HOW *AUDIT AND ACCOUNTING MANUAL* IS ORGANIZED

Updated as of June 1, 2008, this edition has been substantially revised to:

- Conform to the requirements of the risk assessment standards (Statement on Auditing Standards [SAS] Nos. 104–111) including understanding the entity and its environment, including its internal control; assessing the risks of material misstatement; audit risk and materiality; and designing and performing further audit procedures that are responsive to the assessed risks
- Reflect the Defining Professional Requirements standards (SAS No. 102, Statement on Standards for Attestation Engagements [SSAE] No. 13, and Statement on Standards for Accounting and Review Services [SSARS] No. 16)
- Provide additional guidance on the auditor's responsibilities as set forth in SAS Nos. 112–114, including identifying and reporting internal control deficiencies, understanding the link between the auditor's consideration of fraud and the auditor's assessment of risk, dating of the management representation letter, and the auditor's communications with those charged with governance
- Reflect the new requirements of SSARS No. 15, *Elimination of Certain References to Statements on Auditing Standards and Incorporation of Appropriate Guidance Into Statements on Standards for Accounting and Review Services*, which eliminates certain references to the auditing literature from the SSARSs and incorporates, as appropriate, guidance similar to that originally referenced into the compilation and review literature
- 2007/2008 and 2008 Alerts [AAM section 8000]

Scope of *Audit and Accounting Manual*

This Publication brings together for continuing reference a set of nonauthoritative audit tools and illustrations prepared by the staff of the Accounting and Auditing Publications Team of the American Institute of Certified Public Accountants.

Arrangement of Material in *Audit and Accounting Manual*. . .

The contents of this volume are arranged as follows:

Introduction

Compilation and Review

Engagement Planning and Administration

Internal Control

Designing and Performing Further Audit Procedures

Audit Documentation

Correspondence, Confirmations, and Representations

Alerts

Accountants' Reports

Quality Control

Description of Content . . .

The AICPA *Professional Standards* is referenced by the use of the following abbreviations: AU (Statements on Auditing Standards), AT (Statements on Standards for Attestation Engagements), AR (Statements on Standards for Accounting and Review Services), ET (Code of Professional Conduct), BL (Bylaws), QC (Statements on Quality Control Standards), and PR (Standards for Performing and Reporting on Peer Reviews).

The AICPA *Technical Practice Aids* is referenced by the use of the following abbreviations: ACC (Accounting Statements of Position) and AUD (Auditing and Attestation Statements of Position).

Quotations of accounting standards in this volume are derived from the original pronouncements and may have been editorially changed in the FASB *Accounting Standards Current Text*.

AAM Section 1000
Introduction

This manual has not been approved, disapproved, or otherwise acted upon by any senior technical committees of the American Institute of Certified Public Accountants or the Financial Accounting Standards Board and has no official or authoritative status.

TABLE OF CONTENTS

[*The next page is 1101.*]

AAM Section 1100

Introduction

.01 This manual has been prepared by the staff of the AICPA and issued as a nonauthoritative practice aid. The materials included in it are intended primarily as a reference source for conducting audit, review, and compilation engagements. The objective is to provide practitioners with the tools needed to help plan, perform, and report on their engagements. *The manual is not intended to serve as a complete or comprehensive quality control system.* The materials are not intended as a substitute for the professional judgments that practitioners apply. The manual, where practicable, offers choices and alternatives rather than particular positions. The manual is not a substitute for the authoritative technical literature and users are urged to refer directly to applicable authoritative pronouncements for the text of technical standards.

.02 This manual is intended to be used in connection with engagements of nonpublic entities and is not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.

.03 Some sections of the manual include quotations from Statements on Auditing Standards and other authoritative pronouncements. Those quotations are intended only to illustrate certain matters, not to serve as a substitute for careful study of the relevant pronouncements. References are made throughout the manual to the original authoritative pronouncements and to their section numbers in AICPA *Professional Standards* to help users locate those authoritative pronouncements.

.04 The authors hope that the manual will be helpful to practitioners in the conduct of their audit and accounting practice. However, no generalized material, such as that included in this manual, can be a substitute for development and implementation by a firm of a system of quality control, which is appropriately comprehensive and suitably designed in relation to the firm's organizational structure, its policies, and the nature of its practice.

.05 Explanation of References:

ACC =	Reference to section number in Accounting Statements of Position in AICPA *Technical Practice Aids*
APB =	AICPA Accounting Principles Board Opinion
AR =	Reference to section number in AICPA *Professional Standards* (vol. 2) for Statements on Standards for Accounting and Review Services
AT =	Reference to section number in AICPA *Professional Standards* (vol. 1) for Statements on Standards for Attestation Engagements
AU =	Reference to section number in AICPA *Professional Standards* (vol. 1) for Statements on Auditing Standards
AUD =	Reference to section number in the Auditing and Attestation Statements of Position in AICPA *Technical Practice Aids*
EITF =	Emerging Issues Task Force consensus
FIN =	Financial Accounting Standards Board (FASB) Interpretation
FSP =	FASB Staff Position
PB =	Accounting Standards Executive Committee Practice Bulletin

(continued)

QC =	Reference to section number in AICPA *Professional Standards* (vol. 2) for Statements on Quality Control Standards
SAS =	AICPA Statement on Auditing Standards
SOP =	AICPA Statement of Position
SQCS =	Statement on Quality Control Standards
SSAE =	Statement on Standards for Attestation Engagements
SSARS =	Statement on Standards for Accounting and Review Services

.06 The manual is expected to be updated periodically. Changes will likely arise from three main sources:

1. Comments and suggestions from practitioners. Since this manual is a product of AICPA staff, not of a committee of practitioners, it is particularly important that practitioners advise the staff on any suggestions for material that could be improved or added.
2. Issuance of new official pronouncements.
3. Other additions to or deletions from the manual as a result of continued staff study.

Comments and suggestions should be addressed to

Accounting and Auditing Publications

AAM Section 1200

How to Use the Audit and Accounting Manual

Overview

.01 The Audit and Accounting Manual (AAM) is designed to provide practitioners with the tools needed to help plan, perform, and report on audit, review, and compilation engagements. *The AAM is not intended to serve as a complete or comprehensive quality control system, and is not intended to be used in connection with the audits of entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.* The AAM is comprised of the following sections:

Section No.	*Section Name*
2000	Compilation and Review
3000	Engagement Planning and Administration
4000	Internal Control
5000	Designing and Performing Further Audit Procedures
6000	Audit Documentation
7000	Correspondence, Confirmations, and Representations
8000	Alerts
9000	Accountants' Reports
10,000	Quality Control

Audits

.02 To perform an engagement in accordance with generally accepted auditing standards (GAAS) an auditor must comply with the General Standards, the Standards of Field Work, the Standards of Reporting, and the Quality Control Standards.

.03 The general standards are concerned with the qualifications of the auditor and the qualitative aspect of the work performed. They specifically address the auditor's training and proficiency, independence, and due care in the performance of work.

.04 The Standards of Field Work address the manner used by the auditor to perform the audit. This standard begins with the appointment of the auditor and ends with the auditor communicating to those responsible for the oversight of financial reporting of the entity being audited.

.05 The Standards of Reporting are concerned with the opinion the auditor renders on the client's financial statements.

.06 The AAM will assist the auditor in performing an audit, in accordance with GAAS, in the following ways:

a. AAM section 10,000, *Quality Control*, includes sample forms which can be used by a firm to document its adherence to the AICPA requirement for a system of quality control for a CPA firm.

b. AAM section 3000, *Engagement Planning and Administration*, provides guidance in the planning stage. Included in this section are various formats of audit assignment controls and engagement letters.

c. AAM section 4000, *Internal Control*, conforms to the *Internal Control—Integrated Framework,* published by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO report) and AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1). This section provides guidance in evaluating internal control by utilizing checklists, questionnaires, and other generalized aids.

d. AAM section 5000, *Designing and Performing Further Audit Procedures*, explains how the auditor should design and perform tests of controls, substantive procedures, or both, that are responsive to the assessed risks of material misstatement.

e. AAM section 6000, *Audit Documentation*, provides the auditor with a general discussion of the purpose of audit documentation.

f. AAM section 7000, *Correspondence, Confirmations, and Representations*, provides the auditor with numerous examples of confirmations, illustrative inquiries to legal counsel, representation letters, communications with audit committees, as well as a reliance letter.

g. AAM section 9000, *Accountants' Reports*, addresses the format of the accountants' report and numerous examples of the auditor's report.

Compilation and Review Services

.07 To perform either a review or a compilation engagement in accordance with Statements on Standards for Accounting and Review Services (SSARS), an accountant must comply with the standards promulgated by the Accounting and Review Services Committee. As of the date of this manual, there have been 17 SSARSs issued. Refer to paragraph .10 of AAM section 2100, *Introduction*, for a complete list of the SSARSs that have been codified in the AICPA's *Professional Standards*.

.08 The AAM will assist the accountant in performing compilation and review engagements in accordance with SSARS in the following ways:

a. AAM section 2200, *Engagement Planning and Administration*, provides guidance in the planning stage. Addressed are engagement letters, changes in the level of service for the engagement, sample acceptance form, sample information form, and sample engagement letters.

b. AAM section 2300, *Compilation Engagement*, provides sample procedures for compilation engagements, representation letters, and checklists.

c. AAM section 2400, *Review Engagement*, provides sample procedures for review engagements, representation letters, and checklists.

d. AAM section 2500, *Form and Content of Financial Statements*, provides guidance on the statements, notes, supplementary information, and subsequent discovery of facts.

e. AAM section 2600, *Reporting*, provides guidance on the basic reporting fundamentals for compilation and review engagements.

f. AAM section 2610, *Accountants' Reports on Compilation of Financial Statements of a Nonpublic Entity*, and section 2620, *Accountants' Reports on Review of Financial Statements of a Nonpublic Entity*, include examples of several reports for compilation and review engagements.

g. AAM section 2700, *Special Areas*, section addresses other comprehensive bases of accounting, prescribed forms, and specified elements.

.09 It is suggested that the accountant also review the following areas when performing compilation and review engagements for additional guidance:

- *Correspondence, Confirmations, and Representations* (AAM section 7000)
- *Quality Control* (AAM section 10,000)

Alerts

.10 AAM section 8000, *Alerts*, is intended to provide accountants with an overview of recent economic, professional, and regulatory developments that may affect their engagements.

[*The next page is 2001.*]

AAM Section 2000
Compilation and Review

This section is a nonauthoritative other compilation and review publication as described in paragraph .07 of AR section 50. As such, the practice aid has no authoritative status; however, it may help an accountant understand and apply the Statements on Standards for Accounting and Review Services (SSARS).

If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. This section has been reviewed by the AICPA Audit and Attest Standards staff and, therefore, is presumed to be appropriate. The exhibits are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of reference when preparing working papers or a report for a compilation or review engagement.

TABLE OF CONTENTS

[*The next page is 2101.*]

AAM Section 2100

*Introduction**

.01 Statements on Standards for Accounting and Review Services (SSARS) are issued by the American Institute of Certified Public Accountants (AICPA) Accounting and Review Services Committee (ARSC), the senior technical committee of the AICPA designated by its Council to issue pronouncements in connection with unaudited financial statements and other unaudited financial information of nonpublic entities. (A complete listing of SSARS and the full text can be found in AICPA *Professional Standards*, vol. 2.) A nonpublic entity is defined as any entity other than (*a*) one whose securities trade in a public market either on a stock exchange or over the counter, (*b*) one that files with a regulatory agency in preparation for the sale of any class of its securities in a public market, or (*c*) subsidiary, corporate joint venture, or other entity controlled by an entity covered by (*a*) or (*b*). Thus, if an entity does not fall into either category (*a*), (*b*), or (*c*) in the above definition, it is a nonpublic entity.

Standards for Accounting and Review Services

.02 In accordance with paragraph .01 of AR section 50, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2), an accountant must perform a compilation or review of a nonpublic entity in accordance with SSARS issued by the AICPA. SSARS provide a measure of quality and the objectives to be achieved in both a compilation and review.

.03 The SSARS are issued by ARSC and provide performance and reporting standards for compilations and reviews.

.04 Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 202 par. .01), states that an AICPA member who performs compilations or reviews shall comply with standards promulgated by ARSC. The ARSC develops and issues standards in the form of SSARS through a due process that includes deliberations in meetings open to the public, public exposure of proposed SSARS, and a formal vote. The SSARS are codified.

.05 The accountant should have sufficient knowledge of the SSARS to identify those that are applicable to his or her engagement. The nature of the SSARS requires an accountant to exercise professional judgment in applying them. The accountant should be prepared to justify departures from the SSARS.

Interpretative Publications

.06 *Interpretative publications* consist of compilation and review interpretations of the SSARS, appendixes to the SSARS, compilation and review guidance included in AICPA Audit and Accounting Guides, and AICPA Statements of Position to the extent that those statements are applicable to compilation and review engagements. Interpretative publications are not standards for accounting and review services. Interpretative publications are recommendations on the application of the SSARS in specific circumstances, including engagements for entities in specialized industries. An interpretative publication is issued after all

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

ARSC members have been provided an opportunity to consider and comment on whether the proposed interpretative publication is consistent with the SSARS.

.07 The accountant should be aware of and consider interpretative publications applicable to his or her compilation or review. If the accountant does not apply the guidance included in an applicable interpretative publication, the accountant should be prepared to explain how he or she complied with the SSARS provisions addressed by such guidance.

Other Compilation and Review Publications

.08 *Other compilation and review publications* include AICPA accounting and review publications not referred to above; AICPA's annual *Compilation and Review Alert*; compilation and review articles in the Journal of Accountancy and other professional journals; compilation and review articles in AICPA's *The CPA Letter*; continuing professional education programs and other instruction materials, textbooks, guide books, compilation and review programs, and checklists; and other compilation and review publications from state CPA societies, other organizations, and individuals.[1] Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply the SSARS.

.09 If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. In determining whether an other compilation and review publication is appropriate, the accountant may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SSARS and the degree to which the issuer or author is recognized as an authority in compilation and review matters. Other compilation and review publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

Overview of SSARS and Interpretations

.10 ARSC has issued 17 SSARSs, which have been codified in the AICPA's *Professional Standards* literature. They are as follows:

Title	*Summary*	Professional Standards *Reference*
SSARS No. 1, *Compilation and Review of Financial Statements* (December 1978)	Provides guidance to CPAs concerning the standards and procedures applicable to engagements to compile or review financial statements.	AR section 100
SSARS No. 2, *Reporting on Comparative Financial Statements* (October 1979)	Establishes standards for reporting on comparative financial statements of a nonpublic entity (or nonissuer) when financial statements of one or more periods have been compiled or reviewed in accordance with AR section 100.	AR section 200

[1] The accountant is not expected to be aware of the full body of other compilation and review publications.

SSARS No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (December 1981)	Provides an alternative form of standard compilation report when a prescribed form or related instructions call for a specific departure from generally accepted accounting principles (GAAP). Also provides additional guidance applicable to reports on financial statements included in prescribed form.	AR section 300
SSARS No. 4, *Communication Between Predecessor and Successor Accountants* (December 1981)	Provides guidance to a successor accountant who decides to communicate with a predecessor accountant.	AR section 400
SSARS No. 5, *Reporting on Compiled Financial Statements* (July 1982; Deleted November 1992 by the issuance of SSARS No. 7)	Deleted by SSARS No. 7, November 1992 because the provisions of SSARS No. 5 have been incorporated into AR sections 100, 200, and 300.	AR section 500
SSARS No. 6, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (September 1986)	Provides an exemption from AR section 100 for personal financial statements that are included in written personal financial plans prepared by an accountant and specifies the form of written report required under the exemption.	AR section 600
SSARS No. 7, *Omnibus Statement on Standards for Accounting and Review Services—1992* (November 1992)	Contains a number of technical amendments to various standards. Integrated to amend AR sections 100, 200, 300, and 400 and deleted SSARS No. 5.	Not published as a stand-alone section.
SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1*, Compilation and Review of Financial Statements (October 2000)	Amends AR section 100 to create a management-use-only compilation (and make other changes).	Not published as a stand-alone section.
SSARS No. 9, *Omnibus Statement on Standards for Accounting and Review Services—2002* (November 2002)	Contains a number of technical amendments to AR sections 100 and 400.	Not published as a stand-alone section.
SSARS No. 10, *Performance of Review Engagements* (May 2004)	Amends AR section 100.	Not published as a stand-alone section.
SSARS No. 11, *Standards for Accounting and Review Services* (May 2004)	Establishes a SSARS hierarchy and makes practitioners aware of the appropriate literature and the standing of various publications in the SSARS hierarchy. Also amended AR section 200.	AR section 50
SSARS No. 12, *Omnibus Statement on Standards for Accounting and Review Services—2005* (July 2005)	Contains a number of technical amendments and additions to AR sections 100 and 200 and rescinds Interpretation No. 26 of AR section 100 and AR section 9100.100–.103.	Not published as a stand-alone section.

(continued)

SSARS No. 13, *Compilation of Specified Elements, Accounts, or Items of a Financial Statement* (July 2005)	Expands SSARS to apply when an accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement. Rescinds Interpretation No. 8 of AR section 100 at AR section 9100.27–.28.	AR section 110
SSARS No. 14, *Compilation of Pro Forma Financial Information* (July 2005)	Expands SSARS to apply when an accountant is engaged to compile or issue a compilation report on pro forma financial information.	AR section 120
SSARS No. 15, *Elimination of Certain References to Statements on Auditing Standards and Incorporation of Appropriate Guidance Into Statements on Standards for Accounting and Review Services* (July 2007)	Contains a number of technical amendments to AR sections 100, 200, 300, and 400. Rescinds Interpretation No. 4, "Discovery of Information After the Date of the Accountant's Report" of AR section 100 at AR section 9100.13–.15 and Interpretation No. 12, "Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles" of AR section 100 at AR section 9100.41–.45.	Not published as a stand-alone section.
SSARS No. 16, *Defining Professional Requirements in Statements on Standards for Accounting and Review Services* (December 2007)	Defines the terminology the ARSC will use to describe the degrees of responsibility that the requirements impose on the accountant.	AR section 20
SSARS No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (February 2008)†	Contains a number of technical amendments to AR sections 100, 200, 300, and 400.	Not published as a stand-alone section.

.11 In addition to SSARS Nos. 1–17, interpretations are issued by the ARSC to provide timely guidance on applying SSARS. An interpretation is not as authoritative as a SSARS, but accountants may have to justify departure from an interpretation's guidance if the quality of their work is questioned. Interpretations of the SSARS can be found in AR sections 9100, 9200, 9300, 9400, and 9600 of AICPA *Professional Standards*, volume 2.

Determining Applicability of AR section 100A

.12 Paragraph .04 of AR section 100A defines a compilation of financial statements and a review of financial statements. A *compilation of financial statements* is defined as presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the financial statements. A *review of financial statements* involves performing inquiry and analytical procedures to provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications that should be made to the financial statements for them to be in conformity with generally accepted accounting principles or, if applicable, with another comprehensive basis of accounting (OCBOA).

† SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. Due to the effective date, SSARS No. 17 has not been incorporated into the text of this edition.

.13 Paragraph .04 of AR section 100A defines a *financial statement* as:

A presentation of financial data, including accompanying notes, derived from accounting records intended to communicate an entity's economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with generally accepted accounting principles or an OCBOA. Financial forecasts, projections, and similar presentations, and financial presentations included in tax returns are not financial statements for purposes of this section. The following financial presentations are examples of financial statements and are not meant to be all-inclusive:

Appropriate GAAP financial statement titles include the following:

- Balance sheet
- Statement of income
- Statement of comprehensive income
- Statement of retained earnings
- Statement of cash flows
- Statement of changes in owners' equity
- Statement of assets and liabilities (with or without owners' equity accounts)
- Statement on revenues and expenses
- Statement of financial position (condition)
- Statement of activities
- Summary of operations
- Statement of operations by product lines

Appropriate OCBOA financial statement titles:

- Balance sheet—cash basis
- Statement of assets and liabilities arising from cash transactions
- Statement of assets, liabilities, and stockholders' equity—income tax basis
- Statement of revenue collected and expenses paid
- Statement of revenue and expenses—income tax basis
- Statement of income—statutory basis
- Statement of operations—income tax basis

.14 AR section 100A is applicable whenever an accountant submits unaudited financial statements of a nonpublic entity to a client or third parties. In accordance with paragraph .04 of AR section 100A *submission of financial statements* is defined as

presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

.15 Two actions are necessary in order to submit financial statements:

- *Prepare* financial statements, either manually or through the use of computer software, and
- *Present* the financial statements to a client or third party.

.16 Absent either of these actions, the financial statements have not been submitted, and AR section 100A is not applicable.

.17 The term *prepared* is not defined in SSARS. Rather, professional judgment will need to be used to determine if financial statements will be prepared. In making this judgment, the accountant might consider the difference between mere bookkeeping services (for example, making adjustments, corrections, and accruals) and preparation of financial statements. In order to prepare financial statements, the accountant may use his or her knowledge, education, and experience to create financial statements that would not have existed otherwise. In other words, if the financial statements prepared by the client's bookkeeper require only that the accountant, "tweak a couple of things," then financial statements probably haven't been prepared. On the other hand, if the client gives the accountant an unadjusted trial balance and the accountant makes all of the adjustments necessary to convert the information into financial statements, then financial statements probably have been prepared.

Practice Tip

There is no definitive line to cross that would indicate submitting financial statements. Therefore, a firm may wish to establish a firm policy to evaluate how certain accounting services are classified within the firm.

.18 The term *presenting* is also not defined in SSARS. Again, the accountant will have to use his or her professional judgment to determine if financial statements have been presented to a client. Obviously, physically presenting printed financial statements would meet the definition used here. Other situations, especially those involving electronic presentation (for example, via e-mail) may be carefully considered.

.19 The accountant may wish to address the issue of *submission* early in engagement planning. This issue, along with the needs of the client and other financial statements users, is essential to determining the type of engagement to perform.

[*The next page is 2201.*]

AAM Section 2200

*Engagement Planning and Administration**

.01 It is important to remember that when engaged to provide compilation or review services, the accountant shall comply with Rules 201, *General Standards*, and 202, *Compliance With Standards*, respectively, of the AICPA's Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 201 par. .01 and ET sec. 202 par. .01). Rule 201 states that an AICPA member shall comply with the following standards and any interpretations thereof by bodies designated by its Council:

- *Professional Competence*—Undertake only those professional services that the member or the member's firm can reasonably expect to be completed with professional competence.
- *Due Professional Care*—Exercise due professional care in the performance of professional services.
- *Planning and Supervision*—Adequately plan and supervise the performance of professional services.
- *Sufficient Relevant Data*—Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.02 Rule 202 states that an AICPA member who performs auditing, review, compilation, management consulting, tax, or other professional services shall comply with standards promulgated by bodies designated by Council.

Client and Engagement Selection

.03 Prior to accepting an engagement to perform a compilation or review for all prospective clients, the accountant may want to consider if he or she wishes to be associated with them. Factors such as the ability of the accountant to adequately serve the client, the fee arrangement, and client integrity need to be considered.

.04 The firm's client acceptance and continuance policies represent a key element in mitigating litigation and business risk. The firm may want to acknowledge that the integrity and reputation of a client's management could reflect on the reliability of the client's accounting records and financial representations and, therefore, on the firm's reputation or involvement in litigation.

.05 Although professional standards do not require consideration of the following elements, the accountant might consider them in determining whether or not to accept a client. Certain of these elements may not be applicable to every engagement. Those elements the accountant might consider include the following:

- Information that might bear on the integrity or competence of management. Is there information that gives reason to doubt the integrity or competence of management?
- Past experience with management. Have past experiences on other engagements been positive?
- Independence and objectivity considerations.
- Communication with predecessor accountants or auditors.

---

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

- Assessment of management's commitment to the appropriate application of generally accepted accounting principles. Inquire of the prospective client about its significant accounting policies.
- Assessment of management's commitment to implementing and maintaining effective internal control. Inquiring of management regarding its commitment to implementing and maintaining effective internal control including antifraud programs and controls and inquiring about the entity's control environment, risk assessment process, information and communications systems relevant to financial reporting, and control and monitoring activities that are in place, and any changes that management believes can be made to enhance the effectiveness of the entity's internal control.
- Assessment of the entity's financial viability.
- Inquiry of third parties.
- Other considerations. The following listing of other considerations is not intended to be all inclusive, and the accountant may wish to consider whether other conditions are present that may create significantly increased risk, and carefully assess those conditions that are identified.
  - Restrictions on scope of services
  - Entities under common control
  - One-time engagements
  - Business and industry environment

.06 As part of the client acceptance procedures, a firm may want to consider its ability to provide professional services, with reference to industry expertise, size of engagement, and personnel available to staff the engagement.

.07 Some of the following tips may be helpful when evaluating a potential client (although none of these procedures is required by professional standards):

- *Gain access to available financial information.* Review the prior year's financials, with emphasis on leverage for debt. Look at the client's assets and sources of income, as well as the current condition of accounting records.
- *Review S&P, Moody's, or other publications.* Many localities provide a local or regional S&P in conjunction with the *Daily Journal of Commerce* or similar business publication. There is a plethora of available information on the Web. In addition, many firms offer database searches of financial, legal, and operational information, as well as personal information about key executives. Check the court dockets (including the U.S. Bankruptcy and Tax Court dockets) in the area where the client is domiciled.
- *Meet with financial persons of the company.* Ask for a brief overview of their internal practices and procedures, the business plan, bylaws, staff turnover, and so on. Representatives from other departments may provide information as well.
- *Discuss the prospective client with former accountants* (after the client provides written authorization).

.08 It is often useful to complete a "Client Acceptance and Continuance Form" to assist in determining whether or not to accept a client. An illustrative client acceptance form can be found in paragraph .70.

Documentation

.09 Whether or not an engagement is accepted or a professional relationship continued, the firm may document its consideration of the elements of the acceptance and continuance process. If the prospective client becomes or is continued as an attest client of the firm, the firm will typically comply with its document retention policies regarding the client acceptance or continuance consideration. The documentation with respect to prospective clients not accepted need only be retained for purposes of review by the appropriate level of firm management.

Client Needs

.10 Because the cost of a review will be more than a compilation, and the cost of a compilation with full disclosure will be more than a compilation that omits substantially all disclosures, the accountant may wish to discuss the benefits and cost considerations with the client. In addition, when helping the client decide what level of service is appropriate, the accountant may wish to give special consideration to the issues of independence and the requests of bankers and other creditors on the client.

.11 Several issues for the accountant and client to consider in determining the best type of engagement include the following:

- *Needs of third parties.* Does a third party (for example, a bank) need financial statements on a regular basis?
- *Cost-benefit considerations.* Which engagement can be performed at a reasonable cost to the client?
- *Risk management considerations.* Some accountants may perceive the management-use-only compilation as potentially more risky than a "traditional" [1] compilation. Others, however, see the specific representations and restrictions agreed to in the engagement letters for management-use-only engagements as additional protections that are not present in the report that accompanies a traditional compilation engagement.

.12 If the client does not need audited financial statements, the client can choose from these four types of engagements:

- A review (if the accountant is independent and the client needs a moderate level of assurance on the financial statements)
- A traditional compilation[2] (the minimum level of service required if third parties will use the financial statements)
- A management-use-only compilation[3] (available if third parties will not use the financial statements)
- Bookkeeping services (available if the procedures do not include the submission of financial statements)

Traditional Versus Management-Use-Only Compilation

.13 Paragraph .04 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), defines a *compilation* as follows:

> Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

.14 This definition does not require the accountant to test, verify, or corroborate information supplied by management but, simply, to place the information into the form of financial statements.

