, in the case of a compilation engagement, is the management-use-only compilation. In this kind of compilation, you are required to document your understanding with the client (that is, in a written engagement letter). That understanding is required to address specific items outlined in SSARS No. 1 (AR sec. 100.21).

.102 As noted in the "Review Engagement Documentation" section of this Alert, for a review engagement, SSARS No. 1 (AR sec. 100.29 and .32) states that the accountant should have documentation to describe the following:

1. The matters covered in your inquiry and analytical procedures
2. Unusual matters that you considered during the performance of the review, including their disposition
3. The management representation letter (SSARS No. 1 requires that the client provide you with a representation letter in a review engagement.)

.103 However, SSARS does not provide any specific guidance as to the form and content of the documentation to support items 1 and 2 above. Since professional standards do not provide specific guidelines as to the form and content of documentation required for review engagements, other than management representation letters, many accountants question what kind of documentation will be required from peer reviewed firms when they are subject to an engagement review.

.104 In order to clarify what constitutes appropriate documentation for a review engagement, the staff of the AICPA Peer Review Program discussed this matter with ARSC. It is ARSC's position that the form and content of documentation for a review engagement should be based upon the judgment of the accountant who performs the review engagement. Therefore, the judgment of the accountant appears to be the key factor in determining:

1. The nature and extent of inquiries to be made by the accountant when performing a review of financial statements
2. The form and content of documentation to be provided by the accountant as support for inquiries, analytical procedures, and any unusual matters considered during the performance of the review

.105 Examples of appropriate documentation for a review engagement may include one or more of the following:

- A program or checklist that covers the inquiries made by the accountant, such as those generally described in paragraph 28 of SSARS No. 1 (AR sec. 100.28) and also those more specifically described in Appendix B of SSARS No. 1 (AR sec. 100.54)

- Notations in the working papers or memos that describe the analytical procedures performed, such as comparison of financial statements with comparable prior periods, comparison of financial statements with anticipated results, ratio analysis, and also, the conclusions reached by the accountant based on the performance of those analytical procedures
- Memos in a narrative format that discuss any unusual matters the accountant considered during the review, as well as how the accountant disposed of those matters

.106 Since the form and content of documentation may vary from one engagement to another, and will be based on the judgment of the accountant who performed the review engagement, the peer reviewer will need to use reasonable judgment in determining whether the documentation appears to be appropriate.

Recurring Deficiencies Noted in Compilation and Review Engagements

.107 Of the more than 30,000 firms in the AICPA Peer Review Program, almost 18,000 perform reviews or compilations as their highest level of service. More than 40 state administering entities administer the peer review program to include 54 state CPA societies (including the District of Columbia, Guam, Puerto Rico, and the Virgin Islands). The importance of the peer review findings cannot be overemphasized. Here, we provide you with some recent significant and minor deficiencies that you can keep in mind when planning and staffing your compilation and review engagements.

Significant Deficiencies

.108 Significant deficiencies include matters that normally (1) are material to understanding the financial statements or auditor's or accountant's report or (2) represent a critical auditing or SSARS procedure.² An engagement with a significant deficiency is normally considered substandard. Frequently mentioned significant deficiencies in compilation and review engagements that have been noted in peer review comment letters include, among other matters, the following:

- Reports that include the following:
 - Omissions of required reporting elements of applicable standards
 - Issuance of a review report when the accountant is not independent
 - Failure to disclose lack of independence in a compilation report
 - Failure to disclose the omission of substantially all disclosures
 - Failure to disclose the omission of the statement of cash flows in financial statements prepared in accordance with GAAP
 - Failure to disclose an OCBOA for financial statements compiled without disclosure, where the basis of accounting is not readily determinable from reading the report
 - Failure to disclose, in the accountant's report, a material departure from professional standards (Examples include the nonconsolidation of appropriate subsidiaries with a parent company's financial statements; omission of significant income tax provisions in interim financial statements; omission of significant disclosures related to material defined employee benefit plans; or nonrecognition of significant deferred income.)
- Financial statement measurement, presentation, and disclosure, which includes the following:
 - Inclusion of material balances that are not appropriate for the basis of accounting used
 - Failure to include a material amount or balance necessary for the basis of accounting used (examples include the omission of material accruals, failure to provide for material losses or doubtful accounts, or failure to provide for material deferred income taxes)

² Failure to document the understanding with the entity through the use of an engagement letter, and/or include a reference on each page of the financial statements that they are "restricted for management's use only" as required by SSARS No. 8 or failure to include any one of the required descriptions and statements in the engagement letter will be considered a significant deficiency.

- Significant departures from the financial statement formats prescribed by industry audit and accounting guides
- Omission of significant required disclosures related to material financial statement balances or transactions
- Omission of disclosures of significant accounting policies applied (GAAP or OCBOA)
- Omission of significant matters related to the understanding of the financial statements (the cumulative material effect of a number of disclosure deficiencies)
- Improper accounting of a material transaction (e.g., recording a capital lease as an operating lease)
- Misclassification of a material transaction or balance
- Failure to include a summary of significant assumptions in a financial forecast or projection
- Use of a statement of changes in financial position where a statement of cash flows is appropriate
- Failure to segregate the statement of cash flows into the components of operating, investing, and financing activities SSARS procedures and documentation, which includes failures to:
 - Perform inquiries and analytical procedures in review engagements
 - Document inquiries and analytical procedures in review engagements
 - “Read” compiled financial statements for obvious or material errors
 - Obtain client management representation letters in review engagements

Minor Deficiencies

.109 Minor deficiencies include departures from professional standards that (1) are not normally material to a proper understanding of the financial statements or accompanying auditor’s or accountant’s report or (2) do not represent a critical audit or SSARS procedure. As a result, these departures, by themselves, would not usually cause an engagement to be substandard. Frequently mentioned minor deficiencies, among others, in compilation and review engagements that have been noted in peer review comment letters include the following:

- Reports, including the following:
 - Failure to report on supplementary information
 - Minor departures from standard report language, provided the report is not otherwise misleading about the degree of responsibility taken
 - Failure to reference all time periods encompassed by the financial statements
 - Inclusion of a reference about the omission of the statement of cash flows for financial statements prepared on an OCBOA (A statement of cash flows is not required for financial statements prepared on an OCBOA.)
 - Minor report-dating departures
 - Failure to disclose an OCBOA for financial statements compiled without disclosure where the basis of accounting is otherwise readily determinable from reading the report
 - Omission of a reference to a statement of changes in equity (included with the financial statements)
- Financial statement measurement, presentation, and disclosure, which include the following:
 - Omitted or inadequate disclosures related to minor account balances or transactions (e.g., minor disclosure deficiencies related to accounting policies, inventory, valuation allowances, long-term debt, related-party transactions, concentrations of credit risk, deferred income taxes, or employee benefit plans)

- Minor departures from the financial statement formats recommended by industry audit and accounting guides
- Failure to reference the financial statements to the accountant's report or the accompanying footnotes
- Use of financial statement titles that are not appropriate for the basis of accounting used when the accountant's report, financial statements, or footnotes otherwise indicate the basis of accounting
- Failure to include the title "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Omitted" as appropriate for the presentation of certain selected disclosures
- Failure to accrue income taxes where the accrual and provision are expected to be immaterial to the financial statements taken as a whole
- SSARS procedures and documentation, which include the following:
 - Minor documentation deficiencies related to review engagements
 - Minor omitted procedures related to review engagements

.110 Although there are many recurring deficiencies noted in peer review, you can take steps to avoid them by keeping these common mistakes in mind as you plan and perform future compilation and review engagements.

Accounting Pronouncements and Guidance Update

.111 Presented below is a list of recently issued accounting pronouncements and other guidance issued since the publication of last year's Alert. See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a summary explanation of these issuances. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment to FASB Statement No. 13 and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated with Exit or Disposal Activities</i>
FASB Statement No. 147	<i>Acquisitions of Certain Financial Institutions</i>
Statement of Position (SOP) 01-5	<i>Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification</i>
SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>

On the Horizon

.112 You might want to keep abreast of auditing and accounting developments and upcoming guidance that may affect engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS. The AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] summarizes some of the more significant outstanding exposure drafts.

.113 The following table lists the various standard-setting bodies' Web sites where you may obtain information about outstanding exposure drafts. (Also see Appendix B, "The Internet—An Accountant's Research Tool," of this Alert for a more complete list of helpful Web sites.)

Standard Setting Body**Web Site**AICPA Auditing
Standards Board (ASB)www.aicpa.org/members/div/auditstd/drafts.htmAICPA Accounting
Standards Executive
Committee (AcSEC)www.aicpa.org/members/div/acctstd/edo/index.htm

GASB

www.gasb.org

FASB

www.fasb.orgProfessional Ethics
Executive Committeewww.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees are now publishing exposure drafts of proposed professional standards exclusively on the AICPA Web site at: www.aicpa.org. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft email list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

AICPA Resource Central

Publications

.114 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements (product numbers appear in parentheses).

- *Revenue Recognition Audit Guide* (012510kk)
- *Analytical Procedures Audit Guide* (012551kk)
- *Auditing Estimates and Other Soft Accounting Information Practice Aid* (010010kk)
- *Accounting Trends & Techniques—2002* (009894kk)
- *Preparing and Reporting on Cash- and Tax-Basis Financial Statements Practice Aid* (006701kk)
- *Understanding and Implementing SSARS No. 8* (006612kk)

Audit and Accounting Manual

.115 The *Audit and Accounting Manual* (005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. The manual contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; engagement letters; and management representation and confirmation letters, among other items. The 2002 edition of the manual includes a newly reorganized section addressing compilation and review engagements.

AICPA's reSOURCE Online Accounting and Auditing Literature

.116 Get access—any time, any where—to the AICPA's latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20 guides), Audit Risk Alerts (more than 15 alerts) and *Accounting Trends & Techniques*. To subscribe to this essential service for accounting professionals, go to cpa2biz.com.

Educational Courses

.117 The AICPA has developed a number of continuing professional education (CPE) courses that might be valuable to CPAs performing compilation and review engagements. Those courses include (product numbers appear in parentheses):

- Compilation and Review Engagements by Dan M. Guy (73369kk)
- Advanced Update for Compilation and Review Engagements (731500kk)
- Annual Update for Accountants and Auditors (730017kk)

.118 Courses designed with compilation and review in mind include:

- Cash- and Tax-Basis Financial Statements—Preparation and Reporting (CTB)
- Controller by the Hour: Competencies and Controversies (731490kk)
- Workpaper Documentation (732059kk)

Online CPE

.119 The AICPA offers an online learning tool entitled *AICPA InfoBytes*. An annual fee (\$119 for members and \$319 for nonmembers) offers unlimited access to hundreds of hours of CPE content in one- and two-credit courses. Register today as our guest at www.cpa2biz.com/infobytes.

CPE CD-ROM

.120 *The Practitioner's Update* (738452kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.121 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

AICPA Technical Hotline and Ethics Hotline

.122 Do you have a complex technical question about GAAP, OCBOA, accounting, auditing, compilation engagements, review engagements, or other technical matters? If so, you may use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with their answer. You can reach the Technical Hotline at 888-777-7077.

.123 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

in congressional and political affairs affecting CPAs. In addition, you can visit the Web site cpa2biz.com, which offers you all the latest AICPA products, including more than 15 audit risk alerts, more than 20 audit and accounting guides, the professional standards, and CPE courses.

Test Your Knowledge

.125 After you have read and studied this Alert, find out how well you have mastered the material by completing the test below. For each multiple-choice or true-false question, select the best answer. Correct answers are included at the end of the test.

- _____ 1. The new definition of *submission of financial statements* includes:
 - a. Materially modifying client-prepared financial statements
 - b. Generating financial statements on a computer
 - c. Preparing financial statements either manually or through the use of computer software
 - d. Printing financial statements
- _____ 2. The new type of compilation engagement is for financial statements restricted for:
 - a. Management's use only
 - b. Employee use only
 - c. Internal use only
 - d. Bank use only
- _____ 3. A CPA in public practice who performs *controllership services* for a client does not have to comply with SSARS.
TRUE FALSE
- _____ 4. A CPA must gain an understanding of a client's internal control when performing a review engagement.
TRUE FALSE
- _____ 5. A CPA has a responsibility to plan a compilation engagement to consider the risk of material misstatement that results from fraud.
TRUE FALSE
- _____ 6. A CPA in public practice, who also serves as an officer, director, owner, or employee of an entity:
 - a. May issue financial statements of the entity and comply with SSARS No. 1
 - b. May issue financial statements of the entity and use a transmittal letter that clearly indicates his or her relationship to the entity
 - c. Must comply with SSARS No. 1
 - d. Either a or b
- _____ 7. Written engagement letters are required in bookkeeping engagements.
TRUE FALSE
- _____ 8. Financial statements submitted in conjunction with litigation support services are exempt from SSARS No. 1 if:
 - a. The accountant is an expert witness or a trier of fact.
 - b. The accountant's work is subject to detailed analysis and challenge by each party to the dispute.
 - c. The accountant is engaged by the attorney and is protected by the attorney's work product privilege.
 - d. Any one of the above conditions is met.
- _____ 9. If a CPA is serving as treasurer of a political campaign, he or she has the *option* of complying with SSARS when submitting financial statements of the campaign.
TRUE FALSE

- _____ 10. Statements on Quality Control Standards (SQCS) apply to:
- a. Compilation engagements only
 - b. Review engagements only
 - c. Audit engagements only
 - d. All audit, attest, accounting and review, and other services
- _____ 11. According to the proposed SSARS, *Omnibus—2002*, written representations should be obtained from current management for all periods covered by a review report.
- TRUE FALSE
- _____ 12. A statement of retained earnings is a required financial statement.
- TRUE FALSE
- _____ 13. SSARS No. 1 contains no specific documentation requirements for a compilation engagement.
- TRUE FALSE
- _____ 14. All of the following are required to be documented in a review engagement, except:
- a. Management representation letter
 - b. Engagement letter
 - c. Matters covered in inquiry and analytical procedures
 - d. Unusual matters that were considered and their resolution
- _____ 15. Supplementary information includes:
- a. Consolidating information
 - b. Graphs
 - c. Statistical data
 - d. All of the above
- _____ 16. Disclosure of a change in capital can be made:
- a. In a statement of retained earnings
 - b. In the notes to the financial statements
 - c. On the face of the income statement
 - d. Any of the above
- _____ 17. Which of the following is one of the criteria that must be met in order for financial statements submitted in connection with litigation services to be exempt from SSARS?
- a. The service consists of being an expert witness.
 - b. The services are in connection with a business combination.
 - c. The accountant's work is not subject to analysis and challenge by each party to the dispute.
 - d. All of the above criteria must be met.
- _____ 18. Goodwill may no longer be amortized.
- TRUE FALSE
- _____ 19. Goodwill must be tested for impairment at least annually.
- TRUE FALSE
- _____ 20. Which of the following would be considered a significant deficiency in a peer review?
- a. Failure to use a written engagement letter in a management-use-only compilation
 - b. Failure to include a reference to the restricted nature on each page of the financial statements in a management-use-only compilation
 - c. Failure to include any one of the required descriptions and statements in the engagement letter for a management-use-only compilation
 - d. All of the above

Test Your Knowledge—Answers

.126

1. *c*—The new definition of *submission of financial statements* does not include the terms *generating, modifying, or printing*.
2. *a*—The changes to SSARS No. 1 are very specific in that the financial statements are to be restricted to management's use only—not for employee or internal use.
3. FALSE—If a CPA, in the *practice of public accounting*, submits financial statements to a client or third parties, he or she must comply with SSARS, unless the CPA is an officer, director, employee, or owner of the entity.
4. FALSE—SSARS does not require the accountant to obtain an understanding of the client's internal control when conducting a compilation or review engagement.
5. FALSE—SSARS does not require the accountant to plan or perform a compilation or review engagement to obtain reasonable assurance that the financial statements are free of material misstatement, whether caused by error or fraud.
6. *d*—A CPA in the practice of public accounting who also serves as a stockholder, partner, director, officer, or employee of the entity, may either (1) comply with the requirements of SSARS No. 1, or (2) communicate, preferably in writing, his or her relationship to the entity (for example, stockholder, partner, director, officer, or employee).
7. FALSE—No professional standard requires a written engagement letter for bookkeeping services, but a written engagement letter is highly recommended to reduce the possibility of a misunderstanding about the terms of the engagement.
8. *d*
9. TRUE—A CPA in the practice of public accounting who also serves as treasurer of a political campaign, may either (1) comply with the requirements of SSARS No. 1, or (2) communicate, preferably in writing, his or her relationship to the campaign.
10. *d*
11. TRUE
12. FALSE—APB Opinion No. 12, *Omnibus Opinion—1967*, only requires disclosure of a change in capital.
13. FALSE—Although, generally, SSARS does not require any specific documentation in a compilation engagement, SSARS No. 1 requires that the understanding with the entity (engagement letter) be documented in a management-use-only compilation.
14. *b*—A written engagement letter is not required in a review engagement—only an understanding with the entity—and this understanding does not have to be documented.
15. *d*
16. *d*
17. *a*
18. TRUE—FASB Statement No. 142 does not permit amortization of goodwill.
19. TRUE
20. *d*

Appendix A

Bookkeeping Services—Illustrative Engagement Letter

[Appropriate Salutation]

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. So that I (we) can meet your expectations related to the services I (we will provide, this engagement letter clearly identifies both the services that will be provided and the frequency with which these services will be provided.

I (We) will prepare semimonthly payroll checks and compute required withholdings based on hours worked, rates of pay, tax jurisdictions, and withholding information provided by you or your representative. You will need to review all payroll checks prior to signing them, and notify us promptly of any errors. I (We) will notify you of required payroll tax deposits. Failure to make these deposits on a timely basis will subject you to penalties and interest.

I (We) will prepare quarterly and annual payroll tax returns, as well as your annual 1099 forms. You will need to review the returns prior to signing them, and notify us promptly of any errors or omissions.

Any significant changes in the number of employees, various miscellaneous deductions, or other items involved could cause an increase in my (our) fees. I (We) also require that you provide complete information in good “working order” for me (us), with checks and deposits coded to the proper accounts. I (We) will discuss with you in advance any proposed increase in our fees.

