.116 Auditors are reminded to assess the reasonableness of the deferred tax asset valuation allowance as it relates to such items as unrealized capital gains and losses and net operating and alternative minimum tax credit carryforwards. Deferred tax assets are reduced by a valuation allowance if, based on all available evidence (both positive and negative), it is more likely than not (a likelihood of more than 50 percent) that some portion or all of the tax benefit will not be realized. The weight given to the potential effect of negative and positive evidence should commensurate with the extent to which it can be objectively verified. Positive evidence includes tax-planning strategies (for example, strategies that would, if necessary, be implemented to accelerate taxable income to utilize expiring net operating loss carryforwards, change the character of temporary differences from ordinary to capital, or switch from tax-exempt to taxable investments). The valuation allowance recorded should be sufficient to reduce the deferred tax asset to the amount that is more likely than not to be realized.

Statutory Considerations

.117 It should be noted that under NAIC Codification, Statement of Statutory Accounting Practices (SSAP) No. 10, *Income Taxes*, establishes statutory accounting principles for current and deferred federal taxes, as well as foreign income taxes. The key change is that insurance companies are required to record deferred income taxes, subject to an admissibility test. While SSAP No. 10 created several implementation questions, the majority of these are addressed in Q&A 10, *A Guide to Implementation of SSAP No. 10 on Accounting for Income Taxes: Questions and Answers*. Particular attention should be paid to Q&A 10's discussion of the calculation of an insurance company's admitted deferred tax asset, the calculation and reporting of tax contingency reserves, the definition of “expected to be realized,” the use of tax-planning strategies, and the presentation and disclosure of income taxes in an insurance company's financial statements.

FASB Statement No. 133 Implementation Guidance

.118 The Derivatives Implementation Group (DIG) helps the FASB staff answer significant questions that companies face when implementing FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*.

.119 The FASB staff has issued guidance on numerous FASB Statement No. 133 implementation issues, and this guidance can be obtained from the FASB Web site at www.fasb.org. Following is a listing of the insurance-product-related topics that were addressed (through August 2002), together with a brief discussion of the nature of each issue and the date of FASB clearance. This list is intended to highlight to auditors of insurance companies those areas where the application of FASB Statement No. 133 may be required. In addition to the issues listed below, there are several other FASB Statement No. 133 implementation issues that are applicable to companies operating in all industries; such issues also may be relevant to an audit of an insurance company.

.120 A16—*Definition of a Derivative: Synthetic Guaranteed Investment Contracts (March 14, 2001)*. Synthetic guaranteed investment contracts meet the definition of *derivatives* in accordance with paragraph 6 of FASB Statement No. 133.

.121 B7—*Embedded Derivatives: Variable Annuity Products and Policyholder Ownership of Assets* (June 23, 1999). Traditional variable annuity products do not contain embedded derivatives that warrant separate accounting under FASB Statement No. 133 even though the insurer, rather than the policyholder, actually owns the assets.

.122 B8—*Embedded Derivatives: Identification of the Host Contract in a Non-Traditional Variable Annuity Contract* (revised September 25, 2000). Nontraditional variable annuity contracts are distinguished from traditional variable annuity contracts by the fact that investment risk associated with the assets backing the nontraditional variable annuity contracts is shared between the issuer and the policyholder. The host contract for a nontraditional variable annuity contract is the traditional variable annuity portion of the contract (that is, without the nontraditional embedded components).

.123 B9—*Embedded Derivatives: Clearly and Closely Related Criteria for Market Adjusted Value Prepayment Options* (December 6, 2000). The economic characteristics and risks of the embedded derivative (market-adjusted value prepayment option) in a market value annuity contract are clearly and closely related to the economic characteristics and risks of the host contract and therefore need not be bifurcated in accordance with paragraph 12 of FASB Statement No. 133.

.124 B10—*Embedded Derivatives: Equity Indexed Life Insurance Contracts* (July 28, 1999). The existence of a death benefit provision does not exclude the entire equity-indexed life insurance contract from being subject to FASB Statement No. 133 for either the issuer or the policyholder because the policyholder can obtain an equity-linked return by exercising the surrender option before death.

.125 B25—*Embedded Derivatives: Deferred Variable Annuity Contracts with Payment Alternatives at the End of the Accumulation Period*. Deferred variable annuity contracts may contain minimum benefit guarantees in either the accumulation or payout phases of the contract. This issue provides derivative accounting guidance for four separate minimum guarantee scenarios.

.126 Implementation guidance on this issue was originally posted to the FASB Web site on April 10, 2001. The effective date of the December 19, 2001, revisions to the implementation guidance is the first day of the first fiscal quarter beginning after January 9, 2002, the date that the revised FASB-cleared guidance was posted on the FASB Web site. Those revisions related to a period-certain-plus-life-contingent variable-payout annuity contract.

.127 B26—*Embedded Derivatives: Dual-Trigger Property and Casualty Insurance Contracts* (March 14, 2001). A property and casualty contract that provides for the payment of benefits and claims as a result of both an identifiable insurable event and changes in a variable would not contain an embedded derivative instrument that is required to be separately accounted for under FASB Statement No. 133 provided (1) benefits and claims are paid only if an identifiable insurable event occurs (for example, theft or fire), (2) the amount of the payment is limited to the amount of the policyholder's incurred insured loss, and (3) the loss is not virtually certain to occur.

.128 B27—*Embedded Derivatives: Dual-Trigger Financial Guarantee Contracts* (March 14, 2001). A financial guarantee insurance contract for which payment of a claim is triggered only by the occurrence of the insured's credit losses exceeding a specified level on its loans held (though the amount of the payment is affected by the credit losses in a customized pool of loans by third parties exceeding the same specified level) is an insurance contract that is not subject to FASB Statement No. 133 requirements because it indemnifies the insured for its actual losses incurred above a specified level. A provision limiting claims in the event the insured's credit losses exceed the credit losses in a referenced pool or index of consumer loans represents a type of deductible, rather than an embedded derivative that warrants separate accounting under FASB Statement No. 133.

.129 B28—*Embedded Derivatives: Foreign Currency Elements of Insurance Contracts* (March 14, 2001). Contracts that pay claims in a currency different from the one in which the loss is measured at a predetermined contract exchange rate are not deemed to have an embedded foreign currency derivative.

.130 B29—*Embedded Derivatives: Equity-Indexed Annuity Contracts with Embedded Derivatives* (March 14, 2001). Equity-indexed annuities that contain “point-to-point” or “ratchet design” features qualify as contracts with embedded equity derivatives that must be bifurcated and reported at fair value in accordance with paragraph 12 of FASB Statement No. 133.

.131 B30—*Embedded Derivatives: Application of Statement 97 and Statement 133 to Equity-Indexed Annuity Contracts*. Equity-indexed annuities contain a debt instrument with an embedded (equity option) derivative. Upon receipt of the consideration for the equity-indexed contract, the issuer is required to allocate a portion of the consideration to the derivative and the remainder to a fixed annuity host contract. Interest credited and changes in the fair value of the derivative should be recognized in earnings. The host contract should be accreted to the minimum account value at the end of the contract using the effective yield method. A minimum liability shall not be recorded if, prior to the maturity of the contract, the aggregate of the host account value and the market value of the derivative is less than the value of the contract on a FASB Statement No. 97 basis (that is, without bifurcating the derivative).

.132 B31—*Embedded Derivatives: Accounting for Purchases of Life Insurance* (July 12, 2001). FASB Technical Bulletin No. 85-4 prescribes the accounting for life insurance contracts commonly referred to as COLI (corporate-owned life insurance), BOLI (business-owned life insurance), and key-man insurance. This accounting treatment is applicable even though these insurance contracts include derivative-like provisions that would otherwise require separate accounting as derivatives under paragraph 12 of FASB Statement No. 133.

.133 C1—*Scope Exceptions: Exception Related to Physical Variables* (February 17, 1999). If a contract contains a payment provision that requires the issuer to pay to the holder a specified dollar amount based on a financial variable, the contract is subject to the requirements of FASB Statement No. 133 because it would not meet the exclusion in paragraph 10(e)(1) of FASB Statement No. 133.

.134 C7—*Scope Exceptions: Certain Financial Guarantee Contracts*. For financial guarantee contracts, the scope exception in paragraph 10(d) of FASB Statement No. 133 does not apply if such contracts do not require exposure to and incurrence of a loss as a precondition for payment. Furthermore, to qualify for the scope exception in paragraph 10(d), the compensation paid under such contracts cannot exceed the amount of the losses incurred by the guaranteed party.

.135 The FASB initially cleared this issue on July 28, 1999; however, at the March 13, 2002 meeting, the FASB decided to amend paragraph 10(d) of FASB Statement No. 133. That amendment will be included in an exposure draft (ED) containing various amendments of FASB Statement No. 133. Accordingly, the guidance in this issue may be revised or rescinded if a proposed amendment to FASB Statement No. 133 is finalized.

.136 G4—*Cash Flow Hedges: Hedging Voluntary Increases and Interest Credited on an Insurance Contract Liability* (July 28, 1999). FASB Statement No. 133 would permit an insurance company to qualify for cash flow hedge accounting if it is hedging the possibility that it may need to voluntarily increase the interest rate used to credit interest on certain whole life, universal life, repetitive premium variable annuity, and single premium variable annuity contract liabilities. However, to qualify for cash flow hedge accounting, changes in the hedged interest payments attributable to the hedged risk must be sufficiently correlated with the changes in the cash flows of the hedging derivative.

Special Purpose Entities

.137 On July 1, the FASB issued an ED of a proposed interpretation entitled *Consolidation of Certain Special-Purpose Entities, an Interpretation of ARB 51*. If issued in a final interpretation, the provisions of the ED would establish new guidance on the accounting and reporting for the consolidation of special-purpose entities (SPEs). The provisions of the proposed guidance are required to be applied by all entities (excluding

not-for-profit organizations) that are involved with an SPE. Insurance companies may participate in SPEs through investing in structured investments, such as asset-backed securities, synthetic asset-backed securities and catastrophe bonds, certain structured reinsurance deals, joint ventures without substantive operations, financial guarantees, debt issuance vehicles, or limited partnerships.

.138 See the AICPA general *Audit Risk Alert*—2002/03 [AAM section 8010] for a detailed discussion of SPEs.

Two-Step Securitization Required

.139 Nonbank securitizers tend to use a two-step process to structure many securitizations to satisfy the isolation requirements of FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. FASB Statement No. 140 requires that transferred assets must be put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. If transferred assets are not sufficiently isolated, the transfers will not qualify for sale treatment under GAAP, and the transferred assets must be reported as assets on the entity's balance sheet. The two-step approach solves the problem of complying with this isolation requirement.

.140 However, some entities may use a single-step approach when securitizing. This single-step approach makes the securitization vulnerable to an arcane legality called an "equitable right of redemption." This legality might theoretically permit a transferor to recover transferred assets, which is at odds with FASB Statement No. 140's isolation requirement. Recent FASB guidance requires transferors to utilize the two-step approach to structure many securitizations (assuming that the goal is to account for the securitization as an off-balance-sheet sale). The change will affect many deals, particularly revolvers and deals that feature securities issued in debt form.

Steps for Securitization

.141 What are the steps for the proper isolation of a securitization?

1. The parent (*P*) establishes a wholly owned subsidiary (*S*), carefully designed to be bankruptcy remote. *P* transfers assets to *S*, and a payable arises for *S*. Even without the exchange of cash, lawyers deem this transfer a true sale. As a result, accountants are content that the transaction satisfies the isolation requirement of FASB Statement No. 140. However, at this point, no funds have been raised and securitization has not yet occurred.
2. In step 2, *S* transfers assets to the Issuer (*I*) for the exchange of cash and a retained interest in *I*'s assets. *I* is a securitization vehicle (often but not necessarily a qualifying special purpose entity (QSPE)). Step 2 introduces credit enhancements so the retained interest may be subordinated to *I*'s senior interests or *S* may be entitled to reserve fund proceeds if credit losses aren't above expectations. Enhancements such as these leave doubt that step 2 is a true sale alone. Instead step 2 might be judged only a secured borrowing, falling short of FASB Statement No. 140 criteria.
3. Subsequent to step 2, *I* may issue assets to third-party beneficial interests in exchange for cash and use the funds received to purchase assets (for example, pools of credit card balances from the bank).

.142 FASB Statement No. 140 permits an aggregate holistic view of the first two steps for an isolated securitization transaction and rules that isolation has been met because of the first step. However, many entities have set up transactions without step 1; with *P* transferring assets directly to *I*, with *I* being only a QSPE that is not bankruptcy remote, rather than an isolated subsidiary.

Transition

.143 To restructure current deals, entities usually must obtain the affirmative approval of a majority of investors in each of the beneficial interests (step 3). Therefore, transition time will end on the earlier of obtaining the necessary investor approvals or five years subsequent to the publication of FASB Technical

Bulletin No. 01-1, *Effective Date for Certain Financial Institutions of Certain Provisions of Statement 140 Related to the Isolation of Transferred Financial Assets*. This bulletin was issued to provide transitional relief to entities that are faced with some difficult logistical consequences of the new two-step securitization requirement.

.144 Use the following table to see when an entity must apply the proposed transition provision.

<i>The parent (P) transfers assets directly to an Issuer (I) in a single-step securitization and:</i>	<i>FASB Statement No. 140 Transition Rules</i>	<i>Transition Guidance of Technical Bulletin</i>
No assets are transferred and no beneficial interests are issued after March 31, 2001.	FASB Statement No. 140 does not apply. Continue to account for the old transfers under accounting standards prevailing at the time of the transfer.	None needed.
Assets are transferred after March 31, 2001, pursuant to pre-March 31, 2001, commitments to third-party beneficial interest holders (e.g., a revolving commitment in a credit card deal). No new beneficial interests issued after March 31, 2001.	FASB Statement No. 140 does not apply. Account for the committed transfers under accounting standards prevailing at the time of the commitment.	None needed.
Assets are voluntarily transferred after March 31, 2001 (e.g., not pursuant to a commitment) and new beneficial interests are issued.	Transfer requirements of FASB Statement No. 140 apply for post March 31, 2001, transfers. If the Issuer is a QSPE, FASB Statement No. 140 QSPE guidance applies.	Yes. The isolation provisions of FASB Statement No. 140 continue to apply to transfers. Additional transition time may be available.

.145 FASB notes that many series of beneficial interests outstanding today will have paid off within the five-year window, eliminating the need for the entity to obtain approval from these series holders. However, the one condition that must be met before an entity can benefit from additional transition rules is that all new beneficial interests issued after the publication of the technical bulletin must permit the use of a two-step transfer.

Auditing Considerations

.146 The structure of transactions must be examined for legal isolation requirements and the timing of transactions will need to be scrutinized for proper compliance.

.147 The value of retained interests in securitizations must be supported by objectively verifiable documentation of the assets' fair market value, using reasonable, conservative valuation assumptions. Auditors should determine that an entity complies with the accounting requirements encompassed in FASB Statement No. 140, and FASB Technical Bulletin No. 01-1, *Effective Date for Certain Financial Institutions of Certain Provisions of Statement 140 Related to the Isolation of Transferred Financial Assets*.

.148 Additionally, the Audit Issues Task Force issued Auditing Interpretation No. 1, "The Use of Legal Interpretations As Evidential Matter to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140," of SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 9336.01-.21). The guidance reflects changes in accounting guidance that has occurred since the 1998 interpretation. For a copy of the interpretation, visit the AICPA Web site at www.aicpa.org/members/div/auditstd/announce/index.htm.

SEC Disclosure Information

.149 The AICPA Insurance Liaison Task Force understands from comment letters and discussions with the SEC staff that the following disclosure areas should be improved for filings starting in 2002.

Loss Reserves

.150 The SEC staff desires improved explanations for changes in reserve estimates. More specifically, the staff wants disclosure about changes in estimates by line of business, better explanations of the facts involved in the estimates or new information since the last report date underlying the improved insight on estimates, and a more robust discussion of the company's remaining exposure to uncertainty. With respect to the last point, the SEC staff is concerned that investors place a higher degree of precision on loss reserve estimates than exists. Therefore, investors should be provided information relating to uncertainties inherent in the estimates. This disclosure should not be a boilerplate discussion of reserves, rather, it should address the specifics of what "keeps management up at night."

Other Than Temporary Impairments of Securities

.151 The SEC staff mentioned that discussion should include the company policy for evaluating other than temporary impairments, the amount of impairment, how the impairment was measured, as well as the factors that gave rise to the impairment and whether those factors would affect other investments. The SEC staff expects this level of disclosure each quarter for all material impairments given current market conditions.

Realized Losses on Investments

.152 Discussion should include the amount of loss and the fair value at the date of sale as well as the reasons for sales if the company previously asserted the ability and intent to hold the investment to maturity, in order to justify the lack of an impairment loss. The SEC staff expects this level of disclosure each quarter for all material losses given current market conditions.

Unrealized Losses on Investments

.153 Discussion should include concentrations of securities with a loss. Additionally, the company should disclose the length of time that securities have been under water, in table format, by class of security, and broken out between investment and noninvestment grade investments. The SEC staff expects this level of disclosure each quarter for all material losses given current market conditions.

Accounting Policy Disclosures

.154 The SEC staff noted that, in general, registrants should provide more specific information regarding critical accounting policies, especially if the policies are in areas where there is known diversity in practice, such as for guaranteed minimum death benefits.

Asset-Liability Management

.155 Most insurance companies have separate investment departments responsible for managing a company's funds that are available for investments. Some insurance companies outsource the practice to vendors. In either case, investments need to be planned so their maturities match their claims payment patterns. This is generally referred to as *asset-liability management* or *asset/liability matching*—that is, funds are invested so the income from these investments plus maturities will meet the ongoing cash flow needs of the company. This matching approach requires a correct mix of long- and short-term investments.

.156 The rate environment has unexpectedly changed drastically over the past few years. In 2001, the FRB cut rates nine times, for a total of 450 basis points. The short-term rate was 2.0 percent in October 2001,

held at 1.75 percent throughout the first three quarters of 2002 and finally was reduced to 1.25 percent in November 2002, the lowest rate in 41 years. However, prior to 2001, the opposite was occurring and the FRB had raised rates six times over a period of 12 months. The September 11 events increased cash outflow via claims payments for many insurance companies, while at the same time the corresponding low interest rate environment decreased the asset values and/or income of insurance company investments, complicating the prior year's projected asset/liability balance. This is especially true of mortgage assets—see the next section in this Alert titled “Mortgage News” for more information. Insurance industry portfolio management is no longer business as usual. The asset-liability mix is constantly changing and investment options are expanding and becoming more complex. One must monitor portfolio risk and performance in relation to accounting, tax, and regulatory concerns.

.157 Dramatic interest rate swings may continue to occur and have tremendous impact on an entity's revenue streams, asset values, liquidity, margins, share, and loan demand. It is essential that management plan for these changes. Solid asset-liability management procedures, financial planning, and investment strategy come into play. With proper planning and solid policies and procedures in place, institutions can manage these changes and properly assess the impact of alternative actions. Without proper planning, there exists serious risk of financial problems, including unnecessary losses and declines in asset values.

.158 Whether the insurance company has an in-house asset-liability management (ALM) program or has outsourced ALM to an outside vendor, it is important that management understand the ALM program and its results. If the institution has an in-house program, management needs assurance that the program is run correctly. If an outside ALM vendor is used, management needs to understand the vendor's modeling results and the assumptions used. The degree of sophistication needed varies with the complexity of the balance sheet.

.159 ALM programs can be complex and require sophisticated assumptions to be properly run. Personnel running ALM programs may not fully understand the intricacies of the model or may not have developed reasonable assumptions to produce reasonable results. Therefore, financial planning may be based on faulty premises and data. A couple of typical examples of ALM modeling errors include the following:

- *Inaccurate or unreliable prepayment assumptions.* Has the institution established prepayment assumptions in the model? Are the assumptions reasonable and periodically updated? Do prepayment speeds change with interest rates? Does management know what the prepayment assumptions are? If the answer to any of these questions is no, the ALM model's output may be suspect.
- *No core deposit or decay rates.* Decay rates are the assumed maturity of nonmaturity deposits. If decay rates are not reasonable, the model results will not be reliable.
- *Inaccurate input of data.* Detail reports should be run to review the data for errors in the way the model is run and to determine whether the data has been inaccurately input into the model. One basic test is to compare the model results with actual history.

.160 Management needs to ensure that any ALM modeling is performed reasonably and accurately to analyze important variables. These include portfolio market value, interest rate sensitivity, and earning potential, as well as the simulation of income, balance sheet, duration, risk-based capital requirements, and cash flow implications over a variety of scenarios and time horizons. Asset allocation studies to determine optimal performance within prescribed risk tolerance and statutory limitations are also paramount. In the current low-interest rate environment, insurance companies need to be diligent in their financial management process and thoroughly aware of financial and interest rate risks. Each company needs to carefully evaluate its investment and financial decisions.

Mortgage News

.161 While no one could picture any year surpassing the mortgage boom of 2001, analysts are now predicting that 2002 will exceed the prior year's millennium mortgage madness. Mortgage interest rates have

spiraled down to those existing during the Eisenhower years. This is not surprising, as history shows that strong housing markets follow strong stock markets by approximately two years.

.162 It is possible that interest rates will hit bottom by the end of 2002. A large portion of an insurance company's investment portfolio may consist of commercial, real estate, and residential loans. Unfortunately, many institutions now hold many long-term, fixed-rate mortgages in an effort to keep net interest margins from falling further than they have this year. Therefore, the refinance boom has left many institutions with high concentrations of fixed-rate, 15- and 30-year mortgages because debtors like to lock in long-term low rates during a decline. Markets for variable rates have suffered.

Some Audit Considerations

.163 You may need to consider whether your client has adequate ALM procedures in place to understand and manage its market and liquidity risk in a falling interest rate environment. Institutions now have asset heavy portfolios on their books that have been hard to sell during the low rate economy. These assets are risky for two reasons. First, since some institutions lend long term and borrow short term, the asset/liability balance may be detrimental when the cost of borrowing increases during a rise in rates. (Many long-term assets are now locked in at rates unheard of two years ago.) Second, overvalued home appraisals during the current housing market boom may lead to the receivables and foreclosed assets themselves being overvalued.

.164 Additionally, voluminous low-interest-rate refinancing will affect your client's operations and earnings. Profits may suffer substantial decline and could lead to going-concern implications. Also, management may experience intense pressure from stakeholders to maintain profitability, thereby increasing the institution's risk of fraud.

.165 Although the loan origination and servicing fee revenues earned may increase due to an influx of new customers, margins may decrease as interest rates decline. Institutions are subject to prepayment risk in falling rate environments. Mortgage loans may be prepaid by a debtor to refinance the obligation at a new, lower rate. If an institution does not have an effective system for generating new mortgage loans in a period of significant prepayments, the institution's future investments may be negatively affected. Prepayments of assets carrying the old, higher rates reduce the institution's net income and overall asset yields. In addition to loans, other items such as securities, deposits, debts, and derivatives all depend on interest rates.

.166 Finally, many loans have been refinanced. Second-mortgage lenders rank below first-lien holders in collection efforts, and the holder of the second lien is not able to collect until the first lender has been paid. Therefore, one should note the creditor status of the client's portfolio base.

Mortgage Loan Servicing and Secondary Market Sales

.167 Some institutions have been significantly increasing their real estate loan portfolios, as well as enhancing their servicing portfolios of loans sold in the secondary market with servicing retained by the institution. Institutions in recent years have been much more likely than in the past to retain servicing for loans sold to secondary market investors. Not only has the number of institutions that are servicing portfolios grown considerably, but the size and dollar amount of institutions' servicing has also increased. Conversely, the recent refinancing boom has adversely affected certain institutions, as borrowers have moved to other institutions in the highly competitive market.

.168 The value of associated mortgage-servicing rights (MSRs) is an important area for an auditor and may have a significant effect on a client's financial statements this year or in the near future.

Audit and Accounting Guidance

.169 Several publications provide guidance related to mortgage loan servicing:

- FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*
- The AICPA Audit and Accounting Guides *Banks and Savings Institutions and Audits of Credit Unions*
- SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*

.170 The FASB published a special report on February 15, 2001, that addresses the most frequently asked questions about FASB Statement No. 140. On April 19, 2001, the FASB staff published a set of questions and answers about isolation of financial assets transferred by entities, focusing on rights of redemption. Finally, on August 7, 2001, the FASB staff published a set of questions and answers about the limitations on the activities of a qualifying special-purpose entity set forth in paragraphs 35 through 44 of FASB Statement No. 140.

.171 For any insurance company that may have mortgage servicing operations, the auditor should evaluate whether the institution is complying with the relevant accounting requirements. The auditor should gain assurance that the financial institution is properly recording the asset (or liability), and gain or loss on sale when loans are sold with servicing retained. Assurances should also be made that the institution is properly amortizing the MSRs and that procedures are in place to properly assess fair value for potential impairment.

.172 Additionally, the various mortgage-related entities, such as the Department of Housing and Urban Development (HUD), Federal National Mortgage Association (FNMA), Federal Home Loan Mortgage Corporation (FHLMC, also known as Freddie Mac), and Government National Mortgage Association (GNMA, also known as Ginnie Mae) have various audit and reporting requirements.

.173 Another consideration is further activity related to the sales of such loans. As the income is recorded up-front at the sale date and the MSRs are amortized to expense in proportion to net servicing income, if the current level of sales activity is not sustained, the institution will be affected by the loss of such sales income.

.174 Apart from the proper accounting treatment for loans sold and for retained servicing, the auditor may also want to evaluate the internal control of the servicing operations. Your client will have numerous financial and compliance obligations and responsibilities, such as collecting and remitting loan payments, ensuring compliance with federal and state regulations covering escrow accounts, and other servicing requirements; compliance with the seller servicing agreement with a third party, such as Fannie Mae and Freddie Mac; properly collecting on delinquent accounts; and collecting and paying taxes and insurance. Failure to properly comply with any of these requirements could have serious financial impact on the institution.

Recent Regulatory Developments

Codification of Statutory Accounting Principles

.175 In 1999, the NAIC completed a process to codify statutory accounting practices for certain insurance enterprises. In 2002, the NAIC published the *Accounting Practices and Procedures Manual*, as of March 2002 (the revised Manual), which included modifications of and additions to the previously issued Manual (as of March 2001). The insurance laws and regulations of most states require insurance companies domiciled in those states to comply with the guidance provided in the revised Manual except as prescribed or permitted by state law. Most of the requirements of the revised Manual were effective for implementation on January 1, 2001. However, new statutory accounting guidance continues to be developed through a maintenance process that creates and clarifies statutory accounting principles promulgated by the NAIC. Four new SSAPs were effective for implementation on January 1, 2002:

1. SSAP No. 76, *Reporting on the Costs of Start-Up Activities*
2. SSAP No. 77, *Real Estate Sales—an Amendment to SSAP No. 40, Real Estate Investments*
3. SSAP No. 81, *Software Revenue Recognition*
4. SSAP No. 82, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use and Web Site Development Costs*

In addition, 30 new interpretations were adopted during 2001 and incorporated in the revised Manual.

.176 The Preamble of the revised Manual notes the following as the statutory hierarchy, which is not intended to preempt state legislative and regulatory authority:

- Level 1:
 - SSAPs, including GAAP reference material categories a, b, and c from the GAAP hierarchy
 - Category a includes FASB Statements and Interpretations, APB Opinions, AICPA Opinions, and AICPA Accounting Research Bulletins
 - Category b includes FASB Technical Bulletins, AICPA industry Audit and Accounting Guides, and AICPA Statements of Position
 - Category c includes consensus positions of the FASB EITF and AICPA Practice Bulletins
- Level 2:
 - Consensus positions of the Emerging Accounting Issues Working Group as adopted by the NAIC
- Level 3:
 - NAIC Annual Statement Instructions
 - NAIC Purposes and Procedures of the Securities Valuation Office Manual
- Level 4:
 - Statutory Accounting Principles Statement of Concepts
- Level 5:
 - GAAP reference material below Category c in the GAAP Hierarchy

.177 Prescribed statutory accounting practices are practices incorporated directly or by reference in state laws, regulations, and general administrative rules applicable to all insurance enterprises domiciled in a particular state. States have adopted the revised Manual in whole, or in part, as an element of prescribed statutory accounting practices in those states. If, however, the requirements of state laws, regulations, and administrative rules differ from the guidance provided in the revised Manual or subsequent revisions, those state laws, regulations, and administrative rules will take precedence.

.178 Permitted statutory accounting practices include practices not prescribed by the domiciliary state but allowed by the domiciliary state regulatory authority. An insurance enterprise may request permission from the domiciliary state regulatory authority to use a specific accounting practice in the preparation of the enterprise's statutory financial statements (1) if it wishes to depart from the prescribed statutory accounting practice or (2) if prescribed statutory accounting practices do not address the accounting for the transaction. Accordingly, permitted accounting practices differ from state to state, may differ from company to company within a state, and may change in the future.

Guidance for Auditors

.179 Insurance enterprises prepare SAP-basis financial statements in accordance with the accounting practices and principles prescribed or permitted by the insurance departments of their states of domicile.

These practices are considered to be an other comprehensive basis of accounting (OCBOA) under SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623).

.180 You should understand the accounting and reporting requirements of the revised Manual, as adopted by the domiciliary state insurance regulatory authority, and monitor the status of new authoritative guidance maintained and promulgated by the NAIC to evaluate its impact on insurance clients. Proposed guidance related to new statutory accounting principles can be accessed on the NAIC Web site at www.naic.org/1finance/sapwg/index.htm. Proposed guidance responding to questions of application, interpretation, or clarification of existing statutory accounting principles can be accessed on the NAIC Web site at www.naic.org/1finance/eaiwg/index.htm. In addition, the NAIC has created a password-protected Web site to enable holders of the revised Manual to download authoritative guidance adopted by the NAIC subsequent to the issuance of the revised Manual to keep abreast of changes to statutory accounting. This Web site may be accessed by the public at www.naic.org/1finance/SAPmenu.htm. The user identification and password to access this site is located on the front cover of the revised Manual.

.181 Appendix A-205 of the revised Manual, *Illustrative Disclosures of Differences between NAIC Statutory Accounting Practices and Procedures and Accounting Practices Prescribed or Permitted by the State of Domicile*, highlights disclosure requirements in statutory financial statements to reconcile net income and statutory surplus when state-prescribed or permitted statutory accounting practices differ from NAIC statutory accounting practices contained in the revised Manual. This reconciliation is required in both quarterly statements and the annual statements submitted to the NAIC, excluding single-state insurance writers.

Statement of Position 01-5

.182 In December 2001, the AICPA's Accounting Standards Executive Committee (AcSEC) issued SOP 01-5, *Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification*, to modify AICPA guidance affected by Codification.

.183 SOP 01-5 amends SOP 94-5, *Disclosures of Certain Matters in the Financial Statements of Insurance Enterprises*, and requires insurance enterprises to disclose, at the date each balance sheet is presented, beginning with financial statements for fiscal years ending on or after December 15, 2001, a description of the prescribed or permitted statutory accounting practice and the related monetary effect on statutory surplus of using an accounting practice that differs from either state-prescribed statutory accounting practices or NAIC statutory accounting practices.

.184 Those disclosures should be made if (1) state-prescribed statutory accounting practices differ from NAIC statutory accounting practices or (2) permitted state statutory accounting practices differ from either state prescribed statutory accounting practices or NAIC statutory accounting practices, and the use of prescribed or permitted statutory accounting practices (individually or in the aggregate) results in reported statutory surplus or risk-based capital that is significantly different from the statutory surplus or risk-based capital that would have been reported had NAIC statutory accounting practices been followed.

.185 SOP 01-5 includes the following auditing guidance that has been updated as a result of the completion of the NAIC Codification:

- SOP 95-5, *Auditor's Reporting on Statutory Financial Statements of Insurance Enterprises*
- SOP 94-1, *Inquiries of State Insurance Regulators*
- Auditing Interpretation No. 12, "Evaluation of the Appropriateness of Informative Disclosures in Insurance Enterprises' Financial Statements Prepared on a Statutory Basis," of SAS 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 9623.60–.77).

The auditing guidance included in the above has been approved by the Auditing Standards Board (ASB).

.186 SOP 01-5 is effective for annual financial statements for fiscal years ending on or after December 15, 2001, complete sets of interim financial statements for periods beginning on or after that date, and audits of those financial statements.

Regulatory Observations: Access to CPA Audit Documentation

.187 The NAIC Financial Reporting Working Group has discussed with the AICPA-NAIC Task Force concerns related to an insurance regulator's access to an external auditor's audit documentation. An external auditor is required by the NAIC Model Audit Rule to provide timely access to or copies of audit documentation when requested by regulators.

.188 Interpretation No. 1, "Providing Access to or Copies of Audit Documentation to a Regulator," of SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 9339.01-.15), states, in part:

.02 *Interpretation*—When a regulator requests access to audit documentation pursuant to law, regulation or audit contract, the auditor should take the following steps:

- a. Consider advising the client that the regulator has requested access to (and possibly photocopies of) the audit documentation and that the auditor intends to comply with such request. (In some cases, the auditor may be required by law or regulation to confirm in writing that the auditor may be required to provide a regulator access to the audit documentation.)
- b. Make appropriate arrangements with the regulator for the review.
- c. Maintain control over the audit documentation, and
- d. Consider submitting the letter described in this Interpretation to the regulator.

.03 The auditor should make appropriate arrangements with the regulator. These arrangements ordinarily would include the specific details such as the date, time and location of the review. The audit documentation may be made available to a regulator at the offices of the client, the auditor, or a mutually agreed-upon location, so long as the auditor maintains control. Furthermore, the auditor should take appropriate steps to maintain control of the audit documentation. For example, the auditor (or his or her representative) should consider being present when the audit documentation is reviewed by the regulator. Maintaining control of audit documentation is necessary to ensure the continued integrity of the audit documentation and to ensure the confidentiality of client information.

Submitting the audit documentation transmittal letter referred to in Interpretation No. 1 to the regulator would provide clarity on the purpose and use of audit documentation. Interpretation No. 1 also addresses the necessity to maintain control and ownership of the audit documentation.

.189 Practitioners should be aware that the AICPA's task force on NAIC matters is actively working with an NAIC designated group of examiners to pursue ways to increase the examiners' reliance upon the statutory audit and use of underlying audit documentation. One aspect of this project involves development of protocols regarding regulatory access to the CPA's audit documentation prior to the completion of the statutory audit. In this regard, the task force understands from representatives of the NAIC that each state, as a requirement of the accreditation standard, is required to provide confidential treatment of the CPA's audit documentation prepared in connection with a statutory audit. The AICPA also is aware that a number of firms are planning to designate a contact person for regulator reference in pursuing resolution of questions with respect to these firm's individual engagements to perform statutory audits. Firms or individual practitioners performing statutory audits of regulated insurance entities who wish to designate a liaison should contact NAIC representative Annette Knief at (816) 783-8006 or Julie Glaszcz at (816) 783-8132.

Indemnification Clauses by CPAs

.190 In March 2002, the NAIC concluded its discussions on proposed revisions to the Model Audit Rule and voted to prohibit the use of release and indemnification clauses by CPAs who perform audits on statutory financial statements, beginning with 2002 audits. The revised language is as follows:

Section 7. Qualifications of Independent Certified Public Accountant

- A. The commissioner shall not recognize a person or firm as a qualified independent certified public accountant if the person or firm . . .
- (2) Has either directly or indirectly entered into an agreement of indemnity or release from liability (collectively referred to as *indemnification*) with respect to the audit of the insurer.

New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance

.191 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team and available at www.aicpa.org.

.192 Of the pronouncements and other guidance listed in the previous table, those having particular significance to the insurance industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.193 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A); amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333), as amended. The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1 (AU sec. 110.02).¹ However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.²

¹ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 312]), or fraud.

² Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statement in accordance with generally accepted auditing standards. Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), and Statement on Standards for Consulting Services (AICPA, *Professional Standards*, vol. 2, CS sec. 100) provide guidance to accountants relating to the performance of such services.

.194 The following is an overview of the content of the SAS No. 99, with references to paragraphs in the new fraud standard:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs 5 through 12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph 13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs 14 through 18.)
- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather information necessary to identify risks of material misstatement due to fraud, by:
 1. Inquiring of management and others within the entity about the risks of fraud. (See paragraphs 20 through 27.)
 2. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs 28 through 30.)
 3. Considering fraud risk factors. (See paragraphs 31 through 33, and the appendix, "Examples of Fraud Risk Factors.")
 4. Considering certain other information. (See paragraph 34.)
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs 35 through 42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs 43 through 45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence (see paragraph 46). The section requires the auditor to respond to the results of the risk assessment in three ways:
 1. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned (See paragraph 50.)
 2. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed (See paragraphs 51 through 56.)
 3. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls (See paragraphs 57 through 67.)
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs 68 through 74.) It also requires the auditor to consider whether identified misstatements

may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs 75 through 78.)

- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs 79 through 82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph 83.)

SAS No. 99 also includes an exhibit, "Management Antifraud Programs and Controls: Guidance to Help Deter, Detect, and Prevent Fraud," which has been developed to assist auditors in obtaining an understanding of programs and controls established by management to mitigate specific risks of fraud, or that otherwise help prevent, deter, and detect fraud. SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.195 The AICPA has developed a Practice Aid titled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*, which will be published by the end of 2002. The Practice Aid includes topics such as how the new SAS changes audit practice, characteristics of fraud, understanding the new SAS, best practices, and practice aids such as, specialized industry fraud risk factors, common frauds, and extended audit procedures. Auditors should be on the lookout for this new publication (see the section titled "Practice Aid *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guidance*" later in this Alert for more information).

SOP 02-1, Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code

.196 In May 2002 the ASB issued this SOP, which was developed to provide practitioners with guidance on performing agreed-upon procedures engagements that address annual claims prompt payment reports as required by the New Jersey Administrative Code. Practitioners should note that the engagement described in this SOP is designed only to satisfy the requirements of the Code. The procedures, as set forth in this SOP, are not necessarily appropriate for use in any other engagement.

Audit Guide Service Organizations: Applying SAS No. 70, as Amended

.197 This Guide (product no. 012772kk) provides guidance to service auditors engaged to issue reports on a service organization's controls that may be part of a user organization's information system in the context of an audit of financial statements. It also provides guidance to user auditors engaged to audit the financial statements of entities that use service organizations. Guidance on performing service auditors' engagements and using service auditors' reports in audits of financial statements is provided in SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), as amended.

Audit and Accounting Guide Audits of State and Local Governments (GASB 34 Edition)

.198 This new Guide (product no. 012662kk) addresses the audits of basic financial statements and consideration of required supplementary information (RSI) and supplementary information other than RSI (SI) prepared in conformity with the new governmental financial reporting model required by GASB Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*, and its related pronouncements.

.199 The new Guide is to be effective for audits of a state or local government's financial statements for the first fiscal period ending after June 15, 2003, in which the government does apply or is required to apply

the provisions of GASB Statements No. 34 or No. 35, *Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities*. Earlier application will be encouraged if a government issues financial statements that apply GASB Statements No. 34 or No. 35 after the Guide is issued. The AICPA's 1994 Audit and Accounting Guide *Audits of State and Local Governmental Units (Non-GASB 34 Edition)* (updated annually for conforming changes) will remain effective for audits of state and local governments for which the auditor is not required to apply or has not elected to early apply the provisions of the new Guide in accordance with its effective date provisions.

.200 The new Guide, like the previous Guide, applies to *all* state and local governmental entities. That scope requires an auditor to consult two guides when performing audits of governmental entities in certain industries. Specifically, the new Guide applies to public entity risk pools and hospitals and other health care providers, even though the audits of those entities also are subject to the guidance in the Audit and Accounting Guides *Audits of Property and Liability Insurance Companies* and *Health Care Organizations*, respectively. The new Guide explains how auditors of those entities should use the auditing guidance in both of the guides that apply to those entities. The new Guide also provides an expanded section on auditing public colleges and universities.

Practice Alert 02-2, *Use of Specialists*

.201 Auditors may encounter difficulty in determining the appropriate situations in which to use a specialist and, in those cases when a specialist is appropriately used, understanding the findings of the specialist. The purpose of Practice Alert 02-2 is to assist auditors in understanding their responsibilities both with respect to the use of specialists that have been engaged or employed by the audit client and the use of specialists engaged or employed by the audit firm.

Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*

.202 In connection with the issuance of SAS No. 99, the AICPA has developed a Practice Aid to help practitioners implement the new fraud guidance. *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (product no. 006613). The Practice Aid includes such topics as:

- How the new SAS changes audit practice
- Characteristics of fraud
- Understanding the new fraud SAS
- Best practices
- Practice aids such as:
 - Specialized industry fraud risk factors
 - Common frauds and extended audit procedures

The Practice Aid presents valuable guidance in helping practitioners understand and implement SAS No. 99.

New Accounting Pronouncements and Other Guidance

.203 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated With Exit or Disposal Activities</i>
FASB Statement No. 147	<i>Acquisitions of Certain Financial Institutions</i>
Audit and Accounting Guide	<i>Audits of State and Local Governments (GASB 34 Edition)</i> See the "New Auditing and Attestation Pronouncements Quality Control, and Other Guidance" section for more information.
SOP 01-5	<i>Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification</i>
SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>
Technical Practice Aids	<i>Software Revenue Recognition</i>
Questions & Answers	<i>FASB Statement No. 87, Employers' Accounting for Pensions</i>

.204 Of the pronouncements and other guidance listed in the previous table, those having particular significance to the insurance industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA literature, contact the member satisfaction center at (888) 777-7077 or go online at www.cpa2biz.com.

SOP 01-5, Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification

.205 This SOP amends SOP 94-5, SOP 94-1 and AICPA Auditing Interpretation No. 12, as a result of the completion of the National Association of Insurance Commissioners (NAIC) Codification of statutory accounting practices for certain insurance enterprises. This SOP is effective for annual financial statements for fiscal years ending on or after December 31, 2001, and complete sets of interim financial statements for periods beginning on or after that date and audits of those financial statements. If comparative financial statements are presented for fiscal years ending before December 15, 2001, the disclosure provisions of SOP 94-5 effective prior to this SOP apply to permitted statutory practices by the regulatory authority. See the "Recent Regulatory Developments" section of this Alert for more information on SOP 01-5.

SOP 01-6, Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others

.206 This SOP applies to any entity that lends to or finances the activities of others. For example, that arrangement may be a secured mortgage loan, an unsecured commercial loan or a financing arrangement that involves only extending credit to trade customers resulting in trade receivables. Those financing activities of all entities are included in the scope of this SOP. The SOP provides specific guidance for other types of transactions, such as securities purchases, for certain financial institutions listed in the scope paragraphs of the SOP. To the extent an entity is not considered such a financial institution, as described in those paragraphs, the other guidance provided is not applicable. In other words, only the guidance in this SOP related to the financial and lending activities is applicable for entities not considered to be financial institutions.

.207 SOP 01-6 reconciles and conforms, as appropriate, the accounting and financial reporting provisions established by the AICPA Audit and Accounting Guides *Banks and Savings Institutions*, *Audits of Credit Unions* and *Audits of Finance Companies*. The SOP also explicitly incorporates mortgage companies, corporate credit unions, and certain activities of insurance companies in its scope. This SOP will be incorporated in a new AICPA Audit and Accounting Guide, which will supersede the three aforementioned Guides. The new Guide is expected to be issued during the second quarter of 2003. See the SOP for effective date and transition information.

On the Horizon

.208 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your financial institution engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.209 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below. Readers should refer to information provided by the various standard-setting bodies for further information.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if available, your membership and subscriber number in the message.

Auditing Pipeline

New Framework for the Audit Process

.210 The ASB has exposed a suite of seven proposed SASs relating to the auditor's risk assessment process. The ASB believes that the requirements and guidance provided in the proposed SASs, if adopted, would result in a substantial change in audit practice and in more effective audits. The primary objective of the proposed SASs is to enhance the auditor's application of the audit risk model in practice by requiring:

- A more in-depth understanding of the entity and its environment, including its internal control, that would better enable the auditor to identify the risks of material misstatement in the financial statements and any steps the entity is taking to mitigate them.
- A more rigorous assessment of the risks of material misstatement of the financial statements based on that understanding.
- A better linkage between the assessed risks of material misstatement and the nature, timing, and extent of audit procedures performed in response to those risks.

.211 The exposure draft consists of the following proposed SASs:

- *Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards*
- *Audit Evidence*, which will supersede SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)
- *Audit Risk and Materiality in Conducting an Audit*, which will supersede SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)
- *Planning and Supervision*, which will supersede "Appointment of the Independent Auditor" (AICPA, *Professional Standards*, vol. 1, AU sec. 310), and SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)
- *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (Assessing Risks)*
- *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, which will supersede SAS No. 45, *Omnibus Statement on Auditing Standards—1983, section 313, "Substantive Tests Prior to the Balance-Sheet Date"* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and, together with the proposed SAS *Assessing Risks* will supersede SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319)
- *Amendment to SAS No. 39, Audit Sampling*

.212 In connection with this major initiative, the ASB and the International Auditing and Assurance Standards Board (IAASB) have formed a joint task force to develop these new standards jointly. These standards will represent a significant step toward converging U.S. and international auditing standards. The standard produced by this joint task force will form the basis for the ASB's U.S. standards. You should keep abreast of the status of these projects inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

Exposure Draft on Loans and Certain Debt Securities Acquired in a Transfer (Formerly Known as Purchased Loans and Securities)

.213 AcSEC has issued an exposure draft of a proposed SOP titled *Accounting for Loans and Certain Debt Securities Acquired in a Transfer*. This proposed SOP considers whether Practice Bulletin (PB) No. 6, *Amortization of Discounts on Certain Acquired Loans*, continues to be relevant given a number of FASB pronouncements issued subsequent to PB No. 6. The proposed SOP excludes originated loans from its scope. A final SOP is expected to be issued during December 2002.

Consolidation of Certain Special-Purpose Entities

.214 The FASB has issued an exposure draft of a proposed Interpretation, *Consolidation of Certain Special-Purpose Entities*, of Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements*. This proposed Interpretation would address consolidation by business enterprises of special-purpose entities (SPEs) to which the usual condition of consolidation described in ARB No. 51 does not apply because the SPEs have no voting interest or otherwise are not subject to control through ownership of voting interests. A final Statement is expected to be issued during the fourth quarter of 2002.

Amendment of FASB Statement No. 133 on Derivative Instruments and Hedging Activities

.215 The FASB has issued an exposure draft of a proposed Statement, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This proposed Statement would amend the definition of a derivative in paragraph 6(b) of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging*

Activities. This proposed Statement also would amend FASB Statement No. 133 for various decisions made as part of the Derivatives Implementation Group process. A final Statement is expected to be issued during the fourth quarter of 2002.

Exposure Draft on Nontraditional Long-Duration Contracts and Separate Accounts

.216 In July 2002, AcSEC issued for exposure, the draft SOP *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts*. The proposed SOP addresses the classification and valuation of liabilities as well as the disclosure for nontraditional annuity and life insurance contracts issued by insurance enterprises. It also discusses the classification, valuation, and disclosure of assets held in separate accounts of insurance enterprises.

.217 A final SOP would be effective for financial statements for fiscal years beginning after December 15, 2003, with earlier adoption encouraged. The SOP may not be applied retroactively to prior years' financial statements, and initial application should be as of the beginning of an entity's fiscal year. The exposure draft had 90-day comment period that ended October 31, 2002, and is available on the AICPA Web site at www.aicpa.org. AcSEC will begin discussing comment letters received at its December 2002 meeting.

Accounting for Deferred Acquisition Costs on Internal Replacements

.218 In July 2000, AcSEC's Planning Subcommittee approved a prospectus for an SOP project to provide authoritative guidance on accounting by life insurance enterprises for deferred acquisition costs on internal replacements other than those covered by FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. The FASB cleared the prospectus in November 2000. The task force has met several times with AcSEC and it is expected that an exposure draft will be issued during the first quarter of 2003.

Accounting for Purchase Business Combinations Involving Insurance Enterprises Including Certain Reinsurance Transactions That Are in Substance Business Combinations

.219 In September 2001, AcSEC's Planning Subcommittee approved a prospectus, subject to FASB clearance, of a project to develop a SOP that will provide guidance on how to apply FASB Statements No. 141, *Business Combinations*, and No. 142, *Goodwill and Other Intangible Assets*, and the conclusions of the FASB Business Combinations II Project: *Applying the Purchase Method* (Business Combinations II) for purchase business combinations involving enterprises that issue short-duration and/or long-duration contracts as within the scope of FASB Statements No. 60, No. 97, No. 113, and No. 120.

.220 In May 2002, the FASB cleared the prospectus with the understanding that the AcSEC task force would work in tandem with the FASB's conclusions on these projects.

Resource Central

Education courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.221 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- Audit and Accounting Guide *Life and Health Insurance Entities* (product no. 012632kk)
- Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* (product no. 012672kk)

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 123520kk)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk)
- Audit and Accounting Guide *Audit Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012541kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- *Accounting Trends & Techniques*—2002
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Audit Risk Alert *E-Business Industry Developments*—2002/03 [AAM section 8210]

Audit and Accounting Manual

.222 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditor's reports, checklists, and engagement letters; management representation letters; and confirmation letters.

AICPA reSOURCE Online: Accounting and Auditing Literature

.223 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, all Audit and Accounting Guides, all Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential online service, go to cpa2biz.com.

Education Opportunities

.224 The AICPA has developed a number of continuing professional education courses that are valuable to CPAs working in the insurance industry. Those courses include:

- *AICPA's Annual Accounting and Auditing Workshop* (product no. 737062kk [text] and 187080kk [video]). Whether you are in industry or public practice, this course keeps you current, informed, and shows you how to apply the most recent standards.
- *Fair Value Accounting for Hedge Transactions* (product no. 735181). This course helps you understand GAAP for derivatives and hedging activities. Also, you will learn how to identify effective and ineffective hedges.
- *SEC Reporting* (product no. 736746). This course will help the practicing CPA and corporate financial officer learn to apply SEC reporting requirements. It clarifies the more important and difficult disclosure requirements.
- *E-Commerce: Controls and Audit* (product no. 731550kk). This course is a comprehensive overview of the world of e-commerce. Topics covered include internal control evaluation and audit procedures necessary for evaluating business-to-consumer and business-to-business transactions.

Online CPE

.225 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) provides unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

CPE CD-ROM

.226 *The Practitioner's Update* (product no. 738450kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.227 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.228 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.229 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.230 AICPA Online, at www.aicpa.org, offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the Professional Standards, and CPE courses.

Other Helpful Web Sites

.231 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this Alert.

.232 This Audit Risk Alert replaces the *Insurance Industry Developments—2001/02* Audit Risk Alert. The *Insurance Industry Developments Alert* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to jgould@aicpa.org, or write to:

AAM Section 8050

Banks, Credit Unions, and Other Lenders and Depository Institutions Industry—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your audits of financial institutions and other lenders. This Alert delivers knowledge to assist you in achieving a more robust understanding of the business environment your clients operate in. This Alert is an important tool in helping you identify the significant business risks that may result in the material misstatement of financial statements. Moreover, this Alert delivers information about emerging practice issues and about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the financial institution industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining and understanding that industry knowledge.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Industry and Economic Developments

The Economy: From “Neutral” to “Weakness”

.04 Note: See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for additional information about the U.S. and international economies.

.05 On September 24, 2002, the Federal Reserve Board (FRB) chose to hold short-term interest rates constant at 1.75 percent, the lowest rate in 41 years. This rate has remained unchanged throughout 2002 in response to first and second quarter annual growth rates of 5 and 1.1 percent, respectively. Additionally, on September 24, the 10-year treasury yield curve was 2.04 basis points, flattening from 2.79 basis points on July 24, 2002. In its most recent meeting, the Federal Reserve officially said the economy is moving “towards weakness” rather than staying “neutral,” and there is talk of a potential rate decrease during the fourth quarter in order to stimulate the economy.

.06 The central bank opted not to cut rates because it still expects the economy to keep growing in fits and starts. Unfortunately, the nation’s economic recovery is weaker than previously believed. The Department of Commerce has made extensive revisions to 2001 data, most notably indicating that the 2001 recession was longer and deeper than previously thought. The economy shrank in each of the first three quarters instead of just the third, thus raising the expectation that the still-fragile recovery could stall.

.07 The stock markets since September 11 have broken down, due to various reasons including corporate governance issues. The costs of corporate borrowing have been sharply driven up, making it difficult for all but the most creditworthy corporations to borrow.

.08 Additionally, capital spending has suffered. Capital spending remains a major sector even in our predominantly service-oriented economy. Financial institutions are tightening lending standards for their customers, thus limiting the amount of money available to spend on capital investments. In addition, corporate executives are afraid to take on inventory during these uncertain times. The United States economy will not improve significantly until capital spending picks up again.

.09 Government statistics revealed fresh signs of weakness in key sectors of the economy, including commercial real estate and government spending. Finally, investors have been more susceptible to worries about terrorism and potential global conflict. Recent U.S. warnings about an attack on Iraq have added to stock market volatility and have added additional uncertainty to the economy.

Financial Institutions and the Economy

.10 ***Consumer Lending.*** The low interest rate policy has brought down mortgage rates, spurring home sales and enabling many households to refinance and improve their cash flow, while making it possible for automakers and dealers to offer no-interest loans. These factors have helped some financial institutions post record numbers of loans to customers and increase income from loan securitizations. However, one of the problems in the so-called “recovery” of 2002 is that corporate earnings are not keeping pace with the economic recovery. Consumers know this and are wary of borrowing and investing, except in areas such as real estate.

.11 Housing activity accounted for nearly one-half of the 1.2 percent gain in real gross domestic product in 2001. Ordinarily, housing activity slows during a recession. But last year, sales increased because of extraordinarily low interest rates, aggressive mortgage lending, and the sharp sell-off in the stock market, which left many searching for safer investments. The housing market is blocking the recent recession from hitting many major metropolitan areas, although housing’s benefits to the economy could ease in the months ahead. Housing prices are rising at a rate many economists believe is unsustainable, meaning some cities could experience a price correction. So while the current loan boom has made the financial institution industry one of the strongest in today’s weak economy, a housing market bust could soon have the opposite effect on financial institutions by impairing assets and decreasing revenues.

.12 Note that in the third quarter of 2002, foreclosures reached high levels as many consumers stopped making mortgage payments. The layoffs of 2001 are the main culprit. Certain financial institutions have been encountering cash flow problems due to an increase in consumer default on credit card debt. Smaller lenders with a higher percentage of credit card portfolios will be more adversely affected. Additionally, the Federal Deposit Insurance Corporation (FDIC) noted that *subprime* lenders consistently underestimated losses in 2001. The federal banking agencies have continued to struggle with defining subprime and have come up with some definitions that would suggest that nearly half of U.S. family mortgages may be subprime. Institutions may need to adjust their credit risk models to better reflect economic conditions.

.13 ***Commercial Lending and Bankruptcy.*** A number of major industry players in the commercial lending sector are incurring lower earnings attributable to higher loan loss provisions for nonperforming loans. Many loan writeoffs already recorded have occurred because of corporate bankruptcies. Also, a number of institutions have incurred losses related to syndicated loans made to companies experiencing financial difficulties. For additional information, see “Commercial Lending” in the “Credit Risk Watch” section of this Alert.

.14 ***Internal Management.*** Finally, financial institutions have experienced high management turnover due to layoffs and corporate governance issues. Controls over other areas, such as lending and collections, could also suffer. Turnover can have a serious effect on a financial institution’s internal control and financial reporting and accounting systems. Key unfilled positions and lack of qualified employees corrode controls. You may want to consider these risk assessment issues while planning and performing the audit. Gaps in

key positions may cause control weaknesses representing reportable conditions that should be communicated to management and the audit or supervisory committee in accordance with Statement on Auditing Standards (SAS) No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), and SAS No. 90, *Audit Committee Communications* (AICPA, *Professional Standards*, vol. 1, AU secs. 380 and 722).

.15 The federal banking regulatory agencies have issued warnings to financial institutions over the last several years to the effect that the agencies may have safety and soundness concerns if regulated banks scale back their auditing without sufficient controls in place to compensate for the changes.

.16 In addition, new legislation has been put into effect this year due to corporate governance issues. For a complete discussion of corporate governance, the U.S. business environment and the economies of foreign nations, see the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

M&A Report 2002

.17 Mergers and acquisition (M&A) activity slowed considerably in 2002. Instead of buying, many institutions started to improve themselves internally, working toward goals set in past acquisitions. Often, that meant selling, closing, or spinning off less desirable units instead of expanding.

.18 There are a number of reasons for the slowdown. First, banks and other financial stocks were depressed for much of the year, making it difficult for potential buyers to engage in the stock for stock deals that financial institutions prefer. Commercial loan troubles emerged during 2001 and damaged target companies' stocks as merger currency. Some banks had major credit issues as well.

.19 Second, asking prices for some companies remained unrealistically high, blocking potential mergers. Finally, unfamiliarity with accounting procedures introduced by accounting reforms has slowed down mergers. Remember, the pooling of interest method was eliminated on June 30, 2001, except for combinations between two or more mutual enterprises.

.20 In response to the market, analysts have downgraded some investment banks. Additionally, investors have taken a more conservative stance on earnings per share growth for the remainder of 2002 and 2003, given the market declines and the low levels of merger, acquisition, and equity underwriting activity.

.21 The exception to the slowdown has been in the middle market mortgage lender sector, particularly when mortgage units have been a good source of revenue for the parent. The area of mortgage servicing is also ripe for consolidation.

Sarbanes-Oxley Act of 2002

.22 On July 31, 2002, the Sarbanes-Oxley Act of 2002 (the Act) was signed into law. In remarks at the White House signing ceremony for the Act, President Bush declared, "the era of low standards and false profits is over; no boardroom in America is above or beyond the law. This law says to corporate accountants: the high standards of your profession will be enforced without exception; the auditors will be audited; the accountants will be held to account."

.23 This Act is one of the most far-reaching pieces of legislation ever to address corporate fraud and public accounting. Support for the law was fueled by multiple reports of corporate accounting scandals, defrauded investors, and a plummeting stock market.

.24 See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for further information about the Sarbanes-Oxley Act.

.25 The scandals leading to the passage of the Act brought to light numerous conflicts of interest inherent in the business model of some major Wall Street institutions, which served in many conflicting capacities in their dealings with Enron. They acted as lenders, advisers and underwriters for Enron while also managing assets for the energy company and its executives and investors. Now, investigators in the Enron case have recently switched their attention from accountants to financial institutions and the role they played in the rise and fall of the company. Congress, the Securities and Exchange Commission (SEC), and the Justice Department are questioning three of the largest financial firms—Citigroup Inc., J.P. Morgan Chase & Co, and Merrill Lynch & Co.—about financing they provided to Enron. The investigators are examining whether the firms helped Enron artificially increase earnings by structuring transactions in a way that allowed the energy concern to disguise loans as trades and hide debts in special-purpose entities (SPEs).

.26 *Congressional.* Hearings may be held on the adequacy of bank regulatory oversight and the possible role of investment and commercial banks in facilitating fraudulent accounting practices and other abuses. Additionally, Section 705 of the Sarbanes-Oxley Act requires the Comptroller General to conduct a study on whether investment banks and financial advisers assisted public companies in manipulating their earnings and obfuscating their true financial condition. Among other things, the study will address the role the financial institutions played in the collapse of Enron. Upon the completion of the study, the Comptroller General will issue a report discussing regulatory or legislative steps that are recommended or that may be necessary to address concerns identified in the study.

Denser Derivatives

.27 The growing number of corporate scandals fueled increased activity in derivative contracts that commercial banks held for themselves and their customers. The largely unregulated derivative market has ballooned this year. Responding to pressure to mitigate risk, risk managers typically responded by reshaping their risk profiles, which drove up derivative notional volumes during the second quarter of 2002.

.28 Remember that when entities lose money on derivative contracts, the writeoffs usually occur some time after the contract goes sour. Also, auditors should watch out for embedded derivatives including those related to convertible debt and callable notes. SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards* vol. 1, AU sec. 332), along with its companion Audit Guide, provides specific guidance on auditing derivatives.

Back on the Balance Sheet Again

.29 A large portion of off-balance-sheet debt could return to the balance sheets of financial institutions and their customers as a result of changes in accounting principles and possible legislative and regulatory action. The FASB currently has a project in the works that would amend the way SPEs are reported on. This project, expected to be finalized by the end of 2002, would have a major impact on financial institutions. See a description of the FASB's work in this area in the "On the Horizon" section of this Alert.

Credit Risk Watch

Asset-Liability Management

.30 The rate environment for all financial institutions has been changing drastically over the past few years. In 2001, the FRB cut rates nine times, for a total of 450 basis points. The short-term rate was 2.0 percent in October 2001 and has remained at 1.75 percent throughout the first three quarters of 2002, the lowest level in 41 years. Prior to 2001, the opposite was occurring and the Fed had raised rates six times over a period of twelve months. In 1999–2000, many financial institutions had high loan demand and it was difficult for institutions to maintain deposits. In 2001, the opposite occurred. Loan growth slowed and institutions could hardly keep the deposits away. The public began to shift savings from equities into institutions, and some

institutions such as credit unions were much slower than others in lowering their share rates, which caused shares to grow even more and net margins to shrink.

.31 Of course, no one could predict the dramatic changes that have occurred. What is important to recognize is that dramatic swings will continue to occur and have tremendous impact on a financial institution's earnings, liquidity, margins, share and loan demand, and asset values. It is essential that management plan for these changes. Solid asset liability management procedures, financial planning, and investment strategy come into play. With proper planning and solid policies and procedures in place, institutions can manage these changes, and properly assess the impact of alternative actions. Without proper planning, there exists serious risk of financial problems, including unnecessary losses and declines in asset values.

.32 Whether the financial institution has an in-house asset liability management program or has outsourced asset liability management (ALM) to an outside vendor, it is important that management and the board of directors understand the ALM program and its results. If the institution has an in-house program, management needs assurance that the program is run correctly. If an outside ALM vendor is used, management needs to understand the vendor's modeling results and the assumptions used. The degree of sophistication needed will vary with the complexity of the balance sheet.

.33 ALM programs can be complex and require sophisticated assumptions to be properly run. Personnel running ALM programs may not fully understand the intricacies of the model or may not have developed reasonable assumptions to produce reasonable results. Therefore, financial planning may be based on faulty premises and data. A couple of typical examples of ALM modeling errors include the following:

- *Inaccurate or unreliable prepayment assumptions.* Has the institution established prepayment assumptions in the model? Are the assumptions reasonable and periodically updated? Do prepayment speeds change with interest rates? Does management know what the prepayment assumptions are? If the answer to any of these questions is no, the ALM model's output may be suspect.
- *No core deposit or decay rates.* Decay rates are the assumed maturity of nonmaturity deposits. If decay rates are not reasonable then the model results will not be reliable.
- *Inaccurate input of data.* Detail reports should be run to review the data for errors in the way the model is run and to determine whether the data have been inaccurately input into the model. One basic test is to compare the model results with actual history.

.34 Management needs to ensure that any ALM modeling is performed reasonably and accurately.

.35 In the current low-interest rate environment, financial institutions need to be diligent in their financial management process and thoroughly aware of financial and interest rate risks. Along with an increase in deposits, institutions that have large investment portfolios of callable securities have seen an influx of additional funds as securities are or were called. With excess liquidity and low investment rates, there may be a desire to obtain high-risk investment products. Each institution needs to carefully evaluate its investment and financial decisions.

Commercial Lending

.36 There are five commercial real estate sectors, namely, office, hotel, industrial, multifamily, and retail. Commercial real estate lending is highly cyclical, and all segments have been adversely affected to some extent by the economic slowdown. Largely as a result of the deflation of high tech, there is a significant amount of available subleased office space which is negatively affecting this sector. Additionally, space reductions at blue chip companies as well as major bankruptcies have hurt the commercial lending sector. On the positive side, the hotel sector, despite being heavily affected by the terrorist attacks, has shown quicker signs of recovery.

.37 Unfortunately, the volume of commercial lending at banks has declined this year. Additionally, banks received just 55 cents in recoveries on every dollar of defaulted loans last year, far below the historical average of 69 cents. The overall reduction in the demand for external financing is also due to financial institutions imposing stricter underwriting standards and higher fees and spreads on backup lines of credit for commercial loans because institutions are concerned about the lines being tapped and the overall creditworthiness of customers. Institutions have not been as strict with smaller businesses. However, lenders will remain skeptical of large corporate borrowers with complex balance sheets.

Consumer Loan Credit Scoring and Risk-Based Lending

.38 The use of credit scores as a tool in the loan approval decision process has grown considerably over the past few years. Scores include the FICO (Fair Isaac Company) and Beacon. In addition, many financial institutions have developed internal credit scoring programs. As loan decisions become more automated, financial institutions are using credit scores to a greater extent to approve and determine the interest rate for consumer loans. Traditional underwriting and evaluations of customers' credit capacity are often relied on to a lesser extent, as credit scores become the predominant factor in the loan approval decision process. The auditor and management should thoroughly understand the impact of the credit scores in evaluating expected loan losses.

.39 Assurance should be gained that the scoring system in use is reliable and has been properly validated. This should be done for both external systems and internally developed credit scoring systems. Management must have the capability to properly estimate the expected performance of each category of credit scores. System controls should be in place to capture and report relevant credit scoring information, including the ability to monitor performance by credit scores.

.40 Another lending tool or system that has grown considerably is the use of risk-based lending (RBL) or pricing programs. RBL programs are becoming increasingly common in many financial institutions. RBL refers to pricing different categories of loans according to the risk or probability of default. Not all borrowers are viewed as equals, but rather, loans are made and priced according to the borrower's credit. Usually, an applicant's creditworthiness is rated in conjunction with a credit scoring system. The result is greater loan volume and greater overall portfolio returns because the institution can better price loans in accordance with risk, expand its customer and loan base, and reach more underserved customers who may otherwise be declined. Even though RBL programs can serve as a valuable program and resource and help the financial institution meet expanding competitive pricing constraints, the programs also present substantial new risks of losses and compliance concerns.

Common Credit Scoring and Risk-Based Lending Control Weaknesses

.41 Some common pitfalls and control weaknesses with credit scoring and risk based pricing/lending programs that could potentially result in material losses and other problems include the following:

- A greater number of high-risk loans than intended
- Inadequate reporting mechanisms to alert management and the board of potential problems
- Lack of personnel training and lack of management understanding concerning credit scoring and risk-based lending
- Old or outdated scoring models and a lack of validations and revalidation resulting in faulty loan approval and pricing decisions
- Inadequate risk management procedures and inadequate risk management staffing
- Inadequate operational risk controls and monitoring that result in substantially greater risk to the institution than was expected given a particular score

- Incomplete policies and procedures covering both risk based lending and credit scoring
- Inefficient use of databases, purging of data, and lack of controls covering data entry
- Inconsistent decisions and excessive overrides of scores
- Errors in calculations of scores and rates; system parameters established incorrectly and with lack of proper knowledge and control
- Improper pricing of risk tiers
- A lack of knowledge and information on the profitability of the individual risk tiers
- Incomplete monitoring of scoring and RBL

.42 The auditor may need to determine that the financial institution has established a reasonable control environment for its RBL and that it has properly addressed any regulatory advisories and requirements. An understanding should be gained of the potential effect of higher risk loan categories on loan losses and the allowance for loan losses.

Interesting Mortgages

.43 While no one could picture any year surpassing the mortgage boom of 2001, analysts are now predicting that 2002 will exceed the prior year's millennium mortgage madness. Mortgage interest rates have spiraled down to those existing during the Eisenhower years. This is not surprising, as history shows that strong housing markets follow strong stock markets by approximately two years.

.44 It is possible that interest rates will hit bottom by the end of 2002. Many institutions now hold many long-term, fixed-rate mortgages in an effort to keep net interest margins from falling further than they have this year. Therefore, the refinance boom has left many institutions with high concentrations of fixed-rate, 15- and 30-year mortgages because consumers like to lock in long-term low rates during a decline. Markets for variable rates have suffered.

Some Audit Considerations

.45 You may need to consider whether the institution has adequate asset liability management procedures in place to understand and manage its market and liquidity risk in a falling interest rate environment. Institutions now have asset heavy portfolios on their books that have been hard to sell during the low rate economy. These assets are risky for two reasons. First, since financial institutions lend long term and borrow short term, the asset/liability balance will be detrimental when the cost of borrowing increases during a rise in rates. (Many long-term assets are now locked in at rates unheard of two years ago). Second, overvalued home appraisals during the current housing market boom may lead to the receivables and foreclosed assets themselves being overvalued.

.46 Additionally, voluminous low-interest-rate refinancing will affect a lender's operations and earnings. Profits may suffer substantial decline and could lead to going-concern implications. Also, a lender's management will probably experience intense pressure from stakeholders to maintain profitability, thereby increasing the institution's risk of fraud.

.47 While many of the refinances are being made into fixed rate mortgage loans, there are still a significant number of borrowers opting for the even lower initial rates of adjustable rate mortgages (ARMs). Because of the very low initial rates being offered on these ARMs, it is very likely that future rate increases may push the interest rates on these loans up 5 percentage points or more. Underwriting standards need to consider the likelihood of such increases even more seriously because of the historically low current rates.

.48 Although the loan origination and servicing fee revenues earned may increase due to an influx of new customers, as interest rates decline, margins may correspondingly decrease. Institutions are subject to

prepayment risk in falling rate environments. Mortgage loans and other receivables may be prepaid by a debtor, so the debtor may refinance its obligations at new, lower rates. If an institution does not have an effective system for generating new mortgage loans in a period of significant prepayments, the institution's future prospects may be negatively affected. Prepayments of assets carrying the old, higher rates reduce the institution's net income and overall asset yields. In addition to loans, other items such as securities, deposits, debts, and derivatives all depend on interest rates.

.49 Finally, many loans have been refinanced. Second-mortgage lenders rank below first-lien holders in collection efforts, and the holder of the second lien is not able to collect until the first lender has been paid. Therefore, one should note the creditor status of the client's portfolio base.

Loan Loss Allowance Update

.50 As stated earlier, the grim economic picture seriously heightens concerns about credit quality. As business earnings plunge and layoffs occur, loan delinquencies and defaults may increase sharply. Moreover, the quality of an institution's loan portfolio may deteriorate. Institutions may have eased their underwriting standards in 2001 to attract additional customers during the antecedent economic growth period. Management and auditors need to be especially alert during these poor economic times to ensure that loan loss allowances are adequate and impaired loans are properly accounted for.

.51 During 2002, weaknesses are beginning to appear at banks, especially in credit-card portfolios. In the first quarter of 2002, non-performing loans at many financial institutions continued to increase and as a result, reserves increased in the first quarter. However, the increase in non-performing loans meant that some institutions are now not meeting industry coverage ratios. Additionally, the problems in the telecommunications and energy sectors have led to bankruptcies and bad loans for banks. Despite tightening credit standards toward commercial enterprises, many institutions will need to increase allowances. Estimates show that loan losses will continue to grow until at least the third quarter of 2003.

.52 When evaluating credit risk, the quality of loans, and the adequacy of loan loss allowances, auditors should consider the matters discussed in this Alert and determine whether there is a heightened level of audit risk. If so, it may be necessary to alter the nature, timing, and extent of audit procedures and to increase the level of testing. The evaluation of loan quality and loss allowances can be a complicated process, and the following specific literature will aid you in the accounting and auditing process. SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), and the AICPA Practice Aid entitled *Auditing Estimates and Other Soft Accounting Information* provide guidance on auditing estimates.

National Credit Union Administration Interpretive Ruling and Policy Statement 02-3 on the Allowance for Loan and Lease Losses

.53 This interpretive ruling and policy statement (IRPS), issued on May 28, 2002, provides guidance on the design and implementation of Allowance for Loan and Lease Losses (ALLL) methodologies and supporting documentation practices for credit unions. It provides guidelines that are very similar to the recently issued interagency policy statements of the four federal banking agencies published on July 6, 2001, and similar federal banking guidance issued by the SEC in Staff Accounting Bulletin (SAB) No. 102, *Selected Loan Loss Allowance Methodology and Documentation Issues*.

.54 The IRPS was developed in consultation with the other federal banking agencies and the SEC. It provides guidance on the design and implementation of significant aspects of ALLL methodologies and supporting documentation practices. As stated in National Credit Union Administration (NCUA) letter 02-CU-09, the IRPS also includes illustrations of implementation practices that credit unions may find useful for enhancing their own ALLL as well as explanations and guidance on generally accepted accounting principles (GAAP) and regulatory statements addressing the ALLL.

.55 The IRPS does not change the existing accounting guidance in or modify the documentation requirements of GAAP. It is intended to supplement not replace current guidance. The IRPS does not address or change current guidance concerning loan chargeoffs.

.56 As with the banking Policy Statement, the IRPS specifically addresses the following concerns:

- It clarifies that the board of directors of each institution is responsible for ensuring that controls are in place to determine the appropriate level of the ALLL.
- It states that the ALLL process must be thorough, disciplined and consistently applied, and must incorporate management's current judgments about the credit quality of the loan portfolio.
- It emphasizes the NCUA's long-standing position that institutions should maintain and support the ALLL with documentation that is consistent with their stated policies and procedures, GAAP, and applicable supervisory guidance.
- It provides guidance on maintaining and documenting policies and procedures that are appropriately tailored to the size and complexity of the institution and its loan portfolio.
- Because credit unions are currently required to follow GAAP regarding methodologies and documentation for the ALLL, the IRPS should not significantly affect calculation methodologies.

However, it should serve to clarify and improve practices and procedures, which the auditor will want to review for compliance with GAAP and the IRPS. For example, the institution will be required to ensure that the ALLL policies are current and adequately address the specific policy requirements in the IRPS and Policy Statement.

.57 The auditor should be aware of the potential impact of changing economic conditions and changes in the institution's lending products and practices on the institution's ALLL methodologies. Many credit unions have implemented a variety of both new lending practices and programs within the last couple of years. These programs must be addressed in the ALLL methodologies. For example, some credit unions recently have implemented new business or commercial lending programs. ALLL methodologies that previously relied on FASB Statement of Financial Accounting Standards (Statement) No. 5, *Accounting for Contingencies*, for loans evaluated on a group basis, may now be required to follow FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan*, for evaluating impairment and losses on individual loans. Some examples of other programs and factors that may require a reevaluation of existing ALLL methodologies include indirect vehicle lending, risk-based lending, subprime programs, current economic conditions, new credit scoring or other loan approval technologies, and changes in membership or customer demographics.

.58 The IRPS and policy statements point out that while different institutions may use different methods, certain elements should be in any ALLL methodology including the following:

1. A detailed analysis of the loan portfolio, performed on a regular basis
2. Consideration of all loans (whether on an individual or group basis)
3. Identification of loans for impairment analysis on an individual basis under FASB Statement No. 114 and the segmentation of the remainder of the portfolio into groups of loans with similar risk characteristics for evaluation under FASB Statement No. 5
4. Consideration of all known relevant internal and external factors that may affect loan collectibility
5. Consistent application of loan collectibility factors, with modification for new factors that may affect collectibility
6. Consideration of the different risks inherent in different kinds of lending

7. Consideration of current collateral values where applicable
8. Performance of analysis, estimates, reviews, and all other ALLL methodology functions by competent and well-trained personnel
9. Methodology that is based on current and reliable data
10. Methodology that is well documented with clear explanations of the supporting analyses and rationale
11. A systematic and logical method to consolidate the loss estimates and ensure the ALLL balance is recorded in accordance with GAAP

Other Accounting and Auditing Considerations

FASB and AICPA Guidance

.59 Currently, the accounting guidance for the measurement of the allowance for loan losses available to financial institutions is addressed in FASB Statements No. 5, and No. 114, as amended by FASB Statement No. 118, *Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures*; EITF Topic D-80, *Application of FASB Statements No. 5 and No. 114 to a Loan Portfolio*; FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss* (an Interpretation of FASB Statement No. 5); and the AICPA Audit and Accounting Guides *Banks and Savings Institutions*, *Audits of Credit Unions*, and *Audits of Finance Companies*.

.60 *The FASB Viewpoints Article on Loan Loss Allowances.* The April 12, 1999, issue of FASB *Viewpoints* addressed the application of FASB Statements No. 5 and No. 114 to a loan portfolio and discussed how those Statements interrelate. The *Viewpoints* article discusses numerous issues, including the following questions:

- How should a creditor identify loans that are to be individually evaluated for collectibility under FASB Statement No. 114?
- How should a creditor determine whether it is probable that it will be unable to collect all amounts due according to the contractual terms of a loan agreement under FASB Statement No. 114?
- If a creditor concludes that an individual loan specifically identified for evaluation is not impaired under FASB Statement No. 114, may that loan be included in the assessment of the allowance for loan losses under FASB Statement No. 5?

The FASB *Viewpoints* publication can be obtained at the FASB Web site at www.fasb.org.

.61 *SOP 01-6.* Financial institutions and auditors also need to follow the guidance in SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*. For example, the arrangement may be a secured mortgage loan, an unsecured commercial loan, or a financing arrangement that only involves extending credit to trade customers resulting in trade receivables.

.62 For banks and savings institution recognition and measurement, note that all sales of servicing rights should be recognized into income, regardless of whether the loan is retained or sold. Additionally, insurance commissions need to be amortized over the insurance risk period for experience-rated or retrospective commission arrangements.

.63 As with banks and savings institutions, recognition and measurement is of critical importance to credit unions as well. For example:

- Standby commitments to purchase loans should be either reported as a net against loans purchased and amortized under FASB Statement No. 91, or recorded as liabilities (the greater of the fair market value or the fee received.)

- Nonmortgage loans held for sale should be recorded at the lower of cost or market.
- Short sales of securities (securities sold, not yet purchased) should be a liability at fair value.
- A liability should be recorded when the credit union receives member deposits, not when funds are collected.
- Redeemable preferred stock dividends should be recorded based on their preferred stock classification.

.64 SOP 01-6 contains numerous presentation and disclosure requirements that apply to the financial statements. Additionally, SOP 01-6 removes some disclosure requirements for banks and credit unions. Banks no longer need to disclose balance-sheet presentation of cash and cash equivalents, interest-bearing deposits, federal funds purchased, and repurchase agreements. Additionally, the requirement for regulatory capital long-term debt disclosure has also been removed.

.65 For credit unions, SOP 01-6 eliminates the following requirements:

- Disclosure of significant factors affecting the carrying amount of mortgage related derivative securities
- Disclosure of additional information about repurchased and reverse repurchased agreements apart from FASB Statement No. 107
- Disclosure of additional information about servicing apart from FASB Statement No. 140
- Disclosure of additional information about credit union deposits

.66 Readers should refer to the full text of SOP 01-6 when evaluating lending and financing activities. SOP 01-6 reconciles and conforms, as appropriate, the accounting and financial reporting provisions established by the AICPA Audit and Accounting Guides *Banks and Savings Institutions*, *Audits of Credit Unions*, and *Audits of Finance Companies*. This SOP will be incorporated in a new AICPA Audit and Accounting Guide, which will supersede the three aforementioned Guides. The new Guide is expected to be issued during the second quarter of 2003. See the SOP for effective date and transition information.

.67 **SOP 94-6.** Financial institutions and auditors also need to follow the guidance in SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.68 More specifically, SOP 94-6 requires entities to disclose certain concentrations (described in paragraph 22 of the SOP) if, based on information known to management before issuance of the financial statements, all of the following criteria are met:

- The concentration exists at the date of the financial statements.
- The concentration makes the entity vulnerable to the risk of a near-term severe impact.
- It is at least reasonably possible that the events that could cause the severe impact will occur in the near term.

.69 Examples of concentrations that might be found at financial institutions include:

- Sale of a substantial portion of or all receivables or loan products to a single customer
- Loss of approved status as a seller to or servicer for a third party
- Concentration of revenue from issuances involving a third-party guarantee program
- Concentration of revenue from mortgage banking activities

.70 **AICPA Audit and Accounting Guides.** Auditors should read SOP 01-6 in conjunction with chapters 6 and 7 of the Audit and Accounting Guide *Banks and Savings Institutions*, chapters 5 and 6 of the Audit and

Accounting Guide *Audits of Credit Unions*, and chapter 2 of the Audit and Accounting Guide *Audits of Finance Companies*, as applicable, for a thorough discussion of auditing procedures regarding loans and loan loss allowances.

Regulatory Guidance

.71 SEC Financial Reporting Release (FRR) No. 28, *Accounting for Loan Losses by Registrants Engaged in Lending Activities*, issued in December 1986, states that the books and records of registrants engaged in lending activities are expected to include documentation of a systematic methodology to be employed each period in determining the amount of loan losses to be reported and the rationale supporting each period's determination that the amounts reported were accurate. Also note that FRR No. 28 requires registrants to describe their procedural discipline in the business section of the annual report.

.72 Additionally, the Interagency Policy Statement on the Allowance for Loan and Lease Losses (Interagency Policy Statement) issued on December 21, 1993, by the SEC and the federal banking regulators requires nonpublic financial institutions to follow instructions very similar to those outlined in FRR No. 28.

.73 Even though the allowance for loan loss documentation requires numerical calculations, it is critical that financial institutions have written, qualitative narrative supporting the thought process behind the calculations in satisfying the procedural discipline required by FRR No. 28. Moreover, financial institutions should maintain a self-correcting mechanism that adjusts loss estimation methods in order to reduce differences between estimated and actual observed losses.

.74 **SEC SAB No. 102.** On July 6, 2001, the SEC released SAB No. 102, *Selected Loan Loss Allowance Methodology and Documentation Issues*, which provides certain views of the staff on the development, documentation, and application of a systematic loan loss allowance methodology in accordance with GAAP as required by FRR No. 28. In particular, the guidance focuses on the documentation the staff normally would expect registrants to prepare and maintain in support of their allowances for loan losses. The SAB applies to registrants that are creditors in loan transactions that, individually or in the aggregate, have a material effect on the registrant's financial statements.

.75 **Federal Financial Institutions Examination Council Guidance.** In conjunction with the release of SAB No. 102, the Federal Financial Institutions Examination Council (FFIEC) issued on July 6, 2001, an Interagency Policy Statement entitled *Allowance for Loan Loss and Lease Losses (ALLL) Methodologies and Documentation for Banks and Savings Institutions*.

.76 The Interagency Policy Statement provides guidance on the design and implementation of ALLL methodologies and supporting documentation practices. Specifically, the statement:

- Clarifies that the board of directors of each institution is responsible for ensuring that controls are in place to consistently determine the appropriate level of the ALLL.
- States that the ALLL process must be appropriate, systematic, and consistently applied, and must incorporate management's current judgments about the credit quality of the loan portfolio.
- Emphasizes the banking agencies' long-standing position that institutions should maintain and support the ALLL with documentation that is consistent with their stated policies and procedures, GAAP, and applicable supervisory guidance.
- Provides guidance on maintaining and documenting policies and procedures that are appropriately tailored to the size and complexity of the institution and its loan portfolio.

.77 The Interagency Policy Statement also includes illustrations of implementation practices that institutions may find useful for enhancing their own ALLL processes; an appendix that provides examples of

certain key aspects of ALLL guidance; a summary of applicable GAAP guidance; and a bibliographical list of relevant GAAP guidance, joint interagency statements, and other literature on ALLL issues.

.78 The Interagency Policy Statement does not change existing accounting guidance in or modify the documentation requirements of GAAP or guidance provided in the relevant joint interagency statements. The text of the full document is located at the FDIC Web site at www.fdic.gov.

.79 *Interagency Guidance Points Out Important Practices.* A joint interagency letter (issued July 12, 1999) reaffirmed aspects of loan loss allowance practices. This letter was issued by the SEC, the FDIC, the Office of the Comptroller of the Currency (OCC), and the Office of Thrift Supervision (OTS).

.80 *Disclosures Related to Loan Loss Allowances.* Management's discussion and analysis (MD&A) and SEC Industry Guide 3 disclosures need to fully disclose all pertinent trends, events, and uncertainties related to the allowance for loan losses. Moreover, the narrative disclosures in MD&A need to be consistent with the MD&A financial tables relating to the allowance for loan losses and loan portfolio, and with the financial statements and related footnotes.

.81 The discussion in MD&A should be in quantified detail, explaining the changes in the specific elements of the allowance for loan losses, including instances in which the overall allowance has not changed significantly. The effects of any changes in methodology should be explained and justified.

.82 *SEC Staff Actions Concerning MD&A.* If statistical data, quantitative analysis, or disclosures in a registrant filing appear inconsistent with loan loss allowance levels, the SEC staff may require the institution to explain those inconsistencies. For example, data commonly used to evaluate the appropriateness of the loan loss allowance may indicate an inconsistency between the accounting for the allowance and the disclosure of material risks in the portfolio for which the allowance was maintained. In such a case, the SEC staff may issue comments on the filing relating to the loan loss allowance.

.83 Additionally, disclosures in the filing should be consistent with the documentation supporting the level of the loan loss allowance. The SEC staff may question allowances that appear too low as well as those that appear too high, as compared with the disclosures made and the supporting documentation.

.84 The SEC letter on the allowance for loan losses issued in January 1999 provides essential information that needs to be considered and included in the "Description of Business," MD&A, and financial statements. (See the SEC Web site at www.sec.gov/rules/other/banklla.txt.) Additionally, the August 2001 SEC current accounting and disclosure letter (section K) provides further loan loss guidance. (See www.sec.gov/divisions/corpfin/acctdisc.html.)

Technology News

Customer Relationship Management

.85 Financial service companies usually spend more on information technology than other businesses, and 2002 is no exception, defying predictions that a weak economy and last year's terrorist attacks would hinder spending in this area. Financial firms spend more than 8 percent of their revenue on technology, among the highest of all industries.

.86 One of the highest areas of technological growth in 2002 has been in the area of customer relationship management (CRM). Demand for CRM software has been high, but results have not been up to expectations. Enticed by the promise of a quick means for personalizing customer services, increasing retention, sharpening cross sales and making customers more profitable, financial institutions have spent millions on CRM initiatives. Some of these initiatives have been worthwhile, but many have failed to deliver on expectations

and have resulted in wasted investment, shelved projects and firings. As a result, the industry is taking a slower and steadier approach to CRM. Success requires that technology be a tool, not a comprehensive solution to CRM.

Check Imaging

.87 A new developing area of customer relationship management is check imaging technology. This technology is meant to solve one of the most vexing customer relationship management issues that financial institutions face, namely, how to supply their customers with timely information about check payments. By successfully producing check images for customers, a financial institution can meet a major goal of CRM; to increase internal growth by improving service and winning more business from existing customers.

.88 Check imaging technology has been around for more than a decade but is only just beginning to live up to its early hype. The idea of capturing check images and storing them in an archive is gaining popularity throughout the industry. Many medium and large size banks are now starting to look seriously into image archiving. Institutions that implement this product will have significant competitive advantage over other players.

.89 The nation's largest check processor, Bank of America, is the first institution to implement the technology, and has begun taking electronic pictures of each of its 800 million monthly checks. The company can now download check images to representatives at bank branches or call centers. In addition, customers can request images through the Internet or automated teller machines (ATMs). Customers are happy since images are available through varied delivery channels. Institutions stand to save billions of dollars in transportation costs by exchanging electronic checking account information for actual paper checks.

The Decline of Internet Banks

.90 Despite industry predictions of market growth, Internet banks have either closed, contracted, explored their strategic options, or sold themselves in large numbers, leaving fewer institutions to carry out the plan of providing cheaper banking services through streamlined or nonexistent branch infrastructures.

.91 Internet banks of all types had trouble this year. Among the Internet banks that are still in existence, only Net Bank and E-Trade Bank stand out as having significant customer and asset bases. Net Bank focused from the start on profitability, not branding. E-Trade bank has both the benefit of longevity through its 1980s predecessor Telebank and a cross sell boost from its brokerage parent, E-Trade Group.

.92 The failure of so many Internet banks may have been due to traditional banks expanding operations onto the Internet. These traditional institutions showed impressive growth in their online banking customers. In short, it appears that consumers want more from a bank than Internet-only portals. They want branches and full service as well.

A New Foreign Exchange Settlement Method

.93 A new service has appeared on the market that settles foreign exchange (fx) trades simultaneously and irrevocably. The service known as *continuous linked settlement*, went live on September 9, 2002, after two postponements. It is run by CLS Bank International, which obtained regulatory approval from the Federal Reserve Bank of New York.

.94 CLS Bank International was formed by a consortium of banks for the purpose of consolidating and mitigating risk in foreign exchange trading. The only way for a bank to send transactions directly through CLS is to invest \$5 million and become a shareholder. CLS Bank does not execute the trades. It simply settles payments for trades. The new fx continuous linked settlement is complementary to the trading platforms that execute trades such as Fxall, Currenex Inc., and Fx connect.

.95 The system settles bank-to-bank foreign exchange settlement transactions within a few hours rather than two days or more. This reduces risks from multiple time zones, settlement delays and legal jurisdictions. The risk of paying in one currency and failing to receive in another is reduced since both sides are settled at once.

.96 This new fx settlement system has the potential to become industry practice, despite the initial expense of becoming a shareholder.

ATMs Versus Western Union

.97 The demand for international person-to-person money transfers is heating up, with strong development from two major banks that think that they can use ATM networks and card products to take money transfer share away from the market leader, Western Union. Two market factors have lead to this development. First, the immigrant market has become a significant revenue opportunity. Over the last five years, the consumer sector in the United States of Mexicans, and Central and South American peoples has grown, spurring market demand for cross-border money transfers. There has also been a significant increase in ATMs and Internet access south of the Rio Grande. Second, there is a rising ATM and Internet use among all population sectors.

.98 It still remains to be seen whether ATM money transfers will take off, especially given obvious security issues, including the potential that the machines could be used for money laundering. But there is room for a new trend of global remitters in the next four or five years, especially through the Internet and ATMs.

Fraud and Illegal Activities

Money Laundering Developments

.99 Criminals use financial institutions to launder the proceeds of crime. Omnibus providers of diversified financial services may be particularly vulnerable because they provide a broad range of financial services that money launderers want and need, often in higher risk jurisdictions.

Definition of Money Laundering

.100 *Money laundering* is the funneling of cash or other funds generated from illegal activities through legitimate businesses to conceal the initial source of the funds. Money laundering is a global activity and, like the illegal activities that give it sustenance, it seldom respects local, national, or international jurisdictions. Current estimates of the size of the global annual “gross money laundering product” range from \$500 billion to \$1.5 trillion.

Money Laundering in the Electronic Age

.101 Recent cases underscore how criminals are increasingly using personal computers, banking software, electronic funds transfers, and the Internet to launder the proceeds of their illicit activities. Large volumes of high-speed wire transfers between institutions on a daily basis make it exceedingly difficult for regulators, law enforcement, and financial institutions to identify money laundering activities.

Inadequate Controls Increase Risk of Money Laundering

.102 Evidence suggests that financial institutions penetrated by money launderers may not have sufficient controls in place for effective money laundering risk management, including adequate processes for identifying unusual activity and determining whether unusual activity is really suspicious and reportable.

.103 In a number of instances, organized crime associates were employed at the affected institutions and existing controls were inadequate for management to detect suspicious or improper relationships and activities involving the criminals.

The USA Patriot Act

.104 On October 26, 2001, President Bush signed into law the “Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001” (the Act). This law, enacted in response to the terrorist attacks of September 11, 2001 was intended to strengthen our nation’s ability to combat terrorism and prevent and detect money laundering activities in all financial institutions. Broad authority to develop anti-money regulations applicable to each of the various segments of the financial services industry was delegated to the Treasury Department.

.105 On July 17, 2002, the Treasury Department, along with the FDIC, FRB, NCUA, OCC, OTS, Commodity Futures Trading Commission, and the SEC issued proposed rules that would require certain financial institutions to establish minimum procedures for identifying and verifying the identity of customers seeking to open new financial accounts. These proposed rules implement section 326 of the USA PATRIOT Act, which directs the issuance of regulations requiring financial institutions to implement reasonable procedures for (1) verifying the identity of any person seeking to open an account, to the extent reasonable and practicable; (2) maintaining records of the information used to verify the person’s identity and; (3) determining whether the person appears on any list of known or suspected terrorists or terrorist organizations. Final rules implementing section 326 must be effective by October 25, 2002.

.106 Unless exempted by regulation, financial institutions must establish an anti-money-laundering compliance program, including, at a minimum:

- The development of internal policies, procedures, and controls; these should be appropriate for the level of risk of money laundering identified.
- The designation of a compliance officer; the officer should have appropriate training and background to execute their responsibilities. In addition, the compliance officer should have access to senior management.
- An ongoing employee training program; a training program should match training to the employees’ roles in the organization and their job functions. The training program should be provided as often as necessary to address gaps created by movement of employees within the organization and turnover.
- An independent audit function should test procedures.

.107 Additionally, on January 4, 2002, interim guidance was issued to financial institutions on how to comply with two other anti-money-laundering provisions of the Act. Effective December 25, 2001, financial institutions are prohibited from providing correspondent accounts directly to foreign shell banks and are required to take steps to ensure that correspondent accounts are not being used indirectly to provide banking services to such shell banks. A “prohibited” shell bank is one that has no physical presence in a country. This excludes a shell bank that is affiliated with a U.S. or foreign bank that has a physical presence and is regulated. Additionally, financial institutions are required to keep records of the owners of foreign banks to which they provide correspondent accounts and of the foreign banks’ agent designated to accept service of legal process.

Other Related Laws and Regulations

.108 The Bank Secrecy Act (BSA), enacted to address the problem of money laundering, authorizes the Treasury Department to issue regulations requiring financial institutions to file reports, keep certain records, implement anti-money-laundering programs and compliance procedures, and report suspicious transactions to the government. (See 31 CFR Part 103.) Failure to comply with BSA reporting and recordkeeping provisions may result in the assessment of severe penalties.

.109 The BSA contains a suspicious activity reporting (SAR) requirement that applies to insured banks, savings associations, savings association service corporations, credit unions, bank holding companies, nonbank subsidiaries of bank holding companies, edge and agreement corporations, and U.S. branches and agencies of foreign banks operating in the United States. These financial institutions are required to report suspicious activity following the discovery of insider abuse involving any amount, violations aggregating \$5,000 or more when a suspect can be identified, violations aggregating \$25,000 or more regardless of a potential suspect, or transactions aggregating \$5,000 or more that involve potential money laundering or violations of the BSA. In June, 2000, the NCUA, FRB, FDIC, OCC, and OTS issued a newly revised SAR form.

.110 The BSA also contains regulations requiring financial institutions to file currency transaction reports (CTRs) for cash transactions greater than \$10,000.

.111 **BSA Compliance Deficiencies.** Recent examinations by the OCC have revealed some common BSA compliance deficiencies. The OCC found that some institutions failed to adequately:

- Document and evaluate new, high-risk accounts for money laundering.
- Establish controls and review procedures for high-risk services.
- Monitor high-risk accounts for money laundering.
- Conduct adequate, independent testing of high-risk accounts for the possibility of money laundering.
- Train employees to detect suspicious activity in higher risk areas.
- Review CTR filing patterns for suspicious activity.

The OCC reminds financial institutions that they must have adequate internal controls, independent testing, responsible personnel, and training to comply with the BSA.

Federal Government Initiative Looks to CPAs to Fight Money Laundering

.112 The government's National Money Laundering Strategy Report of September 2001 identifies addressing the role of "legal and accounting professionals in combating money laundering" as a priority supporting the objective of increasing usefulness of reported information to law enforcement agencies and the financial industry. (See www.treas.gov.)

Money Laundering and Financial Statements

.113 Money launderers tend to use the business entity more as a conduit than as a means of directly expropriating assets. For this reason, money laundering is far less likely to affect financial statements than other types of fraud such as misappropriations and consequently is unlikely to be detected in a financial statement audit. In addition, other forms of fraudulent activity usually result in the loss or disappearance of assets or revenue, whereas money laundering involves the manipulation of large quantities of illicit proceeds to distance them from their source quickly and without detection. However, money laundering activities may have indirect effects on an entity's financial statements.

.114 Nevertheless, independent auditors have a responsibility under SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317), to be aware of the possibility that illegal acts may have occurred, indirectly affecting amounts recorded in an entity's financial statements.

.115 Possible indications of money laundering include the following:

- Transactions that appear inconsistent with a customer's known legitimate business or personal activities or means; unusual deviations from normal account and transaction patterns
- Situations in which it is difficult to confirm a person's identity
- Unauthorized or improperly recorded transactions; inadequate audit trails

- Unconventionally large currency transactions, particularly in exchange for negotiable instruments or for the direct purchase of funds transfer services
- Apparent structuring of currency transactions to avoid regulatory recordkeeping and reporting thresholds (such as transactions in amounts less than \$10,000)
- Businesses seeking investment management services when the source of funds is difficult to pinpoint or appears inconsistent with the customer's means or expected behavior
- Uncharacteristically premature redemption of investment vehicles, particularly with requests to remit proceeds to apparently unrelated third parties
- The purchase of large cash value investments, soon followed by heavy borrowing against them
- Large lump-sum payments from abroad
- Purchases of goods and currency at prices significantly below or above market
- Use of many different firms of auditors and advisers for associated entities and businesses
- Forming companies or trusts that appear to have no reasonable business purpose

.116 Money laundering is considered to be an illegal act with an indirect effect on financial statement amounts. Under SAS No. 54, the auditor should be aware of the possibility that such illegal acts have occurred. If specific information comes to your attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, you should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred.

.117 You should also note that laundered funds and their proceeds could be subject to asset seizure and forfeiture (claims) by law enforcement agencies that could result in material contingent liabilities during prosecution and adjudication of cases.

.118 *Section 10A of the Securities Exchange Act of 1934.* The Private Securities Litigation Reform Act of 1995, among other things, amended the Securities Exchange Act of 1934 to add Section 10A. This section requires that each audit under the Exchange Act include procedures regarding the detection of illegal acts, the identification of related party transactions, and an evaluation of the issuer's ability to continue as a going concern. Section 10A also codified certain then-existing professional auditing standards regarding the detection of illegal acts by issuers and imposed expanded obligations on auditors to report in a timely manner to management any information indicating that an illegal act has or may have occurred. The auditor must ensure that the audit committee or board of directors is adequately informed with respect to an illegal act, as broadly defined by Section 10A, unless the illegal act is clearly inconsequential.

.119 In addition, Section 10A requires the issuer to notify the SEC within one business day after the issuer's board of directors is informed by its auditor that the auditor reasonably expects to resign from the audit engagement or to modify its audit report due to an illegal act that has a material effect on the issuer's financial statements for which appropriate remedial action has not been taken by senior management and the board of directors. If the issuer does not notify the SEC within that period, then the auditor, within the next business day, must provide a copy of the illegal acts report (or documentation of any oral report) that it gave to the board directly to the SEC. Section 10A provides for cease and desist and civil money penalties to be imposed against auditors who willfully fail to provide the required reports.

Financial Crimes Enforcement Network Advisories

.120 The Financial Crimes Enforcement Network (FinCEN) is the policy-making and law enforcement agency within the U.S. Department of the Treasury that supports law enforcement investigative efforts and fosters interagency and global cooperation against domestic and international financial crimes. FinCEN constantly issues advisories about transactions. These advisories normally instruct financial institutions to

give enhanced scrutiny to any transaction originating in or routed through higher risk jurisdictions. Periodically, the federal government reviews and reassesses foreign government and financial system risk, cooperation, and compliance and accordingly adds names to and removes names from the sanction lists. It should be emphasized that the issuance of these advisories does not mean that financial institutions should curtail legitimate business with these jurisdictions.

National Interdiction and Sanction Laws

.121 The Department of the Treasury's Office of Foreign Assets Control (OFAC) administers sanction programs against Libya, Liberia, Iraq, Cuba, North Korea, the National Union for the Total Independence of Angola (UNITA), Sierra Leone, Sudan, Yugoslavia, Burma, the Balkans, Iran, the Taliban in Afghanistan, and generally persons who are classified as specially designated nationals (SDNs), who may include known international terrorists and narcotics traffickers. Financial transactions with these regimes, entities, and individuals may be prohibited or restricted by federal law. Information concerning OFAC rules, lists of prohibited entities, and general OFAC information can be obtained on the OFAC Web site at www.ustreas.gov/ofac.

Advice for Credit Unions

.122 Credit unions have been singled out in the past by the Treasury Department for having the worst compliance record among financial institutions in the area of the administration and enforcement of the Bank Secrecy Act and OFAC requirements. It is likely that compliance and procedures will continue to be closely watched by regulators and law enforcement agencies due to our war against terrorism.

.123 The Bank Secrecy Act of 1970 provides requirements for financial institutions to maintain records regarding member transactions and that they report certain transactions involving currency over \$10,000. The NCUA Rules and Regulations Section 748.2 (1986) provides further specific requirements for credit unions to ensure their compliance with the BSA. *Section 748.2 requires that credit unions have a formal BSA compliance program and adequate training and monitoring procedures.* Management needs to ensure that it has a reasonable BSA compliance program in place to independently test for compliance with the BSA, proper completion of cash transaction reports, proper completion of Suspicious Activity Reports, and identification and prevention of any transactions with OFAC restricted nations, individuals, or organizations.

.124 Fines and sanctions for failure to comply can be enormous. In addition to fines and penalties, criminal sanctions can be imposed against the officers and directors of financial institutions. The credit union should look carefully at its policies and procedures to ensure compliance with the BSA and with the OFAC restrictions.

.125 Credit union management should review this area to ensure compliance with provisions of the BSA and OFAC requirements.

In the Spotlight

Outsourcing to Third-Party Vendors and Services Organizations

.126 Financial institutions are placing much greater reliance on third parties to perform a variety of services including the processing of transactions and information. With a growing list of new products and services, an increasing number of third-party vendors are being utilized by financial institutions. Every day, new key products are developing such as account aggregation, portals, home banking, CRM, MCIF systems, Web hosting, and telephony systems. Also, many banks and credit unions today are relying on outside vendors to perform many functions that were previously done in-house because of labor shortages, cost savings, increased complexities, and a host of other reasons.

.127 Increases in both the number and complexity of outside services have created new emerging risks. There is an exposure that basic due diligence such as contract reviews and background checks will not be adequately completed as it becomes more difficult to manage a vast number of vendors. Additional risks are also emerging with the increase in technology-related vendors. Reliance on technology-related vendors causes additional risks due to factors such as increased complexities, access to member account information, and reliance by the institution for processing of transactions. The risks are further compounded if the services provided involve the use of the Internet and other technologies because of the potential for individuals outside of the vendor or financial institution to access information and potentially perform unauthorized transactions. A number of financial institutions have incurred substantial losses due to fraud or failures at outside service organizations on which the financial institution had placed reliance.

.128 The regulatory agencies have recognized these increased risks and have issued guidance on reasonable procedures that should be put into place to properly manage these risks. In November 2001, the OCC issued OCC Bulletin 2001-47 providing guidance to national banks on managing the risks that may arise from their business relationships with third parties. Additionally, the NCUA issued letter 01-CU-20 in November 2001 entitled "Due Diligence Over Third Party Service Providers." The OCC provides guidance on critical aspects of a risk management and due diligence process covering third-party providers. The risk management process should include:

- A risk assessment to identify the bank's needs and requirements
- Proper due diligence to identify and select a third-party provider
- Written contracts that outline duties, obligations, and responsibilities of the parties involved
- Ongoing oversight of the third parties and third-party activities

The bulletin can be obtained at www.occ.treas.gov.

.129 The NCUA in letter 01-CU-20 provides direction that credit union officials should follow to perform the necessary due diligence. Minimum procedures that must be followed include planning, at which time the officials need to determine, among other things, whether the proposed activities are consistent with the financial institution's overall business strategy and risk tolerances. Other procedures that must be followed include background checks, legal and financial review, return on investment, and insurance requirements.

Due Diligence

.130 The extreme end of the potential vendor risk exposure involves addressing unscrupulous or unsound vendors who could cause losses to the financial institution and its stakeholders. There have been instances in which institutions have suffered substantial losses from unscrupulous or unsound vendors such as investment brokers, leasing companies, insurance companies, and a host of others. It is absolutely critical that the institution perform reasonable due diligence on the integrity and financial strength of all critical vendors on an ongoing basis, especially if the vendor has access to, controls, or is responsible for large dollar amounts of the financial institution's assets. If the vendor processes information and transactions or otherwise has access to member information, the institution also needs to ascertain that the vendor has reasonable internal controls in place and is adequately bonded.

Some Auditing Considerations

.131 An auditor should obtain an understanding of each of the five components of an institution's internal control sufficient to plan the audit. This understanding may encompass controls placed in operation by the financial institution and by services organizations whose services are part of the institution's information system. SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, and SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), provide relevant auditing guidance. Note that many vendors have

not had SAS No. 70 reports prepared, or if they have been prepared, a significant fee is charged to obtain a copy. The auditor may need to communicate the importance of SAS No. 70 reports to the client and that there may be additional cost involved in obtaining the report.

.132 The Auditing Standards Board (ASB) has issued a new Audit Guide entitled *Service Organizations: Applying SAS No. 70, as Amended*. The Guide includes illustrative control objectives as well as three new Interpretations that address the responsibilities of service organizations and service auditors with respect to forward-looking information, subsequent events, and the risk of projecting evaluations of controls to future periods. The Guide also clarifies that the use of a service auditor's report should be restricted to existing customers and is not meant for potential customers.

.133 Procedures need to be in place to ensure that expanding relationships are well controlled. The security of information, privacy of members, and assurance that you are dealing with an ongoing solid entity is extremely important. Management should have a vendor risk management program in place. The risk management program needs to raise questions concerning vendor relationships such as:

- Was an initial due diligence review completed?
- Is there an ongoing due diligence review and vendor oversight?
- Where do each of the parties' rights, responsibilities, and liabilities lie with existing vendor contracts?
- Do contracts adequately protect the institution's legal interests, and has counsel reviewed them?
- How does the institution ensure the vendor provides adequate services to customers/members and employees?

Regulator Working Paper Reviews

.134 If you are a CPA who audits financial institutions, sooner or later federal and state bank regulators will ask to see a copy of your audit working papers. CPAs who frequently perform bank audits say they can help examiners accomplish more, with fewer headaches for themselves, if they work with the examiners to make working paper reviews efficient.

Who Has the Power?

.135 Depending upon which agency is making the request and how big the financial institution is, the regulatory agency may have specific regulatory authority to demand the working papers. Under the Federal Deposit Insurance Corporation Improvement Act of 1991, auditors are required to make working papers available upon request to regulators for client banks with assets in excess of \$500 million. If the agency does not have the authority, it always can subpoena the documents. In addition, the Interagency Policy Statement on External Auditing Programs of Banks and Savings Institutions provides guidance to depository institutions in establishing an effective external audit program. The policy statement specifically requires explicit language in the engagement letter granting examiners access to the auditor's working papers. The interagency policy became effective on January 1, 2000. In addition, many *financial institutions, at regulators' urging, have recently reworded their audit engagement letters to require that the working papers be made available.*

.136 Guidance for providing regulators with access to auditors' working papers can be found in "Working Papers: Auditing Interpretations of Section 339A" (AICPA, *Professional Standards*, vol. 1, AU sec. 9339A). Additionally, SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339A), among other things, supersedes SAS No. 41, *Working Papers* (AICPA, *Professional Standards*, vol. 1, AU sec. 339A), and is effective for audits of financial statements for periods beginning on or after May 15, 2002. Early application is permitted. If SAS No. 96 has not been adopted, auditors should refer to SAS No. 41 for guidance.

.137 Additionally, the FDIC has released guidance instructing FDIC examiners to review a bank's external auditors' working papers in cases where the bank has a CAMEL rating of 4 or 5, or when the examiner has significant concerns with bank operations that may have been tested by the external auditor. For all examinations, FDIC examiners are also instructed to obtain from the institution and review all correspondence between the institution and external auditor, with a focus on material weaknesses and reportable condition communications. The FDIC notice states that examiners can sign a letter from the auditor acknowledging receipt of the auditor's letter specifying terms of the working paper review; however, examiners may not sign any document that implies that the FDIC has agreed to any conditions in the letter.

.138 To obtain a copy of the memorandum (RD Memorandum Transmittal 2000-019, Review of External Auditors' Workpapers), contact the FDIC's Public Information Center: call (800) 276-6003 or (202) 416-6940; fax (202) 416-2076; or e-mail publicinfo@fdic.gov.

The Paper Chase

.139 Note that meeting a request for working papers does not mean dumping loads of paper into the laps of bank examiners. When examiners ask to look at working papers, the CPA should talk to them first, find out what they are trying to do, and determine what they are looking for. You may be able to satisfy the examiner's needs by talking. If not, then direct them to working papers that will help them answer their questions. Note that the purpose of a working paper review is examination scoping, in which a review of the work can help regulators better focus their own resources. Additionally, examiners are concerned about the possible existence of client fraud and regulators want to know what the auditors have done to detect it and to what extent internal controls have been examined. Additionally, the working paper review should assess whether the financial institution was meeting statutory and regulatory requirements, and whether its board had implemented and was effectively overseeing an appropriate external audit program.

.140 Look for changes in regulatory oversight over the next year due to new legislation, including the Sarbanes-Oxley Act of 2002. Additionally, the AICPA has issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316). This SAS supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU secs. 110, 230, 312, and 316A), and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230). SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 31, 2002. Early application is permitted. See the "New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance" section of this Alert for a discussion of SAS No. 99.

.141 Note that federal regulators may be investigated by the Congress as far as their oversight role for banks involved with WorldCom and Enron. Therefore, it is feasible that the regulators may put more demands on auditors during their year-end working paper reviews in anticipation of being reviewed themselves.

.142 Ever since regulators began filing lawsuits against accounting firms during the savings and loan crisis of the 1980s, CPAs worry about just whom federal regulators are concerned with when they look at working papers—banks or their accounting firms? This leads to wariness on the part of CPAs during communications. Note that regulators that oversee the nation's financial institutions reserve the right to report any serious audit deficiencies to the institutions they examine. If deficiencies are severe enough, regulators can suggest a change in auditors.

.143 However, the OCC recently released guidance clarifying issues concerning its supervision of national banks' audit programs, including reviews of external audit programs, key independence issues affecting outsourced internal audit activities, and responsibilities of audit committees. The guidance states that an OCC review of a bank's external audit program is not intended to be an "audit of the auditors." Rather, it is an assessment of whether statutory and regulatory requirements for external audits and audit

committees are met, whether the bank's board has implemented an appropriate external audit program, and whether a bank's board effectively oversees the external audit program. To obtain a copy of the memorandum (MM 2001-1, Audit Policy Clarification), contact the OCC's Public Information Room by calling (202) 874-5043 or faxing (202) 874-4448.

.144 Working paper review can play an appropriate role in bank supervision today. Accountants can help regulators be more efficient during their reviews so they do not have to reperform work that internal and external auditors have performed to their satisfaction. Also, working paper review helps regulators get their arms around a new client to obtain better understanding of a newly regulated institution.

Mortgage Loan Servicing and Secondary Market Sales

.145 Some financial institutions have been significantly increasing their real estate loan portfolios, as well as enhancing their servicing portfolios of loans sold in the secondary market with servicing retained by the institution. Institutions in recent years have been much more likely than in the past to retain servicing for loans sold to secondary market investors. Not only has the number of financial institutions that are servicing portfolios grown considerably, but the size and dollar amount of institutions' servicing has also grown substantially. Conversely, the recent refinancing boom has adversely affected certain institutions, as borrowers have moved to other institutions in a highly competitive market.

.146 The value of associated mortgage-servicing rights (MSRs) is an important emerging material area for auditors and may have a significant effect on your client's financial statements this year or in the near future.

Audit and Accounting Guidance

.147 FASB No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, the AICPA audit and Accounting Guides *Banks and Savings Institutions*, and *Audit of Credit Unions*, and SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*, provide guidance related to mortgage loan servicing.

.148 The FASB published a Special Report on February 15, 2001, that addresses the most frequently asked questions about FASB Statement No. 140. On April 19, 2001, the FASB staff published a set of questions and answers about isolation of financial assets transferred by banks and other entities, focusing on rights of redemption. Finally, on August 7, 2001, the FASB staff published a set of questions and answers about the limitations on the activities of a qualifying special-purpose entity set forth in paragraphs 35 through 44 of FASB Statement No. 140.

.149 For those institutions that have mortgage servicing operations, the auditor should evaluate whether the institution is complying with the relevant accounting requirements. The auditor should gain assurance that the financial institution is properly recording the asset (or liability), and gain or loss on sale when loans are sold with servicing retained. Assurances should also be made that the institution is properly amortizing the MSRs and that procedures are in place to properly assess fair value for potential impairment.

.150 Additionally, the various mortgage-related entities such as the Department of Housing and Urban Development (HUD), Federal National Mortgage Association (FNMA), Federal Home Loan Mortgage Corporation (FHLMC, also known as Freddie Mac), and Government National Mortgage Association (GNMA, also known as Ginnie Mae) have various audit and reporting requirements.

.151 Another consideration is further activity related to the sales of such loans. As the income is recorded up-front at the sale date and the MSRs are amortized to expense in proportion to net servicing income, if the current level of sales activity is not sustained, the institution will be affected by the loss of such sales income.

.152 Apart from the proper accounting treatment for loans sold and accounting for retained servicing, the auditor may also want to evaluate the internal control of the servicing operations. The financial institution will have numerous financial and compliance obligations and responsibilities, such as collecting and remitting loan payments, ensuring compliance with federal and state regulations covering escrow accounts and other servicing requirements; compliance with the seller servicing agreement with a third party such as Fannie Mae and Freddie Mac; properly collecting on delinquent accounts; and collecting and paying taxes and insurance. Failure to properly comply with any of these requirements could have serious financial impact on the financial institution.

Recent Regulatory Actions at a Glance

.153 The financial institution industry in general is subject to various monetary and fiscal policies and regulations, which include but are not limited to those determined by the FRB, the OCC, the FDIC, state regulators, the OTS and the NCUA.

.154 This section presents some important recent regulatory actions. The list of regulatory actions is not comprehensive and the information provided represents only summaries of the regulations. Readers should visit the Web sites of the various regulatory agencies for complete listings of new regulations and for full descriptions of the regulations. Regulatory Web sites are:

- FDIC: www.fdic.gov
- FFIEC: www.ffiec.gov
- FRB: www.federalreserve.gov
- NCUA: www.ncua.gov
- OCC: www.occ.treas.gov
- OTS: www.ots.treas.gov
- SEC: www.sec.gov

Interagency Guidance

.155

- On November 29, 2001, the FRB, FDIC, OCC and OTS published final rules that changed regulatory capital standards to address the treatment of recourse obligations and direct credit substitutes that expose banking organizations to credit risk. The rule also added new capital standards for residual interests. The revised rule primarily affects institutions involved in securitization activities, and it is intended to result in more consistent risk-based capital treatment of these transactions among the four agencies. (12 CFR 325) www.fdic.gov
- On January 25, 2002, the FRB, FDIC, and the OCC published final rules governing the regulatory capital treatment of equity investments in nonfinancial companies held by banks, bank holding companies and financial holding companies. The final rules are effective April 1, 2002. (www.federalreserve.gov)
- On March 19, 2002, the FRB, FDIC, OCC, OTS, and the NCUA announced that financial institutions they supervise should follow the guidance issued by the SEC with respect to auditing and accounting work performed under Arthur Andersen LLP. The SEC announced on March 14 and 18 that it would continue to accept financial statements audited by Andersen provided the companies filing the statements obtain from Andersen certain representations concerning audit quality and controls and generally set forth those representations in their filings. The SEC's statements are available on its Web site at www.sec.gov.

- On April 9, 2002, the FRB, FDIC, OCC, and the OTS published a final rule amending their risk-based capital standards for banks, bank holding companies, and savings associations (institutions) to reduce the risk weight applied to claims on, or guaranteed by qualifying securities firms. The rule is effective July 1, 2002. (www.federalreserve.gov)
- On May 17, 2002, the FRB, FDIC, OCC, and OTS issued an interagency advisory on the regulatory capital treatment of accrued interest receivable related to credit card securitizations. This advisory describes how this asset is created, explains why it is considered a subordinated retained interest for regulatory capital purposes, and describes the regulatory capital treatment that institutions should apply to this asset no later than December 31, 2002. (www.fdic.gov)
- On May 23, 2002, the FRB, FDIC, OCC, and OTS issued interagency guidance on implicit recourse in asset securitizations. The issuance describes the agencies' concerns with implicit recourse, which exists when an institution supports a securitization above and beyond its contractual obligations, and the supervisory actions that may be taken against an institution that provides implicit support to its securitizations. It also includes examples of post-sale support that institutions have provided to securitizations and discusses whether they constitute implicit recourse. (www.fdic.gov)
- On May 23, 2002, the FRB, FDIC, OCC, and OTS issued an interagency advisory on the unsafe and unsound use of covenants tied to supervisory actions in securitization documents. This advisory describes covenants that use certain supervisory actions as triggers for early amortization events or the transfer of servicing in securitizations and explains that the presence of such covenants in securitization documents will be criticized as an unsafe and unsound banking practice. (www.fdic.gov)
- On May 24, 2002, the FRB, FDIC, OCC, and OTS released interagency questions and answers on the capital treatment of recourse, direct credit substitutes, and residual interests in asset securitizations. This document addresses several implementation questions that had been raised concerning the agencies' final regulatory capital rules issued on November 29, 2001, which were described above. (www.fdic.gov)
- On June 5, 2002, the FRB, FDIC, and the OCC issued final regulations amending their rules that currently prohibit interstate branches from being used primarily for deposit production. The Riegle-Neal Interstate Banking and Branching Efficiency Act prohibits any bank from establishing or acquiring a branch outside of its home state primarily for the purpose of deposit production. Section 101 of the Gramm-Leach-Bliley Act expands this prohibition to include any branch of a bank controlled by an out-of-state bank holding company. To conform their regulations to this statutory change, the agencies have amended their rules so that the prohibition against deposit production office also applies to any bank or branch of a bank controlled by an out-of-state holding company. The regulations are effective October 1, 2002. (www.federalreserve.gov)
- On June 24, 2002, the FRB, FDIC, and the OCC issued the host state loan-to-deposit ratios that the banking agencies will use to determine compliance with section 109 of the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994. These ratios update data released in June 2001. (www.fdic.gov)
- On July 17, 2002, the Treasury Department along with the FDIC, FRB, NCUA, OCC, OTS, Commodity Futures Trading Commission, and the SEC issued proposed rules that would require certain financial institutions to establish minimum procedures for identifying and verifying the identity of customers seeking to open new financial accounts. These proposed rules implement section 326 of the USA PATRIOT Act, which directs the issuance of regulations requiring financial institutions to implement reasonable procedures for (1) verifying the identity of any person seeking to open an account, to the extent reasonable and practicable; (2) maintaining records of the information used to verify the person's identity and; (3) determining whether the person appears on any list of known or suspected terrorists or terrorist organizations. Final rules implementing section 326 must be effective by October 25, 2002.

Federal Deposit Insurance Corporation

.156

- On October 30, 2001, the FDIC published a final rule clarifying the meaning of the statutory requirement that an institution must be “engaged in the business of receiving deposits other than trust funds” in order to be eligible for FDIC insurance. Under the amended regulations, an institution can satisfy this standard by maintaining one or more non-trust deposit accounts that, in the aggregate, total \$500,000 or more. (12 CFR 303) (www.fdic.gov)
- On April 25, 2002, the FDIC issued guidance to banks regarding Securities Investor Protection Corporation coverage for banks that use securities broker-dealers for the safekeeping of securities. The guidance reminds banks of the credit risks associated with these custodial relationships. It advises banks to review existing custodial relationships, evaluate the creditworthiness and reputation of custodians, and ensure that the bank maintains properly diversified custodial relationships.

Federal Financial Institutions Examination Council

.157

- On July 22, 2002, the FFIEC issued draft interagency guidance on account management and loss allowance guidance for credit card lending. The guidance will apply to all institutions under the agencies’ supervision that offer credit card programs. It describes the agencies’ expectations for prudent risk management practices for credit card activities, particularly with regard to credit line management, over-limit accounts, and workouts. The draft guidance also addresses income recognition and loss allowance practices for credit card lending. (www.ffiec.gov)
- On August 8, 2001, the FFIEC released guidance on the risks and risk management controls necessary to authenticate the identity of customers accessing electronic financial services. This guidance, *Authentication in an Electronic Banking Environment*, addresses the verification of new customers and the authentication of existing customer. It applies to both retail and commercial customers. (www.ffiec.gov)

Federal Reserve Board

.158

- On December 12, 2001, the FRB approved a final rule that amends its regulations aimed at curbing predatory lending. Compliance with the amendments becomes mandatory on October 1, 2002. The amendments to regulation Z (Truth in Lending) broadens the scope of loans subject to the protections of the Home Ownership and Equity Protection Act of 1994 by adjusting price triggers that determine coverage under the act. (www.federalreserve.gov)
- On January 23, 2002, the FRB published revisions to its Regulation C (Home Mortgages Disclosure). The amendments establish the thresholds for determining the loans for which financial institutions must report loan-pricing data (the spread between the annual percentage rate on a loan and the yield on comparable Treasury securities). It also requires lenders to report the lien status of applications and originated loans. Compliance with the amendments relating to the thresholds and lien status is mandatory on January 1, 2004. The amendments also require that lenders ask applicants their ethnicity, race, and sex in applications taken by telephone. The data collection requirement effective date is January 1, 2003. (www.federalreserve.gov)
- On August 15, 2002, the FRB made significant revisions to Regulation C (12 CFR 203), the implementing regulation for the Home Mortgage Disclosure Act, 12 USC 2801 et seq. (HMDA). Most of the changes become effective January 1, 2004, for data required to be reported by March 1, 2005. However, two changes become effective January 1, 2003, for data due by March 1, 2004. See the FRB web site for further information.

National Credit Union Administration

.159

- In November, 2001, the NCUA issued letter 01-CU-20 entitled “Due Diligence Over Third Party Service Providers,” which provides guidance on critical aspects of a risk management and due diligence process covering third party providers. (www.ncua.gov)
- On May 28, 2002, the NCUA issued Interpretive Ruling and Policy Statement (IPRS) 02-3 on the ALLL. It provides guidance on the design and implementation of ALLL methodologies and is similar to interagency policy statements of the federal banking agencies published on July 6, 2001, and similar federal banking guidance issued by the SEC in Staff Accounting Bulletin No. 102. The IRPS does not change the existing accounting guidance and does not address or change current guidance with loan chargeoffs. For additional information, see the description under “Credit Risk Watch” section of this Alert. (www.ncua.gov)

Office of the Comptroller of the Currency

.160

- In November 2001, the OCC issued OCC Bulletin 2001-47 providing guidance to national banks on managing the risks that may arise from their business relationships with third parties. (www.occ.treas.gov)
- On January 4, 2002, interim guidance was issued to financial institutions on how to comply with two anti-money-laundering provisions of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001.

Effective December 25, 2001, financial institutions are prohibited from providing correspondent accounts directly to foreign shell banks and are required to take steps to ensure that correspondent accounts are not being used indirectly to provide banking services to such shell banks. In addition, financial institutions are required to keep records of the owners of foreign banks to which they provide correspondent accounts and of the foreign banks’ agent designated to accept service of legal process.

It is the expectation of the Department of the Treasury that financial institutions will accord priority to meeting their compliance obligations in connection with foreign banks for which they maintain correspondent deposit accounts. However, the requirements also apply to nondeposit relationships with foreign banks. The interim guidance will remain in effect until superseded by regulation or subsequent guidance. A link to the interim guidance can be found in the U.S. Department of Treasury’s Web site, www.treas.gov/press/.

- On January 31, 2002, the OCC issued a final rule on the regulatory capital treatment of nonfinancial equity investments that was published in the *Federal Register* on January 25, 2002. The final rule is substantially similar to the proposal that the OCC published in February 2001 (66 FR 10212, February 14, 2001). Similar to the earlier proposal, this final rule requires a series of marginal capital charges on equity investments that increase with the level of those investments relative to the bank’s Tier 1 capital. One modification to the proposal is the inclusion of a grandfathering provision. Individual investments are exempt from the revised capital requirements if they were made prior to March 13, 2000. (www.occ.treas.gov)
- On May 28, 2002, the OCC issued a final rule governing national banks’ ability to conduct business using electronic technologies. The regulation was published in the *Federal Register* on May 17 and, except for one provision, is effective on June 17, 2002. The exception is a provision containing certain disclosure requirements for national banks that have co-branded Web sites or other shared electronic space. That provision takes effect on July 1, 2002. (www.occ.treas.gov)

- On August 12, 2002, the OCC amended OCC regulations regarding the capital equivalency deposits (CEDs) that foreign banks with federal branches or agencies must establish and maintain. The rule revises certain requirements regarding CED deposit arrangements to increase flexibility for and reduce the burden on certain federal branches and agencies, based on a supervisory assessment of the risks presented by the particular institution. (www.occ.treas.gov)
- On August 29, 2002, the OCC issued a new handbook for examiners on personal fiduciary services. The handbook addresses a broad range of fiduciary services that banks provide to individuals, their families, and their businesses. Banks provide these services as trustee, investment adviser, or in any capacity in which the bank possesses investment discretion on behalf of another. The handbook is structured by risk framework, outlining the transaction, compliance, reputation, and strategic risk that exists with fiduciary services. (www.occ.treas.gov)
- On September 19, 2002, the OCC published a final rule that adds a new part 37 to the OCC's rulebook that governs debt cancellation contracts and debt suspension agreements. The purpose is to establish standards governing these products in order to ensure that national banks provide such products consistent with safe and sound banking practices and subject to appropriate consumer protections. The effective date is June 16, 2003. (www.occ.treas.gov)

Office of Thrift Supervision

.161

- On November 1, 2001, the OTS issued Regulatory Bulletin 32-19, which provides an update to Thrift Activities Regulatory Handbook Section 110 Capital Stock and Ownership. This section provides additional guidance for mutual organizations, capital stock, and contributed capital. More specifically, it adds a new section on ownership of mutual associations, revises information on mutual holding companies to reflect the changes introduced by the Gramm-Leach-Bliley Act, and clarifies that savings associations may accept certain capital contributions without limit. (www.ots.treas.gov)
- On February 7, 2002, the OTS issued CEO Memo #156, Certain Transfers of "Higher-Risk" Assets. This memo discusses transfers of high-risk assets including non-performing loans to entities or parties outside of the savings association. The specific transactions addressed are those in which the transferor both (1) retains significant credit risk in the transferred assets, and (2) unlike typical securitization transactions, often provides substantial funding to the transferee. These transfers may be motivated by favorable regulatory reporting treatment but lack economic substance or a sound business purpose and raise supervisory concerns. When such transfers have been made or are being contemplated, the Regional office of OTS should be contacted. (www.ots.treas.gov)
- On February 13, 2002, the OTS issued RB 32-23, which updated the Thrift Activities Handbook. These changes included the highlighting that no less than a majority of outside directors must make up an audit committee and added information on examiner access to external audit working papers. (www.ots.treas.gov)
- On May 22, 2002, OTS issued Transmittal TR-281, which made changes to its capital regulations regarding qualifying mortgage loans, interest-rate risk component and other capital components. These changes are designed to eliminate unnecessary capital burden and to align OTS capital regulations more closely to those of the other federal banking agencies.
- On July 26, 2002, the OTS updated Thrift Activities Handbook Section 350 External Audit and expanded the work of examiners during a review of external audit workpapers. (www.ots.treas.gov)
- On July 31, 2002, OTS issued Regulatory Bulletin RB 32-26 and rescinded RB 32-16. RB 32-26 updates the Thrift Activities Handbook Section 250. OTS significantly revised Appendix A, Bank Owned Life Insurance (BOLI). (www.ots.treas.gov)

The changes include the following:

- Revised the appendix to more closely track the OCC bulletin on BOLI, BC-2000-23
- Stated explicitly that purchasing BOLI that is not incidental to banking is not permitted
- Revised the concentration guidance to make it clear that savings associations' investment in BOLI should not exceed 25 percent of capital
- Added guidance on separate account BOLI
- Made a statement that the lending limit rule can apply to the underlying assets in separate account BOLI provided that certain controls are in place with the insurer
- Added a discussion about insurable interest and stated that holding insurance in excess of the institution's risk of loss is considered unsafe and unsound (www.ots.treas.gov)
- On August 9, 2002, the OTS issued Transmittal TR-290, which amended its regulations on the mutual-to-stock conversion process and portions of its regulations on mutual holding company reorganizations. This rule includes modifications to the provisions addressing business plans. In addition, it addresses certain matters involving conversions from the mutual to the stock form, by, among other things, adding demand account holders to the definition of savings account holders, allowing accelerated vesting in management benefit plans for changes of control, adding rules to establish charitable organizations, and clarifying the policy on the amount of proceeds allowed to be retained at the holding company level. (www.ots.treas.gov)

Securities and Exchange Commission

.162

- On December 21, 2002, the SEC adopted a rule that states that employee option plans that have not gotten shareholder approval must be disclosed in annual reports and proxy statements. Until now, companies generally have been required to disclose the total number of options awarded. The company must file copies of the equity compensation plans with the SEC unless immaterial. See rule at www.sec.gov for effective date information.
- On March 18, 2002, the SEC adopted rules stating requirements for Arthur Andersen LLP Auditing Clients. The rules assure a continuing and orderly flow of information to investors and markets and minimize any potential disruptions that occurred as a result of the indictment of Arthur Andersen LLP. Effective Dates include March 18, 2002. See rule at www.sec.gov for other dates.
- On August 29, 2002, the SEC adopted final rules for Certification of Disclosure in Companies' Quarterly and Annual Reports. In response to Section 3029(a) of the Sarbanes-Oxley Act of 2002, CEOs and CFOs are now required to certify the financial and other information contained in quarterly and annual reports. Effective Date August 29, 2002. (www.sec.gov)

An Added Note

.163 The AICPA has developed a practice guide to assist members in observing regulatory FTC and SEC privacy and disclosure requirements established by the Gramm-Leach-Bliley Act. (www.aicpa.org/public/download/news)

New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance

.164 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. .165 Of the pronouncements and other guidance listed in the previous table, those having particular significance to the financial institution industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.166 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316) and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230). The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02).¹ However, SAS No. 99, establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS).²

.167 The following is an overview of the content of the SAS No. 99:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs 5 through 12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph 13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs 14 through 18.)
- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather the information necessary to identify risks of material misstatement due to fraud, by:
 - a. Inquiries of management and others within the entity about the risks of fraud. (See paragraphs 20 through 27.)
 - b. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs 28 through 30.)
 - c. Considering fraud risk factors. (See paragraphs 31 through 33, and Appendix A, "Examples of Fraud Risk Factors.")
 - d. Considering certain other information. (See paragraph 34.)

¹ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts, that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), or fraud.

² Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statement in accordance with generally accepted auditing standards (GAAS). SSAE No. 10, chapter 1, *Attest Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), and Statement on Standards for Consulting Services (AICPA, *Professional Standards*, vol. 2, CS sec. 100) provide guidance to accountants relating to the performance of such services.

- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs 35 through 42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs 43 through 45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risk of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence. (See paragraph 46.) The section requires the auditor to respond to the results of the risk assessment in three ways:
 - a. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned (See paragraph 50.)
 - b. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed (See paragraphs 51 through 56.)
 - c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls (See paragraphs 57 through 67.)
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs 68 through 74.) It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs 75 through 78.)
- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs 79 through 82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph 83.)

.168 SAS No. 99 includes in Exhibit 1, *Anti-Fraud Programs and Controls*, which has been developed to assist auditors in obtaining an understanding of programs and controls established by management to mitigate specific risks of fraud, or that otherwise help to prevent, deter, and detect fraud. It also includes an amendment to SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333.06 and .16), since SAS No. 99 requires the auditor to make inquiries of management about fraud and risk of fraud. In support of and consistent with these inquiries, the amendment revises the guidance for management representations about fraud currently found in SAS No. 85, paragraph 6h and Appendix A. SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 31, 2002. Early application of the provisions of SAS No. 99 is permissible.

.169 The AICPA will publish in December 2002, a Fraud Practice Aid entitled *Fraud Detection in a GAAS Audit—An Auditor's Field Guide*. See the description of the new Practice Aid in this section for further information.

Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*

.170 The Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012772kk) provides guidance to service auditors engaged to issue reports on a service organization's controls that may

be part of a user organization's information system in the context of an audit of financial statements. It also provides guidance to user auditors engaged to audit the financial statements of entities that use service organizations. Guidance on performing service auditors' engagements and using service auditors' reports in audits of financial statements is provided in SAS No. 70, *Service Organizations*.

Practice Aid, *Fraud Detection in a GAAS Audit—An Auditor's Field Guide*

.171 In connection with the issuance of SAS No. 99, the AICPA will issue in December of 2002, a practice aid to help practitioners implement the new fraud guidance. The practice aid is entitled *Fraud Detection in a GAAS Audit—An Auditor's Field Guide* (product no. 006613). The practice aid includes topics such as:

- How the new SAS changes audit practice
- Characteristics of fraud
- Understanding the new fraud SAS
- Best practices
- Practice aids such as:
 - Specialized industry fraud risk factors
 - Common frauds and extended audit procedures

The Practice Aid represents valuable guidance in helping practitioners understand and implement SAS No. 99.

New Accounting Pronouncements and Other Guidance

.172 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated with Exit or Disposal Activities</i>
FASB Statement No. 147	<i>Acquisitions of Certain Financial Institutions</i>
Audit and Accounting Guide	<i>Audits of State and Local Governments (GASB 34 Edition)</i> See the "New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance" section above for more information.
SOP 01-5	<i>Amendment to Specific AICPA Pronouncements for Changes Related to the NAIC Codification</i>
SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>
Technical Practice Aids	<i>Software Revenue Recognition</i>
Questions & Answers	<i>FASB Statement No. 87, Employers' Accounting for Pensions</i>

.173 Of the pronouncements and other guidance listed in the previous table, those having particular significance to the financial institution industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org.

FASB Statement No. 147, *Acquisitions of Certain Financial Institutions*

.174 FASB Statement No. 147, *Acquisitions of Certain Financial Institutions*, addresses guidance on accounting for the acquisition of a financial institution and applies to all acquisitions except those between two or more mutual enterprises (the combination of which is currently being discussed as a separate board topic this year.) FASB Statement No. 147 requires that the excess of fair value of liabilities assumed over the fair value of tangible and identifiable intangible assets acquired in a business combination represents goodwill that should be accounted for under FASB Statement No. 142, *Goodwill and Other Intangible Assets*. Thus, the specialized accounting guidance in paragraph 5 of FASB Statement No. 72, *Accounting for Certain Acquisitions of Banking or Thrift Institutions*, will not apply after September 30, 2002. If certain criteria in Statement No. 147 are met, the amount of the unidentifiable intangible asset will be reclassified to goodwill upon adoption of the Statement. Financial institutions meeting conditions outlined in FASB Statement No. 147 will be required to restate previously issued financial statements. Additionally, the scope of FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, has been amended to include long-term customer-relationship intangible assets such as depositor- and borrower-relationship intangible assets and credit cardholder intangible assets.

SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*

.175 SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*, applies to any entity that lends to or finances the activities of others. For example, that arrangement may be a secured mortgage loan, an unsecured commercial loan or a financing arrangement that only involves extending credit to trade customers resulting in trade receivables. Those financing activities of all entities are included in the scope of this SOP. The SOP provides specific guidance for other kinds of transactions, such as securities purchases, for certain financial institutions listed in the scope paragraphs of the SOP. To the extent an entity is not considered such a financial institution, as described in those paragraphs, the other guidance provided is not applicable. In other words, only the guidance in this SOP related to the financial and lending activities is applicable for entities not considered to be financial institutions.

.176 SOP 01-6 reconciles and conforms, as appropriate, the accounting and financial reporting provisions established by the AICPA Audit and Accounting Guides, *Banks and Savings Institutions*, *Audits of Credit Unions*, and *Audits of Finance Companies*. The SOP also explicitly incorporates mortgage companies, corporate credit unions, and certain activities of insurance companies in its scope. This SOP will be incorporated in a new AICPA Audit and Accounting Guide, which will supersede the three aforementioned Guides. The new Guide is expected to be issued during the second quarter of 2003. See the SOP for effective date and transition information.

On the Horizon

.177 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your financial institution engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.178 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body**Web Site**

AICPA Auditing Standards Board (ASB)

www.aicpa.org/members/div/auditstd/drafts.htm

AICPA Accounting Standards Executive Committee (AcSEC)

www.aicpa.org/members/div/acctstd/edo/index.htm

Financial Accounting Standards Board (FASB)

www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html

Professional Ethics Executive Committee (PEEC)

www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Auditing Pipeline

Exposure Draft on Auditing Fair Value Measurements and Disclosures

.179 The AICPA's ASB has issued an exposure draft of a proposed SAS entitled *Auditing Fair Value Measurements and Disclosures*. The proposed SAS addresses auditing considerations relating to measurement, presentation, and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. A vote to ballot a document for final issuance is expected to occur in the Autumn of 2002.

New Framework for the Audit Process

.180 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB expects to issue a series of exposure drafts in 2003. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "Expectation Gap" standards were issued in 1988.

.181 Some of the more important changes to the standards that are expected to be proposed are:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to assessment of the risk of material misstatement of the financial statements (Among other things, this will improve the auditor's assessment of inherent risk and eliminate the "default" to assess inherent risk at the maximum.)
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures

These changes collectively are intended to improve the guidance on how the auditor operationalizes the audit risk model.

.182 In connection with this major initiative, the ASB and the International Auditing Practices Committee (IAPC) have agreed to form a joint task force to develop a joint standard addressing the risk assessment process. This standard will represent a significant step towards converging U.S. and international auditing standards. The standard produced by this joint task force will form the basis for the ASB's overall project.

.183 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

Exposure Draft on Loans and Certain Debt Securities Acquired in a Transfer (Formerly Known as Purchased Loans and Securities)

.184 The AcSEC has issued an exposure draft of a proposed SOP entitled *Accounting for Loans and Certain Debt Securities Acquired in a Transfer*. This proposed SOP considers whether Practice Bulletin (PB) No. 6, *Amortization of Discounts on Certain Acquired Loans*, continues to be relevant given a number of FASB pronouncements issued subsequent to PB No. 6. The proposed SOP excludes originated loans from its scope. A final SOP is expected to be issued during the last half of 2002.

Consolidation of Certain Special-Purpose Entities

.185 The FASB has issued an exposure draft of a proposed Interpretation of Accounting Research Bulletin (ARB) No. 51, *Consolidation of Certain Special-Purpose Entities*. This proposed Interpretation would address consolidation by business enterprises of SPEs to which the usual condition of consolidation described in ARB No. 51, *Consolidated Financial Statements*, does not apply because the SPEs have no voting interest or otherwise are not subject to control through ownership of voting interests. A final Statement is expected to be issued during the fourth quarter of 2002.

Amendment of FASB Statement No. 133 on Derivative Instruments and Hedging Activities

.186 The FASB has issued an exposure draft of a proposed Statement, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This proposed Statement would amend the definition of a derivative in paragraph 6(b) of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This proposed Statement also would amend FASB Statement No. 133 for various decisions made as part of the Derivatives Implementation Group process. A final Statement is expected to be issued during the fourth quarter of 2002.

A New Audit and Accounting Guide for Financial Institutions

.187 A new combined audit and accounting guide for financial institutions is due to be published by the AICPA in the second quarter of 2003. The Guide will reconcile guidance in the former three Audit and Accounting Guides, *Banks and Savings Institutions*, *Audits of Credit Unions*, and *Audits of Finance Companies*. More specifically, the new guide will reconcile the specialized accounting and financial reporting guidance established in the former Guides, eliminate differences in accounting and disclosure, and carry forward accounting guidance for transactions determined to be unique to certain financial institutions. The changes correspond to SOP 01-6, *Accounting by Certain Entities (Including Entities with Trade Receivables) That Lend to or Finance the Activities of Others*.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.188 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements:

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 123520kk.)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk)
- Audit Guide *Audit Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012541kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012772kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- *Accounting Trends & Techniques—2002*
- Audit Risk Alert *E-Business Industry Developments—2002/03* [AAM section 8210]
- *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; and engagement letters, management representation letters, and confirmation letters.

CD-ROMS

.189 The AICPA is currently offering a CD-ROM product entitled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to the following AICPA Professional Literature products in a Windows format: *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related Audit Risk Alerts, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

.190 Additionally, *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Educational Opportunities

.191 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the financial institution industry. Those courses include:

- AICPA's *Annual Accounting and Auditing Workshop* (product no. 737062 [text] and 187080 [video]). Whether you are in industry or public practice, this course keeps you current, informed, and shows you how to apply the most recent standards.
- *Fair Value Accounting for Hedge Transactions* (product no. 735181). This course helps you understand GAAP for derivatives and hedging activities. Also, you will learn how to identify effective and ineffective hedges.

- *SEC Reporting* (product no. 736746). This course will help the practicing CPA and corporate financial officer learn to apply SEC reporting requirements. It clarifies the more important and difficult disclosure requirements.
- *Depository Institutions: An Accounting and Auditing Perspective* (product no. 736092 [text] and 181791 [video]). This course provides an excellent introduction to the banking, savings institutions, and credit union industries. It will ensure that you are up-to-date and prepared for the continuing changes in this field.
- *E-Commerce: Controls and Audit* (product no. 731550). This course is a comprehensive overview of the world of e-commerce. Topics covered include internal control evaluation and audit procedures necessary for evaluating business-to-consumer and business-to-business transactions.

Member Satisfaction Center

.192 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.193 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.194 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Site Products @ AICPA Online and CPA2Biz

.195

- *AICPA reSOURCE Online*. Get access—anytime, anywhere—to the AICPA's latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides, Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential service, go to www.cpa2biz.com.
- *AICPA's Online Learning Tool, AICPA Infobytes*. An annual fee (\$95 for members and \$295 for nonmembers) will offer unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.
- *AICPA Online* offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. Online informs the subscriber of developments in the accounting and auditing world as well as developments in congressional and political affairs.

Other Helpful Web Sites

.196 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the "Information Sources" table at the end of this Alert.

.197 This Audit Risk Alert replaces the *Banks, Credit Unions, and Other Lenders and Depository Institutions Industry Developments—2001/02* Audit Risk Alert. *The Banks, Credit Unions, and Other Lenders and Depository Institutions Industry Developments* Alert is published annually. As you encounter audit or industry issues that

you believe warrant discussion in next year's Alert, please feel free to share those with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to jgould@aicpa.org, or write to:

AAM Section 8060

Employee Benefit Plans Industry Developments—2003

NOTICE TO READERS

This Audit Risk Alert, prepared by the AICPA staff, is intended to provide auditors of financial statements of employee benefit plans with an overview of recent economic, industry, regulatory, and professional developments that may affect the audits they perform.

This publication is an *Other Auditing Publication* as defined in Statement on Auditing Standards (SAS) No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. This publication was reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

The AICPA staff wishes to thank the members of the Employee Benefit Plans Expert Panel; the Employee Benefit Plans Audit Guide Revision Task Force; and the Office of Chief Accountant, Employee Benefits Security Administration of the U.S. Department of Labor for their contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert is intended to help you plan and perform your employee benefit plan audits. The Alert addresses current industry developments and emerging practice issues and provides information on current auditing, accounting, and regulatory developments. Being armed with a sound understanding of these areas allows you, among other things, to perform your audits in a more efficient and effective manner, and to deliver greater value to your clients through audit and related services.

Industry and Economic Developments

.02 As traditional pension plans continue to grow more scarce, employees are using their 401(k) accounts as their main source of retirement income. The past three years have seen 401(k) portfolios shrinking and pension plans becoming underfunded. This section discusses the economic environment, pension funding crisis, and other issues facing benefit plans today.

Economic Environment

.03 In planning their audits, auditors need to understand the economic conditions facing the industry in which the client operates. Economic activities relating to such factors as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and the labor market are likely to have an impact on the entity being audited.

.04 The United States economy is in a continued state of flux. According to the Commerce Department's figures, the economy was actually shrinking in 2001, showing that the United States was in a recession long

before September 11. The events of that day certainly cost the U.S. economy thousands upon thousands of jobs and somewhere between \$75 billion and \$100 billion in reduced output. And a number of industries, such as airlines and tourism, suffered tremendously and have not fully recovered. Undoubtedly, the impact of the terrorist attacks will ripple through the economy for some time.

.05 Although the 2001 recession lasted six months longer than originally thought, it is still considered a mild recession by historical standards. Unfortunately, the recovery has been equally weak and is not typical of recoveries the country has experienced since World War II. In the past, job growth was sizable after a recession. This time, although unemployment fell to 5.6 percent in September of 2002, the trend for most of 2002 was flat. The government created most of the new jobs, and the number of jobs in the private sector actually decreased slightly. Employers are reluctant to hire new employees because of the tumbling stock market and uncertainty over the economy's health. The fourth quarter of 2002 saw the economy grow at a 1.4 percent annual rate. The historical average for economic growth at this stage of a recovery is in excess of 5 percent. The economy grew 1.6 percent in the first three months of 2003, weakened by war worries, high oil prices, and bad weather.

Stock Market Woes

.06 The downward slide of the Dow Jones Industrial Average (DJIA), the National Association of Securities Dealers Automated Quotation (NASDAQ) Composite Index, and the Standard & Poor's 500 Stock Index (S&P 500) that began in 2000 continued through 2002. Throughout the year, analysts were evaluating economic conditions and drastic declines in stock market indexes, comparing them to prior periods in an attempt to determine whether the economy had finally reached rock bottom. But the stock market kept surprising everyone with further declines that sent various indexes to record lows.

.07 Many defined benefit pension plans have experienced market value declines to the extent that plan sponsors must now make contributions (see the "Defined Benefit Plans' Pension Funding Crisis" section of this Alert for an in-depth discussion). In addition, sponsors of defined contribution pension plans are rethinking company stock versus cash matching contributions and other plan design features.

Effect of Layoffs and Cost Reductions

.08 The benefit plan administration area at a company can be especially volatile when it comes to layoffs. Significant layoffs can have a serious effect on an entity's internal control and financial reporting and accounting systems. For instance, employees who remain at the company may feel overwhelmed by their workloads, may feel pressured to complete their tasks with little or no time to consider their decisions, and may be performing too many tasks and functions. The auditor may need to consider whether these situations exist and what their effect on internal control may be. Statement on Auditing Standards (SAS) No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, provides guidance on the auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards (GAAS).

.09 Additionally, the auditor may need to consider the possible effects that key unfilled positions can have on internal control. Entities that have had strong financial reporting and accounting controls could see those controls deteriorate due to the lack of employees. Layoffs as well as the current economic climate can also create additional exposure to possible internal fraudulent activities (for example, when an employee performs a job function that otherwise would be segregated). SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement caused by fraud. See the section "Consideration of Fraud in Employee Benefit Plan Engagements" in this Alert for further discussion of SAS No. 99.

.10 You may want to consider these issues in planning and performing the audit and in assessing control risk. Remember that gaps in key positions may represent reportable conditions that should be communicated

to management and the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325).

.11 In addition, significant layoffs could result in a change in benefit plan activity (for example, decreased contributions or increased distributions) that should be considered in planning and performing the plan audit.

.12 Some companies have chosen to reduce operating costs by decreasing/eliminating employer matching contributions or amending employee benefit plans to allow for payment of expenses from the plan instead of from the plan sponsor. There has been a trend toward defined contribution plans charging participants for expenses or paying expenses out of plan forfeitures. In addition, to reduce costs, health and welfare plans are increasing premium copayments or health insurance deductibles or lowering health coverage limits. Such changes in plan administration should be reviewed to determine whether they are in accordance with the plan document and should be considered in planning and performing the audit.

The Sarbanes-Oxley Act of 2002

.13 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (the Act). The Act dramatically affects the accounting profession and affects not just the largest accounting firms, but any CPA actively working as an auditor of or for a publicly traded company or any CPA working in the financial management area of a public company. The Act contains some of the most far-reaching changes that Congress has ever introduced to the business world. Although most of the provisions of this legislation are specific to auditors of public companies, even practitioners not performing audits may be affected by the Act. Therefore, all CPA firms should become familiar with the provisions of the Act.

Timetable

.14 For a timetable of key actions to be taken in response to the Act and for information about what auditors need to know, go to www.aicpa.org/sarbanes/index.asp.

Major Provisions

.15 Major provisions of the Act include:

- A new Public Company Accounting Oversight Board (PCAOB) of five members has been appointed and is overseen by the Securities and Exchange Commission (SEC). This new board will be funded by public companies through mandatory fees.
- Auditors of public companies will be required to register with the board. This includes auditors of employee benefit plans whose plan sponsors file Form 11-Ks with the SEC.
- The board has the authority to set and enforce auditing, attestation, ethics, and quality control standards for audits of public companies.
- The Act requires the board to include in auditing standards certain requirements, such as:
 - Retention of the audit working papers for a seven-year period
 - A concurring or second partner review of audit reports
 - A description in the auditor's report of the scope of the auditor's testing of the internal control structure and procedures of the issuer
- The Act requires inclusion in the auditor's report or in a separate report of (1) the findings of the auditor's testing of internal controls; (2) an evaluation of (a) whether the internal control structure and procedures include maintenance by the issuer of records that accurately and fairly reflects the transactions and disposition of assets and (b) whether the issuer's internal controls provide reasonable

assurance that transactions are recorded in conformity with generally accepted accounting principles (GAAP), and that receipts and expenditures are being made only in accordance with authorizations of management and directors; and (3) a description, at a minimum, of material weaknesses in internal controls.

- The board is empowered to inspect the auditing operations of public accounting firms and to investigate violations of securities laws, standards, competency, and conduct.
- The board can impose disciplinary or remedial sanctions for violations of the board's rules, securities laws related to public company audits, and professional accounting standards. The board will perform annual quality reviews (inspections) for the largest audit firms (more than 100 issuers); smaller firms must be inspected every three years.
- The Act restricts the consulting work auditors may perform for a public company it audits. Banned nonaudit services include bookkeeping, information systems design and implementation, appraisals or valuation services, actuarial services, internal audits, management and human resources services, broker/dealer and investment banking services, legal or expert services unrelated to audit services, and other services the board determines by rule are impermissible. Nonaudit services not banned are allowed if preapproved by the audit committee.
- Audit committees of the company's board of directors are responsible for the hiring, compensation, and oversight of the independent auditor.
- Chief executive officers (CEOs) and chief financial officers (CFOs) are required to certify company financial statements, with criminal (up to 20 years) and civil (up to \$5 million) penalties for false certification. In the event of a restatement of financial statements arising from securities fraud, CEOs and CFOs must forfeit trading profits and bonuses received before the restatement. Presently, this requirement under section 302 of the Act does not apply to Form 11-K filings. It is unclear if certifications pursuant to section 906 of the Act apply to Form 11-K filings. SEC council should be consulted for this regulation.
- Document altering or destroying in a federal or bankruptcy investigation is now a felony with penalties of up to 20 years. Key audit documents and e-mail must be preserved for five years. It is a felony, with penalties of up to 10 years, to destroy such documents. There is also a provision that requires retention of key audit documents, as defined by the SEC, for seven years.
- The statute of limitations for the discovery of fraud is extended to two years from the date of discovery and five years after the act. (It was previously one year from discovery and three from the act.)

To read a detailed description of the Sarbanes-Oxley Act, go to www.aicpa.org/info/sarbanes_oxley_summary.htm.

Ramifications and Rulemaking

.16 The ramifications of some of the provisions in the Sarbanes-Oxley Act will become known only as the SEC and the new PCAOB begin implementing the law. In response to the Act, the SEC has issued a number of rulings.

Cascade Effect

.17 Of particular concern is just how far down the Act will cascade, affecting the nation's small and midsized accounting firms of nonpublic companies. A major concern is that the new legislation by Congress may become the template for parallel federal and state legislative or rule changes that directly affect both nonpublic companies that are subject to other regulations and the CPAs that provide services to them.

.18 Section 209 of the Act states:

In supervising nonregistered public accounting firms and their associated persons, appropriate State regulatory authorities should make an independent determination of the proper standards applicable, particularly taking into consideration the size and nature of the business of the accounting firms they supervise and the size and nature of the business of the clients of those firms.

.19 As we write, several states are moving forward with legislation that could result in additional burdens for CPAs and possibly conflict with federal laws. The AICPA and the state CPA societies are monitoring this situation closely and will continue to keep you informed.

Audit Engagement Changes Resulting From Sarbanes-Oxley

.20 Currently, the AICPA Auditing Standards Board (ASB) is considering the Act's provisions and its audit implications. Issues being addressed include:

1. A possible amendment to SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), to address the audit working paper retention provisions of the Act
2. Amendments to the attestation standards (Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards: Revision and Recodification* [AICPA, *Professional Standards*, vol. 1, AT sec. 501]) in light of the Act's provisions regarding internal control reporting
3. Possible changes to auditing and quality control standards to respond to the Act's provisions concerning audit partner rotation, concurring review partner reviews, and quality control
4. Possible changes to auditing standards in response to communication and reporting needs of audit committees

Your Professional Resource

.21 To help you understand the ramifications of the Sarbanes-Oxley Act and to help you comply with its provisions, the AICPA is developing several resources, including the following:

1. A new toll-free number is available for any questions your firm or company may have about the legislation, how it will be implemented, and how to comply. Call (866) 265-1977 and select the option that is most appropriate for your firm or company. You will receive a response within 24 hours.
2. The AICPA has established the "Sarbanes-Oxley Act/PCAOB Implementation Central" at AICPA Online at www.aicpa.org/sarbanes/index.asp to keep you up-to-date on important developments.
3. Periodic Web casts will be conducted to brief members on issues as they emerge, as well as short video clips and news alerts that will be sent to members through e-mail.
4. A one-hour CPE training course on the legislation has been developed.
5. Updates and information will be published in numerous newsletters and other communication channels, including AICPA Online, the *CPA Letter*, and the *Journal of Accountancy*.

Defined Benefit Plans' Pension Funding Crisis

.22 As the stock market has plummeted, so has the value of pension plan assets. Suddenly, entities are faced with the prospect of pouring money into underfunded pension plans. These contributions will reduce earnings, perhaps significantly. In addition, companies with underfunded pension plans face the risk of technically defaulting on the debt they carry. Thus, a going-concern problem can arise.

Impact on the Plan Sponsor

.23 The funded status of most defined benefit pension plans has flipped from overfunded to underfunded since the beginning of 2000, and plan sponsor contributions may now be required. The decline of the

equity markets is well recognized as a cause of the reversal, with the S&P 500 Stock Index declining 40 percent over that three-year period. Less recognized but of great impact is the lower interest rates used to present value the pension obligation. As a rule of thumb, for every 1 percent drop in the discount rate, the pension obligation increases by 15 percent to 20 percent.

.24 The impact on a plan sponsor's financial statements has been dramatic, increasing pension expense (and thus lowering earnings per share), and in many cases causing an additional minimum liability to be recorded for the first time ever. When the market value of plan assets under Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 87, *Employers' Accounting for Pensions*, falls below the accumulated plan obligation (APO), the deficiency, along with any prepaid pension cost, is recorded as additional liability, and for some companies, a portion of the additional liability is recorded as a reduction in shareholders' equity. The decreased equity affects the debt-to-equity ratio, which may cause debt covenant violations.

Illustrative Statement of Changes in Net Assets Available for Benefits With Negative Returns

.25 With the continued decline in value of plan investments, many plans have investment losses. The following financial statement shows the presentation of investment losses on a statement of changes in net assets available for benefits.

ABC, Inc. 401(k) Employee Savings Plan Statement of Changes in Net Assets Available for Benefits (Modified Cash Basis)		
	Years ended December 31,	
	20X2	20X1
Investment income (loss):		
Interest and dividend income	\$ 1,302,277	\$ 475,195
Net depreciation in fair value of investments	(5,206,577)	(1,888,439)
Other income—loan interest	15,488	9,805
Total investment loss	(3,888,812)	(1,403,439)
Contributions:		
Employee	6,777,195	5,489,673
Employer	2,483,755	865,479
Rollover	467,288	672,053
Total contributions	9,728,238	7,027,205
	5,839,426	5,623,766
Deductions from net assets attributable to:		
Benefits paid	3,796,126	2,947,410
Administrative expenses (note 4)	5,465	2,345
Total deductions	3,801,591	2,949,755
Net increase	2,037,835	2,674,011
Net assets available for benefits:		
Beginning of year	21,907,630	19,233,619
End of year	<u>\$23,945,465</u>	<u>\$21,907,630</u>

See accompanying notes to financial statements.

Investments in Limited Partnerships and Reporting Such Investments on Form 5500 and 103-12 Entities

.26 Pension funds, especially those with large investment portfolios, are more frequently investing in limited partnership private equity funds, which may include hedge funds. These pooled investment funds are lightly regulated and not readily marketable, unlike registered investment funds, commonly known as mutual funds. Auditors should take special care in identifying when a plan invests in a limited partnership because it is not uncommon for such investments to be classified incorrectly (for example, as a registered investment company or other type of fund) on the schedule of investments provided by the custodian or trustee.

.27 This trend of investing in limited partnerships and the recent scrutiny of accounting and disclosure of limited partnership investments in corporate financial statements have precipitated an issue about what employee benefit plan financial statements should disclose about a plan's investments in limited partnerships.

.28 The AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans* (EBP Guide), does not specifically address financial statement or Form 5500 reporting requirements for limited partnerships. Employee benefit plan financial statements report investments at fair value, which would include investments in limited partnerships. Such investments are not consolidated or accounted for on the equity method, as they might be in the plan sponsor's financial statements.

.29 Other required disclosures for limited partnership investments are those applicable under AICPA Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. SOP 94-6 requires disclosures about certain significant estimates and current vulnerability due to certain concentrations.

.30 Consideration should be given to including the following disclosures:

- Description of the plan's ownership interests in the limited partnerships and a summary of investments owned by the partnership investments and the corresponding risk. A riskier, more aggressive investment would warrant consideration of additional disclosure.
- If a related party relationship exists, the names of the other partners in the plan's partnership investments and their relationship to the plan.
- Methodology in which the partnerships allocate gains, losses, and expenses between the plan and the other partners.
- Related-party transactions with parties in interest related to the limited partnerships (including investment management fees paid).
- Additional capital commitment requirements.

.31 Paragraph 7.57 of the EBP Guide addresses auditing procedures for limited partnerships when performing full scope audits. Auditors should take special care in performing limited scope audit procedures on limited partnership investments, as often the certifying entity does not have timely or accurate information regarding the amount and valuation of the plan's investment in the limited partnership. Although the auditor is not required to audit certain investment information when the limited scope audit exemption is applicable, further investigation and testing are required whenever the auditor becomes aware that such information is incorrect, incomplete, or otherwise unsatisfactory for the purpose of preparing the financial statements (see paragraph 7.62 of the EBP Guide.)

.32 How a plan reports an investment in a limited partnership on Schedule H to the Form 5500 depends on the nature of the underlying assets of the partnership and whether the partnership elects to file directly with the Department of Labor (DOL).

Financial Statement Reporting and Form 5500 Filing Requirements for 103-12 Entities

.33 DOL regulation 29 CFR 2520.103-12 provides an alternative method of reporting for plans that invest in an entity, other than a master trust investment account (MTIA), common/collective trust (CCT), or pooled separate account (PSA), whose underlying assets include “plan assets” (within the meaning of DOL regulation 29 CFR 2510.2-101) of two or more plans that are not members of a related group of employee benefit plans. Making this determination can be complicated and may necessitate legal consultation.

.34 Generally a 103-12 entity will operate based on its legal structure (according to its operating agreements) in the form of a financial services product such as a collective trust or a limited partnership. Typically audited financial statements are required by the entity’s operating agreement and are prepared in accordance with generally accepted accounting principles in a format following industry standards consistent with the entity’s operations. For example, a 103-12 entity that operates as a limited partnership would prepare financial statements in accordance with GAAP for limited partnerships.

.35 103-12 entities are required to file the following (see paragraph A.56 of the EBP Guide):

- Form 5500
- Schedule A, Insurance Information
- Schedule C, Service Provider Information, Part I and II
- Schedule D, DFE/Participating Plan Information, Part II
- Schedule H, Financial Information (including the Schedule of Assets (Held at End of Year))
- Schedule G, Financial Transaction Schedules
- A report of the independent qualified accountant

.36 Often the format of the financial statement schedules (for example, the Schedule of Assets) for the 103-12 entity prepared in accordance with industry standards are not consistent with format of the schedules as required by Form 5500 instructions. Form 5500 requirements should be considered when preparing additional information schedules to be attached to the 103-12 entity’s financial statements filed with the Form 5500.

Outsourcing of Certain Administrative Functions

.37 Employee benefit plan sponsors have typically used third-party service providers in some capacity to assist in administering their plans. With the trend toward company downsizing and increased reliance on technology, many plan sponsors are increasingly turning to outsourcing as a way to reduce costs and increase efficiencies of administering employee benefit plans. Examples include recordkeeping and/or benefit payments or claims processed by outside service organizations, such as bank trust departments, data processing service bureaus, insurance companies, and benefits administrators.

.38 Many plan sponsors and their employees may not be familiar with their fiduciary responsibilities regarding employee benefit plans. Auditors should refer plan sponsors to their plan legal counsel for interpretations of specific actions and how these may or may not be in accord with their fiduciary responsibilities.