.15 There are two types of compilations:

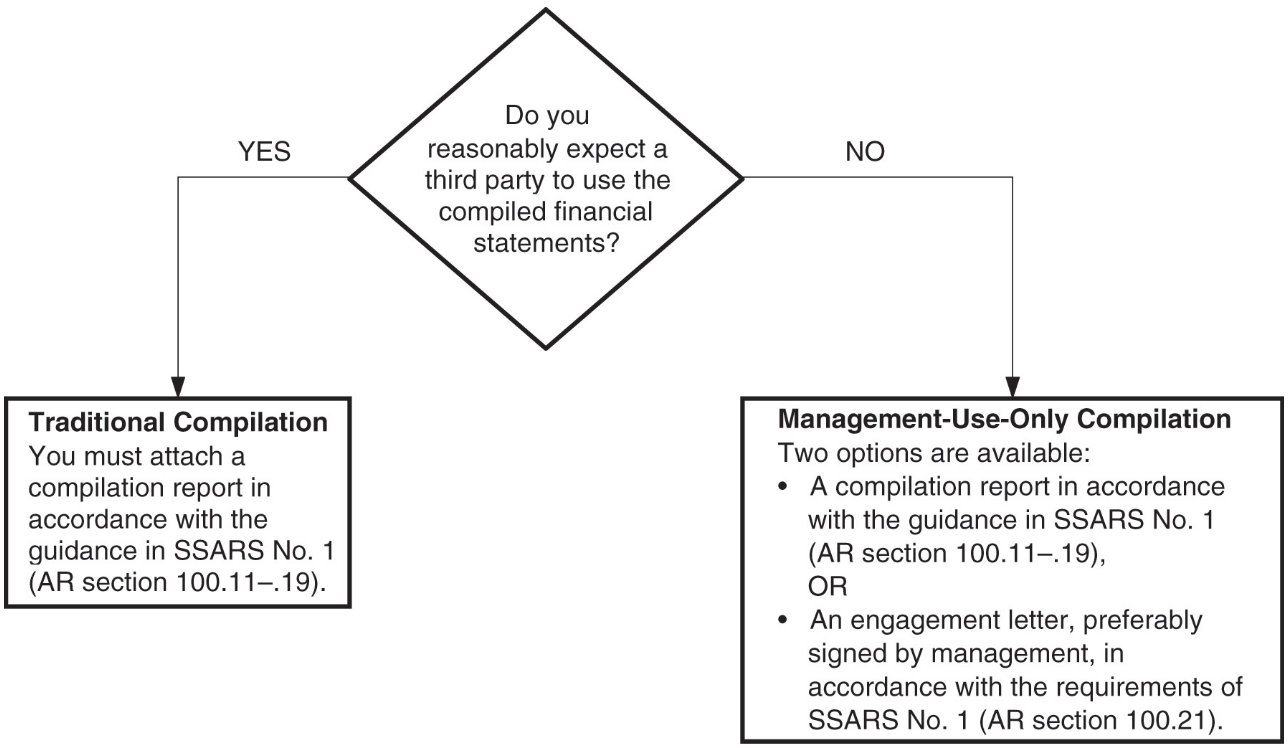
- *A compilation with a report.* Compiled financial statements should be accompanied by a report when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects that the financial statements may be used by a third party. This type of engagement might be referred to as a *traditional compilation.*

[1] See paragraph .15 for more information about types of compilations.
[2] See paragraph .15 for more information about types of compilations.
[3] See paragraph .15 for more information about types of compilations.

- *A compilation without a report*. This is available when the accountant does not reasonably expect the financial statements to be used by a third party. This type of engagement might be referred to as a *management-use-only compilation.*

.16 In either case, the engagement is a compilation, and the accountant must consider the performance requirements of AR section 100A. The difference between the two options lies in the form of communication used in the engagement. See exhibit 2200-1.

Exhibit 2200-1—Communication Options in Compilation Engagements



.17 Though not required by professional standards, the accountant might consider making the decision about the best type of engagement for the client early in engagement planning and base that decision on a combination of (1) the needs of the client and other users, (2) knowledge of the client, and (3) the nature of the procedures that will be performed.

.18 If the client does not need compiled financial statements (taking into account the needs of the client and other users), the client may, instead, choose to have the accountant perform only bookkeeping services. Other than the broad, general ethical guidance available in ET section 201 of AICPA Code of Professional Conduct, there are no authoritative standards for bookkeeping services. Thus, it is wise to at least establish a written understanding with the client concerning bookkeeping services. This understanding may include the following:

- A description of the nature and limitations of the services
- A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts

.19 A written engagement letter for a bookkeeping services engagement could be important because there are no specific standards to follow for these types of engagements. Other professional engagements, such as audits, reviews, and compilations, include the added benefit of authoritative standards that define the engagement objectives, limitations, communication, and so on. An illustrative engagement letter for a bookkeeping service engagement can be found in paragraph .74.

Independence Issues

.20 If an accountant is not independent, he or she can only perform a compilation service (with report modification). If the client needs reviewed or audited financial statements, the nonindependent CPA may refer the client to another CPA. The primary rules governing independence are found in the *Independence* section of the AICPA Code of Professional Conduct. The independence standards are contained in Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .01), along with the associated interpretations and ethics rulings. Rule 101 states:

> *A member in public practice shall be independent in the performance of professional services as required by standards promulgated by bodies designated by Council.*

.21 Independence is the foundation of the attest function. Third party users rely on the CPA's opinion in a review engagement because they believe the conclusion is impartial and unbiased.

.22 In the final analysis, independence in mental attitude means objective consideration of facts, unbiased judgments, and honest neutrality on the part of the CPA in forming and expressing conclusions. Independence in mental attitude presumes an undeviating concern for an unbiased conclusion.

.23 The appearance of independence is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests.

.24 On February 28, 2007, the AICPA's Professional Ethics Committee issued a revision to Interpretation No. 101-3, "Performance of nonattest services," of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05), which applies to AICPA members. The revised ethics interpretation modifies the independence requirements of the forensic accounting services provisions and tax provisions and makes them more restrictive starting February 28, 2007.

.25 Ethics Interpretation No. 101-3 states that a member who performs attest services should not perform management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client's management in performing its functions and making decisions.) If a member is engaged to perform nonattest services, the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed
- Accept responsibility for the results of the services

.26 The member should be satisfied that the client will be able to meet all these criteria and to make an informed judgment on the results of the member's nonattest services. Assessing the competency of the client's designated employee is a matter of professional judgment. The member should be satisfied that the employee understands the services to be performed sufficiently to oversee them. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with the necessary competence to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member's provision of nonattest services would impair independence. Before performing nonattest services, the member should establish and document in writing the client's acceptance of its responsibilities, as well as the objectives of the nonattest engagement, services to be performed, member's responsibilities, and any limitations of the engagement. Code of Professional Conduct ET section 101 provides examples of nonattest services and whether performance of those services would impair independence.

.27 As with many rules and standards of the profession, the guidance for independence is continually changing to meet the developments and pressures facing the profession. Nevertheless, CPAs and their firms should take steps to ensure they meet the independence requirements before performing any review engagement service for a client.

Understanding the Engagement

.28 Paragraph .05 of AR section 100A states that the accountant should establish an understanding with the entity, preferably in writing, regarding the services to be performed. If the engagement is to compile financial statements not expected to be used by a third party, a written communication is required. (See paragraphs .22–.23 of AR section 100A.)

Establishing an Understanding With the Client

.29 As noted in the previous paragraph, paragraph .05 of AR section 100A states the CPA should establish an understanding with the client. This understanding should include the following:

a. A description of the nature and limitations of the services.

b. A description of the report the accountant expects to render.

c. A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts.

d. A statement that the accountant will inform the appropriate level of management of any material errors, of any evidence or information that comes to the accountant's attention during the performance of compilation or review procedures, that fraud or an illegal act may have occurred.[4] The accountant need not report any matters regarding illegal acts that may have occurred that are clearly inconsequential and may reach agreement in advance with the entity on the nature of any such matters to be communicated.

.30 If the financial statements are not expected to be used by third parties (management-use-only compilation), the documentation of understanding should include the following descriptions or statements, according to paragraph .23 of AR section 100A:

- The nature and limitations of the services to be performed.
- A compilation is limited to presenting in the form of financial statements information that is the representation of management.
- The financial statements will not be audited or reviewed.
- No opinion or any other form of assurance on the financial statements will be provided.
- Management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.
- Acknowledgement of management's representation and agreement that the financial statements are not to be used by third parties.
- The engagement cannot be relied upon to disclose errors, fraud, or illegal acts.

.31 According to paragraph .23 of AR section 100A, the documentation of understanding should also address the following additional matters, if applicable:

- Material departures from generally accepted accounting principles (GAAP) or an other comprehensive bases of accounting (OCBOA) may exist, and the effects of those departures, if any, may not be disclosed.

---

[4] Whether an act is, in fact, fraudulent or illegal is a determination that is normally beyond the accountant's professional competence. An accountant, in reporting on financial statements, presents himself or herself as one who is proficient in accounting and compilation or review services. The accountant's training, experience, and understanding of the client and its industry may provide a basis for recognition that some client acts coming to his or her attention may be fraudulent or illegal. However, the determination as to whether a particular act is fraudulent or illegal would generally be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law.

- Substantially all disclosures (and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted.
- Lack of independence.
- Reference to any supplementary information.

.32 A written engagement letter, though not required in a traditional compilation engagement, provides a means of formalizing the understanding between the accountant and the client concerning the services to be rendered. Engagement letters are advantageous for the following reasons:

- They help to avoid client misunderstandings.
- They help to avoid staff misunderstandings.
- They reduce potential legal liability.
- They improve practice management.
- They clarify contractual obligations.

What to Include in an Engagement Letter

.33 The following items of information to include in an engagement letter are suggestions only; these items do not represent authoritative requirements:

- Identification of the client
- Record retention policy
- Description of the services to be provided
- Responses to subpoenas and outside inquiries
- Staffing of the engagement
- Explanation of how fees and costs will be billed
- Description of client responsibilities
- Payment terms
- Designation of client contacts
- Consequences of nonpayment
- Timing of the work
- Alternative dispute resolution
- Consequences of extending completion deadlines
- Withdrawal and termination
- Requests for additional services
- Client signature
- Client communications required by the AICPA
- Provisions to resolve potential ethical conflicts
- Any matter or terms unique to an engagement that are agreed upon in advance of rendering services

Overcoming Client Resistance to an Engagement Letter

.34 If the accountant encounters a situation in which the client exhibits reluctance about or resentment to an engagement letter, presenting the engagement letter face-to-face usually is sufficient to overcome any resistance on the part of the client.

.35 As an alternative to having the client sign an engagement letter, the accountant may consider developing a letter of understanding and mailing it to the client as a confirmation of the oral understanding. If an engagement letter is not obtained, the accountant may prepare a memorandum for the working papers describing the understanding with the client.

.36 Management is not required to sign the engagement letter, but it is preferable and highly advisable. Obtaining management's signature on the engagement letter helps to ensure that management has read and understands the letter and the engagement. If the engagement letter is mailed to the client, it may be advisable to send the letter by certified mail or another means that would provide proof of receipt. In any case, a copy of the engagement letter is typically included in the working papers.

Engagement Letters for Monthly, Quarterly, or Comparative Statements

.37 One engagement letter can be drafted to cover financial statements issued for a period of time, such as a year, or for comparative financial statements issued for multiple periods. It is also possible to use one engagement letter for all services to be performed (for example, compilation, review, consulting, bookkeeping, and tax services). However, the accountant may want to be cautious when addressing multiple levels of service (for example, compilation and review) in one engagement letter because this can be confusing to the client.

Minimizing Liability to Third Parties

.38 In certain cases, it may be beneficial to identify in the engagement letter any third parties that the accountant knows will rely on the compilation or review report to limit the ability of unknown third parties' use of the financial statements. For example, if the accountant knows at the time of the engagement that the client is negotiating with a bank for a loan of $100,000, the following language might be added to the engagement letter:

> We understand that you are negotiating with Last National Bank for a loan of $100,000 and that the purpose of our report on your financial statements is to enable you to present the compiled [reviewed] financial statements to Last National Bank. We are not aware of any other persons, entities, or limited groups of persons or entities for whose use or benefit this report is intended or contemplated.

.39 The use of language such as this in engagement letters varies in practice. Some CPAs feel that the language may offend clients or actually increase the likelihood of litigation from the identified third party, or both. Before adding such language, the accountant may wish to consult with legal counsel.

.40 Illustrative engagement letters for compilation engagements are presented in paragraphs .71–.72.

Practice Tip

The accountant may want to be cautious when adding additional services to the engagement letter. Although it is common to address additional services such as bookkeeping, tax, payroll, and consulting in this engagement letter, it is not advisable to include both the management-use compilation and traditional (unrestricted) compilation engagements in the same engagement letter. If the client needs compiled financial statements for third party use, it is recommended that a separate engagement letter be issued in order to reduce the risk of misunderstanding and confusion about the two types of engagements.

Also, be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by the accountant on the engagement. The accountant may also make sure that a final engagement letter is always issued in such circumstances.

Change in Engagement Level of Service

.41 Occasionally, during the course of an engagement, the client may request that the CPA change the nature of the engagement. The request may be for a

- step-up—for example, from a compilation to a review.
- change in service—for example, from a management-use-only compilation to a traditional compilation or from a traditional compilation to a review.
- step-down—for example, from an audit to a review or compilation.
- step-down—for example, from a review to a compilation.
- change in service—from a compilation with disclosures to a compilation without disclosures.
- change in service—for example, from a traditional compilation to a management-use-only compilation, or from a management-use-only compilation to bookkeeping services.

Step-Ups

.42 AR section 100A does not specifically address step-ups. Generally, step-ups pose no issues of great concern. The CPA might

- determine what additional procedures and standards are required for the level of service requested.
- determine whether it is possible and practical to perform the procedures and comply with the standards.
- revise the understanding with the client.

.43 If the client needs financial statements for third-party use, the accountant may compile, review, or audit the financial statements for that client and comply with the reporting requirements in AR section 100A. The accountant may do this even if he or she has previously compiled the financial statements for management's use only.

Practice Tip

The accountant may want to include language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use (compiled, reviewed, or audited), that service can be provided separately.

Step-Downs and Changes in Service

Step-Down From Audit to Review or Compilation

.44 Paragraphs .73–.78 of AR section 100A discuss three reasons that might cause a client to request a change from an audit engagement to another type of engagement after an audit has begun. They are as follows:

A change in circumstances affecting the entity's requirement for an audit

- For example, a bank may no longer require an audit because a line-of-credit is reduced to a level that does not require audited financial statements.
- Generally, a step-down, in this case, is acceptable.

A misunderstanding as to the nature of an audit, review, or compilation services originally available

- Generally, a step-down, in this case, is acceptable.
- The CPA may want to consider explaining all of the options available to the client.

A restriction on the scope of the audit, whether imposed by the client or caused by circumstances

- The implications of a scope restriction need to be considered carefully.
- Paragraph .76 of AR section 100A describes the following two circumstances that would preclude a step-down:
  - The accountant has been prohibited from corresponding with the entity's legal counsel.
  - The management or owner has refused to sign a client representation letter.

Step-Down From Review to Compilation

.45 Paragraph .73 of AR section 100A lists the following three reasons that might cause a client to request a change after a review has begun:

A change in circumstances affecting the entity's requirement for a review

- For example, a bank may no longer require a review because a line-of-credit is reduced to a level that does not require audited financial statements.
- Generally, a step-down, in this case, is acceptable.

A misunderstanding as to the nature of an audit, review, or compilation services originally available

- Generally, a step-down, in this case, is acceptable.
- The CPA may want to consider explaining all of the options available to the client.

A restriction on the scope of the inquiries or analytical procedures, whether imposed by the client or caused by circumstances.

- The implications of a scope restriction need to be considered carefully.
- The management's or owner's refusal to sign a client representation letter would preclude a step-down.

Change in Service From Full Disclosure to Omission of Substantially All Disclosures

.46 The accountant can agree to a request to change in service from a compilation with full disclosure financial statements to a compilation with financial statements that omit substantially all disclosures only if, to the best of his knowledge, the omission of disclosures is not intended to mislead those who might reasonably be expected to use the statements.

Change in Service From a Traditional Compilation to a Management-Use-Only Compilation

.47 The accountant can agree to a request to change in service from a traditional compilation to a management-use-only compilation if (1) he or she does not reasonably expect the financial statements to be used by a third party, (2) nothing comes to the accountant's attention that contradicts management's representation that the financial statements will not be used by a third party, and (3) the accountant documents his or her understanding with the client through the use of a written engagement letter.

Step-Down From a Management-Use-Only Compilation to a Bookkeeping Engagement

.48 The accountant can agree to a request to step-down from a management-use-only compilation to bookkeeping services if the accountant feels that the services will not constitute preparing and presenting financial statements to the client or third parties.

Communications Between Predecessor and Successor Accountants

.49 AR section 400A, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2), establishes guidance for communication between predecessor and successor accountants. Unlike AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1), which requires such communication between predecessor and successor auditors, AR section 400A does not require a successor accountant to communicate with a predecessor accountant in connection with acceptance of a compilation or review engagement, but he or she may believe it is beneficial to obtain information that will assist in determining whether to accept the engagement. The successor accountant may consider making inquiries of the predecessor accountant when circumstances such as the following exist:

- Information about the prospective client and its management and principals is limited or requires special attention.
- The change in accountants occurs substantially after the end of the accounting period for which financial statements are to be compiled or reviewed.
- The client has frequently changed accountants.

.50 The successor accountant should bear in mind that the predecessor accountant and the client may have disagreed about accounting principles, procedures applied by the predecessor accountant, or similarly significant matters.

.51 The successor accountant should request permission from the prospective client to make any inquiries of the predecessor accountant. Except as permitted by the AICPA Code of Professional Conduct, an accountant is precluded from disclosing any confidential information obtained in the course of an engagement unless the client specifically consents. Accordingly, if the successor accountant decides to communicate with the predecessor, the successor accountant should request the client to (*a*) permit the successor accountant to make inquiries of the predecessor accountant and (*b*) authorize the predecessor accountant to respond fully to those inquiries. If the prospective client refuses to permit the predecessor accountant to respond or limits the response, the successor accountant should inquire about the reasons and consider the implications of that refusal in connection with acceptance of the engagement (see paragraph .04 of AR section 400A).

Inquiries Regarding Acceptance of the Engagement

.52 According to paragraph .05 of AR section 400A, if a successor accountant decides to communicate with the predecessor accountant, either orally or in writing, the inquiries should be specific and reasonable regarding matters that will assist the successor accountant in determining whether to accept the engagement. Matters subject to inquiry may include the following:

- Information that might bear on the honesty or integrity of management
- Disagreements with management about accounting matters or performance of compilation or review procedures or similarly significant matters
- Cooperation from management when additional or revised information is needed
- Predecessor's knowledge of any fraud or illegal acts perpetrated within the client
- Predecessor's understanding of the reason for the change of accountants

.53 Paragraph .06 of AR section 400A states that the predecessor accountant, when authorized by the client, should respond promptly and fully to the inquiries on the basis of known facts. If the predecessor accountant decides, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor accountant should indicate that the response is limited. (Note that unpaid fees are not considered to be an unusual circumstance for purposes of this paragraph; however, see the following paragraph.) The successor accountant should consider the reasons and consider the implications of such a response in connection with acceptance of the engagement.

.54 Paragraph .08 of AR section 400A states that the successor accountant may wish to review the predecessor's working papers. In these circumstances, the successor accountant should request the client to authorize the predecessor accountant to allow access. Ordinarily, the predecessor accountant should make available certain working papers relating to matters of continuing significance and those relating to contingencies, for example. However, valid business reasons may lead the predecessor accountant to decide not to allow access to the working papers. Unpaid fees constitute a valid business reason to deny access to the predecessor accountant's working papers. The predecessor accountant may decide to reach an understanding with the successor accountant about the use of the working papers. Before permitting access to the working papers, the predecessor accountant may wish to obtain a written communication from the successor accountant regarding the use of the working papers. The appendix of AR section 400A contains an illustrative successor accountant acknowledgement letter presented for illustrative purposes only and is not required by professional standards. In addition, a predecessor accountant is not obligated to make himself or herself or the working papers available to more than one prospective successor accountant.

Materially Misleading Financial Statements

.55 If during the engagement, the successor accountant becomes aware of information that causes him or her to believe that the financial statements reported on by the predecessor accountant may need to be revised, the successor accountant should request the client to communicate the matter to the predecessor accountant. Paragraph .64 of AR section 100A provides guidance to the predecessor accountant in determining an appropriate course of action. If the client refuses to do so or if the predecessor accountant's response is inadequate, the successor accountant should evaluate (*a*) possible implications for the current engagement and (*b*) whether to resign from the engagement. Furthermore, the successor accountant may decide to consult with legal counsel in determining an appropriate course of further action.

Subsequent Discovery of Facts

.56 After compiling or reviewing a client's financial statements and issuing a report, the accountant may become aware of facts that lead him or her to believe that information supplied by the entity may have been incorrect, incomplete, or otherwise unsatisfactory had the accountant then been aware of such facts. Because of the variety of conditions that might be encountered, some of the procedures discussed subsequently are necessarily set out only in general terms; the specific actions to be taken in a particular case may vary with the circumstances. The accountant would be well advised to consult with his or her legal counsel and insurance provider when he or she encounters the circumstances to which this section may apply because of legal implications that may be involved in actions contemplated herein.

.57 As stated in paragraph .65 of AR section 100A, after the date of the accountant's compilation or review report, the accountant has no obligation to perform other compilation or review procedures with respect to the financial statements, unless new information comes to his or her attention. However, when the accountant becomes aware of information that relates to financial statements previously reported on by him or her, but that was not known to the accountant at the date of the report, and that is of such a nature and from such a source that the accountant would have investigated it had it come to his or her attention during the course of the compilation or review, the accountant should, as soon as practicable, undertake to determine whether the information is reliable and whether the facts existed at the date of the report. In this connection, the accountant should discuss the matter with his or her client at whatever management levels the accountant deems appropriate, including the board of directors, and request cooperation in whatever investigation may be necessary. If the nature and effect of the matter are such that (*a*) the accountant's report or the financial statements would have been affected if the information had been known to the accountant at the accountant's compilation or review report date and had not been reflected in the financial statements and (*b*) the accountant believes that there are persons currently using or likely to use the financial statements who would attach importance to the information, the accountant should

- in a compilation engagement, obtain additional or revised information.

- in a review engagement, perform the additional procedures deemed necessary to achieve limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with generally accepted accounting principles.

With respect to (*b*), consideration should be given, among other things, to the time elapsed since the financial statements were issued.

.58 When the accountant has concluded, after considering (*a*) and (*b*) in the preceding paragraph as appropriate, that action should be taken to prevent further use of the accountant's report or the financial statements, the accountant should advise his or her client to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to persons who are known to be currently using or who are likely to use the financial statements. When the client undertakes to make appropriate disclosure, the method used and the disclosure made will depend on the circumstances.

a. If the effect on the accountant's report or the financial statements of the subsequently discovered information can promptly be determined, disclosure should consist of issuing, as soon as practicable, revised financial statements and, where applicable, the accountant's report. The reasons for the revision usually should be described in a note to the financial statements and, where applicable, referred to in the accountant's report. Generally, only the most recently issued, compiled, or reviewed financial statements would need to be revised, even though the revision resulted from events that had occurred in prior years.[5]

b. When issuance of financial statements for a subsequent period is imminent, so that disclosure is not delayed, appropriate disclosure of the revision can be made in such statements instead of reissuing the earlier statements pursuant to subparagraph (*a*).[6]

c. When the effect on the financial statements of the subsequently discovered information cannot be promptly determined, the issuance of revised financial statements would necessarily be delayed. In this circumstance, when it appears that the information will require a revision of the statements, appropriate disclosure would consist of notification by the client to persons who are known to be using or who are likely to use the financial statements that they should not be used, and that revised financial statements will be issued and, where applicable, the accountant's report will be issued as soon as practicable.

.59 The accountant should take whatever steps he or she deems necessary to satisfy himself or herself that the client has made the disclosures specified in paragraph .58 of this section.

.60 If the client refuses to make the disclosures specified in paragraph .58 of this section, the accountant should notify the appropriate personnel at the highest levels within the entity, such as the manager (owner) or the board of directors, of such refusal and of the fact that, in the absence of disclosure by the client, the accountant will take steps as subsequently outlined to prevent further use of the financial statements and, if applicable, the accountant's report. The steps that can appropriately be taken will depend upon the degree of certainty of the accountant's knowledge that there are persons who are currently using or who will use the financial statements and, if applicable, the accountant's report, and who would attach importance to the information, and the accountant's ability as a practical matter to communicate with them. Unless the accountant's attorney recommends a different course of action, the accountant should take the following steps to the extent applicable:

a. Notification to the client that the accountant's report must no longer be associated with the financial statements.

b. Notification to the regulatory agencies having jurisdiction over the client that the accountant's report should no longer be used.

---

[5] See paragraphs 26–27 of Accounting Principles Board (APB) Opinion No. 9, *Reporting the Results of Operations*, and paragraphs 25–26 of Financial Accounting Standards Board (FASB) Statement No. 154, *Accounting Changes and Error Corrections*, regarding disclosure of adjustments applicable to prior periods.

[6] See paragraphs 26–27 of APB Opinion No. 9 and paragraphs 25–26 of FASB Statement No. 154 regarding disclosure of adjustments applicable to prior periods.

c. Notification to each person known to the accountant to be using the financial statements that the financial statements and the accountant's report should no longer be used. In many instances, it will not be practicable for the accountant to give appropriate individual notification to stakeholders whose identities ordinarily are unknown to him or her; notification to a regulatory agency having jurisdiction over the client will usually be the only practicable way for the accountant to provide appropriate disclosure. Such notification should be accompanied by a request that the agency take whatever steps it may deem appropriate to accomplish the necessary disclosure.

Although a compilation report does not express any form of assurance on the financial statements, it would seldom be appropriate for an accountant to conclude, simply because his or her responsibilities were limited to a compilation service, that notification of third party users in the absence of notification by the client is not required when the accountant knows that the financial statements should be revised.

.61 The following guidelines should govern the content of any disclosure made by the accountant in accordance with paragraph .60 of this section to persons other than his or her client:

a. The disclosure should include a description of the nature of the subsequently acquired information and its effect on the financial statements.

b. The information disclosed should be as precise and factual as possible and should not go beyond that which is reasonably necessary to accomplish the purpose mentioned in the preceding subparagraph (*a*). Comments concerning the conduct or motives of any person should be avoided.

If the client has not cooperated, the accountant's disclosure need not detail the specific information, but can merely indicate that information has come to his or her attention which the client has not cooperated in attempting to substantiate and that, if the information is true, the accountant believes that the compilation or review report must no longer be used or associated with the financial statements. No such disclosure should be made unless the accountant believes that the financial statements are likely to be misleading and that the accountant's compilation or review report should not be used.

Management-Use-Only Financial Statements Distributed to Third Parties

.62 Paragraph .25 of AR section 100A states the following:

> If the accountant becomes aware that the financial statements have been distributed to third parties, the accountant should discuss the situation with the client and request that the client have the statements returned. If the client does not comply with this request within a reasonable period of time, the accountant should notify known third parties that the financial statements are not intended for third-party use, preferably in consultation with his or her attorney.

.63 If the accountant determines that the financial statements were given to a third party unintentionally (for example, the client made a mistake or forgot about the restricted nature of the financial statements), then he or she should discuss with the client the restricted nature of the statements and request that the client retrieve all copies from third parties. If the client complies, then there is no need for further action.

.64 However, if the accountant discovers that the client intentionally disregarded the restriction placed on the use of the financial statements, and if the client refuses to retrieve the financial statements, then he or she should notify known third parties that the financial statements are not intended for third-party use. The accountant also might consider how such an action on the client's part to intentionally disregard the distribution restriction bears on management's integrity and, as a result, on the performance of any further services for that client.

.65 Some accountants have suggested that the potential risk of third-party distribution is high and, therefore, may avoid performing the management-use-only type of compilation. However, in our profession, there are other restricted use professional services that are offered (for example, agreed-upon procedures engagements and projections). If the management-use-only engagement is performed correctly, including obtaining a written engagement letter and placing a legend indicating the restricted nature of the presentation on each page of the financial statements, then the risk of third-party distribution will likely be very low.

Practice Tip

Notification of third parties would involve legal matters beyond the scope of this manual. Therefore, the accountant might want to consult with an attorney before taking any action. In order to minimize the risk of a client distributing management-use-only financial statements to third parties, the accountant may want to include language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use that service can be provided separately (see illustrative engagement letter in paragraph .71).

When to Withdraw From an Engagement

.66 The CPA may consider withdrawing from an engagement if any of the following conditions exist:

- He or she determines that he or she does not have and cannot obtain sufficient knowledge of the client's business or industry.
- The client refuses or is unable to provide additional or revised information when the accountant has become aware that information supplied is incorrect, incomplete, or otherwise unsatisfactory.
- Disclosures were omitted with an intent to mislead.
- The CPA determines that he or she is not independent with respect to the entity, and reviewed financial statements are required.
- The compiled or reviewed financial statements contain departures from GAAP that the client will not correct, and the CPA believes the departures were undertaken with the intention of misleading statement users.
- There have been substantial limitations in the scope of the engagement, particularly in a review engagement when management does not provide a client representation letter.
- Information comes to the accountant's attention that contradicts management's representation that financial statements compiled for management's use only will not be used by third parties.

Key Question and Answer Guidance

.67 The AICPA Practice Aid *Compilation and Review Engagements—Essential Questions and Answers* (product no. 006622) is an extensive compendium of questions and answers about compilation and review services. The content was assembled by CPAs with extensive knowledge and experience in the compilation and review arena. The questions and answers were developed from inquiries received by the AICPA Accounting and Auditing Technical Hotline, the AICPA *Technical Practice Aids*, the AICPA Ethics division, and from the collective knowledge and experience of the authors.

.68 Answering specific questions about compilations and reviews, this practice aid covers many topics including the following:

- Accounting principles
- Engagement administration
- Prescribed forms
- Supplementary information
- Fraud and illegal acts

- Interim financial statements
- Financial statements prepared on an other comprehensive basis of accounting
- Personal financial statements

.69 Moreover, the practice aid provides an overview of the standards and guidance associated with compilations and reviews. Developed in an easy-to-read format, *Compilation and Review Engagements—Essential Questions and Answers* is available by calling the AICPA at 888-777-7077 or going online at www.cpa2biz.com.