I (We) will also assist you with various bookkeeping functions, including consultation on recordkeeping, recording of transactions, and periodic adjustments, among others.

My (Our) work in connection with this engagement is not intended to result in the submission or issuance of financial statements by [Firm] as defined by Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A submission of financial statements, as defined by professional standards, requires that the CPA present to a client or third parties financial statements that the CPA has prepared manually or through the use of computer software. By your signature below, you understand that the submission of financial statements as defined above is outside the scope of this engagement.

Should you require financial statements (either for management use or third-party use), I (We) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors that come to my (our) attention and any fraud or illegal acts that come to our attention, unless they are clearly inconsequential.

I (We) appreciate the opportunity to be of service to you and believe that this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let me (us) know. If the foregoing terms are in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).

Sincerely yours,

[Signature of accountant]

Accepted and agreed to:

XYZ Company

AAM Section 8030

Health Care Industry Developments—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your health care industry audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the health care industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010]. You should refer to the full text of the accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this Alert.

Economic and Industry Developments

.04 Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311), among other matters, provides guidance for auditors regarding the specific procedures that should be considered in planning an audit in accordance with generally accepted auditing standards (GAAS). SAS No. 22 states that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics, and consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit.

Economic Developments

.05 For a thorough discussion of the economic and business environment, see the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Economic News

.06 Health care organizations operated and invested through the first three quarters of 2002 in an economy recovering from the recession experienced in 2001. The economic word for 2001 was *uncertain* and that continues to hold true for 2002. The current mix of opposing trends—solid demand, but no strong pickup in jobs—stems partly from the nature of this business cycle. In other words, mild recoveries tend to follow mild recessions.

.07 Some matters in the forefront during the first three quarters of 2002 were allegations of fraudulent financial reporting, employee layoffs, increased government regulation and security procedures resulting from terrorism concerns, and weak corporate profits reported in some business sectors. Also, consumer spending has remained strong through the first half and into the third quarter of 2002. Interest rates have

remained low. Following a number of cuts by the Federal Reserve Board in 2001, the federal funds rate stayed at 1.75 percent through much of 2002, until the rate was cut again in November 2002 to 1.25 percent. Activity in the U.S. equities markets through the first three quarters of 2002 was volatile. The Dow Jones Industrial Average, Standard and Poor's 500 Index, and National Association of Securities Dealers Automated Quotation continued their declines of the two previous years.

Third-Party Payers

Federal and State Health Care Programs

.08 Many entities in the health care industry derive their revenues from payment arrangements with third-party payers. These third-party payers frequently include federal and state health care programs. Patient revenues received from these programs continue to be affected by new rules that change the methodologies for determining payments for services and products. These new rules include changes from cost-based reimbursement to prospective payment systems (PPS), as well as changes to fee reimbursement schedules for health care services. The Centers for Medicare and Medicaid Services (CMS) in recent years has published final rules that establish new PPS for Medicare outpatient services, home health care agencies, inpatient rehabilitation facilities, and, most recently, long-term care hospitals. (See the related discussion "Prospective Payment Systems" in the "Regulatory Developments" section of this Alert.)

.09 Auditors of health care organizations that will be affected by new or revised PPS rules may want to consider whether these changes in payment regulations may create any incentive for clients to look for inappropriate methods of maximizing income, and whether management has adopted appropriate revenue recognition policies. Auditors need to pay attention to warning signals that may indicate increased audit risk with respect to revenue recognition and respond with appropriate professional skepticism and additional audit procedures.

.10 Statement of Position (SOP) 00-1, *Auditing Health Care Third-Party Revenues and Related Receivables*, is a source of guidance to auditors of health care organizations regarding uncertainties inherent in health care third-party revenue recognition. This SOP discusses auditing matters to consider in testing third-party revenues and related receivables, and provides guidance regarding the sufficiency of evidential matter and reporting on financial statements of health care organizations exposed to material uncertainties.

Managed Care

.11 The use of managed care organizations as a means of controlling rapidly rising health care costs has slowed. Medicare+Choice plans allow Medicare program beneficiaries to participate in managed care plans. In 2002, a number of Medicare program beneficiaries enrolled in these plans were affected by the decisions of managed care companies to drop their coverage of Medicare plans.

.12 Auditors may need to consider the financial statement impact of new contracts executed between hospitals and other providers of health care services and managed care organizations, and between managed care organizations and members. Chapter 13 in the Audit and Accounting Guide *Health Care Organizations* provides guidance on applying generally accepted accounting principles (GAAP) to providers of prepaid health care services for the accounting and reporting of health care costs, contract losses (premium deficiencies), stop-loss insurance (reinsurance), and contract acquisition costs.

Rising Cost of Health Care Products and Services

.13 The cost of health care in the United States is rising at rates higher than those seen in recent years. Health care organizations are providing expanded and sometimes higher-cost alternatives to existing health care products. Many health care organizations are incurring additional costs for regulatory compliance. The demand for health care products and services, such as prescription drugs and hospital services, remains strong as the baby boomer segment of the U.S. population continues to age.

Information Technology

.14 Health care organizations use information technology (IT) for communicating health information to patients and maintaining patient medical records, among other things. However, for the most part, the health care industry has lagged behind other industries in its use of IT. A number of health care organizations have undertaken projects to expand their use of IT, such as projects involving the transmission of patient billing information electronically, or the electronic maintenance of patient medical records, sometimes for viewing by the patients or by physicians at other locations. When health care organizations undertake certain projects to expand their use of IT, they must consider whether compliance is required with certain regulations. These regulations include the Health Insurance Portability and Accountability Act (HIPAA) Administrative Simplification provision rules for privacy of medical information, and for submitting claims electronically. (See the related discussion “The Health Insurance Portability and Accountability Act of 1996” in the “Regulatory Developments” section of this Alert.)

Staffing

.15 While a number of entities in other industries have reported employee layoffs, the health care industry in general continues to provide job opportunities, as the hiring and retention of staff, in particular, professional nursing staff, continues to be a focus for many health care organizations. Shortages of qualified nursing staff in many areas have resulted in some health care organizations hiring agency nurses to fill vacancies, a practice that can lead to increases in personnel costs. Some health care organizations, however, continue to use staffing cuts as a cost saving measure. Staffing cuts may also result when programs and services are eliminated at the health care organization.

Pension Benefits

.16 Compensation and benefit costs, including pension benefit costs, can be significant to the financial statements of health care organizations. As a result of the sustained downturn in the markets, health care organizations may be reexamining and revising their pension earning assumptions downward. Downward revisions in pension earning assumptions and a resulting increase in pension expense may have a material affect on the health care organization’s operating results, liquidity, or capital resources.

.17 Also, health care organizations may be recording a minimum pension liability for the first time in recent years. As a reminder, paragraph 10.18 in the Audit and Accounting Guide *Health Care Organizations* provides guidance on the items that should be reported separately from the performance indicator in the statement of operations of not-for-profit health care organizations. This includes other items that are required by GAAP to be reported separately, such as minimum pension liabilities in accordance with paragraph 37 of Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 87, *Employers’ Accounting for Pensions*.

Insurance Coverage

.18 Many health care organizations are facing steep increases in premiums from malpractice or property and casualty insurers, along with more restrictive terms and conditions, and policies that are not renewed. Meanwhile, some insurers have failed in, or withdrawn from, certain market segments, raising concerns about the financial viability of some insurance carriers.

.19 Health care organizations facing premium increases, concerns about the viability of the insurer, or policies that are not renewed, may be reevaluating their insurance coverage. Health care organizations may be opting to increase deductibles in order to reduce costs, or may increase the extent of risk retained as a result of changes in policy terms. There may also be significant changes in assessing the extent of risk retained due to changes in the types of insurance coverage used. Auditors should consider the effect of these insurance coverage issues when conducting audits of health care organizations.

Regulatory Developments¹

.20 This section of the Alert provides brief summaries of some of the regulations issued and regulatory publications released since the writing of last year's Alert that may affect your clients in the health care industry. Brief discussions about certain regulations discussed in last year's Alert that have effective or compliance dates in 2002 or 2003 are also included.

.21 Auditors may need to monitor changes in government regulations for various reasons. For example, new regulations requiring prospective payment systems directly affect the recognition of patient revenues. Also, health care organizations that are providers of services to patients covered under Medicare or other federal health care programs have potential exposure to fines and penalties as a result of laws and regulations governing the billing and cost-reporting process. As another example, auditors of health care organizations may be required to comply with government auditing standards, as specified in the *Government Auditing Standards* (also referred to as the Yellow Book).

.22 As discussed in paragraphs 2.41 and 2.42 of the Audit and Accounting Guide *Health Care Organizations*, there are certain laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of amounts in financial statements of health care organizations, including tax laws affecting tax accruals and tax expense, as well as Medicare and Medicaid laws directly affecting the amount of revenue recognized during the accounting period. Other laws and regulations relate more to the health care organization's operating aspects than to its financial and accounting aspects, and the financial statement effect is indirect.

The Health Insurance Portability and Accountability Act of 1996

.23 The Administrative Simplification provisions of HIPAA require the U.S. Department of Health and Human Services (HHS) to adopt national standards for electronic health care transactions; unique identifiers for employers, providers, and health plans; and security and privacy standards for health information. Health care organizations are implementing final rules that HHS has issued to address certain Administrative Simplification provisions.

.24 Additional information on HIPAA is available on the HHS Web site, www.hhs.gov. Also, see the related discussion "Implementing Health Insurance Portability and Accountability Act Requirements" in the "Audit Issues and Developments" section of this Alert.

Standards for Privacy of Individually Identifiable Health Information

.25 As discussed in last year's Alert, HHS published a final rule with standards for privacy of individually identifiable health information. This rule applies to health plans, health care clearinghouses, and those health care providers that conduct certain financial and administrative transactions electronically (covered entities). This rule's "Business Associates" section includes guidance for a covered entity's responsibilities when engaging others to perform essential functions or services for them. Health plans other than small health plans, health care clearinghouses, and health care providers who conduct certain financial and administrative transactions electronically have until April 14, 2003, to comply. Small health plans have until April 14, 2004, to comply. The final rule was published in the December 28, 2000, *Federal Register*.

.26 Also, in the August 14, 2002, *Federal Register*, HHS published modifications to the privacy regulations. Among the modifications, covered entities (except for small health plans) are given up to an additional year

¹ Readers should be alert for updates, amendments, or other changes to the rules discussed in this section of the Alert and other recent developments related to regulatory activities. The brief summaries provided in this section of the Alert are for informational purposes only. Readers should refer to the full text of the regulations and other documents that are discussed in this section of the Alert. See the "Information Sources" section at the end of this Alert for a list of some Web sites that can provide additional information on regulatory issues and developments.

to change existing written contracts to comply with the rule's business associates requirements. HHS also provided sample business associate contract provisions.

Standards for Electronic Transactions

.27 Also discussed in last year's Alert was the HHS rule that established standard data content and formats for submitting electronic claims and other administrative health transactions. The final rule, published in the August 17, 2000, *Federal Register*, contains the requirements concerning the use of these standards by private and government sector health plans, health care clearinghouses, and certain health care providers. Small health plans have until October 16, 2003, to comply. Health plans other than small health plans, health care clearinghouses, and health care providers that choose to transmit their transactions in electronic form, were required to comply no later than October 16, 2002. In December 2001, however, Congress adopted legislation allowing most covered entities to obtain an extension of one year, to October 16, 2003, to comply with the standards.

Employer Identifier

.28 HHS issued a final rule, published in the May 31, 2002, *Federal Register*, that adopts the employer identification number issued by the Internal Revenue Service (IRS) as the National Employer Identifier in the health care industry. In general, covered entities have until July 30, 2004, to comply. Small health plans have until August 1, 2005, to comply.

Prospective Payment Systems

Inpatient Rehabilitation Facilities

.29 As discussed in last year's Alert, the CMS final rule for inpatient rehabilitation facility PPS was published in the August 7, 2001, *Federal Register*. The inpatient rehabilitation facility PPS replaces an existing cost-based payment system. Among the principal features of this PPS, rehabilitation facilities are to be paid for Medicare patients on a per-discharge basis, similar to acute care hospitals. This PPS rule took effect for inpatient rehabilitation facilities with cost reporting periods beginning on January 1, 2002.

.30 Inpatient rehabilitation facilities could elect how they will transition into the PPS over a one-year period, either by being paid based on a blended rate, consisting of a mix of the rates paid under the old and new systems, or by being paid at full PPS rates.

Long-Term Care Hospitals

.31 The CMS final rule for long-term care hospitals PPS was published in the August 30, 2002, *Federal Register*. The long-term care hospitals PPS replaces the existing cost-based payment system. Among the features of this PPS, long-term care hospitals are to be paid for Medicare patients at a per-discharge amount. Long-term care hospitals are defined as having an average inpatient length of stay greater than 25 days. A five-year transition period has been implemented to phase-in this PPS for long-term care hospitals. The long-term care hospital may elect to exercise a one-time opportunity to be paid based on 100 percent of the federal rate for cost reporting periods beginning on or after October 1, 2002.

Physicians' Referrals to Health Care Entities With Which They Have Financial Relationships

.32 As discussed in last year's Alert, CMS published a final rule entitled "Medicare and Medicaid Programs; Physicians' Referrals to Health Care Entities With Which They Have Financial Relationships" in the January 4, 2001, *Federal Register*. This rule was effective January 4, 2002. In the December 3, 2001, *Federal Register*, CMS published an interim final rule with comment period that delays for one year, until January 6,

2003, the effective date of the last sentence of Section 411.354(d)(1) of the final rule. In the November 22, 2002, *Federal Register*, CMS published a final rule that further postpones, for an additional six months, until July 7, 2003, the effective date of the last sentence of Section 411.354(d)(1).

Corporate Compliance

.33 Compliance plans are voluntary for health care organizations unless imposed under a corporate integrity agreement by the HHS Office of Inspector General (OIG). The OIG has issued compliance program guidance in previous years for:

- Clinical laboratories
- Hospitals
- Home health agencies
- Third-party medical billing companies
- Hospices
- The durable medical equipment, prosthetics, orthotics, and supply industry
- Medicare+Choice organizations
- Nursing facilities
- Individual and small group physician practices

In 2002, the OIG released “Draft Compliance Program Guidance for Ambulance Suppliers,” “Draft Compliance Program Guidance for Pharmaceutical Manufacturers,” and “Solicitation of Information and Recommendations for Revising the Compliance Program Guidance for the Hospital Industry.” You can get these releases and the full text of the OIG compliance program guidance, as well as information on any compliance guidance issued subsequent to the writing of this Alert, on the OIG Web site, www.oig.hhs.gov/.

Circular A-133 Audit Guidance Update

2002 Compliance Supplement Issued

.34 The Office of Management and Budget (OMB) Circular A-133 *Compliance Supplement* (the Supplement) is based on the requirements of the Single Audit Act Amendments of 1996 and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133). Those requirements provide for the issuance of a compliance supplement to assist auditors in planning and performing the required audits. The Supplement identifies existing compliance requirements that the federal government expects to be considered as part of an audit in accordance with the Single Audit Act Amendments of 1996 and Circular A-133, and use of the Supplement is mandatory.

.35 The OMB issued its 2002 Supplement in March 2002. The 2002 Supplement is effective for audits of fiscal years beginning after June 30, 2001. Appendix V of the Supplement lists changes from the 2001 Supplement.

Circular A-133 Audit Reviews

.36 To obtain more information about the Circular A-133 audits of the grants they administer, many federal OIGs and state-level agencies with oversight responsibilities for Circular A-133 audits are increasing their scrutiny of completed audits through desk reviews, quality control reviews, and other types of examinations. Those reviews and peer reviews of single audit engagements have identified a range of audit problems.

.37 The AICPA has published a new Audit Risk Alert, *Single Audits—2002* [AAM section 8220], as a complement to SOP 98-3, *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*.² This new Audit Risk Alert is intended to provide auditors of organizations receiving federal awards with an overview of recent industry, regulatory, and professional developments that may affect the audits they perform. Among other things, it includes a discussion of common engagement deficiencies noted in peer reviews and ethics investigations, a summary of audit deficiencies found by various federal agency OIGs, audit refresher information on determining major programs and auditors' responsibility for internal control, and the latest on Federal Audit Clearinghouse data collection form submissions.

Government Auditing Standards

.38 The Government Accounting Office (GAO) 1994 *Government Auditing Standards* (GAS) or Yellow Book, as amended, is the set of standards for audits you should follow when so required by law, regulation, agreement, contract, or policy. The Yellow Book standards are an integral part of the requirements for a Circular A-133 audit.

Help Desk—The Yellow Book documents discussed in this section are available on the GAO's Web site at www.gao.gov/govaud/ybk01.htm.

Independence Requirements

.39 In January 2002, the GAO made significant changes to the Yellow Book's auditor independence requirements. Amendment No. 3, *Independence*, establishes independence standards for CPAs, non-CPAs, government auditors, and performance auditors. It deals with a range of auditor independence issues, including restrictions on nonaudit services. It affects a significant number of audits, applying to auditors of federal, state, and local governments as well as not-for-profit and for-profit recipients of federal (and some state) grants and loans.

.40 **Topics Addressed.** Amendment No. 3 addresses when auditors and their organizations are independent from the organizations they audit by defining when personal, external, and organizational impairments to independence exist. The amendment applies not only to auditors but also to specialists—such as actuaries, appraisers, and attorneys—whose work is used in an audit and which the amendment defines as members of the audit team. If an audit organization is not independent, the amendment states that the auditor should (1) decline to perform the work or (2) report the impairment in the scope section of the auditor's report when a government auditor cannot decline to perform the work because of a legislative requirement or for other reasons.

.41 Like the AICPA's Code of Professional Conduct, Amendment No. 3 adopts an engagement-team-focused approach to independence for matters such as financial interests of an individual auditor. It requires that audit organizations' internal quality control systems identify impairments to independence and determine compliance with Yellow Book independence requirements. Amendment No. 3 provides criteria for when governmental audit organizations are organizationally independent from the audited entity for purposes of external and internal reporting, expanding the previous criteria for when such organizations are independent for external reporting purposes.