.39 SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), as amended, provides, among other things, guidance on the factors an independent auditor should consider when auditing the financial statements of a plan that uses a service organization to process certain transactions. Often, the plan does not maintain independent accounting records of transactions executed by the service provider. For example, many plan sponsors no longer maintain participant enrollment forms detailing the

contribution percentage and the allocation by fund option; these amounts can be changed by telephone or over the Internet without any record. In these situations, the auditor may not be able to obtain a sufficient understanding of internal control relevant to transactions executed by the service organization to plan the audit and to determine the nature, timing, and extent of testing to be performed without considering those components of internal control maintained by the service organization. This understanding can be efficiently achieved by obtaining and reviewing a report prepared in accordance with SAS No. 70, if available. If a SAS No. 70 report is not available, see paragraph 6.14 of the EBP Guide for guidance.

.40 The auditor should read the entire SAS No. 70 document to determine what was reviewed and tested and over what period and whether there are any instances of noncompliance with the service organization's controls identified in either (1) the service auditor's report or (2) the body of the document (where the results of testing are described). If the service organization's SAS No. 70 report identifies instances of noncompliance with the service organization's controls, the plan auditor should consider the effect of the findings on the assessed level of control risk for the audit of the plan's financial statements and, as a result, the plan auditor may decide to perform additional tests at the service organization or, if possible, perform additional audit procedures at the plan. In certain situations, the SAS No. 70 report may identify instances of noncompliance with the service organization's controls but the plan auditor concludes that no additional tests or audit procedures are required because the noncompliance does not affect the assessment of control risk for the plan.

.41 The plan auditor should also read the description of controls to determine whether complementary user organizations controls are required (for example, at the plan sponsor level) and whether they are relevant to the service provided to the plan. If they are relevant to the plan, the plan auditor should consider such information in planning the audit. The plan auditor should consider the need to document and test such user organization controls. While the plan sponsor may have outsourced administrative functions to a third party, the plan sponsor still has a fiduciary duty to monitor the activities of the third party. Examples of such monitoring controls, which should be considered in planning and performing the audit, may include:

- Review of third-party service provider's SAS No. 70 report
- Fluctuation analysis or reasonableness review of periodic third-party service provider reports with reconciliations with and comparisons to client data
- Predetermined communication, escalation, and "follow-up" procedures in the event of an issue or problem
- Periodic review of financial and control measures included in the third-party service provider contract
- On-site visits to the third-party service provider
- Annual reassessment of effectiveness of the third-party service provider relationship

What If the Service Organization Uses Another Service Organization to Perform Certain Functions?

.42 A service organization may use another service organization to perform functions or processing that is part of the plan's information system as it relates to an audit of the financial statements. The subservice organization may be a separate entity from the service organization or may be related to the service organization. To plan the audit and assess control risk, the plan auditor may need to consider controls at the service organization and also may need to consider controls at the subservice organization, depending on the functions each performs. For further guidance on subservice organizations, see paragraph 6.17 of the EBP Guide and chapter 5 in the AICPA Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012772).

Going-Concern Issues for Plans

.43 SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341), as amended, provides guidance to auditors with respect to evaluating whether there is substantial doubt about the plan's ability to continue as a going concern. For financial reporting purposes, continuation of a plan as a going concern is assumed in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going concern assumption relates to:

- The plan's ability to continue to meet its obligations as they become due without an extraordinary contribution by the sponsor or substantial disposition of assets outside the ordinary course of business.
- Externally forced revision of its operations, or similar actions.

.44 During the course of the audit, the auditor may become aware of information that raises substantial doubt about the plan sponsor's ability to continue as a going concern. Although employee benefit plans are not automatically and necessarily affected by the plan sponsor's financial adversities, the auditor should address whether those difficulties pose any imminent, potential impact on the plan and should consider the sponsor's plans for dealing with its conditions. Due to the current economic climate, some plan sponsors are filing for bankruptcy, causing the plan to liquidate and pay out all of the participants. Plan expenses may increase if the costs of winding down the plan are paid out of plan assets (if permitted by the plan document).

.45 SAS No. 59, as amended, states that the auditor has a responsibility to evaluate whether there is substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. The auditor considers the results of the procedures performed in planning, gathering evidential matter relative to the various audit objectives, and completing the audit to identify conditions and events that, when considered in the aggregate, create substantial doubt about the plan's ability to continue as a going concern for a reasonable period of time. As noted earlier, such conditions may include the need for an extraordinary contribution from the plan sponsor and/or the need to dispose of substantial assets outside the ordinary course of business. Other such conditions and events may include:

- The plan's inability to make benefit payments when they are due
- Plan merger or consolidation
- Debt restructuring
- Loan defaults
- The plan's inability to meet minimum funding requirements
- Bankruptcy of the plan sponsor (or participating employers in multiemployer plans)
- A nontemporary decline in the market value of investments held by the plan
- A significant increase in the cost of benefits without the ability to significantly raise contributions
- Events that endanger the plan's ability to operate, such as if the plan no longer qualifies as a qualified plan

.46 If the auditor determines that substantial doubt about the plan's ability to continue as a going concern does exist, an explanatory paragraph in the auditor's report is required regardless of the auditor's assessment of asset recoverability and amount and classification of liabilities. For example, if the sponsoring employer intends to terminate the plan within 12 months of the date of the financial statements, the auditor should include an explanatory paragraph in his or her report that discloses that fact. SAS No. 59 is amended to preclude the use of conditional language in expressing a conclusion concerning the existence of substantial doubt about the plan's ability to continue as a going concern in a going-concern explanatory paragraph.

The Health Insurance Portability and Accountability Act

.47 The Health Insurance Portability and Accountability Act of 1996 (HIPAA) established standards for the privacy and protection of individually identifiable electronic health information as well as administrative simplification standards. HIPAA includes protection for those who move from one job to another, who are self-employed, or who have preexisting medical conditions, and places requirements on employer-sponsored group health plans, insurance companies, and health maintenance organizations.

.48 In December 2000 the final rules on standards for privacy of individually identifiable health information were published in the *Federal Register*. The rules include standards to protect the privacy of individually identifiable health information. The rules (applicable to health plans, health care clearinghouses, and certain health care providers) present standards with respect to the rights of individuals who are the subjects of this information, procedures for the exercise of those rights, and the authorized and required uses and disclosures of this information. These are the first-ever national standards to protect medical records and other personal health information.

.49 The new standards:

- Limit the nonconsensual use and release of private health information.
- Give patients new access to their records and let them know who else has accessed them.
- Restrict most disclosure of information to the minimum needed for the stated purpose.
- Establish criminal and civil sanctions.
- Establish requirements for access by researchers and others.

Providers will be required to obtain advance written consent from their patients to disclose information and to provide those patients with written information on their privacy rights.

.50 The regulations became effective April 14, 2001; however, health care providers were not forced to fully comply with the changes until April 14, 2003.

.51 In response to this regulation, many claim processors have updated and instituted a variety of confidentiality, indemnification, or business associates agreements to protect their organizations when third parties request claim information. In certain instances the auditor has been willing to sign such contracts but the third-party administrator has interpreted the new HIPAA regulations to not allow outside auditors access to the detail claims information. However, some believe that as long as the health information is protected by a privacy contract signed by the auditor, the third-party administrator should provide access to a plan's claim information for purposes of performing an audit of the plan's financial statements to be attached to the Form 5500 filing with the DOL.

.52 On February 20, 2003 the security rules under HIPAA were finalized. The rules are effective for most health plans on April 21, 2005 (small health plans, as defined, will have until April 21, 2006 to comply).

.53 If the auditor is unable to obtain access to records as a result of (1) not signing a confidentiality agreement or (2) a third party administrator's refusal to provide access under any circumstances, a scope limitation could result.

.54 (See the discussion of confidentiality agreements in the section "Health and Welfare Benefit Plan Issues—Confidentiality, Indemnification, and Business Associates Agreements" of this Alert.)

GUST

.55 GUST is an acronym for the following laws that have changed plan qualification requirements:

- General Agreement on Tariffs and Trade—Uruguay Round Agreements Acts (GATT)
- Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA)
- Small Business Job Protection Act of 1996 (SBJPA)
- Taxpayer Relief Act of 1997 (TRA '97)
- IRS Restructuring and Reform Act of 1998 (RRA '98)
- Community Renewal Tax Relief Act of 1997 (CRA)
- Community Renewal Tax Relief Act of 2000 (as added by Rev. Proc. 2001-55)

.56 All plan documents, including those for prototype plans, must be amended to comply with the applicable legislative changes required by GUST. A prototype plan is typically a retirement plan prepared by a bank, securities firm, or other financial institution that may be adopted by an employer. Like all plans, prototype plans must be amended from time to time as required by changing legislation and regulations. Auditors should be aware that if plans are not restated in a timely manner to comply with GUST, the plan sponsor risks losing its plan's tax-qualified status.

.57 Revenue Procedure 2001-55 extended the remedial amendment period to February 28, 2002 (if the period would have otherwise ended before then). Also extended to February 28, 2002, was the time for adoption of a preapproved prototype plan or certification of intent to adopt such a plan in order to be eligible for the extension of the GUST remedial amendment period (later of December 31, 2002 or one year from receipt of a GUST opinion letter). Revenue Procedure 2002-73 further extended this time to the later of September 30, 2003 or the end of the 12th month after the date the sponsor receives a GUST opinion or advisory letter from the IRS, for amending preapproved plans to comply with GUST.

Regulatory Developments

PWBA Becomes the Employee Benefits Security Administration

.58 Effective February 3, 2003, the DOL changed the name of the Pension and Welfare Benefits Administration (PWBA) to the Employee Benefits Security Administration (EBSA). According to EBSA Assistant Secretary Ann L. Combs, "This action helps us achieve our goal of improved public service by making the agency more recognizable to those we serve. We want to enable Americans to better identify the federal agency that assists them in understanding and receiving their benefits."

.59 EBSA will continue to meet the ever-increasing demand to assist workers with their health and retirement benefits. The agency will continue its outreach activities to educate individuals and the business community about its programs, services, and relevant federal law, and help employers and service providers comply with their obligations under the law. During 2002, over 184,000 individuals contacted the agency for assistance.

.60 The public may reach EBSA by using the existing telephone, e-mail, and Web site contacts for PWBA. The agency is initiating a new toll-free participant assistance number, (866) 444-EBSA (3272), a new address for electronic inquiries, www.askebsa.dol.gov, and a new address for its Web site, www.dol.gov/ebsa. To reduce paperwork and costs, employers and plans will not be required to modify existing summary plan descriptions to reflect the agency's name change.

2002 Form 5500 Series

.61 The DOL, Internal Revenue Service (IRS), and the Pension Benefit Guaranty Corporation (PBGC) have released the 2002 Form 5500 return/reports, schedules, and instructions to be used by employee benefit plans for plan year 2002 filings. The IRS has also released the Form 5500-EZ return and instructions to be used by certain one-participant retirement plans for plan year 2002 filings.

.62 The Form 5500 and Form 5500-EZ for plan year 2002 are essentially unchanged from 2001. Certain modifications have been made to reflect changes in the law or regulations, to improve forms processing and to clarify the instructions. Modifications include, among other things:

- Redesign of the signature areas on the Form 5500, Form 5500-EZ, and Schedules B, P, and SSA to highlight where to sign the forms;
- Addition of several new principal business activity codes for Form 5500, line 2d, and several new plan characteristics codes for lines 8a and 8b;
- Removal of lines 8c and 10c of Form 5500 and Schedule F as a result of IRS Notice 2002-24 that suspended the filing requirements for fringe benefit plans;
- Elimination of several lines from Schedules B and R due to the phasing out of certain rules under Internal Revenue Code section 412(l) and Employee Retirement Income Security Act (ERISA) section 302(d);
- Addition of lines 16a through 16c and 17a through 17e to Schedule E concerning employee stock option plans (ESOPs) maintained by S Corporations;
- Modification of Schedules H and I line 4a to highlight EBSA's Voluntary Fiduciary Correction Program (VFCP) and Prohibited Transaction Exemption (PTE) 2002-51; and
- Advising Schedule SSA filers who need to report more separated participants than Schedule SSA (page 2) allows that the Social Security Administration requires that filers use additional Schedule SSA (page 2) as attachments.

.63 The DOL's ERISA Filing Acceptance System (EFAST) continues to process the Form 5500 in two computer scannable formats: *machine print* and *hand print* (the questions are the same, only the appearance is different). Machine print forms are completed using computer software from EFAST approved vendors and can be filed electronically or by mail (including certain private delivery services). Hand print forms may be completed by hand, typewriter, or by using computer software from EFAST approved vendors. Hand print forms can be filed by mail (including certain private delivery services); however, they *cannot* be filed electronically.

.64 The list of approved software vendors on the EFAST Web site is updated as software is approved for plan year 2002 filings. For assistance, filers may also contact EBSA's help desk toll free at (866) 463-3278.

.65 Information copies of the forms, schedules, and instructions are available on EBSA's Web site at www.efast.dol.gov. Filers may also order forms and IRS publications 24 hours a day, seven days a week, by calling (800) TAX-FORM (800-829-3676).

Department of Labor Amends EXPRO

.66 On July 2, 2002, the DOL finalized an amendment to PTE 96-62, known as EXPRO, to streamline the process for parties to seek authorization from the DOL to engage in certain prohibited transactions. The exemption applies to certain prospective transactions between employee benefit plans and parties in interest where such transactions are specifically authorized by the DOL and are subject to terms, conditions, and representations that are substantially similar to exemptions previously granted by the DOL. The exemption

affects plans, participants, and beneficiaries of such plans and certain persons engaging in such transactions.

.67 PTE 96-62 requires that applicants demonstrate to the DOL that their proposed transactions are substantially similar to transactions in at least two exemptions previously granted by the department within five years of their submission. The amendment provides applicants with more cases on which to base their transactions. The amendment to EXPRO also provides applicants with an alternate method of satisfying the program's requirements: Instead of having to cite as substantially similar two individual exemptions granted by the DOL within the previous five years, applicants may cite one individual exemption granted within the past 10 years and a transaction "authorized" under the EXPRO exemption within the past five years.

.68 To date, over 200 EXPRO transactions have been authorized. EXPRO has significantly reduced the number of individual exemptions relating to routine transactions, thus allowing applicants to receive exemptions in a more timely fashion and often saving them the cost of going through the more formal process for exemptions.

.69 For more information about EXPRO and the transactions authorized under the program, visit EBSA's Web site at www.dol.gov/ebsa.

Small Pension Plan Security Regulation

.70 On October 19, 2000, the DOL published a final rule to improve the security of the more than \$300 billion in assets held in private-sector pension plans maintained by small businesses. In recent years, considerable public attention has focused on small plans' potential vulnerability to fraud and abuse. Although such circumstances are rare, the DOL decided it was appropriate to strengthen the security of pension assets and the accountability of persons handling those assets.

.71 Historically, pension plans with fewer than 100 participants have been exempt from the requirement to have an independent audit of the plan's financial statements. This regulation is designed to safeguard small pension plan assets by adding conditions to the audit waiver requirement that focus on persons who hold plan assets, enhanced disclosure to participants and beneficiaries, and improved bonding requirements. The audit requirement for health and welfare plans is not affected by this regulation.

.72 Under the regulation, the administrator of an employee pension benefit plan that is required to complete Schedule I of the Form 5500 is not required to engage an independent auditor provided:

- At least 95 percent of the assets of the plan constitute "qualifying plan assets;" or
 - Any person who "handles" assets of the plan that do not constitute qualifying plan assets is bonded in accordance with ERISA section 412 and DOL Regulation 29 CFR 2580.412-6;
- and
- Certain required disclosures are made in the plan's summary annual report (SAR).

According to the DOL, the vast majority of the assets of small plans are "qualifying plan assets." The DOL believes that the plans that do not meet the 95 percent threshold will opt for the less expensive bonding alternative to avoid an independent audit of the plan's financial statements.

Definition of Qualifying Plan Assets

.73 For purposes of this regulation, the term *qualifying plan assets* means:

- Qualifying employer securities, as defined in ERISA section 407(d)(5) and the regulations issued there under;

- Any loan meeting the requirements of ERISA section 408(b)(1) and the regulations issued there under;
- Any assets held by any of the following institutions:
 - A bank or similar financial institution as defined in section 2550.408b-4(c);
 - An insurance company qualified to do business under the laws of a state;
 - An organization registered as a broker-dealer under the Securities Exchange Act of 1934; or
 - Any other organization authorized to act as a trustee for individual retirement accounts under Internal Revenue Code section 408.
- Shares issued by an investment company registered under the Investment Company Act of 1940;
- Investment and annuity contracts issued by any insurance company qualified to do business under the laws of a state; and
- In the case of an individual account plan, any assets in the individual account of a participant or beneficiary over which the participant or beneficiary has the opportunity to exercise control and with respect to which the participant or beneficiary is furnished with, at least annually, a statement from a regulated financial institution describing the assets held (or issued) by such institution and the amount of such assets.

Disclosure Requirements

.74 The exemption from the audit requirement for small pension plans is further conditioned on the disclosure of certain information to participants and beneficiaries. Specifically, the SAR of a plan electing the waiver must include, in addition to any other required information:

- Except for qualifying plan assets, as previously described, the name of each regulated financial institution holding (or issuing) qualifying plan assets and the amount of such assets reported by the institution as of the end of the plan year;
- The name of the surety company issuing the bond, if the plan has more than 5 percent of its assets in nonqualifying plan assets;
- A notice indicating that participants and beneficiaries may, upon request and without charge, examine, or receive copies of, evidence of the required bond and statements received from the regulated financial institutions describing the qualifying plan assets; and
- A notice stating that participants and beneficiaries should contact the EBSA regional office if they are unable to examine or obtain copies of the regulated financial institution statements or evidence of the required bond, as applicable.

.75 In response to a request from any participant or beneficiary, the administrator, without charge to the participant or beneficiary, must make available for examination, or upon request furnish copies of, each regulated financial institution statement and evidence of any bond required.

Effective Date

.76 The amendments made by this final rule are applicable as of the first plan year beginning after April 27, 2001. Accordingly, this change applied to the 2001 year filings for fiscal year filers whose plan years begin after April 27, 2001, and the 2002 filings for calendar year filers.

.77 Plan auditors should advise their small plan clients that they must indicate on Schedule I, Item 4k, whether they are claiming a waiver of the audit requirement.

Help Desk—See *Appendix D* of this Alert for a summary of the small pension plan audit waiver (SPPAW) in decision tree format.

DOL Guidance on Claims Regulation

.78 On November 21, 2000, the DOL published in the *Federal Register* a final regulation that sets new standards for processing benefit claims of participants and beneficiaries who are covered under employee benefit plans governed by ERISA. The regulation may be found at the DOL's Web site at www.dol.gov/ebsa/regs/fedreg/final/2000029766.htm.

.79 The new claims procedure regulation began to apply to some plans for new claims filed on or after January 1, 2002, and began to apply to group health plans on the first day of the first plan year beginning on or after July 1, 2002, but not later than January 1, 2003. The claims procedure regulation changes the minimum procedural requirements for the processing of benefit claims for all employee benefit plans covered under ERISA, although the changes are minimal for pension and welfare benefits plans other than those that provide group health and disability benefits. For group health and disability benefit claims, the regulation substantially changes the procedures for benefit determinations. Among other things, it creates new procedural standards for initial and appeal-level decisions, new time frames for decision making, and new disclosure rights for claimants.

.80 In response to many questions, the DOL has also published new guidance, in a Q & A format, to assist plans in bringing their benefit processing systems into timely compliance with the requirements of the claims regulation. This new guidance answers many of the frequently asked questions about the application of the claims regulation to group health and disability benefit plans. To the extent that the provisions of the regulation apply to other types of plans, the Q & A guidance applies to those plans also. The DOL anticipates providing additional guidance in the form of additional questions and answers, advisory opinions, or information letters as may be necessary to facilitate implementation of the requirements of the regulation. The views expressed in this publication represent the views of the DOL and may be obtained on the Internet at www.dol.gov/dol/ebsa or by calling the DOL toll free at (800) 998-7542 to obtain free printed copies.

EBSA Review of Plan Audits

.81 The EBSA continues its ongoing quality review program to assess the quality of ERISA audits. EBSA staff review audit reports that are attached to Form 5500 filings as well as conduct on-site reviews of audit work papers.

.82 In January 2003, the agency also began a nationwide study involving the on-site review of approximately 300 randomly selected sets of ERISA audit working papers. The primary objective of this review is to assess whether the level and quality of audit work being performed by Independent Qualified Public Accountants has improved as a result of actions taken by the DOL and the accounting and auditing profession since the performance of a similar study in 1997. That study disclosed that 19 percent of the audits pertaining to the 1992 filing year failed to comply with one or more of the established professional standards, and 33 percent of the audit reports reviewed failed to comply with one or more of ERISA's reporting and disclosure requirements.

EBSA Outreach and Customer Service Efforts

.83 The EBSA continues to encourage auditors and plan filers to call its Division of Accounting Services at (202) 693-8360 with ERISA-related accounting and auditing questions. Questions concerning the filing requirements and preparation of Form 5500 should be directed to the EBSA's EFAST help desk at its toll-free number, (866) 463-3278.

.84 In addition to handling technical telephone inquiries, the EBSA is involved in numerous outreach efforts designed to provide information to practitioners to help their clients comply with ERISA's reporting and disclosure requirements. The agency's outreach efforts continue to feature the current Form 5500, the EFAST processing system, and other agency-related developments. Questions regarding these outreach efforts

should be directed to the Office of the Chief Accountant at (202) 693-8360. Practitioners and other members of the public may also wish to contact the EBSA at its Web site at www.dol.gov/dol/ebsa. The Web site also provides information on EBSA's organizational structure, current regulatory activities, and customer service and public outreach efforts.

Delinquent Filer Voluntary Compliance Program

Help Desk—While more common for pension plans, this program also covers delinquent contributions made to health and welfare plans.

.85 The Delinquent Filer Voluntary Compliance (DFVC) Program is designed to encourage plan administrators to file overdue annual reports by letting them pay reduced penalties. Established in 1995, the program was revised in March 2002 to increase the incentives for delinquent plan administrators to voluntarily comply with ERISA's annual reporting requirements. Specifically, the DOL further reduced penalties under the DFVC program, and updated and simplified the rules governing participation in the program.

Program Eligibility

.86 Eligibility in the DFVC program continues to be limited to plan administrators with filing obligations under Title I of ERISA who comply with the provisions of the program and who have not been notified in writing by the DOL of a failure to file a timely annual report under Title I of ERISA. For example, Form 5500-EZ filers and Form 5500 filers for plans without employees (as described in 29 CFR 2510.3-3(b) and (c)), are not eligible to participate in the DFVC program because such plans are not subject to Title I.

Program Criteria

.87 Participation in the DFVC program is a two-part process. First, file with EBSA a complete Form 5500 Series Annual Return/Report, including all schedules and attachments, for each year relief is requested. Special simplified rules apply to "top hat" plans and apprenticeship and training plans. Second, submit to the DFVC program the required documentation and applicable penalty amount. The plan administrator is personally liable for the applicable penalty amount, and, therefore, amounts paid under the DFVC program shall not be paid from the assets of an employee benefit plan.

Penalty Structure

.88 *Reduced Per-Day Penalty.* The basic penalty under the program was reduced from \$50 to \$10 per day for delinquent filings.

.89 *Reduced Per-Filing Cap.* The maximum penalty for a single late annual report was reduced from \$2,000 to \$750 for a small plan (generally a plan with fewer than 100 participants at the beginning of the plan year) and from \$5,000 to \$2,000 for a large plan.

.90 *Per-Plan Cap.* The revised DFVC program also includes a per-plan cap. This cap is designed to encourage reporting compliance by plan administrators who have failed to file an annual report for a plan for multiple years. The per-plan cap limits the penalty to \$1,500 for a small plan and \$4,000 for a large plan regardless of the number of late annual reports filed for the plan at the same time. There is no per-administrator or per-sponsor cap. If the same party is the administrator or sponsor of several plans required to file annual reports under Title I of ERISA, the maximum applicable penalty amounts would apply for each plan.

.91 *Small Plans Sponsored by Certain Tax-Exempt Organizations.* A special per-plan cap of \$750 applies to a small plan sponsored by an organization that is tax-exempt under Internal Revenue Code section 501(c)(3). The \$750 limitation applies regardless of the number of late annual reports filed for the plan at the same time. It is not available, however, if as of the date the plan files under the DFVC program, there is a delinquent annual report for a plan year during which the plan was a large plan.

.92 Top Hat Plans and Apprenticeship and Training Plans. The penalty amount for top-hat plans and apprenticeship and training plans was reduced to \$750.

Updated and Simplified Procedures

.93 The DOL also simplified and updated the procedures governing participation in the program. The changes are intended to make the program easier to use. For example:

- Plan administrators may use the Form 5500 forms for the year relief is sought or the most current form available at the time of participation. This option allows administrators to choose the form that is most efficient and least burdensome for their circumstances.
- The forms and penalty payment check should no longer be annotated in bold-red print identifying the filing as a DFVC filing.
- The program has been updated to conform to the annual reporting procedures under the computerized EFAST.
- The address where DFVC program remittances are submitted has been changed to DFVC Program, EBSA, P.O. Box 530292, Atlanta, Georgia 30353-0292. Submissions made to the old address will be returned to the filer.

IRS and PBGC Participation

.94 Although the DFVC program does not cover late filing penalties under the Internal Revenue Code or Title IV of ERISA, the IRS and PBGC agreed to provide certain penalty relief for delinquent Form 5500s filed for Title I plans where the conditions of the DFVC program have been satisfied.

Effective Date and Comments

.95 The modifications of the DFVC program were effective upon the March 28, 2002, publication in the *Federal Register* of a notice announcing the modifications.

.96 Questions about the DFVC program should be directed to EBSA by calling (202) 693-8360. For additional information about the Form 5500 Series, visit the EFAST Internet site at www.efast.dol.gov, or call the EBSA help desk toll free at (866) 463-3278.

DOL Issues Final Rules on Disclosure of Pension Plan “Blackout Periods”

.97 On January 24, 2003, the DOL published final rules implementing a new federal law requiring 401(k) plans to give workers 30-day advance notice of “blackout periods” when their rights to direct investments, take loans, or obtain distributions are suspended. These final rules supersede interim final rules issued by the department on October 21, 2002.

.98 Blackout periods typically occur when plans change recordkeepers or investment options, or add participants due to corporate merger or acquisition.

.99 On July 30, 2002, President Bush signed the Sarbanes-Oxley Act of 2002, giving the Secretary of Labor authority to promulgate rules and a model notice implementing the blackout notice provisions. The act requires that participants and beneficiaries be given a 30-day advance notice of a blackout period. When a blackout period affects a plan that includes employer stock as an investment option, the plan must also notify the corporate issuer of the employer stock, so corporate insiders are aware that they may not trade employer securities or exercise options during the blackout. The law is effective for blackout periods occurring on or after January 26, 2003.

.100 Under the final rules, 401(k) plan administrators must provide blackout notices that contain the reasons for the blackout, a description of the workers' rights that will be suspended, the start and end dates of the blackout period, and a statement advising workers to evaluate their current investments based on their inability to direct or diversify assets during the blackout period.

.101 Changes made to the interim final rules in the final regulations include:

- Flexibility for plan administrators in describing the starting and ending dates of the blackout period;
- Clarification of situations that are not blackout periods, such as suspensions resulting from pending qualified domestic relations order determinations and actions by individual participants; and
- A special rule for issuers of company stock who are also the plan administrators.

.102 Failure or refusal to provide the required notice may result in civil penalties. A second set of final rules issued by the DOL adopts the interim final rules that provide for civil penalties of up to \$100 per day per participant for plan administrators who fail or refuse to comply with the notice requirement.

.103 The rules may be viewed at www.dol.gov/ebsa under "Laws and Regulations."

The DOL Introduces New Compliance Assistance Tool—Field Assistance Bulletins

.104 On September 26, 2002, the DOL unveiled its first Field Assistance Bulletin (FAB) to publicize technical guidance provided to its field enforcement staff.

.105 In the course of audits and investigations by EBSA field enforcement staff, difficult legal issues often arise. In an effort to provide the regional office staff with prompt guidance, EBSA has developed a new vehicle for communicating technical guidance from the national office. FABs will ensure that the law is applied consistently across the various regions. They also will provide the regulated community with an important source of information about the agency's views on technical applications of ERISA. All FABs will be posted on EBSA's Web site and be available to the public.

.106 Secretary of Labor Elaine L. Chao has made compliance assistance a top DOL priority. The FABs are the next step in EBSA's continuing compliance assistance program to educate and assist employers, plan officials, service providers, and others in achieving and maintaining compliance with ERISA. These efforts include working to foster self-regulation and oversight by offering programs that encourage voluntary compliance, such as the VFPC and the DFVC program. EBSA's compliance assistance program also includes outreach, new educational materials, and a dedicated Web page. FABs, as well as future bulletins, will be available at www.dol.gov/ebsa under "Compliance Assistance" and "Laws and Regulations."

.107 The first FAB, Field Assistance Bulletin 2002-1, addresses the fiduciary considerations involved with the refinancing of an ESOP loan under ERISA section 408(b)(3).

.108 Field Assistance Bulletin 2002-2 addresses whether the trustees of two related multiemployer plans were subject to ERISA's fiduciary standards when they amended the plan's trust agreements.

.109 Field Assistance Bulletin 2002-3 addresses the fiduciary considerations regarding the use of agreements in which the service provider retains the "float" on plan assets.

Timeliness of Remittance of Participant Contributions Remains an Enforcement Initiative for the EBSA

.110 The EBSA continues to focus on the timeliness of remittance of participant contributions in contributory employee benefit plans. Participant contributions are required to be remitted as soon as they

can reasonably be segregated from an employer's general assets. DOL regulations require employers who sponsor pension plans (both defined benefit and defined contribution) to remit employee contributions as soon as practicable, but in no event more than 15 business days after the month in which the participant contribution was withheld or received by the employer.

.111 The regulation establishes a procedure by which an employer may obtain an extension of the 15-business-day limit for an additional 10 business days. This regulation does not change the maximum period for remittance of employee contributions to welfare plans as soon as practicable, but in no event more than 90 days after the day the contribution was withheld or received by the employer.

.112 Failure to remit or untimely remittance of participant contributions may constitute a prohibited transaction (either a use of plan assets for the benefit of the employer or a prohibited extension of credit), regardless of materiality, and in certain circumstances may constitute embezzlement of plan assets. Additionally, such information should be properly presented on the required Form 5500 supplemental schedule of nonexempt transactions with parties-in-interest. GAAS requires that the auditor's report on financial statements included in an annual report filed with the DOL cover the information in the required supplementary schedules when they are presented along with the basic financial statements. If the auditor concludes that the plan has entered into a prohibited transaction, and the transaction has not been properly disclosed in the required supplemental schedule, the auditor should (1) express a qualified opinion or an adverse opinion on the supplemental schedule if the transaction is material to the financial statements, or (2) modify his or her report on the supplemental schedule by adding a paragraph to disclose the omitted transaction if the transaction is not material to the financial statements. See Chapter 11, "Party in Interest Transactions," of the EBP Guide for further discussion of prohibited transactions.

Late Remittances

.113 Failure to remit or untimely remittance of participant contributions may constitute a prohibited transaction (either a use of plan assets for the benefit of the employer or a prohibited extension of credit), regardless of materiality, and, in certain circumstances, may constitute embezzlement of plan assets. Such information should be reported on line 4a of either Schedule H or Schedule I of the Form 5500. Unless otherwise exempt, such transactions should also be reported on line 4d of either Schedule H or I; Part III of Schedule G (for large plans); and, if the plan is subject to the audit requirement, on the supplemental schedule of nonexempt transactions with parties in interest.

.114 Plan officials faced with remitting delinquent participant contributions should consider applying to the DOL's VFCP. Full compliance with the program will result in the DOL's issuance of a No-Action Letter and no imposition of penalties. In addition, applicants that satisfy both the VFCP requirements and the conditions of PTE 2002-51:

- Will be eligible for immediate relief from payment of certain prohibited transaction excise taxes imposed by the IRS. For more information, see 67 Federal Regulations 15062 and 67 Federal Regulations 70623 (November 25, 2002).
- Do not report the "corrected" transaction(s) as nonexempt transactions on line 4d of either Schedule H or Schedule I.
- Do not include such transaction(s) on the supplemental schedule of nonexempt transactions with parties in interest.

.115 The EBSA's Web site contains useful information about the VFCP and an FAQ section that addresses issues such as how lost earnings may be calculated on delinquently remitted employee contributions.

Help Desk—For further guidance visit the EBSA's Web site at www.dol.gov/ebsa, in the "Spotlight on . . ." section, and click on VFCP Fact Sheet & FAQs, or see the section "DOL Voluntary Fiduciary Correction Program" under "Other EBSA Matters You Should Be Aware of" in this Alert.

.116 It should be noted that the DOL's regional offices have conducted many investigations involving late remittances, often triggered by the reporting of late remittances on the plan's Schedule G attached to the Form 5500. It is not uncommon for the DOL to find additional late remittances that were not reported on the Schedule G once they begin their investigation. If a plan sponsor determines that they have late remittances, they should consider going back and reviewing all payroll remittances for the period under question to ensure they have a complete listing of all late remittances. The plan's auditor should also review the plan sponsor's procedures and consider additional testing, as applicable, to ensure completeness once it has been determined a late remittance has occurred since the auditor is opining on the schedule of nonexempt transactions.

Reporting Delinquent Participant Contributions on Schedule G

.117 Often there is confusion when reporting a late deposit of employee deferrals on Part III of Schedule G. As there are no precise instructions, consider completing the following items:

- The employer is generally considered the "party involved."
- The relationship is the "plan sponsor."
- The description is "loan to employer in the form of late deposits of employee 401(k) deferrals."
- The current value of asset is the amount of the lost interest.
- Other items should be left blank.

You may also wish to attach a statement to the Schedule G explaining the circumstances that led to the delinquent remittance(s), the steps taken to correct the situation, and an explanation about how lost earnings were calculated.

Help Desk—For questions or further information, contact the DOL Office of Regulations and Interpretations at (202) 693-8500.

Participant Loan Repayments Subject to Timing Rules

.118 In Advisory Opinion 2002-2A, the DOL concluded that, while not subject to the participant contribution regulation (29 C.F.R. §2510.3-102), participant loan repayments paid to or withheld by an employer for purposes of transmittal to an employee benefit plan are sufficiently similar to participant contributions to justify, in the absence of regulations providing otherwise, the application of principles similar to those underlying the final participant contribution regulation for purposes of determining when such repayments become assets of the plan. Specifically, the Advisory Opinion concluded that participant loan repayments paid to or withheld by an employer for purposes of transmittal to the plan become plan assets as of the earliest date on which such repayments can reasonably be segregated from the employer's general assets.

.119 Given the similar treatment of participant contributions and loan repayments, the DOL has determined that it is appropriate to permit delinquent participant loan repayments to be corrected under the VFCP in the same manner as delinquent participant contributions.

Help Desk—For questions or further information, contact the Office of Regulations and Interpretations at the DOL at (202) 693-8500.

Other EBSA Matters You Should Be Aware of

.120 This section discusses the following matters:

- 2002 Form M-1 Multiple Employer Welfare Arrangements
- DOL VFCP
- Direct Filing Entity (DFE) Enforcement Activities

2002 Form M-1 for Multiple Employer Welfare Arrangements

.121 On December 13, 2002, the DOL published in the *Federal Register* the Year 2002 Form M-1 annual report for multiple employer welfare arrangements (MEWAs). Although the format of the form has been improved to make it easier to read, the content is identical to the 2001 form.

.122 Generally, MEWAs are arrangements that offer medical benefits to the employees of two or more employers, or to their beneficiaries. These arrangements may not include plans that are established or maintained under collective bargaining agreements, by a rural electric cooperative, or by a rural telephone cooperative association.

.123 The DOL has authority under HIPAA to require reporting of information about MEWAs. Administrators generally must file the one-page Form M-1 annually. The year 2002 form is generally due March 1, 2003, but administrators may request an automatic 60-day extension to May 1, 2003.

.124 Administrators who fail to file the Form M-1, as required, are subject to penalties pursuant to DOL Regulation 29 CFR 2560.502c-5 of up to \$1,100 per day, continuing up to the date that the report is filed.

.125 The Year 2002 Form M-1 is available by calling EBSA's toll-free publications hotline at (800) 998-7542 and is available on the Internet at www.dol.gov/dol/ebsa. Administrators may contact the EBSA help desk for assistance in completing this form by calling (202) 693-8360.

DOL Voluntary Fiduciary Correction Program

.126 On March 15, 2000, the DOL adopted the VFCP, which helps plan officials quickly and completely correct certain employee benefit plan violations.

.127 The EBSA has authority to bring civil enforcement actions and assess monetary penalties for ERISA violations. The VFCP lays out procedures, the types of transactions covered by the program, and acceptable corrective actions that do not require consultation or negotiation with the department.

.128 Any plan official, sponsoring employer, or parties to affected transactions may apply to the appropriate EBSA regional office to voluntarily correct violations covered by the program. To qualify, applicants must have fully undone any prohibited transactions, restored any losses and profits with interest, and distributed any supplemental benefits owed to eligible participants and beneficiaries. In addition, a notice must be given to participants advising them of corrected violations.

.129 The transactions eligible (a total of 14 specific transactions) for the VFCP involve:

- Delinquent employee contributions
- Certain prohibited loans
- Loans with inadequate collateral or security
- Certain improper sales or purchases, including prohibited transactions
- Improper valuation of assets that affect benefit calculations
- Payment of excessive or duplicative fees

.130 Applicants who fully comply with all the terms and procedures of the VFCP will receive a No-Action Letter from EBSA and will not be subject to penalties. EBSA, however, does reserve the right to conduct investigations to determine truthfulness, completeness, and whether full correction was made.

.131 Applicants who fail to fully correct fiduciary violations will be rejected and become subject to enforcement action and civil penalties. In addition, persons involved in pending investigations or criminal violations cannot take advantage of the program.

.132 Information regarding the VFCP is available on the EBSA's Web site at www.dol.gov/dol/ebsa. Persons should telephone the EBSA regional office in their area with any questions about the application process. These telephone numbers may be found on the EBSA's Web site <http://askebsa.dol.gov>.

Direct Filing Entity Enforcement Activities

.133 During the second half of 2002, the DOL began a program to review the accuracy and completeness of Form 5500 filings made by direct filing entities (DFEs). Initial reviews of the 1999 Form 5500 database have identified numerous technical deficiencies in DFE filings—namely, not properly following the instructions. Several of the more common errors include:

- Incorrect completion of Schedule D, Part II, Information on Participating Plans (to be completed by DFEs). The schedule either:
 - Is not completed at all;
 - Fails to provide all of the participating plans employer identification numbers *and* three-digit plan numbers; or
 - Discloses participating plan information on an attachment in place of completing the schedule.
- The failure of DFE investment information on Schedule H, Part I, to reconcile with Schedule D, Part I.
- DFEs completing items on Schedule H that relate only to plan filings.

Enforcement letters have been sent to DFE filers requesting that the filings be corrected. Failure to correct the DFE filing may subject the participating plans' filings to rejection and further enforcement action by the EBSA.

.134 DFE filers are encouraged to carefully read and follow the directions contained in the Form 5500 instructions regarding completion of the necessary schedules and information. Questions concerning completion of the Form 5500 may be directed to the EBSA help desk toll free at (866) 463-3278.

Audit Issues

Consideration of Fraud in Employee Benefit Plan Engagements

.135 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), is the primary source of authoritative guidance about an auditor's responsibilities concerning the consideration of fraud in a financial statement audit. SAS No. 99 supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A), and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230). SAS No. 99 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02). (SAS No. 99 also amends SAS No. 85, *Management Representations* [AICPA, *Professional Standards*, vol. 1, AU sec. 333].) SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002, with early application of the provisions permissible.

.136 There are two types of misstatements relevant to the auditor's consideration of fraud in a financial statement audit:

- Misstatements arising from fraudulent financial reporting.
- Misstatements arising from misappropriation of assets.

.137 Three conditions generally are present when fraud occurs. First, management or other employees have an *incentive* or are under *pressure*, which provides a reason to commit fraud. Second, circumstances exist—for example, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an *opportunity* for a fraud to be perpetrated. Third, those involved are able to *rationalize* committing a fraudulent act.

The Importance of Exercising Professional Skepticism

.138 Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.139 Members of the audit team should discuss the potential for material misstatement due to fraud in accordance with the requirements of SAS No. 99 (AU sec. 316.14–.18). The discussion among the audit team members about the susceptibility of the entity's financial statements to material misstatement due to fraud should include a consideration of the known external and internal factors affecting the entity that might (1) create incentives/pressures for management and others to commit fraud, (2) provide the opportunity for fraud to be perpetrated, and (3) indicate a culture or environment that enables management to rationalize committing fraud. Communication among the audit team members about the risks of material misstatement due to fraud also should continue throughout the audit. Examples of risk factors specific to employee benefit plans can be found in Appendix E of this Alert.

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.140 SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311.06–.08), provides guidance about how the auditor obtains knowledge about the entity's business and the industry in which it operates. In performing that work, information may come to the auditor's attention that should be considered in identifying risks of material misstatement due to fraud. As part of this work, the auditor should perform the following procedures to obtain information that is used (as described in SAS No. 99 [AU sec. 316.35–.42]) to identify the risks of material misstatement due to fraud:

1. Make inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed. (See SAS No. 99 [AU sec. 316.20–.27].)
2. Consider any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit. (See SAS No. 99 [AU sec. 316.28–.30].)
3. Consider whether one or more fraud risk factors exist. (See SAS No. 99 [AU sec. 316.31–.33], and the Appendix to SAS No. 99 [AU sec. 316.85])
4. Consider other information that may be helpful in the identification of risks of material misstatements due to fraud. (See SAS No. 99 [AU sec. 316.34].)

.141 In planning the audit, the auditor also should perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that may indicate a material misstatement due to fraudulent financial reporting, for example, for employee benefit plans investment returns that vary from industry benchmarks for the investment type.

.142 *Considering Fraud Risk Factors.* As previously indicated, the auditor may identify events or conditions that indicate incentives/pressures to perpetrate fraud, opportunities to carry out the fraud, or attitudes/rationalizations to justify a fraudulent action. Such events or conditions are referred to as “fraud risk factors.” Fraud risk factors do not necessarily indicate the existence of fraud; however, they often are present in circumstances where fraud exists.

.143 SAS No. 99 provides fraud risk factor examples that have been written to apply to most enterprises. Appendix E of the Alert contains a list of fraud risk factors specific to employee benefit plans.¹ Remember, fraud risk factors are only one of several sources of information an auditor considers when identifying and assessing risk of material misstatement due to fraud.

Identifying Risks That May Result in a Material Misstatement Due to Fraud

.144 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered in accordance with the requirements of SAS No. 99 (AU sec. 316.19–.34). The auditor’s identification of fraud risks may be influenced by characteristics such as the size, complexity, and ownership attributes of the entity. In addition, the auditor should evaluate whether identified risks of material misstatement due to fraud can be related to specific financial statement account balances or classes of transactions and related assertions, or whether they relate more pervasively to the financial statements as a whole. Certain accounts, classes of transactions, and assertions that have high inherent risk because they involve a high degree of management judgment and subjectivity also may present risks of material misstatement due to fraud because they are susceptible to manipulation by management.

.145 For employee benefit plans, such accounts include valuation of nonmarketable investments; for pension plans the accumulated plan benefit obligation; for health and welfare plans the benefit obligations, including those for postretirement, postemployment, claims incurred but not reported, and claims payable. For multiemployer plans, estimates also include the amount and collectability of contributions receivable and withdrawal liabilities.

A Presumption That Improper Revenue Recognition Is a Fraud Risk

.146 Material misstatements due to fraudulent financial reporting often result from an overstatement of revenues (for example, through premature revenue recognition or recording fictitious revenues) or an understatement of revenues (for example, through improperly shifting revenues to a later period). Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. (See SAS No. 99 [AU sec. 316.41].) For employee benefit plans, this risk is primarily related to investment income resulting from inappropriate investment valuation.

A Consideration of the Risk of Management Override of Controls

.147 Even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur, and accordingly, the auditor should address that risk (see SAS No. 99 [AU sec. 316.57]) apart from any conclusions regarding the existence of more specifically identifiable risks. Specifically, the procedures described in SAS No. 99 (AU sec. 316.58–.67) should be performed to further address the risk of management override of controls. These procedures include (1) examining journal entries and other adjustments for evidence of possible material misstatement

¹ (See also Appendix I of the EBP Guide for fraud risk factors specific to employee benefit plans.)

due to fraud, (2) reviewing accounting estimates for biases that could result in material misstatement due to fraud, and (3) evaluating the business rationale for significant unusual transactions.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.148 Auditors should comply with the requirements of SAS No. 99 (AU sec. 316.43–.45) concerning an entity's programs and controls that address identified risks of material misstatement due to fraud.

.149 Examples of programs and controls for employee benefit plans include those examples detailed in Appendix B of the EBP Guide and also may include the following:

- Board of directors or committee oversight of the plan with qualified and stable members
- Identification and education of the individuals who have fiduciary responsibility for the plan
- Access to qualified ERISA counsel
- Use of reputable outside service providers, such as investment custodians, investment managers, recordkeepers, claims administrators, or paying agents
- Appropriate oversight and monitoring of outside service providers
- Plan administrator-maintained independent records; periodic checks of information provided to the investment custodian
- Preparation and review of reconciliations of trust assets to participant accounts or accounting records of the plan
- Segregation of duties related to benefit payments, contributions, investment transactions, and loans
- Process for approval of transactions with parties-in-interest
- Periodic "audit" of methodology and assumptions used in actuarial valuations
- In multiemployer plans, payroll audits of contributing employers to verify employer contributions receivable

.150 The auditor should consider whether such programs and controls mitigate the identified risks of material misstatement due to fraud. After the auditor has evaluated whether the entity's programs and controls have been suitably designed and placed in operation, the auditor should assess these risks, taking into account that evaluation. This assessment should be considered when developing the auditor's response to the identified risks of material misstatement due to fraud.

Responding to the Results of the Assessment

.151 SAS No. 99 (AU sec. 316.46–.67) provides requirements and guidance about an auditor's response to the results of the assessment of the risks of material misstatement due to fraud. The auditor responds to risks of material misstatement due to fraud in the following three ways:

1. A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned (see SAS No. 99 [AU sec. 316.50]).
2. A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed (see SAS No. 99 [AU sec. 316.51–.56]).
3. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur (see SAS No. 99 [AU sec. 316.57–.67]).

.152 Appendix I, paragraph I.08 of the EBP Guide describes specific auditor procedures that could be performed for employee benefit plans.

Evaluating Audit Evidence

.153 SAS No. 99 (AU sec. 316.68–78) provides requirements and guidance for evaluating audit evidence. The auditor should evaluate whether analytical procedures that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud. The auditor also should consider whether responses to inquiries throughout the audit about analytical relationships have been vague or implausible, or have produced evidence that is inconsistent with other evidential matter accumulated during the audit.

.154 At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of auditing procedures and other observations affect the assessment of the risks of material misstatement due to fraud made earlier in the audit. As part of this evaluation, the auditor with final responsibility for the audit should ascertain that there has been appropriate communication with the other audit team members throughout the audit regarding information or conditions indicative of risks of material misstatement due to fraud.

Responding to Misstatements That May Be the Result of Fraud

.155 When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. See SAS No. 99 (AU sec. 316.75–78) for requirements and guidance about an auditor's response to misstatements that may be the result of fraud. If the auditor believes that misstatements are or may be the result of fraud, but the effect of the misstatements is not material to the financial statements, the auditor nevertheless should evaluate the implications, especially those dealing with the organizational position of the person(s) involved.

.156 If the auditor believes that the misstatement is or may be the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

1. Attempt to obtain additional evidential matter to determine whether material fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report thereon.²
2. Consider the implications for other aspects of the audit (see SAS No. 99 [AU sec. 316.76]).
3. Discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and the audit committee.³
4. If appropriate, suggest that the client consult with legal counsel.

.157 The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to the audit committee or others with equivalent authority and responsibility. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

² See Statement on Auditing Standards (SAS) No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508), as amended, for guidance on auditors' reports issued in connection with audits of financial statements.

³ If the auditor believes senior management may be involved, discussion of the matter directly with the audit committee may be appropriate.

Communicating About Possible Fraud to Management, the Audit Committee, and Others

.158 Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. See SAS No. 99 (AU sec. 316.82) for further requirements and guidance about communications with management, the audit committee, and others.

Documenting the Auditor's Consideration of Fraud

.159 SAS No. 99 (AU sec. 316.83) requires certain items and events to be documented by the auditor. Auditors should comply with those requirements.

Practical Guidance

.160 The AICPA Practice Aid *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (product no. 006613kk) provides a wealth of information and help on complying with the provisions of SAS No. 99. Moreover, this Practice Aid provides an understanding of the differences between the requirements of SAS No. 99 and SAS No. 82, which was superseded by SAS No. 99. This Practice Aid is an Other Auditing Publication as defined in SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply SASs.

Limited-Scope Certifications

.161 The auditor may be engaged to perform a full-scope audit of the financial statements of an employee benefit plan in accordance with GAAS. Alternatively, ERISA section 103(a)(3)(c) allows the plan administrator to instruct the auditor not to perform any auditing procedures with respect to investment information prepared and certified by a bank or similar institution or by an insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency who acts as trustee or custodian. The election is available, however, only if the trustee or custodian certifies both the *accuracy and completeness* of the information submitted. Certifications that address only accuracy *or* completeness, but not both, do not comply with the DOL's regulation, and therefore are not adequate to allow plan administrators to limit the scope of the audit. This *limited-scope* audit provision does not apply to information about investments held by a broker/dealer or an investment company. However, some broker/dealers and investment companies have established separate trust companies that will provide a limited scope certification. The DOL has noted instances where limited scope audits were performed when the financial institution did not qualify.

.162 The auditor should note that certifications received from third-party administrators or service organizations may not qualify for the limited scope audit. In addition, if a limited-scope audit is to be performed on a plan funded under a master trust arrangement or other similar vehicle, separate individual plan certifications from the trustee or the custodian should be obtained for the allocation of the assets and the related income activity to the specific plan. The exemption applies only to the *investment* information certified by the qualified trustee or custodian, and does not extend to participant allocations, contributions, benefit payments, or other information, whether or not it is certified by the trustee or custodian. Thus, except for the investment-related functions performed by the trustee/custodian, an auditor conducting a limited-scope audit would need to include in the scope of the audit functions performed by the plan sponsor or other third-party service organizations, such as third-party welfare plan claims administrators or third-party savings plan administrators, if circumstances necessitate. The nature and scope of testing will depend on a variety of factors, including the nature of the functions being performed by the third-party service organization, whether a SAS No. 70 report that addresses areas other than investments is available, if deemed necessary, and, if so, the type of report and the related results. (See chapter 6 of the EBP Guide for a discussion of SAS No. 70.) The limited-scope audit exemption is implemented by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. The limited-scope exemption does not exempt the plan from the requirement to have an audit. Guidance on the auditor's report and responsibilities for this type of limited-scope audit is provided in paragraphs 7.61 and 13.25 through 13.29. Exhibit 5-1 in chapter 5 of the EBP Guide summarizes the conditions that generally allow for limited-scope audits in decision tree format.

Self-Directed Investments—The DOL's Alternative Method of Reporting Participant-Directed Brokerage Window Investments

.163 Plan sponsors of participant-directed defined contribution plans continue to allow participants to expand their control over investment decisions, through self-directed investments,⁴ sometimes referred to as self-directed brokerage accounts. These features allow participants to select any investment they choose without oversight from the plan administrator or investment committee. The only limitation is the availability of the desired investment through the plan's service provider, which generally is a securities broker-dealer or is a broker-dealer that has an alliance with the plan's service provider. The self-directed feature is often in addition to a more traditional array of risk diverse mutual funds and other investment option choices. Often plan sponsors may charge participants' fees to provide this investment feature and may also require a minimum balance to be invested.

.164 While self-directed accounts should be viewed as individual investments for auditing and reporting purposes, the instructions to Form 5500, Schedule H, "Financial Information," permit aggregate reporting of certain self-directed accounts (also known as participant-directed brokerage accounts) on the Form 5500 and related schedule of assets.

.165 For Form 5500 reporting, investments made through participant-directed brokerage accounts may be reported as a single line item on the Schedule H of the Annual Return/Report Form 5500 rather than by type of asset on the appropriate line item for the asset category (in Parts I and II of Schedule H), for example, common stocks and mutual funds, provided the assets are *not*:

- Loans
- Partnership or joint-venture interests
- Real property
- Employer securities
- Investments that could result in a loss in excess of the account balance of the participant or beneficiary who directed the transaction

.166 This Form 5500 reporting creates an issue with investment reporting in plan financial statements because GAAP requires certain reporting and disclosures. The following table summarizes the differences between the Form 5500 alternative reporting for participant-directed brokerage account investments and GAAP that may raise issues for auditors when obtaining brokerage window investment information.

<i>Form 5500—Alternative Reporting</i>	<i>GAAP—Required Reporting and Disclosures</i>
<ul style="list-style-type: none"> • Certain investments and related income (see above) made through participant-directed brokerage accounts may be shown as single line items on Schedule H. • Certain investments listed on the Schedule of Assets (Held at End of Year) may be shown as a single line item. 	<ul style="list-style-type: none"> • Identification of investments representing 5 percent or more of plan net assets in the plan's footnotes. (See paragraph 3.28g of the EBP Guide.) • Reporting of investment income, exclusive of changes in fair value, in the statement of changes in net assets or the footnotes. (See paragraph 3.28b of the EBP Guide.) • Reporting of net appreciation/depreciation by investment type in the plan's footnotes. (See paragraph 3.25a of the EBP Guide.)

⁴ This is different from participant-directed investment fund options. Participant-directed investment fund options allow the participant to select from among various available alternatives and to periodically change that selection. The alternatives are usually fund vehicles, such as registered investment companies (that is, mutual funds); commingled funds of banks; or insurance company pooled separate accounts providing varying kinds of investments, for example, equity funds and fixed income funds.

.167 In addition, plan auditors may experience difficulty in obtaining brokerage window investment information by individual investment categories (such as common stocks and mutual funds) and brokerage window investment income (such as net appreciation/depreciation by type) from plan service providers. In plans subject to the limited scope audit provisions of ERISA, the investment certification may provide investment amounts only in total, not for the individual investments. However, brokerage window investments are not considered a fund or a pooled separate account subject to other reporting requirements. Individual investment information is needed by plan administrators and auditors for the valuation of investment assets in the plan and for audit testing and disclosure purposes in accordance with GAAP and GAAS. Therefore, it is important for plan administrators, recordkeepers, and service providers to maintain these records for audit and financial reporting purposes.

.168 It is also important to note that the single line reporting of participant-directed brokerage window investment assets on the Form 5500 is allowed provided the investment assets are not loans, partnership or joint-venture interests, real property, employer securities, or investments that could result in a loss in excess of the account balance of the participant or beneficiary who directed the transaction.

.169 This alternative method of reporting participant-directed brokerage window investments does not relieve fiduciaries from their obligation to prudently select and monitor designated plan investment options and brokers.

What Are Derivatives? How Do I Audit Them?

.170 As plan investments continue to lose value, many plan sponsors are turning to derivatives as tools to manage the risk stemming from fluctuations in foreign currencies, interest rates, and other market risks, or as speculative investment vehicles to enhance earnings. Derivatives get their name because they derive their value from movements in an underlying⁵ such as changes in the price of a security or a commodity. Examples of common derivatives are options, forwards, futures, and swaps. Employee benefit plans that use derivatives to manage risk are involved in hedging activities. Hedging is a risk alteration activity that attempts to protect the employee benefit plan against the risk of adverse changes in the fair values or cash flows of assets, liabilities, or future transactions. SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), provides guidance on auditing investments in debt and equity securities; investments accounted for under Accounting Principles Board (APB) Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*; and derivative instruments and hedging activities. Paragraph 7.53 of the EBP Guide discusses the objectives of auditing procedures applied to derivative instruments and related transactions. Paragraph 7.54 discusses the auditing procedures to be applied to derivative instruments and hedging activities.

.171 The unique characteristics of derivatives instruments and securities, coupled with the relative complexity of the related accounting guidance, may require auditors to obtain special skills or knowledge to plan and perform auditing procedures. SAS No. 92 is intended to alert auditors to the possible need for such skill or knowledge. Also, see the AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, for further guidance on auditing such instruments (product no. 012520).

Help Desk—Chapter 3 of the AICPA Audit and Accounting Guide *Audits of Investment Companies*, includes brief descriptions of certain financial instruments that may be helpful when such investments are used by employee benefit plans. Some derivative financial instruments commonly found in employee benefit plans include call options, forward foreign exchange contracts, futures contracts, put options, and synthetic guaranteed investment contracts (GICs). (For more information regarding current accounting and financial reporting for synthetic GICs, see paragraphs 7.44 and 7.45 of the EBP Guide.)

⁵ Paragraph 2.09 of the Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, defines an underlying as a specific interest rate, security price, commodity price, foreign exchange rate, index of prices, or rates, or other variable. An underlying may be a price or rate of an asset or liability, but it is not the asset or liability itself.

Health and Welfare Benefit Plan Issues—Confidentiality, Indemnification, and Business Associates Agreements

.172 In response to the new HIPAA regulations (see the section “The Health Insurance Portability and Accountability Act” in this Alert), claim processors may be updating and instituting a variety of confidentiality, indemnification, or business associates agreements to protect the organization when third parties request claim information. Many third-party administrators that process health and welfare claims for plan administrators do not have a report on their internal control prepared in accordance with SAS No. 70, as amended. It may be necessary for the auditor to request access to the third-party administrator’s records to test claim transactions in order to obtain sufficient evidence to achieve the audit objectives. In many instances, a third-party administrator will request that the auditor enter into a confidentiality, indemnification, or business associates agreement signed by the auditor, third-party administrator, and plan sponsor relating to the claims testing.

.173 Auditors need to take special care in reviewing these agreements. Often the auditor may not agree with certain language in the agreement, resulting in delays in the audit while mutually agreeable language is determined. Many of the representations are very broad. The agreements generally require that the auditor hold the claim processor harmless from any actual or threatened action arising from the release of information without limitation of liability. In addition, the agreements may require the auditor to hold the client harmless as well. This last indemnification will most likely contradict provisions in the engagement letter between the auditor and the client. Auditors need to keep in mind that the testing of claims at a third-party administrator could be delayed as a result of the request to sign such an agreement and should plan the timing of the audit accordingly. Before entering into any confidentiality agreements, the agreement should be reviewed by the auditor’s legal counsel. If the auditor is unable to obtain access to records as a result of not signing a confidentiality agreement, a scope limitation could result.

AICPA Peer Review Developments—Recurring Deficiencies Found in Employee Benefit Plan Audits and Commonly Overlooked Audit Areas

.174 The AICPA, working with EBSA, has made a concerted effort to improve the guidance and training available to auditors of employee benefit plans. The AICPA self-regulatory teams continue to be concerned about deficiencies noted on audits of employee benefit plans, and practitioners need to understand that severe consequences can result from inadequate plan audits, including loss of membership in the AICPA and loss of license. Some common recurring deficiencies noted by the AICPA Peer Review Board⁶ in its review of employee benefit plans include:

- Inadequate testing of participant data
- Inadequate testing of investments, particularly when held by outside parties
- Inadequate disclosures related to participant-directed investment programs
- Failure to understand testing requirements on a limited-scope engagement
- Inadequate consideration of prohibited transactions
- Incomplete description of the plan and its provisions
- Inadequate or missing disclosures related to investments
- Failure to properly report on a DOL limited-scope audit
- Improper use of limited scope exemption because the financial institution did not qualify for such an exemption

⁶ Taken from the AICPA 2001/2002 Peer Review Board Oversight Task Force Report and Comments

- Inadequate or missing disclosures related to participant data
- Failure to properly report on and/or include the required supplemental schedules relating to ERISA and the DOL

.175 The EBP Guide provides guidance concerning areas where the Peer Review Board noted deficiencies.

Commonly Overlooked Audit Areas

.176 Specific areas often overlooked in employee benefit plan audits include the following.

.177 ***Eligible Compensation.*** Plan documents specify the various aspects of compensation (for example, base wages, overtime, and bonuses) that are considered in the calculation of plan contributions for defined contribution plans and in the determination of benefits in a defined benefit plan. Testing of payroll data should address the determination of eligible compensation for individual employees and comparison of the definition of eligible compensation used in the calculation to the plan document. Since this process is generally not included in the payroll testing of the plan sponsor or in Type II SAS No. 70 reports, a comparison of eligible compensation per the plan document to eligible compensation used in plan operations is required.

.178 ***Payroll Data.*** Reliance is often placed on testing of payroll performed in conjunction with a corporate audit; however, these procedures, which generally include only high level analytics with limited or no documentation of the control environment or performance of substantive procedures, are not sufficient in scope to opine on the benefit plan. Often payroll processing is outsourced to an outside service provider that may have a SAS No. 70 Type I report, which provides a description of procedures and controls, but does not have a SAS No. 70 Type II report, which also includes testing of the procedures and controls, and can be used to reduce the scope of substantive testing. Paragraph 10.05 of the EBP Guide describes procedures the auditor should consider to test payroll in conjunction with the plan audit.

.179 ***Service Organizations and SAS No. 70 Reports.*** Most employee benefit plans use service organizations (for example, bank trustees, insurance companies, or benefits administrators) to process transactions and maintain plan records. Often SAS No. 70 Type II reports are obtained and used by the auditor to reduce the amount of substantive testing required. Auditors often do not perform or document their evaluations of the extent of the evidence provided by the report regarding the effectiveness of controls for particular financial statement assertions and of its effect on audit strategy, including determination of the nature, timing, and extent of substantive tests for particular audit objectives. An evaluation of user organization controls that are contemplated in the design of the service organization's controls and recommended in the service organization's description of controls in the SAS No. 70 report should also be performed.

.180 For service organizations that do not issue a current Type II SAS No. 70 report, the working papers should contain sufficient documentation of the auditor's understanding of the control environment at the service organization and the results of the auditor's evaluation of the effectiveness of control policies and procedures sufficient to support the planned reliance approach. See chapter 6 of the EBP Guide for further discussion of internal controls.

.181 ***Understanding Investments.*** Plan investments represent the majority of assets held by a benefit plan. Benefit plans invest in a wide variety of investments and investment vehicles, some of which are not easily identified by review of the investment firms. It is important for auditors to gain an understanding of the types of investments the plan holds to determine the proper auditing procedures and accounting and reporting implications. This understanding can be obtained through (1) discussions with plan management, investment advisers, or custodian/trustees and (2) review of investment agreements, minutes of investment committee meetings, and other documentation. Chapter 7 of the EBP Guide provides a description of various investments and related audit procedures.

.182 Limited Versus Full-Scope Audits. Under DOL regulations, certain assets held by a bank, trust company, or similar institution or by a regulated insurance company and related investment information do not have to be audited provided the institution certifies the information. All noninvestment activity of the plan such as participant allocations, contributions, benefit payments, and expenses are subject to audit. See EBP Guide paragraphs 7.61 and 13.26 for limited scope procedures and reporting.

.183 Allocation Testing for Defined Contribution Plans. One of the objectives of auditing procedures applied to individual participant accounts of a defined contribution plan is to provide the auditor with a reasonable basis for concluding whether net assets and transactions have been properly allocated to participant accounts in accordance with the plan documents. Each type of participant account activity during the year (for example, contributions, income allocations, expenses allocations, and forfeiture allocations) should be taken into consideration in the determination of auditing procedures. In a limited scope audit, the allocation of investment income to individual accounts is not certified by the trustee/custodian and must be tested by the auditor, taking into consideration reliance on a SAS No. 70 Type II report, if available. See chapter 10 of the EBP Guide for further discussion of auditing participant data.

New Auditing, Attestation, and Other Guidance

.184 Presented below is a list of auditing, attestation, and quality control pronouncements, guides, and other guidance issued since the publication of last year's Alert.

Help Desk—For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team and available at www.aicpa.org.

SAS No. 97, *Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles*

.186 SAS No. 97, *Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 625), revises SAS No. 50, *Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 625), to prohibit an accountant from providing a written report on the application of accounting principles not involving facts and circumstances of a specific entity.

.187 This Statement is effective for written reports issued or oral advice provided on or after June 30, 2002. Earlier application of the provisions of this Statement is permissible.

SAS No. 98, *Omnibus Statement on Auditing Standards—2002*

.188 In September 2002, the ASB issued SAS No. 98, *Omnibus Statement on Auditing Standards—2002*, which makes various amendments to existing SASs, including SAS No. 95 (AICPA, *Professional Standards*, vol. 1, AU sec. 150); SAS No. 25, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 161.02 and .03); SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312); SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324); SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508.65); SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550); SAS No. 52, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 558); and SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551).

SAS No. 101, *Auditing Fair Value Measurements and Disclosures*

.189 This Statement establishes standards and provides guidance on auditing fair value measurements and disclosures contained in financial statements. In particular, the Statement addresses audit considerations relating to the measurement and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. This Statement is effective for audits of financial statements for periods beginning on or after June 15, 2003, with earlier application permitted.

Accounting Developments

FASB Issues Statement No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*

.190 In April 2003, the FASB issued FASB Statement No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. The Statement amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under FASB Statement No. 133. In particular, FASB Statement No. 149 amends FASB Statement No. 133 to say the following:

Certain investment contracts. A contract that is accounted for under either paragraph 4 of FASB Statement No. 110, *Reporting by Defined Benefit Pension Plans of Investment Contracts*, or paragraph 12 of FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, as amended by Statement 110, is not subject to this Statement. Similarly, a contract that is accounted for under either paragraph 4 or paragraph 5 of AICPA Statement of Position 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans*, is not subject to this Statement. Those exceptions apply only to the party that accounts for the contract under Statement 35, Statement 110, or SOP 94-4.

FASB Statement No. 149 is effective for contracts entered into or modified after June 30, 2003, with certain exceptions as described in FASB Statement No. 149, and for hedging relationships designated after June 30, 2003. The guidance should be applied prospectively.

.191 Since the issuance of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, questions were raised regarding the proper accounting for such contracts as insurance contracts, GICs, and synthetic GICs that are held by various defined contribution pension and health and welfare plans.

.192 FASB Statement No. 110, *Reporting by Defined Benefit Pension Plans of Investment Contracts*, amends FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, to require defined benefit plans to report insurance contracts “in the same manner as specified in the annual report filed by the plan with certain governmental agencies pursuant to ERISA” (that is, at either fair value or contract value). SOP 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans*, indicates that a fully benefit-responsive investment contract should be reported at contract value and provides an example of a fully benefit-responsive synthetic GIC as an investment contract that is subject to SOP 94-4.

.193 A conflict with FASB Statement No. 133 arose because for some insurance contracts with embedded derivatives, FASB Statement No. 133 required that the insurance contract be bifurcated and the embedded derivative be accounted for separately (that is, at fair value). In addition, FASB Statement No. 133 Implementation Issue No. A16, “Synthetic Guaranteed Investment Contracts,” concluded that synthetic GICs met FASB Statement No. 133’s definition of a *derivative instrument* from the perspective of the issuer. Since FASB Statement No. 133’s definition applied to the terms of the contract, that conclusion also implied that synthetic GICs met the definition of a derivative from the viewpoint of the holder. A conflict arose because FASB Statement No. 133 did not contain an exception for synthetic GICs held by reporting entities subject to SOP 94-4 until now.

Accounting Trends & Techniques—Employee Benefit Plans

.194 *Accounting Trends & Techniques—Employee Benefit Plans* is a new publication intended to provide preparers and auditors of employee benefit plan financial statements with a compilation of illustrative financial statement disclosures and illustrative auditor’s reports based on examples from actual financial statements of all types of audited employee benefit plans. In addition, the publication contains an entire chapter illustrating management letters and common management letter comments found on actual plan audits.

Help Desk—To order this publication, call the AICPA Member Satisfaction Center at (888) 777-7077 and ask for product no. 006611kk.

New Accounting Pronouncements and Other Guidance

.195 Presented here is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert.

Help Desk—For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Audit and Accounting Guide Revisions as of March 1, 2003

.197 The following list summarizes some of the revisions that will be included in the EBP Guide, with conforming changes as of March 1, 2003.

.198 The EBP Guide has been updated to reflect the issuance of the following pronouncements:

- FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*
- SAS No. 98, *Omnibus Statement on Auditing Standards—2002*
- SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.199 The EBP Guide also provides guidance on confidentiality, indemnity, and business associates agreements, and includes a revised Appendix I to reflect the issuance of SAS No. 99.

Help Desk—To order the EBP Guide, call the Member Satisfaction Center at (888) 777-7077 or go to CPA2Biz.com and order product no. 012593kk.

AICPA Professional Ethics Division Interpretations and Rulings

.200 Ethics Interpretations and rulings are promulgated by the executive committee of the Professional Ethics Division of the AICPA to provide guidelines on the scope and application of ethics rules but are not intended to limit such scope or application. Publication of an Interpretation or ethics ruling in the *Journal of Accountancy* constitutes notice to members. A member who departs from Interpretations or rulings shall have the burden of justifying such departure in any disciplinary hearing.

Help Desk—It is important for you to monitor the activities of the Professional Ethics Executive Committee because it may issue Interpretations, ethics rulings, or both, that may be relevant to your engagements. For full information about Interpretations and rulings, visit the Professional Ethics Team Web page at www.aicpa.org/members/div/ethics/index.htm. You can also call the Professional Ethics Team at (888) 777-7077, menu option 2, followed by menu option 2. It is important to point out that, for ERISA engagements, the DOL has separate independence standards that may be more restrictive than those of the AICPA. See *paragraph A.85* in Appendix A of the EBP Guide for a listing of the DOL's independence standards.

.201 This section of the Alert highlights some of the more important developments in the area of professional ethics and independence.

General Accounting Office Issues New Independence Rules

.202 In January 2002 the Government Accounting Office (GAO) amended *Government Auditing Standards* (GAS, also referred to as the Yellow Book), significantly tightening its auditor independence provisions. In issuing the new standard, the comptroller general stated that protecting the public interest and ensuring public confidence in the independence of auditors of government financial statements, programs, and operations, both in form and substance, were the overriding considerations. The updated standard is required reading for auditors of government entities and of organizations receiving government funds.

Help Desk—To help members and others better understand the new standard, the AICPA has developed two educational tools, which are available on the Institute's Web site (www.aicpa.org/members/div/ethics/index.htm): GAO independence standard and AICPA-GAO comparison of independence rules governing nonaudit services. In addition, the GAO issued a series of questions and answers relating to the standard (www.gao.gov/govaud/d02870g.pdf).

Recent Revisions to AICPA Ethics Interpretations and Rulings

.203 In March and April 2003 the Professional Ethics Executive Committee (PEEC) revised the following rulings and Interpretations of the AICPA Code of Professional Conduct (see the March 2003 issue of the *Journal of Accountancy* for the revisions):

- Revision of Interpretation No. 101-1, "Interpretation of Rule 101," of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02)
- Revision of Interpretation No. 101-2, "Former Practitioners and Firm Independence" (ET sec. 101.04)

- Revision of Interpretation No. 101-10, "The Effect on Independence of Relationships With Entities Included in the Governmental Financial Statements" (ET sec. 101.12)
- Revision of Ethics Ruling No. 41, "Financial Services Company Client Has Custody of a Member's Assets," of ET section 191, *Ethics Rulings on Independence, Integrity, and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.081-.082)
- Revision of Ethics Ruling No. 70, "Member's Depository Relationship With Client Financial Institution" (ET sec. 191.140-.141)
- Deletion of Ethics Ruling No. 77, "Individual Considering or Accepting Employment With the Client" (ET sec. 191.[154-.155])

.204 In July 2002, the PEEC revised the following rulings and Interpretations of the AICPA Code of Professional Conduct; see the July 2002 issue of the *Journal of Accountancy* for the revisions:

- Interpretation No. 101-1, "Interpretation of Rule 101," of ET sec. 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.02)
- Ethics Ruling No. 10, "Member as Legislator," of ET section 191, *Ethics Rulings on Independence, Integrity, and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.019-.020)

.205 In November 2002, the PEEC made certain revisions to the following ruling and Interpretation (see the November 2002 issue of the *Journal of Accountancy* for the revisions):

- Interpretation No. 101-5, "Loans From Financial Institution Clients and Related Terminology," of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.07)
- Ethics Ruling No. 107, "Participation in Health and Welfare Plan Sponsored by Client," of ET section 191, *Ethics Rulings on Independence, Integrity, and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191.214-.215)

SEC Rules on Auditor Independence

.206 The SEC has approved rules on auditor independence and audit working paper retention to implement provisions of the Sarbanes-Oxley Act of 2002. The new independence rules require certain disclosures and reports by auditors and set conditions under which auditing firms would not be considered independent for purposes of performing audits of public company financial statements. The new rules address issues such as:

- Revising the rules related to the nonaudit services that, if provided to an audit client, would impair an accounting firm's independence
- Requiring that certain partners on the audit engagement team rotate after no more than five or seven consecutive years, depending on the partner's involvement in the audit, except that certain small accounting firms may be exempt from this requirement
- Establishing rules that an accounting firm would not be independent if certain members of management of that issuer had been members of the accounting firm's audit engagement team within the one-year period preceding the commencement of audit procedures
- Establishing rules that an accountant would not be independent from an audit client if any "audit partner" received compensation based on the partner procuring engagements with that client for services other than audit, review, and attest services
- Requiring the auditor to report certain matters to the issuer's audit committee, including "critical" accounting policies used by the issuer

- Requiring the issuer's audit committee to preapprove all audit and nonaudit services provided to the issuer by the auditor
- Requiring disclosures to investors of information related to audit and nonaudit services provided by, and fees paid to, the auditor

For further information about these new rules, visit AICPA Online at www.aicpa.org/sarbanes/secproposesrules.asp.

On the Horizon

.207 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented here is brief information about some ongoing projects that may be relevant to your engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.208 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if available, your membership and subscriber number in the message.

Auditing Pipeline

Substantial Changes to Audit Process Proposed

.209 In December 2002, the AICPA's ASB issued an exposure draft proposing seven new SASs relating to the auditor's risk assessment process. The ASB believes that the requirements and guidance provided in the proposed SASs, if adopted, would result in a substantial change in audit practice and in more effective audits. The primary objective of the proposed SASs is to enhance auditors' application of the audit risk model in practice by requiring:

- More in-depth understanding of the entity and its environment, including its internal control, to identify the risks of material misstatement in the financial statements and what the entity is doing to mitigate them.

- More rigorous assessment of the risks of material misstatement of the financial statements based on that understanding.
- Improved linkage between the assessed risks and the nature, timing, and extent of audit procedures performed in response to those risks.

.210 The exposure draft consists of the following proposed SASs:

- *Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards*
- *Audit Evidence*
- *Audit Risk and Materiality in Conducting an Audit*
- *Planning and Supervision*
- *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
- *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
- *Amendment to Statement on Auditing Standards No. 39, Audit Sampling*

.211 The proposed SASs establish standards and provide guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the proposed SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit.

.212 The proposed SASs would be effective for audits of financial statements for periods beginning on or after December 15, 2004, to allow time for auditors to revise their methodologies and train their personnel to plan the initial application of these standards to their audits.

Accounting Pipeline

Exposure Draft on Loans and Certain Debt Securities Acquired in a Transfer (Formerly Known as Purchased Loans and Securities)

.213 AcSEC is issuing an exposure draft of a proposed SOP titled *Accounting for Loans and Certain Debt Securities Acquired in a Transfer*. This proposed SOP considers whether Practice Bulletin (PB) No. 6, *Amortization of Discounts on Certain Acquired Loans*, continues to be relevant given a number of FASB pronouncements issued subsequent to PB No. 6. The proposed SOP excludes originated loans from its scope. Readers should be alert to any final pronouncement.

Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.214 Proposed AICPA SOP *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*, and proposed FASB Statement *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment—an amendment of APB Opinions No. 20 and 28 and FASB Statements No. 51 and 67 and a rescission of FASB Statement No. 73*, were issued simultaneously for public comment. Principally, the proposed FASB Statement would amend FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to exclude from its scope the accounting for acquisition, development, and construction costs of real estate developed and used by an entity for subsequent rental activities. The accounting for those costs would be subject to the guidance in the proposed SOP. It also would amend APB Opinion No. 28, *Interim Financial Reporting*, to require that those costs that the proposed SOP would require be expensed as incurred on an annual basis also be expensed as incurred in interim periods.

.215 The proposed SOP addresses accounting and disclosure issues related to determining which costs related to property, plant, and equipment should be capitalized as improvements and which should be charged to expense. The proposed SOP also addresses capitalization of indirect and overhead costs and component accounting for property, plant, and equipment. Final Statements are expected to be issued in 2003.

Exposure Draft—Omnibus Proposal of Professional Ethics Division Interpretations and Rulings

.216 The PEEC proposes revisions to Rule 101, *Independence*, for nonattest services, loans, and leases. One of the PEEC's primary responsibilities is to interpret the AICPA *Code of Professional Conduct* and amend it when necessary to ensure its continued effectiveness in protecting the public interest by promoting AICPA members' independence, integrity, and objectivity. In accordance with that responsibility, an exposure draft has been issued to solicit feedback on proposed independence rule revisions. For more information on this exposure draft, visit the Professional Ethics section of the AICPA Web site (www.aicpa.org).

International Accounting Standards

.217 The International Accounting Standards Committee (IASC) was formed in 1973 and is an independent, private sector body. The objective of the IASC is to harmonize the accounting principles for financial reporting around the world. The IASC publishes the International Accounting Standards.

Employee Benefit Plan-Related Standards

.218 The following are employee benefit plan-related standards:

- International Accounting Standard (IAS) No. 19, *Employee Benefits* (AICPA, *Professional Standards*, vol. 2, AC sec. 9019), addresses postemployment benefits including pensions.
- IAS No. 26, *Accounting and Reporting by Retirement Benefit Plans* (AICPA, *Professional Standards*, vol. 2, AC sec. 9026), addresses the accounting and reporting by retirement benefit plans. It establishes separate standards for reporting by defined benefit plans and by defined contribution plans.

.219 In June 2002 the IASB agreed to add a limited convergence project on postemployment benefits to its agenda. The purpose of this project is to build on the principles that are common to most existing national standards on postemployment benefits and to seek improvements to IAS No. 19 in certain specific areas.

Help Desk—For further information regarding the IASC and its standards visit its Web site at www.iasb.org.uk.

Resource Central

*Employee benefit plan-related educational courses,
Web sites, publications, and other resources available to CPAs*

Related Publications

.220 The following are some of the AICPA publications that deliver valuable guidance and practical assistance as potent tools to be used on your employee benefit plan engagements.

- AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, with conforming changes as of March 1, 2003 (product no. 012593kk).

- **New! Accounting Trends & Techniques—Employee Benefit Plans** (product no. 006611kk). Offering the same kind of powerful help that the AICPA's *Accounting Trends and Techniques* does, this comprehensive book illustrates a wide range of employee benefit plan financial statement disclosures and auditors' reports for both full-scope and limited-scope audits. The publication also includes a chapter dedicated to illustrative management letters and management letter comments.
- **AICPA Practice Aid Auditing Multiemployer Plans** (product no. 006603kk). This publication provides guidance on unique issues regarding the accounting, auditing, and reporting on financial statements of various types of multiemployer employee benefit plans. This nonauthoritative Practice Aid is designed to complement the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*. There are chapters on SOP 92-6, *Accounting and Reporting by Health and Welfare Benefit Plans*; application; investments; employer payroll audits; internal control testing; and more. Also included are illustrative financial statements for various types of multiemployer employee benefit plans.
- **Checklists and Illustrative Financial Statements for:**
 - *Defined Benefit Pension Plans* (008776kk). The 2003 checklist will be available this summer (product no. 008789kk).
 - *Defined Contribution Pension Plans* (008777kk). The 2003 checklist will be available this summer (product no. 008790kk).
 - *Health and Welfare Benefit Plans* (008778kk). The 2003 checklist will be available this summer (product no. 008791kk).
- "A Wake-Up Call," an employee benefit plan audit video (013801kk).

AICPA's reSOURCE Online Accounting and Auditing Literature

.221 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (all 23), *Audit Risk Alerts* (all 19), and *Accounting Trends & Techniques*. To subscribe to this essential service, go to CPA2biz.com.

reSOURCE CD-ROM

.222 The AICPA is currently offering a CD-ROM product entitled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access in Windows format to AICPA Professional Literature products, namely, *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related *Audit Risk Alerts*, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Conferences

National Conference on Employee Benefit Plans

.223 Each spring the AICPA sponsors a National Conference on Employee Benefit Plans that is specifically designed to update auditors, plan administrators, and industry or plan sponsors on various topics, including recent and proposed employee benefit plan legislative and regulatory issues, and significant accounting, auditing, and tax developments. The 2004 National Conference on Employee Benefit Plans will be held May 3–5, 2004, in Orlando, Florida. For a conference brochure, please call (888) 777-7077, and request brochure G50038; for more information, visit the Web site at www.cpa2biz.com/conferences.

Education Courses

.224 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working on employee benefit plan engagements. Those courses include:

- *Audits of Employee Benefit Plans*
- *Audits of 401(k) Plans*

Online CPE

.225 *AICPA InfoBytes*, offered exclusively through CPA2Biz, is AICPA's flagship online learning product. Selected as one of *Accounting Today's* top 100 products for 2003, *AICPA InfoBytes* now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay \$149 (\$369 nonmembers) for a new subscription and \$119 (\$319 nonmembers) for the annual renewal. Divided into one- to two-credit courses that are available 24/7, AICPA InfoBytes offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit <http://cpa2biz.com>.

CPE CD-ROM

.226 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.227 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.228 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.229 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.230 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2Biz.com offers all the latest AICPA products, including Audit Risk Alerts, *Audit and Accounting Guides*, *Professional Standards*, and CPE courses.

Other Helpful Web Sites

.231 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this Alert.

.232 This Audit Risk Alert replaces *Employee Benefit Plans Industry Developments—2002*.

.233 The Audit Risk Alert *Employee Benefit Plans Industry Developments* is published annually. As you encounter audit and industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be greatly appreciated. You may e-mail these comments to ldelahanty@aicpa.org or write to:

Appendix A

IRS Limits on Benefits and Compensation

	2003	2002	2001
Defined benefit			
Maximum annual pension	\$160,000	\$160,000	\$140,000
Defined contribution			
Maximum annual addition	\$ 40,000	\$40,000 ¹	\$ 35,000
401(k) plan			
Maximum elective deferral	\$ 12,000	\$11,000 ²	\$ 10,500
403(b) plan			
Maximum elective deferral	\$ 12,000	\$ 11,000	\$ 10,500
457 plans	\$ 12,000	\$ 11,000	\$ 8,500
SIMPLE plans	\$ 8,000	\$ 7,000	\$ 6,500
Qualified plans			
Maximum compensation limits	\$200,000	\$200,000	\$170,000
Highly compensated limits	\$ 90,000	\$ 90,000	\$ 85,000
Officer limits (key employee)	\$130,000	\$130,000	\$ 70,000
FICA taxable wage base	\$ 87,000	\$ 84,900	\$ 80,400
Employer and employee Social Security tax	6.20%	6.20%	6.20%

¹ The limitation for defined contribution plans is increased from \$35,000 to \$40,000 effective for limitation years beginning after December 31, 2001, and remained at \$40,000 for 2003.

² See Appendix C for a summary of major retirement plan law changes resulting from the Economic Growth and Tax Relief Reconciliation Act of 2001. These changes include catch-up contributions for individuals over age 50. The catch-up contribution increased from \$1,000 in 2002 to \$2,000 in 2003.

.236

Appendix B

Commonly Asked Questions and Answers

The following questions and answers have been developed by the members of the 2002 Employee Benefit Plans Audit Guide Revision Task Force. They include frequently asked questions encountered by the task force members on accounting, auditing, and regulatory matters.

- Q.** Can the plan sponsor accept a certification from the plan's recordkeeper if the recordkeeper certifies the investment information to be complete and accurate on behalf of the plan's trustee/custodian as "agent for"?
- A.** According to the U.S. Department of Labor (DOL), such a certification generally would be acceptable if there is in fact a legal arrangement between the trustee and the recordkeeper to be able to provide the certification on the trustee's behalf. Care should be taken by the plan administrator to obtain such legal documentation. Additionally the plan auditor might consider adding wording to the standard limited scope report to include reference to such an arrangement. Sample language might include the following: "any auditing procedures with respect to the information described in Note X, which was certified by ABC, Inc., the recordkeeper of the Plan as agent for XYZ Bank, the trustee of the Plan, . . . We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the agent on behalf of the trustee, as of and for the year ended December 31, 20XX, that the information provided to the plan administrator by the agent for the trustee is complete and accurate." The third paragraph of the report should also be modified.
- Q.** Is it permissible to perform a limited scope audit on a portion of the plan's investments but not all (some investments did not meet the DOL 29 CFR 2520.103-8 criteria for a limited scope audit)? If yes, what form does the auditors' report take?
- A.** Yes, it is permissible to perform a limited scope audit on only a portion of a plan's investments and audit the remaining investments. The auditors' report is the same as that used for a limited scope audit. However, the note that is referenced in the auditor report should clearly identify the investments that were not audited.
- Q.** Under Form 5500 (Schedule H, Part IV, line 4j), there is a special rule whereby transactions under an individual account plan that a participant directs should not be taken into account for purposes of preparing the Schedule of Reportable Transactions. What about situations where an individual account plan is participant-directed but has certain transactions that appear to be nonparticipant-directed (for example, "pass through" account for contributions)?
- A.** If the plan is an individual account plan and the overall structure of the plan is participant-directed, "pass through" account transactions would not be required to be included on the Schedule of Reportable Transactions. Another example would be a participant-directed individual account plan that liquidates its investment options as a result of a plan termination, merger, or change in service provider. Often such changes result in the plan sponsor directing the plan trustee to liquidate the current balance in the participant-directed investment options into a short-term fund before the transfer to new investment options. Such transactions would not be required to be included on the Schedule of Reportable Transactions.
- Q.** What are the general conditions requiring an audit of pension plan financial statements?
- A.** An audit generally is required if the plan is covered under Title I of the Employee Retirement Income Security Act of 1974 (ERISA) and there are over 100 participants as of the beginning of the plan year. Exhibit 5-2 in chapter 5 of the AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans*, with conforming changes as of March 1, 2003 (the EBP Guide) provides guidance on determining

who is considered a participant. In addition, DOL regulations permit plans that have between 80 and 120 participants at the beginning of the plan year to complete the Form 5500 in the same category ("large plan" or "small plan") as was filed in the previous year.

- Q. What audit procedures should be performed on material plan mergers into a plan? What audit procedures are required when the prior plan was audited? What if the prior plan was never audited?
- A. If the prior plan was audited, the auditor should obtain the audited financial statements to ensure that the balance transferred from the prior plan financial statements reconciles to the balance that is reflected on the new plan's financial statements. Also, the auditor will generally perform procedures to ensure that a sample of participant accounts were properly set up under the new plan. In addition to the participant level testing, if the prior plan was not audited, the auditor will generally perform audit procedures to determine that the equity that is transferred from the prior plan is reasonable based upon an analysis of historical activity. (Other audit procedures relating to plan mergers can be found in paragraphs 12.13 through 12.16 of the EBP Guide.)
- Q. When a plan operates in a decentralized environment, what additional audit procedures should be considered?
- A. The auditor should consider the controls at each decentralized location as well as the overall mitigating controls that may be performed on a centralized basis. Taking into consideration the materiality of the activity at each decentralized location, the auditor may choose to expand participant level and substantive testing to incorporate these decentralized locations.
- Q. When the majority of a plan's assets are held in a master trust, but the plan has investments outside of the master trust, what are the requirements for the supplemental schedules?
- A. The Form 5500 instructions exclude master trust assets from the supplemental schedule reporting requirements. However, any assets held outside the master trust must be reported on the supplemental schedules. When calculating the 5 percent threshold for disclosing reportable transactions, the current value of master trust assets is subtracted from the beginning of the year net asset balance.
- Q. Is the master trust required to be audited?
- A. While the DOL does not require the master trust to be audited, the plan administrator normally engages an auditor to report only on the financial statements of the individual plans. If the master trust is not audited, the plan auditor should perform those procedures necessary to obtain sufficient audit evidence to support the financial statement assertions as to the plan's investments or qualify or disclaim his or her report.
- Q. Is a certification at the master trust level acceptable under DOL regulation 2520.103-8?
- A. If a limited scope audit is to be performed on a plan funded under a master trust arrangement or other similar vehicle, the DOL requires separate individual plan certifications from the trustee or the custodian regarding the allocation of the assets and the related income activity to the specific plan.
- Q. Should noninterest-bearing cash be included as an asset on the supplemental schedule of assets (held at end of year)?
- A. Generally, only assets held for investment are included on the supplemental schedule of assets (held at end of year); thus noninterest-bearing cash would not be included. Interest-bearing cash accounts would be included on the supplemental schedule.
- Q. Can immaterial investments be netted together as "other" on the supplemental schedule of assets (held at end of year)?
- A. No, each investment must be separately listed on the supplemental schedule.
- Q. What is the auditor's responsibility for detecting nonexempt transactions resulting from participant contributions that are not remitted to the plan within the guidelines established by DOL regulations?

- A. An audit performed in accordance with generally accepted auditing standards (GAAS) cannot be expected to provide assurance that all party-in-interest transactions will be discovered. Nevertheless, during the audit the auditor should be aware of the possible existence of party-in-interest transactions. During the planning phase of the audit, the auditor should inquire about the existence of any party-in-interest or nonexempt transactions. If any issues relating to late remittances are brought to the auditor's attention, the auditor may consider obtaining a schedule of employee contributions detailing payroll withholding date and date of deposit to the plan. A sample of deposits can then be traced to the supporting payroll register and wire transfer advice or check. Further, the auditor should have the client include in the management representation letter a representation that there are no party-in-interest transactions that have not been disclosed in the supplemental schedules.
- Q. If a nonexempt transaction related to the above is noted, is materiality of the transaction taken into consideration in determining the need for the supplemental schedule of nonexempt transactions?
- A. There is no materiality threshold for the inclusion on the supplemental schedule. All known events must be reported.
- Q. When is a plan subject to the requirements of the Securities and Exchange Act of 1933, thus requiring a Form 11-K filing under the Securities and Exchange Act of 1934?
- A. Section 3(a)(2) of the Securities and Exchange Act of 1933 provides exemptions from registration requirements for defined benefit plans and defined contribution plans not involving the purchase of employer securities with employee contributions. All other plans are subject to the requirements, provided they are both voluntary and contributory. (For further guidance, see paragraph 12.24 of the EBP Guide.) Advice of counsel should be obtained to determine if the registration requirements apply to the plan.
- Q. In a defined contribution plan, can investments be shown as a one-line item on the financial statements?
- A. Participant-directed plan investments may be shown in the aggregate, as a one-line item in the statement of net assets available for benefits. The presentation of nonparticipant-directed investments in the statement of net assets available for benefits or in the notes should be detailed by general type, such as registered investments companies, government securities, corporate bonds, common stocks, and so on.
- Q. If investments are shown as a one-line item in a defined contribution plan, what disclosures are required?
- A. The presentation should indicate whether the fair values of the investments have been measured by quoted market prices in an active market or were determined otherwise. Investments that represent 5 percent or more of the net assets available for benefits should be separately identified. If any of those investments are nonparticipant-directed, they should be identified as such. Listing all investments in the schedule of assets (held at end of year) required by the ERISA does not eliminate the requirement to include this disclosure in the financial statements.
- Q. Are participant loans considered an investment on the face of the financial statements or as a loan receivable?
- A. Loans are considered an investment for reporting purposes.
- Q. Should the benefits paid per the statement of changes in net assets available for plan benefits agree to the benefits paid in the statement of changes in accumulated plan benefits for a defined benefit pension plan?
- A. The benefits paid should be the same on both statements. If differences are noted, the auditor should resolve the issue with the actuary to determine if the actuarial number requires adjustment.
- Q. Is the schedule of 5 percent reportable transactions required for defined benefit plans?

- A. As defined benefit plans generally are not participant-directed, the reportable transactions schedule would be required.
- Q. When does a health and welfare plan require an audit?
- A. A health and welfare plan is required to have an audit when the plan has more than 100 participants at the beginning of the plan year (this can be expanded to 120 if the 80-to-120-participant rule applies) and the plan is funded. According to DOL Regulation 2520.104-44, the existence of a separate fund or account for the plan by the employer or a third-party administrator (TPA) can cause the requirement that funds be paid directly from the general assets of the sponsor not to be met. For example, if a separate account is maintained that would be deemed to be a trust under state law, the related plan would be deemed to be funded under ERISA. It is not always easy to determine when a plan is considered funded. The auditor may wish to consult with legal counsel, plan actuaries, or the DOL to determine if a plan meets the definition of funded.
- Q. Are participants counted the same way for pension plans and health and welfare benefit plans?
- A. Participants for health and welfare plans are employees who are eligible and are receiving coverage under the plan.
- Q. If participants are contributing toward the health and welfare benefits, is an audit required?
- A. According to DOL Technical Releases 88-1 and 92-1, participant contributions to a welfare plan that has an Internal Revenue Code (IRC) section 125 cafeteria plan feature do not have to be held in trust. If contributions are not through a Section 125 plan and they are not used for the payment of insurance or health maintenance organization (HMO) premiums, generally, they will be required to be held in trust. If the plan is funded voluntarily or as required by DOL regulation, then the plan would require an audit.
- Q. If a plan offers several benefits under the plan document, and only medical is funded through the voluntary employees' beneficiary association (VEBA) trust, what is the audit requirement?
- A. The audit requirement is of the plan; not the trust. All benefits covered by the plan should be included in the audited financial statements.
- Q. If a VEBA trust is used as a pass-through for claims payment during the year, but there are no monies in the VEBA trust at year end, is an audit of the plan required?
- A. If a plan is deemed to be funded for a part of a plan year, the entire plan year is subject to the audit requirement. All plan activity for the entire year would have to be included in the audited financial statements.
- Q. If multiple plans use a VEBA trust, can an audit be performed at the VEBA trust level?
- A. The audit requirement is of the plan, not the trust. Each plan would require a separate audit if it individually met the audit requirement (see previous question). The auditor may be engaged to audit the VEBA trust in order to assist with the plan level allocation reporting, but this would not fulfill the plan level audit requirement.
- Q. Does the funding of a health and welfare benefit plan through a 401(h) account, when the plan was otherwise unfunded, cause the plan to require an audit?
- A. If the plan was otherwise unfunded, the 401(h) account association will not cause the health and welfare benefit plan to be considered funded for audit determination purposes.
- Q. What responsibility does the auditor have in testing plan qualification tests (for example, ACP and ADP) prepared by a client's third-party administrator?
- A. An audit in accordance with GAAS is not designed to ensure compliance with all legislative and regulatory provisions. However, Plans must be designed and comply with certain operating tests in order to maintain their qualified status. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible violations affecting the financial statements,

the auditor should apply auditing procedures specifically directed to ascertaining whether a violation has occurred. The auditor is also expected to inquire of, and obtain representation from, management concerning compliance with laws and regulations and the prevention of violations that may cause disqualification.

- Q. If the plan fails its 2000 discrimination test and has to return employee contributions in 2001 should "Excess Contribution Payable" liability be shown on the 2000 financial statement?
- A. Yes, the financial statements should reflect a liability for excess contributions payable on the financial statements if the amount is material to the financial statements.
- Q. What alternate audit procedures should be done to test participants' investment allocation of deferral contributions where no documentation exists (participants can change deferrals and allocation of such online or via phone)?
- A. Where participants make contributions or investment elections by telephone or electronic means (such as the Internet), consider confirming contribution percentage, source, and investment election directly with the participant or compare to a transaction report, if one is maintained. Alternatively, if the service provider has a Type II Statement on Auditing Standards (SAS) No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), as amended, report that provides evidence that the service auditor has tested investment allocations, the auditor may place some reliance on the SAS No. 70 report to reduce other testing.
- Q. For a DOL-limited scope audit, is it necessary to test the allocation of investment earnings at the participant account level?
- A. The testing of allocation of investment earnings at the participant level is part of the participant data testing and is required for a limited scope audit.
- Q. How should a late transmittal be handled in a multiemployer 401(k) plan audit where one of the participating employers submitted its cumulative contribution report containing late employee 401(k) contributions? What needs to be disclosed on the financial statement and Form 5500?
- A. The lost earnings due to the plan because of the late contribution should be shown on Form 5500 Schedule G, "Schedule of Nonexempt Transactions." The board of trustees should be made aware of the fact that there is a prohibited transaction that is required to be reported on the supplemental schedule of nonexempt transactions, which is part of the audited financial statements. The employer is responsible for depositing the lost earnings into the plan, filing the excise tax return, and paying the excise tax.
- Q. I understand that brokerage accounts can be listed on one line item on the Form 5500. Can they be listed on one line item on the supplemental schedules to the financial statements or do the individual underlying investments have to be listed?
- A. Individually directed brokerage accounts may be listed as one line item on the statement of net assets available for benefits and on the supplemental schedule of assets, provided the investments are not loans, partnerships or joint-venture interests, real property, employer securities, or investments that could result in a loss in excess of the account balance of the participant or beneficiary who directed the transaction. However, the notes to the financial statements must disclose any individual investment that is over 5 percent of net assets available for benefits at the end of the year. In addition, the investment income for individually directed brokerage accounts may be shown as one line item in the Form 5500; however, the financial statements must separate interest and dividends from net appreciation (depreciation) in fair value on the statement of changes in net assets available for benefits and disclose net appreciation (depreciation) by type of investment in the notes to the financial statements.

.237

Appendix C

Summary of Major Retirement Plan Law Changes

The following table summarizes the major retirement plan law changes resulting from the Economic Growth and Tax Relief Reconciliation Act of 2001.

<i>Summary of Major Retirement Plan Law Changes</i>				
<i>No.</i>	<i>Description</i>	<i>New Law</i>	<i>Effective</i>	<i>Act Section</i>
1	Increased IRA contribution limits IRC §219	The current \$2,000 contribution limit is increased for traditional and Roth IRAs to \$3,000 beginning in 2002, then to \$4,000 in 2005, and \$5,000 in 2008. After 2008, the limit will be adjusted for inflation.	2002	601
2	Catch-up IRA contributions for individuals over 50 IRC §219	Individuals who are at least age 50 by the end of the tax year can increase their normal IRA contribution limit by \$500 per year for 2002–2005 and \$1,000 for 2006 and later. Thus, for example, such an individual's total limit in 2002 will be \$3,500 (\$3,000 regular limit plus the special over 50 limit of \$500).	2002	601
3	Increased benefit and contribution limits for qualified plans IRC §§401(a)(17) and 415	<p>New law limits:</p> <ul style="list-style-type: none"> • Section 415(b)(1)(A) limit on annual benefits from a defined benefit plan will be \$160,000. • Section 415(c)(1) limit on annual additions to a defined contribution plan is raised from \$35,000 to \$40,000. • Section 401(a)(17) limit on compensation for plan purposes is raised from the current \$170,000 to \$200,000. <p>All three new limits will be indexed for inflation after July 1, 2001.</p>	<ul style="list-style-type: none"> • Years ending after 2001 • Years beginning after 2001 • Years beginning after 2001 	611
4	Elective deferrals IRC §402(g)	The current \$10,500 limit on elective deferrals is increased to \$11,000 in 2002 and then by \$1,000 each year until it reaches \$15,000 in 2006.	2002	611
5	Elective deferrals to SIMPLE plans IRC §408(p)(2)	The current \$6,500 SIMPLE retirement account limit is increased to \$7,000 in 2002 and then by \$1,000 each year until it reaches \$10,000 in 2005.	2002	611

(continued)

<i>Summary of Major Retirement Plan Law Changes</i>				
<i>No.</i>	<i>Description</i>	<i>New Law</i>	<i>Effective</i>	<i>Act Section</i>
6	Plan loans for owner employees IRC §4975(f)(6)	The special restrictions under current law on plan loans to owner employees is generally eliminated. This will allow for loans to sole proprietors, more-than-10% partners, and more-than-5% sub-S shareholders under the same rules as for other employees. Present law restrictions will continue to prohibit loans from IRAs, including SEPs and SIMPLE IRAs.	2002	612
7	Top-heavy provisions IRC § 416(i)	The top-heavy rules are changed: Three changes have been made to the definition of <i>key employee</i> : (1) The determination will be based solely on the participant's status and compensation in the plan year containing the determination date (the preceding 4 years will no longer be considered), (2) an officer is treated as a key employee based on officer status only if the employee earns more than \$130,000, and (3) the "top 10 owner" category has been eliminated. Matching contributions will now count toward satisfying the top-heavy minimums. The matching contribution of a safe harbor 401(k) plan will be deemed to satisfy the top-heavy rules. This does not mean that the match will automatically satisfy top-heavy rules for an accompanying profit-sharing plan, although the matching contributions will count toward otherwise satisfying the minimum. The 5-year look-back rule applicable to distributions will be shortened to one year for distributions other than in-service distributions. A frozen top-heavy defined benefit plan will no longer be required to make minimum accruals on behalf of non-key employees.	2002	613
8	Elective deferrals and employer deduction limits IRC § 404(n)	Elective deferrals will no longer be considered employer contributions for purposes of the IRC § 404 deduction limits.	2002	614

(continued)

<i>Summary of Major Retirement Plan Law Changes</i>				
<i>No.</i>	<i>Description</i>	<i>New Law</i>	<i>Effective</i>	<i>Act Section</i>
9	Deduction limit definition of compensation IRC § 404(a)(3)(A)	The definition of compensation for purpose of the deduction limit rules will include salary reduction amounts treated as compensation under IRC § 415 (e.g., 401(k) plan elective deferrals).	2002	616
10	Profit-sharing and stock bonus plan deduction limit increased IRC § 404(a)	The annual limitation on the amount of deductible contributions to a profit-sharing or stock bonus plan is increased from 15% to 25% of compensation of the employees covered by the plan for the year. Also, except to the extent provided in regulations, a money purchase pension plan is treated like a profit-sharing or stock bonus plan for purpose of the deduction rules.	2002	616
11	Option to treat elective deferrals as Roth contributions IRC § 402A	Effective for tax years beginning after 2005, the Act allows participants in certain plans to make after tax deferrals treated as Roth contributions.	Effective for years beginning after 2005	617
12	Tax credit for contributions IRC § 25B	From 2002 through 2006, eligible taxpayers will receive a nonrefundable tax credit of up to 50% of contributions made to an IRA 401(k), 403(b), SIMPLE, SEP, or 457 plan. This credit is available on the first \$2,000 of contributions (reduced by certain distributions) and is in addition to any deduction or exclusion that would otherwise apply with respect to the contribution. The amount of the credit is determined by the adjusted gross income (AGI). For a joint filer with an AGI between \$0-\$30,000, the credit rate is 50%. The rate decreases to 20% when the AGI exceeds \$30,000 and then to 10% when the AGI exceeds \$32,500; it finally phases out at AGI of \$50,000.	2002	618
13	Credit for new retirement plan expenses IRC § 45E	Effective for plans established after December 31, 2001, in tax years beginning after that date, the Act provides a nonrefundable income tax credit for the administrative and retirement-education expenses of a small business that adopts a new qualified defined benefit or defined contribution plan, a SIMPLE plan, or SEP. The credit applies to 50% of the first \$1,000 of qualified expenses for each of the first three years of the plan.	2002	619

(continued)

<i>Summary of Major Retirement Plan Law Changes</i>				
<i>No.</i>	<i>Description</i>	<i>New Law</i>	<i>Effective</i>	<i>Act Section</i>
		The credit is available to an employer that did not employ, in the preceding year, more than 100 employees with compensation in excess of \$5,000. For an employer to be eligible for the credit, the plan must cover at least one non-highly compensated employee. In addition, if the credit is for the cost of a payroll deduction IRA arrangement, the arrangement must be made available to all employees who have been with the employer at least three months. The 50% of qualifying expenses offset by the credit are not deductible. However, the other 50% of such expenses (along with other expenses above the \$1,000 limit) are deductible to the extent permitted under present law.		
14	Catch-up contributions IRC § 414(v)	<p>A plan may allow individuals who have attained age 50 by year end to make catch-up contributions. The otherwise applicable dollar limit on elective deferrals under a Section 401(k) or Section 457 plan, Section 403(b) annuity, SEP, or SIMPLE is increased. Catch-up contributions are not subject to any other contribution limits and are not taken into account in applying other contribution limits. In addition, they are not subject to applicable nondiscrimination rules. However, they must be available to all participants over age 50 on an equal basis.</p> <p>An employer is permitted to make matching contributions with respect to catch-up contributions. Any such matching contributions are subject to the normally applicable rules.</p> <p>The allowable catch-up contribution applicable to 401(k), 403(b), SEP, and 457 for 2002 is \$1,000. This amount is increased by \$1,000 each year until it reaches \$5,000 in 2006.</p> <p>For SIMPLE IRA and 401(k) plans, the amount for 2002 is \$500 and is increased \$500 each year until it reaches \$2,500 in 2006.</p>	2002	631
15	Increased annual additions limit for defined contribution plans IRC § 415(c)(1)	The annual additions limit is increased from 25% of compensation under a defined contribution plan to 100% of compensation.	2002	632

(continued)

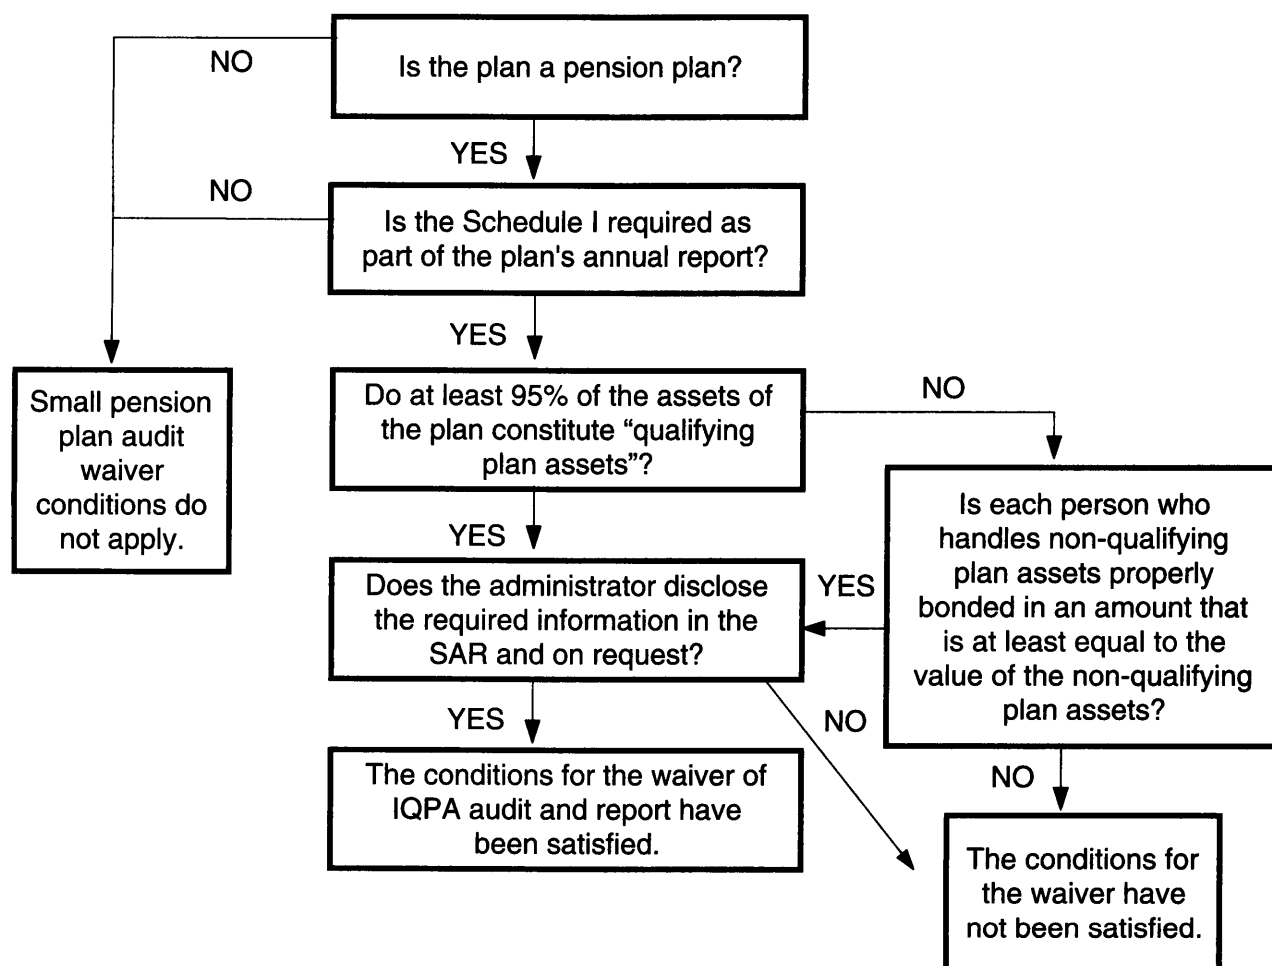

<i>Summary of Major Retirement Plan Law Changes</i>				
<i>No.</i>	<i>Description</i>	<i>New Law</i>	<i>Effective</i>	<i>Act Section</i>
16	Rollovers among various types of plans IRC §§ 402, 403, 408, 457, and 3401	Generally distributions from a qualified retirement plan. Section 403(b) annuity, IRA, or Section 457 plan can be rolled over to any of such plans or arrangements.	2002	641–643
17	Vesting IRC § 411(a)	Employer matching contributions must vest under a maximum 3-year cliff or 6-year graded vesting schedule.	Generally effective for plan years beginning after 2001	633
18	Waiver of 60-day rollover rule	The IRS may waive the 60-day rollover period if the failure to provide a waiver would be against equity or good conscience, including cases of casualty, disaster, or other events beyond the reasonable control of the individual.	2002	644
19	Employer-provided retirement advice IRC § 132	Qualified retirement planning services provided to an employee and his or her spouse by an employer maintaining a qualified plan are excludible from income and wages. The benefit must be available on substantially the same terms to each member of the group of employees normally provided education and information regarding the employer's qualified plan.	2002	665
20	Deemed IRAs under employer plans IRC § 408	A qualified employer plan may elect to allow employees to make traditional or Roth IRA-type contributions to the plan.	Years beginning after December 31, 2002	602
21	Elimination of user fee for determination letter requests for small employers	User fees will be eliminated for determination letters requested by small employers within 5 years of the adoption of a new plan or within 5 years of the end of a remedial amendment period beginning in the first 5 years the plan is in existence.	2002	620
22	Multiple-use test IRC § 401(m)	The multiple use of the alternative limit test has been repealed. Employers may use the alternative limit to pass both the ADP and the ACP tests.	2002	666

Appendix D

Small Pension Plan Audit Waiver Summary

Small Pension Plan Audit Waiver (SPPAW) Summary (Applies to Plan Years Beginning on or after April 18, 2001)

Appendix E

Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting and Misappropriation of Assets

This appendix contains examples of risk factors presented separately relating to the two types of fraud relevant to the auditor's consideration—that is, fraudulent financial reporting and misappropriation of assets. Risk factors are further classified based on the three conditions generally present when fraud exists:

1. *Incentive/pressure* to perpetrate fraud
2. *Opportunity* to carry out the fraud
3. *Attitude/rationalization* to justify the fraudulent action

Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the engagement team may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

I. RISK FACTORS RELATING TO MISSTATEMENTS ARISING FROM FRAUDULENT FINANCIAL REPORTING

Incentives/Pressures

Financial stability or profitability of the plan is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):

- Financial stability or profitability of the plan sponsor is threatened by economic, industry, or entity operating conditions
- The plan holds employer securities and the employer is in an industry in which the value of the securities is subject to significant volatility or is not readily determinable
- The plan has limited investment options or has invested significantly in employer assets other than employer securities
- Poor investment results, especially compared to that of other similar plans
- Recurring negative cash flows combined with an underfunded position
- New accounting, statutory, or regulatory requirements, such as legislation that increases benefits of public employee retirement plans (PERs) or the Health Insurance Portability and Accountability Act of 1996 (HIPAA) for health care plans that process their own claims

Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:

- Public relations risk of large investment that becomes worthless, especially if a derivative or nonregulated investment such as a hedge fund or "alternative investments"
- Investment return expectations of participants, participating employers, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management

- Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as plan sponsor business combinations or multiemployer plan attempts to attract new employers or to prevent departure of current employers

Opportunities

The nature of the industry or the plan's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:

- Senior management of the plan sponsor appointing itself trustee of the plan and having the opportunity in that position to benefit the plan sponsor (for example, to use the plan's money for speculative investing or to support the plan sponsor through purchasing employer assets or supporting a supplier)
- Significant related-party transactions not in the ordinary course of business or with related plans not audited or audited by another firm
- Non-readily marketable investments where valuation is based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate, such as unregulated investments (hedge funds or "alternative investments") or real estate
- In-kind contributions from the plan sponsor

There is ineffective monitoring of management as a result of the following:

- Lack of oversight by plan management of outside service providers such as investment custodians, investment managers, recordkeepers, claims administrators, or paying agents
- Domination of plan management by a single person or small group without compensating controls
- Ineffective board of directors or committee oversight over the financial reporting process and internal controls
- Lack of competence of plan trustees because of background and lack of training

There is a complex or unstable organizational structure as evidenced by the following:

- Difficulty in determining the committee or individuals that have oversight or fiduciary responsibility for the plan
- Turnover of plan management, oversight committee members, counsel, board members, or outside service providers

Internal control components are deficient as a result of the following:

- Inadequate monitoring of controls, including automated controls
- High turnover rates or employment of ineffective accounting, internal audit, or information technology staff
- Ineffective accounting and information systems including situations involving reportable conditions

Attitudes/Rationalizations

We may not be able to observe risk factors reflective of attitudes/rationalizations by board members, management, or employees that allow them to engage in and/or justify fraudulent financial reporting. Nevertheless, if we become aware of the existence of such information, we should consider it in identifying the risks of material misstatement arising from fraudulent financial reporting.

The following matters have come to our attention:

- Ineffective communication, implementation, support, or enforcement of the plan sponsor or plan's values or ethical standards by management or the communication of inappropriate values or ethical standards

- Lack of management candor in dealing with plan participants, claimants, outside service organizations, actuaries, and auditors regarding decisions that could have an impact on plan assets, including restructuring or downsizing arrangements
- Failure by management to have adequate valuations performed, including actuarial valuations
- The plan administrator lacks an understanding of the major regulations that govern the plans (for example, Employee Retirement Income Security Act (ERISA), HIPAA, the Internal Revenue Code (IRC), and State legislation)
- Management displays a significant disregard toward compliance with laws and regulations, such as ERISA, HIPAA, IRC, and Department of Labor (DOL)
- The plan administrator custodian or trustees have been investigated by the DOL, Internal Revenue Service (IRS), Pension Benefit Guaranty Corporation (PBGC), or other party
- The plan has participated in a voluntary compliance program in conjunction with the IRS or DOL. Such participation a possible indication of ineffective management of the plan or controls over the plan
- Management failing to correct known operational deficiencies, prohibited transactions, or reportable conditions on a timely basis

The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:

- Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters
- Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report
- Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or oversight committee
- Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

II. RISK FACTORS RELATING TO MISSTATEMENTS ARISING FROM MISAPPROPRIATION OF ASSETS

Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur (for example, ineffective monitoring of management and weaknesses in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exists).

Incentives/Pressures

Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets. (Access to assets, such as access to participant data communicated to the trustee, may be indirect.)

- Known personal financial pressures affecting employees with access to plan assets

Adverse relationships between the plan sponsor or plan administration and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:

- Known or anticipated future employee layoffs
- Recent or anticipated changes to employee compensation or benefit plans

- Promotions, compensation, or other rewards inconsistent with expectations
- Individuals involved in plan administration known to be dissatisfied

Opportunities

Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:

- A company sponsoring multiple defined benefit pension plans, some underfunded, some overfunded
- Lack of qualified outside service provider to serve as trustee and/or custodian of plan assets
- Nonreadily marketable, specialized, or unique investments and management's lack of understanding of such investments (for example, nonregulated investments such as hedge funds and "alternative investments", derivative products, securities lending arrangements, junk bonds, real estate, securities traded in non-U.S. markets, limited partnerships, and real property)

Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:

- Lack of appropriate management oversight
- Lack of review of plan investment transactions including accounting for investment income (for example, by the trustee, sponsor, or the plan's investment committee)
- Lack of segregation of duties or independent checks
- Lack of independent preparation and review of reconciliations of trust assets to participant accounts or accounting records of the plan
- Lack of segregation of duties related to benefit payments, contributions, investment transactions, and loans
- Plan administrator does not maintain independent records and periodically check information provided to the custodian
- Lack of appropriate system of authorization and approval of transactions
- Lack of complete and timely reconciliations of assets
- Lack of approval of transactions with parties-in-interest that could lead to prohibited transactions
- Lack of timely and appropriate documentation for transactions
- Trustee does not prepare required supplemental information (for example, historical cost records not maintained for non-participant directed accounts)
- Lack of controls over benefit payments, including the termination of payments in accordance with plan provisions
- Lack of segregation of plan assets from the sponsor's assets or inappropriate access to plan assets by plan sponsor
- SAS No. 70 report indicating a lack of adequate controls at an outside service provider
- Use of a service provider that does not provide a SAS No. 70 report
- Unreconciled differences between net assets available for benefits per the trustee/custodian records and the recorded participant accounts for a defined contribution plan (unallocated assets or liabilities)

- Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation
- Inadequate access controls over automated records, including controls over and review of computer systems event logs

Attitudes/Rationalizations

We may not be able to observe risk factors reflective of employee attitudes/rationalizations that allow them to justify misappropriations of assets. Nevertheless, if we become aware of the existence of such information, we should consider it in identifying the risks of material misstatement arising from misappropriation of assets.

If we have observed the following attitudes or behavior of employees who have access to assets susceptible to misappropriation:

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies
- Behavior indicating displeasure or dissatisfaction with the plan or plan sponsor or their treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated

Appendix F

Governmental Employee Benefit Plans

This section addresses audit and accounting issues unique to governmental employee benefit plans (governmental plans). Auditors of governmental plans should also see the AICPA Audit and Accounting Guides *Audits of State and Local Governments (Non-GASB 34 Edition)*, and *Audits of State and Local Governments (GASB 34 Edition)*, and the AICPA Audit Risk Alert *State and Local Governmental Developments* [AAM section 8070].

Help Desk—The accounting for many governmental plans is prescribed by Governmental Accounting Standards Board (GASB) standards, primarily GASB Statements No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, and No. 26, *Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans*. The AICPA Audit and Accounting Guide *Audits of Employee Benefit Plans* (the EBP Guide) and related AICPA publications (such as this Audit Risk Alert, the checklists, and Practice Aids listed in the “Related Publications” section of this Alert) are designed to address issues related to plans sponsored by commercial or not-for-profit private sector entities, and the accounting provisions in the EBP Guide do not apply to governmental plans. However, portions of those publications, including this Alert, may be useful to auditors of governmental plans. For example, auditors should consider referring to the EBP Guide for specific auditing considerations relating to governmental plans, such as evaluating actuarial information. Although the audit objectives for governmental plans are similar to those for private-sector pension plans, the auditor should be aware that the Employee Retirement Income Security Act of 1974 (ERISA) does not apply to governmental entities. Instead, state and local laws and regulations govern the operations of governmental plans.

Current Trends

The funding levels for public sector retirement plans have been reduced by three years of underperforming investment returns, and funding, like funding for all governmental programs, is threatened by lower tax revenues and governmental deficits.

A study of 199 public pension funds performed by Greenwich Associates revealed an average asset loss of 9.3 percent from 2001 to 2002, which followed an 8.9 percent loss from 2000 to 2001. As a result, the percentage of underfunded plans rose from 52 percent overall, and to 58 percent among funds with over \$5 billion in assets. U.S. equity markets fell for the third year in a row, which has not happened since the period 1939 to 1941. The S&P SuperComposite 1500 fell 21.3 percent in 2002 after falling 10.6 percent in 2001 and 7.0 percent in 2000.

Funding of benefit programs may be tested as state legislatures face a minimum \$68.5 billion budget shortfall for fiscal year 2004. According to the National Conference of State Legislatures, President Angela Monson, a state senator from Oklahoma, says, “Thirty-three states estimate budget gaps in excess of 5 percent, with 18 of those facing gaps above 10 percent. There is great cause for concern since the deficit numbers continue to grow at an alarming rate.”

Audit Risks

With the continued investment losses and underfunding of plans, many funds have undertaken asset allocation or asset/liability studies. Auditors should consider reviewing such studies, including comparing allocation targets and ranges with the current asset allocation to determine if funds are within policy limits. Also, benefit cash flows should be monitored for any possible changes in contribution rates, early retirement incentives, and/or increased purchase service activity.

New and Proposed GASB Pronouncements

Help Desk—For further information on recent exposure drafts outstanding, visit the Web site <http://accounting.rutgers.edu/raw/gasb/welcome.htm>.

GASB Issues Standard to Improve Disclosures on Deposit and Investment Risk

In an effort to provide the public with better information about the risks that could potentially affect a government's ability to provide services and pay its debts, the GASB has published GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, an amendment of GASB Statement No. 3. The Statement amends GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements*, and addresses additional risks to which governments are exposed.

The new accounting guidance requires that state and local governments communicate key information about deposit and investment risks, frequently one of the largest assets on a government's balance sheet. Under GASB Statement No. 40, state and local governments are required to disclose information covering four principal areas:

1. Investment credit risk disclosures, including credit quality information issued by rating agencies
2. Interest rate disclosures that include investment maturity information, such as weighted average maturities or specification identification of the securities
3. Interest rate sensitivity for investments that are highly sensitive to changes in interest rates (for example, inverse floaters, enhanced variable-rate investments, and certain asset-backed securities)
4. Foreign exchange exposures that would indicate the foreign investment's denomination

The provisions of GASB Statement No. 40 are effective for financial statements for periods beginning after June 15, 2004. Earlier application is encouraged.

Help Desk—GASB Statement No. 40 (product no. GS40) can be ordered through the GASB's Order Department at (800) 748-0659 or online via its Web site at www.gasb.org.

GASB Issues Technical Bulletin to Improve Disclosures About Derivatives

In an effort to improve disclosures about the risks associated with derivative contracts, the GASB has released for public comment accounting guidance that would provide more consistent reporting by state and local governments. The proposed Technical Bulletin, *Disclosure Requirements for Derivatives Not Presented at Fair Value on the Statement of Net Assets*, is designed to increase the public's understanding of the significance of derivatives to a government's net assets and would provide key information about the potential effects on future cash flows.

While state and local governments use a vast array of increasingly complex derivative instruments to manage debt and investments, they also may be assuming significant risks. Governments must communicate those risks to financial statement users and the proposed Technical Bulletin would help clarify existing accounting guidance so that more consistent disclosures can be made across all governments.

Governments would be required to disclose the derivative's objective, its terms, fair value, and risks. The proposed accounting guidance would require governments to disclose in their financial statements credit risk, interest rate risk, basis risk, termination risk, rollover risk and market access risk.

Help Desk—This Technical Bulletin would be effective for periods ending after June 15, 2003. The proposed Technical Bulletin is available from the GASB's Web site. Comments on the proposed documents may be made through May 16, 2003.

Postemployment Benefits Exposure Drafts

The GASB issued two exposure drafts of proposed Statements on financial reporting of postemployment benefits other than pensions (known as other postemployment benefits, or OPEB) in February 2003.

- *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions.* This proposed Statement establishes standards for the measurement, recognition, and display of other postemployment employee benefits (OPEB) expense or expenditures and related liabilities in the financial reports of state and local governments.
- *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans.* This proposed Statement establishes uniform financial reporting standards for OPEB plans and would supersede the previously issued interim guidance in GASB Statement No. 26.

Other Governmental Employee Benefit Plan Resources

The National Conference on Public Employee Retirement Systems (NCPERS) issued a special report on the evolution of the structure of defined benefit and defined contribution plans in the public sector. The report is titled “The Evolution of Public Sector Pension Plans.” The report details six examples of innovative state plans that offer variations of traditional defined benefit plans. The report also reviews the issues that have driven the discussion of defined contribution plans as well as the adoption of hybrid plans and the economic factors that have influenced the development of public sector plans. A copy of this special report has been sent to every NCPERS member. Additional copies are free to NCPERS members by calling the NCPERS office at (202) 624-1456.

Public Pension Coordinating Council’s 2001 Survey of State and Local Government Employee Retirement Systems

The 2001 Survey of State and Local Government Employee Retirement Systems is available online at <http://ppcc.grsnet.com>. The report presents summary statistical analysis of state and local government employee systems surveyed by the Public Pension Coordinating Council in the summer of 2001 and published in March of 2002.

Resources

See the “Information Resources” section of the AICPA Audit Risk Alert *State and Local Governmental Developments—2002*, for a listing of resources for governmental entities, including governmental plans.

[The next page is 8179.]

AAM Section 8070

State and Local Governmental Developments—2003

NOTICE TO READERS

We, as members of the AICPA staff, have developed this Audit Risk Alert to provide you, as an auditor of financial statements of state and local governments¹, with an overview of recent economic, industry, regulatory, and professional developments that may affect the audits you perform. This document presents brief summaries of recently issued accounting and auditing pronouncements and legal and regulatory provisions. We present those summaries for your information only; you should not rely on them as a substitute for a complete reading of the source material.

This publication is an *Other Auditing Publication* as defined in Statement on Auditing Standards (SAS) No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), as amended. Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. This publication was reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Economic and Industry Developments

The State of the Economy

.01 State and local governments are taking severe action to weather these difficult times. Last year we saw some tax increases, budget trimming, and the use of rainy-day funds. This year, those techniques are being supplemented with additional tax increases (on a scale not seen since 1992), tax restructuring, across-the-board budget cuts, hiring freezes, layoffs, early retirement incentives, and program restructuring, especially in health care programs. Some governments are using current tobacco settlement payments, which are significantly lower than originally projected, to fill budget gaps, as well as using future settlement payments to securitize bonded debt. State governments are stepping up their efforts to tax Internet sales. (See the later discussion in this section titled "Taxation of Internet Sales.") Further, state cuts in funding to local governments are adding to the financial stress those entities are facing. To increase revenue, some governments are trying "data mining," a process of identifying unpaid taxes and fees by looking at other, related data. For example, a government might use overseas purchases declared on customs forms to identify unpaid use taxes and use self-employment income in tax returns to identify unpaid business licenses. Governments also issued debt, including refunding debt, in record amounts in 2002, taking advantage of historically low interest rates.

¹ Until 2003, this annual Alert has included the topic of single audits—audits performed under Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133). Beginning this year, we address single audits matters separately in the Audit Risk Alert, titled *Single Audits* [AAM section 8220]. The annual Single Audit Alert will provide auditors of organizations receiving federal awards with an overview of recent industry, regulatory, and professional developments that may affect the audits they perform.

.02 In the face of these uncertain economic times, governments may consider using “creative” budgeting, financing, and financial reporting techniques to avoid the appearance of deficit financial positions. They may find innovative ways to minimize the reporting of costs, maximize the reporting of revenues and unrestricted net assets, and use restricted resources for unrestricted purposes.

Help Desk—The Rockefeller Institute of Government’s new Web site, “The Gateway to State and Local Government Information,” at <http://StateAndLocalGateway.rockinst.org>, is a clearinghouse of information on state and local government finances that can help you to keep up-to-date on economic issues facing governmental entities.

Taxation of Internet Sales

.03 The taxation of Internet sales remains an ongoing issue. State and local governments are concerned about losing billions of revenue dollars annually because of untaxed Internet sales. Internet businesses claim that disparities in sales tax systems among the various jurisdictions make it too burdensome to administer sales tax collections.

.04 Late in 2002, a majority of states approved an interstate agreement to simplify their sales tax laws. The agreement will become effective once a certain number of states have enacted conforming legislation. In response, some of the nation’s largest retailers have started voluntarily to collect taxes on their Internet sales. However, before state and local governments can enforce the taxation of Internet sales, the federal government must pass legislation permitting it. The Internet Tax Nondiscrimination Act (Public Law [P.L.] 107-075), which expires November 1, 2003, bans new Internet access taxes and new, multiple, and discriminatory taxes on electronic commerce. Legislators are considering bills in the 108th Congress to make the ban permanent. Surely, the states will be adding their voice to that debate.

Governing Board Scrutiny

.05 You may find governing boards, audit committees, and those with oversight responsibility for financial matters more attentive to and involved with this year’s audit. There are several reasons why these groups are on a heightened state of alert:

- They are concerned with the financial stress the entity is facing. (See the earlier discussion in this section titled “The State of the Economy.”)
- They are taking their oversight responsibilities more seriously in the wake of recent accounting scandals and the passage of the Sarbanes-Oxley Act of 2002 (P.L. 107-204).
- They are receiving new financial information because of the implementation of Government Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*. (You might find them especially interested in the tone and content of the information in the management’s discussion and analysis [MD&A].)
- You are bringing them more directly into the audit process through the fraud inquiries required by Statement on Auditing Standards (SAS) No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316). (See the discussion of SAS No. 99 and the associated AICPA publications in the later sections of this Alert titled “Recent AICPA Auditing Standards and Other Guidance” and “Focus on Fraud.”)

This increased attention and involvement can have a positive effect on your audits and your relationships with your clients. However, you will likely need to plan some extra time in your audit budgets because of it.

Regulatory, Legislative, and Other Developments

Internal Revenue Service Activities

.06 We have included in the past few Alerts lengthy discussions about how Internal Revenue Service (IRS) activities might affect the financial statement audits of your state and local government clients. You should be aware of IRS concerns about noncompliance that could have a direct and material effect on the determination of financial statement amounts. While there are some new IRS concerns every year, many of them stay the same.

.07 This year the IRS continues to be concerned about and use various techniques to examine compliance with laws and regulations relating to, among other matters, settlements for back pay, worker versus independent contractor classification, taxable fringe benefits, Federal Insurance Contribution Act (FICA) taxes, tax-sheltered annuities and deferred compensation plans, and yield burning and arbitrage on tax-exempt bonds. In addition, changes in IRS regulations, some of which we highlight below, might result in changes in a government's activities relating to, for example, its retirement plans or tax-exempt debt.

.08 There is a simple way to obtain targeted, up-to-date information about relevant IRS activities—go to the appropriate sections of the IRS Web site. The portion of the IRS Web site relating to the Tax Exempt and Government Entities (TE/GE) Operating Division:

- Provides separate pages for state and local governments, Indian tribal governments, tax-exempt bonds, and employee plans
- Provides links to relevant regulations, revenue rulings, revenue procedures, notices, announcements, publications (such as the 2002 versions of Publications 963, *Federal-State Reference Guide: Social Security Coverage and FICA Reporting by State and Local Government Employers*, and 3908, *Gaming Tax Law for Indian Tribal Governments*), and educational materials
- Allows you to access and subscribe to electronic newsletters, such as the *Federal, State, and Local Government Newsletter* and *Employee Plans News*
- Gives you information about outreach efforts, voluntary correction programs (such as the voluntary closing agreement program for tax-exempt bonds), and contacts for appropriate IRS and other federal agency personnel.

Help Desk—Check it out! Go to www.irs.gov and follow the links to government entities (which will take you to separate pages for federal, state, and local governments; Indian tribal governments; and tax-exempt bonds) and retirement plans.

Employment Issues

.09 This year, the TE/GE office of Federal, State, and Local Governments (FSLG) will try to increase voluntary compliance with the regulations for information returns (Forms 1099 and W-2) by conducting “compliance checks” and examinations. Compliance checks, which are not examinations, are used to verify that information returns are accurately and timely reported. The FSLG also will be addressing information return penalties. Each state-based FSLG office has developed plans to provide educational information to governments and practitioner and government associations about information return reporting and other employment tax issues.

Tax-Exempt Bonds

.10 *Enforcement activities.* In last year's Alert, we explained the IRS's enforcement activities and global settlements relating to yield burning on tax-exempt bonds. The IRS continues to cast a wider net, gathering many firms that did not participate in the global settlements and even expanding their concerns into cash-funded

defeasance escrows (in addition to the bond-funded escrows that have been targeted for several years). An interesting aspect of this activity is that the brokers often are paying small refunds to the issuers. In some cases, the issuers will have to pay those refunds to the IRS. If a government you audit receives such a refund, it should consult a competent tax adviser about the consequences.

.11 As its examiners gain experience, the IRS is auditing more types of tax-exempt bonds. Its experience with “blind pools” has piqued its interest further, and such pooled financing issues (particularly, pools from which few, if any, loans were made) can be expected to be a continuing target of IRS audits for some time. It is also worth noting that the IRS’s interest in solid waste bonds and arbitrage rebate payments has not diminished. In addition, relatively new areas of focus include single family and multifamily mortgage bonds and student loan bonds. Finally, *any* type of bond issue where the project(s) to be financed never came about can anticipate intense scrutiny, in the event that an IRS audit letter is received.

.12 An easily overlooked problem for which auditors should be on the lookout is *change in use* of financed facilities. Bond proceeds may be used to finance a project that is initially eligible for tax-exempt financing, but the use of the property later changes to an ineligible use (for instance, space that is no longer being needed for a government purpose could be leased to a private business, or a government service using bond-financed facilities could be privatized). If this should occur with respect to any portion of such a facility, the government should consult a competent tax adviser about the consequences.

.13 In last year’s Alert, we discussed an IRS Voluntary Closing Agreement Program (VCAP) that was announced on October 1, 2001. This program continues in full force and can be a very useful tool to resolve problems that a government discovers with its tax-exempt bonds. Refer to the IRS Web site at www.irs.gov for more details.

.14 *Output facility regulations.* In the September 23, 2002, *Federal Register* (67 FR 59756), the IRS issued regulations that provide guidance for applying the private activity bond restrictions to tax-exempt bonds issued by state and local governments for output facilities, which generally are facilities for the generation and transmission of electricity. The final regulations apply to bonds sold on or after November 22, 2002.

.15 *Arbitrage safe harbor.* In Revenue Procedure 2002-31 (*Internal Revenue Bulletin* 2002-19, May 13, 2002), the IRS finalized an arbitrage safe harbor under which an issue of certain short-term tax or revenue anticipation bonds will not be treated as outstanding longer than is reasonably necessary to accomplish the governmental purposes of the bonds. The revenue procedure applies to bonds sold after May 13, 2002.

Help Desk—The IRS recently issued a guide to provide an overview of federal tax law requirements pertaining to tax-exempt municipal bonds. Publication 4079, *Tax-Exempt Governmental Bonds Compliance Guide*, is available on the IRS Web site at www.irs.gov/pub/irs-pdf/p4079.pdf.

Employee Plans

.16 The Economic Growth and Tax Relief Reconciliation Act of 2001 (P.L. 107-016) included comprehensive pension reforms that significantly changed how traditional retirement programs are operated, including programs that cover governmental employees. See last year’s Alert for an overview of the effect of the Act.

.17 In the July 11, 2003, *Federal Register* (68 FR 41230), the IRS issued final regulations on eligible Section 457(b) deferred compensation plans. The regulations reflect the changes made to 457 plans by various laws enacted over the past two decades. They also make various technical changes and clarifications to the existing final regulations on many discrete issues. The final regulations are effective upon issuance and generally applicable to taxable years beginning after December 31, 2001.

.18 In Notice 2003-20 (*Internal Revenue Bulletin* 2003-19, May 12, 2003), the IRS provides needed and helpful guidance on the withholding and reporting requirements applicable to 457(b) plans. Guidance in the

Notice includes timing and reporting for income tax withholdings and FICA payments. The rules in the Notice are effective for deferrals and distributions made after December 31, 2001.

Securities and Exchange Commission Developments

.19 Last year, the Securities and Exchange Commission's (SEC's) Office of Municipal Securities studied the system of nationally recognized municipal securities information repositories (NRMSIRs). The study found that municipal securities issuers and conduit borrowers frequently are not filing their contractually required annual continuing disclosures. (See the discussion of continuing disclosure requirements in the SEC section of last year's Alert.) Issuers and conduit borrowers frequently fail to make the required filings because they are not aware of their obligation or the potential consequences of noncompliance. Such potential consequences are (1) broker-dealers may become unable to recommend the purchase of the entity's securities, reducing their liquidity, and (2) issuers and conduit borrowers must disclose their failures to file in the offering document for their next bond issue. If an issuer or conduit borrower repeatedly fails to meet its obligation to file in a timely manner, broker-dealers may be unable to underwrite or bid for the offering. The SEC recently reminded broker-dealers of these obligations and of its intention to enforce them.

.20 In last year's Alert, we discussed how you might become aware during a financial statement audit that a government has not complied with its continuing disclosure obligations, and that such noncompliance might have a material indirect effect on the financial statements. We want to again remind you that when you become aware of such noncompliance, you should consider the adequacy of the government's financial statement disclosure about the violations and actions taken to address them as well as the effect of nondisclosure on the auditor's report. Should you find such violations, you also may want to assess the entity's internal control over making the required filings and report deficiencies in that internal control in the management letter.

.21 You also should be aware of the increasing need for governments, especially municipal securities issuers and conduit borrowers, to have their financial statements produced in an electronic format. Issuers and conduit borrowers are increasing their use of the Internet to disseminate information, including financial statements. Further, the Municipal Council is developing a central electronic filing location that will simultaneously forward each filing to every NRMSIR (commonly referred to as an electronic "post office") for issuers and conduit borrowers to use to make filings with NRMSIRs. This post office will probably begin accepting filings during the next year. (The Municipal Council is a group of 20 organizations representing all sectors of the municipal market.) The SEC supports that effort and is expected to consider mandating use of an electronic post office for all NRMSIR filings. Therefore, the production of financial statements in an electronic format—and one that is secure, such as a portable document format (PDF) file—will meet both current and future needs.

The Sarbanes-Oxley Act of 2002

.22 Congress passed, and President Bush signed, the Sarbanes-Oxley Act of 2002 (the Act), providing unprecedented new requirements for auditors of public companies, corporations, and Wall Street. Since the Act's issuance, several state legislators, regulators, and other elected or appointed officials are seeking to duplicate and/or extend provisions of the Act to nonpublic companies. Further, the General Accounting Office (GAO), which issues *Government Auditing Standards*, has stated that it will be monitoring the actions of the AICPA and the new Public Company Accounting Oversight Board (PCAOB) (which was established by the Act) to determine if any clarifying guidance needs to be added to its auditing standards. It is not clear at this point how or if these activities will affect audits of state and local governments. For this reason, you may want to follow developments related to the Act over the next year. See the related discussion on certain recent proposed auditing standards related to the Act in the section of this Alert titled "Proposed AICPA Auditing and Attestation Standards."

Help Desk—For information about the Sarbanes-Oxley Act, see the Sarbanes-Oxley Act/PCAOB Implementation section of the AICPA Web site at www.aicpa.org/sarbanes/index.asp. This section includes background information; links to AICPA implementation guidance; and information on federal regulator, state regulator, and PCAOB activities related to the implementation of the Act.

Audit and Attestation Issues and Developments

Recent AICPA Auditing Standards and Other Guidance

SAS No. 97, Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles

.23 Issued in June 2002, SAS No. 97 (AICPA, *Professional Standards*, vol. 1, AU sec. 625) revises SAS No. 50, *Reports on the Application of Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 625). The Statement prohibits an accountant from providing a written report on the application of accounting principles not involving facts and circumstances of a specific entity. It provides guidance that a reporting accountant should apply when preparing a written report or providing oral advice on the application of accounting principles to specified transactions involving facts and circumstances of a specific entity, among other things. SAS No. 97 is effective for written reports issued or oral advice provided on or after June 30, 2002, with earlier application permissible.

SAS No. 98, Omnibus Statement on Auditing Standards—2002

.24 SAS No. 98, issued in September 2002, includes numerous accumulated revisions to various SASs. Among items that might be relevant to the audits of state and local governments are:

- An amendment to SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550.07), which indicates that the auditor may express an opinion, in relation to the basic financial statements taken as a whole, on supplementary information and other information that has been subjected to the auditing procedures applied in the audit of those basic financial statements. It also describes, in more detail, the auditor's reporting on the information and that the auditor should use the guidance provided in SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551.12 and .14).
- An amendment to SAS No. 52, *Omnibus Statement on Auditing Standards—1987* (AICPA, *Professional Standards*, vol. 1, AU sec. 558.02 and .08–.10, "Required Supplementary Information"), which revises the applicability section of the SAS to include all sources of generally accepted accounting principles (GAAP), including AICPA industry Audit and Accounting Guides.
- An amendment to SAS No. 29 (AU sec. 551.12 and .15), which clarifies that an auditor can report whether required supplementary information (RSI) in an auditor-submitted document that is neither incomplete nor otherwise deficient is fairly stated in relation to the basic financial statements taken as a whole. To report in this manner, the RSI must have been subjected to the auditing procedures applied in the audit of the basic financial statements.

.25 Among the amendments and revisions included in SAS No. 98 are others related to SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150.05); SAS No. 47, *Audit Risk and Materiality* (AICPA, *Professional Standards*, vol. 1, AU sec. 312.34–.41); SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324.34–.41); SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508.65); and SAS No. 1, section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 530.03–.05) (which clarifies the auditor's responsibility with respect to subsequent events). With the exception of the effective date of the

amendment to SAS No. 70 and the rescission of Auditing Interpretation No. 6 of SAS No. 70 (effective for reports issued on or after January 1, 2003), all amendments were effective when SAS No. 98 was issued.

SAS No. 99, Consideration of Fraud in a Financial Statement Audit

.26 SAS No. 99 (AICPA, *Professional Standards*, vol. 1, AU sec. 316), issued in October 2002, supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A). It also amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), and SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). SAS No. 99 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. It provides guidance as it relates to fraud in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS).

.27 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002, with early application permissible. See the subsequent section of this Alert, "Focus on Fraud," for additional related information.

SAS No. 100, Interim Financial Information

.28 SAS No. 100 (AICPA, *Professional Standards*, vol. 1, AU sec. 722), issued in November 2002, supersedes SAS No. 71, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722A). SAS No. 100 applies to accountants who conduct reviews of interim information of an SEC registrant or non-SEC registrant filing with a regulatory agency (note that the standard defines a *regulatory agency* as the SEC and the following agencies with which an entity files periodic reports pursuant to the Securities Exchange Act of 1934: Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Reserve System, or the Office of Thrift Supervision). SAS No. 100 establishes standards on the nature, timing, and extent of procedures to be performed by an independent accountant when conducting a review of interim financial information. Although such a review is not a frequent occurrence, you may be engaged to review interim financial information as part of a governmental entity's municipal securities filing. This guidance is effective for interim periods within fiscal years beginning after December 15, 2002, with earlier application permitted. See the related discussion about the proposed SAS that would amend SAS No. 100 in the section of this Alert, "Proposed AICPA Auditing and Attestation Standards."

SAS No. 101, Auditing Fair Value Measurements and Disclosures

.29 GAAP requires fair value measurements and disclosures for many investments and investment-related transactions. For example, GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, as amended, requires that investments be reported at fair value. Issued in January 2003, SAS No. 101 (AICPA, *Professional Standards*, vol. 1, AU sec. 328), establishes standards and provides guidance on auditing fair value measurements and disclosures contained in financial statements. More specifically, SAS No. 101 addresses audit considerations relating to the measurement and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. SAS No. 101 is effective for audits of financial statements for periods beginning on or after June 15, 2003, with earlier application permitted.

Auditing Interpretations

.30 Among the AICPA's recent Interpretations that could relate to your state and local governmental clients is Interpretation No. 15, "Reporting as Successor Auditor When Prior-Period Audited Financial Statements Were Audited by a Predecessor Auditor Who Has Ceased Operations," of SAS No. 58 (AICPA, *Professional Standards*, vol. 1, AU sec. 9508.60–75). This Interpretation clarifies guidance for circumstances when prior-period financial statements audited by a predecessor auditor who has ceased operations are

presented for comparative purposes with current-period audited financial statements. It provides, among other things, an example of the reference that would be added to the introductory paragraph of the successor auditor's report when prior-period financial statements are unchanged. It also provides other reporting guidance for situations when such prior-period financial statements are restated.

Recent AICPA Attestation Standards

.31 In September 2002, the Auditing Standards Board (ASB) issued Statement on Standards for Attestation Engagements (SSAE) No. 12, *Amendment to Statement on Standards for Attestation Engagements No. 10, Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101). SSAE No. 12 is an omnibus standard that amends various standards for matters that have accumulated over time. It was primarily issued to make changes to the attestation standards that are consistent with those made to the auditing standards via SAS No. 98 (see the previous discussion in the section of this Alert titled "Recent AICPA Auditing Standards and Other Guidance"). It also clarifies the relationship between the attestation standards and the AICPA's quality control standards to indicate that deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular engagement was not performed in accordance with attestation standards.

Proposed AICPA Auditing and Attestation Standards

.32 The ASB has released several exposure drafts that might affect your audits of state and local governmental financial statements or the environment in which you are conducting your audits this year. These proposals include the following:

- *Proposed SASs related to audit risk.* The ASB released seven proposed SASs related to the audit risk assessment process to change audit practice to result in more efficient audits. The primary objective of the proposed SASs is to enhance auditors' application of the audit risk model. The proposed SASs are:
 - *Amendment to SAS No. 95, Generally Accepted Auditing Standards*
 - *Audit Evidence* (which would supersede SAS No. 31 of the same name [AICPA, *Professional Standards*, vol. 1, AU sec. 326])
 - *Audit Risk and Materiality in Conducting an Audit* (which would supersede SAS No. 47 of the same name)
 - *Planning and Supervision* (which would supersede SAS No. 22 of the same name [AICPA, *Professional Standards*, vol. 1, AU sec. 311])
 - New SASs titled *Understanding the Entity and Its Environment and Assessing the Risk of Material Misstatement* and *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (which together would supersede SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* [AICPA, *Professional Standards*, vol. 1, AU secs. 313 and 334], and SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 319])
 - An amendment to SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350).
- *Proposed SAS, Sarbanes-Oxley Omnibus.* This proposed standard includes amendments to various standards to reflect certain provisions of the Sarbanes-Oxley Act of 2002 and the final SEC rules titled *Retention of Records Relevant to Audits and Reviews* and *Strengthening the Commission's Requirements Regarding Auditor Independence*. Although many of the revisions would only apply to SEC engagements, for example, requirements for a review by a reviewing partner of financial statements for SEC engagements and for the required reporting on internal control over financial reporting (see the related discussion in the following bulleted item), there are other proposed changes that would affect governmental audits. For example, the statement would amend SAS No. 96, *Audit Documentation*

(AICPA, *Professional Standards*, vol. 1, AU sec. 339), to require that certain audit documentation be retained for a period of seven years from the end of the audit or review period. This standard also would amend SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), to establish a definition of an audit committee and to revise certain existing communication requirements or add new requirements.

- *Proposed SASs and SSAE related to reporting on internal control.* The Sarbanes-Oxley Act of 2002 requires that auditors of public company financial statements also report on the effectiveness of management's internal control over financial reporting. The proposed SASs titled *Auditing an Entity's Internal Control Over Financial Reporting in Conjunction With Financial Statement Audit* and *Amendment to SAS No. 100, Interim Reporting*, and the proposed SSAE titled *Reporting on an Entity's Internal Control Over Financial Reporting* (which will supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Standards: Revision and Recodification* [AICPA, *Professional Standards*, vol. 1, AT sec. 501], as amended), establish standards and provide guidance to auditors in fulfilling that responsibility. Currently there is no similar requirement for an auditor to report on the effectiveness of a government's internal control over financial reporting. However, the proposed SSAE, when finalized, would be guidance for an auditor of a state or local government entity if he or she were engaged to provide such assurance on controls.
- *Proposed SAS related to communicating internal control matters.* This SAS, titled *Communication of Internal Control Related Matters Noted in an Audit*, would supersede SAS No. 60 of the same name (AICPA, *Professional Standards*, vol. 1, AU sec. 325). It establishes and provides guidance to enhance the auditor communication responsibility to the audit committee (or its equivalent) concerning significant deficiencies and material weaknesses in internal control noted in a financial statement audit. One result of this proposed standard is that the term *reportable condition* would be replaced by the term *significant deficiency*. If the standards are finalized as proposed, this would result in possible future report wording changes in audits of state and local governments (for example, in the reporting required under *Government Auditing Standards*).

Help Desk—For information about the current status of these proposed standards, go to the AICPA Web site at www.aicpa.org/members/div/auditstd/drafts.htm.

Focus on Fraud

.33 Recent news in corporate America has revealed fraud-related events in several major industries. The effects of fraud can extend well beyond these specific industry boundaries to affect many types of entities, including governments. Preparers and auditors of state and local government entities' financial statements should make sure that they are aware of fraud factors and their related risks as they plan and conduct their engagements.

.34 The AICPA has taken an active role, as noted in the following endeavors, in responding to the news of recent fraud events, both independently and in conjunction with other organizations. While this section is not all-encompassing, it identifies the types of activities surrounding fraud information that you can consider.

Help Desk—For more information on fraud and fraud-related resources, see the AICPA Web site at www.aicpa.org/antifraud/additional_info.asp.

Issuance of SAS No. 99

.35 The AICPA's issuance of SAS No. 99, discussed previously in this section of the Alert, was a pivotal step in providing standards and guidance for auditors in detecting material fraud. However, the story does not stop there. The fight against fraud is not just the external auditor's responsibility. Rather, other key players in this focus on fraud include internal auditors, management, governing and other boards, audit committees, and employees.

.36 The issuance of this far-reaching standard heightens efforts in the battle against fraud by providing additional standards and guidance that extends beyond its predecessor, SAS No. 82 (of the same name). It also provides examples of conditions that are conducive to fraud risk, among other matters. Consider the following information, for example.

.37 There are two types of misstatements relevant to the auditor's consideration of fraud in a financial statement audit:

- Misstatements arising from fraudulent financial reporting.
- Misstatements arising from misappropriation of assets.

.38 SAS No. 99 highlights three conditions that are generally present when fraud occurs. However, this does not mean that whenever these conditions are present, there is likely to be fraud or, on the other hand, that if any of these conditions is not present, that fraud is not likely to occur. Your professional judgment is important when assessing any entity for the possibility of fraud, as it is in numerous other audit matters.

.39 For each fraud-related condition included here, we present related examples that apply more specifically to the state and local government environment. These conditions include the following:

- *Incentives/pressures.* First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Examples might include expectations of laws or regulations that will limit resources, anticipated funding cuts for the entity, public pressures to provide more services with fewer dollars, declining property or other tax base, entity investment values that have been negatively affected by the market, the use of complex or "innovative" financing mechanisms, and insufficient cash flows to cover expenditures, to name a few.
- *Opportunities.* Second, circumstances exist—for instance, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an opportunity for a fraud to be perpetrated. Examples of opportunities include the governing board accepts management's recommendations and actions without query or debate; the entity is subject to complex or frequently changing accounting requirements; the entity makes excessive use of separate funds, internal service funds, or interfund and internal activity; the budget is not prepared by the appropriate level of management or is prepared without input of those who understand the budgetary aspects of the entity's activities; or the entity awards financially significant contracts without competitive bids or without due consideration of vendor qualifications.
- *Attitudes/rationalizations.* Third, those involved are able to rationalize committing a fraudulent act. Examples include a governing board that displays significant disregard for regulatory, legal, or oversight requirements or other regulatory authorities; management that exhibits an attitude that funds must be spent on a "use or lose" basis in order to sustain future funding levels; or management that fails to effectively follow up on questions about financial position, financial performance, or budget variances.

.40 Among its many topics, the SAS includes sections addressing a description and characteristics of fraud; the importance of exercising professional skepticism; the importance of discussions among engagement personnel regarding risks of material misstatement due to fraud; the need to obtain information required to identify risks of material misstatement due to fraud; the identification of risks that may result in a material misstatement due to fraud; the assessment of identified risks, after taking into account an evaluation of the entity's programs and controls that address the risks; responses to the results of the assessment; evaluation of audit evidence; communication about possible fraud to management, the audit committee, and others; and documentation of the auditor's considerations of fraud.

Help Desk—For a more complete summary of information of SAS No. 99, please see the AICPA Web site at www.aicpa.org and click on Audit and Attest Standards, then Technical

Activities and Publications, and then Summary of Recently Issued Standards. See also the AICPA Audit and Accounting Guides *Audits of State and Local Governmental Units (Non-GASB 34 Edition)*, and *Audits of State and Local Governments (GASB 34 Edition)*, which have both been updated to reflect the provisions of SAS No. 99.

AICPA's Antifraud and Corporate Responsibility Resource Center

.41 In the quest for combatting fraud, you might find the tools and information you need online, in the AICPA's Antifraud and Corporate Responsibility Resource Center (www.aicpa.org/antifraud/). The Center allows you to select optional ways to learn about fraud as it relates to you and to learn about the topic itself. As of this writing, spotlights are on the new Web-based fraud and ethics case studies and commentaries recently issued; the AICPA antifraud Web cast series; the interactive CPA course *Fraud and the CPA*; and a competency model that allows you to assess your overall skills and proficiencies as they relate to fraud prevention, detection, and investigation; among other topics. In addition, the site offers press releases and newsworthy items on other AICPA courses related to prevention and detection and an overview of the AICPA Antifraud and Corporate Responsibility Program.

Help Desk—To find out more about fraud-related topics, go to the AICPA Web site at www.aicpa.org, click on Antifraud Resource Center, and begin exploring.

Other Fraud-Related Tools

.42 We discuss the AICPA's Practice Aid *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* in the later section of this Alert titled "AICPA Issues Three Practice Aids Relevant to State and Local Governments." The fraud detection Practice Aid, which includes guidance specifically related to audits of state and local governments, should prove to be a big help as you plan and prepare for your audits.

.43 The AICPA's Fraud Task Force of the Auditing Standards Board has also issued the document, "Management Antifraud Programs and Controls: Guidance to Help Prevent, Deter, and Detect Fraud," which appears as an exhibit to SAS No. 99. Issued jointly by the AICPA and other organizations focusing on fraud, the document, among other things, identifies measures entities can implement to prevent, deter, and detect fraud.

Help Desk—To obtain a copy of SAS No. 99, which includes the exhibit mentioned here, contact AICPA's Member Services at (888) 777-7077 and ask for product number 060701kk. The exhibit is also available on the AICPA's Web site at www.aicpa.org (click on Audit and Attest Standards and then on Technical Activities and Publications).

2003 Conforming Changes to Audit and Accounting Guides

State and Local Government Guides

.44 We have updated the AICPA's Audit and Accounting Guides *Audits of State and Local Governmental Units (Non-GASB 34 Edition)*, and *Audits of State and Local Governments (GASB 34 Edition)*, for conforming changes as of May 1, 2003. Appendixes in each Guide detail all changes. We made revisions for or added information alerting auditors to the issuance or effective dates of (1) SASs through SAS No. 101; (2) Ethics Interpretation 101-10, "The Effect on Independence of Relationships With Entities Included in the Governmental Financial Statements," of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.12); (3) *Government Auditing Standards* Amendment No. 3, *Independence*, and the recent overhaul to *Government Auditing Standards* issued by the General Accounting Office (GAO) (see the discussion of these new standards in the section of this Alert titled "Government Auditing Standards Developments"); (4) GASB Statements No. 39 through No. 41; (5) the GASB's Technical Bulletin 2003-1, *Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets*; and (6) the GASB staff's *Comprehensive Implementation Guide—2003* (issued in May 2003). We also revised the Guides:

- To reflect the issuance of the new AICPA Audit Guide *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*, which contains the guidance on audits in accordance with *Government Auditing Standards* (1994 edition, as amended) and U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, that previously was in Statement of Position (SOP) 98-3 of the same name as the new Guide. (See the discussion of the new Guide in this section of this Alert titled “Issuance of New AICPA Audit Guide for Performing OMB Circular A-133 Audits.”)
- To add a new auditor’s report to the GASB 34 Audit Guide to illustrate a situation with multiple opinion modifications, including an adverse opinion when a major fund is not included in the financial statements.
- To add a new appendix to the GASB 34 Audit Guide that provides an expanded contents listing, including all headings, tables, and examples, in alphabetical order, by chapter, to help users locate topics of choice.

Help Desk—For copies of the *Non-GASB 34 Audit Guide* (product no. 012563kk) and the *GASB 34 Audit Guide* (product no. 012663kk) (both with conforming changes through May 1, 2003), call AICPA Member Services at (888) 777-7077 to order your copy. Also see the “References for Additional Guidance” section later in this Alert.

Health Care Organizations

.45 The Audit and Accounting Guide *Health Care Organizations*, has been updated with conforming changes as of January 1, 2003, to reflect the issuance of GASB Statement No. 34 and related pronouncements. Because they are not yet effective for certain governmental health care entities, the provisions of GASB Statement No. 34 and related pronouncements concerning governmental health care entities that are included in the scope of the Guide are discussed in a new Appendix F to the Guide. Illustrative management’s discussion and analysis, basic financial statements, and notes to financial statements prepared in conformity with GASB Statement No. 34 and related pronouncements are also provided in the new Appendix F to the Guide.

Help Desk—For copies of the *Health Care Organizations* Guide, contact Member Services at (888) 777-7077 and ask for product number 012613kk.

Effect of Adopting GASB Statement No. 34 on Auditors’ Reports

.46 The adoption of GASB Statement No. 34 constitutes a change in accounting principles that, unless immaterial, will require the auditor’s report to include an explanatory paragraph regarding consistency. Such a paragraph could read “As described in Note X, the City has implemented a new financial reporting model as required by the provisions of GASB Statement No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*, as of June 30, 20X1.”

AICPA Issues Three Practice Aids Relevant to State and Local Governments

Auditing Governmental Financial Statements: Programs and Other Practice Aids

.47 This Practice Aid (scheduled for issuance in fall 2003) is a nonauthoritative companion to the AICPA Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*, and will address GAAS audits of financial statements prepared in conformity with GASB Statement No. 34. Organized using the same sequencing as the GASB 34 Guide, this publication will primarily comprise illustrative audit programs and other practice aids, such as an engagement letter, a management representation letter, and deposit and investment confirmations. The Practice Aid also will have a case study on selecting, evaluating the results of, and reporting on opinion units.

Help Desk—Watch future issues of the CPA Letter for the status of this upcoming Practice Aid. You can also periodically check the CPA2Biz Web site at www.cpa2biz.com.

Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide

.48 With fraud appearing so frequently in recent news about corporate, employee, and even auditor misdeeds, the AICPA has issued this nonauthoritative guidance to provide CPAs with information related to implementing SAS No. 99. Topics relate to a full spectrum of fraud-related matters, including, for example, understanding SAS No. 99 and its implications and computer-assisted audit techniques. The Practice Aid also features industry-specific conditions, including those in a state and local governmental environment that may indicate the presence of fraud.

Help Desk—You can obtain this convenient reference by contacting AICPA Member Services at (888) 777-7077 and asking for product no. 006613kk.

Applying OCBOA in State and Local Governmental Financial Statements

.49 A significant number of the more than 87,000 state and local governments prepare their financial statements using an other comprehensive basis of accounting (OCBOA), as defined in SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623.04). With issuance of GASB Statement No. 34, questions have developed regarding the applicability of those financial reporting requirements to OCBOA financial statements. This nonauthoritative Practice Aid provides guidance in preparing OCBOA financial statements of state and local governments and also for the appropriate auditor reporting on those financial statements in accordance with SAS No. 62 and the AICPA Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition).

Help Desk—You can obtain this convenient reference (expected to be published by the end of August) by contacting AICPA Member Services at (888) 777-7077 and asking for product no. 006614kk. For additional guidance on both preparing and auditor reporting on OCBOA financial statements, also check SAS No. 62 and chapter 15 of the AICPA Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition).

Issuance of New AICPA Audit Guide for Performing OMB Circular A-133 Audits

.50 This new Audit Guide titled *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*, is the former Statement of Position (SOP) 98-3 of the same name. Until this year, that guidance had been included as an SOP in an appendix to both the GASB 34 and non-GASB 34 editions of the AICPA's state and local government Audit and Accounting Guides and in the not-for-profit organizations Audit and Accounting Guide. The AICPA ASB decided to convert the SOP into an AICPA Audit Guide because the content and guidance in the SOP are more similar to that which would be included in an Audit Guide and also to make it more clear that, like other AICPA Audit Guides, it is updated each year for conforming changes. The new Guide does not supersede the guidance that appeared in SOP 98-3 but rather changes its format from an SOP to an Audit Guide. It is now one of the AICPA's primary sources of authoritative guidance for performing audits under the Single Audit Act Amendments of 1996; OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*; and *Government Auditing Standards* (see the discussion in the following section regarding a new related nonauthoritative Audit Risk Alert).

.51 Under SAS No. 95, this Audit Guide is considered an Interpretive Publication. Interpretive Publications are recommendations on the application of SASs in specific circumstances, including engagements for entities in specialized industries. If you do not apply the auditing guidance included in an applicable Interpretive Publication, you should be prepared to explain how you complied with the SAS provisions addressed by such auditing.

.52 Each year since 1998, AICPA staff has updated the SOP and, in its new form as a separate guide, this year is no different. Updates for this Guide include conforming changes related to recent auditing standards through SAS No. 101, *Auditing Fair Value Measurements and Disclosures*, and other changes in guidance, for example, changes resulting from recently adopted Amendment No. 3, "Independence," to *Government Auditing Standards* and the AICPA's Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition).

Help Desk—The product number for the new Audit Guide *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards* is 012743kk. To place your order for this Guide, you can call AICPA Member Services at (888) 777-7077. Also see the "References for Additional Guidance" section later in this Alert.