Client Acceptance and Continuance Form—Part I
Client: ______________________________   **Financial Statement Date:** ______________________________

INSTRUCTIONS:

Part I: This form may be completed for all prospective clients for which audit, review, or compilation services are to be performed. The date on the form is ordinarily completed by the in-charge of the engagement and approved by the engagement partner as a basis for initially accepting the client. Part I is typically updated and reviewed annually as a basis for deciding to retain the client.

Part II: Part II is typically completed by the engagement partner and concurring partner to document the firm's decision to either accept or reject the client.

CLIENT'S LEGAL NAME:

ADDRESS:

PHONE:	FISCAL YEAR END:

FEDERAL I.D. NO.:	STATE I.D. NO.:

1. Describe the nature of the client's business (and locations, if other than above address):

2. Identify the type of entity (for example, corporation, proprietorship, partnership, or S corporation):

3. List key owners, officers, and directors of the client:

Name	Percentage Owned	Position	Family Relationship

4. Identify any related businesses or individuals:

Name	Nature of Relationship

5. Identify the client's predecessor accountants:

Name:
Address:
Contact Person:

6. Indicate the results of our inquiries of the predecessor accountants regarding the following:

   a. Reasons for change of accountant: ______________________

   ____

   ____

   b. Integrity of management: ______________________

   ____

   ____

   c. Disagreements on accounting principles and auditing, review, or compilation procedures:______

   ____

   ____

   d. Fee disputes: ______________________

   ____

   ____

7. Describe the client's relationship with financial institutions:______________________

____

____

Name	Type of A/C's or Loans	Account Executive

8. Describe the services our firm is to provide: ______________________________

____

____

	How Often?			Report Deadlines
Service	Monthly	Quarterly	Annually	

<u>Other Services:</u>

Consulting services: ______________________________

Federal tax returns: ______________________________

State tax returns: ______________________________

Payroll tax returns: ______________________________

Tax returns for principal owners: ______________________________

9. Will the financial statements and reports be used for high risk purposes, for example, reports to regulatory agencies, to obtain significant amounts of new credit, to obtain performance bonding, or for purchase of the business? ______________________________

Describe the use of the financial statements:

10. Read the latest financial statements and tax returns and indicate any unusual items:

11. Does the client have potential going-concern problems? ______________________

If so, describe them:

12. Describe the client's major sources of financing:

13. State name(s) of third parties contacted concerning management's and owners' reputation, attitude, ability, and integrity:

14. Describe any significant engagement performance, accounting, or tax problems with which we should be concerned:

15. Identify the client's legal counsel:

Name:
Address:
Contact Person:

16. Describe any pending litigation against the client or its principals:

17. Describe the billing arrangements:

18. Describe any potential independence problems with respect to the client:

19. Describe any major changes in the above information since our last evaluation of this client. Also describe any other matters that have come to our attention that would have caused us to reject the client had we been aware of them at the time of our initial acceptance of this client:

.71 Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use[†]

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of my (our) engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

> I (We) will compile, from information you provide, the [*monthly, quarterly, or other frequency*] financial statements of Gowers Drug Stores for the year 20XX.
>
> I (We) will compile the financial statements in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A compilation is limited to presenting, in the form of financial statements, information that is the representation of management. I (We) will not audit or review the financial statements and, accordingly, will not express an opinion or any other form of assurance on them.
>
> The financial statements will not be accompanied by a report. Based upon my (our) discussions with you, these financial statements are for management's use only and are not intended for third-party use.
>
> Material departures from generally accepted accounting principles (GAAP) or other comprehensive basis of accounting (OCBOA) may exist and the effects of those departures, if any, on the financial statements may not be disclosed. In addition, substantially all disclosures required by GAAP or OCBOA may be omitted. [*The accountant may wish to identify known departures.*] Notwithstanding these limitations, you represent that you have knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements that allows you to place the financial information in the proper context. Further, you represent and agree that the use of the financial statements will be limited to members of management with similar knowledge.
>
> The financial statements are intended solely for the information and use of [*include list of specified members of management*] and are not intended to be and should not be used by any other party.—[*optional*]

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors, of any evidence or information that comes to my (our) attention during the performance of compilation procedures, that fraud may have occurred. In addition, I (we) will report to you any evidence or information that comes to my (our) attention during the performance of my (our) compilation procedures regarding illegal acts that may have occurred unless they are clearly inconsequential.

We are not independent with respect to [*name of entity*].—[*if applicable*]

As part of my (our) engagement, I (we) will also (list any nonattest services to be provided, if applicable, such as income tax preparation and bookkeeping services).

You are responsible for

a. making all management decisions and performing all management functions;

b. designating an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

[†] In February 2008, the ARSC issued SSARS No. 17, which, among other things, amends appendix D of AR section 100A, from which this illustrative engagement letter is derived. SSARS No. 17 is effective for periods ending on or after December 15, 2008, with early application permitted. This letter will be updated for SSARS No. 17 in the next edition.

c. evaluating the adequacy and results of the services performed;

d. accepting responsibility for the results of the services; and

e. establishing and maintaining internal controls, including monitoring ongoing activities.

The other data accompanying the financial statements are presented only for supplementary analysis purposes and will be compiled from information that is the representation of management, without audit or review, and I (we) will not express an opinion or any other form of assurance on such data.—[*if applicable*]

Our fees for these services [*fill in*]

Should you require financial statements for third-party use, I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.[7]

Sincerely yours,

____

.72 Illustrative Engagement Letter for a Compilation of Financial Statements[‡]

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

> I (We) will compile, from information you provide, the annual and interim balance sheets and related statements of income, retained earnings, and cash flows of Gowers Drug Stores for the year 20XX.
>
> I (We) will compile the financial statements and issue an accountant's report thereon in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A compilation is limited to presenting, in the form of financial statements, information that is the representation of management. I (We) will not audit or review the financial statements and, accordingly, will not express an opinion or any other form of assurance on them.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors, and of any evidence or information that comes to our attention during the performance of my (our) compilation procedures, that fraud may have occurred. In addition, I (we) will report to you any evidence or information that comes to my (our) attention during the performance of my (our) compilation procedures regarding illegal acts that may have occurred, unless they are clearly inconsequential.

As part of my (our) engagement, I (we) will also (list any nonattest services to be performed, if applicable, such as income tax preparation and bookkeeping services).

You are responsible for

a. making all management decisions and performing all management functions;

b. designating an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

c. evaluating the adequacy and results of the services performed;

d. accepting responsibility for the results of the services; and

e. establishing and maintaining internal controls, including monitoring ongoing activities.

If, for any reason, I (we) am (are) unable to complete the compilation of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

My (Our) fees for these services....

I (We) shall be pleased to discuss this letter with you at any time.

[‡] In February 2008, the ARSC issued SSARS No. 17, which, among other things, amends appendix C of AR section 100A, from which this illustrative engagement letter is derived. SSARS No. 17 is effective for periods ending on or after December 15, 2008, with early application permitted. This letter will be updated for SSARS No. 17 in the next edition.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).[8]

Sincerely yours,

____

.73 Illustrative Engagement Letter for a Review of Financial Statements[||]

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

> I (We) will review the balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, and issue an accountant's report thereon in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. I (We) will not perform an audit of such financial statements, the objective of which is the expression of an opinion regarding the financial statements taken as a whole, and, accordingly, I (we) will not express such an opinion on them.
>
> A review consists primarily of inquiries of company personnel and analytical procedures applied to financial data. A review does not contemplate obtaining an understanding of internal control or assessing control risk, tests of accounting records and responses to inquiries by obtaining corroborating evidential matter, and certain other procedures ordinarily performed during an audit. Thus, a review does not provide assurance that I (we) will become aware of all significant matters that would be disclosed in an audit.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors, and of any evidence or information that comes to our attention during the performance of our review procedures, that fraud may have occurred. In addition, I (we) will report to you any evidence or information that comes to my (our) attention during the performance of my (our) review procedures regarding illegal acts that may have occurred, unless they are clearly inconsequential.

As part of my (our) engagement, I (we) will also (list any nonattest services to be provided, if applicable, such as income tax preparation and bookkeeping services).

You are responsible for

a. making all management decisions and performing all management functions;

b. designating an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

c. evaluating the adequacy and results of the services performed;

d. accepting responsibility for the results of the services; and

e. establishing and maintaining internal controls, including monitoring ongoing activities.

As part of my (our) review procedures, I (we) will require certain written representations from management about the financial statements and matters related thereto.

If, for any reason, I (we) am (are) unable to complete my (our) review of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

My (Our) fees for these services....

I (We) shall be pleased to discuss this letter with you at any time.

[||] In February 2008, the ARSC issued SSARS No. 17, which, among other things, amends appendix E of AR section 100A, from which this illustrative engagement letter is derived. SSARS No. 17 is effective for periods ending on or after December 15, 2008, with early application permitted. This letter will be updated for SSARS No. 17 in the next edition.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

.74 Illustrative Engagement Letter for a Bookkeeping Engagement

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. So that I (we) can meet your expectations related to the services we will provide, this engagement letter clearly identifies both the services that will be provided and the frequency with which these services will be provided.

I (We) will prepare semi-monthly payroll checks and compute required withholdings based on hours worked, rates of pay, tax jurisdictions, and withholding information provided by you or your representative. You will need to review all payroll checks prior to signing them, and notify me (us) promptly of any errors. I (We) will notify you of required payroll tax deposits. Failure to make these deposits on a timely basis will subject you to penalties and interest.

I (We) will prepare quarterly and annual payroll tax returns, as well as your annual 1099 forms. You will need to review the returns prior to signing them, and notify me (us) promptly of any errors or omissions.

Any significant changes in the number of employees, various miscellaneous deductions, or other items involved could cause an increase in our fees. I (We) also require that you provide complete information in good "working order" for us, with checks and deposits coded to the proper accounts. I (We) will discuss with you in advance any proposed increase in our fees.

I (We) will also assist you with various bookkeeping functions, including consultation on recordkeeping, recording of transactions, and periodic adjustments, among others.

Our work in connection with this engagement is not intended to result in submission or issuance of financial statements by [*Firm*] as defined by Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. As defined by professional standards, a submission of financial statements occurs when an accountant presents to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software. By your signature below, you understand that the submission of financial statements as defined above is outside the scope of this engagement.

Should you require financial statements (either for management use or third-party use), I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist.

I (We) appreciate the opportunity to be of service to you and believe that this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let me (us) know. If the foregoing terms are in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).

Sincerely yours,

____

[*The next page is 2301.*]

AAM Section 2300

*Compilation Engagements**

Type of Compilation

.01 Paragraph .04 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), defines a *compilation* as follows:

> Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

.02 AR section 100A now provides for two types of compilations:

- Compiled financial statements should be accompanied by a report when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects the financial statements to be used by a third party. This might be referred to as a *traditional compilation.*
- A compilation without a report is available when the accountant does not reasonably expect the financial statements to be used by a third party. This might be referred to as a *management-use-only compilation.*

.03 In either case, the engagement is a compilation, and the accountant must consider the performance requirements in AR section 100A. The difference between the two options lies in the form of communication used in the engagement (see exhibit 2200-1 in the previous section of this manual for additional details).

What's the Difference Between a Traditional Compilation and Management-Use-Only Compilation?

.04 Some accountants have suggested that there is no real difference between the traditional compilation and the management-use-only compilation because essentially the same information is communicated in either a compilation report or an engagement letter. Although there are similarities in the two forms of communication, there are substantial differences. Both forms of communication (report and engagement letter) are used to communicate the following:

- *What the engagement is*—in both cases, the CPA tells the user that the financial statements are compiled and explains what a compilation is (presenting in the form of financial statements information that is the representation of management).
- *What the engagement is not*—in both cases, the CPA tells the user that the financial statements are not audited or reviewed, and that no opinion or any other form of assurance is expressed.
- *Limitations in the financial statements*—in both cases, the CPA tells the user about any limitations in the financial statements. In this area, however, the way in which limitations are communicated is very different.

---

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

— *Traditional Compilation (Report)*—Paragraphs .51–.52 of AR section 100A states that if the accountant becomes aware of a measurement or disclosure departure in the financial statements, the financial statements should be revised or the report should be modified to disclose the departure. In other words, absent revision of the financial statements, the accountant should add an additional paragraph to the report to disclose the nature of the departure and disclose the effect of the departure on the financial statements (if the effect is known). The accountant is not required to determine the effects of a departure if management has not done so, provided the accountant states in the report that such determination has not been made.

— *Management-Use-Only Compilation (Engagement Letter)*—Paragraph .23 of AR section 100A states that the accountant should include in the engagement letter a statement that material departures from generally accepted accounting principles (GAAP) or an other comprehensive bases of accounting (OCBOA) may exist and the effects of those departures on the financial statements may not be disclosed.

.05 The reason for this difference in communication is based on the intended user of the financial statements. In the case of a traditional compilation, the financial statements are intended to be used by anyone (general-use). Therefore, the limitations should be communicated in such a way as to be understood by anyone, including those not familiar with the financial matters of the entity. In the case of a management-use-only compilation, the financial statements are intended for a limited group of management (non third parties). By definition, these members of management have a certain level of knowledge about the business and about the engagement that the accountant is performing. For that reason, the issue of limitations can be handled in a more broad way (departures may exist) rather than specifically identifying each and every known departure.

.06 In an engagement to compile financial statements for management's use only, a written engagement letter is required. (Note that in all compilation and review engagements, an understanding with the client is required.) This engagement letter might address certain matters, as described in paragraph .33 of AAM section 2200, *Engagement Planning and Administration.* It is permissible to issue one engagement letter to cover multiple periods or multiple services, or both. However, it is recommended that this engagement letter be updated at least annually. Because client relationships change over time, it is especially important in this type of engagement to ensure that there is a good understanding between the CPA and the client (restricted nature of the statements, limitations of the financial statements).

Performance Requirements for a Compilation Engagement

.07 AR section 100A states that in all compilation engagements, the performance standards in paragraph .05 and paragraphs .07–.10 of AR section 100A should be followed.

.08 These performance standards consist of the following:

- *Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.*

The accountant should have a sufficient understanding of his or her client's industry to know what the financial statements for an entity in that industry should look like and to be aware of any accounting principles or practices that are unique to that industry. The accountant does not have to be an industry expert, and he or she can obtain this general understanding if he or she does not already possess it (for example, through AICPA guides, nonauthoritative industry guides, and trade publications).

- *Have or obtain a general understanding of the client's business.*

The accountant should have a general understanding of the client's business transactions, form of its accounting records, stated qualifications of accounting personnel, basis of accounting on which the financial statements are to be presented, and form and content of the financial statements, according to the standard. The purpose of this general understanding is to determine whether it will be necessary for the accountant to perform other accounting services (such as bookkeeping and adjustments) in order to compile the financial statements.

- *Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.*

This requirement to obtain additional or revised information has different meanings depending upon the intended use of the financial statements. For example, if the financial statements will be used by a third party (or if the accountant reasonably expects that they might be used by a third party), any information that appears to be incomplete, incorrect, or unsatisfactory for use by that third party (for example, missing disclosures or measurement departures) should be obtained from or corrected by the client. On the other hand, if the financial statements are not intended to be used by third parties, then that same information may be sufficient for management because they have the requisite knowledge of the business to put the information in the proper context.

- *Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.*

This final reading of the financial statements is sometimes called the *smell test*. The primary purpose of the smell test requirement is to look for mathematical or clerical errors, presentation errors (for example, incorrect titles on the financial statements), and others.

Traditional Compilation

Performance Requirements

.09 In order to perform a traditional compilation, the accountant should

- establish an understanding with the client (See paragraphs .29–.40 of AAM section 2200).
- have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.
- have or obtain a general understanding of the client's business.
- obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.
- read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Reporting Requirements

.10 If the accountant submits financial statements to a client that will be used by a third party (or if he or she reasonably expects that they might be used by a third party), the accountant should comply with the reporting requirements in paragraphs .11–.20 of AR section 100A.

.11 Illustrative reports for compiled financial statements are included in AAM section 2610, *Accountants' Reports on Compilation of Financial Statements of a Nonpublic Entity*.

Management-Use-Only Compilation

Performance Requirements

.12 In order to perform a management-use-only compilation, the accountant should

- establish an understanding with the client and document that understanding through the use of an engagement letter (See paragraphs .29–.40 of AAM section 2200).

- have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.
- have or obtain a general understanding of the client's business.
- obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.
- read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Third Parties

.13 In deciding whether the financial statements are, or reasonably might be, expected to be used by a third party, the accountant may rely on management's representation without further inquiry, unless information comes to his or her attention that contradicts management's representation. Paragraph .04 of AR section 100A defines *third parties* as follows:

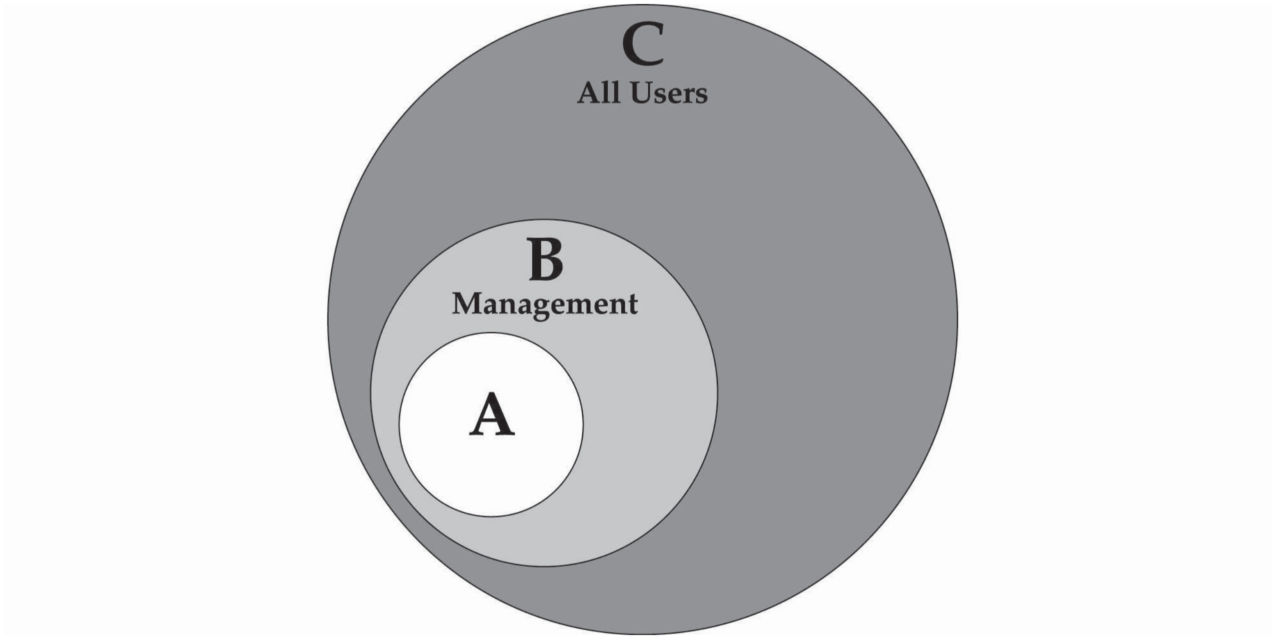
> All parties except for members of management who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

.14 This is a definition by exception. In other words, the starting point for determining who is a third party is that *all* parties are third parties, with the exception of certain members of management. Those certain members of management would be those members who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements. In order to not be considered a third party, the person or persons could meet the following two requirements:

- He or she is a member of management.
- He or she is knowledgeable enough about the business to put the information in the proper context.

.15 In exhibit 2300-1, "Third Parties," circle C represents all potential users of an entity's financial statements (banks, bonding companies, creditors, shareholders, vendors, customers, and so on), and circle B represents all members of management. All users in circle C would be considered third parties. In addition, members of management in circle B—those without the requisite knowledge of the client's business that would allow them to place the information contained in the financial statements in the proper context—also would be considered third parties. Compiled financial statements which do not include a report should be restricted to those parties in circle A—those members of management who have the requisite knowledge of the business.

Exhibit 2300-1—Third Parties



.16 Although some judgment will be involved in making this determination, the accountant may rely on management's representation that they have the necessary knowledge of the business to put the information in the proper context.

.17 This definition does not mean that certain members of management have to be thoroughly knowledgeable about technical accounting principles and procedures. Instead, management might be knowledgeable about the nature of the services the accountant is providing and understand the procedures and assumptions he or she is using. Consider these examples of third parties:

- ABC Company is a small, closely-held business, owned and managed by its sole shareholder, John. In this situation, absent evidence to the contrary, John has the requisite knowledge of his business and would not be considered a third party.
- KLM Company is a small, closely-held business, managed by one of its ten shareholders, Jane (the other nine shareholders live out of state and are not involved in the management of the business). In this situation, absent evidence to the contrary, Jane has the requisite knowledge of the business and would not be considered a third party. The other nine shareholders, however, would be considered third parties.
- XYZ Company is a small, closely-held business. The management team consists of a president, Joe; controller, Mary; operations manager, Sue; and sales manager, Jim. Joe, Mary, and Sue are all involved in the financial operation of the company and are knowledgeable about the accounting principles and practices being used. Jim, on the other hand, has no finance background and is not involved in the financial operation of the company. In this example, Joe, Mary, and Sue would not be considered third parties. Jim, although he is a member of management, does not have the requisite knowledge of the accounting practices of the business and would be considered a third party.

.18 Note that those members of management that are considered third parties (Jim, in the preceding example) could be "brought into the loop" or removed from third party status. Removing management members from third-party status would occur by educating those members of management about the accounting principles and practices of the business, thereby allowing them to place the information in the proper context. This education could be accomplished by other members of management or by the accountant.

Transmittal Letter for Management-Use-Only Compilation

.19 Some accountants have questioned whether they should include a transmittal letter with financial statements compiled for management's use only. While a transmittal letter is not required by Statements on Standards for Accounting and Review Services (SSARSs), it is permissible to attach such a letter to management-use-only financial statements. This letter, however, may not contain any language that resembles that found in a traditional compilation report.

Documentation Requirement

.20 AR section 100A does not discuss working paper documentation for a compilation engagement except in the case of the engagement letter in a management-use-only compilation.[1] Although not required, including the type of documentation noted in the following list may be helpful from a risk management and quality control perspective:

- Engagement letter
- Trial balance information to bridge the client's records to the compiled financial statements
- Notes on how incorrect, incomplete, or unsatisfactory matters were resolved, if any
- If required by firm policy, compilation work program, procedural checklists, and disclosure checklists

.21 In order to reduce misunderstandings, an accountant might document all client discussions, in person or over the phone. Such documentation could identify all parties to the discussion, what was said, and by whom. Entries could be initiated and dated by the accountant. Also, the accountant may wish to consider potential consequences to the client if they ignore, misinterpret, or fail to act on advice or conclusions. If such actions could result in lost financial benefits or adverse tax consequences to the client, or if action by other professionals is recommended or required, the accountant may wish to send a follow-up letter to the client explaining the substance of the discussions and detailed recommendations.

.22 As a best practice, the accountant may have a policy to never include unsubstantiated subjective statements in a working paper file. If documenting observations regarding questionable client ethics or possible fraud, the accountant may consider listing the objective findings that led to this observation. In addition, the accountant may want to reflect and accurately describe work performed during the engagement on timesheets. Additionally, it is best to avoid using terms like *audit* and *review*, unless the service performed fits the definitions contained in the AICPA *Professional Standards*.

Practice Tip

Remember—all relevant information is potentially subject to discovery in a lawsuit, regardless of the storage medium.

.23 Compilation Engagement Program

Client:	**Balance Sheet Date:**
Completed by:	**Date Completed:**

[1] AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), does require documentation of the understanding with the client in the form of a written engagement letter for a management-use-only compilation (if a compilation report is not to be issued).

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance and Continuance Form.	
2. Consider whether the firm is independent. If not independent, the compilation report should be modified to indicate that fact.	
3. Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.	
4. If the engagement was originally intended to be an audit or a review, document the appropriateness of the decision to step-down.	
5. Acquire the necessary knowledge and understanding of the following:	
a. Accounting principles and practices of the industry	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements	
6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.	
7. If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.	
8. Draft and read the financial statements and consider whether:	
a. the financial statements include all required disclosures, unless substantially all disclosures are omitted.	
b. financial statements prepared in accordance with an OCBOA present proper OCBOA titles and disclose the basis of accounting either in the notes or in the compilation report.	
c. the financial statements are appropriate in form.	
d. the financial statements are free of obvious mathematical or clerical error.	
e. the financial statements are free of obvious measurement departures from GAAP or OCBOA.	
9. Draft the accountant's report.	
10. If the financial statements omit substantially all disclosures required by GAAP or OCBOA, add an additional paragraph to the report disclosing the omission.	
11. If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:	
a. Revise the financial statements or modify the report to indicate the departure.	
b. If the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.	
c. If modification of the report is not considered adequate, consider withdrawing from the engagement.	

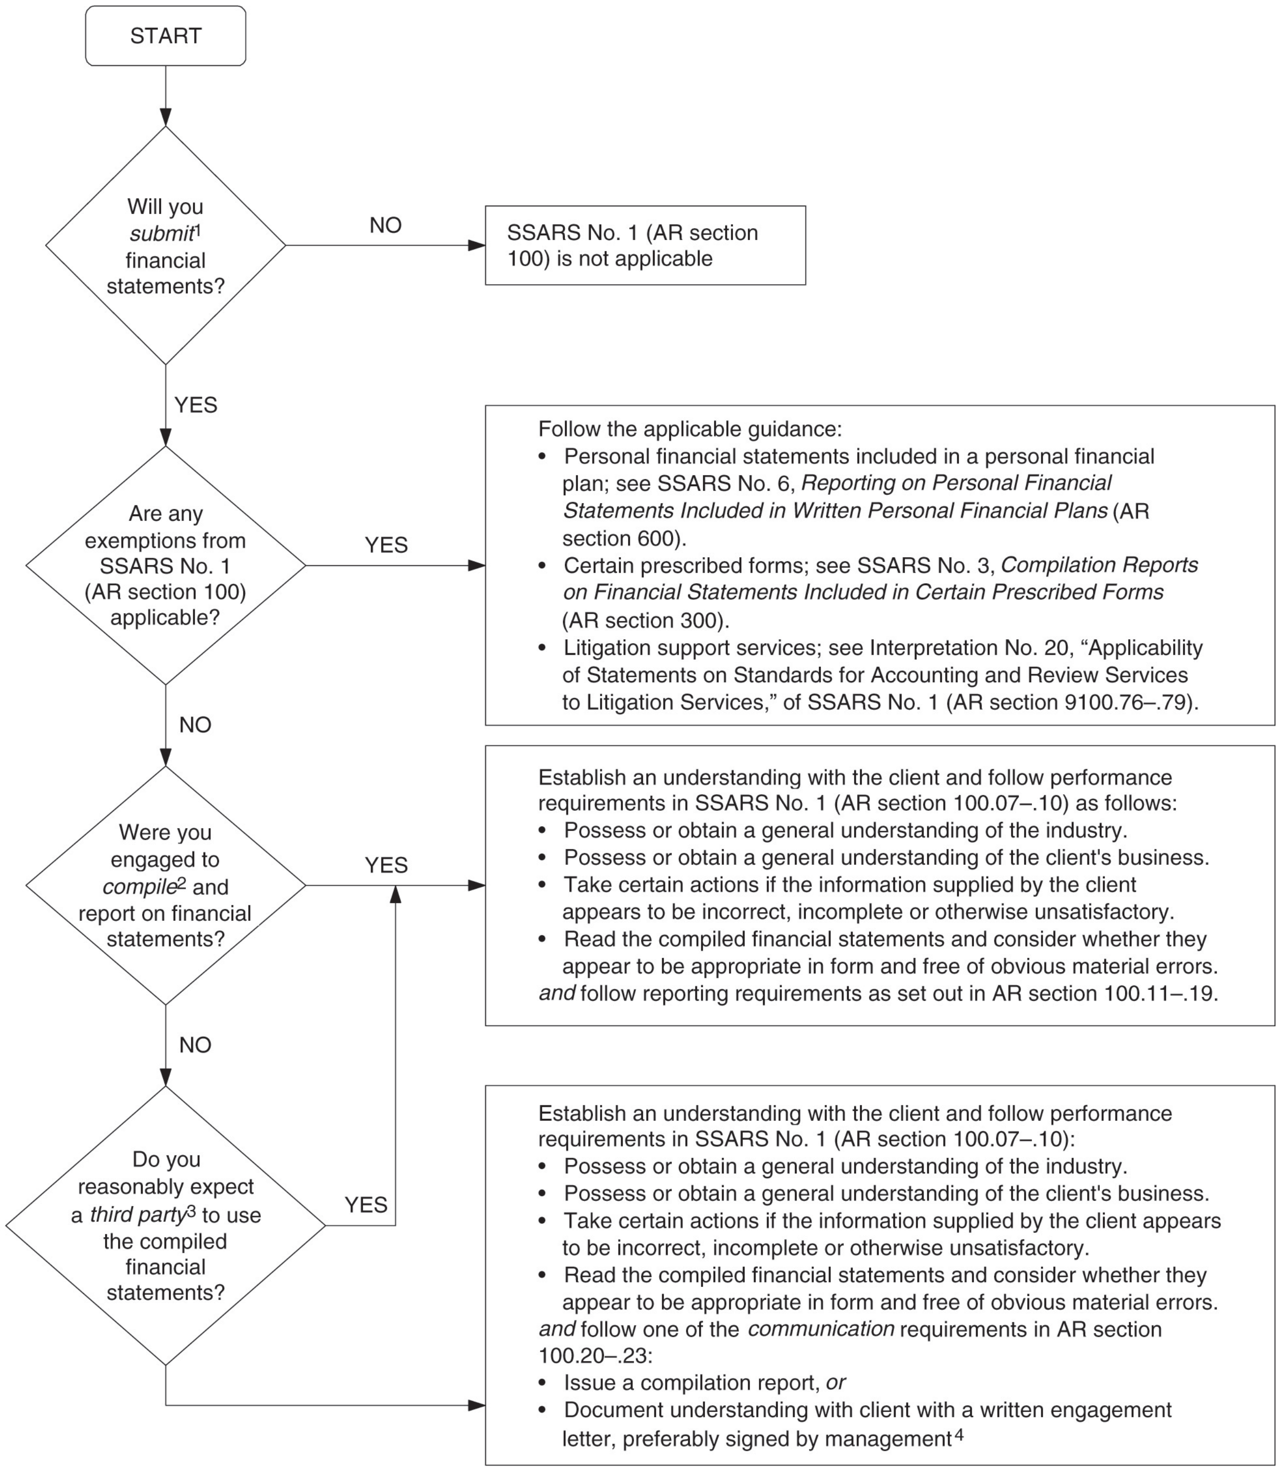
(continued)

Procedure	Completed by or N/A
12. If supplementary data accompanies the financial statements, consider referring to the other data in the compilation report or issuing a separate report on the other data.	
13. Include a reference to the report on each page of the financial statements and supplementary data.	
14. Document any other procedures performed or unusual problems and their resolution.	
15. Determine that all required forms and checklists have been completed.	
16. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the working papers.	
17. Date the report as of the date the compilation was completed.	