.42 Amendment No. 3 employs a principles-based approach to independence supplemented with certain safeguards for matters such as the performance of nonaudit services. With respect to nonaudit services, the Yellow Book rule is more restrictive than the AICPA rule because it prohibits an auditor from providing nonaudit services (except for routine advice or activities) when those services are significant or material to

² Statement of Position (SOP) 98-3, *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*, is updated annually with conforming changes. SOP 98-3 is available in the AICPA publication *Technical Practice Aids*, and is also included as an appendix to the Audit and Accounting Guides *Audits of State and Local Governmental Units* (Non-GASB 34 Edition), *Audits of State and Local Governments* (GASB 34 Edition), and *Not-for-Profit Organizations*.

the subject matter of the audit. When the nonaudit service is not significant or material to the subject matter of the audit, specific safeguards are required, including a requirement for a separate engagement team to perform the service. The amendment's provisions relating to nonaudit services have the potential to significantly change auditor-client relationships.

.43 The standard for nonaudit services employs two overarching principles:

1. Audit organizations should not provide nonaudit services that involve performing management functions or making management decisions; and
2. Audit organizations should not audit their own work or provide nonaudit services in situations where the nonaudit services are significant or material to the subject matter of the audits.

.44 Audit organizations may perform nonaudit services that do not violate the above principles only if all of the following seven safeguards are followed:

1. The audit organization should preclude personnel who provided the nonaudit services from planning, conducting, or reviewing audit work related to the nonaudit service.
2. The audit organization is precluded from reducing the scope and extent of the audit work beyond the level that would be appropriate if another unrelated party performed the nonaudit work.
3. The audit organization should document its consideration of the nonaudit service, and document its rationale that providing the nonaudit service does not violate the two overarching principles.
4. Before performing nonaudit services, the audit organization should establish and document an understanding with the audited entity regarding the objectives, scope of work, and product or deliverables of the nonaudit service. The audit organization should also establish and document an understanding with management that management is responsible for the substantive outcomes of the work.
5. The audit organization's quality control systems for compliance with independence requirements should include policies and procedures to assure consideration of the effect on the ongoing, planned, and future audits when deciding whether to provide nonaudit services and a requirement to have the understanding with management of the audited entity documented. The understanding should be communicated to management in writing. Documentation must specify management's responsibility for the nonaudit service, management's qualifications to conduct the required oversight, and that management's responsibilities were performed.
6. In cases where certain nonaudit services by their nature impair the audit organization's ability to meet either or both of the overarching principles for certain types of audit work, the audit organization should communicate to management of the audited entity, before performing the nonaudit service, that the audit organization would not be able to perform subsequent audit work related to the subject matter of the nonaudit service.
7. For audits selected in the peer review, all related nonaudit services should be identified to the audit organization's peer reviewer and the audit documentation made available for peer review.

Help Desk—The AICPA has developed a fact sheet on Amendment No. 3 that discusses its provisions, including nonaudit services that may be performed and those that are expressly prohibited. In addition, the AICPA has developed a comparison of the AICPA and Yellow Book independence requirements. Both those documents, which are on the AICPA Web site at www.aicpa.org/members/div/ethics/index.htm, explain the differences between the Yellow Book and the AICPA independence requirements in general and for the following nonaudit services: bookkeeping, payroll, tax, human resources, information technology, appraisal or valuation, indirect cost proposal or cost allocation plans, legislative and administrative decision-making, internal control self-assessments, and assisting legislative bodies.

.45 The GAO has released additional guidance on the auditor independence requirements under GAS. *Government Auditing Standards—Answers to Independence Standard Questions* is available on the GAO Web site at www.gao.gov/govaud/ybk01.htm. Also, in that guidance, the GAO extended the effective date of Amendment 3 from all Yellow Book audits for periods beginning on or after October 1, 2002, to all Yellow Book audits for periods beginning on or after January 1, 2003.

Proposed 2002 Revision to Government Auditing Standards

.46 In January 2002 the GAO issued an exposure draft, *Government Auditing Standards: 2002 Revision*. The exposure draft proposes revisions to all chapters of the Yellow Book, including those relating to both financial and performance audits. The exposure draft does not address auditor independence (which was recently addressed in Amendment No. 3, discussed earlier in this section of the Alert). Among other matters, the proposed revisions are intended to clarify the types of audits and services that are performed under the Yellow Book, to strengthen and streamline certain provisions of it, and to improve understandability of the GAS. As of the writing of this Alert, the GAO staff is estimating a spring 2003 issuance date for a final document.

Internal Revenue Service Developments

Intermediate Sanctions—Final Regulations

.47 The IRS has issued final regulations for intermediate sanctions designed to protect donors and charities from insider dealing and excessive compensation for executives. The rules gave the IRS a tool to regulate the activities of exempt organizations, with or without revoking the organization's exempt status. The temporary rules were discussed in last year's Alert. The final regulations differ slightly from the temporary rules. The effective and applicability dates of the final regulations are January 23, 2002.

.48 Not-for-profit organizations must continue to document how and why they compensate CFOs, CEOs, or others with significant power over an organization. The law not only targets top executives but also their family members and family-controlled entities in which there is a combined ownership interest of more than 35 percent if any receives excess benefits. Penalties will be imposed on any transaction that provides excess economic benefits to a disqualified person (that is, a person in a position to exercise substantial power over the affairs of a public charity or social welfare organization). Penalties will also be imposed on transactions involving excessive compensation for executives. The ultimate penalty is revocation of the not-for-profit organization exempt status.

.49 There is a five-year look-back period starting with the transaction date. This means that the IRS can look back five years from the date the executive received the excess benefit and impose the tax if he or she was a disqualified person at any time during this period. A parallel five-year look-back rule applies in determining qualifying organizations. If an entity was a section 501(c)(3) or 501(c)(4) organization at any time within the five years before the transaction date, section 4958(e) considers it a qualifying organization.

.50 **Exceptions.** There are several exceptions to the section 4958 rules, including a binding contract exception as well as an initial contract exception.

.51 **Donor-Advised Funds.** The final regulations do not adopt a special rule regarding any donor or adviser to a donor-advised fund; consequently, the general rule will apply to determine whether a donor is a disqualified person.

.52 **Managers Shield Expanded.** An excise tax equal to 10 percent of the excess benefit may be imposed on the participation of an organization manager in an excess benefit transaction between an applicable tax-exempt organization and a disqualified person. This tax, which may not exceed \$10,000 with respect to any single transaction, is only imposed if the 25 percent tax is imposed on the disqualified person, the organization manager knowingly participated in the transaction, and the manager's participation was willful

and not the result of reasonable cause. There is also joint and several liability on this tax. A person may be liable for both the tax paid by the disqualified person and this organization manager tax in appropriate circumstances.

.53 The final regulations add to the means by which organization managers can protect themselves from such tax. Protection starts with making a decision as to whether an individual is an organization manager. An organization manager is any officer, director, or trustee of an applicable tax-exempt organization, or any individual having powers or responsibilities similar to those of the officers, directors, or trustees of the organization, regardless of title. An organization manager is not considered to have participated in an excess benefit transaction if the manager has opposed the transaction in a manner consistent with the fulfillment of the manager's responsibilities to the organization. For example, a director who votes against giving an excess benefit would ordinarily not be subject to this tax.

.54 A manager's participation in a transaction will not be considered knowing whether the organization's board has satisfied the requirements of the rebuttable presumption of reasonableness for the transaction as discussed in the final regulations. A manager is protected as well if he or she relies on a professional's reasoned written opinion on matters within the professional's expertise that concludes, based on a full disclosure of all the facts, that an excess benefit transaction has not occurred.

.55 *Disregarded Benefits Rule Broadened.* This rule addresses the final regulations added to the economic benefits, which are to be disregarded in determining whether an excess benefit transaction has occurred, including employee expense reimbursements paid under an accountable plan. A plan is an accountable plan if (a) the reimbursement is for ordinary and necessary business expenses; (b) the employee substantiates the expenses reimbursed within a reasonable period of time; and (c) the employee must return the unsubstantiated portion of the reimbursement.

.56 *Section 4958 Does Not Replace Revocation of Exemption.* Section 4958 does not affect the substantive standards for tax exemption under sections 501(c)(3) and 501(c)(4), including the requirements that the organization be organized and operated exclusively for exempt purposes, and that no part of its net earnings inure to the benefit of any private shareholder or individual. In most cases, the imposition of this intermediate sanction will be in lieu of revocation. The IRS has indicated that the following four factors will be considered in determining whether to revoke an applicable tax-exempt organization's exemption status if an excess benefit transaction has occurred. The four factors are:

1. Whether the organization has been involved in repeat excess benefit transactions.
2. The size and scope of the excess benefit transaction.
3. Whether, after concluding that it has been party to an excess benefit transaction, the organization has implemented safeguards to prevent future recurrences.
4. Whether there was compliance with other applicable laws.

.57 *Rebuttable Presumption Procedure.* The regulations contain a procedure for ensuring that all top officials are in full compliance, and thus not liable for the taxes. The procedure is called creating a "rebuttable presumption of reasonableness." The procedure is *not required*, but is potentially advantageous to all persons covered by the regulations.

Acquisition Financing Bond Transactions

.58 Auditors of health care organization clients that may have or may be contemplating acquisition financing bond transactions involving hospital mergers should note that in April 2002, the IRS published proposed regulations regarding the issuance of such debt. Simultaneously with the publication of the proposed rules, the IRS released a separate voluntary settlement agreement that would allow systems that have already merged using acquisition financing debt that is deemed not to be in compliance with the tax code to repay a percentage of their arbitrage profits and avoid having their bonds declared taxable.

Audit Issues and Developments³

The Sarbanes-Oxley Act of 2002

.59 The Sarbanes-Oxley Act of 2002, signed into law on July 30, 2002, is the most significant legislation affecting the accounting profession since 1933. A more detailed discussion of the Sarbanes-Oxley Act of 2002 can be found in the general *Audit Risk Alert—2002/03* [AAM section 8010]. Also, the AICPA has a new hotline to help members with questions about the Sarbanes-Oxley Act of 2002, how it will be implemented, and how to comply. Call (866) 265-1977. The hotline will remain in operation for the remainder of 2002.

Implementing Health Insurance Portability and Accountability Act Requirements

.60 A number of health care organizations will be focusing on implementing HHS rules that address the Administrative Simplification provisions of HIPAA. (See the related discussion “The Health Insurance Portability and Accountability Act of 1996” in the “Regulatory Developments” section of this Alert.) Compliance with these rules will require a multiyear effort with the potential for significant resource outlays, including major changes for processing. Noncompliance with HIPAA Administrative Simplification provision rules can subject affected health care organizations to civil and criminal penalties. Also, health care organizations that are unable to comply with the required deadlines for submission of electronic claims in the HIPAA required format may find such claims rejected by third-party payers.

.61 Health care organizations may have implemented, and may be continuing to implement, system changes necessary to accommodate the Administrative Simplification provision rules. Auditors should be alert for risks relevant to financial reporting that can arise or change due to, for example, new systems or system changes. SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, provides guidance on the independent auditor’s consideration of an entity’s internal control in an audit of financial statements in accordance with GAAS. SAS No. 55, as amended, among other matters, states that risks relevant to financial reporting include internal and external events and circumstances that may occur and adversely affect an entity’s ability to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements. Risks can arise or change due to circumstances, such as, among other things, changes in the regulatory or operating environment and new or revamped information systems.

.62 Auditors of a health care organization should consider their client’s preparations for compliance with the HIPAA Administrative Simplification provision rules and be alert for any conditions or events which, when considered in the aggregate, indicate there could be substantial doubt about the client’s ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statements being audited. The significance of such conditions and events will depend on the circumstances, and some may have significance only when viewed in conjunction with others. See the discussion “Going Concern Considerations” in this section of the Alert for a discussion about the guidance in SAS No. 59, *The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341).

.63 Implementing regulations such as the rules issued to address the HIPAA Administrative Simplification provisions may result in increases in certain expense categories. The auditor should consider this when designing and performing analytical procedures in financial statement audits conducted in accordance with GAAS. SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329) provides guidance on the use of analytical procedures.

.64 Also, the AICPA has published a technical practice aid (TPA) that provides nonauthoritative guidance on accounting by health care organizations for costs associated with upgrading and improving

³ Readers should refer to the full text of the laws, regulations, auditing and accounting standards, and other pronouncements that are discussed in this section of the Audit Risk Alert.

computer systems to comply with HIPAA. See the discussion “Accounting for Computer Systems Costs Incurred in Connection With the Health Insurance Portability and Accountability Act of 1996” in the “New Accounting Pronouncements and Other Guidance” section of this Alert.

.65 As noted previously in the discussion “Standards for Privacy of Individually Identifiable Health Information” in the “Regulatory Developments” section of this Alert, HHS published a final rule with standards for privacy of individually identifiable health information. This rule’s “Business Associates” section includes guidance for a covered entity’s responsibilities when engaging others to perform essential functions or services. Covered entities are required to execute agreements with business associates to ensure the business associates protect the privacy of health information. Auditors of health care organizations that are covered entities may be considered business associates.

.66 Auditors should consider the effect of the final rule and the rule’s business associates provisions on the audit. For example, SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) states that the auditor should prepare and maintain audit documentation, the form and content of which should be designed to meet the circumstances of the particular audit engagement. The quantity, type, and content of audit documentation are matters of the auditor’s professional judgment. If the health care organization client refuses to share information with its auditor due to concerns over violating privacy regulations, the auditor should consider whether the inability to obtain information as a result of the refusal by the client constitutes a scope limitation on the audit. As discussed in SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508), as amended, restrictions on the scope of the audit, whether imposed by the client or by circumstances, such as the inability to obtain sufficient competent evidential matter, may require the auditor to qualify his or her opinion or to disclaim an opinion. In such instances, the reasons for the auditor’s qualification of opinion or disclaimer of opinion should be described in the report.

Auditing and Accounting Guidance for Investments

.67 Health care organizations, like organizations in other industries, have been investing in markets and in a business environment that during the past year have seen periods of significant volatility, declines in corporate profitability, and ratings downgrades for a number of companies. Auditors should consider whether their health care organization clients may have invested in debt or equity instruments of companies that have potential for declines in value, including an other than temporary decline in value.

Not-for-Profit Health Care Organizations

.68 Not-for-profit health care organizations should consider the guidance in FASB Statement No. 124, *Accounting for Certain Investments in Held by Not-for-Profit Organizations*. FASB Statement No. 124 requires that investments in equity securities with readily determinable fair values and all investments in debt securities be reported at fair value with gains and losses included in a statement of activities. FASB Statement No. 124 does not include within its scope investments in equity securities that are accounted for under the equity method, investments in consolidated subsidiaries, or investments in derivative instruments that are subject to the requirements of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. FASB Statement No. 124 also includes disclosure requirements.

.69 Chapter 4 in the Audit and Accounting Guide *Health Care Organizations* also includes guidance about the reporting of investments by not-for-profit health care organizations, including the classification of investment return. A discussion of some of the guidance presented in chapter 4 follows.

.70 Investment return (including realized and unrealized gains and losses) not restricted by donors or by law should be classified as changes in unrestricted net assets as follows:

- Included in the performance indicator:

- Dividend, interest, and other similar investment income
- Realized gains and losses
- Unrealized gains and losses on trading securities⁴
- Other than temporary impairment losses
- Excluded from the performance indicator:
 - Unrealized gains and losses on other than trading securities

.71 You can find a discussion about the performance indicator in the section “Financial Statement Presentation” in chapter 10 of the Guide.

.72 Gains and investment income that are limited to specific uses by donor-imposed restrictions may be reported as increases in unrestricted net assets if the restrictions are met in the same reporting period as the gains and income are recognized, provided that the organization has a similar policy for reporting contributions received, applies the policy consistently from period to period, and discloses its accounting policy. The classification of these gains and investment income in unrestricted net assets should be consistent with the preceding paragraph.

.73 In the absence of donor stipulations or law to the contrary, losses on the investments of a donor-restricted endowment fund shall reduce temporarily restricted net assets to the extent that donor-imposed temporary restrictions on net appreciation of the fund have not been met before the loss occurs. Any remaining loss shall reduce unrestricted net assets and shall be excluded from the determination of the performance indicator. If losses reduce the assets of a donor-restricted endowment fund below the level required by the donor stipulations or law, gains that restore the fair value of the assets of the endowment fund to the required level shall be classified as increases in unrestricted net assets and shall be excluded from the determination of the performance indicator.

.74 Except as described in the two preceding paragraphs, investment return (including realized and unrealized gains and losses) restricted by donors or by law, should be classified as changes in temporarily or permanently restricted net assets consistent with the applicable restrictions.

Investor-Owned Health Care Organizations

.75 Investor-owned health care organizations are subject to the accounting, reporting, and disclosure requirements of FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. FASB Statement No. 115 defines three categories into which an enterprise classifies investments:

- *Held-to-maturity.* These investments are reported at amortized cost.
- *Trading securities.* These investments are reported at fair value, with unrealized holding gains and losses included in income.
- *Available-for-sale.* These investments are reported at fair value with unrealized holding gains and losses excluded from income and reported in a separate component of other comprehensive income until realized, except all or a portion of the unrealized holding gain and loss of an available-for-sale security that is designated as being hedged in a fair value hedge shall be recognized in earnings during the period of the hedge.

.76 FASB Statement No. 115 also states that for individual securities classified as either available-for-sale or held-to-maturity, an enterprise shall determine whether a decline in fair value below the amortized cost

⁴ Trading securities are defined in FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, including any interpretations thereof.

basis is other than temporary. If the decline in fair value is judged to be other than temporary, the cost basis of the individual security shall be written down to fair value as a new cost basis and the amount of the write-down shall be included in earnings (that is, accounted for as a realized loss). The new cost basis shall not be changed for subsequent recoveries in fair value.

.77 Appendix B, “Additional Guidance on Impairment of Securities,” of the FASB Special Report *A Guide to Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities*, includes the Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 59, *Accounting for Noncurrent Marketable Equity Securities*. SAB No. 59 provides examples of factors that, individually or in combination, indicate that a decline is other than temporary and that a write-down of the carrying value is required. These factors are:

- The length of time and the extent to which the market value has been less than cost.
- The financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings potential.
- The intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

.78 Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, provides that declines in the value of investments that are accounted for using the equity method be recognized if the declines in value are other than temporary.⁵

.79 Also, see chapter 4 of the Audit and Accounting Guide *Health Care Organizations* for further discussion about the accounting and reporting requirements for investments.