Single Audit Risk Alert

.53 You may have grown accustomed in previous years to looking to this Audit Risk Alert, as well as the Alert on not-for-profit organizations (NPOs), for the latest developments on audits of federal awards (also known as single audits or Circular A-133 audits). This is the first year that such guidance will not be included in this Alert and the NPO Alert. Instead, because of the importance of this topic, the guidance will be included in the separate annual Audit Risk Alert, titled *Single Audits* [AAM section 8220]. The Single Audit Alert will provide auditors of organizations receiving federal awards with an overview of recent industry, regulatory, and professional developments that may affect the audits they perform. If you perform single audits, you should consider obtaining a copy of the Single Audit Alert. Also note that this State and Local Governmental Alert will continue to provide updates on Government Auditing Standards as many audits of state and local government financial statements are required to be performed under those standards, regardless of whether the entity receives federal money (see the discussion later in this section on *Government Auditing Standards* developments).

Help Desk—The product number for the Audit Risk Alert, *Single Audits—2003* [AAM section 8220] is 022453kk. To place your order for the Alert, you can call the AICPA at (888) 777-7077. Also see the "References for Additional Guidance" section later in this Alert.

AICPA Ethics-Related Standards

Revision of Interpretation 101-10

.54 Ethics Interpretation No. 101-10, "The Effect on Independence of Relationships With Entities Included in the Governmental Financial Statements," of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.12), discusses the effect on an auditor's independence of relationships with entities included in governmental financial statements. The AICPA issued a revision of this interpretation (effective March 2003) that reflects new wording related to changes resulting from issuance of GASB Statement No. 34. In addition, certain changes were made to the Interpretation to conform it to the AICPA's new independence rules that were issued in November 2001 (that is, engagement-team focused approach to independence). Finally, the revision changes the focus of the Interpretation, which had been based on the commercial model concept of *financial control* to an *accountability* focus, which is more consistent with the government reporting model.

Help Desk—You can find the revision to the Interpretation in the March 2003 issue of the AICPA's *Journal of Accountancy*. You can access the *Journal's* Web site at www.aicpa.org/pubs/jofa/joahome.htm.

Revisions to Rule 101—Independence for Nonattest Services

.55 In June 2003, the AICPA's Professional Ethics Executive Committee issued revisions to Interpretation No. 101-3, "Performance of Other Services," of ET section 101, *Independence* (AICPA, *Professional Standards*,

vol. 2, ET sec. 101.05), and deleted Interpretation No. 101-13, “Extended Audit Services,” of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.15), and related Ethics Rulings. In the area of nonattest services, the Committee adopted several new requirements, including those that would require members to:

- Comply with regulations of certain regulatory bodies (such as the state boards of accountancy, the SEC, and the GAO) when performing services for attest clients that are governed by such regulators’ independence rules
- Assess the client’s willingness and ability to oversee permitted nonattest services
- Document various aspects of the permitted nonattest services engagement prior to performing nonattest services

In addition, the committee adopted more restrictive rules for certain services:

- Performing appraisal, valuation, and actuarial services would impair independence if the results of the service will be material to the client’s financial statements and if the services involve a significant degree of subjectivity.
- Performing certain financial information systems design and implementation services would impair independence in certain circumstances.

.56 The committee also clarified existing rules for bookkeeping and internal audit assistance services and proposed an increase in the allowable balance that individuals subject to independence restrictions could have through credit cards and cash advance accounts.

.57 The rule revisions will become effective on September 30, 2003.

Help Desk—To access related information, go to the AICPA Web site at www.aicpa.org/members/ethics.

Government Auditing Standards Developments

.58 Certain laws, regulations, and contracts require auditors to follow *Government Auditing Standards* (also known as the Yellow Book) promulgated by the Comptroller General of the United States. For example, some states require that all local governments’ financial statements be audited in accordance with GAAS and *Government Auditing Standards*. If you are performing a financial statement audit of a state or local government under *Government Auditing Standards*, you should be aware of a number of recent revisions that have been made to the standards.

Independence

.59 In a GAAS audit, auditors must comply with the AICPA’s independence rules included in the AICPA Code of Professional Conduct. For audits performed under *Government Auditing Standards*, auditors and audit organizations are subject to additional independence rules that are in some cases very similar to the AICPA independence rules and in other cases are more restrictive. Amendment No. 3, *Independence*, to *Government Auditing Standards* establishes the additional independence rules under *Government Auditing Standards*. The GAO also has issued a question and answer document titled *Answers to Independence Standard Questions*, which responds to questions related to the independence standard’s implementation time frame, underlying concepts, and application in specific nonaudit circumstances. Amendment No. 3, as affected by *Government Auditing Standards: Answers to Independence Questions*, revises the independence standards in *Government Auditing Standards* for audits for periods beginning on or after January 1, 2003, with early implementation encouraged. The independence rules in *Government Auditing Standards* address when auditors and their organizations are independent from the organizations they audit by defining when personal, external, and organizational impairments to independence exist. If an audit organization is not

independent, *Government Auditing Standards* states that the auditor should (1) decline to perform the work or (2) report the impairment in the scope section of the auditor's report when a government auditor cannot decline to perform the work because of a legislative requirement or for other reasons.

.60 *Government Auditing Standards* adopts an engagement-team focused approach to independence for matters such as financial interests of an individual auditor, not unlike the AICPA's Code of Professional Conduct. It also provides criteria for when governmental audit organizations are organizationally independent from the audited entity for purposes of external and internal reporting. *Government Auditing Standards* employs a principles-based approach to independence supplemented with certain safeguards for matters such as the performance of nonaudit services. With respect to nonaudit services, the *Government Auditing Standards* rules are generally more restrictive than the AICPA rules (see the discussion of recent proposed revisions to the AICPA rules in the section of this Alert titled "AICPA Ethics-Related Standards"). In planning the audit, the auditor should consider the effects of any nonaudit services performed on the auditor's independence for current, future, and planned audit services.

.61 To comply with the provisions governing nonaudit services, audit organizations must meet two overarching principles. The first bars audit organizations from performing management functions or making management decisions for their clients; the second prohibits audit organizations from auditing their own work or providing nonaudit services when the services are material or significant to the subject matter of the audit. If a nonaudit service does not conflict with either principle, an audit organization may perform the service as long as it complies with each of the following safeguards (see paragraph 3.25 of *Government Auditing Standards* for a more detailed description of the safeguards):

- Personnel providing the nonaudit service cannot plan, conduct, or review audit work related to the nonaudit service. Audit and nonaudit work must be performed by separate engagement teams. (When an audit organization provides 40 or fewer hours of nonaudit services related to a specific audit engagement, this safeguard requiring separate engagement teams is waived but the auditors must observe the two overarching principles and other safeguards described in this paragraph.)
- The scope and extent of audit work cannot be reduced beyond the level that would be appropriate if the nonaudit work were performed by an unrelated party.
- The audit organization should document its consideration of the nonaudit service, including its rationale that providing the service does not violate the two overarching principles.
- The audit organization should establish and document an understanding with management regarding the objectives, scope of work, and deliverables of the nonaudit service, including an understanding that management is responsible for the results of the service.
- The audit organization's quality control system should include policies and procedures that ensure consideration of the effect of the nonaudit service on ongoing, planned, and future audits.
- Where a nonaudit service is deemed to conflict with the audit (because the service violates one or both of the overarching principles), the audit organization should communicate to management—before beginning the nonaudit service engagement—that it will be unable to perform subsequent audit work related to the subject matter of the nonaudit service.
- For audits selected during peer review, the audit organization should identify to its peer reviewer all related nonaudit services and provide all related audit documentation.

.62 *Government Auditing Standards* describe both nonaudit services that are expressly prohibited and others that are permissible (as long as the auditor complies with the two overarching principles and all required safeguards noted above). The standards also state that audit organizations can perform routine activities for the audited entity and management without impairing their independence—provided the audit organization neither makes management decisions nor performs management functions. Such ordinary services do not violate the overarching principles and are not subject to the safeguards.

Overhaul to Remaining Sections of Government Auditing Standards

.63 Other changes are in the works for *Government Auditing Standards*. The GAO issued a comprehensive revision to *Government Auditing Standards* on June 25, 2003. This is the fourth revision of the overall standards since they were first issued in 1972. This revision of the standards supersedes the 1994 revision, including Amendments No. 1 through No. 3 (note that the content of these Amendments was incorporated into the revision).

.64 The revision affects all chapters of the Yellow Book, including those relating to both financial and performance audits. Among other things, the proposed changes are intended to clarify the types of audits and services that are performed under the Yellow Book, strengthen and streamline certain provisions of it, and improve understandability of the standards. The revisions are effective for financial audits and attestation engagements of periods ending on or after January 1, 2004, and for performance audits beginning on or after January 1, 2004. Early application is permissible. Some of the more significant changes are that the revision:

- Adds a new chapter on attestation engagements that includes additional field work and reporting standards over and above what would be required under the AICPA's attestation standards.
- Requires that auditors collectively possess the technical knowledge, skills, and experience necessary to be competent for the type of work being performed before beginning the work on the assignment.
- Clarifies that the 80 hours of continuing professional education and training that is required under the Yellow Book every two years should directly enhance the auditor's professional proficiency to perform audits and/or attestation engagements. During the next year, the GAO is expected to modify its existing *Interpretation of Continuing Education and Training Requirements—Government Auditing Standards* (see the related discussion in the section of this Alert titled "References for Additional Guidance") to more specifically address this new clarification and whether certain courses (for example, those related to taxation) would count toward the 80-hour requirement.
- For financial statement audits, adds a requirement for auditors to be alert to situations or transactions that could indicate abuse, and if indications of abuse exist that could significantly affect the financial statement amounts or other financial data, to apply audit procedures specifically directed to ascertain whether abuse has occurred and the effect on the financial statement amounts or other financial data.

Help Desk—You can obtain the new 2003 version of *Government Auditing Standards* (which includes the independence requirements from Amendment No. 3), the independence question and answer document, and a summary of the significant changes made since the 1994 revision of the standards from the GAO Web site at www.gao.gov/govaud/ybk01.htm.

Common Engagement Deficiencies

.65 Following are some common deficiencies noted on governmental financial statement audits found during recent peer reviews and AICPA Professional Ethics Division investigations of CPA firms. This list continues to include some of the deficiencies identified in past Alerts, indicating problems with the same matters. You should consider reviewing your firm's policies and procedures to see whether your governmental engagements also might have these kinds of issues.

- The auditor used inadequate or outdated reference materials related to the engagement performed.
- GAAP requirements for the classification, accounting, and reporting for particular funds and for disclosures were not followed.
- In some cases the auditor's report was not qualified for GAAP departures.
- The auditor's consideration of the entity's internal control was inadequately documented.

- *Government Auditing Standards'* continuing professional education and audit documentation requirements were not met.
- The required *Government Auditing Standards* reports for internal control or compliance were not prepared or were not referred to in the report on the financial statements.
- The auditor failed to document the subsequent events review.
- The management representation letter did not follow the requirements of SAS No. 85, *Management Representations*, as amended.

Accounting Issues and Developments

GASB Pronouncements, Exposure Drafts, and Additional Projects

GASB Pronouncements on the New Financial Reporting Model

.66 In the past few years, the GASB issued the following pronouncements to develop a new financial reporting model for state and local governments:

- GASB Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*. This is the “core” reporting model standard, which requires both government-wide and fund financial statements. (The GASB staff has issued implementation guidance relating to this Statement, which, as discussed later in this section, has now been updated.)
- GASB Statement No. 35, *Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities*. This Statement extends the applicability of GASB Statement No. 34 to public colleges and universities.
- GASB Statement No. 37, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments: Omnibus*. This Statement amends GASB Statement No. 21, *Accounting for Escheat Property*, and clarifies and modifies certain provisions of GASB Statement No. 34.
- GASB Statement No. 38, *Certain Financial Statement Note Disclosures*. This Statement adds several new disclosures to governmental financial statements.
- GASB Interpretation No. 6, *Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements*. This Interpretation clarifies the modified accrual recognition of certain liabilities and expenditures.

Those reporting model standards started to become effective in 2002. The second phase of implementation—for “medium-sized governments”—takes place for 2003 fiscal year ends but only those with year ends after June 15—a phase two government with a May 31 fiscal year, for example, would implement for May 31, 2004. Even when not yet required, many governments are early implementing the new standards. It is important for you to have a solid working knowledge of those standards. You should consult the 2002 Audit Risk Alert *State and Local Governmental Developments* for a thorough briefing on those standards, including their effective dates. In addition, be sure to review the original pronouncements for a complete understanding of their provisions.

Help Desk—The AICPA continues to make available its Practice Aid *Understanding and Implementing GASB's New Financial Reporting Model: A Question and Answer Guide for Preparers and Auditors of State and Local Governmental Financial Statements* (product no. 022516kk). That Practice Aid will help you and the governments you audit understand the new standards. Call AICPA Member Services at (888) 777-7077 to order your copy.

GASB Statement No. 39

.67 In May 2002, the GASB issued Statement No. 39, *Determining Whether Certain Organizations Are Component Units—An Amendment of GASB Statement No. 14*. The Statement is effective for financial statements

for periods beginning after June 15, 2003, with earlier application encouraged. GASB Statement No. 39 provides guidance to determine whether certain organizations for which the primary government is not financially accountable should be reported as component units based on the nature and significance of their relationship with the primary government. Consult the 2002 Audit Risk Alert *State and Local Governmental Developments* for a thorough briefing on GASB Statement No. 39.

.68 GASB Statement No. 39, paragraph 5, adds paragraph 40(a) to GASB Statement No. 14, *The Financial Reporting Entity*, to provide three criteria that a legally separate, tax-exempt organization should meet to be included as a component unit of a reporting entity. The third criterion is “The economic resources received or held by an *individual organization* that the specific primary government, or its component units, is entitled to, or has the ability to otherwise access, are significant to that primary government.” We have observed a potential practice problem with that criterion—some governments mistakenly believe that GASB Statement No. 39 now provides that “significance” is a criterion for including any component unit. Instead, the “significance” criterion results from the GASB’s expanded development of the provisions of GASB Statement No. 14, paragraph 40. Paragraph 40 requires organizations to be included in a reporting entity when the nature and significance of the organization’s relationship with the primary government are such that exclusion would cause the reporting entity’s financial statements to be misleading or incomplete. The “significance” criterion in new paragraph 40(a) applies only to the legally separate, tax-exempt organizations that meet the other two criteria in that paragraph. As discussed in paragraph 30 of the Basis for Conclusions of GASB Statement No. 39, “significance” constitutes a higher threshold for inclusion than is provided for component units that meet GASB Statement No. 14’s financial accountability criterion. Governments should continue to include component units for which they are financially accountable in their financial reporting entity based on materiality, not significance.

GASB Statement No. 40

.69 In March 2003, the GASB issued its Statement No. 40, *Deposit and Investment Risk Disclosures, an amendment of GASB Statement No. 3*. The Statement requires specific disclosures for credit risk, concentration of credit risk, interest rate risk, and foreign currency risk. It also modifies GASB Statement No. 3, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, in part, to limit the required disclosure of custodial credit risk to “category 3” deposits and investments. GASB Statement No. 40 is effective for financial statements for periods beginning after June 15, 2004, with earlier application encouraged.

GASB Statement No. 41

.70 Issued in May 2003, GASB Statement No. 41, *Budgetary Comparison Schedule—Perspective Differences*, clarifies the requirements in GASB Statement No. 34 for reporting budgetary comparison information. The statement applies to governments with budgetary structures (certain program-based budgets, for example) that prevent them from presenting budgetary comparison information for their general and major special revenue funds, as required by GASB Statement No. 34. GASB Statement No. 41 requires those governments to present budgetary comparison schedules as required supplementary information (RSI) based on the fund, organization, or program structure that it uses for its legally adopted budgets. Those presentations may not be displayed as basic financial statements. GASB Statement No. 41 is effective simultaneously with GASB Statement No. 34. For governments that already have implemented GASB Statement No. 34, the Statement is effective immediately—for periods beginning after June 15, 2002.

GASB Exposure Drafts of Proposed Statements

.71 The GASB has these outstanding exposure drafts (EDs) of proposed Statements that it plans to finalize before the end of 2003:

- *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries*. This ED proposes accounting and reporting guidance for (1) recognizing losses and for writing off a portion

of historical cost for the impairment of capital assets and (2) all insurance recoveries (not just those associated with impairment of capital assets). Its proposed effective date is for financial statements for periods beginning after December 15, 2004, with earlier application encouraged.

- *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions* and the related *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*. These EDs propose standards for how employers and plans should report postemployment health care, as well as other forms of postemployment benefits (for example, life insurance) when provided separately from a pension plan. The GASB also issued a companion plain language supplement to these EDs, *Other Postemployment Benefits*. The GASB proposed that the employer ED become effective in three annual phases (using the same dollar cutoffs as was done with GASB Statement No. 34) starting for periods beginning after June 15, 2006. The GASB proposed that the plan ED become effective one year before the effective date of the related Statement for the employer in single-employer plans or for the largest participating employer in multiple-employer plans. For both EDs, earlier application would be encouraged.

GASB Technical Bulletin

.72 In June 2003, the GASB staff issued Technical Bulletin (TB) 2003-1, *Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets*, to supersede GASB Technical Bulletin No. 94-1, *Disclosures about Derivatives and Similar Debt and Investment Transactions*. The TB applies to derivatives that are not reported at fair value on the statement of net assets. It provides an updated definition of derivatives and also provides disclosure requirements for the government's objective for entering into the derivative and the derivative's terms, fair value, associated debt, and risk exposures. The TB also discusses acceptable methods for determining fair value. It is effective for financial statements for periods ending after June 15, 2003, with earlier application encouraged.

Comprehensive Implementation Guide

.73 The GASB staff issued the *Comprehensive Implementation Guide—2003* in May 2003. The guide combines the staff's previous eight implementation guides and revises their content for new pronouncements, especially GASB Statement No. 34 and its related pronouncements, that changed answers to certain questions and/or made the questions moot. Some new questions, not addressed in the original guides, have also been answered. The GASB staff plans to update the *Comprehensive Implementation Guide* annually.

Additional GASB Projects and Publications

.74 GASB projects that may see EDs of proposed accounting and financial reporting standards released in the remainder of 2003 and in 2004 include (1) derivatives and hedging, (2) certain economic condition reporting issues (primarily relating to statistical information), (3) pollution remediation obligations, and (4) net assets/fund balance. EDs of proposed TBs are also expected on termination benefits and tobacco settlement issues.

.75 The GASB also has identified several financial reporting issues as potential long-term research and monitoring projects: (1) additional economic condition reporting issues, (2) fiduciary responsibilities, (3) service efforts and accomplishments (performance measurement), (4) the preservation method for infrastructure assets, and (5) electronic financial reporting.

.76 In July 2002, the GASB issued *Report on the GASB Citizen Discussion Groups on Performance Reporting*. That research report, funded by a grant from the Sloan Foundation, summarizes the results of meetings held to obtain information about users' experiences with, and perceptions of, performance measures.

Help Desk—If you are interested in tracking the progress of the GASB's projects, look at the GASB Web site at www.gasb.org. You can obtain a free copy of the research report from the GASB through its Web site.

GASB Statement No. 34 Implementation Issues

.77 Although implementing GASB Statement No. 34 and its related pronouncements can be challenging, many preparers found the process less difficult than they expected, provided they gave it appropriate planning and research. One important step is to learn from the experience of others. Following are some of the difficulties we have noted in the implementation process, including a reference to the GASB standard that provides guidance, where applicable:

- The MD&A contains subjective language or discussions that go beyond the required topics (GASB Statement No. 34, paragraph 4 and paragraph 11, as amended by GASB Statement No. 37, paragraph 4).
- The fund level discussion in MD&A focuses on totals of fund types rather than individual funds (GASB Statement No. 34, paragraph 11(d)).
- The MD&A does not address both years presented in two-year comparative financial statements (GASB *Comprehensive Implementation Guide—2003*, item 7.14).
- Special purpose governments mistakenly believe they are not required to present an MD&A (GASB Statement No. 34, paragraphs 135 through 141).
- Restricted assets and restricted net assets are not appropriately determined. Specifically, governing board resolutions and annual appropriations bills do not create restrictions (GASB Statement No. 34, paragraph 34).
- Some governments have not developed a separate definition of *available* for governmental fund recognition that is appropriate to the timing of cash receipts for their expenditure-driven grant revenues. (Note that GASB standards do not require the same “availability” time period for every type of revenue.)
- Fiduciary fund financial statements present individual funds rather than fund types (GASB 34, paragraph 106).
- Some hospitals, utilities, and other business-type activities are continuing to use financial statement presentations that are similar to those used by their private-sector counterparts, rather than those required by GASB Statement No. 34 (GASB Statement No. 34, paragraphs 95 through 105).
- Some governments are finding that they have misapplied accounting and financial reporting principles unrelated to GASB Statement No. 34 in the past.
- Note disclosures do not focus on governmental activities, business-type activities, major funds, and nonmajor funds in the aggregate (GASB Statement No. 34, paragraph 113).
- Segment disclosures include activities that do not meet the definition of *segments* (GASB 34, paragraph 122, as amended by GASB Statement No. 37, paragraph 17).
- When the budgetary comparison schedules are presented as required supplementary information (RSI), some governments make related disclosures in the notes to the financial statements rather than in the notes to RSI (GASB Statement No. 34, paragraph 131, as amended by GASB Statement No. 37, paragraph 19).

.78 We also have received numerous questions, often referred to us by the GASB staff, asking whether GAAP-based fund and departmental financial statements are required to include an MD&A. Neither GASB standards, which do not address such financial statements, nor the AICPA Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*, which addresses only auditor reporting on those presentations, directly answer this question.

.79 Long-established practice for presenting GAAP-based fund and departmental financial statements dictates that those presentations should apply all relevant GAAP standards. For example, a GAAP-based

fund financial statement includes relevant GAAP-required note disclosures. GASB Statement No. 34 requires the presentation of an MD&A. That is a GAAP standard. To us, it logically follows that GAAP-based fund and departmental financial statements should present an MD&A, presenting the topics in GASB Statement No. 34, paragraph 11, that are relevant to the presentation.

References for Additional Guidance

AICPA

Web Site

.80 AICPA Online (www.aicpa.org) is the AICPA's Web site on the Internet. The site offers users the opportunity to stay abreast of developments in accounting, auditing, and professional ethics. Online resources include professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, exposure drafts, and a list of links to other accounting- and finance-related sites. The AICPA Web site also features a "Talk to Us" section, allowing users to send e-mail messages directly to AICPA representatives or teams. The AICPA Web site includes a separate section that deals with Circular A-133 audit issues, including a document that provides unofficial answers to frequently asked questions, at www.aicpa.org/belt/a133main.htm.

Order Department (Customer Service Center)

.81 To order AICPA products, call the Customer Service Center at (888) 777-7077 or fax to (800) 362-5066. The best times to call are 8:30 a.m. to 11:30 a.m. and 2:00 p.m. to 7:30 p.m., Eastern Standard Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Publications

.82 The following AICPA publications may be of interest to auditors of state and local governments.

- Audit and Accounting Guide *Audits of State and Local Governmental Units (Non-GASB 34 Edition)* (product no. 012563kk)
- Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)* (product no. 012663kk)
- Audit and Accounting Guide *Health Care Organizations* (product no. 012613kk)
- Audit and Accounting Guide *Audits of Property and Liability Insurance Companies* (product no. 012673kk)
- SOP 98-2, *Accounting for Costs of Activities of Not-for-Profit Organizations and State and Local Governmental Entities That Include Fund Raising* (product no. 014887kk)—This SOP is an appendix to the two Audit and Accounting Guides for state and local governments (see previous bullets) and the Audit and Accounting Guide *Not-for-Profit Organizations* (product no. 012643kk). The SOP also is included in *AICPA Technical Practice Aids* (product no. 005142kk).
- *Understanding and Implementing GASB's New Financial Reporting Model: A Question and Answer Guide for Preparers and Auditors of State and Local Governmental Financial Statements, Revised Edition* (product no. 022516kk)—This publication provides a summary of the significant portions of GASB Statement No. 34 and related GASB publications in a question-and-answer format.
- *Checklists and Illustrative Financial Statements for State and Local Governments (Non-GASB 34 Edition and GASB 34 Edition)* (product no. 009033kk)—Updated annually, this publication provides checklists and illustrations of financial statements, note disclosures, and auditors' reports, including reports in accordance with *Government Auditing Standards* and the Single Audit Act Amendments of 1996. Note: This volume includes both the Non-GASB 34 and GASB 34 editions of the checklists in one handy binder.

- *Audit and Accounting Manual* (product no. 005133kk)—Updated annually, this publication has an extensive section of internal control questionnaires and audit programs for audits of governmental entities, including audits in accordance with the Single Audit Act Amendments of 1996.

Continuing Professional Education Courses

.83 The AICPA offers continuing professional education (CPE) in the form of both group-study and self-study courses, and in print and video format.

.84 Group-study courses include the following:

- Advanced Auditing of HUD-Assisted Projects
- Applying A-133 to Nonprofit and Governmental Organizations
- Audits of HUD-Assisted Projects
- Extra-Strength GASB No. 34
- In GASB We Trust: Foundations in Governmental Accounting
- GASB No. 34 Auditing: The Home of the Brave
- GASB No. 34 Implementation: From Here to There
- GASB No. 34 Infrastructure: How in the GASB Are We Going to Do This?
- Governmental Accounting and Auditing Update
- Governmental and Nonprofit Annual Update
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations
- Workpaper Preparation Techniques for Government and Nonprofit Organizations
- The Revised Yellow Book: *Government Auditing Standards*

.85 Self-study courses include the following:

- Advanced Auditing of HUD-Assisted Projects (product no. 730188kk)
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 730198kk)
- Audits of HUD-Assisted Projects (product no. 730293kk)
- Extra-Strength GASB No. 34 (product no. 731760kk)
- In GASB We Trust: Foundations in Governmental Accounting (product no. 731640kk)
- GASB No. 34 Auditing: The Home of the Brave (product no. 731331kk)
- GASB No. 34 Implementation: From Here to There (product no. 731567kk)
- GASB No. 34 Infrastructure: How in the GASB Are We Going to Do This? (product no. 731562kk)
- Governmental Accounting and Auditing Update (product no. 736472kk)
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations (product no. 734406kk)
- Workpaper Preparation Techniques for Government and Nonprofit Organizations (product no. 732631kk)
- The Revised Yellow Book: *Government Auditing Standards* (product no. 736111kk)

.86 The AICPA also offers the following video courses:

- GASB No. 34 Auditing: The Home of the Brave (product no. 187111kk)
- Governmental Accounting and Auditing Update (product no. 186476kk)
- The Revised Yellow Book: *Government Auditing Standards* (product no. 187101kk)
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 187200kk—available fall 2003)

Online CPE

.87 AICPA InfoBytes, offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. Selected as one of *Accounting Today's* top 100 products for 2003, AICPA InfoBytes now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay \$149 (\$369 nonmembers) for a new subscription and \$119 (\$319 nonmembers) for the annual renewal. Divided into 1- and 2-credit courses that are available 24/7, AICPA InfoBytes offers hundreds of hours of learning in a wide variety of topics. Governmental topics include the Yellow Book, Circular A-133 auditing, GASB Statement No. 34, HUD, industry updates, and other pertinent issues. To register or learn more, visit www.cpa2biz.com/infobytes.

Industry Conference and Training Program

.88 The AICPA will hold its 20th annual National Governmental Accounting and Auditing Update Conference on August 25–27, in Washington, DC, and again on September 21–23, 2003, in Tempe, Arizona. This conference is designed for practitioners; officials working in federal, state, or local governmental finance and accounting; and recipients of federal awards. It is the premier forum for the discussion of important governmental accounting and auditing developments. Participants will receive updates on current issues, practical advice, and timely guidance on recent developments from experts.

.89 The AICPA also offers an annual training program called the National Governmental and Not-for-Profit Training Program. This year's program will be held on October 19–22, in Baltimore, MD. This program is designed for practitioners or accountants, auditors, and other staff in government who want in-depth, hands-on training in government accounting and auditing.

.90 For more information about the conference or the training program, please contact the Customer Service Center at (888) 777-7077 or the Web site for cpa2biz at www.cpa2biz.com.

Accounting and Auditing Technical Hotline

.91 The Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077 or go to the AICPA's Web site at www.aicpa.org.

Ethics Hotline

.92 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Fax Hotline

.93 The AICPA has a 24-hour fax system that enables interested persons to obtain information that includes, for example, current AICPA comment letters, conference brochures and registration forms, CPE information, AcSEC actions, and legislative news. To access the hotline, dial (201) 938-3787 from a fax machine and follow the voice cues.

Governmental Accounting Standards Board

.94 GASB publications can be obtained by calling the GASB Order Department at (800) 748-0659. Publications are also available by mail (P.O. Box 30784, Hartford, CT 06150, payment by check) or on the GASB's Web site at www.gasb.org.

.95 The GASB offers the following publications and services:

- *Codification of Governmental Accounting and Financial Reporting Standards*. The 2003–2004 edition is as of June 30, 2003 and will be available in the fall of 2003.
- *GASB Original Pronouncements*, as of June 30, 2003. An updated edition as of June 30 each year is issued each fall.
- GASB staff document *Comprehensive Implementation Guide—2003*. This document provides guidance on implementing GASB standards and includes the previous eight implementation guides in one publication. Issued in May 2003, this Guide provides, in a question-and-answer format, relevant and helpful GASB 34 implementation guidance.
- *GASB User Guides*. The GASB has published a series of guides to assist different users of government financial statements to understand what information can be found in financial statements prepared using the provisions of GASB Statement No. 34.²
- *GASB Web Site*—Information about the GASB can be found on its Web site, www.gasb.org. The site links to online resources about GASB Statement No. 34. The “What’s New?” section contains the latest news about the GASB and governmental accounting, as well as calendars of GASB meetings, speaking engagements, constituent events, outstanding due process documents, the current-period technical plan, and other frequently requested materials. Other items include “Facts about GASB”; summaries of all final GASB documents and ordering information; a list of board members, staff, and advisory council members with their e-mail addresses; and a technical inquiry system.
- *Performance Measurement for Government Web Site*—The GASB’s second Web site, located at www.seagov.org, is a clearinghouse for information about the development, use, and reporting of performance measures for governments. The site’s main features include a citizens’ guide and links to government performance indicators, studies, reports, government sites, ongoing projects, and several online discussion groups.
- *Fax Information System*—The GASB has a 24-hour fax system that enables interested persons to obtain information on upcoming meetings, the current-period technical plan, and “Facts about GASB.” To access the system, dial (203) 847-0700, ext. 14, from a fax machine, and follow the voice cues.

General Accounting Office

.96 The GAO home page, on the Internet at www.gao.gov, contains links to the hundreds of reports and testimony to the Congress each year on a variety of subjects, including accounting, budgeting, and financial management. Hard copies of GAO reports and testimony can be obtained from the GAO, P.O. Box 37050, Washington, DC 20013; phone (202) 512-6000; fax (202) 512-6061; or www.gao.gov/cgi-bin/ordtab.pl.

.97 GAO’s Web site is updated daily and also includes Comptroller General decisions and legal opinions; GAO policy documents; and special publications. You may subscribe to GAO daily electronic alerts using the form at www.gao.gov/subtest/subscribe.html.

² The Governmental Accounting Standards Board’s user guides are not authoritative pronouncements under the hierarchy of generally accepted accounting principles for governmental entities as provided in Statement on Auditing Standards No. 69, *The Meaning of Present Fairly in Accordance With Generally Accepted Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 411), as amended.

.98 The following publications are available on the GAO Web site at www.gao.gov/govaud/ybk01.htm. The first three publications also are available through the Superintendent of Documents, U.S. Government Printing Office (GPO), P.O. Box 371954, Pittsburgh, PA 15250-7954; phone (202) 512-1800; fax (202) 512-2250; or <http://bookstore.gpo.gov/index.html>.

- *Government Auditing Standards, 2003 Revision*—These standards relate to financial and performance audits of governmental organizations, programs, activities, and functions, and of governmental funds received by contractors, nonprofit organizations, and other nongovernmental organizations. All previous amendments to the previous 1994 Revision of the Yellow Book (that is, Amendments No. 1 through No. 3) have been incorporated into the 2003 Revision. As of the date of this Alert, the 2003 Revision was available electronically only on the GAO Web site. Details on ordering a hard copy print version will be placed on the GAO Web site once the print version is available.
- *Government Auditing Standards: Answers to Independence Questions* responds to questions related to the Yellow Book independence standard's implementation time frame, underlying concepts, and application in specific nonaudit circumstances.
- *Interpretation of Continuing Education and Training Requirements—Government Auditing Standards* establishes specific CPE requirements for auditors working on audits performed in accordance with those standards. This Interpretation guides audit organizations and individual auditors on implementing the CPE requirements by answering the most frequently asked questions from the audit community. As noted in the section of this Alert entitled "Government Auditing Standards Developments," the GAO is expected to revise this Interpretation during the upcoming year.

Government Finance Officers Association

.99 The Government Finance Officers Association (GFOA) can be contacted at 203 North LaSalle Street, Suite 2700, Chicago, IL 60601-1210; phone (312) 977-9700; fax (312) 977-4806; www.gfoa.org. Its publications include:

- *Governmental Accounting, Auditing and Financial Reporting: Using the GASB 34 Model*—This publication, commonly known as the GAAFR or "Blue Book," provides detailed professional guidance on the practical application of the new financial reporting model to state and local governments. The basic text of the GAAFR also is available on CD-ROM. (*The GAAFR Study Guide Outlines and Exercises* and *The GAAFR Self-Study Course* also are available to assist those wishing to use the GAAFR for instructional or self-study purposes.)
- *An Elected Official's Guide to the New Governmental Financial Reporting Model*—This booklet provides a comprehensive overview of the new governmental financial reporting model established by GASB Statement No. 34.
- "General-Purpose Government Checklist for the Certificate of Achievement for Excellence in Financial Reporting Program"—This detailed checklist has been completely revised to reflect GASB Statement No. 34 and is available free of charge on the GFOA Web site.
- *An Elected Official's Guide to Fund Balance*—This booklet provides the nonaccountant with a concise explanation of the meaning of the various components of fund balance and focuses on how to properly interpret the meaning of fund balance in the general fund.
- *An Elected Official's Guide to Auditing*—This booklet provides elected officials, management, and other nonaudit professionals with practical information concerning the audit process for state and local governments, including discussion of annual audits of financial statements; Yellow Book audits; Circular A-133 audits; auditor's reports; managing the financial audit; performance auditing; and internal auditing. (Recently updated.)
- *Model Request for Proposal for Auditing Services (diskette)*—This diskette includes a model request for proposals for auditing services in WordPerfect 6.1 format (recently updated).

- *Evaluating Internal Controls: A Local Government Manager's Guide*—This publication is designed for public managers seeking the practical guidance needed to assume a leadership role in the design, implementation, and maintenance of a comprehensive framework of internal control.
- *An Elected Official's Guide to Internal Controls and Fraud Prevention*—This booklet provides a concise yet comprehensive overview of internal controls and fraud prevention in the public sector. Explanations cover a wide range of topics, including the control environment; accounting systems; control policies and procedures; evaluating internal controls; the causes, cost, and prevention of fraud; common types of fraud; and how management can detect fraud.
- *Accounting Issues and Practices: A Guide for Smaller Governments*—This 12-chapter manual provides “how to” advice on the basic duties of local government finance officials. Sample documents are included throughout.
- *A Guide to Arbitrage Requirements for Governmental Bond Issues and 1994 Supplement*—These two publications present a comprehensive overview of federal arbitrage requirements.
- *Pension Accounting and Reporting; Pension CAFRS: Guidelines for the Preparation of a Public Employee Retirement System Comprehensive Annual Financial Report; 2000 Survey of State and Local Government Employee Retirement Systems—Survey Report; and the PENDAT 2000 Database and User's Manual*—Various publications and other products on the administration of and financial reporting for PERSs.
- *GAAFR Review*—This eight-page subscription newsletter, issued 10 times each year, covers major issues in governmental accounting, auditing, and financial reporting and includes analyses of recent authoritative pronouncements.
- *Recommended Practices for State and Local Governments*—The GFOA's recommended practices identify “best practices” in each of the major disciplines of state and local government finance. They are available free of charge on the GFOA Web site.
- *Financial Indicators Data Base*—The GFOA makes available each year key data extracted from Comprehensive Annual Financial Reports (CAFRs) submitted to its certificate program. Separate data bases are available for counties, general-purpose governments, and school districts.

.100 This Audit Risk Alert replaces *State and Local Governmental Developments—2002*.

.101 The *State and Local Governmental Developments* Audit Risk Alert is published annually. As you encounter audit and industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be greatly appreciated. You may e-mail these comments to lgivarz@aicpa.org or write to:

Leslye Givarz
AICPA
Harborside Financial Center
201 Plaza Three
Jersey City, NJ 07311-3881

.102 We also suggest that you review the annual AICPA Audit Risk Alert, *Single Audits—2003 (Audits of Organizations Receiving Federal Awards: Single Audits Performed in Accordance With Office of Management and Budget Circular A-133)* [AAM section 8220] if you have clients that receive federal money. This Alert addresses current issues of relevance to the performance of single audits, including regulatory, legislative, and other developments, among its many topics. Also review the *AICPA Audit Risk Alert*, which is a general update on economic, auditing, accounting, and other professional developments. That publication discusses numerous general audit topics of interest that, although not specifically geared toward an audit of the financial statements of state and local governments, might be relevant to auditors of those financial statements.

.103

Appendix

The Internet—An Auditor's Research Tool

If used properly, the Internet can be a valuable tool for auditors. Through the Internet, auditors can access a wide variety of global business information. For example, information is available relating to professional news, state CPA society information, IRS activities, software downloads, university research materials, currency exchange rates, stock prices, annual reports, and legislative and regulatory initiatives. Not only are they accessible from the computer, but they are also available at any time, often free of charge.

A number of resources provide direct information, whereas others may simply point to information inside and outside of the Internet. Auditors can use the Internet to:

- Obtain audit and accounting research information
- Obtain information, regulations, and documents from federal agencies and departments
- Discuss audit issues with peers
- Communicate with audit clients
- Obtain information from a client's Web site
- Obtain information from professional associations

There are caveats to keep in mind when using the Internet. Reliability varies considerably. Some information on the Internet has not been reviewed or checked for accuracy; we advise caution when you access data from unknown or questionable sources. Although a vast amount of information is available on the Internet, much of it may be of little or no value to auditors. Accordingly, auditors should learn how to use search engines effectively and efficiently. The Internet is best used in tandem with other research tools, because it is unlikely that all desired research can be conducted solely from Internet sources.

The following listing summarizes the various Web sites of many of the organizations referred to in this Audit Risk Alert, as well as others that auditors of state and local governments may find useful.

AAM Section 8080

Common Interest Realty Associations Industry Developments—2001/02

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your common interest realty association (CIRA) audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment your clients operate in—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the CIRA industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2001/02* [AAM section 8010] and *Compilation and Review Alert—2001/02* [AAM section 8015].

Current Economic Developments

.03 For a complete overview of the current economic environment in the United States see the AICPA general *Audit Risk Alert—2001/02* [AAM section 8010].

.04 The economy remained weak and uncertain in the third quarter of 2001, hanging between recovery and recession. The U.S. consumer sentiment index plunged to 83.6 in September 2001, its lowest level in nearly eight years. This loss of consumer confidence is significant inasmuch as consumer spending has been a major pillar propping up the economy. The sharp rise in unemployment was a contributing factor to the reduction in consumer confidence. The U.S. unemployment rate soared to a four-year high of 4.9 percent in August 2001.

.05 The September 11, 2001 attack on America injected further agitation and uncertainty into the U.S. economy. The ramifications of that attack and the ensuing war against those responsible for that attack may deepen the economic slowdown and lead to a recession; however at the time of the writing of this Alert the short- and long-term effects of the attack on the economy are uncertain.

.06 Despite the general economic slowdown, the housing market has remained strong, partly due to low mortgage interest rates. Housing continues to be a good investment for families since home values have appreciated at more than twice the rate of consumer price inflation. Home values have increased by an annualized rate of 6.9 percent nationwide in the second quarter of 2001 according to the Federal Home Loan Mortgage Corporation (FreddieMac).

Regulatory Developments

.07 The operations of CIRAs are regulated by the individual states and not by the federal government. However, federal regulations, court cases, IRS revenue rulings, and federal legislation apply to the income

tax treatment of CIRAs. Also, two federal agencies, the Federal Housing Administration (FHA) and the Department of Veterans Affairs, as well as two government sponsored enterprises (GSEs), FreddieMac and the Federal National Mortgage Association (FannieMae), have regulations and underwriting guidelines to guide developers, mortgage lenders, and others in establishing CIRAs as well as in the sales and financing of units. Although compliance with such regulations may not be mandatory, compliance with their guidelines and underwriting requirements facilitates the development, sale, and resale of units within CIRAs. This section discusses recent developments in federal regulations as they relate to CIRAs, including U.S. Department of Housing and Urban Development (HUD) requirements, IRS private letter rulings, and bankruptcy legislation.

HUD Electronic Submission Requirements for Multifamily Programs

What are HUD's electronic submission requirements for multifamily programs, and what are the auditor's related responsibilities?

.08 A number of CIRAs are involved with housing programs administered by the FHA, which is part of HUD. These housing programs promote the development of housing for elderly and low- to moderate-income individuals and families by providing mortgage insurance, rent subsidies, direct loans, and mortgage interest subsidies. CIRAs that are developed under these programs are typically required to adhere to specific program requirements, as well as to submit annual audited financial statements to HUD. Housing cooperatives are the most likely type of CIRA that might be developed under such HUD programs. If your client should comply with HUD requirements, refer to HUD handbooks for guidance on accountant qualifications, financial statement format, disclosure, reporting, and specific program compliance.

Help Desk—To obtain copies of the HUD handbooks, notices, and other documents go to www.hudclips.org where they are available for print or to be viewed. Printed handbooks can be ordered online through the Direct Distribution System or by telephone at (800) 767-7468.

.09 Under the HUD Uniform Financial Reporting Standards, public housing authorities and project owners of HUD-assisted housing, such as public housing, section 8 housing, and multifamily insured housing programs, are required to submit financial information electronically to HUD's financial assessment subsystem (FASS) via a template known as the financial data schedule (FDS). The electronic submissions should be sent to the Real Estate Assessment Center (REAC), which is the HUD national management center created to receive and evaluate electronic submissions.

.10 Also, if your client is involved in a not-for-profit or for-profit multifamily housing program and is receiving financial assistance from HUD, note that the HUD reporting and audit requirements for such programs have recently changed. A revised user guide, *Industry User Guide for the Financial Assessment Subsystem-Multifamily Housing* (FASSUB guide 3.0), as of September 21, 2001 has been issued by REAC and can be obtained at www.hud.gov/offices/reac/products/fass/fassmf_guide.cfm. This revised guide expands the requirement for electronic submissions to include the multifamily housing portfolio and revises the submission process for audited data.

.11 The FAASSUB guide requires auditors to perform the following:

- The auditor is required to compare the electronically submitted FDS information (which essentially includes a trial balance of the financial statements and certain other supplemental information) in the REAC staging database to hard copy of the same information. The REAC database is made up of accurate, credible, and reliable information assessing the condition of HUD's housing portfolio through an Internet-worked database of comprehensive and objective information drawn from existing government systems and from an ongoing program of property inspections, analysis of financial and management reports, resident surveys, and review of residential appraisals. An attestation agreed-upon procedures report should be prepared and submitted to REAC electronically

by the auditor. The attestation agreed-upon procedures engagement should be performed in accordance with chapter 2, “Agreed-Up Upon Procedures Engagements,” of Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 201).

Help Desk—Chapter 2 of SSAE No. 10 supersedes SSAE No. 4, *Agreed-Up Upon Procedures Engagements*. HUD revised its guidance on March 6, 2001, to refer to SSAE No. 10. The guidelines on reporting and attestation requirements of Uniform Financial Reporting Standards (UFRS) can be found at www.hud.gov/utilities/intercept.cfm?/offices/reac/pdf/ufrs22801.pdf.

- Hardcopy of the FDS is required to be included with the basic financial statements and reported on by the auditor in accordance with Statement on Auditing Standards (SAS) No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551). Since the FDS information is outside the basic financial statements, auditors should report on it as it relates to the financial statements taken as a whole.

Help Desk—The AICPA provided input into the UFRS guidelines as HUD developed them, particularly on the auditor report templates. A copy of the UFRS guidelines can be obtained from the REAC Web site at www.hud.gov/reac/pdf/fass_ph_guideufrs.pdf. Additional information regarding the activities of REAC and how they affect HUD programs and audits of HUD programs is available on the REAC Web site at www.hud.gov/reac. Further assistance on the electronic submission requirements is available by contacting the REAC customer service center at (888) 245-4860.

Unique Independent Public Accountant Identifiers

.12 REAC recently instituted a system of “unique independent public accountant identifiers” (UII) to help identify auditors and to enhance the security of its system. For each electronic submission of a multifamily housing project FDS made after February 5, 2001, that has auditor involvement, FASS requires a UII, which is a randomly generated, permanently assigned, five-digit number. Before an auditor may obtain a UII, the auditor must register within HUD secure systems, which requires the involvement of a multifamily housing entity client. Therefore, you should coordinate with one of your multifamily housing entity clients to obtain your UII in advance of when you will need it.

Help Desk—To obtain more information about UIIs and auditor validation of submission of data required when submitting audited financial information to REAC, visit the HUD Web site at www.hud.gov/offices/reac/products/fass/mf_uiaudit.cfm.

Guidelines for Calculating and Retaining Section 236 Excess Income

.13 On July 27, 2001, the HUD Office of Housing issued Notice H 01-7, which supersedes Notice H 00-17. Notice H 01-7 expires July 31, 2002. The HUD Notice applies to all section 236 projects (the typical CIRA would be a housing cooperative) with assistance through the section 236 interest reduction payment program. HUD Notice H 01-7 provides guidelines for implementation of section 216 of the department’s Fiscal Year 2001 Appropriations Act, P.L. 106377. Section 861 of the American Homeownership and Economic Opportunity Act of 2000 amends section 236(g) of the National Housing Act, providing an extension of the authority to retain excess income. It also provides, in relevant part, that any excess income that a project owner has collected and that such owner has not remitted to the Secretary of HUD may be retained by such owner unless the Secretary otherwise provides. Instructions are provided for an owner’s participating in retention of excess income for projects with assistance through the section 236 interest reduction payments program.

.14 Excess income comprises cash collected as rent from residents by the mortgagor, on a unit-by-unit basis, that is higher than the HUD-approved unassisted basic rent. Excess income may be used for any project

purpose, such as project operating shortfalls and repair costs, which are applicable to CIRA clients. Another project use applicable to CIRA clients is increasing deposits to the reserve fund for replacements to a limit necessary to fund the reserve adequately.

Help Desk—For additional guidance, refer to HUD Notice H 01-7 at www.hudclips.org, which contains sections on policy, retaining section 236 excess income, usage of excess income, requesting approval, treatment of excess income previously collected, and reporting requirements.

IRS Rulings and Memorandum

.15 Private letter rulings (PRLs) are written memoranda furnished by the IRS national office in response to taxpayer requests under published annual guidelines. Technical advise memoranda (TAMs) are furnished by the national office of the IRS upon request of a district director or chief appeals officer pursuant to annual review procedures. It is important to note that although such rulings and memoranda cannot be used or cited as precedent, they can be used as guidance if your client encounters a similar situation. The following may affect CIRAs:

- With PLR 2000-51049 and PLR 2001-01036 the IRS is establishing a rulings position that the operation of exercise facilities and health clubs, under certain circumstances, constitutes a related activity for section 501(c)(3) organizations. If your client is a 501(c)(3) organization and houses exercise facilities in its building then you may consider referring to these private letter rulings for possible guidance. This evolving position has attracted criticism from the fitness club industry in a manner similar to the opposition several years ago to travel tours operated by tax-exempt organizations.
- TAM 2000-47-049 was published by the national office. This technical advise memorandum contains an extensive analysis of the treatment for unrelated business income tax (UBIT) purposes of income from the development and sale of land, the provision of municipal-type services such as water and sewer, garbage collection, services to its own buildings and to the private residences within the grounds, and operation of a golf course, tennis courts, and boating facilities by section 501(c)(3) organizations. If your client is in a similar situation, you may consider referring to this TAM for guidance on what constitutes UBIT under Internal Revenue Code (IRC) 512(a)(1).

Help Desk—For more information on unrelated business income tax go to www.irs.gov/bus_info/eo/topicF02.pdf for a written document on the current developments of UBIT which includes the full PLR and TAM discussions and conclusions on the specific issues mentioned above as well as many others.

Bankruptcy Legislation in Washington

.16 According to the Mortgage Bankers Association (MBA), the percentage of mortgages in foreclosure and the number of late mortgage payments being made by homeowners has increased. The MBA's national delinquency survey showed the following second quarter 2001 results:

- The delinquency rate for loans on one- to four-unit residential properties increased to 4.63 percent. This is up 26 basis points from the first quarter 2001.
- The delinquency rate for conventional loans increased 2.93 percent, up 16 points from the first quarter 2001.
- The rates for FHA loans increased to 10.79 percent, up 79 basis points from the first quarter 2001.
- The rates for VA loans increased to 7.63 percent, up 41 basis points from the first quarter 2001.

.17 Moody's Investor Services stated that late payment and bad loan write-off rates rose by over 13 percent from the prior year. Consumer credit quality has not been this dismal since the negative credit cycle

in 1995–1997. The continuing slowing of the U.S. economy, especially in light of the recent economic effects of the September 11, 2001 terrorist attacks, raises the specter of growing defaults and bankruptcies. It should be mentioned, however, that mortgage lenders, the two federal agencies, and the two GSEs have powerful software-driven scripting and mitigation tools and programs that can assist in bringing delinquent borrowers in CIRAs current in their mortgages. You may want to advise your clients of this management tool.

.18 Under the current law, a CIRA generally becomes a secured creditor in a bankruptcy proceeding when an assessment lien is recorded on the property before the owner (debtor) files for bankruptcy. Once the CIRA receives notification of the bankruptcy, the CIRA must stop all collection action such as warning letters, liens, lawsuits, and foreclosures against that owner immediately due to the federal court's "automatic stay" against such actions.

.19 Legislation is currently going on in Washington that would constitute the largest overhaul of the bankruptcy laws in 20 years. The House and the Senate have appointed conferees who will draft a final version of the Bankruptcy Reform Act of 2001 to be sent to the President for signature.

Proposed Changes in the U.S. Bankruptcy Law

.20 The proposed changes in the bankruptcy law provide that when the owner of a condo unit or the shareholder of a coop files for bankruptcy, he or she is not discharged from liability for assessments or other fees that become due and payable after the owner-shareholder files for bankruptcy, provided that the homeowner continues to live in the unit or receives rent payments from a tenant occupying the unit. However, if the owner-shareholder abandons the property and fails to rent out the unit, then the homeowner is not liable for the post-petition assessments. Therefore, in certain situations under the revised bankruptcy law, associations would have the option of proceeding in state court to collect on post-petition debt.

.21 The passing of this law is important to CIRAs because it will make it easier for CIRAs to collect post-petition assessments¹ and carrying charges² from an owner-shareholder who does not relinquish the ownership interest in the unit. Under the current law, collection of such assessments and charges is tied to occupancy or subletting. Some owners-shareholders engage in "under the table" subletting or allow friends and relatives to stay in the unit rent-free, thereby escaping liability for post-petition monthly assessments and charges.

Audit Issues and Developments

Budgets and Budget Analysis

What is important about CIRA budgets and their analysis for this year's CIRA engagements?

.22 Because budgets are the primary basis for assessments or revenue for a CIRA we will revisit the topic of budgets again this year. In effect, budgets are the cornerstone of a CIRA's performance measurement. The budget is a framework that defines the financial parameters in which a CIRA operates. The legal documents creating most CIRAs require that assessments be based on budgets. The budgets of CIRAs are the monetary expression of their goals and objectives and emphasize the stewardship responsibility of their boards of directors as they deliver the three core housing services of all CIRAs: business services, governance services, and community services. According to Financial Accounting Standards Board (FASB) Statement of Financial

¹ Post-petition assessments are the bankrupt owner's proportionate share of the amount of money necessary to pay for the operation, administration, maintenance, and management of the common property and funds for future major repairs and replacements, late charges, and interest incurred after the date the bankruptcy was filed.

² Carrying charges are charged to tenant-shareholders for operating and capital expenditures based on proprietary lease agreements, in cooperative housing corporations (commonly referred to as rent).

Accounting Concepts No. 4, *Objectives of Financial Reporting by Nonbusiness Organizations*, budgets are used to allocate and control the use of resources. Budgets are also used to obtain resources. For example, budgets are pivotal in establishing levels of dues, taxes, and fees to be imposed.

.23 Budgets are pivotal in assessing actual versus anticipated CIRA operating results. The AICPA Audit and Accounting Guide *Common Interest Realty Associations* (the CIRA Audit Guide) recommends that the auditor consider comparing budgeted amounts with actual amounts as an analytical procedure in the audit of a CIRA. SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329), provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits.

.24 Most items in a CIRA's budget are fixed, such as monthly mortgage payments, or easily predictable expenses, such as insurance, corporate taxes, real estate taxes, and labor service contracts. Annual budgets are made up of basic costs for repairs and supplies, as well as major repairs or special projects, which usually account for the lion's share of the annual budget. The remainder consists of utilities, water and sewer charges, and fuel, which have become the most unpredictable variables over the past two years, seriously impacting the budgets of CIRAs.

.25 Over the past year we have seen electricity costs increase more than 25 percent beyond budgeted amounts, leaving many CIRAs dipping into budget surpluses from prior years. This year electricity costs are expected to increase by another 15 or 20 percent. The cost of natural gas and home heating oil also increased sharply, rising anywhere ranging from 25 percent to 50 percent during the course of the 2000–2001 winter season. Insurance premiums in general, and for directors and officers liability coverage in particular, also are likely to rise as much as 25 percent over the next two years due to the rising level of claims at the "severity level"—the \$1 million mark or above. In light of the above, your CIRA client should consider including a contingency line item in the annual budget for these expected increases in operating costs.

.26 The events of September 11, 2001 should be a painful reminder that CIRAs located in high-rise buildings may want to consider developing budgets that include the creation of evacuation procedures, drills for such procedures, various types of safety equipment, the purchase of equipment that can facilitate the evacuation of the disabled, and the purchase of insurance that contains adequate amounts of debris removal coverage.

.27 As an auditor of CIRA clients, you should be cognizant that sometimes the budget accompanying the financial statement has expired. As discussed in the CIRA Audit Guide, if expired budget information accompanies the financial statements, this additional information should be treated in accordance with the provisions of SAS No. 29. Ordinarily, such information would not have been subjected to the auditing procedures applied in the audit of the basic financial statements, and, accordingly, the auditor would disclaim an opinion on such information. For an example of a disclosure of opinion that would be appropriate in such circumstances, see paragraph 7.22 in the CIRA Audit Guide.

Help Desk—The AICPA's new Audit Guide *Analytical Procedures* (product no. 021069kk) provides great implementation guidance for the use of analytical procedures. It also includes a discussion of your professional responsibilities under SAS No. 56.

.28 Another budgeting area of concern to auditors includes financial reserve studies. If the CIRA has accepted financial reserve study recommendations, auditors should inquire about the professional qualifications of the entity performing the reserve study and whether the CIRA has reconciled these approved financial amounts with the budget to ensure consistency.

.29 How do budgets play a part in performance evaluations? Budgets can help determine if the CIRA is successfully and prudently delivering its three core housing services. Also, budgets can provide CIRA owners who use them with a measure of evaluating both manager and board performance. Performance of

these key CIRA decision makers is a reflection of, among other things, how the association has actually performed relative to achieving its budgetary financial goals. Some of the more important categories for CIRAs to consider when evaluating performance are listed in the table.

Delivery of Core CIRA Housing Services

<i>Business Services</i>	<i>Governance Services</i>	<i>Community Services</i>
1. Measure the variances between budgeted and actual amounts.	1. Measure and compare the costs of various types of dispute resolution: internal CIRA mediation, use of attorneys, and so on.	1. Evaluate the budgeted cost and timeliness of responses to resident communications concerning CIRA operations, and so on.
2. Determine if proper allocations to replacement fund accounts are being met.	2. Ensure that the cost components of the CIRA's annual plan are included in the budget.	2. Determine that the budget contains sufficient funds so that new residents (owners and tenants) can be successfully oriented to living in the CIRA.
3. Monitor budgeted amounts for delinquencies and bad debts by duration, amount, and type.	3. Make sure sufficient funds are budgeted for board, committee, and staff training.	3. Evaluate the budgeted amounts for making sure the CIRA is in compliance with Fair Housing and similar statutes.
4. Make sure that insurance deductibles are included in the budget.	4. Determine that the records of the CIRA accurately reflect board decisions that involve budgeted items.	4. If the CIRA communicates using a Web site, determine if the budget can support ongoing Internet maintenance and security.

Misappropriation of Assets

.30 Fraud is always a concern for CIRAs, whether the embezzlement is large or small. Frauds in CIRAs sometimes involve CIRA board members or CIRA managers. A typical fraud perpetrated by CIRA board members involves the writing of checks to themselves or to related companies—foregoing the second required signature. CIRA managers who commit fraud typically create fictitious vendors and bill the CIRA with invoices from those vendors. The CIRA's payment check is then deposited into the manager's bank account.

.31 Auditors have a responsibility to plan and perform the audit to obtain reasonable assurance that the financial statements are free of material misstatement, whether caused by error or fraud. Fraud often goes undetected and may be concealed through falsified documentation, including forgery. Auditors should be alert to the presence of risk factors or other conditions that may alert the auditor to a possibility that fraud may exist. In planning an audit, the auditor should consider fraud risks factors in accordance with the guidance contained in SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316). Examples of fraud risk factors and other conditions that may affect CIRAs include the following:

- A lack of segregation of duties among the CIRA board or CIRA management (responsibility for financial matters is largely in the hands of one individual).

- A lack of CIRA board oversight over financial matters, such as a failure to review the CIRA's financial statements periodically.
- Inadequate internal control, such as a failure to prepare and independently review bank reconciliations, independently match checks to authorized invoices or payment requests, and obtain multiple bids for major contracts or projects.
- General ledgers that do not balance or subsidiary accounting records that cannot be reconciled to the general ledger.
- Cash shortages that cannot be explained.
- Accounts receivable credited without proper authorization.

.32 An auditor should assess the risk of material misstatement of the financial statements due to fraud and take into account all identified risk factors and other conditions. In some cases, even though fraud risk factors have been identified, the auditor's judgment may be that audit procedures otherwise planned are sufficient to respond to the risk factors. In other circumstances, the auditor may conclude that the conditions indicate a need to modify procedures.

.33 Depending on an auditor's assessment of the risk of material misstatement due to fraud, the following example audit procedures may help detect the existence of fraud.

- Review vendor lists with appropriate board members or management and investigate any material payments to unknown or unusual vendors.
- Review bank statements and cancelled checks. Look for checks for significant amounts made out to cash, employees, or unusual vendors. For those checks, compare endorsements to payee.
- Examine bank reconciliations. A thorough review of bank reconciliations is one of the best ways to detect fraud relating to cash. With the advent of sophisticated software it is possible to forge bank statements; the auditor should examine such statements for the bank's watermark or other security mark.
- Examine material disbursements with management-only signatures carefully.
- Use substantive analytical procedures, including the development of an expected dollar amount, at a high level of precision, to be compared with a recorded amount.

.34 SAS No. 82 provides guidance for the auditor if he or she determines that financial statement misstatements are or may be the result of fraud.

Help Desk—In implementing SAS No. 82, auditors can consult the AICPA's publication entitled *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* (product no. 008883kk). This publication contains practical user-friendly information to help understand and follow the requirements of SAS No. 82. Call the AICPA at (888) 777-7077 to order.

Audit Efficiency

.35 The AICPA Private Companies Practice Section (PCPS) task force has conducted a survey on the best practices in audits. The not-for-profit (NPO) sector was selected because NPOs often have small operations and few accounting staff, if any, which poses a particular challenge to audit efficiency. However, the best practices uncovered can be applied to CIRA audits as well, since there are many similarities between the two. Firms cited for their excellent quality controls shared practice tips on how to improve audits while saving time and enhancing profits. The study also revealed four important steps to achieving audit efficiency.

.36 As reflected in the survey findings, sometimes less is more when it comes to audit efficiency. While still meeting professional standards, many CPA firms have found it possible to reduce the amount of time involved in the audit. They can improve and maintain quality just by working smarter. The four steps to achieving audit efficiency include:

1. Involve client in audit preparation
2. Retain clients and staff
3. Plan properly
4. Assess risk

Involve Client in Audit Preparation

.37 CPAs can work much more efficiently when clients supply them with all the information they need to perform the audit. If a CPA's staff has to spend time locating and copying needed files or doing catch-up bookkeeping work, the length of the audit most often increases, resulting in the firm not realizing 100 percent of the value of its fees.

.38 The survey revealed a variety of strategies firms are using to ensure clients are prepared for their audits:

- One firm created two separate groups: a traditional audit team and another, "swat" team that prepares clients for the audit. The firm would introduce the swat team, if needed, with a different engagement letter for the additional audit preparation work to be performed, which then forces a conversation with the higher level people. The conversation would include discussion of what's not ready, what needs to happen, how the firm can help, and what it would cost.
- Firms can review possible engagement efficiencies with the clients at the planning conference. Items that added or saved time or money during the previous year's engagement can be discussed, to reinforce the right client behavior and in turn allow the clients to see how they can provide the firm with better assistance and the positive financial impact it will have on the fee.
- Practitioners can meet with the board of directors, and ask them to communicate the value and importance of the audit to the organization staff members and urge them to cooperate in the engagement preparation. Firms can also provide explicit lists of what is needed with clear examples and due dates.
- Some firms have also discounted the fee when proper preparation is performed. They have found that a small inducement can cost less than taking on the preparation work themselves.
- Some firms reschedule the fieldwork if the client is not ready.
- Finally, developing realistic expectations for your clients is yet another strategy to help you ensure your clients are prepared for the audit.

Retain Clients and Staff

.39 According to the firms surveyed, an important contributor to efficiency is a meaningful investment in an industry niche. Greater familiarity with the practice area, such as CIRAs, and with particular clients enables practitioners to streamline their audit approaches and to make the most of the time they spend on each engagement. It also allowed them to offer clients valuable advice on best industry practices and to charge premium fees. One way to keep the relationship going is to bring next year's engagement letter with you when you drop off the reports at the end of the audit. Some clients may sign it and hand it right back to you.

.40 *Strategies for Achieving Low Employee Turnover.* Staff retention was also very important to the participants surveyed. It enhances both their client-specific and industry experience. The best strategies included:

- Explicit and enforced anti-overtime policies
- A growth plan that offers opportunities for recognition and advancement to partner level
- Flexible hours and casual dress policies
- Competitive compensation and benefits
- Keeping the work interesting, which can involve granting responsibility and including staff in the planning process.

Plan Properly

.41 Many practitioners believe that planning is critical to audit efficiency. The time the participants surveyed spent on this part of the audit process varied greatly from firm to firm, with a range of 2 percent to 25 percent.

.42 Strategies to plan properly included:

- Spend time getting to know a client and its systems in advance to help understand its entire operation, as opposed to reviewing or performing a bunch of procedures that were done in the past and not really understanding why.
- As a part of the planning process, review the prior year's workpapers to familiarize the firm with client issues and to seek out possible past inefficiencies and possible improvements in the firm's own work.
- Meet with the client to discuss the audit process and identify client responsibilities. Downloading the client's trial balance to the firm's software, sending confirmations, and preparing lead schedules are all procedures performed in the planning process, as well as reviewing planning decisions with the firm's audit staff and considering the staff suggestions for improvements that were turned in at the end of last year's work.

.43 However, the survey found that not all successful firms have lengthy planning processes. Some considered what the firm could have done differently simply by reviewing the prior year's audit, while others created a final plan after the audit had begun, when current issues and problems were clear. These approaches generally were applied by smaller firms with a higher percentage of experienced staff.

Assess Risk

.44 The survey found that correlating audit efforts to the levels of risk and materiality resulted in a more efficient approach. The practitioner's audit risk assessment will affect the types of procedures to be performed. Procedures in the low-risk areas should be minimal. The firms should focus their procedures on the potential problem areas instead.

.45 *Strategies for Assessing Risk.* When considering risk, it's a good idea to bring the whole audit team together. In doing so, the senior people can talk about industry risks, while the middle-level people tend to know more about the expertise or knowledge base of client personnel and control issues. The lower-level people tend to give little input but learn a lot, thus enabling the whole audit team to understand the different types of risk.

.46 According to the survey analytical procedures (reasonable and predictive tests) were considered to be the most efficient. One firm's audit team begins each step of the process by asking, Can we audit this analytically? Every participant is trying to use more analytical procedures and to do less transaction testing because it:

- Saves time.
- Uncovers what isn't there instead of focusing on what is.
- Is more interesting to perform, leading to a deeper understanding of the client's business.

.47 The survey revealed these areas in which predictive and reasonable tests have replaced transaction testing and saved time:

- Rent payable or paid and rent receivable or received.
- Interest income.
- Depreciation.
- Payroll and payroll taxes.
- Supplies.
- Prepaid expenses (rent, insurance).
- Professional fees.

.48 The auditor considers the level of assurance, if any, he or she wants from substantive testing for a particular audit objective and decides, among other things, which procedure, or combination of procedures, can provide that level of assurance. For some assertions, analytical procedures are effective in providing the appropriate level of assurance. For other assertions, however, analytical procedures may not be as effective or efficient as tests of details in providing the desired level of assurance.

Time Efficiencies

.49 The survey also revealed tips for enhancing efficiency. One step considered key to an efficient audit, saving as much as 20 percent to 30 percent of total time, was completing the audit in the field. Employees are less distracted when the audit wrap-up is completed in the field, including:

- Reviewing workpapers.
- Clearing up points that arise while doing the review of the workpapers.
- Producing the draft report and management letter.

.50 Other efficiencies identified that could improve profitability include:

- Use technology. Cut down on hard copy and use laptops and even portable printers to facilitate efficiency in the field.
- Include memos in the workpapers. These can stipulate test objectives, document steps performed, and describe what's found.
- Organize workpapers along narrative lines. Arrange them so they describe what was done, why, and the results.
- Keep it short. Restrict workpaper files to less than one-inch thickness.
- Keep a summary of information received from the client rather than storing all the data in the files for next year's team to wade through.
- Conduct firmwide meetings on how to streamline workpapers.
- Keep in touch. Have the audit partner or senior manager available to staff in the field to reduce cycle time and total audit time; staff can then get quick answers and implement changes to the audit program.

- Be consistent. Standardize the format and flow of workpapers so they are easy to understand and all data contained in them are readily referenced.

Accounting Issues and Developments

Environmental Remediation Liabilities

.51 Recently, there has been heightened vulnerability to CIRAs with regards to environmental claims. Under current law, a CIRA may be held liable in an environmental claim even if the CIRA was not involved in generating, disposing of, or transporting hazardous substances. If the CIRA owns land that was contaminated by previous owners, the CIRA may still become liable for the cleanup of the site.

.52 In addition to being concerned about environmental issues that it inherits from other parties, a CIRA may have the following environmental considerations:

- *Underground fuel storage tanks.* Heating oil for housing units and gasoline for vehicles may be stored underground at a CIRA. Federal, state, and local regulations require monitoring of those storage tanks for leaks. Also, if leaks occur, the cleanup of the surrounding soil is expensive and only partially covered in typical CIRA insurance policies.
- *Wetlands.* Federal law protecting wetlands may affect a CIRA's ability to make changes to its property when the CIRA is located on or near wetlands.
- *Mold, mildew, and other toxic chemicals.* CIRAs are seeing these "toxic torts" as construction, rehabilitation, and related property maintenance problems grow.
- *Waste disposal practices.* Depending on the types of substances being used and disposed of at a CIRA (for example, fertilizers and paints), regulations exist that are designed to prevent the release of hazardous substances into the environment. These regulations pertain to various matters, including the types of containers in which the wastes are stored, and the land and structures surrounding them.

.53 Statement of Position (SOP) 96-1, *Environmental Remediation Liabilities*, provides accounting guidance for the recognition, measurement, display, and disclosure of environmental remediation liabilities. SOP 96-1 requires that environmental remediation liabilities be accrued when the criteria in FASB Statement No. 5, *Accounting for Contingencies*, are met. SOP 96-1 includes benchmarks to aid in the determination of when an entity is identified as a potentially responsible party (PRP) and when a feasibility study is completed. SOP 96-1 also requires that the accrual for environmental remediation liabilities include the incremental direct costs of the remediation effort and the costs of compensation and benefits for employees who are expected to devote a significant amount of time directly to the remediation effort. The measurement of the liability should:

- Include the entity's allocable share of the liability for a specific site, and the entity's share of amounts that will not be paid by other PRPs or the government.
- Be based on enacted laws and existing regulations and policies, and on the remediation technology that is expected to be approved to complete the remediation effort.
- Be based on the entity's estimates of what it will cost to perform all elements of the remediation effort when they are expected to be performed. The measurement may be discounted to reflect the time value of money if the aggregate amount of the liability or component of the liability and the amount and timing of the cash payments for the liability or component are fixed or reliably determinable.

.54 Estimates of environmental remediation liabilities usually are predicted on subjective information and numerous judgments about how matters will be resolved in the future. Such matters generally increase audit risk, because of the difficulty in identifying and estimating remediation liabilities.

.55 SOP 96-1 also provides guidance on the display of environmental remediation liabilities in financial statements and on the disclosures about environmental cost-related accounting principles, environmental loss contingencies, and other loss contingency considerations. In addition to the accounting guidance, SOP 96-1 also contains a nonauthoritative section describing major federal legislation dealing with pollution control (responsibility) laws and environmental remediation (cleanup) laws and the need to consider various state and non-U.S. government requirements.

.56 Auditors should make inquiries of management and other appropriate personnel, have knowledge of the CIRA's operations, make inquiries of the CIRA's attorneys, read the minutes of the board meetings, and examine other pertinent sources of information to obtain an understanding of any potential environmental remediation liabilities present on the engagement. When potential exposure to environmental remediation liabilities exists, the auditor's understanding of the CIRA's internal control generally should extend to controls designed to help management identify and evaluate environmental remediation liabilities and loss contingencies.

.57 The auditor's substantive testing of environmental remediation liabilities generally consists of testing the accounting estimates recorded by management, making inquiries of legal counsel or identified specialists, and obtaining representations from management.

.58 The Environmental Issues Task Force of the Auditing Standards Board (ASB) has drafted auditing guidance on planning, performing, and reporting on an audit of financial statements as it relates to auditing environmental remediation liabilities. The guidance is included in appendix C, "Auditing Environmental Remediation Liabilities," of SOP 96-1.

.59 SOP 96-1 applies when there is the probability of litigation. Auditors should consider whether management has followed the guidance set forth in FASB Statement No. 5, FASB Interpretation No. 14, *Reasonable Estimation of the Amount of a Loss*, and the FASB Emerging Issues Task Force (EITF) Issue No. 93-5, *Accounting for Environmental Liabilities*.

.60 EITF Issue No. 93-5 states that the liability should be considered separately from any potential recovery from other potentially responsible parties. The loss arising from the recognition of the environmental liability should be reduced only when a claim for recovery is probable of realization. The balance sheet liability should not be offset by a recovery receivable unless the right of offset exists under FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts*.

Tax Treatment of Environmental Cleanup Costs

How should CIRAs treat environmental cleanup costs for tax purposes?

.61 CIRAs filing Federal Tax Form 1120 under IRC section 277 are taxed as regular corporations, subject to the graduated corporate rates. Such CIRAs are taxed on net income from member assessments over expenditures, unless an excess of member assessments has been actually or constructively refunded to members (see Revenue Ruling 70-604 for guidance), or that excess has been appropriated and segregated to restricted accounts for capital replacements. Accordingly, CIRAs may deduct expenses attributable to providing its members with services, insurance, goods, or other items of value to the extent of income derived during the year from members or transactions with members.³

.62 Because of economic performance rules under IRC section 461(h), CIRAs should not deduct the costs associated with environmental cleanup until they are actually paid.

³ In determining the applicability of IRC section 277 to CIRAs, the accountant should refer to applicable court cases and the IRC.

Disclosure of Certain Significant Risks and Uncertainties

What significant risks and uncertainties do auditors need to disclose?

.63 SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*, requires entities to include in their financial statements disclosures about (1) the nature of their operations and (2) the use of estimates in the preparation of the financial statements. In addition, if specified criteria are met, SOP 94-6 requires entities to include in their financial statements disclosures about (1) certain significant estimates and (2) current vulnerability due to certain concentrations.

.64 Examples of estimates that may be particularly sensitive to changes in the current environment that may be presented in the financial statements of a CIRA include the following:

- Liabilities arising from lawsuits filed against the CIRA.
- The collectibility of assessments receivable.
- Liabilities arising from environmental remediation.

.65 Examples of concentrations that may meet the SOP 94-6 criteria for disclosure in a CIRA's financial statement include the following:

- The available sources of supply material, labor, or services.
- The number and amounts of loans obtained from a particular lender.
- The geographic area in which the CIRA is located.

.66 In preparing financial statements in conformity with GAAP, auditors should refer to SOP 94-6 for guidance. Auditors should consider whether all significant estimates and concentrations have been identified and considered for disclosure.

Uninsured Risks

.67 CIRAs may lack sufficient insurance to protect them against significant loss. Although insured, some CIRAs carry deductibles that would cause them to suffer significant losses before receiving insurance compensation. Internet-related exposures such as maintaining privacy and security over information on CIRA Web sites could cause potential liabilities and environmental remediation liabilities (see the "Environmental Remediation Liabilities" section of this Alert). When auditing a CIRA that is exposed to significant uninsured risks, questions concerning the financial statement implications of such uninsured risks arise. Should uninsured risks be accrued for? Is financial statement disclosure of an uninsured risk required?

.68 When addressing these questions, auditors should remember the following points:

- The absence of insurance against risks of future loss or damage to an entity's property by fire, hurricane, wind, explosion, or other similar events does not mean that an asset has been impaired or a liability has been incurred at the date of the entity's financial statements. With respect to events of that type, the condition for accrual is not met prior to the occurrence of the event because until that time there is no diminution in the value of the property.
- The sole result of accrual, for financial accounting and reporting purposes, is allocation of costs among accounting periods. Anticipation of asset impairments, liabilities, or losses that do not relate to the current or a prior period is not justified by the matching concept.
- Generally accepted accounting principles (GAAP) do not require the disclosure of noninsured or underinsured risks; however, those disclosures are not discouraged in appropriate circumstances.

.69 Auditors should refer to FASB Statement No. 5 for further guidance.

Privacy

What is all the talk about privacy issues about?

.70 Protecting the privacy of financial information has emerged as an issue within the CIRA industry. Increasingly, CIRAs are utilizing online application service programs. Services and functions being conducted online include:

- Collecting assessments through Web-enabled financial management software.
- Processing work orders.
- Collecting user fees (for example, paying for the pool pass).
- Collecting rents from commercial users.
- Communicating with homeowners via e-mail.
- Communicating with board members via e-mail.
- Storing and transmitting documents such as governing documents, rules, and regulations.
- Submitting forms to vendors for bids.

.71 When services and functions are conducted online, privacy issues arise. Currently, only a handful of CIRAs conduct the above functions and services on the Internet. Nevertheless, using the Internet for such services will continue to grow since it simplifies and reduces the cost of the transactions, as well as facilitating loan balancing.

Privacy Risk

.72 Concerns over privacy tend to focus on the following points:

- Personal information transmitted over the Internet and other networks
- Third-party access to personal information
- The extensive collection of sensitive, personal information necessary to carry on data mining and customer relationship management activities.

Privacy Regulations and Laws

.73 CIRAs should be aware of existing federal and state privacy regulations and emerging regulations. Privacy is a new and growing concern, and new rules likely will continue to develop. Also, under the federal privacy law, if the Federal Trade Commission determines state laws and regulations provide greater consumer protection, those requirements will be incorporated into the federal requirements. Several states have recently passed or proposed various privacy regulations.

Considerations for Auditors and Business Opportunities

.74 *Auditor Considerations.* As with any significant legal or regulatory requirements, the auditor may need to obtain appropriate representations from management that the CIRA has taken steps to ensure compliance with existing privacy laws and test those representations as considered necessary. Noncompliance could result in significant financial risk to the CIRA.

.75 *Public Practice Opportunities.* Clients may seek advice from CPAs regarding the operational and system requirements related to implementing privacy requirements. In addition, the recent focus on privacy creates numerous service opportunities for the practitioner in his or her role as adviser to clients. As more and

more CIRAs migrate to e-commerce environments, the need for consultative advice and assurance on all aspects of operations affected by these changes becomes paramount to clients and potential clients.

.76 *Providing Assurance on Privacy Systems.* To mitigate risks, CIRAs may seek assurance services that test the efficacy of their privacy systems. AICPA WebTrust™ and SysTrust™ assurance services are pioneering efforts in this area. Privacy consulting—creating both privacy policies and systems as well as internal controls—is also an area where the accounting profession’s expertise can put CPAs front and center in the effort to guard public and business interests.

Electronic Commerce

An extensive discussion about e-commerce.

.77 E-business is an increasingly powerful force affecting the CIRA industry. More and more CIRAs are using the Internet or other computer networks as an information resource or delivery channel. An increasing percentage of CIRAs now provide some form of Web site through which they can communicate with customers, and a small percentage provide Web sites that can be used to conduct financial transactions. These numbers are growing.

.78 The AICPA Audit Risk Alert *E-Business Industry—2001/02* [AAM section 8210] provides an extensive discussion about e-business. The Alert addresses risks associated with e-business, security concerns, advice to help you audit in an e-business environment, testing internal controls, specific professional standards to consult, and skills and training issues. Also addressed in the Alert are accounting considerations including Web site development costs and the costs of start-up activities.

Special Assessments

.79 CIRAs levy assessments for various purposes, from covering an operating deficit or litigation costs to funding major repairs and replacements. Special assessments should be reported as revenue unless they are designated for specific costs that have not yet been incurred and therefore should be deferred in accordance with paragraph 4.12 of the AICPA Audit and Accounting Guide *Common Interest Realty Associations* (the Guide) (product no. 012491kk). Auditors should also consider the proper timing and valuation of special assessments receivables, which may be collectible over time.

.80 The Guide specifies that audit procedures applied to assessment revenues should include comparing total reported assessments for the period under audit with budgeted amounts and testing whether amounts assessed to individual owners have been computed in accordance with the CIRA’s documents.

.81 When auditing assessments receivable, the Guide states that the auditor should design tests to provide reasonable assurance that the following have occurred.

1. All assessments receivable owed to the CIRA at the balance sheet date are recorded.
2. Recorded assessments receivable represent amounts owed to the CIRA at the balance sheet date.
3. Assessments receivable are properly described and classified in the financial statements.

.82 The auditor may achieve these objectives by performing substantive tests or a combination of substantive tests and tests of control. One of the most widely used substantive tests for determining the existence and accuracy of receivables is confirmation of the amount receivable by direct communication with parties owing amounts to the entity being audited. SAS No. 67, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 330), provides guidance about the confirmation process in audits conducted in accordance with generally accepted auditing standards (GAAS). If replies to confirmation requests are not received or if the replies are not satisfactory, the auditor should obtain satisfaction about the existence and

accuracy of assessment receivable balances by alternative procedures such as examining subsequent cash receipts and the existence of liens filed against units, although such liens do not assure the collectibility of assessments receivable.

.83 In addition, when auditing revenues and related receivables from special assessments, auditors may wish to consider examining the following:

- Documents supporting the board's decision to levy special assessments (minutes of meetings, contracts, or legal documents).
- The CIRA's governing documents indicating the criteria for assessing members.
- The CIRA's governing documents indicating the criteria for assessing developers (owners of unsold CIRA units), and the legal responsibilities of developers to pay those assessments.
- Expenditures, if any, related to special assessments (Expenses, including allocable costs such as income taxes, whether incurred or budgeted, should be directly associated with the assessment. If the assessment is for major repairs and replacements, relevant expenses include direct costs of repairing and replacing specific common property and indirect costs, such as liability insurance expense incurred during the construction period.)

.84 It also should be mentioned that as CIRAs age, borrowing from banks has become common practice. The aging structures have resulted in major component deterioration, in areas such as concrete spalling of exterior walls, balconies, garages, and common area structural damages, as well as elevator malfunctioning, and boilers and cooling towers repairs or replacements, just to name a few. Payment terms vary considerably, as banks have been very competitive. Larger CIRAs may even go to banks for working capital loans, with the intention of restoring adequate working capital with higher assessments in a short period of time. However, in light of the current economic conditions, it is conceivable that banks will be more stringent in their underwriting guidelines for CIRA loans.

Update on Accounting Projects That May Be Relevant to CIRAs

.85 Accounting standard setters are addressing several issues that could affect CIRAs. Although final pronouncements may not be issued and effective for some time, you may want to acquaint yourself with how the issues being addressed may change existing practice and affect your CIRA clients. Some clients will require assistance to understand or otherwise prepare for any new accounting guidance.

Special Assessments and Deferred Revenue

.86 Some CIRAs receive loans, such as Small Business Association loans, to pay for common property or other capital improvements. For example, CIRAs may receive loans to pay for replacement of common areas that have been damaged or destroyed by natural disasters, such as earthquakes and hurricanes. In conformity with the CIRA Guide, those improvements are frequently expensed as incurred, rather than capitalized and depreciated. Some of the loans are made to the CIRA subject to the CIRA assessing its members for amounts equal to the present value of the loan obligation, with the assessment generally payable with interest in amounts and in periods matching the loan amortization, although variations on this assessment model exist. A typical scenario is for the lender to require that the loans be secured by the special assessment receivable. Owners agree to the special assessment with the understanding that it is designated for repayment of a loan that is undertaken to finance capital improvements. Questions have arisen about CIRAs reporting special assessments designated for future loan payments in circumstances in which the loans are entered into for purposes of financing capital improvements that are expensed as incurred.

.87 Paragraphs 4.12 to 4.15 of the CIRA Guide discuss, among other matters, accounting for special assessments and deferred revenue. The Guide provides that all assessments, including special assessments

and periodic assessments for funding future major repairs and replacements, should be reported as revenue in the period in which they are assessed, regardless of whether they have been collected or expended, subject to the exception in the following sentence. Paragraph 4.12 of the Guide provides as follows:

Deferred revenue may include items such as special assessments designated for specific costs that have not yet been incurred. Such amounts should be reported as revenues when corresponding *liabilities and expenses* are reported. [*emphasis added*]

In other words, revenue from special assessments designated for specific costs that have not yet been incurred should be deferred and recognized when the corresponding liabilities and expenses are reported.

.88 Practice for reporting the kinds of special assessments described above (assessments for future loan payments in circumstances in which the loans are entered into for purposes of financing capital improvements that are expensed as incurred) is diverse. For example, some recognize the special assessment as a receivable and revenue when the assessment is levied. Others recognize the special assessment as a receivable when levied and recognize revenue when the expenses for making the capital improvements are incurred, which is frequently the same period in which the receivable is recognized and therefore frequently results in the same reporting as that described in the previous sentence. Others do not report the assessment as a receivable (or revenue) when it is levied, but instead report a receivable and revenue each year for the amount of the annual payment due.

.89 In considering whether a special assessment should be reported as a receivable, auditors should consider whether it meets the definition of an asset in FASB Concepts Statement No. 6, *Elements of Financial Statements*. Auditors should be alert that a special assessment that has been levied should likely be reported as an assessment receivable even though it is due in future periods, although exceptions could exist depending on the facts and circumstances of a particular assessment. The AICPA is considering whether it should address this issue further, such as through a staff Technical Practice Aid or through a pronouncement issued by the AICPA's Accounting Standards Executive Committee (AcSEC).

Proposed SOP Related to Property, Plant, and Equipment

.90 In July 2001 the AcSEC released for exposure a proposed SOP providing guidance on accounting for certain costs and activities relating to property, plant, and equipment (PP&E). For purposes of this proposed SOP, a project stage or timeline framework is used and PP&E assets are accounted for at a component level. Costs incurred for PP&E are classified into four stages: preliminary, preacquisition, acquisition-or-construction, and in-service. The proposed SOP requires, among other things, the following:

- Preliminary stage costs should be charged to expense as incurred, except for payments to obtain an option to acquire PP&E.
- Preacquisition and acquisition-or-construction stage costs should be charged to expense as incurred unless the costs are directly identifiable with the specific PP&E. Directly identifiable costs include only:
 - Incremental direct costs of activities incurred in transactions with independent third parties for the specific PP&E.
 - Certain costs directly related to specified activities performed by the entity for the specific PP&E.
 - Payments to obtain an option to acquire PP&E.

.91 Costs related to PP&E that are incurred during the in-service stage, including costs of normal, recurring, or periodic repairs and maintenance activities, should be charged to expense as incurred unless the costs are incurred for (1) the acquisition of additional PP&E or components of PP&E or (2) the replacement of existing PP&E or components of PP&E.

- Removal costs incurred during replacement of PP&E, except for certain demolition costs, should be charged to expense as incurred.
- During all stages, general and administrative costs and overhead costs, including costs of support functions, should be charged to expense as incurred.
- Costs of planned major maintenance activities are not a separate PP&E asset or component. Those costs should be charged to expense, except for acquisitions or replacements of components that are capitalizable under the in-service stage guidance of this SOP.
- A component is a tangible part or portion of PP&E that (1) can be separately identified as an asset and depreciated over its own expected useful life and (2) is expected to provide economic benefit for more than one year. If a component has an expected useful life that differs from the expected useful life of the PP&E asset to which it relates, the cost should be accounted for separately and depreciated or amortized over its expected useful life.

.92 Component accounting should begin at the time of acquisition or construction. Component accounting for a replacement should begin at the time of replacement. If an entity replaces a part or portion of a PP&E asset that has not been previously accounted for as a separate component, and the replacement meets the definition of a component, then the entity should capitalize the replacement, account for it as a separate component going forward, estimate the net book value of the replaced item, and charge that net book value to depreciation expense in the period of replacement.

- Amounts contractually recoverable by a lessor from a lessee, under the terms of an operating lease, for capital expenditures that benefit multiple lessees, should be accounted for as deferred revenue by the lessor and prepaid rent by the lessee. PP&E expenditures meeting the requirements of this SOP should be capitalized by the lessor.

.93 This SOP is proposed to be effective for financial statements for fiscal years beginning after December 15, 2001, with earlier application encouraged. Practitioners should be alert for the final issuance of the proposed SOP.

.94 Simultaneously with AcSEC's release of the proposed SOP, FASB issued an exposure draft of a proposed Statement of Financial Accounting Standards, *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant and Equipment* (an amendment of Accounting Principles Board [APB] Opinions No. 20, *Accounting Changes*, and No. 28, *Interim Financial Reporting*, and FASB Statements No. 51, *Financial Reporting by Cable Television Companies*, and No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, and a rescission of FASB Statement No. 73, *Reporting a Change in Accounting for Railroad Track Structures*). That proposed Statement includes amendments to certain FASB pronouncements that would be made in conjunction with the issuance of the proposed SOP.

Auditing and Attestation Pronouncements and Guidance Update

.95 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. The AICPA *Audit Risk Alert—2001/02* [AAM section 8010] contains a summary explanation of all these issuances. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

On the Horizon

.98 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that are especially relevant to the CIRA industry. Remember that exposure drafts are nonauthoritative and cannot

be used as a basis for changing GAAP or GAAS. The AICPA *Audit Risk Alert*—2001/02 [AAM section 8010] summarizes some of the more significant exposure drafts outstanding.

.99 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft.

<i>Standard Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
FASB	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees are now publishing exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process the submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

New Framework for the Audit Process

.100 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB expects to issue a series of exposure drafts in late 2001 and 2002. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "expectation gap" standards were issued in 1988.

.101 Some of the more important changes to the standards that are expected to be proposed are:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Among other things, this will improve the auditor's assessment of inherent risk and eliminate the "default" to assess inherent risk at the maximum.
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit.
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls.
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures.

These changes collectively are intended to improve the guidance on how the auditor operationalizes the audit risk model.

.102 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs.

On the Bookshelf

.103 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities Audit Guide* (product no. 012520kk)
- *Auditing Revenue in Certain Industries Audit Guide* (product no. 012510kk)
- *Audit Sampling Audit Guide* (product no. 012530kk)
- *Analytical Procedures Audit Guide* (product no. 012551kk)
- *Auditing Estimates and Other Soft Accounting Information Practice Aid* (product no. 010010kk)
- *Accounting Trends & Techniques—2001* (product no. 009893kk)
- *Preparing and Reporting on Cash- and Tax-Basis Financial Statements Practice Aid* (product no. 006701kk)
- *Consideration of Internal Control in a Financial Statement Audit—1997* (product no. 012451kk)
- *Use of Real Estate Appraisal Information 1997* (product no. 013159kk)
- *Common Interest Realty Associations Checklist* (product no. 008764kk)
- *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* (product no. 008883kk)

Audit and Accounting Manual

.104 The *Audit and Accounting Manual* (product no. 005131kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs, auditors' reports, checklists, engagement letters, management representation letters, and confirmation letters.

CD-ROM

.105 The AICPA is currently offering a CD-ROM product titled *reSource: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to the following AICPA professional literature products in a Windows format: *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related Audit Risk Alerts, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Educational Courses

.106 The AICPA has developed a number of continuing professional education courses that are valuable to CPAs working in the CIRA industry. Those courses include:

- *AICPA's Annual Accounting and Auditing Workshop* (2000–2001 edition) (product no. 737061 [text] 187078 [video]). Whether you are in industry or public practice, this course keeps you current and informed, and shows you how to apply the most recent standards.

- *Independence* (product no. 739035). This new interactive CD-ROM course will review the AICPA authoritative literature covering independence standards, including the newly issued SEC Practice Section (SECPS) independence requirements, SEC regulations on independence, and International Standards Board (ISB) standards.
- *Internal Control Implications in a Computer Environment* (product no. 730617). This practical course analyzes the effects of electronic technology on internal controls and provides a comprehensive examination of selected computer environments, from traditional mainframes to popular personal computer set-ups.

Online CPE

.107 The AICPA offers an online learning tool, AICPA InfoBytes. An annual fee (\$95 for members and \$295 for nonmembers) will offer unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today as our guest at infobytes.aicpaservices.org.

CPE CD-ROM

.108 The Practitioner's Update (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.109 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.110 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.111 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online

.112 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, AICPA Online offers information about AICPA products and services, career resources, and online publications.

CPA2Biz

.113 You can order AICPA products and obtain guidance about various accounting and auditing matters online at cpa2biz.com.

Other Helpful Web Sites

.114 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the Appendix [paragraph .117].

.115

This Audit Risk Alert replaces *Common Interest Realty Associations Industry Developments—2000/01*.

.116 The Audit Risk Alert *Common Interest Realty Associations Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share those with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to lwest@aicpa.org, or write to:

AAM Section 8090

Construction Contractors Industry Developments—2002/03

How This Alert Can Help You

.01 This Audit Risk Alert can help you plan and perform your construction industry audits. The knowledge that this Alert delivers can assist you in achieving a more robust understanding of the business environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the construction industry, and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert can assist you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert describes trends and issues facing most contractors in many of the construction markets in the country. National trends and industry-wide benchmarks can help you identify unusual financial statement relationships at the planning or final review stages of an audit. Once they are identified, you can direct your audit attention to those areas. However, broad national trends have their limitations. Keep in mind that your clients will be affected much more by local economic, political, and industry conditions that exist in the specific markets that your clients serve.

.04 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

The U.S. Business Environment

.05 As of the third quarter of 2002, anxious economists are downgrading their forecasts, and some crucial sectors of the economy are pushing the likelihood of a rebound into next year because of the abrupt slowdown in the economic recovery.

.06 For now, the overall economy is expanding, but sluggishly. Jobs are growing, but barely. And with a depressed stock market and reactions to further fears of terrorist strikes weighing on the national psyche, there is none of the exuberance that marked the recovery in the late 1990s.

.07 Analysts argue over whether the summer slump was just a pause in the rebound—perhaps as companies obsess about making sure their financial reports are accurate—or something more ominous. Even optimists say the once-slim chances of a double-dip recession, meaning a recession followed by a short period of growth only to be followed by another recession, are now up to 20 percent or more.

.08 The economy appears to be in a struggle between declining business confidence and strong consumer spending. Eventually, consumer demand should overcome business wariness unless cautious businesses cut so many jobs that consumers finally give up. The same dynamic was at work during the fall of 2001. After September 11th of that year, the business sector froze, but the consumer sector did not, and eventually consumer demand jump-started the economy.

.09 The underlying economic fundamentals remain relatively sound and point toward a moderate economic growth scenario. However, stock market weakness coupled with recent data releases has prompted downward forecast revisions.

Factors Affecting the Current Environment

.10 The confluence of many factors blend to create the uncertainty mix we are experiencing in these economic times. Among those factors are stock market woes, current monetary policy, spending policies of different sectors, and manufacturing activity, as discussed in the following sections.

Stock Market Woes

.11 Accounting scandals and corporate bankruptcies have generated tremendous investor uncertainty resulting in a dramatic decline in stock prices. While this is disconcerting, Wall Street scandals are not expected to play a *significant* adverse role on consumer spending or overall economic growth. Furthermore, any negative economic effects generated by stock price declines are expected by economists to be constrained to third quarter activity.

.12 Potentially, the decline in stock market prices can affect real economic activity by reducing consumer wealth and by adversely affecting consumer buying attitudes. Both conditions could reduce consumer spending activity.

.13 Stock prices declined 25 percent from July to September 2002—resulting in a \$2.6 trillion decline in wealth holdings. Most economists believe the decline in wealth will have a relatively small adverse impact on consumer spending. The wealth decline is primarily a temporary paper setback for investors. The underlying economic fundamentals are relatively sound, and the profit picture facing corporate America is showing mixed signs of improvement. This suggests that once investors regain confidence in corporate financial reporting, the market will rebound strongly.

.14 Furthermore, the current environment of low interest rates and stock uncertainty has prompted additional support to real estate activity, contributing to real estate appreciation.

Current Monetary Policy

.15 Some economists expected a monetary policy reversal to materialize during the fourth quarter of 2002. Most now assume that the Federal Reserve will not engage in a monetary policy tightening until the first quarter of 2003—at the earliest. The new assumption is made in the context of the recent declines in stock prices and the continued fragility of the economic recovery.

Consumer Spending

.16 The economic improvement during 2002 has been carried on the shoulders of the consumer, who accounts for roughly two-thirds of overall economic activity. However, there are serious concerns within the analytical community whether strong consumer spending can last long enough for the other sectors of the U.S. economy to become a net contributor.

.17 Recent data releases suggest that the consumer sector shows no signs of faltering. Aside from a moderation in third quarter consumer spending growth due to stock market woes, economists expect the current strength in consumer spending to endure—enabling other sectors of the economy to turn positive.

.18 Consumer buying attitudes aside, moderate income growth, low inflation, low interest rates, lower energy prices, and retailers' discounting activity should underpin relatively strong consumer affordability conditions.

Investment Spending

.19 Clearly, the dividing factor between a weak economic recovery and stronger growth performance will be the extent to which other sectors of the economy become net contributors to gross domestic product (GDP) growth. The timing and strength of a recovery in business capital spending will play a large role in determining the strength of economic activity during the next year.

.20 Corporate investment spending has been an area of sustained weakness for the U.S. economy for the past year. Business expenditures for new plant and equipment will not begin to recover until corporate profitability shows sustained growth. Throughout 2001, corporate profits recorded declines. To defend its bottom line, the corporate community cut back in investment spending.

.21 Sustained improvement in corporate profits should draw corporate America out of its capital-spending hiatus. The combination of sustained strength in consumer spending, improved conditions in the manufacturing sector, and renewed strength in corporate profits (as well as improvement in the stock market), is expected to lead to a small positive increase in business expenditures for new plant and equipment. Stronger gains in this area are expected throughout 2003.

Government Spending

.22 During the past few years, two key factors have influenced government spending—robust economic conditions and, therefore, robust government revenue sources, and a commitment by policymakers to insure a federal surplus. Things have changed. The slowdown in economic activity has slowed growth in government revenue. Expenses associated with the war on terrorism at home and abroad will add to government spending. Furthermore, Congress is less likely to trumpet the cause of a balanced budget in the context of increased government measures to improve domestic security.

.23 As a result, government spending through 2003 is expected to accelerate, contributing more to GDP growth. As a consequence, federal spending deficits are expected to persist at least through the first half of 2003. This trend has already been the experience during the first quarter of 2002, for which the government recorded a deficit of \$64 billion.

Manufacturing Activity

.24 Recovery in the manufacturing sector is critical in sustaining economic momentum. Despite an improved outlook, the sector remains weak. Although there are conflicting reports surrounding the manufacturing sector, economists believe that the sector is improving at a modest rate. The two key factors in this assessment are continued strength in consumer spending and a sustained lean inventory position. With these two factors in place, monthly fluctuations in durable goods orders play a less important role in the assessment of the ongoing recovery in manufacturing.

Sarbanes-Oxley Act

.25 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (the Act). The Act includes far-reaching changes in federal securities regulation that could represent the most significant overhaul since the enactment of the Securities Exchange Act of 1934. The Act creates the Public Company Accounting Oversight Board (PCAOB) to oversee the audits of public companies that are subject to the securities laws of the Securities and Exchange Commission (SEC). In addition, the Act prescribes a new set of auditor independence rules, new disclosure requirements applicable to public companies and insiders, and harsh civil and criminal penalties for persons responsible for accounting or reporting violations. The Act also imposes new restrictions on loans and stock transactions involving corporate insiders.

.26 A more complete summary of the Act is available on the AICPA Web site at www.aicpa.org/info/sarbanes_oxley_summary.htm. We discuss some of the provisions of the Act that may be of particular interest to publicly traded companies below.

.27 For public companies, the Act's most noticeable effects relate to corporate governance, an area of regulation traditionally left to state corporation laws. The Act will force many companies to adopt significant changes to their internal controls and the roles played by their audit committees and senior management in the financial reporting process. Most significantly, the Act imposes new responsibilities on CEOs and CFOs and exposes them to much greater potential liability for the information presented in their companies' financial statements, among other things.

.28 The Act includes the following changes to the law that took effect immediately or within 30 days of becoming law:

- *Certification of periodic reports; criminal sanctions for false certification.* The criminal provisions of the Act contain a new certification requirement that received little or no attention from commentators prior to the Act's enactment. This requirement, which carries criminal penalties, applies to any periodic report containing financial information (presumably including a Form 8-K). The certification requirement states that such a report must be accompanied by a written statement signed by the CEO and the CFO certifying that the report "fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934" and that the information "fairly presents, in all material respects, the financial condition and results of operation of the issuer." An officer who knowingly makes a false certification as to these matters may be subject to a fine of up to \$5 million and imprisonment of up to 20 years. This provision creates a separate and independent certification requirement that is not subject to SEC rulemaking and is effective immediately. The certification requirement goes beyond the certification discussed below and is required for periodic reports beginning with an issuer's next filing. All issuers should carefully consider these provisions with their legal counsel well in advance of making their next filing.
- *Certification accompanying 10-Ks and 10-Qs.* The Act directed the SEC to issue rules within 30 days of becoming law to require the CEO and the CFO of a reporting company to personally certify the company's reports on Form 10-K and Form 10-Q. The certification must state that the officer has read the report and must confirm, based on the officer's knowledge, the absence of material misstatements or omissions and the fair presentation of the accompanying financial information. The certification also must provide statements regarding the company's financial controls and confirm that the officers have made certain specified disclosures to the company's auditors and audit committee.
- *Audit committees.* Under the Act, audit committees are subject to heightened independence standards (including a prohibition of any non-independent members), and companies are required to grant their audit committees specific levels of control over the company's relationship with its auditors. These control levers would include, for example, exclusive hiring, firing, and spending authority. Audit committees are required to establish rules for (1) the treatment of complaints received by the issuer regarding accounting, internal accounting controls, or auditing matters, and (2) confidential submission by employees of concerns regarding questionable accounting or auditing matters.
- *Insider transactions.* Loans to directors and executive officers are prohibited in almost all circumstances, as are the modification or forgiveness of currently outstanding loans. Insider stock transactions must be reported within two business days of the date of the transaction.
- *Forfeiture of CEO and CFO compensation.* Financial restatements arising from misconduct could result in forfeiture by the issuer's CEO and CFO of bonuses paid to them and profits from their stock sales during the year following the original reporting of the results. There is no provision requiring that the CEO or CFO have any culpability in the misconduct. However, the Act permits the SEC to exempt any person from the application of this provision, as it deems "necessary and appropriate."

- *Statute of limitations in securities fraud litigation.* The statute of limitations for private securities fraud litigation has been significantly lengthened to the earlier of two years from the date of discovery or five years from the date of the violation.

.29 Additional changes that will take effect in the following months, as the SEC issues rules implementing the changes and as auditors become registered with the PCAOB, include, among other things:

- *Auditor independence.* Accounting firms are prohibited from providing most nonaudit services for public companies they are auditing. Tax services and some other nonaudit services may be provided if preapproved by the audit committee. Most of the other nonaudit services that have been provided by accounting firms in the past, however, are absolutely prohibited, including design and implementation of financial information technology (IT) systems, appraisal or valuation services, and legal services and expert services unrelated to the audit, among others.
- *Additional disclosures in periodic reports.* Periodic reports must include disclosures regarding the issuer's internal controls; nonaudit services provided by the issuer's auditor; and material off-balance-sheet transactions, arrangements, or obligations. The reports must disclose whether the issuer has adopted a code of ethics for senior financial officers and, if not, why not. Companies must disclose any change to the code or any waiver of its provisions in a Form 8-K. The reports must disclose whether the issuer's audit committee includes at least one member who constitutes a "financial expert" according to criteria specified in the Act (generally a person with experience as a CFO or controller or similar accounting experience).
- *Adjustments identified by auditors.* The Act requires that any periodic report that contains generally accepted accounting principles (GAAP) financial statements "reflect" all material correcting adjustments that have been identified by the issuer's auditors in accordance with GAAP or the rules and regulations of the SEC.
- *Discussions between auditors and audit committees.* Auditors are specifically required to discuss certain matters with the audit committee, including (1) critical accounting policies and (2) alternative accounting treatment of financial information that has been discussed with management, the ramifications of the alternative treatment, and the treatment preferred by the auditors.
- *Auditor conflict of interest rules.* An accounting firm may not perform audit services for an issuer whose CEO, CFO, controller, or chief accounting officer participated in the audit of the issuer on behalf of the accounting firm during the previous year.
- *Pro forma financial information.* Pro forma financial information must be accompanied by a reconciliation with financial information that conforms to GAAP.
- *Disclosure of misconduct by attorneys.* The Act directs the SEC to adopt rules of professional responsibility requiring attorneys to report a material violation of securities laws or breach of fiduciary duty to the issuer's chief legal officer or CEO, and thereafter, if there is not an adequate response, to the audit committee or the board of directors.

.30 The Act applies only to publicly traded companies. It will have limited direct impact on construction firms, because most of the firms in the industry are privately held. With all the current attention on corporate governance issues, however, some private firms may choose to re-examine their own policies or emulate the Act's provisions in that area.

.31 Some public construction firms say they already comply with at least some of the new legislation's elements. But other firms are looking at steps to improve governance. One idea for taking improvement measures is introducing "continuing education" for audit committee members on percentage-of-completion accounting for construction contracts, for example.

Construction Industry Overview

.32 The construction industry consists of individuals and companies engaged in diverse types of activities that are defined as construction in the *Standard Industrial Classification Manual*. In the United States, the construction industry represents billions of dollars of economic activity, consists of several hundred thousand business entities that are widely dispersed throughout the country, employs a large labor force, and contributes a relatively constant annual percentage (approximately 5 percent) to the gross national product (GNP).

Are All Contractors Alike?

.33 No, not all contractors are alike. Not only do contractors offer different kinds of services; they also have different capabilities. Consequently, the economic and audit risks associated with contractors vary. For example, the business risks and issues facing residential home builders may be very different from those risks encountered by contractors and subcontractors who work on commercial office buildings. You have to consider the contractor within the context of the market segment that he or she serves to better understand the industry and what you need to know about that industry (segment) as an auditor. This Alert describes conditions for the following kinds of contractors.

- *Residential building.* These contractors are engaged in the construction of new single-family and multifamily residential buildings. A number of contractors are involved strictly in the remodeling and maintenance of residential buildings.
- *Nonresidential building.* These contractors specialize in the construction of commercial buildings, such as offices and industrial, retail, and lodging facilities.
- *Heavy construction.* These contractors are engaged in projects such as highways, bridges, dams, railroads, and airports.
- *Specialty trade.* These contractors specialize in work such as painting, electrical, roofing, plumbing, and other specialty trades. Contractors in the specialty trades frequently work as subcontractors on a wide variety of projects.

.34 The organizational structure, resources, and capabilities of contractors vary with the type of activity, and each kind of contractor can pose different accounting and auditing problems. However, certain characteristics are common to all entities in the construction industry. The most basic common characteristic for construction entities is that work is performed under contractual arrangements with a customer. Regardless of the type of construction activity or the type of contractor, a contractor typically enters into an agreement with a customer to build or make improvements on a tangible property to the customer's specifications. Other characteristics common to all contractors and significant to auditors include the following:

- A contractor normally obtains the contracts that generate revenue or sales by bidding or negotiating for specific projects.
- A contractor bids for or negotiates the initial contract price based on an estimate of the cost to complete the project and the desired profit margin, although the initial price may be changed or renegotiated.
- A contractor may be exposed to significant risks in the performance of a contract, particularly when the contract is a fixed-price contract.
- Customers frequently require a contractor to post a performance and a payment bond as protection against the contractor's failure to meet performance requirements.
- The costs and revenues of a contractor are typically accumulated and accounted for by individual contracts or contract commitments extending beyond one accounting period, which complicates the related management, accounting, and auditing processes.

Funding Sources for Construction

.35 To better understand the dynamics of the construction industry, it also helps to consider its source of funding. *Publicly* funded construction is financed by federal, state, and local governments and is driven by the political and legislative processes. For example, the passage of bond measures to fund school construction has resulted in increased construction activity in many areas during the past year. *Privately* funded construction is financed by private owners, such as real estate development companies, home builders, and various business entities. The need for privately funded construction is influenced by a wide variety of economic forces, including the availability of capital, the status of the local and world economy, the level of interest rates, and demographics.

Industry and Economic Developments

General Industry Trends and Conditions

.36 During the first eight months of 2002, the steady volume for total construction compared to 2001 was the result of a varied performance by major sector. Residential building maintained a 9 percent lead over the previous year, nonbuilding construction was up 1 percent, and nonresidential building was down 9 percent. By geography, total construction performed as follows during the January-August period: the Northeast, up 7 percent; the South Atlantic, up 6 percent; the Midwest, up 1 percent; the West, unchanged; and the South Central, down 9 percent. Overall, total construction was just about the same as that indicated during the same period in 2001.

.37 David Wyss, chief economist for Standard & Poor's, predicts that GDP will grow at an annual rate of 3-1/2 percent during the second half of 2002 and then inch up to a 4 percent annual rate during the first half of 2003. However, any mild economic recovery like the one Wyss predicts does not seem to have enough strength to pull construction up with it. In 2002, construction increasingly became two distinct markets. Housing and public construction continued their long expansion, but many of the private nonresidential building markets are close to, if not in, recession. Through July, construction saw year-to-date declines of 44 percent for office buildings, 29 percent for hotels, 25 percent for commercial buildings, and 17 percent for the already depressed industrial market, according to the U.S. Department of Commerce. During the same period, public markets experienced year-to-date increases of 24 percent for hospitals and 16 percent for schools, while highway, water, and sewer work remained strong. In addition, low interest rates continued to keep the housing market growing.

.38 The construction industry still faces the following uncertainties: Will the economy recover fast enough to snap the private nonresidential building market out of its funk? Or will growing federal and state budget deficits eventually pull the plug on the public sector? Finally, will a poor job market and falling consumer confidence overcome the lure of low interest rates and end the housing market's remarkable run?

.39 Construction economist Bill Toal remains cautiously optimistic for the remainder of 2002 and beyond. He is forecasting a 1.6 percent drop in total construction for 2002, with an expected increase of 1.4 percent in 2003. Toal indicated that, while some sectors remain weak, the economy is now showing signs of improvement. Some of the more apparent signs of recovery include an increase in industrial production and record low inflation and interest rates. Due to these low interest rates, consumer spending continues to be strong, and auto sales and housing starts are still robust. As a result, residential construction remains stronger than expected, although a small dip is expected before the end of the year.

.40 While industrial construction had slipped in the beginning of 2002, it has recently shown signs of improvement. However, the corporate office market is still declining, as there is the impression that things

may be worse than previously thought in the corporate sector due to recent financial scandals. Commercial and industrial real estate were previously overbuilt, and that overbuilding contributed to the high office vacancy rate, which has increased from 7 percent last year to over 15 percent in 2002. While the job loss rate has declined, layoffs and downsizing continue to contribute to the imbalance between available office space and corporate need for that space.

.41 Earlier forecast numbers for residential construction have now been revised upward. Housing starts were predicted to drop below 1.5 million for the year from 1.6 million in 2001, but are now expected to finalize at 1.55 million starts for 2002. Industrial and commercial construction have dropped off significantly in 2002, and economists suggest this is a red flag for this segment of the market, with a forecast drop of 10.8 percent by year's end. However, the industrial and commercial sector is forecast to begin recovering with a 5 percent increase anticipated in 2003.

.42 One of the most widely used measures of construction activity is *construction put in place*, which is tracked monthly by the Bureau of Statistics at the U.S. Department of Commerce. The *value of construction put in place* is a measure of the value of construction installed or erected at the site during a given period. For an individual project, this includes:

- New buildings and structures
- Additions, alterations, major replacements, and so on, to existing buildings and structures
- Installed mechanical and electrical equipment
- Installed industrial equipment, such as boilers and blast furnaces
- Site preparation and outside construction, such as streets, sidewalks, parking lots, utility connections, and so on
- Cost of labor and materials (including owner supplied)
- Cost of construction equipment rental
- Profit and overhead costs
- Cost of architectural and engineering (A&E) work
- Any miscellaneous costs of the project that are on the owner's books

.43 The total value-in-place for a given period is the sum of the value of work done on all projects underway during this period, regardless of when work on each individual project was started or when payment was made to the contractors. For some categories estimates are derived by distributing the total construction cost of the project by means of historic construction progress patterns.

.44 Exhibit 1, "New Construction Put in Place," presents details of construction put in place for various market segments. (Note that the amounts are in billions of dollars and represent seasonally adjusted annual rates.) To add some perspective, in January 1992, at the start of the current construction boom, the total new construction put in place was \$452 billion, as compared with the estimated 2001 amount of \$830 billion—a gain of more than 83 percent during the period.

Exhibit 1

New Construction Put in Place
(Billions of Dollars—Seasonally Adjusted Annual Rate, in Current Dollars)

	<i>August 2002</i>	<i>August 2001</i>
Private construction	\$627.1	\$644.3
Public construction	202.7	201.2
Total construction	829.8	845.5
Residential building	407.5	387.3
Nonresidential building		
Office	36.3	48.6
Industrial	14.9	30.8
Retail and other commercial	51.8	58.5
Hotels and motels	9.4	14.2
Other nonresidential	46.8	44.6
Total nonresidential	159.2	196.7
Telecommunications	0.0	0.0
All other private construction	60.4	60.3
Total private construction	627.1	644.3
Highways and streets	51.3	55.8
Infrastructure	24.9	19.8
Educational buildings	63.1	54.3
Other public buildings	30.8	33.9
Other public construction	32.6	37.4
Total public construction	202.7	201.2

Help Desk—You can access current statistics of construction put in place and other construction industry information at www.census.gov.

Private Construction

Residential Building

.45 The residential building segment of the construction industry includes new single- and multi-family housing as well as residential repairs and improvements. Conditions with the most impact on the demand for residential construction include the following.

- *Housing affordability.* Housing affordability is the extent to which potential buyers have the means to purchase a home. Affordability can be measured in several ways by considering average home prices and income levels. For example, some analysts create an “affordability index” by comparing median home prices to household income levels. As income levels get closer to housing prices, the average home becomes affordable to more local residents.

- *Interest rates.* Most homes are financed, therefore interest rates have a tremendous effect on the affordability of housing. As interest rates rise, the cost of home financing increases; as they fall, the cost of financing decreases. However, interest rate changes do not have an immediate impact on home buying markets—usually rates have to be in effect for several quarters to reverse home buying trends.
- *Demographics.* Shifts in demographics can have a significant impact on housing demand. For example, the aging of the U.S. population has increased demand for low-maintenance and multifamily housing. A large number of baby boomers are now entering their peak earning years, which is expected to affect the affordability and demand for single-family homes.
- *Market velocity.* According to industry sources, more than half of all home improvements occur within 18 months after a new owner moves in, or within 12 months before the home is sold. Thus, during times when new and used home markets are active, residential remodeling and improvement activity also increases.

.46 As one of the main drivers of construction's recent 10-year expansion, homebuilding continues to prop up the industry's growth as other sectors go into decline. With the Federal Reserve Board setting its benchmark for interest rates at its lowest level in 40 years, and with strong demographics, homebuilding has shrugged off stock market woes and growing unemployment to keep growing.

.47 Housing clearly was outperforming its commercial building counterpart even before the commercial market began to weaken last year. At the peak of the expansion between 1997 and 2000, the value of single-family housing increased 35 percent, compared to a 20 percent increase in the value of private nonresidential buildings, according to the U.S. Department of Commerce.

Nonresidential Building

.48 As previously stated, industrial and commercial construction dropped off significantly in 2002, with a forecast drop of 10.8 percent by the end of the year. In addition to the general state of the economy, the following trends in the commercial real estate industry are particularly relevant for contractors.

- *Demographic shifts.* For years now, we have watched the baby boomers age. The first part of this generation is now beginning to retire and enter the "active leisure" years. Meanwhile, the number of people in their primary working years (ages 25 to 44) continues to decline. Real estate analysts predict that these trends will have the following impact on the demand for real estate.
 - The aging baby boomers will increase the demand for properties that are tailored to meet their needs. These properties are not limited to elder care facilities or golf course communities. Because they are a group interested in active leisure pursuits, the demand for a wide variety of projects such as resorts, entertainment, and recreational venues is expected to grow. Additionally, the aging baby boomers will begin to have an effect on the retail industry and the related demand for retail space.
 - Most economists are predicting that the shrinking size of the work force will result in most businesses facing the kind of labor shortages that have plagued the construction industry for the past few years. Companies will have to address employee satisfaction and retention issues, which will affect the demand for commercial real estate. For example, the increased practice of telecommuting may ultimately reduce the demand for office space.
- *Electronic commerce (e-commerce).* For the past few years, as the popularity of online shopping has grown, some business observers have predicted the slow demise of the traditional "brick and mortar" retail outlet. In fact, that does not appear to be happening. Although online retailing, also known as electronic retailing or e-tailing, has grown significantly, the evidence now suggests that shopping over the Internet may actually increase traffic at the mall. Most analysts assumed that online shopping was done at the expense of traditional retailing, but it appears that the retail market "pie" is actually getting larger.

One area in which e-commerce has affected demand is in the industrial sector of the real estate market. Previously, many online retailers were set up to be “virtual companies” that essentially processed sales orders. Now, many of these companies are holding inventory and taking control of the distribution process. Large online retailers such as Amazon.com need large amounts of warehouse space to store their ever-increasing inventories, and this need is beginning to be felt in the industrial construction market.

Although nonresidential construction is expected to rebound, with economists predicting a 5 percent increase in 2003, some market segments will fare better than others. The following discussion describes the trends in each of these nonresidential construction segments.

Office Market

.49 The office market has fallen farther and faster than anyone thought possible a year ago. The vacancy rate, which reached a cyclical low point of 8.5 percent in the third quarter of 2000, currently stands at 15 percent, well above the 10 percent rule of thumb for a balanced market. By 2003, with the construction pipeline largely depleted and the potential for a rebound in demand, the market should be poised to tighten again, moving from the saturation phase to the recovery phase of the real estate cycle. Speculative construction (construction of unleased space), which is rapidly disappearing, may be warranted again as early as 2005.

Industrial Market

.50 The industrial market is struggling under the weight of the recession, but there are pockets of activity amidst the gathering quiet. Hardest hit are the big box warehouse-distribution buildings of 100,000 square feet and up. These were the provinces of national, publicly traded retailers, which have been quick to cut back operations.

.51 Despite weakness in certain areas and product types, the industrial market has not followed the pattern of decline in the office market sector because the construction cycle is not as steep. An industrial development project can be completed in six to nine months, while an office project requires more than twice that long. At year end 2001, the industrial market had less space under construction than the office market, although the total industrial inventory in the United States is three times as large as the office inventory.

.52 One corner of the market that remains in high demand is for the general industrial buildings that are less than 100,000 square feet. As a primary user of this type of facility, smaller, privately held companies have been slow to downsize in the current cycle, and low interest rates are a boon to owner-users who want to purchase their buildings.

Retail and Other Commercial Markets

.53 The year 2002 has been a challenging one for the nation’s retailers. While there were a few strong performers (such as Wal-Mart), most of the nation’s merchants experienced weakened sales results and reduced profit margins as they struggled in a weakened economy. With weakened or declining sales, many department store chains have reduced expansion plans and closed or sold underperforming units.

.54 Moving forward into 2003, rising unemployment coupled with a stagnant global economy and fear of continued episodes of terrorism may restrict sales gains. Still, the aggressive steps taken by the Federal Reserve should help stabilize prices and lift demand over the year.

Hospitality Market

.55 Occupancies in the hospitality sector will suffer from a continued slowdown in corporate travel in 2002. The demand for lodging is being rocked by a variety of economic and security concerns, including the

failure of the economy to strengthen to the extent most economists had forecast, the negative wealth effect from the sharp decline in stock values in July, the erosion in consumer confidence, increasing frustration with the inconvenience of air travel, and heightened fears of U.S. action against Iraq.

.56 The economy and the specific effects of the recent events will restrain lodging demand growth and encourage continued discounting through the end of 2002, according to PricewaterhouseCoopers. They are forecasting revenue per available room (RevPAR) to decline 2.3 percent in 2002. Without a catalyst for strong rebound in business travel in the short term, RevPAR will increase by only 3.5 percent in 2003. A more robust outlook is delayed to 2004, when RevPAR is expected to improve by 5.6 percent.

Help Desk—The demand for construction can vary significantly among different geographic regions. One of the most comprehensive analyses of commercial real estate demands and construction activity is published by the Society of Industrial and Office Realtors (SIOR). Annually, SIOR publishes *Comparative Statistics of Industrial and Office Real Estate Markets*, which provides detailed real estate and construction statistics on all of the country's larger cities. You can purchase and download this publication directly from the publications section of the SIOR Web site at www.sior.com.

Public Construction

.57 Compared to 2001, public construction put in place in 2002 increased by less than 1 percent, from \$201.2 billion to \$202.7 billion. School construction will remain strong through the final two quarters of the year, as will public works. In particular, public works has and will continue to benefit from the U.S. Transportation Equity Act for the 21st Century (TEA21), which provides federal funding for transportation construction. This high-level funding, which has been in place since the Act was passed in 1998, will continue to trickle down through public works construction and help maintain that market segment's strength.

Surety Industry Trends

.58 The surety industry is critical to the well-being of the construction industry. Nearly half of all work performed by contractors is bonded, and so any change in the surety market will have a significant effect on the construction industry.

.59 Early in 2002, news stories questioning the strength and viability of the surety industry began to surface. Even before the economic crisis and other calamitous events of the past 12 months, industry analysts were reporting on the tightened surety bond market and predicting possible effects on the construction industry.

.60 In general, the causes of the changes in the surety industry include:

- Reinsurers tightening the terms and conditions of their agreements with sureties and raising rates because of generalized losses in the primary insurance and surety industries.
- Consolidation of the reinsurance and primary surety market, as reputable surety companies are acquired, close shop, or discontinue writing surety.
- Mounting claims and losses.
- Losses cutting into healthy profits.
- Contractors in default.
- Relaxed underwriting standards by sureties.

Certainly, the surety industry is in a state of flux that has not been experienced in many years. Many surety companies have been heavily involved in commercial surety (including guaranteeing certain financial commitments). Many of the larger surety companies are currently involved in litigation with certain financial institutions. Should these companies lose the litigation, it is possible that more surety companies may disappear.

.61 In addition, a large judgment was handed down against two of the nation's larger surety companies. Although most of the loss is reinsured, this loss will strap those reinsurers and may make other reinsurers reluctant to enter the primary surety market.

.62 The changes in the surety industry will affect each contractor differently. Some may not even notice much of a change. Those most affected will be the large contractors (premiums of \$500,000 and greater) and small contractors (premiums of \$25,000 or less). Because of fewer sureties available, large contractors may need co-sureties to handle needs on very large projects. Small contractors, on the other hand, may see considerably higher rates, requests for more detailed information, and a longer timeline to obtain surety credit. The least affected group will be the mid-sized contractors (premiums between \$25,000 and \$500,000), although sureties may require more information and expect it in a timely manner.

Construction Cost Trends

.63 The construction industry's new split personality is reflected in the cost trends reported in the *Engineering News Record's* "Third Quarterly Cost Report." Of the 29 construction material and equipment price indexes tracked by the Bureau of Labor Statistics (BLS), 11 show increases of between 1 percent and 5 percent over a year ago. Ten indexes show declines between 1 percent and 5 percent, while 6 show relatively stable price levels. Outside this group, prices are up 14 percent for gypsum wallboard and down 7 percent for aluminum sheet.

Materials

.64 The construction industry has typically been resistant to price hikes caused by temporary anomalies in supply and demand. Also, in the past, the inflation of construction material costs was widespread and developed rather slowly, giving contractors plenty of time to adjust. However, recent evidence suggests that these two characteristics of the cost structures of contractors are beginning to change.

.65 Prices are falling for materials trapped on the depressed side of the industry. For example, prices for fabricated structural steel used for buildings have fallen 2.4 percent below last year's level, according to the BLS producer price index for July. Materials with a high end-use in public works or housing are showing some price strength. However, of these, only gypsum wallboard and paving asphalt report price gains in the double digits. Paving asphalt prices are being driven by rising prices for crude oil, while wallboard prices are rebounding from last year's depressed levels.

.66 Variations in the price and availability of materials are not uniform across all kinds of building projects. Cost trends for building materials include the following:

- *Housing materials.* As described earlier in this Alert, the residential housing market has been robust. The resulting increase in demand for housing materials has led to an increase in the cost of key housing materials, such as lumber, insulation, bricks, and gypsum wallboard.
- *Concrete.* Throughout 2002, concrete prices have been on the increase. The string of price hikes has raised prices 9 percent above last year's level.
- *Petroleum-based materials.* Petroleum-based materials include paving asphalt, polyvinyl chloride (PVC) pipe, and some roofing materials. War jitters are adding an average \$4 premium on the price of a barrel of oil, according to the forecasting firm DRI-WEFA of Lexington, Massachusetts. Since the beginning of the year, the price of the benchmark West Texas Intermediate crude oil has steadily increased, and by August 2002 it was 47 percent above the December 2001 level.
- *Steel and aluminum.* By the third quarter of 2002, the full effect on prices of new U.S. tariffs on imported steel became clear. On March 5 President Bush placed a 30 percent tariff on most flat products, such as plate and sheet. Most of the so-called long products, which include construction

materials such as structural steel and reinforcing bar, were excluded from the tariffs. Prices for flat products increased 41 percent from the time the tariffs were put in place August 2002, according to the composite flat products price compiled by the forecasting firm DRI-WEFA. During the same period, the firm's composite price for long products rose just 2.5 percent.

Labor

.67 Labor costs continued to be the main inflation driver during the third quarter. However, both union and nonunion sectors seem to have taken into account weaker market conditions and growing unemployment in 2002 wage negotiations. In August 2002, the unemployment rate for both blue and white collar construction workers rose to 9.5 percent according to the BLS. Up from a low of 6.4 percent in 2000, it is now at its highest level since 1994.

.68 Open-shop contractors say that because of weaker market conditions, they only expect to increase wages for their workers by 4.2 percent, according to a survey conducted by Personnel Administration Services (PAS), Saline, Michigan. This would be down from a 4.8 percent wage increase that the same group of contractors awarded in 2001 and a 5.3 percent wage increase reported by PAS in 2000.

.69 The union sector also reeled in wage hikes this year, according to a survey of 165 settlements by the Construction Labor Research Council (CLRC) of Washington, D.C. Wage and benefit settlements reported to CLRC so far in 2002 have resulted in an average first-year increase of \$1.40, or a 4.2 percent annual wage hike. In 2001, union wages showed a 4.6 percent annual increase for the same period.

.70 Labor costs also are getting a kick from higher workers' compensation rates. This year, the average premium per \$100 of payroll increased 9 percent for structural ironworkers, 7 percent for bricklayers, and 2 percent for carpenters, according to an annual survey by the New York City-based insurance broker Marsh USA Inc.

.71 These rate increases just may be the first tremor in a major upheaval in workers' compensation rates expected to hit the market by next year. Industry sources expect to see double-digit rate increases in 2003.

Help Desk—The *Engineering News Record* publishes detailed quarterly cost studies. These cost studies track average prices for a wide variety of materials and labor classifications in major cities across the country. You can access summaries of the studies at the magazine's Web site at www.enr.com.

.72 Construction cost trends, like those mentioned in this section of the Alert, must be considered in the estimates developed by construction contractors. See "Estimating Costs to Complete" in the following section of this Alert for a discussion of audit considerations related to these cost estimates.

Current Audit Issues and Developments

Assessing Audit Risks in the Current Environment

.73 The proper planning and execution of an audit has always required you to have a thorough understanding of the construction industry and the nature of your client's business. For most audit firms, this in-depth understanding means that the most experienced partners and managers must become involved early and often in the audit process. In today's construction environment, your judgment, knowledge, and experience are even more important than they were in the past.

.74 During the past several months, the U.S. economy has suffered significant declines and uncertainties: consumer confidence has dropped, plant closings and layoffs have increased dramatically, profit margins for many companies have slipped, and many companies have failed. Periods of economic uncertainty like

this lead to challenging conditions for companies due to potential deterioration of operating results, increased external scrutiny, and reduced access to capital. During such times, professional skepticism should be heightened and the status quo should be challenged.

Audit Planning

.75 As you prepare to conduct quarterly reviews and annual audits of construction contractors, realize that your clients may be working in a new business environment as a result of the stagnant economy. If this is the case, you must gain an understanding of this new environment to plan and perform the audit adequately. Although not all construction contractors are directly affected by the economic downturn, most in the industry will experience some indirect effects. Many clients will experience effects related to shifts in demand, collectibility of accounts receivable, or valuation of their investments.

Evaluating Audit Risks

.76 Your evaluation of audit risk should start with a good understanding of your client's business. To develop this understanding, you should be knowledgeable about the entity's strategies for dealing with business conditions—both current conditions and those most likely to exist in the near future.

.77 As we mentioned in the first part of this Alert, business conditions in the construction industry vary greatly across contractor types and from region to region. The risks associated with building office buildings are different from those faced by a homebuilder; a contractor in the Northeast faces different issues than a similar contractor located on the Pacific Coast. For this reason, you must be knowledgeable about contractor types and the location in which the entity operates.

Professional Skepticism

.78 The third general audit standard stipulates that due professional care be exercised in planning and conducting an audit engagement. Due professional care requires that you exercise professional skepticism in gathering and evaluating audit evidence. Although you assume neither management dishonesty nor unquestioned honesty, you should consider the increased risk associated with the potential increases in external pressure on management during the current economic climate. For a more detailed discussion of these risks, see "Consideration of Fraud" later in this section of the Alert.

.79 ***Earnings Management Challenges.*** As a result of perceived external pressures, companies may be tempted to manage earnings by using nonrecurring transactions or through changing the method of calculating key estimates, such as reserves, fair values, or impairments. Companies may also adopt inappropriate accounting practices resulting in improper recognition or omission of financial transactions. For material nonrecurring transactions that may require special disclosure to facilitate the readers' understanding of the reported financial results, apply the guidance in Accounting Principles Board (APB) Opinion No. 20, *Accounting Changes*, in reporting the effects of changes in estimates. Inappropriate transactions or accounting practices that may result in errors requiring adjustments of financial statements include, for example, premature recognition of revenue, failure to appropriately accrue for contingent liabilities that are probable and estimable, and failure to record unpaid purchase invoices. Additionally, you should be particularly skeptical of fourth-quarter events that result in significant revenue recognition, loss accrual, or noncash earnings.

.80 The appropriate level of professional skepticism is needed when corroborating management's representations. Management's explanations should make business sense. Additionally, you may need to consider corroborating management's explanations with members of the board of directors or the audit committee.

.81 ***Indicators of Reporting Risk.*** Other indicators of potential increased accounting and reporting risk calling for increased professional skepticism include:

1. Liquidity matters

- The company is undercapitalized, relying heavily on bank loans and other credit, and in danger of violating loan covenants.
- The company is having difficulty obtaining or maintaining financing.
- The company is having difficulty obtaining surety credit.
- The company is showing liquidity problems.

2. Quality of earnings

- The company is changing significant accounting policies and assumptions to less conservative ones.
- The company is generating profits, but not cash flow.

3. Management characteristics

- Management's compensation is largely tied to earnings.
- The company appears vulnerable to the weakening economic conditions and management is not proactive in addressing changing conditions.
- There is a significant change in members of senior management or the board of directors.

Auditing Construction Contracts

.82 Auditors of construction contractors should recognize that the traditional balance sheet approach to auditing usually is not adequate when performing an audit of a contractor. The financial statements of a contractor are built from the financial results of individual contracts. Therefore the more effective audit approach requires you to focus on the terms, financial estimates, and results of individual contracts, rather than the contract-related balance sheet that accounts for the company as a whole.

.83 The authoritative guidance on auditing contractors is contained in the annual AICPA Audit and Accounting Guide *Construction Contractors*. Included in this Audit and Accounting Guide is Statement of Position (SOP) 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, which is the primary authoritative accounting guidance for construction contractors.

.84 Auditing construction contractors is complex. Such businesses rely on accurate and reliable estimates to operate their business as well as to prepare financial statements. Therefore, it is critical that you gain an understanding of the contractor's significant estimates and assumptions that are used in operating the business. Remember that the audit of a construction contractor's financial statements is an audit of the contractor's ability to estimate.

.85 There are several things to consider when auditing estimates: understand the internal control structure surrounding the estimate, consider the contractor's history of accurate estimates, compare actual to budgeted figures, and review subsequent events.

.86 The Professional Issues Task Force of the AICPA has identified certain procedures to consider when performing an audit of a construction contractor. They are:

- *Read significant contracts.* This procedure may seem obvious, but it is necessary to identify the terms of the contract, any guarantees, penalties or incentives, as well as cancellation and postponement provisions. For example, reading the contract might help you identify the party responsible for additional expenses incurred as a result of weather delays.

- *Identify unique contracts.* Increase the amount of testing and professional skepticism related to these contracts because they increase the risk of improper estimates and, thus, improperly stated financial statements. If a company cannot reasonably estimate the cost or progress of a contract it should account for the contract under the completed-contract method.
- *Understand the company's cash flow and how the company will manage expenses.* In this industry, expenses are often payable prior to receiving the related cash from the contract revenue. Therefore, understanding how to realistically anticipate and manage cash flow and expenses can become critical for survival. Unfortunately, some companies win long-term contracts but cannot fund the projects long enough to realize the revenue.
- *Recognize that the length of the contract period can directly affect the quality of related estimates on contracts.* The longer the contract period, the greater the risk that an estimate will be incorrect. Also, the closer a contract is to completion, the less risk there is of an incorrect estimate. Finally, the more variables inherent in an estimate, the greater the risk that an estimate will be incorrect.
- *Confirm the terms and conditions of the contract as well as the normal billing procedures.* When confirming a receivable, strongly consider confirming the original contract price; total approved change orders; total billings and payments; retainage held and whether it accrues interest; detail of any claims, back charges, or disputes; and estimated completion date or the estimate of percentage to complete.
- *Review the unapproved change orders of significant contracts.* Change orders often arise during the life of a contract, and it is necessary to adjust estimated revenue and cost for change orders that have been approved, both as to scope and price. However, when a change order has been approved as to scope but not as to price, carefully evaluate the specific facts and circumstances prior to including the order in estimated contract revenues. To the extent that change orders are disputed or are unapproved as to both scope and price, evaluate them as claims. Generally, recognize revenue on an unapproved change order or claim only if there is verifiable evidence to support it.
- *Visit construction contract sites.* Visiting contract sites can be a very useful audit procedure. Such a visit can provide an opportunity to view the progress of a contract and confirm that the job is progressing in accordance with the plans, specifications, and terms of the contract. Appropriate site visits might include significant contract sites in which the work is in the very early stages of the contract. Such a visit may help you identify the complexities of performing the contract. The site visit may also provide you with the opportunity to interview operational personnel and to gain a better understanding of the responsibility the company has for performing the contract. At the site visit, it also might be helpful to speak with available subcontractors to get additional information about the progress of the contract. Furthermore, you should consider observing equipment and uninstalled inventory at the site.
- *Meet with project managers.* Project managers play an important role in controlling and reporting job site costs. They are also close to the facts and are likely to get prompt and accurate information related to particular contracts. Meeting with the project managers will also assist you in developing your plans for performing analytical procedures.
- *Identify and understand the significant assumptions and uncertainties.* This procedure is fundamental to performing an effective audit of an entity using contract accounting.
- *Test contract costs to make sure that costs are matched with appropriate contracts.* In some instances companies may shift costs from unprofitable contracts to profitable ones in order to defer losses.
- *Audit estimated costs to complete.* The focus should be on the key factors and assumptions, such as those that (1) are significant to the estimate, (2) are sensitive to variation, (3) deviate from historical patterns, and (4) are subjective and susceptible to bias or misstatement. It is also useful to review revised or updated estimates of costs to complete and compare estimates with actual costs incurred after the balance sheet date.

- *See that losses are recorded as incurred*, regardless of whether the entity is using the percentage-of-completion or the completed-contract method of recognizing revenue.
- *Analytically review contracts completed and in progress*. A detailed analytical review of completed contracts and contracts in progress will provide meaningful information as you focus your efforts on potential problem areas.
- *See that there are appropriate disclosures* relating to SOP 94-6, *Disclosure of Risks and Uncertainties*. Entities using contract accounting should have more than generic disclosure about the use of significant estimates in the preparation of financial statements.
- *Review the aging of receivables on contracts*. This procedure will provide evidence that the company is collecting funds on a timely basis.

Although all of the above procedures are important, you should use your professional judgment in designing procedures specific to your particular clients and their contracts.

Long-Lived Assets, Including Goodwill and Intangibles

.87 Industry downturns and cash flow erosion may indicate an impairment of fixed assets, goodwill, or other intangibles. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides guidance in this area. In that regard, significant idle equipment or assets no longer used in operations may need to be written off.

.88 FASB Statement No. 142, *Goodwill and Other Intangible Assets*, was issued in June 2001. This Statement requires that goodwill be tested for impairment at least annually using a two-step process that begins with an estimation of the fair value of a reporting unit. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any.

.89 In addition, FASB Statement No. 142 provides specific guidance on testing intangible assets that are not being amortized for impairment and thus removes those intangible assets from the scope of other impairment guidance. Intangible assets that are not amortized are tested for impairment at least annually by comparing the fair values of those assets with their recorded amounts.

Debt

.90 You should carefully review loan agreements and test for compliance with loan covenants. In this regard, consider any “cross default” provisions, that is, a violation of one loan covenant that affects other loan covenants. Keep in mind that any debt with covenant violations that are not waived by the lender for a period of more than one year from the balance sheet date may need to be classified in the balance sheet as a current liability.

.91 As always, review the debt payment schedules and consider whether the company has the ability to pay current debt installments or to refinance the debt if necessary. When making an evaluation, it is important to remember that it is quite possible the company will not generate as much cash flow as it did in previous years.

Going Concern

.92 Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. During the current economic situation, you should have a heightened sense of awareness of the company’s ability to continue as a going concern. SAS No. 59, *The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341), as amended, addresses your responsibilities to evaluate whether there is substantial doubt about the

entity's ability to continue as a going concern. Negative trends, loan covenant violations, and legal proceedings might be indicators that there could be substantial doubt about the ability of the entity to continue as a going concern.

.93 Many contractors are seeing very large increases in their insurance rates. Some contractors cannot obtain commercial general liability insurance or find that it is available only from one or a few carriers. Such situations will affect the contractor who has a long-term contract bid initiated when the insurance rates were lower. You should question the going concern assumption for a contractor who cannot obtain insurance.

.94 When evaluating management's plans to continue as a going concern, an appropriate level of professional skepticism is important. For example, the company's assumptions to continue as a going concern should be scrutinized to assess whether they are based on overly optimistic or "once-in-a-lifetime" occurrences.

Job Performance

.95 It is difficult for contractors to be profitable when projects are not completed on time. A number of contracts may even require the contractor to pay penalties if the job is not completed by a specified date. Jobs that are significantly behind their established timetable may require additional audit attention and procedures to determine that the original estimates of gross profit have not deteriorated (called *profit fade*) and that the job has not incurred a loss (which should be recognized immediately).

.96 The tight labor market and the difficulty in scheduling subcontractors may result in your clients failing to complete jobs according to their preestablished timetables. For example, in these times of layoffs and increased turnover, if a key operational employee leaves the company before the job is completed, it may require some time to find a competent replacement. A number of contractors may be forced to use less experienced personnel in certain positions, including management, and that lack of experience can result in the job taking longer to complete than originally anticipated.

.97 In reviewing your client's contracts, be alert to problems caused by employee turnover or lack of adequate staffing. If your client has lost a key employee or seems to lack enough personnel to complete the projects it has committed to, consider making inquiries of management to determine how the client has factored these circumstances into the estimation process.

.98 A disruption in the supply of key materials can also affect the ability of the contractor to complete the project on time. During the past year, most construction materials were in adequate supply. However, the events of recent years have shown that an unexpected or continuing surge in demand for materials can quickly outpace supply and create shortages and delays. Additionally, the lead time required for specifically fabricated items may affect the contractor's ability to deliver the project on time.

.99 You might consider performing procedures to identify price hikes in your client's vital materials. Determine whether those price hikes are the result of inadequate supply. If so, assess your client's vulnerability to delays caused by the inability to obtain these materials on a regular and timely basis. Make inquiries to discover what steps the client has taken to mitigate these risks.

Estimating Costs to Complete

.100 A contractor's ability to estimate job costs is critical both from an operational and a financial reporting standpoint. Contractors that cannot accurately estimate job costs will be unable to manage their working capital and maintain consistent levels of profitability over an extended period of time. For most contractors, the estimate of costs to complete a project is the fuel to drive revenue recognition. For that reason, inaccurate or unsupported estimates of costs to complete jobs in progress can result in materially misstated financial statements.

.101 When auditing construction estimates, you should be familiar with SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), the AICPA Practice Aid *Auditing Estimates and Other Soft Information*, and SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.102 Management is responsible for making estimates included in the financial statements, and those estimates may be based in whole, or in part, on subjective factors such as judgment based on experience about past as well as current events and about expected conditions. In the current economic environment there is more pressure on management to accelerate profits (by underestimating the costs to complete, for example), and estimates may be difficult for auditors to audit. Pay close attention to the underlying assumptions used by management when auditing accounting estimates. Remain alert to the possibility of management's overreliance on estimates based on past favorable conditions to predict future outcomes.

Help Desk—Marshall and Swift is a consulting firm that provides comprehensive cost data for the construction industry. Included on its Web site is a cost estimator that allows the user to estimate the cost of a project based on current costs in the user's geographic area. You may find these estimates helpful in performing analytical procedures on client estimates. You can access the cost estimator at www.construction.com.

Accounting Systems and Controls

.103 Companies that expand quickly frequently outgrow the capabilities of their accounting systems and controls. Contractors with a large backlog and demand for their work tend to focus primarily on completing existing projects and bidding on new ones. Little thought may be given to whether the accounting system and related controls are capable of handling the new volume of business. In the current environment, this problem is exacerbated by either or both the lack of sufficient staffing and the high turnover of employees. It is important to consider the effects of the particular accounting systems and controls in the operation of your client's business.

.104 When clients rely on technology to manage and analyze information, audit strategies change. For example:

- Audit evidence that previously existed in paper form may be available electronically only. Accessing electronic audit evidence may require you to become proficient in the use of data extraction or other audit software tools.
- The design and operation of internal control in a computer environment is much different than in a predominately manual environment.

.105 As more construction contractors expand their use of information technology, be aware of the unique audit issues in a highly computerized environment. In addition, if your client is contemplating or in the process of making a transition from a highly manual environment to a more computerized operating environment, you should identify the risks of material misstatement that can arise during the process.

.106 For further information and guidance on auditing in this paperless environment, see SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

Consideration of Fraud

.107 Recently, the Auditing Standards Board (ASB) issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit*, and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), and SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333).

.108 SAS No. 99 addresses the following issues:

- Description and characteristics of fraud
- The importance of exercising professional skepticism
- Discussion among engagement personnel regarding the risks of material misstatement due to fraud
- Obtaining the information needed to identify risks of material misstatement due to fraud
- Identifying risks that may result in a material misstatement due to fraud
- Assessing the identified risks after taking into account an evaluation of the entity's programs and controls
- Responding to the results of the assessment
- Evaluating audit evidence
- Communicating about fraud to management, the audit committee, and others
- Documenting the auditor's consideration of fraud

For more information on SAS No. 99, see the discussion in the "Recent Auditing and Attestation Pronouncements and Other Guidance" section later in this Alert.

.109 Some examples of fraud risk factors that may exist in the construction industry include the following:

- Fraudulent financial reporting, including the following:
 - A willingness to shift costs between completed and uncompleted contracts or to use other techniques to manipulate percentage-of-completion estimates
 - Excessive under- or over-billings on individual jobs
 - A high number of contract performance problems
 - A significant portion of employees' or owners' compensation represented by bonuses, the value of which is contingent on the contractor achieving unduly aggressive financial targets
- Misappropriation of assets, including the following:
 - Tools, equipment, and supplies that are susceptible to misappropriation
 - Lack of management review and control over disbursements such as payroll or material purchases that can be used to misappropriate cash

The general state of the economy may raise several fraud risk factors. For example, the biggest fraud risk factor to consider is whether management may be under significant pressure to intentionally underestimate the costs to complete contracts in order to accelerate income. At the same time, other fraud risk factors for management might include pressure to obtain additional capital, to obtain additional bonding capacity, or to maintain debt covenants at their stated levels.

Affiliated Entities

.110 In the construction industry, contractors frequently participate in joint ventures or have a direct or indirect affiliation with other entities. The prevalence of such arrangements in the industry can be attributed to factors such as legal liability, taxation, competition, ownership and operating arrangements, labor and labor union considerations, and regulatory requirements. As a result of these types of relationships among entities, construction firms are frequently involved in related-party transactions as that term is defined in FASB Statement No. 57, *Related Party Disclosures*. Review your contractor client's participations in joint

ventures to evaluate whether investments in joint ventures are reported properly. You should also review joint venture agreements and document your client's participation.

.111 The audit considerations for a contractor's participation in a partnership are similar to those for participation in a corporate joint venture. Partner participation may differ primarily in relation to the contractor's unlimited liability as a general partner for partnership obligations.

.112 For any type of venture, remember to consider the nature of the venture, the scope of its operations, and the extent of involvement of each participant.

.113 The FASB has issued an exposure draft of an interpretation that will affect the consolidation of certain entities. See the discussion of the proposed FASB Interpretation *Consolidation of Certain Special-Purpose Entities* in the "On the Horizon" section of this Alert.

Using Hedging Transactions to Manage Risk

.114 Many construction contractors enter into hedging transactions to manage various risks. The most common risks that lend themselves to hedging strategies include those related to interest rate or foreign currency exposures. Construction contractors may also enter into weather derivative contracts (that is, contracts indexed to climatic or geological variables). Emerging Issues Task Force (EITF) Issue No. 99-2, *Accounting for Weather Derivatives*, prescribes the accounting treatment for weather derivatives.

.115 FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, provides the primary guidance on accounting for hedging transactions. In addition, SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), provides guidance on auditing hedging transactions. The AICPA's Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* provides practical guidance for implementing SAS No. 92 on all types of audit engagements. The Guide includes an overview of derivatives and securities and how various entities use them, a summary of accounting guidance, and a discussion of the three elements of the auditing framework (inherent risk, control risk, and substantive procedures). Additionally, the Guide includes practical illustrations and case studies.

.116 If your client holds derivative instruments or engages in hedging transactions, you should become thoroughly familiar with the relevant authoritative accounting and auditing literature.

Audit and Accounting Issues of Continuing Importance

Revenue Recognition

.117 In December 1999, the SEC released Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*.¹ SAB No. 101 most directly affects financial statement preparers and auditors of public construction companies. However, auditors of nonpublic companies may also find the information contained in SAB No. 101 useful. The release of SAB No. 101 sends an important message to financial statement preparers and their auditors that revenue recognition matters will continue to draw the scrutiny of regulators.

Help Desk—In October 2000 the SEC staff provided answers to frequently asked questions about the implementation of SAB No. 101. You can find SAB No. 101 and related frequently asked questions on the SEC Web site at www.sec.gov.

¹ Staff Accounting Bulletins (SABs) are not rules or interpretations of the Securities and Exchange Commission. Rather, they represent interpretations and practices followed by the Office of the Chief Accountant and the Division of Corporate Finance in administering the disclosure requirements of the federal securities laws.

.118 As noted previously in this Alert, SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*, provides guidance on revenue recognition for construction contractors. SOP 81-1 requires a contractor to use the percentage-of-completion method for recognizing revenue whenever it can produce reasonably dependable estimates. There is a rebuttable presumption that management can make reasonable estimates.

.119 The completed-contract method should be used only in instances in which reasonable, dependable estimates of construction costs cannot be made. The completed-contract method may also be used if there are no material differences between that method and the percentage-of-completion method. Situations in which there are no material differences may occur when a contractor performs primarily short-term contracts, for example, a small plumbing contractor whose projects are completed in such a short time span that the work is somewhat analogous to the manufacture of shelf production items for sale.

.120 The revenue recognition method should be disclosed in the financial statements. If the percentage-of-completion method is used, the financial statements should disclose the method of computing percentage-of-completion (for example, cost-to-cost). If the completed-contract method is used, the reason for selecting the method should be indicated.

.121 The issuance of SAB No. 101 did not affect the guidance for revenue recognition contained in SOP 81-1.

Asset Impairment

.122 Even though specific markets of the construction industry remain healthy, others are in recession. For that reason, you should continue to be alert for the possible impairment of long-lived assets.

.123 FASB Statement No. 144 provides the primary guidance on accounting for the impairment of long-lived assets. In general, the accounting for the impairment of these assets depends on whether the property is to be held and used or held for disposal. Projects under development are accounted for in the same manner as those held for investment. FASB Statement No. 144 does not provide exceptions for assets subject to nonrecourse debt.

Assets Held and Used

.124 Assets held for use should be reported at cost, less accumulated depreciation, and should be evaluated for impairment if facts and circumstances indicate that impairment may have occurred. Conditions or events such as the following may indicate a need for assessing the recoverability of assets:

- A dramatic change in the manner in which an asset is used
- A reduction in the extent to which an asset is used
- Forecasts showing lack of long-term profitability
- A change in the law or business environment
- A substantial drop in the market value of an asset

.125 If events and circumstances indicate that impairment may exist, the entity is required to estimate the future cash flows expected to result from the use of the asset and its eventual disposition. An asset is deemed to be impaired if its carrying amount exceeds the sum of the expected future cash flows (undiscounted and without interest charges) from the asset. The impairment is measured as the amount by which the carrying amount exceeds the fair value of the asset. After an impairment loss is recognized, the reduced carrying amount of the asset should be accounted for as the new cost of the asset and depreciated over the remaining useful life. Restoration of previously recognized impairment losses is prohibited.

.126 Lack of an asset-impairment evaluation system may indicate a material weakness in an entity's internal controls. Further, a lack of documentation generally increases the extent to which you must apply professional judgment in evaluating the adequacy of management's writedowns.

Assets to Be Disposed Of

.127 Assets to be disposed of (assets for which management has committed to a plan of disposal) should be reported at the lower of the carrying amount or fair value, less costs to sell. Subsequent revisions to fair value less costs to sell should be reported as adjustments to the carrying amount of the asset to be disposed of. However, the carrying amount may not be adjusted to an amount greater than the carrying amount of the asset before an adjustment was made to reflect the decision to dispose of the asset.

.128 Although some assets previously might have been subject to APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, FASB Statement No. 144 amended APB Opinion No. 30. The provisions of FASB Statement No. 144 apply to all long-lived assets. Therefore, discontinued operations are no longer measured on a net realizable value basis, and future operating losses are no longer recognized before they occur.

Recent Auditing and Attestation Pronouncements and Other Guidance

.129 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. .130 The following summaries of auditing standards might have particular significance to the construction industry. The summaries are for informational purposes only and should not be relied on as a substitute for a complete reading of the applicable standards. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

SAS No. 95, *Generally Accepted Auditing Standards*

.131 In December 2001, the ASB issued SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), which supersedes section 150, *Generally Accepted Auditing Standards*, of SAS No. 1. SAS No. 95 is effective for audits of financial statements for periods beginning on or after December 15, 2001.

.132 SAS No. 95 establishes a hierarchy of generally accepted auditing standards (GAAS) consisting of auditing standards, interpretive publications, and other auditing publications.

- *Auditing standards* are comprised of the general, fieldwork, and reporting standards approved and adopted by the AICPA membership, as amended by the ASB, as well as the SASs. The auditor should be prepared to justify departures from the SASs.
- *Interpretive publications* consist of auditing Interpretations of the SASs, auditing guidance included in the AICPA Audit and Accounting Guides, and AICPA auditing SOPs. The auditor should be aware of and consider applicable interpretive publications. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.
- *Other auditing publications* include AICPA auditing publications not referred to above as well as auditing articles in the *Journal of Accountancy* and other professional journals; auditing articles in the *AICPA CPA Letter*; continuing professional education programs and other instruction materials; textbooks; and so forth. Although other auditing publications have no authoritative status, they may help the auditor understand and apply the SASs.

The auditor is not expected to be aware of the full body of other auditing publications. However, if you apply the auditing guidance included in an other auditing publication, you must determine that such guidance is appropriate and relevant. If the guidance has been reviewed by the AICPA Audit and Attest Standards team it is presumed to be appropriate.

SAS No. 96, *Audit Documentation*

.133 In January 2002, the ASB issued SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). SAS No. 96 supersedes SAS No. 41, *Working Papers*, and amends three SASs. SAS No. 96 is effective for audits of financial statements for periods beginning on or after May 15, 2002. Earlier application is permitted.

.134 Among other things, SAS No. 96 supersedes SAS No. 41 by using the term audit documentation instead of working papers to describe the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in an audit engagement. (Note, however, that SAS No. 96 permits the term working papers to be used to refer to audit documentation.)

.135 In addition to superseding SAS No. 41, SAS No. 96 amends the following:

- SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)
- SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329)
- SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341)

SAS No. 98, *Omnibus Statement on Auditing Standards—2002*

.136 In September 2002, the ASB issued SAS No. 98, *Omnibus Statement on Auditing Standards—2002* which, among other things:

1. Amends SAS No. 95 (AU sec. 150.05) to clarify the status of appendixes to SASs as being interpretive publications. This amendment is effective upon issuance.
2. Amends SAS No. 25, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 161.02 and .03), to clarify the relationship between Statements on Quality Control Standards (SQCSs) and engagements performed under SASs. This amendment is effective upon issuance.

3. Amends SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AU sec. 312.34–41), to clarify the auditor's responsibility with respect to evaluating audit adjustments. This amendment is effective upon issuance.
4. Amends SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), and rescinds Interpretation No. 6, "Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events in a Service Auditor's Engagement," of SAS No. 70.
5. Amends SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508.65), to make the guidance in SAS No. 58 consistent with the guidance in section 530 of SAS No. 1 (AU sec. 530.01) by using the term *completion of fieldwork* as opposed to "completion of his most recent audit." This amendment is effective upon issuance.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.137 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit*, and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), and SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333).

.138 The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph .02.² However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.³

.139 Among other things, SAS No. 99 also includes Exhibit 1, "Management Anti-Fraud Programs and Controls," which was developed to assist auditors in obtaining an understanding of programs and controls that management may use to mitigate specific risks of fraud, or that otherwise help to prevent, deter, and detect fraud.

.140 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application is permissible.

.141 The AICPA is working on a fraud Practice Aid titled *Fraud Detection in a GAAS Audit—An Auditor's Field Guide* that will be published by the end of 2002. Among its many topics, the Practice Aid addresses topics such as how the new SAS changes audit practice, characteristics of fraud, understanding the new SAS, best practices, and practice aids, including specialized industry fraud risk factors, common frauds, and extended audit procedures. Auditors should be on the lookout for this new *Auditor's Field Guide*.

² The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts, that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), or fraud.

³ Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), and Statement on Standards for Consulting Services (AICPA, *Professional Standards*, vol. 2, CS sec. 100) provide guidance to accountants relating to the performance of such services.

SQCS No. 6, *Amendment to Statement on Quality Control Standards No. 2, System of Quality Control for a CPA Firm's Accounting and Auditing Practice*

.142 In September 2002, the ASB issued Statement on Quality Control Standards (SQCS) No. 6, *Amendment to Statement on Quality Control Standards No. 2, System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (AICPA, *Professional Standards*, vol. 2, QC sec. 20). This Statement amends SQCS No. 2 to clarify that deficiencies in individual audit, attest, compilation, and review engagements do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards. This amendment is effective upon issuance.

SSAE No. 11, *Attest Documentation*

.143 This amendment to Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT secs. 101–701), reflects the concepts and terminology used in SAS No. 96, *Audit Documentation*.

.144 This amendment is effective for attest engagements when the subject matter or assertion is as of or for a period ending on or after December 15, 2002. Earlier application is permitted.

SSAE No. 12, *Amendment to Statement on Standards for Attestation Engagements No. 10, Attestation Standards: Revision and Recodification*

.145 Issued in September 2002, this amendment to SSAE No. 10 (AT sec. 101.17–18) clarifies the relationship between SQCSs and engagements performed under SSAEs. The amendment clarifies that, although an effective quality control system is conducive to compliance with attestation standards, deficiencies in or noncompliance with a firm's quality control system do not, in and of themselves, indicate that an engagement was not performed in accordance with the applicable professional standards. This amendment is effective upon issuance.

Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*

.146 This Guide (product no. 012772kk) provides guidance to service auditors engaged to issue reports on a service organization's controls that may be part of a user organization's information system in the context of an audit of financial statements. The Guide also provides guidance to user auditors engaged to audit the financial statements of entities that use service organizations. Guidance on performing service auditors' engagements and using service auditors' reports in audits of financial statements is provided in SAS No. 70.

Related-Party Toolkit

.147 The AICPA staff has developed an electronic document, *Accounting and Auditing for Related Parties and Related Party Transactions: A Toolkit for Accountants and Auditors*, to provide accountants and auditors of private-sector business enterprises with an overview of selected authoritative accounting and auditing literature, SEC requirements, and nonauthoritative best practice guidance concerning related parties and related-party transactions. In these current economic times when management needs to be more sensitive to independence and related-party issues and possible conflicts between the entity and parties with which it does business, identifying related parties and related-party transactions is an important aspect of a financial statement audit.

Help Desk—The related-party toolkit is available on the AICPA Web site at aicpa.org/public/download/news/relpty_toolkit.doc.

Audit Risk Factors

.148 In January 2002, the five largest accounting firms and the AICPA released a detailed list of “risk factors” to consider as businesses prepared their 2001 financial statements. Among the specific financial reporting issues addressed by the risk assessment document are liquidity and viability (going concern), changes in internal control, unusual transactions, related parties, off-balance sheet arrangements, materiality, and adequate disclosure. The document also recommends actions that can be taken to address such financial reporting risks.

Help Desk—The risk assessment document is available on the AICPA Web site at aicpa.org/public/download/news/risk_factor.doc.

Accounting Pronouncements and Guidance Update

.149 Presented below is a list of recently issued accounting pronouncements and other guidance issued since the publication of last year’s Alert. See the AICPA *Audit Risk Alert—2002/03* [AAM section 8010] for a summary explanation of these issuances. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and the *Journal of Accountancy*.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13 and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated with Exit or Disposal Activities</i>

SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>

On the Horizon

Proposed SOP Related to Property, Plant, and Equipment

.150 The Accounting Standards Executive Committee (AcSEC) of the AICPA issued a proposed SOP, *Certain Costs and Activities Related to Property, Plant, and Equipment*, that will address accounting and disclosure issues related to determining which costs related to assets should be capitalized as improvements and which should be expensed as repairs and maintenance. The SOP also will address capitalization of indirect and overhead costs. The proposed SOP is expected to provide guidance on “componentization” of assets, in which the asset is separated into separate components each of which may have different useful lives. Each component would be accounted for and depreciated or amortized as a separate asset.

.151 In general, the SOP uses a “project stage” framework, in which accounting guidance is provided for each stage in the property, plant, and equipment (PP&E) project. The stages would include *preliminary* (occurring before acquisition of specific PP&E is deemed probable), *preacquisition* (occurring after acquisition of specific PP&E is deemed probable, but before actual acquisition or construction), *acquisition or construction*, and *in service* (beginning at the time acquisition or construction is substantially complete and the PP&E is ready for its intended use).

.152 The exposure draft contains the following conclusions:

- Except for the cost of options, preliminary stage costs would be charged to expense as incurred.
- Costs related to PP&E incurred during the acquisition-or-construction stage would be capitalized if the costs are directly identifiable with the specific PP&E. Directly identifiable costs include only:
 - Incremental direct costs of acquiring, constructing, or installing the PP&E incurred in transactions with independent third parties for the specific PP&E.
 - Certain costs directly related to specified preacquisition activities performed by the entity for the acquisition, construction, or installation of the specific PP&E.
- General and administrative costs and overhead costs would be charged to expense as incurred. Similar conclusions would apply to preacquisition stage costs.
- Costs related to PP&E that are incurred during the in-service stage, including costs of normal, recurring, or periodic repairs and maintenance activities, would be charged to expense as incurred unless the costs are incurred for (1) the acquisition of additional PP&E or components of PP&E, or (2) the replacement of existing PP&E or components of PP&E. Removal costs would be charged to expense as incurred.
- The costs of planned major maintenance activities would not be a separate PP&E component. Those costs would be capitalized to the extent they are capitalizable under the in-service stage guidance of the SOP and represent additions or replacements, and they would otherwise be charged to expense as incurred.
- A component would be a tangible part or portion of PP&E that (1) can be separately identified as an asset and depreciated over its own expected useful life and (2) is expected to provide economic benefit for more than one year. If a component has an expected useful life that differs from the expected useful life of the PP&E asset to which it relates, the cost would be accounted for separately and depreciated or amortized over its expected useful life.
- If an entity replaces a part or portion of a PP&E asset that has not been previously accounted for as a separate component, and the replacement meets the definition of a component, the entity would capitalize the replacement, account for it as a separate component going forward, estimate the net book value of the replaced item, and charge the net book value of the replaced item to expense in the period of replacement.

Proposed FASB Interpretation *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*

.153 In an effort to improve disclosures about loan guarantees, the FASB has issued an exposure draft of a proposed Interpretation, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*.

.154 The proposed Interpretation would clarify and expand on existing disclosure requirements for guarantees, including loan guarantees. It also would require that at the time a company issues a guarantee, it must recognize a liability for the fair value, or market value, of its obligations under that guarantee. By improving its disclosures and accounting, a company provides a more representationally faithful picture of its financial position and the risk it has assumed.

.155 The Interpretation does not address the subsequent measurement of the guarantor's recognized liability over the term of the guarantee. It also would incorporate, without change, the guidance in FASB Interpretation No. 34, *Disclosure of Indirect Guarantees of Indebtedness of Others*, which is being superseded.

.156 This guidance would not apply to guarantee contracts issued by insurance companies, a lessee's residual value guarantee embedded in a capital lease, contingent rents, and price rebates. The provisions related to recognizing a liability at inception for the fair value of the guarantor's obligations would not apply to product warranties or to guarantees accounted for as derivatives.

Proposed FASB Interpretation *Consolidation of Certain Special-Purpose Entities*

.157 The FASB has issued an exposure draft of a proposed Interpretation that establishes accounting guidance for consolidation of special-purpose entities (SPEs). The proposed Interpretation, *Consolidation of Certain Special-Purpose Entities*, will apply to any business enterprise—whether public or private—that has an ownership interest, contractual relationship, or other business relationship with an SPE. The proposed guidance would not apply to not-for-profit organizations.

.158 The objective of this proposed Interpretation is to improve financial reporting by enterprises involved with SPEs—not to restrict the use of SPEs. However, it is expected that when this proposal is implemented, more SPEs will be consolidated than in the past. Most SPEs serve valid business purposes, for example, by isolating assets or activities to protect the interests of creditors or other investors, or to allocate risks among participants. SPEs that were unconsolidated prior to this proposed Interpretation were reported according to the guidance and accepted practice that existed prior to this proposed Interpretation.