Compilation of Financial Statements Flowchart

.24 During the initial development of SSARS No. 8, *Amendment to Statement on Standards for Accounting and Review Services No. 1* Compilation and Review of Financial Statements (AICPA, *Professional Standards*, vol. 2, AR sec. 100A), the members of the Accounting and Review Services Committee designed a flowchart to help guide their discussion about the proposed changes in AR section 100A. That flowchart, which first appeared in SSARS No. 8, is also currently available in appendix A, "Compilation of Financial Statements," of AR section 100A We are including it here with the addition of explanatory notes following.

Exhibit 2300-2—Compilation of Financial Statements



---

1 **Submission of financial statements**. Presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

2 **Compilation of financial statements**. Presenting in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the statements.

3 **Third parties**. All parties except for management who are generally knowledgeable and understand the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

[4] The engagement letter should include the following matters:

- A description of the nature and limitations of the services to be performed
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management
- A statement that the financial statements have not been audited or reviewed
- A statement that no opinion or any other form of assurance on the financial statements will be provided
- An acknowledgement that management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements
- An acknowledgement of management's representation and agreement that the financial statements will not be used by third parties
- A statement that the engagement cannot be relied upon to disclose errors, fraud, or illegal acts

The engagement letter should also include the following additional matters, if applicable:

- A statement that material departures from GAAP or OCBOA may exist and the effects of those departures on the financial statements may not be disclosed
- A statement that substantially all disclosures (and the statement of comprehensive income and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted
- A statement that the accountant is not independent
- A reference to any supplementary information that may be included

.25 Management-Use-Only Compilation Engagement Checklist

Client:	**Balance Sheet Date:**
Completed by:	**Date Completed:**

Procedure	**Completed by or N/A**
1. Prepare or update the Client Acceptance Form.	
2. Consider whether the firm is independent. If not independent, the engagement letter should be modified to indicate that fact.	
3. Establish an understanding with the client, in writing, regarding the following and include a copy of the engagement letter in the working papers:	
a. Nature and limitations of the services	
b. A compilation is limited to presenting in the form of financial statements information that is the representation of management	
c. The financial statements will not be audited or reviewed	
d. No opinion or any other form of assurance on the financial statements will be provided	
e. Management has knowledge of the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements	
f. Management representation that financial statements are not to be used by third parties	
g. Engagement cannot be relied upon to disclose errors, fraud, or illegal acts, and we will inform appropriate level of management of any material errors, of any evidence or information that comes to my (our) attention during the engagement, that fraud or an illegal act may have occurred, unless clearly inconsequential	
4. If the engagement was originally intended to be another type of engagement, document the appropriateness of the decision to change the engagement.	
5. Acquire the necessary knowledge and understanding of the following:	
a. Accounting principles and practices of the industry	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements	
6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.	
7. If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.	
8. Draft and read the financial statements and consider whether	
a. the financial statements are appropriate in form.	

(continued)

Procedure	Completed by or N/A
b. the financial statements are free of obvious mathematical or clerical error.	
9. Include a legend on each page of the financial statements and supplementary data indicating the restricted nature of the presentation.	
10. Document any other procedures performed or unusual problems and their resolution.	
11. Determine that all required forms and checklists have been completed.	
12. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the working papers.

AAM Section 2400

Review Engagements[*]

Overview

.01 Paragraph .04 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), defines a *review* of financial statements as follows:

> Performing inquiry and analytical procedures that provide the accountant with a reasonable basis for expressing limited assurance that there are no material modifications necessary that should be made to the statements in order for them to be in conformity with generally accepted accounting principles (GAAP) or, if applicable, with an other comprehensive bases of accounting (OCBOA).

.02 The definition of a review assumes the existence of financial statements as a "precedent" to a review engagement. The accountant may have to perform other accounting services or a compilation prior to the review engagement.

.03 The following performance and reporting requirements are applicable to a review engagement:

- Establish an understanding with the entity regarding the services to be performed and the report the accountant expects to render (See paragraphs .29–.40 of AAM section 2200 for a discussion of engagement letters).
- Have, or obtain, knowledge of the accounting principles and practices of the entity's industry and a general understanding of certain matters related to the entity itself.
- Consider whether it will be necessary to perform other accounting services such as assistance in adjusting the books of account, consultation on accounting matters, or compilation of the financial statements.
- Perform sufficient inquiry and analytical procedures to provide a reasonable basis for expressing limited assurance.
- Take certain actions when the accountant becomes aware that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory.
- Obtain a representation letter from management.
- Document certain items in working papers, as required by paragraphs .38–.40 of AR section 100A.

Knowledge of Accounting Principles and Practices of the Industry

.04 AR section 100A states that the accountant should have knowledge of the accounting principles and practices of the industry in which the entity operates. That knowledge, the sources of obtaining it, and the timing requirements are identical to the requirements for a compilation.

---

[*] In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

.05 The purpose of having that knowledge in a review is not the same, however, as in a compilation. In a compilation, the purpose is to ". . . enable [the accountant] to compile financial statements that are appropriate in form for an entity operating in that industry." In a review, an additional purpose is to assist the accountant in constructing inquiries and analytical procedures adequate to provide a reasonable basis for expressing limited assurance.

.06 AR section 100A states that the accountant should possess or obtain certain knowledge about the entity whose financial statements are under review. Because its basic purpose in a review is to enable the accountant to construct appropriate inquiries and analytical procedures, this level of understanding is more extensive than that required for a compilation engagement.

.07 The accountant who performs a review must have a general understanding of the following:

- Entity's organization
- Operating characteristics of that organization
- Nature of the entity's assets and liabilities
- Nature of the entity's revenues and expenses

.08 In order to obtain this understanding, the accountant would need a general knowledge of the entity's

- products and services.
- production, distribution, and compensation methods.
- operating locations.
- material transactions with related parties.

Necessity to Perform Other Accounting Services

.09 Paragraph .04 of AR section 100A states that "The accountant might consider it necessary to compile the financial statements or to perform other accounting services to enable him to perform a review."

.10 Because the definition of a review assumes the existence of financial statements as a basis for a review, if the statements do not already exist, the accountant may have to prepare books of original entry, post the ledger, prepare a trial balance, and compile the financial statements. Therefore, an accountant will need to consider independence requirements in relation to conducting a review in this circumstance. In making a judgment about whether he or she is independent, the accountant must comply with standards set forth in the AICPA Code of Professional Conduct.

.11 In many cases, the financial statements may have to be adjusted (for example, accruals, deferrals, and depreciation) before they are reviewed.

Inquiries and Analytical Procedures

.12 Procedures for conducting a review of financial statements generally are limited to analytical procedures and inquiries. The accountant performs these procedures to obtain a basis for communicating whether he or she is aware of any material modifications that should be made to the financial statements for them to be in conformity with generally accepted accounting principles. The specific inquiries made and the analytical and other procedures performed should be tailored to the engagement based on the accountant's knowledge of the entity's business. For example, if the accountant becomes aware of a significant change in the entity's operations, the accountant may consider making additional inquiries, employing additional analytical procedures, or both. Professional literature does not indicate how many procedures have to be performed in a given engagement to achieve its reporting objective. That is a matter of professional judgment. The extent of the total knowledge the accountant possesses about an entity and the industry in which it operates is the basis for planning the extent of procedures to be performed.

Analytical Procedures

.13 Paragraph .31 of AR section 100A states that the accountant should apply analytical procedures to the financial statements to identify and provide a basis for inquiry about the relationships and individual items that appear to be unusual and that may indicate a material misstatement. Analytical procedures should include the following:

- Developing expectations by identifying and using plausible relationships that are reasonably expected to exist based on the accountant's understanding of the entity and the industry in which the entity operates
- Comparing recorded amounts, or ratios developed from recorded amounts, to expectations developed by the accountant

.14 Appendix I of AR section 100A contains examples of analytical procedures an accountant may consider performing when conducting a review of financial statements.

.15 A list of examples of analytical procedures for a review engagement is included in paragraph .48.

.16 Expectations developed by the accountant in performing analytical procedures in connection with a review of financial statements ordinarily are less encompassing than those developed in an audit. Also in a review, the accountant ordinarily is not required to corroborate management's responses with other evidence. However, the accountant should consider the reasonableness and consistency of management's responses in light of the results of other review procedures and the accountant's knowledge of the entity's business and the industry in which it operates.

.17 A basic premise underlying the application of analytical procedures is that relationships among data may reasonably be expected to exist and continue to exist in the absence of known conditions to the contrary.

.18 Specific analytical procedures used are a matter of the accountant's judgment. Therefore, the accountant should tailor the specific procedures to the client based on his or her understanding of the client's business and the industry in which it operates.

.19 In applying analytical procedures in a review engagement, the accountant may achieve both effectiveness and efficiency by using the following approach.

- Identify immaterial account balances or classes of transactions. Apply analytical procedures to them, if needed.
- Identify account balances or classes of transactions to which other accounting services (bookkeeping or payroll services, for example) have been applied. Consider the evidence that has been gathered and whether any material errors are likely to remain. If there is already sufficient evidence for those account balances or classes of transactions to reduce the risk of material misstatement to a moderate level, consider whether applying analytical procedures is needed.
- For the remaining account balances and classes of transactions, develop expectations (for example, using historical trends adjusted for known changes) for them. Note, however, that AR section 100A does not require a formal process of developing and documenting expectations.
- Consider how close the existing account balance or class of transaction comes to the expectation developed in the previous step. If the differences are small, no additional evidence may be needed.
- If the differences are large, material errors could exist. Inquire about valid business reasons for the difference. If the results of inquiry are plausible and agree with other evidence, no additional evidence may be needed.

- If additional evidence is needed, apply other analytical procedures or obtain other suitable evidence.

Inquiries and Other Review Procedures

.20 The following are inquiries the accountant should consider making and other review procedures the accountant should consider performing when conducting a review of financial statements:

a. Inquiries to members of management who have responsibility for financial and accounting matters concerning (see appendix B of AR section 100A):

(1) Whether the financial statements have been prepared in conformity with generally accepted accounting principles consistently applied

(2) The entity's accounting principles and practices and the methods followed in applying them and procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements

(3) Unusual or complex situations that may have an effect on the financial statements

(4) Significant transactions occurring or recognized near the end of the reporting period

(5) The status of uncorrected misstatements identified during the previous engagement

(6) Questions that have arisen in the course of applying the review procedures

(7) Events subsequent to the date of the financial statements that could have a material effect on the financial statements

(8) Their knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, for example, communications received from employees, former employees, or others

(9) Significant journal entries and other adjustments

(10) Communications from regulatory agencies

b. Inquiries concerning actions taken at meetings of shareholders, board of directors, committees of the board of directors, or comparable meetings that may affect the financial statements

c. Reading the financial statements to consider, on the basis of information coming to the accountant's attention, whether the financial statements appear to conform with generally accepted accounting principles

d. Obtaining reports from other accountants, if any, who have been engaged to audit or review the financial statements of significant components of the reporting entity, its subsidiaries, and other investees[1]

.21 Appendix B of AR section 100A contains illustrative inquiries for a review engagement. However, these illustrative inquires are not intended to serve as a program or checklist in the conduct of a review. The inquiries to be made in a review engagement are a matter of the accountant's judgment. Specific inquiries should be tailored to the client, based on the accountant's understanding of the client's business and the industry in which it operates.

[1] The financial statements of the reporting entity ordinarily include an accounting for all significant components, such as unconsolidated subsidiaries and investees. If other accountants are engaged to audit or review the financial statements of such components, the accountant will require reports from the other accountants as a basis, in part, for the accountant's review report with respect to the review of the financial statements of the reporting entity. The accountant may decide to make reference to the work of other accountants in the accountant's review report on the financial statements. If such reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants.

.22 A list of illustrative inquiries for a review engagement is included in paragraph .53.

.23 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with the primary basis for expressing limited assurance that no material modifications should be made to the financial statements. AR section 100A does not specify how many procedures have to be performed in order to express the limited assurance. The extent and type of procedures performed is a matter of professional judgment.

.24 Paragraph .37 of AR section 100A does allow modification of inquiry and analytical procedures. For example, the accountant may have acquired knowledge about the entity in the performance of audits of the entity's financial statements, compilation of the entity's financial statements, or other accounting services (such as bookkeeping services). This acquired knowledge may be sufficient to reduce the extent of inquiries and analytical procedures, although the accountant would still have the same degree of responsibility with respect to the financial statements (expressing limited assurance that no material modifications should be made to the financial statements).

Analytical Procedures in Initial Review Engagements

.25 Accountants often question how to apply analytical procedures on initial review engagements. For example, how can the accountant evaluate the results of procedures applied for the current year if he or she is unsure whether amounts are comparable with prior years or if the company is newly formed? As stated in the previous section, paragraph .37 of AR section 100A states:

> Knowledge acquired in the performance of audits of the entity's financial statements, compilation of the financial statements, or other accounting services may result in modification of the review procedures described...However, such modification would not reduce the degree of responsibility the accountant assumes with respect to the reviewed financial statements.

.26 This allows the accountant to modify his or her inquiries and analytical procedures based on knowledge acquired in the performance of other services. Although AR section 100A does not cite initial engagements as a situation in which the accountant may choose to modify his or her inquiries and analytical procedures, it is reasonable to assume that these procedures could be modified in initial engagements.

.27 In initial review engagements, the accountant may have to rely on other sources of evidence. For example, the accountant may have to rely on making additional inquiries. Or, the accountant may have already compiled the financial statements, or may have provided other accounting or bookkeeping services for the client. In these cases the accountant may rely on knowledge gained from these other services to supplement the limited analytical procedures that can be performed because of insufficient history. Also, the accountant's analytical procedures may also consist of comparisons with results for similar clients or to industry statistics, and of analysis of the interrelationships between accounts in these circumstances.

When the Results of Analytical Procedures Are Unfavorable

.28 When results of analytical procedures are unfavorable (that is, the accountant believes that fluctuations from expected amounts are significant), paragraph .27 of AR section 100A states that the accountant should apply additional procedures deemed necessary to achieve limited assurance that no material modifications are necessary to conform the financial statements to GAAP. Sometimes inquiries and analytical procedures will be sufficient. However, in many cases, the accountant will combine additional inquiry or analytical procedures with preparing other accounting schedules or analyses to explain fluctuations.

.29 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with the primary basis for expressing limited assurance that no material modifications should be made to the financial statements. AR section 100A does not specify how many procedures have to be performed in order to express the limited assurance. The extent and type of procedures performed is a matter of professional judgment.

.30 An illustrative ratio analysis worksheet is included in paragraph .54, and an illustrative analytical procedures comparative report is included in paragraph .55.

Awareness Concerning Information Supplied

.31 Paragraph .27 of AR section 100A states that a review does not contemplate various procedures that are ordinarily performed during an audit. However, it goes on to state that "…the accountant may become aware that information coming to his or her attention is incorrect, incomplete, or otherwise unsatisfactory. If any evidence or information comes to the accountant's attention regarding fraud or an illegal act that may have occurred, the accountant should request that management consider the affect of the matter on the financial statements. Additionally, the accountant should consider the affect of the matter on his or her review report. In circumstances where the accountant believes the financial statements are materially misstated, the accountant should perform the additional procedures deemed necessary to achieve limited assurance…"

.32 If the accountant is unable to perform the inquiry and analytical procedures he considers necessary to achieve limited assurance contemplated by a review, the accountant's review will be incomplete. Under these circumstances, the accountant will not have attained his original objective and accordingly cannot express limited assurance.

.33 Paragraph .46 of AR section 100A also states that "when an accountant is unable to perform the inquiry and analytical procedures he or she considers necessary … the review will be incomplete." A review that is incomplete is not an adequate basis for issuing a review report. In such a situation, the accountant should also consider whether it is appropriate to issue a compilation report on the financial statements.

Representation Letters

.34 Written representations are required from management for all financial statements and periods covered by the accountant's review report. The specific written representations obtained by the accountant will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. In connection with the review of the financial statements presented in accordance with GAAP, specific representations should relate to the following matters:[2]

- Management's acknowledgement of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with GAAP
- Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles
- Management's acknowledgement of its responsibility to prevent and detect fraud
- Knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, including any communications received from employees, former employees, or others
- Management's full and truthful response to all inquiries
- Completeness of information
- Information concerning subsequent events

.35 Like the inquiries and analytical procedures in a review engagement, the management representation letter ordinarily should be tailored to the client based on the accountant's knowledge of the client's business and the industry in which it operates. Additional representations may be added to the letter, especially if the client operates in a specialized industry (for example, construction contractors, homeowners associa-

[2] Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles (GAAP). The specific representations to be obtained should be based on the nature and basis of representation of the financial statements being reviewed.

tions, and not-for-profit organizations). These additional representations may be found in AICPA *Industry Audit and Accounting Guides* which can be obtained by contacting AICPA Service Center Operations at 888-777-7077.

.36 The written representations should be addressed to the accountant. The representations should be made as of a date no earlier than the date of the accountant's report because the accountant is concerned with events occurring through the date of the report that may require adjustments to or disclosure in the financial statements. The letter should be signed by those members of management whom the accountant believes are responsible for and knowledgeable, directly or through others in the organization, about the matters covered in the representation letter. Normally the chief executive officer and chief financial officer or others with equivalent positions in the entity should sign the representation letter. If the current management was not present during all the periods covered by the accountant's report, the accountant should, nevertheless, obtain written representations from current management on all such periods.

.37 An illustrative management representation letter is provided in appendix F of AR section 100A and is included in paragraph .51.

.38 There are circumstances in which an accountant should consider obtaining an updating represen tation letter from management (for example, the accountant obtains a management representation letter after completion of inquiry and analytical review procedures but does not issue his or her review report for a significant period of time thereafter, or a material subsequent event occurs after the completion of inquiry and analytical review procedures, including obtaining the original management representation letter, but before the issuance of the report on the reviewed financial statements). In addition, if a predecessor accountant is requested by a former client to reissue his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with reviewed financial statements of a subsequent period, the predecessor accountant should obtain an updating representation letter from the management of the former client. The updating management representation letter should state (*a*) whether any information has come to management's attention that would cause management to believe that any of the previous representations should be modified and (*b*) whether any events have occurred subsequent to the balance sheet date of the latest financial statements reported on by the accountant that would require adjustment to or disclosure in those financial statements.

.39 An illustrative updating management representation letter is provided in appendix G of AR section 100A and is included in paragraph .50.

Work Paper Documentation

.40 The accountant should prepare documentation in connection with a review of financial statements, the form and content of which should be designed to meet the circumstances of the particular engagement. Documentation is the principal record of the review procedures performed and the conclusions reached by the accountant in performing the review. However, an accountant would not be precluded from supporting his or her review report by other means in addition to the review documentation. Such other means might include written documentation contained in other engagement (for example, compilation) files or quality control files (for example, consultation files) and in limited situations, oral explanations. Oral explanations should be limited to those situations where the accountant finds it necessary to supplement or clarify information contained in the documentation. Oral explanations should not be the principal support for the work performed or the conclusions reached.

.41 Paragraph .39 of AR section 100A states that it is not possible to specify the form or content of the documentation the accountant should prepare because of the different circumstances in individual engagements. However, the documentation should include any findings or issues that in the accountant's judgment are significant, for example, the results of review procedures that indicate the financial statements could be materially misstated, including actions taken to address such findings, and the basis for the final conclusions reached.

.42 Paragraph .40 of AR section 100A states that the documentation of the inquiry and analytical procedures should include the following:

- The matters covered in the accountant's inquiry procedures
- The analytical procedures performed
- The expectations as discussed in paragraph .31 of AR section 100A, where significant expectations are not otherwise readily determinable from the documentation of the work performed, and factors considered in the development of those expectations
- Results of the comparison of the expectations to the recorded amounts or ratios developed from recorded amounts
- Any additional procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures
- Unusual matters that the accountant considered during the performance of the review procedures, including their disposition
- Communications, whether oral or written, to the appropriate level of management regarding fraud or illegal acts that come to the accountant's attention
- The representation letter

.43 In addition, most accountants include some or all of the following in their working papers:

- Engagement letter
- Checklist or memorandum describing the CPA's knowledge of the client's business and industry
- Checklist, work program, and results of analytical procedures in support of inquiries and analytical procedures, including names of persons responding to inquiries
- Support for data in the notes to the financial statements
- Discussion of unusual matters encountered
- Compilation work papers, if the financial statements required compilation prior to review
- Copies of reports from other accountants who have audited or reviewed a subsidiary
- Reasons for a step-down from an audit, if applicable

Additional Guidance

.44 For additional guidance, accountants may refer to the AICPA Accounting and Review Services Committee Issue Paper on *Analytical Procedures in a Review Engagement* which is intended to provide accountants with information that may help them understand certain requirements related to the use of analytical procedures in review engagements and how the use of analytical procedures can be documented in those engagements.

.45 Accountants may also refer to the AICPA Practice Aid *Review Engagements—New and Expanded Guidance on Analytical Procedures and Inquiries and Other Procedures* (product number 006618). The practice aid clarifies certain existing Statements on Standards for Accounting and Review Services (SSARS), suggests ways of implementing existing and new standards in special circumstances, and provides practical guidance to help implement the changes to AR section 100A.

.46 Review Engagement Program

Client:	Balance Sheet Date:
Completed by:	Date Completed:

Procedure	Completed by or N/A
1. Prepare or update the Client Acceptance and Continuance Form.	
2. Consider whether the firm is independent. If not independent, a review engagement cannot be performed.	
3. Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.	
4. If the engagement was originally intended to be an audit, document the appropriateness of the decision to step-down.	
5. Acquire the necessary knowledge and understanding of:	
a. Accounting principles and practices of the industry.	
b. Nature of the client's business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements.	
6. Consider the necessity to perform any other accounting services to enable review of the financial statements.	
7. Apply analytical procedures to the financial statements to identify and provide a basis for inquiry about relationships and individual items that appear to be unusual and that may indicate a material misstatement. Consider performing the analytical procedures described in paragraph .48 of AAM section 2400.	
8. Inquire of members of management having responsibility for financial and accounting matters concerning the following:	
a. Whether the financial statements have been prepared in conformity with GAAP or OCBOA consistently applied.	
b. The entity's accounting principles and practices and the methods followed in applying them and procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements.	
c. Unusual or complex situations that may have an effect on the financial statements.	
d. Significant transactions occurring or recognized near the end of the reporting period.	
e. The status of uncorrected misstatements identified during the previous engagement.	
f. Questions that have arisen in the course of applying the review procedures.	
g. Events subsequent to the date of the financial statements that could have a material effect on the financial statements.	

(continued)

Procedure	Completed by or N/A
h. Their knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, for example, communications received from employees, former employees, or others.	
i. Significant journal entries and other adjustments.	
j. Communications from regulatory agencies.	
9. Make inquiries concerning actions taken at meetings of shareholders, board of directors, committees of the board of directors, or comparable meetings that may affect the financial statements.	
10. Read the financial statements to consider whether, on the basis of information coming to the accountant's attention:	
a. the financial statements appear to conform with GAAP or an OCBOA.	
b. financial statements prepared in accordance with an OCBOA present proper OCBOA titles and disclose the basis of accounting in the notes or in the review report.	
c. the financial statements are appropriate in form.	
d. the financial statements are free from obvious mathematical or clerical error.	
11. Obtain reports from other accountants, if any, who have been engaged to audit or review the financial statements of significant components of the reporting entity, its subsidiaries, and other investees.	
12. If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.	
13. Draft the accountant's report.	
14. If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:	
a. revise the financial statements or modify the report to indicate the departure.	
b. if the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.	
c. if modification of the report is not considered adequate, consider withdrawing from the engagement.	
15. Obtain a representation letter.	
16. If supplementary data accompanies the financial statements, modify the report in accordance with paragraph .70 of AR section 100A.	
17. Include a reference to the report on each page of the financial statements and supplementary data.	
18. Document the following:	
a. The matters covered in the accountant's inquiry procedures	

Procedure	Completed by or N/A
b. The analytical procedures performed	
c. The expectations as discussed in paragraph .31 of AR section 100A, where significant expectations are not otherwise readily determinable from the documentation of the work performed and factors considered in the development of those expectations	
d. Results of the comparison of the expectations to the recorded amounts or ratios developed from recorded amounts	
e. Any additional procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures	
f. Findings, issues, and unusual matters that the accountant considered during the performance of the review procedures, including actions taken to address such matters, their disposition, and the final conclusions reached	
g. Communications, whether oral or written, to the appropriate level of management regarding fraud or illegal acts that come to the accountant's attention	
19. Determine that all required forms and checklists have been completed.	
20. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and "to do" lists have been removed from the working papers.	
21. Date the report as of the date the review was completed.	

Analytical Procedures the Accountant May Consider Performing When Conducting a Review of Financial Statements

.47 Analytical procedures are designed to identify relationships and individual items that appear to be unusual and that may reflect a material misstatement of the financial statements. The analytical procedures performed in a review of financial statements are a matter of the accountant's professional judgment. In determining the appropriate analytical procedures, an accountant may consider (*a*) the nature and materiality of the items reflected in the financial statements, (*b*) the likelihood of a misstatement in the financial statements, (*c*) knowledge obtained during current and previous engagements, (*d*) the stated qualifications of the entity's accounting personnel, (*e*) the extent to which a particular item is affected by management's judgment, and (*f*) inadequacies in the entity's underlying financial data.

.48 The following list of analytical procedures is for illustrative purposes only. These analytical procedures will not necessarily be applicable in every review engagement, nor are these analytical procedures meant to be all-inclusive. These illustrative analytical procedures are not intended to serve as a program or checklist to be utilized in performing a review engagement. Examples of analytical procedures an accountant may consider performing in a review of financial statements include the following:

- Comparing financial statements with statements for comparable prior period(s).
- Comparing current financial information with anticipated results, such as budgets or forecasts (for example, comparing tax balances and the relationship between the provision for income taxes and pretax income in the current financial information with corresponding information in (*a*) budgets, using expected rates, and (*b*) financial information for prior periods).[3]
- Comparing current financial information with relevant nonfinancial information.
- Comparing ratios and indicators for the current period with expectations based on prior periods, for example, performing gross profit analysis by product line and operating segment using elements of the current financial information and comparing the results with corresponding information for prior periods. Examples of key ratios and indicators are the current ratio, receivables turnover or days' sales outstanding, inventory turnover, depreciation to average fixed assets, debt to equity, gross profit percentage, net income percentage, and plant operating rates.
- Comparing ratios and indicators for the current period with those of entities in the same industry.
- Comparing relationships among elements in the current financial information with corresponding relationships in the financial information of prior periods, for example, expense by type as a percentage of sales, assets by type as a percentage of total assets, and percentage of change in sales to percentage of change in receivables.

.49 Analytical procedures may include such statistical techniques as trend analysis or regression analysis and may be performed manually or with the use of computer-assisted techniques.

.50 In addition, the accountant may find the guidance in AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1) useful in conducting a review of financial statements.

[3] The accountant should exercise caution when comparing and evaluating current financial information with budgets, forecasts, or other anticipated results because of the inherent lack of precision in estimating the future and the susceptibility of such information to manipulation and misstatement by management to reflect desired results.