Auditing Guidance

.80 Audit guidance for auditing investments is available in SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), and in the Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

.81 SAS No. 92 includes a discussion of impairment losses that states that determinations of whether losses are other than temporary often involve estimating the outcome of future events. Accordingly, judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors:

- Fair value is significantly below cost and:
 - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
 - The decline has existed for an extended period of time.
 - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.

⁵ See paragraph 1.30 and Appendix A to chapter 1 of the Audit and Accounting Guide *Health Care Organizations* for information about the applicability of APB Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, as amended, to not-for-profit organizations.

- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

.82 Subsequent to the balance sheet date but prior to the issuance of the financial statements, an event may occur (for example, further decline in fair value, or ratings downgrade) that would provide evidence a decline in fair value is other than temporary. Auditors should refer to SAS No. 1, section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1, AU sec. 560), for guidance on auditor's procedures relating to subsequent events. Two types of subsequent events require consideration by management of the health care organization and evaluation by the independent auditor: an event that provides additional evidence with respect to conditions that existed at the date of the balance sheet being reported on, or an event that provides evidence with respect to conditions that did not exist at the date of the balance sheet being reported on but arose subsequent to that date. If the event provides additional evidence with respect to the investment being other than temporarily impaired at the balance-sheet date, the financial statements should be adjusted. If the event provides evidence that the investment was not other than temporarily impaired at the date of the balance sheet being reported on but arose subsequent to that date, the health care organization needs to consider whether the event may be of such a nature that disclosure of the event is required to keep the financial statements from being misleading.

.83 Auditors should also consider the need for using the work of a specialist for valuation of complex financial instruments. SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336), can be useful in providing guidance to auditors who use the work of a specialist in performing an audit in accordance with GAAS.

Going Concern Considerations

.84 Remember to consider the guidance in SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*. Among other matters, SAS No. 59 provides guidance on (1) the auditor's evaluation of whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements that are being audited, (2) the adequacy of financial statement disclosure, and (3) the need to modify the auditor's report. SAS No. 59 states that continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions.

.85 As discussed in SAS No. 59, the auditor may identify information about certain conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time not to exceed one year beyond the date of the financial statements being audited. The significance of such conditions and events will depend on the circumstances, and some may have significance only when viewed in connection with others. SAS No. 59 provides the following examples of such conditions and events:

- Negative trends (for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, and adverse key financial ratios).
- Other indications of possible financial difficulties (examples include the need to seek new sources or methods of financing or to dispose of substantial assets).
- Internal matters (examples include the need to significantly revise operations).
- External matters that have occurred (examples include legal proceedings, legislation, or similar matters that might jeopardize an entity's ability to operate).

.86 For audits of financial statements for periods beginning on or after May 15, 2002, you will also need to consider the guidance in SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 341). Early implementation of this SAS is permitted. SAS No. 96, among other matters, amends SAS No. 59 to require an auditor to document:

- The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern.
- The work performed in connection with the auditor's evaluation of management's plans.
- The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated.
- The consideration and effect of that conclusion on the financial statements, disclosures, and audit report.

Auditor Responsibility Concerning Illegal Acts

.87 Auditors of health care organizations should be aware of the requirements of SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). SAS No. 54 prescribes the nature and extent of the consideration that the auditor should give to the possibility of illegal acts by a client in audits of financial statements in accordance with GAAS. The term *illegal acts* refers to violations of laws or governmental regulations. SAS No. 54 states, in part, that the auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. Entities may be affected by many other laws or regulations relating more to an entity's operating aspects than to its financial and accounting aspects, and their financial statement effect is indirect. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. SAS No. 54 also provides guidance on the auditor's responsibilities when a possible illegal act is detected.

.88 Among other matters, SAS No. 54 provides guidance regarding communications with audit committees and others. SAS No. 54 notes that the auditor should be assured that the audit committee, or others with equivalent authority and responsibility, is adequately informed with respect to illegal acts that come to the auditor's attention.

Fraud

.89 Recent highly publicized instances of fraudulent financial reporting serve as reminders to auditors of the need to remain alert to possible instances of fraudulent activity and to maintain an appropriate attitude of professional skepticism.

.90 Auditors should consider the guidance in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316). SAS No. 99 supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A), and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), and SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). SAS No. 99 does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02).⁶ However, SAS No. 99 establishes standards and provides

⁶ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit*, AICPA, *Professional Standards*, vol. 1, AU sec. 312) or fraud.

additional guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.

.91 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.92 A more detailed discussion of SAS No. 99 can be found in the general *Audit Risk Alert—2002/03* [AAM section 8010]. Also, the AICPA has developed a Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*. For more information about this Practice Aid, see the discussion “On the Bookshelf” in the “Resource Central” section of this Alert.

.93 The AICPA has launched a new, comprehensive Antifraud and Corporate Responsibility Program. The program includes many initiatives, including the new auditing standard, SAS No. 99; the Institute for Fraud Studies; corporate training programs; and new continuing professional education (CPE) recommendations, among others. Information about the program, a list of initiatives, and other fraud resources are now available on the AICPA Web site at www.aicpa.org/antifraud/homepage.htm. Also, look for the AICPA’s Antifraud Resource Center, which will launch on the AICPA Web site, www.aicpa.org, and will offer comprehensive tools, resources, and information for fraud prevention, detection, and deterrence.

2002 Audit and Accounting Guide Health Care Organizations

.94 The Audit and Accounting Guide *Health Care Organizations* is being updated with conforming changes to reflect the issuance of authoritative pronouncements. The Guide is expected to be issued in early 2003.

.95 Among conforming changes planned for the 2002 edition of the Guide are updates for accounting pronouncements FASB Statement No. 141, *Business Combinations*, FASB Statement No. 142, *Goodwill and Other Intangible Assets*, and FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. Updates to the Guide for auditing pronouncements include conforming changes for SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, and SAS No. 94, *The Effect of Information Technology on the Auditor’s Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

.96 Conforming changes are also planned for the issuance of GASB Statement No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*, and related pronouncements. Because of the phased in effective dates of GASB Statement No. 34, conforming changes planned do not modify the chapters and illustrative financial statements for a governmental hospital authority in Appendix A to the Guide. A new appendix is planned for the Guide that would provide guidance on the requirements of GASB Statement No. 34 and related pronouncements concerning governmental health care entities that are included in the scope of the Guide.

Auditor Association With Municipal Securities Disclosure Documents

.97 The new Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)* expands its discussion about situations in which an auditor becomes associated with an official statement or other offering document for the issuance of municipal securities and, thus, when the auditor should refer to SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550). (See further discussion about the new Guide, “Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*,” in the “New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance” section of this Alert.) Paragraph 16.06 in this Guide states that the auditor becomes associated with the official statement in any of the following situations:

- Assisting in preparing the financial information included in the official statement.
- Reviewing a draft of the official statement at the government’s request.

- Manually signing the independent auditor's report included in the official statement.
- Providing a revised independent auditor's report for inclusion in a specific official statement.
- Issuing a comfort letter, the letter described in SAS No. 72, *Letters to Underwriters and Certain Other Requesting Parties* (AICPA, *Professional Standards*, vol. 1, AU sec. 634.09), as amended, or an attestation engagement report in lieu of a comfort or similar letter on information included in the official statement.
- Providing written agreement for the use of the independent auditor's report in the official statement.
- Issuing a report on an attestation engagement relating to the debt offering (the new Guide includes a discussion on attestation engagements related to the issuance of municipal securities in paragraph 16.20).

.98 Additional information about these seven situations is included in the new Guide. As discussed in paragraphs 16.07 and 16.10 of the Guide, if the auditor is associated with an official statement the guidance in SAS No. 8 provides that the auditor has no obligation to perform any procedures to corroborate other information contained in those documents. However, the auditor should read the other information and consider whether that information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. SAS No. 8 (AU sec. 550.04-.06) provides guidance if the auditor concludes there is a material inconsistency or a material misstatement of fact that is not a material inconsistency. Although an auditor is not required to become associated with a government's official statements except in the situations described in paragraph 16.06 of the Guide, some auditors include a provision in the engagement letter requiring the government to obtain permission from the auditor before using the independent auditor's report in the official statement. Such a provision establishes a requirement that the auditor become associated with the government's official statements when the government requests the required permission from the auditor.

.99 In a November 1994 amendment to rule 15c2-12, the SEC required municipal securities dealers to contract with issuers of municipal bonds for them to provide continuing disclosures at certain times for the life of the bond issue. (See the related discussion "Municipal Securities Disclosures" in the "New Accounting Pronouncements and Other Guidance" section of this Alert). Continuing disclosure, or secondary market disclosure requirements, are made by issuers providing to nationally recognized municipal securities information repositories and state information repositories annual continuing disclosure documents and material events notices. Material events notices are required for 11 specific events, such as principal and interest payment delinquencies and nonpayment-related defaults. Material event notices are provided through a press release or other written notification on an "as needed" basis and do not involve financial statements.

.100 Paragraph 16.09 in the new Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition) states that the auditor is not required to participate in, or undertake any procedures with respect to a government's continuing disclosure documents, even though they may include audited financial statements. A government's continuing disclosures are not required to be submitted to or disseminated from the distributing organizations as a single document. Thus, an auditor's association with other information encompassed by such disclosures cannot be clearly established. Therefore, the provisions of SAS No. 8 do not apply to documents that contain those disclosures. Any attention the auditor devotes to other information included with audited financial statements in continuing disclosure documents at the government's request should be considered a consulting engagement under the provisions of the AICPA Statement on Standards for Consulting Services No. 1, *Consulting Services: Definitions and Standards* (AICPA, *Professional Standards*, vol. 2, CS sec. 100). (See further discussion about the new Guide in "Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition)" in the "New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance" section of this Alert.)

New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance

.101 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the writing of last year's Alert. The AICPA general *Audit Risk Alert*—2002/03 [AAM section 8010] contains a summary explanation of all these issuances. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, the *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards Team and available at www.aicpa.org.

SAS No. 97	<i>Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles</i> Issued in June 2002. This SAS is effective for written reports issued or oral advice provided on or after June 30, 2002. Earlier application is permitted.
SAS No. 98	<i>Omnibus Statement on Auditing Standards—2002</i> Issued in September 2002. This SAS amends a number of SASs. The effective dates vary for the amendments.
SAS No. 99	<i>Consideration of Fraud in a Financial Statement Audit</i> Issued in October 2002. This SAS is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.
SAS No. 100	<i>Interim Financial Information</i> Issued in November 2002. This SAS is effective for interim periods within fiscal years beginning after December 15, 2002. Early application of the provisions of the SAS is permitted.
SOP 02-1	<i>Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code</i> Issued in May 2002. This SOP is effective upon issuance and is applicable only to agreed-upon procedures engagements that report on annual claims prompt payment reports as required by the New Jersey Administrative Code.
Statement on Standards for Attestation Engagements (SSAE) No. 11	<i>Attest Documentation</i> Issued in January 2002. This SSAE is effective for attest engagements when the subject matter or assertion is as of or for a period ending on or after December 15, 2002. Earlier application is permitted.
SSAE No. 12	<i>Amendment to Statement on Standards for Attestation Engagements No. 10, Attestation Standards: Revision and Recodification</i> Issued in September 2002. This SSAE is effective upon issuance.
Audit and Accounting Guide	<i>Audits of State and Local Governments (GASB 34 Edition)</i> Issued in September 2002. The new Guide is effective for audits of a state or local government's financial statements for the first fiscal period ending after June 15, 2003, in which the government does apply or is required to apply the provisions of GASB Statement No. 34, <i>Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments</i> , or GASB Statement No. 35, <i>Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities</i> .
Audit Guide	<i>Service Organizations: Applying SAS No. 70, as Amended</i> New edition as of April 15, 2002.

Of the pronouncements, guides, and other guidance listed above, those having particular significance to the health care industry are briefly explained below. These summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

⁷ SAS No. 98, *Omnibus Statement on Auditing Standards—2002*, among other matters, amends SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324). The amendment revises the guidance in Interpretation No. 6, "Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events in a Service Auditor's Engagement" of SAS No. 70, rescinds Interpretation No. 6, and brings the guidance from Interpretation No. 6 into SAS No. 70. This amendment is effective for reports issued on or after January 1, 2003.

Auditing Standards

SAS No. 98, Omnibus Statement on Auditing Standards—2002

.102 Footnote 7 in this Alert discusses the amendment of SAS No. 70 by SAS No. 98. SAS No. 98 also amends a number of other accounting standards. Three of the amendments are discussed here:

- SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551.12 and .15). SAS No. 98 amends SAS No. 29 to clarify the reporting guidance with respect to required supplementary information presented in an auditor-submitted document. SAS No. 29, as amended by SAS No. 98, states that when supplementary information required by GAAP is presented outside the basic financial statements in an auditor-submitted document, the auditor should (a) express an opinion on the information if the auditor has been engaged to examine the information, (b) report on the information using the guidance in AU sections 551.12 and 551.14, provided such information has been subjected to the auditing procedures applied in the audit of the basic financial statements, or (c) disclaim an opinion on the information. This amendment was effective upon issuance of SAS No. 98.
- SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550.07). The amendment clarifies that an auditor may issue a report providing an opinion, in relation to the basic financial statements taken as a whole, on other information that has been subjected to the auditing procedures applied in the audit of those basic financial statements. This amendment was effective upon issuance of SAS No. 98.
- SAS No. 52, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 558.08 and .10). The amendments to SAS No. 52 clarify that an auditor may issue a report providing an opinion, in relation to the basic financial statements taken as a whole, on supplementary information that has been subjected to the auditing procedures applied in the audit of those basic financial statements. This amendment was effective upon issuance of SAS No. 98.

Audit and Accounting Guides—Industry Guides and General Guides

Audit and Accounting Guide Audits of State and Local Governments (GASB 34 Edition)

.103 The AICPA issued a new Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)* (product no. 012662kk). Even though the AICPA has issued this new Guide, it has also retained and continued to conform the 1994 edition of the Guide *Audits of State and Local Governmental Units (Non-GASB 34 Edition)* as well (product no. 012562kk). The most significant issue addressed in the new Guide is materiality determinations for purposes of planning, performing, evaluating the results of, and reporting on the audit of financial statements.

.104 The scope of the new Guide applies to all state and local governmental entities, including hospitals and other health care providers, even though the audits of those entities may also be subject to the guidance in the Audit and Accounting Guide *Health Care Organizations*. Therefore, the new Guide requires auditors of those governmental health care organizations that are included in the scope of the Audit and Accounting Guide *Health Care Organizations* to also consult the new Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*. Paragraphs 1.21 and 12.13 of the new Guide explain how auditors should use the auditing guidance in both of the Guides that apply to those entities.

General Audit and Accounting Guide Service Organizations: Applying SAS No. 70, as Amended

.105 Health care organizations may use service organizations, such as bank trust departments, service centers, billing entities, or employee benefit plan administrators. SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), as amended, provides guidance on the factors an independent

auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain transactions, as well as guidance for independent auditors who issue reports on the processing of transactions by service organizations for use by other auditors.

.106 The Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (new edition as of April 15, 2002) (product no. 012772kk) assists auditors in applying GAAS in audits of financial statements of entities that use service organizations, and in service auditors' engagements. Chapter 1 of this Audit Guide, "Audit Considerations for an Entity That Uses a Service Organization," identifies the information a user auditor may need about the processing performed by a service organization for a user organization, and also describes how a user auditor obtains that information. Other chapters in the Guide include discussions about the form and content of service auditors' reports, and guidance to user auditors on using a service auditor's report on controls placed in operation (type 1 report) and a service auditor's report on controls placed in operation and tests of operating effectiveness (type 2 report), among other matters. Also, AU section 324 is reproduced as Appendix F to this Audit Guide, and AU section 9324: *Service Organizations: Auditing Interpretations of Section 324* is reproduced in Appendix G to this Audit Guide. Appendix G also includes the three new interpretations of SAS No. 70 listed earlier in this section of the Alert.

New Accounting Pronouncements and Other Guidance

AICPA and FASB Pronouncements

.107 Presented below is a list of accounting pronouncements and other guidance issued since the writing of last year's Alert. The AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] contains a summary explanation of all these issuances. These summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site, www.aicpa.org, and the FASB Web site, www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and the *Journal of Accountancy*.

|----------------------------|---|
| FASB Statement No. 145 | <i>Rescission of FASB Statements No. 4, 44, 64, Amendment of FASB Statement No. 13, and Technical Corrections</i>
Issued in April 2002. The provisions of this Statement related to the rescission of FASB Statement No. 4, <i>Reporting Gains and Losses from Extinguishment of Debt</i> , shall be applied in fiscal years beginning after May 15, 2002, with early application encouraged. The provisions of paragraphs 8 and 9(c) of this Statement related to FASB Statement No. 13, <i>Accounting for Leases</i> , are effective for transactions occurring after May 15, 2002, with early application encouraged. All other provisions of this Statement are effective for financial statements issued on or after May 15, 2002, with early application encouraged. |
| FASB Statement No. 146 | <i>Accounting for Costs Associated With Exit or Disposal Activities</i>
Issued in June 2002. The provisions of this Statement are effective for exit or disposal activities initiated after December 31, 2002. Early application is encouraged. |
| FASB Statement No. 147 | <i>Acquisitions of Certain Financial Institutions</i>
Issued in October 2002. See paragraph 7 of this Statement for effective date information. |
| FASB Interpretation No. 45 | <i>Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others</i>
Issued in November 2002. The initial recognition and initial measurement provisions apply on a prospective basis to guarantees issued or modified after December 31, 2002, regardless of the guarantor's fiscal year end. The disclosure requirements in the Interpretation are effective for financial statements of interim or annual periods ending after December 15, 2002. |

SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i> Issued in December 2001. Changes in accounting and financial reporting required by this SOP should be applied prospectively and are effective for annual and interim financial statements issued for fiscal years beginning after December 15, 2001, with certain exceptions. Early application is encouraged.
Audit and Accounting Guide	<i>Audits of State and Local Governments (GASB 34 Edition)</i> See the “New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance” section of this Alert for more information.
Technical Practice Aids	<i>Software Revenue Recognition</i>
Questions and Answers	<i>FASB Statement No. 87, Employers’ Accounting for Pensions</i>

FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*

.108 FASB Statement No. 141, *Business Combinations*, addresses financial accounting and reporting for business combinations. FASB Statement No. 141, however, does not apply to certain business combinations, including a business combination involving two or more not-for-profit organizations, or the acquisition of a for-profit business by a not-for-profit organization.