.159 Current accounting standards require an enterprise to include subsidiaries in which it has a controlling financial interest in its consolidated financial statements. That requirement usually has been applied to subsidiaries in which an enterprise has a majority voting interest, but in many circumstances the enterprise's consolidated financial statements do not include SPEs with which it has fundamentally similar relationships. The reason is that existing consolidation guidance focuses primarily on parent-subsidiary relationships established through voting ownership interests, and the relationship between a business enterprise and an SPE is established through other means.

.160 The FASB believes that if a business enterprise has a controlling financial interest in an SPE, the assets, liabilities, and results of the activities of the SPE should be included in consolidated financial statements with those of the business enterprise, which is referred to as the primary beneficiary of the SPE.

.161 As to finalization of this project, the FASB expects to issue an Interpretation in the fourth quarter of this year. The accounting guidance would be effective immediately upon issuance of the Interpretation for new SPEs. Companies with SPEs that existed prior to issuance of the Interpretation would be required to apply the guidance to the existing SPEs at the beginning of the first fiscal period after March 15, 2003. Calendar year end companies would need to apply the guidance on April 1, 2003.

AICPA Resource Central

.162 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your construction engagements (product numbers appear in parentheses).

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (012520kk)
- Audit Guide *Auditing Revenue in Certain Industries* (012510kk)
- Audit Guide *Audit Sampling* (012530kk)
- Audit Guide *Analytical Procedures* (012551kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (010010kk)
- *Accounting Trends & Techniques—2002* (009894kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (006701kk)

Audit and Accounting Manual

.163 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. The Manual contains numerous practice aids, samples, and illustrations, including audit programs, auditors' reports, checklists, and engagement letters, management representation letters, and confirmation letters.

AICPA reSOURCE Online: Accounting and Auditing Literature

.164 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (more than 20!), *Audit Risk Alerts* (more than 15!) and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Educational Courses

.165 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the construction industry. Those courses include the following (product numbers are in parentheses):

- *AICPA's Annual Accounting and Auditing Workshop* (2002-2003 edition) (737082kk, text; 187082, video). Whether you are in industry or public practice, this course keeps you current and informed, and shows you how to apply the most recent standards.
- *The AICPA's Guide to Consolidations and Business Combinations* (735125kk). Learn how FASB Statements No. 141 and No. 142 have changed the rules for business combinations and goodwill accounting.
- *Auditing in a Paperless Society* (730121kk). Now that paper is slowly diminishing, where do you go? This course will teach you how to develop strategies for auditing around, through, and with a computer.
- *Real Estate Accounting and Auditing* (730600kk). This course provides an in-depth study of the unique requirements that apply at each stage of the real estate life cycle.

Online CPE

.166 The AICPA offers an online learning tool entitled *AICPA InfoBytes*. An annual fee (\$119 for members and \$319 for nonmembers) offers unlimited access to hundreds of hours of CPE content in one- and two-credit courses. Register today as our guest at www.cpa2biz.com/infobytes.

CPE CD-ROM

.167 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.168 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Technical Hotline and Ethics Hotline

.169 Do you have a complex technical question about GAAP, other comprehensive basis of accounting (OCBOA), accounting, auditing, compilation engagements, review engagements, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with an answer. You can reach the Technical Hotline at (888) 777-7077.

.170 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Conference

.171 Among the many interesting conferences the AICPA offers, there is one that might interest you and your construction industry clients. The conference, held late each fall, is the "AICPA National Construction Industry Conference," which presents a comprehensive program revealing latest trends and developments in the construction industry. The conference offers a national perspective and addresses the newest trends in conducting business, among other topics.

Web Sites⁴

AICPA Online and CPA2Biz

.173 Here is a unique opportunity to stay abreast of matters relevant to the CPA profession! AICPA Online, at www.aicpa.org, informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2Biz, at www.cpa2biz.com, offers you all the latest AICPA products, including more than 15 Audit Risk Alerts, more than 20 Audit and Accounting Guides, the professional standards, and CPE courses.

.174 This Audit Risk Alert replaces *Construction Contractors Industry Developments—2001/02*. *Construction Contractors Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to lgivarz@aicpa.org or write to:

AAM Section 8100

Investment Companies Industry Developments—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your investment companies industry audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the investment companies industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010]. You should refer to the full text of the accounting and auditing pronouncements, as well as the full text of any rules or publications that are discussed in this Alert.

Economic and Industry Developments

.04 Statement on Auditing Standards (SAS) No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311), among other matters, provides guidance for auditors regarding the specific procedures that should be considered in planning an audit in accordance with generally accepted auditing standards (GAAS). SAS No. 22 states that the auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics, and consider matters affecting the industry in which the entity operates, including, among other matters, economic conditions as they relate to the specific audit.

.05 Also, paragraph 2.99 in the Audit and Accounting Guide *Audits of Investment Companies* states that economic conditions in the jurisdictions in which funds invest may affect the auditor's assessment of inherent risk for assertions in investment companies' financial statements. Factors that auditors should consider include local rates of inflation, government stability, and local tax rules. Auditors should consider whether such indicators create, intensify, or mitigate inherent risk.

Economic Developments

.06 For a thorough discussion of the economic and business environment, see the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

The U.S. Economy in Recovery

.07 Investment companies operated and invested through the first three quarters of 2002 in an economy in recovery from the recession experienced in 2001. The economic word for 2001 was *uncertain*, and that continues to hold true for 2002. The current mix of opposing trends—solid demand, but no strong pickup in jobs—stems partly from the nature of this business cycle. In other words, mild recoveries tend to follow mild recessions.

.08 Some matters in the forefront during the first three quarters of 2002 were allegations of fraudulent financial reporting, employee layoffs, increased government regulation and security procedures resulting from terrorism concerns, and weak corporate profits reported in some business sectors. Some of the other economic developments of 2002 are presented in this section of the Alert.

The Equities Markets

.09 Activity in the U.S. equities markets through the first three quarters of 2002 was volatile. The Dow Jones Industrial Average (DJIA), Standard and Poor's (S&P) 500 Index, and National Association of Securities Dealers Automated Quotation (NASDAQ) composite continued their declines of the two previous years.

Low Interest Rates

.10 Interest rates have remained low. Following a number of cuts by the Federal Reserve Board in 2001, the federal funds rate stayed at 1.75 percent through much of 2002, until the rate was cut again in November 2002, to 1.25 percent. Many homeowners took advantage of the opportunity provided by lower interest rates and refinanced their mortgages.

Consumer Spending

.11 Consumer spending, which accounts for two-thirds of U.S. economic output, has remained strong through the first half and into the third quarter of 2002, fueled by demand for new automobiles and a strong housing market.

Fund Performance

.12 Through the first three quarters of 2002, there was not a lot of good news to be found when looking at fund performance. Investors in stock funds, accustomed to double- and even triple-digit gains in recent years, were now seeing negative returns, more frequently in the double digits. Investors saw these negative returns across a wide range of funds—growth funds, as well as value funds, large cap as well as small-cap funds, diversified funds, and many sector funds, among others.

.13 The news, however, was better for other investment companies. A number of money market funds and bond funds, as well as some stock funds, were able to provide investors with positive returns. Also, starting in June 2002, and continuing in the third quarter, many investors began pulling out of stock funds. A number of bond funds and money market funds were the beneficiaries of investor actions away from stock funds, as investors who viewed bond and money market funds as a less riskier investment alternative to stock fund investment responded by moving their investment dollars into bond and money market funds. The continuing declines in interest rates through the year, however, highlighted by the Federal Reserve Board's half-point reduction in the discount rate in 2002, resulted in the movement of money market fund yields, after expenses, near (and in a few cases even below) zero. A number of investment advisers or sponsors of money market funds have waived fees or assumed fund expenses to maintain a positive yield to shareholders. Auditors should understand these waiver and assumption agreements and determine that they are properly accounted for and disclosed in fund financial statements.

Investing in Riskier Instruments

.14 This section of the Alert previously discussed the weak performance of many funds. Investment companies, seeking to retain investors and stem fund outflows, may be under increased pressure to find ways to improve fund performance and outperform competitors and benchmarks. Auditors should consider the possibility that investment companies, seeking higher returns for investors, may be investing in more illiquid investments, or in debt instruments that have a greater potential for default. As discussed in paragraph 2.59 of the Audit and Accounting Guide *Audits of Investment Companies*, adverse economic developments often lead to increases in the default rates of debt securities. In addition to occasional capital

infusions, professional fees to legally restructure the investments are frequently incurred by bondholders. Paragraphs 2.56 and 2.57 of the Guide note that for defaulted debt securities, in accordance with Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, accrued interest should be written off when it becomes probable that the interest will not be collected and the amount of uncollectible interest can be reasonably estimated. The portion of interest receivable on defaulted debt securities written off that was recognized as interest income should be treated as a reduction of interest income. Write-offs of purchased interest should be reported as increases to the cost basis of the security, which will result in an unrealized loss. Paragraphs 2.60 and 2.61 of the Guide discuss accounting for capital infusions and workout expenditures. Auditors should also focus on the valuations of potentially distressed securities, considering the guidance in paragraphs 2.126 through 2.135.

.15 For additional discussion about auditing and accounting for investments, including valuation of investments, see “Auditing and Accounting for Investments” in the “Audit Issues and Developments” section of this Alert.

Exchange-Traded Funds

.16 In 2002, the investment companies industry continued to present new types of investment opportunities. One area where this is reflected is exchange-traded funds (ETFs). At the start of 2002, the ETFs tracked only equity indexes, such as the S&P 500, DJIA, or NASDAQ 100. In 2002, the Securities and Exchange Commission (SEC) approved an exemption application that would permit ETFs that track fixed-income indexes. Also, in November 2001, as discussed in last year’s Alert, the SEC issued the Concept Release *Actively Managed Exchange Traded Funds*, which sought comments on issues relating to actively managed ETFs. This Concept Release is available on the SEC Web site at www.sec.gov.

Pressures to Establish Cost-Cutting Measures

.17 In this weakened economic environment, increased pressures may exist to establish cost-cutting measures at investment companies and at the organizations providing services to the investment company, such as custodians, transfer agents, and administrators.

.18 Auditors of investment companies should consider the possible effects of cost-cutting measures, such as hiring freezes and employee layoffs, on internal control. Employee layoffs may result in a shortage of staff with needed skills and knowledge of the unique industry accounting and regulatory requirements, negatively affecting the ability to record, process, summarize, and report the investment company’s financial data. Responsibilities that were previously segregated may be combined, allowing for greater opportunities to conceal errors or fraud.

.19 SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, provides guidance on the independent auditor’s consideration of an entity’s internal control in an audit of financial statements in accordance with GAAS. In all audits, the auditor should obtain an understanding of internal control sufficient to plan the audit by performing procedures to understand the design of controls relevant to an audit of financial statements, and determine whether they have been placed in operation. The auditor then assesses control risk for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements. Also, weaknesses in internal control that the auditor concludes constitute significant deficiencies that are reportable conditions, should be communicated to the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325).

.20 If an investment company uses a service organization, transactions that affect the investment company’s financial statements are subjected to controls that may be physically and operationally removed from the investment company. Consequently, the investment company’s internal control may include controls

that are not directly administered by the investment company. Planning the audit may require the auditor of the investment company to gain an understanding of controls at the service organization that may affect the investment company's financial statements. This understanding may be gained in several ways, including obtaining a service auditor's report. SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), as amended, provides guidance on the factors an independent auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain transactions, as well as guidance for independent auditors who issue reports on the processing of transactions by service organizations for use by other auditors. See the related discussion "Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*" in the "New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance" section of this Alert.

Mergers of Funds

.21 Auditors of investment companies may find their clients have been involved in a fund merger. You can find guidance about fund mergers in the section "Business Combinations" in chapter 8 of the Audit and Accounting Guide *Audits of Investment Companies*. That discussion notes that a registration statement on SEC Form N-14 is filed in connection with a fund merger. Form N-14 contains information about the companies involved in the transaction, historical financial statements, and pro forma financial statements. Form N-14 instructions, and Article 11 of Regulation S-X, as well as prior SEC "Dear CFO" letters,¹ may assist in understanding the requirements for pro forma financial statements in merger proxy statement and prospectus filings. Also, as a result of fund mergers, auditors of investment companies who may find themselves in the role of either predecessor or successor auditor should consider the guidance in SAS No. 84, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1, AU sec. 315), as amended. SAS No. 84 provides guidance on communications between predecessor and successor auditors when a change of auditors is in process or has taken place. You should note that conforming changes were made in 2002 to the "Business Combinations" section in the Audit and Accounting Guide *Audits of Investment Companies* as a result of the issuance of FASB Statement No. 141, *Business Combinations*.

Regulatory Developments²

.22 SAS No. 22, *Planning and Supervision*, states that in planning the audit, the auditor should consider matters affecting the industry in which the entity operates as they relate to the audit, including, among other matters, government regulations. This section of the Alert provides brief summaries of some of the regulations issued and regulatory publications released since the writing of last year's Alert that may affect your clients in the investment companies industry.

SEC Regulations

.23 Some of the final rules that the SEC issued since the writing of last year's Alert are:

- *Approved information collections* (Releases No. 33-8071, No. 34-45601, No. 35-27505, No. 39-2396, No. IC-25471, and No. IA-2021). In March 2002, the SEC amended its rules concerning information collection requirements under the Paperwork Reduction Act to update the display of Office of Management and Budget control numbers associated with the SEC's collection of information. Effective date: March 27, 2002.

¹ See the discussion "SEC 'Dear CFO' Letter" in the "Regulatory Developments" section of this Alert for additional information.

² Readers should be alert for updates, amendments, or other changes to the rules discussed in this section of the Alert and other recent developments related to regulatory activities. The brief summaries provided in this section of the Alert are for informational purposes only. Readers should refer to the full text of the regulations and other documents that are discussed in this section of the Alert. The complete text of Securities and Exchange Commission (SEC) final rules discussed in this section of the Alert, rules adopted subsequent to the writing of this Alert, as well as proposed rules and other SEC information, can be obtained from the SEC Web site at www.sec.gov. See the "Information Sources" table at the end of this Alert for a list of some Web sites that can provide additional information on regulatory issues and developments.

- Registration form for insurance company separate accounts registered as unit investment trusts that offer variable life insurance policies (Releases No. 33-8088 and No. IC-25522). In April 2002, the SEC adopted a new registration Form N-6 for insurance company separate accounts that are registered as unit investment trusts and that offer variable life insurance policies. Form N-6 is to be used by these separate accounts to register under the Investment Company Act of 1940 (1940 Act) and to offer their securities under the Securities Act of 1933 (1933 Act). Form N-6 replaces Form N-8B-2 and Form S-6 for these registrants. The SEC also amended Form N-1A to require a fee table for mutual funds that offer their shares as investment options for variable life insurance policies and variable annuity contracts. Technical amendments to various rules under the 1933 Act and the 1940 Act, and to Form N-8B-2 were also adopted. Effective date: June 1, 2002. See the SEC release for compliance date information.
- *Amendment to definition of equity security* (Releases No. 33-8091 and No. 34-45769). The Commodity Futures Modernization Act of 2000 amended the definition of *security* in the 1933 Act and the definitions of *security* and *equity security* in the Securities Exchange Act of 1934 (1934 Act) to include a security future. In April 2002, the SEC amended Rule 405 under the 1933 Act and Rule 3a11-1 under the 1934 Act to include security futures in the definition of *equity security*, consistent with the statutory treatment of security futures. Effective date: June 7, 2002.
- *Exemption for the acquisition of securities during the existence of an underwriting or selling syndicate* (Release No. IC-25560). In April 2002, the SEC adopted amendments to Rule 10f-3 under the 1940 Act. Rule 10(f) under the 1940 Act prohibits a fund from purchasing any security during an underwriting or selling syndicate if the fund has certain affiliated relationships with a principal underwriter for the security. Rule 10f-3 permits a fund to purchase securities in a transaction that Section 10(f) would prohibit, if certain conditions are met. The amendments to Rule 10f-3 expand the exemption that rule provides to permit a fund to purchase U.S. government securities in a syndicated offering. Effective date: May 10, 2002.
- *Technical amendments to rules and forms due to the National Securities Markets Improvement Act of 1996 and the Gramm-Leach-Bliley Act* (Releases No. 34-46106 and No. IC-25621). In June 2002, the SEC adopted technical amendments to rules and forms under the 1940 Act and the 1934 Act to correct statutory references included in the rules and forms. Effective date: July 8, 2002.
- *Investment company mergers* (Release No. IC-25666). In July 2002, the SEC adopted amendments to expand the availability of Rule 17a-8 under the 1940 Act. The amendments permit affiliated fund mergers regardless of the reasons for the funds' affiliation, and permit mergers between funds and affiliated persons that are bank common trust funds, bank collective trust funds, and unregistered insurance company separate accounts, provided that the survivor is a registered investment company. The amendments subject the exemption to certain additional conditions designed to protect investors. Effective date: July 26, 2002. See the SEC release for compliance date information.
- *Ownership reports and trading by officers, directors, and principal security holders* (Releases No. 34-46421, No. 35-27563, and No. IC-25720). In August 2002, the SEC adopted rule and form amendments to implement the accelerated filing deadline applicable to change of beneficial ownership reports required to be filed by officers, directors, and principal security holders under Section 16(a) of the 1934 Act, as amended by the Sarbanes-Oxley Act of 2002. Effective date: August 29, 2002.
- *Certification and disclosure in companies' quarterly and annual reports* (Releases No. 33-8124, No. 34-46427, and No. IC-25722). In August 2002, the SEC adopted new rules, including new Rule 30a-2 under the 1940 Act, and rule amendments, including amendments to Rule 30b1-3 and Form N-SAR under the 1940 Act. Rule 30a-2 requires a registered investment company that files periodic reports under Section 13(a) or 15(d) of the 1934 Act to include the certification specified by Section 302 of the Sarbanes-Oxley Act of 2002 in those periodic reports. Section 302 of the Sarbanes-Oxley Act of 2002 requires the SEC to adopt final rules requiring an issuer's principal executive officer or officers and principal financial officer or officers each to certify the financial and other information contained in the issuer's quarterly and annual reports. The instructions to Form N-SAR are amended to require

the specified certification be filed as an exhibit to the form. Investment companies filing reports on Form N-SAR under sections 13(a) and 15(d) of the 1934 Act will also be required to maintain and evaluate disclosure controls and procedures under new 1934 Act rules 13a-15 and 15d-15. Effective date: August 29, 2002.

- *Acceleration of periodic report filing dates and disclosure concerning Web site access to reports* (Releases No. 33-8128 and No. 34-46464). In September 2002, the SEC adopted amendments to rules and forms to accelerate the filing of quarterly and annual reports under the 1934 Act by domestic reporting companies that have a public float of at least \$75 million, that have been subject to the 1934 Act's reporting requirements for at least 12 calendar months, and that previously have filed at least one annual report. The changes for these accelerated filers will be phased in over three years and begin for reports filed by companies that meet the definition of *accelerated filer* as of the end of their first fiscal year ending on or after December 15, 2002. The SEC also adopted amendments that require accelerated filers to disclose in their annual reports where investors can obtain access to their filings, including whether the company provides access to its forms 10-K, 10-Q, and 8-K on its Internet Web site, free of charge, as soon as reasonably practicable after those reports are electronically filed or furnished to the SEC.
- *Disclosure of costs and expenses by insurance company separate accounts registered as unit investment trusts that offer variable annuity contracts*. In November 2002, the SEC adopted amendments to Form N-4, the form used by insurance company separate accounts that are organized as unit investment trusts and that offer variable annuity contracts to register under the 1940 Act and offer their securities under the 1933 Act. The amendments revise the format of the fee table of Form N-4 to require disclosure of the range of total expenses for all of the mutual funds offered through the separate account, rather than disclosure of the expenses of each fund. Other amendments to the format and instructions for the fee table of Form N-4 were also adopted. The SEC also adopted amendments to the fee table of Form N-6, the registration form for insurance company separate accounts that are registered as unit investment trusts and that offer variable life insurance policies. The amendments require disclosure of the range of total expenses of all of the mutual funds offered, consistent with the amendments to the fee table of the registration form for variable annuities. Effective date: December 23, 2002. See the SEC release for compliance date information.

Other SEC Developments

Frequently Asked Questions About Rule 35d-1 (Investment Company Names)

.24 The staff of the SEC's Division of Investment Management has prepared responses to frequently asked questions about Rule 35d-1, which addresses certain broad categories of investment company names that are likely to mislead investors about an investment company's investments and risks. These responses to frequently asked questions are available on the SEC Web site at www.sec.gov.

Cautionary Advice Regarding the Use of "Pro-Forma" Financial Information in Earnings Releases

.25 The SEC issued Financial Reporting Release (FRR) No. 59, *Cautionary Advice Regarding the Use of "Pro-Forma" Financial Information in Earnings Releases* (Releases No. 33-8039 and No. 34-45124) in December 2001 to caution public companies on their use of pro forma financial information and alert investors to the dangers of such information.

Cautionary Advice Regarding Disclosure About Critical Accounting Policies

.26 The SEC issued FRR No. 60, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies* (Releases No. 33-8040 and No. 34-45149) in December 2001 to remind management, auditors, audit committees, and their advisers that were undertaking the preparation and filing of required annual reports of public companies that the selection and application of the company's accounting policies must be appropriately reasoned. The Cautionary Advice encouraged public companies to include in Management's Discussion and

Analysis (MD&A) full explanations, in plain English, of their “critical accounting policies,” the judgements and uncertainties affecting the application of those policies, and the likelihood that materially different amounts would be reported under different conditions or using different assumptions.

Commission Statement About Management’s Discussion and Analysis of Financial Condition and Results of Operations

.27 The SEC issued FRR No. 61, *Commission Statement About Management’s Discussion and Analysis of Financial Condition and Results of Operations* (Releases No. 33-8056 and No. 34-45321) in January 2002 to set forth certain views of the SEC regarding disclosure that should be considered by registrants in MD&A of Financial Condition and Results of Operations while preparing 2001 annual reports. The statement addresses disclosure matters concerning (1) liquidity and capital resources, including off-balance sheets arrangements, (2) certain trading activities that include non-exchange-traded contracts accounted for at fair value, and (3) effects of transactions with related and certain other parties.

Joint Order Granting the Modification of Listing Standards Requirements Under Section 6(h) of the Securities Exchange Act of 1934 and the Criteria Under Section 2(a)(1) of the Commodity Exchange Act

.28 The SEC and Commodity Futures Trading Commission (CFTC) by joint order modified the requirement specified in Section 6(h)(3)(D) of the 1934 Act, and the criterion specified in Section 2(a)(1)(D)(i)(III) of the Commodity Exchange Act, to permit an ETF share, trust-issued receipt, or share of a registered closed-end management investment company to underlie a securities future, provided certain specified criteria are met (Release No. 34-46090).

Order Pursuant to Section 11A of the Securities Exchange Act of 1934 and Rule 11Aa-32(f) Thereunder Granting a De Minimis Exemption for Transactions in Certain Exchange-Traded Funds From the Trade-Through Provisions of the Intermarket Trading System

.29 The SEC granted a de minimis exemption from the trade-through provisions of the Intermarket Trading System Plan with respect to transactions in ETFs tracking the NASDAQ-100 Index (QQQs), the DJIA (DIAMONDS), and the S&P 500 Index (SPDRs) that are effected at a price no more than three cents away from the best bid and offer quoted in the Consolidated Quote System, effective commencing on September 4, 2002 through June 4, 2003 (Release No. 46428).

SEC “Dear CFO” Letter

.30 The accounting staff of the SEC’s Division of Investment Management periodically issues a generic letter addressed to the chief financial officers of investment company registrants and their independent public accountants to assist them in addressing certain accounting-related matters. You can obtain the industry letters for December 1998, December 1999, and February 2001 on the SEC Web site at www.sec.gov.

Audit Issues and Developments³

The Sarbanes-Oxley Act of 2002

.31 The Sarbanes-Oxley Act of 2002, signed into law on July 30, 2002, is the most significant legislation affecting the accounting profession since 1933. A discussion of the Sarbanes-Oxley Act of 2002 can be found in the general *Audit Risk Alert—2002/03* [AAM section 8010].

³ Readers should refer to the full text of the auditing standards and other pronouncements that are discussed in this section of the Alert. Readers should be alert for updates, amendments, or other changes to the rules discussed in this section of the Alert and other recent developments related to regulatory activities. The brief summaries provided in this section of the Alert are for informational purposes only. Readers should refer to the full text of the regulations and other documents that are discussed in this section of the Alert.

Fraud

.32 Recent highly publicized instances of fraudulent financial reporting serve as reminders to auditors of the need to remain alert to possible instances of fraudulent activity and to maintain an appropriate attitude of professional skepticism. Auditors should consider the guidance in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316). SAS No. 99 supersedes SAS No. 82 (AICPA, *Professional Standards*, vol. 1, AU sec. 316A); amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). SAS No. 99 does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02).⁴ However, SAS No. 99 establishes standards and provides additional guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.

.33 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.34 A more detailed discussion of SAS No. 99 can be found in the general *Audit Risk Alert—2002/03* [AAM section 8010]. Also, the AICPA has developed a Practice Aid, *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*. For more information about this Practice Aid, see the discussion "On the Bookshelf" in the "Resource Central" section of this Alert.

.35 The AICPA has launched a new, comprehensive Anti-Fraud and Corporate Responsibility Program. The program includes many initiatives, including the new auditing standard, SAS No. 99; the Institute for Fraud Studies; corporate training programs; and new continuing professional education (CPE) recommendations, among others. Information about the program, a list of initiatives, and other fraud resources are now available on the AICPA Web site at www.aicpa.org/antifraud/homepage.htm. Also, look for the AICPA's Anti-Fraud Resource Center, which will launch on the AICPA Web site, www.aicpa.org, and will offer comprehensive tools, resources, and information for fraud prevention, detection, and deterrence.

Auditing and Accounting for Investments

Significance to the Overall Audit

.36 An investment company's securities portfolio typically comprises substantially all its net assets. Accordingly, the audit of an investment company's investment accounts is a significant portion of the overall audit because of the relative significance of those accounts and of the related income accounts. In auditing the investment accounts, the auditor should consider various aspects of the investment company's transactions with brokers, custodians, and pricing services.

.37 Although the overall direction of the investment activities of an investment company is the responsibility of its board of directors, the board typically delegates the routine operating and investment decisions to an investment committee, a portfolio manager, or in most situations, an investment adviser. For some funds, the adviser may be assisted by one or more subadvisers.

⁴ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 312]) or fraud

.38 The composition of an investment company's portfolio is primarily a function of the company's investment objectives and strategy to achieve them. For example, for some funds, the composition may reflect an investment objective that tracks the performance of a major index, such as the S&P 500 Index.

Guidance for Auditing Investments

.39 Auditors should consider the guidance in the Audit and Accounting Guide Audits of Investment Companies when auditing investment accounts. (See the related discussion "2002 Audit and Accounting Guide Audits of Investment Companies" in this section of the Alert, which discusses the update of the Guide with conforming changes.) Paragraphs 2.98 through 2.136 provide guidance on auditing procedures for investment accounts. Among the matters discussed are the principal objectives in auditing the investment accounts, consideration of internal control, and examination of transactions and detail records, including portfolio transactions with affiliates and valuation of investments.

.40 The auditing procedures in paragraph 2.101 in the Guide note that the auditor should review such relevant investment company documents as the latest prospectus, statement of additional information, certificate of incorporation, bylaws, and minutes of the board of directors' and shareholders' meetings to gain an understanding of the investment company's investment objectives and restrictions, and consider whether management has a program to prevent, deter, or detect noncompliance with the investment company's investment restrictions. The auditor should also consider whether the program has identified noncompliance with the stated investment restrictions and test the operation of the program to the extent considered necessary. An investment company's failure to comply with its stated investment restrictions may be considered a possible illegal act that may have an indirect effect on the financial statements of the fund. Should an auditor become aware of the possibility of an illegal act, the procedures delineated in SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317), should be applied. Auditors may also be required, under certain circumstances, pursuant to the Private Securities Litigation Reform Act of 1995 (codified in Section 10A(b)1 of the 1934 Act), to make a report to the SEC relating to an illegal act that has a material effect on the financial statements.

.41 Additional audit guidance for auditing investments is available in SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1, AU sec. 332), and in the companion Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*. Auditors should also consider the need for using the work of a specialist for valuation of complex financial instruments or restricted securities. SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336), can be useful in providing guidance to auditors who use the work of a specialist in performing an audit in accordance with GAAS.

.42 Auditors should also consider the guidance in SEC Accounting Series Releases No. 113 and No. 118, as well as the SEC Division of Investment Management staff interpretive letters.⁵ This guidance may be useful to auditors and financial statement preparers in assessing investment valuations.

Accounting for Investments

.43 Accounting guidance for investments, including methods of valuing investments, defaulted debt securities, and expenditures in support of defaulted debt securities, lending of portfolio securities, and accounting for foreign investments, is discussed in paragraphs 2.19 through 2.97 of the Guide.

.44 Guidance on the valuation of investments is also provided in paragraph 1.32 in the Guide. Paragraph 1.32 states that values and changes in values of investments held by investment companies are as important

⁵ Letter from Douglas Scheidt, associate and chief counsel, SEC Division of Investment Management, to Craig S. Tyle, Investment Company Institute, December 8, 1999, and Letter from Douglas Scheidt, associate and chief counsel, SEC Division of Investment Management, to Craig S. Tyle, Investment Company Institute, April 30, 2001. You can obtain these documents on the SEC Web site at www.sec.gov.

to investors as the investment income earned. Investment companies, therefore, report investments at fair value. The fair value of an investment is the amount at which the investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The best evidence of fair value is the quoted market price in an active market. In the absence of a quoted market price, amounts representing estimates of fair values using methods applied consistently and determined in good faith by the board of directors should be used.

.45 As discussed in paragraph 2.133 of the Guide, auditors should determine whether their investment company clients have made appropriate disclosures about the method(s) and significant assumptions used to estimate the fair values of investments valued by their investment company clients using a valuation model. The auditor should become familiar with the SEC's FRRs on this subject, with an emphasis on Section 404.03 of the SEC's *Codification of Financial Reporting Policies*.

.46 See the related discussions "Accounting Standards Executive Committee Projects on Blockage and the Scope of the Audit and Accounting Guide *Audits of Investment Companies*" and "Exposure Draft on Auditing Fair Value Measurements and Disclosures" in the "On the Horizon" section of this Alert.

2002 Audit and Accounting Guide *Audits of Investment Companies*

.47 The Audit and Accounting Guide *Audits of Investment Companies* has been updated with conforming changes to reflect the issuance of authoritative pronouncements.

.48 Among the conforming changes to the 2002 edition of the Guide are updates for accounting pronouncements, including FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, and FASB Statement No. 141, *Business Combinations*. Updates to the Guide for auditing and attestation pronouncements include conforming changes for SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*; SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319); Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT secs. 101–701); and Statement of Position (SOP) 01-4, *Reporting Pursuant to the Association for Investment Management and Research Performance Presentation Standards*.

Money Laundering Developments

Money Laundering Activities

.49 Money laundering is the funneling of cash or other funds generated from illegal activities, often through legitimate financial institutions or businesses to conceal the initial source of the funds. Money laundering is a global activity and, like the illegal activities that give it sustenance, it seldom respects local, national, or international boundaries.

.50 Criminals use a wide variety of financial institutions and professional advisers to launder the proceeds of crime, and according to the U.S. Department of the Treasury, securities investment companies may also be vulnerable. The evolving dynamics of the industry—mergers and acquisitions, broader product lines, new technologies, and new distribution channels—generate important business opportunities, but they also generate risks for securities investment companies, including increased money laundering vulnerability.

.51 As these industry trends continue, as money launderers increasingly look for a wide range of financial services and conservative, legitimate-appearing asset holdings, and as greater regulatory requirements for banks and other non-bank financial institutions make it more difficult for them to evade detection, the securities investment company industry may become increasingly vulnerable to money laundering and more attractive to money launderers.

Money Laundering and Financial Statements

.52 Money launderers tend to use the business entity more as a conduit than as a means of directly expropriating assets. For this reason, money laundering is far less likely to affect financial statements than are such types of fraud as misappropriations and consequently is unlikely to be detected in a financial statement audit. In addition, other forms of fraudulent activity usually result in the loss or disappearance of assets or revenue, whereas money laundering involves the manipulation of large quantities of illicit proceeds to distance them from their source quickly and in as undetectable a manner as possible. However, money-laundering activities may have indirect effects on an entity's financial statements.

.53 Nevertheless, independent auditors have a responsibility under SAS No. 54, *Illegal Acts by Clients*, to be aware of the possibility that illegal acts may have occurred, indirectly affecting amounts recorded in an entity's financial statements. In addition, if specific information comes to the auditor's attention indicating possible illegal acts that could have a material indirect effect (for example, the entity's contingent liability resulting from illegal acts committed as part of the money laundering process) on the entity's financial statements, the auditor must apply auditing procedures specifically designed to ascertain whether such activity has occurred.

.54 Money laundering is considered to be an illegal act that will often have an *indirect* effect on financial statement amounts under SAS No. 54. Under SAS No. 54, the auditor should be aware of the possibility that such illegal acts may have occurred. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred.

.55 Auditors should also note that laundered funds and their proceeds could be subject to asset seizure and forfeiture (claims) by law enforcement agencies that could result in material contingent liabilities during prosecution and adjudication of cases.

The Bank Secrecy Act

.56 The Bank Secrecy Act (BSA), enacted to address the problems of money laundering and other financial crime, authorizes the U.S. Department of the Treasury to issue regulations requiring financial institutions to file reports, keep certain records, implement anti-money laundering programs and compliance procedures, and report suspicious transactions to the government (see 31 CFR Part 103). Failure to comply with BSA reporting and recordkeeping provisions may result in the assessment of severe criminal and civil penalties. Investment companies are defined as financial institutions under the Act (Title 31 USC 5312 (a) (I)), and unless they are subsidiaries of bank holding companies, they are not currently required to report suspicious activity either by employees or by customers, to the Treasury Department. The Treasury Department encourages all bank and non-bank financial institutions to voluntarily report regarding suspicions of money laundering and related financial crime, as appropriate. Subsidiaries of bank holding companies are required to report suspicious activity by the Federal Reserve (12 CFR 225). The Annunzio-Wylie Anti-Money Laundering Act of 1992 provides a safe harbor from civil liability for reporting financial institutions.

The USA PATRIOT Act

.57 On October 26, 2001, President Bush signed into law the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001 (the Act). This law, enacted in response to the terrorist attacks of September 11, 2001, was intended to strengthen our nation's ability to combat terrorism and prevent and detect money laundering activities in all financial institutions. Broad authority to develop anti-money laundering regulations applicable to each of the various segments of the financial services industry was delegated to the U.S. Department of the Treasury. Title III of the USA PATRIOT Act amends the anti-money laundering provisions of the BSA.

Interim Final Rule on Anti-Money Laundering Programs for Mutual Funds

.58 In April 2002 the U.S. Department of the Treasury through the Financial Crimes Enforcement Network (FinCEN) issued an interim final rule to prescribe minimum standards applicable to mutual funds pursuant to the revised provision in the BSA that requires financial institutions to establish anti-money laundering programs. The application of the interim rule was limited to those investment companies falling within the category “open-end company” contained in Section 5(a)(1) of the 1940 Act, commonly referred to as “mutual funds.” Mutual funds are required by the interim final rule to develop and implement an anti-money laundering program reasonably designed to prevent the mutual fund from being used for money laundering or the financing of terrorist activities and to achieve and monitor compliance with applicable requirements of the BSA and the U.S. Department of the Treasury’s implementing regulations. Programs must be approved in writing by the mutual fund’s board of directors or trustees.

.59 In a separate interim rule, the U.S. Department of the Treasury temporarily exempted investment companies other than mutual funds from the BSA requirement that they establish anti-money laundering programs. The U.S. Department of the Treasury also temporarily deferred determining the definition of *investment company* for purposes of the BSA.

.60 Refer to interim final rules and the FinCEN Web site at www.fincen.gov for compliance date information.

Proposed Rule on Anti-Money Laundering Programs for Unregistered Investment Companies

.61 In a notice of proposed rulemaking, published in the September 26, 2002, *Federal Register*, the U.S. Department of the Treasury, through FinCEN, proposed amendments to the BSA regulations. The proposed rule would define an investment company to include certain investment vehicles not subject to regulation under the 1940 Act and require those entities to establish anti-money laundering programs. Hedge funds, private equity funds, venture capital funds, commodity pools, and real estate investment trusts would be covered by this proposed definition. Refer to the SEC and FinCEN Web sites for updated information about the proposed rule.

Proposed Rule on Customer Identification Programs for Mutual Funds

.62 In July 2002 the U.S. Department of the Treasury, through FinCEN, and the SEC jointly issued a proposed regulation (see Release No. IC-25657) to implement Section 326 of the USA PATRIOT Act. Section 326 requires the SEC and Secretary of the Treasury to jointly prescribe a regulation that, at a minimum, requires investment companies to adopt and implement reasonable procedures to (1) verify the identity of any person seeking to open an account, to the extent reasonable and practicable; (2) maintain records of the information used to verify the person’s identity; and (3) determine whether the person appears on any lists of known or suspected terrorists or terrorist organizations provided to investment companies by any government agency. The scope of this proposed rule is limited to those entities required to register with the SEC as investment companies and that fall within the category of “open-end company” contained in Section 5(a)(1) of the 1940 Act, entities commonly referred to as mutual funds. The proposed rule would affect mutual funds that are small entities. Refer to the SEC and FinCEN Web sites for updated information about the proposed rule.

New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance

.63 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the writing of last year’s Alert. The AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] contains a summary explanation of all these issuances. For information on auditing and attestation standards

issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards Team and available at www.aicpa.org.

SAS No. 95	<i>Generally Accepted Auditing Standards</i> Issued in December 2001. This SAS is effective for audits of financial statements for periods beginning on or after December 15, 2001.
SAS No. 96	<i>Audit Documentation</i> Issued in January 2002. This SAS is effective for audits of financial statements for periods beginning on or after May 15, 2002. Early application is permitted.
SAS No. 97	<i>Amendment to Statement on Auditing Standards No. 50, Reports on the Application of Accounting Principles</i> Issued in June 2002. This SAS is effective for written reports issued or oral advice provided on or after June 30, 2002. Earlier application is permitted.
SAS No. 98	<i>Omnibus Statement on Auditing Standards—2002</i> Issued in September 2002. This SAS amends a number of SASs. The effective dates vary for the amendments.
SAS No. 99	<i>Consideration of Fraud in a Financial Statement Audit</i> Issued in October 2002. This SAS is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.
SAS No. 100	<i>Interim Financial Information</i> Issued in November 2002. This SAS is effective for interim periods within fiscal years beginning after December 15, 2002. Early application of the provisions of the SAS is permitted.
SOP 02-1	<i>Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code</i> Issued in May 2002. This SOP is effective upon issuance and is applicable only to agreed-upon procedures engagements that report on annual claims prompt payment reports as required by the New Jersey Administrative Code.
SSAE No. 11	<i>Attest Documentation</i> Issued in January 2002. This SSAE is effective for attest engagements when the subject matter or assertion is as of or for a period ending on or after December 15, 2002. Earlier application is permitted.
SSAE No. 12	<i>Amendment to Statement on Standards for Attestation Engagements No. 10, Attestation Standards: Revision and Recodification</i> Issued in September 2002. This SSAE is effective upon issuance.
Audit and Accounting Guide	<i>Audits of State and Local Governments (GASB 34 Edition)</i> Issued September 2002. The new Guide is effective for audits of a state or local government's financial statements for the first fiscal period ending after June 15, 2003, in which the government does apply or is required to apply the provisions of Governmental Accounting Standards Board Statement No. 34, <i>Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments</i> , or GASB Statement No. 35, <i>Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities</i> .

⁶ SAS No. 98, *Omnibus Statement on Auditing Standards—2002*, among other matters, amends SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324). The amendment revises the guidance in Interpretation No. 6, "Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events in a Service Auditor's Engagement" of SAS No. 70, *Service Organizations*, rescinds Interpretation No. 6, and brings the guidance from Interpretation No. 6 into SAS No. 70. This amendment is effective for reports issued on or after January 1, 2003.

.64 Of the pronouncements, guides, and other guidance listed above, those having particular significance to the investment companies industry are briefly explained below. These summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

Audit Guide Service Organizations: Applying SAS No. 70, as Amended

.65 The Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (new edition as of April 15, 2002) (product no. 012772kk) assists auditors in applying GAAS in audits of financial statements of entities that use service organizations, and in service auditors' engagements. Chapter 1 of this Audit Guide, "Audit Considerations for an Entity That Uses a Service Organization," identifies the information a user auditor may need about the processing performed by a service organization for a user organization, and also describes how a user auditor obtains that information. Paragraph 1.06 in this Guide provides examples of service organizations, including the following example regarding transfer agents, custodians, and recordkeepers for investment companies:

Transfer agents process purchases, sales, and other shareholder activity for investment companies. Shareholders or prospective shareholders of investment companies initiate transactions by contacting the transfer agent either in writing, by telephone through an automated response unit, or through the Internet. The transfer agent remits to (receives from) the investment company the net proceeds from the purchase and sale of shares in the investment company. The custodian is responsible for the receipt, delivery, and safekeeping of the company's portfolio securities; the receipt and disbursement of cash resulting from transactions in these securities; and the maintenance of records of the securities held for the investment company. The custodian may also perform other services for the investment company, such as collecting dividend and interest income and distributing that income to the investment company. Recordkeepers maintain the financial accounting records of the investment company based on information provided by the transfer agent and the custodian of the investment company's investments. From the perspective of the investment company, the transfer agent, custodian performing servicing, and recordkeeper may be service organizations. Accordingly, auditors of an investment company may obtain information from a service auditor's report on controls at a transfer agent, recordkeeper, and custodian. From the perspective of an investor, an investment company is not a service organization but rather an entity in which the investor has a financial interest; accordingly, SAS No. 70, as amended, does not apply.

.66 Other chapters in the Guide include discussions about the form and content of service auditors reports, and guidance to user auditors on using a service auditor's report on controls placed in operation (type 1 report) and a service auditor's report on controls placed in operation and tests of operating effectiveness (type 2 report), among other matters. Also, AU section 324: *Service Organizations*, is reproduced as Appendix F to this Audit Guide, and AU sec. 9324: *Service Organizations: Auditing Interpretations of Section 324* is reproduced in Appendix G to this Audit Guide. Appendix G includes the three new interpretations of SAS No. 70 previously listed in this section of the Alert.

New Accounting Pronouncements and Other Guidance

AICPA and FASB Pronouncements and Other Guidance

.67 Presented below is a list of accounting pronouncements and other guidance issued since the writing of last year's Alert. The AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] contains a summary explanation of all these issuances. These summaries are for informational purposes only and should not be

relied upon as a substitute for a complete reading of the applicable standard. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site, www.aicpa.org, and the FASB Web site, www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

- FASB Statement No. 145 *Rescission of FASB Statements No. 4, 44, 64, Amendment of FASB Statement No. 13, and Technical Corrections*
 Issued in April 2002. The provisions of this Statement related to the rescission of FASB Statement No. 4, *Reporting Gains and Losses from Extinguishment of Debt*, shall be applied in fiscal years beginning after May 15, 2002, with early application encouraged. The provisions of paragraphs 8 and 9(c) of this Statement related to FASB Statement No. 13, *Accounting for Leases*, are effective for transactions occurring after May 15, 2002, with early application encouraged. All other provisions of this Statement are effective for financial statements issued on or after May 15, 2002, with early application encouraged.
- FASB Interpretation No. 45 *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*
 Issued in November 2002. The initial recognition and initial measurement provisions apply on a prospective basis to guarantees issued or modified after December 31, 2002, regardless of the guarantor's fiscal year end. The disclosure requirements in the Interpretation are effective for financial statements of interim or annual periods ending after December 15, 2002.
- FASB Statement No. 146 *Accounting for Costs Associated With Exit or Disposal Activities*
 Issued in June 2002. The provisions of this Statement are effective for exit or disposal activities initiated after December 31, 2002. Early application is encouraged.
- FASB Statement No. 147 *Acquisitions of Certain Financial Institutions*
 Issued in October 2002. See paragraph 7 of this Statement for effective date information.
- SOP 01-5 *Amendment to Specific AICPA Pronouncements for Changes Related to the NAIC Codification*
 Issued in December 2001. This SOP is effective for annual financial statements for fiscal years ending on or after December 31, 2001, and complete sets of interim financial statements for periods beginning on or after that date and audits of those financial statements.
- SOP 01-6 *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others*
 Issued in December 2001. Changes in accounting and financial reporting required by this SOP should be applied prospectively and are effective for annual and interim financial statements issued for fiscal years beginning after December 15, 2001, with certain exceptions. Early application is encouraged.
- Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*
 See the "New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance" section of this Alert for effective date information.
- Technical Practice Aids *Software Revenue Recognition*
- Questions and Answers *FASB Statement No. 87, Employers Accounting for Pensions*

Technical Practice Aids—Investment Companies⁷

Private Investment Companies Issue (Nonregistered)

.68 In January 2002, the AICPA Accounting Standards staff, helped by industry experts, released questions and answers (Q&As), commonly referred to as Technical Practice Aids (TPAs), on the implementation by private investment companies of certain provisions of the Audit and Accounting Guide *Audits of Investment Companies*. The TPAs relate primarily to the method of disclosing financial statement highlights by private investment companies and are as follows:

- *Clarification of Certain Terms When Reporting Financial Highlights by Non-Registered Investment Funds* (AICPA, *Technical Practice Aids*, vol. 1, sec. 6910.04)
- *Disclosure of Per Share or Per Unit Data When Reporting Financial Highlights by Non-Registered Investment Funds* (sec. 6910.05)
- *Reporting of Classes of Shares When Reporting Financial Highlights by Non-Registered Investment Funds* (sec. 6910.06)
- *Computation of Financial Ratios When Reporting Financial Highlights by Non-Registered Investment Funds* (sec. 6910.07)
- *Computation of Expense Ratio When Reporting Financial Highlights by Private Equity and Venture Funds* (sec. 6910.08)
- *Computation of Financial Ratios When Reporting Financial Highlights by Partnership Funds-of-Funds and Master-Feeder Funds* (sec. 6910.09)
- *Computation of Total Return When Reporting Financial Highlights by Non-Registered Investment Funds* (sec. 6910.10)

Reporting Financial Highlights by Separate Accounts

.69 In February 2002, the AICPA Accounting Standards staff, helped by industry experts, released Q&As, commonly referred to as TPAs, on reporting financial highlights by separate accounts. The TPAs provide guidance on how to apply the financial highlights requirement by the Audit and Accounting Guide *Audits of Investment Companies* to separate accounts and are as follows:

- *Reporting Financial Highlights by Separate Accounts* (AICPA, *Technical Practice Aids*, vol. 1, sec. 6910.11)
- *Reporting of Per Share or Per Unit Data When Reporting Financial Highlights by Separate Accounts* (sec. 6910.12)
- *Computation of Per Share or Per Unit Data When Reporting Financial Highlights by Separate Accounts* (sec. 6910.13)
- *Reporting Units Issued and Redeemed During the Period* (sec. 6910.14)
- *Transition* (sec. 6910.15)

Application of FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*

.70 FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, among other matters, amends Accounting Research Bulletin (ARB) No. 51, *Consolidated Financial Statements*, to eliminate

⁷ "Technical Questions and Answers" specifically pertaining to investment companies are found in section 6910 of AICPA *Technical Practice Aids*. The questions and answers (Q&As) included in "Technical Questions and Answers" are nonauthoritative and are based on selected practice matters identified by the staff of the AICPA Technical Hotline and various other bodies within the AICPA. As of the writing of this Alert, the Q&As discussed in this section of the Alert are also available on the AICPA Web site at www.aicpa.org.

the exception to consolidation for a subsidiary for which control is likely to be temporary. At its November 7, 2001 meeting, the FASB clarified that the amendment is not intended to apply to the exception to consolidation for noninvestment company investees measured at fair value pursuant to paragraph 7.04 of the Audit and Accounting Guide *Audits of Investment Companies*. See FASB Action Alert No. 01-41.

Application of EITF Topic D-98, *Classification and Measurement of Redeemable Securities*

.71 Consistent with an SEC staff announcement published under Emerging Issues Task Force (EITF) Topic D-98, *Classification and Measurement of Redeemable Securities*, a registered investment company should not include preferred stock under the caption “Net assets” if the investment company may be required to redeem all or part of the preferred stock upon failure to satisfy statistical coverage requirements imposed by its governing documents or a rating agency, as discussed in paragraph 7.31 in the Audit and Accounting Guide *Audits of Investment Companies*.

.72 On July 12, 2002, the Chief Accountants Office of the Division of Investment Management released more guidance specific to the application of EITF Topic D-98 to closed-end funds. Of most significance, the staff indicated that distributions to preferred stockholders should be presented as a component of the net increase (decrease) in net assets resulting from investment operations, below net investment income on the statement of operations, the statement of changes in net assets and financial highlights. The staff indicated that preferred stock arrangements that are redeemable on a fixed or determinable date should follow the guidance set forth in EITF Topic D-98.

On the Horizon

.73 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] summarizes some of the more significant ongoing projects and exposure drafts outstanding. Presented below is brief information about certain ongoing projects and exposure drafts that are especially relevant to the investment companies industry. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.74 The following table lists the various standard-setting bodies’ Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below and in the general *Audit Risk Alert—2002/03* [AAM section 8010]. Readers should refer to information provided by the various standard-setting bodies for further information.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board	www.fasb.org
Professional Ethics Executive Committee	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process the submission more efficiently. Include your full name, mailing address and, if available, your membership and subscriber number in the message.

Accounting Standards Executive Committee Projects on Blockage and the Scope of the Audit and Accounting Guide *Audits of Investment Companies*

.75 Chapter 1 in the Audit and Accounting Guide *Audits of Investment Companies* discusses the kinds of companies considered to be investment companies to which the provisions of the Guide apply. As noted in the Guide, the FASB expressed concerns regarding both the clarity of the scope of the Guide and the use of a blockage factor in estimating the fair value of certain unrestricted investments that have a quoted market price in an active market. As a result, the Accounting Standards Executive Committee (AcSEC) is undertaking two separate projects to address those concerns. For both issues, the Guide includes "standstill" provisions on current accounting practice as follows:

- *Clarification of the Scope of the Investment Companies Audit and Accounting Guide.* AcSEC plans to release in December 2002 an exposure draft of a proposed SOP, *Clarification of the Scope of the Audit and Accounting Guide Audits of Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*, to address this issue. Until that project is finalized, an entity should consistently follow its current accounting policies for determining whether the provisions of the Guide apply to investees of the entity or to subsidiaries that are controlled by the entity. Further, the FASB has expressed its view that an investment company (other than a separate account of an insurance company as defined in the 1940 Act) must be a separate legal entity to be within the scope of the Guide (see the FASB Action Alert No. 02-14, April 3, 2002). Accordingly, the specialized accounting principles in the Guide should be applied to an investment made after March 27, 2002, only if the investment is held by an investment company that is a separate legal entity. Investments acquired prior to March 28, 2002, or those acquired after March 27, 2002, pursuant to an irrevocable binding commitment that existed prior to March 28, 2002, should continue to be accounted for in accordance with the entity's existing policy for such investments. For further discussion of this matter, see the FASB Staff announcement in EITF Topic D-74, *Issues Concerning the Scope of the AICPA Audit Guide on Investment Companies*.
- *Use of a blockage factor.* If it was an entity's accounting policy in investment company financial statements issued for fiscal years ending on or before May 31, 2000, to apply a blockage factor to estimate the fair value of certain unrestricted investments that have a quoted market price in an active market, the entity may continue to apply that policy to those and similar investments. However, disclosure of the existence of such a policy is required. Otherwise, an entity may not elect to adopt such a policy pending the completion of AcSEC's project on this matter or FASB's project on measuring financial instruments at fair value.

FASB Exposure Draft on Consolidation of Certain Special Purpose Entities

.76 The FASB has issued an exposure draft of a proposed Interpretation, *Consolidation of Certain Special Purpose Entities*. This proposed Interpretation would address consolidation by business enterprises of special-purpose entities (SPEs) to which the usual condition for consolidation described in ARB No. 51, *Consolidated Financial Statements*, does not apply because the SPEs have no voting interests or otherwise are not subject to control through ownership of voting interest. The FASB expects to issue an interpretation in the fourth quarter of 2002. While it is still unclear how this exposure draft would affect investment companies, the impact could be significant.

Exposure Draft on Auditing Fair Value Measurements and Disclosures

.77 The AICPA's Auditing Standards Board (ASB) has released an exposure draft of a proposed SAS titled *Auditing Fair Value Measurements and Disclosures*. The proposed SAS addresses auditing considerations relating to measurement, presentation, and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in the financial statements. The ASB will discuss a revised draft of the proposed SAS at its December 2002 meeting. If approved at that meeting, the SAS is expected to be issued by February 2003.

New Framework for the Audit Process

.78 The AICPA's ASB has released an exposure draft of seven proposed SASs relating to the auditor's risk assessment process. See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a discussion of these proposed SASs.

.79 You should keep abreast of the status of this project and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA Web site at www.aicpa.org.

Investment Companies Regulatory Liaison Task Force

.80 The AICPA established the Investment Companies Regulatory Liaison Task Force to liaise with regulatory agencies to advocate the profession's views and to provide technical counsel to ensure that related regulatory or broad private-sector requirements involving accounting, auditing, or work by CPAs for the investment companies industry are consistent with and workable under professional standards set in the private sector.

.81 Information on the task force and meeting highlights can be obtained at the AICPA Web site at www.aicpa.org.

Resource Central

Education courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

Checklist Supplement and Illustrative Financial Statements for Investment Companies

.82 The *Checklist Supplement and Illustrative Financial Statements for Investment Companies* (product no. 008943kk) is a nonauthoritative financial accounting and reporting practice aid for preparers or reviewers of financial statements of investment companies. This checklist should be used in conjunction with the *Checklists and Illustrative Financial Statements for Corporations* (product no. 008933kk).

Audit and Accounting Manual

.83 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; and engagement letters, management representation letters, and confirmation letters.

Practice Aid, Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide

.84 In connection with the issuance of SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, the AICPA has developed a new Practice Aid (product no. 006613kk). The Practice Aid includes topics such as:

- How the new SAS changes audit practice
- Developing an implementation plan
- Audit issues in revenue recognition
- Inquiries of entity personnel
- Practice aids, such as:
 - Specialized industry fraud factors, including the investment companies industry
 - Common frauds, and extended audit procedures

AICPA reSOURCE

.85 AICPA reSOURCE Online is an electronic library that provides instant access to the AICPA's *Professional Standards*, *Technical Practice Aids*, current Audit and Accounting Guides, current Audit Risk Alerts, and *Accounting Trends and Techniques*. To subscribe, go online at www.cpa2biz.com.

.86 The AICPA also has a CD-ROM product titled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM also enables subscription access to the AICPA Professional Literature products in a Windows format.

Education Courses

.87 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the investment companies industry, many of them available for both group study and self-study. For more information about AICPA CPE courses, call the AICPA (Member Satisfaction) at (888) 777-7077.

Online CPE

.88 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee provides you with unlimited access to hundreds of courses of online CPE in one- and two-hour segments.

CPE CD-ROM

.89 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.90 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.91 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.92 Members of the AICPA Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.93 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2Biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the professional standards, and CPE courses.

Other Helpful Web Sites

.94 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the "Information Sources" table at the end of this Alert.

.95 This Audit Risk Alert replaces the *Investment Companies Industry Developments—2001/02* Audit Risk Alert. The *Investment Companies Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to mkasica@aicpa.org or write to:

Securities Industry Developments—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform the audits of your securities industry clients. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment your clients operate in. This Alert is an important tool in helping you identify the significant business risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the securities industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Economic and Industry Developments

*What are the industry and economic conditions facing
broker-dealers and commodity entities in the current year?*

Weak Recovery and an Uncertain Future

.04 The economic word of the day for 2001 was “uncertain” and it still holds true for 2002. The current mix of opposing trends—solid demand, but no strong pickup in jobs—stems partly from the nature of this business cycle. In other words, mild recoveries tend to follow mild recessions. The U.S. economy stands stuck between a double-dip recession and a robust economic expansion.

.05 Growth in gross domestic product (GDP) soared in the first quarter of 2002 to an annual average of 5 percent but then fell back to an alarming growth rate of 1.3 percent. In the third quarter, GDP grew at a 3.1 percent annual rate, stimulated by increased car sales. Economists estimate that GDP will grow at a rate of less than 2 percent in the fourth quarter. The historical average for economic growth at this stage of the recovery is in excess of 5 percent.

.06 In November 2002, the Federal Reserve Board lowered the federal funds rate to 1.25 percent, its lowest level in 41 years. Corporate earnings reports through the first three quarters of 2002 were weak in many sectors. Consumer confidence also showed signs of weakening. Unemployment has barely changed since last year and it stood at 5.7 percent in October of 2002, significantly up from 3.9 percent two years earlier. Economists believe that the economy needs to start growing at a faster rate before unemployment can decline.

Stock Market Woes

.07 Through the first three quarters of 2002, the downward slide of the Dow Jones Industrial Average (DJIA), the National Association of Securities Dealers Automated Quotation (NASDAQ) Composite Index, and the Standard & Poor's 500 stock index (S&P 500) that began in 2000 continued. The volatility in the stock

markets, concerns over possible military action in Iraq, corporate scandals, and fears that the recovery will not last have sapped investor confidence, prompting investors to reconsider their investment strategies. In July 2002, for the first time in 15 years, investors pulled more money out of stock mutual funds than they put in during the preceding year. This negative trend continued for the rest of the summer. Throughout the year analysts were evaluating economic conditions and drastic declines in stock market indexes—comparing them to prior periods and trying to decide if we had finally reached rock bottom. But the stock market kept surprising us all by further declining and sending various indexes to their record lows. On October 9, 2002, the DJIA finished at 7286.27, its lowest close in nearly five years; the NASDAQ ended at 1114.11, its lowest level in more than six years; while the S&P 500 fell to 776.76, its lowest finish in more than five years. All of these indicators are significantly below the panic levels following the events of September 11, which investors thought were the lowest they would ever see. The stock market began an upward climb during the fall, resulting in a 10.6 percent gain in the DJIA in the month of October, its strongest monthly gain since 1987.

.08 The currency markets, too, have experienced nail-biting dips. Like stocks, the dollar was hit hard by the forecasts of weak growth. The dollar went into a nosedive against the euro, sinking 18 percent from mid-January to mid-July 2002. In the third quarter of 2002, however, the dollar rebounded and strengthened.

.09 The year 2002 was another bad one for the securities industry. With a declining stock market and business dwindling in such profitable areas as stock and bond underwriting and mergers and acquisitions, investment bank earnings for the first three quarters of 2002 were significantly lower than last year. The economists do not foresee a turnaround until at least 2003. And even then nobody expects the activity levels to reach those of the late 1990s.

Aftermath of September 11

.10 More than a year after the terrorist attacks of September 11, 2001, the financial industry is still dealing with the consequences. Out of 2,820 people dead or missing in New York City, more than 40 percent worked in the financial services sector. The industry that relies heavily on personal relationships lost a number of professionals who have been hard to replace. Some of the affected firms, in an attempt to restore some normalcy to their operations, rushed to fill vacancies. In a number of cases, people were elevated to high ranks without proper managerial experience. As an auditor of a securities firm that had to replace a significant portion of its staff, you need to consider the effect of new personnel on your client's internal control system. Statement on Auditing Standards (SAS) No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, provides guidance on the auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards (GAAS).

.11 In the year since September 11 a number of securities firms left downtown Manhattan and moved their offices elsewhere. For some companies the move was necessary because their facilities were damaged or destroyed by the attacks. Others realized the need to disperse their operations to ensure business continuity in case of another disaster. One of the lessons learned after September 11 was the inappropriateness of concentrating people and operations in a small geographic area. The New York Stock Exchange (NYSE) soon will be divided into two separate locations—the existing one on Wall Street and another one somewhere within New York State. As you prepare to conduct audits of firms that relocated some or all of their operations, you must gain an understanding of this new environment in order to adequately plan and perform the audit.

Business Continuity Addressed by Regulators

.12 The issue of business continuity was also addressed by various regulatory agencies this year. In August 2002, the Securities and Exchange Commission (SEC) together with the Federal Reserve and the Treasury Department (the agencies) issued for comment a *Draft Interagency White Paper on Sound Practices to Strengthen the Resilience of the U.S. Financial System*. After consideration of the comments received, the agencies

intend to issue a final version of the white paper and to incorporate these sound practices into supervisory expectations or other forms of guidance. This white paper discusses business continuity objectives that have special importance after September 11 and their scope of application; the agencies' preliminary conclusions with respect to key factors affecting the resilience of critical markets and activities in the U.S. financial system; sound practices to strengthen financial system resilience; and an appropriate timetable for implementing these sound practices. Under the new plan, if adopted, securities firms might have to move their backup facilities as far as 200 or 300 miles away from their primary sites. The plan also states that the firms need to have sufficient trained staff located at or near the backup site to resume critical operations within a few hours of a disaster. The sound practices apply most directly to "core clearing and settlement organizations" and "financial institutions that play significant roles in critical markets." Critical markets are defined as the markets for federal funds, foreign exchange, commercial paper, and government, corporate, and mortgage-backed securities. The critics of the plan say that the cost of setting up and staffing remote backup facilities would be too high for some firms to handle. Comments on the draft white paper were due by October 21, 2002.

.13 Also in August, the NASD and the NYSE filed with the SEC proposed rule changes relating to business continuity plans. The proposed rule changes will require members to develop and maintain business continuity plans that establish procedures to be followed in the event of an emergency or significant business disruption. Members will be required to make such plans available to the NASD and/or NYSE (whichever organization is their designated examining authority with respect to financial and operational issues) upon request. Members will also be required to conduct an annual review of their business continuity and contingency plans to determine whether any modifications are necessary in light of changes to the member's operations, structure, business, or location.

.14 Recently the Securities Industry Association (SIA) published its *Best Practices Guidelines for Business Continuity*. According to the SIA, the best practices outline what securities firms should include in their own efforts to ensure that, in the event of an emergency, they can either continue operating or reestablish operations with minimal disruption to their business.

Compliance System

.15 Recent high-profile broker fraud cases put a spotlight on Wall Street firms' compliance practices. The general purpose of a compliance function within a securities firm is to review the activities of the sales departments and branch office operations. A recent case deserves some special attention. For 15 years a star broker, who recently pleaded guilty to a number of charges including misusing more than \$50 million of investors' money, was making unauthorized transfers from customer accounts. To cover up his activities, he diverted clients' brokerage-account statements to post office boxes he controlled or third-party addresses and then sent his clients forged statements inflating the value of their holdings. What is special about this case is that the two securities firms where this broker was employed during this 15-year period did not discover his fraudulent activities until January 2002, when the perpetrator himself sent a letter to the Federal Bureau of Investigation describing in detail how he was able to execute his scam for so long. This case underscores a number of fundamental problems with the way some Wall Street firms monitor their brokers, especially top-producing ones.

.16 One of the reasons why that broker's activities were never discovered by the compliance departments in both firms is that this broker, who was a branch manager, helped supervise the top compliance executive in his office. Experts say that despite the apparent conflict of interest, it is a common practice in the securities industry for compliance personnel to be subordinate to and report to branch managers whose activities they are supposed to be policing. Some firms responded to this incident by prohibiting their branch managers from being active brokers and requiring them to focus more on supervising brokers in their offices.

.17 Another issue raised by this case is the hesitancy on the part of some securities firms to supervise their top-producing brokers. Compliance officials are afraid that these high performers may find any scrutiny

to be offensive and leave, taking their clients and the significant assets they control along with them. There were a number of red flags in the case described above which should have tipped off compliance personnel that something was going on. Industry experts say one of the circumstances that should have been questioned was the disproportionate amount of commissions the broker appeared to have earned from his clients' asset base. In 1999 the broker generated almost \$6 million of commissions on client assets of just slightly over \$100 million while the industry average for commissions that year was below \$500,000.

.18 Another issue that should have been addressed by compliance officials was the presence of the broker's personal computer on his desk despite the fact that it was against the firm's policy. Investigators allege that the broker used his personal computer to falsify client account statements. Mailing customer statements and confirmations to a post office box is a fundamental concern of any basic compliance program. Industry experts also question whether the broker's activities could have been discovered earlier had his employers called his customers to check on his performance. Instead of making phone calls, some companies prefer to send out letters to customers along with account statements to verify that the firm's information matches the clients' records. Securities firms routinely use such spot-checks as part of their compliance procedures. It is unclear if either of the securities firms ever called any of the broker's clients, but some of the clients claim they never received such calls.

.19 After this case came to light, Wall Street's compliance became the center of attention of a congressional hearing. The SEC, NYSE, and the regulatory arm of the National Association of Securities Dealers (NASD) launched a joint "examination" of compliance practices in the securities industry. Recently, the NYSE proposed new rules to strengthen the internal controls at the branch offices of securities firms. The NASD is expected to come up with a similar proposal.

.20 The aforementioned case highlighted a number of weaknesses in the compliance and internal control systems of some securities firms. As an auditor of a broker or dealer in securities (broker-dealer), you are required by the SEC to issue a report on your client's internal control describing any material inadequacies found to exist or to have existed since the date of the previous audit. Refer to SEC Rule 17a-5 and SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), for more guidance on reports on internal control. Also be aware that failure on the part of securities firms to supervise their employees opens them up to significant legal exposure. As an auditor of a securities firm, you need to consider the impact of litigation on your client's financial statements. See the "Litigation, Claims, and Assessments" section of this Alert for a further discussion of this topic. For a discussion of auditor's responsibility with respect to fraud, see the "Fraudulent Financial Reporting" section of this Alert.

Research Analysts

.21 Research analysts attracted a lot of attention in 2002. Analysts were questioned by Congress about their failure to foresee the collapse of Enron despite the presence of numerous red flags. According to the data released by the Senate Governmental Affairs Committee, 10 out of 15 analysts following Enron were still promoting the stock to their clients weeks after the SEC started probing Enron's financial condition.

Numerous Investigations Into Conflicts of Interest

.22 The New York attorney general inquired into a major securities firm's research practices, generating more bad publicity for the securities industry. The attorney general alleged that the securities firm's research analysts issued bullish recommendations on certain Internet stocks while privately criticizing the same stocks. He argued that the firm's analysts were not independent and their ratings were influenced by the desire of their employer to win investment-banking business. To settle the case, the securities firm agreed to pay a \$100 million penalty and agreed to a number of changes to separate research from investment banking and to enhance disclosures in its research reports of multiple relationships with stock issuers.

.23 Having won a settlement in that case, the attorney general turned his attention to the research practices of other major securities firms. The latest focus of his investigation is on the work of a former star telecom analyst and his former firm. Among other things, the attorney general is investigating the telecom analyst's dual role of helping his former employer win investment-banking business from top telecom companies while also actively promoting stocks of those companies to individual investors in his research reports. Recently the attorney general expanded his probe to determine if the telecom analyst's superiors had any influence on his stock recommendations, indicating company-wide conflicts of interest.

.24 Moreover, the NASD charged the telecom analyst and his former employer with improper action connected to his research on a communications company. The regulators allege that the analyst misled investors by maintaining a bullish recommendation on the company, an investment-banking client of his employer, up until a couple of days before the communications company filed for bankruptcy, despite numerous factors pointing to the company's deteriorating condition.

.25 Having spent months dealing with allegations of conflicts of interest involving overly optimistic research analysts, industry regulators had to switch gears and investigate an analyst accused of going too far in trying to obtain information for his research report. In October 2002, the NASD imposed sanctions on a health-care analyst for trying to enroll into a clinical drug trial to find out about the drug's side effects and the progress of the trial. Based on the information the analyst was able to obtain, he published a research report telling his clients to sell the stock, thus causing a significant decline in the stock price. As it turned out, his report was inaccurate. The securities firm where the analyst had worked was also sanctioned for having inadequate training and written supervisory procedures for its research department.

Regulators Take Action on Conflicts of Interest

.26 In April 2002, the SEC commenced a formal inquiry into market practices concerning research analysts and the potential conflicts that can arise from the relationship between research and investment banking. The inquiry will be conducted jointly with the NYSE, the NASD, the New York attorney general, the North American Securities Administrators Association (NASAA), and the state regulators. The inquiry will help determine the necessity of additional rulemaking and whether any laws have been violated.

.27 In May, the SEC approved proposed changes to the rules of the NASD and the NYSE to address conflicts of interest that are raised when research analysts recommend securities in public communications. See the "Self-Regulatory Organization Regulations" section of this Alert for more information on the new rules. Also, the NYSE board of directors recently approved additional proposed rule changes requiring "further separation of analysts from investment banking activities."

.28 In August, the SEC proposed a rule entitled *Regulation Analyst Certification*. The proposed regulation would require that any research report disseminated by broker or dealer include certifications by the research analyst that the views expressed in the research report accurately reflect the analyst's personal views, and state whether the analyst received compensation or other payments in connection with his or her specific recommendations or views. A research analyst would also be required to provide certifications and disclosures in connection with public appearances.

.29 In October 2002, the SEC, the New York State Attorney General's Office, the NYSE, the NASD, and the NASAA announced a joint effort to bring to a speedy and coordinated conclusion the various investigations concerning analyst research and initial public offering (IPO) allocations. (See the "Initial Public Offering Practices" section below for more information on the issue of IPO allocations.) The participating regulatory entities will attempt to formulate a common plan to address conflict-of-interest and other issues pertaining to research analysts and IPO allocations. This plan will then be used as a template to structure appropriate settlements with the companies that are currently under investigation and to provide a sound basis for proposing industry-wide rules and regulations (including structural reforms) that will be used to govern in these areas.

.30 Analyst conflicts of interest were also addressed in the landmark Sarbanes-Oxley Act of 2002. Section 501 of the new law requires the SEC, or industry regulators with the authorization and direction of the SEC, to adopt rules designed to address conflicts of interest in order to improve the objectivity of research and provide investors with more useful and reliable information and rules requiring disclosures of conflicts of interest.

Possible Litigation

.31 In addition to being the focus of attention of various regulatory agencies concerning their research practices, brokerage firms face a number of class action suits and individual arbitration claims filed against them citing recommendations of their analysts. Legal experts believe that the activities of federal and state regulators regarding research analysts will benefit individual investors and make it easier for them to recover money lost on technology stocks from the securities firms. Legal proceedings are hurting investment banks' profitability by forcing them to pay significant amounts of money in legal fees and settlements. As an auditor of a securities firm, you need to consider the impact of litigation on your client's financial statements. See the "Litigation, Claims, and Assessments" section of this Alert for a further discussion of this topic.

Initial Public Offering Practices

.32 Wall Street's IPO practices were another area that was heavily scrutinized by regulators in 2002. In January, following a 10-month investigation, the NASD and the SEC fined a major firm \$100 million for extracting tens of millions of dollars from customers in inflated commissions that amounted to a "profit sharing" arrangement for allocations of "hot" IPOs, according to the NASD. During the tech boom, when IPOs almost always increased in value right after they started trading and, as a result, were hard to get, the firm allocated IPO stocks to customers who agreed to share their IPO profits with the firm in the form of excessive commissions on transactions unrelated to the IPO. The NASD found that such quid pro quo agreements violated a number of its rules, including the rules prohibiting brokers from sharing in the profits of client accounts and requiring brokerage firms to adhere to just and equitable principles of trade.

.33 The New York attorney general, Congress, and the NASD are investigating another major firm's IPO practices. Based on the evidence available so far, it appears that during the telecom boom this firm allocated numerous shares of hot IPOs to personal brokerage accounts of telecom executives at below-market prices. If investigators determine this was done in the hopes of winning investment-banking business from the executives' companies, this practice, known as "spinning," can be found to be in violation of the NASD's Free-Riding Rule. According to the NASD, the purpose of the Free-Riding Rule is to protect the integrity of the public offering system by ensuring that shares are sold to the general public and that broker-dealers do not withhold the securities for their own benefit or use them to reward persons who are in a position to direct future business to the broker-dealer.

.34 Securities firms were also accused of inducing investors who wanted IPO shares to purchase additional shares of the same stocks in the aftermarket in an attempt to drive up prices of those shares, a practice known as "laddering."

.35 There were several lawsuits filed against brokerage firms charging that the firms profited illegally from IPOs by intentionally underpricing the shares in hopes of later on sharing profits generated by the stocks with clients who received the coveted IPO shares.

New Regulatory Actions

.36 To address these alleged improprieties, in July the NASD proposed a set of new rules governing allocation of IPOs that would ban such practices as spinning, laddering, and quid pro quo agreements. These proposed rules have been released for public comment and will require SEC approval. In October, the NASD and the NYSE named the IPO Advisory Committee to review the IPO process. Based on the findings of the Committee, the two self-regulatory organizations intend to make rule proposals and other recommendations

to the SEC. Also in October, the SEC along with other industry regulators announced a joint effort to bring to a fast conclusion the various investigations concerning analyst research and IPO allocations. (See the previous section “Research Analysts” for more information on this initiative.)

.37 Regulatory actions and litigations discussed above may have significant adverse financial consequences for a broker-dealer as well as damage the firm’s reputation and growth prospects. In the worst-case scenario, noncompliance with regulations may even lead to the suspension or revocation of a broker-dealer’s registration. As an auditor of a securities firm, you need to consider the impact of litigation and new regulation on your client’s financial statements. See the “Litigation, Claims, and Assessments” section of this Alert for a further discussion of this topic.

Enron

.38 Enron Corp.’s collapse in 2001 turned out to be much more than the second largest bankruptcy in U.S. history. This scandal brought to light numerous conflicts of interest inherent in the business model of major Wall Street firms. Securities firms served in many conflicting capacities in their dealings with Enron. They acted as lenders, advisers, and underwriters for Enron while also managing assets for the energy company, its executives, and investors. Investigators in the Enron case recently switched their attention from accountants to financial institutions and the role they played in the rise and fall of the company. Congress, the SEC, and the Justice Department are questioning three of the largest U.S. financial firms about financing they provided to Enron. The investigators are examining whether the firms helped Enron artificially increase its earnings by structuring transactions in a way that allowed the energy concern to disguise loans as trades and hide debts in special-purpose entities.

.39 In addition to the investigations, Wall Street firms that did business with Enron face lawsuits filed by the company’s shareholders and employees accusing them of participating in a scheme with the energy company to defraud shareholders and creditors. There were also several lawsuits filed alleging that broker-dealers promoted Enron securities to the public even when as lenders they were or should have been aware of the true state of the company’s finances and that it was about to collapse.

More Regulatory Action Coming

.40 To boost investor confidence in the U.S. financial system following the collapse of Enron, the board of directors of the NASDAQ Stock Market, Inc. in July 2002 approved more than 25 new corporate governance reform proposals designed to increase accountability and transparency for the benefit of investors. Pending approval by the NASD board, they will be forwarded to the SEC for final approval. Shortly thereafter, on August 1, the NYSE board of directors ratified a sweeping set of proposals for its listed companies with respect to corporate governance. These proposals focus on giving boards greater independence and investors greater say in the governance of their companies. The American Stock Exchange (AMEX) board of governors formally approved enhanced rules that will increase disclosure requirements, strengthen board oversight and audit committee responsibility, and provide for increased shareholder rights for its listed companies. The measures will be presented to the SEC for review and approval.

.41 Legislators are considering the need for more regulation. Section 705 of the Sarbanes-Oxley Act of 2002 requires the Comptroller General to conduct a study on whether investment banks and financial advisers assisted public companies in manipulating their earnings and obfuscating their true financial condition. Among other things, the study will address the role financial institutions played in the collapse of Enron. Upon the completion of the study, the Comptroller General will issue a report discussing regulatory or legislative steps that are recommended or that may be necessary to address concerns identified in the study.

.42 Broker-dealers operate in a highly regulated industry that requires close attention to compliance matters. As an auditor of a broker-dealer, you need to stay alert to regulatory and legislative developments to ensure your client’s compliance with the regulations.

Stock Options

.43 As the rash of accounting scandals has put the spotlight on companies' financial statements, the accounting treatment of stock options has also come under scrutiny. Until now, just a few companies elected to account for stock options by using the fair value based method defined in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*, which requires companies to recognize an expense for the fair value of the options granted in arriving at reported earnings. Most companies used the intrinsic value based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, which requires companies to recognize compensation cost based on the difference, if any, between the quoted market price of the stock and the amount an employee must pay to acquire the stock. Most fixed stock option plans have no intrinsic value at grant date, and under APB Opinion No. 25 no compensation cost is recognized for them. Throughout 2002, a number of major U.S. companies from various industries announced their intentions to change their accounting policies for stock options and to begin expensing them as early as 2003. In August 2002, the members of the Financial Services Forum, a group of top executives from 21 of the largest U.S. financial firms, decided to join these companies. At this point, most of the major securities firms have announced their decision to start expensing stock options.

.44 The FASB decided to undertake a limited scope project to reconsider the transition and disclosure provisions of FASB Statement No. 123 to provide guidance to companies that are voluntarily adopting a fair value based method. In October 2002 the FASB issued an exposure draft of a proposed Statement, *Accounting for Stock-Based Compensation—Transition and Disclosure*, that would amend FASB Statement No. 123. The proposed Statement *would not* require companies to adopt the fair value recognition provisions of FASB Statement No. 123. It would provide optional transition methods for those companies that decide to voluntarily adopt the fair value recognition principles of Statement No. 123 and would modify the disclosure requirements of that Statement. The final Statement is expected to be issued by the end of 2002.

.45 The international community is addressing the stock-based compensation issue as well. The International Accounting Standards Board (IASB) concluded its deliberations on the accounting for share-based payments, including employee stock options. It announced plans to issue a proposal for public comment in the fourth quarter of 2002. The proposal would require companies using IASB standards to recognize, beginning in 2004, the fair value of employee stock options granted as an expense in arriving at reported earnings. While there are some important differences between the methodologies in the IASB proposal and those contained in the proposed amendment to FASB Statement No. 123, the fundamental approach is the same—fair value measurement of employee stock options granted with expense recognition over the vesting period of the options.

.46 The debate to expense or not to expense stock options continues. As an auditor of a securities firm which uses stock options as a method of compensation, you need to stay on top of these developments. See the "Expensing Stock Options" section of the general *Audit Risk Alert—2002/03* [AAM section 8010] for more information.

Layoffs

.47 To compensate for the drastic slowdown in merger-and-acquisition (M&A) activity and IPOs—traditionally the biggest sources of revenue for the securities industry—Wall Street firms had to find ways to cut costs to sustain their profitability. Big payrolls, which represent the largest expense for the securities industry, were a number one target. During 2001 securities firms made major cuts which affected mostly lower-level employees. In 2002 the firms were forced to let go some of their higher ranks. According to the SIA, securities firms have eliminated a total of 32,287 jobs, or 8.8 percent of their work force, since the end of 2000. An effort on the part of the regulators to separate research from investment banking is likely to lead to further reductions in staffing levels.

.48 As an auditor of a securities firm that went through layoffs, you need to consider the effects of layoffs on your client's internal control as well as ensure that employee-related termination charges were properly

accounted for. Depending upon the breadth and the handling of the layoffs, key people and key controls may be missing and a firm's employees may be significantly demoralized; as such the foundation of financial reporting may be compromised. Auditors will need to be alert and use common sense to discern the quality of the firm's operational practices and environment and the impact upon the reliability of the firm's financial records. See "Employee Layoffs" in the "Audit and Accounting Issues and Developments" section of this Alert for a detailed discussion of this topic.

Increased Competition

.49 The securities industry was hurt in 2002 by a dramatic slowdown in the IPO market and M&A activity. In the third quarter, there were only seven IPOs by U.S. companies, the lowest number since the first quarter of 1980. The volume of U.S. equity and equity-linked securities issuance declined by 43 percent in the same quarter. The value of U.S. merger deals also fell 42 percent from the third quarter of 2001 to the same period in 2002. With so few deals up for grabs the securities firms compete fiercely for business.

.50 In addition to that, broker-dealers are facing increased competition from commercial banks. The biggest threat comes from megabanks which hope to lure customers away from traditional brokerages and investment banks by offering all kinds of financial services under one roof. To compete, investment banks are offering various types of financing to their clients, including credit lines, hoping the clients will not walk away and take the investment banking deals with them. In some cases, your broker-dealer clients may resort to unethical practices to retain and attract clients, such as providing loans in exchange for lucrative investment-banking business. In September 2002 the NASD advised its members that "the practice of tying commercial loans to investment-banking business violates federal statutes and NASD's rule requiring its members to adhere to just and equitable principles of trade."¹ It is important for broker-dealers to comply with regulatory requirements since noncompliance may result in fines or even the suspension or revocation of the broker-dealer's registration. See the "Pressure on Management to Perform" section of this Alert for a discussion of some additional issues auditors should be concerned with when auditing a client operating in a highly competitive environment.

Going-Concern Issues

.51 According to the SIA, it looks like the securities industry's profits for 2002 will hit the lowest level in seven or eight years. The continuous stock market decline and the mounting pressures from regulators are putting the securities industry to the test. Amid the multiple investigations into research and IPO practices of Wall Street firms and the poor economic outlook, ratings agencies warned they may lower the credit ratings of several major securities firms. If this happens, it will significantly raise the costs of conducting operations by making debt financing more expensive and less available as well as forcing the firms to pledge higher collateral to conduct their derivatives trading. Although larger firms may be able to absorb the higher cost, some smaller and medium-sized firms may not, thus raising possible going-concern issues.

.52 A recent study conducted by Weiss Ratings Inc. indicated a weakness in auditors' ability to spot and disclose potential bankruptcies. Auditors issued unqualified opinions for nearly half the public companies that filed for bankruptcy during the 18-month period ending June 30, 2002. If an auditor fails to raise the issue of going-concern for a client that files for bankruptcy within a year from the date of the audit, the auditor is most likely to face litigation from his or her client's creditors and investors. Creditors in bankruptcy and bankruptcy trustees pursue all viable sources of recovery and often view a civil claim against an insured third-party professional service provider (auditors) as the only reliable source of recovery when there are no significant assets to be liquidated. With that in mind you should be especially careful when evaluating your client's ability to continue as a going concern for another year. See "Going-Concern Issues" in the "Audit and Accounting Issues and Developments" section of this Alert for guidance on evaluating whether there is substantial doubt about a client's ability to continue as a going concern.

¹ National Association of Securities Dealers (NASD) News Release, *NASD Advises Securities Firms on Tying Arrangements*, September 19, 2002.

Money Laundering

.53 After the events of September 11, government officials have been increasingly concerned about the vulnerability of the securities industry to money laundering activities. On October 26, 2001, President Bush signed into law the “Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA Patriot) Act of 2001.” This law was intended to strengthen our nation’s ability to combat terrorism and prevent and detect money laundering activities in all financial institutions. Broad authority to develop anti-money laundering regulations applicable to each of the various segments of the financial services industry was delegated to the Treasury Department (Treasury). “Money Laundering Activities” in the “Audit and Accounting Issues and Developments” section of this Alert provides an explanation of what money laundering is and how it can affect your client as well as your audit. It also discusses new anti-money laundering rules that were issued this year by the Treasury along with the SEC, CFTC, and other regulatory agencies.

The Commodities Industry

.54 The Commodity Futures Trading Commission (CFTC or Commission) is an independent federal agency responsible for regulating commodity futures and options markets in the United States. The mission of the CFTC is to protect market users and the public from fraud, manipulation, and abusive practices related to the sale of commodity futures and options and to foster open, competitive, and financially sound commodity futures and option markets. As part of this process, brokers and individuals who handle customer funds or give trading advice must apply for registration through the National Futures Association (NFA), a self-regulatory organization approved by the Commission as a registered futures association.

.55 Commodity exchanges complement federal regulation with rules of their own—rules covering clearance of trades, trade orders and records, position limits, price limits, disciplinary actions, floor trading practices, and standards of business conduct. The CFTC also regularly reviews NFA’s and each exchange’s programs for ensuring member compliance with financial and other rules.

Futures and Options Business Doing Well

.56 Judging by the first eight months of 2002, futures and options exchanges are on their way to another record year in terms of global trading volume. More than 3.8 billion listed derivatives contracts changed hands worldwide from January through August, an increase of 42.6 percent over the same period in 2001. Should this upward trend continue for the remainder of the year, it bodes well for futures commission merchants (FCMs), because the volume of futures and options contracts traded bears directly on their revenues.

.57 In general, trading activity was driven by continued uncertainty about interest rates and exceptionally high volatility in equity markets, as well as a shift in the energy markets from over-the-counter (OTC) markets to exchanges. Equity index products showed very strong growth in all regions.

.58 In August 2002, the SEC and the CFTC approved final rules for trading single-stock futures. Futures exchanges hope that this will lead to an increase in business. As a possible harbinger of that happening, single-stock futures trading on foreign exchanges soared 180 percent higher in the first eight months of 2002 over the comparable 2001 period.

.59 Although most major commodities exchanges have in place the mechanisms needed to convert from membership-owned organizations to for-profit public companies, at the time of writing this Alert, none have offered shares to the public. It should be noted that the major stock exchanges have deferred their planned offerings as well.

.60 Traditional open outcry trading on commodity exchange floors continues to be challenged by electronic trading platforms. It remains to be seen how these developments will affect the value of exchange memberships and customers served by those exchanges.

Regulatory Issues and Developments²

What are some of the recent regulatory developments affecting broker-dealers?

.61 Chapter 5, "Auditing Considerations," of the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* discusses auditing considerations for an audit of the financial statements of a broker-dealer. The Guide notes that the regulatory environment of a broker-dealer has a major effect on the audit of a broker-dealer because of the requirements that auditors report on the adequacy of the broker-dealer's internal control and on its compliance with the specific rules addressing financial responsibility and recordkeeping. Accordingly, certain tests of controls are performed even if the auditor might not otherwise do so.

.62 The audit and reporting requirements for securities broker-dealers are regulated by Rule 17a-5 under the Securities Exchange Act of 1934 (Exchange Act). An alternative regulatory framework has been created for OTC derivatives dealers that establishes a special class of broker-dealers who may choose to register with the SEC under a limited regulatory structure. Registered broker-dealers in U.S. government securities are regulated by Section 405.02 of the regulations pursuant to Section 15C of the Exchange Act.

.63 Qualifications and reports of independent accountants of commodity entities are specified by Regulation 1.16 of the Commodity Exchange Act (CEA).

.64 Before undertaking the audit of a regulated entity, auditors should read the applicable rules and understand the prescribed scope of the audit and the related reporting requirements.

SEC Regulations

What are some of the final rules issued during the past year by the SEC that may affect broker-dealers?

.65 The following is a summary of some of the rules that the SEC issued during 2002.

- *Applicability of CFTC and SEC Customer Protection, Recordkeeping, Reporting, and Bankruptcy Rules and the Securities Investor Protection Act of 1970 to Accounts Holding Security Futures Products.* See the "Commodity Futures Trading Commission Regulations" section of this Alert for a detailed discussion of this regulation.
- *Confirmation Requirements for Transactions of Security Futures Products Effected in Futures Accounts.* In September 2002, in accordance with the Commodity Futures Modernization Act (CFMA), the SEC adopted rule amendments and a new rule under the Exchange Act which are designed to clarify the disclosures broker-dealers effecting transactions in security futures products in futures accounts must make in the confirmations sent to customers regarding those transactions. The amendments provide that broker-dealers effecting transactions in security futures products in futures accounts do not have to disclose all of the information required by the SEC's confirmation disclosure rule, but rather require

² Readers should be alert for updates, amendments, or other changes to the rules discussed in this section of the Audit Risk Alert and other recent developments related to regulatory activities. The brief summaries provided in this section of the Alert are for informational purposes only. Readers should refer to the full text of the regulations. The complete text of Securities and Exchange Commission (SEC) final rules, including rules adopted subsequent to the writing of this Alert, can be obtained from the SEC Web site at www.sec.gov. The complete text of Commodity Futures Trading Commission (CFTC) final rules, including rules adopted subsequent to the writing of this Alert, can be obtained from the CFTC Web site at www.cftc.gov. See the "Information Sources" table at the end of this Alert for a list of Internet resources, including some Web sites that can provide additional information on regulatory issues and developments.

that the transaction confirmations for these accounts disclose specific information and notify customers that certain additional information will be available upon written request. The new rule also exempts broker-dealers effecting transactions for customers in security futures products in a futures account from the disclosure requirements of Exchange Act Section 11(d)(2). Effective date: October 15, 2002. Compliance dates: October 15, 2002, and June 1, 2003.

- *Acceleration of Periodic Report Filing Dates and Disclosure Concerning Website Access to Reports.* In September 2002, the SEC adopted amendments to its rules and forms to accelerate the filing of quarterly and annual reports under the Exchange Act by domestic reporting companies that have a public float of at least \$75 million, that have been subject to the Exchange Act's reporting requirements for at least 12 calendar months, and that previously have filed at least one annual report. The changes for these accelerated filers will be phased in over three years. The annual report deadline will remain 90 days for year one and change from 90 days to 75 days for year two and from 75 days to 60 days for year three and thereafter. The quarterly report deadline will remain 45 days for year one and change from 45 days to 40 days for year two and from 40 days to 35 days for year three and thereafter. The phase-in period will begin for accelerated filers with fiscal years ending on or after December 15, 2002. The SEC also adopted amendments to require accelerated filers to disclose in their annual reports where investors can obtain access to their filings, including whether the company provides access to its Forms 10-K, 10-Q, and 8-K reports on its Internet Web site free of charge, as soon as reasonably practicable after those reports are electronically filed with or furnished to the SEC. Effective date: 60 days after publication in the *Federal Register*. See Release No. 33-8128 for compliance date information.
- *Certification of Disclosure in Companies' Quarterly and Annual Reports.* In August 2002, the SEC adopted rules, as directed by Section 302(a) of the Sarbanes-Oxley Act of 2002, to require an issuer's principal executive and financial officers each to certify the financial and other information contained in the issuer's quarterly and annual reports. The rules also require these officers to certify that they are responsible for establishing, maintaining, and regularly evaluating the effectiveness of the issuer's internal controls; they have made certain disclosures to the issuer's auditors and the audit committee of the board of directors about the issuer's internal controls; and they have included information in the issuer's quarterly and annual reports about their evaluation and whether there have been significant changes in the issuer's internal controls or in other factors that could significantly affect internal controls subsequent to the evaluation. In addition, the SEC adopted previously proposed rules to require issuers to maintain, and regularly evaluate the effectiveness of, disclosure controls and procedures designed to ensure that the information required in reports filed under the Exchange Act is recorded, processed, summarized, and reported on a timely basis. Effective date: August 29, 2002.
- *Ownership Reports and Trading by Officers, Directors and Principal Security Holders.* In August 2002, the SEC adopted rule and form amendments to implement the accelerated filing deadline applicable to change of beneficial ownership reports required to be filed by officers, directors, and principal security holders under Section 16(a) of the Exchange Act, as amended by the Sarbanes-Oxley Act of 2002. The amendments are intended to facilitate the statutory changes, which became effective August 29, 2002, consistent with their purpose. Effective date: August 29, 2002.
- *Customer Margin Rules Relating to Security Futures.* See the "Commodity Futures Trading Commission Regulations" section of this Alert for a detailed discussion of this regulation.
- *Assessments on Security Futures Transactions and Fees on Sales of Securities Resulting from Physical Settlement of Security Futures Pursuant to Section 31 of the Exchange Act.* In July 2002, the SEC adopted an amendment to a rule under the Exchange Act to clarify how to calculate assessments that are required to be paid by national securities exchanges and national securities associations pursuant to Section 31(d) of the Exchange Act for security futures transactions. In addition, the amendment provides guidance on how to calculate fees that are required to be paid by national securities exchanges and national securities associations pursuant to Sections 31(b) and (c) of the Exchange Act, respectively, for sales of securities that result from the physical settlement of security futures. Effective date: August 12, 2002.

- *Technical Amendments to Rules and Forms Due to the National Securities Markets Improvement Act of 1996 and the Gramm-Leach-Bliley Act.* In June 2002, the SEC adopted technical amendments to rules and forms under the Investment Company Act of 1940 (Investment Company Act) and the Exchange Act. The amendments correct statutory references currently included in the rules and the forms. Effective date: July 8, 2002.
 - *Cash Settlement and Regulatory Halt Requirements for Security Futures Products.* See the “Commodity Futures Trading Commission Regulations” section of this Alert for a discussion of this rule.
 - *Mandated EDGAR Filing for Foreign Issuers.* In May 2002, the SEC adopted amendments to the rules that govern its electronic data gathering, analysis, and retrieval (EDGAR) system. These amendments require foreign private issuers and foreign governments to file electronically through the EDGAR system most of their securities documents, including registration statements under the Securities Act of 1933 (Securities Act) and registration statements, reports, and other documents under the Exchange Act. The SEC also adopted rule amendments to clarify when an electronic or paper filer may submit an English summary instead of an English translation of a foreign language document. The SEC further eliminated the current requirement that any first-time EDGAR filer, domestic or foreign, submit a paper copy of its electronic filing to the Commission. Finally, the SEC permitted a national securities exchange to file voluntarily on EDGAR a Form 25, which reports the delisting of a class of a company’s securities. Effective date: November 4, 2002, except for Sections 232.101(d), 232.101(b)(10), and 232.101(c)(9), which are effective May 24, 2002.
 - *Amendment to Definition of “Equity Security.”* The CFMA amended the definition of “security” in the Securities Act and the definitions of “security” and “equity security” in the Exchange Act to include a security future. In April 2002, the SEC amended the definitions of “equity security” in the rules under the Securities Act and the Exchange Act to conform them to the statutory definitions with respect to security futures. Effective date: June 7, 2002.
 - *Exemption of Transactions in Certain Options and Futures on Security Indexes from Section 31 of the Exchange Act.* In January 2002, the SEC, by rule, exempted two classes of securities from the fee and assessment requirements of Section 31 of the Exchange Act: options on narrow-based security indexes and futures on narrow-based security indexes. In light of the very low amount of Section 31 fees currently collected on options on narrow-based security indexes, the SEC granted the exemption for options on such indexes to relieve certain national securities exchanges of the burden of having to calculate whether an index is narrow-based or broad-based. The SEC granted the exemption for futures on narrow-based security indexes to promote a level playing field between options and futures. Effective date: February 1, 2002.
 - *Amendments to Rule 31-1, Securities Transactions Exempt From Transaction Fees.* In January 2002, the SEC amended the rule that provides an exemption from Section 31(c) of the Exchange Act for OTC transactions in OTC securities that are subject to unlisted trading privileges on a national securities exchange. One subparagraph of the rule has become obsolete and unnecessary due to the enactment of H.R. 1088, the Investor and Capital Markets Fee Relief Act. Effective date: January 16, 2002.
- .66 In addition, final rules that the SEC issued in 2001 since the writing of last year’s Audit Risk Alert include the following:
- *Options Disclosure Document.* In December 2001, the SEC adopted a revision to a rule under the Securities Act to clarify that an options disclosure document prepared in accordance with the SEC rules under the Exchange Act is not a prospectus and is not subject to civil liability under Section 12(a)(2) of the Securities Act. This amendment codifies a long-standing interpretive position taken by the Division of Corporation Finance soon after the SEC adopted the current registration and disclosure system applicable to standardized options in 1982. The SEC codified this position to reduce the legal uncertainty regarding the liability issue. Effective date: February 1, 2002.

- **Disclosure of Equity Compensation Plan Information.** In December 2001, the SEC adopted amendments to the Exchange Act disclosure requirements applicable to annual reports filed on Forms 10-K and 10-KSB and to proxy and information statements. The amendments are intended to enhance disclosure of the number of outstanding options, warrants, and rights granted by registrants to participants in equity compensation plans, as well as the number of securities remaining available for future issuance under these plans. The amendments require registrants to provide this information separately for equity compensation plans that have not been approved by their security holders, and to file with the SEC copies of these plans unless immaterial in amount of significance. Effective date: 30 days after publication in the *Federal Register*. Compliance dates: Registrants must comply with the new disclosure requirements for their annual reports on Forms 10-K or 10-KSB to be filed for fiscal years ending on or after March 15, 2002, and for proxy and information statements for meetings of, or action by, security holders occurring on or after June 15, 2002. Registrants voluntarily may comply with the new disclosure requirements before the compliance dates.

Other Recent SEC Developments

.67 The following is a brief discussion of some other SEC developments that might be of interest to the auditors of securities firms.

SEC Interpretive Release, Commission Guidance on the Application of Certain Provisions of the Securities Act of 1933, the Securities Exchange Act of 1934, and Rules thereunder to Trading in Security Futures Products³

.68 In June 2002, the SEC published its views regarding the application of certain provisions of the federal securities laws to trading in security futures products. On December 21, 2000, Congress enacted the Commodity Futures Modernization Act (CFMA), addressing the regulation of security futures products. Security futures products are securities for purposes of the federal securities laws, including the Securities Act and the Exchange Act, and are “futures” for purposes of the Commodity Exchange Act (CEA). Because these products are both securities and futures, the CFMA established a framework for the joint regulation of these products by the SEC and the CFTC. Security futures products must be traded on trading facilities and through intermediaries that are registered with both the SEC and the CFTC. Given this new regulatory framework, various industry participants have requested guidance regarding the application of certain provisions of the federal securities laws to trading in security futures products. The guidance is effective June 27, 2002.

Other SEC Information

.69 **SEC Section 31 Fees.** SEC Section 31 fees are collected from customers and remitted to the SEC through NASD and national securities exchanges, such as the NYSE and the AMEX, or are directly charged to brokers as part of their Securities Industry Automation Corporation (SIAC) daily settlement. Due principally to rounding differences, clients may be charged a higher fee than is submitted to either the regulators or to the SIAC. This difference has grown over the last few years and the SEC is now requesting the brokers to pay this overage directly to the SEC as opposed to allocating it back to customers.

.70 **Variable Annuities.** Suitability of variable annuities is a major focus of regulators who are concerned that investors do not fully understand the complexities of this product. The SEC is examining firms selling variable annuities to ensure that all features of this product are properly explained to customers. The fees

³ The SEC from time to time will provide guidance relating to topics of general interest to the business and investment communities by issuing an “interpretive release,” in which it publishes its views on the subject matter and interprets the federal securities laws and its own regulations. The SEC Interpretive Release *Commission Guidance to Broker-Dealers on the Use of Electronic Storage Media under the Electronic Signatures in Global and National Commerce Act of 2000 with Respect to Rule 17a-4(f)* is available on the SEC Web site at www.sec.gov

associated with this product, the potential costs to investors due to paying for the life insurance benefit, and the tax consequences of the product need to be communicated to the investor. In addition, the surrender charges are not well known and investors should be alert to these consequences. NASD Regulation (NASDR) also focused on the issue of suitability of variable annuities. NASDR recently brought several enforcement actions against firms for the improper marketing and sale of variable annuities. Rule 2310(a) of the NASD Conduct Rules provides that “in recommending to a customer the purchase, sale or exchange of any security, a member shall have reasonable grounds for believing that the recommendation is suitable for such customer upon the basis of the facts, if any, described by such customer as to his other security holdings and as to his financial situation and needs.” Rule 2310(b) imposes upon a broker the duty to make reasonable efforts to obtain information concerning the customer’s financial status, tax status, investment objectives and other relevant information in making a recommendation to a customer. In various notices to members, the NASD has reminded members that they are subject to suitability requirements in connection with the sale of variable products and provided suitability guidelines for the sale of variable annuities and variable life products.

.71 Order Requiring the Filing of Sworn Statements Pursuant to Section 21(a)(1) of the Securities Exchange Act of 1934. The SEC has commenced an investigation to ascertain facts, conditions, practices, and other matters relating to the financial statements and accounting practices of certain large publicly traded companies. As part of this investigation, in June the SEC issued an order requiring written statements, under oath, from senior officers of certain publicly traded companies (the companies) with revenues during their last fiscal year of greater than \$1.2 billion that file reports with the SEC pursuant to the Exchange Act, regarding the accuracy of their companies’ financial statements and their consultation with the companies’ audit committees. Effective date: August 14, 2002.

.72 Commission Statement about Management’s Discussion and Analysis of Financial Condition and Results of Operations. In January 2002, the SEC issued a statement regarding Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A). The release sets forth certain views of the SEC regarding disclosure that should be considered by registrants. Disclosure matters addressed by the release are liquidity and capital resources including off-balance sheet arrangements; certain trading activities that include non-exchange traded contracts accounted for at fair value; and effects of transactions with related and certain other parties. In November 2002, the SEC proposed a new rule, *Disclosure in Management’s Discussion and Analysis About Off-Balance Sheet Arrangements, Contractual Obligations and Contingent Liabilities and Commitments*, which would require disclosure of off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of an issuer with unconsolidated entities or other persons that have, or may have, a material effect on financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources. The new disclosure would be located in the MD&A section in a company’s disclosure documents. The proposals would require a registrant to provide, in a separately captioned subsection of MD&A, a comprehensive explanation of its off-balance sheet arrangements. The proposals also would require a registrant (other than small business issuers) to provide an overview of its aggregate contractual obligations in a tabular format and contingent liabilities and commitments in either a textual or tabular format.

.73 Cautionary Advice Regarding Disclosure About Critical Accounting Policies. In December 2001 the SEC issued a statement regarding the selection and disclosure by public companies of critical accounting policies and practices. The purpose of this statement is to alert companies to the need for greater investor awareness of the sensitivity of financial statements to the methods, assumptions, and estimates underlying their preparation. The SEC encourages public companies to include in their MD&A full explanations, in plain English, of their “critical accounting policies,” the judgments and uncertainties affecting the application of those policies, and the likelihood that materially different amounts would be reported under different conditions or using different assumptions. The objective of this disclosure is consistent with the objective of MD&A.

.74 In May 2002, the SEC proposed a new rule, *Disclosure in Management’s Discussion and Analysis about the Application of Critical Accounting Policies*, which would encompass disclosure in two areas: accounting estimates a company makes in applying its accounting policies and the initial adoption by a company of an

accounting policy that has a material impact on its financial presentation. Under the first part of the proposals, a company would have to identify the accounting estimates reflected in its financial statements that required it to make assumptions about matters that were highly uncertain at the time of estimation. Disclosure about those estimates would then be required if different estimates that the company reasonably could have used in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on the presentation of the company's financial condition, changes in financial condition, or results of operations. A company's disclosure about these critical accounting estimates would include a discussion of the methodology and assumptions underlying them; the effect the accounting estimates have on the company's financial presentation; and the effect of changes in the estimates. Under the second part of the proposals, a company that has initially adopted an accounting policy with a material impact would have to disclose information that includes what gave rise to the initial adoption; the impact of the adoption; the accounting principle adopted and method of applying it; and the choices it had among accounting principles. Companies would place all of the new disclosure in the MD&A section of their annual reports, registration statements, and proxy and information statements. In addition, in the MD&A section of their quarterly reports, U.S. companies would have to update the information regarding their critical accounting estimates to disclose material changes.

.75 *Cautionary Advice Regarding the Use of "Pro Forma" Financial Information in Earnings Releases.* The SEC issued a statement regarding the use by public companies of pro forma financial information in earnings releases. The purpose of this statement is to caution public companies on their use of pro forma financial information and to alert investors to the potential dangers of such information. The SEC staff is concerned that pro forma financial information, under certain circumstances, can mislead investors if it obscures generally accepted accounting principles (GAAP) results. Because this pro forma financial information by its very nature departs from traditional accounting conventions, its use can make it hard for investors to compare an issuer's financial information with other reporting periods and with other companies. In November 2002, the SEC proposed a new rule entitled *Conditions for Use of Non-GAAP Financial Measures* to address public companies' disclosure or release of certain financial information that is derived on the basis of methodologies other than in accordance with GAAP. The SEC is proposing a new disclosure regulation, Regulation G, which would require public companies that disclose or release these non-GAAP financial measures to include, in that disclosure or release, a presentation of the most comparable GAAP financial measure and a reconciliation of the disclosed non-GAAP financial measure to the most comparable GAAP financial measure. The SEC is also proposing to amend Item 10 of Regulation S-K and Item 10 of Regulation S-B to provide additional guidance to those registrants that include non-GAAP financial measures in Commission filings. Additionally, the SEC is proposing to amend Form 20-F to incorporate the proposed amendments to Item 10 of Regulation S-K. Finally, the SEC is proposing to require registrants to file on Form 8-K earnings releases or similar announcements, with those filings subject to the guidance in amended Item 10 of Regulation S-K and Item 10 of Regulation S-B.

Help Desk—The text of these and other SEC releases are available on the SEC Web site at www.sec.gov.

Commodity Futures Trading Commission Regulations

.76 The following is a summary of some of the rulemakings and orders issued by the Commodity Futures Trading Commission (CFTC or the Commission) during 2002.

Implementing the Commodity Futures Modernization Act

.77 The Commodity Futures Modernization Act (CFMA), which became law on December 21, 2000, establishes a framework for the joint regulation of the trading of futures contracts on single securities and on narrow-based security indexes (collectively "security futures") by the CFTC and the SEC. Previously, security futures were statutorily prohibited from trading in the United States. Several rulemakings and orders were issued during 2002 to address the trading of security futures. A summary of some of these rulemakings and orders is set forth below:

.78 *Applicability of CFTC and SEC Customer Protection, Recordkeeping, Reporting, and Bankruptcy Rules and the Securities Investor Protection Act of 1970 to Accounts Holding Security Futures Products.* The CFMA directs the CFTC and SEC to address certain duplicative or conflicting regulations to any firm that is fully registered both as a futures commission merchant (FCM) with the CFTC and a securities broker-dealer (BD) with the SEC. There are approximately 90 such firms. The principal area where this was an issue is the protection of customer funds. In the futures industry, segregation of customer funds from an FCM's proprietary funds is required; the securities regime requires account insurance that is administered by the Securities Investor Protection Corporation (SIPC).

.79 The CFTC and SEC adopted final rules in this area on September 9, 2002. For the firms that are fully-registered as both FCMs and BDs, in the first instance it is their choice as to whether security futures products (SFPs) will be held in futures or securities accounts. These firms may also permit some or all of their customers to make that election. Futures accounts will be protected by the segregation of funds framework, and securities accounts will be entitled to SIPC coverage. These firms must also establish written policies concerning how SFPs will be held.

.80 All firms that are involved in SFP transactions, even those that are not dually registered with both the CFTC or SEC, must disclose to SFP customers the protections provided by segregation and by SIPC regulatory frameworks, the regulatory framework that is applicable to customer accounts, and the fact that the alternative regulatory framework is not applicable. For FCMs that do not register as full BDs with the SEC, only segregation is available; a BD that does not fully register as an FCM with the CFTC may only provide SIPC coverage.

.81 This regulation became effective September 13, 2002, except for section 240.17a-4(l) and (m) which became effective May 2, 2003.

.82 *Customer Margin Rules Relating to Security Futures.* As part of the statutory scheme for the regulation of security futures, the CFMA provided for the issuance of rules governing customer margin for transactions in security futures. Specifically, the CFMA directed the Federal Reserve Board to prescribe rules establishing initial and maintenance customer margin requirements. Pursuant to joint authority delegated by the Federal Reserve Board, in August 2002 the CFTC and SEC issued customer margin rules that became effective September 13, 2002.

.83 The CFMA provides that the customer margin requirements for security futures must satisfy four requirements. First, they must preserve the financial integrity of markets trading security futures products. Second, they must prevent systemic risk. Third, they must be consistent with the margin requirements for comparable exchange-traded security options, and provide for initial and maintenance margin levels that are not lower than the lowest level of margin, exclusive of premium, required for comparable exchange-traded security options. Fourth, they must be and remain consistent with the margin requirements established by the Federal Reserve Board under Regulation T (which governs the initial margin requirements for all securities other than exempted securities and security futures products).

.84 The customer margin rules for security futures, among other things:

1. Establish minimum initial and maintenance margin levels for outright positions in security futures at 20 percent of their "current market value," as defined in the rules.
2. Permit exchanges to set margin levels lower than 20 percent of current market value for customers with certain strategy-based offset positions involving security futures and one or more related securities or futures.
3. Establish stand-alone requirements that are consistent with Regulation T, but, unlike the proposed rules, do not apply Regulation T in its entirety to futures accounts.

4. Identify the types of collateral acceptable as margin deposits and establish standards for the valuation of such collateral and other components of equity.
5. Set forth procedures applicable to undermargined accounts.

.85 Prior to commencing trading, exchanges must obtain the SEC's approval for exchange rules governing margin for security futures. They also must either certify to the CFTC that the rules do not violate the Commodity Exchange Act or CFTC rules, or obtain the CFTC's prior approval for the rules.

.86 *Cash Settlement and Regulatory Halt Requirements for Security Futures Products.* In May 2002, the CFTC and the SEC (the Commissions) adopted a new rule generally to require that the final settlement price for each cash-settled security futures product fairly reflect the opening price of the underlying security or securities, and that trading in any security futures product halt when a regulatory halt is instituted with respect to a security or securities underlying the security futures product by the national securities exchange or national securities association listing the security. The rule would set forth more specifically how the exchange's or association's rules can satisfy provisions added to the Commodity Exchange Act (CEA) and the Exchange Act by the CFMA. The Commissions also issued an interpretation of the statutory requirement under the CEA and the Exchange Act that procedures be put in place for coordinated surveillance among the markets trading security futures products and any market trading any security underlying the security futures products or any related security. Effective date: June 24, 2002.

Additional Rulemakings and Orders Issued During 2002

.87 *Denomination of Customer Funds and the Location of Depositories.* On August 7, 2002, the Commission published in the *Federal Register* a proposed new rule that would permit FCMs and derivative clearing organizations (DCOs), under certain conditions, to deposit customer funds in foreign depositories and in certain currencies other than U.S. dollars. Specifically, the proposal would provide that FCM obligations owed to customers may be held in: (1) U.S. dollars; (2) in a currency in which funds were deposited by the customer, or converted at the request of the customer, to the extent of such deposits and conversions; or (3) in a currency in which funds have accrued to the customer as a result of trading on a designated contract market. Additionally, the rule would permit an FCM or DCO to hold customer funds of any denomination in the U.S. or any money center country (defined in the proposal as the G7 countries) or in the country of origin of the currency.

.88 The proposed rule also includes an amendment to Appendix B of the Commission's bankruptcy rules that would govern the distribution of property where the bankrupt FCM or DCO maintains customer property in depositories outside the U.S. or in a currency other than U.S. dollars. This new distributional framework is intended to assure that customers whose funds are held in a U.S. depository will not be adversely affected by a shortfall in the funds held in a depository outside the U.S. that is due to the sovereign action of a foreign government or court. The proposed rule would replace Financial and Segregation Interpretation No. 12.

.89 *Treatment of Funds Held in Connection With the Clearing of Over-the-Counter Products by the New York Mercantile Exchange.* On May 30, 2002, the Commission issued an Order permitting the New York Mercantile Exchange (NYMEX) Clearing House and FCMs clearing through the NYMEX Clearing House, subject to specified terms and conditions, to commingle customer funds used to margin, secure, or guarantee transactions executed in the OTC markets with other customer funds held in segregated accounts maintained in accordance with the customer segregation provisions of Section 4d of the Commodity Exchange Act and Commission regulations.

.90 *Withdrawal of FCM or IB Registration.* Commission Rule 3.33(c) was amended to no longer require an FCM or independent introducing broker (IB) to submit a financial statement Form 1-FR-FCM or 1-FR-IB to National Futures Association (NFA) as part of its request to withdraw its registration. This rule was effective June 6, 2002.

.91 *Review of 1-FR Financial Reports.* The Commission continues to enhance its software for reviewing financial reports submitted by FCMs and IBs. RSR Express is a software program which Commission staff use to receive, process, review, and track financial reports received electronically from FCMs and IBs. The Commission receives and reviews approximately 175 FCM financial reports each month. The Commission is the only entity, regulatory or otherwise, that receives financial reports from all registered FCMs.

.92 FCMs e-mail their financial reports to the Commission. An auto processor reads a prescribed mailbox every two minutes, processes newly received financial reports, and sends an automatic confirmation to the filing FCM. RSR Express also notifies Commission staff that a financial report has been received.

.93 RSR software contains a comprehensive set of analytical tools and edit checks which greatly assist Commission staff in their review of reported financial data to ensure continued compliance with the Commission's net capital and customer protection rules. The analytical tools allow the reviewer to compare historical financial data to current data. The edit checks alert the staff to possible problems with the financial reports. RSR also contains important tools that allow staff to track the receipt of financial reports (whether due, received, or overdue) and the status of the reports in the review process, from original review to final signoff.

.94 The Commission on a monthly basis queries RSR for key financial data, which is then posted on the Commission's Web page at www.cftc.gov/tm/tmfcm.htm.

Help Desk—The complete text of the preceding rules, along with other CFTC final rules, including those rules adopted, or changes made, subsequent to the writing of this Audit Risk Alert, can be downloaded from the CFTC's Web site at www.cftc.gov.

Commodity Futures Trading Commission Annual "Dear CPO" Letter

.95 On February 1, 2002, CFTC staff sent a letter to all commodity pool operators (CPOs), which outlined key reporting issues and common reporting deficiencies found in annual reports for commodity pools. The letter pointed out the CFTC staff's concerns and, accordingly, may alert the auditor to high-risk issues that could affect assertions contained in the financial statements of commodity pools. CFTC staff suggested that CPOs share the letter with their independent auditors.

.96 Addressed in the letter as major concerns are:

- New anti-money laundering requirements
- Applicability of GAAP to commodity pools' annual financial statements
- New investment companies guide
- Schedule of investments required for calendar year 2001 annual reports under GAAP
- Fund-of-funds considerations
- Master-feeder structures
- Extended due dates for fund-of-funds pools

.97 In order to avoid some of the most common and easily remedied deficiencies the letter suggested that CPOs do the following:

- File one copy of the report with the National Futures Association (NFA) and two copies with the CFTC at the regional office in whose jurisdiction the CPO's principal place of business is located (the addresses are attached to the letter).

- File the report as soon as possible, but no later than the due date. For pools with a December 31, 2002, year end, the due date is Monday, March 31, 2003 (unless an extension of time has been granted). CPOs operating a fund-of-funds pool should review the streamlined procedures described in Regulation 4.22(f)(2) for requesting an extended due date.
- Include a signed oath or affirmation, as required by Regulation 4.22(h), with each and every copy of the report, including those copies filed with NFA and the CFTC. Omitting the oath was the most common deficiency noted in 2001 annual reports. (Binding the oath as part of the report package or attaching it to the cover page is a helpful practice followed by a number of CPOs.)
- If the pool is operating under a Rule 4.7 or 4.12 exemption, the rule requires that a notation of that fact be made on the cover page of the report.
- Report special allocations of partnership equity as required by CFTC Interpretive Letter 94-3, *Special Allocations of Investment Partnership Equity*. (The letter is available at the CFTC Web site at www.cftc.gov/tm/tm94-03.htm.)
- Include information concerning net asset values or schedules of participants' interests, as required by Regulation 4.22(c)(2).
- Include appropriate footnote disclosures with unaudited financial statements.

.98 Copies of the February 10, 1999, January 19, 2000, January 12, 2001, and February 1, 2002, "Dear CPO" letters are available at the CFTC Web site, www.cftc.gov, under the heading "Law & Regulation, Compliance." Future "Dear CPO" letters also will be available on the CFTC's Web site.

Self-Regulatory Organization Regulations

.99 Under the Exchange Act, all broker-dealers are required to be members of self-regulatory organizations (SROs) such as the NYSE or NASD, or other organization which performs routine surveillance and monitoring of its members. During the past year, a number of significant regulations were issued by SROs. Among these were the following:

- *Order With Respect to the Implementation of Nasdaq's SuperMontage Facility.* In January 2001, the SEC approved a rule change submitted by NASD, on behalf of the Nasdaq Stock Market, Inc. (Nasdaq), that would establish a new order display and collection facility for Nasdaq-listed securities (SuperMontage). To address the concerns expressed by several market participants that certain SEC rules would effectively make their participation in the SuperMontage mandatory, the SEC conditioned its approval of the SuperMontage on the implementation of an alternative display facility (ADF) by the NASD. On July 24, 2002, the Division of Market Regulation approved operation of the ADF as a pilot program for nine months (see below). Based on this and other developments, the SEC believes that participation in SuperMontage will be voluntary, because market participants will have alternative venues in which to display their quotes, including the ADF. In September, the SEC authorized the Nasdaq to begin operation of its SuperMontage facility on or after October 11, 2002 (see Release Nos. 34-46429 and 2002-134).
- *Operation of the Alternative Display Facility for Quoting and Trading in Securities of The Nasdaq Stock Market, Inc.* In July 2002, the SEC approved the NASD's ADF for Nasdaq stocks for a nine-month pilot period. The pilot period is to expire at the close of daily operation of the ADF Pilot on April 24, 2003.
- *Order Granting Temporary Exemption for Broker-Dealers from the Trade-Through Disclosure Rule.* In May 2002, the SEC temporarily exempted until January 1, 2003, broker-dealers from compliance with the Trade-Through Disclosure Rule for exchange-traded funds.
- *Research Analyst Conflicts of Interest.* In May 2002, the SEC approved proposed rule changes by the NASD and NYSE relating to research analyst conflicts of interest. The SROs proposed to amend their rules to address conflicts of interest that are raised when research analysts recommend securities in

public communications. According to a joint memorandum issued by the NASD and the NYSE, generally, the SRO rules would restrict the relationship between research and investment banking departments; require disclosure of financial interest in covered companies by the analyst and the firm; require disclosure of existing and potential investment banking relationships with subject companies; impose quiet periods for the issuance of research reports; restrict personal trading by analysts; and require disclosure of information that helps investors track the correlation between an analyst's rating and the stock's price movements. Effective date: the rules become effective over the period from July 9, 2002, to November 6, 2002.

- *Anti-Money Laundering Compliance Programs.* See "Money Laundering Activities" in the "Audit and Accounting Issues and Developments" section of this Alert for a discussion of this rule.
- *Order Granting Approval to Proposed Rule Change Relating to Revisions to Form U-4 and Form U-5.* In March 2002, the SEC approved NASD proposed rule change revising the Uniform Application for Securities Industry Registration or Transfer (Form U-4) and Uniform Termination Notice for Securities Industry Registration (Form U-5).

.100 The following is a summary of some of the financial-related rules adopted by the NFA, an SRO for commodity futures, during the past year:

- *Changes to Capital Requirement.* Amended the risk-based capital computation requirement to eliminate calculating risk on naked long option positions, conforming to the Chicago Board of Trade (CBOT) and the Chicago Mercantile Exchange (CME) changes. In addition, the charge was eliminated for remote locations and associated persons for FCMs with adjusted net capital of \$2 million or greater and introducing brokers with adjusted net capital of \$1 million or greater. The changes were effective December 31, 2001.
- *Electronic Filing of Financial Reports.* Required that all financial reports be filed electronically using WinJammer 4.0 software.
- *Filing Financial Statements Monthly.* Required that FCMs, for which the NFA is the designated SRO, submit monthly financial statements within 17 business days of the date of the statement.
- *Filings with Other SROs.* Required that FCMs and independent IBs file copies with the NFA of any financial reports or statements filed with other SROs.

Audit and Accounting Issues and Developments

Fraudulent Financial Reporting

.101 The dismal economic and business environment can generate increased pressure on the management of broker-dealers to commit fraud. The already strong pressures to achieve earnings goals and to battle fierce competition within the securities industry become even more intense during periods of economic decline. Auditors should also consider the implications of the stock market volatility on the risk of fraud by their broker-dealer clients. Auditors should note that, along with client bankruptcy, fraud is one of the more common reasons for litigation against auditors.

.102 In 2002 the AICPA Auditing Standards Board (ASB) issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which supersedes SAS No. 82, which carried the same title, and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230). The new Standard does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec.

110.02). However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS). Discussed below are some of the more significant changes from SAS No. 82 and the effects on audits.

New Context for Considering Risks

.103 To provide a richer understanding of the environment in which fraud is likely to occur, the new SAS expands the description of fraud and its characteristics. It describes three conditions generally present when fraud occurs—incentive/pressure, opportunity, and attitude/rationalization. Input from forensic experts, academics, and others consistently showed that evaluation of information about fraud was enhanced when auditors considered it in the context of these three conditions.

Team Discussion and Professional Skepticism

.104 To increase awareness and sensitivity to fraud, and to enhance the fraud risk assessment process, SAS No. 99 requires audit team members to discuss during the planning stage the potential for material misstatements due to fraud. The more experienced team members should share their insights, and all the members should exchange ideas about how and where the entity's financial statements might be susceptible to material misstatements due to fraud.

.105 The new SAS also emphasizes the importance of maintaining the proper mindset throughout the audit regarding the potential for material misstatement due to fraud, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Consequently, the audit team's discussion would acknowledge fraud can occur in any entity and be perpetrated by anyone.

Expanded Inquiries

.106 SAS No. 99 requires auditors to query management on its views of the risks of fraud in the entity and knowledge of any known or suspected fraud. It also says auditors should query others—for example, individuals outside the entity's accounting or financial reporting areas or employees with varying levels of authority. This requirement is not intended to be onerous—the nature and extent of these inquiries would be based on the auditor's professional judgment and generally directed to employees with whom the auditor comes into contact during the course of the audit.

Expanded Scope for Assessing Fraud Risks

.107 SAS No. 99 emphasizes obtaining a broader range of information to serve as the foundation for an assessment that goes beyond considering the fraud risk factors provided in SAS No. 82. The various sources of information—inquiries of management and others, consideration of fraud risk factors, the results of the analytical procedures performed in planning the audit, and certain other information—all feed into the auditor's evaluation of fraud risks.

.108 The auditor uses the information to consider the *type* of risk that may exist (that is, whether it involves fraudulent financial reporting or misappropriation of assets), the *significance* or magnitude of that risk, the *likelihood* it will result in a material misstatement in the financial statements and the *pervasiveness* of the risk (that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions).

Risks Related to Revenue Recognition

.109 Revenue recognition issues have been at the center of numerous instances of fraudulent financial reporting and continue to be the number one reason for restating financial statements. To address this problem, SAS No. 99 says auditors should ordinarily presume that there is a risk of material misstatement

due to fraud relating to revenue recognition. In planning the audit, auditors are now required to perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that may be indicative of a material misstatement due to fraudulent financial reporting. The new SAS also provides examples of auditing procedures that auditors may want to consider related to the risk of improper revenue recognition.

Evaluating Programs and Controls

.110 When the auditor identifies risks of material misstatement due to fraud, SAS No. 99 requires that he or she consider management's programs and controls to address those risks. They might include broader programs or specific controls designed to prevent, deter, or detect fraud. As in SAS No. 82, the auditor has to consider whether such programs and controls will mitigate or exacerbate those identified risks. However, in a change from SAS No. 82, the auditor should evaluate whether these programs and controls have been suitably designed and placed in operation. The auditor's ultimate assessment of the risks of material misstatement due to fraud should take this evaluation into account.

Auditor's Response

.111 The new SAS requires the auditor to develop an appropriate response for each fraud risk identified and includes more extensive guidance and examples on how to do so. The auditor's responses, which are influenced by the nature and significance of the risks identified and the evaluation of the entity's programs and controls, might have an overall effect on how the audit is conducted (for example, additional persons with specialized skills or knowledge may be assigned) or might involve changing the nature, timing, or extent of auditing procedures for specific accounts or assertions. The response typically also will involve performing certain procedures to address the risk of management override of controls.

.112 Management is in a unique position to perpetrate fraud because it can override established controls that would appear to be operating effectively. This risk exists in virtually all audits and can occur in a number of unpredictable ways. Currently, the auditor's planned procedures in response to inherent and control risks and the auditor's assessment of the risk of material fraud consider, at least implicitly, the risk of management override. SAS No. 99, however, requires auditors to perform certain procedures to further address this risk. These procedures include:

- *Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.* Many auditors already may review unusual or "nonstandard" journal entries. However, SAS No. 99 requires the auditor to design procedures to test the appropriateness of journal entries recorded in the general ledger and other adjustments made in the preparation of the financial statements (for example, entries posted directly to financial statement drafts).
- *Reviewing accounting estimates for biases that could result in material misstatement due to fraud.* Existing auditing standards already require the auditor to consider the potential for management bias when reviewing significant estimates. In addition, SAS No. 99 requires auditors to perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management.
- *Evaluating the business rationale for significant unusual transactions.* Although the auditor typically gains an understanding of significant transactions, SAS No. 99 places a greater focus on understanding the underlying business rationale for significant unusual transactions. In this context, unusual transactions are those that come to the auditor's attention that are outside the normal course of business for the company or that otherwise appear unusual.

.113 The new standard also requires auditors to design tests that would be unpredictable and unexpected by the client. During the audit, the engagement team should test areas, locations and accounts that otherwise might not be tested.

.114 SAS No. 99 includes an Exhibit, "Management Antifraud Programs and Controls: Guidance to Help Prevent, Deter, and Detect Fraud." It also includes an amendment to SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333.06 and .16), since SAS No. 99 requires the auditor to make inquiries of management about fraud and the risk of fraud. In support of and consistent with these inquiries, the amendment revises the guidance for management representations about fraud currently found in SAS No. 85.

.115 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 31, 2002. Early application of the provisions of SAS No. 99 is permissible.

.116 The AICPA has developed a fraud Practice Aid titled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*, which will be published by the end of 2002. The Practice Aid includes topics such as how the new SAS changes audit practice, characteristics of fraud, understanding the new SAS, best practices, and practice aids such as specialized industry fraud risk factors (including for brokers and dealers in securities), common frauds, and extended audit procedures. Auditors should consider using the guidance in the Practice Aid to help them implement SAS No. 99.

Going-Concern Issues

.117 Information that raises doubt about the going-concern assumption for broker-dealers includes (1) failure to meet statutory net capital requirements, (2) noncompliance with various other rules and regulations, and (3) substantial disposition of assets outside the ordinary course of business. Auditors should also consider that changes in key financial ratios caused by the stock market's decline may trigger repayment clauses contained in debt covenants or bank-imposed limits on credit due to the decline in the value of a firm's portfolio. In these circumstances, auditors have certain responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341).

.118 SAS No. 59 provides guidance to auditors in conducting an audit of financial statements in accordance with GAAS for evaluating whether there is substantial doubt about a client's ability to continue as a going concern for a period not to exceed one year from the date of the financial statements being audited.

.119 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, noncompliance with various rules and regulations, externally forced revisions of its operations, or similar actions. SAS No. 59 does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.120 If there is substantial doubt about the entity's ability to continue as a going concern, you should consider whether it is likely that existing conditions and events can be mitigated by management plans and whether those plans can be effectively implemented. If you obtain sufficient competent evidential matter to alleviate doubts about going-concern issues, then consideration should be given to the possible effects on the financial statements and the adequacy of the related disclosures.⁴ In particular, the auditor should consider

⁴ Statement on Auditing Standards (SAS) No. 96, *Audit Documentation*, amended SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341), by adding a requirement for the auditor to document (a) the conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern; (b) the work performed in connection with the auditor's evaluation of management's plans; (c) the auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated; and (d) the consideration and effect of that conclusion on the financial statements, disclosures, and the audit report.

the adequacy of the disclosures of those circumstances and events that originally gave rise to the auditor's concern. If, however, after considering identified conditions and events, along with management's plans, you conclude that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances you should refer to the specific guidance set forth under SAS No. 59.

Pressure on Management to Perform

.121 The increasing competition from megabanks as well as from within the securities industry itself generates more intense pressure on management to perform and meet earnings and revenue expectations. Some specific matters auditors should be concerned with when auditing a client subject to intense pressures include the risk of material misstatement due to fraud, aggressive accounting methods, and internal control weaknesses.

Risk of Material Misstatement Due to Fraud

.122 The AICPA fraud Practice Aid titled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (scheduled to be published by the end of 2002) will list a number of risk factors that may indicate an increased risk of fraudulent financial reporting at a broker-dealer, including the following:

- High-degree of competition relating to bank-owned broker-dealers that have been granted expanded powers to engage in securities activities, registered investment companies/mutual funds, accompanied by declining margins
- The pressure on management to meet the expectations of analysts and rating agencies
- Unusually high level of internal competition for capital allocation among product types/trading desks
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend

.123 Some of these factors and conditions may be present in entities where specific circumstances do not present a risk of material misstatement. Also, specific controls may exist which mitigate the risk of material misstatement due to fraud, even though risk factors or conditions are present. When identifying risk factors and other conditions, the auditor should assess whether those risk factors and conditions, individually and in combination, present a risk of material misstatement of the financial statements.

Aggressive Accounting

.124 To achieve expected results or report improved financial results, management may adopt aggressive accounting positions. Auditors should be alert to aggressive accounting positions taken by management and determine whether the accounting is appropriate under the circumstances.

Overriding Internal Control

.125 Management engaged in a severely competitive environment may aggressively engage in transactions that bypass normal internal control. If auditors determine that there is a risk of this occurring, they will need to take this into account in their consideration of internal control and in their consideration of the nature, timing, and extent of their auditing procedures.

Litigation, Claims, and Assessments

.126 As discussed in the "Economic and Industry Developments" section of this Alert, the securities industry saw an increase in the number of arbitrations and lawsuits this year. According to the SEC, most of

the complaints allege misrepresentations, unauthorized trading, and unsuitable recommendations. As an auditor of a securities firm involved in legal proceedings, you need to evaluate management's consideration of the financial accounting and reporting implications of those proceedings pursuant to FASB Statement No. 5, *Accounting for Contingencies*. FASB Statement No. 5 addresses the accounting and reporting for loss contingencies, including those arising from litigation, claims, and assessments.

.127 Auditors need to be aware of their responsibilities under SAS No. 12, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1, AU sec. 337). SAS No. 12 provides guidance on the procedures an independent auditor should consider for identifying litigation, claims, and assessments and for the financial accounting and reporting for such matters when performing an audit in accordance with GAAS. The SAS provides, in part, that auditors should obtain evidential matter relevant to the following factors:

- The existence of a condition, situation, or set of circumstances indicating an uncertainty as to the possible loss to an entity arising from litigation, claims, and assessments
- The period in which the underlying cause for legal action occurred
- The degree of probability of an unfavorable outcome
- The amount or range of potential loss

.128 Because the events or conditions that should be considered in the financial accounting for and reporting of litigation, claims, and assessments are matters within the direct knowledge and, often, control of management of an entity, management is the primary source of information about such matters. Accordingly, the independent auditor's procedures with respect to litigation, claims, and assessments should include the following:

- Inquire of and discuss with management the policies and procedures adopted for identifying, evaluating, and accounting for litigation, claims, and assessments.
- Obtain from management a description and evaluation of litigation, claims, and assessments that existed at the date of the balance sheet being reported on, and during the period from the balance sheet date to the date the information is furnished, including an identification of those matters referred to legal counsel; and obtain assurances from management, ordinarily in writing, that they have disclosed all such matters required to be disclosed by FASB Statement No. 5.
- Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers.
- Obtain assurance from management, ordinarily in writing, that it has disclosed all unasserted claims that the lawyer has advised them are probable of assertion and must be disclosed in accordance with FASB Statement No. 5. In addition, the auditor, with the client's permission, should inform the lawyer that the client has given the auditor this assurance. This client representation may be communicated by the client in the inquiry letter or by the auditor in a separate letter.

.129 An auditor ordinarily does not possess legal skills, and therefore cannot make legal judgments concerning information coming to his or her attention. Accordingly, the auditor should request that the client's management send a letter of inquiry to those lawyers with whom management consulted concerning litigation, claims, and assessments.

.130 Auditors also need to be aware that contingent liabilities could result in an increase in a broker-dealer's aggregate indebtedness and, accordingly, its net capital requirement. According to a comment from the SEC to NASD, a broker-dealer that is the subject of a lawsuit that could have a material impact on its net capital must obtain an opinion of counsel regarding the potential effect of such a suit on the firm's financial condition. Absent such opinion, the item must be considered, at a minimum, a contingent liability and included in the calculation of aggregate indebtedness.

.131 The audit normally includes certain other procedures undertaken for different purposes that might also disclose litigation, claims, and assessments. Such procedures might include reading minutes of meetings of stockholders, directors, and appropriate committees; reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents; obtaining information concerning guarantees from bank confirmation forms; and inspecting other documents for possible guarantees by the client.

Money Laundering Activities

.132 Criminals use financial institutions to launder the proceeds of crime. Omnibus providers of diversified financial services may be particularly vulnerable because they provide a broad range of financial services that money launderers want and need, often in higher risk jurisdictions.

.133 Criminals use a wide variety of financial institutions and professional advisers to launder the proceeds of crime and, according to the Treasury, brokers and dealers in securities may also be vulnerable. The evolving dynamics of the industry—mergers and acquisitions, broader product lines, new technologies, and new distribution channels—generate important business opportunities, but they also generate risks for securities firms, including increased vulnerability to money laundering. As these industry trends continue, as money launderers increasingly look for a wide range of financial services and conservative, legitimate-appearing asset holdings, and as greater regulatory requirements for banks and other nonbank financial institutions make it more difficult for them to evade detection, the securities industry may become more attractive to money launderers.

Money Laundering and Financial Statements

.134 Money launderers tend to use the business entity more as a conduit than as a means of directly expropriating assets. For this reason, money laundering is far less likely to affect financial statements than are such types of fraud as misappropriations and consequently is unlikely to be detected in a financial statement audit. In addition, other forms of fraudulent activity usually result in the loss or disappearance of assets or revenue, whereas money laundering involves the manipulation of large quantities of illicit proceeds to distance them from their source quickly and in as undetectable a manner as possible. However, money laundering activities may have indirect effects on an entity's financial statements.

.135 Money laundering is considered to be an illegal act and independent auditors have a responsibility under SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317), to be aware of the possibility that illegal acts may have occurred, indirectly affecting amounts recorded in an entity's financial statements. In addition, if specific information comes to the auditor's attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect (for example, the entity's contingent liability resulting from illegal acts committed as part of the money laundering process) on the entity's financial statements, the auditor should apply auditing procedures specifically designed to ascertain whether an illegal act has occurred.

.136 Auditors should also note that laundered funds and their proceeds could be subject to asset seizure and forfeiture (claims) by law enforcement agencies that could result in material contingent liabilities during prosecution and adjudication of cases.

Financial Crimes Enforcement Network Advisories

.137 The Financial Crimes Enforcement Network (FinCEN) is the policy-making and law enforcement agency within the U.S. Department of the Treasury that supports law enforcement investigative efforts and fosters interagency and global cooperation against domestic and international financial crimes. FinCEN constantly issues advisories about transactions. These advisories normally instruct financial institutions to give enhanced scrutiny to any transaction originating in or routed through higher risk jurisdictions. Periodically, the federal government reviews and reassesses foreign government and financial system risk,

cooperation, and compliance and accordingly adds names to and removes names from the sanction lists. It should be emphasized that the issuance of these advisories does not mean that financial institutions should curtail legitimate business with these jurisdictions.

Compliance With the Bank Secrecy and Patriot Acts

.138 The Bank Secrecy Act (BSA), as recently amended by the Patriot Act, authorizes the U.S. Department of the Treasury (Treasury) to issue regulations requiring financial institutions, as defined under the BSA, to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax, and regulatory matters, or in the conduct of intelligence or counter-intelligence activities; to protect against international terrorism; and to implement counter-money laundering programs and compliance procedures. Section 321(b) of the Patriot Act specifically added any futures commodity merchant (FCM), commodity pool operator (CPO), or commodity trading advisor (CTA) that is or is required to be registered with the SEC to the "financial institution" definition in the BSA. Treasury also has interpreted the term "broker or dealer in securities or commodities," which is a term that is included within the BSA's financial institution definition, as including an introducing broker (IB).

.139 The following is a brief summary of recent anti-money laundering regulatory developments:

Anti-Money Laundering Programs. Section 352 of the Patriot Act requires each financial institution, as defined in the BSA, to establish an anti-money laundering (AML) program, which, at a minimum, must contain the following components: (1) the development of internal policies, procedures, and controls; (2) the designation of a compliance officer; (3) an ongoing employee training program; and (4) an independent audit function to test programs. Section 352 became effective April 24, 2002. On April 22, 2002, the SEC approved NASD and NYSE proposed rule changes relating to AML compliance programs. Both the NASD and NYSE proposed rule changes require each member firm and member organization to establish and implement AML compliance programs designed to ensure ongoing compliance with the requirements of the BSA and the regulations promulgated thereunder. Each member firm is required to develop and implement a written AML program reasonably designed to achieve and monitor the member's compliance with the requirements of the BSA, and the implementing regulations promulgated thereunder by the Treasury. Each member organization's AML program must be approved, in writing, by a member of senior management. To help their members understand and implement the new rules related to AML programs, the NYSE issued Information Memo 02-21, *Approval of New Rule 445—Anti-Money Laundering Compliance Program*, and the NASD issued Special Notice to Members 02-21, *NASD Provides Guidance To Member Firms Concerning Anti-Money Laundering Compliance Programs Required By Federal Law*.

The NFA has issued a rule (NFA Compliance Rule 2-9(c)) and a related Interpretive Notice requiring each FCM and IB member of the NFA to establish and implement an AML program. The CFTC approved this rule on April 23, 2002. Treasury had deferred application of the AML program requirement for CPOs and CTAs until October 24, 2002. Recently, however, Treasury proposed a rule that will require certain unregistered investment companies, including commodity pools, to have AML programs. Because the proposed rule targets commodity pools, there may not be a need for a separate AML rule for CPOs. Treasury, however, may still issue a separate AML rule for CTAs.

Special Due Diligence Programs for Certain Foreign Accounts. In May 2002, Treasury issued a proposed regulation requiring U.S. financial institutions, including broker-dealers, FCMs, and IBs, to establish due-diligence policies, procedures, and controls reasonably designed to detect and report money laundering through correspondent accounts and private banking accounts that U.S. financial institutions establish and maintain for non-U.S. persons. In July 2002, Treasury issued an interim final rule which requires broker-dealers, FCMs, and IBs to comply with provisions relating to private banking accounts and defers their compliance with the provisions related to correspondent accounts. The interim final rule became effective on July 23, 2002. NYSE's Information Memo No. 02-34, *Special Due Diligence for Correspondent Accounts and Private Banking Accounts*, summarizes relevant provisions of the new rule.

Suspicious Activity Reports (SARs). On July 1, 2002, Treasury issued a final rule requiring broker-dealers to report to Treasury suspicious transactions that involve \$5,000 or more in funds or other assets. This rule is applicable to transactions after December 30, 2002. On August 5, 2002, Treasury published draft Form SAR-SF (Suspicious Activity Report by the Securities and Futures Industry). Once finalized, the form should be used by broker-dealers and may be used voluntarily by FCMs registered with the CFTC to report suspicious activity to Treasury. The readers may wish to refer to the NASD Notice to Members No. 02-47, *Treasury Issues Final Suspicious Activity Reporting Rule for Broker/Dealers*, for a discussion of this new regulation and the proposed form. Section 356(b) of the Patriot Act authorizes Treasury to issue rules requiring FCMs, CPOs, and CTAs to file SARs. Although Treasury has announced its intention to issue rules requiring FCMs and IBs to file SARs, rules have not yet been proposed.

Customer Identification and Verification Rules. On July 23, 2002, Treasury, along with the SEC, CFTC, and other federal financial regulators, issued proposed rules that would require certain financial institutions to establish minimum procedures for identifying and verifying the identity of customers seeking to open new financial accounts. These proposed rules implement Section 326 of the Patriot Act, which directs the issuance of regulations requiring financial institutions to implement reasonable procedures for (1) verifying the identity of any person seeking to open an account, to the extent reasonable and practicable; (2) maintaining records of the information used to verify the person's identity; and (3) determining whether the person appears on any list of known or suspected terrorists or terrorist organizations. Section 326 specifies that final rules must take effect on or before October 25, 2002. However, on October 11, 2002, Treasury advised all financial institutions, including broker-dealers, FCMs, and IBs, that they will not be required to comply with Section 326 of the Patriot Act or the proposed rules issued by Treasury and the federal regulators on July 23 until final implementing regulations are issued and become effective.

Correspondent Accounts. On September 26, 2002, Treasury issued a final rule titled *Correspondent Accounts for Foreign Shell Banks; Recordkeeping and Termination of Correspondent Accounts for Foreign Banks*. The new rule prohibits certain financial institutions, including broker-dealers, from providing correspondent accounts to foreign shell banks; requires such financial institutions to take reasonable steps to ensure that correspondent accounts provided to foreign banks are not being used to indirectly provide banking services to foreign shell banks; requires certain financial institutions that provide correspondent accounts to foreign banks to maintain records of the ownership of such foreign banks and their agents in the United States designated for service of legal process for records regarding the corresponding account; and requires the termination of correspondent accounts of foreign banks that fail to comply with or fail to contest a lawful request of the Secretary of the Treasury or the Attorney General of the United States. The new rule is effective October 28, 2002.

Reports Concerning Transactions in Excess of \$10,000 in Currency. The BSA requires FCMs, IBs, CTAs, and CPOs to file on a Form 8300 a report concerning any transaction (or series of related transactions) in excess of \$10,000 or more in currency.

Reports Concerning Foreign Bank and Financial Accounts (FBAR). The BSA requires each United States person who has a financial interest in or signature or other authority over a bank, securities or other financial account in a foreign country to file an FBAR if the aggregate value of the financial account exceeds \$10,000 at any time during the calendar year. The term "financial account" includes any commodity interest account. The term "United States person" includes any SEC or CFTC registrant (for example, a broker-dealer, FCM, IB, CPO, or CTA) that is a citizen or resident of the United States, domestic partnership, domestic corporation, or a domestic estate or trust.

Information Sharing. On September 26, 2002, Treasury issued a final rule to encourage information sharing among financial institutions and federal government law enforcement agencies to the purpose of identifying, preventing, and deterring money laundering and terrorist activity. Under the new rule, certain financial institutions will be able to share information among themselves for the purpose of identifying and reporting suspected terrorism and money laundering once the financial institutions have notified FinCEN that they intend to share such information and that they will take adequate steps to

maintain confidentiality. Under the final rule, any financial institution that is required to establish and maintain an anti-money laundering program or is treated as having satisfied this requirement is eligible to share information. The rule became effective upon issuance.

Employee Layoffs

.140 Many entities are resorting to layoffs during this economic downturn to counter-balance reduced earnings. Significant layoffs can have a serious effect on an entity's internal control, financial reporting and accounting systems. For instance, employees who remain at the company may feel overwhelmed by their workloads, feel pressure to complete their tasks with little or no time to consider their decisions, and may be performing too many tasks and functions. The auditor may need to consider whether these situations exist and what their effect is on internal control. SAS No. 55, as amended, provides guidance on the auditor's consideration of an entity's internal control in an audit of financial statements in accordance with GAAS.

.141 Additionally, the auditor may need to consider the possible effects that key unfilled positions can have on internal control. Entities that have had strong financial reporting and accounting controls could see those controls deteriorate due to the loss of employees. Layoffs can also create additional exposure to possible internal fraudulent activities (for example, when an employee performs a job function that otherwise would be segregated). Recently issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement caused by fraud. See the "Fraudulent Financial Reporting" section of this Alert for detailed discussion of this new standard.

.142 You may want to consider these issues in planning and performing the audit and in assessing control risk. Remember that gaps in key positions may represent reportable conditions that should be communicated to management and the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*.

.143 If the securities firm you are auditing is experiencing layoffs, management will need to properly account for employee-related termination charges such as severance packages, restructuring charges, and voluntary separation. In addition, management may need to properly account for outplacement services, bonuses, and educational allowances to assist employees in contending with the loss of their jobs. The following accounting literature provides guidance on accounting issues related to layoffs:

- FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, establishes standards for accounting for curtailments and termination benefits, among other issues. Practitioners should refer to paragraphs 6 to 14 for guidance on curtailment and paragraphs 15 to 17 for guidance on termination benefits. FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, requires the effect of the curtailment (for example, the termination of employees' services earlier than expected, which may or may not involve closing a facility or discontinuing a segment of a business) to be recorded as a loss. Practitioners should refer to paragraphs 96 to 99 for guidance on how to account for plan curtailment. The Statement also provides guidance on how to measure the effects of termination benefits in paragraphs 101 and 102.
- FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits*, requires that entities providing postemployment benefits to their employees accrue the cost of such benefits. Inactive employees include those who have been laid off, regardless of whether or not they are expected to return to work. Postemployment benefits that can be attributed to layoffs can include salary continuation, supplemental unemployment benefits, severance benefits, job training and counseling, and the continuation of benefits such as health care benefits and life insurance coverage.

FASB Statement No. 112 does not require that the amount of postemployment benefits be disclosed. The financial statement shall disclose if an obligation for postemployment benefits is not accrued because the amount cannot be reasonably estimated.

- FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits*, addresses disclosures only and requires the disclosure of the amount of gain or loss recognized resulting from a settlement or curtailment. Additionally, the cost of providing special or contractual termination benefits recognized during the period and a description of the nature of the event is required to be disclosed.

AICPA 2002 Audit and Accounting Guide *Brokers and Dealers in Securities*

.144 AICPA Audit and Accounting Guide *Brokers and Dealers in Securities*, with conforming changes as of May 1, 2002 (the Guide), has been updated to reflect the issuance of recently issued authoritative pronouncements. The Guide is available through the AICPA's reSOURCE Online and reSOURCE CD-ROM products, as well as through a loose-leaf subscription service. Paperback editions of Audit and Accounting Guides can be purchased as well.

Help Desk—Subscriptions to AICPA reSOURCE, subscriptions to the loose-leaf service, and paperback copies of the Guide may be obtained by calling the AICPA Order Department (Member Satisfaction) at (888) 777-7077, or faxing a request to (800) 362-5066, or by going online to www.cpa2biz.com.

New Auditing and Attestation Pronouncements, Quality Control, and Other Guidance

.145 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. Related-Party Toolkit

.147 The AICPA staff has developed an electronic document, *Accounting and Auditing for Related Parties and Related Party Transactions: A Toolkit for Accountants and Auditors*, to provide accountants and auditors of private-sector business enterprises with an overview of selected authoritative accounting and auditing literature, SEC requirements, and nonauthoritative best practice guidance concerning related parties and related-party transactions. The related-party toolkit is available on the AICPA Web site at www.aicpa.org/public/download/news/relpty_toolkit.doc.

Practice Alert 02-1, *Communications With the Securities and Exchange Commission*

.148 The AICPA Securities and Exchange Commission Practice Section (SECPS) Executive Committee established a Professional Issues Task Force (PITF) which formulates guidance based on issues arising in peer reviews, firm inspections, and litigation to facilitate the resolution of emerging audit practice issues. This guidance takes the form of Practice Alerts. The information contained in these Practice Alerts is nonauthoritative. It represents the views of the members of the PITF and does not represent official positions of the AICPA.

.149 Practice Alert 02-1 provides registrants and their auditors with the most up-to-date information about when, why, and how they may wish to discuss SEC accounting, financial reporting, and disclosure issues and questions with the staff at the SEC. In addition, this Alert is intended to provide professionals with references to other resources that may be useful when working with SEC registrants.

Practice Aid *Fraud Detection in a GAAS Audit*—SAS No. 99 Implementation Guide

.150 In connection with the issuance of SAS No. 99, the AICPA is issuing a Practice Aid to help practitioners implement the new fraud guidance. The practice aid is entitled *Fraud Detection in a GAAS Audit* (product no. 006613kk) and will be available in December 2002. The Practice Aid includes topics such as:

- How the new SAS changes audit practice
- Characteristics of fraud
- Understanding the new fraud SAS
- Best practices
- Practice aids, such as:
 - Specialized industry fraud risk factors
 - Common frauds and extended audit procedures

The Practice Aid represents valuable guidance in helping practitioners understand and implement SAS No. 99.

New Accounting Pronouncements and Other Guidance⁵

.151 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. On the Horizon

.152 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.153 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web

⁵ Readers should refer to the full text of the accounting pronouncements that are discussed in this section of the Audit Risk Alert. Readers should also be alert for updates to the topics discussed in this section of the Alert, and for other recent Financial Accounting Standards Board (FASB) and SEC developments. Further information related to FASB projects can be obtained from the FASB Web site at www.fasb.org. Further information related to SEC rules and releases can be obtained from the SEC Web site at www.sec.gov.

sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below. Readers should refer to information provided by the various standard-setting bodies for further information.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA’s standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate “exposure draft e-mail list” in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message.

Auditing Pipeline

Exposure Draft on Auditing Fair Value Measurements and Disclosures

.154 The ASB has issued an exposure draft of a proposed SAS entitled *Auditing Fair Value Measurements and Disclosures*. The proposed SAS addresses auditing considerations relating to measurement, presentation, and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. A vote to ballot a document for final issuance is expected to occur in the autumn of 2002.

New Framework for the Audit Process

.155 The ASB has voted to expose a suite of seven proposed SASs relating to the auditor’s risk assessment process. The ASB believes that the requirements and guidance provided in the proposed SASs, if adopted, would result in a substantial change in audit practice and in more effective audits. The primary objective of the proposed SASs is to enhance the auditor’s application of the audit risk model in practice by requiring:

- A more in-depth understanding of the entity and its environment, including its internal control, that would better enable the auditor to identify the risks of material misstatement in the financial statements and any steps the entity is taking to mitigate them.
- A more rigorous assessment of the risks of material misstatement of the financial statements based on that understanding.
- A better linkage between the assessed risks of material misstatement and the nature, timing, and extent of audit procedures performed in response to those risks.

.156 The exposure draft consists of the following proposed SASs:

- *Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150)
- *Audit Evidence*, which would supersede SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)

- *Audit Risk and Materiality in Conducting an Audit*, which would supersede SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)
- *Planning and Supervision*, which would supersede “Appointment of the Independent Auditor” (AICPA, *Professional Standards*, vol. 1, AU sec. 310), and SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)
- *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (Assessing Risks)
- *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, which would supersede SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and, together with the proposed SAS *Assessing Risks*, would supersede SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319)
- *Amendment to SAS No. 39, Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350)

You should keep abreast of the status of these projects and exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA’s Web site at www.aicpa.org.

Accounting Pipeline

Exposure Draft on Loans and Certain Debt Securities Acquired in a Transfer (Formerly Known as Purchased Loans and Securities)

.157 AcSEC has issued an exposure draft of a proposed SOP titled *Accounting for Loans and Certain Debt Securities Acquired in a Transfer*. This proposed SOP considers whether Practice Bulletin (PB) No. 6, *Amortization of Discounts on Certain Acquired Loans*, continues to be relevant given a number of FASB pronouncements issued subsequent to PB No. 6. The proposed SOP excludes originated loans from its scope. A final SOP is expected to be issued during the fourth quarter of 2002.

Consolidation of Certain Special-Purpose Entities

.158 The FASB has issued an exposure draft of a proposed Interpretation of Accounting Research Bulletin (ARB) No. 51 entitled *Consolidation of Certain Special-Purpose Entities*. This proposed Interpretation would address consolidation by business enterprises of special-purpose entities (SPEs) to which the usual condition of consolidation described in ARB No. 51, *Consolidated Financial Statements*, does not apply because the SPEs have no voting interest or otherwise are not subject to control through ownership of voting interests. A final Interpretation is expected to be issued during the fourth quarter of 2002.

Guarantor’s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others

.159 The FASB has issued an exposure draft of a proposed Interpretation of FASB Statements No. 5, 57, and No. 107, *Guarantor’s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. This proposed Interpretation would elaborate on the disclosures to be made by a guarantor in its financial statements about its obligations under certain guarantees that it has issued. It also would require a guarantor to recognize, at the inception of a guarantee, a liability for the fair value of the obligations it has undertaken in issuing the guarantee. This proposed Interpretation does not address the subsequent measurement of the guarantor’s recognized liability over the term of the related guarantee. This proposed Interpretation also would incorporate, without change, the guidance in FASB Interpretation No. 34, *Disclosure of Indirect Guarantees of Indebtedness of Others*, which would be superseded.

.160 This proposed Interpretation would not apply to guarantee contracts issued by insurance and reinsurance companies and accounted for under specialized insurance accounting principles, a lessee’s

residual value guarantee embedded in a capital lease, contingent rents, and vendor rebates. The provisions related to recognizing a liability at inception for the fair value of the guarantor's obligations would not apply to product warranties, guarantees that are accounted for as derivatives, contingent consideration in a business combination, guarantees for which the guarantor's obligations would be reported as an equity item (rather than a liability), and an original lessee's guarantee of lease payments for which it remained secondarily liable in conjunction with being relieved of its primary obligation under a lease restructuring. However, those guarantees would be subject to the disclosure requirements of the proposed Interpretation. A final Statement is expected to be issued during the fourth quarter of 2002.

Amendment of FASB Statement No. 133 on Derivative Instruments and Hedging Activities

.161 The FASB has issued an exposure draft of a proposed Statement entitled *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. This proposed Statement would amend the definition of a derivative in paragraph 6(b) of FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This proposed Statement also would amend Statement No. 133 for various decisions made as part of the Derivatives Implementation Group process. A final Statement is expected to be issued during the fourth quarter of 2002.

Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.162 Proposed AICPA SOP *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment* and proposed FASB Statement *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment—an amendment of APB Opinions No. 20 and 28 and FASB Statements No. 51 and 67 and a rescission of FASB Statement No. 73* were issued simultaneously for public comment. Principally, the proposed FASB Statement would amend FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to exclude from its scope the accounting for acquisition, development, and construction costs of real estate developed and used by an entity for subsequent rental activities. The accounting for those costs would be subject to the guidance in the proposed SOP. It also would amend APB Opinion No. 28, *Interim Financial Reporting*, to require that those costs that the proposed SOP would require be expensed as incurred on an annual basis also be expensed as incurred in interim periods.

.163 The proposed SOP addresses accounting and disclosure issues related to determining which costs related to property, plant, and equipment should be capitalized as improvements and which should be charged to expense. The proposed SOP also addresses capitalization of indirect and overhead costs and component accounting for property, plant, and equipment. Final Statements are expected to be issued during the first half of 2003.

Exposure Draft on Liabilities and Equity

.164 The FASB has issued an exposure draft of a proposed Statement *Accounting for Financial Instruments with Characteristics of Liabilities, Equity, or Both*. This proposed Statement would establish standards for issuers' classification in the statement of financial position of financial instruments with characteristics of liabilities, equity, or both. It would require that an issuer classify liability components and equity components of a financial instrument separately. This proposed Statement would prohibit the presentation of items between the liabilities section and the equity section of the statement of financial position.

.165 The FASB also issued an exposure draft of a proposed amendment to Concepts Statement No. 6 titled *Proposed Amendment to FASB Concepts Statement No. 6 to Revise the Definition of Liabilities*. This proposed amendment would revise the definition of liabilities to also include as liabilities certain obligations that require or permit settlement by issuance of the issuer's equity shares and that do not establish an ownership relationship. The objective of the project is to improve the transparency of the accounting for financial instruments that contain characteristics of liabilities, equity, or both.

.166 Final Statements are expected to be issued during the fourth quarter of 2002.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.167 The following AICPA publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- *Audit and Accounting Guide Brokers and Dealers in Securities* (product no. 012702kk)
- *Audit Guide Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk)
- *Audit Guide Auditing Revenue in Certain Industries* (product no. 012510kk)
- *Audit and Accounting Guide Audit Sampling* (product no. 012530kk)
- *Audit Guide Analytical Procedures* (product no. 012551kk)
- *Audit Guide Service Organizations: Applying SAS No. 70, As Amended* (product no. 012772kk)
- *Practice Aid Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- *Accounting Trends & Techniques—2002*
- *Practice Aid Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- *Practice Aid Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (available December 2002)
- *Audit Risk Alert E-Business Industry Developments—2002/03* [AAM section 8210]

AICPA Practice Aid Audits of Futures Commission Merchants, Introducing Brokers, and Commodity Pools

.168 This Practice Aid (product no. 006600kk) provides practitioners with nonauthoritative practical guidance on auditing financial statements of FCMs, IBs, and commodity pools. Organized to complement the *Audit and Accounting Guide Brokers and Dealers in Securities*, this Practice Aid includes an overview of the commodity industry; discussions of regulatory considerations, auditing considerations, and accounting standards; and illustrative financial statements of FCMs, IBs, and commodity pools.

Audit and Accounting Manual

.169 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs, auditor's reports, checklists, and engagement letters, management representation letters, and confirmation letters.

AICPA reSOURCE Online: Accounting and Auditing Literature

.170 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (all 23), *Audit Risk Alerts* (all 19), and *Accounting Trends & Techniques*. To subscribe to this essential online service, go to cpa2biz.com.

Educational Courses

.171 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Those courses include:

- *AICPA's Annual Accounting and Auditing Workshop* (product no. 737082kk [VHS tape/manual] and 187082kk [video]). Whether you are in industry or public practice, this course keeps you current, informed, and shows you how to apply the most recent standards.
- *Fair Value Accounting for Hedge Transactions* (product no. 735182kk). This course helps you understand GAAP for derivatives and hedging activities. Also, you will learn how to identify effective and ineffective hedges.
- *Fraud and the Financial Statement Audit: Auditor Responsibilities Under New SAS* (product no. 731810kk [text] and 181810kk [video]; available December 31, 2002). The new fraud standard may not change your responsibilities for detecting fraud in a financial statement audit, but it will change how you meet that responsibility. Practitioners will benefit from a risk assessment approach to detecting fraud in a financial statement audit. You will learn the conceptual framework necessary to understand the characteristics of fraud.
- *Auditing for Internal Fraud* (product no. 730237kk). This course provides an auditor with the tools to identify fraud schemes. It trains CPAs to focus their analytical and substantive tests on the fraud triangle when evaluating internal controls. It also illustrates the latest in fraud prevention and detection programs implemented by industry leaders.
- *Identifying Fraudulent Financial Transactions* (product no. 730243kk). Learn to identify the red flags of fraud in financial information and to analyze a variety of fraud schemes. You will develop a framework for detecting financial statement fraud and learn about fraud schemes in revenue, inventory, liabilities, and assets.
- *Independence* (product no. 739058kk). This interactive CD-ROM course reviews the AICPA authoritative literature covering independence standards (including the SECPS independence requirements), SEC regulations on independence, and Independence Standards Board (ISB) standards.
- *SEC Reporting* (product no. 736747kk). This course helps the practicing CPA and corporate financial officer learn to apply SEC reporting requirements. It clarifies the more important and difficult disclosure requirements.
- *E-Commerce: Controls and Audit* (product no. 731551kk). This course is a comprehensive overview of the world of e-commerce. Topics covered include internal control evaluation and audit procedures necessary for evaluating business-to-consumer and business-to-business transactions.

Online CPE

.172 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) provides unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

CPE CD-ROM

.173 *The Practitioner's Update* (product no. 738450kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

National Securities Industry Conference

.174 Each year the AICPA cosponsors with the Financial Management Division of the Securities Industry Association a National Conference on the Securities Industry that is specifically designed to update auditors and securities industry financial executives on significant accounting, legal, financial, and tax developments affecting the securities industry. Information on the conference may be obtained by calling the AICPA CPE Conference Hotline at (888) 777-7077 or visiting the AICPA Web site at www.aicpa.org.

Member Satisfaction Center

.175 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.176 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.177 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.178 AICPA Online, at www.aicpa.org, offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the Professional Standards, and CPE courses.

Other Helpful Web Sites

.179 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the "Information Sources" table at the end of this Alert.

.180 This Audit Risk Alert replaces *Securities Industry Developments—2001/02*. The *Securities Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ymishkevich@aicpa.org, or write to:

AAM Section 8120

Not-for-Profit Organizations Industry Developments—2003

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your not-for-profit organization (NPO) audits. The information delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the not-for-profit industry, and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry information and understanding it.

Economic and Industry Developments

The State of the Economy

.03 The slow economy that has affected the nation since 2001 continues. Uncertainty permeates the financial markets and the labor market continues to worsen. The slow economy causes many consumers to agonize about their personal prospects and causes businesses to be more averse to locking into major financial commitments, investments, and significant job creation. However, the economy is well positioned for improved expansion.

.04 Fundraising has suffered under the current economic conditions. According to the GuideStar survey, nearly half of not-for-profit organizations surveyed reported a drop in donations for the first 10 months of the year, while 22 percent said contributions remained the same. Donors are concerned about the future of the economy and more skeptical about how charities operate. As the net worth of major contributors declines, so do their gifts to charities. A wide variety of charity recipients are being affected as major donors cut their donations in response to losses brought on by the most significant market downturn in 30 years. In addition, some large employers have stopped matching their employees' charitable donations.

.05 In the face of these uncertain economic times, NPOs may consider using "creative" budgeting, financing, and financial reporting techniques to avoid the appearance of deficit financial positions. They may attempt to find innovative ways to minimize the reporting of costs, maximize the reporting of contribution revenues and unrestricted net assets, and use restricted resources for unrestricted purposes. Some of these methods may be inappropriate and even fraudulent.

.06 To help you consider and address these pressures being placed on management and the audit risks that may arise, the recently issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), and its associated Implementation Guide provide extensive audit requirements and how-to guidance. Among its provisions, SAS No. 99 expands the procedures you should take to consider the potential for misstatements from fraud, including those arising from fraudulent financial

reporting. In addition, see the new appendix to Chapter 2, "General Auditing Considerations," of the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*, for further guidance on SAS No. 99.