.51 Review of Financial Statements—Illustrative Representation Letter[†]

A review of financial statements consists principally of inquiries of company personnel and analytical procedures applied to financial data. As part of a review of financial statements, the accountant is required to obtain a written representation from his or her client to confirm the oral representations made to the accountant. The introductory paragraph should specify the financial statements and periods covered by the accountant's review report. If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. The following representation letter is included for illustrative purposes only. The accountant may decide, based on the circumstances of the review engagement or the industry in which the entity operates, that other matters should be specifically included in the letter and that some of the representations included in the illustrative letter are not necessary.

(Date)[4]

(To the Accountant)

We are providing this letter in connection with your review of the (identification of financial statements) of (name of entity) as of (dates) and for the (periods of review) for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements in order for them to be in conformity with generally accepted accounting principles.

We confirm that we are responsible for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person using the information would be changed or influenced by the omission or misstatement.[5]

We confirm, to the best of our knowledge and belief (as of [*the date of the accountant's review report]*), the following representations made to you during your review.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.
2. We have made available to you all:
    a. financial records and related data.
    b. minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
4. We acknowledge our responsibility to prevent and detect fraud.
5. We have no knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, including any communications received from employees, former employees, or others.
6. We have no plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities.

[†] In February 2008, the ARSC issued SSARS No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008*, which, among other things, amends appendix F of AR section 100A, from which this illustrative representation letter is derived. The amendment is effective for periods ending on or after December 15, 2008, with early application permitted. Readers should refer to SSARS No. 17 for the amendments.

[4] This date should be the date that the letter is presented and signed by the client. In no event should the letter be presented and signed prior to the completion of the review.

[5] The qualitative discussion of materiality used in this letter is adapted from (FASB) Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information.*

7. There are no material losses (such as from obsolete inventory or purchase or sales commitments) that have not been properly accrued or disclosed in the financial statements.

8. There are no:

   a. violations or possible violations of laws or regulations, whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

   b. unasserted claims or assessments that our lawyer has advised us are probable of assertion that must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies.*[6]

   c. other material liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

9. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets, nor has any asset been pledged as collateral, except as disclosed to you and reported in the financial statements.

10. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

11. The following have been properly recorded or disclosed in the financial statements:

    a. Related party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

    b. Guarantees, whether written or oral, under which the company is contingently liable.

    c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties.* [Significant estimates are estimates at the balance sheet date that could change materially with the next year. *Concentrations* refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]

    [*Add additional representations that are unique to the entity's business or industry. See below for additional illustrative representations.*]

12. We are in agreement with the adjusting journal entry you have recommended, and they have been posted to the company's account. *(if applicable)*

13. To the best of our knowledge and belief, no events have occurred subsequent to the balance sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.[7]

14. We have responded fully and truthfully to all inquiries made to us by you during your review.

____

(Name of Owner or Chief Executive Officer and Title)

____

(Name of Chief Financial Officer and Title, where applicable)

---

[6] If management has not consulted a lawyer regarding litigation, claims, and assessments, the representation might be worded as follows:

> We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

[7] If the accountant "dual dates" his or her report, the accountant should consider whether obtaining additional representations relating to the subsequent event is appropriate.

Representation letters ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all inclusive. The accountant should consider the effects of pronouncements issued subsequent to the issuance of this section.

General	
Condition	**Illustrative Examples**
The impact of a new accounting principle is not known.	We have not completed the process of evaluating the impact that will result from adopting Financial Accounting Standards Board (FASB) Statement No. *[XXX, Name]*, as discussed in Note [*X*]. The company is therefore unable to disclose the impact that adopting FASB Statement No. [*XXX*] will have on its financial position and the results of operations when such statement is adopted.
There is justification for a change in accounting principles.	We believe that [*describe the newly adopted accounting principle*] is preferable to [*describe the former accounting principle*] because [*describe management's justification for the change in accounting principles*].
Financial circumstances are strained, with disclosure of management's intentions and the entity's ability to continue as a going concern.	Note [*X*] to the financial statements discloses all of the matters of which we are aware that are relevant to the company's ability to continue as a going concern, including significant conditions and events, and management's plans.
The possibility exists that the value of specific significant long lived assets or certain identifiable intangibles may be impaired.	We have reviewed long lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of its assets might not be recoverable and have appropriately recorded the adjustment.

(continued)

The entity has a variable interest in another entity.	Variable interest entities (VIEs) and potential VIEs and transactions with VIEs and potential VIEs have been properly recorded and disclosed in the financial statements in accordance with GAAP. We have considered both implicit and explicit variable interests in (*a*) determining whether potential VIEs should be considered VIEs, (*b*) calculating expected losses and residual returns, and (*c*) determining which party, if any, is the primary beneficiary. We have provided you with lists of all identified variable interests in (*a*) VIEs, (*b*) potential VIEs that we considered but judged not to be VIEs, and (*c*) entities that were afforded the scope exceptions of FASB Interpretation (FIN) No. 46R, *Consolidation of Variable Interest Entities*. We have advised you of all transactions with identified VIEs, potential VIEs, or entities afforded the scope exceptions of FIN No. 46R. We have made available all relevant information about financial interests and contractual arrangements with related parties, de facto agents, and other entities, including but not limited to their governing documents, equity and debt instruments, contracts, leases, guarantee arrangements, and other financial contracts and arrangements. The information we provided about financial interests and contractual arrangements with related parties, de facto agents, and other entities includes information about all transactions, unwritten understandings, agreement modifications, and written and oral side agreements. Our computations of expected losses and expected residual returns of entities that are VIEs and potential VIEs are based on the best information available and include all reasonably possible outcomes. Regarding entities in which the Company has variable interests (implicit and explicit), we have provided all information about events and changes in circumstances that could potentially cause reconsideration about whether the entities are VIEs or whether the Company is the primary beneficiary or has a significant variable interest in the entity. We have made and continue to make exhaustive efforts to obtain information about entities in which the Company has an implicit or explicit interest but that were excluded from complete analysis under FIN No. 46R due to lack of essential information to determine one or more of the following: whether the entity is a VIE, whether the Company is the primary beneficiary, or what accounting is required to consolidate the entity.

The work of a specialist has been used by the entity.	We agree with the findings of specialists in evaluating the [*describe assertion*] and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an impact on the independence or objectivity of the specialists.
	Assets
Condition	**Illustrative Examples**
Cash Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements.	Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, lines of credit, or similar arrangements have been properly disclosed.
Financial Instruments Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.	Debt securities that have been classified as held-to-maturity have been so classified due to the company's intent to hold such securities to maturity and the company's ability to do so. All other debt securities have been classified as available-for-sale or trading.
Management considers the decline in value of debt or equity securities to be temporary.	We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.
Management has determined the fair value of significant financial instruments that do not have readily determinable market values.	The methods and significant assumptions used to determine fair values of financial instruments are as follows: [*describe methods and significant assumptions used to determine fair values of financial instruments*]. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.
There are financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk.	The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements: 1. The extent, nature, and terms of financial instruments with off-balance-sheet risk 2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments 3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments

(continued)

Receivables Receivables have been recorded in the financial statements.	Receivables recorded in the financial statements represent valid claims against debtors for sales or other charges arising on or before the balance sheet date and have been appropriately reduced to their estimated net realizable value.
Inventories Excess or obsolete inventories exist.	Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value.
Investments There are unusual considerations involved in determining the application of equity accounting.	[*For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:*] • The equity method is used to account for the company's investment in the common stock of [investee] because the company has the ability to exercise significant influence over the investee's operating and financial policies. • The cost method is used to account for the company's investment in the common stock of [in vestee] because the company does not have the ability to exercise significant influence over the investee's operating and financial policies.
Deferred Charges Material expenditures have been deferred.	We believe that all material expenditures that have been deferred to future periods will be recoverable.
Deferred Tax Assets A deferred tax asset exists at the balance sheet date.	The valuation allowance has been determined pursuant to the provisions of FASB Statement No. 109, *Accounting for Income Taxes*, including the company's estimation of future taxable income, if necessary, and is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized. [*Complete with appropriate wording detailing how the entity determined the valuation allowance against the deferred tax asset*.] or A valuation allowance against deferred tax assets at the balance sheet date is not considered necessary because it is more likely than not the deferred tax asset will be fully realized.

Liabilities	
Condition	**Illustrative Examples**
Debt Short-term debt could be refinanced on a long-term basis and management intends to do so.	The company has excluded short-term obligations totaling $[*amount*] from current liabilities because it intends to refinance the obligations on a long-term basis. [*Complete with appropriate wording detailing how amounts will be refinanced as follows*:] • The Company has issued a long-term obligation [*debt security*] after the date of the balance sheet but prior to the issuance of the financial state ments for the purpose of refinancing the short- term obligations on a long-term basis. • The Company has the ability to consummate the refinancing by using the financing agreement re ferred to in Note [*X*] to the financial statements.
Tax-exempt bonds have been issued.	Tax-exempt bonds issued have retained their tax-exempt status.
Taxes Management intends to reinvest undistributed earnings of a foreign subsidiary.	We intend to reinvest the undistributed earnings of [*name of foreign subsidiary*].
Contingencies Estimates and disclosures have been made of environmental remediation liabilities and related loss contingencies.	Provision has been made for any material loss that is probable from environmental remediation liabilities associated with [*name of site*]. We believe that such estimate is reasonable based on available information and that the liabilities and related loss contingencies and the expected outcome of uncertainties have been adequately described in the company's financial statements.
Agreements may exist to repurchase assets previously sold.	Agreements to repurchase assets previously sold have been properly disclosed.
Pension and Postretirement Benefits An actuary has been used to measure pension liabilities and costs.	We believe that the actuarial assumptions and methods used to measure pension liabilities and costs for financial accounting purposes are appropriate in the circumstances.
There is involvement with a multiemployer plan.	We are unable to determine the possibility of a withdrawal liability in a multiemployer benefit plan. or We have determined that there is the possibility of a withdrawal liability in a multiemployer plan in the amount of $[*XX*].
Postretirement benefits have been eliminated.	We do not intend to compensate for the elimination of postretirement benefits by granting an increase in pension benefits. or We plan to compensate for the elimination of postretirement benefits by granting an increase in pension benefits in the amount of $[*XX*].

(continued)

Employee layoffs that would otherwise lead to a curtailment of a benefit plan are intended to be temporary.	Current employee layoffs are intended to be temporary.
Management intends to either continue to make or not make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost, or has expressed a substantive commitment to increase benefit obligations.	We plan to continue to make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost. or We do not plan to make frequent amendments to its pension or other postretirement benefit plans.
Equity	
Condition	**Illustrative Example**
There are capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements.	Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements have been properly disclosed.
Income Statement	
Condition	**Illustrative Examples**
There may be a loss from sales commitments.	Provisions have been made for losses to be sustained in the fulfillment of or from inability to fulfill any sales commitments.
There may be losses from purchase commitments.	Provisions have been made for losses to be sustained as a result of purchase commitments for inventory quantities in excess of normal requirements or at prices in excess of prevailing market prices.
Nature of the product or industry indicates the possibility of undisclosed sales terms.	We have fully disclosed to you all sales terms, including all rights of return or price adjustments and all warranty provisions.

.52 Review of Financial Statements—Illustrative Updating Representation Letter

Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. For example, if an event subsequent to the date of the accountant's review report is disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred…"[8]

[*Date*]

To [*Accountant*]

In connection with your review(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods of review*] for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements for them to be in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [*date of previous representation letter*]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [*date of latest balance sheet reported on by the accountant or date of previous representation letter*] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____

(Name of Owner or Chief Executive Officer and Title)

____

(Name of Chief Financial Officer and Title, where applicable)

[8] The accountant has two methods available for dating the report when a subsequent event requiring disclosure occurs after the completion of the review but before issuance of the report on the related financial statements. The accountant may use "dual dating," for example, "February 16, 20XX, except for Note Y, as to which the date is March 1, 20XX," or may date the report as of the later date.

.53 Review of Financial Statements—Illustrative Inquiries

The inquiries to be made in a review of financial statements are a matter of the accountant's professional judgment. In determining the appropriate inquiries, an accountant may consider (a) the nature and materiality of the items reflected in the financial statements, (b) the likelihood of a misstatement in the financial statements, (c) knowledge obtained during current and previous engagements, (d) the stated qualifications of the entity's accounting personnel, (e) the extent to which a particular item is affected by management's judgment, and (f) inadequacies in the entity's underlying financial data. The inquiries should generally be made of members of management with financial reporting and accounting responsibilities.

The following list of inquiries is for illustrative purposes only. These inquiries will not necessarily be applicable in every review engagement, nor are these inquiries meant to be all-inclusive. These illustrative inquiries are not intended to serve as a program or checklist to be utilized in performing a review engagement; rather, they address general areas where inquiries might be made in a review engagement. These sample inquiries can also be found in appendix B of AR section 100A. Also, the accountant may feel it necessary to make several inquiries in an effort to answer questions related to the issues addressed in these illustrative inquiries.

1. General

   a. Have there been any changes in the entity's business activities?

   b. Are there any unusual or complex situations that may have an effect on the financial statements (for example, business combinations, restructuring plans, or litigation)?

   c. What procedures are in place related to recording, classifying, and summarizing transactions and accumulating information related to financial statement disclosures?

   d. Have the financial statements been prepared in conformity with generally accepted accounting principles or, if appropriate, a comprehensive basis of accounting other than generally accepted accounting principles? Have there been any changes in accounting principles and methods of applying those principles? Have voluntary changes in accounting principles been reflected in the financial statements through retrospective application of the new principle in comparative financial statements?

   e. Have there been any instances of fraud or illegal acts within the entity?

   f. Have there been any allegations or suspicions that fraud or illegal acts might have occurred or might be occurring within the entity? If so, where and how?

   g. Are any entities, other than the reporting entity, commonly controlled by the owners? If so, has an evaluation been performed to determine whether those other entities should be consolidated into the financial statements of the reporting entity?

   h. Are there any entities other than the reporting entity in which the owners have significant investments (for example, variable interest entities)? If so, has an evaluation been performed to determine whether the reporting entity is the primary beneficiary related to the activities of these other entities?

   i. Is the reporting entity a general partner in a limited partnership arrangement? If so, has an evaluation been performed to determine whether the limited partnership should be consolidated into the financial statements of the reporting entity?

   j. Is the reporting entity a controlling partner in a general partnership agreement? If so, has an evaluation been performed to determine whether the partnership should be consolidated into the financial statements of the controlling partner?

   k. Have any significant transactions occurred or been recognized near the end of the reporting period?

2. Cash and cash equivalents

   a. Is the entity's policy regarding the composition of cash and cash equivalents in accordance with Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 95, *Statement of Cash Flows* (paragraphs 7–10)? Has the policy been applied on a consistent basis?

   b. Are all cash and cash equivalents[9] accounts on a timely basis?

   c. Have old or unusual reconciling items between bank balances and book balances been reviewed and adjustments made where necessary?

   d. Has there been a proper cutoff of cash receipts and disbursements?

   e. Has a reconciliation of intercompany transfers been prepared?

   f. Have checks written but not mailed as of the financial statement date been properly reclassified into the liability section of the balance sheet?

   g. Have material bank overdrafts been properly reclassified into the liability section of the balance sheet?

   h. Are there compensating balances or other restrictions on the availability of cash and cash equivalents balances? If so, has consideration been given to reclassifying these amounts as noncurrent assets?

   i. Have cash funds been counted and reconciled with control accounts?

3. Receivables

   a. Has an adequate allowance for doubtful accounts been properly reflected in the financial statements?

   b. Have uncollectible receivables been written off through a charge against the allowance account or earnings?

   c. Has interest earned on receivables been properly reflected in the financial statements?

   d. Has there been a proper cutoff of sales transactions?

   e. Are there receivables from employees or other related parties? Have receivables from owners been evaluated to determine if they should be reflected in the equity section (rather than the asset section) of the balance sheet?

   f. Are any receivables pledged, discounted, or factored? Are recourse provisions properly reflected in the financial statements?

   g. Have receivables been properly classified between current and noncurrent?

   h. Have there been significant numbers of sales returns or credit memoranda issued subsequent to the balance sheet date?

   i. Is the accounts receivable subsidiary ledger reconciled to the general ledger account balance on a regular basis?

4. Inventory

   a. Are physical inventory counts performed on a regular basis, including at the end of the reporting period? Are the count procedures adequate to ensure an appropriate count? If not,

[9] Cash and cash equivalents include all cash and highly liquid investments that are both (*a*) readily convertible to cash and (*b*) so near to maturity that they present insignificant risk of changes in value because of changes in interest rates, in accordance with paragraph 8 of FASB Statement No. 95, *Statement of Cash Flows*.

how have amounts related to inventories been determined for purposes of financial statement presentation? If so, what procedures were used to take the latest physical inventory and what date was that inventory taken?

b. Have general ledger control accounts been adjusted to agree with the physical inventory count? If so, were the adjustments significant?

c. If the physical inventory counts were taken at a date other than the balance sheet date, what procedures were used to determine changes in inventory between the date of the physical inventory counts and the balance sheet date?

d. Were consignments in or out considered in taking physical inventories?

e. What is the basis of valuing inventory for purposes of financial statement presentation?

f. Does inventory cost include material, labor, and overhead where applicable?

g. Has inventory been reviewed for obsolescence or cost in excess of net realizable value? If so, how are these costs reflected in the financial statements?

h. Have proper cutoffs of purchases, goods in transit, and returned goods been made?

i. Are there any inventory encumbrances?

j. Is scrap inventoried and controlled?

k. Have abnormal costs related to inventory been expensed as incurred?

5. Prepaid expenses

a. What is the nature of the amounts included in prepaid expenses?

b. How are these amounts being amortized?

6. Investments

a. What is the basis of accounting for investments reported in the financial statements (for example, securities, joint ventures, or closely held businesses)?

b. Are derivative instruments properly measured and disclosed in the financial statements? If those derivatives are utilized in hedge transactions, have the documentation or assessment requirements related to hedge accounting been met?

c. Are investments in marketable debt and equity securities properly classified as trading, available-for-sale, and held-to-maturity?

d. How were fair values of the reported investments determined? Have unrealized gains and losses been properly reported in the financial statements?

e. If the fair values of marketable debt and equity securities are less than cost, have the declines in value been evaluated to determine whether the declines are other-than-temporary?

f. For any debt securities classified as held-to-maturity, does management have the positive ability and intent to hold the securities until they mature? If so, have those debt securities been properly measured?

g. Have gains and losses related to disposal of investments been properly reflected in the financial statements?

h. How was investment income determined? Is investment income properly reflected in the financial statements?

i. Has appropriate consideration been given to the classification of investments between current and noncurrent?

j. For investments made by the reporting entity, have consolidation, equity, or cost method accounting requirements been considered?

k. Are any investments encumbered?

7. Property and equipment

a. Are property and equipment items properly stated at depreciated cost or other proper value?

b. When was the last time a physical inventory of property and equipment was taken?

c. Are all items reflected in property and equipment held for use? If not, have items that are held for sale been properly reclassified from property and equipment?

d. Have gains or losses on disposal of property or equipment been properly reflected in the financial statements?

e. What are the criteria for capitalization of property and equipment? Have the criteria been consistently and appropriately applied?

f. Are repairs and maintenance costs properly reflected as an expense in the income statement?

g. What depreciation methods and rates are utilized in the financial statements? Are these methods and rates appropriate and applied on a consistent basis?

h. Are there any unrecorded additions, retirements, abandonments, sales, or trade-ins?

i. Does the entity have any material lease agreements? If so, have those agreements been properly evaluated for financial statement presentation purposes?

j. Are there any asset retirement obligations associated with tangible long-lived assets? If so, has the recorded amount of the related asset been increased because of the obligation and is the liability properly reflected in the liability section of the balance sheet?

k. Has the entity constructed any of its property and equipment items? If so, have all components of cost been reflected in measuring these items for purposes of financial statement presentation, including, but not limited to, capitalized interest?

l. Has there been any significant impairment in value of property and equipment items? If so, has any impairment loss been properly reflected in the financial statements?

m. Are any property or equipment items mortgaged or otherwise encumbered? If so, are these mortgages and encumbrances properly reflected in the financial statements?

8. Intangibles and other assets

a. What is the nature of the amounts included in other assets?

b. Do these assets represent costs that will benefit future periods? What is the amortization policy related to these assets? Is this policy appropriate?

c. Have other assets been properly classified between current and noncurrent?

d. Are intangible assets with finite lives being appropriately amortized?

e. Are the costs associated with computer software properly reflected as intangible assets (rather than property and equipment) in the financial statements?

f. Are the costs associated with goodwill (and other intangible assets with indefinite lives) properly reflected as intangible assets in the financial statements? Has amortization ceased related to these assets?

g. Has there been any significant impairment in value of these assets? If so, has any impairment loss been properly reflected in the financial statements?

h. Are any of these assets mortgaged or otherwise encumbered?

9. Accounts and short-term notes payable and accrued liabilities

a. Have significant payables been reflected in the financial statements?

b. Are loans from financial institutions and other short-term liabilities properly classified in the financial statements?

c. Have significant accruals (for example, payroll, interest, provisions for pension and profit-sharing plans, or other postretirement benefit obligations) been properly reflected in the financial statements?

d. Has a liability for employees' compensation for future absences been properly accrued and disclosed in the financial statements?

e. Are any liabilities collateralized or subordinated? If so, are those liabilities disclosed in the financial statements?

f. Are there any payables to employees or related parties?

10. Long-term liabilities

a. Are the terms and other provisions of long-term liability agreements properly disclosed in the financial statements?

b. Have liabilities been properly classified between current and noncurrent?

c. Has interest expense been properly accrued and reflected in the financial statements?

d. Is the company in compliance with loan covenants and agreements? If not, is the noncompliance properly disclosed in the financial statements?

e. Are any long-term liabilities collateralized or subordinated? If so, are these facts disclosed in the financial statements?

f. Are there any obligations that, by their terms, are due on demand within one year from the balance sheet date? If so, have these obligations been properly reclassified into the current liability section of the balance sheet?

11. Income and other taxes

a. Do the financial statements reflect an appropriate provision for current and prior-year income taxes payable?

b. Have any assessments or reassessments been received? Are there tax authority examinations in process?

c. Are there any temporary differences between book and tax amounts? If so, have deferred taxes on these differences been properly reflected in the financial statements?

d. Do the financial statements reflect an appropriate provision for taxes other than income taxes (for example, franchise, sales)?

e. Have all required tax payments been made on a timely basis?

f. Has the entity assessed uncertain tax positions and related disclosures in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*?

12. Other liabilities, contingencies, and commitments

a. What is the nature of the amounts included in other liabilities?

b. Have other liabilities been properly classified between current and noncurrent?

c. Are there any guarantees, whether written or verbal, whereby the entity must stand ready to perform or is contingently liable related to the guarantee? If so, are these guarantees properly reflected in the financial statements?

d. Are there any contingent liabilities (for example, discounted notes, drafts, endorsements, warranties, litigation, and unsettled asserted claims)? Are there any potential unasserted claims? Are these contingent liabilities, claims, and assessments properly measured and disclosed in the financial statements?

e. Are there any material, contractual obligations for construction or purchase of property and equipment or any commitments or options to purchase or sell company securities? If so, are these facts clearly disclosed in the financial statements?

f. Is the entity responsible for any environmental remediation liability? If so, is this liability properly measured and disclosed in the financial statements?

g. Does the entity have any agreement to repurchase items that previously were sold? If so, have the repurchase agreements been taken into account in determining the appropriate measure ments and disclosures in the financial statements?

h. Does the entity have any sales commitments at prices expected to result in a loss at the consummation of the sale? If so, are these commitments properly reflected in the financial statements?

i. Are there any violations, or possible violations, of laws or regulations the effects of which should be considered for financial statement accrual or disclosure?

13. Equity

a. What is the nature of any changes in equity accounts during each reporting period?

b. What classes of stock (other ownership interests) have been authorized?

c. What is the par or stated value of the various classes of stock (other ownership interests)?

d. Do amounts of outstanding shares of stock (other ownership interests) agree with subsidiary records?

e. Have pertinent rights and privileges of ownership interests been properly disclosed in the financial statements?

f. Does the entity have any mandatorily redeemable ownership interests? If so, have these ownership interests been evaluated so that a proper determination has been made related to whether these ownership interests should be measured and reclassified to the liability section of the balance sheet? Are redemption features associated with ownership interests clearly disclosed in the financial statements?

g. Have dividend (distribution) and liquidation preferences related to ownership interests been properly disclosed in the financial statements?

h. Do disclosures related to ownership interests include any applicable call provisions (prices and dates), conversion provisions (prices and rates), unusual voting rights, significant terms of contracts to issue additional ownership interests, or any other unusual features associated with the ownership interests?

i. Are syndication fees properly reflected in the financial statements as a reduction of equity (rather than an asset)?

j. Have any stock options or other stock compensation awards been granted to employees or others? If so, are these options or awards properly measured and disclosed in the financial statements?

k. Has the entity made any acquisitions of its own stock? If so, are the amounts associated with these reacquired shares properly reflected in the financial statements as a reduction in equity? Is the presentation in accordance with applicable state laws?

l. Are there any restrictions or appropriations on retained earnings or other capital accounts? If so, are these restrictions or appropriations properly reflected in the financial statements?

14. Revenue and expenses

a. What is the entity's revenue recognition policy? Is the policy appropriate? Has the policy been consistently applied and appropriately disclosed?

b. Are revenues from sales of products and rendering of services recognized in the appropriate reporting period (that is, when the products have been delivered and when the services have been performed)?

c. Were any sales recorded under a "bill and hold" arrangement? If yes, have the criteria been met to record the transaction as a sale?

d. Are purchases and expenses recognized in the appropriate reporting period (that is, matched against revenue) and properly classified in the financial statements?

e. Do the financial statements include discontinued operations or items that might be considered extraordinary, or both? If so, are amounts associated with discontinued operations, extraordinary items, or both properly displayed in the income statement?

f. Does the entity have any gains or losses that would necessitate the display of comprehensive income (for example, gains or losses on available-for-sale securities or cash flow hedge derivatives)? If so, have these items been properly displayed within comprehensive income (rather than included in the determination of net income)?

15. Other

a. Have events occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the financial statements?

b. Have actions taken at stockholders, directors, committees of directors, or comparable meetings that affect the financial statements been reflected in the financial statements?

c. Are significant estimates and material concentrations (for example, customers or suppliers) properly disclosed in the financial statements?

d. Are there plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities reflected in the financial statements?

e. Have there been material transactions between or among related parties (for example, sales, purchases, loans, or leasing arrangements)? If so, are these transactions properly disclosed in the financial statements?

f. Are there uncertainties that could have a material impact on the financial statements? Is there any change in the status of previously disclosed material uncertainties? Are all uncertainties, including going concern matters, that could have a material impact on the financial statements, properly disclosed in the financial statements?

g. Are barter or other nonmonetary transactions properly recorded and disclosed? Have nonmonetary asset exchanges involving commercial substance been reflected in the financial statements at fair value? Have nonmonetary asset exchanges not involving commercial substance been reflected in the financial statements at carrying value?

.54 Illustrative Ratio Analysis Worksheet

In the following table, you will find 24 financial ratios. These financial ratios include liquidity, activity, and efficiency ratios. Accountants should use the ratios deemed necessary and use additional ones as needed.

Ratio Name	Formula	Calculation	Explanation
Current ratio	$\frac{\text{Current Assets}}{\text{Current Liabilities}}$		Measures ability to meet short term obligations
Quick ratio (or acid test ratio)	$\frac{\text{Current Assets} - \text{Inventory}}{\text{Current Liabilities}}$		A more conservative measure of a firm's ability to meet short term obligations
Operating cash flows to current liabilities	$\frac{\text{Cash Provided by Operations}}{\text{Average Current Liabilities}}$		Liquidity calculation
Days sales in accounts receivable	$\frac{\text{Net Accounts Receivable}}{\text{Net Sales/360}}$		Measures length of time average sales is a receivable
Allowance for bad debts as a % of accounts receivable	$\frac{\text{Allowance for Bad Debts}}{\text{Accounts Receivable}}$		Calculation is compared to prior periods and other comparable companies
Bad debt expense as a % of net sales	$\frac{\text{Bad Debt Expense}}{\text{Net Sales}}$		Calculation is compared to prior periods and other comparable companies
Inventory turnover	$\frac{\text{Cost of Sales}}{\text{Inventory}}$		Activity ratio - indication of efficiency of operation
Fixed asset turnover	$\frac{\text{Net Sales}}{\text{Average Fixed Assets}}$		Activity ratio
Receivable turnover	$\frac{\text{Net Credit Sales}}{\text{Average Receivables}}$		Activity ratio
Net sales to inventory	$\frac{\text{Net Sales}}{\text{Inventory}}$		Activity ratio
Days in inventory	$\frac{\text{Inventory} \times \text{(Days in a cycle)}}{\text{Cost of Sales}}$		Identifies how many days of inventory is available
Accounts payable to net sales	Accounts Payable × (Days in a cycle)/Net Sales × (Days in a year)		Compares A/P balance to net sales
Return on total assets	Net Income × (Days in a year)/Total Assets × (Days in a cycle)		Measures profitability at a point in time
Return on net worth	Net Income × (Days in a year)/Net Worth × (Days in a cycle)		Profitability measure
Return on net sales	$\frac{\text{Net Income}}{\text{Net Sales}}$		Profit margin

Ratio Name	Formula	Calculation	Explanation
Net sales to accounts receivable	$\frac{\text{Net Sales} \times (\text{Days in a year})}{\text{Net A/R} \times (\text{Days in a cycle})}$		Identifies how many times A/R will turn over per year of the operating cycle
Net sales to net fixed assets	$\frac{\text{Net Sales} \times (\text{Days in a year})}{\text{Fixed Assets} \times (\text{Days in a cycle})}$		Identifies efficiency of capital investment
Days payables in cost of sales	$\frac{\text{A/P} \times (\text{Days in a cycle})}{\text{Cost of Sales}}$		
Income before tax to net worth	$\frac{\text{EBIT} \times (\text{Days in a year})}{\text{Net Worth} \times (\text{Days in a cycle})}$		Ratio of earnings to net worth per year
Gross profit percentage	$\frac{\text{Net Sales - Cost of Sales}}{\text{Net Sales}}$		Profitability calculation
Operating expenses as a % of net sales	$\frac{\text{Operating Expenses}}{\text{Net Sales}}$		Efficiency calculation
Times interest earned	$\frac{\text{EBIT}}{\text{Interest Expense}}$		Profitability calculation
Income before tax to assets	$\frac{\text{EBIT} \times (\text{Days in a year})}{\text{Assets} \times (\text{Days in a cycle})}$		Measure of profitability
Altman Z score	See Below		A composite formula that is widely used to measure the financial "health" of a company. The formula takes financial ratios and multiplies each by a specific constant. The amounts computed are added together to obtain an overall score. This score is then compared to scores from other companies to rate relative financial health.