.109 The provisions of FASB Statement No. 141 and FASB Statement No. 142, *Goodwill and Other Intangible Assets*, should not be applied to goodwill and intangible assets arising from a combination between two or more not-for-profit organizations or acquired in the acquisition of a for-profit business entity by a not-for-profit organization until the FASB completes its project on those types of combinations and acquisitions. Thus, the guidance in APB Opinion No. 16, *Business Combinations*, and APB Opinion No. 17, *Intangible Assets*, remains in effect for such assets. In addition, when applying APB Opinion Nos. 16 and 17, not-for-profit organizations should continue to apply the amendments to those Opinions found in other literature even though that other literature may have been superseded by FASB Statement Nos. 141, 142, and 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. For example, when applying APB Opinion No. 17, not-for-profit organizations should continue to apply the amendments to that Opinion found in FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, even though that Statement was superseded by FASB Statement No. 144. Readers should be alert to the issuance of a final standard on combinations of not-for-profit organizations. See the related discussion “Combinations of Not-for-Profit Organizations” in the “On the Horizon” section of this Alert.

Elimination of the Temporary Control Exception to Consolidation

.110 FASB Statement No. 144, among other matters, amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary. AICPA staff and FASB staff are currently considering the guidance in paragraphs 11.10 through 11.12 and paragraph 11.36 in the Audit and Accounting Guide *Health Care Organizations* in light of the elimination of the temporary control exception.

Securities Lending Transactions

.111 Health care organizations that make use of securities lending agreements may not have appropriately accounted for these agreements. Paragraphs 91 through 95 in Appendix A of FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, provide implementation guidance for securities lending transactions. FASB Statement No. 140 applies not only to financial institutions, but to entities in other industries as well, including the health care industry. FASB Statement No. 140 does not exempt not-for-profit organizations from its scope.

GASB Pronouncements and Other Accounting Guidance for Governmental Health Care Organizations

.112 One statement was issued by the GASB since the writing of last year's Alert. A brief summary of that statement follows, along with a discussion about implementation guidance for GASB Statement No. 34. For information on GASB accounting standards, including any standards that may be issued subsequent to the writing of this Alert, please refer to the GASB Web site, www.gasb.org.

GASB Statement No. 39, Determining Whether Certain Organizations Are Component Units, an amendment of GASB Statement No. 14

.113 The GASB issued GASB Statement No. 39 in May 2002. GASB Statement No. 39 amends GASB Statement No. 14, *The Financial Reporting Entity*, to provide additional guidance to determine whether certain organizations, such as not-for-profit foundations, for which the primary government is not financially accountable, should be reported as component units based on the nature and significance of their relationship with the primary government.

.114 Organizations that are legally separate, tax-exempt entities and that meet all of the following criteria should be discretely presented as component units:⁸

- The economic resources received or held by the separate organization are entirely or almost entirely for the direct benefit of the primary government, its component units, or its constituents.
- The primary government, or its component units, is entitled to, or has the ability to otherwise access, a majority of the economic resources received or held by the separate organization.
- The economic resources received or held by an individual organization that the specific primary government, or its component units, is entitled to, or has the ability to otherwise access, are significant to that primary government.

.115 This Statement continues the requirement in GASB Statement No. 14 to apply professional judgment to determine whether the relationship between a primary government and other organizations for which the primary government is not financially accountable, and that do not meet the criteria in GASB Statement No. 39, is such that exclusion of the organization would make the reporting entity's financial statements misleading or incomplete. Those component units should be reported based on the existing blending and discrete presentation display requirements of GASB Statement No. 14.

.116 The provisions of GASB Statement No. 39 are effective for financial statements for periods beginning after June 15, 2003. Earlier application is encouraged.

.117 Appendix C of GASB Statement No. 39 provides nonauthoritative illustrative examples intended to illustrate how the criteria in paragraph 5 of the Statement would be applied in several hypothetical situations. Illustrative Example 7 discusses a hospital foundation.

GASB Statement No. 34 Implementation Guidance

.118 The GASB Web site, www.gasb.org, has an area devoted to the implementation of GASB Statement No. 34. Also, the GASB staff issued a question and answer book in December 2001, *Guide to Implementation of GASB Statement 34 and Related Pronouncements*.

.119 See the related discussion "2002 Audit and Accounting Guide *Health Care Organizations*" in the "Audit Issues and Developments" section of this Alert about the 2002 conforming changes resulting from

⁸ These criteria are discussed in paragraph 5 of Governmental Accounting Standards Board (GASB) Statement No. 39, *Determining Whether Certain Organizations Are Component Units*. See the GASB Web site, www.gasb.org, for information regarding the error correction of paragraph 5.

the issuance of GASB Statement No. 34 and related pronouncements. Also, for information about a new edition of an industry audit guide for state and local governments that reflects the guidance in GASB Statement No. 34, see the discussion “Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*” in the “New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance” section of this Alert.

.120 In addition, the AICPA has issued a revised edition of its nonauthoritative question-and-answer booklet on GASB Statement No. 34, *Understanding and Implementing GASB’s New Financial Reporting Model: A Question and Answer Guide for Preparers and Auditors of State and Local Governmental Financial Statements* (product no. 022516kk). The booklet provides a complete, yet uncomplicated, explanation of the standards for the new financial reporting model.

Technical Practice Aids⁹

Accounting for Computer Systems Costs Incurred in Connection With the Health Insurance Portability and Accountability Act of 1996

.121 The AICPA Accounting Standards staff, helped by industry experts, released the following question and answer (Q&A), commonly referred to as Technical Practice Aid (TPA), on accounting for computer systems costs incurred in connection with the HIPAA.

Inquiry—The Health Insurance Portability and Accountability Act of 1996 (HIPAA) was enacted by the federal government with the intent to assure health insurance portability, improve the efficiency and effectiveness of the health care system, reduce health care fraud and abuse, help ensure security and privacy of health information, and enforce standards for transacting health information. HIPAA addresses issues of security and confidentiality in the transfer of electronic patient information and facilitates the reduction of administrative costs by standardizing health care electronic transactions. How should health care organizations account for computer systems costs incurred in connection with HIPAA?

Reply—Costs associated with upgrading and improving computer systems to comply with HIPAA should follow the guidance set forth in SOP 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*. The accounting for specific compliance costs depends on whether the costs relate to “upgrades and enhancements” or maintenance. The following summarizes the financial reporting requirements for each type of cost:

Upgrades and enhancements are defined in SOP 98-1 as “modifications to enable the software to perform tasks that it was previously incapable of performing.” In order for upgrades and enhancements to internal-use software to be capitalized, “it must be probable that those expenditures will result in additional functionality.” For example, if the changes increase the security of the data from tampering or alteration or reduce the ability of unauthorized persons to gain access to the data, those changes would be tasks that the software previously could not perform and the associated qualifying costs of application development stage activities should be capitalized. Conversely, if the changes merely reconfigure existing data to conform to the HIPAA standard or regulatory requirements, such changes would not result in the capability to perform of additional tasks and the associated costs therewith should be expensed as incurred. Because many of the costs associated with HIPAA relate to compliance with the Act and do not result in “additional functionality,” those costs should be expensed as incurred.

⁹ Section 6400 in the “Technical Questions and Answers” section of *Technical Practice Aids* includes questions and answers (Q&A) specifically pertaining to health care organizations. The Q&A are nonauthoritative, and are based on selected practice matters identified by the staff of the AICPA Technical Hotline and various other bodies within the AICPA. As of the writing of this Alert, the Q&A discussed in this section of the Alert is also available on the AICPA Web site at www.aicpa.org.

Maintenance costs should be expensed as incurred. Training costs and data conversion costs, except for costs to develop or obtain software that allows for access or conversion of old data by new systems, should also be expensed as incurred.

Reporting the Costs of Soliciting Contributed Services

.122 The Accounting Standards Executive Committee (AcSEC) developed a prospectus for a proposed SOP to address questions that arose about reporting costs of soliciting contributed services that do not meet the recognition criteria for contributions in FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*. At its March 27, 2002, meeting, the FASB objected to AcSEC's undertaking a project to address this issue. The FASB believes a project is not necessary to clarify the existing GAAP that addresses this issue. The FASB believes that paragraphs 26 through 28 of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*, require that information about expenses be reported by functional classification and that fund-raising activities include soliciting contributions of services from individuals, regardless of whether those services meet the recognition criteria for contributions in FASB Statement No. 116. The FASB also observed that the definition of *fund-raising activities* in paragraph 13.35 of the Audit and Accounting Guide *Not-for-Profit Organizations* conforms to paragraphs 26 through 28 of FASB Statement No. 117 and provides that costs of soliciting donors to contribute services (time) should be reported as fund-raising activities regardless of whether those services meet the recognition criteria for contributions in FASB Statement No. 116. (The FASB observed that that conclusion is also articulated in the March 2000 AICPA Technical Practice Aid No. 6140.11, *Costs of Soliciting Contributed Services and Time That Do Not Meet the Recognition Criteria in FASB Statement No. 116*.)¹⁰

Embedded Derivatives: Application of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to a Not-for-Profit Organization's Obligation Arising From a Split-Interest Agreement

.123 In April 2002, the FASB's Derivatives Implementation Group issued implementation guidance Issue No. B35, *Embedded Derivatives: Application of Statement 133 to a Not-for-Profit Organization's Obligation Arising from an Irrevocable Split-Interest Agreement*. That implementation guidance supersedes certain guidance in Chapter 6, "Split-Interest Agreements," of the Audit and Accounting Guide *Not-for-Profit Organizations* regarding measurement of the liability for unitrusts (split-interest agreements with variable payments) with either period-certain payments or period-certain-plus-life-contingent payments. Specifically, the implementation guidance requires that that liability be measured at fair value; thus, in circumstances in which the fair value is measured using present value calculations, the discount rate assumptions should be revised at each measurement date to reflect current market conditions. A copy of the implementation guidance is included in the Audit and Accounting Guide *Not-for-Profit Organizations* as Appendix B to Chapter 6, and can also be obtained on the FASB Web site, www.fasb.org. The effective date of the implementation guidance is the first day of the first fiscal year beginning after June 15, 2002.

SEC Developments

Cautionary Advice Regarding the Use of "Pro Forma" Financial Information in Earnings Releases

.124 The SEC issued Financial Reporting Release (FRR) No. 59, *Cautionary Advice Regarding the Use of "Pro Forma" Financial Information in Earnings Releases* (Release No. 33-8039), in December 2001 to caution public companies on their use of pro forma financial information and to alert investors to the potential dangers of such information.

¹⁰ The Q&A included in the "Technical Questions and Answers" section, commonly referred to as Technical Practice Aids, are nonauthoritative, and are based on selected practice matters identified by the staff of the AICPA Technical Hotline and various other bodies within the AICPA.

Cautionary Advice Regarding Disclosure About Critical Accounting Policies

.125 The SEC issued FRR No. 60, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies* (Release No. 33-8040), in December 2001 to remind management, auditors, audit committees, and their advisers that were undertaking the preparation and filing of required annual reports of public companies that the selection and application of the company's accounting policies must be appropriately reasoned. The Cautionary Advice encouraged public companies to include in Management's Discussion and Analysis (MD&A) full explanations, in plain English, of their "critical accounting policies," the judgments and uncertainties affecting the application of those policies, and the likelihood that materially different amounts would be reported under different conditions or using different assumptions.

Commission Statement About Management's Discussion and Analysis of Financial Condition and Results of Operations

.126 The SEC issued FRR No. 61, *Commission Statement about Management's Discussion and Analysis of Financial Condition and Results of Operations* (Release No. 33-8056), in January 2002 to set forth certain views of the SEC regarding disclosure that should be considered by registrants in MD&A of financial condition and results of operations while preparing 2001 annual reports. The Statement addresses disclosure matters concerning (1) liquidity and capital resources, including off-balance sheet arrangements, (2) certain trading activities that include non-exchange traded contracts accounted for at fair value, and (3) effects of transactions with related and certain other parties.

Certification of Disclosure in Companies' Quarterly and Annual Reports

.127 In August 2002, the SEC adopted rules (see Release No. 33-8124) to implement the certification mandated by Section 302 of the Sarbanes-Oxley Act of 2002. The new rules require an issuer's principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, each to certify the financial and other information contained in the issuer's quarterly and annual reports. The rules also require these officers to certify that they are responsible for establishing, maintaining, and regularly evaluating the effectiveness of the issuer's internal controls; they have made certain disclosures to the issuer's auditors and the audit committee of the board of directors about the issuer's internal controls; and they have included information in the issuer's quarterly and annual reports about their evaluation and whether there have been significant changes in the issuer's internal controls or in other factors that could significantly affect internal controls subsequent to the evaluation. The SEC also adopted previously proposed rules that require issuers to maintain, and regularly evaluate the effectiveness of, disclosure controls and procedures designed to ensure that the information required in reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported on a timely basis. Effective date: August 29, 2002.

.128 See the related discussion "The Sarbanes-Oxley Act of 2002" in the "Audit Issues and Developments" section of this Alert.

Municipal Securities Disclosures

.129 As discussed in last year's Alert, issuers of municipal bonds, including not-for-profit health care organizations that are conduit issuers of municipal bonds, are exempt from the registration and reporting requirements of the federal securities laws. However, they are not exempt from the antifraud provisions of the federal securities laws, which forbid making misleading statements in, or omitting material facts from, disclosures made in official statements and annual financial filings and other statements speaking to the market. Briefly, the antifraud provisions apply to a municipal issuer whenever it releases information to the public that is reasonably expected to reach investors and the trading markets. If a statement is made reaching markets or investors, the antifraud provisions apply, regardless of whether the statement is made on paper or delivered electronically. The SEC Interpretive Release *Use of Electronic Media* provides interpretive guidance to corporate and municipal issuers on how securities fraud laws apply to such matters as the electronic delivery of documents and electronic disclosures.

.130 The principal sources of SEC guidance on the operation of the municipal disclosure framework and application of the antifraud provisions are (1) SEC releases, including the March 1994 SEC Interpretive Release No. 34-33741, *Statement of the Commission Regarding Disclosure Obligations of Municipal Securities Issuers and Others*, and SEC Release No. 34-34961, *Secondary Market Disclosure*, an amendment to Rule 15c2-12 issued in November 1994; and (2) SEC enforcement actions in the municipal sector involving the antifraud provisions. As of the writing of this Alert, there were no recent releases from the SEC relating to the municipal securities market.

.131 For additional information on the SEC and municipal securities developments, see the SEC Web site, www.sec.gov. This site includes a page providing a shortcut to information on the SEC Web site for municipal issuers and other participants in the municipal securities markets.

.132 See a related discussion “Auditor Association With Municipal Securities Disclosure Documents” in the “Audit Issues and Developments” section of this Alert.

National Federation of Municipal Analysts Recommended Best Practices

.133 In October 2002, the National Federation of Municipal Analysts (NFMA) released “Recommended Best Practices in Disclosure for Long-Term Care/Senior Living Debt.” Specific recommendations for the long-term care/senior living sector are split into three different areas: continuing care retirement communities, assisted living facilities, and skilled nursing facilities. The recommended best practices are available on the NFMA Web site, www.nfma.org.

On the Horizon

.134 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] summarizes some of the more significant ongoing projects and exposure drafts outstanding. Presented below is brief information about certain ongoing projects and exposure drafts that are especially relevant to the health care industry. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.135 The following table lists the various standard-setting bodies’ Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below and in the general *Audit Risk Alert—2002/03* [AAM section 8010]. Readers should refer to information provided by the various standard-setting bodies for further information.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board	www.fasb.org
Governmental Accounting Standards Board	www.gasb.org/tech/techpg.html
Professional Ethics Executive Committee	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA’s standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate “exposure draft e-mail list” in the subject header field to help process the submission more efficiently. Include your full name, mailing address and, if available, your membership and subscriber number in the message.

Combinations of Not-for-Profit Organizations

.136 In November 1999, the FASB affirmed its earlier decision to undertake a project on combinations of not-for-profit organizations separate from its business combinations project. As a result of this decision, FASB Statement No. 141, *Business Combinations*, excludes combinations between two or more not-for-profit organizations, and acquisitions of a for-profit business entity by a not-for-profit organization from its scope. Also, FASB agreed to delay the effective date of FASB Statement No. 142, *Goodwill and Other Intangible Assets*, as it applies to goodwill and other intangible assets arising from combinations between not-for-profit organizations or acquired in the acquisition of a for-profit business entity by a not-for-profit organization until the FASB completes its project on those types of combinations and acquisitions.

.137 The scope of the project on combinations of not-for-profit organizations includes:

- Combinations between two or more not-for-profit organizations.
- Acquisition of a for-profit business enterprise by a not-for-profit organization. The acquisition of a not-for-profit organization by a business enterprise is within the scope of FASB Statement No. 141.

.138 You can obtain additional information about the status of this project on the FASB Web site, www.fasb.org. Also, see the related discussion “FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*” in the “New Accounting Pronouncements and Other Guidance” section of this Alert.

Exposure Draft on Accounting for Derivative Instruments and Hedging Activities by Not-for-Profit Health Care Organizations, and Clarification of the Performance Indicator

.139 In June 2002, AcSEC released an exposure draft of a proposed SOP, *Accounting for Derivative Instruments and Hedging Activities by Not-for-Profit Health Care Organizations, and Clarification of the Performance Indicator*. The proposed SOP would amend the Audit and Accounting Guide *Health Care Organizations* to address how nongovernmental not-for-profit health care organizations should report gains or losses on hedging and nonhedging derivative instruments under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, and clarify certain matters with respect to the performance indicator (earnings measure) reported by such organizations. Under the proposed SOP, not-for-profit health care organizations would exclude from the performance indicator the effective portion of changes in derivatives accounted for as cash flow hedges. The ineffective portion of changes in the fair value of cash flow hedges, changes in the fair value of derivative instruments that do not qualify for hedge accounting, and changes in the fair value of derivatives that are fair value hedges would be included in the performance indicator.