Continuing Weak Economy and Fund-Raising Challenges

.07 As endowments decline, competition for donor dollars rises, and cuts in government, corporate, and foundation funding continue, not-for-profit organizations are forced to cut back spending to preserve assets. Meanwhile the need for programs and services continues to increase, creating pressure for not-for-profits to do more with less. With fewer resources something has to give. Some NPOs may ultimately do without the resources necessary to maintain effective internal control.

.08 Proper accounting related to an organization's endowments may become a concern as negative returns and stock market declines take their toll. See the "Accounting Issues and Developments" section of this Alert for how to account for endowment losses.

The Advantages of Audit Committees

.09 Unfortunately, many NPOs operate without an audit committee. Following Enron, WorldCom, and other similar financial scandals, some occurring within the NPO arena, the audit committee has resurfaced as a vital instrument for strengthening sound financial management and fraud prevention.

.10 Audit committees can help the board of directors become aware of and put a stop to financial mismanagement within an organization. Audit committees can help the board of directors oversee the NPO's internal control and the financial reporting process. In addition, audit committees can act as a buffer between management and the auditor, as well as improving the communication between the outside auditor and the board of directors.

.11 NPOs can be particularly susceptible to fraudulent activities. NPOs operate in an atmosphere of trust with reliance on volunteers to execute crucial tasks with continual influxes of cash donations. Supervision and resources are limited, and a voluntary board of directors may lack financial expertise. NPOs may want to consider maintaining an audit committee and educating their directors and audit committee members about their roles and responsibilities.

Taxation of Internet Sales

.12 The taxation of Internet sales remains an ongoing issue. State and local governments are concerned about losing billions of revenue dollars annually because of untaxed Internet sales. Internet businesses claim that disparities in sales tax systems among the various jurisdictions make it too burdensome to administer sales tax collections.

.13 Late in 2002, a majority of states approved an interstate agreement to simplify their sales tax laws. The agreement will become effective once a certain number of states have enacted conforming legislation. In response, some of the nation's largest retailers have started voluntarily to collect taxes on their Internet sales. However, before state and local governments can enforce the taxation of Internet sales, the federal government must pass legislation permitting it. The Internet Nondiscrimination Act (Public Law [P.L.] 107-075), which expires November 1, 2003, bans new Internet access taxes and new, multiple, and discriminatory taxes on electronic commerce. Legislators have introduced bills in the 108th Congress to make the ban permanent. Surely, the states will be adding their voices to that debate.

Regulatory and Legislative Developments

.14 Auditors of NPOs may need to monitor changes in government regulations for various reasons. For example, they may be required to comply with Government Auditing Standards (GAS), also referred to as

the Yellow Book.¹ In addition, auditors may be required to perform a single audit and comply with applicable rules. A *single audit* is an audit of an entity's federal financial assistance, as required by the Single Audit Act Amendments of 1996 (the Act), and Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133).² NPOs may also be affected by other federal, state, and local laws, such as laws regulating the registration of NPOs and tax laws.

.15 In the past the NPO Audit Risk Alert has discussed developments related to the following regulatory matters:

- Circular A-133 Audit Guidance Update
- Annual Compliance Supplement—Issued to help you understand the objectives, procedures, and compliance requirements of approximately 160 federal programs
 - Data Collection Form Revision and Electronic Submissions
 - Federal Grant Streamlining Program
 - Orange Book
 - Circular A-133 Audit Reviews
- Government Auditing Standards

.16 Discussions of those developments will now appear in the AICPA Audit Risk Alert *Single Audit—2003, Audits of Organizations Receiving Federal Awards: Single Audits Performed in Accordance With Office of Management Budget Circular A-133*.

Internal Revenue Service Activities

Revised Filing Requirements for 527 Political Organizations

.17 The IRS has outlined new reporting requirements that exempt many state and local political organizations from filing certain forms.

.18 The new law changes filing requirements for many political organizations that have tax-exempt status under section 527 of the Internal Revenue Code. The changes are retroactive to July 1, 2000, when the reporting requirements became mandatory.

.19 The new law:

- Exempts state and local candidate and party committees from filing Form 8871 and Form 990 (or 990-EZ);
- Exempts qualified state and local political organizations (QSLPOs) from filing Form 8872;
- Exempts political committees filing with the Federal Election Campaign (FEC) Act of 1971 from filing Form 990 (or 990-EZ);
- Exempts political organizations that are a caucus or association of state or local officials from filing Form 990 (or 990-EZ);
- Requires additional information on Form 8871 and Form 8872;
- Requires the filing of an amended Form 8871 after material changes to maintain tax-exempt status;

¹ Although *government auditing standards* primarily apply to federal assistance, some states have adopted government auditing standards.

² Instead of a single audit, under certain circumstances program-specific audits may be conducted.

- Increases reporting thresholds for certain Form 990 filers;
- Eliminates the requirement to file Form 1120-POL except when an organization has taxable income after taking the \$100 specific deduction (returning to pre-July 2000 requirements);
- Reinstates the pre-July 2000 confidentiality requirement for any Form 1120-POL filed after November 2, 2002; and
- Changes the electronic filing requirements by:
 - Requiring that Form 8871 be filed electronically (as opposed to both in writing and electronically); and
 - Requiring that any Form 8872 due after June 30, 2003, be filed electronically if the filing organization has or expects to have contributions or expenditures of more than \$50,000 during the calendar year.

.20 A more complete description of filing requirements for political organizations can be found in Fact Sheet 02-13. For further information, visit the IRS Web site at www.irs.gov/polorgs or call the IRS Tax Exempt Customer Account Service toll-free number at (877) 829-5500.

IRS Quest to Improve Form 990

.21 The IRS is attempting to alter federal Form 990 to improve its content and accountability. In the wake of numerous accounting scandals and demands for greater financial disclosure, the IRS is requesting greater financial disclosures by not-for-profits. The IRS is proposing changes to Form 990 in the following areas:

- Foreign grants
- Fundraising
- Whether an organization has an independent audit committee
- Conflict of interest policy
- Other disclosure issues, such as:
 - If the NPO should provide more information than currently required about financial relationships with “substantial” contributors, directors, officers, and other key employees.
 - Whether noncharitable exempt organizations should disclose transactions with “substantial” donors, officers, directors, trustees, and key employees, similar to the disclosures of Schedule A, Part III, Question 2.

.22 The IRS is also proposing other changes such as whether organizations should have to complete Part II of Form 990 in accordance with Statement of Position (SOP) 98-2, *Accounting for Costs of Materials and Activities of Not-for-Profit Organizations and State and Local Government Entities that Include Fund-Raising*. The IRS feels that it will simplify the comparisons performed regarding an organization’s fund-raising costs and produce greater uniformity. In addition, the IRS is asking whether organizations should be required to file a separate schedule detailing grants to foreign organizations and whether domestic organizations involved in foreign activities should give more specific information about money flow in those activities or about recipients in response to potential terrorist activities.

.23 Furthermore, IRS Announcement 2002-87 also brings not-for-profits up-to-date on recent changes to Form 990 including the requirement for organizations to report the gross amount raised by an outside fundraiser on Part I, line 1a since, according to the IRS, some organizations were reporting the net amount received, which allowed not-for-profits to evade reporting expenses such as fund-raising fees.

.24 Comments were due back to the IRS by January 28, 2003. As of the writing of this Alert the IRS had not finalized the possible changes yet. Readers should keep an eye out for these proposed changes.

Proposed Changes to Form 1023

.25 The IRS is proposing revisions to Form 1023, “Application for Recognition of Exemption under Section 501(c)(3) of the Internal Revenue Code,” and the instructions for Form 1023. The proposed revisions are quite extensive.

.26 Listed below are some of the more significant changes the revisions call for:

- The revised Form 1023 would require information concerning foreign activities in response to political uneasiness that some U.S. charities may have assisted in financing international terrorist activities. For example, whether the applicant was formed or has operations in a foreign country or contributes to foreign organizations the applicant must explain how control and discretion is maintained when it comes to the use of money or material given to foreign organizations.
- The proposed revisions to Form 1023 would require the applicant to include details to determine if the compensation of the officers, directors, and trustees of the applicant is reasonable. The details include each person’s qualifications, hours worked, and duties performed. A short resume for each compensated executive may be suitable according to the revised proposed instructions.
- The proposed revisions to Form 1023 would require an explanation of agreements and copies of pertinent documents to be submitted if there are any leases, contracts, or other agreements between the organization and those who control it, or with other entities, whether exempt or for-profit, over which they have “substantial influence.” Substantial influence is defined as the ability to affect decisions either as an officer, shareholder, or owner. The details to be included in the required explanation would take into account how the terms of the agreement were attained and how the conflict of interest was settled to attain an unbiased decision.
- The revised Form 1023 would include Part VIII, which is composed of 8 questions aimed at identifying potential unrelated business income. For instance, the IRS is requesting to be acquainted with the facts if the applicant performs any of the following:
 - Conducts activities over the Internet
 - Provides managerial or consulting services to other exempt organizations for a fee
 - Generates income from intellectual property (for example, patents and copyrights)
 - Operates bingo and other gaming activities
 - Conducts other activities that do not directly accomplish its charitable, educational, or religious purposes

.27 As of the writing of this Alert the IRS had not finalized the proposed revisions. Readers should keep an eye out for these proposed changes.

IRS E-File: Exempt Organizations Tax Form Schemas

.28 Preparers should be aware that the IRS now has available the proposed IRS e-file Exempt Organization Tax Schemas for the 2002 tax year. The IRS provides a zip file which consists of the schemas for Forms 990 and 990-EZ (which includes Schedules A and B), Form 1120-POL, and Form 8868. Comments were due back prior to March 24, 2003. The final release of the schemas was scheduled for March 31, 2003.

Employer Leave-Based Donation Programs

.29 As discussed in last year’s Alert some employers adopted a “leave based donation program” following the terrorist attacks of September 11, 2001. The program permitted employees to give up paid vacation, sick, or personal time off in return for the employer’s contribution of specified dollar amounts to charitable organizations.

.30 Usually, an employee who designates compensation to a charity is still considered to have received it for income tax purposes (Reg. 1.61-2 (c)). In spite of this, the IRS proclaimed that amounts donated to charity under leave-based programs before January 1, 2003, would not be included in participating employees' gross income for income tax and payroll tax purposes according to Notice 2001-69. Because no income is recognized, a participating employee would not be entitled to a contribution. Furthermore, employer payments under leave-based programs prior to January 1, 2003, were to be treated as ordinary business expenses to the employer instead of charitable contributions.

.31 Notice 2001-69 has been revoked by the IRS. Practitioners should refer to Notice 2003-1 which states that such payments made on or after January 1, 2003, will be includible in an employee's gross income and deductible only as a charitable contribution.

Revenue Rulings on Electric Cooperatives' Exemption

.32 IRC section 501(c)(12) provides for the exemption of cooperatives that receive at least 85 percent of their income from members for providing certain public utility services. Revenue Rulings 2002-54 and 2002-55 provide additional guidance on how to calculate this member income test.

Private Letter Ruling on Advertising Implications of Web Activities

.33 The IRS has taken the position that the practice of exchanging links to other Web sites or banners with other online organizations may result in taxable advertising income. The IRS will determine this based on the facts and circumstances in each case. Practitioners may refer to Private Letter Ruling (PLR) 200303062 for additional guidance on the potential tax implications of Web site links.

The Better Business Bureau Wise Giving Alliance

.34 The Better Business Bureau (BBB) Wise Giving Alliance is a charity watchdog whose objectives include assisting donors in making knowledgeable and informed giving decisions. In March 2003, it issued new charity accountability standards. These standards supersede the standards of the former National Charities Information Bureau (NCIB) and the Council of Better Business Bureaus Foundation and its Philanthropic Advisory Service (PAS) which were all merged in 2001 to create the BBB Wise Giving Alliance.

.35 The BBB Wise Giving Alliance Standards for Charitable Accountability address the following accountability issues:

- The charity's use of funds and fund-raising practices.
- Donor privacy protection.
- Charity Web site disclosures.
- The importance of spending funds in accordance with donor intentions.
- Recommendation that the charity institute an effectiveness measure to assess its performance.

.36 The BBB Wise Giving Alliance has developed the "Wise Giving Seal" which will guarantee donors that the charity operates in accordance with these thorough standards. Qualified charities will have authorization to display the seal in their solicitation material, advertisements, and other items signifying that they have met the Alliance standards. The seal is scheduled to be available this summer.

.37 An Implementation Guide for the Standards for Charitable Accountability has been developed by the Alliance. It provides detailed guidance on how each standard should be applied and their effective dates.

.38 The BBB Wise Giving Alliance Standards for Charitable Accountability and the Standards Implementation Guide can be found at www.give.org.

Sarbanes-Oxley Act and Not-for-Profits

.39 Although the Sarbanes-Oxley Act (S-O) is only applicable to public companies and their auditors, it could have a ripple effect on not-for-profit organizations. For example, in late January 2003, the New York State Attorney General's Office announced proposed requirements for nonprofits, which mimic the requirements of S-O. S-O-like provisions that could pass through to not-for-profit organizations in the future may include the certification of financial statements, increased disclosures, improved role of the audit committee, and code of conduct rules for CFOs and other senior financial officers. Readers should monitor the AICPA Web site for news about S-O and related developments.

Audit and Attestation Issues and Developments

The Internet and Internal Control Issues

.40 The Internet as a communications and direct response channel is on the rise in the not-for-profit arena. Large and small not-for-profits are using the Internet to develop strong constituent relationships to maximize fund-raising efforts. NPOs can use the Internet for marketing services, driving advocacy, recruiting volunteers, and acquiring and retaining both annual giving and major donors.

.41 NPOs are using the Internet for theme-based appeals, which explain how one's donation will be used, and volunteer-based fundraising. With annual giving and membership programs yielding poor returns of 30–50 percent of supporters from year to year, and the cost of paper-based communications rising, the Internet appears to be a promising vehicle for helping NPOs raise significant dollars. As more and more not-for-profits welcome the Internet as a powerful tool, the auditor faces new challenges.

Audit Timing and Planning

.42 NPOs with online donation transactions may automatically initiate, authorize, record, summarize, and settle transactions electronically without human intervention or physical documentation. As a result, key audit evidence in electronic form may exist only for a limited amount of time. Therefore, you will need to understand and be able to rely on information technology (IT) general controls. Computer programs may summarize transactions on a periodic basis and then purge, update, change, modify, or write over the original detail records of the transaction. Traditionally, audit procedures are performed after a client's fiscal year end. With Internet activities, however, traditional audit timing may be inadequate. One audit implication of sometimes short-term electronic evidence in audits of NPOs with online donations is that waiting until after the fiscal year end to begin auditing procedures may be too late to obtain competent sufficient evidence of controls or transactions.

.43 SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311.09), indicates that "the extent to which computer processing is used in significant accounting applications, as well as the complexity of that processing, may also influence the nature, timing, and extent of audit procedures."

.44 The NPOs conducting e-philanthropy may not have hard-copy or paper evidence of transactions. Contribution statements, delivery, settlement, and authorization may be prepared and performed electronically, leaving no paper trail behind. The failure of NPOs to retain the details of transactions can create troublesome issues for the auditor who is considering whether internal control is functioning as planned. According to SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326.18), as amended:

Certain electronic evidence may exist at a certain point in time. However, such evidence may not be retrievable after a specified period of time if files are changed and if backup files do not exist. Therefore, the auditor should consider the time during which information exists or is available in determining the nature, timing, and extent of his or her substantive tests, and if applicable, tests of controls.

.45 If the retention of evidential matter is questionable, the auditor may want to begin audit procedures before year end. This may also drive the need for continuous auditing.

Adequate Technical Training

.46 The rapid evolution of technology has profound implications for all those affected by computer technology, including auditors. Existing NPO e-philanthropy hardware and software may need to be replaced every 18 months, or more frequently, to remain competitive. This rapid rate of technological change means that, to remain current, ongoing training in the underlying Internet technologies is requisite.

.47 Auditing through the computer and the nature of electronic evidence require that the auditor gain a more detailed understanding of the controls over transactions and records than that traditionally obtained for paper-based manual audits. You can obtain more specific technology skills through technical training courses, seminars, IT reference materials, research, and other methods.

Help Desk—The AICPA provides the following courses that are helpful to CPAs working in the environment of e-business activities: Auditing in a Paperless Society (product no. 730121kk) and E-Commerce: Controls and Audit (product no. 731550kk). How can you develop strategies for auditing around, through, and with a computer? Learn how a wide spectrum of technologies is redefining the role of auditor and auditee in these self-study courses. They are available from the AICPA Order Department at (888) 777-7077.

Using the Work of a Specialist

.48 Due to the rapid advance of technology, you may not have all the skills necessary to audit online activities. Until you and your staff have the technical skills needed to audit NPO e-philanthropy of online donations, you may need to engage IT audit specialists to perform certain procedures. Qualified IT specialists are sometimes available from another part of the firm, such as the consulting division or the internal IT support staff. If not, you may have to go outside your own organization to obtain qualified specialists. Engaging a specialist for gaining an understanding of internal controls, tests of controls, substantive tests, and analytical procedures requires awareness of guidelines available in the authoritative literature. According to SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336.06), specialized assistance is advisable for auditors who:

... may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skills or knowledge and in the auditor's judgment require using the work of a specialist to obtain competent evidential matter.

.49 The use of an outside specialist³ in an Internet context does not absolve the auditor from a certain level of understanding about computers. Audit planning comes into play because of the lead time necessary to contract for a specialist's services and the time required for the auditor to obtain the minimum technological knowledge necessary to supervise the specialist. According to SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311.10):

If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should have sufficient computer-related knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified procedures will meet the auditor's objectives; and to evaluate the results of the procedures applied as they relate to the nature, timing, and extent of other

³ Note that SAS No. 73 does not apply to specialists who are employed by the firm and are part of the engagement team. SAS No. 73 indicates that the auditor uses the work of the specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions. The specialist does not, however, perform the substantive tests or analytical procedures.

planned audit procedures. The auditor's responsibilities with respect to using such a professional are equivalent to those for other assistants.

Internal Control as It Affects Audit Evidential Matter

.50 SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, provides guidance on the independent auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). For traditional businesses, the auditor's consideration of internal control typically involves updating prior-year checklists, questionnaires, and procedural narratives. Using a traditional audit approach for e-philanthropy NPO clients would be insufficient because, in the e-philanthropy environment, almost all of the evidence of transactions is electronic. Critical records may consist of e-mail, database records, electronic documents, spreadsheets, and server logs. In addition, e-philanthropy transactions are subject to intentional and unintentional alteration and manipulation at many points between transaction initiation and summarization in the financial statements. Because NPO e-philanthropy segments generally lack much of the paper evidence found in audits of traditional businesses, your approach to understanding internal controls when planning the e-philanthropy audit and determining the nature and extent of substantive tests should take this into account.

.51 SAS No. 55, as amended, provides guidance to auditors about the effect of IT on internal control and on the auditor's understanding of internal control and assessment of control risk. In some circumstances, auditors may need to perform tests of controls to perform an effective audit.

The Importance of Software Controls

.52 As noted earlier, technology continues to evolve rapidly. Most server software is constantly upgraded, modified, and configured with components from different vendors. Often, when software is upgraded, previous control settings are lost, with no warning to managers. If procedures are performed before year end, you have the additional responsibility to consider whether there are frequent and significant changes being made to the NPO systems that might affect the remainder of the period. According to SAS No. 55 (AICPA, *Professional Standards*, vol. 1, AU sec. 319.99):

When the auditor obtains evidential matter about the design or operation of controls during an interim period, he or she should determine what additional evidential matter should be obtained for the remaining period . . . The auditor should obtain evidential matter about the nature and extent of any significant changes in internal control, including its policies, procedures, and personnel, that occur subsequent to the interim period.

.53 Access is another issue to consider when testing controls over online activities. To test controls, auditors need access to networks, servers, and databases on which entities store their accounting records. Information technology managers may be reluctant to grant auditors the level of access they need, preferring, instead, to provide lengthy printouts, files on diskettes, or files as e-mail attachments. Access to copies of records in these forms is insufficient. Auditors should have full read-access rights to all system and database security settings and tables as well as the underlying electronic accounting records to gain a sufficient understanding of controls and to perform substantive tests.

.54 E-philanthropy software should include controls to prevent the repudiation or alteration of records that initiate transactions. Such controls might include digital signatures or server certificates that authenticate the parties to the transaction, as well as traditional edit and validation controls. Electronic (digital) signatures reduce the likelihood of the parties claiming that they never initiated the transaction or that the record of the terms of the transaction has been altered. Without server certificates, an initiator of a transaction has no assurance that it is dealing with the intended party's computer. Without digital signatures and server certificates, it may be difficult to determine that transactions are neither fictitious nor fraudulent.

The Importance of Monitoring

.55 A key control in a system of internal control is monitoring. Routers, firewalls, Web servers, e-mail servers, databases, and operating systems all have the ability to log traffic and specific security events. Properly implemented and controlled logs can provide some evidence that a transaction occurred and that the transaction record has not been altered. Independent audits of the controls carried out at third parties, along with the use of digital certificates, encryption, access controls, and logging, help provide evidence for the auditor regarding the integrity of recorded transactions.

Key Controls in an Electronic Environment

.56 To reduce the chance of an auditor relying on evidence that lacks credibility, he or she should understand the key controls over validity, completeness, and integrity. In the electronic environment, these typically include the following:

.57 *Segregation of Duties.* Different employees should perform the duties of security administration, security monitoring, system administration, application maintenance, software development, and daily accounting operations.

.58 *Authorization.* User access to networks, systems, servers, services, programs, data, and records should be authorized based on the organization's security policy and documented.

.59 *Authentication.* The identity of authorized users should be established by the use of logon IDs, hard-to-guess and hard-to-crack passwords, and, where appropriate, smart cards.

.60 *Access Limitations.* Authorized users should be granted access to networks and application systems only after they authenticate themselves, and their access rights should be commensurate with their job responsibilities.

.61 *Activity Logging.* Logging should be enabled on all routers, firewalls, servers, databases, and operating systems. The logs should be protected from tampering and alteration and should be retained.

.62 *Independent Monitoring.* Employees independent of the IT department should monitor the activity logs on a frequent enough basis to detect suspicious, unusual, and unauthorized activity. Due to integration of e-philanthropy as discussed above, it should be independent of operations including IT.

.63 *Methods of Error Correction.* Software should have controlled rollback procedures so records are not purged or lost when servers crash and programs abort. Controls preventing changes to historical records should be in place so errors are corrected by entries made by the accounting department. Programmers and other IT personnel should not be able to make changes to actual accounting records.

.64 *Backup Procedures.* Grandfather, father, and son daily backup procedures should be performed, as well as weekly, monthly, quarterly, and annual backups. All files that include the details of transactions should be included in the backup. With the advice of legal counsel, the key user or owner of the data should establish retention schedules to satisfy legal and regulatory requirements. The backup media should have clear exterior identification, and there should be an offline log and inventory of what was backed up, when, by whom, and where stored. Backups should be stored in a safe location off-site and tested periodically by the key user of the data.

.65 *Disaster Recovery.* The nature of online services often requires that systems be capable of operating 24 hours a day, seven days a week. Even short periods of outage may mean significant financial loss to some NPOs. There should be a written plan on how systems will roll over to alternative systems should the data center be destroyed or rendered inoperable. The plan should periodically be tested.

.66 The strength of controls in an electronic environment is like a chain, where strength is determined by the weakest link. You should consider whether any weak links are present and, if so, consider the need to adjust your risk assessment and substantive tests accordingly.

Reports From Service Organizations

.67 Many clients use an Internet service provider (ISP) or application service provider (ASP) to host their Web site, including the databases used to initially record contributions and credit card receivables. In a number of cases, ISP/ASP servers provide fulfillment by allowing users to immediately download their contribution after credit approval for electronic documents. For clients that use outsourced services, auditors can sometimes obtain a report on controls from the service organization. According to SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324.24), as amended, the report would be either (1) reports on controls placed in operation, or (2) reports on controls placed in operation and tests of operating effectiveness.

Fraudulent Financial Reporting

.68 The recent highly publicized instances of fraudulent financial reporting serve as reminders to auditors of the need to remain alert to possible instances of fraudulent activity and to maintain an appropriate attitude of professional skepticism. Most fraud cases involve management fraud or deliberate deceit by management in working with their auditors.

.69 Not-for-profit organizations face mounting pressure to meet the expectations of “watch dog” groups that monitor the use of their resources. Moreover, the image of the not-for-profit organization has a significant effect on a donor’s willingness to contribute. Negative press can considerably decrease future contributions, the availability of volunteers, and public goodwill. Consequently, management of the not-for-profit organization may be subject to unusual pressure to report certain financial results. Such pressure could be a motivation for management to engage in fraudulent financial reporting. Also, significant fraud risk may exist not as an overstatement of operations, but rather as an intentional understatement of operations so that donors perceive a need to continue to give.

.70 Additional factors that not-for-profits confront are the use of ample numbers of volunteer workers who may not be properly trained or supervised; pressure to restrain managerial expenses, resulting in inadequate internal control; scores of locations at which contributions are collected; boards of directors who believe that those involved with the charity would not act in a deceptive manner; inexperienced accounting staff; and dependence on board members to help achieve needed goals and services, resulting in related-party transactions.

Auditing Guidance and Audit Issues

.71 Some of the more common audit issues identified in fraudulent financial reporting include:

1. A willingness by the auditor to accept management’s representations without corroboration
2. Allowing the client to unjustifiably influence the scope of auditing procedures
3. Failure to identify risky situations, or ignoring identified audit risks by not applying professional skepticism and revising auditing procedures appropriately

.72 Auditors need to consider such issues as part of their assessment of the risk of material misstatement due to fraud, as required by SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316).

.73 SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02), states that “the auditor has a responsibility to plan and perform the audit

to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.” That Statement establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit conducted in accordance with GAAS. Auditors also need to consider SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312), and SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317), for additional guidance on the consideration of fraud and illegal acts. Also, auditors should refer to SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), for additional guidance on professional skepticism. Because of the characteristics of fraud, the auditor’s exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence.

.74 Among other things, SAS No. 99:

- Describes the characteristics of fraud. The more the auditor knows about the nature of fraud, the better he or she will be equipped to identify risk factors, assess the risk of material misstatement due to fraud, and develop an appropriate audit response.
- Discusses the importance of exercising professional skepticism when considering the possibility that a material misstatement due to fraud could be present.
- Requires a discussion among engagement personnel regarding the risks of material misstatement due to fraud as part of planning the audit. The discussion among the audit team members should consider how and where the not-for-profit’s financial statements might be susceptible to material misstatement due to fraud and reinforce the importance of adopting an appropriate mindset of professional skepticism.
- Requires the auditor to gather information necessary to identify risks of material misstatements due to fraud by (1) inquiring of management and others within the NPO about the risks of fraud, (2) considering the results of analytical procedures performed in planning the audit, (3) considering fraud risk factors, and (4) considering certain other information.
- Requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud.
- Requires the auditor to evaluate the NPO’s programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation.
- Provides guidance on how the auditor responds to the results of the risk assessment by emphasizing that the auditor’s response should involve the application of professional skepticism when gathering and evaluating audit evidence. It also requires the auditor to respond to the results in three ways (AU sec. 316.50–.67).
- Requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment.
- Provides guidance regarding the auditor’s communications about fraud to management, the audit committee, and others.
- Provides examples of fraud risk factors that, if present, might indicate the presence of fraud.
- Requires the auditor to document evidence of the performance of the fraud risk assessment, including risk factors identified as being present and the auditor’s response to those risk factors.

Fraud Risk Factors

.75 The following are a few of the risk factors discussed in SAS No. 99 that may exist at a not-for-profit organization:

- Domination of management by a single person or small group without compensating controls, such as effective oversight by the board of directors or audit committee
- Inadequate monitoring of significant controls
- High turnover of senior management, counsel, or board members
- New accounting, statutory, or regulatory requirements that could impair the financial stability or profitability of the entity
- Large amounts of cash on hand or processed
- Lack of appropriate management oversight (for example, inadequate supervision or monitoring, or remote locations)
- Lack of appropriate segregation of duties or independent checks

.76 Regardless of when the auditor discovers fraud risk factors or other conditions related to the fraud risk assessment, the auditor should consider their effect on auditing procedures. The auditor should document the risk factors identified, as well as the auditor's response to the risk factors. The fraud risk factors and other conditions identified may cause the auditor to believe that the planned audit procedures are not sufficient to provide reasonable assurance that the financial statements are free from material misstatement. Accordingly, auditing procedures should be planned and performed to specifically address the identified risks.

Professional Skepticism

.77 Very importantly, auditors must maintain an appropriate attitude of professional skepticism. This means neither assuming that management is dishonest nor assuming unquestioned honesty; obtaining corroborating evidence for management representations; considering whether misstatements may be the result of fraud; and appropriately designing and performing auditing procedures to address fraud risk factors. The application of professional skepticism in response to the auditor's assessment of the risk of material misstatement due to fraud might include the following:

1. Increased sensitivity in the selection of the nature and extent of documentation to be examined in support of material transactions
2. Increased recognition of the need to corroborate management explanations or representations concerning material matters such as further analytical procedures, examination of documentation, or discussions with others within or outside the organization
3. The assignment of more senior or experienced personnel to plan and perform certain auditing procedures

Help Desk—For further information on fraud refer to the AICPA Practice Aid *Fraud Detection in a GAAS Audit*—SAS No. 99 Implementation Guide (product no. 006613kk).

Auditing Contributions Receivable

.78 Although contributions receivable are not required to be confirmed under SAS No. 67, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 330), auditors may nevertheless decide to request confirmation of contributions receivable. Auditors deciding to request confirmation of contributions receivable should consider requesting such confirmations more than just in the first year in situations where the contributions are large pledges and multi-year gifts. (Auditors should refer to SAS No. 67, for guidance about the confirmation process.) Many auditors confirm these types of contributions only in the first year and never again. Thus situations can arise where the contribution is not being properly reflected in subsequent years and the confirmation process would have revealed that. For example, an extension of the repayment terms may result in changes in the estimated fair value which can then lead to improper valuation if not reflected in the accounting records.

.79 Confirming recorded promises to give (contributions receivable) may help the auditor obtain additional evidence regarding the existence of the promise to give, the existence or absence of restrictions and conditions, and the periods over which the promises to give become due. This will provide additional evidence about recognition initially and for subsequent measurement of the contribution receivable. Remember that the fair value of contributions arising from unconditional promises to give cash and noncash assets may change because of (1) changes in the quantity or nature of assets expected to be received (such as in the amounts of future cash flows), (2) changes on the timing of assets expected to be received, and (3) changes in the expected fair value of underlying noncash assets. The confirmation process may help auditors address the financial statement assertions regarding contribution receivables.

.80 Initial confirms are used principally to provide evidence about the existence/occurrence assertion. Subsequent confirms can be used as an additional audit consideration to address completeness, valuation, and presentation and disclosure. In other words, subsequent confirmation procedures may help address changes that have occurred in the contribution receivable, whether collectibility is an issue, if any changes in the fair value of the underlying asset have occurred, and if amounts are appropriately reported in the financial statements. Readers should refer to the "Accounting Issues and Developments" section of this Alert for guidance on accounting for contribution receivables.

Common Engagement Deficiencies

.81 Following are some deficiencies commonly noted on not-for-profit engagements during recent peer reviews and AICPA Professional Ethics Division investigations of CPA firms. This list continues to include some of the deficiencies identified in the past, indicating continuing problems with the same matters. You should consider reviewing your firm's policies and procedures to see whether your not-for-profit engagements also might have these kinds of issues.

- Failure to identify a voluntary health and welfare organization as such.
- Incorrect classification of contributions as unrestricted, temporarily restricted, or permanently restricted.
- Failure to present a statement of cash flows (as required by Financial Accounting Standards Board [FASB] Statement of Financial Accounting Standards No. 117, *Financial Statements of Not-for-Profit Organizations*).
- Inadequate audit procedures to support the statement of functional expenses.
- Improper accounting for restricted funds.
- Inadequate format, titles, and presentation of financial statements.
- Failure to obtain sufficient evidence to substantiate the value of noncash gifts.

Auditor Association With Municipal Securities Disclosure Documents

.82 The new Audit and Accounting Guide *Audits of State and Local Governments (GASB 34 Edition)*, expands its discussion about situations in which an auditor becomes associated with an official statement or other offering document for the issuance of municipal securities and, thus, when the auditor should refer to SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550), as amended by SAS No. 98, *Omnibus Statement on Auditing Standards—2002*. Paragraph 16.06 in this Guide states that the auditor becomes associated with the official statement in any of the following situations:

- Assisting in preparing the financial information included in the official statement.
- Reviewing a draft of the official statement at the government's request.
- Manually signing the independent auditor's report included in the official statement.
- Providing a revised independent auditor's report for inclusion in a specific official statement.

- Issuing a comfort letter, the letter described in SAS No. 72, *Letters for Underwriters and Certain Other Requesting Parties* (AICPA, *Professional Standards*, vol. 1, AU sec. 634.09), as amended, or an attestation engagement report in lieu of a comfort or similar letter on information included in the official statement.
- Providing written agreement for the use of the independent auditor's report in the official statement.
- Issuing a report on an attestation engagement relating to the debt offering. (The new Guide includes a discussion on attestation engagements related to the issuance of municipal securities in paragraph 16.20).

.83 Additional information about these seven situations is included in the new Guide. As discussed in paragraphs 16.07 and 16.10 of the Guide, if the auditor is associated with an official statement the guidance in SAS No. 8 provides that the auditor has no obligation to perform any procedures to corroborate other information contained in those documents. However, the auditor should read the other information and consider whether that information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements. SAS No. 8 (AICPA, *Professional Standards*, vol. 1, AU sec. 550.04–.06), provides guidance if the auditor concludes there is a material inconsistency or a material misstatement of fact that is not a material inconsistency. Although an auditor is not required to become associated with a government's official statements except in the situations described in paragraph 16.06 of the Guide, some auditors include a provision in the engagement letter requiring the government to obtain permission from the auditor before using the independent auditor's report in the official statement. Such a provision establishes a requirement that the auditor become associated with the government's official statements when the government requests the required permission from the auditor.

.84 In a November 1994 amendment to rule 15c2-12, the SEC required municipal securities dealers to contract with issuers of municipal bonds for them to provide continuing disclosures at certain times for the life of the bond issue. (See the related discussion "Municipal Securities Disclosures" in the "Accounting Issues and Developments" section of this Alert). Continuing disclosures, or secondary market disclosure requirements, are made by issuers providing to nationally recognized municipal securities information repositories and state information repositories annual continuing disclosure documents and material events notices. Material events notices are required for 11 specific events, such as principal and interest payment delinquencies and nonpayment-related defaults. Material event notices are provided through a press release or other written notification on an "as needed" basis and do not involve financial statements.

.85 Paragraph 16.09 in the new Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition), states that the auditor is not required to participate in or undertake any procedures with respect to a government's continuing disclosure documents, even though they may include audited financial statements. A government's continuing disclosures are not required to be submitted to or disseminated from the distributing organizations as a single document. Thus, an auditor's association with other information encompassed by such disclosures cannot be clearly established. Therefore, the provisions of SAS No. 8 do not apply to documents that contain those disclosures. Any attention the auditor devotes to other information included with audited financial statements in continuing disclosure documents at the government's request should be considered a consulting engagement under the provisions of the AICPA Statement on Standards for Consulting Services No. 1, *Consulting Services: Definitions and Standards* (AICPA, *Professional Standards*, vol. 2, CS sec. 100).

SOP 98-3, Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards, Converted to a Guide

.86 Some auditors have been unaware that SOP 98-3, *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*, is updated annually for conforming changes, including changes resulting from last year's two Yellow Book amendments. To better serve practitioners and increase awareness

of the changes made every year to the guidance, SOP 98-3 has been converted to an audit guide and will be available in the third quarter of 2003. Auditors should consider obtaining the newly issued guide inasmuch as significant changes have been made to the guidance since SOP 98-3 was issued. The newly issued guide will continue to be revised annually to keep it up-to-date for changes in the Yellow Book, single audit literature and processes, and Statements on Auditing Standards.

Accounting Issues and Developments

Split Interest Agreements

.87 Some NPOs have entered into split interest agreements that promised beneficiaries payout rates that are higher than the rates the NPOs are currently earning on their investments. For example, in the 1990s, NPOs may have entered into agreements promising to pay returns of 8 percent to 10 percent, and now the NPOs are earning 2 percent to 3 percent (or less) on the underlying investments. The current market conditions have implications for both accounting and donor relations.

.88 NPOs that did not lock-in returns on investments adequate to fund those obligations to third-party beneficiaries (that is, equal to or exceeding the discount rate used to compute the fair value of the liability) may face the following issues:

- For charitable gift annuities held as general assets and obligations of the NPO, the NPO is in effect incurring economic losses each period in which the interest rate earned is below the initial discount rate. Those losses are not reflected in the financial statements, however, because the interest rate used to discount the liability to the donor is not adjusted to reflect current market conditions. NPOs should consider disclosing such circumstances.
- For annuity trust agreements, continuing to pay a rate greater than is earned raises the possibility that trust assets may be depleted to the extent that at a future date there will be insufficient assets to fund obligations to income beneficiaries. In such circumstances, the trust may eventually have to cease making the payments. Publicity about such conditions and risks, which may not have been clarified in the solicitation or afterwards, could adversely affect the NPO's ability to raise contributions in the future. NPOs should consider disclosing such circumstances. The concern about depleting assets to the extent that payments cease would not apply to typical pooled-life income funds because beneficiaries receive only the income earned on the trust. It also would not apply to unitrusts because the payment amount changes annually as the fair value of the unitrust assets changes.

Even though unitrusts and pooled-life income funds may not be depleted to the extent that payments cease, the current market conditions may have significantly reduced the income of pooled income funds or the fair value of assets in charitable unitrusts. As a result, the payments to beneficiaries also may have been significantly reduced. NPOs that do not inform beneficiaries about the impact of market conditions on the amount of their distributions before the decreases in payments occur may face problems of donor alienation. The effects of potential donor alienation on future gifts should be considered.

Classification of Net Assets in Consolidation

.89 When the net assets of two or more NPOs are combined into a single set of financial statements—for example as a beneficiary and financially interrelated recipient organization, as parent and subsidiary, or as brother and sister under common control, special consideration should be given to the classification of net assets. To illustrate, assume a parent NPO has NPO subsidiaries. In the subsidiary's separately issued financial statements, certain net assets may be reported as unrestricted because the use of the contributed asset is no more specific than broad limits resulting from the nature of the organization, the environment in which it operates, and the purposes specified in the organization's articles of corporations or bylaws (or comparable documents for an unincorporated association). In the consolidated financial statements, however,

the unrestricted net assets of the subsidiary arising from contributions (or investment income on donor-restricted endowment funds) should be reported as temporarily restricted net assets if in fact their use is more specific than broad limits resulting from the nature of the parent organization, the environment in which it operates, and so on.

.90 Example: A membership association (Parent) has an educational subsidiary whose mission is to provide scholarships. Donors make unrestricted contributions to the educational subsidiary with the intent that the subsidiary use the contributions to support its mission, including granting scholarships, and incurring fund-raising and general and administrative expenses. The gifts to the educational subsidiary are therefore classified as increases in unrestricted net assets, but if the educational subsidiary's financial statements are consolidated with the membership association (Parent), the classification of the net assets of the subsidiary should be adjusted to reflect that they are donor-restricted net assets from the perspective of the Parent's consolidated financial statements. The unrestricted net assets of the educational subsidiary resulting from contributions (or investment income on donor-restricted endowment funds) should therefore be reported as temporarily restricted net assets in the Parent's consolidated financial statements.

.91 In summary, if the net assets or results of operations of an organization with a narrow mission are combined (via consolidation, combination, or equity method accounting) with the net assets of an organization with a broader mission, the classification of the net assets of the organization with the narrower mission may need to be adjusted to reflect donor-imposed restrictions if the source of the net assets was contributions (or investment income on donor-restricted endowment funds). The classification of the unrestricted net assets of the organization with the narrower mission would not be adjusted if those net assets arose from exchange transactions, such as fees or ticket sales.

Municipal Securities Disclosures

.92 Issuers of municipal bonds, including not-for-profit health care organizations that are conduit issuers of municipal bonds, are exempt from the registration and reporting requirements of the federal securities laws. However, they are not exempt from antifraud provisions of the federal securities laws, which forbid making misleading statements in, or omitting material facts from, disclosures made in official statements and annual financial filings and other statements speaking to the market. Briefly, the antifraud provisions apply to a municipal issuer whenever it releases information to the public that is reasonably expected to reach investors and the trading markets. If a statement is made reaching markets or investors, the antifraud provisions apply, regardless of whether the statement is made on paper or delivered electronically. The SEC Interpretive Release *Use of Electronic Media* provides interpretive guidance to corporate and municipal issuers on how securities fraud laws apply to such matters as the electronic delivery of documents and electronic disclosure.

.93 The principal sources of SEC guidance on the operation of the municipal disclosures framework and application of the antifraud provisions are (1) SEC releases, including the March 1994 SEC Interpretive Release No. 34-33741, *Statement of the Commission Regarding Disclosure Obligations of Municipal Securities Issuers and Others*, and SEC Release No. 34-34961, *Secondary Market Disclosure*, an amendment to Rule 15c2-12 issued in November 1994; and (2) SEC enforcement actions in the municipal sector involving the antifraud provisions. As of writing this Alert, there were no recent releases from the SEC relating to the municipal securities market.

.94 For additional information on the SEC and municipal securities developments, see the SEC Web site, www.sec.gov. This site includes a page providing a shortcut to information on the SEC Web site for municipal issuers and other participants in the municipal securities markets.

.95 See the related discussion "Auditor Association With Municipal Securities Disclosure Documents" in the "Audit and Attestation Issues and Developments" section of this Alert.

Losses on the Investments of Donor-Restricted Endowment Funds

.96 Many not-for-profit organizations have endowment funds that are commingled and invested as a pool. The funds combined in that pool are usually a mix of true endowments, term endowments, and quasi-endowment funds (also sometimes called funds functioning as endowment.) Questions have arisen as to how the losses on the investments of the pool should be classified.

.97 Paragraphs 11, 12, and 15(d) of FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*, state that:

A donor's stipulation that requires a gift to be invested in perpetuity or for a specified term creates a donor-restricted endowment fund. Unless gains and losses are temporarily or permanently restricted by a donor's explicit stipulation or by a law that extends a donor's restriction to them, gains and losses on investments are changes in unrestricted net assets. For example, if a donor states that a specific investment security must be held in perpetuity, the gains and losses on that security are subject to that same permanent restriction unless the donor specifies otherwise. However, if a donor allows the organization to choose suitable investments, the gains are not permanently restricted unless the donor or the law requires an amount be retained permanently. Instead, those gains are unrestricted if the investment income is unrestricted or are temporarily restricted if the investment income is temporarily restricted by the donor.

In the absence of donor stipulations or law to the contrary, losses on the investments of a donor restricted endowment fund shall reduce temporarily restricted net assets to the extent that donor-imposed temporary restrictions on net appreciation of the fund have not been met before the loss occurs. Any remaining loss shall reduce unrestricted net assets.

For each period in which a statement of financial position is presented, a not-for-profit organization shall disclose the aggregate amount of the deficiencies for all donor-restricted endowment funds for which the fair value of the assets at the reporting date is less than the level required by donor stipulations or law.

.98 To determine how the losses on an investment pool should be classified, an organization should look to the restrictions on the individual funds that constitute the pool rather than to the aggregate of all investments in the pool. The loss on the pool assets is unitized and allocated to each individual fund. Then the donor restrictions on the net assets of the individual funds (or the lack of donor restrictions) determine the classification of that fund's loss.

.99 *Example:* Assume an organization has pooled the investments of three donor-restricted endowment funds and one quasi-endowment fund. The quasi-endowment fund was established by the governing board using unrestricted net assets. The investments in the pool have a fair value of \$1,575,000, and there are 1,575 units with a value of \$1,000 each.

.100 The first donor-restricted endowment fund (Fund 1) is very old—it owns 1,000 units with a fair value of \$1,000,000—\$100,000 of permanently restricted net assets, \$350,000 of temporarily restricted net assets, and \$550,000 of unrestricted net assets. The second donor-restricted endowment fund (Fund 2) is just a few years old. It owns 50 units with a fair value of \$50,000—\$40,000 of permanently restricted net assets, \$2,000 of temporarily restricted net assets, and \$8,000 of unrestricted net assets. The third donor-restricted endowment fund (Fund 3) is new—it owns 25 units with a fair value of \$25,000—\$25,000 of permanently restricted net assets. The gift agreements that established the donor-restricted endowment funds do not have stipulations about what should be done if the fund suffers a loss. The quasi-endowment fund (Fund 4) owns 500 units with a fair value of \$500,000, all of which is unrestricted.

.101 The market value of the investments of the pool falls to \$1,417,500, or a loss of \$157,500. How should that loss be classified?

.102 Each unit is now worth \$900 (\$1,417,500/1,575), for a loss of \$100 per unit. As a result, Fund 1 has a fair value of \$900,000 and a loss of \$100,000. Fund 1's loss of \$100,000 reduces temporarily restricted net assets by \$100,000 because Fund 1 had temporarily restricted net assets of \$350,000 before the loss occurred.

.103 Fund 2 has a fair value of \$45,000 and a loss of \$5,000. Fund 2's loss reduces temporarily restricted net assets by \$2,000 and unrestricted net assets by \$3,000. The loss reduces the net appreciation of the fund from prior years that were classified as temporarily restricted net assets until those net assets are entirely depleted, then it reduces the net appreciation that was classified as unrestricted net assets.

.104 Fund 3 has a fair value of \$22,500 and a loss of \$2,500. Fund 3's loss reduces unrestricted net assets by \$2,500 because the fund had no temporarily restricted net assets. Although the fund has no net appreciation from prior years, the loss does not reduce the permanently restricted net assets. FASB Statement No. 124 requires losses to be classified as decreases in unrestricted net assets unless there is a donor's explicit stipulation or a law that extends a donor's stipulation to the loss.

.105 Fund 4 has a fair value of \$450,000 and a loss of \$50,000. Fund 4's loss of \$50,000 reduces unrestricted net assets because the entire fund was free of donor restrictions.

.106 Thus, the \$157,500 loss on the investments of the pool is classified as a decrease in temporarily restricted net assets of \$102,000 and a decrease in unrestricted net assets of \$55,500. The temporarily restricted net assets of Fund 1 cannot be used to absorb the losses in Funds 2, 3, or 4.

.107 The organization should disclose that the aggregate deficiency for all donor-restricted endowment funds is \$2,500, which is the amount by which the fair value of Fund 3's assets (\$22,500) is less than the amount it should maintain permanently (\$25,000). Funds 1 and 2 have values greater than the amount they are required to keep permanently.

.108 If the market recovers and the fair value of the investments increases after the end of the fiscal year, paragraph 13 of FASB Statement No. 124 says:

If losses reduce the assets of a donor-restricted endowment fund below the level required by the donor stipulations or law,⁴ gains that restore the fair value of the assets of the endowment fund to the required level shall be classified as increases in unrestricted net assets.

⁴ Donors that create endowment funds can require that their gifts be invested in perpetuity or for a specified term. Some donors may require that a portion of income, gains, or both be added to the gift and invested subject to similar restrictions. It is generally understood that at least the amount of the original gift(s) and any required accumulations is not expendable, although the value of the investments purchased may occasionally fall below that amount. Future appreciation of the investments generally restores the value to the required level. In states that have enacted its provisions, the Uniform Management of Institutions Funds Act describes "historic dollar value" as the amount that is not expendable.

.109 Because the fair value of Fund 3 is \$2,500 less than the amount that should be maintained permanently, the first \$2,500 of gains earned by Fund 3 are classified as an increase in unrestricted net assets. Any additional gains are classified as permanently restricted, temporarily restricted, or unrestricted in accordance with the donor stipulations.

.110 Auditors should test the allocation of losses to individual endowment funds. The classification of the loss within the individual endowment fund depends on the amount of net appreciation of the fund in prior years and the classification of that net appreciation in accordance with explicit donor restrictions or a law

that extends the donor restrictions to the net appreciation. (In many states, the Uniform Management of Institutional Funds Act, as adopted, provides the relevant law.) Auditors should review gift instruments and state law to determine the amount of the fund that should be permanently retained and consider whether losses, if any, reduce the fair value of the assets of the fund to an amount that is less than that permanent amount. A loss first reduces the temporarily restricted net appreciation of the fund until it is entirely depleted, then it reduces the unrestricted net appreciation of the fund. If there is no net appreciation in the fund from prior years or if the loss exceeds the net appreciation from prior years, the loss reduces unrestricted net assets. The deficits for all donor-restricted endowment funds for which the fair value of the assets at the reporting date is less than the level required by donor stipulations or law should be disclosed by the organization in its financial statements.

.111 The classification of losses on the investments of a pool is complex and time-consuming. Both organizations and their auditors should allow adequate time to perform necessary procedures properly.

Accounting for Cash Contributions Receivable

.112 Auditors should be reminded that contributions revenue should be measured at the fair value (using quoted market prices if available) of the assets or services received or promised or at the fair value of liabilities satisfied. But, net realizable value may be used when the contributions arise from unconditional promises to give and are expected to be collected within one year of the financial statement date.

.113 The fair value of contributions arising from unconditional promises to give cash should be determined based on the present value of the estimated future cash flows. For example, initial recognition of an unconditional promise to give cash of \$1,000 that is expected to be collected in five years should be measured and reported as follows. First the NPO should determine the estimated future cash flows from the promise to give cash. The not-for-profit should consider when the receivable is expected to be collected, the creditworthiness of the other parties, the organization's past collection history and its policies in connection with the enforcement of promises to give, and other factors concerning the receivable's collectibility in determining the estimated future cash flows. In this case we will use \$700 as the estimated future cash flows from the promise. (Note that the organization does not report bad debt expense of \$300—the difference between the \$1,000 promised and the \$700 expected to be collected.) Then the NPO should determine the present value of the estimated future cash flows which should be measured using a risk-free rate of return appropriate for the expected term of the promise to give. The amount to be discounted is considered to be free from credit risk since the donor's credit rating and other factors affecting the donor's ability to honor the promise to give would be considered already in determining the estimated future cash flows of unconditional promises to give cash. In conformity with paragraph 12 of Accounting Principles Board (APB) Opinion No. 21, *Interest on Receivables and Payables*, the discount rate should be determined at the time the unconditional promise to give is initially recognized and should not be revised subsequently.

.114 Some donors extend payment terms longer than what was called for in original gifts. More often than not, the NPO has not updated the accounting or calculations for discounted future amounts to reflect longer terms or, in extreme cases, revising uncollectible amounts. Auditors should consider subsequent measurement of unconditional promises to give cash and noncash assets because the fair value of the contributions may change if the following conditions occur: (1) changes in the quantity or nature of assets expected to be received, such as changes in the amounts of future cash flows, and (2) changes in the timing of assets expected to be received. Readers should refer to footnote 25 of paragraph 5.70 of the Audit and Accounting Guide *Not-for-Profit Organizations*, since the Guide does not address changes in the timing of assets expected to be received. Since in the current environment we are more concerned with losses we will discuss only losses here. Decreases due to changes in the quantity or nature of assets expected to be received should be recognized in the period(s) in which the expectation changes. Those decreases should be reported as expenses or losses (bad debt) in the net assets class in which the net assets are represented. Decreases in contributions because of changes in the amounts of assets expected to be received should be reported as losses if they are decreases in temporarily restricted net assets or permanently restricted net assets.

Functional Classifications of the Costs of Soliciting Exchange Transactions

.115 Management and general activities are defined as those activities that are not identifiable with a single program, fund-raising activity, or membership-development activity but that are indispensable to the conduct of those activities and to an organization's existence. Among other activities, they include soliciting revenue from exchange transactions, such as government contracts and related administrative activities. Costs of soliciting funds other than contributions, including exchange transactions (whether program-related or not), should be classified as management and general expenses.

Accounting for Fund-Raising Costs

.116 Fund-raising costs, including the cost of special fund-raising events, are incurred to induce donors to make contributions to an organization and should be expensed as incurred. Incurred is defined as when the item or service has been received. Fund-raising costs incurred in one period, such as those made to obtain bequests, compile a mailing list of prospective contributors, or solicit contributions in a direct-response activity, may result in contributions that will be received in future periods but still should be expensed as incurred. For example, fund-raising materials, such as brochures, sitting in a warehouse should be expensed even though they have not yet been mailed. Also included as an expense when incurred are any salaries or consulting fees to develop the brochures.

Derivative Accounting and Split Interest Agreements

.117 Under FASB Derivatives Implementation Group (DIG) Issue B35, many split interest agreements will require bifurcation and derivative accounting. For lead interest agreements in particular, in circumstances in which the NPO has a liability to a beneficiary, even if the lead interest is a fixed payment, as long as the liability is variable and the agreement is period certain, it will qualify as a derivative. This is because the liability to the third party will usually vary based on the fair value of investments.

Required Detailed Disclosures Concerning Contributions of Services

.118 As a reminder, the following disclosures should be included in the notes to the financial statements concerning contributions of services received during the period: (1) the nature and extent of contributed services received by the organization; (2) a description of the programs or activities for which the services were used; and (3) the amount of contributed services recognized during the period. NPOs are also encouraged, if practicable, to report in the notes to the financial statements the fair value of contributed services received but not recognized.

Lapsing of Restrictions in Circumstances in Which Both Time and Purpose Restrictions Exist

.119 In circumstances in which both donor-imposed purpose and donor-imposed time restrictions exist, expenditures meeting the purpose restriction should be made simultaneously with or after the time restriction has expired in order to satisfy both the purpose and time restrictions and result in a reclassification of net assets from temporarily restricted to unrestricted. In other words, donor-imposed time restrictions, if any, must be met before expenditures can result in purpose restrictions being met. Paragraph 150 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, provides that "the [FASB] believes that it is reasonable to assume that by specifying future payment dates donors indicate that their gift is to support activities in each period in which a payment is scheduled". The AICPA staff is considering developing a Technical Practice Aid (TPA) to address this issue. Readers may refer to FASB Statement No. 116, footnote 5 and paragraph 150, for additional guidance.

TPA 6140.12, *Nondiscretionary Assistance Programs*

.120 The AICPA Accounting Standards team recently released another nonauthoritative question and answer (Q&A), commonly referred to as a TPA, pertaining to not-for-profit organizations. TPA 6140.12,

Nondiscretionary Assistance Programs, has been posted to the AICPA Web site at www.aicpa.org/members/div/acctstd/general/tpafin4.htm. It will also be included in the next update of the AICPA publication titled *Technical Practice Aids*, copies of which are available through the AICPA order department at (888) 777-7077. AICPA members with questions on these TPAs should call the AICPA's Technical Hotline, which provides nonauthoritative guidance on accounting and attest issues, at (888) 777-7077.

Auditing and Attestation Pronouncements and Guidance Update

.121 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

SOP 02-1	<i>Performing Agreed-Upon Procedures Engagements That Address Annual Claims Prompt Payment Reports as Required by the New Jersey Administrative Code</i>
SSAE No. 12	<i>Amendment to Statement on Standards for Attestation Engagements No. 10, Attestation Standards: Revision and Recodification</i>

SAS No. 101, Auditing Fair Value Measurements and Disclosures

.123 The Auditing Standards Board issued SAS No. 101, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1, AU sec. 328), in January 2003 to establish standards and provide guidance on auditing fair value measurements and disclosures contained in financial statements. In particular, it addresses audit considerations relating to the measurement and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. Fair value measurements of assets, liabilities, and components of equity may arise from both the initial recording of transactions and later changes in value. Changes in fair value measurements that occur over time may be treated in different ways under generally accepted accounting principles (GAAP). For example, GAAP may require that some fair value changes be reflected in net income and that other fair value changes be reflected in other comprehensive income and equity. Of course, in not-for-profit organizations, all changes are included in the change in net assets for the period.

.124 While SAS No. 101 provides guidance on auditing fair value measurements and disclosures, evidence obtained from other audit procedures also may provide evidence relevant to the measurement and disclosure of fair values. For example, inspection procedures to verify existence of an asset measured at fair value also may provide relevant evidence about its valuation, such as the physical condition of the asset. Refer to the Statement for effective date information.

New Auditing Interpretations

.125 Auditing Interpretations are issued by the Auditing Issues Task Force of the Auditing Standards Board (ASB) to provide timely guidance on the application of ASB pronouncements. Interpretations are reviewed by the ASB but are not as authoritative as ASB statements. Nevertheless, a departure from an Interpretation may have to be justified if the quality of a member's work is questioned. Interpretations become effective upon their publication in the *Journal of Accountancy*.

.126 The new Interpretations listed below are available on the AICPA Web site at www.aicpa.org/members/div/auditstd/announce/index.htm.

Interpretation No. 12, "The Effect on the Auditor's Report of an Entity's Adoption of a New Accounting Standard That Does Not Require the Entity to Disclose the Effect of the Changes in the Year of Adoption," of SAS No. 1, section 420, *Consistency of Application of Generally Accepted Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 9420).

Interpretation No. 15, "Reporting as Successor Auditor When Prior-Period Audited Financial Statements Were Audited by a Predecessor Auditor Who Has Ceased Operations," of SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508).

Interpretation No. 2, "The Effect of an Inability to Obtain Evidential Matter Relating to Income Tax Accruals," of SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 9326).

Interpretation No. 16, "Effect on Auditor's Report of Omission of Schedule of Investments by Investment Partnerships That Are Exempt From Securities and Exchange Commission Registration Under the Investment Company Act of 1940," of SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 9508).

Accounting Pronouncements and Guidance Update

.127 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities

.128 The FASB issued its Statement No. 149 in April 2003, which amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives) and for hedging activities under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. Refer to the Statement for effective date information.

FASB Interpretation No. 46, Consolidation of Variable Interest Entities

.129 This Interpretation of Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, addresses consolidation by business enterprises of variable interest entities,⁵ which have one or both of the following characteristics:

1. The equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support from other parties, which is provided through other interests that will absorb some or all of the expected losses of the entity.
2. The equity investors lack one or more of the following essential characteristics of a controlling financial interest:
 - a. The direct or indirect ability to make decisions about the entity's activities through voting rights or similar rights
 - b. The obligation to absorb the expected losses of the entity if they occur, which makes it possible for the entity to finance its activities
 - c. The right to receive the expected residual returns of the entity if they occur, which is the compensation for the risk of absorbing the expected losses

.130 Not-for-profit organizations subject to the consolidation requirements of SOP 94-3, *Reporting of Related Entities by Not-for-Profit Organizations*, are not subject to FASB Interpretation No. 46, except that they may be related parties for purposes of applying paragraphs 16 and 17 of the Interpretation. In addition, a not-for-profit entity used by a business enterprise in a manner similar to a variable interest entity in an effort to circumvent the provisions FASB Interpretation No. 46 is subject to the Interpretation. Readers should refer to the Interpretation for additional exceptions to the scope of this Interpretation and for the effective date information.

SOP 02-2, Accounting for Derivative Instruments and Hedging Activities by Not-for-Profit Health Care Organizations, and Clarification of the Performance Indicator

.131 This SOP amends the AICPA Audit and Accounting Guide *Health Care Organizations* (Guide), to address how nongovernmental not-for-profit health care organizations should report gains or losses on hedging

⁵ The exposure draft that preceded this Interpretation referred to the entities subject to its requirements as special-purpose entities (SPEs). Because some entities that have been commonly referred to as SPEs may not be subject to this Interpretation and other entities that have not commonly been referred to as SPEs may be subject to this Interpretation, the Financial Accounting Standards Board decided to use the term *variable interest entity*.

and nonhedging derivative instruments under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended. This SOP requires the following:

- Not-for-profit health care organizations should apply the provisions of FASB Statement No. 133 (including the provisions pertaining to cash flow hedge accounting) in the same manner as for-profit enterprises.
- Not-for-profit health care organizations should provide all the disclosures required by paragraph 45 of FASB Statement No. 133, including disclosures related to reclassifications into earnings of gains and losses that are reported in accumulated other comprehensive income. Although those organizations are not otherwise required to report changes in the components of comprehensive income pursuant to paragraph 26 of FASB Statement No. 130, *Reporting Comprehensive Income*, such organizations should separately disclose the beginning and ending accumulated derivative gain or loss that has been excluded from the performance indicator (earnings measure), the related net change associated with current period hedging transactions, and the net amount of any reclassifications into the performance indicator in a manner similar to that described in paragraph 47 of FASB Statement No. 133.

.132 The SOP also amends the Guide to clarify that the performance indicator (earnings measure) reported by not-for-profit health care organizations is analogous to income from continuing operations of a for-profit enterprise. Refer to the Statement for effective date information.

Upcoming Q&As on FASB Statement No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*

.133 The Accounting Standards Team of the AICPA is releasing question and answer guidance about key FASB Statement No. 136 issues. These Q&As will be posted to the AICPA Web site in June and will be incorporated into the AICPA TPAs afterwards. Readers should be alert to the issuance of this guidance.

On the Horizon

.134 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that are especially relevant to the NPO industry. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.135 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft.

<i>Standard Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
FASB	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft email list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

New Framework for the Audit Process

.136 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB has issued a series of exposure drafts in early 2003. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "Expectation Gap" standards were issued in 1988.

.137 Some of the more important changes to the standards that have been proposed are the following:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to the assessment of the risk of material misstatement of the financial statements (Among other things, this will improve the auditor's assessment of inherent risk and eliminate the "default" to assess inherent risk at the maximum.)
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures

These changes collectively are intended to improve the guidance on how the auditor operationalizes the audit risk model.

.138 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Combinations of Not-for-Profit Organizations

.139 In November 1999, the FASB affirmed its earlier decision to undertake a project on combinations of NPOs that is separate from its business combinations project. As a result of that decision, combinations of NPOs are excluded from the scope of FASB Statement No. 141, *Business Combinations*. The FASB also agreed to delay the effective date of FASB Statement No. 142, *Goodwill and Other Intangible Assets*, as it applies to combinations of NPOs, until the FASB addresses the issues related to such combinations.

.140 The objective of this project is to develop guidance on the accounting and reporting for combinations of NPOs. As of the March 17, 2003 meeting, the FASB completed its deliberations related to the following issues:

- The method of accounting for combinations of NPOs
- The criteria to be used to identify the acquiring NPO
- Recognition of goodwill subsequent to acquisition
- Recognition of goodwill at date of acquisition
- The disclosures required by NPOs
- The effective date and transition method to be applied by NPOs

.141 For a tentative summary of the decisions reached by the Board so far on the combinations of NPO organizations go to www.fasb.org and into project updates. An exposure draft is planned for the third quarter of 2003. Readers should be alert for the issuance of a final Statement.

.142 Readers should also be aware of the ongoing work by the FASB on its consolidation project. On February 23, 1999, the FASB released an exposure draft (revised) of a proposed FASB Statement, *Consolidated Financial Statements: Purpose and Policy*, which would supersede FASB Statement No. 94 and amend ARB No. 51, APB Opinion Nos. 16 and 18, and FASB Statement Nos. 15, 57, and 65. The provisions of SOP 94-3 will be reconsidered as the FASB issues final standards. In the meantime, readers should be alert to the fact that NPOs continue to be covered by SOP 94-3 in this area. In January 2003, the FASB issued FASB Interpretation No. 46, *Consolidation of Variable Interest Entities*. The FASB now plans to continue its consideration of the broader proposals in the 1999 exposure draft.

Emerging Issues Task Force Discussion on Other-Than-Temporary Impairment

.143 The Emerging Issues Task Force (EITF) of the FASB discussed proposed guidance for assessing other-than-temporary impairment at the March 20, 2003 EITF meeting. This proposed guidance would apply to investments accounted for under the cost method or the equity method, investments classified as either available-for-sale or held-to-maturity under FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (including individual securities and mutual funds), and investments accounted for under FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*. The guidance would not apply to investments within the scope of EITF Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets." The proposed guidance is expected to address the following: (1) determination as to whether an investment is impaired, (2) determination as to whether an impairment is other-than-temporary, and (3) recognizing an impairment loss equal to the difference between the investment's carrying amount and its fair value (measured as of the date of the financial statements). Additional discussion is anticipated at a future EITF meeting. Readers should be alert to any final consensus reached on this issue.

Proposed FASB Staff Position, *Applicability of FASB Interpretation No. 46, Consolidation of Variable Interest Entities, to Entities Subject to the AICPA Audit and Accounting Guide Health Care Organizations*

.144 The FASB has issued a proposed FASB Staff Position (FSP) on FASB Interpretation No. 46. The FSP addresses whether health care NPOs should follow FASB Interpretation No. 46. Paragraph 4(a) of the Interpretation provides an exception for not-for-profit organizations subject to SOP 94-3. Not-for-profit organizations subject to the AICPA Audit and Accounting Guide *Health Care Organizations* (Audit Guide), are not subject to SOP 94-3. The FSP is expected to answer the question "Do the requirements of FASB Interpretation No. 46 apply to those organizations?" The FSP states that all not-for-profit organizations are excluded from FASB Interpretation No. 46, including health care organizations subject to the Audit Guide. However, a not-for-profit entity used by a business enterprise in a manner similar to a variable interest entity in an effort to circumvent the provisions of FASB Interpretation No. 46 is subject to the Interpretation. Readers should be alert to any final issuance.

AICPA Audit and Accounting Products and Services

AICPA

Web Site

.145 AICPA Online (www.aicpa.org) is the AICPA's Web site on the Internet. The site offers users the opportunity to stay abreast of developments in accounting and auditing. Online resources include professional news, membership information, state and federal legislative updates, AICPA press releases, speeches, exposure drafts, and a list of links to other accounting- and finance-related sites. The AICPA Web site also features a "Talk to Us" section, allowing users to send e-mail messages directly to AICPA representatives or teams. The AICPA Web site includes a separate section that deals with Circular A-133 audit issues, including a document that provides unofficial answers to frequently asked questions, at www.aicpa.org/belt/a133main.htm.

Order Department (Customer Service Center)

.146 To order AICPA products, call the Customer Service Center at (888) 777-7077 or fax to (800) 362-5066. The best times to call are 8:30 a.m. to 11:30 a.m. and 2:00 p.m. to 7:30 p.m., Eastern Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Industry Conference

.147 The AICPA will hold its Ninth Annual Not-for-Profit Organizations Industry Conference on June 12–13, 2003 (with preconference workshops on June 11), in Washington, D.C. The conference is designed for both practitioners and not-for-profit organization financial executives, and will provide technical information for those decision makers. Also coming up is the AICPA Governmental and Not-for-Profit Training Program on October 20–22, 2003 in Baltimore, MD and the AICPA Not-for-Profit Financial Leaders Forum on November 20–21, 2003, in San Francisco, CA. For further information, call the AICPA CPE Conference Hotline at (888) 777-7077 or visit the AICPA Web site at www.aicpa.org.

Accounting and Auditing Technical Hotline

.148 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.149 The AICPA Professional Ethics Team answers inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Continuing Professional Education Courses

.150 The AICPA offers many continuing professional education (CPE) courses related to NPOs, many of them available for both group study and self-study. Among the available titles are the following:

- Accounting and Reporting Practices of Nonprofit Organizations (product no. 743269kk)
- Form 990: AICPA's Answer to Unlocking the Tax Complexities (product no. 731053kk)
- Advanced Accounting and Auditing Problems for NPOs (product no. 730127kk)
- Advanced Auditing of HUD-Assisted Projects (product no. 730187kk)
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 730197kk)
- Audits of HUD-Assisted Projects (product no. 730292kk)
- Analytical Procedures for Nonprofit Organizations (product no. 730211kk)
- Cost Allocation Methods for Not-for-Profit Organizations (product no. 730411kk)
- Managing Nonprofit Organizations Like a Business (product no. 730342kk)
- NEW EDITION! Nonprofit Accounting and Auditing Update (2002–2003 Edition) (available in text [product no. 732066kk] and video [product no. 182065kk])
- Nonprofit Auditing: Auditing Financial Results and Compliance Requirements (product no. 737052kk)
- Tax Mysteries of Private Foundations (product no. 732242kk)
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations (product no. 734405kk)

- Getting Started with Not-for-Profit Organization Tax Issues (product no. 733803kk)
- Nonprofit Organizations Guide to Advanced Tax Planning (product no. 736763kk)
- Using the AICPA Audit and Accounting Guide *Not-for-Profit Organizations*
- Workpaper Techniques for Government and Nonprofit Organizations (product no. 732630kk)
- The Revised Yellow Book: Government Auditing Standards (product no. 736110kk)
- Using Competition for Performance Improvement: A Resource for Practitioners Advising Governments and Not-for-Profits (product no. 056507kk)

For more information about AICPA CPE courses, call the AICPA (Member Satisfaction) at (888) 777-7077 or visit the AICPA Web site at www.aicpa.org.

Online CPE

.151 AICPA InfoBytes, offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. Selected as one of *Accounting Today's* top 100 products for 2003, AICPA InfoBytes now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay \$149 (\$369 nonmembers) for a new subscription and \$119 (\$319 nonmembers) for the annual renewal. Divided into one- and two-credit courses that are available 24/7, AICPA InfoBytes offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com/infobytes.

Not-for-Profit Organizations Checklists

.152 The AICPA Accounting and Auditing Publications Team publishes *Checklists and Illustrative Financial Statements for Not-for-Profit Organizations* (product no. 008983kk), a nonauthoritative publication designed to help those preparing reports and financial statements of NPOs.

Practice Aids

.153 *Financial Statement Presentation and Disclosure Practices for Not-for-Profit Organizations* is a comprehensive Practice Aid (product no. 006605kk) that illustrates a wide variety of financial statement formats and disclosures for NPOs.

.154 *Auditing Recipients of Federal Awards: Practical Guidance for Applying OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*, is a two-volume set (product no. 006602kk) containing comprehensive analyses of the OMB's revisions to its Circulars for performing single audits, numerous checklists, and illustrative examples, and an illustrative case study of the single audit process.

.155 *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (product no. 006613kk), is a Practice Aid that provides CPAs with the most recent information related to the implementation of SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*.

Technical Practice Aids

.156 *AICPA Technical Practice Aids* includes questions received by the AICPA Technical Hotline on various subjects and the responses to those questions. Sections 6140 and 6960 of *Technical Practice Aids* include questions and answers specifically pertaining to NPOs. *Technical Practice Aids* is available both as a subscription service (product no. G01013kk) and in paperback form (product no. 005142kk).

Help Desk—AICPA publications can be obtained by calling the AICPA Order Department (Member Satisfaction) at (888) 777-7077, or faxing a request to (800) 362-5066.

References for Additional Guidance

General Accounting Office

.157 The General Accounting Office (GAO) home page, on the Internet at www.gao.gov, contains links to hundreds of reports and testimony made before Congress each year on a variety of subjects, including accounting, budgeting, and financial management. Hard copies of GAO reports and testimony can be obtained from the GAO, P.O. Box 37050, Washington, DC 20013; phone (202) 512-6000; fax (202) 512-6061; or www.gao.gov/cgi-bin/ordtab.pl.

.158 GAO's Web site is updated daily and also includes Comptroller General decisions and legal opinions; GAO policy documents; and special publications. You may subscribe to GAO daily electronic alerts using the form at www.gao.gov/subtest/subscribe.html.

.159 The following publications are available on the GAO Web site at www.gao.gov/govaud/ybk01.htm. The first three publications also are available through the Superintendent of Documents, U.S. Government Printing Office (GPO), P.O. Box 371954, Pittsburgh, PA 15250-7954; phone (202) 512-1800; fax (202) 512-2250; or bookstore.gpo.gov/index.html.

- *Government Auditing Standards, 1994 Revision*—These standards relate to financial and performance audits of governmental organizations, programs, activities, and functions, and of governmental funds received by contractors, nonprofit organizations, and other nongovernmental organizations. (GPO Stock No. 020-000-00-265-4) There also is a codification of the 1994 standards that includes the Government Auditing Standards Amendments on the GAO Web site.
- *Government Auditing Standards: Amendment No. 1, Documentation Requirements When Assessing Control Risk at Maximum for Controls Significantly Dependent Upon Computerized Information Systems*—This amendment establishes a fieldwork standard requiring documentation in the planning of financial statement audits in certain circumstances. (GPO Stock No. 020-000-00275-1)
- *Government Auditing Standards: Amendment No. 2, Auditor Communication*—This amendment requires specific communication concerning the auditor's work on compliance with laws and regulations and internal control over financial reporting. It also requires the auditor to emphasize in the auditor's report on the financial statements the importance of the reports on compliance with laws and regulations and internal control over financial reporting when these reports are issued separately from the report on the financial statements. (GPO Stock No. 020-000-00274-3)
- *Government Auditing Standards: Amendment No. 3, Independence*—This amendment establishes independence standards for CPAs, non-CPAs, government auditors, and performance auditors. It addresses a range of auditor independence issues, including restrictions on nonaudit services.
- *Interpretation of Continuing Education and Training Requirements*—*Government Auditing Standards* establishes specific CPE requirements for auditors working on audits performed in accordance with those standards. This Interpretation guides audit organizations and individual auditors on implementing the CPE requirements by answering the most frequently asked questions from the audit community.

Other Guidance

.160 Auditors should also be aware of the economic, regulatory, and professional developments that may affect the audits they perform, as described in the AICPA general *Audit Risk Alert*—2002/03 [AAM section 8010], and AICPA *Compilation and Review Alert*—2002/03 [AAM section 8015]. These Alerts may be obtained by calling the AICPA Order Department (Member Satisfaction) at (888) 777-7077 or faxing a request to (800) 362-5066. Obtaining product information and placing online orders can be done at www.CPA2biz.com. (The 2003/04 versions of these publications will be issued later in 2003).

.161 Copies of FASB publications referred to in this document may be obtained directly from the FASB by calling the FASB Order Department at (800) 748-0659.

.162 This Audit Risk Alert replaces *Not-for-Profit Organizations Industry Developments—2002*. The *Not-for-Profit Organizations Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would be appreciated. You may e-mail these comments to lwest@aicpa.org or write to:

Appendix

The Internet—An Auditor's Research Tool

Can auditors use the Internet to perform more efficient audits?

If used properly, the Internet can be a valuable tool for auditors. Through the Internet, auditors can access a wide variety of global business information. For example, information is available relating to industry statistics, resources for not-for-profit organizations (NPOs) and their finance professionals, professional news, state CPA society information, Internal Revenue Service information, software downloads, university research materials, currency exchange rates, stock prices, annual reports, and legislative and regulatory initiatives. Not only are such materials accessible from the computer, but they are available at any time, often free of charge.

A number of resources provide direct information, whereas others may simply point to information inside and outside of the Internet. Auditors can use the Internet to:

- Obtain audit and accounting research information
- Obtain texts, such as audit programs
- Discuss audit issues with peers
- Communicate with audit clients
- Obtain information from a client's Web site
- Obtain information on professional associations

There are caveats to keep in mind when using the Internet. Reliability varies considerably. Some information on the Internet has not been reviewed or checked for accuracy; caution is advised when accessing data from unknown or questionable sources. Although a vast amount of information is available on the Internet, much of it may be of little or no value to auditors. Accordingly, auditors should learn to use search engines effectively to minimize the amount of time browsing through useless information. The Internet is best used in tandem with other research tools, because it is unlikely that all desired research can be conducted solely from Internet sources.

The following listing summarizes the various Web sites of many of the organizations referred to in this Audit Risk Alert, as well as others that auditors of NPOs may find useful.

<i>Name of Site</i>	<i>Content</i>	<i>Internet Address</i>
American Institute of CPAs	Information for CPAs on accounting, auditing, industry activities, the activities of the AICPA, and other matters	www.aicpa.org
Accountant's Home Page	Resources for accountants and financial and business professionals	www.computercpa.com
Action Without Borders	Includes a directory of not-for-profit organizations and volunteering resources, a newsletter on not-for-profit organization issues, and job postings	www.idealists.org
American Society of Association Executives	Provides resources to assist association executives and individuals from for-profit companies that provide products and services to the association community	www.asaenet.org

High-Technology Industry Developments—2002/03

How This Alert Can Help You

.01 This Audit Risk Alert can help you plan and perform your high-technology industry audits. The knowledge delivered by this Alert can assist you in achieving a more robust understanding of the high-technology business environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the high-technology industry and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Industry and Economic Developments

The U.S. Business Environment

.04 As of the third quarter of 2002, anxious economists are downgrading their forecasts, and some crucial sectors of the economy are pushing the likelihood of a rebound into next year because of the abrupt slowdown in the economic recovery.

.05 For now, the overall economy is expanding, but sluggishly. Jobs are growing, but barely. And with a depressed stock market, concerns over a possible military action in Iraq, fears of terrorist strikes, and corporate scandals weighing on the national psyche, there is none of the exuberance that marked the recovery in the late 1990s.

.06 The economy appears to be in a struggle between declining business confidence and strong consumer spending. Eventually, consumer demand should overcome business wariness, unless cautious businesses cut so many jobs that consumers finally give up. The same dynamic was at work during the fall of 2001. After September 11, the business sector froze, the consumer sector did not, and eventually consumer demand jump-started the economy.

.07 The underlying economic fundamentals remain relatively sound and point toward a moderate economic growth scenario. However, stock market weakness, coupled with recent data releases, has prompted downward forecast revisions.

Stock Market Woes

.08 Accounting scandals and corporate bankruptcies have generated tremendous investor uncertainty, resulting in a dramatic decline in stock prices. While this is disconcerting, Wall Street scandals are not expected

to play a *significant* adverse role in consumer spending or overall economic growth. Furthermore, any negative economic impacts generated by stock price declines are expected by economists to be constrained to third-quarter activity.

.09 Potentially, the decline in stock market prices can affect real economic activity by reducing consumer wealth and by adversely affecting consumer buying attitudes. Both conditions could reduce consumer spending activity.

.10 Stock prices have declined throughout the first three quarters of 2002, resulting in a multitrillion dollar decline in wealth holdings. Most economists believe the decline in wealth will have a relatively small adverse impact on consumer spending. The wealth decline is primarily a temporary paper setback for investors. The underlying economic fundamentals are relatively sound and the profit picture facing corporate America is showing mixed signs of improvement. This suggests that once investors regain confidence in corporate financial reporting, the market will rebound strongly.

Current Monetary Policy

.11 In November 2002, for the first time in 11 months, the Federal Reserve Board lowered the federal funds rate to 1.25 percent, its lowest level in 41 years. At this point the Fed believes that the risks between inflation and very slow economic growth are balanced.

The Sarbanes-Oxley Act of 2002

.12 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002. The Act includes far-reaching changes in federal securities regulation that could represent the most significant overhaul since the enactment of the Securities Exchange Act of 1934. The Act prescribes a system of federal oversight of public auditors through a Public Company Accounting Oversight Board, a new set of auditor independence rules, new disclosure requirements applicable to public companies and insiders, and harsh civil and criminal penalties for persons who are responsible for accounting or reporting violations. The Act also imposes new restrictions on loans and stock transactions involving corporate insiders.

.13 A more complete summary of the Act is available on the AICPA Web site at www.aicpa.org/info/sarbanes_oxley_summary.htm and in the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

General Industry Trends and Conditions

.14 The economy and the stock market have been dominated by the high-technology industry in the past several years. The desire to enter this industry seems unaffected by strong competition and the tragic experience of some of the new high-tech companies that have gone bankrupt.

.15 The pervasive impact of high-technology on our overall economy has been dramatic. It is hard to pick up a newspaper without reading something about the so-called new economy, which is made up of all high-tech sectors. Discussions about the Internet, Web sites, portals, electronic commerce (e-commerce), electronic business (e-business), and dot-com companies abound. Analysts estimate that, over the past several years, technology spending accounted for about 30 percent of the growth in gross domestic product (GDP). In addition, technology has helped to increase productivity, which, in turn, has allowed our economy to grow at such a fast pace for so long without sparking inflation.

.16 However, some analysts now question whether the battered high-technology industry will ever regain its strength. History offers some insight to this question. A decade ago, the U.S. technology industry was left for dead. Asian chipmakers had grabbed nearly half of the global semiconductor market. Personal computers (PCs) were helpful at work but seemed of limited utility elsewhere. Investors didn't see much future and tech companies shrunk to their smallest share of stock market value in 15 years.

.17 But around that same time, a group of engineers at a federal lab in Illinois were writing a small program to make it easier for computer users to navigate the infant World Wide Web through graphical links instead of text-based menus. Their Mosaic program later became Netscape. It changed communications and commerce, and it ignited one of the greatest investment frenzies in history.

.18 Now, the technology industry is again in eclipse. The 100 largest tech companies have lost money in the aggregate for five straight quarters, according to Merrill Lynch & Co. And this time, the high-tech industry's troubles have a wider impact than ever, on both the stock market and the broader economy. Approximately 47 percent of business capital spending goes into tech equipment and software now, compared with 20 percent in 1990. On Wall Street, even after the steep plunge in tech shares, they still account for about 14.5 percent of the value of the Standard & Poor's 500 stock index—nearly twice their share at the bottom of the previous slump.

.19 But three times in the past 25 years, the tech industry has faced downturns and an uncertain future. Each time, new ideas, along with relentless improvements of existing products, brought the industry back to life in unforeseen ways, though some innovations took years to bear fruit. The 1990s boom fed on incremental advances in operating systems and the linking of PCs into office networks. Then, the Internet propelled the industry to unforeseen heights.

.20 What will be the next big thing? One intriguing innovation is Wi-Fi technology, a set of standards created to provide wireless office computer networks. Now it's spreading for an unintended purpose: to deliver Internet access to coffee shops, airports, and homes. Another breakthrough could emerge from the resolution of the thorny legal issues around computerized music and movies. A new generation of cheap sensor chips, all linked to the Internet, could create a boom in technologies that track commerce, machines, and even health.

.21 The biggest test will be the nature and ultimate impact of innovation. Pessimists say they don't see a "killer app" on the horizon. Optimists answer that the next big thing is rarely visible from the depths of a downturn. Products and companies may die, but innovation is a process greater than a series of products.

What Is High Technology and What Are Its Industry Segment Conditions?

.22 It is difficult to find common ground on the precise definition of the high-technology industry. According to the AEA (formerly known as the American Electronics Association), the high-tech industry is made up of 45 Standard Industrial Classification (SIC) codes. These sectors fall into three broad categories—high-tech manufacturing, communications services, and software and computer-related services.

.23 High technology is a lot like quality—people know it when they see it—but it is not easy to define. This means the definition of the high-technology industry varies greatly depending on the combination of products and services selected to define the industry. For the purposes of this Alert, we will use a definition that segments the industry into five classifications—personal computers; semiconductors; mainframes, servers, and storage; networking and telecommunications equipment; and software and services.

Personal Computers

.24 After 25 years of strong growth, the PC industry has reached maturity and its future growth will be determined by economic conditions. According to Computer Industry Almanac, Inc. (CIAI), future PC unit sales growth will remain below 10 percent, and economic recessions will produce PC sales contractions. However, the PC industry will see long-term growth, but year-to-year growth is no longer certain, according to CIAI. PCs-in-use will continue to grow in all regions of the world and will double by 2010 in many regions. PCs-in-use in the United States reached 175 million in 2001 and will pass 300 million by 2010. Worldwide PCs-in-use surpassed 525 million in 2001 and will top 1.1 billion units in 2007.

.25 According to research conducted by CIAI, in 2007 the PC industry will pass another milestone when worldwide PC sales will surpass 200 million units, but this is two years later than was expected in early 2000.

Western Europe and North America have the highest PC-adoption rates and consequently will have the slowest growth rates and the highest risk for PC sales declines during economic downturns. Annual PC sales now depend much more on replacement sales than sales to new customers. This means that the economic life of the average PC will become the largest factor in determining annual PC unit sales.

.26 Short product life cycles are a fundamental characteristic of this industry sector. For example, the life cycle of a desktop PC is thought to be two years or less, and it is estimated that up to 50 percent of profits for PCs and related products are generated in the first three to six months of sales. As a result, computer makers face the risk of inventory obsolescence. (See the "Inventory Valuation" section later in this Alert for a discussion of this issue.)

.27 Computer manufacturers may enter into hedging transactions to protect themselves from fluctuating prices of the components used in the production of computers. As a result, computer manufacturers may be affected by Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*.

Semiconductors

.28 The worldwide semiconductor market is forecast to post double-digit growth in 2003, with revenue totaling \$171.8 billion, a 12.1 percent increase from 2002 estimates, according to Dataquest Inc., a unit of Gartner, Inc.

.29 In 2001, worldwide semiconductor revenue totaled \$152.5 billion, a 32 percent decline from 2000. In 2002, the market is beginning to see signs of recovery, as revenue is projected to reach \$153.3 billion, a 0.5 percent increase from 2001.

.30 The semiconductor market recovery in 2002 has progressed as expected, with strong growth in the first half of 2002 as inventories were replenished, and weaker growth in the second half of the year, according to analysts with Gartner Dataquest's semiconductor research group. Although semiconductor sales in the third quarter of 2002 held up reasonably well, benefiting from a degree of seasonal strength, that strength has not carried forward into the fourth quarter and highlights the poor state of electronic equipment production.

.31 The worldwide digital cellular handset market is one of the few bright spots in the semiconductor industry and is driven primarily by a replacement cycle as the industry shifts from second generation (2G) to 2.5 generation (2.5G) cellular, which is good news for semiconductor vendors because it increases demand for silicon-rich handsets.

.32 Gartner Dataquest analysts said that while PC unit production growth has stalled in 2002, a corporate PC replacement cycle is becoming overdue and cannot be put off much longer. A broader-based recovery in electronic equipment production, especially in the wired communications segment, is unlikely to begin until 2004, suggesting a limited impact on semiconductor sales in 2003. 2003 is forecast to be a transition year, as a phased recovery in end markets gradually works its way back to fuel incremental semiconductor sales growth.

.33 In this sector of the industry, where rapid replacement of capital assets is common, you may need to ensure that your clients have appropriately considered the provisions of FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. (See the "Asset Impairment" section later in this Alert for further discussion on this topic.)

.34 Another implication for the shifting needs of product manufacturers and end users is the potential for rapid inventory obsolescence. New types of chips are continuously developed, quickly rendering older ones obsolete. Product life cycles continue to decrease, and communications protocols constantly change. As a result, you may need to consider an increased level of risk associated with inventory valuations. (For a further discussion, see the section titled "Inventory Valuation" later in this Alert.)

Mainframes, Servers, and Storage

.35 The worldwide server market grew 3.1 percent in the third quarter of 2002, as worldwide server shipments totaled 1.1 million, up from 1.07 million units in the third quarter of 2001, according to Dataquest Inc., a unit of Gartner, Inc. While the industry did grow, Gartner Dataquest analysts said the relatively poor performance of the market for the same quarter last year, due primarily to the terrorist attacks of September 11, must be considered when judging the change.

.36 The performance of the worldwide server market in the third quarter of 2002 should be interpreted with caution because of the issues that existed in the same quarter one year ago. The server market still looks cloudy, with the possibility of war in the Middle East further aggravating economic uncertainty, and continued constraints on information technology (IT) spending that make it hard to be optimistic about real recovery of the worldwide server market this year.

.37 The United States server market continued to show signs of recovery, with a 12.2 percent increase in the third quarter of 2002, and shipments of 488,858 units, up from 435,620 in the third quarter of 2001.

.38 As with other segments of the high-tech industry, there is the potential for rapid inventory obsolescence. As demand for new types of servers and storage systems increases, older types may become obsolete. As a result, you may need to consider an increased level of risk associated with inventory valuations. (For a further discussion, see the section titled "Inventory Valuation" later in this Alert.)

Networking and Telecommunications Equipment

.39 The international market for telecommunications equipment and services grew 11.1 percent last year, reaching nearly \$1.2 trillion, according to research by the Telecommunications Industry Association (TIA).

.40 Growth in the Mexican and Canadian markets was slow in 2001 as a result of the weakening economic climate in both countries, and the pace is expected to continue through the rest of this year. By 2003, however, a fully recovered economy will make room for double-digit increases in equipment spending. Spending on enterprise equipment will propel this growth with an expected increase of \$5.3 billion between 2001 and 2005, reaching \$16.8 billion. Spending on public network equipment will grow from \$5.5 billion in 2001 to \$8 billion in 2005.

.41 In Western Europe, telecommunications infrastructure and enterprise equipment spending fell 11.5 percent, with enterprise equipment dropping 9 percent and public network equipment seeing a sharp decline of 19.2 percent in 2001. TIA predicts the equipment market will begin to pick up in 2002, and enterprise equipment spending is projected to grow at a 5.4 percent combined annual growth rate (CAGR) through 2005.

.42 In Eastern Europe, enterprise equipment and public network spending are projected to grow at nearly equal rates. Enterprise spending will grow at a 10.4 percent CAGR, reaching \$17.5 billion in 2005, up from \$11.8 billion in 2001. Public network equipment spending will increase at a 9.2 percent CAGR over the same period, rising from \$3.3 billion to \$4.7 billion.

.43 Enterprise spending in Latin America is gaining ground on public network equipment spending. The latter will grow at a projected 8.8 percent compound annual rate during the 2001-through-2005 study period, compared to 9.3 percent expected growth compounded annually for enterprise equipment.

.44 A surge in demand for network infrastructure will dominate growth in the Asia-Pacific markets through 2005, predicts TIA. For the 2001-through-2005 study period, public network equipment spending will grow at a projected 17 percent CAGR to \$36.6 billion, and enterprise equipment spending will advance at 11.5 percent CAGR to \$122 billion.

.45 A jump in fiber spending is expected to come despite the recent economic downturn and a perceived excess of capacity in the network that caused an overall 13.8 percent decrease in carrier equipment expenditures to \$41 billion in 2001. Service provider purchases are projected to decrease 10.8 percent to \$36.5 billion in 2002, but the negative trend is beginning to turn, heralding positive growth in 2003.

.46 In the meantime, strong enterprise demand for bandwidth-hungry applications is driving the broadband market and reducing the current supply. Continuing a trend from 2000, the most immediate growth in carrier spending will be found in the related gear to get more out of existing fiber. New generations of optical switches and signaling gateways have proven their ability to streamline data transmission time and use less power, thus making fiber more affordable and easier to upgrade. Furthermore, some of the new optical switches that require later generations of fiber will offer such efficiencies that service providers will find it more cost-effective to lay additional fiber in the months ahead, rather than retrofit current network plant.

Software and Services

.47 The continued economic slump in business capital spending is changing the shape of the software industry as top-tier software vendors are gaining revenue share at the expense of the pure-play vendors, according to Dataquest Inc., a unit of Gartner, Inc.

.48 Dataquest analysts refer to these top-tier vendors as titan vendors (vendors that have achieved dominant market share in more than one software market segment by offering a diversified and often integrated line of software products). Pure-play vendors derive most of their software revenue from the sale of products within one market. The realities of the weak economy continue to shift the competitive advantage from pure-plays to titans.

.49 Software titans have deeper pockets and can withstand the economic challenges much easier than many pure-play vendors, which have smaller revenue streams and cash reserve, according to analysts with Gartner Dataquest's Software Industry Research group. This has caused struggling pure-play vendor solutions to be less desirable from a financial perspective, even though they can be a better solution to risk-averse decision makers. Loss of revenue, partly because of such reluctance in the marketplace, may indeed make bankruptcy or acquisition by a titan a self-fulfilling prophecy.

.50 Worldwide end-user spending on software is forecast to grow 3.6 percent in 2002, with revenue of \$76.9 billion, and increase to \$81.8 billion in 2003. In 2001, worldwide software revenue declined 5.7 percent, with revenue of \$74.2 billion.

.51 The first-half 2002 license revenue performance of enterprise software companies was lackluster because of the continued bad news concerning the U.S. and global economy that is inhibiting corporate purchases and stalling investment decisions.

.52 Tight IT budgets have meant that buyers cannot satisfy their pent-up demand for software projects to improve corporate business performance and IT infrastructure efficiencies. When budgets loosen in the second half of 2003 or the first half of 2004, the backlog of demand could cause a temporary growth surge that then settles down to normal growth rates.

Other Economic and Regulatory Issues

Broadband

.53 Leading high-technology associations, banded together as members of the High Tech Broadband Coalition (HTBC), say that swift action by the Federal Communications Commission (FCC) to achieve a minimal regulatory environment is needed to help speed broadband deployment and create an economic

rebound for the technology and telecommunications industries. HTBC is an ad hoc alliance of the leading trade associations of the computer, telecommunications equipment, semiconductor, consumer electronics, software, and manufacturing sectors committed to the rapid and ubiquitous deployment of fast, interactive, content-rich, and affordable broadband services.

.54 HTBC argues the broadband services market is distinct from the legacy voice market and has urged the FCC to refrain from imposing Section 251 unbundling obligations on incumbent local exchange carriers' (ILEC) new, last-mile broadband facilities, including fiber and DSL and successor electronics deployed on the customer side of the central office, used to provide broadband services. HTBC believes removal of these antiquated and burdensome regulations will produce the economic incentive needed for increased investment in broadband, facilities-based competition.

.55 President Bush and members of Congress acknowledge that hurdles and barriers could be standing in the way of broadband reaching its promise of revitalizing the national and global economy. The high-tech industry believes strongly that one important component of a broadband policy or strategy is ensuring that the regulatory framework fosters an environment that encourages all broadband competitors to upgrade, expand, and innovate across the wide variety of existing and future communications networks capable of supporting broadband services.

Audit Issues and Developments

Assessing Audit Risks in the Current Environment

.56 The proper planning and execution of an audit has always required you to have a thorough understanding of the high-tech industry and the nature of your client's business. For most audit firms, this in-depth understanding means that the most experienced partners and managers must become involved early and often in the audit process. In today's high-tech environment, your judgment, knowledge, and experience are even more important than they were in the past.

.57 During the past year, the U.S. economy has suffered some significant declines: consumer confidence has dropped, plant closings and layoffs have increased dramatically, profit margins for many companies have slipped, and many companies have failed.

.58 Periods of economic uncertainty lead to challenging conditions for companies attributable to potential deterioration of operating results, increased external scrutiny, and reduced access to capital. During such times, professional skepticism should be heightened and the status quo should be challenged.

.59 More specifically, in today's economic environment, you should keep the following points in mind as you plan and perform audits of high-tech clients.

- Understand how your client is affected by changes in the current business environment.
- Understand the stresses on your client's internal control over financial reporting, and how they may affect its effectiveness.
- Identify key risk areas, particularly those involving significant estimates and judgments.
- Approach the audit with objectivity and skepticism, notwithstanding prior experiences with or belief in management's integrity.
- Pay special attention to complex transactions, especially those presenting difficult issues of form versus substance.
- Consider whether additional specialized knowledge is needed on the audit team.

- Make management aware of identified audit differences on a timely basis.
- Question the unusual and challenge anything that doesn't make sense.
- Foster open, ongoing communications with management and the audit committee, including discussions about the quality of financial reporting and any pressure to accept less than high-quality financial reporting.
- When faced with a "gray" area, perform appropriate procedures to test and corroborate management's explanations and representations, and consult with others as needed.

.60 Specific points to keep in mind with respect to high-tech clients include:

- Consider the inappropriate use of "bill and hold" accounting, for example, in circumstances where the customer has not requested the delay in shipment or provided a ship date that is unreasonably long in the circumstances.
- Identify "round trip" transactions (see the "Accounting Issues and Developments" section later in this Alert for a detailed discussion of these transactions).
- Consider nonmonetary transactions.
- Pay attention to whether persuasive evidence of the arrangement exists at the time revenue is recognized and whether legal title to the goods has been transferred and the customer has all the risks and rewards of ownership at that time.
- Consider customers' rights of return, particularly those of distributors, and whether all the requirements of FASB Statement No. 48, *Revenue Recognition When Right of Return Exists*, have been satisfied for revenue recognition.

Professional Skepticism

.61 The third general audit standard stipulates that due professional care be exercised in planning and conducting an audit engagement. Due professional care requires that you exercise professional skepticism in gathering and evaluating audit evidence. Although you neither assume that management is dishonest nor assume unquestioned honesty, you should consider the increased risk associated with the potential increases in external pressure faced by management during the current economic climate.

.62 As a result of perceived external pressures, companies may be tempted to manage earnings by using nonrecurring transactions or through changes in the method of calculating key estimates, such as reserves, fair values, or impairments. Companies may also adopt inappropriate accounting practices resulting in improper recognition or omission of financial transactions. Material nonrecurring transactions may require special disclosure to facilitate the readers' understanding of the reported financial results, and the guidance in Accounting Principles Board (APB) Opinion No. 20, *Accounting Changes*, should be applied in reporting the effects of changes in estimates. Inappropriate transactions or accounting practices that may result in errors requiring adjustments of financial statements might include premature recognition of revenue, failure to appropriately accrue for contingent liabilities that are probable and estimable (whether within a range or at a point), and failure to record unpaid purchase invoices. Additionally, you should be particularly skeptical of fourth-quarter events that result in significant revenue recognition, loss accrual, or noncash earnings.

.63 The appropriate level of professional skepticism is needed when corroborating management's representations. Management's explanations should make business sense. Additionally, you may need to consider corroborating management's explanations with members of the board of directors or audit committee, and with transaction counterparties.

.64 Other indicators of potential increased accounting and reporting risk calling for increased professional skepticism include:

- Liquidity matters
 - The company is undercapitalized, is relying heavily on bank loans and other credit, and is in danger of violating loan covenants.
 - The company appears to be dependent on an initial public offering for future funding.
 - The company is having difficulty obtaining or maintaining financing.
 - The company is showing liquidity problems.
- Quality of earnings
 - The company is changing significant accounting policies and assumptions to less conservative ones.
 - The company is generating profits, but not cash flow.
- Management characteristics
 - Management's compensation is largely tied to earnings or the appreciation of stock options.
 - The company appears vulnerable to the weakening economic conditions, and management is not proactive in addressing changing conditions.
 - The company's management is selling their investment in company securities more than in the past.
 - There is a significant change in members of senior management or the board of directors.

Auditing Estimates

.65 The high-tech industry uses estimates in a variety of ways. For example, both the recognition and measurement of impairment losses require management to make estimates of future events or assumptions about current conditions.

.66 When auditing estimates, you should be familiar with Statement on Auditing Standards (SAS) No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342); the AICPA Practice Aid, *Auditing Estimates and Other Soft Information*; and SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.67 Currently, most segments of the high-tech industry are in decline. Certain estimates, for example, expected future cash flows used in the determination of possible asset impairment, require management to make assumptions about future events and conditions. Be skeptical of cash flow and other performance projections that assume overly optimistic upward trends will occur.

.68 Pay close attention to the underlying assumptions used by management when auditing accounting estimates. Management is responsible for making the estimates included in the financial statements. Those estimates may be based in whole or in part on subjective factors such as judgment based on experience about past as well as current events and about conditions it expects to exist. You should be alert to the possibility of management's overreliance on economic information based on favorable conditions to predict future outcomes.

Unusual Transactions

.69 Among the most frequently cited sources of financial reporting risk are significant adjustments or unusual transactions occurring at or near the quarter end or year end. Unusual transactions might include sales of assets outside the ordinary course of business, significant or unusual period-end revenues, introduction of new period-end sales promotion programs, and disposal of a segment of a business. These types of

transactions and adjustments often occur outside the company's ordinary course of business and, therefore, may not be subject to the checks and balances imposed by the internal control system.

.70 Key points include:

- Recognizing the underlying business purpose for entering into unusual transactions, as well as the resulting financial benefits or obligations.
- Whether unusual transactions—particularly those executed close to period end—are subject to effective controls.
- The impact of these types of transactions on annual and quarterly results, and whether they have been appropriately described in the company's financial reports.
- Existence of any "special" or "side" arrangements not considered in determining the appropriate accounting and disclosure for the transactions.
- Whether so-called nonstandard journal entries, including the adjusting entries made at the end of the closing process, are subject to appropriate review and oversight.

Consideration of Fraud

.71 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), provides the primary guidance on your responsibilities for detecting fraud-related misstatements when performing a financial statement audit.¹ SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.72 Some examples of fraud risk factors that may exist in high-tech entities include the following:

- The use by management of unusually aggressive accounting practices in recognizing revenue.
- Complicated criteria for recognizing sales transactions, making it difficult to assess the completion of the earnings process. (For additional information about revenue-recognition-related issues, see the "Revenue Recognition" section of this Alert.)
- Inadequate responses or an unwillingness to respond to inquiries about known regulatory or legal issues.
- Significant related-party transactions.
- A significant portion of management compensation represented by bonuses, stock options, or other incentives.
- Excessive interest by management in maintaining or increasing an entity's stock price.

The general state of the recent economy may raise several fraud risk factors. For example, management may be under significant pressure to obtain additional capital, or the entity may depend on debt with debt covenants that are difficult to maintain under the circumstances.

.73 SAS No. 99 also identifies risk factors related to misstatements arising from fraudulent financial reporting, such as a high degree of competition or market saturation and rapidly changing technology or rapid product obsolescence. All of these factors are present in the high-tech industry, implying potential audit concerns.

¹ Statement on Auditing Standards (SAS) No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A); amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). See the discussion of this new SAS in the "New Auditing and Attestation Pronouncements and Other Guidance" section later in this Alert.

Evaluating Going Concern

.74 A number of high-tech industry sectors have experienced intense competition, recurring operating losses, negative cash flows, and the inability to obtain debt or equity financing. These factors have resulted in a high rate of business failure. The current business environment and market conditions might lead to rapidly deteriorating operating results and liquidity challenges for some high-tech companies, particularly those with reduced access to capital. A company particularly sensitive to negative changes in economic conditions can rapidly develop a liquidity crisis and ultimately fail.

.75 Certain conditions, considered in the aggregate, may lead you to question the entity's ability to continue as a going concern. In general, conditions and events that might indicate caution about going-concern issues could include (1) negative trends, such as recurring operating losses; (2) financial difficulties, such as loan defaults or denial of trade credit from suppliers; (3) internal challenges, such as substantial dependence on the success of a particular product line or service; or (4) external matters, for example, disaster occurrences such as the attacks of September 11, pending legal proceedings, or loss of a principal supplier. Also consider the case of an entity's excessive and unusual reliance on external financing, rather than on money generated from the company's own operations as a going-concern issue.

.76 Key in evaluating these risk factors is whether:

- Existing conditions and events can be mitigated by management's plans and their effective implementation.
- The company has the ability to control the implementation of mitigating plans rather than depending on actions of others.
- The company's assumption about its ability to continue as a going concern is based on realistic, rather than overly optimistic, assessments of its access to needed debt or equity capital or its ability to sell assets in a timely manner.
- Liquidity challenges have been appropriately satisfied and disclosed.

When evaluating management's plans to continue as a going concern, an appropriate level of professional skepticism is important. For example, you may want to scrutinize the company's assumptions to continue as a going concern to assess whether those assumptions are based on overly optimistic or "once-in-a-lifetime" occurrences.

.77 Key factors in your evaluation of the ability to continue as a going concern are part of the guidance provided in SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341).

Auditor's Responsibilities Related to a Going-Concern Issue

.78 Auditors should be aware of their responsibilities pursuant to SAS No. 59 (AU sec. 341.02 and .03b). That statement provides guidance about conducting an audit of financial statements in accordance with generally accepted auditing standards (GAAS) to evaluate whether there is substantial doubt about a client's ability to continue as a going concern for a reasonable period of time.

.79 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption, or the ability to remain a going concern, relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 does not require you to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.80 If there is substantial doubt about the entity's ability to continue as a going concern, you should consider whether it is likely that management plans can mitigate existing conditions and events and whether those plans can be effectively implemented. If you obtain sufficient competent evidential matter to alleviate doubts about going-concern issues, you should give consideration to the possible effects on the financial statements and the adequacy of the related disclosures. If, however, after considering identified conditions and events, along with management's plans, you conclude that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, refer to the specific guidance set forth under SAS No. 59.

Businesses in Bankruptcy Reorganization

.81 For those high-tech entities or operations that are under bankruptcy reorganization pursuant to Chapter 11 of the Bankruptcy Code, or are emerging from it, consider whether the company is following the accounting guidance of SOP 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code*. Entities that filed for bankruptcy may have impairments that need to be recorded before fresh-start accounting under SOP 90-7.

Related-Party Transactions

.82 One of the more important, and yet more difficult, aspects of a financial statement audit is the identification of related parties and transactions with related parties. This aspect of the audit is important because of (1) the requirement under GAAP to disclose material related-party transactions and certain control relationships, (2) the potential for distorted or misleading financial statements in the absence of adequate disclosure, and (3) the instances of fraudulent financial reporting and misappropriation of assets that have been facilitated by the use of an undisclosed related party. See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for an in-depth discussion of related-party transactions.

Inventory Valuation

.83 The primary literature on inventory accounting is Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*, chapters 3A and 4, which provide the following summary:

Inventory shall be stated at the lower of cost or market, except in certain exceptional cases when it may be stated above cost. Cost is defined as the sum of the applicable expenditures and charges directly or indirectly incurred in bringing inventories to their existing condition and location. Cost for inventory purposes may be determined under any one of several assumptions as to the flow of cost factors (such as first-in, first-out; average; and last-in, last-out).

.84 Whether inventory is properly stated at lower of cost or market can be a very significant issue for high-technology audit clients because of the rapid changes that can occur in many areas of the industry, and the need for entities to keep up with the newest technology. Examples of factors that may affect inventory pricing include:

- Changes in a product's design that may have an adverse impact on the entity's older products, with older products not as salable as the newer versions.
- A competitor's introduction of a technologically advanced version of the product that may decrease salability of a client's products.
- Changes in the products promoted by the industry as a whole, such as a shift from analog to digital technology, that may affect salability.
- Changes in foreign economies that could result in such situations as slowdown of sales to that region or lower-priced imports from that region.

- Changes in technology to produce high-technology products that can give competitors a selling-price advantage.
- Changes in regulations that could affect the competitive environment.
- The entity's own product changes that may not be well researched due to the pressure to introduce new products quickly, resulting in poor sales or high returns.

The highly competitive environment and the rapid advancement of technological factors contribute to the common problem of rapid inventory obsolescence in the high-technology industry. As such, you should consider whether the carrying amount of inventories is appropriate.

.85 You can look at many factors in determining the proper valuation of inventories. A few examples of factors that may be useful include the following:

- Product sales trends and expected future demand
- Sales forecasts prepared by management as compared with industry statistics
- Anticipated technological advancements that could render existing inventories obsolete or that could significantly reduce their value
- Inventory valuation ratios, such as gross profit ratios, inventory turnover, obsolescence reserves as a percentage of inventory, and days' sales in inventory
- New product lines planned by management and their effects on current inventory
- New product announcements by competitors
- Economic conditions in markets where the product is sold
- Economic conditions in areas where competitive products are produced
- Changes in the regulatory environment
- Unusual or unexpected movements, or lack thereof, of certain raw materials for use in work-in-process inventory
- Levels of product returns
- Pricing trends for the type of products sold by the client
- Changes in standards used by the industry

.86 These are not the only issues of importance to consider. You may need to address many other issues, including the client's taking of physical inventories in high-technology entities. Consider guidance set forth in SAS No. 1, section 331, *Inventories* (AICPA, *Professional Standards*, vol. 1, AU sec. 331.09–.13). Among the issues for your consideration are the following:

- When dealing with some difficult types of inventory, such as chemicals used in the process, you may need to take samples for outside analysis. The work of a specialist may also be needed, and in this case you should follow the guidance set forth in SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336).
- The extent to which raw materials have been converted to work-in-process will need to be determined to assess the value of the work-in-process.
- Indications of old or neglected materials or finished goods need to be considered in the valuation of the inventory.
- The client's inventory held by others, as well as field service inventories for use in servicing the client's products, will need to be considered.

.87 In addition, the SEC staff believes that inventory reserves create a new cost basis and thus cannot be subsequently reversed into income as a change in estimate if, for example, demand were forecasted to pick up and thereby a previously established excess and obsolete inventory reserve were deemed no longer necessary.

.88 There are also risks posed by the use of contract manufacturers. In many of those circumstances the hardware vendor will provide the contract manufacturer with a guarantee against its loss due to excess raw material inventory (and, possibly, against the value added in the manufacturing or assembly process) that would occur if the vendor were to reduce purchases beyond a certain point. Such a guarantee may represent a contingent loss that needs to be recognized or disclosed under FASB Statement No. 5, *Accounting for Contingencies*. The disclosure requirements of FASB Statement No. 47, *Disclosure of Long-Term Obligations*, also need to be considered.

Revenue Recognition

.89 Revenue recognition continues to pose significant audit risk to auditors. The high-technology industry represents one of the more challenging industries when it comes to the topic of revenue recognition.

.90 Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, summarizes the SEC staff's views in applying GAAP to selected revenue recognition issues. SAB No. 101 presents various fact patterns, questions, and interpretive responses concerning whether the following criteria of revenue recognition are met:

- Persuasive evidence of an arrangement exists.
- Delivery has occurred or services have been rendered.
- The seller's price to the buyer is fixed or determinable.
- Collectibility is reasonably assured.

.91 Another SEC publication, *SAB No. 101: Revenue Recognition in Financial Statements—Frequently Asked Questions and Answers*, addresses recurring questions from preparers, auditors, and analysts about how to apply the guidance in SAB No. 101 to particular transactions.

.92 SAB No. 101 reflects the basic principles of revenue recognition in GAAP and does not supersede any existing authoritative literature. Accordingly, while SAB No. 101 is directed specifically to transactions of public companies, management and auditors of nonpublic companies may find the guidance helpful in analyzing revenue recognition matters.

.93 The SEC continues to see instances of questionable and inappropriate revenue recognition practices. Significant issues encountered recently include:

- Complex arrangements that provide for separate, multiple deliverables (for example, multiple products and/or services), at different points in time, during the contract term.
- Nonmonetary (for example, barter) transactions where fair values are not readily determinable with a sufficient degree of reliability.

.94 The SEC has requested that the Emerging Issues Task Force (EITF) address certain of these issues to clarify the application of GAAP in these transactions. However, the SEC staff generally believes that the existing accounting literature provides analogous guidance for a number of these issues, including SOP 97-2, *Software Revenue Recognition*; APB Opinion No. 29, *Accounting for Nonmonetary Transactions*; SOP 81-1, *Accounting for Performance of Construction-Type and Production-Type Contracts*; FASB Statement of Financial Accounting Concepts No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*; and FASB Concept Statement No. 6, *Elements of Financial Statements*.

AICPA's Audit Guide on Revenue Recognition

.95 The AICPA Audit Guide, *Auditing Revenue in Certain Industries*, assists auditors in auditing assertions about revenue in selected industries not covered by other AICPA Audit and Accounting Guides. You can look to this Guide for descriptions and explanations of auditing standards, procedures, and practices as they relate to auditing assertions about revenue in both the computer software and high-tech manufacturing industries.

.96 This Guide:

- Discusses the responsibilities of management, boards of directors, and audit committees for reliable financial reporting.
- Summarizes key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP.
- Identifies circumstances and transactions that may signal improper revenue recognition.
- Summarizes key aspects of the auditor's responsibility to plan and perform an audit under GAAS.
- Describes procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition.

Help Desk—You may order AICPA Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk) from the AICPA at (888) 777-7077 or go online at www.cpa2biz.com.

Auditing in a Paperless Environment

.97 When clients rely on technology to manage and analyze information, audit strategies change. Consider the following examples:

- Audit evidence that previously existed in paper form may be available electronically only. Accessing electronic audit evidence may require you to become proficient in the use of data-extraction or other audit software tools.
- The design and operation of internal control in a computer environment is much different than in a predominately manual environment.

As companies continue to expand their use of IT, you may need to become aware of the unique audit issues in a highly computerized environment. In addition, you should identify the risks of material misstatement that can arise during the transition from a highly manual environment to a more computerized operating environment.

.98 For further information and guidance on auditing in this paperless environment, see SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), and SAS No. 80, *Amendment to SAS No. 31, Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326).

How Employee Layoffs Might Affect Your Engagements

.99 Many companies continue to experience layoffs during the recent economic downturn. The layoff trend is broad based, affecting not only industries that were racing ahead until recent months, such as technology and telecommunications entities, but also businesses once thought to be recession-proof, for example, food and consumer products. Healthy companies are also using layoffs as a tool to reduce costs and accumulate earnings as they maneuver through this economic downturn. What do layoffs imply for you as you plan your engagements?

.100 If your high-technology clients are experiencing, or have experienced, layoffs, they will need to properly account for employee-related termination charges, such as severance package charges, restructuring charges, and voluntary separation charges. In addition, management may need to properly account for outplacement services offered to their departing employees and bonuses and educational allowances offered to assist employees in contending with the loss of their jobs. Here we offer some highlights of the accounting literature and other topics related to terminations to help provide guidance regarding issues related to layoffs.

- EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*, addresses the timing of liability recognition for certain employee termination benefits in addition to the financial statement disclosures that should be made for those charges.²
- FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, establishes standards for accounting for curtailments and termination benefits, among other issues. Practitioners should refer to paragraphs 6 through 14 for guidance on curtailment and paragraphs 15 through 17 for guidance on termination benefits.
- FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, requires recording as a loss the effect of curtailment, for example, termination of employees' services earlier than expected, which may or may not involve closing a facility or discontinuing a segment of a business. Refer to paragraphs 96 through 99 for guidance on how to account for plan curtailment. The Statement also provides guidance on how to measure the effects of termination benefits in paragraphs 101 and 102.
- FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits*, an amendment of FASB Statements No. 5, *Accounting for Contingencies*, and No. 43, *Accounting for Compensated Absences*, requires that entities providing postemployment benefits to their former or inactive employees accrue the cost of such benefits. Accrual would occur in accordance with FASB Statement No. 5, *Accounting for Contingencies*, when four conditions are met. Inactive employees include those who have been laid off, regardless of whether they are expected to return to work. Postemployment benefits that can be attributed to layoffs can include salary continuation, supplemental unemployment benefits, severance benefits, job training and counseling, and continuation of benefits, such as health care benefits and life insurance coverage.

FASB Statement No. 112 does not require that the amount of postemployment benefits be disclosed. The financial statement shall disclose if an obligation for postemployment benefits is not accrued because the amount cannot be reasonably estimated.

- FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits*, addresses disclosures only (that is, not measurement or recognition) and standardizes the disclosure requirements for pensions and other postretirement benefits. Among other disclosures, the Statement requires the disclosure of the amount of any gain or loss recognized due to a settlement or curtailment. Additionally, the cost of providing special or contractual termination benefits recognized during the period and a description of the nature of the event are required to be disclosed.
- SAS No. 1, section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1, AU sec. 560), describes matters related to subsequent events. Use this guidance as you inquire of and discuss with the management matters involving unusual terminations of participants, such as terminations arising from a sale of a division or layoffs, in addition to other matters.
- Significant layoffs can have a serious effect on an entity's internal control structure and financial reporting and accounting systems. Employees who remain at the company may feel overwhelmed by their workloads, may have insufficient time to complete their tasks completely and accurately, and may be performing too many tasks and functions. With additional workloads and requirements

² EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*, will be superseded upon the effective date of FASB Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. See the "New Accounting Pronouncements and Other Guidance" section of this Alert for a discussion of this pronouncement.

for the performance of added tasks, the company might experience challenges to maintaining an adequate segregation of duties in addition to other experiences affecting internal control.

- The auditor may need to consider the possible effects that key unfilled positions can have on internal control. Entities that have experienced strong financial reporting and accounting controls before layoffs could see those controls deteriorate due to the lack of employees and to redefined employee tasks.

.101 Consider these issues related to employee layoffs when you plan and perform the audit and you assess control risk. Remember that gaps in key positions, and other changes related to reorganization or release of employees, may cause control weaknesses representing reportable conditions that you should communicate to management and the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), as amended. Also see SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, which can help provide a framework to help the auditor obtain an understanding of internal control.

Accounting Issues and Developments

IRU Capacity Swaps

.102 The SEC staff has communicated to the SEC Regulations Committee the following staff position regarding indefeasible right to use (IRU) capacity swaps.

.103 The SEC staff has concluded that all IRU capacity swaps consisting of the exchange of leases should be evaluated within paragraph 21 of APB Opinion No. 29. That is, if a swap involves leases that transfer the right to use similar productive assets, the exchange should be treated as the exchange of similar productive assets, irrespective of whether the “outbound” lease is classified as a sales-type lease, direct financing lease, or operating lease and irrespective of whether the “inbound” lease is classified as a capital lease or an operating lease. The staff believes that the lease classification criteria of FASB Statement No. 13, *Accounting for Leases*, are not an appropriate basis for an entity to “filter” a determination of whether the exchange involves similar productive assets. This conclusion is based on the thought that the right to use an asset—that is, a lease—is in fact an asset and not a service contract, irrespective of whether such asset is recognized in a company’s balance sheet.

.104 This conclusion would require that IRU capacity swaps involving the exchange of leases be recognized based on the carrying value of the assets exchanged, rather than on fair value. The staff did point out that exchanges involving sufficient boot would still be treated as part monetary and part nonmonetary per EITF Issue No. 01-2, *Issues Related to the Accounting for Nonmonetary Transactions*.

.105 The staff expects that registrants will apply this guidance historically to IRU capacity swap transactions that occurred in prior years and, if appropriate, restate their financial statements. The chief executive officer and chief financial officer should be advised to give consideration to this matter before certifying the financial statements previously filed with the SEC.

Revenue Recognition

Income Statement Classification

.106 The appropriate classification of amounts within the income statement or balance sheet can be as important as the appropriate measurement or recognition of such amounts. In the current environment where revenue growth may not be as robust as originally projected, the auditor needs to be particularly

concerned about income statement misclassifications designed to increase reported revenue (for example, reporting agency transactions on a gross basis and showing sales discounts as a marketing expense rather than a revenue reduction). Several EITF consensus provisions provide guidance on the proper classification of certain revenue and expense items. For example, consider EITF Issues No. 99-17, *Accounting for Advertising Barter Transactions*; No. 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*; No. 00-10, *Accounting for Shipping and Handling Fees and Costs*; and No. 00-14, *Accounting for Certain Sales Incentives*; all of which were to be applied no later than in the December 31, 2000, financial statements for calendar year-end companies. SEC registrants should apply the guidance provided in SEC Regulation S-X regarding classification of amounts in financial statements.

Round Tripping

.107 Round tripping is another technique used to artificially inflate revenues and has appeared in several restatement scenarios. It involves transactions in which the company sells products and services to the same entity from which it buys products and services. Often the transactions happen in close temporal proximity and completing one transaction is dependent on completing the other. The fair value of both transactions may be overstated such that the company can report higher revenue at the “cost” of increased expenses. In addition, the products and services purchased back may not be used in the same period the revenue is recognized, resulting in more than a basic incorrect grossing-up of the income statement.

Vendor Financing

.108 The reduced liquidity of many customers is resulting in an increased use of vendor financing that goes well beyond normal trade terms. That requires consideration of whether the fee is fixed or determinable and/or collectible. In addition, provisions of APB Opinion No. 21, *Interest on Receivables and Payables*, need to be considered.

Nonmonetary or Barter Transactions

.109 Abuses in the area of nonmonetary or barter transactions have also been a focus of several recent restatements. The principal issues are whether there is a legitimate business purpose for the transaction and whether there is sufficient objective evidence of fair values. Also of concern is “disguised” barter transactions that are not analyzed as such due to the presence of “boot” or separation in time of transactions that are, in fact, negotiated together. Abuses are seen most often in situations where there is little hard inventoriable cost associated with the deliverables.

Business Combinations

.110 In June 2001, the FASB issued FASB Statement No. 141, *Business Combinations*, to address financial accounting and reporting issues for business combinations. This Statement supersedes APB Opinion No. 16, *Business Combinations*, and FASB Statement No. 38, *Accounting for Preacquisition Contingencies of Purchased Enterprises*.

.111 Under FASB Statement No. 141, all business combinations will be accounted for using one method—the purchase method. Given the economic environment of the high-technology industry, mergers and acquisitions have been, and continue to be, prevalent. Therefore, this change to a single method of accounting for business combinations may have major implications for high-tech companies.

.112 Under APB Opinion No. 16, business combinations were accounted for using one of two methods: the pooling-of-interests method (pooling method) or the purchase method. Use of the pooling method was required whenever 12 criteria were met; otherwise, the purchase method was used. Because those 12 criteria did not distinguish economically dissimilar transactions, similar business combinations were accounted for using different methods, producing dramatically different results.

.113 The provisions of FASB Statement No. 141 reflect a fundamentally different approach to accounting for business combinations. The single-method approach reflects the conclusion that virtually all business combinations are acquisitions and, thus, all business combinations should be accounted for in the same way that other asset acquisitions are accounted for—based on the values exchanged. Specifically, FASB Statement No. 141 changes the accounting for business combinations in APB Opinion No. 16 in the following respects:

- FASB Statement No. 141 requires that all business combinations be accounted for by a single method—the purchase method.
- In contrast to APB Opinion No. 16, which required separate recognition of intangible assets that can be identified and named, FASB Statement No. 141 requires that intangible assets be recognized as assets apart from goodwill if they meet one of two criteria—the contractual-legal criterion or the separability criterion.
- In addition to the disclosure requirements in APB Opinion No. 16, FASB Statement No. 141 requires disclosure of the primary reasons for the business combination and of the allocation of purchase price paid to the assets acquired and liabilities assumed by major balance sheet caption.

.114 The provisions of FASB Statement No. 141 apply to all business combinations initiated after June 30, 2001. The Statement also applies to all business combinations accounted for using the purchase method for which the date of acquisition is July 1, 2001, or later. (See the “New Accounting Pronouncements and Other Guidance” section of this Alert for additional information related to this standard.)

Goodwill and Other Intangible Assets

.115 The FASB issued FASB Statement No. 142, *Goodwill and Other Intangible Assets*, in June 2001. This Statement supersedes APB Opinion No. 17, *Intangible Assets*, and addresses how to account for intangible assets that are acquired individually or with a group of other assets upon their acquisition. This Statement also addresses how to account for goodwill and other intangible assets after they have been initially recognized in the financial statements. The nature and activities of the high-technology industry lend importance to this new standard. Be aware of its guidelines, especially regarding your high-technology clients.

.116 FASB Statement No. 142 changes the unit of account for goodwill and takes a very different approach to how to account for goodwill and other intangible assets subsequent to their initial recognition. Because goodwill and some intangible assets will no longer be amortized, the reported amounts of goodwill and intangible assets will not decrease at the same time and in the same manner as under previous standards. Specifically, FASB Statement No. 142 changes the subsequent accounting for goodwill and other intangible assets in the following respects:

- FASB Statement No. 142 adopts a more aggregate view of goodwill and bases the accounting for goodwill on the units of the combined entity into which an acquired entity is integrated. Those units are referred to as reporting units.
- APB Opinion No. 17 presumed that goodwill and all other intangible assets were wasting assets (that is, finite lived). FASB Statement No. 142 does not presume that those assets are wasting assets. Instead, goodwill and other intangible assets that have indefinite useful lives will not be amortized but, rather, will be tested at least annually for impairment.
- FASB Statement No. 142 provides specific guidance for testing goodwill for impairment. The annual test for goodwill impairment uses a two-step process that begins with an estimation of the fair value of a reporting unit. However, if certain criteria are met, the requirement to test goodwill for impairment annually can be satisfied without a remeasurement of the fair value of the reporting unit.

.117 The provisions of FASB Statement No. 142 are required to be applied starting with fiscal years beginning after December 15, 2001. This Statement is required to be applied to all goodwill and other intangible assets recognized in the financial statements at that date. Goodwill and intangible assets acquired after June 30, 2001, will be subject immediately to the nonamortization provisions of FASB Statement No. 142.

.118 Because there have been numerous combinations of high-tech companies in recent years, and because goodwill may represent a significant asset on the balance sheets of these combined companies, you should carefully consider the impact of any such change on your high-tech clients. Specifically, such a change will necessitate the need to identify the reporting units of the organization and test for impairment of goodwill at the reporting unit level. This process will require extensive valuation judgments and calculations.

.119 A valuable tool to use when auditing or valuing intangibles is the AICPA Practice Aid *Assets Acquired in a Business Combination to Be Used in Research and Development Activities: A Focus on Software, Electronic Devices, and Pharmaceutical Industries* (product no. 006609kk).

Recent EITF Issues and AICPA TPAs Relevant to the High-Tech Industry

.120 Auditors of high-tech companies should pay close attention to EITF issues and AICPA Technical Practice Aids (TPAs) because in the past several years the EITF and the AICPA addressed a number of topics relevant to the high-technology industry.

.121 The application of EITF consensus positions (category *c* of the GAAP hierarchy) effective after March 15, 1992, is mandatory under SAS No. 69, *The Meaning of Present Fairly in Accordance With Generally Accepted Accounting Principles* (AICPA, *Professional Standards*, vol. 1, AU sec. 411), as amended.

.122 TPAs bring together for continuing reference selected technical questions and answers (nonauthoritative), SOPs (accounting as well as auditing and attestation), AcSEC Practice Bulletins, a list of Issues Papers of the Accounting Standards Division of the AICPA, and Practice Alerts of the AICPA SEC Practice Section Professional Issues Task Force.

Employee Stock Options

.123 As noted in last year's Alert, stock options are an important accounting-related area for your high-tech clients. Knowledgeable workers are the prime assets of high-tech businesses and are the key to wealth creation. Accounting for their compensation sometimes raises difficult accounting issues if high-tech companies include stock options in employee compensation packages. High-tech companies grant stock options to essential employees to attract, motivate, and retain them, in addition to granting stock options, awards of stock, or warrants to consultants, contractors, vendors, lawyers, finders, lessors, and others. Issuing equity instruments makes a lot of sense, partly because of the favorable accounting treatment and partly because the use of equity conserves cash and generates capital.

.124 The accounting for employee stock options has received renewed attention in recent months. Several major U.S. companies have announced their intentions to change their method of accounting for employee stock options to an approach that recognizes an expense for the fair value of the options granted in arriving at reported earnings. Recognizing compensation expense relating to the fair value of employee stock options granted is the preferable approach under FASB Statement No. 123, *Accounting for Stock-Based Compensation*. It also is the treatment advocated by an increasing number of investors and other users of financial statements.

.125 Due to these developments, as well as the increased scrutiny from the press, Congress, regulators, and others, the FASB is currently working on a project that would affect the way companies account for employee stock options. The FASB has recently issued an exposure draft, *Accounting for Stock-Based Compensation—Transition and Disclosure*, which would amend FASB Statement No. 123. See the discussion of this exposure draft in the "On the Horizon" section of this Alert.

.126 Currently, there are two permissible methods of accounting for employee stock options: APB Opinion No. 25, *Accounting for Stock Issued to Employees*, which uses the intrinsic value method, and FASB Statement No. 123, which uses the fair-value method. Most e-businesses choose APB Opinion No. 25, which is easier to apply.

.127 Stock options granted to consultants, contractors, and nonemployees for services rendered or goods purchased must be accounted for in accordance with FASB Statement No. 123. Accordingly, companies must use the fair value method, not the intrinsic value method. EITF Issue No. 96-18, *Accounting for Equity Instruments That Are Issued to Other than Employees for Acquiring, or in Conjunction with, Selling Goods and Services*, offers guidance in applying FASB Statement No. 123 to these transactions.

.128 With the downturn in share prices of many e-businesses continuing throughout 2002, the stock options previously granted to many essential employees may now have lost much of their value. To retain these employees, many companies may reprice the options. FASB Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation*, is an interpretation of APB Opinion No. 25, and provides that “if the exercise price of a fixed stock option award is reduced, the award shall be accounted for as variable from the date of the modification to the date the award is exercised, is forfeited, or expires unexercised.” The EITF also addressed the repricing issue in EITF Topic No. D-91, *Application of APB Opinion No. 25, Accounting for Stock Issued to Employees*, and FASB Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation, to an Indirect Repricing of a Stock Option*.

.129 FASB Interpretation No. 44 indicates that any modification or sequence of actions by a grantor to directly or indirectly reduce the exercise price of an option award causes variable accounting for the repriced or replacement award for the remainder of the award’s life. The change from a fixed to a variable plan triggers the requirement to record income statement charges (or credits) at each reporting date. So, although the intrinsic value of the option may be zero at the repricing (or modification) date, from that date until the final exercise (or expiration or forfeiture), the company must report an expense or reversal of that expense even though the options are not vested. This expense is the difference between the fair value of the shares at each balance-sheet date and the exercise price.

.130 The change in accounting triggered by repricing requiring compensation to be recorded has no effect on cash flow. However, it may reduce net income and earnings per share. Management should be made aware of the consequences of making any modification to their option plans and outstanding options and the financial statement impact of giving equity instruments to nonemployees.

Asset Impairment

.131 High-technology products are susceptible to rapid obsolescence. Long-lived assets used by enterprises involved in the manufacture of such products may require significant retooling to retain their usefulness. In some cases, these assets may not lend themselves to modification and could be rendered obsolete. Additionally, the high-tech industry has experienced a spurt of merger and acquisition activity. The elimination of duplicate functions, which typically accompanies a merger or acquisition, may affect the carrying amount of certain assets. These are just a few of the examples of the instances in which the carrying amounts of recorded assets may not be recoverable and the provisions of FASB Statement No. 144 may need to be applied.

.132 FASB Statement No. 144 provides the primary guidance on accounting for the impairment of long-lived assets. In general, the accounting for the impairment of long-lived assets depends on whether the asset is to be held and used or held for disposal.

Long-Lived Assets Held and Used

.133 Long-lived assets held and used should be reported at cost, less accumulated depreciation, and should be evaluated for impairment if facts and circumstances indicate that impairment may have occurred. Conditions or events such as the following may indicate a need for assessing the recoverability of the carrying amount of assets:

- A dramatic change in the manner in which an asset is used
- A reduction in the extent to which an asset is used

- Forecasts showing lack of long-term profitability
- A change in the law or business environment
- A substantial drop in the market value of an asset

.134 If events and circumstances indicate that impairment may exist, the entity is required to estimate the future cash flows expected to result from the use of the asset and its eventual disposition. An asset is deemed to be impaired if its carrying amount exceeds the sum of the expected future cash flows (undiscounted and without interest charges) from the asset. The impairment is measured as the amount by which the carrying amount exceeds the fair value of the asset. After an impairment is recognized, the reduced carrying amount of the asset should be accounted for as the new cost of the asset and depreciated over the remaining useful life. Restoration of previously recognized impairment losses is prohibited.

.135 Lack of an asset-impairment evaluation system may indicate a material weakness in an entity's internal controls. Further, a lack of documentation generally increases the extent to which you must apply professional judgment in evaluating the adequacy of management's writedowns.

Long-Lived Assets to Be Disposed of by Sale

.136 Long-lived assets to be disposed of by sale (assets for which management has committed to a plan of disposal) should be reported at the lower of the carrying amount or fair value, less costs to sell. Subsequent revisions to fair value less costs to sell should be reported as adjustments to the carrying amount of the asset to be disposed of. However, the carrying amount may not be adjusted to an amount greater than the carrying amount of the asset before an adjustment was made to reflect the decision to dispose of the asset.

.137 Although some long-lived assets might have previously been subject to APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, FASB Statement No. 144 amended APB Opinion No. 30. The provisions of FASB Statement No. 144 apply to all long-lived assets. Therefore, gains or losses on disposal of a discontinued operation are no longer measured on a net realizable value basis, and future operating losses are no longer recognized before they occur. (See the "New Accounting Pronouncements and Other Guidance" section of this Alert for additional information related to this Statement.)

Assets to Be Disposed of Other Than by Sale

.138 Assets that are to be abandoned, exchanged for a similar productive asset, or distributed to owners in a spin-off are to be considered as held and used until they are disposed of. If the asset is to be abandoned, the depreciable life is revised in accordance with APB Opinion No. 20, *Accounting Changes*. If the asset is to be exchanged for a similar productive asset or distributed to owners in a spin-off, an impairment loss is to be recognized at the date of exchange or distribution, if the carrying amount of the asset exceeds its fair value at that date.

.139 The provisions of FASB Statement No. 144 are effective for financial statements issued for fiscal years beginning after December 15, 2001, and interim periods within those fiscal years, with early implementation encouraged. The provisions of the Statement generally are to be applied prospectively.

Research and Development Costs

.140 As noted in last year's Alert, ongoing innovation is the heart of competition in the high-tech industry and is required for survival. Consequently, most high-tech companies devote a substantial portion of their resources to research and development (R&D) activity. According to paragraphs 8(a) and 8(b) of FASB Statement No. 2, *Accounting for Research and Development Costs*:

Research is planned search or critical investigation aimed at discovery of new knowledge with the hope that such knowledge will be useful in developing a new product or service.

Development is the translation of research findings or other knowledge into a plan or design for a new product or process . . . whether intended for sale or use.

.141 High-tech management may reduce net loss or increase earnings by capitalizing R&D costs, which are significant for many companies in the high-technology industry. However, FASB Statement No. 2, as interpreted by FASB Interpretation No. 4, *Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method*, prohibits capitalization and requires R&D to be expensed when incurred, except for acquired R&D with alternative future uses purchased from others. In addition to the requirement to expense internal R&D, FASB Statement No. 2 requires disclosure in the financial statements regarding the total amount of R&D costs charged to expense.

.142 Some high-tech companies acquire their assets through mergers and acquisitions. One purpose of these business combinations is to acquire in-process R&D. You may need to hire a technology specialist to determine which acquired technology objects have alternative future uses. For clients with technology with alternative future uses, you should verify that they are properly valued and capitalized.

.143 The AICPA Practice Aid *Assets Acquired in a Business Combination to Be Used in Research and Development Activities: A Focus on Software, Electronic Devices, and Pharmaceutical Industries* (product no. 006609kk) may be helpful in valuing these intangible assets. The Practice Aid is available from the AICPA Order Department at (888) 777-7077 or go online at www.cpa2biz.com.

New Auditing and Attestation Pronouncements and Other Guidance

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.146 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AU sec. 316), supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU sec. 316A); amends SAS No. 1, section 230 (AU sec. 230); and amends SAS No. 85, *Management Representations* (AU sec. 333), as amended. The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02).³ However, SAS No. 99, establishes standards and provides guidance to

³ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 312]), or fraud.

auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.⁴

.147 The following is an overview of the content of SAS No. 99, with references to paragraphs in the new fraud standard:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs 5 through 12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph 13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs 14 through 18.)
- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather information necessary to identify risks of material misstatement due to fraud, by:
 1. Inquiring of management and others within the entity about the risks of fraud. (See paragraphs 20 through 27.)
 2. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs 28 through 30.)
 3. Considering fraud risk factors. (See paragraphs 31 through 33, and the Appendix, "Examples of Fraud Risk Factors.")
 4. Considering certain other information. (See paragraph 34.)
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs 35 through 42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs 43 through 45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence (see paragraph 46). The section requires the auditor to respond to the results of the risk assessment in three ways:
 1. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned (See paragraph 50.)
 2. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed (See paragraphs 51 through 56.)

⁴ Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statements in accordance with generally accepted auditing standards. Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), and Statement on Standards for Consulting Standards (AICPA, *Professional Standards*, vol. 2, CS sec. 100) provide guidance to accountants relating to the performance of such services.

3. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls (See paragraphs 57 through 67.)

- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs 68 through 74.) It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs 75 through 78.)
- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs 79 through 82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph 83.)

.148 SAS No. 99 also includes an Exhibit, "Management Antifraud Programs and Controls: Guidance to Help Deter, Detect, and Prevent Fraud," which has been developed to assist auditors in obtaining an understanding of programs and controls established by management to mitigate specific risks of fraud, or that otherwise help to prevent, deter, and detect fraud. SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.149 The AICPA has published a fraud Practice Aid titled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*. The Practice Aid includes topics such as how the new SAS changes audit practice, characteristics of fraud, understanding the new SAS, best practices, and practice aids, such as specialized industry fraud risk factors, common frauds, and extended audit procedures. Auditors should be on the lookout for this new publication.

Practice Aid *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*

.150 In connection with the issuance of SAS No. 99, the AICPA is issuing a Practice Aid to help practitioners implement the new fraud guidance. The practice aid is entitled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (product no. 006613). The Practice Aid includes topics such as:

- How the new SAS changes audit practice
- Characteristics of fraud
- Understanding the new fraud SAS
- Best practices
- Practice aids, such as:
 - Specialized industry fraud risk factors
 - Common frauds and extended audit procedures

The Practice Aid represents valuable guidance in helping practitioners understand and implement SAS No. 99.

New Accounting Pronouncements and Other Guidance

.151 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated with Exit or Disposal Activities</i>
FASB Statement No. 147	<i>Acquisitions of Certain Financial Institutions, an amendment of FASB Statements No. 71 and 144 and FASB Interpretation No. 9</i>
FASB Interpretation No. 45	<i>Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others</i>
SOP 01-5	<i>Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification</i>
SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>
Technical Practice Aid	<i>Software Revenue Recognition</i>
Questions & Answers	<i>FASB Statement No. 87, Employers' Accounting for Pensions</i>

.152 The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org.

FASB Statement No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*

.153 This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*.

.154 The FASB decided to address the accounting and reporting for costs associated with exit or disposal activities because entities increasingly are engaging in exit and disposal activities and certain costs associated with those activities were recognized as liabilities at a plan (commitment) date under Issue No. 94-3 that did not meet the definition of a liability in FASB Concepts Statement No. 6, *Elements of Financial Statements*.

.155 The principal difference between this Statement and Issue No. 94-3 relates to the Statement's requirements for recognition of a liability for a cost associated with an exit or disposal activity. This Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. Under Issue No. 94-3, a liability for an exit cost as defined in Issue No. 94-3 was recognized at the date of an entity's commitment to an exit plan. A fundamental conclusion reached by the FASB in this Statement is that an entity's commitment to a plan, by itself, does not create a present obligation to others that meets the definition of a liability. Therefore, this Statement eliminates the definition and requirements for recognition of exit costs in Issue No. 94-3. This Statement also establishes that fair value is the objective for initial measurement of the liability.

.156 The provisions of this Statement are effective for exit or disposal activities that are initiated after December 31, 2002, with early application encouraged.

On the Horizon

.157 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.158 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees are now publishing exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Auditing Pipeline

New Framework for the Audit Process

.159 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB issued an exposure draft in November 2002, which proposes to add or amend a number of auditing standards. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "Expectation Gap" standards were issued in 1988.

.160 Some of the more important changes to the standards that are proposed are:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to assessment of the risk of material misstatement of the financial statements. Among other things, this will improve the auditor's assessment of inherent and control risks and eliminate the "default" to assess either of these risks at the maximum.
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit.
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls.
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures.

These changes collectively are intended to improve the guidance on how the auditor uses the audit risk model.

.161 In connection with this major initiative, the ASB and the International Auditing and Assurance Standards Board (IAASB) have formed a joint task force to develop joint standards addressing the risk assessment process. These standards will represent a significant step toward converging U.S. and international auditing standards.

.162 You should keep abreast of the status of this project and exposure draft, inasmuch as the proposed SASs will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.163 Proposed AICPA SOP, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*, and proposed FASB Statement of Financial Accounting Standards, *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment—an amendment of APB Opinions No. 20 and 28 and FASB Statements No. 51 and 67 and a rescission of FASB Statement No. 73*, are being issued simultaneously for public comment.

.164 Principally, the proposed FASB Statement would amend FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to exclude from its scope the accounting for acquisition, development, and construction costs of real estate developed and used by an entity for subsequent rental activities. The accounting for those costs would be subject to the guidance in the proposed SOP. It also would amend APB Opinion No. 28, *Interim Financial Reporting*, to require that those costs that the proposed SOP would require be expensed as incurred on an annual basis also be expensed as incurred in interim periods.

.165 The proposed SOP addresses accounting and disclosure issues related to determining which costs related to property, plant, and equipment should be capitalized as improvements and which should be charged to expense. The proposed SOP also addresses capitalization of indirect and overhead costs and component accounting for property, plant, and equipment. Final Statements are expected to be issued during the first half of 2003.

Exposure Draft on Liabilities and Equity

.166 The FASB has issued an exposure draft of a proposed Statement *Accounting for Financial Instruments with Characteristics of Liabilities, Equity, or Both*. This proposed Statement would establish standards for issuers' classification in the statement of financial position of financial instruments with characteristics of liabilities, equity, or both. It would require that an issuer classify liability components and equity components of a financial instrument separately. This proposed Statement would prohibit the presentation of items between the liabilities section and the equity section of the statement of financial position. The FASB also issued an exposure draft of a proposed amendment, titled *Proposed Amendment to FASB Concepts Statement No. 6 to Revise the Definition of Liabilities*, which would amend FASB Concepts Statement No. 6, *Elements of Financial Statements*. This proposed amendment to FASB Concepts Statement No. 6 would revise that definition to also include as liabilities certain obligations that require or permit settlement by issuance of the issuer's equity shares and that do not establish an ownership relationship. The objective of the project is to improve the transparency of the accounting for financial instruments that contain characteristics of liabilities, equity, or both. Final Statements are expected to be issued during the fourth quarter of 2002.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.167 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- Audit Guide *Consideration of Internal Control in a Financial Statement Audit* (product no. 012451kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk)
- Audit and Accounting Guide *Audit Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012551kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012772kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- *Accounting Trends & Techniques—2002* (product no. 009894kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Practice Aid *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (publication by the end of 2002)
- General Audit Risk Alert—2002/03 [AAM section 8010]
- Compilation and Review Alert *Compilation and Review Alert—2002/03* [AAM section 8015]
- Audit Risk Alert *E-Business Industry Developments—2002/03* [AAM section 8210]

Audit and Accounting Manual

.168 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditor's reports, checklists, and engagement letters; management representation letters; and confirmation letters.

AICPA reSOURCE Online: Accounting and Auditing Literature

.169 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, all Audit and Accounting Guides, all Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential online service, go to www.cpa2biz.com.

Educational Courses

.170 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Those courses include:

- *AICPA's Annual Accounting and Auditing Workshop* (product no. 737082kk [VHS tape/manual] and 187082kk [video]). Whether you are in industry or public practice, this course keeps you current and informed, and shows you how to apply the most recent standards.
- *Fair Value Accounting for Hedge Transactions* (product no. 735182kk). This course helps you understand GAAP for derivatives and hedging activities. Also, you will learn how to identify effective and ineffective hedges.
- *Fraud and the Financial Statement Audit: Auditor Responsibilities Under New SAS* (product no. 731810kk [text] and 181810kk [video]; available December 31, 2002). The new fraud standard may not change your responsibilities for detecting fraud in a financial statement audit, but it will change how you meet that responsibility. Practitioners will benefit from a risk assessment approach to detecting fraud in a financial statement audit. You will learn the conceptual framework necessary to understand the characteristics of fraud.
- *Auditing for Internal Fraud* (product no. 730237kk). This course provides an auditor with the tools to identify fraud schemes. It trains CPAs to focus their analytical and substantive tests on the fraud triangle when evaluating internal controls. It also illustrates the latest in fraud prevention and detection programs implemented by industry leaders.

- *Identifying Fraudulent Financial Transactions* (product no. 730243kk). Learn to identify the red flags of fraud in financial information and to analyze a variety of fraud schemes. You will develop a framework for detecting financial statement fraud and learn about fraud schemes in revenue, inventory, liabilities, and assets.
- *Independence* (product no. 739058kk). This interactive CD-ROM course reviews the AICPA authoritative literature covering independence standards (including the newly issued SECPS independence requirements), SEC regulations on independence, and Independence Standards Board (ISB) standards.
- *SEC Reporting* (product no. 736747kk). This course helps the practicing CPA and corporate financial officer learn to apply SEC reporting requirements. It clarifies the more important and difficult disclosure requirements.
- *E-Commerce: Controls and Audit* (product no. 731551kk). This course is a comprehensive overview of the world of e-commerce. Topics covered include internal control evaluation and audit procedures necessary for evaluating business-to-consumer and business-to-business transactions.

Online CPE

.171 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) provides unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

CPE CD-ROM

.172 *The Practitioner's Update* (product no. 738450kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.173 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.174 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.175 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.176 AICPA Online, at www.aicpa.org, offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the Professional Standards, and CPE courses.

Other Helpful Web Sites

.177 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this Alert.

.178 This Audit Risk Alert replaces *High-Technology Industry Developments—2001/02*. *High-Technology Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ymishkevich@aicpa.org or write to:

AAM Section 8140

Real Estate Industry Developments—2002/03

How This Alert Can Help You

.01 This Audit Risk Alert can help you plan and perform your real estate industry audits. The knowledge delivered by this Alert can provide assistance in achieving a more robust understanding of the business and economic environment in which your clients operate. This Alert is an important tool in helping you identify the significant risks that may result in the material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the real estate industry, and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert can assist you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Industry and Economic Developments

The U.S. Economy

.04 As of the third quarter of 2002, anxious economists are downgrading their forecasts, and some crucial sectors of the economy are pushing the likelihood of a rebound into next year because of the abrupt slowdown in the economic recovery.

.05 For now, the overall economy is expanding, but sluggishly. Jobs are growing, but barely. And with a depressed stock market, concerns over a possible military action in Iraq, fears of terrorist strikes, and corporate scandals weighing on the national psyche, there is none of the exuberance that marked the recovery in the late 1990s.

.06 Analysts argue over whether the summer slump was just a pause in the rebound—perhaps as companies obsess about making sure their financial reports are accurate—or something more ominous. Even optimists say the chances of a double-dip recession—when a recession is followed by a short period of growth, only to be followed by another recession—once slim, are now up to 20 percent or more.

.07 The economy appears to be in a struggle between declining business confidence and strong consumer spending. Eventually, consumer demand should overcome business wariness, unless cautious businesses cut so many jobs that consumers finally give up. The same dynamic was at work during the fall of 2001. After September 11, the business sector froze, the consumer sector did not, and eventually consumer demand jump-started the economy.

.08 The underlying economic fundamentals remain relatively sound and point toward a moderate economic growth scenario. However, stock market weakness, coupled with recent data releases, has prompted downward forecast revisions.

Stock Market Woes

.09 Accounting scandals and corporate bankruptcies have generated tremendous investor uncertainty resulting in a dramatic decline in stock prices. While this is disconcerting, Wall Street scandals are not expected to play a *significant* adverse role on consumer spending or overall economic growth. Furthermore, any negative economic impacts generated by stock price declines are expected by economists to be constrained to third-quarter activity.

.10 Potentially, the decline in stock market prices can affect real economic activity by reducing consumer wealth and by adversely affecting consumer buying attitudes. Both conditions could reduce consumer spending activity.

.11 Stock prices have declined throughout 2002, resulting in a multitrillion dollar decline in wealth holdings. Most economists believe the decline in wealth will have a relatively small adverse impact on consumer spending. The wealth decline is primarily a temporary paper setback for investors. The underlying economic fundamentals are relatively sound and the profit picture facing corporate America is showing mixed signs of improvement. This suggests that once investors regain confidence in corporate financial reporting, the market will rebound strongly.

.12 Furthermore, the current environment of low interest rates and stock uncertainty has prompted additional support to real estate activity—providing additional support for real estate appreciation.

Current Monetary Policy

.13 In November 2002, for the first time in 11 months, the Federal Reserve Board lowered the federal funds rate to 1.25 percent, its lowest level in 41 years. At this point the Fed believes that the risks between inflation and very slow economic growth are balanced.

The Sarbanes-Oxley Act

.14 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002. The Act includes far-reaching changes in federal securities regulation that could represent the most significant overhaul since the enactment of the Securities Exchange Act of 1934. The Act prescribes a system of federal oversight of public auditors through a Public Company Accounting Oversight Board, a new set of auditor independence rules, new disclosure requirements applicable to public companies and insiders, and harsh civil and criminal penalties for persons who are responsible for accounting or reporting violations. The Act also imposes new restrictions on loans and stock transactions involving corporate insiders.

.15 A more complete summary of the Act is available on the AICPA Web site at www.aicpa.org/info/sarbanes_oxley_summary.htm and in the AICPA general *Audit Risk Alert* 2002/03.

General Industry Trends and Conditions

.16 Although the U.S. economy appears to point toward a moderate economic growth scenario, most sectors of real estate will continue to feel the pinch for the next 12 months, according to the Urban Land Institute's (ULI) mid-year Real Estate Forecast.

.17 With the exception of housing, real estate performance will likely lag behind the economy, the outlook says, cautioning that rising vacancies coupled with declines in commercial rents and property values have reduced profitability for many owners. Several ULI members provided industry insights for the report, which included a member survey.

.18 The forecast notes that recent encouraging economic news has led to predictions of a 4 percent growth rate in the U.S. gross domestic product by 2003. However, despite the likelihood of improvement for the

economy, commercial real estate is still reeling from the sharp economic downturn of last year. In particular, the lack of job growth has been the single most damaging factor affecting the industry, the study says.

.19 Only 49 percent of the respondents to ULI's forecast survey expect the profitability of real estate firms to be "good to excellent" through mid-2003, compared to 60 percent one year ago. In addition, 11 percent are expecting profitability to range between modestly poor and abysmal. The ULI forecast projects strongest profits among real estate services firms, followed by financial services/institutional investors, residential or resort developers, private real estate operating firms and developers, public real estate operating companies, and finally, real estate investment trusts.

.20 According to the forecast, development prospects will be strongest for housing in general. It ranks master-planned communities, middle-income detached housing, and infill housing as having the most potential. Urban mixed-use properties, mixed-use town centers, and attached housing are also expected to offer modestly good prospects. Offering the least potential are upscale/luxury hotels, followed by (in order) downtown office space, high-rise suburban office space, resort hotels, midprice and economy hotels, regional malls, and low-rise suburban office space.

.21 ULI survey participants voted Washington, D.C., as the "most favored" investment market, with New York, Los Angeles, Chicago, and San Diego rounding out the top five. The forecast comments that:

- Washington is "strong because of the tight market that predated the recession and the fact that demand remains strong in many sectors of the local economy, particularly government and defense contracting."
- New York suffered "the loss of the World Trade Center [which] has taken a lot of space out of the market and kept the market from deteriorating. . . . Infusion of state and federal funds to revitalize lower Manhattan will also help."
- Los Angeles "will lead because of its diversified economy—not heavily dependent on technology sectors—and its strong population growth."
- Chicago "will benefit from its broadly diversified economy and from recovery in the manufacturing sector."
- San Diego "will get a boost from increased defense spending."

.22 The retail sector appears the least affected by the weakened status for the commercial real estate industry, primarily because "the prospects for attractive rent increases were not particularly favorable last year and have not changed much since," the forecast says. The for-sale housing sector is expected to fare much better than the commercial side, with infill housing and middle-income detached homes experiencing fair to strong price increases. In general, consumer-driven real estate markets will fare better than business-driven markets over the coming year, the forecast concludes.

.23 In addition to forces in the general economy, other forces will continue to reshape the real estate industry, including the following:

- *Globalization.* Through consolidation and expansion, real estate companies are becoming international enterprises. Numerous opportunities for global expansion exist outside the United States, particularly in Europe and Asia. However, U.S. companies that expand overseas must be savvy about local conditions and must carefully assess the risks of doing business in an unfamiliar environment.
- *Larger real estate companies.* Traditionally, real estate companies tended to be privately held, entrepreneurial enterprises. This continues to change. Today, there are more than 150 public real estate companies. Recently, Standard & Poor's changed its policy and added several real estate investment trusts (REITs) to its indexes. In addition, primarily through mergers and acquisitions, larger real estate companies are continuing to emerge.

Larger public companies have different operating characteristics than smaller private companies. For example, larger public companies may have more comprehensive internal controls (including internal audit departments) and more sophisticated information technology (IT) to help them manage their real estate assets.

- *Technology.* Technology has played and will continue to play a significant role in reshaping the industry. The Internet has greatly enhanced the marketing of commercial property and facilitated the exchange of information about underlying industry conditions. The result has been a significant decrease in the time available to make real-estate-related decisions. In what had previously been a relatively slow-moving industry, the speed and availability of information made possible by new technology have increased the pace at which real estate business is conducted.

As a result of these recent trends, the real estate industry will endure significant and lasting change. The exact nature of these changes is still largely unknown; more time is needed to observe and analyze the interaction of these dynamics. This is still the embryonic stage of what is sometimes described as a revolution, but there is a consensus that the real estate industry is now more complex and sophisticated than ever before.

Industry Segment Conditions

Office Market Conditions

.24 The office market has fallen farther and faster than anyone thought possible a year ago. The vacancy rate, which reached a cyclical low point of 8.5 percent in the third quarter of 2000, rose to over 15 percent in 2002, well above the 10 percent rule of thumb that constitutes a balanced market.

.25 While tenants continued to vacate office space, the construction pipeline added 20.5 million square feet of competitive space (multitenant plus single tenant), a process that was initiated before the recession.

.26 The economy shows signs of recovery, but job growth is anemic, corporate earnings have been disappointing so far this year, and the recovery remains fragile. A sustained increase in business capital spending is required to power the expansion. As long as corporate earnings are poor, there isn't much to encourage capital spending, corporate hiring, or office leasing activity. Analysts are predicting the nation's vacancy rate to peak above 16 percent by the end of 2002 and then begin a moderate decline in 2003.

Industrial Market Conditions

.27 The industrial market is bottoming out, thanks to a decline in construction coupled with a slight pickup in demand. The vacancy rate is expected to peak at around 9 percent, far below the 13.7 percent peak that defined the bottom of the last recession 10 years ago. Small tenants and owner-users are leading the charge, while large companies remain paralyzed by earnings fears and the roller coaster stock market. The stabilizing industrial market disguises dramatic variations among different regions, some of which clearly remain in decline, while others are seeing a healthy pick up in demand.

.28 Nationally, the vacancy rate increased by less than one-tenth of 1 percent during the second quarter of 2002. By comparison, it had been rising by an average of 59 basis points per quarter over the prior five quarters. The five markets posting the sharpest vacancy declines were San Antonio, Orlando, Pittsburgh, Los Angeles, and Chicago. The five markets posting the sharpest increases were Des Moines, Phoenix, Boston, Sacramento, and Oakland.

.29 The improvement from recent quarters is due both to supply and demand factors. On the supply side, the amount of space under construction continues to fall. New space completions totaled 15 million square feet in the second quarter, half the quarterly average of 31 million square feet completed from 1999 through 2001. The amount of space still under construction totals 53 million square feet, well below half the 122 million square feet underway less than two years ago. On the demand side, the manufacturing sector of the economy continues to expand slowly even as the economy has lost momentum in recent weeks.

.30 The outlook for the industrial market depends entirely on the economy. Developers and lenders have cut back on construction. The economy is expanding, but not quickly enough to encourage hiring activity. Despite the moribund economy, the industrial market is moving into the recovery phase of the real estate cycle, but it is unlikely to bounce back quickly. Analysts expect the vacancy rate to begin a slow decline late this year, continuing into next year.

Retail Market Conditions

.31 Of all property types, retail probably has been the least affected by the recession. Retail sales are down and shopping center vacancy rates are up, but not to the extent of prior recessions. In fact, consumers have carried the economy through the recession. With the economy teetering on the brink of a deep recession after September 11, shoppers rushed to the malls and auto showrooms like it was their patriotic duty to spend the country out of recession. This was coupled with the fact that consumers had more money in their pockets due to low gas prices, tax rebate checks, low interest rates, and a rush of mortgage refinancing activity.

.32 The downside is that the rebound in retail sales and the retail property market is likely to be less robust than in prior recoveries. Several factors point to this soft rebound:

- Gas prices have risen steadily during the year.
- Home sales remain high, but may be poised for a fall. A decline in home sales would dampen sales at home furnishings and improvement stores.
- Mortgage refinancing may decline if interest rates begin to rise again.
- Joblessness continues to rise.

All of this means that retail sales will be weaker than usual following a recession, but most analysts expect moderate year-over-year gains, nevertheless.

.33 Market conditions vary widely by region. Several markets are seeing tight conditions, including Dallas, Los Angeles, and Silicon Valley, whereas other markets, such as Atlanta, Columbus, and Kansas City, are saturated. Most markets remain in balance, with new and expanding retailers replacing those who have closed or downsized.

Residential Market Conditions

.34 Unlike the broader economy, the single-family market showed no signs of recession in 2001 or 2002. Sales of new and existing homes reached record levels in 2002. With the Federal Reserve Board setting its benchmark for interest rates at its lowest level in 41 years, and with strong demographics, homebuilding has shrugged off stock market woes and growing unemployment to keep growing. Earlier forecast numbers for residential construction have now been revised upward. Housing starts were predicted to drop below 1.5 million for the year from 1.6 million in 2001, but they are now expected to finalize at 1.55 million starts for 2002.

.35 However, there are signs that the housing boom may be coming to an end. For the past several years, a rare confluence of factors—including low interest rates, low unemployment, easy credit standards, and tight housing supply—have combined to stimulate an unprecedented surge in home sales, sending prices rocketing up. The result: housing has been one of the most important bulwarks of the U.S. economy, even as it gets buffeted by plunging stocks, business scandals, and the war on terror. Now, however, some of the factors behind the housing boom show signs of fading, and indicators that traditionally foretell weakness in the market are emerging.

.36 In more than one hundred U.S. cities, home prices have climbed at least twice as fast as household incomes since 1998, according to data analyzed for the *Wall Street Journal* by the economic consulting firm Economy.com. Nationally, prices have risen at more than triple the rate of incomes in the last two years, a surge that is steadily putting home ownership out of the reach of more people. The nationwide price and income figures had tracked together closely through the 1990s boom.

.37 Though the problem is most common in the Northeast and on the West Coast, the list of localities with out-of-proportion prices includes large cities around the country such as Atlanta, Las Vegas, Denver, Houston, Tucson and Charleston, S.C. In Miami, home prices have shot up 58 percent since the beginning of 1998, while incomes have risen only 16 percent. In New York's Long Island suburbs, an 81 percent increase in home prices compares with a 14 percent rise in incomes. In Boston, home prices have jumped 89 percent, compared with income gains of only 22 percent.

.38 In some cities, including San Diego, Miami, and Washington, the run-ups have accelerated in the past year, confounding expectations that the market would cool off before it got too far out of line. In the late 1980s and early 1990s, the presence of such "bubblettes" in such places as Boston, Houston, and Los Angeles signaled the end of a boom cycle.

.39 On the multifamily side, building permits declined significantly during August, dropping 19 percent to 295,000 units permitted. On a year-over-year basis, multifamily permits fell more than 2 percent from 302,000 permits issued in August 2001.

.40 The most active states remained the same during the month of July. Four of the top five states witnessed an increase in permit levels in comparison to July 2001. On the upside were Florida, Texas, California, and New York, while activity in Georgia declined. Overall, these five states account for nearly 46 percent of total multifamily permit activity in the nation.

.41 The effect of the recent economic slowdown and low mortgage rates has been seen primarily within the nation's multifamily housing market. Starting midway through 2001, the apartment market saw steadily declining demand over a period of three quarters. As mounting job losses in some areas forced some households to relocate and falling mortgage rates spurred a new surge of first-time homebuyers, vacancies rose to a national average of 8.5 percent in the second quarter of 2002.

Hospitality Market Conditions

.42 Occupancies in the hospitality sector will suffer from a continued slowdown in corporate travel in 2002. The demand for lodging is being rocked by a variety of economic and security concerns, including the failure of the economy to strengthen to the extent most economists had forecast, the negative wealth effect from the sharp decline in stock values in throughout this year, the erosion in consumer confidence, increasing frustration with the inconvenience of air travel, and heightened fears of U.S. action against Iraq.

.43 The economy and the specific effects of the recent events will restrain lodging demand growth and encourage continued discounting through the end of 2002, according to PricewaterhouseCoopers. They are forecasting revenue per available room (RevPAR) to decline 2.3 percent this year. Without a catalyst for strong rebound in business travel in the short term, RevPAR will increase by only 3.5 percent in 2003. A more robust outlook is delayed to 2004, when RevPAR is expected to improve by 5.6 percent.

Real Estate Investment Trusts

.44 The prices for REIT shares bottomed out in late 1999 and have seen a major rebound throughout 2000, 2001, and 2002. Equity REITs, which make money by buying and then renting out offices, apartments, shopping malls, and other buildings, have posted a 55 percent cumulative total return since year-end 1999, according to the National Association of Real Estate Investment Trusts. Over the same stretch, the Standard & Poor's 500-stock index has slumped 35 percent. However, after two years of increases, returns on REITs fell 9 percent in the third quarter of 2002, according to Morgan Stanley.

.45 Green Street Advisors of Newport Beach, California, calculates the value of the real estate owned by REITs and then compares it with current REIT share prices. There has often been a yawning gap between these two numbers, with REIT shares selling at both steep discounts and steep premiums to this "net asset value." But over the past dozen years, REITs—on average—have traded at net asset value.

Environmental Factors Affecting Financial Reporting

Pressures to Perform

.46 Businesses deal with pressures that arise from a variety of sources, both internal and external. External pressures come primarily from the capital markets, with many believing that Wall Street's expectations too often drive inappropriate management behavior. Management often is under pressure to meet short-term performance indicators, such as earnings or revenue growth, financial ratios tied to debt covenants, or other measures. Most often the intentions of management are to follow sound and ethical practices, but pressure may build when analysts and shareholders demand short-term performance and when competitors move closer to the edge of the range of acceptable behavior.

.47 Members of top management also may be pressured to demonstrate that shareholder value has grown as a consequence of their leadership. Boards of directors often create pressure on management to meet financial and other goals. There also is a well-established practice of motivating management with stock options and other equity instruments that attempt to align management and shareholder interests. With their own performance and compensation tied to operating or financial targets, management can, in turn, push hard on personnel throughout the company, including those in operating business units, to meet what may be overly optimistic goals. This high-pressure environment can create an incentive to adopt practices that may be too aggressive or inconsistently applied in an effort to meet perceived expectations of the capital markets, creditors, or potential investors. At some point, the motivation behind earnings management can become strong enough for individuals with the right opportunity to move beyond acceptable practices, even though they are otherwise honest individuals. The greater the pressures, the more likely individuals will rationalize the acceptability of their actions.