For private companies (four variable):

$$\frac{\text{Working Capital}}{\text{Total Assets}} \times 6.56 =$$

$$\frac{\text{Retained Earnings}}{\text{Total Assets}} \times 3.26 =$$

$$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}} \times 6.72 =$$

$$\frac{\text{Net Worth}}{\text{Total Liabilities}} \times 1.05 =$$

Altman Z Score ______

For private companies (five variable):

$\frac{\text{Working Capital}}{\text{Total Assets}}$	×	.717	=
$\frac{\text{Retained Earnings}}{\text{Total Assets}}$	×	.847	=
$\frac{\text{Income before Interest and Taxes}}{\text{Total Assets}}$	×	3.107	=
$\frac{\text{Net Worth (Book Value)}}{\text{Total Liabilities}}$	×	.420	=
$\frac{\text{Sales}}{\text{Total Assets}}$	×	.998	=
		Altman Z Score	

Altman Z Score Source: Altman, Edward, Corporate Financial Distress, A Complete Guide to Predicting, Avoiding, and Dealing with Bankruptcy (John Wiley and Sons, 1983).

AAM Section 2500

*Form and Content of Financial Statements**

.01 Preparing financial statements is both an art and a science, normally learned by trial and error or by word of mouth. The process is an art in that financial statements are typically presented in a format that has eye appeal, is understandable, conveys the company's financial picture, and can be produced economically. Preparing financial statements is a science in that a mastery of a complex array of authoritative standards for measurement, presentation, and disclosure is needed.

Title Page

.02 A title page is recommended for all financial statement presentations. The title page typically contains the name of the entity, the title of the financial statements, and the date or period covered.

Name of the Entity

.03 The name of the entity is ordinarily presented exactly as it is listed in the charter, partnership agreement, or other appropriate legal document. When the entity is not a regular corporation, the type of entity may be disclosed. Examples of appropriate presentations are as follows:

- Corporation
- XYZ, Ltd.
- Jones Nursery
- The Estate of John Doe
- Mr. and Mrs. John Q. Public
- Jane Doe Testamentary Trust

Title of Financial Statements

.04 If the presentation includes more than one type of financial statement (for example, Balance Sheet and Income Statement), the term *financial statements* is the most practical method of communicating what is included in the presentation. When only one type of statement is presented, it is more appropriate to use the exact title of the statement. When consolidated or combined statements are presented, the title page includes the words *consolidated* or *combined*. When financial statements include supplementary information, the title is modified. Some accountants add a description of the service performed to the title of the financial statements on the title page.

Date or Period Covered

.05 When both a balance sheet and income statement are presented, the period covered by the statement is typically shown, with the period ending date. When only a balance sheet is presented, the date is the balance sheet date, alone.

---

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

Presentation of the Accountant's Report

.06 This section discusses presentation and format of the accountant's report. AAM section 2600, *Reporting*, discusses the wording of the report and other considerations that affect the degree of responsibility assumed by the accountant.

Letterhead

.07 There is no requirement that the accountant's report be printed on the firm's letterhead (nor is there any requirement that the report be manually signed—for example, the signature could be manual, stamped, electronic, or typed—or that the financial statements be bound).

Heading of the Accountant's Report

.08 No heading is needed for an accountant's report, although some accountants prefer to use one. This avoids any misunderstanding about the type of report. Examples of appropriate report headings would be as follows:

- Accountant's Report
- Accountant's Report on Financial Statements
- Accountant's Report on Supplementary Information

Address

.09 Generally, the accountant's report is addressed to the board of directors, stockholders, or both. Reports are not intended as letters. Accordingly, addresses that include street names or zip codes are not appropriate. Examples of appropriate addresses are as follows:

- To the Board of Directors; XYZ Corporation; Greenville, SC
- To the Stockholders; XYZ Corporation
- To the Board of Directors and Shareholders; XYZ Corporation; Greenville, SC
- For small, closely held companies: Mr. John Doe; Small Manufacturing, Inc; Greenville, SC
- For personal financial statements: Mr. And Mrs. John Doe; Greenville, SC
- For partnerships: To the Managing Partner; ABC Company; Greenville, SC or Mrs. Jane Doe; General Partner, XYZ Ltd. Partnership
- For proprietorship: Mr. John Jones; Jones Transportation; Columbia, SC
- For trusts: Mr. John Smith; Trustee; Jane Doe Testamentary Trust; Myrtle Beach, SC
- For estates: Mr. John Doe; Executor; Estate of John Smith; Hilton Head Island, SC

Salutations

.10 Common practice in the profession is to exclude such salutations as "Dear Sirs" or "Gentlemen" from the report.

Signature

.11 The compilation or review report should contain a signature of the accounting firm or the accountant as appropriate. (For example, the signature could be manual, stamped, electronic, or typed.) Some state boards and certain regulatory agencies require an individual's signature on the report.

Date of Report

.12 The dating of the report affects the responsibility assumed by the accountant and is discussed in more detail in AAM section 2600. The format of the date is rather straightforward. Firms with multiple offices often precede the date of the report with the office's location.

Basic Financial Statements

.13 The basic financial statements included in a generally accepted accounting principles (GAAP) financial statement presentation are as follows: (Note: Basic financial statements for an other comprehensive bases of accounting [OCBOA] presentation are discussed in AAM section 2700, *Special Areas*).

- Balance sheet
- Income statement
- Statement of retained earnings[1] or Changes in stockholders' equity
- Statement of cash flows

Heading

.14 The heading of each financial statement typically contains the name of the entity, the title of specific statement, and the date or period covered.

Reference on Financial Statements

.15 The following examples demonstrate how the type of reference or legend on the financial statements depends upon the type of engagement:

- If the financial statements are reviewed, each page of the financial statements should contain a reference, such as: *See Accountant's Review Report*.
- If the financial statements are compiled for general-use (that is, not restricted to management's use only), each page of the financial statements should contain a reference, such as: *See Accountant's Compilation Report*.
- If the financial statements are compiled for management's use only, each page of the financial statements should contain a reference to the restricted nature of the financial statements, such as the following:
  - — *Restricted for Management's Use Only*, or
  - — *Solely for the information of and use by the management of XYZ Company and not intended to be and should not be used by any other party*.
- If the financial statements are compiled and included in certain prescribed forms (according to AR section 300A, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* [AICPA, *Professional Standards*, vol. 2]), each page of the form should include a reference, such as: *See Accountant's Compilation Report*.
- If the financial statements are personal financial statements prepared for inclusion in a personal financial plan (AR section 600, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* [AICPA, *Professional Standards*, vol. 2]), each of the personal financial statements should contain a reference to the report, such as: *See Accountant's Report*.

---

[1] The accounting literature does not require the statement of retained earnings to be presented as a separate financial statement. Accounting Principles Board (APB) Opinion No. 12, *Omnibus Opinion—1967*, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.

.16 Note that, in all cases, these requirements extend to the footnotes (because the footnotes are part of the financial statements). However, there is diversity in practice as to how to meet this requirement for footnotes. Some accountants place the reference on each page of the footnotes, and others place the reference only on the first page of the footnotes. Still others place a statement on each page of the financial statements that "the notes are an integral part of the financial statements" and, therefore, do not place the reference on the footnote pages. Any of these approaches is acceptable.

.17 Also, the previous references are examples given in Statements on Standards for Accounting and Review Services (SSARS), and the accountant may modify the wording of the reference. AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2) states that the accountant refer to the report—not that he or she state the type of report (level of service) in the reference. Therefore, the reference "See Accountant's Report" would be sufficient in all engagements that contain a report. However, most accountants follow the wording given in the examples. Accountants may place the reference on the financial statements by installing footers in the financial statement software, by using a rubber stamp, by manually writing the reference, or by any other method that is practical to use.

Use of the Term *Unaudited*

.18 Some accountants follow the financial statement title with the term *unaudited.* This practice is not required by SSARS and may be misleading.

Supplementary Information

.19 Financial statements of nonpublic companies often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as the following:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

Presentation

.20 Normally, supplementary information is segregated from the basic financial statements, after a title page marked "Supplementary Information." If a separate report on the supplementary information is presented, it typically follows the title page.

Reporting

.21 The accountant should describe in the report on the financial statements, or in a separate report, the degree of responsibility, if any, he or she takes with regard to the supplementary information. See AAM section 2600 for information on suggested wording for compilation and review reports.

Headings

.22 Each schedule is typically headed with a descriptive title that distinguishes it from the basic financial statements. Normally, supplementary schedules are not referred to as *statements* to avoid confusing them with basic financial statements.

Reference to Report

.23 Each supplementary schedule may contain a reference to the report. Although not specifically addressed in SSARS, the reference is advisable because the report describes the degree of responsibility the accountant takes with regard to the schedules.

Disclosures

.24 In general, all financial statements should include adequate disclosures (footnotes). However, there are situations in which the accountant may omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.25 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

> Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.26 Note that if the financial statements are presented on a basis of accounting other than GAAP (for example, income tax basis), this extra paragraph would be worded as follows:

> Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's assets, liabilities, equity, revenues, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.27 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they typically are not labeled as "Notes to the Financial Statements" (this title implies full disclosure). Instead, an appropriate title would be "Selected Information— Substantially All Disclosures Required by GAAP Are Not Included."

Referencing Notes

.28 While there is no requirement that individual notes be referenced to specific items in the financial statements, each page of the financial statements generally contains a general reference to the notes. If selected information rather than all notes is presented in a compilation, a reference to the selected information is ordinarily included.

[*The next page is 2551.*]

AAM Section 2600

*Reporting**

Reporting Obligation

.01 AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2) discusses the accountant's reporting obligation for compilation and review engagements. In summary, it says the following:

- A compilation is the minimum level of service that an accountant can provide before submitting unaudited financial statements of a nonpublic entity to a client or others (paragraph .01 of AR section 100A)
- The accountant should not consent to the use of his or her name in a document or written communication containing unaudited financial statements of a nonpublic entity unless (*a*) the accountant has compiled or reviewed the financial statements in compliance with the provisions of AR section 100A, or (*b*) the financial statements are accompanied by an indication that the accountant has not compiled or reviewed the financial statements, and that the accountant assumes no responsibility for them. For example, the indication may be worded as follows:

  The accompanying balance sheet of X Company as of December 31, 20X1, the related statements of income, and cash flows for the year then ended were not audited, reviewed, or compiled by us and, accordingly, we do not express an opinion or any other form of assurance on them. (paragraph .03 of AR section 100A)
- The accountant should issue a report prepared in accordance with Statements on Standards for Accounting and Review Services (SSARS) whenever he or she is engaged to compile financial statements of a nonpublic entity, or submits financial statements that are reasonably expected to be used by a third party (paragraph .11 of AR section 100A)
- The accountant should issue a report prepared in accordance with SSARS whenever he or she is engaged to review financial statements of a nonpublic entity (paragraph .41 of AR section 100A)

.02 The first item in the bulleted list above is addressed in paragraph .01 of AR section 100A. Whenever the accountant prepares financial statements (manually or using a computer) and presents them to a client or third parties, he or she has submitted financial statements.

.03 The second item in the bulleted list in paragraph .01 of this section is aimed at situations when a client includes the accountant's name in a loan proposal, prospectus, or other written communication that includes client prepared financial statements. If the client uses financial statements that were previously compiled or reviewed by the accountant, the accountant should insist that his report accompany the statements. If the financial statements are client prepared, the accountant should insist either that the reference to his name be removed or that the statements be accompanied by an indication that he has not compiled or reviewed them and takes no responsibility for them.

---

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

.04 The third and fourth items addressed in the bulleted list in paragraph .01 of this section are discussed in more detail in the following sections.

Basic Compilation Reports

.05 The basic elements of a report on compiled financial statements are as follows:

- A statement that a compilation has been performed in accordance with SSARS, issued by the AICPA
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management (owners)
- A statement that the financial statements have not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on them
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the compilation report (The date of completion of the compilation should be used as the date of the accountant's report.)

.06 The report should not refer to any other procedures that the accountant may have performed. To do so might lead the reader to conclude that the accountant is, in fact, offering some form of assurance.

Basic Review Reports

.07 The basic elements of a report on financial statements reviewed by an accountant are as follows:

- A statement that a review has been performed in accordance with SSARS, issued by the AICPA
- A statement that all information included in the financial statements is the representation of management (owners) of the entity
- A statement that a review consists primarily of inquiries of company personnel and analytical procedures applied to financial data
- A statement that a review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements taken as a whole and, accordingly, no such opinion is expressed
- A statement that the accountant is not aware of any material modifications that should be made to the financial statements in order for them to be in conformity with generally accepted accounting principles (GAAP), other than those modifications, if any, indicated in the report
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the review report (The date of the completion of the accountant's review procedures should be used as the date of the accountant's report.)

.08 Any other procedures that the accountant may have performed before or during the review engagement, including those performed in connection with a compilation engagement, should not be described in the report.

Reporting When Not Independent

.09 An accountant is precluded from issuing a review report on the financial statements of an entity with respect to which he is not independent.[1] He or she may, however, issue a compilation report.

[1] In making a judgment about whether he or she is independent, the accountant should be guided by the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2).

.10 The compilation report should specifically disclose the lack of independence. However, the reason for lack of independence should not be described. When the accountant is not independent, he or she should include the following as the last paragraph of the compilation report:

> We are not independent with respect to XYZ Company.

Reporting on Financial Statements That Omit Disclosures

.11 In general, all financial statements should include adequate disclosures (footnotes). However, there are situations in which the accountant may omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.12 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

> Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.13 Note that if the financial statements are presented on a basis of accounting other than GAAP (for example, income tax basis), this extra paragraph would be worded as follows:

> Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's assets, liabilities, equity, revenues, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.14 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they typically are not labeled as "Notes to the Financial Statements" (this title implies full disclosure). Instead, an appropriate title would be "Selected Information— Substantially All Disclosures Required by GAAP Are Not Included."

.15 Interpretation No. 1, "Omission of Disclosures in Reviewed Financial Statements," of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100A par. .01), indicates that the above modification for compiled financial statements is not appropriate for reviewed financial statements. Because the omission of substantially all disclosures is a departure from GAAP, the review report should include the omitted disclosures.

.16 When the financial statements include substantially all disclosures except one, the guidance above is not appropriate. Rather, the omission of a single disclosure should be treated in a compilation or review report like any other departure from GAAP, and the accountant should disclose the nature of the departure and its effects, if known.

Reporting on Financial Statements With Departures From GAAP

.17 Although compiled financial statements may omit substantially all disclosures required by GAAP, the omission of disclosures that are material to reviewed financial statements is a GAAP departure. As discussed previously, the accountant should include in the review report all of the omitted disclosures or, if the details to be disclosed have not been determined, the specific nature of the omitted disclosures. If, in the course of a compilation or review engagement, the accountant becomes aware of *measurement* departures from GAAP that are material to the financial statements, he or she has the following three alternatives:

- Persuade the client to revise the financial statements to conform to GAAP

- Refer to the departure in the report
- Withdraw from the engagement

.18 If modification of the report is appropriate, the nature of the departure from GAAP should be disclosed in a separate paragraph, and the effects (dollar amount) of the departure should be disclosed, if known. If the effects are not known, the accountant is not required to determine them, provided the accountant states in his report that no determination of the effects of the departure has been made.

Reporting When There Are Significant Departures From GAAP

.19 According to Interpretation No. 7, "Reporting When There Are Significant Departures From Generally Accepted Accounting Principles," of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100 par. .23–.26), an accountant cannot modify a compilation or review report to indicate that the financial statements are not fairly presented in accordance with GAAP. Thus, an adverse opinion is not appropriate in a compilation or review engagement. An adverse opinion can only be expressed in an audit engagement.

.20 The interpretation indicates that the accountant may wish to emphasize the limitations of financial statements having significant GAAP departures (whether disclosure or measurement) in a separate paragraph in the report. This paragraph is in addition to the one that describes the departure. Suggested wording for such a paragraph follows:

> Because the significance and pervasiveness of the matters discussed above make it difficult to assess their impact on the financial statements taken as a whole, users of these financial statements should recognize that they might reach different conclusions about the company's financial position, results of operations, and cash flows if they had access to revised financial statements prepared in conformity with generally accepted accounting principles.

Date of Reports

.21 The date of the completion of the accountant's review procedures should be used as the date of his or her report on reviewed financial statements. The date of completion of the compilation should be used as the date of his or her report on compiled financial statements. Most accountants believe that the completion of a compilation generally takes place on the date the financial statements are "read."

Highest Level of Service

.22 If the accountant provides more than one level of service on the same financial statements (for example, compilation and review or review and audit), the financial statements should be accompanied by a report that is appropriate for the highest level of service provided. This does not preclude the accountant from using procedures that go beyond those required for the level of assurance expressed.

.23 Interpretation No. 3, "Reporting on the Highest Level of Service," of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100A par. .06–.12) provides guidance on the type of report to be issued when the accountant performs procedures that go beyond those required. It states that simply performing procedures (for example, analytical procedures in a compilation engagement) do not require the issuance of the higher report.

.24 Interpretation No. 13, "Additional Procedures," of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100 par. .46–.49) addresses whether an accountant can perform audit procedures in a compilation or review engagement and still issue a compilation or review report. It states that SSARS do not preclude the accountant from performing procedures that he deems necessary or that his client requests.

.25 Both interpretations stress the importance of the understanding with the client.

.26 An exception to the highest level of service rule is indicated in paragraph .48 of AR section 100A. If the accountant is engaged to perform an audit or a review, but finds that he or she is not independent, the auditor may issue a compilation report.

.27 AR section 300A, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2), permits another exception to the highest level of service rule). It allows an accountant who has reviewed financial statements to issue a compilation report on financial statements for the same period included in a prescribed form.

Performing a Lower Level of Service

.28 CPAs may be asked to perform a level of service from the one they previously performed on financial statements covering the same period, depending on the situation. Examples are as follows:

- The client requests the CPA to compile financial statements that omit substantially all disclosures, even though the CPA has already compiled, reviewed, or audited full disclosure financial statements for the same period.
- The client requests the CPA to compile a balance sheet that omits substantially all disclosures, even though the accountant has already compiled, reviewed, or audited the complete financial statements for the same period.

.29 Because professional standards are silent on this issue, practice varies. Many accountants will consent to providing the compilation as long as they are satisfied that the client has a valid business reason for the request and is not attempting to mislead anyone. However, questions frequently arise about the form of the report. The most common question is whether the report should refer to the prior level of service performed on the statements. Again, the professional standards are silent.

Reporting When the Statement of Cash Flows or Comprehensive Income Information Is Omitted, or Both

.30 Financial Accounting Standards Board (FASB) Statement No. 95, *Statement of Cash Flows*, requires that a statement of cash flows be presented for each period for which an income statement is presented. Thus, omitting the statement of cash flows constitutes a departure from GAAP. Like other departures from GAAP, the accountant should disclose the departure in a separate paragraph of his report. An example wording of the separate paragraph follows:

> A statement of cash flows for the year ended December 31, 20XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

.31 According to FASB Statement No. 130, *Reporting Comprehensive Income*, all business entities that have any component of comprehensive income must display information about comprehensive income in a financial statement having the same prominence as the other basic financial statements. The primary components of other comprehensive income include the following:

- Unrealized gains and losses arising from investments in marketable securities classified as "available for sale" (FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*)
- Foreign currency translation adjustments and gains and losses from certain foreign currency transactions (FASB Statement No. 52, *Foreign Currency Translation*)
- Minimum pension liability adjustments (FASB Statement No. 87, *Employers' Accounting for Pensions*)
- Unrealized gains and losses arising from certain derivative transactions (FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*)

.32 If an entity does not have components of other comprehensive income, FASB Statement No. 130 does not apply. As a result, most small business clients do not have to apply FASB Statement No. 130. The requirements of FASB Statement No. 130 do not apply to not-for-profit organizations that are required to follow the provisions of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*.

.33 FASB Statement No. 130 does not specify a format for presenting comprehensive income, although it provides three examples:

- Presenting the information in the income statement (after net income)
- Presenting the information in the statement of changes in equity
- Presenting the information in a separate statement of comprehensive income

.34 The wording of the introductory paragraph of the compilation or review report may have to be modified depending on how the accountant chooses to report comprehensive income. If comprehensive income is reported in the income statement, then the title of the statement will need to be modified (Statement of Income and Comprehensive Income). If comprehensive income is reported in a separate statement, then an additional statement will need to be referenced in the report. If comprehensive income is reported in the statement of changes in equity, then no modification to the report is necessary.

.35 However, in compiled financial statements, the presentation of comprehensive income may be omitted by identifying the omission (in much the same way that a statement of cash flows is omitted). Depending on the type of engagement, the omission will be identified in the report accompanying the financial statements or in the engagement letter (management-use-only financial statements).

Reporting When Supplementary Information Is Included

.36 The following are two common questions that arise when supplementary information is included with the basic financial statements:

- What is considered supplementary information, and where is it placed in the presentation?
- Does the accountant have to modify the standard compilation or review report if supplementary information is included?

.37 The term *supplementary information* is not defined in SSARS. AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, *Professional Standards*, vol. 1), defines this type of information as

- additional details of items in, or related to, the basic financial statements, unless the information has been identified as being part of the basic financial statements.
- consolidating information.
- historical summaries of items extracted from basic financial statements, including graphs prepared on a computer.
- statistical data.
- other material, some of which may be from sources outside the accounting system or outside the entity.

.38 Financial statements often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as the following:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule

- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

.39 Normally, supplementary information is separated from the basic financial statements. Most accountants present supplementary information on separate pages after the basic financial statements (and footnotes, if included). It is also a good idea to separate the supplementary information from the basic financial statements by including a title page marked, "Supplementary Information." If the accountant presents a separate report on the supplementary information, it typically follows the title page.

.40 Paragraph .70 of AR section 100A states that the accountant should clearly indicate the degree of responsibility, if any, he or she is taking with respect to the supplementary information that accompanies the basic financial statements.

.41 When the accountant has compiled both the basic financial statements and other data presented only for supplementary analysis purposes, the compilation report should refer to the other data, or the accountant can issue a separate report on the other data. If a separate report is issued, the report should state that the other data accompanying the financial statements are presented only for supplementary analysis purposes and that the information has been compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data. If the basic financial statements are compiled, then the compilation report can be modified as follows:

> We have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings and cash flows for the year then ended, and the accompanying supplementary information contained in schedules A and B, which are presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
>
> A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management. We have not audited or reviewed the accompanying financial statements and supplementary schedules and, accordingly, do not express an opinion or any other form of assurance on them.

.42 If the basic financial statements are reviewed, an explanation should be included in the review report or in a separate report on the other data. The report should state that the review has been made primarily for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, and either

- the other data accompanying the financial statements are presented only for supplementary analysis purposes and have been subjected to the inquiry and analytical procedures applied in the review of the financial statements, and the accountant did not become aware of any material modifications that should be made to such data (in other words, the accountant is stating that he or she also *reviewed* the supplementary information), or
- the other data accompanying the financial statements are presented only for supplementary analysis purposes and have not been subjected to the inquiry and analytical procedures applied in the review of the financial statements, but were compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data (in other words the accountant is stating that he or she reviewed the financial statements but only *compiled* the supplementary information).

.43 In any case, the important thing to remember is to clearly indicate the degree of responsibility the accountant is taking for any information accompanying the basic financial statements.

Client Prepared Supplementary Information

.44 When the supplementary information is prepared or presented solely by the client, the reporting responsibility may not be as obvious as when the accountant assembled or assisted in assembling the information. Client prepared supplementary information is normally included with compiled or reviewed financial statements in one of the following ways:

- The financial statements and the client prepared information are bound by the accountant in his firm's report cover (or typed on the accountant's letterhead and stapled to the financial statements).
- After the accountant submits the financial statements to the client, the client, in turn, attaches (in some manner) supplementary information and distributes the package to third parties.

Client Prepared Supplementary Information Bound in the Accountant's Report Cover

.45 When the client prepared supplementary information is bound in the accountant's report cover, a third party would normally conclude that the accountant has some responsibility for the information. Thus, in such a situation, being silent about the accountant's responsibility for the client prepared supplementary information is not a valid alternative. Paragraph .70 of AR section 100A states, "When the basic financial statements are accompanied by information presented for supplementary analysis purposes, the accountant should clearly indicate the degree of responsibility, if any, he is taking with respect to such information."

Supplementary Information Attached by the Client

.46 The accountant's reporting responsibility for client prepared supplementary information attached to the financial statements after they are delivered to the client is not directly addressed by SSARS. Realistically, the accountant has little control over the client's actions once he or she delivers the report. However, situations do occur when the client clearly communicates to the accountant that the financial statements will be combined with other client prepared information and submitted by the client to third parties, for example, to a bank as part of a loan proposal package. In fact, the accountant may accompany the client when he or she submits the package to the third party. Guidance for these situations can be inferred from AR section 100A and AR section 200A, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2), that discusses client prepared financial statements included in a client prepared document along with compiled or reviewed financial statements. Basically, this guidance says the client prepared financial statements of some periods that have not been audited, reviewed, or compiled may be presented on separate pages of a document that also contains financial statements of other periods on which the accountant has reported if they are accompanied by a statement that they were not prepared by the accounting firm and the accounting firm assumes no responsibility for them. Absent such a statement, the accountant is advised to consult with his attorney to consider what other actions are appropriate. In such situations, the accountant may ask the client to disclose (preferably on a page immediately preceding the data) a statement such as the following:

> The supplementary information on pages ____ to ____ has not been audited, reviewed, or compiled by ABC Firm, and ABC Firm assumes no responsibility for this information.

.47 Alternately, the accountant may desire to add the following paragraph to the compilation or review report:

> All other information that may be included with (or attached to) the financial statements (and supplementary information) identified in the preceding paragraph has not been audited, reviewed, or compiled by us (me) and, accordingly, we (I) assume no responsibility for it.

Percentages

.48 Percentages presented in the financial statements (as is commonly the case with computer generated statements) do not constitute supplementary information for purposes of the reporting requirements of AR section 100A. Accordingly, the accountant generally does not mention the percentages in the report. A related question is whether the inclusion of such percentages implies the accountant has performed analytical procedures and, thus, must report on the financial statements as if it were a SSARS review engagement. Most would argue that this is not the case.

Forecast or Projection Included With Historical Financial Statements

.49 SSARS do not apply to any type of prospective information. The accountant is required to report separately on prospective information included with historical financial statements following the reporting rules in the Statements on Standards for Attestation Engagements. Generally, the accountant will either compile, examine, or apply agreed upon procedures to the prospective information.

.50 An exception to this rule occurs for expired forecasts or projections, that is, presentations that are no longer prospective in nature because the prospective period has expired. An example would be 2002 historical financial statements presented alongside an expired 2002 budget. Expired prospective information presented for comparative purposes meets the definition of supplementary information; therefore, AR section 100A applies.

Pro Forma Information

.51 The objective of pro forma financial information is to show what the significant direct effects on historical information might have been had a consummated or proposed transaction or event occurred at an earlier date. Pro forma financial information usually is presented by applying certain pro forma adjustments to amounts in the historical financial statements. Such information is frequently used to show the effects of the following:

- Business combinations
- Changes in capitalization
- Dispositions of a significant part of a business
- Changes in the form of business organization
- Proposed sale of securities and application of the proceeds

.52 Although such future or hypothetical transactions may appear prospective in nature, pro forma presentations are essentially historical financial statements that have been recast.

.53 In situations where the pro forma information is treated as supplementary information, the reporting guidance in AR section 100A should be followed. The document presenting pro forma information should include complete historical financial statements. Usually, the pro forma information will be presented as notes or supplementary information to the historical financial statements.