.140 The proposed SOP would amend paragraphs 10.17 and 10.18 of the Audit and Accounting Guide *Health Care Organizations*. The amendments to the Guide clarify that the performance indicator reported by not-for-profit health care organizations is analogous to income from continuing operations of a for-profit enterprise.

.141 The comment period for the exposure draft ended on August 13, 2002. At its September 2002 meeting, AcSEC approved a final SOP, subject to the chair’s clearance and FASB clearance, that includes changes to the exposure draft provisions. The major changes to the exposure draft are to:

1. Encourage early adoption.
2. Not require pro-forma disclosure of how the current year would have been reported if presented on a basis consistent with the prior years.

.142 In November 2002, the FASB met with representatives of AcSEC and discussed the clearance of a final SOP. The FASB did not object to the issuance of the final SOP, subject to certain changes being made. A final SOP is expected in the fourth quarter of 2002.

Exposure Drafts on Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.143 AcSEC released an exposure draft of a proposed SOP, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*. The proposed SOP would apply to all nongovernmental entities, including not-for-profit organizations and regulated entities. Among other matters, this proposed SOP would amend the Audit and Accounting Guide *Health Care Organizations* as follows:

- Replace the third sentence of paragraph 14.33 with the following:
However, costs of acquiring initial continuing-care contracts that are within the scope of SOP 02-X, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*, should be expensed or capitalized in accordance with that SOP.
- Delete the last sentence of paragraph 14.33.
- Replace footnote 2 to paragraph 14.33 with the following:
Although SOP 90-8, *Financial Accounting and Reporting by Continuing Care Retirement Communities*, is superseded with the issuance of this Audit and Accounting Guide, its provisions have been adopted in this chapter.
- Delete the second sentence of the "Property and equipment" paragraph of footnote 2 in the Sample Not-for-Profit Health Maintenance Organization illustrative financial statements.

.144 Concurrent with the issuance of this exposure draft, the FASB issued an exposure draft of a proposed Statement of Financial Accounting Standards, *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment*.

Potential Technical Practice Aids¹¹

.145 The AICPA is considering addressing issues related to FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*, in a series of Q&As, commonly referred to as TPAs. A number of these potential TPAs are health care specific.

Exposure Draft on Deposit and Investment Risk Disclosures

.146 The GASB published an exposure draft of a proposed statement, *Deposit and Investment Risk Disclosures*, that would amend GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements) and Reverse Repurchase Agreements*. Among the proposed statement's requirements, financial statement disclosures would cover deposit and investment risks; credit risk disclosures would include credit quality information issued by rating agencies; interest rate disclosures would include investment maturity information; disclosures for investments highly sensitive to changes in interest rates would indicate basis for sensitivity; and deposit and investment policies related to disclosed risks would be disclosed.

¹¹ See footnote 9.

New Framework for the Audit Process

.147 The ASB has released an exposure draft of seven proposed SASs relating to the auditor's risk assessment process. See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a discussion of these proposed SASs.

.148 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained from the AICPA Web site at www.aicpa.org.

Resource Central

Education courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

Checklist and Illustrative Financial Statements for Health Care Organizations

.149 The *Checklist and Illustrative Financial Statements for Health Care Organizations* (product no. 008787kk) is a nonauthoritative financial accounting and reporting practice aid for preparers or reviewers of financial statements of health care organizations.

Audit and Accounting Manual

.150 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; and engagement letters, management representation letters, and confirmation letters.

Understanding and Implementing GASB's New Financial Reporting Model: A Question and Answer Guide for Preparers and Auditors of State and Local Governmental Financial Statements (Revised Edition)

.151 The AICPA has issued a revised edition of its nonauthoritative question-and-answer booklet on GASB Statement No. 34 (product no. 022516kk). The booklet provides a complete, yet uncomplicated, explanation of the standards for the new financial reporting model.

Auditing Recipients of Federal Awards: Practical Guidance for Applying OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations (Second Edition)

.152 This Practice Aid (product no. 006607kk) provides comprehensive guidance on applying OMB Circular A-133. The publication includes audit checklists and illustrative examples to help auditors perform audits that comply with regulations.

Practice Aid Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide

.153 In connection with the issuance of SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, the AICPA has developed a new Practice Aid (product no. 006613kk). The Practice Aid includes topics such as:

- How the new SAS changes audit practice
- Developing an implementation plan

- Audit issues in revenue recognition
- Inquiries of entity personnel
- Practice aids such as:
 - Specialized industry fraud factors, including the health care industry
 - Common frauds, and extended audit procedures

AICPA reSOURCE

.154 AICPA reSOURCE Online is an electronic library that provides instant access to the AICPA's *Professional Standards*, *Technical Practice Aids*, current Audit and Accounting Guides, current Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe, go online at www.cpa2biz.com.

.155 The AICPA also has a CD-ROM product titled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM also enables subscription access to the AICPA Professional Literature products in a Windows format.

Education Courses

.156 The AICPA has developed a number of CPE courses that are valuable to CPAs working in the health care industry, many of them available for both group study and self-study. For more information about AICPA CPE courses, call the AICPA (Member Satisfaction) at (888) 777-7077.

Online CPE

.157 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee provides you with unlimited access to hundreds of courses of online CPE in one- and two-hour segments.

CPE CD-ROM

.158 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.159 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.160 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.161 Members of the AICPA Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.162 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, cpa2biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the professional standards, and CPE courses.

Other Helpful Web Sites

.163 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the "Information Sources" table at the end of this Alert.

.164 This Audit Risk Alert replaces the *Health Care Industry Developments—2001/02* Audit Risk Alert. The *Health Care Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to mkasica@aicpa.org or write to:

AAM Section 8040

Insurance Industry Developments—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your insurance audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the insurance industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Industry and Economic Developments

The U.S. Economy

.04 Since the beginning of 2002, overall economic activity has been expanding at a moderate pace, showing signs of improvement since the events of September 11. Third-quarter economic growth expanded at a strong 4 percent rate. Still, the Federal Reserve officially said the economy is moving "towards weakness" rather than staying "neutral" and a fourth quarter interest rate cut of 50 basis points was made to stimulate the economy. The Department of Commerce has made extensive revisions to 2001 data, most notably indicating that the 2001 recession was longer and deeper than previously thought.

.05 In 2002, widespread corporate accounting fraud allegations caused ongoing turmoil in U.S. equity markets, including a stock market slide and eroding consumer and investor confidence. Since insurers' investment portfolios consist mainly of fixed-income investments, the low interest rate environment has caused returns on these investments to be bleak. Corporate bonds, yielding a higher return in exchange for slightly higher risk relative to government bonds, are even more risky in the wake of several investigations surrounding accounting procedures and reporting in the corporate arena. Insurance companies must be selective in investing in corporate bonds, and be aware of any potential corporate investigations.

The Aftermath of September 11 on the Insurance Industry

.06 It was just over a year ago when the horrific attacks occurred on September 11, 2001. This one catastrophe affected many lines of business in the insurance industry, including disability, workers' compensation, group life, aviation, and commercial property. The industry, which was experiencing poor underwriting results at the time of the September 11 event, has responded a year later by raising prices and by examining risks as it has never done before.

Increase in Premium Rates

.07 Despite huge losses related to the events surrounding September 11, the insurance industry has managed to partially recover. The industry's improved health is largely attributed to an increase in demand for insurance coverage and subsequent increases in premium rates; allowing companies to both post solid underwriting results and establish high written premiums.

.08 It is hard to determine how the events of September 11 alone affected pricing—the industry had been experiencing years of soft-market pricing; insurers and reinsurers had begun to raise rates prior to September 11. Many believe, however, that both threats of unforeseen risk exposure due to the events of September 11 and subsequent diminished insurance availability have forced premium rates to increase. Additionally, insurance companies have been reevaluating their policies concerning major catastrophes.

Estimated Losses

.09 According to A. M. Best, the total insured losses from the events of that day have been estimated to be between \$35 billion and \$55 billion. A trend of reserve strengthening currently characterizes the industry. Many insurers and reinsurers have begun to enact measures to strengthen reserves by setting aside money for future claims and booking a corresponding loss on the income statement. This movement toward an increase in overall reserve strengthening could reflect a natural response by insurers to the riskier, post-September 11 environment. Statement on Auditing Standards (SAS) No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), provides guidance to auditors on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). Statement of Position (SOP) 92-4, *Auditing Insurance Entities' Loss Reserves*, provides guidance to help auditors understand the loss-reserving process and to develop an effective audit approach when auditing loss reserves of insurance entities.

Single Event or Multiple Events?

.10 Defining whether the September 11 attacks will be considered a single event, multiple events, or act(s) of war will broadly determine losses related to the catastrophe. A judge ruled at a hearing held on August 22 that he will bifurcate the World Trade Center (WTC) trial into two parts. The first trial will deal with which policy form governs the WTC property coverage and whether the coordinated attack on the WTC complex resulted in one insurable loss. The second trial, if necessary, would deal with WTC valuation issues.

.11 One unresolved issue is whether the federal government/taxpayers should play a permanent role as a backup insurer. By the close of 2001, Congress decided not to pass backstop legislation to provide money to the insurance industry in paying claims related to September 11 and future attacks. Because of ongoing delays surrounding this legislation, many jurisdictions have adopted optional terrorism exclusion endorsements. Many believe that these exclusions are necessary to avoid industry insolvency in the event of another catastrophe of similar or greater magnitude. Many state laws mandate that terrorism must be covered under workers' compensation policies; however, insurers are not allowed to increase rates just for terrorism coverage. One specific problem arising from the exclusions lies in defining the term *terrorism* for use in formal contracts. In addition, insurance companies are making the decision to discontinue terrorism coverage, through exclusions and other means.

.12 Congress recently formed a House-Senate conference that will address legislation regarding the creation of a federal terrorism insurance backstop. The Senate bill concentrates on providing federal revenue to the industry and policyholders; the House bill provides financing with paybacks by the entire industry. In November 2002, the House and Senate approved a terrorism insurance bill that will result in the government/taxpayers covering a set amount annually in insurance claims from any future terrorist attacks. President Bush signed this bill into law on November 26, 2002.

Insurance Fraud

.13 Insurance fraud prevention is an issue for September 11 claims because of the quantity of extensive losses, lack of crucial documentation, and difficulty in measuring business interruption losses. All these problems unearth serious potential for fraudulent behavior on behalf of claimants. In an effort to prevent insurance fraud, antifraud operations have been created and the New York Insurance Department has helped coordinate a large antifraud effort in the wake of the September 11 attacks. Unfortunately, the speed at which adjusters processed the magnitude of claims, especially considering the emotional nature of the events, also caused fraudulent claim activity to be more widespread than normal. However, the antifraud network assembled by both the New York Insurance Department and the National Insurance Crime Bureau will now crosscheck claims against other databases such as those at the Federal Emergency Management Agency, law enforcement organization, and state regulators. These preventative measures will aid in managing the fraud that arises from crises such as that of September 11.

Reinsurance Issues

.14 With the reinsurance sector responsible for an estimated \$35 billion of the September 11 losses, new capital emerged just weeks after the attacks and new reinsurers were set up in Bermuda with funding from a variety of financial sources.

.15 Considering both unpredictable earnings and the risk intensity associated with the sector, improved quality is the product now demanded by reinsurance buyers. Because financial risks of catastrophes like September 11 affect many areas of an insurance company's operations (for example, property, workers' compensation, life), buyers are now more concerned with the strength of their reinsurer. Reinsurers may need to become large, strong conglomerates to withstand future catastrophes and consumer demand; an increase in mergers and acquisitions may occur in this sector of the industry over the next few years.

.16 In addressing the risks of terrorism insurance, reinsurance pools are being considered to meet the demands of future catastrophes and to maximize capital available for paying claims. One plan for a reinsurance pool would be to pool insured losses and have a stated deductible. Pooled losses exceeding the deductible would be reinsured, and paid by reinsurers, capital markets, and possibly government/taxpayers as a last resort. Essentially, the plan aims to assign relative risk according to the financial capacity of the entity assuming it.

Property and Casualty Sector

.17 There has been ongoing improvement in the industry's financial results. However, these results are likely to be dampened by continuing claims, inflation, higher reinsurance costs, and lower interest rates generating lower investment income on insurers' portfolios. In addition, A. M. Best continues to believe that there are considerable reserve deficiencies, particularly for certain commercial coverages such as commercial automobile, workers' compensation, and medical malpractice. Large reinsurers have strengthened reserves in 2002, and there is also concern about the recoverables of some reinsurance by primary insurers. During its review of 2001, A. M. Best also raised concerns about additional asbestos and environmental claims and the potential drag on future earnings if these claims continue to be funded on a "pay as you go" basis.

.18 Claims under Directors and Officers liability insurance could become more extensive with the passage of the Sarbanes-Oxley Act of 2002, as there may be increased exposure for corporate lawsuits. Also, there is the potential for class action suits questioning the adequacy of terrorism coverage and corporate malfeasance in general.

.19 Since the September 11 attacks, there have been a number of new entrants into the reinsurance market, providing new capital in excess of \$6 billion. Reinsurers have been deemphasizing proportional coverages in favor of excess of loss coverages. This change in type of reinsurance coverage may result in primary insurers retaining greater risk, thereby subjecting surplus to greater volatility.

.20 Sales of insurance via the Internet continue to be slow. For example, Internet sales of personal automobile insurance are still less than 1 percent of total personal automobile sales. However, the Internet is becoming a more frequent means for companies' communications with their agents, policyholders, and claimants.

Auto Insurance

.21 Insurers continue to announce their intention to withdraw from New Jersey because of burdensome regulations. The largest insurer has received approval to reduce its book of business by approximately 200,000 cars. This business will need to be absorbed by other insurers. New Jersey is one of three states to have an "excess profits" regulation (New York and Florida are the others). New Jersey changed the calculation of excess profits from a paid loss to an incurred loss basis in 2002. The impact of the change is uncertain.

.22 Claims fraud has been and continues to be a problem for insurers in certain large states, most recently in New York and Florida. In particular, higher personal injury protection coverage loss ratios have resulted from fraud and abuse through unfounded lawsuits and increasing medical reviews. Auto maintenance and repair costs have been accelerating, and pricing restrictions in a number of states make sustained profitability difficult to achieve. Residual markets in New York, New Jersey, Pennsylvania, and Texas have grown in recent years.

Homeowners' Insurance

.23 The cost of insuring a home has continued to rise significantly in 2002. A. M. Best reported that the homeowner line of business was profitable for only one year during the last decade. The central region of the country has exhibited extreme volatility in homeowner results.

.24 Mold has recently become a national issue for insurers as one large insurer had a \$32 million judgment entered against it. Claims have grown exponentially. A number of carriers have stopped writing new business in Texas. Carriers have been restricting coverage for mold nationwide. Texas reacted to the "crisis" by eliminating coverage for high-priced procedures beyond those necessary for repairing water damage as part of the standard homeowner policy. However, a buy-back provision for more expensive coverage continues to exist. Mold claims have spread to other states, particularly California.

Life and Health Sector

.25 In 2002 the life and health insurance industry continued to experience challenges caused by the sluggish U.S. economy and the volatile equity markets.

.26 Annuity production, which came under pressure in 2000 and 2001, continued to experience decline in the first six months of 2002.

.27 Sales of fixed annuities started to increase in 2002, as did sales of life insurance products.

.28 In 2002, the key issues affecting life insurers include:

- Investment losses from credit deterioration
- The acceleration of amortization of deferred acquisition costs (DAC) for products accounted for in accordance with Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*
- Recognition of benefits associated with variable annuity products that contain guaranteed minimum death benefits (GMDBs) and guaranteed minimum income benefits (GMIBs).
- Actions by Standard & Poor's and Moody's placing negative outlooks on the industry.

The life insurance industry has been hit hard by credit losses. Writedowns and sales of investments, both equity and fixed income, especially in the telecommunications and energy sector, have affected results. See the “Declines in the Value of Securities” section of this Alert for a description of other than temporary impairment.

.29 Declines in equity markets have resulted in exposures for accelerated amortization of DAC, particularly where the variable annuity business is concerned. Recent publicity has revealed that a number of different treatments are being used to address differences between long-term assumptions regarding market returns and actual experience. Equity market returns are particularly relevant to amortization of variable annuity DAC, since investment return (a key component of the estimation of future gross profits) is based on the valuation of the separate account assets. See the “Deferred Acquisition Costs” section of this Alert for further DAC considerations.

.30 Variable annuity products that contain GMDBs or GMIBs have two main issues to consider: (1) companies may experience general account charges for the payout of these benefits (upon either death or annuitization, as applicable) when the market value of the separate account assets are not sufficient to support the level of benefit payment and (2) generally accepted accounting principles (GAAP) and statutory accounting may require insurers to establish reserves for variable annuity guarantees on these products, thereby placing strain on capital strength. The AICPA proposed SOP *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and Separate Accounts* contains proposed guidance for accounting for GMDBs. See the “Accounting Pipeline” section of this Alert for further information on the proposed SOP.

Health Insurance Portability and Accountability Act Compliance

.31 The Health Insurance Portability and Accountability Act (HIPAA) of 1996 will be a significant initiative for health plans, health care providers, and clearinghouses that process health information electronically. Auditors should be aware that most covered entities will be required to comply with HIPAA standards by April 2003 (April 2004 for small companies that write less than \$5 million in receipts).

.32 HIPAA was adopted to improve the efficiency and effectiveness of the health care system by standardizing the electronic transmission of certain administrative and financial transactions. Significant cost reductions are projected due to the utilization of standard formats, codes, and identifiers for electronic claims. Many health care organizations may need to replace or substantially change their current systems and processes to comply with HIPAA regulations.

.33 The convergence to electronic data interchange will require significant changes to how security and privacy are addressed. As a result, HIPAA also mandates security and privacy protection standards for individually identifiable health information that is stored, processed, or transmitted. Security standards require comprehensive, formal, written procedures for protecting all patient-identifiable information stored or transmitted by any electronic system. Privacy regulations cover patient-identifiable health information in any other form that is or has been in electronic form. Patients must give their written, uncoerced, and revocable permission to use health information for purposes other than treatment, payment, healthcare operations, and specified exceptions (public health, oversight, law enforcement). Records of disclosures must be kept, and patients have the right to challenge and correct their health information.