Complexity and Sophistication of Business Structures and Transactions

.48 The increasing sophistication of the capital markets and the creativity of investment bankers and other financial advisers have fostered a wide variety of complex financial instruments and structured financial transactions. Many companies now use complex transactions involving transactions with one another in the form of purchases/sales of assets, derivative transactions, and intricate operating agreements designed to meet a specific reporting objective as well as an economic objective. Some companies have transferred assets off-balance-sheet or arranged for units to be acquired by special purpose entities, joint ventures, limited liability corporations, or partnerships, retaining substantially all the risks and rewards of ownership but without "control." Recent business failures, including the boom-bust cycle of dot-com enterprises, have focused attention on the potential risks of these business structures and transactions and the challenge of reporting them in a way that is easily understood by financial statement users.

.49 Many companies have adopted rapid and innovative forms of business expansion, either through acquisitions and mergers, or internal development. Such rapid expansion may have been necessary to support high price-to-earnings multiples. However, it also creates many challenges, including integrating disparate operations, melding internal control processes, and meeting expanded financing needs. Liquidity crises or financial reporting failures may result.

Current Audit and Accounting Issues

Assessing Audit Risks in the Current Environment

.50 The proper planning and execution of an audit has always required you to have a thorough understanding of the real estate industry and the nature of your client's business. For most audit firms, this in-depth understanding means that the most experienced partners and managers must become involved early and often in the audit process. In today's real estate environment, your judgment, knowledge, and experience are even more important than they were in the past.

.51 During the past year, the U.S. economy has suffered some significant declines: consumer confidence has dropped, plant closings and layoffs have increased dramatically, profit margins for many companies have slipped, and many companies have failed.

.52 Periods of economic uncertainty lead to challenging conditions for companies attributable to potential deterioration of operating results, increased external scrutiny, and reduced access to capital. During such times, professional skepticism should be heightened and the status quo should be challenged.

.53 More specifically, in today's economic environment, you should keep the following points in mind as you plan and perform audits of real estate clients.

- Understand how your client is affected by changes in the current business environment.
- Understand the stresses on your client's internal control over financial reporting, and how they may affect its effectiveness.
- Identify key risk areas, particularly those involving significant estimates and judgments.
- Approach the audit with objectivity and skepticism, notwithstanding prior experiences with or belief in management's integrity.
- Pay special attention to complex transactions, especially those presenting difficult issues of form versus substance.
- Consider whether additional specialized knowledge is needed on the audit team.
- Make management aware of identified audit differences on a timely basis.
- Question the unusual and challenge anything that doesn't make sense.
- Foster open, ongoing communications with management and the audit committee, including discussions about the quality of financial reporting and any pressure to accept less than high-quality financial reporting.
- When faced with a "gray" area, perform appropriate procedures to test and corroborate management's explanations and representations, and consult with others as needed.

Audit Planning

.54 As you prepare to conduct quarterly reviews and annual audits of real estate companies, you need to realize that your clients may be working in a new business environment as a result of the stagnant economy. If this is the case, you must gain an understanding of this new environment to adequately plan and perform the audit. Although not all real estate companies are directly affected by the economic downturn, most in the industry could experience some possible indirect effects. Many clients will experience effects related to shifts in demand, collectibility of accounts receivable, or valuation of their investments.

Evaluating Audit Risks

.55 We know that your evaluation of audit risk should start with a solid understanding of your client's business. To develop this understanding, you should be knowledgeable about the entity's strategies for dealing with business conditions—both current conditions and those most likely to exist in the near future. In the real estate industry, business conditions vary greatly across property types and from region to region. The risks associated with developing office buildings are different from those faced by a homebuilder; a warehouse facility in the Northeast may face different issues than a similar facility located on the Pacific Coast. For this reason, you must be knowledgeable about property types and the location in which the entity operates.

.56 Audit risk can be altered when a real estate entity enters into new property types or new geographic markets. You should be aware that current economic conditions might force your real estate clients to expand

beyond their traditional sphere of operations. During audit planning, you should identify new property types or geographic locations and carefully assess the risks associated with the client's change in operating strategy.

Professional Skepticism

.57 The third general audit standard stipulates that due professional care be exercised in planning and conducting an audit engagement. Due professional care requires that you exercise professional skepticism in gathering and evaluating audit evidence. Although you neither assume that management is dishonest nor assume unquestioned honesty, you should consider the increased risk associated with the potential increases in external pressure faced by management during the current economic climate.

.58 As a result of perceived external pressures, companies may be tempted to manage earnings by using nonrecurring transactions or by changing the method of calculating key estimates, such as reserves, fair values, or impairments. Companies may also adopt inappropriate accounting practices resulting in improper recognition or omission of financial transactions. Material nonrecurring transactions may require special disclosure to facilitate the readers' understanding of the reported financial results, and the guidance in Accounting Principles Board (APB) Opinion No. 20, *Accounting Changes*, should be applied in reporting the effects of changes in estimates. Inappropriate transactions or accounting practices that may result in errors requiring adjustments of financial statements might include premature recognition of revenue, failure to appropriately accrue for contingent liabilities that are probable and estimable, and failure to record unpaid purchase invoices. Additionally, you should be particularly skeptical of fourth-quarter events that result in significant revenue recognition, loss accrual, or noncash earnings.

.59 The appropriate level of professional skepticism is needed when corroborating management's representations. Management's explanations should make business sense. Additionally, you may need to consider corroborating management's explanations with members of the board of directors or audit committee.

.60 Other indicators of potential increased accounting and reporting risk calling for increased professional skepticism include:

- Liquidity matters
 - The company is undercapitalized, is relying heavily on bank loans and other credit, and is in danger of violating loan covenants.
 - The company appears to be dependent on an initial public offering for future funding.
 - The company is having difficulty obtaining or maintaining financing.
 - The company is showing liquidity problems.
- Quality of earnings
 - The company is changing significant accounting policies and assumptions to less conservative ones.
 - The company is generating profits, but not cash flow.
- Management characteristics
 - Management's compensation is largely tied to earnings or the appreciation of stock options.
 - The company appears vulnerable to the weakening economic conditions, and management is not proactive in addressing changing conditions.
 - The company's management is selling its investment in company securities more than in the past.
 - There is a significant change in members of senior management or the board of directors.

Consideration of Fraud

.61 Statement on Auditing Standards (SAS) No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), provides the primary guidance on your responsibilities for detecting fraud-related misstatements when performing a financial statement audit.¹

.62 Some examples of fraud risk factors that may exist in real estate entities include the following:

- An excessive interest by management in maintaining or increasing the reported amount of real estate assets through the use of aggressive appraisal assumptions
- The use by management of unusually aggressive accounting practices in recognizing revenue from real estate sales
- Complicated criteria for recognizing sales transactions, making it difficult to assess the completion of the earnings process
- Inadequate responses or an unwillingness to respond to inquiries about known regulatory or legal issues, for example, the presence of environmental contamination on an entity-owned site
- Significant related-party transactions
- Significant side-agreements or transaction terms not previously disclosed
- Key contracts awarded without a competitive bidding process

The general state of the recent economy may raise several fraud risk factors. For example, management may be under significant pressure to obtain additional capital, or the entity may depend on debt with debt covenants that are difficult to maintain under the circumstances.

Auditing Estimates

.63 The real estate industry uses estimates in a variety of ways. For example, supplemental current values of real estate assets and the recognition and measurement of impairment losses both require management to make estimates of future events or assumptions about current conditions.

.64 When auditing estimates, you should be familiar with SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342); the AICPA Practice Aid *Auditing Estimates and Other Soft Information*; and SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.65 Currently, certain segments of the real estate industry are in decline. Certain estimates, for example, expected future cash flows used in the determination of possible asset impairment, require management to make assumptions about future events and conditions. Be skeptical of cash flow and other performance projections that assume overly optimistic upward trends will occur.

.66 Pay close attention to the underlying assumptions used by management when auditing accounting estimates. Management is responsible for making the estimates included in the financial statements. Those estimates may be based in whole or in part on subjective factors, such as judgment based on experience with past as well as current events, and with conditions it expects to exist. You should be alert to the possibility of management's overreliance on economic information based on favorable conditions to predict future outcomes.

¹ Statement on Auditing Standards (SAS) No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82, of the same name; amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). See the discussion of this new SAS in the "New Auditing and Attestation Pronouncements and Other Guidance" section later in this Alert.

Help Desk—Landauer Real Counselors publishes the annual *National Real Estate Market Forecast*, which can be downloaded at www.landauer.com. The report provides in-depth analysis of current industry conditions and the outlook for the future in five different property types. The publication provides one analysis of the conditions in major markets for each property type. The report is published annually.

Evaluating Going Concern

.67 The current business environment and market conditions might lead to rapidly deteriorating operating results and liquidity challenges for some real estate companies, particularly those with reduced access to capital. A company particularly sensitive to negative changes in economic conditions can rapidly develop a liquidity crisis and ultimately fail. Certain conditions, considered in the aggregate, may lead you to question the entity's ability to continue as a going concern. These include negative trends, such as recurring operating losses or working capital deficiencies, financial difficulties in the form of loan defaults or denial of credit from suppliers, dependence on the success of a particular product that is not selling well, legal proceedings, loss of a principal customer or supplier, destabilization of a trading partner or contract counterparty, and excessive reliance on external financing rather than funds generated from operations.

.68 Key in evaluating these risk factors is whether:

- Existing conditions and events can be mitigated by management's plans and their effective implementation.
- The company has the ability to control the implementation of mitigating plans rather than being dependent on actions of others.
- The company's assumption about its ability to continue as a going concern is based on realistic, rather than overly optimistic, assessments of its access to needed debt or equity capital or its ability to sell assets in a timely manner.
- Liquidity challenges have been appropriately satisfied and disclosed.

.69 When evaluating management's plans to continue as a going concern, an appropriate level of professional skepticism is important. For example, you may want to scrutinize the company's assumptions to continue as a going concern to assess whether those assumptions are based on overly optimistic or "once-in-a-lifetime" occurrences.

.70 Key factors in your evaluation of the ability to continue as a going concern are part of the guidance provided in SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341).

Auditing in a Paperless Environment

.71 When clients rely on technology to manage and analyze information, audit strategies change. Consider the following examples:

- Audit evidence that previously existed in paper form may be available electronically only. Accessing electronic audit evidence may require you to become proficient in the use of data extraction or other audit software tools.
- The design and operation of internal control in a computer environment is much different than in a predominately manual environment.

.72 As real estate entities continue to expand their use of IT, you may need to become aware of the unique audit issues in a highly computerized environment. In addition, you should identify the risks of material misstatement that can arise during the transition from a highly manual environment to a more computerized operating environment.

.73 For further information and guidance on auditing in this paperless environment, see SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

Risks of Overseas Expansion

.74 According to a recent survey by DTZ International Property Advisers of Switzerland (DTZ), 70 percent of real estate investors hold overseas real estate assets. The survey questioned representatives from investment vehicles, institutions, and property companies and found that the majority of respondents go overseas to achieve superior returns. Europe emerges as their most popular investment target. The survey also reveals that this trend is set to continue, with 43 percent of respondents planning to increase overseas real estate investment in the short term; 60 percent plan to increase their overseas exposure within the next three to five years; and 57 percent plan to increase overseas activities over the longer term.

.75 When looking to buy overseas, the investors often cite economic performance, market size, and the tax and operating environment as key factors in identifying suitable markets. The lack of local market knowledge appears to be the major stumbling block. To overcome this challenge, the most popular method of entry into overseas markets is via joint ventures with local partners.

.76 Competing in foreign markets is complex and fraught with risks, many of which are indiscernible at first glance. The political risks in some nations are quite high, but even in countries that have relative political stability, complexities may arise. Each country has its own market characteristics, regulations and laws, and accounting standards. If your client has or is considering venturing into foreign real estate markets, you should gain an understanding of the risks of doing business in those markets. Consider whether the client has an effective process for identifying and managing those risks. For example, has management adequately assessed the realities of a foreign marketplace when developing assumptions about the future performance of real estate located in those markets?

Changes in Internal Control

.77 Large layoffs, staff reductions, and notifications to employees of impending termination can affect internal control over financial accounting and reporting systems. Remaining employees may feel overwhelmed by their workloads, lack of time to complete tasks and consider decisions, and simply be performing too many tasks and functions to meet the required levels of accuracy. In addition, rapid business expansion, changes in business strategies, and integration of different businesses may outstrip the ability of a company's financial systems to remain under effective internal control. Furthermore, controls at business units whose divestiture has been announced may be disrupted. As a result of any of these factors, internal control may become less effective or even ineffective.

.78 Relevant considerations are whether:

- The attention to internal control has been maintained in the face of significant changes in the business.
- As a result of unfilled positions, key control procedures are no longer being performed, are being performed less frequently, or are being performed by individuals lacking proper understanding to identify and correct errors.
- Layoffs of IT personnel have had a negative effect on the entity's ability to initiate, process, or record its transactions, or maintain the integrity of information generated by the IT system.
- Key functions that should be segregated are now being performed by one person.
- The impact of changes to the control environment has altered internal control effectiveness and potentially resulted in a material control weakness.
- Changes in internal control caused by past or pending layoffs or staff reductions create an opportunity for fraudulent activities, including misappropriation of assets.

Transactions Involving Off-Balance-Sheet Arrangements, Including Special Purpose Entities

.79 Some real estate entities make use of off-balance sheet arrangements to conduct financing or other business activities. These may involve unconsolidated, nonindependent, limited purpose entities, often referred to as structured finance or special purpose entities (SPEs). These entities may be used to provide financing, liquidity, or market risk or credit support, or may involve leasing, hedging, or research and development services. See the AICPA general *Audit Risk Alert—2002/03* for a detailed discussion about risks and audit procedures concerning this area.

Audit and Accounting Issues of Continuing Importance

Revenue Recognition

.80 During the past few years of industry recovery, many real estate entities were able to report impressive growth as a result of the improvement in the underlying real estate. But after suffering through last year's recession, some entities may be under increased pressure to maintain the previous rate of growth.

.81 You might want to consider the appropriateness of your client's revenue recognition policies or, especially, changes to those policies. Some clients attempt to demonstrate growth in a flattening market by changing operating or accounting policies that affect the timing or propriety of revenue recognition. In evaluating the revenue recognition policies of real estate entities, you should consider carefully whether the criteria in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 66, *Accounting for Sales of Real Estate*, have been met.

.82 You should also continue to be alert for the following:

- *"Put" arrangements.* These arrangements may commit a seller, its officers, or shareholders to repurchase the property, find other buyers, or indemnify the buyer or third-party guarantors for risk of loss. These arrangements can significantly affect revenue recognition. In a number of cases, put arrangements may not be formally documented, so you should consider the facts and circumstances surrounding property sales to be sure there are no formal or informal arrangements of this kind. You may also wish to request written representation from management regarding the absence of such agreements.
- *Direct or indirect seller financing.* Consider circumstances that would indicate that a seller might have directly or indirectly provided the funds for a down payment (or for the entire purchase price) in a cash sale. Apart from precluding the use of the full accrual method of profit recognition, such circumstances may create related-party transactions that require disclosure, as described in FASB Statement No. 57, *Related Party Disclosures*.

.83 FASB Statement No. 66 describes examples of real estate transactions that include sales of corporate stock of enterprises with substantial real estate, partnership interests, and time-sharing interests. Questions have been raised about whether the sale of these investments should be accounted for under FASB Statement No. 66 or under FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. In Emerging Issues Task Force (EITF) Issue No. 98-8, *Accounting for Transfers of Investments That Are in Substance Real Estate*, a consensus was reached that the sale or transfer of an investment in the form of a financial asset is, in substance, real estate and should be accounted for in accordance with FASB Statement No. 66.

.84 FASB Interpretation No. 43, *Real Estate Sales*, clarifies that FASB Statement No. 66 applies to all real estate sales, not just those made by real estate entities. Included within the scope of FASB Statement No. 66 are sales of real estate with property improvements or integral equipment that cannot be removed and used separately from the real estate without incurring significant costs.

Lease Income

.85 Several accounting pronouncements provide guidance to lessors on recognizing lease revenue. These pronouncements include the following:

- *FASB Statement No. 13, Accounting for Leases*. Paragraph 19(b) of this Statement describes how a lessor should report lease income, as follows:
 - In general, rental income is recognized when it becomes receivable according to the provisions of the lease.
 - However, if the rentals vary from a straight-line basis, the income should be recognized on a straight-line basis (unless another systematic and rational basis is more representative of the time pattern in which use benefit from the lease property is diminished).
- *FASB Statement No. 29, Determining Contingent Rentals*. This statement defines contingent rentals and states that they should be recognized as revenue when they become accruable.
- *FASB Technical Bulletin No. 85-3, Accounting for Operating Leases with Scheduled Rent Increases*. This Technical Bulletin addresses whether it is appropriate for lessors to recognize scheduled rent increases on a basis other than as required in FASB Statement No. 13.
- *SEC Staff Accounting Bulletin (SAB) No. 101, Revenue Recognition in Financial Statements*. SABs are not rules or interpretations of the SEC, but represent practices followed by SEC staff in administering the disclosure requirements of the federal securities laws. As clarified in Interpretive Response No. 8, a landlord should not recognize any contingent rental income until the threshold for contingent rental payments has passed.

.86 In auditing rental income, you should obtain reasonable assurance that rental income has been properly recognized during the period. Pay particular attention to revenue from contingent rentals and revenue recognition when lease payments are scheduled to vary from a straight-line basis.

.87 To properly recognize rental income on a straight-line basis, the accounting for income from lease arrangements that call for scheduled rent increases requires the recording of a receivable during the early years of the lease. If your client's financial statements include such a receivable, you should determine that it is collectible, for example, by assessing the creditworthiness of the tenant.

Help Desk—Auditors designing and performing procedures related to revenue recognition can look to the AICPA publication *Auditing Revenue in Certain Industries* (product no. 012510kk).

Sale-Leaseback Transactions

.88 Industry observers continue to report a growing number of sale-leaseback transactions involving corporations that own their facilities. Real estate entities may participate in these transactions as the purchaser-lessor.

.89 FASB Statement No. 13 describes the accounting by the purchaser-lessor in a sale-leaseback transaction, as follows:

- If the lease meets the criteria for classification as a capital lease, the purchaser-lessor should record the transaction as a purchase and a direct financing lease.
- If the lease does not meet the criteria for classification as a capital lease, the purchaser-lessor should record the transaction as a purchase and an operating lease.

.90 You can find the primary guidance on accounting by the seller-lessee in a sale-leaseback transaction in FASB Statement No. 98, *Accounting for Leases*.

Asset Impairment

.91 Specific markets or properties in the real estate industry may not weather last year's recession well. For that reason, you should continue to be alert for the possible impairment of real estate assets.

.92 FASB recently issued a Statement that provides the primary guidance on accounting for the impairment of real estate assets.

.93 In general, the accounting for the impairment of real estate depends on whether the property is to be held for investment or held for disposal. Projects under development are accounted for in the same manner as those held for investment. FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, does not provide exceptions for assets subject to nonrecourse debt.

Real Estate Properties Held for Investment

.94 Real estate held for investment and projects under development should be reported at cost, less accumulated depreciation, and should be evaluated for impairment if facts and circumstances indicate that impairment may have occurred. Conditions or events such as the following may indicate a need for assessing the recoverability of investments in real estate:

- Cash flows from operating activities are insufficient to cover debt service.
- Current occupancy rates indicate that future cash flows to be received are lower than the amounts needed to recover the carrying amount of the investment fully.
- Major tenants have experienced or are experiencing financial difficulties.
- A significant portion of leases will expire in the near term.
- Lessors are being forced to make significant concessions to rent property.
- Properties held for sale remain unsold at subsequent balance-sheet dates.
- Other investors have decided to cease providing support or reduce their financial commitment to a project or venture.
- Rental demand for a rental project currently under construction is not meeting projections.
- Auditors' reports on financial statements of investee properties are modified for reasons that relate to real estate investments (for example, an auditor's report on the financial statements of investee properties that is modified for a departure from GAAP attributable to the improper valuation of assets).

.95 If events and circumstances indicate that impairment may exist, the entity is required to estimate the future cash flows expected to result from the use of the asset and its eventual disposition. An asset is deemed to be impaired if its carrying amount exceeds the sum of the expected future cash flows (undiscounted and without interest charges) from the asset. The impairment is measured as the amount by which the carrying amount exceeds the fair value of the asset. After recognizing an impairment, the entity should account for the reduced carrying amount of the asset as the new cost of the asset and depreciate it over the remaining useful life. Restoration of previously recognized impairment losses is prohibited.

.96 Lack of an asset-impairment evaluation system may indicate a material weakness in an entity's internal controls. Further, a lack of documentation generally increases the extent to which you must apply professional judgment in evaluating the adequacy of management's write-downs.

Real Estate to Be Disposed of by Sale

.97 Real estate to be disposed of by sale (real estate for which management has committed to a plan of disposal by sale) should be reported at the lower of the carrying amount or fair value, less costs to sell. Subsequent revisions to fair value less costs to sell should be reported as adjustments to the carrying amount of the asset to be disposed of. Nevertheless, the carrying amount may not be adjusted to an amount greater

than the carrying amount of the asset before an adjustment was made to reflect the decision to dispose of the asset. Determination of whether the carrying amounts of real estate projects require write-downs should be done on a project-by-project basis, in accordance with paragraph 24 of FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*.

.98 Some real estate might have previously been subject to APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*. FASB Statement No. 144 amended APB Opinion No. 30. The provisions of FASB Statement No. 144 apply to all long-lived assets. Therefore, gains or losses on a disposal of a discontinued operation are no longer measured on a net realizable value basis, and future operating losses are no longer recognized before they occur.

Assets to Be Disposed of Other Than by Sale

.99 Assets that are to be abandoned, exchanged for a similar productive asset, or distributed to owners in a spinoff are to be considered as held and used until they are disposed of. If the asset is to be abandoned, the depreciable life is revised in accordance with APB Opinion No. 20, *Accounting Changes*. If the asset is to be exchanged for a similar productive asset or distributed to owners in a spinoff and if the carrying amount of the asset exceeds its fair value at the date of exchange or distribution, an impairment loss is to be recognized at that date.

Non-GAAP Measures of Performance

.100 In 1999, the National Association of Real Estate Investment Trusts (NAREIT) issued recommendations with respect to clarifying the industry's supplemental performance benchmark, called Funds From Operations (FFO). These recommendations include the following:

- The industry's supplemental performance measure should include all operating results, both recurring and nonrecurring, except those results defined as "extraordinary items" under GAAP and gains and losses from sales of depreciable operating property.
- The industry's supplemental performance measure should continue to be labeled "Funds From Operations."
- The clarification of FFO is effective January 1, 2000.
- Calculation of FFO based on this clarification should be shown for all periods presented in financial statements or tables.
- Disclosures should include the information included in the NAREIT white paper on FFO and in NAREIT National Policy Bulletins related to reporting FFO.

These recommendations were based on a year-long evaluation of the industry's supplemental performance benchmark at the direction of NAREIT's leadership. NAREIT surveyed member company executives, investment analysts, institutional investors, and other industry participants regarding the effectiveness of FFO.

.101 However, the SEC staff has noted that FFO has been discussed outside of the financial statements in several recent filings with the SEC. Neither GAAP nor SEC authoritative accounting literature provides a definition of FFO, and the SEC staff's views on the presentation of supplemental earnings measures and cash-flow measures as a proxy for net income and the presentation of funds generated from operations are expressed in Accounting Series Release (ASR) No. 142 (Section 202 of SEC's *Financial Reporting Policies*). ASR No. 142 states that if such measurements of economic performance are presented in the MD&A section or elsewhere, they should not be presented in such a manner that gives them greater authority or prominence than conventionally computed earnings. In no event should the presentation leave the reader with the impression that FFO is the primary measure of operating performance for the REIT or an appropriate measure for which dividends are computed and based. In addition, ASR No. 142 does not allow these supplemental earnings or cash-flow measures to be reported on a per-share basis. Net income and cash flows from operating, investing, and financing activities remain the appropriate measures.

Effect of FASB Statement No. 144 on FFO

.102 After considering the impact of FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, on income statements prepared using GAAP and on FFO, NAREIT's board of governors adopted several recommendations of the Association's Best Financial Practices Council. Chief among them is affirmation of NAREIT's commitment to GAAP net income as the primary industry earnings measure.

.103 The board of governors also adopted a recommendation that FFO from income-producing property held for sale, sold, or otherwise transferred and now reported in "results of discontinued operations" should be included in consolidated FFO.

.104 The resulting clarification of NAREIT's white paper on FFO was needed to ensure that a change in GAAP classification made by FASB Statement No. 144 did not create an inappropriate and unintended change in reported FFO. The clarification results in no change to FFO—mirroring the impact of FASB Statement No. 144 on GAAP net income.

New Auditing and Attestation Pronouncements and Other Guidance

.105 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team and available at www.aicpa.org.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.107 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, supersedes Statement on Auditing Standards No. 82, *Consideration of Fraud in a Financial Statement Audit* (AU sec. 316); amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333), as amended. The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1 (AU sec. 110.02).² However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS).³

² The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 312]), or fraud.

³ Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statement in accordance with generally accepted auditing standards. Chapter 1, "Attest Engagements," of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards. Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), and Statement on Standards for Consulting Services (AICPA, *Professional Standards*, vol. 2, CS sec. 100) provide guidance to accountants relating to the performance of such services.

.108 The following is an overview of the content of the SAS No. 99, with references to paragraphs in the new fraud standard:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs 5 through 12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph 13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs 14 through 18.)
- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather information necessary to identify risks of material misstatement due to fraud, by:
 1. Inquiring of management and others within the entity about the risks of fraud. (See paragraphs 20 through 27.)
 2. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs 28 through 30.)
 3. Considering fraud risk factors. (See paragraphs 31 through 33, and the appendix, "Examples of Fraud Risk Factors.")
 4. Considering certain other information. (See paragraph 34.)
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs 35 through 42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs 43 through 45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence (see paragraph 46). The section requires the auditor to respond to the results of the risk assessment in three ways:
 1. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned (See paragraph 50.)
 2. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed (See paragraphs 51 through 56.)
 3. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls (See paragraphs 57 through 67.)
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs 68 through 74.) It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs 75 through 78.)

- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs 79 through 82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph 83.)

.109 SAS No. 99 also includes an exhibit, "Management Antifraud Programs and Controls: Guidance to Help Deter, Detect, and Prevent Fraud," which has been developed to assist auditors in obtaining an understanding of programs and controls established by management to mitigate specific risks of fraud, or that otherwise help to prevent, deter, and detect fraud. SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.110 The AICPA has developed a Practice Aid titled *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide*, which will be published by the end of 2002. The Practice Aid includes topics such as how the new SAS changes audit practice, characteristics of fraud, understanding the new SAS, best practices, and practice aids such as, specialized industry fraud risk factors, common frauds, and extended audit procedures. Auditors should be on the lookout for this new publication (see the section titled "Practice Aid *Fraud Detection in a GAAS Audit*" later in this Alert for more information).

Practice Alert 02-2, *Use of Specialists*

.111 The AICPA Securities and Exchange Commission Practice Section (SECPS) Executive Committee established a Professional Issues Task Force (PITF), which formulates guidance based on issues arising in peer reviews, firm inspections, and litigation to facilitate the resolution of emerging audit practice issues. This guidance takes the form of Practice Alerts. The information contained in these Practice Alerts is nonauthoritative. It represents the views of the members of the PITF and does not represent official positions of the AICPA.

.112 Auditors may encounter difficulty in determining the appropriate situations in which to use a specialist and, in those cases when a specialist is appropriately used, understanding the findings of the specialist. The current guidance when specialists are used is broad and focuses on the use of all kinds of specialists. The purpose of Practice Alert 02-2 is to assist auditors in understanding their responsibilities with respect to both the use of specialists that have been engaged or employed by the audit client and the use of specialists engaged or employed by the audit firm.

Practice Aid *Fraud Detection in a GAAS Audit*

.113 In connection with the issuance of SAS No. 99, the AICPA has developed a Practice Aid to help practitioners implement the new fraud guidance. The practice aid is entitled *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide* (product no. 006613) and will be available in December 2002. The Practice Aid includes topics such as:

- How the new SAS changes audit practice
- Characteristics of fraud
- Understanding the new fraud SAS
- Best practices
- Practice aids, such as:
 - Specialized industry fraud risk factors
 - Common frauds and extended audit procedures

The Practice Aid represents valuable guidance in helping practitioners understand and implement SAS No. 99.

New Accounting Pronouncements and Other Guidance

.114 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Questions & Answers	<i>FASB Statement No. 87, Employers' Accounting for Pensions</i>

.115 The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org.

FASB Statement No. 145, *Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections*

.116 In April 2002, the FASB issued FASB Statement No. 145, which rescinds FASB Statement No. 4, *Reporting Gains and Losses from Extinguishment of Debt*, and an amendment of that Statement, FASB Statement No. 64, *Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements*, thereby eliminating the requirement that gains and losses from debt extinguishments be classified as extraordinary items. Instead, those entities should use the provisions of APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, as amended and interpreted, to report debt extinguishments in fiscal years beginning after May 15, 2002, with earlier application encouraged. Other effective dates apply to the other provisions of FASB Statement No. 145. This Statement also rescinds FASB Statement No. 44, *Accounting for Intangible Assets of Motor Carriers*. This Statement amends FASB Statement No. 13, *Accounting for Leases*, as well, to eliminate an inconsistency between the required accounting for sale-leaseback transactions and the required accounting for certain lease modifications that have economic effects that are similar to sale-leaseback transactions. This Statement also amends other existing authoritative pronouncements to make various technical corrections, clarify meanings, or describe their applicability under changing conditions.

.117 The provisions of this Statement related to the rescission of FASB Statement No. 4 should be applied in fiscal years beginning after May 15, 2002. Any gain or loss on extinguishment of debt that was classified as an extraordinary item in prior periods presented that does not meet the criteria in APB Opinion No. 30 for classification as an extraordinary item should be reclassified. Early application of the provisions of this Statement related to the rescission of FASB Statement No. 4 is encouraged.

.118 The provisions in paragraphs 8 and 9(c) of this Statement related to FASB Statement No. 13 should be for transactions occurring after May 15, 2002, with early application encouraged. All other provisions of this Statement shall be effective for financial statements issued on or after May 15, 2002, with early application encouraged.

.119 Early application of the provisions of this Statement may be as of the beginning of the fiscal year or as of the beginning of the interim period in which this Statement is issued.

On the Horizon

.120 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.121 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline.

<i>Standard-Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	http://www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees are now publishing exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Auditing Pipeline

Exposure Draft on Auditing Fair Value Measurements and Disclosures

.122 The AICPA's Auditing Standards Board (ASB) has issued an exposure draft of a proposed SAS titled *Auditing Fair Value Measurements and Disclosures*. The proposed SAS addresses auditing considerations relating to measurement, presentation, and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. A vote to ballot a document for final issuance is expected to occur in December 2002.

New Framework for the Audit Process

.123 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB expects to issue a series of exposure drafts in before the end of 2002. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "Expectation Gap" standards were issued in 1988.

.124 Some of the more important changes to the standards that are expected to be proposed are:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to assessment of the risk of material misstatement of the financial statements. Among other things, this will improve the auditor's assessment of inherent and control risks and eliminate the "default" to assess either of these risks at the maximum.
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit.
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls.
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures.

These changes collectively are intended to improve the guidance on how the auditor uses the audit risk model.

.125 In connection with this major initiative, the ASB and the International Auditing and Assurance Standards Board (IAASB) have agreed to form a joint task force to develop joint standards addressing the risk assessment process. These standards will represent a significant step toward converging U.S. and international auditing standards. These proposed standards are being exposed now.

.126 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

Consolidation of Certain Special-Purpose Entities

.127 The FASB has issued an exposure draft of a proposed Interpretation, *Consolidation of Certain Special-Purpose Entities*, of ARB No. 51, *Consolidated Financial Statements*. This proposed Interpretation would address consolidation by business enterprises of SPEs to which the usual condition of consolidation described in Accounting Research Bulletin No. 51 does not apply because the SPEs have no voting interest or otherwise are not subject to control through ownership of voting interests. A final Statement is expected to be issued during the fourth quarter of 2002.

Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.128 Proposed AICPA SOP, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*, and proposed FASB Statement, *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment—an amendment of APB Opinions No. 20 and 28 and FASB Statements No. 51 and 67 and a rescission of FASB Statement No. 73*, are being issued simultaneously for public comment.

.129 Principally, the proposed FASB Statement would amend FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to exclude from its scope the accounting for acquisition, development, and construction costs of real estate developed and used by an entity for subsequent rental activities. The accounting for those costs would be subject to the guidance in the proposed SOP. It also would amend APB Opinion No. 28, *Interim Financial Reporting*, to require that those costs that the proposed SOP would require be expensed as incurred on an annual basis also be expensed as incurred in interim periods.

.130 The proposed SOP addresses accounting and disclosure issues related to determining which costs related to property, plant, and equipment should be capitalized as improvements and which should be

charged to expense. The proposed SOP also addresses capitalization of indirect and overhead costs and component accounting for property, plant, and equipment. Final Statements are expected to be issued during the first half of 2003.

Proposed AICPA SOP Related to Real Estate Time-Sharing Transactions

.131 This proposed SOP will address several key issues affecting the sellers of real estate time-sharing arrangements. These issues include revenue recognition, determining the allowance for uncollectible receivables, and the deferring of selling costs. At its September 2001 meeting, the Accounting Standards Executive Committee (AcSEC) approved for exposure, subject to AcSEC's positive clearance of certain revisions and FASB clearance, a draft SOP titled *Accounting for Real Estate Time-Sharing Transactions*. AcSEC expects to issue the exposure draft in the first quarter of 2003.

.132 Tentative conclusions to date include the following:

- *Basic accounting model.* The underlying structural basis for the time-sharing model is the retail land sales model of FASB Statement No. 66, with inclusion of certain of the fundamental principles of the other-than-retail-land-sales model of that Statement.
- *Basic accounting model—Buyer's commitment test.* The accounting model's test for buyer's commitment is a 10 percent-of-principle test, similar to that of the FASB Statement No. 66 retail land sales model, which would be met by receipt by the seller of cumulative down payments of at least 10 percent of the sales price.
- *Basic accounting model—Collectibility-of-receivables test.* Collectibility is demonstrated either by meeting a test based on collection of 85 percent of prior similar projects' receivables dollars or by the seller's collection of cumulative principle payments of at least 25 percent of the sales price.
- *Basic accounting model—Estimability-of-credit-losses test.* The estimability-of-credit-losses test is a nonbright-line test, subject to certain criteria, whereby a time-sharing entity would have to have sufficient collection experience to demonstrate that it can reliably measure credit losses (analogous to the ability to estimate future returns discussed in FASB Statement No. 48, *Revenue Recognition When Right of Return Exists*).
- *Meaning of credit losses.* For purposes of estimating credit losses in the collectibility-of-receivables and estimability-of-credit-losses tests, sales canceled subsequent to being recorded as sales should be considered credit losses, rather than sales reversals. A seller should interpret credit losses broadly to include all situations in which, as a result of credit concerns, less than 100 percent of a receivable is collected from a buyer. Costs related to credit losses (for example, collection costs) should not be incorporated into the seller's estimate of credit losses but should instead be charged to selling, general, and administrative expense as incurred.
- *Accounting for estimated and actual credit losses.* For sales (meeting the recognition criteria) that, based on historical and statistical information, are not expected to be collected, revenue should be reduced rather than bad debt expense charged.
- *Accounting for cost of sales and inventory.* The relative sales value method should be used to allocate inventory cost and determine the cost of sales when inventory relief is recorded as part of a sale.
- *Passage-of-title requirement.* Passage of nonreversionary title is a criterion for treating a time-sharing transaction as a sale rather than a lease.
- *Rentals of unsold interests.* Rentals are considered to be holding-period activities and are accounted for as "incidental operations." Incidental operations would be defined as in FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, except that the SOP's definition would not require that the purposes of those operations is to reduce the cost of developing the property for its intended use. Time-sharing interests should be accounted for as inventory rather than fixed assets, and therefore not be depreciated during times of rental.

- *Expensing versus deferral of selling costs.* Selling costs should be accounted for using the “directly associated” approach of paragraph 18 of FASB Statement No. 67, modified to include some restrictions similar to those in FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*.
- *Special purpose entities.* The issue involves SPE structures in which a seller transfers deeded title to a trust or third party (the SPE) in exchange for stock or other interests in the SPE, which the seller then sells to the time-share buyers. Sales should be recorded only upon the sale of the stock or interests to the time-share buyer, not upon transfer of title to the SPE. Generally, an SPE should be viewed as an entity lacking economic substance and established to facilitate sales. The seller should present in its balance sheet the unsold interests in the SPE as time-share inventory rather than apply consolidation or some other accounting method to the seller’s interests in the SPE as the seller’s ownership percentage in the SPE decreases during the sellout of a project.
- *Amendments to Level A GAAP.* If the final SOP is issued, the FASB would remove from FASB Statement No. 66 the guidance related to time-sharing; that Statement would direct the reader to the SOP for guidance. The FASB would also modify FASB Statement No. 67 to exclude time-sharing transactions from the section in the Statement titled “Costs Incurred to Sell Real Estate Projects,” in view of the SOP’s prescribed “incremental” accounting for time-sharing selling costs.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.133 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- Audit and Accounting Guide *Common Interest Realty Associations* 2002 (product no. 012572kk)
- Audit and Accounting Guide *Construction Contractors* 2002 (product no. 012582kk)
- Audit and Accounting Guide *Guide for the Use of Real Estate Appraisal Information* (product no. 013159kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk)
- Audit and Accounting Guide *Audit Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012551kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (product no. 012772kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- *Accounting Trends & Techniques—2002*
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Practice Aid *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* (publication by the end of 2002)
- General Audit Risk Alert—2002/03 [AAM section 8010]
- Compilation and Review Alert *Compilation and Review Alert—2002/03* [AAM section 8015]

- Audit Risk Alert *Construction Contractors Industry Developments*—2002/03 [AAM section 8090]
- Audit Risk Alert *Common Interest Realty Associations Industry Developments*—2002/03 [AAM section 8080]
- Audit Risk Alert *E-Business Industry Developments*—2002/03 [AAM section 8210]

Audit and Accounting Manual

.134 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditor's reports, checklists, and engagement letters; management representation letters; and confirmation letters.

AICPA reSOURCE Online: Accounting and Auditing Literature

.135 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, all Audit and Accounting Guides, all Audit Risk Alerts, and *Accounting Trends & Techniques*. To subscribe to this essential online service, go to cpa2biz.com.

Educational Courses

.136 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry. Those courses include:

- *AICPA's Annual Accounting and Auditing Workshop* (product no. 737082kk (VHS tape/manual) and 187082kk (video)). Whether you are in industry or public practice, this course keeps you current and informed, and shows you how to apply the most recent standards.
- *Fair Value Accounting for Hedge Transactions* (product no. 735182kk). This course helps you understand GAAP for derivatives and hedging activities. Also, you will learn how to identify effective and ineffective hedges.
- *Fraud and the Financial Statement Audit: Auditor Responsibilities Under New SAS* (product no. 731810kk (text) and 181810kk (video); available December 31, 2002). The new fraud standard may not change your responsibilities for detecting fraud in a financial statement audit, but it will change how you meet that responsibility. Practitioners will benefit from a risk assessment approach to detecting fraud in a financial statement audit. You will learn the conceptual framework necessary to understand the characteristics of fraud.
- *Auditing for Internal Fraud* (product no. 730237kk). This course provides an auditor with the tools to identify fraud schemes. It trains CPAs to focus their analytical and substantive tests on the fraud triangle when evaluating internal controls. It also illustrates the latest in fraud prevention and detection programs implemented by industry leaders.
- *Identifying Fraudulent Financial Transactions* (product no. 730243kk). Learn to identify the red flags of fraud in financial information and to analyze a variety of fraud schemes. You will develop a framework for detecting financial statement fraud and learn about fraud schemes in revenue, inventory, liabilities, and assets.
- *Independence* (product no. 739058kk). This interactive CD-ROM course reviews the AICPA authoritative literature covering independence standards (including the newly issued SECPS independence requirements), SEC regulations on independence, and Independence Standards Board (ISB) standards.
- *SEC Reporting* (product no. 736747kk). This course helps the practicing CPA and corporate financial officer learn to apply SEC reporting requirements. It clarifies the more important and difficult disclosure requirements.

- *E-Commerce: Controls and Audit* (product no. 731551kk). This course is a comprehensive overview of the world of e-commerce. Topics covered include internal control evaluation and audit procedures necessary for evaluating business-to-consumer and business-to-business transactions.

In addition to the general courses mentioned here, the following courses might be relevant to practitioners with real estate clients:

- Self-study—*Real Estate Accounting and Auditing*, by Michael Ramos (product no. 730599kk)
- Group study—*Real Estate Accounting and Auditing* (product no. 730600kk). This course is also available for in-firm delivery.

Online CPE

.137 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) provides unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

CPE CD-ROM

.138 *The Practitioner's Update* (product no. 738450kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Real Estate Annual Conference

.139 The AICPA sponsors an annual Real Estate Conference in the fall. For further information about the conference, contact the Member Satisfaction Team at (888) 777-7077 or visit the CPA2Biz Web site (cpa2biz.com) to view the latest conferences calendar and to register.

Member Satisfaction Center

.140 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.141 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.142 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.143 AICPA Online, at www.aicpa.org, offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing

world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit Risk Alerts, Audit and Accounting Guides, the professional standards, and CPE courses.

Other Helpful Web Sites

.144 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this Alert.

.145 This Audit Risk Alert replaces *Real Estate Industry Developments—2001/02*. *Real Estate Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share those with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to ymishkevich@aicpa.org or write to:

AAM Section 8150

Retail Industry Developments—2001/02

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your retail industry audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the retail industry, and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2001/02* [AAM section 8010].

Economic and Industry Developments

What are the current economic and industry conditions facing retailers this year?

.03 For a complete overview of the current economic environment in the United States see the AICPA general *Audit Risk Alert—2001/02* [AAM section 8010].

.04 The Christmas shopping season, of crucial importance to retailers, netted dismal results for 2000. The poor holiday season showing led to reduced profits early in 2001 as retailers were forced to offer steep discounts to move unsold inventories. High levels of promotional activities have accompanied the product discount programs. In light of these advertising activities, discounts, and other incentives, auditors may need to consider whether their clients have properly addressed the accounting and disclosure issues relating to these matters. The accounting treatment for advertising costs and incentives is addressed in the “Accounting for Advertising Costs” and “Special Customer Programs” sections of this Alert.

.05 As the third quarter of 2001 passed, retailers continued to post losses and those retailers reporting profits were fewer than expected. Consumers are frequenting discount stores and warehouse clubs looking for bargains during this time of uncertainty. In fact, discount store sales have risen 6 percent from the past year.

.06 In addition to operating losses, retailers are reporting huge losses due to one-time writeoffs for investments in Internet firms and telecom businesses, restructuring charges due to store closings, inventory liquidations, employee layoffs, and bad debt writeoffs. In fact, net income for a number of the nation’s largest companies plunged two-thirds in the second quarter as a result of the massive writeoffs and charges related to the slowing economy.

Consumer Spending Sluggish

.07 Customer turnout continues to remain sluggish as consumer shopping traffic has fallen for the fourteenth week straight through August 2001. Consumer confidence declined for the second month from 116.3 in July 2001 to 114.3 in August 2001. With new jobless claims at a nine-year high, corporate layoffs rising, and a volatile stock market, consumers are cutting spending on discretionary items. Household purchasing power has increased as wages are rising at 4.3 percent, which is still 1 percent faster than inflation. Real consumer spending grew to 1.5 percent annually in the second quarter of 2001, which is the lowest pace in nearly six years. The influx of about \$38 billion in tax rebates and the wave of approximately \$50 billion in mortgage refinancing appear to be helping retail sales in the beginning of the third quarter of 2001.

.08 The September 11, 2001, attack on America injected further agitation and uncertainty into the U.S. economy. The ramifications of that attack and the ensuing war against those responsible for it may deepen the economic slowdown and lead to a recession; however, at the time of the writing of this Alert, the short- and long-term effects of the attack on the economy are uncertain. Nevertheless, only nine days after the attacks, the National Retail Federation lowered its sales growth forecast for the fourth quarter, speculating that the effects on the economy and consumer responses will affect retailer's future sales.

Help Desk—The Financial Accounting Standards Board's (FASB) Emerging Issues Task Force (EITF) reached consensus on issues of accounting for the terrorist attacks of September 11, 2001. This guidance was issued as EITF Issue No. 01-10, *Accounting for the Impact of the Terrorist Attacks*, to provide financial statement preparers and auditors with guidance. The Task Force concluded that, while the events of September 11 were certainly extraordinary, the financial reporting treatment that uses that label would not be an effective way to communicate the financial effects of those events and should not be used in this case. Readers of financial reports will be intensely interested in understanding the whole impact of the events on each company. The EITF concluded that showing part of the effect as an extraordinary item would hinder rather than help effective communication. Practitioners should go to www.fasb.org/eitf/eitf911-101.html for further information about EITF Issue No. 01-10. Also, the AICPA general *Audit Risk Alert*—2001/02 [AAM section 8010] contains an extensive discussion of accounting and auditing issues related to the September 11 attacks.

Retailers' Response to the Weak Economy

.09 In response to the weak economy, retailers are taking steps and pursuing policies designed to help them weather the rough economic seas. They are buying less merchandise for fear of getting stuck with too much again (see the "Inventory" section of this Alert), cutting back on expenses, and creating contingency plans if sales fall below predictions. They are also preparing for what could be the worst Christmas season in a decade by tightly managing inventories and costs. And, for the first time since the 1990 recession, retailers have reduced spending on equipment and software. Since profit projections remain poor, business investments, payroll expenses, and capital spending are being cut by retailers.

.10 **Store Closings.** The cost cutting and restructurings undertaken by retailers have led to an increased number of store closings. In these circumstances, auditors should consider whether management has accounted for these store closings and restructurings appropriately. See the "Store Closings, Restructuring Charges, and Asset Impairments" section of this Alert for a discussion of a number of the accounting and auditing issues that result when a retail entity closes store locations.

.11 **Tough Competition Shaking Retailers Up.** The difficult economic environment has resulted in some very tough competition among retailers. In response, retailers are focusing on new ideas to capitalize on sales opportunities. For example, retailers are putting an increased emphasis on tracking merchandise by analyzing what is not selling, allowing retailers to quickly react through promotions or the shifting of merchandise to other store locations. Also, retailers are reducing inventory levels (see the section of this Alert entitled

“Helping Your Clients Manage Their Inventory During This Economic Downturn”), and retailers are simplifying trend and brand-name messages through clearer displays and more advertising.

.12 Bankruptcies and Going Concern. Many retailers have filed for bankruptcy in the midst of the overall weak retail environment. The sluggish economy and not being able to keep up with the discount chains caused the majority of the bankruptcies. Auditors should be aware of their responsibility to evaluate whether there is substantial doubt about a retailer’s ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. See the “Going-Concern Issue” and “Troubled Debt Restructurings and Bankruptcy Reorganizations” sections of this Alert.

Electronic Commerce

.13 Despite the economic downturn, established bricks-and-mortar retailers’ online sales leaped to \$5.3 billion in June 2001—a 71 percent increase from June 2000 according to Nielsen/NetRating. The increase in traffic on their e-commerce Web sites is attributable, in many cases, to their well-known name brands and their customer relationships. Their customer base trusts them and knows what to expect from their products. The Internet is a cost-effective channel that allows these traditional retailers to extend their reach.

.14 Many stand-alone Internet retailers are not doing well. Going out and about, roaming aisles, touching and feeling the products seems to appeal to most consumers. At least 232 e-commerce companies have gone out of business since January 2000, according to Webmergers.com.

See the lengthy discussion of the current e-business economic environment in the AICPA Audit Risk Alert, *E-Business Industry Developments—2001/02* [AAM section 8210]. Call the AICPA Order Department at (888) 777-7077 to order. That Alert also contains detailed discussions about the unique accounting and auditing concerns prevalent in an e-business environment.

Regulatory and Legislative Issues

*What recent actions has the IRS taken that possibly may affect your retail clients?
What legislation is on the horizon that may affect your clients?*

Large and Mid-Size Business Division of the IRS

.15 As part of its modernization plan, the Internal Revenue Service (IRS) created the Large and Mid-Size Business (LMSB) Division organized around customer needs. The group includes corporations, Subchapter S corporations, and partnerships with assets over \$5 million. The LMSB will be responsive to the needs of customers in a global environment and apply innovative approaches to customer service and compliance. The LMSB Division addresses key customer needs by improving tax administration in the following four areas:

- More consistent, timely, and direct responses from accountable industry managers through the LMSB Organizational Design
- Reduced examination duration, costs, and burden through enhanced prefiling guidance and issue resolution to resolve issues before forwarding the case to the United States Court of Appeals or the Tax Court
- Improved efficiency in examination cases through case planning and information management
- Reduced examination costs and burden through technology, such as electronic communication and data transfer, to reduce paper retention and exchange

.16 The IRS continues to develop the structure of its LMSB Division. The Division includes a special industry section, headquartered in Chicago, devoted to retailers, food, and pharmaceutical industries with business dealings in beverages, tobacco, garments, small household appliances, hotels, agricultural commodities, and farms. The IRS Web site, www.irs.gov, provides contact information for the leadership of the LMSB Division and currently has a separate page to serve the customers of the Large to Mid-Size Business segment of the Division.

IRS Announcement 2001-82—Required Minimum Distributions

.17 IRS Announcement 2001-82 establishes an alternative model amendment for all qualified stock bonus, pension and profit-sharing plan sponsors under Internal Revenue Code (IRC) Section 401 (a) to use with respect to required minimum distributions made for 2001 but before the date on which the plan began operating under 2001 proposed rules. The announcement was in response to concerns by plan sponsors that intended to use the 2001 proposed regulations for distributions for 2001 but that made required distributions for 2001 under the 1987 proposed regulations. Announcement 2001-82 allows qualified plan sponsors to use the alternative model amendment so that required minimum distributions made for 2001 (but before the date on which the plan began operating under the 2001 proposed rules) are deemed made under the 1987 proposed regulations.

.18 For additional information on the announcement, go to www.irs.gov and see the Internal Revenue Bulletin.

IRS to Tax Stock Option Plans

.19 The IRS has announced its intent to contemplate applying Social Security tax to stock option plans. A stock option purchase plan authorizes employees to purchase shares of their company stock at a discount generally around 15 percent below the market price.

.20 The IRS has determined that it may possibly want to impose the Social Security tax (7.65 percent to the employee, matched by the employer) on the difference between the stock's market price and the discounted purchase price. The IRS maintains that the difference between the purchase price and the market price of the stock represents a type of compensation and therefore should be subject to the Social Security tax.

.21 The IRS plans to impose this tax starting in January 2003 unless the IRS changes its position or Congress votes to block the tax.

Interest-Free Adjustments Under Section 6205

.22 Final regulations under IRC Section 6205 were released by the IRS and the Treasury Department regarding the interest-free adjustment period for underpayment of employment taxes to reflect the changes made by the Taxpayer Relief Act of 1997 (1997 TRA). The final regulations issued and the proposed regulations issued in January 2001 are exactly alike. They affect employers that are the subject of IRS Examinations involving determinations by the IRS that workers are employees for purposes of subtitle C or that the employers are not entitled to relief from employment taxes under section 530 of the Revenue Act of 1978.

Section 6205

.23 IRC Section 6205 allows employers that have paid less than the correct amount of employment taxes to make adjustments without interest, provided the error is reported and the taxes are paid by the last day for filing the return for the quarter in which the error was ascertained. However, no interest-free adjustments are permitted pursuant to IRC Section 6205 after receipt of notice and demand for payment thereof based upon an assessment.

Before the Taxpayer Relief Act of 1997

.24 Section 6205 basically allowed an employer to pay employment taxes for disputed workers on an interest-free basis until the point in time that the IRS issued notice and demand for payment based on an assessment. The 1997 TRA added a new section 7436, which permits an employer to contest certain employment tax issues before the Tax Court. Consequently, the IRS cannot issue notice and demand for payment based on an assessment until after the taxpayer has received a "Notice of Determination Concerning Worker Classification Under Section 7436" and had the opportunity to petition the Tax Court contesting such determination.

Final Regulations

.25 The final regulations provide that, in employment tax examinations involving worker classification or IRC Section 530 issues, as in other types of employment tax examinations, the error is ascertained for purposes of IRC Section 6205 when the employer has exhausted all internal appeals within the IRS. Accordingly, the regulations prohibit interest-free adjustments after a taxpayer receives a notice of determination. However, if, before receiving such notice, a taxpayer makes a remittance, the IRS will consider such remittance to be a payment of tax and assess it on an interest-free basis (and will issue a notice of determination only if some portion of the proposed liability remains).

Effective Date

.26 The regulations are applicable with respect to notices of determination issued on or after March 19, 2001. For interest computation purposes, the final regulations will apply to claims for refund of interest pending on January 17, 2001.

Bankruptcy Legislation in Washington

.27 The U.S. House of Representatives and the U.S. Senate have appointed conferees to draft a final version of the Bankruptcy Reform Act of 2001 to be sent to the President for his signature.

.28 The National Retail Federation, long awaiting this action, claims that the absence of bankruptcy reform legislation costs retailers millions of dollars on a daily basis. Retailers are directly affected by this legislation since consumers more often than not finance highly priced items like televisions and furniture with installment debt. When consumers file for bankruptcy, retailers may be able to recover only some of the debt. This legislation is meant to protect the safety net of bankruptcy for those who really need it. Filing for bankruptcy, if this legislation is passed, will be more difficult if you have the means to repay your debt. The legislation will affect about 11 percent of those who file for bankruptcy with an estimated savings of \$4 billion in debt annually that would currently be discharged—almost \$11 million daily!

Debt Default and Delinquencies Rising—Bankruptcy Reform Needed Now

.29 If the legislation is enacted, it comes at an opportune time for retailers since consumer debt is at an all-time high despite the slowing economy. Debt levels have risen due to substantial credit card account growth in 2000 and easier credit terms for consumers. According to the Federal Reserve Data, consumer debt in America now exceeds \$1.5 trillion. Revolving debt jumped about 11 percent last year. Also, by the end of 2000, household debt service payments as a percentage of disposable personal income rose to more than 14 percent, the highest it has been since 1986.

.30 Moody's Investor Services stated that the late payment and bad loan writeoff rate rose by over 13 percent from the prior year. Based on those statistics, consumer credit quality has not been this dismal since the negative credit cycle in 1995 to 1997. Moreover, Standard & Poor's found that credit card issuers wrote off uncollectible balances at an annual rate of 6.7 percent—also the highest rate loss since February 1997.

.31 The disappointing economic outlook raises the specter of growing defaults and bankruptcies. Many retailers are already seeing increases in their credit card chargeoffs.

Taxation of Internet Sales: The Debate Continues

Will there be taxation of Internet sales?

.32 For the past few years, we have been following the continuing debate over the taxation of Internet sales. State and local governments are concerned about losing sales and use tax revenue because of untaxed Internet sales. A recent estimate of the amount of sales tax revenue that will be lost in 2001 because of the nontaxation of Internet sales puts the amount at \$2 billion.

.33 During the saga of the taxation of Internet sales last year, the Advisory Commission on Electronic Commerce (ACEC) had just submitted its report to Congress. That report recommended that, among other actions, Congress (1) extend the existing ban (which is slated to expire in October 2001) on new taxes on Internet access and on multiple or discriminatory taxes on e-commerce, and (2) take steps to simplify state and local sales and use taxes. (Internet businesses claim that disparities in sales tax systems among the various jurisdictions are too burdensome to administer.) Despite the introduction of numerous bills, Congress was unable to pass Internet taxation legislation this year. However, the attempts continue.

Recent Developments

.34 More recently, on July 18, 2001, the Internet Tax Moratorium and Equity Act (H.R. 1410) was introduced in Congress. The bill ostensibly seeks to simplify state and local governments' complex sales tax structures to establish a uniform streamlined sales tax system. In turn, bricks-and-mortar retailers and Internet retailers will treat all retail sales of tangible property in the same manner. The current moratorium, the Internet Tax Freedom Act of 1998 (ITFA), on access taxes and on new discriminatory taxes on the Internet, would be extended until December 31, 2005, however, Congress failed to pass new legislation and the moratorium on Internet taxes expired on October 21, 2001. Analysts and lawmakers say it is unlikely that state and local governments will rush to impose e-commerce sales taxes, but given enough time and an increasing need to raise revenues, that could change. There is concern that tax officials around the country could begin interpreting a variety of their current tax laws as applying to the Internet. Observers say such a move would drag down a crucial engine of the U.S. economy, adding to the nation's economic woes.

State Sales Tax Simplification

.35 Simplifying the tax code should help retailers. First, tax policy should not provide one retailer with an advantage over another. Since profit margins are often narrow in the retail industry, out-of-state retailers who do not have to charge sales tax have a significant pricing advantage over those that do. Second, it would make filing tax returns easier. Some multistate companies file as many as ten thousand different forms with taxing jurisdictions across the country. The states are attempting to address the issue of sales tax simplification. The District of Columbia, forty-five states, and thousands of local governments impose sales taxes. To address complaints about disparities among the jurisdictions, the National Governors Association created the streamlined sales tax project (SSTP). The SSTP, comprising tax administrators from thirty states, developed model legislation to unify and simplify sales and use tax administration among the states that adopt the legislation. The SSTP hopes that, by unifying and simplifying sales tax systems, Internet businesses will voluntarily collect sales taxes. The model legislation, entitled the Uniform Sales and Use Tax Administration Act (the Act), would authorize a state taxing authority to enter into an interstate contract, the Streamlined Sales and Use Tax Agreement (the Agreement). The Act and the related Agreement would, among other matters, establish more uniform administrative standards, and develop and adopt uniform definitions of sales and use tax terms.

.36 Recently, the Act ran into a snag when a task force of the National Conference of State Legislatures (NCSL) took significant exception to some of its measures. The NCSL drafted and distributed its own version

of model legislation to simplify sales tax. State legislatures are now considering whether to adopt legislation and, if so, which version.

Help Desk—The Act is available on SSTP's Web site at www.streamlinedsalestax.org. The NCSL's version of the model legislation is available on the NCSL Web site at www.ncsl.org/programs/fiscal/tctelcom.htm. The NCSL site also includes a document that lists the amendments that the NCSL made to the SSTP Act.

Nevada Passes a Sales Tax Law

.37 Nevada has enacted a law, A.B. 455, that requires out-of-state vendors that sell tangible personal property over the Internet or by other electronic means to Nevada customers to collect use tax on those sales. A.B. 455 has revised the definition of "a retailer maintaining a place of business" in the state to include the following.

A retailer soliciting orders for tangible personal property . . . through a Web site on the Internet or other means of electronic communication to provide solicitations to persons in this state.

Also effective June 13, 2001, retailers soliciting orders from persons located in Nevada via a Web site are treated as "maintaining a place of business" (defined to include not just maintaining an office, but also various other activities, including soliciting orders via television, Web sites, and a toll-free telephone number) in the state and are required to collect sales and use taxes.

New York State Ruling

.38 The New York Department of Taxation and Finance also ruled earlier this year that the sale of music delivered electronically over the Internet is neither a taxable sale of tangible personal property nor the provision of a taxable information or entertainment service.

.39 New York treats digitally downloaded music and digitally downloaded software differently. Digitally downloaded software is treated as a sale of tangible personal property, which is subject to sales tax in New York. Currently, some states treat the sales of digitally delivered software as sales of tangible personal property, others consider these sales of a taxable service, while still others deem them sales of intangible property that are exempt from sales tax.

Audit Issues and Developments

Collectibility of Receivables (Allowance for Doubtful Accounts)

What are some of the audit issues that may arise when considering the collectibility of receivables?

.40 With current high levels of consumer bankruptcies, the collectibility of receivables may be a more significant issue this year. Bankruptcies are discussed further in the section entitled "Bankruptcy Legislation in Washington" in the "Regulatory and Legislative Issues" section of the Audit Risk Alert.

.41 The client's estimate of the level of accounts receivable that may not be collectible as a result of bad debts is reflected in the allowance for doubtful accounts, which is one of the offsets used to bring accounts receivable to their net realizable value. (Other allowances include those for returns and rebates.) When auditing estimates, auditors should be familiar with Statement on Auditing Standards (SAS) No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342), which provides guidance on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates

used in a client's financial statements. Practitioners should also refer to the section, "Evaluating Accounting Estimates Relevant to Revenue Recognition," of this Alert for additional guidance. The guidelines set forth by SAS No. 57 include the following:

- Identify the circumstances that require accounting estimates.
- Consider internal control relating to developing accounting estimates.
- Evaluate the reasonableness of management's estimate.

.42 As part of evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate for the allowance for doubtful accounts and, based on that understanding, use one or a combination of the following approaches listed in SAS No. 57:

- a. Review and test the process used by management to develop the estimate.
- b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.
- c. Review subsequent events or transactions occurring prior to completion of fieldwork, including chargebacks from credit card companies.

.43 A review of the aging of the accounts receivable is often performed. This may include testing the reliability of the aging report; reviewing past due accounts on the report, including the number and amount of such accounts; reviewing past due balances, the client's prior history in collecting past due balances, customer correspondence files and credit reports; and so forth. This may be done with the assistance of the client in obtaining an understanding of how the allowance was developed and determining whether it is reasonable. Testing the reasonability of the company's estimate of the collectibility of receivables may also be performed by using the following procedures:

- a. Obtain publicly available information on major customers to determine their ability to honor outstanding obligations to the company.
- b. Investigate unusual credit limits or nonstandard payment terms granted to customers.
- c. Test subsequent collections of receivables.

.44 Another very useful tool in evaluating the allowance for doubtful accounts is the application of analytical procedures. According to SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329.02), analytical procedures are an important part of the audit process and consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Often, the large number of customer accounts makes it difficult to determine the adequacy of the allowance only by reference to individual accounts, making analytical procedures helpful to the audit process. The following are examples of the ratios that auditors might use to evaluate collectibility of accounts receivable:

- *Accounts receivable turnover* indicates how well the company collects its receivables and is computed as net credit sales divided by average net accounts receivable.
- *Bad debts to net credit sales* indicates whether writeoffs are adequate. It is computed as bad debt expense divided by net credit sales.
- *Doubtful accounts allowance to accounts receivable* indicates whether the allowance account is adequate. It is computed as an allowance for doubtful accounts divided by accounts receivable.

.45 The auditor may also review revenue and receivables transactions and fluctuations after the balance-sheet date for items such as sales and writeoffs. This may provide additional information about the collectibility of the accounts receivable and the reasonableness of the allowance account on the balance-sheet date.

.46 The auditor will, of course, use his or her professional judgment to determine which of these and other procedures to perform to obtain the evidence needed to judge whether the allowance is reasonable.

.47 Also, auditors of retail entities that have transferred receivables should evaluate whether management has properly implemented FASB Statement of Financial Accounting Standards No. 125,¹ *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, and FASB Statement No. 127, *Deferral of the Effective Date of Certain Provisions of FASB Statement No. 125*, an amendment of FASB Statement No. 125, and any related pronouncement.

Going-Concern Issue

Why is going concern an important issue for the retail industry?

What is the auditor's responsibility in addressing it?

.48 Historically, the retail industry's sensitivity to negative changes in economic conditions, such as reductions in personal income, layoffs, higher unemployment levels, and decreases in consumer confidence, have resulted in high rates of business failures. Accordingly, auditors should be alert to conditions and events which, when considered in the aggregate, indicate that there could be substantial doubt about the retail entity's ability to continue as a going concern.

.49 For example, such conditions and events could include (1) negative trends such as recurring operating losses or working capital deficiencies, (2) financial difficulties such as loan defaults or denial of trade credit from suppliers, (3) internal matters such as substantial dependence on the success of a particular product line, or (4) external matters such as legal proceedings or loss of a principal supplier. Another condition which may raise doubt about an entity's ability to continue as a going concern could be excessive and unusual reliance on external financing, rather than money generated from the companies' own operations as evidenced by many dot.com retailers that shut down or filed for bankruptcy this past year, including Pet.com, Quepasa.com, Mothernature.com, and ValueAmerica.com, just to name a few. In such circumstances, auditors will have to consider whether, based on such conditions and events, there is substantial doubt about the retailer's ability to continue as a going concern.

Auditor's Responsibilities Related to a Going-Concern Issue

.50 SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341), provides guidance to auditors in conducting an audit of financial statements in accordance with generally accepted auditing standards (GAAS) for evaluating whether there is substantial doubt about a client's ability to continue as a going concern for a period not to exceed one year from the date of the financial statements being audited.

.51 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

¹ This Statement was replaced by FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, which is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after March 31, 2001. See the "Accounting Pronouncements and Guidance Update" section of this Alert for more information on FASB Statement No. 140.

.52 If there is substantial doubt about the entity's ability to continue as a going concern, the auditor should consider whether it is likely that existing conditions and events can be mitigated by management plans and whether those plans can be effectively implemented. If the auditor obtains sufficient competent evidential matter to alleviate doubts about going-concern issues, then consideration should be given to the possible effects on the financial statements and the adequacy of the related disclosures. If, however, after considering identified conditions and events, along with management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, auditors should refer to the specific guidance set forth under SAS No. 59.

Retailers in Bankruptcy Reorganization

.53 For those retail entities that are under bankruptcy reorganization pursuant to chapter 11 of the Bankruptcy Code or emerging from it, the auditor should consider whether the company is following the accounting guidance of SOP 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code*. Retail entities that filed for bankruptcy may have impairments that need to be recorded prior to fresh-start accounting under SOP 90-7.

Inventory

*What are the risks in the area of inventory?
What effect will they have on audits for retail entities?*

Obsolete or Excess Inventory

.54 Numerous retail companies were far too optimistic in their economic forecasts, resulting in overstocking, overexpansion, and warehouses bulging with inventory. Some retailers have sought out deep discounters, barter companies, and liquidators to help relieve excessive levels of inventory.

.55 The primary literature on inventory accounting is Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*. Chapter 4 of ARB No. 43 states:

[I]n keeping with the principle that accounting is primarily based on cost, there is a presumption that inventories shall be stated at cost. . . A departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as its cost. If the utility of goods is impaired by damage, deterioration, obsolescence, changes in price levels, or other causes, a loss [shall] be reflected as a charge against the revenues of the period in which it occurs. The measurement of such losses shall be accomplished by applying the rule of pricing inventories at cost or market, whichever is lower.

.56 The appendix to SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326.26), lists the following substantive tests that the auditor might want to consider in identifying slow-moving, excess, defective, and obsolete items included in inventories:

- a. Examine an analysis of inventory turnover.
- b. Review industry experience and trends.
- c. Analytically compare the relationship of inventory balances to anticipated sales volume. (The "Analytical Procedures" section below describes some of the ratios commonly used in a retail environment to evaluate the reasonableness of inventory valuation and to help identify the existence of obsolete inventory.)

- d. Tour the facility.
- e. Inquire of sales and other relevant personnel concerning possible excess or obsolete items.

.57 When significant excess or obsolete inventories exist, it may be appropriate to include the matter in the management representation letter. SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333.17), provides the following illustrative example of such a representation: "Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value."

Analytical Procedures

.58 To evaluate the reasonableness of inventory valuation and to help identify the existence of obsolete inventory, the auditor may wish to consider using analytical procedures as described below. Auditors should be aware of the need to have these procedures performed by staff with sufficient industry expertise to properly evaluate the results. In performing analytical procedures, auditors compare amounts or ratios to expected results developed from such sources as the following:

- Prior-period financial information
- Budgets or forecasts
- Relationships among elements of financial information in the same period
- Relationships among financial and nonfinancial data
- Industry data compiled by services (for example, Dun & Bradstreet, Robert Morris Associates, and Standard & Poor's)

.59 The following gives a brief description of some of the ratios commonly used in a retail environment for inventory valuation:

- The *gross profit ratio* indicates whether profit goals will be met and whether there are unusual variances in the cost of sales and inventory, and is computed as gross margin divided by net sales.
- The *inventory turnover ratio* indicates how well merchandise inventory is managed and whether sales problems exist. It is computed as the cost of goods sold divided by average inventory.
- The *stock to sales ratio* indicates the projected time (usually in months) to sell the merchandise. It is computed as beginning merchandise inventory divided by sales for the period. A similar ratio is days of sales in inventory.
- *Inventory shrinkage to inventory* indicates the percentage of inventory loss resulting from shrinkage. This ratio is calculated as the inventory shrinkage amount divided by the book value of inventory.
- *Inventory shrinkage as a percentage of sales* indicates the percentage of inventory loss resulting from theft and/or bookkeeping errors. Many retailers look at the trend of inventory shrinkage as a percentage of sales from period to period and on a location-by-location basis. This is calculated by taking the book inventory minus the physical inventory divided by net sales.
- *Net markdowns to inventory available for sale at retail* provides information about trends in marking down inventory. This ratio is calculated as net markdowns divided by total inventory available for sale at retail.
- *Inventory by location* provides a check on whether the amount of inventory at each location is reasonable (or even possible). Various calculations are possible, such as using total by location, square foot by location, dollar values, or quantities of inventory.

Help Desk—For additional guidance the auditor should refer to the new AICPA *Analytical Procedures Guide* (Product No. 012551). Call the AICPA at (888) 777-7077 to order.

Helping Your Client Manage Their Inventory During This Economic Downturn

.60 Good inventory management has become an important determinant in the success of a business in the retail industry today. As the U.S. economy began to slow and demand began to weaken, retailers found themselves with surplus inventories. The stores that are thriving, such as Wal-Mart and H & M clothing retailer, are less likely to maintain stale inventory. Inventories have climbed to \$4 billion, up from just \$250 million a year ago according to liquidation experts. Retailers are becoming averse to retaining mounds of inventory attributable to the lack of spending by consumers during this weak economy. Even the biggest retail giants, Wal-Mart and Target, are being conservative in regard to the intake of inventory. Inventory levels fell for the fifth straight month in August 2001 according to the U.S. government. Retailers are being extremely cautious about future demand. In prior years, retailers have been in inventory building modes, and these days they must make the transition to the maintenance mode. Factory inventory levels are at their lowest in almost twenty years according to the National Association of Purchasing Management of Chicago. The U.S. Commerce Department reported that during the second quarter, businesses curtailed inventories at a rate of \$38.4 billion per year and the gross domestic product grew at 0.2 percent annual rate.

.61 Practitioners can assist their retail clients in establishing and maintaining effective controls over inventory during this economic downturn in some of the following areas:

- *Physical Inventory.* Practitioners can assist their clients in developing written instructions for taking inventory while highlighting the importance of good documentation during the physical inventory. AU Section 331, *Inventories* (AICPA, *Professional Standards*, vol. 1, AU sec. 331), discusses the requirements to observe inventories, periodic comparisons with physical counts, and inventory controls (including statistical sampling) on procedures used by the auditor.
- *Perpetual Inventory.* Practitioners can assist clients in optimizing the full potential of their perpetual inventory systems by helping their clients implement an inventory in transit procedure to ensure the proper recording of inventory shipped FOB shipping point along with the related accounts payable. You may suggest using a separate control account to record the inventory in transit, which would be reversed when the goods are received and entered into the perpetual inventory system. Also, by assisting the client in ensuring that all inventory that has been purchased has been included in inventory and accounts payable, the practitioner can help minimize inventory cutoff errors.
- *Markdowns.* Practitioners can help clients develop a procedure to monitor markdowns to confirm that only authorized markdowns are taken in order to control inventory levels and fulfill its planned profit expectations. The appropriate level of management should supervise markdowns closely, regardless of whether the cost or retail method is used in order to achieve those goals.
- *Shrinkage.* Practitioners can assist clients in implementing effective paperwork control by instituting internal controls to help prevent errors and to find them as they occur. The practitioner can also assist in minimizing the risk of loss from theft, both internal and external, by the means of setting up operating policies, practices, and procedures. For example, this can be done in areas such as store closings, transfers, store openings, and merchandise receiving operations (not all inclusive).
- *Employee Purchases.* Practitioners can assist clients in establishing procedures that keep track of employee purchases on an individual basis to monitor possible abuse so it may be detected and resolved in a more timely manner.
- *Open-to-Buy.* Practitioners can assist in instituting and supporting an open-to-buy (OTB) system to help ensure that inventory levels will be adequate to satisfy budgeted sales. It will also help retailers reduce the amount of resources they tie up in slow-moving inventories, which during the current economic environment, can be devastating to retailers.

Inventory Fraud

What auditors should know to help uncover phony figures.

.62 As the economy downshifts and management is under pressure, companies may be more prone to inventory fraud. Practitioners who are familiar with common methods for fraudulent inventory manipulations will be in a much better position to identify them.

.63 There are many ways a dishonest client can attempt to manipulate inventory. Those clients usually use a combination of several methods to commit inventory fraud: fictitious inventory, the manipulation of inventory counts, the nonrecording of purchases, and fraudulent inventory capitalization. All these elaborate schemes have the same goal of illegally boosting inventory values.

.64 Auditors are not responsible for detecting fraud *per se*, however, auditors do have a responsibility to plan and perform the audit to obtain reasonable assurance that the financial statements are free of material misstatements, whether caused by error or fraud. The issuance of SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), did not change the auditor's responsibility with respect to fraud, but was designed to help auditors to fulfill their responsibility to detect material misstatements caused by fraud.

.65 Among other things, the Standard:

- Describes the characteristics of fraud. The more the auditor knows about the nature of fraud, the better he or she will be equipped to identify risk factors, assess the risk of material misstatement attributable to fraud, and develop an appropriate audit response.
- Requires the auditor to make an assessment as to the risk of material misstatement attributable to fraud, from the perspective of the broad categories listed in the SAS. The assessment is separate from but may be performed in conjunction with other risk assessments made during the audit. The SAS also requires the auditor to reevaluate the assessment if other conditions are identified during the fieldwork.
- Provides examples of fraud risk factors that, when present, might indicate the presence of fraud.
- Requires the auditor to document evidence of the performance of the fraud risk assessment, including risk factors identified as being present and the auditor's response to those risk factors.
- Requires the auditor to communicate to management at the appropriate level and, in certain circumstances, directly with the audit committee.

.66 Auditors must maintain an appropriate attitude of professional skepticism. This means assuming neither that the management is dishonest nor that it is unquestionably honest; obtaining corroborating evidence for management representations; considering whether misstatements may be the result of fraud; and appropriately designing and performing auditing procedures to address fraud risk factors. The application of professional skepticism in response to the auditor's assessment of the risk of material misstatement attributable to fraud might include (1) increased sensitivity in the selection of the nature and extent of documentation to be examined in support of material transactions, and (2) increased recognition of the need to corroborate management explanations or representations concerning material matters, such as, further analytical procedures, the examination of documentation, or discussions with others within or outside the entity.

Fraudulent Asset Valuations

.67 Companies use five different techniques to illegally boost assets and profits:

- a. Fictitious revenue
- b. Fraudulent timing differences

- c. Concealed liabilities and expenses
- d. Fraudulent disclosures
- e. Fraudulent asset valuations

The misstatement of asset valuations is the most common form of inventory fraud. Inventory overstatement makes up the majority of asset valuation frauds and is the focus of this section.

.68 The valuation of inventory involves two separate elements: quantity and price. Goods are constantly being bought and sold, and transferred among locations. Figuring the unit cost of inventory can be problematic, too; FIFO, LIFO, average cost, and other valuation methods can routinely make a material difference in what the final inventory is worth. As a result, the complex inventory account is an attractive target for fraud.

.69 The obvious way to increase inventory asset value is to create various records for items that do not exist, including unsupported journal entries, inflated inventory count sheets, bogus shipping and receiving reports, and fake purchase orders. Since it can be difficult for the auditor to spot such phony documents, he or she may use other means to substantiate the existence and value of inventory.

Auditing Procedures

.70 Since the auditor relies heavily on observing the client's inventory, the auditor's taking and documenting of the test counts is important. During the observation of the physical inventory, the auditor should validate the inventory quantity by test counting. Even when this is done, inventory fraud can go undetected. The following are examples:

- Management representatives follow the auditor and record the test counts. Thereafter, the client can add phony inventory to the items not tested, in turn falsely increasing the total inventory values.
- Auditors announce when and where they will conduct their test counts. For companies with multiple inventory locations, this advance warning may permit management to conceal shortages at locations which auditors will not visit.
- Sometimes auditors do not take the extra step of examining packaged boxes. To inflate inventory, management may stack empty boxes or boxes may contain items other than inventory in the warehouse.

.71 Practitioners can use analytical procedures to help detect ghost goods. *Ghost goods* are phantom inventories, which may throw off a company's books. For example, if the auditor compares the books with previous periods, the cost of sales will be too low; inventory and profits will be too high. There will be other signs, too. When analyzing a company's financial statement over time, the auditor can look for the following trends:

- Inventory increasing faster than sales
- Decreasing inventory turnover
- Shipping costs decreasing as a percentage of inventory
- Inventory rising faster than total assets move up
- Falling cost of sales as a percentage of sales
- Cost of goods sold on the books not agreeing with tax returns

An alert auditor may be able to detect inventory fraud schemes by any one of the above analytical methods. The auditor can also examine the cash disbursements subsequent to the end of the period. If the auditor finds

payment made directly to vendors that were not recorded in the purchase journal, he or she should investigate further.

Assessing the Risk of Inventory Fraud

.72 Practitioners should refer to SAS No. 82 for guidance. In evaluating the risks of inventory overstatements, the auditor may answer the following questions. Many *yes* answers to the following may indicate a greater risk of inventory fraud:

- Is inventory a significant balance-sheet item?
- Is the company attempting to obtain financing secured by inventory?
- Has the percentage of inventory to total assets increased over time?
- Has the ratio of cost of sales to total sales decreased over time?
- Have shipping costs fallen compared with total inventory?
- Has inventory turnover slowed over time?
- Have there been significant adjusting entries that have increased the inventory balance?
- After the close of an accounting period, have material reversing entries been made to the inventory account?

.73 Auditors may need to adjust the scope of their audits if control risk, associated with inventory controls, is assessed as high. The auditor should document the understanding of the entity's internal control as required by SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended. If the understanding reveals weakness in inventory controls, there may be an increased risk of material misstatements and fraud in the financial statements. Also, reportable conditions, as defined in SAS No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), as amended, may exist.

Evaluating Accounting Estimates Relevant to Revenue Recognition

How practitioners can evaluate the reasonableness of accounting estimates.

.74 In light of the current economic slump, management is under great pressure to show good results. Since revenue is an easy target to boost up profits, it may be inflated. So, auditors may need to pay particular attention to revenue recognition issues.

.75 The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole. The evaluation of estimates is always an area of auditing concern because the measurement of estimates is inherently uncertain and depends on the outcome of future events. SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342.10), sets forth guidance for auditing estimates. Refer to the "Collectibility of Receivables (Allowance for Doubtful Accounts)" section of this Alert for a description of those guidelines.

.76 Estimates relevant to the retail industry that are significant to management's assertion about revenue include sales returns and the allowance for doubtful accounts. An adequate allowance for doubtful accounts assumes increasing importance in the face of today's slowing economy, abundance of store closings, consumer loan payment delinquencies, and bankruptcies. Auditors often use historical data to evaluate the reasonableness of such estimates as reserves for sales returns. Historical data may indicate client practices to take back inventory even when no contractual right of return exists. Analysis of the aging of the accounts receivable that reflects a "building up" of receivables may indicate contingent sales or concessions to customers regarding the return of goods. Auditors also should consider reviewing sales to major customers,

particularly to distributors, to detect excess purchases (channel stuffing) that may be at greater risk of return in the subsequent period. A company's ability to make reasonable estimates of sales returns may be impaired if the company does not have sufficient visibility into what is going on in the sales channel. Reliance on solely historical averages may be insufficient, especially if the environment is somewhat volatile.

.77 The ability to make reasonable estimates of future returns is one of the conditions that must be met for recognition of revenue at the time of sale, in accordance with FASB Statement No. 48, *Revenue Recognition When Right of Return Exists*. FASB Statement No. 48 establishes accounting and reporting standards for sales of a product when the buyer has the right to return the product. Paragraph 6 provides that, in such circumstances, revenues from the sales transactions should be recognized at the time of sale only if *all* of the following conditions are met:

- a. The seller's price to the buyer is substantially fixed or determinable at the date of sale.
- b. The buyer has paid the seller, or the buyer is obligated to pay the seller and the obligation is not contingent on the resale of the product.
- c. The buyer's obligation to the seller would not be changed in the event of theft or physical destruction or damage of the product.
- d. The buyer acquiring the product for resale has economic substance apart from that provided by the seller.
- e. The seller does not have significant obligations for future performance to directly bring about the resale of the product by the buyer.
- f. The amount of future returns² can be reasonably estimated (paragraph 8).

If the preceding conditions are not met, sales recognition should be postponed until the right of return substantially expires or until such time as the conditions are met.

.78 If revenue is recognized at the time of sale because the above conditions are met, FASB Statement No. 48 requires that the costs or losses that may be expected in connection with returns must be accrued in accordance with FASB Statement No. 5, *Accounting for Contingencies*. The sales revenue and cost of sales reported in the income statement should be reduced to reflect estimated returns.

.79 Paragraph 8 of FASB Statement No. 48 describes a number of factors that may impair (but not necessarily preclude) the ability to make a reasonable estimate of the amount of future returns. Among those factors are the susceptibility of the product to significant external factors (for example, obsolescence or changes in demand); the absence of or lack of relevance of historical experience to the circumstances (for example, if a product, market, or customer is new); the length of the return period; and the absence of a large volume of relatively homogeneous transactions.

.80 In addition to analyzing historical data and the accounts receivable aging reports, auditors' should consider testing the company's estimate of the collectibility of receivables. Practitioners should refer to the "Collectibility of Receivables (Allowance for Doubtful Accounts)" section of this Alert for the procedures to be followed.

Help Desk—For additional guidance, the auditor should refer to the AICPA Practice Aid *Auditing Estimates and Other Soft Accounting Information* (Product No. 010010kk) and the AICPA Audit Guide *Auditing Revenue in Certain Industries* (Product No. 012510). Call the AICPA at (888) 777-7077 to order.

² Exchanges by ultimate customers of one item for another of the same kind, quality, and price (for example, one color or size for another) are not considered for purposes of this Statement.

Accounting Issues and Developments

Store Closings, Restructuring Charges, and Asset Impairments

What accounting issues arise with respect to store closings?

.81 In this weak economic period and harsh retail climate, retailers are continually evaluating the performance of individual stores and considering whether it might be necessary to close those stores. In the past year, many retailers have had to close stores as a result of the adverse economic conditions. Retailers such as JC Penney, Sears Roebuck & Co., Saks Fifth Avenue, Krause's Furniture Inc., Albertson's Inc., Montgomery Ward, Bradlees Inc., Office Max, Office Depot, Lechters, Ames Department Stores, Dillards, and Sterns, just to name a few, have posted sizable charges related to shutdowns. As many retailers are closing stores, discount retailers such as Wal-Mart, Target, Costco, Kohls, and Family Dollar Stores are adding new stores in response to the slowing economy and bargain-oriented customers.

.82 Also in the wake of this bleak economic picture and in response to intense competitive pressures, retailers such as Lechters Inc., Tupperware Corp., Albertsons Inc., and iGo Corp., have had huge nonrecurring charges as a part of their restructuring plans. Restructure costs may include store closings, job reductions, sale of business segments, reductions in the number of operating divisions, disposal of assets, asset impairment, and eliminating or combining certain functions or departments in an attempt to reduce the cost structure and spur future profitability and return of capital. Auditors need to address a number of issues concerning store closings.

Need to Accrue for the Costs of the Exit Plan

.83 The auditor needs to determine whether management has properly addressed the requirements of EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (Including Certain Costs Incurred in a Restructuring)*, and, for Securities and Exchange Commission (SEC) clients, Staff Accounting Bulletin (SAB) No. 100, *Restructuring and Impairment Charges*. Auditors should pay particular attention to the accrual of estimated liabilities, the criteria necessary to accrue for the costs of the exit plan, and the disclosures that should be provided. In particular, the reasons for such accruals, and the incurrence of the costs that are subsequently charged against such reserves, or the reversals of excess amounts of such liability reserves, should be clearly disclosed. For further guidance on disclosures, auditors should refer to EITF Issue No. 94-3 and SAB No. 100, as they both address disclosure requirements that must be followed by the organizations beginning with the period in which the exit plan is committed and ending with the point at which the exit plan is completed.

.84 When evaluating the criteria necessary to accrue for the costs of an exit plan, auditors should be aware of restrictive standards set in EITF Issue No. 94-3 for plan specificity. It states that the exit plan should specifically identify all significant actions to be taken to complete the exit plan and the period of time to complete the plan should indicate that significant changes to the exit plan are not likely. In determining the specificity of a retailer's exit plan, the SEC staff suggests that auditors may wish to consider whether the exit plan is sufficiently detailed so that the retailer can and will use it to (1) evaluate the performance of those responsible for executing the plan and (2) identify and react to plan versus actual performance. According to SAB No. 100, auditors should consider whether the exit plan is at least comparable to other operating and capital budgets the retailer prepares in terms of the level of detail and reliability of estimates. Furthermore, auditors should consider whether it is more likely than not that either the exit plan itself, or significant actions identified within the exit plan, will be materially revised in response to events or circumstances that are likely to occur. If so, the exit plan may not be sufficiently detailed and thus not meet the criteria for accrual of related costs under EITF Issue No. 94-3.

.85 Finally, auditors should be aware that EITF Issue No. 94-3 permits accruals to be made only for those costs associated with specifically identified significant actions that can be reasonably estimated at the exit

plan's commitment date. SAB No. 100 discusses in further detail factors that need to be considered in evaluating the plan's specificity. Those factors include the reliability of estimated costs, the level of identification and the aggregation of costs, and the timetable within which the exit plan is expected to be completed.

.86 According to SAB No. 100, after the exit plan is evaluated and the amount of accrual is determined, it is not final and might have to be adjusted because of a change in circumstances. The SAB states that at each balance-sheet date, exit costs accruals should be evaluated to ensure that any accrued amount no longer needed for its originally intended purposes is reversed in a timely manner. Reversal of the liability should be recorded through the same income statement line item that was used when the liability was initially recorded. Costs actually incurred in connection with an exit plan should be charged to the exit accrual only to the extent those costs were specifically included in the original estimation of the accrual. Costs incurred in connection with an exit plan but not specifically contemplated in the original estimate of the liability for exit costs should be charged to operating expense in the period incurred, or the period that the exit costs qualify for accrual under EITF Issue No. 94-3, with appropriate explanation presented in the Management's Discussion and Analysis.

Employee Termination Benefits

.87 EITF No. 94-3 requires a liability to be recorded in the period that management approves a store closing for benefits paid to involuntarily terminated employees if the conditions are met to accrue the costs to exit an activity as well as meeting the conditions to record a liability for employee termination benefits according to EITF No. 94-3. Practitioners should refer to the EITF for the specific conditions.

.88 EITF No. 94-3 also provides guidance for voluntary termination arrangements and when employees are required to work until they receive the benefits offered.

.89 Practitioners should refer to EITF No. 94-3 for required disclosures related to employee termination costs.

Unusual and Infrequent Items

.90 Unusual and infrequent (but not both) transactions or events are to be presented in the statement of income as separate elements of income from continuing operations as required by Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*. The presentation should not imply that the amounts are extraordinary items since they do not meet the criteria of being both infrequent and unusual. Practitioners may present store closings on the face of the statement of income as a component of continuing operations such as provision for store closing.

.91 Disclosures stating the effect and nature of the transaction or event can be made in the notes to the financial statements using captions such as unusual items or nonrecurring items, as well as on the face of the statement of income as stated above.

Inventory Markdowns

.92 The auditor should determine whether the client has properly addressed the requirements of EITF Issue No. 96-9, *Classification of Inventory Markdowns and Other Costs Associated with a Restructuring*, and, for publicly held companies, whether the position of the SEC staff, as provided in SAB No. 67, *Income Statement Presentation of Restructuring Charges*, has been followed regarding the classification as a component of cost of goods sold for markdowns associated with a restructuring.

Lease Modifications

.93 The auditor needs to find out whether the client, as a result of the decision to close a store, has entered into a lease modification agreement with the landlord, and whether the client has properly addressed the requirements of EITF Issue 95-17, *Accounting for Modification to an Operating Lease*.

Other Concerns

.94 Additional matters that may need to be addressed in light of store closings include the collectibility of accounts receivable and the accounting for handling and shipping costs when transferring merchandise to other stores.

Need to Accrue for Restructuring Charges

.95 You should also consider whether management has appropriately accounted for restructuring costs. EITF Issue No. 94-3 also provides guidance on whether certain costs (such as employee severance and termination costs) should be accrued and classified as part of restructuring charges, or whether such costs would be more appropriately considered a recurring operational cost of the organization. The EITF provides guidance about the appropriate timing of recognition of restructuring charges and the related disclosures as well.

Management's Plan

.96 To justify restructuring charges, an approved management plan as of the date of the financial statements should exist. Management's plan should be comprehensive, explicit, and adequately documented to provide objective evidence of management's intent.

.97 Loss recognition that is based on management's intent must be supported by objective evidence of intent. To demonstrate management's intent, you may consider whether the plan is sufficiently developed to forecast its consequences and management's commitment to ultimately implement the plan as contemplated. A documented and appropriately approved management plan that is comprehensive and explicit is necessary to accrue a liability.

.98 Practitioners should also evaluate whether the restructuring charges are in violation of loan covenant agreements.

Making Disclosures

.99 When liabilities are accrued in accordance with the guidance in EITF Issue No. 94-3, certain disclosures are required. The thresholds for making the required disclosures are related to the materiality of the amounts accrued or the significance of the activities that will not be continued. Therefore, when the disclosure thresholds have been met, all the disclosures are required, not just those that are individually material.

.100 Some of the disclosures are required until the plan of termination is completed or until all actions under a plan to exit an activity have been fully executed. For instance, under EITF Issue No. 94-3, the amount of actual termination benefits paid and charged against the liability and the number of employees actually terminated as a result of the plan to terminate the employees must be disclosed. The amount of any adjustments to the liability also must be disclosed.

Making Sure Accruals Are Not "Cushions"

.101 Sometimes, frequent reductions to restructuring liabilities may suggest that management has provided a cushion by overstating the accrual. When reviewing management's accruals, you should be aware of the kinds of charges that are allowed to be accrued for, pursuant to EITF Issue No. 94-3 and other relevant accounting literature, as appropriate. For example, FASB Statement No. 5 refers to "reserves for general contingencies." No accrual shall be made or disclosure required since general business risks do not meet the conditions for an accrual as stated in paragraph 8 of FASB Statement No. 5.

Impairment of Assets

.102 Management is responsible for evaluating whether a store closing constitutes an event or a change in circumstances indicating that the carrying amount of an asset in question may not be recoverable.

- *Old Guidance.* Auditors should evaluate management's consideration of FASB Statement No. 121, *Accounting for Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, which requires that long-lived assets and certain identifiable intangibles and goodwill related to those assets to be held and used by an entity be reviewed for impairment in such circumstances. This Statement also requires that long-lived assets and certain identifiable intangibles to be disposed of be reported at the lower of carrying amount or fair value less costs to sell, except for assets covered by APB Opinion No. 30. Assets covered by APB Opinion No. 30 will continue to be reported at the lower of the carrying amount or the net realizable value. The SEC's SAB No. 100, among other things, discusses the impairment of fixed assets and goodwill.
- *New Guidance.* The FASB has issued FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, in August of 2001. The Statement addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The Statement supersedes FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, for the disposal of a segment of a business (as previously defined in that Opinion). FASB Statement No. 144 was issued because FASB Statement No. 121 did not address the accounting for a segment of a business accounted for as a discontinued operation under APB Opinion No. 30, two accounting models existed for long-lived assets to be disposed of. The Board decided to establish a single accounting model, based on the framework established in FASB Statement No. 121, for long-lived assets to be disposed of by sale. The Board also decided to resolve significant implementation issues related to FASB Statement No. 121. The provisions of FASB Statement No. 144 are effective for financial statements issued for the fiscal years beginning after December 15, 2001, and interim periods within those fiscal years, with early application encouraged.
- Also practitioners should refer to FASB Statement No. 142, *Goodwill and Other Intangible Assets*, issued in June 2001, for guidance on the recognition and measurement of impairment losses for goodwill and intangible assets. The Statement addresses financial accounting and reporting for acquired goodwill and other intangible assets and supersedes APB Opinion No. 17, *Intangible Assets*. It addresses how intangible assets that are acquired individually or with a group of other assets (but not those acquired in a business combination) should be accounted for in financial statements upon their acquisition. The Statement also addresses how goodwill and other intangible assets should be accounted for after they have been initially recognized in the financial statements. FASB Statement No. 142 is effective starting with fiscal years beginning after December 15, 2001. Early application is permitted for entities with fiscal years beginning after March 15, 2001, provided that the first interim financial statements have not previously been issued. The Statement is required to be applied at the beginning of an entity's fiscal year and to be applied to all goodwill and other intangible assets recognized in its financial statements at that date. Impairment losses for goodwill and indefinite-lived intangible assets that arise due to the initial application of this Statement (resulting from a transitional impairment test) are to be reported as resulting from a change in accounting principle.

Multiple Leased Locations

How does the existence of multiple leased locations affect the auditor of retail entities?

.103 Retailers often operate from multiple locations, including stores and warehouses, and these locations can change or can be eliminated in response to economic conditions. Retailers often choose to lease a significant portion of their space, one reason being that leasing, as opposed to owning, frees up capital that can be used in inventory financing. As a result, lease expense is usually one of the larger expense items for retailers. The following discussion highlights some of the variety of leasing issues that the auditor should be alert to when auditing retail clients.

.104 To begin with, the auditor will need to determine the leases that the client has entered into. This may be accomplished with procedures such as talking to company personnel, reviewing minutes, analyzing rent expense (analytical procedures may prove effective for this purpose), and reviewing lease agreements. The auditor should also review the terms of each lease to determine whether it has been properly accounted for in accordance with FASB Statement No. 13, *Accounting for Leases*, and the related interpretations and pronouncements (FASB, *Current Text*, vol. 2, sec. L10).

.105 Some of the issues the auditor may encounter when evaluating the lease under these standards are:

- a. The lease may only apply to a portion of a building.
- b. Equipment may be included in the rental.
- c. The fair market value of the leased property may not be easily determinable.
- d. The economic life of the leased property may not be easily determinable.

.106 The auditor will need to determine whether the client has properly accounted for the leases in the financial statements and that appropriate disclosures have been included in the financial statements. A detailed discussion of the accounting for lease terms is beyond the scope of this Audit Risk Alert, but in general, for operating leases (which tend to be more prevalent among retail store space), FASB Statement No. 13, *Accounting for Leases*, provides, in part, the following.

Normally, rental on an operating lease shall be charged to expense over the lease term as it becomes payable. If rental payments are not made on a straight-line basis, rental expense nevertheless shall be recognized on a straight-line basis unless another systematic and rational basis is more representative of the time pattern in which use benefit is derived from the leased property, in which case that basis shall be used.

.107 In addition to base rents, the lease may provide for various other kinds of lease terms, such as the following:

- Scheduled rent increases
- Rent holidays
- Contingent rents (such as percentage rents)
- Common area maintenance (CAM) charges
- Pass-through charges, such as property taxes and insurance
- Reimbursements by the landlord to the lessee for certain expenses, such as moving and leasehold improvements
- Key money
- Sublease income
- Construction allowances from the landlord for construction or remodeling costs

The auditor will need to determine that these arrangements have also been recorded in accordance with FASB Statement No. 13, and the related interpretations and pronouncements, including consensus positions reached by the FASB's EITF relating to leasing transactions. EITF Issue No. 98-9, *Accounting for Contingent Rent in Interim Financial Periods* addresses how lessors and lessees should account during interim periods for contingent rental income/expense that is based on future specified targets within the lessor's or lessee's fiscal year.

.108 The auditor should also review leases for upcoming lease expiration dates, penalties for early terminations (especially with the large amount of recent store closings), requirements that the client make changes to the premises, and other terms.

.109 Lease terms often call for contingent rents to be calculated as the greater of a specified minimum or a percentage of sales over a set dollar amount. Various categories of sales or receipts may be excluded, such as sales to employees, sales taxes collected, and delivery charges. Landlords often require a report from the accountants with respect to the sales amounts. The level of service used in this report can be an audit, a review, a compilation, or agreed-upon procedures. However, the first question to be answered is whether the information will be reported on as supplementary information to the basic financial statements or reported on separately as a separate specified element. Assuming that the landlord requires an audit service, and sales are being reported on as supplementary information, the auditor would follow SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551), in addition to other applicable GAAS. However, if the audit service is to report on sales as a separate element, the auditor would follow SAS No. 62, *Special Reports* (AICPA, *Professional Standards*, vol. 1, AU sec. 623), in addition to other applicable GAAS. If a different level of service is required, the auditor would follow the applicable standards.

.110 Numerous other issues can also arise when addressing leases. For example, if the owner of the retail business also owns the building being leased in a separate entity (more often seen with freestanding sites) the auditor should refer to SAS No. 45, *Related Parties* (AICPA, *Professional Standards*, vol. 1, AU sec. 334), and FASB Statement No. 13, and the related interpretations and pronouncements. Another example of a situation the auditor may encounter occurs if the retailer subleases a portion of the stores to independent entities; such arrangements may affect sublease income, payroll, and so forth.

.111 The auditor needs to be aware of various situations that can affect the accounting treatment for the client's leases. For example, as a result of the nature of the transaction, such as the use of a special purpose entity as the lessor or the client's involvement in asset construction, the retail client may be required to consolidate the other entity or record additional assets. Among the applicable literature are FASB's EITF Issue No. 96-21, *Implementation Issues in Accounting for Leasing Transactions Involving Special-Purpose Entities*, and EITF Issue No. 97-10, *The Effect of Lessee Involvement in Asset Construction*.

Troubled Debt Restructurings and Bankruptcy Reorganizations

.112 Some retailers have been in the news lately announcing debt restructurings, and bankruptcy reorganizations. Given the occurrence of these events and their inherently complicated nature, we have provided information below to remind you of the accounting requirements for companies involved in troubled debt restructurings and bankruptcy reorganizations. Also presented are some useful disclosure examples.

Troubled Debt Restructurings

.113 FASB Statement No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings* (FASB, *Current Text*, vol. 1, sec. D22) as amended, provides the primary guidance on accounting for troubled debt restructurings. The debtor's accounting for a troubled debt restructuring depends upon the kind of restructuring. For example, the arrangement could be a transfer of assets, a grant of equity, a modification of terms, or a combination of those kinds. In addition to the accounting requirements, FASB Statement No. 15, as amended, mandates debtors to make certain disclosures about their troubled debt restructurings.

.114 You may also need to be familiar with the guidance contained in EITF Issue No. 89-15, *Accounting for a Modification of Debt Terms When the Debtor is Experiencing Financial Difficulties* (FASB, *EITF Abstracts*), FASB Technical Bulletin 80-2, *Classification of Debt Restructurings by Debtors and Creditors* (FASB, *Current Text*, vol. 1, sec. D22), and FASB Technical Bulletin 81-6, *Applicability of Statement 15 to Debtors in Bankruptcy Situations* (FASB, *Current Text*, vol. 1, sec. D22).

Bankruptcy Reorganizations

.115 AICPA SOP 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code* (AICPA, *Technical Practice Aids*, vol. 2, sec. 10,460) provides guidance on financial reporting by entities that reorganize under Chapter 11 of title 11 of the U.S. Bankruptcy Code. SOP 90-7 distinguishes between financial reporting by the entity during the reorganization proceeding and financial reporting after the plan is confirmed by the court. The principal reporting problem during the proceeding is the measurement of liabilities subject to compromise. The principal reporting problem after the plan is confirmed is the allocation of the reorganization value to the assets of the entity. Determining the appropriate accounting in accordance with SOP 90-7 for entities in reorganization under the Bankruptcy Code requires considerable judgment. You should ensure that appropriate expertise is available in these situations.

Helpful Disclosure Examples

.116 Presented below are examples of financial statement disclosures that concern entities involved with a bankruptcy reorganization.

Example of Financial Statement Disclosure of Reorganization.

On [date], the Company's Second Amended Plan of Reorganization (the Plan of Reorganization) was confirmed by the United States Bankruptcy Court for the District of [place] (Case No. xx-xxx) (the Bankruptcy Court). None of the Company's foreign-based subsidiaries were part of the chapter 11 filing.

By its terms, the Plan of Reorganization becomes effective (*the Effective Date*) on the first business day that is at least ten days after the Bankruptcy Court order confirming the Plan of Reorganization is entered and on which no stay of such order is then in effect. On [date], the Bankruptcy Court entered its order confirming the Plan of Reorganization. Accordingly, the Effective Date of the Plan of Reorganization is [date].

On [date] (*the Filing Date*) the Company filed a voluntary petition (*the Chapter 11 Case*) under chapter 11 of the United States Bankruptcy Code. On [date], the Company filed an amended plan of reorganization and related disclosure statement with the Bankruptcy Court. On [date], the Bankruptcy Court approved as adequate the Disclosure Statement, thereby enabling the Company to solicit votes on the Plan of Reorganization from the Company's secured lenders (collectively, *the Lender Group*) and stockholders. From the Filing Date until the Effective Date, the Company operated its business as a debtor-in-possession subject to the jurisdiction of the Bankruptcy Court. During such time, all claims against the Company in existence prior to the Filing Date were stayed and have been classified as "liabilities subject to compromise" in the consolidated balance sheet.

At [date], "liabilities subject to compromise" were comprised of the following:

[list]

Example of "Basis of Presentation" Disclosure in Significant Accounting Policies Footnote, Related to a Bankruptcy Reorganization.

On [date], with the approval of all voting classes of creditors and equity holders, the United States Bankruptcy Court for [location] confirmed the Debtor's Modified Amended Consolidated Plan of Reorganization dated [date] [*the plan*]. On [date], the plan became effective. For accounting purposes, the effective date of the plan is considered to be [date].

Upon emergence from its Chapter 11 proceedings, the Company issued new common stock, warrants to purchase common stock and senior notes, and created a newly formed liquidating subsidiary, [name], which issued certain asset proceeds notes to be redeemed from the proceeds of sales of noncore assets.

The Company adopted fresh-start reporting in accordance with AICPA Statement of Position No. 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code*, as of [date]. The Company's emergence from its Chapter 11 proceedings resulted in a new reporting entity with no retained earnings or accumulated deficit as of [date]. Accordingly, the Company's consolidated financial statements for periods prior to [date] are not comparable to consolidated financial statements presented on or subsequent to [date]. A black line has been drawn on the accompanying consolidated financial statements to distinguish between the pre-reorganization and post-reorganization company.

Special Customer Programs

.117 To confront dwindling consumer demand and the weak economy, many retailers are increasingly offering special incentives to customers. Auditors should inquire whether a client has offered any incentives. Recently, the FASB EITF has been discussing issues relating to certain sales incentives. The following EITF issues relate to the accounting for sales incentives and should be considered:

- EITF Issue No. 00-14, *Accounting for Certain Sales Incentives* (Consensuses were reached May 17-18, 2000, with revisions made to the EITF Abstracts at the September 20-21, 2000 meeting.)
- EITF Issue No. 00-21, *Accounting for Multiple-Element Revenue Arrangements* (Consensuses were reached July 19, 2001, with revisions to the EITF Abstracts at the July 19, 2001 meeting.)
- EITF Issue No. 00-22, *Accounting for "Points" and Certain Other Time-Based or Volume-Based Sales Incentive Offers, and Offers for Free Products or Services to Be Delivered in the Future* (Originally discussed at the September 20-21, 2000 meeting, consensuses reached on Issue 3 January 17-18 2001, further discussion is planned at future meetings.)

.118 Auditors should also consider the guidance in SAS No. 89, *Audit Adjustments* (AICPA, *Professional Standards*, vol. 1, AU secs. 310, 333, and 380), when evaluating whether such sales incentives have been properly accounted for. SAS No. 89 establishes audit requirements designed to encourage client management to record financial statement adjustments aggregated by the auditor.

Employee Layoffs

.119 Many companies are instituting layoffs during this economic downturn. Since January 2001, announcements of job cuts just keep coming. U.S. companies have reported approximately 650,000 layoffs through May 2001. The trend is broad-based, affecting not just struggling industries like tech and telecom but also food and consumer products—both businesses once thought to be recession-proof. Healthy companies are also using layoffs as a tool to reduce costs and accumulate earnings as they maneuver through this economic downturn.

.120 If the retailing entity you are auditing is experiencing layoffs, management will need to properly account for employee-related termination charges such as severance packages, restructuring charges, and voluntary separation. In addition, management may need to properly account for outplacement services, bonuses, and educational allowances to assist employees in contending with the loss of their jobs. The following accounting literature provides guidance on accounting issues related to layoffs:

- EITF Issue No. 94-3 addresses liability recognition for certain employee termination benefits. See the "Store Closings, Restructuring Charges, and Asset Impairments" section of this Alert for further information about the guidance in EITF Issue No. 94-3.
- FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, establishes standards for accounting for curtailments and termination benefits among other issues. Practitioners should refer to paragraphs 6 to 14 for guidance on curtailment and paragraphs 15 to 17 for guidance on termination benefits. FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits other than Pensions*, requires the effect of the curtailment

(for example, the termination of employees' services earlier than expected, which may or may not involve closing a facility or discontinuing a segment of a business) to be recorded as a loss. Practitioners should refer to paragraphs 96 to 99 for guidance on how to account for plan curtailment. The Statement also provides guidance on how to measure the effects of termination benefits in paragraphs 101 and 102.

- FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits*, requires that entities providing postemployment benefits to their employees accrue the cost of such benefits. Inactive employees include those who have been laid-off, regardless of whether or not they are expected to return to work. Postemployment benefits that can be attributed to layoffs can include salary continuation, supplemental unemployment benefits, severance benefits, job training and counseling, and the continuation of benefits such as health care benefits and life insurance coverage.

FASB Statement No. 112 does not require that the amount of postemployment benefits be disclosed. The financial statement shall disclose if an obligation for postemployment benefits is not accrued because the amount cannot be reasonably estimated.

- FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits*, addresses disclosures only and requires the disclosure of the amount of gain or loss recognized resulting from a settlement or curtailment. Additionally, the cost of providing special or contractual termination benefits recognized during the period and a description of the nature of the event is required to be disclosed.

Subsequent Events

.121 Auditors should also refer to AU Section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1, AU sec. 560), for guidance on auditors' procedures relating to subsequent events. The following audit procedure should be applied to employee benefit plan engagements that include terminations. The auditor should inquire of and discuss with the plan administrator or other parties performing the plan's management function matters involving unusual terminations of participants, such as terminations arising from a sale of a division or layoffs.

Internal Control Deficiencies and Audit Processes

.122 Significant layoffs can have a serious effect on a retailer's internal control and financial reporting and accounting systems. For instance, employees who remain at the company may be overwhelmed by their workloads, under pressure to complete their tasks with little or no time to consider their decisions, or performing too many tasks and functions. The auditor may need to consider whether these situations exist and what their effect is on internal control.

.123 Additionally, the auditor may need to consider the possible effects that key unfilled positions can have on internal control. Retailers that have had strong financial reporting and accounting controls could see those controls deteriorate as a result of the lack of employees. Controls over inventory, purchasing, and receivable collections could also suffer. Layoffs can also create additional exposure to possible internal fraudulent activities (for example, when an employee performs job functions that otherwise would be segregated.)

.124 You may want to consider these issues in planning and performing the audit and in assessing control risk. Remember that gaps in key positions may cause control weaknesses representing reportable conditions that should be communicated to management and the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325).

Accounting for Advertising Costs

How should management account for advertising costs?

.125 Retailers advertise through newspaper inserts, local television, circulars, magazines and radio spots, which can take a big chunk out of their budgets and bottom lines. In the beginning of the year and now,

advertising has been used to help retailers with promoting markdowns for slow moving merchandise in an effort to keep inventory at a healthy level. Currently, retailers will use advertising to promote back-to-school sales, to target consumers receiving tax rebates, and to possibly develop a competitive edge in the upcoming holiday season. Practitioners should refer to SOP 93-7, *Reporting on Advertising Costs*, for guidance.

.126 SOP 93-7 defines advertising as a customer acquisition activity involving the promotion of an industry, an entity, a brand, a product name, or specific products or services so as to create or stimulate a positive entity image, or to create or stimulate a desire to buy the entities' products or services. It also provides guidance on accounting for advertising costs in annual financial statements for the following:

- a. Reporting the costs of advertising, which would be expensed either as incurred or the first time the advertising takes place, except for direct-response advertising:
 - (1) That is primarily intended to elicit sales to customers who could be shown to have responded specifically to the advertising.
 - (2) That results in probable future economic benefits.
- b. For direct-response advertising that may result in reported assets (that is, capitalized pursuant to the criteria set forth in items (1) and (2) above) as follows:
 - (1) How such assets should be measured initially
 - (2) How the amounts ascribed to such assets should be amortized
 - (3) How the realizability of such assets should be assessed

Additionally, SOP 93-7 requires that the notes to the financial statements should disclose the following:

- a. The accounting policy for reporting advertising, indicating whether such costs are expensed as incurred or the first time the advertising takes place
- b. A description of the direct-response advertising reported as assets (if any), the accounting policy for it, and the amortization period
- c. The total amount charged to advertising expense for each income statement presented, with separate disclosure of amounts, if any, representing a write-down to net realizable value
- d. The total amount of advertising reported as assets in each balance sheet presented

.127 The following is an example of the disclosures required by the SOP:

Note X. Advertising

The Company expenses the production costs of advertising the first time the advertising takes place, except for direct-response advertising, which is capitalized and amortized over its expected period of future benefits.

Direct-response advertising consists primarily of magazine advertisements that include order coupons for the Company's products. The capitalized costs of the advertising are amortized over the three-month period following the publication of the magazine in which it appears.

At December 31, 20XX, \$1,000,000 of advertising was reported as assets. Advertising expense was \$10,000,000 in 20XX, including \$500,000 for amounts written down to net realizable value.

Auditing and Attestation Pronouncements and Guidance Update

.128 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. The AICPA *Audit Risk Alert*—2001/02 [AAM section 8010] contains a summary explanation of all these issuances. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

.129 To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

On the Horizon

.131 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is some brief information about some ongoing projects that are especially relevant to the Retail industry. Remember that exposure drafts are non-authoritative and cannot be used as a basis for changing GAAP or GAAS. The AICPA general *Audit Risk Alert—2001/02* [AAM section 8010] summarizes some of the more significant exposure drafts outstanding.

.132 The following table lists the various standard-setting bodies' web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft.

<i>Standard Setting Body</i>	<i>Web site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
FASB	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees are now publishing exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To have your e-mail address put on the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft email list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

New Framework for the Audit Process

.133 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB expects to issue a series of exposure drafts in late 2001 and 2002. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "Expectation Gap" standards were issued in 1988.

.134 Some of the more important changes to the standards that are expected to be proposed are:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Among other things, this will improve the auditor's assessment of inherent risk and eliminate the "default" to assess inherent risk at the maximum.
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit.
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls.
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures.

These changes collectively are intended to improve the guidance on how the auditor operationalizes the audit risk model.

.135 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Book Shelf

.136 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- *Auditing Derivative Instruments, Hedging Activities and Investments in Securities* Audit Guide (Product No. 012520kk)
- *Auditing Revenue in Certain Industries* Audit Guide (Product No. 012510kk)
- *Audit Sampling* Audit Guide (Product No. 012530kk)
- *Analytical Procedures* Audit Guide (Product No. 012551kk)
- *Auditing Estimates and Other Soft Accounting Information* Practice Aid (Product No. 010010kk)
- *Accounting Trends & Techniques—2001*
- *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* Practice Aid (Product No. 006701kk)
- *Consideration of Internal Control in a Financial Statement Audit* 1997 (Product No. 012451kk)
- *Use of Real Estate Appraisal Information* 1997 (Product No. 013159kk)
- *Common Interest Realty Associations Checklist* (Product No. 008764kk)
- *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* (Product No. 008883kk)

Audit and Accounting Manual

.137 The *Audit and Accounting Manual* (Product No. 005131kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports; checklists; engagement letters, management representation letters, and confirmation letters.

CD-ROM

.138 The AICPA is currently offering a CD-ROM product titled *reSource: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to the following AICPA Professional Literature products in a Windows format: *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related Audit Risk Alerts, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Educational Courses

.139 The AICPA has developed a number of continuing professional education courses that are valuable to CPAs working in the specific industries. Those courses include:

- *AICPA's Annual Accounting and Auditing Workshop* (2000-2001 Edition) (Product No. 737061 (Text); 187078 (Video)). Whether you are in industry or public practice, this course keeps you current, informed, and shows you how to apply the most recent standards.
- *Independence* (Product No. 739035). This new interactive CD-ROM course will review the AICPA authoritative literature covering independence standards (including the newly issued SECPS independence requirements), SEC regulations on independence, and Independence Standards Board standards.
- *Internal Control Implications in a Computer Environment* (Product No. 730617). This practical course analyzes the effects of electronic technology on internal controls and provides a comprehensive examination of selected computer environments, from traditional mainframes to popular personal computer setups.

Online CPE

.140 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) will offer unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today as our guest at infobytes.aicpaservices.org.

CPE CD-ROM

.141 *The Practitioner's Update* (Product No. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.142 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.143 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.144 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online

.145 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as

developments in congressional and political affairs affecting CPAs. In addition, AICPA Online offers information about AICPA products and services, career resources, and online publications.

CPA2Biz.Com

.146 This new Web entity is the product of an independently incorporated joint venture between the AICPA and state societies. It currently offers a broad array of traditional and new products, services, communities and capabilities so CPAs can better serve their clients and employers. Because it functions as a gateway to various professional and commercial online resources, cpa2biz.com is considered a Web “portal.”

.147 Some features cpa2biz provides or will provide include:

- Online access to AICPA products like audit and accounting guides, and audit risk alerts
- News feeds each user can customize
- CPA “communities”
- Online CPE
- Web-site development and hosting
- Electronic procurement tools to buy goods and services online
- Electronic recruitment tools to attract potential employees online
- Links to a wider variety of professional literature
- Advanced professional research tools

Other Helpful Web Sites

.148 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this section.

.149 This Audit Risk Alert replaces *Retail Industry Developments—2000/2001*.

.150 Practitioners should also be aware of the economic, regulatory, and professional developments described in *Audit Risk Alert—2001/02* [AAM section 8010] and *Compilation and Review Alert—2001/02* [AAM section 8015] which may be obtained by calling the AICPA Order Department at (888) 777-7077.

.151 The *Retail Industry Developments* Audit Risk Alert is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year’s Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be greatly appreciated. You may e-mail these comments to lwest@aicpa.org or write to—

Jersey City, NJ 07311-3881

Appendix

The Internet—An Auditor's Research Tool

If used properly, the Internet can be a valuable tool for auditors. Through the Internet, auditors can access a wide variety of global business information. For example, information is available relating to SEC filings, professional news, state CPA society information, IRS information, software downloads, university research materials, currency exchange rates, stock prices, annual reports, and legislative and regulatory initiatives. Not only are such materials accessible from the computer, but they are available at any time, and are generally free of charge.

A number of resources provide direct information, whereas others may simply point to information inside and outside of the Internet. Auditors can use the Internet as follows:

- Obtain audit and accounting research information.
- Obtain texts such as audit programs.
- Discuss audit issues with peers.
- Communicate with audit clients.
- Obtain information from a client's Web site.
- Obtain information on professional associations.

There are caveats to keep in mind when using the Internet. The reliability of the information obtained via the Internet varies considerably. Some information on the Internet has not been reviewed or checked for accuracy; caution is advised when accessing data from unknown or questionable sources. Although a vast amount of information is available on the Internet, much of it may be of little or no value to auditors. Accordingly, auditors should learn to use search engines effectively to minimize the amount of time browsing through useless information. The Internet is best used in tandem with other research tools, because it is unlikely that all desired research can be conducted solely from Internet sources.

Some Web sites that may provide valuable information to auditors are listed in the following table.

<i>Name of Site</i>	<i>Content</i>	<i>Internet Address</i>
American Institute of CPAs	Summaries of recent auditing and other professional standards as well as other AICPA activities	www.aicpa.org
Financial Accounting Standards Board	Summaries of recent accounting pronouncements and other FASB activities	www.fasb.org
Securities and Exchange Commission	SEC Digest and Statements, EDGAR database, current SEC rulemaking	www.sec.gov
Independence Standards Board	Information on the activities of the Independence Standards Board	www.cpaindependence.org
The Electronic Accountant	<i>World Wide Web</i> magazine, which features up-to-the-minute news for accountants	www.electronicaccountant.com

<i>Name of Site</i>	<i>Content</i>	<i>Internet Address</i>
CPAnet	Links to other Web sites of interest to CPAs	www.cpalinks.com/
Guide to WWW for Research and Auditing	Basic instructions on how to use the Web as an auditing research tool	www.tetranet.net/users/gaostl/guide.htm

AAM Section 8160

Auto Dealership Industry Developments—2001/02

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your 2001 year-end audits of dealerships. Although this Alert focuses on the automobile dealership, the topics discussed often can be applied to other types of dealerships, including boats, heavy trucks, farm machinery, and recreational vehicles. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business and economic environment your clients operate in. This Alert is an important tool in helping you identify the significant business risks that may result in the material misstatement of your client's financial statements. Moreover, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the dealership industry and you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2001/02* [AAM section 8010].

Economic Developments

.04 With over 19,400 franchised automobile dealerships in the United States, automobile dealerships play a big role in the U.S. economy and in many local communities as well. In auditing a dealership you should be aware of the general economic, regulatory, and professional developments that may affect your client.

.05 The AICPA *Audit Risk Alert—2001/02* [AAM section 8010] contains a summary of general economic conditions, some of which are summarized in this section, along with certain industry-specific information. Keep in mind that Statement on Auditing Standards (SAS) No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329), requires the use of analytical procedures in the planning and overall review stages of all audits. Statistical information of the type shown may be useful to auditors in applying the provisions of SAS No. 56.

Dealership Results in 2000

.06 Surprisingly, franchised new vehicle dealers had another good year in 2000, despite the slowing of the U.S. economy. Total industry revenue hit another record by reaching more than \$646 billion (up from \$608 billion last year), with more than 17 million new cars and light trucks registered in the United States.¹ The new vehicle department contributed almost 25 percent to total profit at the average dealership. Although this is down from last year's 39 percent, this is still impressive compared to the last decade. Before 1998, dealership profits came mostly from the sale of used vehicles and the service and parts department. The following table shows the breakdown of dealership profits by department over the past three years.

¹ AutoExec magazine, NADA Data 2001 (August 2001), pp. 35–55.

Percentage of Total Dealership Profits

	2000	1999	1998
New vehicle department	25%	39%	29%
Used vehicle department	22%	19%	24%
Service and parts department	53%	42%	47%

.07 In 2000, sales of new vehicles increased 7 percent from 1999 and used vehicle sales increased 6 percent with total sales of 20.5 million used vehicles.² The service and parts department also had a good year with sales up 9 percent over last year. Even with record sales, however, total profit at the average dealership declined due to the increase in floor plan costs. The average dealer's floor plan interest (for the new and used car departments) for the first half of 2000 increased 52 percent over the first half of 1999.³

.08 The trend of the decline of small-volume franchised car dealerships continued in 2000. According to *AutoExec* magazine, in 1981 dealerships with sales of less than 150 new vehicles per year numbered 9,700. Today there are only 3,699 such dealerships (this is down from 4,161 last year). In contrast, today more than 6,400 dealerships sell more than 750 new vehicles per year, whereas fewer than 4,000 such dealerships existed in 1980.⁴

The Current Economic Environment

.09 As of the fourth quarter of 2001, the U.S. economy was weak and its outlook uncertain. Adding further agitation and uncertainty to that weak economic picture are the ramifications of the September 11 attacks upon America. The effects of the attacks are likely to further unhinge consumer confidence, decrease corporate earnings, increase layoffs, and further depress the stock market. To be sure, the short-term economic picture looks grim.

.10 Still, the financial underpinnings of the U.S. economy remain strong. Inflation is contained, interest rates have been cut, taxes have been lowered, energy prices have fallen, and the public debt has diminished. Additionally, in response to the September 11 attacks government stimulus measures are likely to be enacted in the form of increased spending on defense, spending on recovery efforts, direct aid to certain industries, and further tax cuts. The seeds of economic recovery are being sown. So while the health of the economy in the short term is grim and uncertain and will likely continue to worsen, some feel that the economic malaise may be short-lived.

.11 Total retail automobile sales mirror the general ebb and flow of the economy. Buying decisions are influenced by a multitude of economic factors, including disposable personal income; consumer confidence; the relationship between car prices, the rate of inflation, and real wage growth; and the availability, cost, and average maturity of consumer credit. No single variable determines how the industry will perform over time. However, there appears to be a strong historical relationship between consumer confidence and automobile sales. Given the interrelationship of automobile sales and the economy, auditors of dealerships will benefit from having an understanding of general economic conditions.

.12 SAS No. 56 requires the use of analytical procedures in the planning and overall review stages of all audits. The following key statistics relating to the overall performance of the U.S. economy may be useful to auditors in applying the provisions of SAS No. 56. It is important to point out however that in the wake of the September 11 attacks, the traditional indicators that many economists use to gauge the movement of the economy may be rendered useless in the short term. The effects of the September 11 attacks on the economy won't be known for some time.

² See footnote 1.

³ *AutoExec* magazine, October 2000, p. 25

⁴ *AutoExec* magazine, NADA Data 1995, p. 29; and NADA Data 1998 and NADA Data 2001.

- Gross domestic product (GDP)—which measures the output of goods and services produced by labor and property located in the United States—increased 1.3 percent in the first quarter. GDP barely grew in the second quarter of 2001, increasing slightly by .3 percent. This was the slowest performance in eight years. Prior to September 11, all indications were that the economy would continue to stagnate in the third quarter; instead third quarter GDP fell .4 percent, the first drop in GDP since 1993. Estimates for fourth quarter GDP point to a 1 percent or more decline. Some define a recession as a decline in GDP for two consecutive quarters thereby suggesting that the U.S. is entering a recession. In fact, the National Bureau of Economic Research establishes the official date of when a recession occurs based on the decline of several economic indicators, not just GDP.
- Consumer confidence,⁵ a key predictor of household spending, fell sharply in September 2001 to 97.6 from 114 in August. October 2001 saw consumer confidence at its lowest level in seven years, down to 85.5, with expectations for the next six months very dim. Still this level is higher than the 60 points consumer confidence was at during the Gulf War. Historically, there appears to be a strong relationship between consumer confidence and automobile sales, not boding well for dealers. However the current manufacturer incentives have helped to keep sales strong since September 11.
- Unemployment increased to 4.9 percent in August 2001 and remained steady at that level in September. In October 2001 unemployment jumped to 5.4 percent; this is the highest level it has been at since December 1996, reflecting the effects of September 11. Dealerships continue to play a major role in the nation's employment. In 2000 the payroll for all dealerships combined represented 11 percent of the nation's total retail trade payroll.⁶
- Interest rates have been cut 10 times this year—the fastest series of interest rate cuts seen in the past 14 years. On November 6, 2001, the federal funds rate (the interest rate at which banks lend to each other overnight) was reduced another half-point to 2 percent—this is down from 6.5 percent in the third quarter of 2000. By the end of the third quarter 2001, the prime rate (the rate many banks charge their top customers and to which other interest rates are often linked) was down to 6 percent and then was lowered again in October to 5.5 percent—the lowest it has been since 1972. The prime rate is down from 9 percent a year ago. Mortgage rates have also declined to under 7 percent from just six months ago. Mortgage rates are at their lowest in three years.

The Local Economy

.13 In addition to the national economy, auditors should also consider the local economy. Significant local developments may affect dealership performance. Plant closings and layoffs by major employers can send local economies into a tailspin. Certain regions may also be vulnerable to economic downturns in major local industries, whereas other regions may be susceptible to various natural disasters. Whenever a dealership operates in an area that is experiencing such economic pressures, new car sales are also negatively affected.

Layoffs

.14 The economic decline has been accompanied by major layoffs throughout many industries. Even healthy companies are using layoffs as a tool to reduce costs and accumulate earnings as they maneuver through this economic downturn.

.15 Significant layoffs can have a serious effect on an entity's internal control and financial reporting and accounting systems. For instance, employees who remain at the company may feel overwhelmed by their workloads, feel pressure to complete their tasks with little or no time to consider their decisions, and may be performing too many tasks and functions. The auditor may need to consider whether these situations exist and what their effect is on internal control.

⁵ As measured by the Conference Board. See www.conferenceboard.org for further information.

⁶ AutoExec magazine, NADA Data 2001, p. 48.

.16 Additionally, the auditor may need to consider the possible effects that key unfilled positions can have on internal control. Entities that have had strong financial reporting and accounting controls could see those controls deteriorate due to the lack of employees. Layoffs can also create additional exposure to possible internal fraudulent activities (for example, when an employee performs a job function that otherwise would be segregated).

.17 You may want to consider these issues in planning and performing the audit and in assessing control risk. Remember that gaps in key positions may cause control weaknesses representing reportable conditions that should be communicated to management and the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325).

Industry Developments and Other Issues

The following sections touch on how dealerships have fared in 2001 so far and what new obstacles they face.

.18 The automobile industry continues to be a highly saturated, mature industry with intense competition. The makeup of the automobile industry is changing, perhaps forever. The U.S. domestic car makers have been hit hardest by the slowing of the U.S. economy and the “Big Three” U.S. car makers (General Motors, Ford, and the Chrysler unit of Daimler-Chrysler) are quickly losing their market share to foreign competitors. While sales continue to decline for the domestic car makers, some of the foreign car makers are doing well, especially in the sport-utility, pickup, and minivan areas. At one time U.S. car makers held over 70 percent of sales in the U.S. car market. In August 2001 sales at the Big Three car companies fell below 60 percent of all new cars and trucks sold. It is believed that as their market share continues to erode, the U.S. car market may one day be dominated by foreign brands.

.19 This section discusses various threats, competitors, and other industry issues that may be relevant to auditors of dealerships. The following standards should be considered when auditing dealerships:

- SAS No. 22, *Planning and Supervision* (AICPA, *Professional Publications*, vol. 1 AU sec. 311), states that, when planning an audit, the auditor should consider other matters, such as accounting practices common to the industry, competitive conditions, and if available, financial trends and ratios.
- SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), indicates that the presence of a high degree of competition or market saturation, accompanied by declining margins, may indicate an increased risk of fraudulent financial reporting. Keep in mind that when risk factors are identified, professional judgment should be exercised in assessing their significance and relevance (see SAS No. 82 for a list of fraud risk factors).
- Auditors should also keep in mind their responsibilities under SAS No. 59, *The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341). SAS No. 59 discusses the auditor’s responsibilities with respect to evaluating whether there is substantial doubt about an entity’s ability to continue as a going concern. Some external matters cited by SAS No. 59 that indicate there could be substantial doubt about the entity’s ability to continue as a going concern when considered in the aggregate include loss of a key franchise and loss of a principal customer or supplier.

How Are Dealerships Doing in 2001?

.20 Dealerships are still seeing strong sales in 2001, although it is believed that 2001 will not be able to beat the record sales of the past few years. The strong level of sales throughout 2001 is being linked to the numerous manufacturer incentives that were offered, especially by the domestic car dealers. Sales estimates

prior to September 11 estimated total sales of just over 16.5 million vehicles. At first, sales of vehicles after September 11 were estimated to fall below the 16.5 million mark, however further manufacturer incentives have helped to spur record sales in October 2001. Since September 11 many domestic car dealers have offered new incentives linked to “patriotic” themes to help spur sales through the end of the year. While this has helped boost sales in the short-term, dealerships should be prepared for when these incentives are no longer offered. It is believed that the manufacturers may not be able to keep offering incentives as sales decline and cut into their profits.

September 11, 2001

.21 While sales of vehicles were already slowing down, the September 11 attacks on the World Trade Center and the Pentagon brought vehicle sales screeching to a halt. Sales declined almost 30 percent in the first couple of days after the attacks. Sales then rebounded through the end of the month due mainly to the zero percent financing program incentives that the Big 3 auto makers offered—helping to bring consumers back into the showrooms. In October 2001 a record of 1.73 million new light vehicles were sold. Sales of light vehicles are now expected to reach 16.8 million for the year. This level of sales would make 2001 the third best year ever. Forecasts for 2002 show sales falling below 16 million vehicles.

Operating in a Downturn

.22 In the wake of the September 11, 2001, terrorist attacks against America it seems more likely than ever that sales of new vehicles will be slowing. Naturally, many are concerned that America is headed for an economic recession. The automobile industry is vulnerable to economic swings and therefore is cyclical in nature. This makes us look to the past to see how dealerships have performed in difficult economic times.

Some History

.23 Total domestic car and light truck sales exploded during the mid 1980s, growing from a modest 10.05 million units in 1982 to a peak of 16.08 million units in 1986.⁷ In contrast, the late 1980s was marked by substantial declines. Sales declined from 1988 through 1991, reaching an eight-year low of 12.4 million units in 1991.⁸ Keep in mind that this decline coincided with the Gulf War. The industry began to rebound in 1992. The recovery in that year was relatively modest, which was consistent with the overall economy. During the lean years, many dealers struggled to survive. Faced with narrowing gross margins, these dealers reduced inventory, scaled back promotional expenses, and laid off employees to reduce overall expenses. Despite these efforts, according to *AutoExec* magazine, in 1990 and 1991 “... more than 20% of dealerships lost money, and nearly 1,500 went out of business.”⁹

What About Today?

.24 We are seeing some similarities in the way dealers are handling the current economic slowdown. Dealers are looking for ways to cut costs and to preserve their profits. Some dealers are trying to restructure their advertising, to get control of new and used inventory, and to control energy consumption. When the economy slows dealers attempt to shorten their vehicle turnover, for example to shorten it from 60 days to 45 days. Also look for dealerships to reduce head count and streamline advertising.

.25 J.D. Power and Associates released a report recently saying that although new vehicle sales fell sharply immediately after September 11, they expect sales to be less than last year but still the third best year on record. Manufacturers are doing their part in trying to spur on the sales of new vehicles. GM, Ford, and

⁷ Automotive News, 1995 Market Data Book, May 24, 1995, p. 25; 1992 Market Data Book, May 27, 1992, p. 17.

⁸ Automotive News, 1992 Market Data Book, May 27, 1992, p. 17.

⁹ AutoExec magazine, 1992 NADA Data Book, August 1992, p.24.

others offered new incentives to help raise the demand for new vehicles and to get Americans back to purchasing new cars. Dealers believed they would be affected first by the declining sales as they had already ordered their inventory for the remainder of 2001, however after record sales in October 2001, dealers' inventory levels are significantly less than inventory levels a year ago. Many believe that while the new incentives have helped sales now, the first part of 2002 will see tough times for the industry.

Audit Implications

.26 The declining business environment that auto dealerships are currently operating in presents business risks that could result in material misstatements to the financial statements. Issues that auditors may want to consider include:

- Going concern (consider guidance in SAS No. 59)
- Increased competitive environment and the pressure it places on management (see the section "Increased Competition" in this section of the Alert)
- Layoffs and their effect on internal control and related accounting issues (see the discussion of "Layoffs" in "The Current Economic Environment" section of this Alert)
- Increased risk of fraudulent financial reporting (consider guidance in SAS No. 82)

The Role of the Internet

.27 The Internet, once thought to be a major threat, has proven to be an asset to the dealers. The past year has shown that consumers want and need the bricks-and-mortar dealerships for many reasons, including to test drive and service their cars. This past year has seen the demise and consolidation of many auto dot-com companies. Most consumers use the Internet as a resource and a research tool but do the actual purchasing at the dealership. The Internet has changed the way dealerships operate. Dealerships now use the Internet for business-to-business and business-to-consumer purposes. Currently, 94 percent of dealerships have a Web site and 78 percent of dealerships use the Internet for business operations.¹⁰ Many dealers are using the Internet for vehicles, parts, and warranty claims. They can now order, trade, or locate cars online. These Internet-based systems allow for access to dealer data, dealer-factory communications, and competitive sales data. Dealers may face certain exposures when conducting business via the Internet. Such exposures include unauthorized access to or theft of data, computer viruses, and unauthorized transactions. The use of the Internet by dealers raises numerous accounting and auditing issues that should be considered by auditors.

Help Desk—For a thorough discussion of e-business issues and risks including audit and accounting concerns see the Audit Risk Alert *E-Business Industry Developments—2001/02* [AAM section 8210].

Increased Competition

.28 An unlikely competitor to the dealerships is now in the form of other independent service stations trying to win over the service of vehicles from dealerships. The profits from the service and parts departments contributed 53 percent to total dealership profits in 2000. Dealerships will be competing with independent service stations in the future for fewer repairs as the quality of vehicles increases.

Audit Implications

.29 The increasing competition from independent service stations generates more intense pressure on management to perform and meet earnings and revenue expectations. Some specific matters auditors should

¹⁰ A recent study by Autodata. NADA's AutoExec magazine, June 2001, p. 39.

be concerned with when auditing a client subject to intense pressures include the risk of material misstatement due to fraud, aggressive accounting methods, and internal control weaknesses.

.30 *Risk of Material Misstatement Due to Fraud.* SAS No. 82 points out the following factors that may indicate an increased risk of fraudulent financial reporting at an entity:

- High degree of competition or market saturation, accompanied by declining margins
- An excessive interest by management in maintaining or increasing the entity's earnings trend through the use of unusually aggressive accounting practices
- Management setting unduly aggressive financial targets and expectations for operating personnel
- Significant pressure to obtain additional capital necessary to stay competitive, considering the financial position of the entity
- Unrealistically aggressive sales or profitability incentive programs

When one or more of these risk factors is identified, professional judgment should be exercised when assessing their significance and relevance. Auditors assessing the risk of material misstatement due to fraud should keep in mind that the presence of a risk factor should not be considered in isolation, but rather in combination with other risk factors and conditions or mitigating circumstances. SAS No. 82 provides guidance to the auditor when considering risk factors in assessing the risk of material misstatement of the financial statements due to fraud.

.31 *Aggressive Accounting.* To achieve expected results or report improved financial results, management may adopt aggressive accounting positions. Auditors should be alert to aggressive accounting positions taken by management and determine whether the accounting is appropriate under the circumstances.

.32 *Overriding Internal Control.* Management of a dealership engaged in a severely competitive environment may aggressively engage in transactions that bypass normal internal control. If auditors determine that there is a risk of this occurring, they will need to take this into account in their consideration of internal control and perhaps increase control testing.

Relationships With Factories

.33 The National Automotive Dealers Association (NADA) continues to focus its efforts on industry relations. Last year's Alert discussed the rise in factory-owned dealerships. In 2000, we saw a retreat by the manufacturers in establishing their own Web sites and trying to sell directly to consumers. In many cases franchise laws have protected the traditional dealerships. In fact, Ford announced that by the end of the year it would sell many of its manufacturer-owned auto dealerships.

.34 The relationship between dealers and their factories¹¹ continues to be contentious. With the Ford recalls, the discontinuance of Oldsmobile, and the Blue Oval program there was a lot for domestic car dealers to be upset about.

.35 Auditors should pay attention to the factory-dealer relationship because it can have a tremendous impact on the dealership. In some cases, adverse relationships may affect the dealership's ability to continue as a going concern—for instance, if the discontinuance of a certain brand of vehicle plays a large roll in the profitability of a dealership or if a dealer cannot meet customer demands because it is unable to obtain certain types of vehicles from the factory. In reviewing such relationships, auditors should be aware of their responsibilities pursuant to SAS No. 59. SAS No. 59 says that ordinarily information that significantly

¹¹ For the purposes of this section, the word factories is synonymous with manufacturers.

contradicts the going-concern assumption includes the inability to continue to meet obligations as they become due without substantial disposition of assets outside the ordinary course of business, externally forced revisions of operations, or similar actions. Auditors also should consider whether management has made appropriate financial statement disclosures of concentrations in the available source of supply materials pursuant to Statement of Position (SOP) No. 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.36 The following discusses some of the more prominent conflicts between dealers and manufacturers.

Ford

.37 Relations between Ford and its dealers continued to be strained this year. You could not pick up a newspaper without reading about the Ford-Firestone recalls. To this day there is still “finger pointing” going on between Ford and Firestone. The dealers have concerns about how Ford has handled this crisis. Dealers are dependent upon their manufacturer to help support the products they sell. The Ford-Firestone situation has caused dealers to question Ford’s financial health, future product programs, and quality incentives. Ford dealerships have seen their sales and their profitability decline due to these recalls. In August Ford said it would take a \$900 million hit against earnings for restructuring including cutting 5,000 jobs. In addition the charge includes the selling of manufacturer-owned dealerships, and the write-down of electronic-commerce investments. Further, Ford has to deal with the decline in sales, the decline in market share, lower ratings on vehicle quality, and tire safety litigation.

.38 Ford’s Blue Oval program has also come under much criticism and is an area of contention between Ford and its dealers. The Blue Oval program is a customer satisfaction program that pays dealers an incentive for meeting certain customer service standards. Many dealers feel that this program is discriminatory and that the potential exists for some dealers to be at a competitive disadvantage. At the time of the writing of this Alert, North Carolina’s legislature was considering a bill that would ban the incentive tied to the Blue Oval program because of price discrimination. The bill was with a conference committee to settle a dispute concerning when the legislation should take effect. Be alert to the passing of this bill as it may spur on other states to follow suit.

General Motors

.39 Ford is not the only automobile manufacturer to have strained relations with its dealers. The announcement this year by GM that it would discontinue the Oldsmobile brand has left many dealers shaken. Some dealers feel that the announcement to discontinue the Oldsmobile has violated the existing franchise agreements by cutting the value of Oldsmobile to the public. Many Oldsmobile dealers believe that the buyout package that GM is offering is not adequate and that many dealers will be forced out of business. The possibility for a legal battle between GM and the Oldsmobile dealers exists.

.40 Other conflicts occurred when GM said it would enforce a franchise agreement requiring GM approval for any dual franchises. GM plans to sue dealers who refuse to move non-GM brands of vehicles out of their showrooms. GM also has problems with its dealers on the new ordering system. Many dealers have found the system very complex and time-consuming, putting more pressure on dealers and making more demands of them. This again shows the fragile relationship between dealers and manufacturers.

Chrysler

.41 Chrysler is not immune to conflict with its dealers. In taking cost-cutting steps to restore the company’s financial health, Chrysler has angered many of its dealers. Such steps as shipping cars to dealers without a full tank of gas, cutting funding for advertising and technology improvements at dealerships, and paying dealers less to get cars prepped for the showroom leave the dealers feeling that Chrysler is taking money out of their pockets.

Money Laundering

What should you know about money laundering?

.42 Money laundering¹² is the funneling of cash or other funds generated from illegal activities through legitimate financial institutions (and automobile dealerships are defined as nonbank financial institutions by the Bank Secrecy Act¹³) or other businesses to conceal the initial source of the funds. Money laundering is a global activity and, like the illegal activities that give it sustenance, it seldom respects local, national, or international boundaries. Current estimates of the size of the global annual “gross money laundering product” range from \$500 billion to \$1.5 trillion.¹⁴

.43 Criminals use a wide variety of bank and nonbank financial institutions and professional advisers to launder the proceeds of crime, and according to the U.S. Department of Treasury, auto dealerships and dealers in boats and aircraft may also be vulnerable. As money launderers increasingly look for a wide range of financial services and conservative, legitimate-appearing asset holdings, and as greater regulatory requirements for banks and other nonbank financial institutions make it more difficult for them to evade detection, the automobile dealership industry may become increasingly vulnerable to money laundering and more attractive to money launderers.

.44 Although automobile dealerships are not subject to specific anti-money laundering regulations under the Bank Secrecy Act, regulations issued by the Internal Revenue Service (IRS) require these businesses to report the receipt of currency and certain monetary instruments that exceed \$10,000. Section 6050I of the Internal Revenue Code requires that any person who, in the course of engaging in a trade or business, receives more than \$10,000 in cash or, in some instances, monetary instruments, in a single transaction or two or more related transactions, must file a report describing the transaction or transactions.¹⁵ This requirement does not apply to transactions that are reported under the Bank Secrecy Act to avoid duplicate reporting of the same transaction.

.45 As money laundering activities and methods become increasingly complex and ingenious, its “operations” tend to consist of three basic stages or processes—placement, layering, and integration.

.46 *Placement* is the process of transferring the actual criminal proceeds, whether in cash or in any other form, into the financial system in such a manner to avoid detection by bank and nonbank financial institutions and government authorities. Money launderers pay careful attention to national laws, regulations, governance, trends, and law enforcement strategies and techniques in order to keep their proceeds concealed, their methods secret, and their identities and professional resources anonymous. A common placement technique is to purchase expensive luxury goods, often through structuring¹⁶ payments of illicitly obtained cash and cash equivalents.

.47 *Layering* is the process of generating a series or layers of transactions to distance the proceeds from their illegal source and to obfuscate the audit trail in doing so. Common layering techniques include electronic fund transfers, usually directly or subsequently transacted with a “bank secrecy haven” or a jurisdiction with more liberal recordkeeping and reporting requirements; withdrawals of already-placed

¹² This section of the Alert was drafted after consultation with the U.S. Department of the Treasury. As such, it provides auditors with a unique insight into how federal regulators view this important area of concern.

¹³ 31 U.S.C. 315312(a)(2)(T).

¹⁴ By definition, money launderers are in the business of cloaking their activities and revenue, making this approximation difficult.

¹⁵ See 26 U.S.C. 6050I. The report must include the following information: the name, address, and taxpayer identification number of the person from whom the cash was received; the amount of cash received; the date and nature of the transaction; and such other information as may be prescribed by rule.

¹⁶ Structuring means breaking up large amounts of currency into smaller amounts to conduct transactions in such a manner to avoid currency reporting or other regulatory requirements.

deposits in the form of highly liquid monetary instruments, such as money orders and travelers checks; and requests for account transfers or checks made payable to third parties with whom the account holder or policy holder appears to have no obvious relationship.

.48 *Integration*, the final money laundering stage, is the unnoticed reinsertion of successfully laundered, untraceable proceeds into an economy. This is accomplished through a wide variety of spending, investing, and lending techniques and cross-border, legitimate-appearing transactions.

.49 Money launderers tend to use the victimized business entity as a conduit for illicit funds that need to be distanced from their source as quickly as possible in an undetected manner. Consequently, money laundering is far less likely to be detected in a financial statement audit than other types of illegal activities. In addition, money laundering activity is more likely to cause assets to be overstated rather than understated, with shorter-term fluctuations in account balances rather than cumulative changes. Money laundering is considered to be an illegal act with an *indirect* effect on financial statement amounts under SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). Under SAS No. 54, the auditor should be aware of the possibility that such illegal acts may have occurred. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred.

.50 Auditors should also note that laundered funds and their proceeds could be subject to asset seizure and forfeiture (claims) by law enforcement agencies that could result in material contingent liabilities during prosecution and adjudication of cases.

.51 In June 2000, the OECD's Paris-based Financial Action Task Force (FATF), the world's anti-money laundering watchdog intergovernmental organization, issued a *Review to Identify Non-Cooperative Countries or Territories*, expressly identifying 15 governments as noncooperative with other countries and jurisdictions in combating money laundering. Subsequently, in July, the U.S. Treasury Department followed suit with a series of Financial Crimes Enforcement Network (FinCEN) country advisories, which asked U.S. businesses to pay closer attention to transactions linked to these countries. During 2001, several of these jurisdictions were removed from the noncooperative lists and new ones added.

.52 For more information about the EITF, see the AICPA *Audit Risk Alert*—2001/02 [AAM section 8010].

.53 The AICPA Audit and Accounting Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk) is helpful in explaining what swaps are and how to audit them.

Help Desk—A description of federal regulations pertaining to money laundering appears in this Alert's *appendix*, "Federal Money Laundering Regulations."

Audit and Accounting Issues and Developments

Swaps and the Dealership

.54 Some dealerships may be using swaps as a means of managing financing costs. What are swaps and how do they work?

.55 The AICPA Audit and Accounting Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, new edition as of March 15, 2001, defines a swap as follows:

Swap—a forward-based contract in which two parties agree to swap streams of payments over a specified period of time.

.56 In effect, they exchange the investment performance of one underlying instrument for the investment performance of another instrument without exchanging the instruments themselves.

.57 There are different types of swaps, such as interest rate swaps and exchange rate swaps. An interest rate swap is when two parties agree to exchange interest payments on a set principal amount for a specified period of time. For example, when an entity pays interest under the swap at a variable rate and receives interest under the swap at a fixed rate, the entity actually pays or receives only the net amount under the swap. The most common form of interest rate swap entails the exchange of streams of fixed rate and variable interest payments. Other examples are basis swaps where both rates are variable but are tied to different index rates and fixed-rate currency swaps, whereby two counterparties exchange fixed-rate interest in one currency for fixed-rate interest in another currency.

.58 Interest rate swaps are often used because they allow the borrower to borrow in a readily accessible market yet obtain the type of debt they need via the swap. Swaps are also used to hedge existing debt obligations.

.59 If the dealership you are auditing is financing with swaps you should become familiar with what a swap is and how to audit such financial instruments.

Help Desk—The AICPA Audit and Accounting Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk) is helpful in explaining what swaps are and how to audit them.

.60 Keep in mind that Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*, applies when accounting for swaps. When auditing swaps SAS No. 92, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA Professional Standards, vol. 1, AU sec. 332) should be followed.

.61 The following are potential misstatements relating to swaps:

- Failure to identify the swap
- Failure to properly document the hedge and the expectation of hedge effectiveness
- Hedge not remaining highly effective on an ongoing basis, so that hedge accounting does not continue to be appropriate
- Assessment of hedge effectiveness inconsistent with the risk management strategy documented for the particular hedging relationship
- Dealership not assessing hedge effectiveness for similar hedging strategies in a similar manner, and not documenting such differences
- Incorrectly determining the fair value of the swap and the bonds
- Incorrectly computing and recording interest and accrued interest on the bonds
- Inadequate financial statement presentation and disclosure

.62 The following are inherent risks related to swaps:

- The transaction requires no initial cash outlay, and therefore detection of the derivative may be difficult.
- Management may not have a valuation model capable of valuing the interest rate swap and relies on the broker-dealer who arranged the transaction for the valuation of the swap.

- Credit risk related to the swap is moderate and is primarily related to the risk of nonperformance by the counterparty.

Finance and Insurance Income and SubPrime Lending

.63 Financing for high-credit risk customers, or *subprime lending*, continues to play a big role in a dealership's finance and insurance (F&I) area. Subprime loans are usually high-risk, high-yield loans offered to customers that would not qualify for traditional loans. Many financial institutions specialize in subprime loans. Because the majority of these loans are sold to a financial institution specializing in subprime loans, the dealership itself may have no exposure to risk of nonpayment. However, the auditor should closely review the terms of the arrangements between the dealer and the financial institution to ensure that such risk is indeed completely transferred. Many dealers as well as other financial institutions are getting out of the subprime lending area. In fact there has been much consolidation of subprime lenders and there have been many bankruptcies or foreclosures as well. If the dealership were to enter into subprime lending itself or undertake certain obligations in case of customer default, this would then become an area with a high level of audit risk. This past year has also seen an increase in the "buy here, pay here" business.

Buy Here, Pay Here

.64 Buy here, pay here, also referred to as a "note lot," is a type of used car business directed towards customers who purchase inexpensive, older model vehicles. The dealership usually provides its own financing. Customers typically provide a downpayment and finance the balance by a note to the dealership. These operations often involve high margins as well as high customer default rates and lack of effective collateralization. The notes generally carry stated interest rates in excess of current market rates, often as high as 30 percent. Accordingly, collection is often in doubt.

.65 Accounting Principles Board (APB) Opinion No. 10, *Omnibus Opinion*—1966, says that when "there are exceptional cases where receivables are collectible over an extended period of time and...there is no reasonable basis for estimating the degree of collectibility...either the installment method or the cost recovery method of accounting may be used."

- *Installment method.* The installment method defers the gross profit and treats each payment as if it included both recovery of cost and gross profit in the same ratio as the original sale. Thus if the original sale presumed a 60 percent gross profit, each principal payment would reduce the deferred gross profit by 60 percent of the amount received. Any receivables due more than one year from the balance sheet date should generally be classified as noncurrent.
- *Cost recovery method.* Under the cost recovery method revenue is credited and cost of sales debited for all receipts until costs are fully recovered. Only after receipts exceed the carrying value of the vehicle sold does the dealership recognize profits.

.66 Auditors may need to pay special attention to the collectibility of these receivables and whether they are realizable. Adequate allowances should be established. Also, management should comply with the guidance contained in APB No. 21, *Interest on Receivables and Payables*.

Financing at the Dealership

.67 When the dealership provides the customer with financing and the note is sold to a financial institution, that institution generally pays the dealership a fee. If a customer prepays or defaults on the note, the financial institution may charge back a portion of the fee to the dealership.

.68 In determining when a dealership should recognize financing income, auditors should assess management's consideration of FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial*

Assets and Extinguishments of Liabilities. Issued in September 2000, FASB Statement No. 140 provides accounting and reporting standards for transfers and servicing of financial assets and extinguishments of liabilities. FASB Statement No. 140 replaces FASB Statement No. 125, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, but carries over most of the FASB Statement No. 125 provisions without reconsideration.

.69 FASB Statement No. 140 requires that a transfer of financial assets in which the transferor surrenders control over those assets should be accounted for as a sale to the extent that consideration other than beneficial interests in the transferred asset is received in exchange. The transferor has surrendered control over the transferred assets if and only if all of the following conditions are met:

- a. The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. (In other words, the contract is beyond the reach of the dealership and its creditors, even in bankruptcy.)
- b. Each transferee (or, if the transferee is a qualifying special-purpose entity [SPE], each holder of its beneficial interests) has the right to pledge or exchange the assets (or beneficial interests) it received, and no condition both constrains the transferee (or holder) from taking advantage of its right to pledge or exchange and provides more than a trivial benefit to the transferor.
- c. The transferor does not maintain effective control over the transferred assets through either (a) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (b) the ability to unilaterally cause the holder to return specific assets, other than through a cleanup call.

.70 FASB Statement No. 140 requires that liabilities and derivatives incurred or obtained by transferors as part of a transfer of financial assets be initially measured at fair value, if practicable. It also requires that servicing assets and other retained interests in the transferred assets be measured by allocating the previous carrying amount between the assets sold, if any, and retained interests, if any, based on their relative fair values at the date of the transfer.

.71 FASB Statement No. 140 also requires:

- That servicing assets and liabilities be subsequently measured by (1) amortization in proportion to and over the period of estimated net servicing income or loss and (2) assessment for asset impairment or increased obligation based on their fair values.
- That a liability be derecognized if and only if either (1) the debtor pays the creditor and is relieved of its obligation for the liability or (2) the debtor is legally released from being the primary obligor under the liability either judicially or by the creditor. Therefore, a liability is not considered extinguished by an in-substance defeasance.
- A debtor (1) to reclassify financial assets pledged as collateral and report those assets in its statement of financial position separately from other assets not so encumbered if the secured party has the right by contract or custom to sell or repledge the collateral and (2) to disclose assets pledged as collateral that have not been reclassified and separately reported in the statement of financial position.
- That a secured party disclose information about collateral that it has accepted and is permitted by contract or custom to sell or repledge. The required disclosure includes the fair value at the end of the period of that collateral, and of the portion of that collateral that it has sold or repledged, and information about the sources and uses of that collateral.
- An entity that has securitized financial assets to disclose information about accounting policies, volume, cash flows, key assumptions made in determining fair values of retained interests, and sensitivity of those fair values to changes in key assumptions.

- That entities that securitize assets disclose for the securitized assets and any other financial assets it manages together with them (1) the total principal amount outstanding, the portion that has been derecognized, and the portion that continues to be recognized in each category reported in the statement of financial position, at the end of the period; (2) delinquencies at the end of the period; and (3) credit losses during the period.

.72 This statement provides:

- Implementation guidance for assessing isolation of transferred assets, conditions that constrain a transferee, conditions for an entity to be a qualifying SPE, accounting for transfers of partial interests, measurement of retained interests, servicing of financial assets, securitizations, transfers of sales-type and direct-financing lease receivables, securities lending transactions, repurchase agreements including “dollar rolls,” “wash sales,” loan syndications and participations, risk participations in banker’s acceptances, factoring arrangements, transfers of receivables with recourse, and extinguishments of liabilities.
- Guidance about whether a transferor has retained effective control over assets transferred to qualifying SPEs through removal-of-accounts provisions, liquidation provisions, or other arrangements.

.73 The Audit Issues Task Force (AITF) Interpretation, “The Use of Legal Interpretations As Evidential Matter to Support Management’s Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140” (AICPA, *Professional Publications*, vol. 1, AU sec. 9336.01-.21), provides guidance regarding the use of a legal specialist’s findings as audit evidence to support management’s assertion that a transfer of financial assets meets the legal isolation criterion of paragraph 9(a) of FASB Statement No. 140. The Interpretation addresses when the use of a legal specialist’s work may be appropriate; factors that should be considered in assessing the adequacy of the legal response; and the use, as audit evidence, of legal responses that are restricted to the client’s use. The Interpretation includes the form of letter that adequately communicates permission for the auditor to use the legal specialist’s opinion for the purpose of evaluating management’s assertion as well as sample language that does not adequately communicate such permission.

Leased Vehicles

.74 The leasing of vehicles has seen tough times over the past few years. The residual value that is set at the beginning of a lease is the most important factor when determining the profitability of a lease and the residual values on full-term leased vehicles have turned out to be much lower than originally anticipated. According to the Consumer Bankers Association, 68 percent of vehicles coming off lease in 2000 reached full term. Of those full-term vehicles returned, 95 percent resulted in losses to the lessor. This is up from 71 percent in 1998. The shortening of lease terms resulted in a record number of lease vehicles being returned in 1999 and 2000, flooding the used car market and driving down the residual values. Many independent companies have gotten out of the leasing industry, thereby reducing the number of leasing companies dealers have left to work with. In addition, the leasing companies that remain are promoting longer leases to help correct the oversupply of off-lease vehicles.

.75 In most cases when dealers lease a vehicle it is treated as a typical sales transaction because the dealership does not maintain the lease but transfers it to a manufacturer’s financing subsidiary. The dealership records a sale to the financing institution and the financing institution obtains a vehicle subject to a lease and the responsibility to account for the lease transaction.

Accounting for Leases

.76 Dealerships may, however, retain vehicle leases rather than transferring them. Dealerships may lease new vehicles under either a sales-type lease or an operating lease. When a long-term lease meets the criteria

established by FASB Statement No. 13, *Accounting for Leases*, the leasing transaction is treated as a sale. For the leasing transaction to be treated as a sales-type lease, the following conditions should be met.

.77 First, at least one of the following four conditions must exist:¹⁷

- a. The lease transfers ownership of the vehicle to the customer by the end of the lease term.
- b. The lease contains a bargain purchase option.
- c. The lease term is equal to at least 75 percent of the vehicle's estimated economic life.
- d. At the beginning of the lease term, the present value of the minimum lease payments (excluding executory costs) is at least 90 percent of the fair value of the vehicle.

.78 Second, the lease must fulfill both of the following criteria:

- a. Collectibility of the minimum lease payment is reasonably predictable.
- b. No important uncertainties, such as guarantees against obsolescence, surround the amount of unreimbursable costs yet to be incurred by the auto dealer.

If the lease meets these criteria, it is treated as a sale by the dealership.

.79 Auditors may wish to select a sample of the new leases and review the lease agreement. Auditors may also wish to understand all relevant terms of the lease agreement and carefully evaluate them to ensure that management has properly accounted for the transaction, including the calculation of receivables and interest income. Further, auditors may consider confirming the principal balance with the lessee.

.80 Many leases establish a mileage charge in addition to the minimum lease payments. These are considered contingent payments under FASB Statement No. 13 and are not considered in the minimum lease payments. Accordingly, they do not enter into the calculation of the sales price of a sales-type lease. Instead, they are recognized when they are determined to be receivable. FASB Statement No. 13 requires that the total contingent rentals included in income be disclosed in the financial statements. (See Emerging Issues Task Force [EITF] Issue No. 98-9, *Accounting for Contingent Rent*, for guidance on how lessors and lessees should account for contingent rental income that is based on future specified targets.)

.81 Dealerships may also enter into operating leases. Some of these are long-term leases that do not meet the criteria established in FASB Statement No. 13 for sales-type leases. Others are short-term rentals done for the benefit of customers whose vehicles need repair.¹⁸ In these cases rental revenue is recognized as it is earned. Many floor plan arrangements allow the dealer to pay off a portion of the debt (for example, 2 percent) every month for these vehicles.

.82 For operating leases, auditors should consider whether management has complied with the provisions and disclosures required by FASB Statement No. 13.

Customer Incentives

.83 Dealerships continue to offer special incentives to customers, such as free oil changes for a certain period of time. Auditors should inquire if their clients have offered any such incentives. Recently the EITF

¹⁷ The third and fourth conditions do not apply if the lease is entered into during the last 25 percent of the vehicle's estimated economic life.

¹⁸ The same accounting is usually used for loaners except that there is no rental revenue. Many dealerships include loaners under inventory in their financial statements.

has been discussing issues relating to certain sales incentives. The following EITF issues relate to the accounting for sales incentives and should be considered:

- EITF Issue No. 00-14, *Accounting for Certain Sales Incentives* (Consensuses were reached May 17–19, 2000, with revisions made to the EITF Abstracts at other various meetings.)
- EITF Issue No. 00-21, *Accounting for Multiple-Element Revenue Arrangements* (Originally discussed at the July 19–20, 2000, meeting, further discussion is planned, however any future discussions will not be applicable to SEC registrants.)
- EITF Issue No. 00-22, *Accounting for “Points” and Certain Other Time-Based or Volume-Based Sales Incentive Offers, and Offers for Free Products or Services to Be Delivered in the Future* (Originally discussed at the September 20–21, 2000, meeting. Consensuses were reached on Issue No. 3 at the January 17–18, 2001, meeting. Further discussion is planned at future meetings.)
- EITF Issue No. 00-25, *Vendor Income Statement Characterization from a Vendor to a Retailer* (Originally discussed September 20–21, 2000. Consensuses reached April 18–19, 2001.)

Help Desk—For more information about the EITF, see the AICPA *Audit Risk Alert*—2001/02 [AAM section 8010].

Employee Fraud

.84 Many dealers experience fraud at some time or another and much of this fraud is perpetrated by dealership employees. Some examples of dealership frauds include:

- Embezzlement by controller and other employees
- Unexplained shrinkage in parts and accessories
- Collusion (generally involving trade-ins and auction purchases when a salesperson, in exchange for payment, appraises a trade-in at a higher value or purchases a vehicle at auction at a higher value)

.85 With proper controls in place, many of these frauds can be deterred. Auditors should look for any of the following management controls which may mitigate the chance for such frauds:

- Owners review checks issued, including a timely review of bank statements.
- Check signing is limited to the dealer, general manager, and controller, and requires two signatures.
- Vehicle tags and keys are kept in a secured area.
- Strict records are maintained to track inventory.
- Locations are visited or certain tests are performed on a surprise or unannounced basis—for example, surprise vehicle inventory counts in the middle of the month.
- Employees are required to take vacation time at least once a year.
- There is a clear segregation of duties.
- Managers review write-offs, not just sign them.

.86 As discussed earlier in this Alert, SAS No. 82 provides guidance about an auditor’s responsibilities related to fraud.

Help Desk—For additional guidance on SAS No. 82, you may wish to refer to the AICPA Practice Aid *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* (product no. 008883kk), which includes issues likely to be encountered in applying SAS No. 82 to audits and valuable tools, such as sample documentation. The self-study

course *Consideration of Fraud in a Financial Statement Audit: The Auditor's Responsibilities under SAS No. 82* (product no. 732045kk) also provides additional guidance.

Independence

AICPA Independence Rule Modernization

.87 In light of fast-moving changes in society and business, the profession has responded by shifting from “firm-based” independence rules toward an approach that is “engagement team based.” In an effort to modernize the profession’s rules on independence, the Professional Ethics Executive Committee (PEEC) of the AICPA approved new independence rules on August 9, 2001. The rules become effective May 31, 2002. These significant revisions to section 101 of the AICPA Code of Professional Conduct seek to modernize and harmonize independence rules with other governing bodies, most notably the SEC, while simplifying the rules at the same time. For a more detailed discussion of these rules see the *AICPA Audit Risk Alert—2001/02* [AAM section 8010].

Help Desk—Final rules are available at www.aicpa.org/members/div/ethics/adopt.htm and published in the November 2001 issue of AICPA’s *Journal of Accountancy*.

Regulatory Issues

.88 Certain environmental and Occupational Safety and Health Administration (OSHA) regulations, as well as particular Internal Revenue Code (IRC) sections, are of particular importance to the dealership industry. For example, under California’s clean air rules, a certain percentage of cars sold in the state must emit no harmful exhaust. Car manufacturers continue to research alternative methods to power vehicles without emitting harmful exhaust. Hybrid vehicles are becoming more prevalent. According to *AutoExec* magazine, sales of the Honda Insight and the Toyota Prius have more than doubled. State and local regulations generally fall into four categories: (1) environmental, (2) taxation, (3) vehicle registration, and (4) business practices.