.54 According to paragraph .05 of AR section 120, *Compilation of Pro Forma Financial Information* (AICPA, *Professional Standards*, vol. 1) pro forma financial information should be labeled as such to distinguish it from historical financial information. This presentation should describe the transaction (or event) that is reflected in the pro forma financial information, the source of the historical financial information on which it is based, the significant assumptions used in developing the pro forma adjustments, and any significant uncertainties about those assumptions. The presentation should also indicate that the pro forma financial information should be read in conjunction with the related historical financial information and that the pro forma financial information is not necessarily indicative of the results (such as financial position and results of operations, as applicable) that would have been attained had the transaction (or event) actually taken place earlier.

.55 If an accountant prepares or assists a client in preparing pro forma financial information, the accountant should consider how the presentation of pro forma financial information will be used. The accountant should also consider the potential of being associated with pro forma financial information and the likelihood that the user may inappropriately infer, through that association, an unintended level of assurance. If the accountant believes that he or she will be associated with the information, the accountant should consider issuing a compilation report so a user will not infer a level of assurance that does not exist.

.56 An engagement to compile pro forma financial information may be undertaken as a separate engagement or in conjunction with a compilation of financial statements. The accountant may agree to compile pro forma financial information if the document that contains the pro forma financial information includes (or incorporates by reference) complete historical financial statements of the entity for the most recent year (or for the preceding year if financial statements for the most recent year are not yet available) and, if pro forma financial information is presented for an interim period, the document also includes (or incorporates by reference) historical interim financial information for that period (which may be presented in condensed form). In the case of a business combination, the document should include (or incorporate by reference) the appropriate historical financial information for the significant constituent parts of the combined entity.

.57 Additionally, the historical financial statements of the entity (or, in the case of a business combination, of each significant constituent part of the combined entity) on which the pro forma financial information is based must have been compiled, reviewed, or audited. The accountant's compilation or review report or the auditor's report on the historical financial statements should be included (or incorporated by reference) in the document containing the pro forma financial information.

.58 Before issuance of a compilation report on pro forma financial information, the accountant should read such compiled pro forma financial information, including the summary of significant assumptions,[2] and consider whether the information appears to be appropriate in form and free of obvious material errors. In this context, the term *error* refers to mistakes in the compilation of the pro forma financial information, including arithmetical or clerical mistakes, and mistakes in the application of accounting principles, including disclosures, if presented. The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented. If the accountant reports on compiled pro forma financial information when management elects to omit substantially all disclosures, then the accountant should follow the guidance in paragraph .17 of AR section 100A.

.59 When the accountant is engaged to compile or issues a compilation report on pro forma financial information, the basic elements of the report are as follows:

a. An identification of the pro forma financial information.

b. A statement that the compilation was performed in accordance with SSARS issued by the American Institute of Certified Public Accountants.

c. A reference to the financial statements from which the historical financial information is derived and a statement on whether such financial statements were compiled, reviewed, or audited. (The report on pro forma financial information should refer to any modifications in the accountant's or auditor's report on historical financial statements.)

d. A statement that the pro forma financial information was compiled. If the compilation was performed in conjunction with a compilation of the company's financial statements, the paragraph should so state and indicate the date of the accountant's compilation report on those financial statements. Furthermore, any departure from the standard report on those statements should also be disclosed if considered relevant to the presentation of the pro forma financial information.

---

[2] The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented. Nothing in this statement should be interpreted to preclude the accountant from reporting on compiled pro forma financial information when management elects to omit substantially all disclosures. In that situation, the accountant should follow the guidance in paragraphs .17–.20 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2).

e. A description of the basis on which the pro forma financial information is presented if that basis is not generally accepted accounting principles and a statement that that basis of presentation is a comprehensive basis of accounting other than GAAP.

f. A statement that a compilation is limited to presenting pro forma financial information that is the representation of management (owners).

g. A statement that the pro forma financial information has not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on it.

h. A separate paragraph explaining the objective of pro forma financial information and its limitations.

i. A signature of the accounting firm or the accountant as appropriate. (The signature could be manual, stamped, electronic, or typed.)

j. The date of the compilation report. (The date of completion of the compilation should be used as the date of the accountant's report.)

.60 Each page of the compiled pro forma financial information should include a reference, such as "See Accountant's Compilation Report."

Supplementary Information Presented Without Financial Statements

.61 Because stand alone supplementary information will ordinarily not constitute a full financial statement, the accountant has no reporting responsibility under SSARS. However, the guidance above can generally be followed if the accountant is asked to report on supplementary information that is to be presented without financial statements.

Reporting on Charts and Graphs

General

.62 Common examples of charts and graphs prepared for clients include the following:

- Number of days sales in accounts receivable
- Sales by product line
- Operating expenses by plant
- Line of credit usage versus owned inventory

Charts and Graphs That Accompany Financial Statements

.63 When the basic financial statements are accompanied by information in the form of a chart or graph, such information may be considered supplementary information. The accountant may wish to consider the following basic issues:

- Accountants ordinarily should check for consistency if the same information is presented numerically in the basic financial statements and graphically in supplementary information.
- Accountants ordinarily should consider whether the information is presented in a way that is obviously misleading.
- Due to the subjective nature of graphic presentations, accountants will ordinarily elect to report on them as compiled—even when they accompany reviewed financial statements.
- Each chart or graph ordinarily includes a reference to the accountant's report.

Stand Alone Charts and Graphs

.64 Unless the stand alone chart or graph constitutes a complete financial statement (which would be rare), the accountant has no reporting responsibility. The type of financial information depicted in charts and graphs (that is, whether they are considered specified elements or condensed financial information) determines how accountants should report if they elect to do so.

Emphasis Paragraphs

.65 In accordance with paragraph .49 of AR section 100A, an accountant may emphasize, in any report on financial statements, a matter disclosed in the financial statements. Such explanatory information should be presented in a separate paragraph of the accountant's report. Emphasis paragraphs are never required; they may be added solely at the accountant's discretion. Examples of matters the accountant may wish to emphasize are as follows:

- Uncertainties
- That the entity is a component of a larger business enterprise
- That the entity has had significant transactions with related parties
- Unusually important subsequent events
- Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period

.66 Because an emphasis of matter paragraph should not be used in lieu of management disclosures, an accountant should not include an emphasis paragraph in a compilation report on financial statements that omit substantially all disclosures unless the matter is disclosed in the financial statements. For example, the accountant may include an emphasis paragraph on a matter when management has presented selected information, even though substantially, all disclosures have been omitted, as long as the matter discussed in the emphasis paragraph is disclosed in the selected information. The accountant should refer to paragraph .17 of AR section 100A if he or she believes that a disclosure is necessary to keep the financial statements from being misleading.

Going Concern Issues

Full Disclosure Financial Statements

.67 As stated in footnote 30 in paragraph .52 of AR section 100A, "Normally, neither an uncertainty, including an uncertainty about an entity's ability to continue as a going concern, nor an inconsistency in the application of accounting principles would cause the accountant to modify the standard report provided the financial statements appropriately disclose such matters." According to Interpretation No. 29, "Reporting on an Uncertainty Including, an Uncertainty About an Entity's Ability to Continue as a Going Concern," of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100A par. .120–.129) information. Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. If, during the performance of compilation or review procedures, evidence or information comes to the accountant's attention that there may be an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being compiled or reviewed, the accountant should consider the adequacy of management's disclosure of the uncertainty. If management has not disclosed the matter or the accountant is concerned about the adequacy of management's disclosure, the accountant should consider whether there is a reasonable possibility that third-party users or other readers of the compiled or reviewed financial statements would be misled into assuming the continuation of the entity. If the accountant determines that the disclosure of the uncertainty regarding the entity's ability to continue as a going concern is not adequate, he or she should follow the guidance in paragraphs .51–.53 of AR section 100A with respect to departures from GAAP.

.68 If the accountant concludes that management's disclosure of the uncertainty regarding the entity's ability to continue as a going concern is adequate, but further decides to include an emphasis of a matter paragraph with respect to the uncertainty in the accountant's compilation or review report, he or she may use the following language:

> As discussed in Note X, certain conditions indicate that the company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the company be unable to continue as a going concern.

Omission of Substantially All Disclosures

.69 The accountant may compile financial statements for a client that omit substantially all disclosures required by GAAP or other comprehensive bases of accounting (OCBOA), provided that the omission is clearly indicated in the report and is not, to the accountant's knowledge, undertaken with the intention of misleading those who might reasonably be expected to use such financial statements.[3]

.70 Because the user is alerted that substantially all disclosures have been omitted from the financial statements (by adding a paragraph to the compilation report to explain the omission), going concern disclosures would not be required.

.71 Although not required, the going concern matter can be disclosed. In this case, however, the disclosure might be made in the financial statements. Keep in mind that emphasis paragraphs ordinarily do not introduce new information about the financial statements. Rather, they only emphasize a matter that is already disclosed in the financial statements. If the going concern matter is the only disclosure included in the financial statements, it should be labeled as "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included," rather than "Notes to the Financial Statements." Once disclosed in the financial statements, the matter can then be emphasized, if the accountant desires, in a separate paragraph of the report.

Reporting on Computer Prepared Financial Statements

.72 Computer prepared financial statements for interim or annual periods that contain disclosure omissions or measurement departures should be reported on in accordance with AR section 100A. The accountant cannot place a legend on computer prepared financial statements saying that the statements were not compiled, reviewed, or audited by an accountant and thereby avoid the reporting requirements of AR section 100A.

Reporting When There Is a Scope Limitation

.73 Scope limitations occur in audit engagements when the auditor is prevented from applying generally accepted auditing standards (GAAS) because of limitations imposed by the client or caused by circumstances. When an auditor encounters a scope limitation, he or she issues an "except for" opinion or disclaimer of opinion. However, AR section 100A does not permit such reporting.

.74 Scope limitations can occur in SSARS engagements, especially in initial review engagements. In those cases, it is not unusual for the accountant to raise questions about the reasonableness of amounts included in the financial statements. Often, due to the timing of the engagement or inadequate accounting records, he or she may also be unable to apply analytical procedures to obtain review assurance. Paragraph .46 of AR section 100A notes that when an accountant is unable to perform inquiry and analytical procedures necessary for a review or when the client does not furnish a representation letter, the review will be incomplete, and a review report cannot be issued. In this situation, the accountant should consider whether the scope limitation also precludes him or her from issuing a compilation report.

---

[3] Note that the accountant cannot review financial statements that omit substantially all disclosures.

.75 In considering the limitations of the scope limitation, the accountant should evaluate the possibility that the information affected by the scope limitation is incorrect, incomplete, or otherwise unsatisfactory. This evaluation is a matter of professional judgment. If the client is unable to provide additional or revised information due to factors beyond his or her control, a step-down to a compilation is probably acceptable. The accountant may consider the following:

- Whether the reason for the scope limitation seems logical
- Whether the scope restriction significantly impairs the usefulness of the financial statements

.76 In deciding whether it would be appropriate to issue a compilation report when a scope restriction precludes a review report, the accountant should determine if the scope restriction is client imposed. Paragraph .09 of AR section 100A states that the accountant should withdraw from the engagement if the client refuses to provide additional or revised information. A scope restriction resulting from inadequate accounting records is normally considered a client imposed restriction. Although the restriction may be unintentional, the maintenance of adequate accounting records is within the client's control. Situations where the client is unable to provide additional or revised information are rare ordinarily. One such situation may be when accounting records have been destroyed.

.77 When there has been a scope restriction that precludes a review report, and the accountant decides to issue a compilation report, paragraph .78 of AR section 100A indicates he or she should issue an appropriate compilation report without any reference to the scope restriction.

.78 If the accountant is unable to obtain the limited assurance required for a review and decides it would not be appropriate to issue a compilation report, he or she can try to provide other accounting information to the client, short of submitting financial statements. For example, a working trial balance may satisfy the client's needs.

Reporting on Financial Statements Included in Management Consulting Services Reports

General

.79 Unaudited financial statements are often included in reports on findings in management consulting services engagements (MCS reports). A question often arises as to what reporting responsibility the CPA has on those historical financial statements.

.80 The accountant should not submit unaudited financial statements of a nonissuer to his or her client or a third party unless, at a minimum, he or she complies with the provisions of AR section 100A applicable to a compilation engagement. This requirement extends to unaudited financial statements included in MCS reports.

Financial Statements Compiled or Reviewed by Another Accountant

.81 As discussed in paragraph .17 of AR section 200A, when the financial statements of a prior period have been compiled or reviewed by a predecessor whose report is not presented, and the successor has not compiled or reviewed those financial statements, the successor should make reference in an additional paragraph(s) of his report on the current period financial statements to the predecessor's report on the prior period financial statements. This reference should include the following matters:

a. A statement that the financial statements of the prior period were compiled or reviewed by another accountant (other accountants). The successor accountant should not disclose the name of the other accountant in his or her report; however, the successor accountant may name the predecessor accountant if the predecessor accountant's practice was acquired by or merged with that of the successor accountant

b. The date of his (their) report

c. A description of the standard form of disclaimer or limited assurance, as applicable, included in the report

d. A description or a quotation of any modifications of the standard compilation or review report and of any paragraphs emphasizing a matter regarding the financial statements

.82 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard compilation report on the financial statements follows:

> The 20X1 financial statements of XYZ Company were compiled by other accountants, whose report dated February 1, 20X2 stated that they did not express an opinion or any other form of assurance on those statements.

.83 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard review report on the financial statements follows:

> The 20X1 financial statements of XYZ Company were reviewed by other accountants, whose report dated February 1, 20X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

Client Prepared Financial Statements

.84 If the MCS report contains client prepared financial statements, the accountant is not required to compile and report in those statements. In that case, professional standards do not require that the accountant mention those statements in the MCS report at all. However, most accountants would compile and report on such statements because they are included in a document (MCS report) that bears their name and because a compilation is the lowest level of service with which they would want to be associated. If the accountant decides not to compile the statements, he or she may add a statement to the MCS report to clarify his or her responsibility for the financial statements. Such a statement might be worded as follows:

> We have not compiled, reviewed, or audited the financial statements presented on pages ____ to ____ and, accordingly, we assume no responsibility for them.

Reporting When Only One Financial Statement Is Presented

.85 An accountant may issue a compilation report on a single financial statement, such as a balance sheet. Likewise, he or she may issue a review report on a single financial statement. Engagements to report on a single financial statement are limited reporting engagements, not scope restrictions.

Reporting on Comparative Financial Statements

.86 AR section 200A, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2), establishes standards for reporting on comparative financial statements of a nonpublic entity when financial statements of one or more periods presented have been compiled and reported on or reviewed in accordance with AR section 100A. Reporting is simple unless a change of accountants has occurred, the level of service (compilation or review) differs from period to period, or a change in the nonpublic status of the entity has occurred. In these situations, the accountant may face some rather complex reporting decisions. Because the accountant may not face these complexities often, applying the guidance in AR section 200A can be daunting.

.87 The following definitions from paragraph .07 of AR section 200A may facilitate reporting on comparative financial statements.

- **Updated report**. A continuing accountant issues this kind of report, which considers new information from the current engagement and re-expresses the previous conclusions or expresses different conclusions on the prior period financial statements as of the current report date.
- **Reissued report**. Issued subsequent to the date of the original report but bears the same date as the original report; a reissued report may need to be revised and dual dated for the effects of specific events.

General

.88 When comparative financial statements of a nonpublic entity are presented, the accountant should issue a report covering each period presented. If the accountant becomes aware that financial statements of other periods that have not been audited, reviewed, or compiled are presented in comparative form in a document containing financial statements that he or she has reported on, and the accountant's name or report is used, the accountant should advise the client that the use of his or her name or report is inappropriate. The accountant may also wish to consult with an attorney.

.89 The accountant should not report on comparative statements when statements for one or more of the periods, but not all, omit substantially all disclosures.

Practice Tip

Financial statements in columnar form with disclosures are comparative; financial statements that omit substantially all disclosures are comparative; but financial statements with disclosures are not comparative to financial statements without disclosures.

Continuing Accountant's Standard Report

.90 A continuing accountant who performs the same or higher level of service on the current period financial statements should update his or her report on the prior period financial statements.

.91 A continuing accountant who performs a lower level of service (20X2 compiled, 20X1 reviewed) should either

- include a separate paragraph in the report describing the responsibility for the prior period financial statements.
- reissue the report on the prior period financial statements.

.92 If the first option indicated in the paragraph above is selected, the description should include the original date of the report and should state that no review procedures were performed after that date.

.93 If the second option is selected, the report may be

- a combined compilation and reissued review report. (The combined report should state that no review procedures were performed after the date of the review report.)
- presented separately.

Continuing Accountant's Changed Reference to GAAP

.94 The accountant should consider the effects on the prior period report of circumstances or events that came to his or her attention. When the accountant's report contains a changed reference to a GAAP departure, the report should include a separate paragraph indicating the following:

- Date of previous report
- Circumstances or events that caused the change

- If applicable, that the prior period financial statements have been changed

Predecessor's Compilation or Review Report

.95 A predecessor accountant is not required to, but may choose to reissue his or her report. If the predecessor's compilation or review report is not presented, the successor should either

- make reference to the predecessor's report.
- perform a compilation, review, or audit of the prior period financial statements and report thereon.

.96 If "reference to the predecessor's report" option is selected, the successor's reference should include

- a statement that the prior period financial statements were compiled or reviewed by another accountant(s) (without identifying the predecessor by name).[4]
- the date of prior accountant's report.
- a description of the disclaimer or limited assurance report.
- a description or quotation of any report modification or emphasis paragraphs.

.97 According to paragraph .20 of AR section 200A, if the predecessor report is to be reissued, before reissuing, the predecessor should consider

- the current form and presentation of the prior period financial statements.
- subsequent events not previously known.
- changes in the financial statements that alter modifications to the report.

.98 The predecessor should also perform the following procedures:

- Read the current period financial statements and the successor's report.
- Compare the prior period financial statements (*a*) with those previously issued and (*b*) with the current period.
- Obtain a letter from the successor indicating whether he or she is aware of any matter that affects the prior period financial statements. The predecessor should not refer in his reissued report to this letter or the report of the successor.

.99 If the predecessor becomes aware of any matter that affects the prior period financial statements, he or she should

- make inquiries or perform analytical procedures similar to those that would have been applied to the information if it had been known at the report date.
- perform other procedures considered necessary such as discussing the matter with the successor or reviewing the successor's working papers.

.100 When reissuing the report, the predecessor should use the date of the previous report. However, if the financial statements are revised, the report should be dual dated. Also, if the financial statements are revised, the predecessor should obtain a written statement from the former client describing the new information and its effect on the prior period financial statements.

.101 If the predecessor is unable to complete the reissue procedures described above, he or she should not reissue the report and may wish to consult with an attorney.

---

[4] The successor accountant should not name the predecessor accountant in his or her report; however, the successor accountant may name the predecessor accountant if the predecessor accountant's practice was acquired by, or merged with that of the successor accountant.

Restated Prior Period Financial Statements

.102 When prior period financial statements have been restated,[5] the predecessor accountant would normally reissue his or her report following the guidance in paragraph .22 of AR section 200A. If the predecessor decides not to reissue his or her report, the successor accountant may be engaged to report on the financial statements for the prior year. If the predecessor accountant does not reissue his or her report and the successor accountant is not engaged to report on the prior year financial statements, the successor accountant should indicate in the introductory paragraph of his or her compilation or review report that a predecessor accountant reported on the financial statements of the prior period before restatement. In addition, if the successor accountant is engaged to compile or review the restatement adjustment(s), he or she may also indicate in the accountant's report that he or she compiled or reviewed the adjustment(s) that was (were) applied to restate prior year financial statements.

Reporting When Prior Period Is Audited

.103 The accountant should issue a compilation or review report on the current period financial statements and either

- reissue the audit report on the prior period or
- add a separate paragraph to the current period report that includes the following information:
  - The financial statements of the prior period were audited.
  - The date of the audit report.
  - The type of opinion.
  - Substantive reasons for other than unqualified opinion.
  - No audit procedures were performed after the date of the audit report.

Reporting on Financial Statements That Previously Did Not Omit Substantially All Disclosures

.104 The accountant may report on comparative financial statements that omit substantially all disclosures even if the prior period statements were originally compiled, reviewed, or audited (with disclosures) provided that his or her report includes an additional paragraph stating the nature of the previous service and the date of the previous report.

Change of Accountants—Reporting Following a Merger or Purchase of a Firm

.105 When there has been a merger or purchase of a firm, the new firm or purchaser should report as a successor accountant and apply the guidance in AR section 200A. Basically, it permits the successor to (*a*) make reference to the old or acquired firm's report or (*b*) assume compilation, review, or audit responsibility for the prior period financial statements. The successor accountant may name the predecessor accountant if the predecessor accountant's practice was acquired by or merged with that of the successor accountant.

Change of Accountants—Predecessor Accountant Has Ceased Operations

.106 If the prior period financial statements were compiled or reviewed and have not been restated, the notice states that the successor accountant should add a paragraph to the report on the current year financial statements that includes the following:

- A statement that the prior period financial statements were compiled or reviewed by another accountant who has ceased operations

[5] See paragraphs .10–.11 of AR section 400A, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2), for guidance regarding communication to the predecessor accountant with respect to information that leads the successor accountant to believe that the financial statements reported on by the predecessor accountant may require revision.

- The date of the predecessor accountant's report
- A description of the standard form of disclaimer or limited assurance, as applicable, included in the report
- A description or quotation of any modifications of the standard report and any paragraphs emphasizing a matter regarding the financial statements

.107 If the prior period financial statements were audited and have not been restated, the successor accountant should add a paragraph to the report on the current period financial statements that indicates the following:

- That the prior period financial statements were audited by another firm
- The date of the predecessor's report
- The type of opinion issued by the predecessor
- If the opinion was other than unqualified, the substantive reasons therefore
- That no auditing procedures were performed after the date of the predecessor's report

.108 If the prior period financial statements have been restated, the successor accountant may be engaged to report on the financial statements for the prior year. If the successor accountant is not engaged to report on the financial statements for the prior year, the successor accountant should indicate in the introductory paragraph of his compilation or review report that a predecessor accountant reported on the financial statements of the prior period before restatement. In addition, if the successor accountant is engaged to compile or review the restatement adjustment(s), he or she may also indicate in the accountant's report that he or she compiled or reviewed the adjustment(s) that was (were) applied to restate prior year financial statements.

Change of Status—Public/Nonpublic Entity

.109 A previously issued compilation or review report should not be reissued or referred to in the current report if the entity is currently a public entity.

AR Section 200A Summary

.110 AR section 200A may be rather complex for some accountants. The following summary decision aid helps simplify the report decision process in AR section 200A. The comparative statements are for years 20X5 and 20X6.

1. If 20X6 is audited, SASs apply.
2. If the entity's current status for 20X6 is a public company, SASs apply.
3. For continuing accountant:
   a. If 20X6 level of service is equal to or higher than 20X5, update report.
   b. If 20X6 is lower level of service, either refer to or reissue prior report.
4. For successor accountant:
   a. If predecessor does not reissue, refer to report of predecessor or perform audit, review, or compilation of 20X5.
   b. If financial statements are restated because of an error and predecessor doesn't report on restated financials, perform audit, review, or compilation of 20X5.

Split Level Reporting

.111 Split-level reporting involves providing different levels of assurance on a single set of financial statements (for example, auditing the balance sheet and reviewing the income statement). Although the authoritative literature does not address this situation, most believe that it should be avoided.

Reporting When Other Accountants Have Audited or Reviewed a Component

.112 If other accountants are engaged to audit or review the financial statements of a division, branch, subsidiary, or other investee, the accountant will require reports from the other accountants as a basis, in part, for his report on his review of the financial statements of the reporting entity. The accountant may decide to refer to the work of the other accountants in his review report. If such a reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants.

Preliminary Financial Statement Drafts

.113 Interpretation No. 17, "Submitting Draft Financial Statements," of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100A par. .61) states that an accountant can submit draft financial statements without attaching a compilation or review report as long as

- he or she intends to submit final financial statements, and
- he or she labels each page of the draft financial statements with words such as *Draft*, *Preliminary Draft*, *Draft—Subject to Change*, or *Working Draft*.

.114 In the rare circumstances where the accountant submits drafts but never issues the final statements, the interpretation suggests that the accountant document the reasons why. The interpretation reinforces the fact that preliminary drafts should not be used as a means of circumventing the reporting standards of SSARS.

AAM Section 2610

Accountants' Reports on Compilation of Financial Statements of a Nonpublic Entity[*]

.01 Accountants' Standard Report[1]

Stockholders and Board of Directors

[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings,[2] and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

[Source: Paragraph .14 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2)]

---

[*] In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

[1] If the statement of comprehensive income is included, the first paragraph of the report should also refer to this statement.

[2] Accounting Principles Board (APB) Opinion No. 12, *Omnibus Opinion—1967*, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.

.02 Omission of Substantially All Disclosures But Otherwise in Conformity With GAAP

Stockholders and Board of Directors

[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income and retained earnings, for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures (and the statement of cash flows) required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

January 28, 20X7

[*Signature of CPA*]

.03 Accountants Not Independent

Stockholders and Board of Directors

[*Company*]

[*Address*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

We are not independent with respect to [*Company*].

January 28, 20X7

[*Signature of CPA*]

[Source: Paragraphs .14 and .21 of AR section 100A]

.04 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors

[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

A statement of cash flows for the year ended December 31, 20X6, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

January 28, 20X7

.05 Departure From GAAP—Accounting Principles Not Generally Accepted

Stockholders and Board of Directors

[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management [*owners*]. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed me (us) that the company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders' equity would have been decreased by $500,000.

.06 Compilation Report With Departure From GAAP and Omission of Substantially All Disclosures

Stockholders and Board of Directors

[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (We) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

Generally accepted accounting principles require that [*describe requirement*]. Management has informed me (us) that the company has [*describe departure*], which is not in accordance with generally accepted accounting principles. Management has not determined the effect of the departure from generally accepted accounting principles on the accompanying balance sheet. The accompanying statements of income, retained earnings, and cash flows would not be affected by the departure.

Management has elected to omit substantially all disclosures required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.16 Compilation Report on Pro Forma Financial Information

Stockholders and Board of Directors

[*Company*]

I (we) have compiled the accompanying pro forma financial information as of and for the year ended December 31, 20X6, reflecting the business combination of the Company and ABC Company in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The historical condensed financial statements are derived from the historical unaudited financial statements of XYZ Company, which were compiled by me (us), and of ABC Company, which were compiled by another (other) accountant(s).[3]

A compilation is limited to presenting pro forma financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying pro forma financial information and, accordingly, do not express an opinion or any other form of assurance on it.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the transaction (or event) occurred at an earlier date. However, the pro forma financial information is not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the above mentioned transaction (or event) actually occurred earlier.

[*If the presentation does not include all applicable disclosures, the following paragraph should be added.*][4]

Management has elected to omit all of the disclosures ordinarily included in pro forma financial information. The omitted disclosures might have added significant information regarding the company's pro forma financial position and results of operations. Accordingly, this pro forma financial information is not designed for those who are not informed about such matters.

January XX, 20X7

[*Signature of CPA*]

[Source: Paragraph .16 of AR section 120, *Compilation of Pro Forma Financial Information* (AICPA, *Professional Standards*, vol. 2)]

[3] Where one set of historical financial statements is audited or reviewed and the other is audited, reviewed, or compiled, wording similar to the following would be appropriate:

> The historical condensed financial statements are derived from the historical financial statements of XYZ Company, which were compiled by me (us), and of ABC Company, which were reviewed by another (other) accountant(s), appearing elsewhere herein (or incorporated by reference).

If either accountant's review report or auditor's report includes an explanatory paragraph or is modified, that fact should be referred to within this report.

[4] The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented.

.17 Compilation Report—Emphasis of a Going Concern Uncertainty

Stockholders and Board of Directors

[*Company*]

I (We) have compiled the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

As discussed in Note [*Number*], certain conditions indicate that the company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the company be unable to continue as a going concern.

AAM Section 2620

*Accountants' Reports on Review of Financial Statements of a Nonpublic Entity**

.01 Accountants' Standard Report

Stockholders and Board of Directors

[*Company*]

I (We) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings,[1] and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

January 28, 20X7

[*Signature of CPA*]

[Source: Paragraph .44 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2)]

---

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

[1] Accounting Principles Board (APB) Opinion No. 12 requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the review report is not needed.

.02 Departure From GAAP—Accounting Principle Not Generally Accepted

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As disclosed in Note X to the financial statements, investments in marketable equity securities should be reported at fair value. Management has informed us that the Company has stated these investments at cost, which is not in accordance with generally accepted accounting principles. If generally accepted accounting principles had been followed, the investment in marketable equity securities and stockholders' equity would have been decreased by $70,000.

January 28, 20X7

[*Signature of CPA*]

[Source: Paragraph .52 of AR section 100A]

.03 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

A statement of cash flows for the year ended December 31, 20X6, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operations.

Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

My (our) review was made for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with generally accepted accounting principles. The supplementary data appearing on pages [*Numbers*] are presented only for supplementary analysis purposes. This supplementary information has been subjected to the inquiry and analytical procedures applied in the review of the basic financial statements, and I (we) are not aware of any material modifications that should be made thereto.