New Products

Terrorism Coverage

.34 Insurers are revising their policies to clarify what they will and will not cover as a result of terrorist attacks. It is important for the auditor to understand precisely what risk actions a company is taking in this area as well as how the carriers’ own assets and investments may be affected.

Catastrophe Bonds

.35 The downturn in the economy and business environment has contributed to a resurgent interest in some alternative risk vehicles, such as catastrophe bonds. Catastrophe bonds are becoming more attractive to investors as an alternative to traditional risk retention. The main reasons for their increase in popularity are their transparency, simplicity, and high reward to risk ratios. Investors are willing to pay to have investments they understand and can easily follow.

.36 Catastrophe bonds are also trading well because investors are willing to try new investments to further spread their risk. These bonds are issued at a tighter spread than indemnity insurance, which makes them less risky in terms of investments. At the same time, dual-year coverage, and competition have made catastrophe bonds even more efficient. The catastrophe bond market is finally seeing participants invest for economic, and not strategic, reasons.

Containing the Cost of Weather Events

.37 Insurers, capital markets, and corporate entities are discussing methods to contain the costs of weather events. Weather risk management has become increasingly important in the last five years. And, as market sophistication continues to increase, capital and insurance markets are trading various weather risks for investors.

.38 Earthquakes, hurricanes, and tropical storms may occur infrequently but have large costs. Hail, precipitation, and temperature changes occur more frequently but tend to have lesser costs. This gives investors and insurers opportunities to mix and match the types of risk they are willing to take.

Vehicle for Facilitating Securitization

.39 The National Association of Insurance Commissioners (NAIC) has approved a Special Purpose Reinsurance Vehicle (SPRV) Model Act. The SPRV has created a vehicle for facilitating securitization within the United States, instead of at an offshore location. By allowing such vehicles within the country, states will now be able to regulate any limitations to these specific types of insurance.

The Global Insurance Industry

.40 The global insurance industry is evolving into a more complex and dynamic environment. Companies must adapt in order to gain market share and maintain profitability. Factors contributing to the evolution of the industry include:

- Increasing consolidation
- Convergence and globalization
- International mergers and acquisitions
- An evolving socioeconomic and political environment
- Changing consumer concerns and buying behavior
- Rapidly developing technology
- Broadening distribution patterns
- Increasing competition
- Rapidly changing regulations
- Increasing number of varying regulatory authorities
- Global investment strategies

- Global currency issues
- Culturally diverse workforce and customer base

.41 The new market demands that companies be specialized in a particular niche and eliminate areas in which they are not successful. One way of achieving this is through consolidation. Companies are also realizing the importance of strategic alignment with other companies to meet the needs of consumers.

.42 Additionally, the increased use of the Internet is changing the industry by eliminating global borders and reducing barriers to entry.

.43 To survive in the new global market, companies must find a way to serve their customers conveniently while also reducing costs. Many companies, as part of their cost reduction efforts, are shifting their service centers to global locations outside of the United States, or to centralized locations within the United States.

.44 Strong brands will have an advantage in this changing market. It is important to have a strong brand name to be able to access independent distribution channels. A key success strategy will be to quickly establish a brand name before existing global brands take over.

Privacy and Security—Where Are We Today?

.45 Nearly three years after passage, the privacy and security provisions contained in Title V of the Gramm-Leach-Bliley Act (GLBA) remain the cornerstone of federal efforts to regulate the handling of nonpublic personal financial information by federal and state regulated financial services institutions. Title V of the GLBA addresses the issues of how a financial services institution may use its customers' nonpublic personal information, including the providing of required notice and disclosures, and imposes upon each institution an affirmative obligation to protect its customers' information from unauthorized disclosure to internal, as well as external, sources. Under the GLBA's functional regulation approach, primary responsibility for regulation and enforcement of insurance industry compliance with GLBA's privacy and security requirements was delegated to the states.

.46 Shortly after the GLBA was signed into law, state insurance regulators, working through the NAIC, commenced the development of a privacy regulation consistent with Congress's stated goals and objectives. As permitted by language in the GLBA, permitting states may impose additional or more stringent protections, and the model developed by the NAIC includes personal health as well as financial information. The NAIC's Privacy of Consumer Financial and Health Information Model Regulation was adopted by the NAIC in September 2000.

.47 According to the NAIC, 49 states plus the District of Columbia have adopted laws or regulations, or both, that meet the GLBA's minimum privacy standards. Of these states:

- Thirty-six states plus the District of Columbia have enacted regulations or laws based on the NAIC model privacy regulation.
- Twenty-two states include the financial and health provisions of the model (two of those states have imposed "opt-in" instead of "opt-out" requirements).
- Fourteen states plus the District of Columbia contain financial but not health provisions of the model.
- Thirteen states have retained the NAIC's 1982 Model Privacy Act.

Neither the states nor the NAIC have made as much progress, however, on the development of standards for safeguarding customer information. To date only one state, New York, has adopted a security regulation. The NAIC is currently developing a model security regulation. The current proposal follows closely upon the approach taken by New York.

.48 Entities should be aware of the state privacy regulations and other emerging regulations to which the entity will be subject.

GLBA Privacy Regulations

.49 Entities were required to comply with the privacy requirements of the GLBA by July 1, 2001.

.50 The regulation on the privacy of consumers' financial information:

- Describes under what conditions an entity may disclose nonpublic personal information about consumers to nonaffiliated third parties.
- Requires an entity to provide notice to customers about its privacy policies and practices.
- Provides an "opt out" method for consumers to prevent the entity from disclosing that information to nonaffiliated third parties.

.51 ***Protected Information.*** Under the privacy regulation of the GLBA, restrictions on sharing information with nonaffiliated third parties apply to "nonpublic personal information" about a consumer. Nonpublic personal information is "personally identifiable financial information" that is provided by a consumer to an entity and results from any transaction with or service performed for the consumer, or is otherwise obtained by the entity.

.52 The regulation excludes "publicly available information" from the definition of *nonpublic personal information*. Publicly available information is any information that an entity has a reasonable basis to believe is lawfully made available to the general public from government records, widely distributed media, or disclosures to the public required to be made by federal, state, or local law.

.53 ***Privacy Policy Notice.*** Under the regulation, entities must provide a clear and conspicuous notice that accurately reflects their privacy policies and practices. The notice must be given to any individual who becomes a customer of the entity by the time the customer relationship is established, and annually as long as the relationship continues. Also, the notice must be given to any consumer who does not become a customer before nonpublic personal information about the consumer may be shared with nonaffiliated third parties.

.54 ***Opt-Out Requirement.*** Before an entity can share nonpublic personal information with nonaffiliated third parties, consumers must be given a reasonable opportunity to opt out from having that information shared. The opt-out notice must be given to:

1. Customers as a part of the initial notice of the entities' privacy policies and practices, or before sharing nonpublic personal information about them with nonaffiliated third parties.
2. Individual consumers who do not become customers of the entity, and former customers, before nonpublic personal information about them may be shared with nonaffiliated third parties.

.55 ***Exceptions.*** The regulation does provide certain exceptions that permit an entity to share nonpublic information with third parties without providing privacy or opt-out notices. These exceptions include disclosures of nonpublic personal information made in connection with certain processing and servicing transactions, with the consent of or at the direction of the consumer, to protect against potential fraud or unauthorized transactions; and to respond to judicial process.

The Sarbanes-Oxley Act of 2002

.56 On July 31, 2002, the Sarbanes-Oxley Act of 2002 (the Act) was signed into law. This Act is one of the most far-reaching pieces of legislation ever to address corporate fraud and public accounting. Support for the law was fueled by multiple reports of corporate accounting scandals, defrauded investors, and a plummeting stock market.

.57 See the AICPA general *Audit Risk Alert*—2002/03 [AAM section 8010] for further information about the Sarbanes-Oxley Act.

Congressional Hearings

.58 Hearings may be held on the adequacy of bank regulatory oversight and the possible role of investment and commercial banks in facilitating fraudulent accounting practices and other abuses. Additionally, Section 705 of the Sarbanes-Oxley Act requires the Comptroller General to conduct a study on whether investment banks and financial advisers assisted public companies in manipulating their earnings and obfuscating their true financial condition. Among other things, the study will address the role the financial institutions played in the collapse of Enron. Upon the completion of the study, the Comptroller General will issue a report discussing regulatory or legislative steps that are recommended or that may be necessary to address concerns identified in the study.

Derivatives Watch

.59 The growing number of corporate scandals has fueled increased activity in the largely unregulated derivative market. Risk managers have reshaped risk profiles in response to changing market conditions. Derivative activity at your clients and corresponding risk may increase. SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), along with its companion Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, provides specific guidance on auditing derivatives. Additionally, see the “FASB Statement No. 133 Implementation Guidance” section of this Alert for a discussion of the FASB Derivative Implementation Group work on insurance specific issues.

Back on the Balance Sheet Again

.60 A large portion of off-balance-sheet debt could return to the balance sheets of financial institutions and their customers as a result of changes in accounting principles and possible legislative and regulatory action. The FASB currently has a project in the works that would amend the way SPEs are reported. This project, expected to be finalized by the end of 2002, would have a major impact on financial institutions. See a description of the FASB’s work in this area in the “Special Purpose Entities” and “On the Horizon” sections of this Alert.

Audit and Accounting Issues in the Spotlight

Reinsurance Arrangements

.61 Reinsurance accounting and reporting—in particular, the question of what constitutes an acceptable transfer of risk—continues to be an important issue requiring careful analysis. The Securities and Exchange Commission (SEC) and state insurance departments have closely scrutinized the accounting and reporting practices of insurance companies with respect to reinsurance transactions.

.62 Due to a number of contributing factors, many insurance companies are reassessing the amount of exposure they retain and the types of reinsurance protection they use for risk management. As a result of the convergence of capital markets, banking and insurance purchasers of risk management products have been provided new alternatives and vehicles for redistributing risks. These new structures can take on many forms and may have unique accounting requirements based on their structure.

.63 FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, continues to be the primary source of guidance used to determine if a contract transfers risk and meets the conditions for reinsurance accounting. The following areas are factors that affect the reinsurance market and reinsurance consumers that should be evaluated.

Significant Historical Losses and a Hardening Market

.64 After steady erosion throughout most of the 1990s, reinsurance rates have been increasing across all lines of business from the beginning of this decade. The outlook for 2002 is for continued growth. The rate increases are long overdue for the industry. The rate increases reflect years of deteriorating results for the industry and reduced capacity due to insolvent reinsurers. The significant catastrophe losses from European storms and the events of September 11 have been key factors driving the most recent poor underwriting results of the reinsurance market.

.65 An increase in rates causes reinsurance consumers to question the amount of coverage they obtain and the type of reinsurance they purchase. When the cost of coverage increases, reinsurance purchasers will attempt to control their risk management costs by obtaining less coverage, purchasing higher layers, or increasing their retention.

.66 When an entity changes its risk management strategy, careful consideration should be given to whether the entity created “gaps” in coverage for which it had obtained continuous or comparable coverage. Examples of instances where this can occur include situations in which companies shift from calendar year coverages to accident year stop loss coverages, include stop loss corridors in existing coverages, or accept terms with complex excess of loss layers. In each situation, the terms and conditions of contracts need to be carefully evaluated to determine if they meet the criteria for reinsurance accounting under FASB Statement No. 113.

.67 As insurers continue to evaluate the losses reported on the significant catastrophes that have occurred, careful consideration should be given by the ceding enterprises as to the financial strength of the reinsurer. The reinsurer’s strength helps to support the collectibility of ceded loss reserves and other reinsurance balances receivable.

Regulatory Changes and Market Convergence

.68 The repeal of the Glass-Steagall Act opened the door to the convergence of capital markets and banking activities to insurance products. As a result, the reinsurance providers and consumers have many alternative risk transfer options available to them. These types of contracts often include finite risk covers that provide for a narrowly defined amount of coverage. In response to the need for innovative risk management products, underwriters and brokers are creating arrangements that are becoming more creative with unique and complex provisions.

.69 **Accounting Guidance.** Emerging Issues Task Force (EITF) Issue No. 93-6, *Accounting for Multiple Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises*, and EITF Issue No. 93-14, *Accounting for Multiple Year Retrospectively Rated Contracts by Insurance Enterprises and Other Enterprises*, represent guidance addressing issues that may be present in reinsurance transactions. These EITF issues address contractual features that create future rights and obligations as a result of past events and therefore require certain accruals to be made in the financial statements. As products become more advanced and complex, careful consideration is required to determine if the contracts are being accounted for appropriately based on a complete understanding of the facts and circumstances. Alternative risk transfer products and finite risk covers usually present complex issues with respect to evaluating the contracts for risk transfer under FASB Statement No. 113. An evaluation of such contracts should be performed with the aid of the necessary specialists, including actuaries familiar with the exposures covered under the proposed contract.

.70 SOP 98-7, *Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk*, should be used to determine the appropriate method of accounting for contracts that do not meet the requirements for reinsurance accounting under FASB Statement No. 113. SOP 98-7 outlines the appropriate accounting for contracts based on one of the following categories: contracts that transfer only significant timing risk, contracts that transfer only significant underwriting risk, contracts that transfer neither significant timing nor underwriting risk, and contracts that have an indeterminate risk.

Additional Pronouncements and Proposed Projects

.71 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, states that traditional reinsurance contracts accounted for under FASB Statement No. 113 are, in most cases, not subject to the requirements of the standard. That is, a contract is not subject to the requirements of FASB Statement No. 133 if it entitles the holder to be compensated only if, as a result of an identifiable insurable event (other than a change in price), the holder incurs a liability or there is an adverse change in the value of a specific asset or liability for which the holder is at risk.

.72 One of the interpretations of FASB Statement No. 133 (Implementation Issue No. B26, *Embedded Derivatives: Dual-Trigger Property and Casualty Insurance Contracts*) identified certain types of insurance contracts that could be considered to have derivative type features. The interpretation defines policies with dual-triggers as agreements for which the payment of a claim is triggered by the occurrence of two events (that is, the occurrence of both an insurable event and changes in a separate preidentified variable). Certain types of dual trigger contracts would be subject to the provisions of FASB Statement No. 133 if more than the occurrence of an insured event was a barrier to the policyholder being availed a reimbursement under a contract. The FASB has determined all of the following conditions must be met in order for a contract possessing dual triggers to meet the scope exception and to be accounted for as a traditional insurance contract:

- Benefits and claims are paid only if an identifiable insurable event occurs.
- The amount of the payment is limited to the amount of the policyholder's incurred insured loss.
- The contract does not involve essentially assured amounts of cash flows based on the insurable event, such that recoveries under the contract are more likely determined by the referenced variable.

.73 In other words, if the occurrence of the insurable event is highly probable and the amount the insured would most likely receive is altered by the variable, the contract or a portion of it is subject to the provisions of FASB Statement No. 133.

.74 The FASB provided implementation guidance with respect to guarantee type contracts in Issue B27, *Dual-Trigger Financial Guarantee Contracts*. The interpretation states a similar conclusion to the aforementioned issue that contracts that pay for declines in value are subject to FASB Statement No. 133; however, if the payments are based on an insured loss (that is, default), the contract would meet the scope exception for traditional insurance.

Purchase Accounting

.75 Historically, many business combinations involving short-duration contracts had used the acquiree's recorded account balances as the allocated amounts for insurance-specific items in purchase accounting. In purchase business combinations involving acquisitions of property and casualty insurance companies, changes in liabilities for claim losses and loss adjustment expenses of an acquired insurance company ordinarily were made prior to the sale date through losses incurred in the seller's income statement rather than through purchase accounting adjustments. Some believe this was consistent with the SEC's Staff Accounting Bulletin (SAB) No. 61, *Adjustments of Allowances for Business Combination Loan Losses—Purchase Method Accounting*.

.76 In 1999, SAB No. 100, *Restructuring and Impairment Charges* (Topic 2-A), clarified that receivables, liabilities, and accruals should be recorded in the purchase price allocation at their fair value. Frequently, fair values are based on estimations of the underlying cash flows to be received or paid, discounted to their present value using appropriate current market interest rates. Insurers should be aware that fair value encompasses more than discounting because the cash flows related to reserves are not fixed and determinable. FASB Statement of Financial Concepts No. 7, *Using Cash Flow Information and Present Value in Accounting Measurements*, provides a good framework for utilizing cash flow techniques in estimating fair value.

.77 In a speech given by the SEC staff at the December 2000 AICPA SEC conference, the staff reiterated that companies that engage in a purchase business combination should record the acquired company's liabilities using their best estimate of fair value at the date of the business combination. If a registrant believes that it has unique facts and circumstances such that it should not recognize an acquired company's liabilities or accruals at fair value, the registrant should consider preclearing its proposed accounting with the SEC staff.

.78 Auditors should be aware of this fair value consideration in recording the acquired company's liabilities and should note that the AICPA has a task force that is addressing the issue of purchase accounting for insurance enterprises. The task force will provide guidance on a purchaser's initial and subsequent accounting for purchase business combinations involving enterprises that issue short or long duration contracts, covered under insurance guidance. The task force also will address the application of FASB Statements No. 141, *Business Combinations*, and No. 142, *Goodwill and Other Intangible Assets*, and the FASB Business Combinations II Project, *Applying the Purchase Method*.

Surplus Enhancement

.79 In all audits of generally accepted accounting principles (GAAP) basis and statutory accounting practices (SAP) basis financial statements, consideration should be given to the effects of unusual transactions as well as accounting differences on solvency and the adequacy of the company's SAP-basis capital and surplus. You should evaluate transactions that materially affect SAP-basis income or surplus, or transactions for which the effects on SAP-basis financial statements would be substantially different from the effects on GAAP-basis financial statements. That evaluation is especially important when an insurer's surplus is at or near minimum levels or if an insurer's risk-based capital ratio is at or near a regulatory action or control level.

.80 In addition, you should be alert to significant and unusual transactions or events at or near year end that may require significant judgment about the proper accounting treatment, including the following:

- Financially oriented reinsurance transactions
- "Parking" of securities
- Loaning or borrowing securities
- Intercompany transactions
- Transactions involving special-purpose entities
- Asset swaps
- Asset reclassifications
- Other types of potential "window dressing" transactions

.81 SOP 94-1, *Inquiries of State Insurance Regulators*, as amended by SOP 01-5, *Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification*, requires that, if a permitted accounting practice is material to an insurance enterprise's financial statements, the auditor obtain sufficient competent evidential matter to corroborate management's assertion that the accounting treatment is permitted. In many situations, that requirement will cause the auditor to obtain written confirmation, on an annual basis, from the domiciliary state insurance department that the accounting practice continues to be permissible.