Current Legislation

- .89 The following may be of interest to dealers. You may want to keep abreast of the status of these issues.
- The corporate average fuel economy standards (CAFE)
 - Voluntary Arbitration Bill¹⁹

Tax Issues

.90 Again, things have been fairly quiet this past year relating to tax issues for dealerships. The NADA reported that the IRS plans to address the issue of “demos” sometime this year; therefore we will discuss demos again in this year’s Alert. This section also discusses other areas that continue to be important to dealerships. In auditing the financial statements of auto dealerships, in particular when evaluating management’s accounting for income taxes in accordance with FASB Statement No. 109, *Accounting for Income Taxes*, as amended, auditors should be familiar with federal, state, and local tax rules.

Help Desk—Visit the IRS Web site for information on tax laws and regulations specific to the automotive industry at www.irs.gov/prod/smallbiz/automotive/rules_regulations.htm.

¹⁹ This bill, introduced in the Senate, would prevent manufacturers from forcing arbitration on dealers and is identical to the measure passed last year by the House.

New Tax Laws and Regulations

Federal Trade Commission's New Privacy Regulations

.91 Effective July 1, 2001, the Federal Trade Commission (FTC) rule requires any business collecting financial information from customers to notify the customer of the business's privacy policies. The NADA Web site provides guidance for dealerships on this regulation at www.nada.org/memberservices/governmentaffairs/regulation. You must be a member of NADA to obtain this information. See the AICPA *Audit Risk Alert*—2001/02 [AAM section 8010] for more information about the new privacy regulations.

Revenue Procedure 2001-23

.92 Revenue Procedure 2001-23 provides an alternative LIFO (last in, first out) inventory computation method (the used vehicle alternative LIFO method) for used vehicle dealers. Used vehicle dealers may change to or adopt this alternative method. Used vehicle dealers may obtain automatic consent to change their method of accounting to this alternative method by following the procedures in Revenue Procedure 99-49, 1999-52 C.B. 725 (or its successor) as modified by this Revenue Procedure.

Help Desk—To obtain a copy of Revenue Procedure 2001-23 visit www.revenueprocedures.com/procedures/2001/revproc2001-23.htm.

Parts Inventory

.93 Last year, the U.S. Tax Court ruled that the use of replacement cost to value parts is contrary to LIFO regulations, and the IRS added the entire parts LIFO reserve back into the dealer's income. The Tax Court ruled that parts should be valued at actual cost rather than replacement cost.²⁰ In response to this, the NADA proposed four alternatives to the IRS for ways dealers using LIFO should value parts inventory. The NADA proposed that dealers may:

- a. Value inventory based on actual cost of most recent purchases
- b. Adjust year-end value based on number of turns for the year
- c. Use automakers' midyear prices to price current inventory
- d. Price year-end inventory against pricing at the beginning of the year

.94 This case is currently on appeal.

.95 Some dealerships using LIFO may value their parts and accessories inventories at replacement cost. Because this method is a departure from GAAP, auditors of dealerships should consider the effect of this misstatement on the financial statements and on their report. SAS No. 58, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 508.35–.60), describes the circumstances that may require a qualified or adverse opinion when the financial statements contain a departure from GAAP. A qualified opinion is expressed when the auditor believes, on the basis of his or her audit, that the financial statements contain a departure from GAAP, the effect of which is material, and he or she has concluded not to express an adverse opinion. An auditor should express an adverse opinion when, in the auditor's judgment, the financial statements taken as a whole are not presented fairly in conformity with GAAP.

LIFO Conformity Rules

.96 LIFO continues to be a focus of concern for the IRS. Franchised automobile dealers are normally required to issue monthly income statements to their franchisor, who is also typically a creditor of the dealership.

²⁰ Mountain State Ford Truck Sales, Inc. vs. Comm. (docket no. 16350-95) can be obtained from the Tax Court Web site, www.taxcourt.gov

These monthly statements are often prepared in a format required by the franchisor or on a preprinted form supplied by the franchisor. The 12th-month statement is normally issued within a few days after the end of the year and presents the dealership's operating results for both the month and the calendar year. It is subsequently amended by another income statement commonly known as the 13th-month statement.

.97 For several years, there was uncertainty about whether certain monthly income statements issued to the franchisor or creditor violated the LIFO conformity requirement of IRC section 472(c) or (e)(2). In 1997, the IRS issued guidance to assist auto dealers in determining whether they had violated the LIFO conformity requirement (Revenue Ruling 97-42). In addition, the IRS also issued guidance to forgive certain LIFO conformity violations by auto dealers that occurred on or before October 14, 1997 (Revenue Procedure 97-44).

.98 Revenue Ruling 97-42 provides that an auto dealer has violated the LIFO conformity requirement by providing the credit subsidiary of its franchisor with a 12th-month income statement (in the format required by the franchisor or on preprinted forms supplied by the franchisor) for the tax year, if that statement fails to reflect the LIFO inventory method in the computation of net income. The ruling provides that an auto dealer has not violated the LIFO conformity requirement if the 12th-month income statement issued to the credit subsidiary of its franchisor uses the LIFO inventory method to determine net income for both the 12th-month and for the entire year (even if the LIFO adjustment is only a reasonable estimate). The LIFO adjustment can be made either against cost of goods sold (so that it is reflected in gross profit) or as an adjustment below the line (so that it is reflected in net income). The IRS may feel that the use of a constant LIFO reserve throughout the year is not a reasonable estimate when the dealer is not on a calendar-year basis.

.99 Auto dealers could have received relief under Revenue Procedure 97-44 for prior LIFO conformity violations; however, the relief did not apply to all prior conformity violations. The settlement amount was due by May 31, 1998, as an initial installment of one-third of the total, followed by two other equal payments on January 31, 1999, and January 31, 2000. Failure to make any of these installment payments in a timely manner would void the relief protection.

.100 An auto dealer not making a settlement payment should take steps to fully document the fact that it is not required to make such a payment. Copies of all available annual income statements issued during the look-back period (of six years) should be retained, as well as any other evidence to document when and to whom statements were issued.

.101 In the future, auto dealers should make certain that they comply with the LIFO conformity rules of IRC section 472, as well as Revenue Ruling 97-42, for all income statements issued to shareholders and creditors.

.102 Auditors should be aware of the issue of conformity violations thus far discussed. If an auto dealership has violations and has failed to use the relief that expired on May 31, 1998, the IRS can terminate the dealership's LIFO election and the income tax owed would become due immediately, plus interest and penalties that, in most cases, will be substantial.

.103 IRS rulings and procedures that apply include the following:

- IRS Revenue Procedure 97-36, which supersedes IRS Revenue Procedure 92-79 and is effective August 18, 1997. Revenue Procedure 92-79 specified the LIFO inventory valuation approach and standardized the LIFO calculation for new vehicles. The alternative method discussed in Revenue Procedure 97-36 is the same as the method in Revenue Procedure 92-79 and therefore may not significantly change what dealerships do.
- IRS Revenue Ruling 97-42, which provides guidance to assist auto dealers in determining whether they have violated the LIFO conformity requirements.

- IRS Revenue Procedure 97-44, which gives special relief for certain LIFO conformity violations as long as the action was taken by May 31, 1998. The NADA also issued guidance in this area in its publication *A Guide to the LIFO Conformity Settlement*.

The Use of Demonstrators

.104 The NADA reported that under the IRS's new Industry Issue Resolution Pilot Program dealership demos is one of seven subjects picked by the IRS to be considered. The pilot program was created to resolve frequently disputed tax issues that affect large numbers of businesses.

.105 Demonstrator inventory comprises the value of new vehicles placed in demonstrator service. Generally these autos are taken out of the new inventory accounts. Any labor and material costs for dealer-installed equipment and accessories are added to the inventory value; the cost of any such equipment or accessories removed from the vehicle is subtracted from inventory. Many dealerships limit the number of miles that demonstrators may be driven. Demonstrators are generally not written down for wear and tear or depreciation because, even after use, their market values generally exceed inventory cost. If cost exceeds value, however, a write-down may be necessary. When a demonstrator is sold, it is transferred back to new vehicle inventory because the sale is reported as a new vehicle sale.

.106 If the IRS determines that a dealership violated the special rules that govern qualified automobile demonstration use, the value of the use of employer-provided vehicles is a fringe benefit that must be included in the employee's gross income, and the dealer will need to pay the related employment taxes. IRS Private Letter Ruling 9801002 discusses situations in which the IRS found a dealership to be in violation of the special rules for "certain fringe benefits." The private letter ruling says that qualified automobile demonstration use should be treated as a working condition fringe. (Section 132(a)(3) specifically provides that qualified automobile demonstration use should be treated as a working condition fringe.)

.107 *Qualified automobile demonstration use* is defined as any use of an automobile by a full-time automobile salesperson in the sales area in which the automobile dealer's sales office is located if:

- a. Such use is provided primarily to facilitate the salesperson's performance of services for the employer.
- b. There are substantial restrictions on the personal use of the automobile by the salesperson.

.108 The substantial restrictions on the personal use of the automobile by the salesperson exist when all of the following conditions are met:

- a. Use by individuals other than the full-time automobile salesperson is prohibited.
- b. Use for personal vacation trips is prohibited.
- c. The storage of personal possessions in the automobile is prohibited.
- d. The total use of the automobile, by mileage, by the salesperson outside the salesperson's normal working hours is limited.

.109 The IRS will typically examine the records of demonstrator vehicles to substantiate that only qualified personnel have been assigned demonstrators and that personal use is accounted for properly. Lists of personnel-assigned demonstrator vehicles may be checked against payroll records to detect family members and others who do not qualify for demonstrator vehicles. Individuals not qualifying for demonstrator vehicles would have to report additional income attributable to their personal use of a company vehicle. Depreciation expense accounts are reconciled to verify that depreciation is not taken on demonstrator vehicles.

.110 You may want to familiarize yourself with Private Letter Ruling 9801002 to see where the IRS found the dealership to be in violation and compare that with the practices of your clients. In addition, be alert to any decision made by the IRS through the Industry Issue Resolution Pilot Program.

New Auditing and Attestation Pronouncements

.111 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year's Alert. The AICPA *Audit Risk Alert*—2001/02 [AAM section 8010] contains a summary explanation for all these issuances.

Help Desk—For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

On the Horizon

.113 Auditors should keep abreast of auditing and accounting developments and related guidance that may affect their engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS. The AICPA *Audit Risk Alert*—2001/02 [AAM section 8010] summarizes some of the more significant exposure drafts outstanding.

.114 The following table lists the various standard-setting bodies' Web sites where you can go to obtain information on outstanding exposure drafts and download a copy of the exposure draft.

<i>Standard Setting Body</i>	<i>Web Site</i>
AICPA Auditing Standards Board (ASB)	www.aicpa.org/members/div/auditstd/drafts.htm
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/members/div/acctstd/edo/index.htm
Financial Accounting Standards Board (FASB)	www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.html
Professional Ethics Executive Committee	www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA's standard-setting committees are now publishing exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process the submissions more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message.

New Framework for the Audit Process

.115 The ASB is reviewing the auditor's consideration of the risk assessment process in the auditing standards, including the necessary understanding of the client's business and the relationships among inherent, control, fraud, and other risks. The ASB expects to issue a series of exposure drafts in late 2001 and 2002. Some participants in the process expect the final standards to have an effect on the conduct of audits that has not been seen since the "Expectation Gap" standards were issued in 1988.

.116 Some of the more important changes to the standards that are expected to be proposed are:

- A requirement for a more robust understanding of the entity's business and environment that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Among other things, this will improve the auditor's assessment of inherent risk and eliminate the "default" to assess inherent risk at the maximum.
- An increased emphasis on the importance of entity controls with clearer guidance on what constitutes a sufficient knowledge of controls to plan the audit.
- A clarification of how the auditor may obtain evidence about the effectiveness of controls in obtaining an understanding of controls.
- A clarification of how the auditor plans and performs auditing procedures differently for higher and lower assessed risks of material misstatement at the assertion level while retaining a "safety net" of procedures.

.117 These changes collectively are intended to improve the guidance on how the auditor operationalizes the audit risk model.

.118 You should keep abreast of the status of these projects and projected exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.119 The following are some of the AICPA publications that deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* Audit Guide (product no. 012520kk)
- *Auditing Revenue in Certain Industries* Audit Guide (product no. 012510kk)
- *Audit Sampling* Audit Guide (product no. 012530kk)
- *Analytical Procedures* Audit Guide (product no. 012551kk)
- *Accounting Trends & Techniques—2001* (product no. 009893kk)
- *E-Business Industry Developments 2001/02* Audit Risk Alert [AAM section 8210]
- *Auditing Estimates and Other Soft Accounting Information* Practice Aid (product no. 010010kk)
- *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* Practice Aid (product no. 006701kk)
- *Considering Fraud in a Financial Statement Audit: Practical Guidance for Applying SAS No. 82* Practice Aid (product no. 008883kk)

Audit and Accounting Manual

.120 The *Audit and Accounting Manual* is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs, auditors' reports, checklists, engagement letters, management representation letters, and confirmation letters.

CD-ROM

.121 The AICPA is currently offering a CD-ROM product titled *reSource: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to the following AICPA Professional Literature products in a Windows format: *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related Audit Risk Alerts, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Educational Courses

.122 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the automobile dealership industry. Those courses include:

- *Automobile Dealership Accounting* (product no. 735156kk)

Online CPE

.123 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) will offer unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

CPE CD-ROM

.124 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.125 To order AICPA products, receive information about AICPA activities, and find help on your membership questions call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.126 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.127 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Conferences

National Auto Dealership Conference

.128 Each fall the AICPA sponsors a National Auto Dealership Conference that is specifically designed to update auditors and dealers on significant accounting, auditing, legal, financial, and tax developments affecting the auto dealership industry. Information on the conference may be obtained by calling the AICPA Conferences Division at (201) 938-3556.

Web Sites

AICPA Online

.129 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, AICPA Online offers information about AICPA products and services, career resources, and online publications.

CPA2Biz

.130 This new Web entity is the product of an independently incorporated joint venture between the AICPA and state societies. It currently offers a broad array of traditional and new products, services, communities, and capabilities so CPAs can better serve their clients and employers. Because it functions as a gateway to various professional and commercial online resources, cpa2biz.com is considered a Web "portal."

.131 Some features cpa2biz provides or will provide include:

- Online access to AICPA products such as Audit and Accounting Guides, and Audit Risk Alerts
- News feeds each user can customize
- CPA “communities”
- Online CPE
- Web site development and hosting
- Electronic procurement tools to buy goods and services online
- Electronic recruitment tools to attract potential employees online
- Links to a wider variety of professional literature
- Advanced professional research tools

Other Helpful Web Sites

.132 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of this Alert.

.133 This Audit Risk Alert replaces *Auto Dealership Industry Developments—2000/01*.

.134 The Audit Risk Alert *Auto Dealership Industry Developments* is published annually. As you encounter audit and industry issues that you believe warrant discussion in next year’s Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be greatly appreciated. You may e-mail your comments to ldelahanty@aicpa.org or write to:

Appendix

Federal Money Laundering Regulations

The Bank Secrecy Act (BSA), enacted to address the problem of money laundering, authorizes the U.S. Department of the Treasury to issue regulations requiring bank and nonbank financial institutions to file reports, keep certain records, implement anti-money laundering programs and compliance procedures, and report suspicious transactions to the government (see 31 CFR Part 103). Failure to comply with BSA reporting and recordkeeping provisions may result in the assessment of severe criminal and civil penalties. Automobile dealerships are defined as financial institutions under the Act (Title 31 USC 5312(a)(5312(a)(2)(T)) but are not currently subject to BSA rules. IRS regulations require dealerships to file reports for cash (and certain cash equivalents) transactions greater than \$10,000 (26 USC 6050I). Cash transactions conducted by or on behalf of the same customer in a 24-hour period must be aggregated and, if the cash transactions exceed \$10,000, must be reported. In addition, multiple cash transactions conducted over the course of a rolling one-year period, by or on behalf of the same person, must also be aggregated and reported if the dealership knows or has reason to know that the transactions are related.

As with the BSA, structuring transactions to avoid reporting is prohibited, and willful failure to file a Form 8300 or to file incorrectly may result in severe criminal and civil penalties.

BSA rules governing the reporting of international transportation of currency or monetary instruments (CMIRs—Customs Form 4790) have not been modified since 1989, and foreign bank and financial accounts (FBARs—Treasury Form TDF 90-22.1) have not been modified since 1987. However, on January 16, 1997 (see the *Federal Register*), the Treasury issued a proposal to expand the statutory definition of monetary instruments to include foreign bank drafts.

For copies of BSA forms mentioned in this appendix and more information regarding anti-money laundering issues, consult the FinCEN Web site at www.treas.gov/fincen.

E-Business Industry Developments—2002/03

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your e-business audits. The knowledge delivered by this Alert assists you in achieving a more robust understanding of the business environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the world of e-business activities, and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining knowledge of e-business issues and understanding them.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

E-Business Background

.04 A critical component of a successful e-business audit is a comprehensive knowledge of the environment in which e-business operates. The e-business environment is almost borderless—and, because of the relative infancy of this environment, established standard guidelines and metrics for performance may not be as robust as in other areas. For these reasons, among others, you should carefully consider the unique audit implications of dealing with or being in such a new and vaguely defined industry. For example, the e-business environment contains unique business risks resulting from the reliance on technology. These risks can include lack of paper audit trails, extensive use of information technology, risks/exposure of loss of data, and system interdependencies, among others.

.05 The primary purpose of this Alert is to address the most important current auditing, accounting, and regulatory issues related to e-business to help you as you plan your engagements. See the later sections of this Alert that relate directly to these topics.

Internet and E-Business Development

.06 The Internet occupies a large presence today in our everyday lives and business lives. Among the many things that Internet technologies allow is providing the opportunity for using e-business to:

- Increase brand awareness and expand sales opportunities (by opening additional sales channels, for example)
- Improve communications and customer service (by providing product descriptions, facilitating order placement and tracking order status, for example)
- Enhance purchasing and selling functions (by linking systems to sales and inventory databases to allow for production of automatic purchase orders, for example)
- Create more efficient, convenient, and customized customer transactions (for example, allowing larger items for selection at the tip of the customer's typing fingers)

.07 These business functions, and the use of the Internet to conduct business, improve and expand the horizon for conducting business in a convenient, efficient, and timely manner. However, these somewhat rosy descriptors about conducting e-business are somewhat offset by the tradeoff of risk necessary to obtain them. Consider, for example, the daily reminders of the risk associated with various security vulnerabilities, “denial of service” attacks, and other threats to revenues and assets. In addition, special e-business risks can stem from an enterprise’s information technology (IT) infrastructure, either through inherent vulnerabilities or through internal or external attacks. Further, vulnerabilities in IT infrastructure can create exposure to other e-business risks, such as those associated with compromised privacy, falsified authenticity, destructive programs, and issues surrounding the availability and integrity of data. System interdependencies can sometimes make an e-business enterprise vulnerable through the system of a business partner, even if the enterprise itself effectively manages the risk within its own boundaries. You can find a more detailed discussion of e-business risk later in this Alert in Appendix A, “Identifying and Managing E-Business Risks.”

E-Business Models

.08 The variety of e-business models is limited only by entrepreneurial vision. Companies are constantly innovating to compete in the marketplace. Many e-business models encompass business-to-consumer (B2C) transactions, business-to-business (B2B) transactions, and variations on these themes, as noted in the following chart. Several new models have emerged, as well. (Note the acronyms in the following chart as they relate to government, business, consumer, and employee.)

	<i>Government (G)</i>	<i>Business (B)</i>	<i>Consumer (C)</i>	<i>Employee (E)</i>
Government	G2G	G2B	G2C	G2E
Business	B2G	B2B	B2C	B2E
Consumer	C2G	C2B	C2C	—

.09 The key models can be described as follows:

- B2C—Typically a retailer selling directly to the consumer; until recently, this is the sector that has shown the fastest growth. Lately, however, B2B has shown the most growth potential, and the B2C growth rate now appears to be decelerating. (See the following section for additional information on B2Cs.)
- B2B—Typically a business selling up, down, or across the supply chain, involving business partners or business consortia. (See the subsequent section of this alert for additional information on B2Bs.)
- B2E—Typically a system enabling intercompany (intragroup) e-mails over the Internet to be directed to the correct department.
- B2G—A system that allows for electronic submission of business information to governmental entities, for example, the filing of corporate tax returns.
- C2G—A system that allows for electronic submission of individual information to governmental entities, for example, the filing of income tax returns.

The Differences Between B2C and B2B E-Commerce

.10 The participants of B2C and B2B e-commerce differ. B2B users are other companies, whereas B2C users are individuals. Overall, B2B transactions are more complex and have higher security needs. And, in general, B2B involves processing large transaction volumes and potentially large dollar amounts.

.11 Beyond that, there are other major distinctions:

- *Negotiation* is selling to another business and involves haggling over prices, delivery, and product specifications. This is not the case with most consumer sales because, for example, it is easier for retailers to place a catalog online and also explains why the first B2B applications were for buying finished goods or commodities that are simple to describe and price.

- *Integration* involves a situation in which retailers conducting B2C transactions don't have to integrate with their customers' systems. Companies selling to other businesses, however, need to make sure they can communicate without human intervention.

Business-to-Consumer Models

.12 Although the term *e-commerce* generally refers to the value of goods and services sold online, B2C applies to any business or organization that sells its products or services over the Internet to consumers for their own use. A good example of B2C e-commerce is Amazon.com, the online bookseller that launched its site in 1995 and quickly took on the nation's major retailers. However, in addition to online retailers, B2C has grown to include the online sale/provision of services such as online banking, travel services, online auctions, health information, and real estate sites.

.13 *Some of the Major Challenges of B2C E-Commerce.* When it comes to determining what B2C presents as challenges, you can think about:

- *Getting consumers to buy things*—An e-commerce site cannot live on traffic alone. Getting visitors to the site is only half the battle. Whether they buy something is what determines if the business wins. The so-called conversion rate (converting visitors into purchasers) for B2C e-commerce sites is still fairly low. Some ways to boost conversion rate include improving navigation, simplifying checkout process (such as one-step checkout and easily replaced passwords), and sending out e-mails with special offers.
- *Building customer loyalty*—With so many sites out there, how can companies build a strong relationship with customers? Here are a couple of suggestions:
 - Focus on personalization. A wide array of software packages is available to help e-commerce sites create unique boutiques that target specific customers. For example, American Airlines has personalized its Web site so business fliers view it as a business airline and leisure travelers see it as a vacation site. Amazon, which built its own personalization and customer relationship management (CRM) systems, is well known for its ability to recognize customers' individual preferences.
 - Create "stickiness." Stickiness of a Web site refers to the site's ability to keep visitors engaged for long periods and to keep them coming back. Examples of sticky Web sites include www.Yahoo.com, www.AOL.com, and www.eBay.com. One solution to the challenge of creating stickiness is to keep content fresh and frequently update offerings.
 - Create an easy-to-use customer service application. Providing just an e-mail address can be frustrating to customers with questions. Live chat or, at the very least, a phone number contact to help resolve questions can help.
- *Providing order fulfillment*—E-commerce has increased the focus on customer satisfaction and delivery fulfillment. One cautionary tale is the Toys "R" Us holiday debacle in 1999, when fulfillment problems caused some Christmas orders to be delivered late. Since then, companies have spent billions of dollars trying to improve their logistical systems, to guarantee on-time delivery. Providing instant gratification for customers still isn't easy, but successful B2C e-commerce operations are finding that fulfillment headaches can be eased with increased focus and investment in supply chain and logistical technologies.

.14 *Importance of Channel Conflict to E-Business.* Channel conflict, or disintermediation, occurs when a manufacturer or service provider bypasses a reseller or salesperson and starts selling directly to the customer. Some sectors, including the PC and automobile industries, are particularly vulnerable to entities that engage in disintermediation, as are service industries such as insurance and travel. Levi's, for example, pulled its Web site after its resellers protested. Now, some entities that struggled with channel conflict are now finding ways to approach e-commerce without upsetting their salespeople. For example, big car companies and manufacturers, such as Maytag, are setting up Web sites that allow customers to decide what they want before being redirected to a local dealer.

.15 Major B2C Models. As noted in last year's Alert, the short lifetime of the digital economy has witnessed evolution of the following four major categories of B2C models:

- Online stores, marketplaces, and services (Dell, amazon.com, eBay, and Charles Schwab)
- Content providers (the *Wall Street Journal* and *Consumer Reports*)
- Content aggregators and portals (Yahoo)
- Infrastructure providers (Sprint, Cisco Systems, Lucent, and BroadVision)

Within each of these categories, there are many different business models that include an enormous amount of hybridization and innovation. There is also cross-pollination between B2C and B2B variations of these models because what works for B2C also can apply to B2B.

Business-to-Business Models

.16 The term *B2B* is used generically, to describe all online marketplaces where buyers and sellers congregate to exchange goods and services for money. It is important to note that B2B can be organized either horizontally or vertically.

- *Horizontal markets* cut across many industries, typically providing a common service, such as financial services; benefits management; and maintenance, repair, and operating (MRO) equipment procurement process management. Popular examples are Ariba Network and Commerce One's MarketSite.net.
- *Vertical markets* concentrate on one specific industry, such as agriculture and chemicals, and seek to provide all the services needed by that industry. Popular examples are VerticalNet, Chemconnect, and Covisint.

.17 There are three common models currently in use:

- *Buy-centric markets* are the exact opposite of sell-centric markets. In these markets, a few big buyers join forces to build a marketplace where small fragmented sellers can sell their goods. This is great for buyers because it permits quick and easy price comparison-shopping. Popular examples are K-Mart's Retail Link, FreeMarkets.com, and Covisint.
- *Sell-centric markets* are markets in which one or a few big sellers work together to build a marketplace for many small fragmented buyers. Typically revenues are derived from ads, commissions on sales, or fees for delivering qualified leads to suppliers. Popular examples are Grainger.com, GE Global Exchange, DoveBid, GoFish.com, GlobalFoodExchange.com, E2Open.com, and TradeOut.com.
- *Neutral exchanges* appear where both the sellers and buyers are fragmented. In this environment, a third party creates a neutral exchange and performs the transactions through a bid/ask system. The middleman, or "net market maker," here cause "disintermediation," for which they receive a cut or transaction fee for each deal. The most important success factor for these exchanges is to reach "liquidity" or critical mass of both number and size of the transactions running through the exchange. Popular examples are NASDAQ, Altra, Paper Exchange, and Arbinet.

.18 Some more specific examples of several B2B models are presented below.

- *Public exchanges (also called marketplaces).* A public vertical B2B electronic marketplace is a Web site run by a third party centered around a commodity or service that is open to many buyers and sellers. At a vertical B2B Web site, an e-business purchasing function may provide a link to its own purchasing Web site or post the specifications for its purchasing requirements. Not only does this type of arrangement provide the opportunity for great cost savings and efficiency in the electronic marketplace, but the public exchange also allows purchasers and sellers to obtain the best price quotes in minutes instead of days.

Auditors of e-businesses that participate in a vertical B2B electronic marketplace should remember that some of the source records for purchasing transactions may exist on computer systems outside of the control of the audit client. If so, it is necessary to be familiar with Statement on Auditing Standards (SAS) No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324.24–.56), and with the AICPA Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*. See the “Reports From Service Organizations” section later in this Alert for further discussion of SAS No. 70 issues.

- *Industry portals.* An industry portal is very similar to a vertical B2B electronic marketplace except that a portal may include many more links to information and services common to any business in that industry. Such links might provide general news, sports, financial services, and other non-industry-specific services.

An e-business may conduct the purchasing function on an industry portal in the same manner as for a vertical B2B electronic marketplace. Consider, for example, the industry portal www.cpa2biz.com, which offers many things a CPA might need, from the latest authoritative publications to conference registration, CPE products, and state society news and announcements.

- *Supply-chain extranets.* An extranet is a Web site that an e-business sets up for its prospective and current trading partners. The site is accessible to registered users, with a user ID (identification) and password. The extranet site provides information about the products and services the company is interested in purchasing as well as specification requirements. Information about the company’s current inventories is linked to its internal databases and also may be available to certain customers. Access to the site usually requires establishing a preexisting relationship between the trading partners. Ford’s AutoXchange and GM’s TradeXchange are extranets designed not only to link Ford and GM with suppliers, but also to link suppliers with each other.

The audit implication for a client that operates its own extranet for purchasing is that the supplier may control elements of the electronic purchasing function, and the auditor will have to gain an understanding of the internal controls over these functions at the supplier. For further discussion of internal control issues, see the “Internal Control as It Affects Audit Evidential Matter” section later in this Alert.

- *Virtual private networks or private trading networks.* Some e-businesses may establish virtual private networks (VPNs) with trading partners. A VPN is a logical network that provides user privacy over a public network, such as a frame relay or, especially, the Internet, using tools such as encryption in various combinations. When used in the purchasing function, VPNs are a good means to ensure the secure transmission of data.

From an audit standpoint, VPNs offer strong controls over the purchasing function. These networks offer transactions logging and authenticating trading partners, as well as the integrity of information, the identification of suppliers, and the nonrepudiation of transactions using digital signatures. See more on the issue of digital signatures later in this Alert in the “Recent Regulatory Developments” section.

E-Business Economic Environment

The U.S. Business Environment

.19 As of late in the third quarter of 2002, anxious economists are downgrading their forecasts, and some crucial sectors of the economy are pushing the likelihood of a rebound into next year because of the abrupt slowdown in the economic recovery. For now, the overall economy is expanding, but sluggishly. Jobs are growing, but barely. And with a depressed stock market and reactions to further fears of terrorist strikes weighing on the national psyche, there is none of the exuberance that marked the recovery in the late 1990s.

.20 The economy appears to be in a struggle between declining business confidence and strong consumer spending. Eventually, consumer demand should overcome business wariness unless cautious businesses cut so many jobs that consumers finally give up. The same dynamic was at work during the fall of 2001. After September 11th of that year, the business sector froze, but the consumer sector did not, and eventually consumer demand jump-started the economy.

.21 The underlying economic fundamentals¹ in our economy remain relatively sound and point toward a moderate economic growth scenario. However, stock market weakness, coupled with recent data releases, has prompted downward forecast revisions.

The Sarbanes-Oxley Act

.22 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (the Act). The Act includes far-reaching changes in federal securities regulation that could represent the most significant overhaul since the enactment of the Securities Exchange Act of 1934. The Act creates the Public Company Accounting Oversight Board (PCAOB) to oversee the audit of public companies that are subject to the securities laws of the Securities and Exchange Commission (SEC). In addition, the Act prescribes a new set of auditor independence rules, new disclosure requirements applicable to public companies and insiders, and harsh civil and criminal penalties for persons responsible for accounting or reporting violations. The Act also imposes new restrictions on loans and stock transactions involving corporate insiders.

.23 A more complete summary of the Act is available on the AICPA Web site at www.aicpa.org/info/sarbanes_oxley_summary.htm.

General E-Business Trends

.24 Although numerous market research firms have tracked and reported information about e-business sales for several years, the U.S. government began officially reporting such information only in late 1999. For the year 2001 (totals reported in this section are the most recent available as of the printing of this Alert), the U.S. Department of Commerce reported total e-commerce sales of \$35.9 billion.² For the second quarter of 2002, the Department of Commerce reported total e-commerce sales of \$10.2 billion (compared to \$8.2 billion for second quarter 2001), a 24.2 percent increase in sales over the prior year's quarter.

.25 Although the Department of Commerce does not separately track B2C and B2B, it estimates that more than 90 percent of e-commerce is concentrated in the B2B area. A number of market forecasters are predicting even bigger things down the road for B2B companies. However, their estimates vary widely depending on what they measure and how they measure it. According to IDC (a Boston-based market research firm), worldwide B2B e-business will generate \$2.6 trillion in revenues by 2004. On the other hand, Gartner, Inc., a Stamford, Connecticut, research firm, forecasts that the worldwide B2B market should total \$1.9 trillion in 2002 and \$8.5 trillion by 2005. Not to be left out, small businesses (those with fewer than 100 employees) are also jumping on the B2B bandwagon. Although only 850,000 small businesses were engaged in B2B transactions in 1999, a U.S. Small Business Administration survey projects that this figure will leap to 2.9 million by 2003.

.26 On the B2C side, despite a disastrous couple of years recently for many dot-com merchants, online retail sales grew 21 percent, to \$51.3 billion in 2001, according to a study conducted by the Boston Consulting Group. Predictions indicate further profitability and growth for 2002 due to continued growth in consumer spending online and additional cost efficiencies, with an anticipated increase of 41 percent in consumer spending online.

¹ Underlying economic fundamentals determine the long-term trend around which the business cycle weaves. The dips stem from temporary deficiencies of investment, consumption, net exports, and government spending. The task of stabilization is to minimize the swings over and under the sustainable trend of gross domestic product growth.

² The Department of Commerce limits the definition of *e-commerce* to the value of goods and services sold online.

.27 Online penetration by product category also grew. Out of 15 categories studied, sales in seven, including computer hardware and software, books, music and videos, toys, and consumer electronics, represented more than 5 percent of all retail sales for those respective categories, with penetration in some categories as high as 17 percent.

.28 The Boston Consulting Group predicted that 2002 would be the beginning of a profitable era in online retailing. It was anticipated that retailers not only would continue to improve marketing effectiveness, but they also would have opportunities to realize efficiencies in the supply chain and product fulfillment.

.29 Online holiday sales in 2002 are projected to total \$38.2 billion worldwide, a 48 percent increase from the same period last year, according to Gartner, Inc. Also, according to Gartner, Inc., Europeans will spend more money online this holiday season than any other region, with revenue reaching \$15.77 billion. North America will fall to second place with revenue at \$15.66 billion.

.30 Electronic commerce is a small part of total retail sales, so e-commerce growth depends less on retail ups and downs and more on the experience of Internet users and the maturity of Internet retailers, according to Gartner, Inc.

Where Are We Headed?

.31 We have now lived through so many iterations of e-business that it's hard to keep track of its rapid development. For example, several years ago, the hottest topic of discussion was business-to-consumer e-commerce applications, which were going to radically alter the way we shopped for everything. Since then, the scales have tipped in the direction of both dollar and transaction volumes from the B2C to the B2B models.

.32 The B2B model became the rage with such companies as Ariba and Extensity, which facilitated the ability to do business electronically. This minor subset of the entire business-to-business equation soon gave rise to the notion of electronic exchanges. These exchanges for vertical markets promised to reinvent how companies transact business by letting them essentially bid in real time for business among an established set of buyers and suppliers. With companies such as Oracle, CommerceOne, and Ariba leading the charge, these types of exchanges popped up in every major industry segment.

.33 According to some experts, the next wave of e-business will be driven by business-to-business-to-consumer systems. Otherwise known as b-to-b-to-c, these systems will emerge because business models in the digital economy will not tolerate inefficiencies.

Recent Regulatory Developments

Internet Tax Issues

.34 State and local governments are concerned about losing sales and use tax revenue because of untaxed Internet sales. A recent estimate of the amount of sales tax revenue lost in 2002 because of the nontaxation of Internet sales puts the amount at more than \$10 billion.

.35 On November 28, 2002, President Bush signed a bill to extend the Internet Tax Freedom Act (ITFA) until November 1, 2003. This no-frills extension keeps Internet access free of sales tax in most states and puts off for two years any further action by Congress on Internet taxation. The extension was passed in spite of the objection of some in Congress, who wanted a commitment to give states the power to enforce sales tax collection, if the states simplify sales tax compliance.

.36 The bill is the culmination of a long debate in both houses of Congress on the role of the federal government in state sales tax. At different times during the debate, those opposed to taxing e-commerce

floated proposals to make the ITFA permanent, or to ban sales tax on digital products. Those supporting the states pushed for a commitment on the part of Congress to grant states the power to enforce sales tax collection, if the states simplify sales tax compliance (see the following section on state sales tax simplification).

.37 Internet Tax Freedom Act Basics. The ITFA exempts Internet access services from state and local taxes, such as sales tax. In addition to Internet access, this ban extends to many Internet-based services. However, the ban on taxation of Internet access is not complete. The eight states that currently tax Internet access can continue to do so. The ITFA also prohibits multiple and discriminatory taxation of electronic commerce. However, the ITFA does not directly affect sales of tangible products over the Internet.

.38 Not all Internet access is protected by the ITFA. In addition to allowing tax in states that already tax Internet access, the ITFA allows tax on Internet providers that engage in certain kinds of activities. These activities include knowingly providing access to materials that are harmful to minors, unless access to those materials is restricted. This exception does not apply to Internet access providers, to the extent they are providing Internet access. Presumably, an Internet service provider (ISP) engaged in providing Internet access, and engaged in the business of providing unrestricted access to materials harmful to minors, would be partly taxable.

.39 The ITFA prohibits discriminatory taxes on e-commerce. Discriminatory taxes include taxes imposed on e-commerce that are not generally imposed on transactions accomplished by other means. For example, a state could not impose a tax on access to an online newspaper, when newspaper sales from a street corner are tax free.

.40 In addition, discriminatory taxes include taxes imposed at a different rate on e-commerce than on the same transactions accomplished by other means. For example, a state could not impose a 7 percent sales tax on sales of flowers via the Internet, when it imposes a 5 percent tax on sales from a local flower shop.

.41 The ITFA includes provisions relating to the ability of a state to require a remote seller to collect sales and use tax. One provision relates to the effect of access to a Web site on a vendor's liability to collect sales tax. According to the ITFA, states may not require a vendor to collect a tax if "the sole ability to access a site on a remote seller's out-of-state computer server is considered a factor in determining a remote seller's tax collection obligation."

.42 The ITFA prevents states from imposing an obligation to collect or pay tax on a different person than in the case of non-Internet transactions involving similar goods and services.

.43 State Sales Tax Simplification. States are attempting to address the issue of sales tax simplification. The District of Columbia, 45 states, and thousands of local governments impose sales taxes. To cope with complaints about disparities among the jurisdictions, the National Governors Association created the Streamlined Sales Tax Project (SSTP). The SSTP, comprising tax administrators from 30 states, developed model legislation to unify and simplify sales and use tax administration among the states that adopt the legislation. The SSTP hopes that, by unifying and simplifying sales tax systems, Internet businesses will voluntarily collect sales taxes. The model legislation, entitled the Uniform Sales and Use Tax Administration Act (the Act), would authorize a state taxing authority to enter into an interstate contract, the Streamlined Sales and Use Tax Agreement (the Agreement). The Act and related Agreement would, among other matters, establish more uniform administrative standards, and develop and adopt uniform definitions of sales and use tax terms.

.44 The SSTP has now gathered half the states into its fold. The SSTP process consists of two parts. First, states must pass enabling legislation that allows tax administrators from the different states to work together to craft a new set of model sales tax laws. Second, states must individually amend their sales tax laws to

conform to the model legislation. As of April 1, 2002, 25 states and the District of Columbia have passed enabling legislation. The legislatures of eight other states have introduced the legislation.

.45 Recently, the Act ran into a snag when a task force of the National Conference of State Legislatures (NCSL) took significant exception to some of its measures. The NCSL drafted and distributed its own version of model legislation to simplify sales tax. State legislatures are now considering whether to adopt legislation and, if so, which version.

Help Desk—The Act is available on SSTP's Web site at www.streamlinedsalestax.org. The NCSL's version of the model legislation is available on the NCSL Web site at www.ncsl.org/programs/fiscal/tctelcom.htm. The NCSL site also includes a document that lists the amendments that the NCSL made to the SSTP Act.

Online Sales to European Union Consumers

.46 The European Union (EU) is in the process of adopting new rules that would require non-EU suppliers (including many U.S. companies) to collect and remit a value-added tax (VAT) on digital goods and services supplied to EU consumers. However, these new rules do not apply to non-EU suppliers selling to business customers in the union because existing self-assessment arrangements already cover VAT collection in these situations.

.47 Non-EU suppliers will have to register in an EU member state of their choice, and levy VAT at the rate applicable in the member state where the customer resides.

.48 **Goods and Services Included.** These new rules will apply to the online sale of digital products, such as software, music, games, databases, and broadcasts of events.

.49 The VAT situation will lead to discrepancies in taxation between digital goods and services and their tangible equivalents. Books, magazines, and newspapers physically available in the EU member states are taxed at reduced rates, or not at all. E-books or electronic subscriptions to newspapers or magazines provided by non-EU vendors will be subject to VAT under these new rules.

.50 **Thresholds.** There is no provision in these new rules for any sort of a *de minimis* amount; theoretically, a vendor with \$1 of digitized-goods sales in the EU would need to register and collect the VAT. In addition, each of the EU states can enact its own threshold amount. Currently, this can range from zero to approximately 85,000 euros (about \$75,000).

.51 **Documentation.** Under these new rules, a non-EU company must charge VAT based on the customer's location. The vendor would be required to verify the information concerning the purchasers and their locations. The vendor would be responsible if the individual consumer provided inaccurate or fraudulent information, even if it was accepted in good faith; a purchaser's declaration would not be sufficient. In addition, the vendor would presumably be responsible if there were discrepancies between the customer's ordering location and shipping address (for example, a customer purchased goods via the Internet while on vacation but had them delivered to his or her home address).

.52 **Collection.** Under these new rules, a U.S. company will have to register in one of the EU countries; however, the U.S. company will have to charge and collect VAT at the rate that applies in the country of consumption. Currently, there are 15 different rates, ranging from 15 percent (in Luxembourg) to 25 percent (in Sweden). Thus, a non-EU vendor will have to register in one country in the EU but collect VAT at the correct rate in 15 different countries.

.53 Such a requirement contrasts sharply with those imposed on EU vendors. In general, an EU vendor will have to charge VAT only at the rate that applies in the country where it (the seller) is established.

E-Signature Act

.54 In June 2000, the President signed into law the Electronic Signatures in Global and National Commerce Act (E-SIGN). E-SIGN contains provisions that ensure the legal validity of electronic (digital) signatures and contracts, permit the electronic delivery of legally required notices and disclosures, and allow for the satisfaction of record retention requirements through electronic means. An electronic signature can be “an electronic sound, symbol, or process, attached to or logically associated with a contract or record and executed or adopted by a person with the intent to sign the record.” Digital signatures are created and verified using cryptography, the science of encoding and unencoding data. The technique allows recipients of Web-based documents to identify the sender and be assured of the validity of electronically transmitted data.

.55 Even though such technology could vastly expand the realm of business that can be conducted electronically, adoption has been slow because of the lack of flexibility from older signature technologies. Recently, however, leading Internet security companies and top industry standards-setting bodies have settled on a more flexible way to verify electronic signatures for documents sent over the Web.

.56 The World Wide Web Consortium (W3C), the standards-setting body founded by Web co-inventor Tim Berners-Lee, said that the agreement would help Internet users to more safely share documents, fill out forms and trade images and other media. The W3C group said the XML (Extensible Markup Language) Signature Syntax and Processing standard is now ready to be incorporated into new products and services from companies such as Microsoft, IBM, VeriSign, and scores of other security software developers.

.57 XML Signature is designed to work with existing XML software, making it easier for modern software developers to incorporate the signature verification technology into new programs they develop.

Internet Privacy

.58 Advances in computer technology have made it possible to compile and share detailed information about people more easily and cheaply than ever. That situation can be good for society as a whole and for individual consumers as well. For example, it is easier for law enforcement to track down criminals, for banks to use electronic information to help detect and prevent fraud, and for consumers to learn about new products and services, allowing them to make better-informed purchasing decisions. At the same time, as personal information becomes more accessible, companies, associations, government agencies, and consumers must take precautions to protect against the misuse of that information. Along these lines, the privacy of information collected by operators of Web sites is a growing issue of concern.

.59 In the current Congress, there are more than 60 House bills and more than 30 Senate bills that address Internet privacy in whole or in part. Advocates of self-regulation argue that industry efforts, such as seal programs, for example, AICPA Trust Assurance Services (see the AICPA Web site, www.aicpa.org, for a detailed discussion), demonstrate the industry’s ability to police itself. However, advocates of legislation argue that, although the seal programs are useful, they do not carry the weight of law, limiting the remedies available to consumers whose privacy is violated. Auditors should monitor potential Internet privacy legislation closely and be prepared to advise their clients on compliance and other voluntary privacy efforts.

Help Desk—The Electronic Privacy Information Center tracks legislation and provides information on privacy, speech, and cyberliberties. Information is available at www.epic.org.

E-Fraud

.60 The Internet Fraud Complaint Center (IFCC), which began operation on May 8, 2000, is a partnership between the National White Collar Crime Center (NW3C) and the Federal Bureau of Investigation (FBI). The IFCC’s primary mission is to address fraud committed over the Internet. The mission is accomplished by facilitating the flow of information between law enforcement agencies and the victims of fraud—information that might otherwise go unreported.

.61 From January 1, 2001, to December 31, 2001, the IFCC Web site received 49,711 complaints. This total includes many different fraud types and nonfraudulent complaints: computer intrusions, SPAM/unsolicited e-mail, and child pornography. During this same time period, the IFCC referred 16,775 complaints of fraud, the majority of which was committed over the Internet or similar online service. The total dollar loss from all referred cases of fraud was \$17.8 million, with a median dollar loss of \$435 per complaint. Some significant findings of this report include:

- Internet auction fraud was by far the most reported offense, comprising 42.8 percent of referred complaints. Nondeliverable merchandise and payment account for 20.3 percent of complaints, and the Nigerian Letter Scam (individuals representing themselves as Nigerian or foreign government officials asking for help in placing large sums of money in overseas bank accounts) made up 15.5 percent of complaints. Credit and debit card fraud and confidence fraud (such as home improvement scams and multilevel marketing) round out the top five categories of complaints referred to law enforcement during the year. Among those individuals who reported a dollar loss, the highest median dollar losses were found among the Nigerian Letter Scam (\$5,575), identity theft (\$3,000), and investment fraud (\$1,000) complainants.
- Nearly 76 percent of alleged fraud perpetrators tend to be individuals (as opposed to businesses), 81 percent are male, and half reside in one of the following states: California, Florida, Illinois, New York, and Texas. Even though most are from the United States, perpetrators have a representation in Canada, Nigeria, Romania, and the United Kingdom.
- Of the male complainants, half are between the ages of 30 and 50 (the average age is 38.6), and over one-third resides in one of the four most populated states: California, Texas, Florida, and New York. Most are from the United States, but the IFCC has received a number of complaints from Canada, United Kingdom, Australia, and Japan.
- The amount of loss by complainants tends to be related to a number of factors. Business victims tend to lose more than individuals and males tend to lose more than females. This may be a function of both online purchasing differences by gender and the type of fraud in which individuals find themselves. Even though there isn't a strong relationship between age and loss, the proportion of individuals losing at least \$5,000 is higher for those 60 years and older than it is for any other age category.
- E-mail and Web pages are the two primary mechanisms by which the fraudulent contact took place. Nearly 70 percent of complainants reported they had e-mail contact with the perpetrator.

Help Desk—Further information on Internet fraud is available at the Internet Fraud Complaint Center Web site at <http://www1.ifccfbi.gov/index.asp>.

Extensible Business Reporting Language

.62 Extensible Business Reporting Language (XBRL) is a royalty-free, open specification for software that uses Extensible Markup Language (XML) data tags to describe financial information for public and private companies and other organizations. XBRL benefits all members of the financial information supply chain.

.63 XBRL:

- Is a standards-based method with which users can prepare, publish in a variety of formats, exchange, and analyze financial statements and the information they contain.
- Is a licensed royalty-free worldwide by XBRL International, a nonprofit consortium consisting of more than 140 leading companies, associations, and government agencies.
- Permits the automatic exchange and reliable extraction of financial information across all software formats and technologies, including the Internet.

- Benefits all users of the financial information supply chain: public and private companies, the accounting profession, regulators, analysts, the investment community, capital markets, and lenders, as well as key third parties, such as software developers and data aggregators.
- Does not require a company to disclose any additional information beyond that which it normally discloses under existing accounting standards. XBRL does not require a change to existing accounting standards.
- Improves access to financial information by improving the form of the information and making it more appropriate for the Internet.
- Reduces the need to enter financial information more than one time, reducing the risk of data entry error and eliminating the need to manually key information for various formats (for example, printed financial statement, an HTML document for a company's Web site, an EDGAR filing document, a raw XML file, or other specialized reporting formats, such as credit reports and loan documents), thereby lowering a company's cost to prepare and distribute its financial statements while improving investor or analyst access to information.
- Leverages efficiencies of the Internet as today's primary source of financial information. More than 80 percent of major U.S. public companies provide some type of financial disclosure on the Internet, and the majority of information that investors use to make decisions comes to them via the Internet.

.64 In October 2002, the XBRL-US Domain Working Group and the AICPA posted for public review a public working draft of the "U.S. Financial Reporting Taxonomy Framework" and "U.S. GAAP Commercial and Industrial Taxonomy." The "U.S. Financial Reporting Taxonomy Framework" provides a foundation that will be used in future taxonomy development; the "U.S. GAAP Commercial and Industrial Taxonomy" provides companies within that industry the ability to create XBRL financial statements.

Help Desk—Further information on XBRL is available at www.xbrl.org.

General Audit Issues and E-Business

.65 E-business is an ever more commanding presence in the lives of investors and businesses. The powerful force of e-business, in addition to its potential effect on the way we do business, directly affects practitioners and the avenues open to them as providers of services to the companies that engage in e-business. This electronic world is a unique and challenging frontier in many regards. It is an environment that will pose new demands on the auditors of both fledgling Web-play-only e-businesses and brick-and-mortar entities that are expanding their traditional business into e-business. Transactions conducted in an e-business environment may have a significant impact on audit process.

The Scope of E-Business Client Activities

.66 E-business activities can occur in many aspects of your clients' businesses. For this reason, you may need to search for information about your clients' e-business activities and consider their effects on your audit planning. Specific techniques to consider in the search for e-business activities include:

- Modifying engagement acceptance procedures to include questions about the client's e-business activities.
- Reviewing minutes of board meetings, paying particular attention to discussions about the entity's e-business strategy, related issues, and timing.
- Examining the entity's annual budget for information about e-business plans.
- Looking for unusual increases in other budget line items—marketing and technology budgets, for example.

- Performing transaction reviews.
- Performing inquiries as part of obtaining an understanding of the business.
- Searching the Internet and carefully reviewing the client's Web site.

Although not all-inclusive, these techniques may reveal evidence of the nature, scope, and depth of the client's e-business activities.

Audit Timing and Planning

.67 E-business transactions may automatically initiate, authorize, record, summarize, and settle electronically without human intervention or physical documentation. As a result, key audit evidence in electronic form may exist only for a limited amount of time. Therefore, you will need to understand and be able to rely on IT general controls. Computer programs may summarize transactions on a periodic basis and then purge, update, change, modify, or write over the original detail records of the transaction. Traditionally, audit procedures are performed after a client's fiscal year end. With e-business activities, however, traditional audit timing may be inadequate. One audit implication of sometimes short-term electronic evidence in e-business audits is that waiting until after the fiscal year end to begin auditing procedures may be too late to obtain competent sufficient evidence of controls or transactions.

.68 As noted in last year's Alert, SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311.09), indicates that "the extent to which computer processing is used in significant accounting applications, as well as the complexity of that processing, may also influence the nature, timing, and extent of audit procedures."

.69 Many e-businesses may not have hard-copy or paper evidence of transactions. Sales orders, purchase orders, invoices, delivery, settlement, and authorization may be prepared and performed electronically, leaving no paper trail behind. The failure of e-business companies to retain the details of transactions can create troublesome issues for the auditor who is considering whether internal control is functioning as planned. According to SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326.18), as amended:

Certain electronic evidence may exist at a certain point in time. However, such evidence may not be retrievable after a specified period of time if files are changed and if backup files do not exist. Therefore, the auditor should consider the time during which information exists or is available in determining the nature, timing, and extent of his or her substantive tests, and if applicable, tests of controls.

If the retention of evidential matter is questionable, the auditor may want to begin audit procedures before year end. This may also drive the need for continuous auditing.

Adequate Technical Training

.70 The rapid evolution of technology has profound implications for all those affected by computer technology, including auditors. Existing e-business hardware and software may need to be replaced every 18 months, or more frequently, to remain competitive. This rapid rate of technological change means that, to remain current, ongoing training in the underlying Internet technologies is requisite.

.71 Auditing through the computer and the nature of electronic evidence require that the auditor gain a more detailed understanding of the controls over transactions and records than that traditionally obtained for paper-based manual audits. Experienced auditors with traditional audit skills already have 60 percent to 80 percent of what is needed to audit e-business. You can obtain the balance of the more specific technology

skills through technical training courses, seminars, IT reference materials, research, and through other methods. You need look no further than SAS No. 1, section 210, *Training and Proficiency of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 210.04). The ubiquitous nature of e-business places even more demands on auditors than ever before.

Using the Work of a Specialist

.72 Due to the rapid advance of technology, you may not have all the skills necessary to audit e-business activities. Until you and your staff have the technical skills needed to audit e-business, you may need to engage IT audit specialists to perform certain procedures. Qualified IT specialists are sometimes available from another part of the firm, such as the consulting division or the internal IT support staff. If not, you may have to go outside your own organization to obtain qualified specialists.

.73 Engaging a specialist for gaining an understanding of internal controls, tests of controls, substantive tests, and analytical procedures requires awareness of guidelines available in the authoritative literature. According to SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336.06), specialized assistance is advisable for auditors who:

May encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skills or knowledge and in the auditor's judgment require using the work of a specialist to obtain competent evidential matter.

The use of an outside specialist³ in an e-business context does not absolve the auditor from a certain level of understanding about computers. Audit planning comes into play because of the lead time necessary to contract for a specialist's services and the time required for the auditor to obtain the minimum technological knowledge necessary to supervise the specialist. According to SAS No. 22 (AU sec. 311.10):

If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, that is, someone who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should have sufficient computer-related knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified procedures will meet the auditor's objectives; and to evaluate the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The auditor's responsibilities with respect to using such a professional are equivalent to those for other assistants.

Internal Control as It Affects Audit Evidential Matter

.74 SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended, provides guidance on the independent auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). For traditional businesses, the auditor's consideration of internal control typically involves updating prior-year checklists, questionnaires, and procedural narratives. Using a traditional audit approach for e-business clients would be insufficient because, in the e-business environment, almost all of the evidence of transactions is electronic. Critical records may consist of e-mail, database records, electronic documents, spreadsheets, and server logs. In addition, e-business transactions are subject to intentional and unintentional alteration and manipulation at many points between transaction initiation and summarization in the financial statements. Because e-businesses generally lack much of the paper evidence found in audits of traditional businesses, your approach to understanding internal controls when planning the e-business audit and determining the nature and extent of substantive tests must take this into account.

³ Note that Statement on Auditing Standards (SAS) No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336), does not apply to specialists who are employed by the firm and are part of the engagement team. SAS No. 73 indicates that the auditor uses the work of the specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions. The specialist does not, however, perform the substantive tests or analytical procedures.

.75 SAS No. 55, as amended, provides guidance to auditors about the effect of IT⁴ on internal control and on the auditor's understanding of internal control and assessment of control risk. The Auditing Standards Board (ASB) believed the guidance was needed because entities of all sizes increasingly are using IT in ways that affect their internal control and the auditor's consideration of internal control in a financial statement audit. Consequently, in some circumstances, auditors may need to perform tests of controls to perform an effective audit.

.76 Remember that SAS No. 94 does not:

- Eliminate the alternative of assessing control risk at the maximum level and performing a substantive audit, if that is an effective approach.
- Change the requirement to perform substantive tests for significant account balances and transaction classes.

The Importance of Software Controls

.77 As noted earlier, technology continues to evolve rapidly. Most e-business server software is constantly upgraded, modified, and configured with components from different vendors. Often, when software is upgraded, previous control settings are lost, with no warning to managers. If procedures are performed before year end, you have the additional responsibility to consider whether there are frequent and significant changes being made to e-business systems that might affect the remainder of the period. According to SAS No. 55 (AU sec. 319.99):

When the auditor obtains evidential matter about the design or operation of controls during an interim period, he or she should determine what additional evidential matter should be obtained for the remaining period . . . The auditor should obtain evidential matter about the nature and extent of any significant changes in internal control, including its policies, procedures, and personnel, that occur subsequent to the interim period.

.78 Access is another issue to consider when testing controls over e-business activities. To test controls, auditors need access to networks, servers, and databases on which companies store their accounting records. Information technology managers may be reluctant to grant auditors the level of access they need, preferring, instead, to provide lengthy printouts, files on diskettes, or files as e-mail attachments. Access to copies of records in these forms is insufficient. E-business auditors must have full read-access rights to all system and database security settings and tables as well as the underlying electronic accounting records to gain a sufficient understanding of controls and to perform substantive tests. Sometimes this will require the CFO's involvement to obtain this access.

.79 We already know that e-business transactions may be initiated by a trading partner's software. If transactions are automatically initiated between customer and supplier computers, the trading parties should require an independent auditor's report on controls at the other party. (The report—an SAS No. 70 report—is described in the subsequent section of this Alert, "Reports From Service Organizations.")

.80 E-business software should include controls to prevent the repudiation or alteration of records that initiate transactions. Such controls might include digital signatures or server certificates that authenticate the parties to the transaction, as well as traditional edit and validation controls. Electronic (digital) signatures reduce the likelihood of the parties claiming that they never initiated the transaction or that the record of the terms of the transaction has been altered. Without server certificates, an initiator of a transaction has no

⁴ According to SAS No. 94, *The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), information technology (IT) encompasses automated means of originating, processing, storing, and communicating information, and includes devices, communication systems, computer systems (including hardware and software components and data), and other electronic devices.

assurance that it is dealing with the intended party's computer. Without digital signatures and server certificates, it may be difficult to determine that transactions are neither fictitious nor fraudulent. See the discussion of digital signatures in the "E-Signature Act" section in the "Recent Regulatory Developments" section of this Alert.

The Importance of Monitoring

.81 A key control in a system of internal control is monitoring. Routers, firewalls, Web servers, e-mail servers, databases, and operating systems all have the ability to log traffic and specific security events. Properly implemented and controlled logs can provide some evidence that a transaction occurred and that the transaction record has not been altered. Independent audits of the controls carried out at third parties, along with the use of digital certificates, encryption, access controls, and logging, help provide evidence for the auditor regarding the integrity of recorded transactions.

Key Controls in an Electronic Environment

.82 As noted in last year's Alert, to reduce the chance of an auditor relying on evidence that lacks credibility, he or she must understand the key controls over validity, completeness, and integrity. In the electronic environment, these typically include the following:

- *Segregation of duties.* Different employees should perform the duties of security administration, security monitoring, system administration, application maintenance, software development, and daily accounting operations.
- *Authorization.* User access to networks, systems, servers, services, programs, data, and records should be authorized based on the company's security policy and documented.
- *Authentication.* The identity of authorized users should be established by the use of logon IDs, hard-to-guess and hard-to-crack passwords, and, where appropriate, smart cards.
- *Access limitations.* Authorized users should be granted access to networks and application systems only after they authenticate themselves, and their access rights should be commensurate with their job responsibilities.
- *Activity logging.* Logging should be enabled on all routers, firewalls, servers, databases, and operating systems. The logs should be protected from tampering and alteration and should be retained.
- *Independent monitoring.* Employees independent of the IT department should monitor the activity logs on a frequent enough basis to detect suspicious, unusual, and unauthorized activity. Due to integration of e-business as discussed above, it should be independent of operations including IT.
- *Software development life cycle standards.* E-businesses should adopt and comply with authoritative standards for the development and implementation of new e-business systems.
- *Methods of error correction.* E-business software should have controlled rollback procedures so records are not purged or lost when servers crash and programs abort. Controls preventing changes to historical records should be in place so errors are corrected by entries made by the accounting department. Programmers and other IT personnel should not make changes to actual accounting records.
- *Backup procedures.* Grandfather, father, and son daily backup procedures should be performed, as well as weekly, monthly, quarterly, and annual backups. All files that include the details of transactions should be included in the backup. With the advice of legal counsel, the key user or owner of the data should establish retention schedules to satisfy legal and regulatory requirements. The backup media should have clear exterior identification, and there should be an offline log and inventory of what was backed up, when, by whom, and where stored. Backups should be stored in a safe location off-site and tested periodically by the key user of the data.

- *Disaster recovery.* The nature of e-business often requires that systems be capable of operating 24 hours a day, seven days a week. Even short periods of outage may mean significant financial loss to some e-businesses. There should be a written plan on how systems will roll over to alternative systems should the data center be destroyed or rendered inoperable. The plan should periodically be tested.

The strength of controls in an electronic environment is like a chain, where strength is determined by the weakest link. You should consider whether any weak links are present and, if so, consider the need to adjust your risk assessment and substantive tests accordingly.

Reports From Service Organizations

.83 Many clients use an ISP or application service provider (ASP) to host their Web site, including the databases used to initially record sales and credit card receivables. In a number of cases, ISP/ASP servers provide fulfillment by allowing users to immediately download their purchase after credit approval for software, digitized music, videos, books, and other electronic documents. For clients that use outsourced services, auditors can sometimes obtain a report on controls from the service organization. According to SAS No. 70, *Service Organizations* (AU sec. 324.24), the report would be either (1) reports on controls placed in operation, or (2) reports on controls placed in operation and tests of operating effectiveness.

.84 See the discussion about the recently published AICPA Audit Guide related to service organizations in the subsequent section of this Alert, “Audit Guide *Service Organizations: Applying SAS No. 70, as Amended.*”

IT Vendor Management

.85 IT vendor management provides clients with expert IT services that allow them to control direct labor costs and leverage their high volume to obtain more competitive rates. The scenario involves the management of IT vendors through effective controls and service level agreements.

.86 In the United States, many IT contractors are employed in vendor-management arranged deals. This trend is increasing because companies are operating on a global basis now and want to make use of their global buying power, so they outsource contractor employment to large vendor management companies.

.87 From an audit perspective, you should understand and review not only the performance of the IT vendor manager, but also the impact of vendor management controls over e-business operations. This has been a major issue during the past year in the financial services industry.

Current Audit Issues and Developments

Assessing Audit Risks in the Current Environment

.88 The proper planning and execution of an audit have always required you to have a thorough understanding of e-business and the nature of your client’s business. For most audit firms, this in-depth understanding means that the most experienced partners and managers must become involved early and often in the audit process. In today’s economic environment, your judgment, knowledge, and experience are even more important than they were in the past.

.89 During the past several months, the U.S. economy has suffered significant declines and uncertainties: Consumer confidence has dropped, plant closings and layoffs have increased dramatically, profit margins for many companies have slipped, and many companies have failed. Periods of economic uncertainty like this lead to challenging conditions for companies due to potential deterioration of operating results, increased external scrutiny, and reduced access to capital. During such times, professional skepticism should be heightened, and the status quo should be challenged.

Evaluating Audit Risks

.90 Your evaluation of audit risk should start with a good understanding of your client's business. To develop this understanding, you should be knowledgeable about the entity's strategies for dealing with business conditions—both current conditions and those most likely to exist in the near future.

Professional Skepticism

.91 The third general audit standard stipulates that due professional care be exercised in planning and conducting an audit engagement. Due professional care requires that you exercise professional skepticism in gathering and evaluating audit evidence. Although you assume neither management dishonesty nor unquestioned honesty, you should consider the increased risk associated with the potential increases in external pressure on management during the current economic climate. For a more detailed discussion of these risks, see the "Consideration of Fraud" section of this Alert.

.92 *Earnings Management Challenges.* As a result of perceived external pressures, companies may be tempted to manage earnings by using nonrecurring transactions or changing the method of calculating key estimates, such as reserves, fair values, or impairments. Companies may also adopt inappropriate accounting practices resulting in improper recognition or omission of financial transactions. For material nonrecurring transactions that may require special disclosure to facilitate the readers' understanding of the reported financial results, apply the guidance in Accounting Principles Board (APB) Opinion No. 20, *Accounting Changes*, in reporting the effects of changes in estimates. Inappropriate transactions or accounting practices that may result in errors requiring adjustments of financial statements include, for example, premature recognition of revenue, failure to appropriately accrue for contingent liabilities that are probable and estimable, and failure to record unpaid purchase invoices. As mentioned earlier in this Alert, the use of outsourcing deals may affect current financial performance. Additionally, you should be particularly skeptical of fourth-quarter events that result in significant revenue recognition, loss accrual, or noncash earnings.

.93 The appropriate level of professional skepticism is needed when corroborating management's representations. Management's explanations should make business sense. Additionally, you may need to consider corroborating management's explanations with members of the board of directors or the audit committee.

.94 *Indicators of Reporting Risk.* Other indicators of potential increased accounting and reporting risk calling for increased professional skepticism include:

1. Liquidity matters
 - The company is undercapitalized, relying heavily on bank loans and other credit, and is in danger of violating loan covenants.
 - The company appears to be dependent on an initial public offering for future funding.
 - The company is having difficulty obtaining or maintaining financing.
 - The company is showing liquidity problems.
2. Quality of earnings
 - The company is changing significant accounting policies and assumptions to less conservative ones.
 - The company is generating profits, but not cash flow.
3. Management characteristics
 - Management's compensation is largely tied to earnings or appreciation of stock options.
 - The company appears vulnerable to the weakening economic conditions and management is not proactive in addressing changing conditions.

- The company's management is selling their investment in company securities more than in the past.
- There is a significant change in members of senior management or the board of directors.

Long-Lived Assets, Including Goodwill and Intangibles

.95 Industry downturns and cash flow erosion may indicate an impairment of fixed assets, goodwill, or other intangibles. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides guidance in this area. In that regard, significant idle equipment or assets no longer used in operations may need to be written off. (See the "Asset Impairment" subsection later in this Alert for related information.)

.96 FASB Statement No. 142, *Goodwill and Other Intangible Assets*, was issued in June 2001. This Statement requires that goodwill be tested for impairment at least annually using a two-step process that begins with an estimation of the fair value of a reporting unit. The first step is a screen for potential impairment, and the second step measures the amount of impairment, if any.

.97 In addition, FASB Statement No. 142 provides specific guidance on testing intangible assets that are not being amortized for impairment and thus removes those intangible assets from the scope of other impairment guidance. Intangible assets that are not amortized are tested for impairment at least annually by comparing the fair values of those assets with their recorded amounts.

Debt

.98 You should carefully review loan agreements and test for compliance with loan covenants. In this regard, consider any "cross default" provisions, that is, a violation of one loan covenant that affects other loan covenants. Keep in mind that any debt with covenant violations that are not waived by the lender for a period of more than one year from the balance sheet date may need to be classified in the balance sheet as a current liability.

.99 As always, review the debt payment schedules and consider whether the company has the ability to pay current debt installments or to refinance the debt if necessary. When making an evaluation, it is important to remember that it is quite possible that the company will not generate as much cash flow as it did in previous years.

Going Concern

.100 As you plan and perform audits of e-business activities, you should consider general economic factors that give rise to going-concern issues. For example, reductions in personal income, layoffs, higher unemployment levels, changing or outdated technology, and decreases in consumer confidence all give rise to such concerns. These factors have combined recently to result in high rates of business failure. Accordingly, auditors should be alert to general economic and other conditions and events which, when considered in the aggregate, indicate that there could be substantial doubt about the entity's ability to continue as a going concern.

.101 In general, conditions and events that might indicate caution about going-concern issues could include (1) negative trends, such as recurring operating losses (2) financial difficulties, such as loan defaults or denial of trade credit from suppliers (3) internal challenges, such as substantial dependence on the success of a particular product line or service (4) external matters, such as pending legal proceedings or the loss of a principal supplier or (5) the inability to retain key technical or managerial talent. Also consider the possibility of the entity's excessive and unusual reliance on external financing, rather than money generated from the company's own operations as a going-concern issue. External financing reliance is one major factor that led to the many of the failures of dot-com companies.

.102 Auditors should be aware of their responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341.02-.04). That Statement provides guidance about conducting an audit of financial statements in accordance with GAAS to evaluate whether there is substantial doubt about a client's ability to continue as a going concern for a reasonable period of time.

.103 Information that significantly contradicts the going-concern assumption, or the ability to remain a going concern, relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 does not require you to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.104 If there is substantial doubt about the entity's ability to continue as a going concern, consider the likelihood that management plans can mitigate existing conditions and events and whether those plans can be effectively implemented. If you obtain sufficient competent evidential matter to alleviate doubts about going-concern issues, then consider the need for disclosures of the conditions and events that initially caused you to believe there was substantial doubt.⁵ If, however, after considering identified conditions and events, along with management's plans, you conclude that substantial doubt remains about the entity's ability to continue as a going concern, consider the possible effects on the financial statements and the adequacy of the related disclosure. Additionally, the audit report should include an explanatory paragraph to reflect your conclusion. In these circumstances, refer to the specific guidance set forth under SAS No. 59.

E-Businesses in Bankruptcy Reorganization

.105 For those e-business entities or operations that are under bankruptcy reorganization pursuant to Chapter 11 of the Bankruptcy Code, or emerging from it, consider whether the company is following the accounting guidance of Statement of Position (SOP) 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code*. E-business entities that filed for bankruptcy may have impairments that need to be recorded before fresh-start accounting under SOP 90-7.

Consideration of Fraud

.106 Recently, the ASB issued SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A); amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333).

.107 SAS No. 99 addresses the following issues:

- Description and characteristics of fraud
- The importance of exercising professional skepticism
- Discussion among engagement personnel regarding the risks of material misstatement due to fraud
- Obtaining the information needed to identify risks of material misstatement due to fraud
- Identifying risks that may result in a material misstatement due to fraud

⁵ Note that SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), amended SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341), to require that this evidence be documented.

- Assessing the identified risks after taking into account an evaluation of the entity's programs and controls
- Responding to the results of the assessment
- Evaluating audit evidence
- Communicating about fraud to management, the audit committee, and others
- Documenting the auditor's consideration of fraud

.108 According to SAS No. 99, fraud frequently involves a pressure or incentive to commit fraud. The lack of industry self-regulation of e-business and, in some cases, the lack of established accounting practices relative to the industry could provide management with the opportunity to manipulate income.

.109 SAS No. 99 specifically recognizes certain conditions as risk factors that motivate management to engage in fraudulent financial reporting. For example, factors include situations in which a significant portion of management compensation is represented by bonuses, stock options, or other incentives; and ones in which there is an excessive interest by management in maintaining or increasing an entity's stock price. SAS No. 99 also identifies other risk factors related to misstatements arising from fraudulent financial reporting, such as a high degree of competition or market saturation, and rapidly changing technology or rapid product obsolescence. All of these factors are present in the e-business environment, implying potential audit concerns.

.110 As a result of the opportunity for fraud that is present in audits of e-businesses, you should consider whether specific controls exist that mitigate the risks. Mitigating controls at larger companies may include an effective board of directors, audit committee, and an internal audit function. Smaller companies may have an environment that fosters integrity and ethical behavior, as well as management by example.

.111 You may need to modify the nature, timing, and extent of audit procedures if you believe that there are risks of material misstatement attributable to fraud during an audit of an e-business. For example, you may choose to perform detailed substantive analytical procedures or conduct interviews in areas where fraud may be present, or both. For potential fraud related to revenue recognition issues, you may decide to confirm certain relevant terms of customer contracts. SAS No. 99 contains specific guidance on revenue recognition as a potential fraud risk.

.112 In certain situations, you may have a duty to disclose the circumstances of the fraud to outside parties. For public companies, if the fraud or related risk factor results in termination of the engagement, is considered a reportable event, or is the source of a disagreement, you may be required to report this situation to the SEC. If fraud is present, other reports also may be required under section 10A(b)1 of the Securities and Exchange Act of 1934.

.113 For more information on SAS No. 99, see the discussion in the "Recent Auditing and Attestation Pronouncements and Other Guidance" section later in this Alert.

General Accounting Issues Affecting E-Business

.114 Accounting for e-business involves the application of many complex accounting principles and transactions for which there may be diversity in practice or no authoritative guidance. The diversity in accounting treatment for e-business transactions leads to incomparable financial statements and potential earnings-management issues and may cause investors to rely on unaudited sources of information for stock valuation and investment decisions.

.115 Accounting regulators and standard-setters are aware of the issues raised by the diversity in accounting by e-businesses. In addition, the SEC staff has identified several accounting issues for Internet companies that the Emerging Issues Task Force (EITF) is addressing. See the section in this Alert titled “SEC Internet-Related Concerns” for a discussion of these issues.

Stock Options

.116 As noted in last year’s Alert, stock options are an important accounting-related area for your e-business clients. Knowledgeable workers are the prime assets of e-businesses and are the key to wealth creation. Accounting for their compensation sometimes raises difficult accounting issues if e-businesses include stock options in employee compensation packages. E-businesses grant stock options to essential employees to attract, motivate, and retain them, in addition to granting stock options, awards of stock, or warrants to consultants, contractors, vendors, lawyers, finders, lessors, and others. Issuing equity instruments makes a lot of sense, partly because of the favorable accounting treatment and partly because the use of equity conserves cash and generates capital.

.117 The accounting for employee stock options has received renewed attention in recent months. There have been two important developments. First, several major U.S. companies have announced their intentions to change their method of accounting for employee stock options to an approach that recognizes an expense for the fair value of the options granted in arriving at reported earnings. Recognizing compensation expense relating to the fair value of employee stock options granted is the preferable approach under FASB Statement No. 123, *Accounting for Stock-Based Compensation*. It also is the treatment advocated by an increasing number of investors and other users of financial statements.

.118 When the FASB developed FASB Statement No. 123 in the mid-1990s, the FASB proposed requiring that treatment because it believed it was the best way to report the effect of employee stock options in a company’s financial statements. The FASB modified that proposal in the face of strong opposition by many in the business community and in Congress who directly threatened the existence of the FASB as an independent standard setter. Thus, while FASB Statement No. 123 provides that expense recognition for the fair value of employee stock options granted is the preferable approach, it permitted the continued use of existing methods with disclosure in the footnotes to the financial statements of the pro forma effect on net income and earnings per share as if the preferable, expense recognition method had been applied. Until now, only a handful of companies elected to follow the preferable method. (See related information in the subsequent section of this Alert, “FASB Issues EDs Related to Stock-Based Compensation.”)

.119 Second, the International Accounting Standards Board (IASB) has concluded its deliberations on the accounting for share-based payments, including employee stock options, and announced plans to issue a proposal for public comment in the fourth quarter of 2002. That proposal would require companies using IASB standards to recognize, starting in 2004, the fair value of employee stock options granted as an expense in arriving at reported earnings. Although there are some important differences between the methodologies in the IASB proposal and those contained in FASB Statement No. 123, the basic approach is the same—fair value measurement of employee stock options granted with expense recognition over the vesting period of the options. See information related to FASB exposure drafts about stock options (stock-based compensation) in the “On the Horizon” section of this Alert.

Business Combinations

.120 In June 2001, the FASB issued FASB Statement No. 141, *Business Combinations*, to address financial accounting and reporting issues for business combinations. This Statement supersedes APB Opinion No. 16, *Business Combinations*, and FASB Statement No. 38, *Accounting for Preacquisition Contingencies of Purchased Enterprises*. Under FASB Statement No. 141, all business combinations will be accounted for using one method—the purchase method. Given the economic environment of e-business, mergers and acquisitions have been prevalent, so this change to a single method of accounting for business combinations may have major implications for e-businesses.

.121 Under APB Opinion No. 16, business combinations were accounted for using one of two methods, namely, the pooling-of-interests method (pooling method) or the purchase method. Use of the pooling method was required whenever 12 criteria were met; otherwise, the purchase method was used. Because those 12 criteria did not distinguish economically dissimilar transactions, similar business combinations were accounted for using different methods, producing dramatically different results.

.122 The provisions of FASB Statement No. 141 reflect a fundamentally different approach to accounting for business combinations. The single-method approach reflects the conclusion that virtually all business combinations are acquisitions and, thus, all business combinations should be accounted for in the same way that other asset acquisitions are accounted for—based on the values exchanged. Specifically, FASB Statement No. 141 changes the accounting for business combinations in APB Opinion No. 16 in the following respects:

- FASB Statement No. 141 requires that all business combinations be accounted for by a single method—the purchase method.
- In contrast to APB Opinion No. 16, which required the separate recognition of intangible assets that can be identified and named, FASB Statement No. 141 requires that intangible assets be recognized as assets apart from goodwill if they meet one of two criteria—either the contractual-legal criterion or the separability criterion.
- In addition to the disclosure requirements in APB Opinion No. 16, FASB Statement No. 141 requires the disclosure of the primary reasons for both the business combination and the allocation of purchase price paid to the assets acquired and liabilities assumed by major balance-sheet caption.

.123 The provisions of FASB Statement No. 141 apply to all business combinations initiated after June 30, 2001. The Statement also applies to all business combinations accounted for using the purchase method for which the date of acquisition is July 1, 2001, or later.

SEC Internet-Related Concerns

.124 The SEC staff expressed concern about issues that they believed warranted consideration by the EITF or another standard-setting body. Since 1999, the SEC and the EITF have worked to resolve these issues, which we discuss here.

Rebates and Free Products or Services

.125 ISPs and computer retailers commonly offer a rebate to purchasers of new computers who contract for three years of Internet service. In most cases, the rebate cost is borne by the ISP while a portion is borne by the retailer. In addition, the retailer provides advertising and marketing for the arrangement, and the rebate must be returned by the consumer if the consumer breaks the contract with the ISP. Some ISPs and retailers believe their portion of the cost of the rebate should be a marketing expense, as opposed to a reduction of revenues. However, according to SEC's Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements—Frequently Asked Questions and Answers*, the SEC staff generally believes that such rebates should be considered a reduction of revenue.

.126 On a related matter, some e-businesses offer free or heavily discounted products or services in introductory offers (for example, a free month of service or six CDs for a penny). Some businesses conclude that these introductory offers should be accounted for at full sales price, with the recognition of marketing expense for the discount. The section titled "One-Cent Sales" in AICPA Technical Practice Aid *Revenue Recognition* (AICPA, *Technical Practice Aids*, vol. 1, TIS sec. 5100.07) addresses this issue, concluding, "The practice of crediting sales and charging advertising expense for the difference between the normal sales price and the 'bargain day' sales price of merchandise is not acceptable for financial reporting."

.127 The FASB's EITF addressed these issues in EITF Issue No. 00-14, concluding that sales incentives, such as rebates and free products, should be treated as a reduction of revenue.

Auction Site Fees

.128 Internet auction sites usually charge both up-front (listing) fees and back-end (transaction-based) fees. In many cases, the listing fees are being recognized as revenue when the item is originally listed, despite the requirement for the auction site to maintain the listing for the duration of the auction. In addition, some auction sites recognize the back-end fees as revenue at the end of the auction despite the fact that the seller is entitled to a refund of the fee if the transaction between the seller and the buyer does not close. According to the SEC's SAB No. 101, the SEC staff generally believes that the up-front (listing) fees should be recognized over the listing period, which is the period of performance. Because the facts and circumstances of the agreements among the auction site, the buyers, and the sellers may vary significantly concerning the back-end fees, each situation will have to be evaluated to determine the appropriate method of revenue recognition.

Application Service Providers

.129 Some purchasers of software do not actually receive the software. Rather, the software application resides on the vendor's or a third party's server, and the customer accesses the software on an as-needed basis over the Internet. Essentially, the customer is paying for two elements—the right to use the software and the storage of the software on someone else's hardware. The latter service is referred to as *hosting*. If the vendor also provides the hosting, several revenue recognition issues may arise. First, there may be transactions structured in the form of a service agreement providing Internet access to the specified site, without a corresponding software license. In such instances, it may not be clear how to apply SOP 97-2, *Software Revenue Recognition*. Second, if the transaction is viewed as a software license with a service element, it is not clear how to evaluate the delivery requirement of SOP 97-2.

.130 The EITF addressed this topic in EITF Issue No. 00-3, *Application of AICPA Statement of Position 97-2, Software Revenue Recognition, to Arrangements That Include a Right to Use Software Stored on Another Entity's Hardware*. The consensus of the EITF was that SOP 97-2 does not apply to all of these arrangements, but if it does, revenue should be allocated to the software element based on vendor-specific evidence of fair value. Revenue should be recognized on the software element when the delivery has occurred and on the hosting element when the services are performed.

Web Site Access and Maintenance

.131 Some e-businesses provide customers with services that include access to a Web site, maintenance of a Web site, or the publication of certain information on a Web site for a period of time.⁶ Some companies have argued that, because the incremental costs of maintaining the Web site and/or providing access to it are minimal, this ongoing requirement should not preclude up-front revenue recognition. According to the SEC's SAB No. 101, the SEC staff believes, however, that fees like this should be recognized over the performance period, which would be the period over which the company has agreed to maintain the Web site or listing.

Accounting for Customer or Membership Base Costs

.132 E-businesses often make large investments in building a customer or membership base. Consider the following examples:

- Sites that give users rewards, such as points, products, discounts, and services, in exchange for setting up an account with the site
- Sites that make payments to business partners for referring new customers or members
- Businesses that give users a computer and Internet service for free if they are willing to spend a certain amount of time on the Internet each month and are willing to have advertisements reside permanently on their computers

⁶ EITF Issue No. 00-2, *Accounting for Web Site Development Costs*, describes the accounting treatment for costs associated with developing a Web site.

In each of these examples, a question may arise about whether the costs represent customer acquisition costs or the costs of building a membership base that qualifies for capitalization, for example, by analogy to FASB Statement No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases*, as amended.

.133 The EITF has not reached a consensus on Issue No. 00-22, *Accounting for "Points" and Certain Other Time-Based or Volume-Based Incentive Offers, and Offers for Free Products or Services to Be Delivered in the Future*, although it still plans further discussion. Specific industries would be excluded from the scope of EITF Issue No. 00-22 to the extent that they are addressed by higher level GAAP; however, not much guidance currently exists.

Other E-Business Accounting Issues Important to Investors

.134 E-business analysts have identified several essential e-business accounting issues of interest to auditors. These issues are presented from the point of view of investors evaluating Internet companies.

Recognition of Costs

.135 Customer solicitation and software development costs are key costs for e-businesses that present cost recognition issues. Currently, there is diversity in accounting for these costs by Internet companies—they could either capitalize or expense the costs—which makes it difficult to compare their financial statements.⁷ If they capitalize the costs, amortization periods for essentially the same transactions could differ between companies. Compounding the problem is the practice by some established companies of masking these costs by spreading them across existing operations.

.136 If alternative accounting treatments give management the ability to choose between capitalizing or expensing a cost, management may use the alternatives to manage earnings. If investors cannot compare audited financial statements reliably, they may turn to potentially unreliable sources of information as a basis for their investment decisions. The use of unreliable information can cause volatility in the stock prices, misvaluation, and losses for investors.

.137 In the two major categories of customer solicitation and software development costs, auditors should be aware of current GAAP, as follows:

- SOP 93-7, *Reporting on Advertising Costs*
- EITF Issue No. 00-22, *Accounting for "Points" and Certain Other Time-Based or Volume-Based Incentive Offers, and Offers for Free Products or Services to Be Delivered in the Future*
- SOP 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*
- EITF Issue No. 00-2, *Accounting for Web Site Development Costs*

Research and Development Costs

.138 The e-business industry is still in its infancy. Often, the competitive advantage of an e-business rests on an idea that is still in the conceptual stage, with no existing commercial software process to implement the strategy. Therefore, many e-businesses undertake the research and development (R&D) activities themselves.

.139 Ongoing innovation is the heart of competition in e-business and is required for survival. Consequently, most e-businesses devote a substantial portion of their resources to R&D activity. According to paragraphs 8(a) and 8(b) of FASB Statement No. 2, *Accounting for Research and Development Costs*:

⁷ If the costs incurred relate to internal-use software, Statement of Position (SOP) 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use* requires that these costs be capitalized and amortized over the useful life of the software.

Research is planned search or critical investigation aimed at discovery of new knowledge with the hope that such knowledge will be useful in developing a new product or service.

Development is the translation of research findings or other knowledge into a plan or design for a new product or process . . . whether intended for sale or use.

.140 E-business management may reduce net loss or increase earnings by capitalizing R&D costs, which are significant for many companies involved in e-business. However, FASB Statement No. 2, as interpreted by FASB Interpretation No. 4, *Applicability of FASB Statement No. 2 to Business Combinations Accounted for by the Purchase Method*, prohibits capitalization and requires R&D to be expensed when incurred, except for acquired R&D with alternative future uses purchased from others. In addition to the requirement to expense internal R&D, FASB Statement No. 2 requires disclosure in the financial statements regarding the total amount of R&D costs charged to expense.

.141 Some e-businesses acquire their assets through mergers and acquisitions. One purpose of these business combinations is to acquire in-process e-business R&D. You may need to hire a technology specialist to determine which acquired technology objects have alternative future uses. For clients with technology with alternative future uses, you should verify that they are properly valued and capitalized.

Help Desk—The AICPA Practice Aid titled *Assets Acquired in a Business Combination to Be Used in Research and Development Activities: A Focus on Software, Electronic Devices, and Pharmaceutical Industries* (product no. 006609kk) may be helpful in valuing these intangible assets. It is available from the AICPA Order Department at (888) 777-7077 or online at www.cpa2biz.com.

Contingency Losses

.142 E-businesses that conduct retail transactions over the Internet with consumers might experience contingent losses for sales returns, allowances, and credit card chargebacks. Auditors of e-businesses should ensure that clients conducting online retail sales accrue an adequate loss contingency for sales returns, allowances, and credit card chargebacks, or that they make adequate disclosure that they cannot reasonably estimate the amount of loss.

.143 Usually, estimates of anticipated losses are based on the normal experience of the business and its transaction history. For many e-businesses, however, there is not enough transaction history to reasonably estimate these amounts. In that case, according to paragraph 10 of FASB Statement No. 5, *Accounting for Contingencies*:

If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 [see previous extract] are not met . . . disclosure of the contingency shall be made where there is at least a reasonable possibility that a loss . . . may have been incurred. The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made.

Start-Up Activity Costs

.144 As a result of the recent pace of e-business investment, you should take the time to understand how to apply the provisions of SOP 98-5, *Reporting on the Costs of Start-Up Activities*, for your clients. In addition, you may want to review the provisions of FASB Statement No. 7, *Accounting and Reporting by Development Stage Enterprises*. Paragraph 5 of SOP 98-5 defines start-up activities as:

Those one-time activities related to opening a new facility, introducing a new product or service, conducting business with a new class of customer or beneficiary, initiating a new process in an existing facility, or commencing some new operation. Start-up activities include activities related to organizing a new entity (commonly referred to as organization costs).

.145 Certain costs that ongoing enterprises would be able to capitalize under GAAP, such as acquiring or constructing long-lived assets and getting them ready for their intended uses, acquiring or producing inventory, and acquiring intangible assets, are not subject to SOP 98-5. Costs of start-up activities, including organization costs, should be expensed as incurred.

.146 FASB Statement No. 7 defines a development stage enterprise as one that is devoting substantially all of its efforts to establishing a new business, whose principal operations have not commenced, or for which there is no significant revenue. In addition, a development stage enterprise typically devotes most of its activities to acquiring or developing operating assets, recruiting and training personnel, and developing markets, as well as other activities. Clearly, FASB Statement No. 7 applies to most new e-businesses because they are typically involved in the activities described by the Statement. According to paragraph 10 of FASB Statement No. 7:

Financial statements issued by a development stage enterprise shall present financial position and results of operations in conformity with the generally accepted accounting principles that apply to established operating enterprises.

.147 Furthermore, FASB Statement No. 7 requires additional balance-sheet disclosures. These disclosures include cumulative net losses, with special descriptive captions, income statement disclosure of cumulative revenue and expenses, and a statement of stockholder equity showing each issuance of equity securities, including dollar amounts, dollar amounts assigned for noncash consideration, the nature of noncash consideration, and the basis for assigning amounts.

.148 The applicability of FASB Statement No. 7 is especially important for new e-businesses that might be tempted to play by their own rules, and to pick and choose between what to report and disclose. Public development stage companies are subject to article 5A of SEC Regulation S-X, which requires separate statements of assets and unrecovered promotional and development costs. Rule 12-06a of Regulation S-X allows the offset of certain proceeds and other income against promotional and development costs.

Footnote Disclosures

.149 Under current GAAP, there are no special reporting or disclosure requirements specifically related to e-business. On the other hand, SEC reporting companies with multiple operating segments are required to report and disclose financial and descriptive information about reportable operating segments. According to paragraphs 3 and 4 of FASB Statement No. 131, *Disclosures About Segments of an Enterprise and Related Information*:

The objective of requiring disclosures about segments of an enterprise and related information is to provide information about different types of business activities in which an enterprise engages and the different economic environments in which it operates to help users of financial statements better understand the enterprise's performance, better assess its prospects for future net cash flows, and make more informed judgments about the enterprise as a whole.

The method the Board chose for determining what information to report is referred to as the management approach . . . [which is] based on the way that management organizes the segments within the enterprise for making operating decisions and assessing performance.

.150 Information about the e-business activities of public companies is important and valuable information to investors. Reliable financial information about the nature of a company's e-business activities is crucial to assessing that company's future prospects. E-business activities may meet the guidelines for an operating segment, according to paragraph 10 of FASB Statement No. 131, if one of the following occurs:

- The segment engages in activities from which it may earn revenues and incur expenses.
- The enterprise's chief operation decision-maker regularly reviews its operating results.
- There is discrete financial information available.

.151 Further, these e-business activities that meet the definition of operating segments may meet the guidelines for a reportable segment (segments for which specific disclosures are required), according to paragraph 18 of FASB Statement No. 131, if the following occur:

- The segment's reported revenue to both external customers and intersegment sales is 10 percent or more of the combined revenue of all operating segments;
- The absolute amount of reported profit or loss is 10 percent or more of the combined operating profit or loss; or
- Its assets are 10 percent or more of the combined assets of all operating segments.

.152 FASB Statement No. 131 is not intended to discourage the disclosure of additional information about e-business activities. Audited information disclosed in the notes to the financial statements that investors may use to value e-business companies, such as Web site traffic, growth in customer base, customer retention ratios, and employee turnover, could help dampen stock market volatility by improving the quality of information available to investors.

.153 On a related matter, as noted in the "Long-Lived Assets, Including Goodwill and Intangibles" section of this Alert, FASB Statement No. 142, *Goodwill and Other Intangible Assets*, requires public and nonpublic companies to test goodwill for impairment at least annually at the "reporting unit" level. A reporting unit is defined as "an operating segment or one level below an operating segment." FASB Statement No. 142 further requires specific disclosures about goodwill and other intangible assets at the reporting unit or operating segment level.

Asset Impairment

.154 Moving sales and distribution networks to the Internet can displace existing traditional distribution channels, deconstruct industries and companies, and cause assets to lose significant value. For example, e-business can threaten existing branch office operations, travel agencies, bookstores, stockbrokers, insurance agents, music distributors, automobile dealerships, and newspaper classified advertising departments. Where does the auditor come into play in all of this? Auditors of businesses subject to deconstruction by the Internet need to consider whether management has appropriately accounted for asset values that have been impaired. FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides you with some relevant guidance.

.155 FASB Statement No. 144 supersedes FASB Statement No. 121 and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual, and Infrequently Occurring Events and Transactions*, for the disposal of a segment of a business (as previously defined in the Opinion). This Statement also amends ARB 51, *Consolidated Financial Statements*, to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary.

.156 FASB Statement No. 144 retains the requirements of FASB Statement No. 121 to (1) recognize an impairment loss only if the carrying amount of a long-lived asset is not recoverable from its undiscounted cash flows and (2) measure an impairment loss as the difference between the carrying amount and the fair value of the asset. To resolve implementation issues, the Statement:

- Removes goodwill from its scope and, therefore, eliminates the requirement of FASB Statement No. 121 to allocate goodwill to long-lived assets to be tested for impairment.

- Describes a probability-weighted cash-flow estimation approach to address situations in which alternative courses of action to recover the carrying amount of a long-lived asset are under consideration or a range is estimated for the amount of possible future cash flows.
- Establishes a “primary asset” approach to determine the cash-flow estimation period for a group of assets and liabilities that represents the unit of accounting for a long-lived asset to be held and used.

.157 The accounting model for long-lived assets to be disposed of by sale is used for all long-lived assets, whether previously held and used or newly acquired. That accounting model retains the requirement of FASB Statement No. 121 to measure a long-lived asset classified as held for sale at the lower of its carrying amount or fair value less cost to sell and to cease depreciation. Therefore, discontinued operations are no longer measured on a net realizable value basis, and future operating losses are no longer recognized before they occur.

.158 According to paragraph 8 of FASB Statement No. 144:

A long-lived asset (asset group) shall be tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable.

.159 A significant adverse change in the business climate is one example that paragraph 8 of FASB Statement No. 144 provides to determine whether it is necessary to assess the recoverability of an asset. Some assets, particularly legacy software and hardware systems, or even relatively recently installed enterprise resource planning, network operating, and software systems, have been rendered obsolete by changing technology and may have fair values that are significantly less than book value. In addition to single assets, FASB Statement No. 144 also applies to groups of assets.

.160 The provisions of FASB Statement No. 144 are effective for financial statements issued for fiscal years beginning after December 15, 2001, and interim periods within those fiscal years, with early implementation encouraged. The provisions of the Statement generally are to be applied prospectively.

Recent Auditing and Attestation Pronouncements and Other Guidance

.161 Presented below is a list of auditing and attestation pronouncements, guides, and other guidance issued since the publication of last year’s Alert. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team and available at www.aicpa.org.

.162 The following summaries of available guidance might have particular significance in the e-business environment. The summaries are for informational purposes only and should not be relied on as a substitute for a complete reading of the applicable standards. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.163 As noted previously in the “Consideration of Fraud” section of this Alert, SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A); amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230); and amends SAS No. 85, *Management Representations*. The Statement does not change the auditor’s responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02).⁸ However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.⁹

.164 Among other things, SAS No. 99 also includes Exhibit 1, “Management Antifraud Programs and Controls: Guidance to Help Prevent, Detect, and Deter Fraud.” This document was developed by the AICPA and other sponsoring organizations to assist management, audit committees, and board of directors to better understand the types of programs and controls that would be effective in preventing and deterring fraud. The document has been included with the SAS to assist auditors in obtaining an understanding of programs and controls that management and those with corporate governance responsibility may use to mitigate specific risks of fraud, or that otherwise help to prevent, deter, and detect fraud. SAS No. 99 also revises the guidance for management representations about fraud currently found in SAS No. 85, *Management Representations*.

.165 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application is permissible. (See related discussion in the previous section of this Alert, “Consideration of Fraud.”)

.166 The AICPA is completing a fraud Practice Aid titled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide* that will be published by the end of 2002. The Practice Aid addresses such topics as how the new SAS changes audit practice, characteristics of fraud, understanding the new SAS, best practices, and practice aids, including specialized industry fraud risk factors, common frauds, and extended audit procedures. Auditors should be on the lookout for this new publication.

Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*

.167 The objective of this Guide recently issued by the AICPA is to help auditors implement SAS No. 70, as amended. Guidance included is for service auditors engaged to issue reports on a service organization’s controls that may be part of a user organization’s information system in the context of an audit of financial statements. In addition, the guidance is for user auditors engaged to audit financial statements of entities that use service organizations.

⁸ The auditor’s consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in SAS No. 54, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1, AU sec. 317). For those illegal acts that are defined in that Statement as having a direct and material effect on the determination of financial statement amounts, the auditor’s responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* [AICPA, *Professional Standards*, vol. 1, AU sec. 312]), or fraud.

⁹ Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statement in accordance with generally accepted auditing standards (GAAS). Chapter 1, “Attest Engagements,” of Statement on Standards for Attestation Engagements No. 10, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101), and Statement on Standards for Consulting Services (AICPA, *Professional Standards*, vol. 2, CS sec. 100) provide guidance to accountants relating to the performance of such services.

.168 Some of the new elements included in the revised Guide are illustrative control objectives for various types of service organizations as well as three recently issued audit interpretations that address the responsibilities of service organizations and service auditors with respect to forward-looking information and the risk of projecting evaluations of controls to future periods. The Guide also clarifies that the use of a service auditor's report should be restricted to existing customers and is not meant for potential customers.

Help Desk—You can obtain the Guide by contacting the AICPA at (888) 777-7077 and requesting product number 012772kk or by going online at www.cpa2biz.com.

Accounting Pronouncements and Guidance Update

.169 Presented below is a list of recently issued accounting pronouncements and other guidance issued since the publication of last year's Alert. See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a summary explanation of these issuances. For information on accounting standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and the *Journal of Accountancy*.

FASB Statement No. 145	<i>Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13 and Technical Corrections</i>
FASB Statement No. 146	<i>Accounting for Costs Associated With Exit or Disposal Activities</i>
FASB Statement No. 147	<i>Acquisitions of Certain Financial Institutions</i>
SOP 01-5	<i>Amendments to Specific AICPA Pronouncements for Changes Related to the NAIC Codification</i>
SOP 01-6	<i>Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others</i>

On the Horizon

.170 You should keep abreast of auditing and accounting developments and anticipated guidance that may affect your engagements. In considering exposure drafts toward this end, remember that they are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

FASB Issues EDs Related to Stock-Based Compensation

.171 In October 2002, the FASB issued an exposure draft, *Accounting for Stock-Based Compensation: Transition and Disclosure—an Amendment of FASB Statement No. 123*. The proposed standard would amend the transition and disclosure provisions of FASB No. 123 but would not amend its recognition and measurement provisions. In addition, in November 2002, the FASB issued an exposure draft, *Accounting for Stock-Based Compensation: A Comparison of FASB Statement No. 123, Accounting for Stock-Based Compensation, and Its Related Interpretations, and IASB Proposed IFRS, Share-based Payment*. For more information about these proposed standards, go to the FASB Web site at www.fasb.org. (See discussion of Stock Options in the previous "Stock Options" section of this Alert.)

AICPA Resource Central

.172 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your e-business engagements (product numbers appear in parentheses).

- AICPA general *Audit Risk Alert* [AAM section 8010]
- Audit Guide *Auditing Revenue in Certain Industries* (012510kk)

- Audit and Accounting Guide *Audit Sampling* (012530kk)
- Audit Guide *Analytical Procedures* (012551kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (010010kk)
- *Accounting Trends & Techniques—2002* (009894kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (006701kk)
- Practice Aid *Assets Acquired in a Business Combination to Be Used in Research and Development Activities: A Focus on Software, Electronic Devices, and Pharmaceutical Industries* (006609kk)

Audit and Accounting Manual

.173 The *Audit and Accounting Manual* (product no. 005132kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. The Manual contains numerous practice aids, samples, and illustrations, including audit programs; auditors' reports, checklists, and engagement letters; management representation letters; and confirmation letters.

AICPA reSOURCE: Online Accounting and Auditing Literature

.174 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (more than 20), *Audit Risk Alerts* (more than 15) and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Educational Courses

.175 The AICPA has developed a number of continuing professional education (CPE) courses that are valuable to CPAs working in the e-business environment. Those courses include (product numbers are in parentheses):

- *AICPA's Annual Accounting and Auditing Workshop* (2002-2003 edition) (737082kk, text; 187082kk, video). Whether you are in industry or public practice, this course keeps you current and informed, and shows you how to apply the most recent standards.
- *The AICPA's Guide to Consolidations and Business Combinations* (735125kk). Learn how FASB Statements No. 141 and No. 142 have changed the rules for business combinations and goodwill accounting.
- *E-Commerce: Controls and Audit* (731551kk). Do you want to have a basic, yet comprehensive overview of the world of e-commerce? If so, this is the self-study course for you.
- *Guide to XBRL* (731111kk). XBRL (eXtensible Business Reporting Language) has sweeping implications for CPAs in industry and in public practice. The course begins with a big-picture introduction, then covers the enabling technologies, XBRL itself, and the strategic issues.
- *Auditing in a Paperless Society* (730121kk). Now that paper is slowly diminishing, where do you go? This course will teach you how to develop strategies for auditing around, through, and with a computer.

Online CPE

.176 The AICPA offers an online learning tool titled *AICPA InfoBytes*. An annual fee (\$119 for members and \$319 for nonmembers) offers unlimited access to hundreds of hours of CPE content in one- and two-credit courses. Register today at www.cpa2biz.com/infobytes.

CPE CD-ROM

.177 *The Practitioner's Update* (product no. 738110kk) CD-ROM helps you keep on top of the latest standards. Issued twice a year, this cutting-edge course focuses primarily on new pronouncements that will become effective during the upcoming audit cycle.

Member Satisfaction Center

.178 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Technical and Ethics Hotlines

.179 Do you have a complex technical question about GAAP, OCBOA, accounting, auditing, compilation engagements, review engagements, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with their answer. You can reach the Technical Hotline at (888) 777-7077.

.180 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Conference: The Business of E-Business

.181 Among the many conferences the AICPA offers, there is one that might interest you or your e-business clients: the AICPA/ISACA/MIS Training Institute—The Business of E-Business: Audit, Control, and Accounting in a Dot.Com World, which addresses the latest trends, strategies, and best practices of innovative companies involved in e-business.

.182 For additional information, contact CPA2biz at its Web site, www.cpa2biz.com.

Web Sites¹⁰

AICPA Online and CPA2Biz

.183 AICPA Online, at www.aicpa.org, informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, CPA2Biz, at www.cpa2biz.com, offers you all the latest AICPA products, including more than 15 Audit Risk Alerts, more than 20 Audit and Accounting Guides, the Professional Standards, and CPE courses.

.184 This Audit Risk Alert replaces the *E-Business Industry Developments—2001/02 Audit Risk Alert*. The *E-Business Alert* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to Leslye Givarz at lgivarz@aicpa.org, or write to:

Appendix A

Identifying and Managing E-Business Risks

Risks in E-Business

Business risk is a term used to describe the risk inherent in a firm's operations. If a firm engages in e-business, its business risk typically changes in nature and increases. This is a result of the risks associated with e-business, such as increased reliance on technology and the fact that this technology changes rapidly. Deloitte and Touche, LLP, has identified common risk-increasing characteristics of firms engaged in e-business.¹ Some of these characteristics include the following:

- Rapid growth
- Mergers and acquisitions
- Formations of new partnerships
- Obtaining financing through debt and equity offerings and/or initial public offerings
- Upgrading and installing new technology
- Taking new products to market
- Complex information systems
- Changes in management
- Regulatory compliance difficulties
- Increasingly complex business models and processes

Any firm's risk management program should be comprehensive enough to encompass the risks stemming from these characteristics. However, effectively managing these risks is an increasingly high priority for e-business firms because they are currently more likely than other firms to exhibit these characteristics.

Remember, e-business is not only the buying and selling of goods and services over the Internet. Any electronic transfer of information that facilitates a company's operations can be termed e-business. Consequently, the risks of e-business are as broad as the term itself. However, the general categories of e-business risk can be summarized as follows:²

- IT infrastructure vulnerabilities
- Falsified identity
- Compromised privacy
- Destructive or malicious code
- System interdependencies

Information Technology Infrastructure Vulnerabilities

One of the primary sources of risk facing e-business firms stems from vulnerability in the organization's IT infrastructure—the hardware, software, and processes that allow day-to-day operations to be carried out. Other risks associated with infrastructure vulnerabilities include the following:

¹ *Enterprise Risk Services*, Deloitte and Touche LLP, 1998.

² Steven M. Glover, Stephen W. Little, and Douglas F. Prawitt. *E-Business Principles and Strategies for Accountants*. Englewood Cliffs, N.J.: Prentice Hall, 2001.

- Denial-of-service attacks, such as the one experienced by Yahoo and others
- Physical outages, such as those caused by hardware failures
- Design failures, such as in February 2000, when the NASDAQ suffered an outage because a problem in a communications feed to one of its mainframe computers froze the NASDAQ Composite Index for two-and-a-half hours
- Operations failures, such as errors or malicious acts by operations personnel
- Environmental outages, such as those caused by natural disasters
- Reconfiguration outages, such as those caused by software upgrades, database maintenance, or hardware changes

Controlling Risks Associated With Infrastructure Vulnerabilities

Companies stand to lose millions of dollars in equipment, software, and sensitive information when a disaster strikes. Enterprises should prepare to minimize the effects of disasters by having a good disaster recovery plan. In addition to a good disaster recovery plan, e-businesses may use software-based security packages as an integral part of controlling the risks associated with infrastructure vulnerabilities. There are several different types of software security packages, including the following:

- *Firewalls.* Software applications designed to block unauthorized access to files, directories, and networks.
- *Intrusion detection software.* Applications that constantly monitor a system and its components and notify users of unauthorized entrance into a system.
- *Scanners or security probes.* Applications that test the strength of security measures by actively probing a network for vulnerabilities. (The SATAN and COPS probes, available for free on the Internet, are examples of general security probes.)

Other ways to protect an organization from the risk associated with infrastructure vulnerabilities include the encryption of information, physical controls, and use of passwords (with periodic password change requirements).

Falsified Identities

Falsified identity is a major source of exposure and risk in conducting e-business. For an electronic transaction to take place, each party to the transaction needs to be confident that the claimed identity of the other party is authentic. These threats are less of a concern in traditional electronic data interchange environments because they involve relatively limited access points, dedicated lines, and established network providers as intermediaries. But authenticity is a significant concern for transactions conducted in an Internet-based environment. The following are examples of risks associated with identification and authenticity:

- *E-mail spoofing.* Hackers can hide their identity simply by changing the information in an e-mail header. In addition, e-mail spoofing can be associated with virus transfers and "spam" mail.
- *IP spoofing.* Some security measures, such as firewalls, may be configured to disallow access to incoming requests with certain IP addresses. By changing the IP address to one that the security system will not block, an unauthorized person can sometimes gain access to the system.
- *Customer impersonation.* Like traditional businesses that accept checks or credit cards, e-businesses face the burden of verifying customer identity. If a consumer has falsified his or her identity, businesses can lose money on fraudulent requests for products or services.
- *False Web sites.* Also called false storefronts, false Web sites are set up to grab confidential information, leading to further misdeeds.

Controlling the Risks Associated With Falsified Identity

The evolution of e-business has caused a shift in the area of identity issues. With the emergence of the Internet as the primary vehicle for e-business, the potential exists for a virtually unlimited number of parties to attempt to initiate transactions. Some of the controls available for authentication and identification in the e-business environment include the following:

- *Digital signatures and certificates.* Just as a signature on a paper document serves as the authentication or certification of a procedure or important information, a digital signature provides beneficiaries assurance that the transaction is valid.
- *Biometrics.* One of the most promising areas of technology and systems security is biometrics, the use of unique features of the human body to create secure access controls. Because each person possesses unique biological characteristics (for example, iris and retina patterns, fingerprints, voice tones, and writing styles), scientists have been able to develop specialized security devices that are highly accurate in authenticating an individual's identity.

Compromised Privacy

Consumers remain concerned that their privacy may be violated if they engage in e-business transactions. Several surveys have found that consumers' biggest concerns are privacy and security. Privacy risks are of concern to e-businesses because (1) consumers who are not confident that their personal information will be kept secure and confident are less likely to transact business with an e-business company and (2) e-businesses that either purposefully or inadvertently share customers' personal information with third parties may be exposed to legal liability and litigation.

Controlling the Risks Associated With Compromised Privacy

E-businesses interested in protecting the privacy of their customers should develop and implement effective privacy policies. Given the fact that many e-businesses are guilty of violating their own privacy policy, e-businesses that are serious about enhancing customers' confidence that their privacy will be preserved sometimes purchase independent third-party assurance services.

Destructive or Malicious Code

Regardless of their origins, harmful codes and programs have the potential to shut down entire networks and cause huge costs in the form of lost sales and productivity. The following table provides an overview of some harmful codes and programs.

Common Destructive Codes and Programs

<i>Type</i>	<i>Characteristics</i>	<i>Example</i>
Virus	This software was designed to replicate itself and spread from location to location without user knowledge. A virus usually attaches itself to a system in such a way that it is activated when a part of the system is activated.	The "Love Bug" virus was designed to attack users of the Microsoft Outlook® mail program.
Worm	Worms are similar to viruses except that worms do not replicate themselves. Worms are created to destroy or change data within a system.	The "Code Red" worm was designed to attack computers using Microsoft's Internet Information Server®.

(continued)

<i>Type</i>	<i>Characteristics</i>	<i>Example</i>
Trojan horse	This malicious program appears to be a legitimate program or file. When the "legitimate" file is activated, the program is activated, detaches itself, and damages the system that activated it.	
Hoax	A file or message is sent out claiming to be a virus but it is really not a virus.	A Valentine's Day hoax read as follows: "Read this immediately . . . on February 14, 2000, you may receive an e-mail that says 'Be My Valentine.' Do not open it . . . it contains a deadly virus . . . it will erase all of your Windows files."
Logic bomb	This code is inserted into an operating system or application that causes a destructive or security-compromising activity whenever certain conditions are met.	The famous Michelangelo virus was embedded in a logic bomb. The virus was triggered on the artist's birthday, March 6.
Trap door	This illegitimate access is created by programmers enabling easy navigation through software programs and data without going through normal security procedures.	Trap doors are sometimes very useful in systems development, but programmers sometimes fail to close trap doors on completion of a project.
Cross-site scripting	Malicious code is embedded on Web pages with tiny "scripting" programs that make sites more interactive. An unsuspecting Web site visitor then activates the hacker's program by using the corrupted scripting program.	In August, a hacker used cross-site scripting to wipe out desktop icons of Web users visiting Price Lotto, a Japanese auction site.

System Interdependencies

System interdependencies expose e-businesses to risks that come from outside traditional organizational boundaries. E-business often involves highly interdependent relationships with customers, suppliers, and various service providers. These partnerships are vital, but the interdependent nature of these partnerships means that the risks an enterprise faces are at least partly determined by how well partners identify and mitigate the risks to their systems.

Because the quality of a partnership depends heavily on the quality of each partner's information systems, as well as on the communication system between partners, organizations must ensure that their information systems are well managed and controlled. In addition, an e-business must also ensure that the information systems of its critical partners allow for the safe acquisition, processing, storage, and communication of important information. Thus, in an e-business environment, organizations must realize their responsibility to ensure that their trading partners are using effective risk identification and management processes to protect the strength and integrity of the entire network of interdependent enterprises.

.186

Appendix B

Trust Assurance Services

During the past five years, the AICPA and Canadian Institute of Chartered Accountants (CICA) introduced Principles and Criteria to address concerns in the marketplace for assurance around systems reliability and e-commerce activities. These were specifically applicable to two AICPA/CICA assurance services: SysTrust and WebTrust. Although these two initial Principles and Criteria frameworks were very similar, there were a number of differences relating to structure and style. As well, in some cases, the two sets of Principles and Criteria targeted the same basic business concerns (for example, both services provided assurance around security and availability).

After assessing the objectives of SysTrust and WebTrust, the AICPA and CICA decided that the next step in the evolution was to harmonize the underlying Principles and Criteria where commonalities existed and to conform the presentation and wording of the material. To facilitate this change, the separate SysTrust and WebTrust Task Forces were merged to form the Trust Services Task Force. Its first objective was to harmonize the Principles and Criteria and to conform the wording and structure. It was not the goal or intent to change the SysTrust or WebTrust services, or to introduce additional branded services as part of this first task.

The AICPA's Assurance Services Executive Committee and the CICA's Assurance Service Development Board have developed a framework for the development of new services. This framework recognizes that there is a need and an opportunity to build a broad range of professional services in diverse areas. Consequently, the task force issued an exposure draft to accomplish this harmonization.

Due to its unique nature and specific requirements, the Principles and Criteria for WebTrust for Certification Authorities continues as a stand-alone program and is not included as part of this harmonization.

What Are the Significant Changes?

The WebTrust and SysTrust products/services remain unchanged as examination level (audit) assurance services. WebTrust continues to enable assurance on electronic commerce systems. SysTrust continues to enable assurance on any system. As noted above, agreed-upon procedure engagements can be performed using the Trust Services Principles and Criteria that would not result in the issuance of a WebTrust/SysTrust seal/logo.

The task force believes that there has been no substantive change in the scope of work necessary to perform WebTrust or SysTrust engagements. There has been a significant change, however, in the structure, order and wording of the prior Principles and Criteria to achieve the harmonization required.

The following highlights the key changes made as a result of the harmonization of the Principles and Criteria that underscored SysTrust and WebTrust.

Common Set of Principles and Criteria

The SysTrust and WebTrust Principles and Criteria have been harmonized to create a common set of Principles and Criteria, now labeled as the Trust Services Principles and Criteria. No principles have been added. In fact, the criteria for the Principle of Maintainability that existed in the SysTrust Principles have been subsumed under the other principles in the appropriate sections. Therefore, the proposed harmonized set of Principles consists of Security, Availability, Processing Integrity, Online Privacy, and Confidentiality.

Separation of the Measurement Criteria From the Specific Services

The Principles and Criteria have been separated from the specific products and services (that is, SysTrust and WebTrust). Previously they were embedded in the respective service. This separation creates the opportunity

to develop additional branded products and services based on the measurement criteria. The Trust Services Principles and Criteria are considered suitable criteria as defined by professional literature.

Minimum Initial Reporting Period

Previously, under the SysTrust program, there was no defined initial reporting period. In WebTrust 3.0, a minimum reporting period of two months was recommended. This two-month minimum requirement is now applicable to SysTrust engagements.

Controls Reporting Illustrated

Under the WebTrust 3.0 model, the practitioner's report covered management's assertion that an entity disclosed its practices for electronic commerce transactions, complied with such practices, and maintained effective controls. Under SysTrust 2.0, the practitioner's report covered management's assertion that they maintained effective controls. While the examples provided in the exposure draft illustrate the use of reporting on controls only, the Task Force continues to consider the appropriateness of both models. The final release is expected to embrace the original reporting models described for WebTrust 3.0 and SysTrust 2.0.

No Cumulative Reporting

Under WebTrust 3.0, cumulative reporting was an option. Under the new reporting guidelines, it is no longer available. Additional conforming changes have been made to reflect that the services offered are based on a common set of Principles and Criteria.

Consistent Seal Process For Trust Services

WebTrust 3.0 was designed to incorporate a seal management process whereby the WebTrust seal could be used as an electronic representation of the practitioner's unqualified WebTrust report. In contrast, SysTrust did not incorporate the concept of a seal. The SysTrust logo was primarily meant to be used as a symbol for marketing purposes. Under the revised services, the WebTrust service continues to include a seal management process. Now, however, the SysTrust logo may also be used as an equivalent to a seal when the report is presented electronically, provided the issuance of the SysTrust logo as a seal follows the same procedures required to issue a WebTrust seal. Seal management procedures will be provided in the Trust Services publication to be released after the exposure period.

Periodic Examinations

The existing WebTrust service requires updates at least every six months—more frequently if needed based on changes to the e-commerce system. The existing SysTrust service does not have an update requirement. Under the new Trust Services framework, if a report is represented by a seal/logo, updates will be required at least every 12 months—more frequently if circumstances warrant it, regardless of the service. This change reflects the maturity and stability in e-commerce systems and establishes a common standard for the seal or logo.

Licensing

There were separate licensing agreements for SysTrust and WebTrust required with significantly varying requirements. The licensing of the WebTrust Services and SysTrust Services is currently being revised.

Why Change?

The Assurance Services Executive Committee and Assurance Service Development Board concluded, based on recommendations from a working group from the SysTrust and WebTrust Task Forces, that:

- There is no conceptual difference in the respective SysTrust and WebTrust Principles and Criteria taken as a whole.

- While WebTrust was the first service developed, it is, in effect, a specific application of the SysTrust framework.
- There is marketplace confusion among key stakeholders about the differences between the two services.
- There is a need to build a framework of principles and criteria that would be more flexible in meeting the needs of stakeholders in the area of e-commerce and information systems.

For these reasons, the separate SysTrust and WebTrust Task Forces were combined into the Trust Services Task Force. Its first objective was to develop the harmonized Trust Services Principles and Criteria.

Trust Services Principles and Criteria

The following principles have been developed by the AICPA and CICA for use by practitioners in the delivery of Trust Services engagements such as WebTrust and SysTrust. In the course of completing a Trust Services engagement, the practitioner uses the identified Criteria as the basis for assessing whether the particular Principle has been achieved. These principle and criteria definitions have been updated based on the expected release of the Trust Services Principles and Criteria.

Principles

- **Security.** The system¹ is protected against unauthorized access (both physical and logical).
- **Availability.** The system is available for operation and use as committed or agreed.
- **Processing Integrity.** System processing is complete, accurate, timely, and authorized.
- **Online Privacy.** Private information² obtained as a result of electronic commerce is collected, used, disclosed and retained as committed or agreed.
- **Confidentiality.** Information designated as confidential is protected as committed or agreed.

Criteria³

The Criteria associated with each of the Trust Services Principles are organized using a framework covering the following four broad categories:

- **Policies.** The entity has defined and documented its policies⁴ relevant to the particular principle.
- **Communications.** The entity has communicated its defined policies to authorized users.
- **Procedures.** The entity uses procedures to achieve its objectives in accordance with its defined policies.
- **Monitoring.** The entity monitors the system and takes action to maintain compliance with its defined policies.

¹ A "system" consists of five key components organized to achieve a specified objective. The components are categorized as follows: infrastructure (facilities, equipment, and networks), software (systems, applications, and utilities), people (developers, operators, users, and managers), procedures (automated and manual), and data (transaction streams, files, databases, and tables).

² The term *private information* includes personally identifiable information and other sensitive information for which the entity has legal or other privacy obligations and commitments.

³ These criteria meet the definition of "criteria established by a recognized body" described in the third general standard for attestation engagements in the United States (AICPA, *Professional Standards*, vol. 1, AT sec. 100.14) and in the standards for assurance engagements in Canada (CICA Handbook, paragraph 5025.41).

⁴ The term *policies* refers to written statements that communicate management's intent, objectives, requirements, responsibilities and/or standards for a particular subject. Some policies may be explicitly described as such, being contained in policy manuals or similarly labeled documents. However, some policies may be contained in documents without such explicit labeling, including for example, notices or reports to employees or outside parties.

The Criteria have been specifically designed to facilitate engagements related to a single Principle, or combinations of Principles to meet the client's particular needs. Where an engagement involves more than one Principle, there may be significant areas of overlap in the Criteria. In such circumstances the practitioner must be satisfied that the criteria have been achieved for each Principle, but may not need to duplicate the effort required to accomplish this.

AAM Section 8220

Single Audits—2003

NOTICE TO READERS

We, as members of the AICPA staff, have developed this Audit Risk Alert to provide you, as an auditor of organizations receiving federal awards, with an overview of recent industry, regulatory, and professional developments that may affect the audits you perform. This document presents brief summaries of recently issued auditing pronouncements, legal and regulatory provisions, and other guidance. We present those summaries for your information only; you should not rely on them as a substitute for a complete reading of the source material. This publication is an *Other Auditing Publication* as defined in Statement on Auditing Standards (SAS) No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), as amended. Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply SASs.

If an auditor applies the auditing guidance included in an *Other Auditing Publication*, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Industry Developments

.01 This Audit Risk Alert assumes that you have some basic knowledge about single audits performed under the Single Audit Act Amendments of 1996 (the Single Audit Act) (Public Law [P.L.]104-156) and Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133). If it has been a while since you have performed a single audit or you are new to the area, Appendix A, "Overview of Key Components of a Single Audit," includes an overview of various key components of a single audit that should be of use to you. You should also refer to the AICPA Audit Guide *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards* (Single Audit Guide), for more comprehensive guidance.

.02 Things continue to percolate in the area of single audits. New independence rules issued by the U.S. General Accounting Office (GAO) through its *Government Auditing Standards* (GAS—also known as the Yellow Book—terms that are used interchangeably in this Alert) have become effective for the first time. Further, the GAO has recently issued a complete overhaul to *Government Auditing Standards* that will become effective in 2004. There have also been several pieces of new regulation and other guidance issued during the past year that will affect your single audits. First, the OMB revised Circular A-133 in June 2003 to, among other things, increase the threshold for performing single audits. This revision is not effective until fiscal years ending after December 31, 2003, and early implementation is *not* permitted. Second, the 2003 version of the Circular A-133 *Compliance Supplement* (the Supplement) was issued in March 2003. The OMB has also issued proposed revisions to the various OMB cost circulars. Improvements to the grants management process are also in the works because OMB recently issued several final rules and proposals to carry out that objective. Most of these grants management initiatives will affect primarily your auditees (for example, by requiring them to identify themselves via a unique identifying number).

.03 Audit quality continues to be an area of utmost importance. Both the AICPA peer review and disciplinary processes continue to indicate that there are problems in the single audits they are reviewing.

Federal Offices of Inspectors General (OIGs) have found problems based on their reviews of single audit work that are consistent with those found by the AICPA. As a result, the OIGs are working to coordinate a national statistical sample of single audit work to be reviewed. Their objective in performing these reviews is to be able to identify how extensive the single audit quality problems may be. You should keep these quality concerns in mind as you prepare for and perform your single audits this year. For example, you should be sure that you and your staff are fully aware of the various complex requirements for a single audit and that all staff are current on their educational requirements. If not, perhaps a refresher educational course or two is a good idea. Further, you should be sure that all members of the engagement team have access to and familiarity with the many forms of single audit guidance that are available. For example, be sure that your team has the most current Single Audit Guide, Yellow Book, and the Supplement. You should also consider asking key staff members to read this Alert before performing their single audits.

.04 The following sections of this Alert cover many of these items in more detail.

Regulatory, Legislative, and Other Developments

OMB Raises Single Audit Threshold and Revises Other Sections of Circular A-133

.05 In the June 27, 2003, *Federal Register* (68 FR 38401) the OMB issued a revision to Circular A-133 that raises the threshold that triggers a single audit. Other revisions include a change to the threshold that determines whether an auditee is assigned a cognizant agency for audit versus an oversight agency for audit and related technical changes to facilitate that determination and to provide for federal agency reassignment of the oversight agency for audit.

.06 *Single audit threshold.* The Single Audit Act provides for the OMB director to review the single audit threshold every two years and increase it as appropriate. The new audit threshold requires all grantees that expend \$500,000 or more a year in federal awards to have an audit conducted in accordance with Circular A-133 (the former audit threshold amount was \$300,000). This increase will relieve approximately 6,000 entities from the audit requirements of Circular A-133 while retaining audit coverage for 99.5 percent of federal awards currently audited (in dollars). This change is effective for fiscal years ending after December 31, 2003, and early implementation is *not* permitted.

.07 *Cognizant agency threshold.* For auditees expending greater than \$25 million a year in federal awards, the cognizant agency for audit is the federal awarding agency that provides the predominant amount of direct funding to the auditee (unless the OMB makes a specific cognizant agency for audit assignment). An auditee that does not have a designated cognizant agency for audit has an oversight agency for audit. Paragraphs 2.29 through 2.32 of the Single Audit Guide describe the differences between the cognizant and oversight agency for audit in greater detail. The revision increases the cognizant agency for audit threshold from \$25 million to \$50 million. This will reduce the number of auditees assigned a cognizant agency for audit from approximately 1,000 to approximately 500. This change is effective for fiscal years ending after December 31, 2003, and early implementation is *not* permitted.

.08 *Other technical changes.* The revisions also contained two technical changes. First, Circular A-133 definitions have not specifically provided for the reassignment of oversight agency for audit. The revisions explicitly allow the reassignment of the oversight agency for audit by federal agencies similar to the provision in Circular A-133 that allows for the reassignment of the cognizant agency for audit. This provision is effective July 28, 2003. Second, the revisions make 2004 the base year for determining the cognizant agency for audit for 2006 through 2010. All fiscal year 2004 Circular A-133 reports are due to the Federal Audit Clearinghouse (FAC) on or before September 30, 2005. This will provide sufficient time for federal agencies to use the FAC database to produce a cognizant agency for audit listing for the 2006 through 2010 audit cognizance period at the start of 2006. You should note that the base year for 2001 through 2005 will remain at 2000.

Federal Grant Streamlining Program

.09 Work continues on the implementation of the Federal Financial Assistance Management Improvement Act of 1999 (P.L. 106-107). The purposes of P.L. 106-107 are to (1) improve the effectiveness and performance of federal financial assistance programs, (2) simplify federal financial assistance application and reporting requirements, (3) improve the delivery of services to the public, and (4) facilitate greater coordination among those responsible for delivering the services. Under joint leadership from the OMB and the Department of Health and Human Services, agencies are working together to make it easier for state, local, and tribal governments; universities; and not-for-profit organizations to administer federal grant programs. In addition to the final notice issued June 27, 2003, regarding Circular A-133 revisions (see the previous section of this Alert titled “OMB Raises Single Audit Threshold and Revises Other Sections of Circular A-133”), the OMB has issued other final notices and various proposals during the past year related to these efforts, and a brief description of each follows:

- A June 27, 2003, *Federal Register* (68 FR 38402) notice of final policy, titled *Use of a Universal Identifier by Grant Applicants*, establishes a standard means for tracking federal grant recipients throughout the entire grant life cycle. The notice requires each applicant to be uniquely identified and to register for a Dun and Bradstreet (D&B) Data Universal Numbering System (DUNS) number for use as the Universal Identifier needed to respond to federal agency grant or cooperative agreement announcements. The number must be provided for both paper and electronic applications submitted on or after October 1, 2003.
- A June 23, 2003, *Federal Register* (68 FR 37370) notice of final policy directive, titled *Office of Federal Financial Management Policy Directive on Financial Assistance Program Announcements*, establishes a standard format for federal agency announcements of funding opportunities under programs that award discretionary grants or cooperative agreements.
- A June 23, 2003, *Federal Register* (68 FR 37379) notice, titled *Standard Data Elements for Electronically Posting Synopses of Federal Agencies' Financial Assistance Program Announcements at Grants.gov FIND*, establishes the government-wide standard data elements for federal agency use in electronically posting synopses of discretionary grant and cooperative agreement funding opportunities.
- A June 23, 2003, *Federal Register* (68 FR 37385) notice of proposed policy guidance, titled *Government-Wide Guidance for Use of Grants.gov FIND To Post Funding Opportunity Announcement Synopses*, would require federal agencies to electronically post synopses of funding opportunities under federal financial assistance programs that award discretionary grants and cooperative agreements at www.FedGrants.gov.
- A June 6, 2003, *Federal Register* (68 FR 33883) proposal, titled *Government-Wide Guidance for Grants and Agreements*, would publish in a single title in the Code of Federal Regulations (CFR), OMB's guidance to federal agencies for grants and agreements (currently the guidance is located in seven separate OMB Circulars and other policy documents). This proposal would also create in the same new title of the CFR a subtitle in which federal agencies will collocate their regulations for the award and administration of grants and agreements.
- An April 8, 2003, *Federal Register* (68 FR 17090) proposal, titled *Standard Data Elements for Federal Grant Applications*, would, among other things, establish a standard set of data elements and definitions for federal agencies and grant applicants to use on both paper and electronic applications for discretionary grants.
- An August 12, 2002, *Federal Register* (67 FR 52558) proposal, titled *Cost Principles for Educational Institutions, for State, Local, and Indian Tribal Governments and for Non-Profit Organizations*, would revise three OMB Circulars (A-21, *Cost Principles for Educational Institutions*; A-87, *Cost Principles for State, Local and Indian Tribal Governments*; and A-122, *Cost Principles for Non-Profit Organizations*), to clarify ambiguous language. The three cost principle circulars apply to different types of recipient organizations and were developed separately. Consequently, different language is used in the three circulars

to describe similar cost items, sometimes causing inconsistent interpretations by federal staff, recipients, and auditors. The OMB is not intending to change the policy in any of the circulars.

- An August 12, 2002, *Federal Register* (67 FR 52547) notice, titled *Circular A-110, "Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations,"* describes OMB's decision not to revise OMB Circular A-110 to require that federal agencies offer grantees the option to request cash advances on a pooled basis.

.10 The proposal related to clarifying language in the three cost principles circulars (A-21, A-87, and A-122) is the most likely to have an implication on the single audit work that you do. A final rule is expected in the fall of 2003. Although the remaining notices and proposals included in the bulleted list above primarily affect your auditees as they go through the grant application process, brief descriptions have been included here because your auditees may ask for your assistance in helping them understand the many changes that are underway.

Help Desk—Check the "Current Document" section of the OMB Web site (www.omb.gov/grants) for updates on the status of the various proposals described in this section, as well as any new proposals that are issued.

Help America Vote Act

.11 In October, 2002, the Help America Vote Act (P.L. 107-252) was passed. The Act provides funds to states to, among other things, replace punch card voting systems; educate voters; and train election officials, poll workers, and election volunteers. Funds will be distributed to states that may in turn pass the funds through to local governments. Based on questions that were received, the OMB recently determined that the funds distributed under the Help America Vote Act are subject to the Single Audit Act. The General Services Administration recently assigned a *Catalog of Federal Domestic Assistance* (CFDA) number, 39.011, to its portion of the program. Over the next few months, the OMB will consider whether this program will be added to the 2004 update to the Supplement.

Help Desk—If your auditees receive funds under this program, you can advise them to check the CFDA on the Internet at www.cfda.gov/public/cat-whatshere.htm to obtain more information about the program. As the program itself is not in the 2003 Supplement, you should refer to the law, the CFDA, and Part 7 of the Supplement to determine the compliance requirements you should be concerned with if you have to audit this program as a major program. The law can be accessed at the Thomas legislative search Web site at frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=107_cong_public_laws&docid=f:publ252.107.pdf or via the Federal Election Commission's Web site at www.fec.gov/hava/hava.htm.

Health Insurance Portability and Accountability Act

.12 If you have visited your doctor's office recently, you have probably been introduced to some aspect of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). Effective April 14, 2003, it is probably the single most significant piece of federal legislation affecting the health care industry since the inception of the Medicare and Medicaid programs. While HIPAA has many facets, one of the key focuses is on the privacy of individually identifiable health information. While there are many HIPAA implications that affect you personally, there may also be implications for you if you perform single audits of health care entities (referred to as covered entities under the Act) subject to HIPAA. For example, if you are performing a single audit that involves the review of personal medical information, you are likely considered a "business associate" under HIPAA. A business associate is a person or entity who provides certain functions, activities, or services for or to a covered entity, involving the use and/or disclosure of protected health information (PHI). In allowing covered entities to provide PHI to business associates, HIPAA also requires those entities to get certain assurances from the business associates. Your firm or audit organization may have already been asked to sign a business associate agreement that asks you to agree, for example, that you will use the

PHI only for the purposes for which you were engaged and that you will safeguard the information from misuse. Before signing such an agreement, you may want to consult with your legal counsel and also ensure that you have established policies and procedures to allow your firm or organization to comply with the specific documentation requirements of the agreement, safeguarding of PHI, and monitoring the release of PHI when necessary.

Department of Education's eZ-Audit

.13 Under Circular A-133, not-for-profit and public institutions must submit their annual audits to the Federal Audit Clearinghouse (FAC), which in turn provides copies to the U.S. Department of Education (ED). In the May 16, 2003, *Federal Register* (68 FR 26586), the ED issued a notice implementing a new electronic process (eZ-Audit) for submitting compliance and financial statement audits. Beginning on June 16, 2003, institutions that participate, or seek to participate, in the federal student financial aid programs must submit their Circular A-133 audits directly to the ED through eZ-Audit. In addition to filing the compliance and financial audit in the form of a noneditable electronic PDF file, your auditees will also have to submit compliance audit data and summary financial data via an Internet Web form. You should note that this new electronic submission process does not alleviate the normal FAC submission requirements of Circular A-133. There is no required auditor association with the new electronic submission requirements. However, you may be asked to provide your auditees that are subject to the new eZ-Audit rules with an electronic version of your auditor's reports. Further, your auditees may engage you to assist them with the data entry of the information.

Help Desk—The ED has developed step-by-step guides for both not-for-profit and public institutions that contain an overview of the new process, information on how to register and obtain identification numbers and passwords, as well as other administrative and security procedures. You can find these guides on the ED Web site at <http://ifap.ed.gov/eannouncements/0328GuideUsingZAudit.html>.

Adherence to Professional Standards and Requirements

Auditor's Ethical Obligations to Follow Standards or Guidelines

.14 Be aware that AICPA Ethics Interpretation No. 501-3, "Failure to Follow Standards and/or Procedures or Other Requirements in Governmental Audits," of *Acts Discreditable* (AICPA, *Professional Standards*, vol. 2, ET sec. 501.04), states that when an auditor undertakes an audit of government grants or recipients of government monies and agrees to follow specified government audit standards, guides, procedures, statutes, rules, and regulations, he or she is obligated to follow these standards or guidelines in addition to generally accepted auditing standards (GAAS). Failure to do so discredits the profession and violates rule 501 of the AICPA Code of Professional Conduct, unless it is disclosed in the auditor's report that these rules were not followed and the reasons for doing so are given.

Results of AICPA Peer Reviews and Ethics Investigations

.15 Both the AICPA Peer Review Program and ethics investigations continue to indicate that there are problems in some of the single audits they are reviewing. Many are consistent with those reported in last year's Alert and include problems with the application of the risk-based approach to selecting major programs for testing, documentation issues, and noncompliance with various auditing standards and other requirements. Further, many are consistent with the findings of the federal OIGs (see the following section of this Alert titled "Federal OIG Quality Control Reviews"). A more complete description of deficiencies commonly noted on single audits during recent peer reviews and AICPA Professional Ethics Division investigations of CPA firms, as well as quality control reviews performed by federal OIGs, is included in Appendix B, "Common Engagement Deficiencies Noted in Peer Reviews, Ethics Investigations, and Federal OIG Quality Control Reviews," of this Alert.

Federal OIG Quality Control Reviews

.16 During the past year, federal OIGs continued performing quality control reviews (QCRs) at a brisk pace. The OIGs continue to note audit problems that include auditors' internal control and/or compliance testing and compliance with *Government Auditing Standards*. In order to provide an overall assessment of single audit quality, an interagency, interdisciplinary task force to be led by the U.S. Department of Education has been established. That task force will oversee a statistical sampling of single audits and the review of those audits selected. As of the date of this Alert, the task force is in its initial strategy phase, which includes looking at the methodology that might be used in selecting the statistical sample and how the reviews will be carried out. It is planned that 50 percent to 60 percent of the reviews of selected audits will be conducted by practitioners under contract by the federal government. However, the conduct of this project is subject to the approval of funding (it was included the president's proposed budget for federal fiscal year 2004). If this funding is approved on a timely basis, it is anticipated that the sample of audits will be selected during the latter part of 2003 and early 2004, with the actual reviews commencing in spring 2004. Once the reviews are completed, the task force will be drawing conclusions about the overall quality of single audit work performed based on the statistical sample of audits reviewed.

.17 A more complete description of deficiencies found by both federal OIGs and the AICPA is included in Appendix B, "Common Engagement Deficiencies Noted in Peer Reviews, Ethics Investigations, and Federal OIG Quality Control Reviews," of this Alert.

.18 Also, the FAC has recently prepared a report using its database of submitted single audits to highlight potential audit problems. As noted in Appendix B, one of the most common problems the AICPA and OIGs have found is that auditors have not been appropriately applying Circular A-133's "two-year lookback" rule (that is, a type A program should be audited as a major program in the current year if it has not been audited in at least one of the two most recent audit periods). Using an electronic means, the FAC has identified audits where it appears that a type A program should have been audited as a major program (because it was not audited as major in one of the previous two years) and has passed this information to the various OIGs affected for their follow-up.

Help Desk—The President's Council on Integrity and Efficiency (PCIE) has issued the *Uniform Guide for Initial Review of A-133 Audit Reports and the Uniform Quality Control Review Guide* for use by OIGs when performing desk reviews and quality control reviews. Both are available electronically on the Internet at www.ignet.gov/pande/audit/psingle.html. Before completing your Circular A-133 audits, consider reviewing the guides to gain an understanding of what the OIGs will be looking for in their reviews. Taking this step will help ensure that your engagements meet the criteria identified. You can also refer to chapter 3 of the Single Audit Guide for further discussion of the desk review and QCR processes.

Circular A-133 Audit Guidance Update

2003 Compliance Supplement Issued

.19 The OMB issued its 2003 Supplement in March. The 2003 Supplement includes information to help you understand the objectives, procedures, and compliance requirements of 160 federal programs. Part 7 of the Supplement, "Guidance for Auditing Programs Not Included in This Compliance Supplement," provides guidance to help you determine relevant compliance requirements, audit objectives, and suggested audit procedures for programs not included in the Supplement. Although the primary focus of the work on the 2003 Supplement was to update previously included federal programs, it does add four programs. The 2003 Supplement is effective for audits of fiscal years beginning after June 30, 2002, and supersedes the previous Supplement, which was issued in March 2002.

.20 Appendix V of the Supplement lists changes from the 2002 Supplement. Among the more significant changes, the 2003 Supplement includes the following:

- In Part 3, “Compliance Requirements,” the section titled “Allowable Costs Cost Principles” has been substantially rewritten to reflect a reorganization by individual cost principles circular (A-21, A-87, A-122). The section begins with general guidance on allowable costs, followed by specific compliance guidance for each of the three cost principles circulars. Further, there was a substantial rewrite of Exhibits 1 and 2 to combine them as a single exhibit, titled “Exhibit 1, Selected Items of Costs.” Twenty-seven selected items of costs were added to the new Exhibit 1.
- In the section titled “Eligibility,” in Part 3, the audit responsibility has been clarified when there are split eligibility determination functions. It also clarifies that required redeterminations of eligibility should be tested.
- In the section titled “Subrecipient Monitoring,” in Part 3, there has been a substantial rewrite to clarify compliance requirements, during-the-award monitoring, and suggested audit procedures.
- In Part 4, “Agency Program Requirements,” and Part 5, “Clusters of Programs,” there are revisions to the program requirements for many existing programs and program clusters for the effect of new laws and regulations or for other reasons.
- In Part 4, the section titled “Department of Education Cross-Cutting” and various education programs were updated for changes made by the No Child Left Behind Act of 2001 (P.L. 107-110).

Help Desk—You may purchase the 2003 Supplement from the Government Printing Office or download a free electronic copy from the OMB Web site, as discussed in the section of this Alert titled “References for Additional Guidance.” Further, the CFDA numbers for federal programs often change. You can obtain information about number changes in the CFDA’s list of current-year changes and in its Appendix VII, “Historical Profile of Catalog Programs,” which lists changes since 1965. The table of contents for the CFDA, which can take you to all sections of the CFDA, is on the Internet at www.cfda.gov/public/cats-whatshere.htm.

Data Collection Form Update

.21 The FAC collects information about Circular A-133 audits on a data collection form for entry into a database that is accessible through its Web site. You should be sure that you are using the appropriate version of the form. The OMB issued a revised form and accompanying instructions to report the results of Circular A-133 audits for fiscal periods ending on or after January 1, 2001. Audits covering fiscal period end dates before January 1, 2001, should continue to use the previous version of the data collection form (dated August 1997). Both versions of the form are available on the FAC Web site. You should also be aware that the FAC encourages you to complete your submission online via the FAC’s Internet data entry system (IDES). Even though you still have to submit a signed and dated hard copy of the form, the IDES runs your submission through an online edit check that increases the likelihood that your form will be accepted without errors. Currently the FAC is receiving approximately 70 percent of data collection forms through the IDES.

.22 Even with the online edit process, the FAC is still finding a few common errors in the forms that are submitted. A description of those problem areas follows.

.23 *Signing and dating the form.* The most common error that the FAC has noted is that the form is submitted without one or both of the signatures that are required (the auditor and auditee both must sign) or it is not dated. For the FAC to accept the form, it must have the appropriate signatures and date on it. You should remind your auditee to check this before submitting the hard copy form with the reporting package.

.24 *Federal program detail.* Certain details applicable to the federal programs identified on page 3 of the form are either missing or incorrect. The areas where problems have been noted include invalid CFDA prefixes are being entered, the research and development box either is left blank or two conflicting boxes are

checked, the box for types of compliance requirements either is left blank or an invalid type code is entered, and the finding reference number field is often left blank. You should take care to ensure that federal program information is filled in completely, is correct, and that it matches other information in the reporting package.

.25 Number of reporting packages to be submitted. The purpose of Part III, Item 9, of the form is to determine which federal agencies are required to receive the reporting package. The FAC is finding that some auditors are either not checking off all of the agencies that should be identified in this section or are entering an invalid agency. You should be sure that you identify all federal agencies that have current-year audit findings related to direct funding or prior audit findings (identified in the Summary Schedule of Prior Audit Findings) related to direct funding in this question. It is also important that the answer to this question be consistent with Part III, Item 10(f), of the form, which asks that direct awards be identified.

.26 Mathematical mistakes. The FAC has found that when it recalculates the total of the lines in Part III, Item 10(d), of the form under the column heading "Amount Expended," that total sometimes does match the total federal awards expended entered at the bottom of that column. You should recheck your math before submitting the form.

.27 Questions either left blank or multiple boxes checked. Part III, Items 2, 5, and 7, all require a "yes" or "no" answer. The FAC has found that some auditors are either checking both boxes, or leaving the entire question blank. Each question on the form must be completed with one answer for the FAC to accept the form.

.28 Form submitted separately from reporting package. The FAC periodically receives the reporting packages separate from the hard copy data collection form. While this is not technically a form error, it does delay the overall completion of the submission because the FAC needs both the form and the reporting package so certain information in the form can be verified against the package. The FAC encourages that the data collection form be submitted with the reporting packages in all cases.

.29 Finally, you should note that every three years, the OMB is charged with reviewing the form and updating it for any changes that are necessary. The current form was revised in 2001. The process is now underway for new form revisions, and you should expect to see a proposed revision to the form in the *Federal Register*, asking for your comments, sometime this summer. Next year's Alert will advise you of any changes that are made to the form.

Help Desk—You can complete and submit the data collection forms electronically at the FAC Web site at harvester.census.gov/sac. The data collection forms and related instructions also are available in portable document format (PDF) versions at the FAC Web site. You can obtain printed copies from the FAC by calling (888) 222-9907. When ordering printed copies by phone, note that the form number is SF-SAC and that you must indicate whether you need the current or previous form. You and the entities you audit are not permitted to create your own version of the forms.

Orange Book: Cognizant Agency Responsibilities

.30 Last issued in 1985, the *Federal Cognizant Agency Audit Organization Guidelines*, also known as the Orange Book, sets forth the responsibilities of the cognizant agencies for audit. It addresses areas such as technical advice and liaison, desk reviews of audit reports, reviews of audit organizations and their work, resolution of deficiencies noted during reviews, and processing audit reports. We reported in last year's Alert that the PCIE was expected to issue a revision to the Orange Book in late 2002. Since then, the issuance of the revision was postponed and is now expected to be issued sometime during the next year. When issued, the revision is expected to consider, among other things, the effects of the Single Audit Act Amendments of 1996 and Circular A-133. The revision also is expected to provide guidance to oversight agencies for audit as well as to the cognizant agencies.

Help Desk—When issued, the Orange Book should be available on IGnet, the Inspectors General's Web site, at www.ignet.gov. Consider reviewing the Orange Book to gain an understanding of the processes used by the Inspectors General and how they could affect your engagements.

Audit and Attestation Issues and Developments

Government Auditing Standards Developments

.31 Circular A-133 requires auditors to follow *Government Auditing Standards* (in addition to GAAS) when performing the financial statement audit portion of a single audit. For this reason, you should be aware of a number of recent revisions that have been made to *Government Auditing Standards*.

Independence

.32 In a GAAS audit, auditors must comply with the AICPA's independence rules included in the AICPA Code of Professional Conduct. For audits performed under *Government Auditing Standards*, auditors and audit organizations are subject to additional independence rules that are in some cases very similar to the AICPA independence rules and in other cases are more restrictive. Amendment No. 3, *Independence*, to *Government Auditing Standards* establishes the additional independence rules under *Government Auditing Standards*. The GAO also has issued a question and answer document titled *Answers to Independence Standard Questions*, which responds to questions related to the independence standard's implementation time frame, underlying concepts, and application in specific nonaudit circumstances. Amendment No. 3, as affected by *Government Auditing Standards: Answers to Independence Questions*, revises the independence standards in *Government Auditing Standards* for audits for periods beginning on or after January 1, 2003, with early implementation encouraged. The independence rules in *Government Auditing Standards* address when auditors and their organizations are independent from the organizations they audit by defining when personal, external, and organizational impairments to independence exist. If an audit organization is not independent, *Government Auditing Standards* states that the auditor should (1) decline to perform the work or (2) report the impairment in the scope section of the auditor's report when a government auditor cannot decline to perform the work because of a legislative requirement or for other reasons.

.33 *Government Auditing Standards* adopts an engagement-team focused approach to independence for matters such as financial interests of an individual auditor, not unlike the AICPA's Code of Professional Conduct. It also provides criteria for when governmental audit organizations are organizationally independent from the audited entity for purposes of external and internal reporting. *Government Auditing Standards* employs a principles-based approach to independence supplemented with certain safeguards for matters such as the performance of nonaudit services. With respect to nonaudit services, the *Government Auditing Standards* rules are generally more restrictive than the AICPA rules (see the discussion of recent proposed revisions to the AICPA rules in the section of this Alert titled "AICPA Ethics Developments." In planning the audit, the auditor should consider the effects of any nonaudit services performed on the auditor's independence for current, future, and planned audit services.

.34 To comply with the provisions governing non-audit services, audit organizations must meet two overarching principles. The first bars audit organizations from performing management functions or making management decisions for their auditees; the second prohibits audit organizations from auditing their own work or providing nonaudit services when the services are material or significant to the subject matter of the audit. If a non-audit service does not conflict with either principle, an audit organization may perform the service as long as it complies with each of the following safeguards (see paragraph 3.25 of Amendment No. 3 to *Government Auditing Standards* for a more detailed description of the safeguards):

- Personnel providing the nonaudit service cannot plan, conduct, or review audit work related to the nonaudit service. Audit and non-audit work must be performed by separate engagement teams. (When

an audit organization provides 40 or fewer hours of non-audit services related to a specific audit engagement, this safeguard requiring separate engagement teams is waived but the auditors must observe the two overarching principles and other safeguards described in this paragraph.)

- The scope and extent of audit work cannot be reduced beyond the level that would be appropriate if the nonaudit work were performed by an unrelated party.
- The audit organization should document its consideration of the nonaudit service, including its rationale that providing the service does not violate the two overarching principles.
- The audit organization should establish and document an understanding with management regarding the objectives, scope of work, and deliverables of the nonaudit service, including an understanding that management is responsible for the results of the service.
- The audit organization's quality control system should include policies and procedures that ensure consideration of the effect of the nonaudit service on ongoing, planned, and future audits.
- Where a nonaudit service is deemed to conflict with the audit (because the service violates one or both of the overarching principles), the audit organization should communicate to management—before beginning the non-audit service engagement—that it will be unable to perform subsequent audit work related to the subject matter of the non-audit service.
- For audits selected during peer review, the audit organization should identify to its peer reviewer all related non-audit services and provide all related audit documentation.

.35 *Government Auditing Standards* describe both non-audit services that are expressly prohibited and others that are permissible (as long as the auditor complies with the two overarching principles and all required safeguards noted above). The standards also state that audit organizations can perform routine activities for the audited entity and management without impairing their independence—provided the audit organization neither makes management decisions nor performs management functions. Such ordinary services do not violate the overarching principles and are not subject to the safeguards.

Overhaul to Remaining Sections of Government Auditing Standards

.36 The GAO issued a comprehensive revision to *Government Auditing Standards* on June 25, 2003. This is the fourth revision of the overall standards since they were first issued in 1972. This revision of the standards supersedes the 1994 revision, including Amendments No. 1 through 3 (note that the content of these Amendments was incorporated into the revision).

.37 The revision affects all chapters of the Yellow Book, including those relating to both financial and performance audits. Among other things, the proposed changes are intended to clarify the types of audits and services that are performed under the Yellow Book, strengthen and streamline certain provisions of it, and improve understandability of the standards. The revisions are effective for financial audits and attestation engagements of periods ending on or after January 1, 2004, and for performance audits beginning on or after January 1, 2004. Early application is permissible. Some of the more significant changes are that the revision:

- Adds a new chapter on attestation engagements that includes additional field work and reporting standards over and above what would be required under the AICPA's attestation standards.
- Requires that auditors collectively possess the technical knowledge, skills, and experience necessary to be competent for the type of work being performed before beginning the work on the assignment.
- Clarifies that the 80 hours of continuing professional education and training that is required under the Yellow Book every two years should directly enhance the auditor's professional proficiency to perform audits and/or attestation engagements. During the next year, the GAO is expected to modify its existing *Interpretation of Continuing Education and Training Requirements—Government Auditing Standards* (see

related discussion in the section of this Alert titled, “References for Additional Guidance”) to more specifically address this new clarification and whether certain courses (for example, those related to taxation) would count toward the 80 hour requirement.

- For financial statement audits, adds a requirement for auditors to be alert to situations or transactions that could indicate abuse, and if indications of abuse exist that could significantly affect the financial statement amounts or other financial data, to apply auditing procedures specifically directed to ascertaining whether abuse has occurred and the effect on the financial statement amounts or other financial data.

Help Desk—You can obtain the new 2003 version of Government Auditing Standards (which includes the independence requirements from Amendment No. 3), the independence question and answer document, and a summary of the significant changes made since the 1994 revision of the standards from the GAO Web site at www.gao.gov/govaud/ybk01.htm.

Recently Issued AICPA Auditing and Attestation Standards

.38 During the last year the AICPA’s Auditing Standards Board (ASB) has issued the following auditing and attestation standards. Although some do not specifically address issues associated with your single audits, you should still be aware of them as they could affect the work you do on the financial statement portion of the single audit. The standards are identified by title below. Only those that might have some impact on your single audit are described in more detail. You can look to the *Audit Risk Alerts State and Local Government Developments—2003* [AAM section 8070] and *Not-for-Profit Organizations—2003* [AAM section 8120] for further discussion of the financial statement audit implications of these standards.

- Statement on Auditing Standards (SAS) No. 98, *Omnibus Statement on Auditing Standards—2002*. With the exception of the effective date of the portions of this standard that amend SAS No. 70, *Service Organizations* (AICPA, *Professional Standards*, vol. 1, AU sec. 324), as amended, and rescind Auditing Interpretation No. 6, “Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events in a Service Auditor’s Engagement,” of SAS No. 70 (AU sec. 9324.40–.42) (effective for reports issued on or after January 1, 2003), all amendments were effective when SAS No. 98 was issued. One change that you should be aware of as a result of this standard is an amendment to SAS No. 8, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1, AU sec. 550.07). It clarifies that if supplementary or other information has been subjected to the auditing procedures applied in the audit of the basic financial statements, the auditor may express an opinion on whether such information is fairly stated in all material respects, in relation to the basic financial statements taken as a whole. It also describes, in more detail, the auditor’s reporting on the information and that the auditor should use the guidance provided in SAS No. 29, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1, AU sec. 551.12 and .14), as amended. While such “in relation to” reporting has been common practice in the single audit arena (that is, the auditor reports on the schedule of expenditure of federal awards in relation to the financial statements taken as a whole), the auditing standards never clearly addressed whether such reporting was permissible when the information was included in a client-prepared document. SAS No. 98 clarifies this issue.
- SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316). This SAS is effective for audits of financial statements for periods beginning on or after December 15, 2002, with early application permissible. You should note that this new standard is written from a financial statement audit perspective. That is, it provides standards and guidance to the auditor in fulfilling his or her responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement whether due to error or fraud.
- SAS No. 100, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722). It is effective for interim periods within fiscal years beginning after December 15, 2002, with earlier application permitted.

- SAS No. 101, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1, AU sec. 328). It is effective for audits of financial statements for periods beginning on or after June 15, 2003, with earlier application permitted.
- Statement on Standards for Attestation Engagements (SSAE) No. 12, *Amendment to Statement on Standards for Attestation Engagements No. 10*, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101). This omnibus standard makes changes to the attestation standards, where applicable, that are consistent with those made to the auditing standards via SAS No. 98.

.39 However, you should also note that the Audit Guide *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*, states that as part of assessing audit risk in a single or program-specific audit, the auditor should specifically assess the risk of material noncompliance with a major program's compliance requirements occurring due to fraud. The auditor must then consider that assessment in designing the audit procedures to be performed. Although SAS No. 99 applies only to an audit of financial statements (that is, its requirements do not apply to a compliance audit), you may want to consider the guidance set forth therein when planning and performing your audit of an auditee's compliance with specified requirements applicable to its major programs. Additionally, you may wish to refer to the AICPA Practice Aid titled *Fraud Detection in a GAAS Audit—SAS No. 99 Implementation Guide*, which identifies example risk factors that relate to recipients of federal awards.

- SAS No. 100, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1, AU sec. 722). It is effective for interim periods within fiscal years beginning after December 15, 2002, with earlier application permitted.
- SAS No. 101, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1, AU sec. 328). It is effective for audits of financial statements for periods beginning on or after June 15, 2003, with earlier application permitted.
- Statement on Standards for Attestation Engagements (SSAE) No. 12, *Amendment to Statement on Standards for Attestation Engagements No. 10*, *Attestation Standards: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 101). This omnibus standard makes changes to the attestation standards, where applicable, that are consistent with those made to the auditing standards via SAS No. 98.

Proposed AICPA Auditing and Attestation Standards

.40 The ASB has released several exposure drafts that will primarily affect the financial statement audit portion of your single audit. The proposals are identified here by title. Only those that might have some impact on your single audit are described in more detail.

- *Proposed SAS related to audit risk.* The ASB released seven proposed SASs related to the audit risk assessment process to change audit practice to result in more efficient audits. The primary objective of the proposed SASs is to enhance auditors' application of the audit risk model. The proposed SASs are:
 - *Amendment to SAS No. 95, Generally Accepted Auditing Standards*
 - *Audit Evidence* (which would supersede SAS No. 31 of the same name [AICPA, *Professional Standards*, vol. 1, AU sec. 326])
 - *Audit Risk and Materiality in Conducting an Audit* (which would supersede SAS No. 47 of the same name [AICPA, *Professional Standards*, vol. 1, AU sec. 312])
 - *Planning and Supervision* (which would supersede SAS No. 22 of the same name [AICPA, *Professional Standards*, vol. 1, AU sec. 311])
 - New SASs titled *Understanding the Entity and Its Environment and Assessing the Risk of Material Misstatement* and *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (which together would supersede SAS No. 45, *Substantive Tests Prior to the Balance-Sheet Date* [AICPA, *Professional Standards*, vol. 1, AU secs. 313 and 334], and SAS No. 55,

Consideration of Internal Control in a Financial Statement Audit [AICPA, *Professional Standards*, vol. 1, AU sec. 319])

— An amendment to SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350)

- *Proposed SAS, Sarbanes-Oxley Omnibus.* Although many of the revisions in this proposal would only apply to Securities and Exchange Commission (SEC) engagements, there are a few proposed changes that could affect your single audits. For example, the statement would amend SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), as amended, to establish a definition of an audit committee and to revise certain existing communication requirements or add new requirements.
- Proposed SASs titled *Auditing an Entity's Internal Control Over Financial Reporting in Conjunction With Financial Statement Audit* and *Amendment to SAS No. 100, Interim Financial Reporting*; proposed SSAE titled *Reporting on an Entity's Internal Control Over Financial Reporting*.
- Proposed SAS titled *Communication of Internal Control Related Matters Noted in an Audit*, which would supersede SAS No. 60 (AICPA, *Professional Standards*, vol. 1, AU sec. 325), of the same name. One result of this proposed standard is that the term *reportable condition* would be replaced by the term *significant deficiency* to comply with the SEC's terminology. If the standards are finalized as proposed, this would result in possible future report wording changes to your single audit reports (for example, in the reporting required under *Government Auditing Standards* and Circular A-133).

Help Desk—For information about the current status of these proposed standards, go to the AICPA Web site at www.aicpa.org/members/div/auditstd/drafts.htm.

Issuance of New AICPA Audit Guide for Performing OMB Circular A-133 Audits

.41 This new Audit Guide titled *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards* (the Single Audit Guide) is the former Statement of Position (SOP) 98-3 of the same name. Until this year, that guidance had been included as an SOP in an appendix to both the GASB 34 and Non-GASB 34 editions of the AICPA's state and local government Audit and Accounting Guides and in the not-for-profit organizations Audit and Accounting Guide. The AICPA ASB decided to convert the SOP into an AICPA Audit Guide because the content and guidance in the SOP are more similar to that which would be included in an Audit Guide and also to make it more clear that, like other AICPA Audit Guides, it is updated each year for conforming changes. The new Guide does not supersede the guidance that appeared in SOP 98-3 but rather changes its format from an SOP to an Audit Guide. It is now one of the AICPA's primary sources of authoritative guidance for performing audits under the Single Audit Act, Circular A-133, and *Government Auditing Standards*.

.42 Under SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150), both an Audit Guide and an SOP are considered Interpretive Publications. Interpretive Publications are recommendations on the application of SASs in specific circumstances, including engagements for entities in specialized industries. If you do not apply the auditing guidance included in an applicable Interpretive Publication, you should be prepared to explain how you complied with the SAS provisions addressed by such auditing guidance.

.43 Each year since 1998, AICPA staff has updated the SOP and, in its new form as a separate Guide, this year is no different. Updates for this Guide include conforming changes related to recent auditing standards and other changes in guidance, for example, changes resulting from recently adopted Amendment No. 3, "Independence," to *Government Auditing Standards* and the AICPA's Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition). Also, the illustrative *Government Auditing Standards* and Circular A-133 reporting included in Appendix D of the Single Audit Guide has been updated to reflect wording changes that would be necessary for audits performed using the provisions of the recently issued Audit and Accounting Guide *Audits of State and Local Governments* (GASB 34 Edition).

Help Desk—The product number for the Audit Guide *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*, is 0012743kk. To place your order for this Guide, you can call AICPA Member Services at (888) 777-7077. Also see the “References for Additional Guidance” section later in this Alert.

AICPA Ethics Developments

Revision of Interpretation 101-10

.44 Ethics Interpretation No. 101-10, “The Effect on Independence of Relationships With Entities Included in the Governmental Financial Statements,” of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.12), discusses the effect on an auditor’s independence of relationships with entities included in governmental financial statements. The AICPA issued a revision of this Interpretation (effective March 2003) that reflects new wording related to changes resulting from issuance of GASB Statement No. 34. In addition, certain changes were made to the Interpretation to conform it to the AICPA’s new independence rules that were issued in November 2001 (that is, engagement-team focused approach to independence). Finally, the revision changes the focus of the Interpretation, which had been based on the commercial model concept of *financial control* to an *accountability* focus, which is more consistent with the government reporting model.

Help Desk—You can find the revision to the Interpretation in the March 2003 issue of the AICPA’s Journal of Accountancy. You can access the Journal’s Web site at www.aicpa.org/pubs/jofa/joahome.htm.

Revisions to Rule 101—Independence for Nonattest Services

.45 In June 2003, the AICPA’s Professional Ethics Executive Committee issued revisions to Interpretation No. 101-3, “Performance of Other Services,” of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05), and deleted Interpretation No. 101-13, “Extended Audit Services,” of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.15), and related *Ethics Rulings*. In the area of nonattest services, the Committee adopted several new requirements, including those that would require members to:

- Comply with regulations of certain regulatory bodies (such as the state boards of accountancy, the SEC, and the GAO) when performing services for attest clients that are governed by such regulators’ independence rules
- Assess the client’s willingness and ability to oversee permitted nonattest services
- Document various aspects of the permitted nonattest services engagement before performing nonattest services

In addition, the committee adopted more restrictive rules for certain services:

- Performing appraisal, valuation, and actuarial services would impair independence if the results of the service will be material to the client’s financial statements and if the services involve a significant degree of subjectivity.
- Performing certain financial information systems design and implementation services would impair independence in certain circumstances.

.46 The committee also clarified existing rules for bookkeeping and internal audit assistance services and proposed an increase in the allowable balance that individuals subject to independence restrictions could have through credit cards and cash advance accounts.

.47 The rule revisions generally become effective on December 31, 2003; however, there is also transitional effective date guidance included in the revised Interpretation. Independence would not be impaired as a result

of the more restrictive requirements of Interpretation No. 101-3, provided the provision of any such nonattest services are pursuant to arrangements in existence on December 31, 2003, and are completed by December 31, 2004, and the member was in compliance with the preexisting requirements of the Interpretation.

Help Desk—To access related information, go to the AICPA Web site at www.aicpa.org/download/ethics/interp_revisions_jun03.pdf.

Reissuing Single Audit Reports

.48 As noted in the section of this Alert titled “Adherence to Professional Standards and Requirements,” the federal OIGs have been very active in performing quality control reviews. In some cases where problems have been noted by the OIGs, there has been a need for the auditor to perform additional test work or to revise the schedule of expenditures of federal awards (SEFA). Auditors have been asking about the appropriate actions to take with regard to the auditor’s single audit reporting once such problems arise. If you find yourself in this circumstance, you should first look to SAS No. 1, section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor’s Report* (AICPA, *Professional Standards*, vol. 1, AU sec. 561). The following discussion might also be of assistance.

.49 If an error is found that results in the addition of a major program (for example, because the type A program threshold changes due to missing programs in the SEFA resulting in a new major program or because a type A program that should have been a major program because it had not been tested in the previous two years was overlooked), you will need to perform the appropriate testing on the new major program. It will then be necessary to reissue your Circular A-133 reporting with a dual date that references the new program. Your report wording might remain the same (for example, if your previous report was unqualified and your opinion on the additional major program is also unqualified) or need to be revised (for example, if your previous report was unqualified and your opinion on the additional major program is qualified) depending on the results of the procedures you perform on the new major program. You should also revise the schedule of findings and questioned costs to reflect the additional major program and to include any additional findings and questioned costs that result from your testing. You should also consider modifying the title of the schedule to indicate that it has been restated. Finally, if the SEFA previously identified major programs and a change needs to be made due to the new major program, your reporting on the SEFA will need to be reissued. See the following paragraph for further discussion on the SEFA reporting.