.82 If the financial effect of such permitted practices is material, either individually or in the aggregate, to a company's SAP-basis surplus, sufficient competent evidential matter should be received before the issuance of an auditor's report on either the company's GAAP-basis or SAP-basis financial statements. If you are unable to obtain such competent evidential matter for material permitted accounting practices, you should consider a qualification or disclaimer in your opinion on the GAAP-basis and the SAP-basis financial statements due to a scope limitation in accordance with SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508), as amended.

Money Laundering

.83 Money laundering is the funneling of cash or other funds generated from illegal activities through legitimate businesses to conceal the initial source of the funds. Money laundering is a global activity and, like the illegal activities that give it sustenance, it seldom respects local, national, or international jurisdiction.

Money Laundering and Financial Statements

.84 Money launderers tend to use the business entity more as a conduit than as a means of directly expropriating assets. For this reason, money laundering is far less likely to affect financial statements than other types of fraud such as misappropriations, and consequently money laundering is unlikely to be detected in a financial statement audit. In addition, other forms of fraudulent activity usually result in the loss or disappearance of assets or revenue, whereas money laundering involves the manipulation of large quantities of illicit proceeds to distance them from their source quickly and in as undetectable a manner as possible. However, money-laundering activities may have indirect effects on an entity's financial statements.

.85 Independent auditors have a responsibility under SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317), to be aware of the possibility that illegal acts may have occurred, indirectly affecting amounts recorded in an entity's financial statements. In addition, if specific information comes to the auditor's attention indicating possible illegal acts that could have a material indirect effect on the entity's financial statements, the auditor must apply auditing procedures specifically designed to ascertain whether such activity has occurred.

.86 Possible indications of illegal acts include the following:

- Transactions that appear inconsistent with a customer's known legitimate business or personal activities or means; unusual deviations from normal account and transaction patterns.
- Situations in which it is difficult to confirm a person's identity.
- Unauthorized or improperly recorded transactions; inadequate audit trails.
- Unconventionally large currency transactions, particularly in exchange for negotiable instruments or for the direct purchase of funds transfer services.
- Apparent structuring of currency transactions to avoid regulatory recordkeeping and reporting thresholds (such as transactions in amounts less than \$10,000).
- Uncharacteristically premature redemption of policies, particularly with requests to remit proceeds to apparently unrelated third parties.
- The purchase of large cash value policies, soon followed by heavy borrowing against them.
- Large lump-sum payments from abroad.
- Insurance policies with values that appear to be inconsistent with the buyer's insurance needs or apparent means.
- Use of many different firms of auditors and advisers for associated entities and businesses.
- Forming companies or trusts that appear to have no reasonable business purpose.

When an auditor becomes aware of information concerning a possible illegal act, SAS No. 54 requires him or her to obtain from management—at a higher level than those employees potentially involved—information on the act's nature, the circumstances in which it occurred, and its possible effect on the client's financial statements.

.87 *Section 10A of the Securities Exchange Act of 1934.* The Private Securities Litigation Reform Act of 1995, among other things, amended the Securities Exchange Act of 1934 (the Exchange Act) to add section 10A. This section requires that each audit under the Exchange Act include procedures regarding the detection

of illegal acts, the identification of related-party transactions, and an evaluation of the issuer's ability to continue as a going concern. Section 10A also codified certain then-existing professional auditing standards regarding the detection of illegal acts by issuers and imposed expanded obligations on auditors to report in a timely manner to management any information indicating that an illegal act has or may have occurred. The auditor must ensure that the audit committee or board of directors is adequately informed of an illegal act, as broadly defined by section 10A, unless the illegal act is clearly inconsequential.

.88 In addition, section 10A requires the issuer to notify the SEC within one business day after the auditor informs the issuer's board of directors that the auditor reasonably expects either to resign from the audit engagement or to modify its audit report due to an illegal act that has a material effect on the issuer's financial statements for which appropriate remedial action has not been taken by senior management and the board of directors. If the issuer does not notify the SEC within that period, the auditor, within the next business day, must provide the SEC directly a copy of the illegal acts report (or documentation of any oral report) that it gave to the board. Section 10A provides for cease-and-desist and civil money penalties to be imposed against auditors who willfully fail to provide the required reports. Auditors should consider the advice of legal counsel when addressing possible acts subject to Section 10A.

Federal Money Laundering Regulations

.89 The Bank Secrecy Act (BSA), enacted to address the problem of money laundering, authorizes the U.S. Department of the Treasury to issue regulations requiring financial institutions to file reports, keep certain records, implement anti-money laundering programs and compliance procedures, and report suspicious transactions to the government (see 31 CFR Part 103). Failure to comply with BSA reporting and recordkeeping provisions may result in the assessment of severe penalties. Insurance companies are defined as financial institutions under the Act (Title 31 USC 5312(a)(M)). Prior to the USA PATRIOT Act, insurance companies were not subject to BSA.

.90 On October 26, 2001, President Bush signed into law the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001. This law, enacted in response to the terrorist attacks of September 11, 2001, was intended to strengthen our nation's ability to combat terrorism and prevent and detect money-laundering activities in all financial institutions. This meant that for the first time, the insurance industry would be made subject to federal anti-money laundering rules and requirements. Broad authority to develop anti-money regulations applicable to each of the various segments of the financial services industry was delegated to the Treasury Department.

.91 On July 17, 2002, the Treasury Department, along with the Federal Deposit Insurance Corporation (FDIC), Federal Reserve Board, National Credit Union Association (NCUA), Office of the Comptroller of the Currency (OCC), Office of Thrift Supervision (OTS), Commodity Futures Trading Commission, and the SEC, issued proposed rules that would require certain financial institutions to establish minimum procedures for identifying and verifying the identity of customers seeking to open new financial accounts. These proposed rules implement Section 326 of the USA PATRIOT Act, which directs the issuance of regulations requiring financial institutions to implement reasonable procedures for (1) verifying the identity of any person seeking to open an account, to the extent reasonable and practicable; (2) maintaining records of the information used to verify the person's identity; and (3) determining whether the person appears on any list of known or suspected terrorists or terrorist organizations. Final rules implementing Section 326 were effective on October 25, 2002.

.92 Unless exempted by regulation, financial institutions must establish an anti-money-laundering compliance program, including, at a minimum:

- The development of internal policies, procedures, and controls; these should be appropriate for the level of money laundering risk identified.

- The designation of a compliance officer; the officer should have appropriate training and background to execute their responsibilities. In addition, the compliance officer should have access to senior management.
- An ongoing employee training program; a training program should match training to the employees' roles in the organization and their job functions. The training program should be provided as often as necessary to address gaps created by movement of employees within the organization and turnover.
- An independent audit function should test procedures.

.93 Additionally, on January 4, 2002, interim guidance was issued to financial institutions on how to comply with two other anti-money-laundering provisions of the Act. Effective December 25, 2001, financial institutions are prohibited from providing correspondent accounts directly to foreign shell banks and are required to take steps to ensure that correspondent accounts are not being used indirectly to provide banking services to such shell banks. A "prohibited" shell bank is one that has no physical presence in a country. This excludes a shell bank that is affiliated with a U.S. or foreign bank that has a physical presence and is regulated. Additionally, financial institutions are required to keep records of the owners of foreign banks to which they provide correspondent accounts and of the foreign banks' agent designated to accept service of legal process.

Declines in the Value of Securities

.94 Major equity markets in the United States and around the world have experienced significant declines during 2002. U.S. investors are affected by market volatility related to recent, well-publicized corporate scandals and business failures, and troubled economies in various places worldwide.

.95 For accounting purposes, an impairment occurs when the fair value of an investment is lower than the cost of that investment. Impairments are either (1) temporary or (2) other than temporary. GAAP and statutory accounting principles (specifically, in accordance with the *NAIC Accounting Practices and Procedures Manual*) require that a loss be realized for other than temporary impairments of the value of investments. Significant judgment is involved in determining whether a decline in fair value is temporary or reflects conditions that are more persistent. Evidence should support management's assertion that a decline in fair value is only temporary.

Determination of Impairment

.96 **Debt and Marketable Equity Securities.** FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, discusses accounting for impairment losses recognized when fair value of a security is below cost and when that condition is "other than temporary." Management should determine whether a decline in fair value is other than temporary. If a decline is judged to be other than temporary, the cost basis of the individual security should be written down to the fair value as a new cost basis and the amount of the write-down should be included in earnings (trading securities fair value adjustments are already included in earnings). The new cost basis should not be changed for subsequent recoveries in fair value.

.97 Management's assessment of a marketable security should begin with the contemporaneous market price because that price reflects the markets' most recent evaluation of available information. Then objective evidence should be considered, such as—

- Adverse financial conditions of a specific issuer, segment, industry, region, or other variable.
- Management's ability and intent to hold the security for a period of time sufficient to recover the carrying value. Longer anticipated recovery periods give rise to uncertainty that the decline in fair value is temporary.
- Length of time that the market price has been less than cost.

- Financial condition and near-term prospects of issuer, including any specific adverse events that may influence the issuer's operations.
- Realization of a loss on subsequent disposition of the investment.
- Elimination or reduction in dividend payments, or scheduled interest and principal payments are in default.
- Rating agency downgrade of a debt security.
- Decrease in expected cash flows of a debt security.

.98 Management should display a systematic methodology that includes documentation of the factors considered. Such methodology should ensure that all available evidence concerning declines in market value below cost will be identified and evaluated in a disciplined manner by responsible personnel.

.99 *Beneficial Interests.* Certain investments, such as asset-backed or mortgage-backed obligations, represent purchased or retained beneficial interests. EITF Issue No. 99-20, *Recognition of Interest Income and Impairments on Purchased and Retained Beneficial Interest in Securitized Financial Assets*, addresses how to determine whether an impairment exists on these types of obligations. The issue's consensus requires that if the amount of (1) present value of estimated cash flows plus actual cash received since last measurement is less than (2) the present value of estimated cash flows at last measurement, for a reason other than changes in interest rates, an impairment loss must be recognized. The consensus sets out the guidance for selection of discount rate and measurement of the loss to be recognized.

.100 *Equity and Cost Method Investments In Common Stock.* Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, discusses loss recognition for other than temporary declines in the value of equity method investments (which could be applied by analogy to cost method investments). Evidence to consider would include expected future cash flows from dividends or other distributions or sale to an unrelated party, investees' inability to sustain earnings, quoted market prices (if any), or other factors evidencing the investor's inability to recover the carrying value of the investment.

.101 *Other Items.* FASB Statements No. 114, *Accounting by Creditors for Impairment of a Loan*, and No. 118, *Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures*, address accounting for impairments of loans, such as mortgage loans. FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, addresses accounting for impairment on long-lived assets (excluding financial instruments), which would include real estate.

.102 FASB Statements No. 114 and No. 118 require that a loss be recognized if it is probable that the creditor will be unable to collect all amounts due pursuant to a loan agreement's contractual terms. FASB Statement No. 144 requires that a long-lived asset or asset group shall be tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. An impairment loss shall be recognized if the carrying amount of a long-lived asset or asset group is not recoverable and exceeds its fair value. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of undiscounted cash flows expected from the use and disposition of the asset.

.103 *Statutory Accounting.* Determining whether impairment has occurred on an investment under the NAIC *Accounting Practices and Procedures Manual* is similar to GAAP as described above. Management needs to consider all available evidence in determining whether an impairment exists and if that impairment is other than temporary. For each type of investment, specific measurement criteria are set out in the Statements of Statutory Accounting Principles. Differences generally do not arise between GAAP and statutory accounting principles regarding the timing of an impairment loss other than for securities subject to EITF Issue No. 99-20.

Audit Implications

.104 SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332.48), provides guidance for auditing derivative and investments in securities. SAS No. 92 indicates the following:

The auditor should evaluate (a) whether management has considered relevant information in determining whether factors exist and (b) management's conclusions about the need to recognize an impairment loss. That evaluation requires the auditor to obtain evidence about such factors that tend to corroborate or conflict with management's conclusions. When the entity has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the entity has appropriately followed generally accepted accounting principles.

Deferred Acquisition Costs

.105 Under GAAP, commissions, allowances, and other costs that vary with and are primarily related to the acquisition of new and renewal business are generally deferred and amortized. These deferred amounts, referred to as deferred acquisition costs (DAC), are recorded as an asset on the balance sheet and amortized to income in a systematic manner based on related contract revenues or gross profits (or gross margins as in SOP 95-1, *Accounting for Certain Insurance Activities of Mutual Life Insurance Enterprises*, contracts), as appropriate.

DAC Recoverability and Allocation

.106 Unamortized acquisition costs are subject to recoverability and loss-recognition testing as outlined in FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*. In addition, DAC should be allocated to or directly identified with contract types or lines of businesses so these costs can be amortized over the life of the related contracts. Auditors are reminded to assess DAC recoverability and DAC allocation on their audits. Some suggestions include:

- The auditor can review the recoverability of DAC by comparing GAAP net premium with gross premiums. For unfavorable results, review loss recognition studies by line of business or contract type for possible loss recognition situations.
- The auditor can review studies comparing actual and projected experience (gross profits, mortality, morbidity, persistency, investment yields, and expenses) with those assumed for adverse deviation from the original assumptions that may indicate potential loss-recognition situations.
- For identified loss recognition situations, the auditor can determine that DAC balances are appropriately reduced or that premium deficiency liabilities are accrued.
- The auditor can evaluate reasonableness and consistency of cost allocations to lines of business or contract types and obtain explanations for unusual items.

Further DAC Considerations

.107 *Amortization.* For investment contracts, universal life-type contracts, and participating policies of mutual insurers, FASB Statement No. 97 and SOP 95-1 require that DAC be amortized over the life of a book of business at a constant rate based on the present value of estimated gross profits (EGPs) or margins. In contrast to products accounted for under FASB Statement No. 60, for which reserving and DAC assumptions are "locked in" unless premium deficiency/loss recognition is triggered, assumptions used in the FASB Statement No. 97 and SOP 95-1 calculation of DAC are "unlocked" and are subject to periodic review. Accordingly, for FASB Statement No. 97 and SOP 95-1 products, management should regularly reevaluate the underlying assumption used to determine its "best estimates" of profits and revise DAC calculations as necessary. With each reporting period, DAC amortization should be revised to reflect the most current

estimates of gross profits. In light of current competitive market conditions and changing interest rates, the auditor may want to challenge management's persistency assumptions and future gross margins incorporated in these analyses.

.108 *Investment Returns.* For variable life insurance and annuity contracts, many companies use an approach, sometimes referred to as "reversion to the mean," where the investment return assumptions in the company's EGP model reflects investment return performance over the remaining expected life of the contract such that investment return performance over the entire life of the contract achieves the company's initial expected long-term growth rate given past market performance. Other companies assume significant near-term market corrections to return to modeled account balances or use similar adjustment methodologies that in the current market environment imply significant short-term positive market performance. When using these various approaches, companies may impose various judgmental limits on the return assumptions.

.109 Regardless of the approach used to develop investment return assumptions, the prolonged decline in the equity markets and the current interest rate environment require the auditor to challenge the reasonableness of management's best estimate assumptions, accounting estimation policies for selecting their assumptions (that is, when and how to adjust their assumptions), and whether those assumptions are consistent with assumptions the company uses for other purposes (for example, the company's financial plan). Items to consider may include composition of the portfolio, the long-term and short-term asset appreciation/growth rate assumptions, and the amortization period.

.110 For universal life and deferred annuity contracts and the general account component of variable contracts, companies must make assumptions about interest rates to be earned on fixed income investment.

.111 For further information on investment management, see the "Asset-Liability Management" section in this Alert.

.112 *Persistency and Lapse Rates.* Since an increasing number of life and annuity policies contain features that were previously uncommon in traditional policy offerings, historical persistency rates may not be indicative of future persistency rates. Given competitive market conditions in which consumers are attempting to maximize yields within their risk tolerance levels, the life and annuity markets have experienced high rates of policy replacement, both external and internal, in recent years. Accordingly, practitioners may want to challenge persistency assumptions used in the calculation of DAC amortization.

.113 *Fees and Expenses.* With the emergence of accommodations to meet competition, such as increases in crediting rates, bonus interest, persistency bonuses, immediate bonus credits, and decreases in administrative charges to customers, EGPs may have declined relative to prior years. In auditing DAC, the auditor may want to review assumptions used to estimate future gross profits for consistency with management's description of its business as well as other management analyses. If inconsistencies are identified, the auditor may want to consider their implications in the determination of DAC. To the extent it is determined that assumptions used do not represent management's best estimate, the auditor should propose that management adjust those estimates and record any required adjustment.

.114 *Deferral of Costs.* For costs that are initially being deferred in the current year, the auditor should consider whether costs indeed meet the criteria for acquisition costs in FASB Statement No. 60—that is, whether they vary with and are primarily related to the acquisition of new and renewal insurance contracts. Care must be exercised to note the difference between changes in estimates and changes in accounting policies for costs that are deferred. Given the SEC's concerns regarding the nature of acquisition costs being deferred, auditors should carefully consider their procedures in these situations.

.115 *DAC Related to Internal Replacements.* GAAP concerning the treatment of existing DAC related to internal replacements is unclear. FASB Statement No. 97 requires the write-off of existing DAC when a FASB Statement No. 97 universal life contract replaces a FASB Statement No. 60 traditional life insurance

contract. However, GAAP is silent about whether to write off or maintain DAC when a policy is replaced with a comparable product (for example, when a FASB Statement No. 97 deferred annuity replaces another FASB Statement No. 97 deferred annuity). To the extent an insurer follows a policy of maintaining DAC for policies replaced by another similar contract, management should document the rationale for its position and that such rollover DAC continues to be recoverable. The AICPA currently has a task force reviewing the matter of accounting by insurance enterprises for deferred acquisition costs on internal replacements other than those specifically referenced by FASB Statement No. 97. See the “On the Horizon” section of this Alert for further information.

Deferred Taxes