.50 If you are in a situation where the SEFA needs to be restated (for example, because a program needs to be added or deleted or a program expenditure amount needs to be revised), you have several considerations. If your reporting on the SEFA had previously been included in the report on the financial statements, you may want to consider reissuing your financial statement report (using the original date) and issuing a new separate in-relation-to opinion on the SEFA that carries a dual date. If your reporting on the SEFA had previously been included in your Circular A-133 reporting, you could reissue that report, including the reporting on the SEFA, with a dual date. Finally, if you had issued a separate SEFA report to begin with, you could reissue that report with a dual date. In all cases, the dual dated report should refer to a new footnote to the SEFA (that should be added by your client) explaining the restatement.

.51 In either of the above scenarios, it is not likely that your *Government Auditing Standards* reporting would be affected. That is because the Yellow Book report relates to your audit of the financial statements. However, if you have to audit a new major program and find noncompliance that would be direct and material to the financial statements, you would follow the guidance in SAS No. 46, *Consideration of Omitted Procedures After the Report Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 390).

.52 In a few cases, the OIGs have not been satisfied with the amount of test work that has been performed by the auditor in a single audit and have asked the auditor to perform additional procedures. You should refer to the guidance in SAS No. 46 for additional guidance if you find yourself in this situation.

.53 Finally, if as a result of any of the scenarios described above, changes are needed to the data collection form and reporting packages that have already been submitted to the FAC, you should follow the instructions for “Paper Submission” revision at the FAC Web site at harvester.census.gov/sac/collect/revisions_Main.html. All resubmissions to the FAC (of either a revised form or reporting package) must be accompanied by a newly signed data collection form.

The best times to call are 8:30 a.m. to 11:30 a.m. and 2:00 p.m. to 7:30 p.m., Eastern Standard Time. Also, visit the CPA2Biz Web site at www.cpa2biz.com to obtain product information and place online orders.

Publications

.56 The following AICPA publications may be of interest to auditors of entities that receive federal funding.

- *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards*—This Audit Guide (previously issued as SOP 98-3 of the same name—see the section of this Alert titled “Issuance of New AICPA Guide for Performing OMB Circular A-133 Audits”) provides guidance on the auditor’s responsibilities when conducting a single audit or program-specific audit. It is updated annually for conforming changes (product no. 0012743kk).
- *AICPA Professional Standards*—These include SASs and related Interpretations, Statements on Standards for Attestation Engagements, and the AICPA Code of Professional Conduct, among other things (product no. 005103kk).
- *Audits of State and Local Governments (GASB 34 Edition)*—This Audit and Accounting Guide presents guidance on the application of GAAS to audits of financial statements of state and local governments (product no. 012663kk).
- *Audits of State and Local Governmental Units (Non-GASB 34 Edition)*—This Audit and Accounting Guide presents guidance on the application of GAAS to audits of financial statements of state and local governments (product no. 012563kk).
- *Health Care Organizations*—This Audit and Accounting Guide presents guidance on the application of GAAS to audits of financial statements of health care organizations (product no. 012613kk).
- *Not-for-Profit Organizations*—This Audit and Accounting Guide presents guidance on the application of GAAS to audits of financial statements of not-for-profit organizations (product no. 012643kk).

- *Checklists and Illustrative Financial Statements for State and Local Governments (Non-GASB 34 Edition and GASB 34 Edition)*—Updated annually, this publication provides checklists and illustrations of financial statements, note disclosures, and auditors' reports, including reports in accordance with *Government Auditing Standards* and the Single Audit Act. Note: This volume includes both the non-GASB 34 and GASB 34 editions of the checklists in one handy binder (product no. 009033kk).
- *Audit and Accounting Manual* (product no. 005133kk)—Updated annually, this publication has an extensive section of internal control questionnaires and audit programs for audits of governmental entities, including audits in accordance with the Single Audit Act.

Continuing Professional Education Courses

.57 The AICPA offers continuing professional education (CPE) related to single audits in the form of both group-study and self-study courses, and in print and video format.

.58 Group-study courses include the following:

- Advanced Auditing of HUD-Assisted Projects
- Applying A-133 to Nonprofit and Governmental Organizations
- Audits of HUD-Assisted Projects
- Governmental Accounting and Auditing Update
- Governmental and Nonprofit Annual Update
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations
- Workpaper Preparation Techniques for Government and Nonprofit Organizations
- The Revised Yellow Book: *Government Auditing Standards*

.59 Self-study courses include the following:

- Advanced Auditing of HUD-Assisted Projects (product no. 730188kk)
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 730198kk)
- Audits of HUD-Assisted Projects (product no. 730293kk)
- Governmental Accounting and Auditing Update (product no. 736472kk)
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations (product no. 734406kk)
- Workpaper Preparation Techniques for Government and Nonprofit Organizations (product no. 732631kk)
- The Revised Yellow Book: *Government Auditing Standards* (product no. 736111kk)

.60 The AICPA also offers the following video courses:

- Governmental Accounting and Auditing Update (product no. 186476kk)
- The Revised Yellow Book: *Government Auditing Standards* (product no. 734406kk)
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 187200kk)

.61 Information on these and other AICPA government and not-for-profit auditing courses is available at www.cpa2biz.com or by calling (888) 777-7077.

Online CPE

.62 AICPA InfoBytes, offered exclusively through CPA2Biz.com, is the AICPA's flagship online learning product. Selected as one of *Accounting Today's* top 100 products for 2003, AICPA InfoBytes now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay \$149 (nonmember, \$369) for a new subscription and \$119 (nonmembers, \$319) for the annual renewal. Divided into 1- and 2-credit courses that are available 24/7, AICPA InfoBytes offers hundreds of hours of learning in a wide variety of topics. Governmental topics include the Yellow Book, Circular A-133 auditing, GASB Statement No. 34, HUD, industry updates, and other pertinent issues. To register or learn more, visit www.cpa2biz.com/infobytes.

Industry Conference and Training Program

.63 The AICPA will hold its 20th annual National Governmental Accounting and Auditing Update Conference on August 25–27, in Washington, DC, and again on September 21–23, 2003, in Tempe, AZ. This conference is designed for practitioners; officials working in federal, state, or local governmental finance and accounting; and recipients of federal awards. It is the premier forum for the discussion of important governmental accounting and auditing developments. Participants will receive updates on current issues, practical advice, and timely guidance on recent developments from experts.

.64 The AICPA also offers an annual training program called the National Governmental and Not-for-Profit Training Program. This year's program will be held on October 19–22, in Baltimore, MD. This program is designed for practitioners or accountants, auditors, and other staff in government who want in-depth, hands-on training in government accounting and auditing.

.65 For more information about the conference or the training program, please contact the Customer Service Center at (888) 777-7077 or the Web site for cpa2biz at www.cpa2biz.com.

Accounting and Auditing Technical Hotline

.66 The Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077 or go to the AICPA's Web site at www.aicpa.org.

Ethics Hotline

.67 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Fax Hotline

.68 The AICPA has a 24-hour fax system that enables interested persons to obtain information that includes, for example, current AICPA comment letters, conference brochures and registration forms, CPE information, AcSEC actions, and legislative news. To access the hotline, dial (201) 938-3787 from a fax machine and follow the voice cues.

Federal Agencies—Administrative Regulations

.69 Most federal agencies issue general administrative regulations that apply to their programs and that provide general rules on how to apply for grants and contracts, how grants are made, the general conditions that apply to and the administrative responsibilities of grantees and contractors, and the compliance procedures used by the various agencies. Those regulations are included in the *Code of Federal Regulations*.

.70 In 1988, a final rule, *Uniform Administrative Requirements for Grants and Cooperative Agreements With State and Local Governments*, was published, establishing a common rule to create consistency and uniformity among federal agencies in the administration of grants to and cooperative agreements with state, local, and federally recognized Indian tribal governments. The common rule has been codified in each federal agency's portion of the *Code of Federal Regulations*.

General Accounting Office

.71 The GAO home page, on the Internet at www.gao.gov, contains links to the hundreds of reports and testimony to Congress each year on a variety of subjects, including accounting, budgeting, and financial management. Hard copies of GAO reports and testimony can be obtained from the GAO, P.O. Box 37050, Washington, DC 20013; phone (202) 512-6000; fax (202) 512-6061; or www.gao.gov/cgi-bin/ordtab.pl.

.72 The GAO's Web site is updated daily and also includes Comptroller General decisions and legal opinions, GAO policy documents, and special publications. You may subscribe to GAO daily electronic alerts using the form at www.gao.gov/subtest/subscribe.html.

.73 The following publications are available on the GAO Web site at www.gao.gov/govaud/ybk01.htm. The first three publications also are available through the Superintendent of Documents, U.S. Government Printing Office (GPO), P.O. Box 371954, Pittsburgh, PA 15250-7954; phone (202) 512-1800; fax (202) 512-2250; or bookstore.gpo.gov/index.html.

- *Government Auditing Standards, 2003 Revision* relates to financial and performance audits of governmental organizations, programs, activities, and functions, and of governmental funds received by contractors, nonprofit organizations, and other nongovernmental organizations. All previous amendments to the previous 1994 Revision of the Yellow Book (that is, Amendments No. 1 through No. 3) have been incorporated into the 2003 Revision. As of the date of this Alert, the 2003 Revision was available electronically only on the GAO Web site. Details on ordering a hard copy print version will be placed on the GAO Web site once the print version is available.
- *Government Auditing Standards: Answers to Independence Questions* responds to questions related to the Yellow Book independence standard's implementation time frame, underlying concepts, and application in specific nonaudit circumstances.
- *Interpretation of Continuing Education and Training Requirements—Government Auditing Standards* establishes specific CPE requirements for auditors working on audits performed in accordance with those standards. This Interpretation guides audit organizations and individual auditors on implementing the CPE requirements by answering the most frequently asked questions from the audit community. As noted in the section of this Alert titled "*Government Auditing Standards Developments*," the GAO is expected to revise this Interpretation during the upcoming year.

Office of Management and Budget

Circulars

.74 The OMB issues cost and grants management circulars to establish uniform policies and rules to be observed by federal agencies for the administration of federal grants. Federal agencies then adopt these circulars in their regulations. The process for issuing circulars includes due process, with a notice of any proposed changes in the *Federal Register*, a comment period, and careful consideration of all responses before issuance of final circulars. The following table includes a list of circulars relevant to single audits. Copies of these circulars are available under the grants management section of the OMB Web site at www.omb.gov/grants.

OMB Circulars Relevant to Single Audits

<i>Circular Number</i>	<i>Title</i>	<i>Issue Date</i>
A-21 (Revised)	<i>Cost Principles for Educational Institutions</i>	August 2000
A-87 (Revised)	<i>Cost Principles for State, Local, and Indian Tribal Governments</i>	August 1997
A-102 (Revised)	<i>Grants and Cooperative Agreements With State and Local Governments</i>	August 1997
A-110 (Revised)	<i>Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations</i>	September 1999
A-122 (Revised)	<i>Cost Principles for Non-Profit Organizations</i>	May 1998
A-133 (Revised)	<i>Audits of States, Local Governments, and Nonprofit Organizations</i>	June 2003

OMB Circular A-133 Compliance Supplement

.75 The Supplement (Appendix B in OMB Circular A-133) sets forth the major federal compliance requirements to consider in a Circular A-133 audit of states, local governments, and not-for-profit organizations that receive federal assistance. You can find the 2003 Supplement (and the preceding 2002 and 2001 Supplements) on the OMB's Web site at the grants management address, www.omb.gov/grants. You may purchase a printed copy (product no. 041-001-00593-5) of the 2003 Supplement from the Government Printing Office at (202) 512-1800.

Other Guidance

.76 Standard forms prescribed by OMB's grants management circulars can be obtained on the grants management section of OMB's Web site (see the previous section of this Alert). The data collection form (Form SF-SAC), which is required to be completed for all Circular A-133 audits, can be completed online at the Federal Audit Clearinghouse Web site at harvester.census.gov/sac. That site also has PDF versions of the data collection form.

.77 The *Catalog of Federal Domestic Assistance* (CFDA) is a government-wide compendium of federal programs, projects, services, and activities that provide assistance or benefits to the public. Program information provided by the CFDA includes authorizing legislation and audit requirements. The General Services Administration (GSA) is responsible for the dissemination of federal domestic assistance information through the catalog and maintains the information database from which program information is obtained. A searchable version of the CFDA is located at www.cfda.gov.

.78 The GSA also makes copies of the CFDA available to certain specified national, state, and local government offices. You can locate those depositories through the GSA Web site at www.gsa.gov. The CFDA also may be purchased from the GPO by calling (202) 512-1800 or through the online bookstore at www.gpo.gov.

PCIE Audit Committee Guidance

.79 The PCIE Audit Committee publishes supplemental, nonauthoritative guidance for federal officials addressing issues arising from the implementation of the Single Audit Act and related OMB Circulars.

.80 Over the years, the PCIE Audit Committee (or its predecessors) has issued a total of six position statements. Most of these position statements are no longer applicable because they were originally developed to address issues related to audits conducted under the Single Audit Act of 1984, Circular A-128, *Audits of State and Local Governments*, and the March 1990 version of Circular A-133.

.81 Note that the PCIE Audit Committee also is responsible for developing nonfederal audit review guidelines in the form of a desk review guide and a quality control review guide. Those guides, which have been updated for the Single Audit Act Amendments of 1996 and the June 1997 revision to Circular A-133, are available at the Inspectors General Web site (www.ignet.gov/pande/audit/mains.html) in the Single Audit Library.

This Audit Risk Alert replaces *Single Audits—2002, Audits of Organizations Receiving Federal Awards: Single Audits Performed in Accordance With Office of Management and Budget Circular A-133*.

.82 The *Single Audits* Audit Risk Alert is published annually. As you encounter audit and industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be greatly appreciated. You may e-mail these comments to mfoelster@aicpa.org or write to:

Mary McKnight Foelster
AICPA
Professional Standards and Services
1455 Pennsylvania Avenue, NW
Washington, DC 20004-1081

.83 We also suggest that you review the AICPA *Audit Risk Alert* [AAM section 8010], which is a general update on economic, auditing, accounting, and other professional developments, and the Audit Risk Alerts *State and Local Governmental Developments* [AAM section 8070] and *Not-for-Profit Organizations* [AAM section 8120], which discuss industry-specific financial statement audit considerations. Although not specifically geared toward single audits, these publications might be relevant and valuable to consider in your single audit engagements.

Appendix A

Overview of Key Components of a Single Audit

Each year, the federal government awards billions of dollars to state and local governments and not-for-profit organizations (NPOs). Last year alone, the federal government issued approximately \$400 billion in awards to these entities. These awards include grants, loans, loan guarantees, property, cooperative agreements, interest subsidies, insurance, food commodities, and direct appropriations and federal cost reimbursements. Entities that receive federal funds are subject to audit requirements that are commonly referred to as *single audits*.

Among other things, the Single Audit Act Amendments of 1996 (the Single Audit Act) (Public Law [P.L.]104-156) is intended to promote sound financial management, including effective internal control, with respect to federal awards administered by state and local governments and NPOs. Each year, over 35,000 single audits are performed. Under Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133), those governments or organizations that expend \$300,000 or more in federal awards during the fiscal year must do the following (see the section of this Alert titled “OMB Raises Single Audit Threshold and Revises Other Sections of Circular A-133” for a discussion of recent revisions to the \$300,000 threshold):

1. Maintain internal control for federal programs.
2. Comply with the laws, regulations, and the provisions of contracts or grant agreements.
3. Prepare appropriate financial statements, including the schedule of expenditures of federal awards (SEFA).
4. Ensure that the required single audits are properly performed and submitted when due.
5. Follow up and take corrective actions on audit findings.

Single Audit Objectives

Under Circular A-133, the auditor has additional testing and reporting responsibilities for compliance, as well as internal control over compliance, beyond a financial statement audit performed in accordance with *Government Auditing Standards* and generally accepted auditing standards (GAAS). A single audit has two main objectives:

1. An audit of the entity’s financial statements and the reporting on the SEFA in relation to those financial statements
2. A compliance audit of federal awards expended during the fiscal year (This compliance audit provides a basis for issuing an additional report on compliance related to major programs and on internal control over compliance.)

With regard to compliance, the auditor is required to determine whether the entity complied with laws, regulations, and the provisions of contracts or grant agreements pertaining to federal awards that have a direct and material effect on each major program. The auditor is required to express an opinion on whether the entity complied with laws, regulations, and the provisions of contracts or grant agreements that could have a direct and material effect on each major program. Where applicable, the auditor is also required to refer to a separate schedule of findings and questioned costs.

With regard to internal control over compliance, the auditor is required to do the following, in addition to the requirements of *Government Auditing Standards*:

- Perform procedures to obtain an understanding of internal control over federal programs that is sufficient to plan the audit to support a low assessed level of control risk for major programs.
- Plan the testing of internal control over major programs to support a low assessed level of control risk for the assertions relevant to the compliance requirements for each major program.
- Perform tests of internal control (unless the internal control is likely to be ineffective in preventing or detecting noncompliance).

Single Audit Guidance

The primary sources of AICPA audit standards and guidance regarding single audits are Statement on Auditing Standards (SAS) No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), and the AICPA Audit Guide *Audits of States, Local Governments, and Not-for-Profit Organizations Receiving Federal Awards* (the Single Audit Guide). The Single Audit Guide provides guidance on the auditor's responsibilities when conducting a single audit or program-specific audit in accordance with the Single Audit Act and Circular A-133.

Circular A-133 provides for the issuance of a compliance supplement to assist auditors in planning and performing the required audits. The OMB Circular A-133 *Compliance Supplement* (the Supplement) identifies important compliance requirements that the federal government expects to be considered as part of an audit in accordance with the Single Audit Act and Circular A-133. Use of the Supplement is mandatory.

The Supplement is updated annually and contains specific audit guidance relating to individual federal programs. The Supplement provides a source of information for auditors to understand federal program objectives, procedures, and compliance requirements, as well as audit objectives and suggested audit procedures for determining compliance with these requirements. See the discussion of the 2003 Supplement in the section of this Alert titled "Circular A-133 Audit Guidance Update."

Federal Audit Clearinghouse: Role and Responsibilities

The Federal Audit Clearinghouse (FAC), the organization the OMB designated to receive single audit reports from federal award recipients, received about 38,200 single audit reports with a fiscal year end date in 2001. About 7,200, or approximately 19 percent, of these reports contained audit findings.

The FAC processes incoming reporting packages and related data collection forms, maintains a government-wide database of audits, distributes reports with audit findings to individual federal agencies for audit resolution, and maintains an archival copy of all reports. The FAC provides an efficient and effective method of (1) processing, distributing, and archiving single audit reports; (2) monitoring recipients' compliance with requirements to submit reports required by the Single Audit Act; and (3) capturing summary information on audit results.

Help Desk—The FAC database of all complete data collection form information is accessible to federal agency users and the public through the FAC Web site at <http://harvester.census.gov/sac>.

Audit Quality Monitoring by Cognizant Agencies

Circular A-133 requires that cognizant agencies for audit (meaning those agencies with specific single audit oversight responsibilities for recipients expending more than \$25 million annually in federal awards) conduct or obtain quality control reviews of selected single audits (see the section of this Alert titled "OMB Raises Single Audit Threshold and Revises Other Sections of Circular A-133" for a discussion of recent revisions to the \$25 million threshold). These efforts include desk reviews and quality control reviews (QCRs). Federal OIGs require corrective action on audit reports that are *technically deficient* or *substandard*. For audits that are substandard, the OIGs generally refer auditors who are CPAs to state licensing officials and, if they are members, to the AICPA for disciplinary action.

Desk reviews. All single audit reporting packages undergo an initial screening to determine whether they are complete when submitted to the FAC in Jeffersonville, IN. Some federal Offices of Inspectors General (OIGs) or another office within the agency perform a desk review when the reporting package arrives at the federal agency. The President's Council on Integrity and Efficiency (PCIE) has issued a desk review guide and checklist, titled *Uniform Guide for Initial Review of A-133 Audit Reports*, for use by OIGs when performing desk reviews.

Quality control reviews. QCRs are more detailed than desk reviews and typically involve the OIG examining the auditor's work. The objectives of a QCR of a single audit are to (1) ensure that the audit was conducted in accordance with applicable standards and that it meets the single audit requirements, (2) identify any follow-up audit work needed, and (3) identify issues that may require management attention. QCRs are performed using the PCIE *Uniform Quality Control Review Guide*.

.85

Appendix B

Common Engagement Deficiencies Noted in Peer Reviews, Ethics Investigations, and Federal OIG Quality Control Reviews

As noted earlier in this Alert, both the AICPA peer review and disciplinary processes continue to indicate that there are problems in the single audits they are reviewing. Federal Offices of Inspectors General (OIGs) have also found problems based on their quality control reviews of single audit work that are consistent with those found by the AICPA. The following discussion describes the most common deficiencies being found. You should consider reviewing your firm's policies and procedures to see whether your single audits also might have these kinds of issues.

- *Failure to audit type A programs as major because of errors made in determining the type A/type B program dollar threshold.* Circular A-133 includes criteria for determining the dollar threshold for type A programs. Any program that does not meet those criteria is considered a type B program. No rounding is permitted for that threshold. Some auditors made mathematical computation errors in determining the threshold and some erroneously based calculations on interim rather than final federal awards expended amounts. You should note that federal awards expended for purposes of determining type A and type B programs are the amount of cash and noncash awards, after all adjustments are made, in the *final* current-year schedule of expenditures of federal awards (SEFA), including the notes thereto. An auditor who uses the prior-year schedule or preliminary current-year estimates to plan the audit should recalculate the threshold for type A programs based on the final amounts to ensure that federal awards are properly classified as type A or B.
- *Failure to audit all programs included in a cluster of programs.* Clusters are defined in Part 5 of the Supplement and should be considered as one program in determining major programs. Auditors made errors in identifying programs as part of a program cluster.
- *Failure to meet the percentage-of-coverage requirement in Circular A-133, section 520(f).* The percentage-of-coverage requirement is applied as the last step in the risk-based approach and must always be met. At least one program must always be audited as a major program. In some cases, there were errors in the reviewed audits' compliance with the percentage-of-coverage requirement.
- *Inadequate or outdated reference material.* The auditor used inadequate or outdated reference material related to the engagement performed. Be sure to be familiar with new Statements on Auditing Standards (SASs) and accounting standards that are issued. Further, you should ensure that you are using the most up-to-date versions of the Supplement, Yellow Book, and the Single Audit Guide.
- *Documentation problems noted in various areas.* Internal control and compliance tests were not always adequately documented to support the reports issued. In some cases the auditor did not document that an auditee was considered a low-risk auditee (to support the reduced testing that was performed). Further, in a few other cases items such as the subsequent events review and litigation follow-up were not documented. SAS No. 96, *Audit Documentation*, provides guidance on the content, retention, and confidentiality of audit documentation as required by generally accepted auditing standards (GAAS). Among other things, SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), requires audit documentation to be sufficient to enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent, and results of auditing procedures performed, and the evidence obtained. *Government Auditing Standards* includes an additional standard that requires audit documentation to contain sufficient information to enable an experienced auditor having no previous connection with the audit to ascertain the evidence that supports the auditor's significant conclusions and judgments. You should keep these SAS No. 96 and *Government Auditing Standards* requirements in mind when you

are preparing your audit documentation. It is possible that problems with audit documentation could be the root of many of the other problems discussed in this section.

- *Problems with the GAAS audit of the financial statements.* Generally accepted accounting principles (GAAP) requirements for the classification, accounting, and reporting for particular funds and for disclosures were not followed in all cases. Further, the auditor's report was not always qualified for GAAP departures. While Circular A-133 does not require the financial statements to be prepared in conformity with GAAP, if the entity has chosen to follow GAAP, the financial statements should include all appropriate requirements. Further, the auditor's report should be appropriately modified for any GAAP departures.
- *Engagement letter deficiencies.* The engagement letter did not include proper references to Circular A-133 requirements or record retention policies, or include a copy of the latest peer review report. Refer to SAS No. 83, *Establishing an Understanding With the Client*, as amended by SAS No. 89, *Audit Adjustments* (AICPA, *Professional Standards*, vol. 1, AU sec. 310.06-.07), for a listing of the matters that should generally be included when the auditor establishes an understanding with the auditee. The Single Audit Guide also includes additional matters that the auditor might want to consider in the communication when engaged to perform a single audit.
- *Inadequate Government Auditing Standards reporting.* The required *Government Auditing Standards* reporting for internal control or compliance were not prepared or were not referred to in the report on the financial statements. Remember to prepare a Yellow Book report when the audit is required to be performed in accordance with *Government Auditing Standards* (either by law, regulation, or contract). Remember, also, that there is a required linkage paragraph required in the report on the financial statements that informs the reader that the Yellow Book report has been issued and that it is an integral part of the audit and should be read in conjunction with the financial statement report. The Single Audit Guide includes illustrative Yellow Book reporting with recommended AICPA wording.
- *Inadequate Circular A-133 reporting.* The appropriate Circular A-133 reporting was not included in some cases. In others, the appropriate report wording was not used. You are required to issue a Circular A-133 report in every single audit. The Single Audit Guide includes illustrative Circular A-133 reporting with recommended AICPA wording.
- *Inappropriate compliance opinion.* Sometimes the Circular A-133 report was not modified when it appeared that it should be. In other words, an unqualified opinion was provided when there were material instances of noncompliance. When the audit of an auditee's compliance with requirements applicable to a major program detects material instances of noncompliance with those requirements, you should express a qualified or adverse opinion. You should also consider whether the noncompliance is the result of a related reportable condition or material weakness and, if so, report it in the Circular A-133 report. Chapters 6 and 10 of the Single Audit Guide discuss compliance auditing requirements and auditor reporting. Further, chapter 3 of the Single Audit Guide discusses materiality differences between the single audit and the financial statement audit.
- *Problems with compliance and internal control work.* In some cases, the required compliance testing was not performed, sometimes because the auditor did not follow the guidance in Part 7 of the Supplement for identifying the applicable compliance requirements to test and report on. In other cases, internal control and compliance tests were not adequately designed or documented to support the reports issued. In performing compliance tests, be sure that you have identified which of the applicable compliance requirements may have a direct and material effect on each major program. It is imperative that you use the most recent version of the Supplement to make this identification. If the program you are auditing is not included in the Supplement, you should follow the guidance in Part 7 of the Supplement for identifying the applicable compliance requirements. Further, in performing compliance tests, be sure to consider relevant portions of the entity's internal control over compliance. Remember that you must test controls (to support a low assessed level of control risk for the assertions relevant to the compliance requirements for each major program) unless they are

likely to be ineffective in preventing or detecting noncompliance. Consult the Single Audit Guide, chapters 6 and 8, for detailed guidance on both compliance and internal control testing.

- *Audit findings and supporting documentation lacking.* Audit findings reported by auditors in the schedule of findings and questioned cost have been found to be lacking required information. Further, in some cases federal agencies have reviewed audit documentation supporting audit findings for purposes of assisting them in seeking recovery of questioned costs. In performing those reviews, they have found that the audit documentation lacked information on the specific items tested and the transactions for which exceptions were found. Circular A-133 requires that audit findings should be presented in sufficient detail for the auditee to prepare a corrective action plan and take corrective action and for federal agencies and pass-through entities to arrive at a management decision. You should refer to chapter 10 of the Single Audit Guide for a discussion of the specific requirements of Circular A-133 as it relates to audit findings. Further, you should ensure that your audit documentation clearly identifies the work performed and conclusions reached. Remember that SAS No. 96 requires that audit documentation related to tests of operating effectiveness of controls and substantive test of details that involve inspection of documents or confirmation to include an identification of the items tested. See the bullet above that covers single audit documentation problems in general.
- *Inadequate management representation letter.* The management representation letter did not follow the requirements of SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333), as amended, or include the additional representations required by the Single Audit Guide for a Circular A-133 audit. Refer to both SAS No. 85 and the Single Audit Guide to ensure all required components of the management representation letter are included.
- *Issues with the schedule of expenditures of federal awards.* In some instances, the SEFA was not presented or reported upon. In others, the schedule was presented but it did not accurately reflect the federal expenditures of the auditee and the auditor's reporting on the schedule was not modified. Circular A-133 requires the auditor to determine whether the SEFA is presented fairly in all material respects in relation to the auditee's financial statements taken as a whole. The schedule, prepared by the auditee, reports the total expenditures for each federal program. Refer to chapters 5 and 10 of the Single Audit Guide, which cover the identification of federal awards, the general presentation requirements governing the schedule, pass-through awards, noncash awards, endowment funds, and the auditor's reporting on the schedule.
- *Noncompliance with Yellow Book continuing professional education (CPE) requirements.* Under the Yellow Book, certain auditors must complete 80 hours of CPE every two years, with at least 24 of those hours in subjects directly related to the government environment and to government auditing. If the audited entity operates in a specific or unique environment, auditors should receive training related to that environment. Also, the GAO has issued an *Interpretation of Continuing Education and Training Requirements—Government Auditing Standards* that is helpful in understanding the specific CPE requirements for auditors working on audits performed in accordance with *Government Auditing Standards*. (See the discussion in the section of this alert titled "Government Auditing Standards Developments" for upcoming changes to the CPE requirements of the Yellow Book.)
- *Concurring review process failed.* In several of the cases, engagements that were reviewed before completion by a concurring reviewer had a multitude of problems. If your firm uses concurring reviewers as part of your quality control system, you should consider ensuring that the reviewer has knowledge of *Government Auditing Standards* and Circular A-133 requirements.

AAM Section 8230

Manufacturing Industry Developments—2002/03

How This Alert Helps You

.01 This Audit Risk Alert is intended to help you plan and perform your manufacturing industry audits. The knowledge delivered by this Alert can assist you in achieving a more comprehensive understanding of the business and economic environment in which your clients operate—an understanding that is more clearly linked to the assessment of the risk of material misstatement of the financial statements. Also, this Alert delivers information about emerging practice issues, and information about current accounting, auditing, and regulatory developments.

.02 If you understand what is happening in the manufacturing industry, and if you can interpret and add value to that information, you will be able to offer valuable service and advice to your clients. This Alert assists you in making considerable strides in gaining that industry knowledge and understanding it.

.03 This Alert is intended to be used in conjunction with the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

Industry and Economic Developments

.04 For a complete overview of the current economic environment in the United States, see the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010].

The U.S. Business Environment

.05 The current economic recovery is in its early stages and sustainable momentum has yet to fully emerge. Even though exports are beginning to recover from their second worst year in half a century, and business investment has stopped its steep decline, these positive signs have been eclipsed by a drop-off in consumer confidence, which could have a substantial ripple effect on the economy, resulting in decreased corporate earnings, increased layoffs, and further depression of the stock market.

.06 One of the biggest impediments to economic expansion is the difficulty companies are having in obtaining credit. Small and medium-size businesses continue to find it difficult to obtain the credit they need for basic capital investment and working capital. The great majority of companies are too small to borrow in the public markets. As of August 2002, bank business loans had declined steadily for 73 weeks to the lowest level since November 1999, and the Comptroller of the Currency reports that more than 60 percent of the largest banks continue to tighten loan standards. To be sure, the short-term economic picture looks unclear.

.07 Still, the financial underpinnings of the U.S. economy remain strong. Inflation is contained, interest rates are at a 40-year low, taxes have been lowered, and energy prices have fallen. New orders for nondefense capital goods, a good gauge for overall business investment, have risen during 2002. So, the U.S. economy continues to experience weak to mild growth, while the future appears uncertain and might worsen before it achieves stability and further growth.

General Industry Trends and Conditions

.08 After a number of years during which high-tech companies dominated the marketplace and drove the economic expansion, traditional manufacturers once again are emerging as a stabilizing force in the U.S. economy. According to the Commerce Department, inventory restocking contributed to more than half of the growth in the gross domestic product (GDP) in the first quarter of 2002, and all of GDP growth in the second quarter. Because technology has helped to increase productivity, manufacturers have cut costs while maintaining high levels of production. Excess capacity has abated and inventories are being rebuilt, industrial production is rising, profits among manufacturers are stabilizing, and new capital expenditures are being made.

.09 Nevertheless, manufacturing activity remains weak and is being adversely affected by poor foreign markets, lower automobile sales, and a lack of strong capital spending by most companies.

.10 Even though last years' September 11 attacks on America were a shock to the business environment, certain manufacturers have seen a substantial increase in business. For example, manufacturers of mainframe computers and some computer storage equipment have seen more business, as companies strengthen backup systems and disaster-recovery plans. The various sectors of the manufacturing industry will all be affected by the current economic events, but each sector is likely to be affected differently.

Manufacturers' Response to the Weak Economy

Inventory

.11 In response to current economic conditions, many manufacturers are tightly managing inventories and costs. As a result of recent sluggish consumer spending, retailers have bought less merchandise and also have reduced spending on equipment and software. These reductions have had a direct impact on the manufacturers of such goods. See the "Audit and Accounting Issues Arising From Current Risks" section of this Alert for in-depth discussions about inventory.

Risk Management

.12 Short product life cycles are a fundamental characteristic of numerous sectors within the manufacturing industry. For example, the life cycle of a desktop PC is thought to be two years or less, and it is estimated that up to 50 percent of profits for PCs and related products are generated in the first three to six months of sales. Those manufacturers with such short product life cycles face the risk of inventory obsolescence. See the "Inventory Valuation" section later in this Alert for a discussion of this issue.

.13 Manufacturers may enter into hedging transactions to protect themselves from fluctuating prices of the components used in the production of their products. As a result, those manufacturers may need to consider Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*.

.14 The use of debt extinguishment also has become part of the risk management strategy of many companies. Those manufacturing clients that have employed such strategies will need to consider FASB Statement No. 145, *Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections*.

Bankruptcies and Going Concern

.15 The volatile economic environment has resulted in difficult times, and even bankruptcies, for some manufacturers. Auditors should be aware of their responsibility to evaluate whether there is substantial doubt about a manufacturer's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. See the "Evaluating Going Concern" section of this Alert.

Plant Closings

.16 The cost cutting and restructuring undertaken by many manufacturers have led to a number of plant closings. In these circumstances, auditors should consider whether management has accounted for these plant closings and restructurings appropriately. See the “Plant Closings, Restructuring Charges, and Asset Impairments” and the “How Employee Layoffs Might Affect Audit Engagements” sections of this Alert for a discussion of a number of the accounting and auditing issues that result when a manufacturing entity closes plant locations.

Electronic Commerce

.17 Manufacturers today operate in a highly competitive, dynamic marketplace. To meet the increasing demands for speed and customer responsiveness and to optimize business opportunities, manufacturers are transforming their manufacturing, procurement, and other operations into e-businesses. In the near term, manufacturers may see suppliers, plants, warehouses, distribution centers, sales channels, business partners, and customers all interconnected by advanced e-business applications. The auditor should be aware of the effect that e-commerce has on a manufacturing entity’s internal control as he or she plans and performs the audit. See the “Going Electronic—Consideration of Internal Control” section of this Alert for a further discussion of these matters.

Help Desk—See the lengthy discussion of the current e-business economic environment in the AICPA Audit Risk Alert *E-Business Industry Developments—2002/03* [AAM section 8210]. That Alert also contains detailed discussions about the unique accounting and auditing concerns prevalent in an e-business environment. To order, call the AICPA Order Department at (888) 777-7077 or go to www.cpa2biz.com.

Regulatory and Legislative Issues

The Sarbanes-Oxley Act of 2002

.18 On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002. The Act dramatically affects the accounting profession and impacts not just the largest accounting firms, but any CPA actively working as an auditor of, or for, a publicly traded company or any CPA working in the financial management area of a public company. The Act contains some of the most far-reaching changes that Congress has ever introduced into the business world. Although most of the provisions of this legislation are specific to auditors of public companies, even practitioners not performing audits may be affected by the Act. Therefore, all CPA firms should become familiar with the provisions of the Act.

.19 Read the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a detailed description of the provisions of the Act and a description of recent and forthcoming rules and regulations implementing the Act.

High-Tech Survival Act

.20 Legislation titled the High-Tech Survival Act has been introduced in Congress. This bill seeks to provide economic relief to businesses in two ways:

1. The bill proposes a two-year recovery period—from the current five-year period—for depreciation of computers and other manufacturing equipment. These include any wireless telecommunications equipment, any advanced services equipment, any network or network system equipment, and certain computer software.
2. The bill proposes shortening the depreciation recovery period for spectrum license fees from 15 years to 7 years.

Most individuals in the high-tech manufacturing industry believe it is imperative that something be done to immediately stimulate our economy and ensure that Americans continue to support the nation's economic growth through these difficult times. According to industry observers, the High-Tech Survival Act will provide much-needed relief to businesses, big and small, and to the high-tech manufacturing industry, in particular.

Audit and Accounting Issues Arising From Current Risks

.21 The proper planning and execution of an audit have always required the auditor to have an understanding of the industry and the nature of the client's business. For most audit firms, this in-depth understanding means that the most experienced partners and managers must become involved early and often in the audit process. In today's manufacturing environment, the auditor's judgment, knowledge, and experience are even more important than they were in the past.

General Consideration of Fraud

.22 The recent wave of accounting scandals at major U.S. corporations should heighten the auditor's awareness of the possibility of fraud in their financial statement audits. In September 2002, the AICPA Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), which gives auditors expanded guidance for detecting material fraud. SAS No. 99 supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1 AU sec. 316A), and even though the new standard may carry the same title as SAS No. 82, auditors need to recognize that it is clearly more far-reaching than its predecessor. SAS No. 99 should substantially change auditor performance, thereby improving the likelihood that auditors will detect material misstatements due to fraud. See the section of this Alert titled "New Auditing, Attestation, and Quality Control Pronouncements and Other Guidance" for more detailed information about SAS No. 99. SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

.23 SAS No. 99 is extremely comprehensive and touches on many elements of the audit process. It cannot be reduced to a checklist or form. The effective implementation of SAS No. 99 will require auditors to *audit smarter* and think more creatively when they audit. Engagement teams that plan to implement the new standard by obtaining an updated version of a generic audit program will be doing themselves and their clients an injustice. The effective implementation of SAS No. 99 will force you to rethink how you plan and perform your audits. To help practitioners implement SAS No. 99, the AICPA has developed a Practice Aid titled *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide*.

Revenue Recognition

.24 Revenue recognition continues to pose significant audit risk to auditors. In this challenging economic and business environment, management may be under great pressure to improve financial results. Because revenue is an easy target to boost profits, the auditor should be aware of the potential for inflated revenue, and may need to pay particular attention to revenue recognition issues. Moreover, SAS No. 99 includes a presumption that improper revenue recognition is a fraud risk.

Evaluating Accounting Estimates Relevant to Revenue Recognition

.25 The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole. The evaluation of estimates is always an area of auditing concern because the measurement of estimates is inherently uncertain and depends on the outcome of future events. SAS No. 57, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1, AU sec. 342.10), sets forth guidance for auditing estimates. Refer to the "Collectibility of Receivables" section of this Alert for a description of those guidelines.

.26 Sales returns are a key estimate in a manufacturing entity and they are a key element in proper revenue recognition. When a sales transaction includes a right of return, FASB Statement No. 48, *Revenue Recognition When Right of Return Exists*, lists six conditions, *all* of which must be met to recognize revenue at the time of sale. Those conditions are:

1. The seller's price to the buyer is substantially fixed or determinable at the date of sale.
2. The buyer has paid the seller, or the buyer is obligated to pay the seller and the obligation is not contingent on the resale of the product.
3. The buyer's obligation to the seller would not be changed in the event of theft or physical destruction or damage of the product.
4. The buyer acquiring the product for resale has economic substance apart from that provided by the seller.
5. The seller does not have significant obligations for future performance to directly bring about the resale of the product by the buyer.
6. The amount of future returns can be reasonably estimated.

If all of the preceding conditions are not met, sales recognition should be postponed until the right of return substantially expires or until such time as the conditions are met.

.27 The most subjective of those conditions is the requirement that the amount of future returns can be reasonably estimated. FASB Statement No. 48 provides specific guidance on a number of factors that may impair, but not necessarily preclude, the ability to make a reasonable estimate. These are:

- The susceptibility of the product to significant external factors, such as technological obsolescence or changes in demand.
- Relatively long periods in which a particular product may be returned.
- Absence of historical experience with similar types of sales of similar products, or inability to apply such experience because of changing circumstances, for example, changes in the selling enterprise's marketing policies or relationships with its customers.
- Absence of a large volume of relatively homogeneous transactions.

If revenue is recognized at the time of sale because these conditions are met, FASB Statement No. 48 requires that the costs or losses that may be expected in connection with returns must be accrued in accordance with FASB Statement No. 5, *Accounting for Contingencies*. The sales revenue and cost of sales reported in the income statement should be reduced to reflect estimated returns.

Help Desk—For additional guidance, the auditor should refer to the AICPA Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk) and the AICPA Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk). To order, call the AICPA at (888) 777-7077 or go to www.cpa2biz.com.

Valuable SEC Guidance

.28 Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, summarizes the Securities and Exchange Commission (SEC) staff's views in applying generally accepted accounting principles (GAAP) to selected revenue recognition issues. SAB No. 101 reflects the basic principles of revenue recognition in GAAP and does not supersede any existing authoritative literature. Accordingly, although SAB No. 101 is directed specifically to transactions of public companies, management and auditors of nonpublic companies may find the guidance helpful in analyzing revenue recognition matters.

.29 SAB No. 101 presents various fact patterns, questions, and interpretive responses concerning whether the following criteria of revenue recognition are met:

- Persuasive evidence of an arrangement exists.
- Delivery has occurred or services have been rendered.
- The seller's price to the buyer is fixed or determinable.
- Collectibility is reasonably assured.

.30 Another SEC publication, *SAB No. 101: Revenue Recognition in Financial Statements—Frequently Asked Questions and Answers*, addresses recurring questions from preparers, auditors, and analysts about how to apply the guidance in SAB No. 101 to particular transactions.

Essential Auditing and Accounting Guidance

.31 The AICPA Audit Guide *Auditing Revenue in Certain Industries* assists auditors in auditing financial statement assertions about revenue. The auditor can look to this Guide for descriptions and explanations of auditing standards, procedures, and practices as they relate to auditing assertions about revenue in the manufacturing industry. This Guide:

- Discusses the responsibilities of management, boards of directors, and audit committees for reliable financial reporting.
- Summarizes key accounting guidance regarding whether and when revenue should be recognized in accordance with GAAP.
- Identifies circumstances and transactions that may signal improper revenue recognition.
- Summarizes key aspects of the auditor's responsibility to plan and perform an audit under generally accepted auditing standards (GAAS).
- Describes procedures that the auditor may find effective in limiting audit risk arising from improper revenue recognition.

In addition to that Guide, chapter 6 of the AICPA Practice Aid *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide* (product no. 006613) provides in-depth guidance on auditing revenue recognition, and also discusses relevant accounting issues.

Evaluating Going Concern

.32 Generally, the manufacturing industry as a whole is sensitive to negative changes in economic conditions, such as reductions in personal income, layoffs, higher unemployment levels, and decreases in consumer confidence. In addition, many manufacturers have in recent years experienced intense competition, recurring operating losses, and negative cash flows. Many small and medium-size businesses that do not have access to the public markets are finding it difficult to obtain the credit they need for basic capital investment and working capital. Accordingly, the auditor should be alert to general economic and other conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about a manufacturing entity's ability to continue as a going concern. More specifically, the auditor should consider the client's short-term cash requirements and cash-generating ability. These two issues alone are critical enough for survival to prompt auditors to consider whether clients that require additional cash in the next 12 months to maintain operations can continue as going concerns.

.33 In general, conditions and events that might indicate caution about going-concern issues could include (1) negative trends, such as recurring operating losses or working capital deficiencies; (2) financial difficulties, such as loan defaults or denial of trade credit from suppliers; (3) internal challenges, such as substantial dependence on the success of a particular product line or service; or (4) external matters, such as

disaster occurrences, pending legal proceedings, or loss of a principal supplier. Also, an entity's excessive and unusual reliance on external financing, rather than on money generated from the company's own operations, may indicate a going-concern issue.

Auditor's Responsibilities Related to a Going-Concern Issue

.34 Auditors should be aware of their responsibilities pursuant to SAS No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1, AU sec. 341.02 and .03b), as amended. That statement provides guidance about conducting an audit of financial statements in accordance with GAAS to evaluate whether there is substantial doubt about a client's ability to continue as a going concern for a reasonable period of time.

.35 Continuation of an entity as a going concern is generally assumed in the absence of significant information to the contrary. Information that significantly contradicts the going-concern assumption, or the ability to remain a going concern, relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions. SAS No. 59 does not require the auditor to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

.36 If there is substantial doubt about the entity's ability to continue as a going concern, the auditor should consider whether it is likely that management plans can mitigate existing conditions and events and whether those plans can be effectively implemented. If the auditor obtains sufficient competent evidential matter to alleviate doubts about going-concern issues, he or she should give consideration to the possible effects on the financial statements and the adequacy of the related disclosures. If, however, after considering identified conditions and events, along with management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern remains, the audit report should include an explanatory paragraph to reflect that conclusion. In these circumstances, refer to the specific guidance set forth under SAS No. 59.

Documentation Requirements

.37 SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), amends SAS No. 59 to require the auditor to document:

- The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern.
- The work performed in connection with the auditor's evaluation of management's plans.
- The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated.
- The consideration and effect of that conclusion on the financial statements, disclosures, and the audit report.

Manufacturers in Bankruptcy Reorganization

.38 For those manufacturers that are under bankruptcy reorganization pursuant to chapter 11 of the Bankruptcy Code, or are emerging from it, the auditor should consider whether the company is following the accounting guidance of Statement of Position (SOP) 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code*. Manufacturers that filed for bankruptcy may have impairments that need to be recorded before fresh-start accounting under SOP 90-7.

Inventory and Analytical Procedures

Just-in-Time and Total Quality Management Considerations

.39 The auditor must obtain sufficient competent evidential matter to provide a reasonable basis for the audit opinion. With the conversion by many manufacturers to the just-in-time (JIT) and total quality management (TQM) concepts, it may be necessary to reevaluate the auditor's approach to the audit of inventory.

.40 The focus of JIT/TQM is on the process rather than the product, as in traditional manufacturing environments. Parts are bundled and prepared by process cells rather than by products; production costs are charged to the process cells for the daily production rather than to jobs or lots. As a result, work-in-process (WIP) inventory counts are not as accurate as those in traditional manufacturing environments; however, in a JIT system the amount of inventory in process likely will not be material. This is a substantial change from traditional manufacturers, where WIP could be the most significant current asset. In addition, in a JIT setting, work orders do not serve as the primary documentary evidence for tracking costs, as they do in a traditional manufacturing environment.

.41 For manufacturers that have adopted the JIT production process, more extensive analytical review procedures on the relationships between production throughput, total cycle time, sales volume, and manufacturing costs may be necessary to obtain sufficient competent evidential matter, to compensate for the reduced paper audit trail. According to SAS No. 56, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1, AU sec. 329.02), as amended, analytical procedures are an important part of the audit process and consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data.

.42 Auditors should be aware of the need to have analytical procedures performed by staff with sufficient industry expertise to properly evaluate the results. In performing analytical procedures, auditors compare amounts or ratios to expected results developed from such sources as the following:

- Prior period financial information
- Budgets or forecasts
- Relationships among elements of financial information in the same period
- Relationships among financial and nonfinancial data
- Industry data compiled by services (for example, Dun & Bradstreet, Robert Morris Associates, and Standard & Poor's)

Documenting Analytical Procedures

.43 SAS No. 96, *Audit Documentation*, amended SAS No. 56 to require auditors to document the factors they considered in developing the expectation for a substantive analytical procedure. Auditors also must document the expectation, if it is not apparent from the documentation of the work that they performed. The auditor also should document (1) the results of his or her comparison of that expectation to the recorded amounts or ratios that he or she developed from recorded amounts and (2) any additional auditing procedures he or she performed in response to significant unexpected differences arising from the analytical procedures as well as the results of such additional procedures.

Key Ratios to Help Analyze Inventory

.44 The following gives a brief description of some of the ratios commonly used in a manufacturing environment for inventory valuation:

- The *gross profit ratio* indicates whether profit goals will be met and whether there are unusual variances in the cost of sales and inventory, and is computed as gross margin divided by net sales.
- The *finished goods turnover ratio* indicates how well inventory is managed and whether sales problems exist, for example, over- or understocking. It can be expressed in terms of a rate or days. If expressed as a rate, the finished goods turnover ratio is computed as the cost of goods sold divided by average finished goods inventory. If expressed in days, it is calculated as average finished goods inventory divided by the cost of sales, times the number of days in the period.
- The *raw materials turnover ratio* indicates the number of times raw material inventory was “used” on the average during the period. It is calculated as the cost of raw materials used divided by the average raw materials inventory.
- The *days’ supply in inventory ratio* provides an estimate of the number of days’ supply of inventory the client has on hand. It indicates the general condition of over- or understocking, and is calculated as number of days in the period divided by the inventory turnover, as computed in the second bullet in this list.
- The *inventory ratio* is calculated as sales divided by inventory. A low ratio of sales to inventory may indicate overstocking, slow-moving goods, overstatement of sales, or a lack of balance in inventory.
- The *obsolescence reserve as a percentage of inventory ratio* is calculated as the obsolescence reserve divided by average inventory. It indicates the general adequacy of the obsolescence reserve.

Help Desk—For additional guidance, the auditor should refer to the AICPA Audit Guide *Analytical Procedures* (product no. 012551kk). To order, call the AICPA at (888) 777-7077 or go to www.cpa2biz.com.

Inventory Valuation

.45 The primary literature on inventory accounting is Accounting Research Bulletin (ARB) No. 43, *Restatement and Revision of Accounting Research Bulletins*. Chapter 4 of ARB No. 43 states:

[I]n keeping with the principle that accounting is primarily based on cost, there is a presumption that inventories shall be stated at cost . . . A departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as its cost. If the utility of goods is impaired by damage, deterioration, obsolescence, changes in price levels, or other causes, a loss [shall] be reflected as a charge against the revenues of the period in which it occurs. The measurement of such losses shall be accomplished by applying the rule of pricing inventories at cost or market, whichever is lower.

Whether inventory is properly stated at lower of cost or market can be a very significant issue for many manufacturers due to advances in technology and the ever-changing marketplace. Examples of factors that may affect inventory pricing include:

- Changes in a product’s design that may have an adverse effect on the entity’s older products, with older products not as salable as the newer versions.
- A competitor’s introduction of a technologically advanced version of the product, which may decrease salability of a client’s products.
- Changes in the products promoted in the industry as a whole, such as a shift from analog to digital technology, which may affect salability.
- Changes in foreign economies that could result in such situations as slowdown of sales to that region or lower-priced imports from that region.

- Changes in technology to produce products that can give competitors a selling-price advantage.
- Changes in regulations that could affect the competitive environment.
- The entity's own product changes that may not be well researched due to the pressure to introduce new products quickly, resulting in poor sales or high returns.

.46 A highly competitive environment and the rapid technological advancement in some segments contribute to the common problem of inventory obsolescence in the manufacturing industry. As such, the auditor should consider whether the carrying amount of inventories is appropriate.

Factors to Consider in Evaluating Inventory Valuation

.47 The auditor may consider many factors in determining the proper valuation of inventories. A few examples of those factors that may be useful include the following:

- Product sales trends and expected future demand
- Sales forecasts prepared by management as compared with industry statistics
- Anticipated technological advancements that could render existing inventories obsolete or that could significantly reduce their value
- Inventory valuation ratios, such as gross profit ratios, inventory turnover, obsolescence reserves as a percentage of inventory, and days' supply in inventory (The "Inventory and Analytical Procedures" section in this Alert describes some of the ratios commonly used in a manufacturing environment to evaluate the reasonableness of inventory valuation and to help identify the existence of obsolete inventory.)
- New product lines planned by management and their effects on current inventory
- New product announcements by competitors
- Economic conditions in markets where the product is sold
- Economic conditions in areas where competitive products are produced
- Changes in the regulatory environment
- Unusual or unexpected movements, or lack thereof, of certain raw materials for use in producing inventory
- Levels of product returns
- Pricing trends for the type of products sold by the client
- Changes in standards used by the industry

These are not the only issues of importance to consider. The auditor may need to address other issues, including the client's taking of physical inventories. Consider the guidance set forth in SAS No. 1, section 331, *Inventories* (AICPA, *Professional Standards*, vol. 1, AU sec. 331.09–.13). Among the issues for consideration are the following:

- When dealing with some difficult types of inventory, such as chemicals used in a process, the auditor may need to take samples for outside analysis. The work of a specialist may also be needed, and in this case the auditor should follow the guidance set forth in SAS No. 73, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1, AU sec. 336).
- The extent to which raw materials have been converted to work-in-process will need to be determined to assess the value of the work-in-process.
- Indications of old or neglected materials or finished goods need to be considered.

Tests to Help Identify Obsolete Inventory

.48 The appendix to SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326.26), lists the following substantive tests the auditor might want to consider in identifying slow-moving, excess, defective, and obsolete items included in inventories:

1. Examine an analysis of inventory turnover.
2. Review industry experience and trends.
3. Analytically compare the relationship of inventory balances to anticipated sales volume. (The "Inventory and Analytical Procedures" section in this Alert describes some of the ratios commonly used in a manufacturing environment to evaluate the reasonableness of inventory valuation and to help identify the existence of obsolete inventory.)
4. Tour the facility.
5. Inquire of production, sales, and other relevant personnel concerning possible excess or obsolete items.

When significant excess or obsolete inventories exist, it may be appropriate to include the matter in the management representation letter. SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333.17), as amended, provides the following illustrative example of such a representation: "Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value."

Fraudulent Financial Reporting of Inventory

.49 As the economy remains sluggish and management is under pressure to provide positive financial results, companies may be more prone to inventory fraud. Auditors who are familiar with common methods for fraudulent inventory manipulations will be in a much better position to identify them.

.50 There are many ways management can attempt to manipulate inventory. Those clients may use a combination of several methods, including fictitious inventory, the manipulation of inventory counts, the nonrecording of purchases, and fraudulent inventory capitalization. All these schemes have the same goal of illegally boosting inventory values.

.51 SAS No. 99 provides guidance to help auditors fulfill their responsibilities to detect material misstatements caused by fraud. SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible. If SAS No. 99 has not yet been adopted, the provisions of SAS No. 82 should be followed.

Fraudulent Asset Valuations

.52 The misstatement of asset valuations is the most common form of inventory fraud. Inventory overstatement makes up the majority of asset valuation frauds and is the focus of this section.

.53 The valuation of inventory involves two separate elements: quantity and price. Goods are constantly being bought, sold, manufactured, and transferred among locations. Figuring the unit cost of inventory can be problematic; cost accounting methods and inventory valuation methods can routinely make a material difference in what the final inventory is worth. As a result, the complex inventory account is an attractive target for fraud.

.54 An obvious way to increase inventory value is to create various records for items that do not exist, including unsupported journal entries, inflated inventory count sheets, bogus shipping and receiving reports, and fake purchase orders. Because it may be difficult for the auditor to spot such phony documents, he or she may use other means to substantiate the existence and value of inventory.

Auditing Procedures

.55 During the observation of the physical inventory, the auditor should validate the inventory quantity by test counting. Because the auditor relies heavily on observation of the client's physical inventory count, documenting his or her test counts is important. Even when the auditor observes the physical inventory count and performs and records test counts, inventory fraud can go undetected. The following are examples:

- Management representatives follow the auditor and record the test counts. Thereafter, the client can add phony inventory to the items not tested, in turn falsely increasing the total inventory values.
- Auditors announce in advance when and where they will conduct their test counts. For companies with multiple inventory locations, this advance warning may permit management to conceal shortages at locations that auditors will not visit.
- Sometimes auditors do not take the extra step of examining packaged boxes. To inflate inventory, management may stack empty boxes, or boxes may contain items other than inventory in the warehouse.

.56 *Analytical Procedures.* Auditors can use analytical procedures to help detect inventory overstatements. When analyzing a company's financial statements and accounting records, the auditor can look for the following trends:

- Inventory increasing faster than sales
- Decreasing inventory turnover
- Shipping costs decreasing as a percentage of inventory
- Inventory rising faster than total assets move up
- Falling cost of sales as a percentage of sales
- Cost of goods sold on the books not agreeing with tax returns

The auditor can also examine the cash disbursements subsequent to the end of the audit period. If the auditor finds payments made directly to suppliers that were not recorded in the purchase journal, he or she should investigate further.

.57 *Assessing the Risk of Inventory Fraud.* The auditor may ask the following questions. Many *yes* answers may indicate greater risk of inventory fraud:

- Is the company attempting to obtain financing secured by inventory?
- Has the percentage of inventory to total assets increased over time?
- Has the ratio of cost of sales to total sales decreased over time?
- Have shipping costs fallen compared with total inventory?
- Has inventory turnover slowed over time?
- Have there been significant adjusting entries that have increased the inventory balance?
- After the close of an accounting period, have material reversing entries been made to the inventory account?

New Guidance Available

.58 Chapter 8 of the AICPA Practice Aid *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide* addresses the fraudulent financial reporting of inventory. Practitioners will find that guidance useful in planning and performing their audits of inventory balances.

Collectibility of Receivables

.59 The current high levels of bankruptcies in the retail and other industries should cause auditors of manufacturers to more closely evaluate the collectibility of their accounts receivable. The client's estimate of the level of accounts receivable that may not be collectible as a result of bad debts is reflected in the allowance for doubtful accounts—a contra-asset account used to bring accounts receivable to their net realizable value. When auditing estimates, auditors should be familiar with SAS No. 57, *Auditing Accounting Estimates*, which provides guidance on obtaining and evaluating sufficient competent evidential matter to support significant accounting estimates used in a client's financial statements. Practitioners also should refer to the section "Revenue Recognition" of this Alert for additional guidance. The guidelines set forth by SAS No. 57 include the following:

- Identify the circumstances that require accounting estimates.
- Consider internal control relating to developing accounting estimates.
- Evaluate the reasonableness of management's estimates.

.60 As part of evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate for the allowance for doubtful accounts and, based on that understanding, use one or a combination of the following approaches listed in SAS No. 57:

1. Review and test the process used by management to develop the estimate.
2. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.
3. Review subsequent events or transactions occurring before completion of fieldwork, including returns, chargebacks, and payments by customers.

.61 A review of the aging of the accounts receivable may be performed. This may include testing the reliability of the aging report; reviewing past due accounts on the report, including the number and amounts of such accounts; reviewing the client's prior history in collecting past due balances; reading customer correspondence files and credit reports; and so forth. This may be done with the assistance of the client in obtaining an understanding of how the allowance was developed and determining whether it is reasonable. Testing the reasonableness of the company's estimate of the collectibility of receivables also may be performed by using the following procedures:

1. Obtain publicly available information on major customers to determine their ability to honor outstanding obligations to the company.
2. Investigate unusual credit limits or nonstandard payment terms granted to customers.
3. Test subsequent collections of receivables.

.62 Often, the large number of customer accounts makes it difficult to determine the adequacy of the allowance only by reference to individual accounts. In such cases, a very useful tool in evaluating the allowance for doubtful accounts is the application of analytical procedures. The following are examples of the ratios auditors might use to evaluate collectibility of accounts receivable:

- *Accounts receivable turnover* indicates how well the company collects its receivables and is computed as net credit sales divided by average accounts receivable.
- *Bad debts to net credit sales* indicates whether writeoffs are adequate. It is computed as bad debt expense divided by net credit sales.
- *Allowance for doubtful accounts to accounts receivable* indicates whether the allowance is adequate. It is computed as the allowance for doubtful accounts divided by accounts receivable.

The auditor may also review revenue and receivables transactions and fluctuations after the balance-sheet date for items such as sales, writeoffs, and collections subsequent to year end. This may provide additional information about the collectibility of the accounts receivable and the reasonableness of the allowance account on the balance sheet date.

How Employee Layoffs Might Affect Audit Engagements

.63 Layoffs in the manufacturing industry during the recent recession accounted for 906,000 of the 1.3 million non-farm jobs that were lost. Many manufacturers continue to experience layoffs during this weak economic recovery. The layoff trend is broad based, affecting not only high-tech manufacturers, but also businesses once thought to be relatively safe from changes in the economy; for example, manufacturers of food and consumer products. Healthy companies are also using layoffs as a tool to reduce costs and accumulate earnings as they maneuver through this economic malaise.

.64 If manufacturing clients are experiencing or have experienced layoffs, they will need to properly account for employee-related termination charges, such as severance package charges, restructuring charges, and voluntary separation charges. In addition, management may incur fees for outplacement services offered to their departing employees and bonuses and educational allowances offered to assist employees in contending with the loss of their jobs. Following are some highlights of the accounting literature that may need to be considered.

- FASB Statement No. 146, *Accounting for Costs Associated With Exit or Disposal Activities*, addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies FASB Emerging Issues Task Force (EITF) Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." FASB Statement No. 146 requires that a liability for a cost associated with an exit or a disposal activity be recognized when the liability is incurred. The Statement also establishes that fair value is the objective for initial measurement of the liability.
- FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, establishes standards for accounting for curtailments and termination benefits, among other issues. Practitioners should refer to paragraphs 6 through 14 for guidance on curtailments, and paragraphs 15 through 17 for guidance on termination benefits.
- FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, requires recording as a loss the effect of curtailments, for example, termination of employees' services earlier than expected, that may or may not involve closing a facility or discontinuing a segment of a business. Refer to paragraphs 96 through 99 for guidance on how to account for plan curtailments. The Statement also provides guidance on how to measure the effects of termination benefits in paragraphs 101 and 102.
- FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits*, an amendment of FASB Statements No. 5 and No. 43, requires that entities providing postemployment benefits to their former or inactive employees accrue the cost of such benefits. Accrual would occur in accordance with FASB Statement No. 5, *Accounting for Contingencies*, when four conditions are met. Inactive employees include those who have been laid off, regardless of whether they are expected to return to work. Postemployment benefits that can be attributed to layoffs can include salary continuation, supplemental unemployment benefits, severance benefits, job training and counseling, and continuation of benefits, such as health care benefits and life insurance coverage. FASB Statement No. 112 does not require that the amount of postemployment benefits be disclosed. Financial statement disclosure should be made if an obligation for postemployment benefits is not accrued because the amount cannot be reasonably estimated.
- FASB Statement No. 132, *Employers' Disclosures about Pensions and Other Postretirement Benefits*, addresses disclosures only (that is, not measurement or recognition) and standardizes the disclosure

requirements for pensions and other postretirement benefits. Among other disclosures, the Statement requires the disclosure of the amount of any gain or loss recognized due to a settlement or curtailment. Additionally, the cost of providing special or contractual termination benefits recognized during the period and a description of the nature of the event are required to be disclosed.

Internal Control Concerns

.65 Significant layoffs can have a serious effect on an entity's internal control and financial reporting and accounting systems. Employees who remain at the company may feel overwhelmed by their workloads, may have insufficient time to complete their tasks completely and accurately, and may be performing too many tasks and functions. With additional workloads and requirements for the performance of added tasks, the company might experience challenges to maintaining an adequate segregation of duties in addition to other experiences affecting internal control.

.66 The auditor may need to consider the possible effects that key unfilled positions can have on internal control. Entities that have experienced strong financial reporting and accounting controls before layoffs could see those controls deteriorate due to the lack of employees and to redefined employee tasks.

.67 These issues related to employee layoffs should be considered when the auditor plans and performs the audit and assesses control risk. Gaps in key positions, and other changes related to reorganization or release of employees, may cause control weaknesses representing reportable conditions that should be communicated to management and the audit committee in accordance with SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), as amended.

.68 In addition, SAS No. 1, section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1, AU sec. 560), describes matters related to subsequent events. The auditor should use this guidance as he or she inquires of and discusses with management matters involving unusual terminations of participants, such as terminations arising from a sale of a division or layoffs, in addition to other matters.

Plant Closings, Restructuring Charges, and Asset Impairments

.69 In the past few years, economic uncertainty has caused some manufacturers to incur significant nonrecurring charges as they restructure their businesses. The overall weak economy has caused manufacturers to evaluate the performance of certain plants and consider whether it might be necessary to close those plants; many manufacturers have incurred sizable charges related to plant closings. Other related costs may include job reductions, sales of business segments, disposal of assets, asset impairment, and eliminating or combining certain functions or departments in an attempt to reduce the cost structure and spur future profitability and return of capital. Auditors need to address a number of issues concerning business restructurings.

.70 FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, provides the primary guidance on accounting for the impairment of long-lived assets. In general, the accounting for the impairment of long-lived assets depends on whether the asset is to be held and used or held for disposal.

Long-Lived Assets Held and Used

.71 Long-lived assets held and used should be reported at cost, less accumulated depreciation, and should be evaluated for impairment if facts and circumstances indicate that impairment may have occurred. Conditions or events such as the following may indicate a need for assessing the recoverability of the carrying amount of assets:

- A dramatic change in the manner in which an asset is used
- A reduction in the extent to which an asset is used

- Forecasts showing lack of long-term profitability
- A change in the law or business environment
- A substantial drop in the market value of an asset

.72 If events and circumstances indicate that impairment may exist, the entity is required to estimate the future cash flows expected to result from the use of the asset and its eventual disposition. An asset is deemed to be impaired if its carrying amount exceeds the sum of the expected future cash flows (undiscounted and without interest charges) from the asset. The impairment is measured as the amount by which the carrying amount exceeds the fair value of the asset. After an impairment is recognized, the reduced carrying amount of the asset should be accounted for as the new cost of the asset and depreciated over the remaining useful life. Restoration of previously recognized impairment losses is prohibited.

.73 Lack of an asset-impairment evaluation system may indicate a material weakness in an entity's internal controls. Further, a lack of documentation generally increases the extent to which the auditor must apply professional judgment in evaluating the adequacy of management's writedowns.

Long-Lived Assets to Be Disposed of by Sale

.74 Long-lived assets to be disposed of by sale (assets for which management has committed to a plan of disposal) should be reported at the lower of the carrying amount or fair value, less costs to sell. Subsequent revisions to fair value less costs to sell should be reported as adjustments to the carrying amount of the asset to be disposed of. However, the carrying amount may not be adjusted to an amount greater than the carrying amount of the asset before an adjustment was made to reflect the decision to dispose of the asset.

.75 Some long-lived assets might have previously been subject to Accounting Principles Board (APB) Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, but FASB Statement No. 144 amended APB Opinion No. 30. The provisions of FASB Statement No. 144 apply to all long-lived assets. Therefore, gains or losses on disposal of a discontinued operation are no longer measured on a net realizable value basis, and future operating losses are no longer recognized before they occur.

Unusual and Infrequent Items

.76 Unusual or infrequent (but not both) transactions or events are to be presented in the statement of income as separate elements of income from continuing operations, as required by APB Opinion No. 30. The presentation should not imply that the amounts are extraordinary items because they do not meet the criteria of being both infrequent and unusual. Clients may present plant closings on the face of the statement of income as a component of continuing operations, such as "provision for plant closing."

.77 Disclosures stating the effect and nature of the transaction or event can be made in the notes to the financial statements using captions, such as unusual items or nonrecurring items, as well as on the face of the statement of income, as stated above.

Assets to Be Disposed of Other Than by Sale

.78 Assets that are to be abandoned, exchanged for a similar productive asset, or distributed to owners in a spin-off are to be considered as held and used until they are disposed of. If the asset is to be abandoned, the depreciable life is revised in accordance with APB Opinion No. 20, *Accounting Changes*. If the asset is to be exchanged for a similar productive asset or distributed to owners in a spin-off, an impairment loss is to be recognized at the date of exchange or distribution, if the carrying amount of the asset exceeds its fair value at that date.

Inventory Markdowns

.79 If appropriate to the circumstances at the particular client, the auditor should determine whether the client has properly addressed the requirements of EITF Issue No. 96-9, "Classification of Inventory Markdowns and Other Costs Associated with a Restructuring," and, for publicly held companies, whether the position of the SEC staff, as provided in SAB No. 67, *Income Statement Presentation of Restructuring Charges*, has been followed regarding the classification of markdowns associated with a restructuring as a component of cost of goods sold.

Goodwill and Other Intangible Assets

.80 Because there have been numerous combinations of manufacturing companies in recent years, and because goodwill may represent a significant asset on the balance sheets of these combined companies, the auditor should carefully consider whether management has properly complied with the new accounting requirements of FASB Statement No. 142, *Goodwill and Other Intangible Assets*.

.81 FASB Statement No. 142 changes the unit of account for goodwill and takes a very different approach to how to account for goodwill and other intangible assets subsequent to their initial recognition. Specifically, FASB Statement No. 142 changes the subsequent accounting for goodwill and other intangible assets in the following respects:

- FASB Statement No. 142 adopts a more aggregate view of goodwill and bases the accounting for goodwill on the units of the combined entity into which an acquired entity is integrated. Those units are referred to as reporting units.
- APB Opinion No. 17, *Intangible Assets*, presumed that goodwill and all other intangible assets were wasting assets (that is, finite lived). FASB Statement No. 142 does not presume that those assets are wasting assets. Instead, goodwill and other intangible assets that have indefinite useful lives will not be amortized but, rather, will be tested at least annually for impairment.
- FASB Statement No. 142 provides specific guidance for testing goodwill for impairment. The annual test for goodwill impairment uses a two-step process that begins with an estimation of the fair value of a reporting unit. However, if certain criteria are met, the requirement to test goodwill for impairment annually can be satisfied without a remeasurement of the fair value of the reporting unit.

Implementing FASB No. 142 can require extensive valuation judgments and calculations. Auditors need to be aware of this situation and ready to evaluate the new accounting.

Repricing of Employee Stock Options

.82 With the downturn in share prices of many manufacturing companies continuing throughout 2002, the stock options previously granted to many essential employees may now have lost much of their value. To retain these employees, many companies may reprice the options. FASB Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation*, is an interpretation of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and provides that "if the exercise price of a fixed stock option award is reduced, the award shall be accounted for as variable from the date of the modification to the date the award is exercised, is forfeited, or expires unexercised." The EITF has also addressed the repricing issue in EITF Topic No. D-91, *Application of APB Opinion No. 25, Accounting for Stock Issued to Employees*, and FASB Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation, to an Indirect Repricing of a Stock Option*.

.83 FASB Interpretation No. 44 indicates that any modification or sequence of actions by a grantor to directly or indirectly reduce the exercise price of an option award causes variable accounting for the repriced or replacement award for the remainder of the award's life. The change from a fixed to a variable plan triggers the requirement to record income statement charges (or credits) at each reporting date. So, while the intrinsic

value of the option may be zero at the repricing (or modification) date, from that date until the final exercise (or expiration or forfeiture), the company must report an expense or reversal of that expense even though the options are not vested. This expense is the difference between the fair value of the shares at each balance sheet date and the exercise price.

.84 The change in accounting triggered by repricing requiring compensation to be recorded has no effect on cash flow. However, it may reduce net income and earnings per share. Management should be made aware of the consequences of making any modification to their option plans and outstanding options and the financial statement impact of giving equity instruments to nonemployees.

Going Electronic—Consideration of Internal Control

.85 Many manufacturers are becoming “digital enterprises”—using e-business technologies to connect critical business systems directly to customers, employees, suppliers, and distributors. In addition, the just-in-time and total quality management concepts have significantly changed the operating structure of many manufacturing companies. As a result, manufacturers have adopted new models, systems, and processes as advances in technology and business systems have emerged. Frequently, the paper trail from the old internal control system will not provide adequate evidence about the effectiveness of controls in the new environment.

.86 When clients rely on technology to manage and analyze information, audit strategies change. For example:

- Audit evidence that previously existed in paper form may be only available electronically. Accessing electronic audit evidence may require the auditor to become proficient in the use of data extraction or other audit software tools.
- The design and operation of internal control in a computer environment is much different than in a predominately manual environment.

The auditor should be aware of the audit issues unique to a highly computerized environment. In addition, the auditor should identify the risks of material misstatement that can arise during the transition from a highly manual environment to a more computerized operating environment.

.87 In planning the audit, the auditor must reevaluate attitudes toward internal control and operating policies and determine management’s commitment to maintain or improve internal control in the new manufacturing environment. In addition, the auditor should consider the effect changes in technology or other changes in the client’s business may have on its internal control. The auditor should document the understanding of the entity’s internal control as required by SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319), as amended. If the understanding reveals weakness in controls, there may be an increased risk of material misstatements in the financial statements. In such circumstances, SAS No. 96, *Audit Documentation* which supersedes SAS No. 41, *Working Papers* (AICPA, *Professional Standards*, vol. 1, AU sec. 339A), requires auditors to document their audit findings or issues that in their judgment are significant (which include those that indicate that (1) the financial statements or disclosures could be materially misstated or (2) auditing procedures need to be significantly modified; and circumstances that cause significant difficulty in applying auditing procedures the auditor considered necessary), actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached.

.88 SAS No. 96 contains a list of factors that the auditor should consider in determining the nature and extent of the documentation for a particular audit area or auditing procedure. Additionally, for tests of operating effectiveness of controls, audit documentation is now required to include an identification of items tested. The identification of items tested may be satisfied by indicating the source from which the items were selected and the specific selection criteria.

.89 For further information and guidance on auditing in a paperless environment, see the requirements of SAS No. 80, *Amendment to Statement on Auditing Standards No. 31, Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326), and the AICPA Audit Practice Release *Auditing in Common Computer Environment* (product no. 021059kk), which alerts the auditor to the changes that need to be considered in a computer environment.

New Auditing, Attestation, and Quality Control Pronouncements and Other Guidance

.90 Presented below is a list of auditing, attestation, and quality control pronouncements, guides, and other guidance issued since the publication of last year's Alert. For information on auditing and attestation standards issued subsequent to the writing of this Alert, please refer to the AICPA Web site at www.aicpa.org/members/div/auditstd/technic.htm. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team and available at www.aicpa.org.

.91 See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a brief description of these new pronouncements and other publications. Given the significance of SAS No. 99, a description of its requirements is presented below.

.92 The following summary is for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA standards and guides, contact the Member Satisfaction Center at (888) 777-7077 or go online at www.cpa2biz.com.

SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*

.93 SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), supersedes SAS No. 82, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316A) and amends SAS No. 1, section 230, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230), and SAS No. 85, *Management Representations* (AICPA, *Professional Standards*, vol. 1, AU sec. 333). The Statement does not change the auditor's responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud as stated in SAS No. 1, section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1, AU sec. 110.02). However, SAS No. 99 establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with GAAS.

.94 The following is an overview of the content of SAS No. 99:

- *Description and characteristics of fraud.*
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present.
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to (1) consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and (2) reinforce the importance of adopting an appropriate mindset of professional skepticism.
- *Obtaining the information needed to identify the risks of material misstatement due to fraud.* This section requires the auditor to gather the information necessary to identify the risks of material misstatement due to fraud, by:
 1. Inquiries of management and others within the entity about the risks of fraud.
 2. Considering the results of the analytical procedures performed in planning the audit.

3. Considering fraud risk factors.
 4. Considering certain other information.
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered above to identify risks that may result in a material misstatement due to fraud.
 - *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation.
 - *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risk of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence. The section requires the auditor to respond to the results of the risk assessment in three ways:
 1. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned
 2. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed
 3. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls
 - *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate, at the completion of the audit, whether the accumulated results of auditing procedures and other observations affect the assessment. It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications.
 - *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others.
 - *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements.

.95 In addition, SAS No. 99 includes an amendment to SAS No. 85, *Management Representations* (AU sec. 333.06 and Appendix A), because SAS No. 99 requires the auditor to make inquiries of management about fraud and risk of fraud. In support of and consistent with these inquiries, the amendment revises the guidance for management representations about fraud currently found in SAS No. 85, paragraph 6(h), and Appendix A.

.96 SAS No. 99 is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of SAS No. 99 is permissible.

Implementation Guide Available

.97 The AICPA has developed a Practice Aid titled *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide* to help implement SAS No. 99.

New Accounting Pronouncements and Other Guidance

.98 Presented below is a list of accounting pronouncements and other guidance issued since the publication of last year's Alert. For information on accounting standards issued subsequent to the writing

of this Alert, please refer to the AICPA Web site at www.aicpa.org, and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

.99 See the AICPA general *Audit Risk Alert—2002/03* [AAM section 8010] for a brief description of these new pronouncements and other publications. Given its relevance to the current manufacturing industry environment, a description of FASB Statement No. 146 is presented below.

.100 The following summary is for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard.

FASB Statement No. 146, Accounting for Costs Associated With Exit or Disposal Activities

.101 This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)."

.102 This Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. The Board concluded in this Statement that an entity's commitment to a plan, by itself, does not create a present obligation to others that meets the definition of a liability. Therefore, this Statement eliminates the definition and requirements for recognition of exit costs in EITF Issue No. 94-3. This Statement also establishes that fair value is the objective for initial measurement of the liability. Refer to the Statement for effective date and transition information.

On the Horizon

.103 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented below is brief information about some ongoing projects that may be relevant to your engagements. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.104 The following table lists the various standard-setting bodies' Web sites where information may be obtained on outstanding exposure drafts, including downloading a copy of the exposure draft. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist beyond those discussed below. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body**Web Site**AICPA Auditing
Standards Board (ASB)www.aicpa.org/members/div/auditstd/drafts.htmAICPA Accounting
Standards Executive
Committee (AcSEC)www.aicpa.org/members/div/acctstd/edo/index.htmFinancial Accounting
Standards Board (FASB)www.rutgers.edu/Accounting/raw/fasb/draft/draftpg.htmlProfessional Ethics
Executive Committee
(PEEC)www.aicpa.org/members/div/ethics/index.htm

Help Desk—The AICPA’s standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to memsat@aicpa.org. Indicate “exposure draft e-mail list” in the subject header field to help process your submission more efficiently. Include your full name, mailing address and, if known, your membership and subscriber number in the message.

Auditing Pipeline

New Framework for the Audit Process

.105 The ASB has exposed a suite of seven proposed SASs relating to the auditor’s risk assessment process. The ASB believes that the requirements and guidance provided in the proposed SASs, if adopted, would result in a substantial change in audit practice and in more effective audits. The primary objective of the proposed SASs is to enhance the auditor’s application of the audit risk model in practice by requiring:

- A more in-depth understanding of the entity and its environment, including its internal control, that would better enable the auditor to identify the risks of material misstatement in the financial statements and any steps the entity is taking to mitigate them.
- A more rigorous assessment of the risks of material misstatement of the financial statements based on that understanding.
- A better linkage between the assessed risks of material misstatement and the nature, timing, and extent of audit procedures performed in response to those risks.

.106 The exposure draft consists of the following proposed SASs:

- *Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards*
- *Audit Evidence*, which will supersede SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)
- *Audit Risk and Materiality in Conducting an Audit*, which will supersede SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)
- *Planning and Supervision*, which will supersede section 310, *Appointment of the Independent Auditor*, of SAS No. 1 (AU sec. 310), and SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)
- *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

- *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, which will supersede SAS No. 45, *Omnibus Statement on Auditing Standards—1983*, section 313, *Substantive Tests Prior to the Balance-Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with the proposed SAS *Assessing Risks* will supersede SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319)
- *Amendment to SAS No. 39, Audit Sampling*

You should keep abreast of the status of these projects and exposure drafts, inasmuch as they will substantially affect the audit process. More information can be obtained on the AICPA's Web site at www.aicpa.org.

Accounting Pipeline

Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment

.107 Proposed AICPA SOP, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment*, and proposed FASB Statement, *Accounting in Interim and Annual Financial Statements for Certain Costs and Activities Related to Property, Plant, and Equipment—an amendment of APB Opinions No. 20 and 28 and FASB Statements No. 51 and 67 and a rescission of FASB Statement No. 73*, were issued simultaneously for public comment. Principally, the proposed FASB Statement would amend FASB Statement No. 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*, to exclude from its scope the accounting for acquisition, development, and construction costs of real estate developed and used by an entity for subsequent rental activities. The accounting for those costs would be subject to the guidance in the proposed SOP. It also would amend APB Opinion No. 28, *Interim Financial Reporting*, to require that those costs that the proposed SOP would require be expensed as incurred on an annual basis also be expensed as incurred in interim periods.

.108 The proposed SOP addresses accounting and disclosure issues related to determining which costs related to property, plant, and equipment should be capitalized as improvements and which should be charged to expense. The proposed SOP also addresses capitalization of indirect and overhead costs and component accounting for property, plant, and equipment. Final Statements are expected to be issued during the first half of 2003.

Resource Central

Educational courses, Web sites, publications, and other resources available to CPAs

On the Bookshelf

.109 The following publications deliver valuable guidance and practical assistance as potent tools to be used on your engagements.

- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (product no. 012520kk)
- Audit Guide *Auditing Revenue in Certain Industries* (product no. 012510kk)
- Audit and Accounting Guide *Audit Sampling* (product no. 012530kk)
- Audit Guide *Analytical Procedures* (product no. 012551kk)
- Practice Aid *Auditing Estimates and Other Soft Accounting Information* (product no. 010010kk)
- *Accounting Trends & Techniques—2002* (product no. 009894kk)
- Practice Aid *Preparing and Reporting on Cash- and Tax-Basis Financial Statements* (product no. 006701kk)
- Practice Aid *Fraud Detection in a GAAS Audit: SAS No. 99 Implementation Guide* (product no. 006613kk)
- Audit Risk Alert *E-Business Industry Developments—2002/03* [AAM section 8210]

Audit and Accounting Manual

.110 The *Audit and Accounting Manual* (product no. 005131kk) is a valuable nonauthoritative practice tool designed to provide assistance for audit, review, and compilation engagements. It contains numerous practice aids, samples, and illustrations, including audit programs, auditor's reports, checklists, engagement letters, management representation letters, and confirmation letters.

AICPA's reSOURCE Online Accounting and Auditing Literature

.111 Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, *Audit & Accounting Guides* (all 23), *Audit Risk Alerts* (all 19), and *Accounting Trends & Techniques*. To subscribe to this essential service, go to www.cpa2biz.com.

reSOURCE CD-ROM

.112 The AICPA is currently offering a CD-ROM product titled *reSOURCE: AICPA's Accounting and Auditing Literature*. This CD-ROM enables subscription access to the following AICPA Professional Literature products in a Windows format: *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set that includes all Guides and the related *Audit Risk Alerts*, or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

Online CPE

.113 The AICPA offers an online learning tool, *AICPA InfoBytes*. An annual fee (\$95 for members and \$295 for nonmembers) will offer unlimited access to over 1,000 hours of online CPE in one- and two-hour segments. Register today at infobytes.aicpaservices.org.

Member Satisfaction Center

.114 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Member Satisfaction Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.115 The AICPA Technical Hotline answers members' inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.

Ethics Hotline

.116 Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2BIZ

.117 AICPA Online offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the *Audit Risk Alerts*, *Audit and Accounting Guides*, *Professional Standards*, and CPE courses.

Other Helpful Web Sites

.118 Further information on matters addressed in this Audit Risk Alert is available through various publications and services offered by a number of organizations. Some of those organizations are listed in the table at the end of the Alert.

.119 This is the first year the AICPA has published a *Manufacturing Industry Developments* Audit Risk Alert. The AICPA expects to continue to publish this Alert annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about the Alert would also be appreciated. You may e-mail these comments to rdurak@aicpa.org, or write to:

AAM Section 9100

Supervision and Review Procedures

Introduction

.01 Supervision is an important phase of all engagements. A supervisor trains staff members, determines that there is an understanding of the work to be performed and ascertains that all procedures were appropriately performed.

.02 Review procedures are necessary to determine whether the objectives of the engagement and the results of the procedures performed were consistent with the conclusions presented in the accountant's or auditor's report.

Authoritative Literature

.03 The necessity for supervision is emphasized in the *AICPA Code of Professional Conduct*, which applies to all major areas of accounting practice, Rule 201, *General Standards* (ET section 201.01) states, "A member shall adequately plan and *supervise* an engagement."

.04 The first standard of fieldwork of generally accepted auditing standards states: "The work is to be adequately planned and assistants, if any, are to be properly *supervised*."

.05 For compilation and review engagements, SSARS No. 1, *Compilation and Review of Financial Statements* (AR section 100), provides the guidance necessary to enable the accountant to comply with the general standards of the profession as explained in paragraph .03 above.

.06 For audit engagements, the following Statements on Auditing Standards (SAS) provide specific guidance on supervising and reviewing audit engagements:

- a. SAS No. 22, *Planning and Supervision*, and SAS No. 77, *Amendments to Statements on Auditing Standards No. 22, Planning and Supervision*, No. 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, and No. 62, *Special Reports* (AU section 311), establishes broad requirements for the review of the work of assistants.
- b. SAS No. 39, *Audit Sampling* (AU section 350), states that nonsampling risk can be reduced to a negligible level through such factors as adequate planning and supervision and proper conduct of a firm's audit practice.
- c. SAS No. 96, *Audit Documentation* (AU section 339), establishes requirements for documenting the supervision of work performed.
- d. SAS No. 56, *Analytical Procedures* (AU section 329), provides guidance on the use of analytical procedures and requires their use in both the planning and review of audits.

.07 In addition, the AICPA's Statement on Quality Control Standards (SQCS) No. 2,* *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), provides that a CPA firm shall have

* SQCS No. 2 (QC section 20.03), as amended by SQCS No. 6, *Amendment to Statement on Quality Control Standards No. 2, System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (QC section 20), to clarify that deficiencies in individual audit, attest, compilation, and review engagements do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards. By the addition of a footnote, this amendment clarifies the relationship of deficiencies in individual engagements and a firm's system of quality control.

a system of quality control for its accounting and auditing practice. One of the elements of a quality control system discussed in this standard is supervision. Supervision as an element of quality control is defined as policies and procedures for the conduct and supervision of work to provide that the firm's work meets its standard of quality.

Phases of Supervision and Review

.08 Supervision and review are conducted in several phases:

- a. Instructing and training assistants.
- b. Providing the staff with an efficient and effective approach to the performance of the engagement.
- c. Keeping informed of significant problems encountered.
- d. Reviewing the work performed.
- e. Comparing the time spent on performing the procedures required with the budget prepared for those procedures.
- f. Dealing with technical differences of opinion among firm personnel.

Review Organization

.09 A firm's practice for reviewing engagements will vary depending on the size of the firm and on the complexity of the engagement.

.10 Some firms can justify a separate review department, while others cannot afford this functional division of duties. Firms cannot afford to omit any of the review procedures or processes. There should always be some form of reading of the reports for both professional and accounting matters as well as typographical errors after they are typed.

Firm Policy and Procedures Regarding Supervision and Review

.11 The foundation of good supervision is adequate firm policies and procedures on conducting and supervising work performed. Some examples of such policies are:

- a. Procedures for planning engagements (AAM section 3000).
- b. Procedures for maintaining the quality of work performed (AAM section 11,000).
- c. Procedures for reviewing engagement audit documentation and reports.

.12 The procedures for reviewing engagement audit documentation and reports is broken into two separate components. The two components consist of (1) detailed review of the audit documentation by the audit senior and (2) the higher-level supervisory review performed by the manager and partner on the engagement.

Review of Audit Documentation

.13 The purpose of the detailed review of the audit documentation on an engagement is to determine that:

- a. All procedures in the program, albeit audit, review or compilation, were performed and documented.
- b. The results and conclusions reached are appropriate for the work performed.
- c. The results are properly summarized and in agreement with the report to be issued.

Supervisory Review

- .14 The purpose of the supervisory review is to determine that:
- a. Professional and firm standards have been complied with.
 - b. Accounting and auditing concerns for the client's industry were evaluated properly.
 - c. The overall results of the procedures performed are appropriate.

Purpose of Form

.15 The In-Charge's and Partner's Engagement Review Programs are tools used for determining whether all engagement steps were properly considered, completed, and resolved. The In-Charge should complete the respective form by checking off "yes," "no," or "n/a" in the appropriate column. All "no" answers should be explained with a separate memorandum. The Partner should sign off on the In-Charge's Engagement Review Program and then complete the Partner's Engagement Review Program in the same manner.

[The next page is 9201.]

AAM Section 9200

In-Charge's Engagement Review Program

The Partner's Engagement Review Program should be used for all engagements. The supplemental programs for Not-for-Profit Organizations, Local Governmental Units, and Banks should be completed in conjunction with the Partner's Engagement Review Program.

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
I. General Procedures			
A. .010 General			
1. In planning the audit engagement, were the following matters properly considered?			
a. Matters affecting the environment in which the entity operates, such as accounting practices, economic conditions, government regulations, contractual obligations and technological changes. (SAS No. 22, as amended by SAS No. 77 [AU section 311])	_____	_____	_____
b. Matters affecting the entity's operations, such as legal organization and types of services. (SAS No. 22, as amended by SAS No. 77 [AU section 311])	_____	_____	_____
c. Preliminary judgment about materiality levels for audit purposes. (SAS No. 47 [AU section 312])	_____	_____	_____
d. Consideration of internal control. (SAS No. 55, as amended by SAS No. 78 and SAS No. 94 [AU section 319])	_____	_____	_____
e. Conditions that may require extension or modification of audit tests, such as the possibility of material errors or fraud and management's ability to override controls. (SAS Nos. 47 and 99 [AU sections 312 and 316])	_____	_____	_____
f. Other audit risks.	_____	_____	_____
2. If the firm succeeded a predecessor accountant, did the firm:			
a. Communicate with the predecessor accountant to ascertain whether there were disagreements between the predecessor accountant and the entity's management on accounting or auditing matters and consider the implications of such matters in accepting the client?	_____	_____	_____
b. Make other inquiries of the predecessor accountant on significant matters?	_____	_____	_____
c. Satisfy itself on the fair presentation of opening balances, such as reviewing the predecessor accountant's working papers?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
3. Did the auditor obtain an understanding of internal control sufficient to plan the audit by performing procedures to understand the design of controls relevant to an audit of financial statements, and determine whether they have been placed in operation? (SAS No. 55, as amended [AU section 319])	_____	_____	_____
a. Did the auditor then assess control risk for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements? (SAS No. 55, as amended [AU section 319])	_____	_____	_____
b. If control risk is assessed below the maximum for an assertion, was evidential matter obtained supporting that lower assessed level? (SAS Nos. 55 and 78 [AU section 319])	_____	_____	_____
c. If the client used computer processing in significant accounting applications, did the assessment of risk in internal control include an evaluation of the extent, as well as the complexity, of that processing, including those, if any, of an outside service center? (SAS Nos. 48, 55, as amended, and 70, as amended [AU sections 311, 319, and 324])	_____	_____	_____
d. If the firm relied on the internal control at a service organization, was a service auditor's report obtained and appropriately considered? (SAS No. 70, as amended [AU section 324])	_____	_____	_____
4. If consideration was given to the work of internal auditors in determining the scope of the audit, was it done in accordance with SAS No. 65 (AU section 322)?	_____	_____	_____
5. Was audit planning appropriately documented?	_____	_____	_____
6. Were procedures performed to obtain information that was used to identify the risks of material misstatement due to fraud, including a discussion among the audit team members about the potential for material misstatement due to fraud?	_____	_____	_____
7. Was a presumption made that there is a risk of material misstatement due to fraud related to revenue recognition in accordance with paragraph 41 of SAS No. 99 (AU section 316.41), and was a proper response to that risk performed? (Ordinarily, there should be a presumption that there is a risk of material misstatement due to related to revenue recognition.)	_____	_____	_____
8. Was a written audit program prepared? (SAS No. 22, as amended by SAS No. 77 [AU section 311])	_____	_____	_____
a. Was it responsive to the needs of the engagement identified during the planning process and was it developed in light of internal control? (SAS No. 55, as amended [AU section 319])	_____	_____	_____
b. Was consideration given to applicable assertions in developing audit objectives and in designing substantive tests? (SAS No. 31 [AU section 326])	_____	_____	_____
c. Were tests considered regarding related party transactions? (SAS No. 45 [AU section 334])	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
d. If conditions changed during the course of the audit, was the audit program modified as appropriate in the circumstances?	_____	_____	_____
e. Was guidance in the applicable AICPA Audit and Accounting Guide considered?	_____	_____	_____
9. If statistical or nonstatistical sampling was used in test of controls (SAS No. 39 [AU section 350]):			
a. Was appropriate consideration given, in planning the sampling application, to the relationship of the sample to the objective of the test, maximum rate of deviation, allowable risk of assessing control risk too low and characteristics of the population?	_____	_____	_____
b. Was the sample selected in such a way that it could be expected to be representative of the population?	_____	_____	_____
c. Were the results of the sample evaluated as to their effect on the nature, timing, and extent of planned substantive procedures?	_____	_____	_____
d. Was appropriate consideration given, in evaluating the sample, to items for which the planned test or appropriate alternative procedure could not be performed, for example, because the documentation was missing?	_____	_____	_____
e. Was documentation of the foregoing considerations in accordance with firm policy?	_____	_____	_____
10. If statistical or nonstatistical sampling was used for substantive tests of details (SAS No. 39 [AU section 350]):			
a. Was appropriate consideration given, in planning the sampling application, to the relationship of the sample to the audit objective, preliminary judgments about materiality levels, auditor's allowable risk of incorrect acceptance, and characteristics of the population?	_____	_____	_____
b. Was the sample selected in such a way that it could be expected to be representative of the population?	_____	_____	_____
c. Were the misstatement results of the sample projected to the items from which the sample was selected?	_____	_____	_____
d. Was appropriate consideration given, in evaluating the sample, to items for which the planned substantive tests or appropriate alternative procedures could not be performed?	_____	_____	_____
e. Was appropriate consideration given in the aggregate to projected misstatement results from all audit sampling applications and to all known misstatements from nonsampling applications in evaluating material misstatements in the financial statements?	_____	_____	_____
f. Was documentation of the foregoing considerations in accordance with firm policy?	_____	_____	_____
11. Were the guidelines of SAS No. 56 (AU section 329), followed in the performance of analytical procedures for:			
a. Audit planning?	_____	_____	_____
b. Use as a substantive test?	_____	_____	_____
c. Overall review of the audit?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
12. Was a consideration made whether analytical procedures performed in planning the audit resulted in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatement due to fraud?	_____	_____	_____
13. Was an evaluation made whether analytical procedures that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud?	_____	_____	_____
14. Did the firm obtain timely and appropriate responses from the auditee's attorney concerning litigation, claims, and assessments? (SAS No. 12 [AU section 337])	_____	_____	_____
15. Have all required engagement forms and documents been completed, signed, and dated?	_____	_____	_____
16. Have all questions, exceptions, or notes, if any, posed during the audit been followed up and resolved, including consideration of the views obtained from responsible officials of the organization, program, activity, or function audited concerning the auditor's findings, conclusions, and recommendations?	_____	_____	_____
17. Did the firm obtain a timely appropriate letter of representation from management? (SAS No. 85, as amended [AU section 333])	_____	_____	_____
18. Does it appear that appropriate consideration was given to all past adjustments and to the risk that the current period's financial statements are materially misstated? (SAS No. 47 [AU section 312])	_____	_____	_____
19. At or near the completion of fieldwork, was an evaluation made whether the accumulated results of auditing procedures and other observations affect the assessment of the risks of material misstatement due to fraud made earlier in the audit?	_____	_____	_____
20. Were errors, fraud, or illegal acts, if any, followed up in accordance with SAS Nos. 99 and 54 (AU sections 316 and 317)?	_____	_____	_____
21. Have reportable conditions, if any, in the internal control been communicated to the audit committee or to individuals with a level of authority and responsibility equivalent to an audit committee in organizations that do not have one? (SAS No. 60 [AU section 325])	_____	_____	_____
22. If required by firm policy, was an appropriate engagement letter issued?	_____	_____	_____
23. Were communications of internal control related matters issued in accordance with SAS No. 60 (AU section 325)?	_____	_____	_____
24. If specialized skills were used (e.g., computer auditing, statistical sampling, etc.), were they properly evaluated by persons with training in these areas? (SAS No. 39 [AU section 350])	_____	_____	_____
25. Did the planning and execution of the engagement include an assessment of the risk of errors and fraud and management's ability to override control procedures? (SAS No. 99 [AU section 316])	_____	_____	_____
26. Was the risk of management override of controls addressed?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
27. Did the audit strategy and expected conduct and scope of the audit reflect the following assessments:			
a. The risk of material misstatement in the financial statements?	_____	_____	_____
b. The risk of management misrepresentation?	_____	_____	_____
28. Was the audit designed to provide reasonable assurance of detecting material misstatements; and when audit test results identified misstatements in the financial statements, was a consideration made whether such misstatements may be indicative of fraud?	_____	_____	_____
29. If it has been determined that an audit adjustment is, or may be, an act of fraud but it has also been determined that the effect on the financial statements would not be material, has the following been performed:			
a. Referral of the matter to an appropriate level of management that is at least one level above those involved?	_____	_____	_____
b. Obtain satisfaction that, in view of the organizational position of the likely perpetrator, the fraud has no implications for other aspects of the audit or that those implications have been adequately considered?	_____	_____	_____
30. If it has been determined that an audit adjustment is, or may be, an act of fraud and the auditor has either determined that the effect could be material or has been unable to evaluate the potential materiality, has the following been performed?			
a. Consideration of the implications for other aspects of the audit.	_____	_____	_____
b. Discussions of the matter and the approach to further investigate the fraud with an appropriate level of management that is at least one level above those involved and with senior management and the audit committee.	_____	_____	_____
c. An attempt to obtain additional evidential matter to determine whether material fraud has occurred or is likely to have occurred, and if so, its effect on the financial statements and the auditor's report thereon.	_____	_____	_____
d. If appropriate, suggestions that the client consult with legal counsel on matters concerning questions.	_____	_____	_____
31. When it has been concluded that an illegal act has or is likely to have occurred, have the following been considered?			
a. The effect on the financial statements.	_____	_____	_____
b. The implications for other aspects of the audit.	_____	_____	_____
c. Communication with the audit committee.	_____	_____	_____
d. The effect on the auditor's report.	_____	_____	_____
32. If the engagement included the use of the work (domestic or international) of another office, correspondent, or affiliate:			
a. Do the instructions to the other office or firm appear adequate?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
b. Does it appear that control exercised over the work of others through supervision and review was adequate?	_____	_____	_____
c. Was there appropriate follow-up of open matters?	_____	_____	_____
d. Were appropriate inquiries made as to its professional reputation?	_____	_____	_____
33. Does the firm's disclosure checklist document that the audit report is properly prepared and that the financial statements are fairly stated?	_____	_____	_____
34. Were matters related to the conduct of the audit communicated to those who have responsibility for oversight of the financial reporting process? (SAS No. 61 [AU section 380])?	_____	_____	_____
35. Was the applicable disclosure checklist completed?	_____	_____	_____

II. Audit Documentation Areas

A. .020 Cash

1. Was due consideration give to cash transactions shortly before and shortly after the balance sheet date to determine that transactions were recorded in the proper period?	_____	_____	_____
2. Were bank accounts confirmed at the audit date and were reconciling items existing at the balance sheet date cleared by reference to subsequent statements obtained directly from the bank?	_____	_____	_____
3. Does the audit documentation indicate that the following were considered?			
a. Restrictions on cash balances.	_____	_____	_____
b. Confirmation of bank credit arrangements such as compensating balances.	_____	_____	_____
c. Review of confirmation responses for indication of related party transactions.	_____	_____	_____
4. Based on the assessed level of control risk, do the substantive tests of cash appear adequate?	_____	_____	_____

B. .030 Receivables

1. Was a summary prepared (or obtained) properly classifying receivables (i.e., notes and accounts receivable; trade; officers, directors, and employees; parent and subsidiary companies; other related party transactions; etc.)?	_____	_____	_____
2. If accounts receivable are not confirmed, has the reason been documented? One of the following is acceptable:			
a. Accounts receivable are immaterial to the financial statements.	_____	_____	_____
b. Use of confirmations would be ineffective.	_____	_____	_____
c. Combined assessed level of inherent and control risk is low (as addressed in the internal control section), and the assessed level, in conjunction with other evidence (analytical procedures or other substantive tests) reduced audit risk to an acceptably low level for applicable financial statement assertions.	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
3. Were accounts receivable confirmations sent out and appropriate follow-up steps taken?	_____	_____	_____
4. If confirmation work was performed prior to year-end, is there evidence that an adequate review was made of transactions from the confirmation date to the balance sheet date?	_____	_____	_____
5. If a significant number and amount of accounts receivable confirmations were not sent out, is there evidence that other auditing procedures were performed?	_____	_____	_____
6. Were significant notes receivable confirmed as of the audit date?	_____	_____	_____
7. Were the results of confirmation procedures summarized in the working papers?	_____	_____	_____
8. Was collateral (if any) for receivables examined with respect to existence, ownership, and value?	_____	_____	_____
9. Were adequate tests made of discounts and allowances?	_____	_____	_____
10. Was the reasonableness of allowances for doubtful accounts covered in the audit documentation and collectibility of receivables adequately considered?	_____	_____	_____
11. Is there evidence in the audit documentation that inquiry was made and consideration given to whether receivables are pledged or factored?	_____	_____	_____
12. Was receivables work coordinated with test of sales including inventory cut-off tests?	_____	_____	_____
13. Are notes receivable accounted for to reasonably represent the present value of the consideration exchanged and at an appropriate interest rate? (APB Opinion No. 21 [AC I69])	_____	_____	_____
14. Based on the assessed level of control risk, do the substantive tests of receivables appear adequate?	_____	_____	_____
C. .040 Inventories			
1. Was an inventory summary prepared (or obtained) showing basis (e.g., "cost," "market," "LIFO," "FIFO," etc.) with respect to the various classifications of inventory (e.g., finished goods, work-in-process, raw materials, etc.)?	_____	_____	_____
2. Where the physical inventory is taken at a date other than the balance-sheet date (or where rotating procedures are used), do the working papers indicate that consideration was given to inventory transactions between the inventory date(s) and the balance-sheet date?	_____	_____	_____
3. Does the audit documentation contain evidence that counts were correctly made and recorded (i.e., was control maintained over inventory tags or count sheets) and were test count quantities reconciled with counts reflected in final inventory?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
4. Does the audit documentation indicate that adequate tests were made of:			
a. The clerical accuracy of inventory footings?	_____	_____	_____
b. Costing methods and substantiation of costs used in pricing all elements (raw materials, work-in-process, finished goods) of the inventory?	_____	_____	_____
5. Does the audit documentation indicate that a lower of cost or market test was performed (including obsolescence)?	_____	_____	_____
6. If perpetual inventory records are maintained, does the audit documentation indicate that differences disclosed by the client's physical inventory (or cycle counts) are properly reflected in the accounts?	_____	_____	_____
7. Was an examination of purchase and sales commitments made, including consideration as to any possible adverse effects?	_____	_____	_____
8. Were appropriate inventory cut-off tests performed?	_____	_____	_____
9. Where applicable, were gross profit percentage tests employed to check overall valuation of inventories?	_____	_____	_____
10. Where the physical inventory in the hands of others was not observed, were inventory confirmations received (i.e., inventory in public warehouses, on consignment, etc.)?	_____	_____	_____
11. Does the audit documentation indicate that steps were performed to determine if any inventory is pledged?	_____	_____	_____
12. Based on the assessed level of control risk, do the substantive tests of inventory appear adequate?	_____	_____	_____
D. .050 Investments			
1. Was a summary schedule prepared (or obtained) and details examined with respect to description, purchase price and data, changes during period, classification of investment income market value, etc., of investments?	_____	_____	_____
2. Were all securities (including stock certificates of subsidiary companies) examined or confirmed?	_____	_____	_____
3. Was investigation made of carrying value and possible cost impairment of investments?	_____	_____	_____
4. Does the audit documentation indicate that consideration was given to indications that investments were pledged?	_____	_____	_____
5. Were financial statements and other information reviewed to support the amounts presented for investments accounted for using the equity method?	_____	_____	_____
6. Does the audit documentation indicate that adequate evidential matter has been accumulated for investments?	_____	_____	_____
7. Based on the assessed level of control risks, do the substantive tests of investments appear adequate?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
E. .060 Prepaid Expenses, Intangible Assets, Deferred Charges, Etc.			
1. Were adequate tests made and/or confirmations received for all material:			
a. Prepaid expenses?	_____	_____	_____
b. Intangible assets?	_____	_____	_____
c. Deferred charges?	_____	_____	_____
d. Other?	_____	_____	_____
2. For prepayments, intangibles, and deferred charges, is there adequate support for deferral and amortization (or lack thereof)?	_____	_____	_____
3. If insurance policies were pledged as collateral or subjected to premium financing, were the related loans properly accounted for?	_____	_____	_____
4. Based on the assessed level of control risk, do the substantive tests of prepaid expenses, intangible assets, deferred charges, etc., appear adequate?	_____	_____	_____
F. .070 Property, Plant, and Equipment			
1. Was a summary schedule prepared (or obtained) to show beginning balances, changes during the period, and ending balances for:			
a. Property, plant, and equipment?	_____	_____	_____
b. Accumulated depreciation?	_____	_____	_____
2. Do tests appear adequate with respect to:			
a. Additions:			
(1) Examination of supporting documents?	_____	_____	_____
(2) Physical inspection?	_____	_____	_____
b. Retirement, etc. (including examination of miscellaneous income, scrap sales, etc.)?	_____	_____	_____
c. The adequacy of current and accumulated provisions for depreciation and depletion?	_____	_____	_____
d. Compliance with control procedures?	_____	_____	_____
e. Status of idle facilities?	_____	_____	_____
3. Do the working papers indicate the presence of liens on property?	_____	_____	_____
4. Were differences between book and tax depreciation reconciled?	_____	_____	_____
5. Was investigation made of possible impairment?	_____	_____	_____
6. Based on the assessed level of control risk, do the substantive tests of property, plant, and equipment appear adequate?	_____	_____	_____
G. .080 Current Liabilities			
1. Were accounts payable adequately tested for propriety?	_____	_____	_____
2. Was an adequate test made of subsequent transactions (i.e., cash disbursements, voucher register entries, vouchers, unpaid invoices, etc.) to determine if any material unrecorded liabilities existed?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
3. Was the payable work correlated with the purchase cutoff examination?	_____	_____	_____
4. Was consideration given to costs and expenses that might require accrual (e.g., compensated absences), and to whether accrued expenses were reasonably stated?	_____	_____	_____
5. Based on the assessed level of control risk, do the substantive tests of liabilities appear adequate?	_____	_____	_____
H. .090 Long-Term Debt			
1. Were confirmations received for significant debt obligations, together with verification of interest rates, repayment period, etc.?	_____	_____	_____
2. Is there evidence that covenants to long-term debt obligations are being complied with?	_____	_____	_____
3. Have leases been examined to determine that capital leases have been properly accounted for?	_____	_____	_____
4. Does the audit documentation include evidence as to compliance with any loan restrictions?	_____	_____	_____
5. Based on the assessed level of control risk, do the substantive tests of long-term debt appear adequate?	_____	_____	_____
I. .100 Deferred Credits			
1. Does the audit documentation indicate that:			
a. The basis of deferring income is reasonable and is on a consistent basis from year to year?	_____	_____	_____
b. Deferrals have been established on a reasonable basis?	_____	_____	_____
2. Based on the assessed level of control risk, do the substantive tests of deferred credits appear adequate?	_____	_____	_____
J. .110 Income Taxes			
1. Were current and deferred tax accrual accounts and related provisions analyzed and reviewed as to adequacy?	_____	_____	_____
2. Does the audit documentation document the determination of the adequacy of the income tax accruals and provisions in accordance with federal, state, local regulations and GAAP and any possible adjustments required for:			
a. Tax positions taken by the client that might be challenged by the taxing authorities?	_____	_____	_____
b. Possible assessments, penalties or interest indicated by tax return examinations completed during the year or in progress, including similar adjustments applicable to years not yet examined?	_____	_____	_____
3. Based on the review of the financial statements and working papers and, if necessary, discussions with engagement personnel, does it appear tax matters were adequately considered?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
4. Based on the assessed level of control risk, do the substantive tests of income taxes appear adequate?	_____	_____	_____
K. .120 Commitments and Contingencies			
1. Does the audit documentation include indication of the following?			
a. Inspection of minutes of meetings of the stockholders, board of directors, and executive and other committees of the board.	_____	_____	_____
b. Inspection of contracts, loan agreements, leases, and correspondence from taxing and other governmental agencies, and similar documents.	_____	_____	_____
c. Accumulation and analysis of confirmation responses from banks and lawyers.	_____	_____	_____
d. Inquiry and discussion with management (including management's written representations concerning liabilities, and litigation, claims, and assessments).	_____	_____	_____
e. Inspection of other documents for possible guarantees by the client.	_____	_____	_____
2. Is there indication that procedures were performed to uncover the need for recording or disclosure of events subsequent to the date of the financial statements?	_____	_____	_____
3. Based on the assessed level of control risk, do the substantive tests of commitments and contingencies appear adequate?	_____	_____	_____
L. .130 Capital Accounts			
1. Were changes in capitalization checked to authorizations?	_____	_____	_____
2. Do the working papers indicate that adequate inquiries were made as to:			
a. Stock options?	_____	_____	_____
b. Warrants?	_____	_____	_____
c. Rights?	_____	_____	_____
d. Redemptions?	_____	_____	_____
e. Conversion privileges?	_____	_____	_____
3. Based on the assessed level of control risk, do the substantive tests of capital accounts appear adequate?	_____	_____	_____
M. .140 Income and Expenses			
1. Were tests made of payrolls, including account distribution?	_____	_____	_____
2. With regard to pension and profit sharing plans (including impact of ERISA), do tests of expenses and liabilities appear adequate?	_____	_____	_____
3. Were revenue and expenses for the period compared with those of the preceding period and reviewed for reasonableness with significant fluctuations explained?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
4. Was adequate consideration given to review of the client's revenue recognition policy and unusual sales transactions?	_____	_____	_____
5. Has adequate consideration been given to loss contingencies in accordance with FASB Statements No. 5 (AC C59)?	_____	_____	_____
6. Based upon the assessed level of control risk, do the substantive tests (review, analysis, and casting) of income and expense appear adequate?	_____	_____	_____
N. .150 Other			
1. Were procedures applied to supplementary information in accordance with SAS No. 52 (AU section 558), as applicable?	_____	_____	_____
2. If the work of a specialist was used, was the effect of the specialist's work on the auditor's report considered in accordance with SAS No. 73 (AU section 336)?	_____	_____	_____
3. Were specific procedures applied for determining the existence of related parties and examining identified related party transactions? (SAS No 45 [AU section 334])	_____	_____	_____
4. Was the guidance in SAS No. 47 (AU section 312) regarding audit risk and materiality considered during the planning and performance of the engagement?	_____	_____	_____

This audit engagement has been completed in accordance with professional standards and firm policy.

AAM Section 9210

Partner's Engagement Review Program

.01

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
a. Were all issues regarding independence considered including policies and procedures and reporting considered?	_____	_____	_____
b. Were all issues relating to assigning personnel to engagements including policies, procedures, scheduling, staffing, and training considered?	_____	_____	_____
c. If outside consultation was required, was proper documentation made and differences resolved in accordance with firm policy?	_____	_____	_____
d. Was engagement planning adequate and did it cover staff and specific industry issues?	_____	_____	_____
e. Were all forms, checklists, and questionnaires adequately completed?	_____	_____	_____
f. Were the financial statements reviewed to ensure compliance with professional standards, authoritative literature, and firm policy?	_____	_____	_____
g. Did the firm comply with its quality review guidelines and firm policy and procedures regarding acceptance and continuance of clients?	_____	_____	_____
h. Were all necessary inquiries and communications with the predecessor accountant made and was the firm satisfied with the responses?	_____	_____	_____
i. Did the firm obtain timely and appropriate responses from the auditee's attorney concerning litigation, claims, and assessments?	_____	_____	_____
j. Have all questions, exceptions, or notes, if any, posed during the audit been resolved, including consideration of the views obtained from responsible officials of the organization, program, activity, or function audited concerning the auditor's findings, conclusions, and recommendations?	_____	_____	_____
k. Did the firm obtain a timely appropriate letter of representation from management?	_____	_____	_____
l. Does it appear that appropriate consideration was given to all past adjustments and to the risk that the current period's financial statements are materially misstated?	_____	_____	_____
m. Were errors, fraud, illegal acts, and reportable conditions adequately followed up and communicated including reporting, communication, other audit effects, legal consultation, etc.?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
n. Does the firm's disclosure checklist document that the audit report is properly prepared and that the financial statements are fairly stated?	_____	_____	_____
o. Were matters related to the conduct of the audit communicated to those who have responsibility for oversight of the financial reporting process?	_____	_____	_____
p. Did the partner sign the In-Charge Engagement Review Program?	_____	_____	_____

This audit engagement has been completed in accordance with professional standards and firm policy.

AAM Section 9220

Partner's Engagement Review Program Supplement for Not-for-Profit Organizations

To be completed in conjunction with Partner's Engagement Review Program [AAM section 9210]

Yes No N/A

I. General Audit Procedures

A. .010 General

[No additional General Audit Procedures are required as part of this supplement.]

II. Working Paper Areas

A. .020 Cash

1. Do the working papers indicate that the following were considered?

a. Confirmation of liabilities and contingent liabilities to banks. _____

b. Authorization for interfund cash transactions. _____

c. Determination that all cash accounts have been identified and appropriately recorded. _____

B. .030 Receivables

1. Were procedures performed to provide evidence that pledged receivables are properly recorded in the appropriate funds? _____

C. .040 Investments

1. Were income and realized and unrealized gains and losses from investments examined for proper allocation to the individual funds? _____

2. Do the working papers indicate that risk of loss on repurchase agreements was properly considered? _____

3. Do the working papers indicate that repurchase security transactions were reviewed for consistency with the disclosures of the terms or circumstances of the transactions? _____

D. .050 Collections of Works of Art and Similar Items

1. If the collection is considered inexhaustible (i.e., exhibits owned by museums, art galleries, botanical gardens, etc.) and has been capitalized, do the working papers indicate that the auditor tested the reasonableness of the collection's carrying value? _____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
2. If the collection is considered exhaustible and has been capitalized, do the working papers indicate that the auditor tested the reasonableness of the collection's carrying value and related amortization?	_____	_____	_____
3. Are the tests adequate with respect to acquisitions and deaccessions?	_____	_____	_____
4. If the collection is capitalized:			
a. Were physical inventories observed at all locations where relatively large amounts are located?	_____	_____	_____
b. Do the working papers contain evidence that counts were correctly made and recorded (i.e., was control over inventory tags or count sheets maintained) and were test count quantities reconciled with the quantities reflected in the final inventory?	_____	_____	_____
5. If the collection is considered inexhaustible and has been capitalized, do the working papers indicate that the auditor:			
a. Evaluated the internal controls over the collection?	_____	_____	_____
b. Observed a physical inventory at all locations where large amounts are located?	_____	_____	_____
6. Based on the assessed level of control risk, do the substantive tests of collections of works of art and similar items appear adequate?	_____	_____	_____
E. .060 Property, Plant, and Equipment			
1. Was a review made to determine that capital expenditures are classified in the proper fund accounts?	_____	_____	_____
F. .070 Liabilities			
1. Were liabilities properly classified as current or long-term and in the proper fund?	_____	_____	_____
2. Were procedures performed to determine whether tax deferred annuity plans are appropriately calculated to conform with GAAP and IRS regulations?	_____	_____	_____
3. Was consideration given to any liabilities (including the effect of any temporary differences) resulting from the federal excise tax on investment income and any federal and state taxes on unrelated business income?	_____	_____	_____
4. Do the tests of interfund borrowings appear adequate with respect to:			
a. Legal restrictions, if any, on such borrowings?	_____	_____	_____
b. Authorization?	_____	_____	_____
c. Classification?	_____	_____	_____
d. Collectibility of amounts due from other funds?	_____	_____	_____
e. Appropriateness of interest accruals and payments?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
G. .080 Deferred Revenue			
1. Do the working papers indicate that consideration was given to whether the basis of deferring revenue is reasonable and consistent with the donors' or grantors' restrictions?	_____	_____	_____
2. Was consideration given to matching requirements, if any?	_____	_____	_____
3. Do the working papers indicate that consideration was given to the appropriateness of the amounts of restricted gifts, grants, bequests, donations, or other income recognized as current revenue or support?	_____	_____	_____
4. Based on the assessed level of control risk, do the substantive tests of deferred revenue appear adequate?	_____	_____	_____
H. .090 Commitments and Contingencies			
1. Did the auditor consider evidence of the entity's activities (such as lobbying) which might cause the entity to lose its tax exempt status or be subject to penalties or taxes?	_____	_____	_____
2. If the entity is a private foundation, as defined by IRC section 509, did the auditor determine whether the entity complied with IRS regulations concerning required distribution of income and prohibited activities?	_____	_____	_____
I. .100 Fund Balance			
1. Where appropriate, were authorizations of changes in reserves and designated balances examined?	_____	_____	_____
2. Do the working papers indicate that there were adequate inquiries, where appropriate, as to proper classification, description and disclosure of components of the fund balance?	_____	_____	_____
3. Do the working papers indicate that fund transfers were properly approved and recorded?	_____	_____	_____
4. If an endowment fund is maintained, do the working papers indicate that fund income is distributed to unrestricted and restricted funds in accordance with donors' stipulations?	_____	_____	_____
5. Based on the assessed level of control risk do the substantive tests of fund balances appear adequate?	_____	_____	_____
J. .110 Revenues, Expenses, Support, and Capital Additions			
1. Were revenues and expenses for the period compared with those of the preceding period and reviewed for reasonableness and were significant fluctuations explained?	_____	_____	_____
2. Was adequate consideration given to:			
a. The entity's revenue recognition policy?	_____	_____	_____
b. Income recognition on transactions where the earnings process is not complete?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
3. Do the working papers indicate that consideration was given to the valuation and classification of revenue derived from service fees, such as subscription and membership income, and sales of publications and other items?	_____	_____	_____
4. If the entity is reimbursed by a third party for costs incurred in connection with providing services to others:			
a. Were pertinent sections of significant third party contracts reviewed to determine the basis for reimbursement?	_____	_____	_____
b. Were cost reimbursement reports and the underlying support reviewed?	_____	_____	_____
c. Were appropriate allocations made of indirect costs among the entity's programs?	_____	_____	_____
5. Do the working papers indicate that the auditor considered actual receipt of, rights to, and any restrictions placed on amounts received during the current period from:			
a. Cash contributions?	_____	_____	_____
b. Donated services?	_____	_____	_____
c. Gifts of securities, materials, facilities, and other nonmonetary items?	_____	_____	_____
d. Future interests and interest free loans?	_____	_____	_____
6. If expenses are classified by function, did the auditor adequately test the classifications and allocations?	_____	_____	_____
7. If grants are awarded to other organizations, did the auditor review:			
a. The classification of the grants?	_____	_____	_____
b. The effects of the grantees' compliance or noncompliance with performance requirements?	_____	_____	_____
8. Were tests of payrolls performed, including account distribution?	_____	_____	_____
9. With regard to pension plans, do the tests made of the expense and liabilities appear adequate?	_____	_____	_____
10. Based upon the assessed level of control risk, did the substantive tests (review, analysis, and testing) of revenues and expenditures/expense appear adequate?	_____	_____	_____
K. .120 Other			
1. If the entity is affiliated or otherwise financially related to other entities, did the auditor consider the need for combined financial statements or disclosure of the relationship?	_____	_____	_____

Yes No N/A

III. Audits of Governmental Grantees

Note: These questions are derived from the U.S. General Accounting Office's (GAO) *Government Auditing Standards* ("Yellow Book") and the Office of Management and Budget, Circular A-110 (*Uniform Administrative Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations*). Note that the GAO is in the process of revising its auditing standards during 2003. Readers should be alert to these changes and follow the revised requirements as applicable. This section will be updated in the future when the new standards are published and effective.

A. .130 General

1. If the audit was required to be conducted in accordance with the *Government Auditing Standards*, do the auditor's report(s) include references to *Government Auditing Standards*, and appropriately cover:
 - a. The financial statements, including, where presented, the combining and individual fund financial statements? _____
 - b. Tests of controls based solely on the evaluation of the effectiveness of the controls made as part of the audit of the financial statements? _____
 - c. Compliance with finance-related legal and contractual provisions, including a summary of questioned costs and/or instances of noncompliance? _____
 - d. Instances or indications of illegal acts that could result in criminal prosecution of the top officials of the entity arranging the audit? _____
2. If required, did the auditor's report on internal control identify:
 - a. The scope of the auditor's work in obtaining an understanding of the internal control structure and in assessing control risk? _____
 - b. The entity's significant internal control structure including those controls established to ensure compliance with laws and regulations that have a material impact on the financial statements? _____
 - c. The reportable conditions, including the identification of material weaknesses identified as a result of the auditor's work in understanding and assessing control risk? _____
3. If required, did the auditor's report on compliance include:
 - a. A statement of positive assurance with respect to those items tested for compliance with applicable laws and regulations? _____
 - b. Negative assurance on those items not tested? _____
 - c. A summary of material instances of noncompliance? _____
4. If required by contractual obligations, were findings presented in accordance with the guidance in the *Government Auditing Standards* regarding reporting on economy and efficiency audits and program results audits? _____
5. Was interfund activity properly reviewed and were differences between total interfund receivables and total interfund payables investigated and resolved? _____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
6. If applicable, were adequate tests of controls with applicable laws and regulations made?	_____	_____	_____
7. Were all reportable conditions in the internal control structure and all identified instances of noncompliance with applicable laws and regulations:			
<i>a.</i> Adequately evaluated and documented?	_____	_____	_____
<i>b.</i> Appropriately reported in accordance with applicable standards? (SAS No. 60 [AU section 325]; GAO's <i>Government Auditing Standards</i> , paragraphs 5-26 through 5-28; OMB A-110, Attachment F)	_____	_____	_____
8. Do the working papers indicate that consideration was given to prior audits of government financial assistance programs that disclosed questionable or disallowed costs, or instance of noncompliance?	_____	_____	_____

This audit engagement has been completed in accordance with professional standards and firm policy.

Partner's Engagement Review Program Supplement for Banks

To be completed in conjunction with Partner's Engagement Review Program [AAM section 9210]

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
I. General Procedures			
A. .010 General			
1. Were banking and other appropriate regulations considered in planning the audit engagement?	_____	_____	_____
II. Working Paper Areas			
A. .020 General			
1. Does the audit documentation document the consideration of the results of inquiries, readings, excerpts or other evidence of an understanding of regulatory examinations, their findings and actions and the recognition of the above in planning the audit?	_____	_____	_____
2. Did the engagement team obtain an adequate understanding of those factors that have a significant effect on the bank's business (i.e., interest rates, liquidity, off-balance sheet financing)?	_____	_____	_____
3. If the client engaged in the following types of transactions, was there a review of the propriety of the accounting and recording for:			
a. Loan originations?	_____	_____	_____
b. Loan commitments?	_____	_____	_____
c. Fees?	_____	_____	_____
d. Loan refinancing and restructuring?	_____	_____	_____
e. Transfers between investment accounts?	_____	_____	_____
f. Wash sale transactions?	_____	_____	_____
g. Hedging transactions, including interest rate swaps and interest rate futures?	_____	_____	_____
h. Coupon stripping?	_____	_____	_____
i. Adjusted price forward placement trades?	_____	_____	_____
j. Reposition swaps?	_____	_____	_____
k. Repos to maturity?	_____	_____	_____
l. Dollar repos?	_____	_____	_____
m. Commitments for the purchase or sale of securities?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
n. Industrial development bonds?	_____	_____	_____
o. Purchase or sale of options?	_____	_____	_____
p. Purchase or sale of securities?	_____	_____	_____
4. Did audit planning and the implementation of audit procedures adequately consider:			
a. Off-balance sheet transactions?	_____	_____	_____
b. The appropriate accounting for investments?	_____	_____	_____
c. Related party transactions?	_____	_____	_____
d. Regulatory examination reports?	_____	_____	_____
e. Regulatory agreements?	_____	_____	_____
f. Apparent fraud and insider abuse?	_____	_____	_____
5. Did the engagement team consider the risks to the bank of possible violations of regulations?			
6. Was the following considered in connection with foreign exchange transactions?			
a. Reasonable assurance that material commitments and contingent liabilities related to international operations have been properly recorded and disclosed.	_____	_____	_____
b. Reasonable assurance that gains and losses from foreign exchange activities of the international department are properly recorded and disclosed.	_____	_____	_____
B. .030 Cash			
1. Were bank accounts in the financial institutions confirmed at the audit date and were reconciling items existing at the balance-sheet date cleared by reference to subsequent statements obtained directly from the financial institutions?	_____	_____	_____
2. Does the audit documentation indicate that the following were considered?	_____	_____	_____
a. Confirmation of liabilities and contingent liabilities to other banks.	_____	_____	_____
b. Proper recording of interest.	_____	_____	_____
3. Does the audit documentation indicate whether cash on hand represents currency and coins on hand?	_____	_____	_____
4. Was it determined whether clearings, exchanges and in-transit items represent valid claims against the drawee bank?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
5. Does the audit documentation reflect whether cash items (checks cashed after close of business, maturing coupons and bonds, returned checks and other items held temporarily pending their liquidation) are properly classified?	_____	_____	_____
C. .040 Investment and Trading Securities			
1. Does the audit documentation indicate physical evidence of the ownership of securities on hand or held in custody or safekeeping by others for the account of the bank?	_____	_____	_____
2. Does the audit documentation indicate whether interest and dividend income and security gains and losses were properly recorded?	_____	_____	_____
3. Does the audit documentation indicate whether investments have suffered a permanent reduction in recorded value?	_____	_____	_____
4. Does the audit documentation indicate whether allowances for losses have been provided where necessary?	_____	_____	_____
5. Does the audit documentation indicate whether securities have been properly classified and valued?	_____	_____	_____
6. Does the audit documentation indicate whether amounts for investment securities and the related income, gains and losses are properly presented in the financial statements?	_____	_____	_____
7. Were substantive tests of investment securities adequate based on the assessed level of control risk?	_____	_____	_____
D. .050 Federal Funds and Repurchase/Reverse Repurchase Agreements			
1. Does the audit documentation indicate whether federal funds and repurchase/reverse repurchase agreements represent valid claims against the borrower or obligations to the lender?	_____	_____	_____
2. Does the audit documentation indicate whether amounts shown on the financial statements are properly classified and described?	_____	_____	_____
3. Based on the assessed level of control risk were substantive tests of federal funds and repurchase/reverse repurchase agreements and trading securities adequate?	_____	_____	_____
E. .060 Loans			
1. Was an evaluation of the adequacy of the allowance for loan losses and the selection of loans to be evaluated performed and documented?	_____	_____	_____
2. Did the evaluation in 1 above include:			
a. The bank's lending policies and procedures including its control over loan file documentation and maintenance?	_____	_____	_____
b. Consideration of the qualification of the bank loan officers?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
c. Consideration of the effectiveness of the bank's internal audit and loan review program?	_____	_____	_____
d. Consideration of the results of prior years' examinations and industry statistics?	_____	_____	_____
e. Consideration of overall portfolio mix (industry and location), loan loss experience, and charge-off policy?	_____	_____	_____
3. Was consideration given to the relative degrees of inherent risk, by type, for: unsecured, depressed areas or industries; concentration or political risk; geographic or economic risks?	_____	_____	_____
4. Was consideration given to the participations purchased or sold?	_____	_____	_____
5. Was consideration given to overdrafts?	_____	_____	_____
6. Was consideration given to the accounting for and disclosures of related party transactions?	_____	_____	_____
7. Was consideration given to the extent to which loan renewals and extensions are used to maintain loans on a current basis?	_____	_____	_____
8. Was consideration given to appraisals obtained on originations and foreclosures, including the qualifications, independence and findings of the appraisers?	_____	_____	_____
9. Was consideration given to the disclosure of indirect liabilities?	_____	_____	_____
10. Were management's responses to discussions concerning the adequacy of the allowance appropriate?	_____	_____	_____
11. Was consideration given to the propriety of acquisition, development, and construction loans?	_____	_____	_____
12. Was consideration given to the use of watch lists, delinquency reports and other sources of potential problems?	_____	_____	_____
13. Were individual loan files reviewed, including borrowers financial statements, evidence of collateral and cash flow information?	_____	_____	_____
14. Did the final assessment of the adequacy of loan losses consider specific loans and historical trends?	_____	_____	_____
15. Was there comprehensive documentation to 14 above?	_____	_____	_____
16. If real estate or other assets acquired through foreclosure were significant to the client:			
a. Was the carrying value at the time of foreclosure evaluated and properly classified in the financial statements?	_____	_____	_____
b. Was the continuing carrying value assessed?	_____	_____	_____

	<u>Yes</u>	<u>No</u>	<u>N/A</u>
c. Were loans restructured by the client reviewed for proper recording?	_____	_____	_____
17. For loans, was the following considered?			
a. The bank's compliance with its internal control, i.e., approval, reports, documentation, disbursement, and collection.	_____	_____	_____
b. Selection of a sample from all significant loan areas.	_____	_____	_____
c. Did the tests include executed notes, loan applications, financial statements of borrowers, chattels, other credit information and approvals.	_____	_____	_____
d. Confirmation with bank customers.	_____	_____	_____
e. Proper accounting recognition of unearned income, interest income, recognition of acquisition and other fees such as "points".	_____	_____	_____
f. Tests of interest income to average loan balance and yield to interest rates in effect.	_____	_____	_____
g. Testing of related party transactions and conflicts of interest.	_____	_____	_____
h. Testing of the bank's credit card operations.	_____	_____	_____
i. Testing of lease financing operations.	_____	_____	_____
j. Testing of loan participations.	_____	_____	_____
k. Review of underlying collateral.	_____	_____	_____
18. Based on the assessed level of control risk, were substantive tests of loans adequate?	_____	_____	_____
F. .070 Deposits			
1. Does the audit documentation indicate whether deposits are recorded at the proper amounts, segregated as to type and represent valid claims?	_____	_____	_____
2. Was it determined whether the related accrued interest and interest expense is stated on a reasonable and consistent basis?	_____	_____	_____
3. Was it determined whether the amounts shown on the financial statements are properly classified and adequately described?	_____	_____	_____
4. Based on the assessed level of control risk were substantive tests of deposits adequate?	_____	_____	_____

AAM Section 9500

Report Processing

Drafting the Report

.01 This section provides guidance for preparing and processing the financial statements and notes and the appropriate auditor's report.

.02 Auditors should establish policies and procedures that would define responsibility regarding the preparation and review of the financial statements and the notes thereto and preparation of the auditor's report. (See AAM section 10,100 for a detailed discussion of the auditor's report.)

Uniformity

.03 Strict uniformity may stifle creative thinking, but a consistent format adds quality to the financial statement notes and auditor's report (the "report").

- a. The client's name should appear at the top of every statement with identical spelling and punctuation. The certificate of incorporation should be inspected to determine the exact name of the corporation. Accuracy in seemingly small matters, such as whether "the" is part of the name, the word "Company" or "Incorporated" is abbreviated or spelled out, or commas are part of the name, is important to the accountant's reputation.
- b. Descriptive phraseology should be uniform. If the phrase "cost of goods sold" is used in the income statement, then a schedule of these costs should show "cost of goods sold," not "cost of sales."
- c. The manner in which the date or period covered is indicated should also be uniform. If the income statement is headed "for the year ended December 31, 20___," then all supporting schedules should be headed that way, rather than "for the year 20___."
- d. Schedule and statement headings should conform to a pattern. For example, if "schedule of cost of goods sold" is used, then all other schedules should begin with "schedule of."
- e. Statement and schedule headings should be the same in the letter, table of contents, index, and other references.
- f. Each page should be well balanced, paragraphs should break in the right places, tables should be centered and not broken except when a table is longer than a page, page numbers should be in the same place on each sheet, type should be clean and alignment even, and there should be no "strikeovers" or visible erasures.

- g. As part of firm policy, the following should be standardized:

Title	Captions
Indexing	Spacing
Salutation	Indentation
Page Numbering	Paragraphing
Closing and Signing	Capitalization
Dating	Underscoring
Whole Dollar Reporting	Punctuation
Headings	Dollar Signs

Double or Single Spacing

Draft of Report

.04 In some cases a draft of the report, clearly identified as a draft, can be used effectively to afford the client an opportunity to comment on the report before it is in final form.

Report Production

.05 A *report guide sheet* usually accompanies all reports submitted for processing. Included in the report guide sheet is the basic information which relates to the specific client, such as:

- a. Client name
- b. Audit date
- c. Engagement partner and manager
- d. Date audit commenced
- e. Date audit completed
- f. Date report submitted for review
- g. Date review completed
- h. Date submitted for typing
- i. Date submitted for checking
- j. Date sent to client
- k. Special comments, such as "rush," "date promised to client," and "hold for confirmation."

.06 The purpose of the report guide sheet is to enable the audit team to know the status of the report at all times, and to ascertain if there are any time lags in the processing of the report. The following procedures are used in its preparation.

Engagement information. The in-charge accountant enters the engagement information, delivery instructions, and "hold items" (items to be cleared prior to releasing report). He signs the report guide sheet as initial reviewer.

Review. The report is approved at various levels or review. If there is more than one reviewer (for example, two department reviewers for phases of a large job), the primary reviewer should sign the report guide sheet. If another partner or manager performed the entire review in the absence of the primary reviewer, then such other reviewer should sign the report guide sheet as overall reviewer.

Processing. The various processing levels are signed off. If more than one typist is involved, the head of the typing department or the primary typist may sign the report guide sheet. If more than one person is involved in comparing and proofing, the person primarily responsible should sign the report guide sheet. The review partner or his delegate should sign as final reader.

Final release. The person who signs for final release must ascertain that all other required signatures are on the report guide sheet before releasing the report.

Report production. The reverse side of the report guide sheet is usually completed by the in-charge accountant. A photocopy may be given to the report production department as advance notice of production requirements (for example, where numerous printed covers will be needed).

.07 The report guide sheet is bound with the operating office's file copy of the report. With the busy atmosphere prevailing at most firms, it is of vital importance that all work as it moves through the production process be under tight control independent of the work product and its guide sheet.

.08 A simple schedule can be maintained to control the flow of work from the date an audit engagement is begun to the date the report is finally mailed to the client. The schedule has key items arranged in columnar form and can be maintained by the office manager or another person in charge of staff assignments. Frequent references to the schedule should reveal any unusual delays in completing an engagement or typing a report.

.09 To account for each report from the time it is placed for typing to the time it is mailed or delivered to the client, some firms maintain a record in the typing department, in place of or as a supplement to the foregoing record. (See Report Production Control in AAM section 9500.13.)

.10 If this record indicates any time lags, the matter should be investigated; it may indicate either an abnormal backlog of work or some other problem.

.11 In preparing the report production control form, the following procedures are suggested:

- It should be manually prepared and updated daily by a control clerk.
- It should be retained in a notebook in a readily accessible location so that audit personnel can check report status without interfering with review and production operations.
- When a report and related workpapers are received by the reviewer, the client name, report description, fiscal year end, report-letter date, and due date should be entered.
- The review partner should assign a reviewer and record the date forwarded to the reviewer and the forwarding date for tax review.
- The person's name to whom the report is given for rework (if required) should be entered and the dates forwarded for tax and audit reviews of rework are recorded (if required).
- Other dates should be recorded through final release.

.12

Signing Reports

.14 After the report has been reviewed, typed, proofread, and corrected, it is usually submitted to a partner for reading and signature.

.15 Some firms do not bind the report until after it is signed. This saves unbinding in case the signing partner orders any revisions. In offices where the reports have been sufficiently and systematically reviewed and referenced before or after typing, they may be submitted to the partner for his signature in final bound form. This saves time and additional handling.

.16 The transmittal letters and addressed envelopes should be submitted to the partner with the reports. This gives him an opportunity to review the mailing directions, so that reports are directed to the proper person.

.17 Report letters are usually signed by a partner using the firm name. Where reproducing equipment is used, a signature on the original is sufficient. It is important to establish rules applying to report signatures since all reports (add correspondence) issued to clients carry with them the reputation, authority, and responsibility of the firm.

Delivery of Completed Work

.18 Audit reports are rightfully considered by clients to be confidential documents. For this reason, care should be taken to address them to a responsible person, usually the treasurer or principal executive, in an envelope clearly marked "confidential." Where there is some question as to the person or persons to whom the report should be delivered, address it to the specific source of authority authorizing the report. In a majority of cases, especially for recurring engagements, the reports are mailed. However, some firms make it a practice to have a partner deliver the report personally and discuss it with the client.

.19 The report should be mailed in envelopes or boxes sturdy enough to withstand the rough treatment they may receive in transit.

.20 Many firms send separate transmittal letters with their reports. The letter should contain no comments on the report because it might be construed as a modification of the opinion on the report. It is advisable to write a letter requesting that a printer's proof be submitted to the accounting firm for review before any printed reports are released by the client to stockholders or the public.

.21 Reports are generally issued only to the client who engaged the services. The unauthorized distribution of a report represents a violation of the confidential relationship between a firm and its client. Firms are sometimes asked by clients to mail copies of their reports directly to third parties. Clients should be discouraged from making such requests. In rare instances, where a firm assumes this added responsibility, distributions are made only upon specific written instruction from the client, and reference to the client's instructions should be included in the transmittal to the third party. Printed annual reports to shareholders, prospectuses, and other reports that are a matter of public record, such as those filed with certain governmental agencies, are obvious exceptions to this rule.

AAM Section 10,000

Accountants' Reports

These examples are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of departure when drafting reports to meet their individual needs. This manual is a nonauthoritative kit of practice aids and accordingly, does not include extensive explanation or discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate.

These examples illustrate the body of various reports. For comment on addressing and dating of the report, see AAM section 10,100.

Examples which are assembled from illustrative reporting language set forth in Statements on Auditing Standards (SASs) and Statements on Standards for Accounting and Review Services (SSARs) include citation of the particular source and its location in *AICPA Professional Standards*.

Scope Limitation—Inventory and GAAP Departure—Capitalized Lease Obligations03

<i>Section</i>	<i>Paragraph</i>
10,240 Qualified Opinions010-.080
Scope Limitation—Investment in Foreign Affiliate (Assuming Effects Are Such That Qualification Rather Than Disclaimer Is Appropriate)010
Departure from GAAP—Leases Not Capitalized020
Departure from GAAP—Leases Not Capitalized—Pertinent Facts Disclosed in Note030
Inadequate Disclosure—Omission of Disclosures040
Inadequate Disclosure—Omission of Statement of Cash Flows050
Change in Accounting Principle Without Reasonable Justification060
Change in Accounting Principle Not in Conformity with Generally Accepted Accounting Principles070
More than One Reason—Qualified Opinion on Prior Year’s Financial Statements With the Current Year Qualified for the Same Reason and an Additional Reason080
10,245 Information Accompanying Audited Financial Statements010-.110
Omission of Supplementary Information Required by the FASB010
Omission of Supplementary Information Required by the GASB015
Material Departures From FASB Guidelines on Supplementary Information020
Material Departures From GASB Guidelines on Supplementary Information025
Prescribed Procedures Not Completed Regarding Supplementary Information Required by the FASB030
Prescribed Procedures Not Completed Regarding Supplementary Information Required by the GASB035
Unresolved Doubts About Adherence to Guidelines Regarding Supplementary Information Required by FASB040
Unresolved Doubts About Adherence to Guidelines Regarding Supplementary Information Required by GASB045
Report on Accompanying Information050
Disclaimer on Accompanying Information (Not Audited)060
Disclaimer on Part of the Accompanying Information (Not Audited)070
Qualification on Basic Financial Statements and Accompanying Information (Departure From GAAP)080
Supplementary Information Required by the FASB Included in Auditor-Submitted Document090
Supplementary Information Required by the GASB Included in Auditor-Submitted Documents095
Consolidating Information Not Separately Audited100
Unqualified Opinion on Selected Financial Data in a Client-Prepared Document That Includes Audited Financial Statements110
10,250 Engagements to Report on Internal Control010-.170
Accountant’s Report When Expressing an Opinion Directly on the Effectiveness of an Entity’s Internal Control as of a Specified Date010
Accountant’s Report When Expressing an Opinion on a Written Assertion About the Effectiveness of an Entity’s Internal Control as of a Specified Date020
Modified Report With Explanatory Language, That a Practitioner Should Use When There Is a Material Weakness in an Entity’s Internal Control and, Based on Its Significance and Its Effect on the Achievement of the Objectives of the Control Criteria, the Practitioner Concludes That a Qualified Opinion Is Appropriate030
Adverse Opinion When a Material Weakness in Internal Control Exists and, in the Practitioner’s Judgment, the Material Weakness(es) Is (Are) So Pervasive That the Entity’s Internal Control Over Financial Reporting Does Not Achieve the Control Objectives040

<i>Section</i>	<i>Paragraph</i>
10,250 Engagements to Report on Internal Control—continued	
Qualified Opinion on the Effectiveness of an Entity's Internal Control, or Written Assertion Thereon, Due to a Scope Limitation050
Disclaimer of Opinion When Restrictions That Significantly Limit the Scope of the Examination Are Imposed by the Client or the Responsible Party060
Unqualified Opinion When the Practitioner Decides to Make Reference to the Report of Another Practitioner as a Basis, in Part, for the Practitioner's Opinion070
Unqualified Opinion on the Effectiveness of Only a Segment of an Entity's Internal Control080
Unqualified Opinion About the Suitability of Design of the Entity's Internal Control090
Unqualified Opinion Based on an Examination on the Adequacy of an Entity's Internal Control Over Financial Reporting Based on Criteria Established by a Regulatory Agency That Are Not Suitable for General Use100
Communication of Internal Control Matters Noted in an Audit110
Communication of Internal Control Related Matters Noted in an Audit When One or More Reportable Conditions Were Identified, but None Is Deemed to Be a Material Weakness120
Report on Controls Placed in Operation at a Service Organization130
Report on Controls Placed in Operation at a Service Organization and Tests of Operating Effectiveness140
Reports on Internal Control Required by SEC Rule 17a-5150
Letter to SEC When the Broker-Dealer Has Not Made the Required Notification160
Independent Auditor's Report on Internal Control Required by Regulation 1.16 of the Commodity Futures Trading Commission170

AAM Section 10,100

Format of Accountants' Reports

Report Preparation

.01 Firms should develop standard policies and procedures for preparing and issuing reports. The following are some suggested report preparation policies:

- *Letterhead.* The report should be presented on firm letterhead.
- *Addressee.* The report should be addressed to the board of directors, stockholders, partners, general partner, proprietor, or to the company whose financial statements are being audited. If the firm was engaged by others, the report should be addressed thereto.

The Board of Directors
XYZ Credit Union
City, State Zip Code

- *Salutation.* A salutation should not be included on the report.
- *Report signing.* The firm name should be manually signed by the engagement partner. The words "Certified Public Accountants" should be excluded from the signature if they are a normal part of the firm's letterhead.
- *Report dating.* Audit reports should be dated as of the last day of field work.
 - The date should be presented at the bottom of the page along with the city and state, if not included in firm letterhead, as follows:

City, State
April 5, 20XX

- If significant subsequent events are discovered before the report is issued, but after the completion of field work, the report should be dual-dated for the subsequent event.
- Subsequent events affecting previously issued reports that are being reissued will also cause the report to be dual-dated. The following illustrates dual-dating:

City, State
February 26, 20XX, except for Note X as to which the date is
April 5, 20XX

- *Level of service.* The level of service performed and the nature of the report are typically outlined in the engagement letter. The letter should be revised for any significant changes from the original understanding with the client, such as, in the event of a step-up or step-down in the level of service.
 - The partner should approve any step-up or step-down in level of service. A step-up in level of service may occur after obtaining a revised understanding with the client. A step-down in level of service should occur only after carefully evaluating the reasons for the change because the reasons for the change may also affect the report on lower levels of service. Limitations on the scope of an audit, for example, may also preclude issuing a review or compilation report.
 - If more than one level of service is performed for financial statements of the same period (e.g., compilation and audit), the financial statements need only be accompanied by the report on the highest level of service performed.

Reports on Audited Financial Statements

.02 Generally accepted auditing standards (GAAS) establish reporting responsibilities. The four standards of reporting stated in AU section 150.02 are:

- a. The report shall state whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).
- b. The report shall identify those circumstances in which GAAP has not been consistently applied in the current period in relation to the preceding period.
- c. Informative disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report.
- d. The report shall contain either an expression of opinion regarding the financial statements taken as a whole, or a statement that an opinion cannot be expressed. When an opinion cannot be expressed, the reasons should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility, the auditor is taking.

Standard Report

.03 The standard auditor's report prescribed by SAS No. 58, *Reports on Audited Financial Statements*, as amended by SAS No. 79, *Amendment to Statement on Auditing Standards No. 58, Reports on Audited Financial Statements*, SAS No. 93, *Omnibus Statement on Auditing Standards—2000*, and SAS No. 98, *Omnibus Statement on Auditing Standards—2002* (AU section 508), should be used when the auditor has formed an opinion, based on the application of GAAS,* that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in accordance with GAAP. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles). It should address all financial statements presented. A standard auditor's report for the presentation of comparative financial statements is illustrated in AAM section 10,210.010.

Modifications of the Standard Auditor's Report

.04 SAS No. 58 (AU section 508), as amended, describes situations that may require auditors to modify the standard report, and also provides illustrations of the appropriate modifying language. These modifications, which are discussed in greater depth in the following sections, are:

- *Explanatory language.* A wide variety of situations may arise that require a modification of the standard auditor's report, without affecting the expression of an unqualified opinion. Some of the more common of such situations are going-concern problems, part of the financial statements have been audited by another auditor, or a significant change in accounting principles. The explanatory paragraph for situations that do not affect the auditor's opinion should be placed after the opinion paragraph.
- *Qualified opinion.* Qualified opinions result from two general categories of situations: scope limitations and departures from GAAP. A scope limitation arises when the auditor has been unable to perform all of the auditing procedures he or she believes are necessary to express an unqualified opinion on the financial statements. Financial statements containing a material departure from GAAP, including inadequate disclosures in the financial statements, may lead the auditor to qualify his or her opinion. Both situations require that an explanatory paragraph, preceding the opinion paragraph, be included that describes the nature of the scope limitation or the departure from GAAP.

* SAS No. 93, *Omnibus Statement on Auditing Standards—2000*, requires an identification of the United States of America as the country of origin of those standards (for example, auditing standards generally accepted in the United States of America or U.S. generally accepted auditing standards).

- *Disclaimer of opinion.* A disclaimer of opinion may be required when:
 - The scope of the audit has been restricted so significantly that the auditor does not have a basis for forming an opinion on the financial statements. In this case, an explanatory paragraph, preceding the disclaimer paragraph, should be included in the auditor's report to explain all significant reasons for the disclaimer.
 - The auditor is not independent, in which case a one-paragraph disclaimer is issued (applies for publicly held entities only). A compilation report with a lack of independence noted should be issued for nonpublic entities.
- *Adverse opinion.* An adverse opinion should be expressed on financial statements that do not present fairly the entity's financial position, results of operations, or cash flows in conformity with GAAP. In other words, the auditor concludes that the financial statements are *not* fairly presented in accordance with GAAP. Issuance of an adverse opinion requires inclusion of an explanatory paragraph, preceding the opinion paragraph, that explains all of the reasons for the adverse opinion and, if practicable, the effects of the subject matter of the adverse opinion on the financial statements.

Scope Limitations

.05 Restrictions on the scope of an audit, whether imposed by the client or by circumstances such as the timing of the auditor's work, the inability to obtain sufficient, competent evidential matter, or an inadequacy in the client's accounting records, may require a qualified opinion or a disclaimer of opinion. Deciding whether to qualify or disclaim is a matter of judgment, and generally the primary factor in this decision is the materiality of the financial statement items affected. However, other factors should be considered, such as the pervasiveness of the effects of the omitted auditing procedures and the nature of the financial statement items affected.

Departures From GAAP

.06 Unacceptable Principles. Significant departures from GAAP require that the auditor issue either a qualified or adverse opinion. Choosing between a qualified or adverse opinion depends on the magnitude of the departure. While the materiality of the effects of the departure is a primary consideration, the auditor should also consider the pervasiveness of the departure, such as the number of financial statement items affected, the importance of the departure to the organization's activities and its ability to obtain funding, and the dollar effect of the departure on individual financial statement items as well as the statements as a whole.

.07 For both qualified and adverse opinions, an explanatory paragraph should be included, preceding the opinion paragraph, that describes all of the substantive reasons for the auditor's opinion, and the effects on the financial statements, if readily determinable. If it is not practical to determine the effects of the departure, the explanatory paragraph should contain a statement to that effect. If information about the effects of the departure are described in the notes, the explanatory paragraph can be shortened by referring to the note.

.08 Inadequate Disclosure. Departures from GAAP include not just inappropriate application of accounting principles, but also omitted or inadequate disclosures in the financial statements. Such situations require the auditor to add an explanatory paragraph, preceding the opinion paragraph, that describes the nature of the inadequate or omitted disclosure and, if practical, the information that should have been disclosed. The significance of the omitted or inadequate disclosure will determine whether a qualified or adverse opinion is appropriate.

.09 Report Modification. The opinion paragraph for a qualified opinion due to a departure from GAAP should include the words "except" or "exception" and a reference to the explanatory paragraph that describes

that departure. Adverse opinions should include language such as “do not present fairly” and should also include a reference to the explanatory paragraph. A qualified opinion indicating a departure from GAAP is presented in AAM section 10,240.020. An adverse opinion indicating a departure from GAAP is presented in AAM section 10,220.01.

Errors, Fraud, and Illegal Acts

.10 If the financial statements are materially affected by an error, fraud or illegal act that has not been properly accounted for and disclosed, a qualified or adverse opinion should be considered. If the auditor is precluded from applying necessary procedures or from obtaining sufficient information to conclude whether an error, fraud or illegal act that could be material to the financial statements has occurred, a qualified or disclaimer of opinion should be issued. All such matters should be discussed immediately with the engagement partner.

.11 If a client will not accept modification of the report under the circumstances above, the firm should consider withdrawing from the engagement and consulting with legal counsel.

Consistency Exceptions

.12 Accounting changes affecting consistency include:

- A change from one generally accepted accounting principle to another method, practice or principle that is different from the one previously used.
- A change from an unacceptable to an acceptable principle (correction of an error).
- A change in financial statement classification that significantly affects financial position or results of operations (e.g., classification of an item in earnings from operations as other income or expense).
- A change in reporting entity.

.13 Accounting changes not normally affecting consistency include:

- Initial adoption of an existing accounting principle for a new event or transaction.
- Insignificant reclassification.
- Correction of errors not involving a principle.
- Changes in accounting estimates.

.14 The nature of the accounting change will determine whether prior periods should be restated or a cumulative adjustment should be included in current activities. In either event, the change should be disclosed in the notes to the financial statements and in the auditor's report in a separate paragraph following the opinion paragraph. The auditor's concurrence with a change is implicit unless he or she takes exception to the change. The opinion paragraph would be standard unless the change is to an unacceptable principle or method, the change is not justified, or a prospective change of a principle requiring retroactive adjustment is not discussed. In such situations, either a qualified or adverse opinion should be issued.

Uncertainties

.15 Uncertainties are significant circumstances, events, or transactions affecting the financial statements, the outcome of which cannot be reasonably estimated. Uncertainties are a particularly complex area because

they can result in a qualified or adverse opinion due to a departure from GAAP, or a qualified opinion or disclaimer due to a scope limitation. Uncertainties include, but are not limited to, contingencies covered by FASB Statement No. 5, *Accounting for Contingencies* (AC C59), and matters related to estimates covered by SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

.16 *Uncertainties Not Requiring Modification of the Opinion.* SAS No. 58, paragraph 29, as amended by SAS No. 79 (AU section 508.29), states that when the auditor has concluded that sufficient information supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate.

.17 *Scope Limitations.* A qualified opinion or disclaimer of opinion may be required if the auditor is unable to obtain sufficient information to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements. In some ways, information about uncertainties may always be considered insufficient because it is dependent on future, unknown events. However, if the auditor determines that information did or does exist, but it is unavailable to him or her (e.g., because the information was destroyed or management will not allow the auditor to have access to it), the auditor should consider modifying the report for a scope limitation.

.18 *Departures From GAAP.* SAS No. 58, paragraph 45, as amended by SAS No. 79 (AU section 508.45), describes three categories of departures from GAAP involving risks or uncertainties:

- Inadequate disclosure
- Inappropriate accounting principles
- Unreasonable accounting estimates

.19 A qualified or adverse opinion due to a departure from GAAP may be necessary if the auditor concludes that a matter involving an uncertainty has not been appropriately disclosed in the financial statements in conformity with GAAP.

.20 Also, a departure from GAAP may exist if management has made inappropriate estimates of future events in applying accounting principles (such as the use of unreasonable expected lives of depreciable assets for calculating depreciation) or in making other accounting estimates.

.21 *Going-Concern Uncertainties.* If the auditor concludes that there is substantial doubt about the organization's ability to continue as a going concern, the situation should be described in an explanatory paragraph, following the opinion paragraph. The explanatory paragraph should describe the principal events and conditions related to the going concern, their possible effects on the financial statements, management's plans for corrective actions, and the auditor's conclusion that substantial doubt exists. SAS No. 64, *Omnibus Statement on Auditing Standards—1990* (AU section 341.12 and .13), imposes the additional requirement that the explanatory paragraph include the terms "substantial doubt" and "going concern." The auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern in the going-concern explanatory paragraph.

.22 If financial statement disclosures about the uncertainty are inadequate, a departure from GAAP exists, and either a qualified or adverse opinion may be necessary.

Reporting on Supplementary Information

.23 Supplementary information includes detailed schedules of other data that are not necessary for a fair presentation of the basic financial statements. Whenever supplementary information is included in an auditor-

submitted document, the auditor must indicate the degree of responsibility, if any, taken for this information. A separate report on the supplementary information or a separate paragraph in the report on the basic financial statements may be used to report on supplementary information. If a separate report is issued, it should be on the firm's letterhead and be signed. The report date should be the same as for the basic financial statements.

.24 Reports on supplementary information should express or disclaim audit assurance. The nature of the engagement and the extent and results of testing of supplementary information will determine the firm's responsibility in each circumstance. If a separate report on the supplemental information is issued, the first sentence of that report should refer to the report on the basic financial statements.

Reporting on a Single Statement

.25 In certain circumstances, an engagement to audit a single financial statement may be accepted. Generally these engagements, called "limited reporting engagements," are a result of the client needing a single financial statement to fulfill a contractual requirement, such as an organization that must provide its landlord with an audited income statement for purposes of calculating rent. Also, entities that have never been audited often request an audit of the statement of financial position only for the first year, with the intention of having audits of the entire financial statements in the future. Generally such engagements are accepted as long as there is a legitimate reason for the limited engagement, and provided there are no restrictions on access to information underlying the financial statements or on the scope of the procedures the auditor needs to perform. In such engagements, an unqualified opinion can be expressed on the financial statement the auditor was engaged to audit. If the other financial statements are presented, a disclaimer of opinion should be issued on those statements. An unqualified opinion on a single statement audit is presented in AAM section 10,210.030.

Relying on the Work of a Specialist

.26 The firm may engage specialists to perform certain work supporting representations in the financial statements. SAS No. 73, *Using the Work of a Specialist* (AU section 336), says if a review of the specialist's work finds it satisfactory, and if no report modification is necessary because of the specialist's findings, there is no need to refer to the specialist's work.

.27 If the specialist's work is not adequate to support the financial statement representations, a qualification or disclaimer of opinion because of a scope limitation may be required. Findings of the specialist that indicate the financial statements are not in accordance with GAAP may require a qualified or adverse opinion.

Lack of Independence

.28 For public entities, whenever the auditor is not independent with respect to a client whose financial statements have been audited, a disclaimer of opinion should be issued. For nonpublic entities, the firm may only issue a compilation report that includes a statement that the firm is not independent.

Reissuance of Audit Reports as Predecessors

.29 If the auditor is asked by a former client to reissue its report on prior-period financial statements, he or she should inform the client of the procedures necessary to comply with that request. If the client agrees to perform these procedures, and pay the fee for these services, the auditor would ordinarily agree to reissue the report.

.30 Before reissuing a report, the auditor should consider whether the previous opinion on those prior-period statements is still appropriate. Differences in the current form and presentation of the financial statements for the prior period, or the possibility of material subsequent events affecting those financial statements, could make the previous opinion inappropriate. The auditor should perform at least the following procedures:

- Read the financial statements of the current period.
- Compare the prior-period financial statements with the financial statements to be presented in comparative format by the successor.
- Obtain a letter of representation from the successor auditor. The successor should represent that his or her audit has not revealed any matters that may have a material effect on the prior-period financial statements.

.31 If the firm reissues its report without change, the previous report date should be used. If the financial statements or the report of the prior period are revised, the report should be dual-dated as to the event or matter causing the revision. There should be no reference to the report or the work of the successor auditor.

Reissuance of the Audit Report Subsequent to the Date of Original Issue¹

.32 Occasionally the firm may be requested by a client to furnish additional copies of a previously issued report. Approval of the engagement partner is necessary to reissue a previously issued report. In such situations the engagement partner may prepare a memo stating the reasons for the reissuance and that he or she is not aware of any circumstances occurring since the original report date that would require adjustment to or disclosure in the financial statements.

.33 Use of the original report date removes any implication that records, transactions, or events after that date have been audited or reviewed. Although the auditor has no responsibility to make further investigation or inquiry as to subsequent events, the engagement partner should consider a brief discussion with the client's chief financial or executive officer before reissuing his or her report.

Subsequent Discovery of Facts Existing at Report Date

.34 Although the auditor has no obligation to make any continuing inquiries or perform other procedures after issuing his or her report, the auditor may become aware of information that affects the financial statements upon which he or she has previously reported. When becoming aware of such information, the auditor should determine the reliability of the information and whether such information existed at the date of the report. The engagement partner should make inquiries of client management in this regard.

.35 If the information is reliable and did exist at the date of the report, if the report would have been affected if the information had been known at the report date, and if there are persons relying on the financial statements who would attach importance to the information, the auditor should take action to prevent future reliance on the report. If the engagement partner concludes that action should be taken to prevent future reliance on the report, he or she should advise the client to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to the persons known to be, or likely to be, relying on the financial statements and related report. Disclosures should be made in one of the following ways:

¹ The AICPA Auditing Standards Board Auditing Interpretation, *Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report* (AU section 9341.01 and .02), deals with situations where a previously issued report contains a going-concern explanatory paragraph, and the situation that gave rise to the going-concern has been resolved.

- If the effects of subsequent facts can be promptly determined, disclosure should include reissuing revised financial statements and a revised report. The reasons for the revision usually should be described in a note to the financial statements and referred to in the auditor's report.
- If the current financial statements have not been released, appropriate disclosure of the revision of the prior-period financial statements can be included therein.
- When the effects of subsequent facts cannot be readily determined, revisions of financial statements and reports may be delayed. In this case, persons known to be, or likely to be, relying on the financial statements should be notified by the client that the financial statements and related reports should not be relied on, and that revised financial statements and report will be forthcoming.

.36 If the client refuses to make the disclosures discussed above, the auditor should contact legal counsel. He or she should also notify all members of the board of directors of such refusal and that the firm will take the following steps to prevent future reliance on its report:

- Notify the client that the auditor's report must no longer be associated with the financial statements.
- Notify any applicable regulatory agencies that the report should no longer be relied upon.
- Notify each person known to be relying on the financial statements that the report should no longer be relied upon.

.37 If the auditor's investigation of the subsequently discovered information is satisfactory, and he or she has determined that the information is reliable, the notifications in AAM section 10,100.36 should include a description of the effects of the information on the financial statements. If the client has not cooperated and, as a result, the auditor has been unable to conduct a satisfactory investigation, the auditor does not need to indicate the details of the information. Instead, he or she should indicate that the auditor's report must no longer be relied upon nor should the auditor be associated with the financial statements.

AAM Section 10,210

Unqualified Opinions

.010 Auditor's Standard Report—Comparative Financial Statements

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.020 Auditor's Standard Report—Single Year Financial Statements**Independent Auditor's Report**

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

.030 Report on a Single Statement Audit (Balance Sheet Only Presented) [Assuming the auditor is able to satisfy himself or herself regarding the consistency of application of accounting principles]

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[Source: SAS No. 58, paragraph 34, as amended by SAS No. 79 and with conforming changes due to SAS No. 93 (AU section 508.34).]

Note: If reporting on a single statement (for example, balance sheet only) when other financial statements are also presented, the following paragraph should be added after the opinion paragraph:

Because we were not engaged to audit the statements of income, retained earnings, and cash flows, we did not extend our auditing procedures to enable us to express an opinion on the results of operations and cash flows for the year ended December 31, 20XX. Accordingly, we express no opinion on them.

.040 Reference to Other Auditors—Successor Auditor's Report When Predecessor's Report (Unqualified) Is Not Presented

Independent Auditor's Report

Addressee:

We have audited the balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Practice Tips

- (1) The successor auditor should not name the predecessor auditor in his report; however, the successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with that of the successor auditor.

[Source: SAS No. 58, paragraph 74, footnote 27, as amended by SAS No. 79 (AU section 508.74).]

.050 Reference to Other Auditors in Report**Independent Auditor's Report**

Addressee:

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of \$_____ and \$_____ as of December 31, 20X2 and 20X1, respectively, and total revenues of \$_____ and \$_____ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.