.11 Review Report—Supplementary Information Not Subjected to Review Procedures

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] for the year ended December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

My (Our) review was made for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with generally accepted accounting principles. The accompanying information included on pages [*Numbers*] is not a required part of the basic financial statements but is supplementary information presented by the Company. Such information is presented only for analysis purposes and has not been subjected to the inquiry and analytical procedures applied in the review of the basic financial statements. This information was compiled from information that is the representation of management, without audit or review. Accordingly, I (we) do not express an opinion or any other form of assurance on these data.

.12 Review Report—Emphasis of a Going Concern Uncertainty

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As discussed in Note [*Number*], certain conditions indicate that the company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the Company be unable to continue as a going concern.

.13 Comparative Statements—Both Years Reviewed; However, Prior Year by a Different Accountant Who Has Ceased Operations

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

The financial statements for the year ended December 31, 20X5, were reviewed by other accountants whose report, dated March 1, 20X6, stated that they were not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

.14 Comparative Statements—Current Year Reviewed and Prior Year Audited by a Different Accountant Who Has Ceased Operations

Stockholders and Board of Directors

[*Company*]

I (we) have reviewed the accompanying balance sheet of [*Company*] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of [*Company*].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I (we) are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

The financial statements for the year ended December 31, 20X5, were audited by other accountants and they expressed an unqualified opinion on them in their report dated March 1, 20X6, but they have not performed any auditing procedures since that date.

AAM Section 2700

*Special Areas**

Other Comprehensive Bases of Accounting

.01 Paragraph .04 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), defines other comprehensive bases of accounting (OCBOA) as a definite set of criteria, other than generally accepted accounting principles (GAAP), having substantial support underlying the preparation of financial statements prepared pursuant to that basis. Paragraph .04 of section 100A recognizes the following OCBOAs:

- The basis of accounting the reporting entity uses to comply with the requirements or financial reporting provisions of a governmental regulatory agency which has jurisdiction over the entity. An example is a basis of accounting insurance companies use pursuant to the rules of a state insurance commission.
- The basis of accounting the reporting entity uses or expects to use to file its income tax return for the period covered by the financial statements
- The cash basis of accounting and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets). Ordinarily, a modification would have substantial support if the method is equivalent to the accrual basis of accounting for that item and if the method is not illogical. If modifications to the cash basis of accounting do not have substantial support, the accountant should appropriately modify his or her report in accordance with the guidance in paragraphs .51–.53 of AR section 100A. If the modifications are so extensive that the modified "cash basis" statements are, in the accountant's judgment, equivalent to financial statements on the accrual basis, the statements should be considered GAAP basis. The accountant may use the standard form of report, modified as appropriate, because of the departures from generally accepted accounting principles.

Deciding When to Use an OCBOA

.02 OCBOA financial statements are beneficial to clients for many reasons. Among them is the idea that the client and the accountants do not need to consider the measurement requirements of GAAP for OCBOA financial statements and, therefore, OCBOA statements often can be prepared on a more timely and cost efficient basis.

.03 The accountant might consider the following characteristics of entities as good candidates for cash or tax basis financial statements:

- There are no third party users of financial statements (for example, the entity is closely held with no third party debt).
- The entity's debt is secured rather than unsecured.
- The entity's creditors do not require GAAP financial statements.

---

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

- The cost of complying with GAAP would exceed the benefits.
- The owners and managers are closely involved in the day-to-day operations of the business and have a fairly accurate picture of the entity's financial position.
- The business's owners are primarily interested in cash flows.
- The owners are primarily interested in the tax implications of transactions.
- Capital expenditures and long-term financing are not significant.
- Internal Revenue Code rules do not require the entity to prepare its tax return on the accrual basis.

.04 In advising clients about the use of an OCBOA, accountants might consider the following issues:

- Does the entity have inventory? If so, the pure cash basis may not be helpful.
- What basis of accounting does the entity use in preparing its income tax return? If the accrual basis is used, preparing financial statements on the same basis makes sense.
- Is the entity highly leveraged? Lenders may require GAAP financial statements.
- Are there outside investors? GAAP financial statements may provide information required by such users.
- Does the entity's cash flow parallel its income and expenses? The pure cash basis may be appropriate.
- Does the entity anticipate going public? If so, the entity will need a history of GAAP financial statements.
- Was the entity formed for tax purposes? If yes, the owners are probably interested in the tax effects of transactions, and the income tax basis would be appropriate.
- Is the entity subject to bonding requirements? Most bonding companies will only accept GAAP financial statements.

Basic Financial Statements

.05 In an OCBOA presentation, the basic financial statements typically present financial position and results of operations as measured under the OCBOA, descriptions of accounting policies, and notes to the financial statements. However, an exception to this presentation exists for entities that use the pure cash basis of accounting. Under the pure cash basis of accounting, a statement of assets, liabilities, and equity would be needless because the cash balance would be the only item that would appear. Consequently, entities using the pure cash basis of accounting present a single statement titled "Statement of Cash Receipts and Disbursements."

Statement Titles

.06 Titles of OCBOA financial statements differ from titles of similar statements prepared in accordance with GAAP. The following table lists some suggested titles for OCBOA financial statements.

Table 2700-1
Suggested OCBOA Statement Titles

GAAP	*Cash Basis*	*Tax Basis*
Balance Sheet	Statement of Assets, Liabilities, and Equity—Cash Basis	Statement of Assets, Liabilities, and Equity—Income Tax Basis
Statement of Income	Statement of Revenues and Expenses—Cash Basis	Statement of Revenues and Expenses—Income Tax Basis

GAAP	*Cash Basis*	*Tax Basis*
Statement of Income & Retained Earnings	Statement of Revenues, Expenses, and Retained Earnings—Cash Basis	Statement of Revenues, Expenses, and Retained Earnings—Income Tax Basis
Statement of Changes in Equity	Statement of Changes in Equity—Cash Basis	Statement of Changes in Equity—Income Tax Basis
Statement of Cash Flows	Statement of Cash Flows— Cash Basis	Statement of Cash Flows— Income Tax Basis

Notes:

- These titles are only suggestions.
- The pure cash basis has a single asset and no liabilities. Accordingly, only a single statement titled "Statement of Cash Receipts and Disbursements" is normally presented.
- Although Financial Accounting Standards Board (FASB) Statement No. 95, *Statement of Cash Flows,* does not require a statement of cash flows for OCBOA financial statements, if a cash flow statement is presented, it is suggested that the basis of accounting used be added to the statement title.

Disclosures

.07 Authoritative accounting literature does not address OCBOA or the disclosures necessary in such presentations. As a best practice, cash, modified cash, and income tax basis financial statements ordinarily should be informative of matters that may affect their use, understanding, and interpretation. For example:

- The financial statements could include a brief summary of significant accounting policies that discusses the basis of presentation and describes how the basis differs from GAAP.
- When financial statements contain items the same as, or similar to, those in GAAP financial statements, similar disclosures may be appropriate (for example, depreciation or long-term debt).
- The accountant may also consider disclosing matters not specifically identified on the face of the statements, such as related party transactions, restrictions on assets and owners' equity, subsequent events, and uncertainties.
- If GAAP sets forth requirements that apply to the presentation of financial statements, cash, modified cash, and income tax basis statements ordinarily should either comply with those requirements or provide information that communicates the substance of those requirements.

.08 Nevertheless, diversity in practice has developed over the years. Accountants at one extreme believe disclosures should be included in cash, modified cash, and income tax basis financial statements that are identical to those that would be included in a GAAP presentation. Accountants at the other extreme would recommend including very little disclosure in OCBOA statements.

Cash Basis of Accounting

Pure Cash Basis

.09 Under the cash receipts and disbursements basis of accounting (pure cash basis), only transactions that increase or decrease cash and cash equivalents are reflected in the financial statement. The pure cash basis recognizes all cash disbursements as expenses and all cash receipts as revenues. In practice, the pure cash basis of accounting is rare.

.10 Entities that use the pure cash basis of accounting would include, for example, school activity funds, civic ventures, trusts and estates, political action committees and political campaigns. Typically, those types of entities have the following characteristics:

- They are not-for-profit oriented.
- Their operations are simple.
- Their accounting and finance functions are unsophisticated.
- There is only one major activity.
- Capital expenditures and long-term debt are not significant.

Modified Cash Basis

.11 The modified cash basis of accounting is described as the pure cash basis incorporating modifications having substantial support. These modifications generally include the recognition of certain transactions having substantial support, such as recording depreciation on fixed assets or accruing income taxes, as entities would recognize them under GAAP. The appropriate modifications and the extent of those modifications are not clearly defined in the literature, however.

.12 Generally, entities that use the modified cash basis of accounting, such as professional association of doctors, lawyers, or CPAs, might include the following characteristics:

- They are profit oriented.
- They distribute profits as collected (for example, through bonuses and retirement plan contributions).
- They have significant inventory and credit arrangements with vendors.
- They make material capital expenditures or incur material amounts of debt.
- Their operations are somewhat sophisticated, and accounting, for them, may become complex.

Income Tax Basis of Accounting

.13 The income tax basis of accounting typically is based on federal income tax laws that generally do not address financial statement presentation or disclosure considerations, however.

.14 Typically, entities that use the tax basis of accounting are one of the following:

- Profit oriented enterprises (such as small, closely held companies for which conversion to GAAP would be costly)
- Partnerships whose partnership agreements require the use of the tax basis of accounting
- Not-for-profit organizations seeking relief from the requirements of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made,* and No. 117, *Financial Statements of Not-for-Profit Organizations.*

Nontaxed Entities

.15 The income tax basis of accounting is defined as the basis an entity uses or expects to use to file its income tax return. There is not any additional guidance on what is meant by the phrase *income tax return*. If taken literally, nontaxed-entities would not be able to use the income tax basis. However, many practitioners believe that not-for-profit organizations using the accounting principles followed in filing Form 990 may issue income tax basis financial statements.

Other Bases of Accounting

.16 Although less common, entities may present their financial statements on a basis of accounting other than cash, tax, or GAAP. For example, insurance companies present financial statements on a regulatory basis. In addition, entities generally may use other comprehensive bases if they have substantial support and are applied consistently to all items in the financial statements. At the present time, however, only the price level basis of accounting meets that criteria, and its use is very rare.

Disclosure of Basis of Accounting

.17 AR section 100A states that when the accountant reports on compiled financial statements that omit substantially all disclosures, he or she should disclose the basis of accounting in the compilation report if it is not disclosed in the financial statements.

Other Disclosures

.18 Financial statements prepared on an OCBOA require notes and other disclosures. If the statements are compiled, management may elect to omit substantially all disclosures. However, this option is not available if the statements are reviewed.

Reporting

.19 In general, the only report modification necessary when financial statements are prepared using a comprehensive basis of accounting other than GAAP is the identification of the financial statements. Because financial statements prepared using an OCBOA contain modified titles (for example, "Statement of Assets, Liabilities, and Equity—Income Tax Basis" instead of "Balance Sheet"), the compilation or review report should refer to the modified titles actually used on the statements (for example, "We have compiled the accompanying statement of assets, liabilities, and equity—income tax basis…"). However, when the accountant compiles OCBOA financial statements that omit substantially all disclosures, paragraph .18 of AR section 100A states that the basis of accounting should be disclosed. This disclosure may be in an attached footnote or in a note on the face of the financial statements. If disclosure is not made as part of the financial statements, the basis should be disclosed in the accountant's report.

.20 When financial statements that the accountant has compiled omit substantially all disclosures with no reference to basis, but are otherwise in conformity with an OCBOA, the following form of standard report is appropriate. For illustrative purposes, the example is of a compilation of income tax basis financial statements.

> Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Prescribed Forms

Background

.21 One of the major complications of prescribed form engagements has been the requirement in AR section 100A that the accountant's report disclose all material measurement departures from GAAP. In 1981, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 3, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2, AR sec. 300A), which amends AR section 100A and AR section 200A, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2) to provide for an alternative form of standard compilation report when the prescribed form or related instructions call for departures from GAAP.

Provisions of AR Section 300A

.22 Any standard, preprinted form designed or adopted by the body to which it is to be submitted is a prescribed form. Examples include forms used by industry trade associations, credit agencies, banks, and governmental and regulatory bodies other than those concerned with the sale or trading of securities.

.23 According to paragraph .03 of AR section 300A, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2), the following alternative form of compilation report is appropriate when the financial statements are included in a prescribed form that calls for a departure from GAAP:

> I (We) have compiled the (identification of financial statements, including period covered and name of entity) included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
>
> My (Our) compilation was limited to presenting in the form prescribed by (name of body) information that is the representation of management (the owners). I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.
>
> These financial statements (including related disclosures) are presented in accordance with the requirements of (name of body), which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.24 Note that the first two paragraphs are similar to the standard compilation report of AR section 100A. The main differences are the references to the following:

- The prescribed form
- The body that prescribed the form
- The third paragraph, which indicates that the basis of accounting and disclosures required by the form are different from GAAP and cautions the reader about the limits of the financial statements.

Departures From GAAP or From the Prescribed Form

.25 The accountant is concerned with the following three types of departures in an engagement to compile financial statements to be included in a prescribed form:

- Departures from GAAP required by the prescribed form. This type of departure does not require disclosure in the AR section 300A report.
- Departures from GAAP not required by the prescribed form. Such departures should be disclosed following the guidance in AR section 100A.
- Departures from the requirements of the prescribed form. These departures also should be disclosed following the guidance in AR section 100A.

.26 For the items in the second and third bullets in the preceding paragraph, the accountant should modify the compilation report to identify, in a separate paragraph, the departures, including the effects, if known. If not known, the accountant should include a statement that the effects have not been determined.

Signing a Preprinted Report Form

.27 Paragraph .05 of AR section 300A states that the accountant should not sign a preprinted report form unless the language in it conforms to the guidance in AR section 300A or AR section 100A. If the preprinted report is not suitable, the accountant should attach an appropriate report to the prescribed form. It is advisable to type, "See Accountant's Report" in the prescribed form signature block.

Determining When AR Section 300A Is Applicable

.28 Questions involving the applicability of AR section 300A might pertain to the definition of a prescribed form, the type of service involved or clarification of how a form calls for a departure from GAAP. These issues are discussed in the following questions.

.29 Does AR section 300A establish different standards for compiling a prescribed form? No. The reporting standards of AR section 100A require issuing a report whenever the accountant compiles or reviews financial statements included in a prescribed form. AR section 300A merely provides an alternative form of standard compilation report. It does not expand the accountant's reporting responsibility, nor does it change the performance standards of AR section 100A.

.30 Is AR section 300A applicable to review engagements? No. AR section 300A makes no provision for an alternative review report. A review report should conform to the standards of AR section 100A or AR section 200A. The report should describe any departures from GAAP (even if the departures are called for by the form). The review report should also describe each GAAP disclosure that is omitted.

.31 Is a tax return a prescribed form? No. AR section 300A refers to financial statements, and thus excludes financial presentations included in tax returns. Interpretation No. 10, "Reporting on Tax Returns" of AR section 100A (AICPA, *Professional Standards*, vol. 2, AR sec. 9100 par. .31–.32) points out that an accountant may attach a report to tax or information returns. This report should follow the guidance in AR section 100A because the tax return will be submitted to a user that did not design the form.

.32 Does a comprehensive set of instructions constitute a prescribed form? No. The definition of a prescribed form in AR section 300A specifically includes the words *standard preprinted form*.

.33 Is AR section 300A applicable to a prescribed form that does not call for departures from GAAP? No. If the form does not call for departures from GAAP, the AR section 300A alternative report is not appropriate.

.34 How does a prescribed form call for departures from GAAP? AR section 300A indicates that a form calls for a departure from GAAP by either:

- specifying a measurement principle not in conformity with GAAP; or
- sailing to request disclosures required by GAAP.

.35 Can an AR section 100A report be issued even if AR section 300A applies? Yes. The accountant should, however, comply with AR section 100A regarding departures from GAAP.

.36 Is the AR section 300A report appropriate when a prescribed form is presented to other third parties? No. The AR section 300A alternative report presumes that the information required by a prescribed form is sufficient to meet the needs of the body that designed or adopted the form.

.37 What does a CPA do when financial statements presented on an OCBOA are included in the prescribed form and uses, for example, the terms *Balance Sheet* or *Income Statement*? In practice, the titles usually are not changed, and the report on the statements use the preprinted titles.

.38 What if the CPA is not independent? An accountant who is not independent can issue an AR section 300A report on financial statements included in a prescribed form. He or she should, however, comply with AR section 100A and include the following as the last paragraph of the report:

I am (We are) not independent with respect to XYZ Company.

.39 Does the CPA have to mark each page of the prescribed form with "See Accountant's Report"? Yes. AR section 300A does not change that requirement.

Personal Financial Statements

.40 The term *personal financial statements* refers to financial statements that present the personal assets and liabilities of an individual or group of related individuals.

.41 AICPA Statement of Position (SOP) 82-1, *Accounting and Financial Reporting for Personal Financial Statements* (AICPA, *Technical Practice Aids*, ACC sec. 10,350), is the principle source of guidance in dealing with personal financial statements. This SOP establishes the current value basis of accounting as GAAP for personal financial statements. The AICPA's *Personal Financial Statement Guide* contains guidance on the scope of work and form of report for audits, reviews, and compilations of personal financial statements.

Personal Financial Statements Engagements

.42 Using the estimated current value basis of accounting in personal financial statements creates some unique considerations for accountants engaged to compile or review such statements.

Acceptance of Clients

.43 Before accepting the engagement, the accountant typically considers his independence, the client's integrity, and circumstances that present unusual business risks.

.44 Personal financial statement engagements usually require a greater degree of client participation than do other engagements. In many cases, client interviews and telephone inquiries are an integral part of the process. Therefore, it is especially important to consider a potential client's ability and willingness to provide sufficient data and reliable estimates of current value.

Engagement Letters

.45 Both AR section 100A and the *Personal Financial Statements Guide* recommend, but do not require, written engagement letters. Engagement letters are especially important in personal financial statement engagements to

- dispel any notion that the accountant is responsible for estimates of current value.
- link the client's cooperation to the fee because the cooperation of the client is vital to developing adequate accounting information.

Client Representation Letters

.46 Although AR section 100A only requires that a representation letter be obtained from the client in engagements to review personal financial statements, the *Personal Financial Statements Guide* recommends obtaining written representations on all personal financial statement engagements because of the following:

- The informal nature of personal financial records usually requires that accountants place greater reliance on the client's representation to ensure completeness of the statements.
- The estimated current values and amounts of assets and liabilities provided by the client have a significant effect on the statements.
- A client representation letter can help to clarify that responsibility for the estimates of current value, even if developed by the accountant, rests with the client.

Compilation of Personal Financial Statements

.47 Standards for compilation of financial statements prescribed by AR section 100A are applicable to the compilation of personal financial statements in the same manner as to the compilation of other financial statements. There is an exception for personal financial statements contained in written financial plans, if certain criteria are met (see the subsequent section in this manual, "Exception for Personal Financial

Statements Included in Written Financial Plans"). Thus, in compiling personal financial statements, the accountant must meet the same general requirements.

.48 First, the accountant should have knowledge of the accounting principles and practices applicable to personal financial statements. For instance, the accountant should understand the provisions of SOP 82-1.

.49 Second, the accountant ordinarily should posses a general understanding of the following:

- The nature of the individual's transactions
- The form of available accounting records
- The stated qualifications of accounting personnel, if any
- The basis of accounting on which the financial statements are to be presented
- The form and content of the financial statements
- The methods used for determining estimated current values of significant assets and estimated current amounts of significant liabilities, and be able to consider whether the methods are appropriate in light of the nature of each asset or liability

.50 Third, the accountant should read the financial statements and consider whether they appear to be appropriate in form and free of obvious material errors.

.51 The standards prescribed by SSARS do not require an accountant to verify the reasonableness of information supplied to him or her in a compilation engagement. Accordingly, he or she can compile personal financial statements based on the client's estimate of current values and amounts.

.52 However, the *Personal Financial Statements Guide* warns that other factors may prevent the acceptance of the client's estimate. The guide states that, at a minimum, the accountant should obtain an understanding of the methods by which the individual determined the estimated current values and amounts and consider whether the methods are appropriate for the asset or liability.

.53 With the exception of compiled personal financial statements that omit substantially all disclosures, the financial statements, including the notes, ordinarily should disclose the method used to determine the estimated current values and amounts, even when such values or amounts are based on the individual's estimate.

.54 In many situations, particularly when the individual is unsophisticated in financial matters, the individual and the accountant will jointly develop the estimated current values and amounts. In such situations, the accountant ordinarily should obtain the individual's approval and acceptance of responsibility for the values, preferably in writing.

Review of Personal Financial Statements

.55 Standards for the review of financial statements prescribed by AR section 100A are applicable to the review of personal financial statements in the same manner as the review of other financial statements. Accordingly, to review personal financial statements, the accountant should meet the following general requirements.

.56 The accountant should possess (*a*) a level of knowledge of the accounting principles and practices applicable to personal financial statements and (*b*) an understanding of the individual's financial activities and financial position that will provide him, through the performance of inquiry and analytical procedures, with a reasonable basis for expressing limited assurance that no material modifications are necessary to the financial statements for them to conform to GAAP. Knowledge of accounting principles and practices implies that the accountant should be thoroughly familiar with the requirements of SOP 82-1.

.57 AR section 100A requires accountants to obtain a representation letter in all review engagements.

Reporting

.58 In general, the only report modifications necessary when presenting personal financial statements are the identification of the financial statements and identification of the reporting entity. For example:

> I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20XX, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.
>
> A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

.59 However, when the accountant compiles personal financial statements that omit substantially all disclosures, the *Personal Financial Statements Guide* requires that he or she disclose that assets are presented at their estimated current values, and liabilities are presented at their estimated current amount. This disclosure may be in an attached footnote or in a note on the face of the financial statements. If disclosure is not made as part of the financial statements, modification of the compilation report would be required. For example, the following sentence could be added to the first paragraph of the standard compilation report:

> The financial statement(s) is (are) intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

.60 In addition, if substantially all disclosures have been omitted, the accountant should communicate this fact in the compilation report, by adding the following paragraph:

> The individuals whose financial statements are presented have elected to omit substantially all disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the individuals' assets, liabilities, and net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Exception for Personal Financial Statements Included in Written Financial Plans

.61 Paragraph .03 of AR section 600, *Reporting on Personal Financial Statements Included in Written Personal Financial Plans* (AICPA, *Professional Standards*, vol. 2), provides an exemption from AR section 100A for personal financial statements included in written personal financial plans when the following conditions exist:

- The accountant establishes an understanding with the client, preferably in writing, that the financial statements (1) will be used solely to assist the client and the client's advisers to develop the client's personal financial goals and objectives and (2) will not be used to obtain credit or for any purpose other than developing the financial plan.
- Nothing comes to the accountant's attention during the engagement that would cause him to believe that the financial statements will be used to obtain credit or for any purpose other than developing the client's financial goals and objectives.

.62 If both conditions exist, the accountant is exempt from both the performance and reporting standards in AR section 100A. Absent both of these conditions, AR section 100A would apply.

.63 As long as those same conditions are met, Interpretation No. 1, "Submitting a Personal Financial Plan to a Client's Advisers" of AR section 600 (AICPA, *Professional Standards*, vol. 2, AR sec. 9600 par. .01) clarifies that the same exception applies when an accountant submits a written personal financial plan containing the financial statements for use by a client's advisers to help the client implement the personal financial plan. Implementing the plan includes, for example, use of the plan by an insurance broker who will recommend specific insurance products to the client, an investment adviser who will provide specific recommendations about the investment portfolio, and an attorney who will draft a will or trust document.

The Accountant's Report

.64 AR section 600 prescribes the following language when the conditions of the AR section 100A exemption are met:

> The accompanying statement of financial condition of John Doe, as of December 31, 20XX, was prepared solely to help you develop your personal financial plan. Accordingly, it may be incomplete or contain departures from generally accepted accounting principles and should not be used to obtain credit or for any other purposes other than developing your personal financial plan. We have not audited, reviewed, or compiled the statement.

.65 AR section 600 does not require the accountant to identify specific measurement or disclosure departures in the report. As with any SSARS engagement, the accountant is required to place a notation such as "See Accountant's Report" on each financial statement page.

Specified Elements, Accounts, or Items of a Financial Statement

.66 A compilation of one or more specified elements, accounts, or items of a financial statement is limited to presenting financial information that is the representation of management (owners) without undertaking to express any assurance on that information. (The accountant might consider it necessary to perform other accounting services to compile the financial information.)

.67 Examples of specified elements, accounts, or items of a financial statement that an accountant may compile include schedules of rentals, royalties, profit participation, or provision for income taxes.

.68 In accordance with paragraph .04 of AR section 110, *Compilation of Specified Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*, vol. 2), if an accountant prepares or assists a client in preparing a schedule of one or more specified elements, accounts, or items of a financial statement, the accountant should consider how such a presentation of specified elements, accounts, or items will be used. If the specified element, account, or item of a financial statement is included as accompanying information to the basic financial statements, the accountant must consider the guidance in paragraph .70 of AR section 100A. The accountant should also consider the potential of being associated with the schedule and the likelihood that the user may inappropriately infer, through that association, an unintended level of assurance. If the accountant believes that he or she will be associated with the information, the accountant should consider issuing a compilation report so a user will not infer a level of assurance that does not exist.

.69 An engagement to compile one or more specified elements, accounts, or items of a financial statement may be undertaken as a separate engagement or in conjunction with a compilation of financial statements.

.70 Before issuance of a compilation report on one or more specified elements, accounts, or items of a financial statement, the accountant should read such compiled specified elements, accounts, or items of a financial statement and consider whether the information appears to be appropriate in form and free of obvious material errors. In this context, the term *error* refers to mistakes in the compilation of the specified elements, accounts, or items of a financial statement, including arithmetical or clerical mistakes, and mistakes in the application of accounting principles, including disclosures, if presented.

.71 When the accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement, the basic elements of the report, in addition to the basic elements described in paragraph .05 of AAM section 2600, *Reporting*, are as follows:

a. A statement that the specified element(s), account(s), or item(s) identified in the report were compiled. If the compilation was performed in conjunction with a compilation of the company's financial statements, the paragraph should so state and indicate the date of the accountant's compilation report on those financial statements. Furthermore, any departure from the standard report on those statements should also be disclosed if considered relevant to the presentation of the specified element(s), account(s), or item(s).

b. A description of the basis on which the specified element(s), account(s), or item(s) are presented if that basis is not generally accepted accounting principles and a statement that that basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles.

.72 Each page of the compiled specified elements, accounts, or items of a financial statement should include a reference, such as "See Accountant's Compilation Report."

.73 Following are illustrations of accountant's compilation reports on specified elements, accounts, or items of a financial statement.

Report Related to Accounts Receivable

I (we) have compiled the accompanying schedule of accounts receivable of XYZ Company as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying schedule of accounts receivable and, accordingly, do not express an opinion or any other form of assurance on it.

Report Related to the Schedule of Depreciation— Income Tax Basis

I (we) have compiled the accompanying schedule of depreciation—income tax basis of XYZ Company as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The schedule of depreciation—income tax basis has been prepared on the accounting basis used by the company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying schedule of depreciation—income tax basis and, accordingly, do not express an opinion or any other form of assurance on it.

Relationship of Statements on Standards for Accounting and Review Services to Quality Control Standards

.74 Paragraphs .80–.82 of AR section 100A states that an accountant is responsible for compliance with SSARS in a review or compilation engagement. Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202 par. .01) of the Code of Professional Conduct of the AICPA requires members to comply with such standards when associated with reviewed or compiled financial statements.

.75 An accountant has the responsibility to adopt a system of quality control in conducting an accounting practice. Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with SSARS in its review and compilation engagements. The nature and extent of a firm's quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations.

.76 SSARSs relate to the conduct on individual review and compilation engagements; Statements on Quality Control Standards (SQCSs) relate to the conduct of a firm's accounting practice. Thus, SSARSs and SQCSs are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of an individual engagement and the firm's accounting practice as a whole. However, deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular review or compilation engagement was not performed in accordance with SSARSs.

AAM Section 2710

*Accountants' Reports on Prescribed Forms, Specified Elements, Personal Financial Statements, and OCBOA Financial Statements**

.01 Compilation Report—Cash Basis Statements; Full Disclosure

Stockholders and Board of Directors
[*Company*]

We have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [*Company*] as of December 31, 20X6, and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

[Source: Derived from paragraph .14 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2)]

* In February 2008, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), which amends some of the guidance for compilation and review engagements. SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. This manual will be updated for SSARS No. 17 in the next edition.

Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of *Professional Standards* until the effective date of SSARS No. 17. This manual references the "A" sections as appropriate because SSARS No. 17 has not been incorporated in this edition.

.02 Compilation Report—Cash Basis Statements; Omission of Substantially All Disclosures, With No Reference to Basis

Stockholders and Board of Directors
[*Company*]
[*Address*]

We have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [*Company*] as of December 31, 20X6, and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The financial statements have been prepared on the modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the modified cash basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Company's assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.09 Compilation Report—Personal Financial Statements; GAAP Basis

[*Name*]
[*Address*]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X6, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[*Signature of CPA*]

[Source: Derived from paragraph .14 of AR section 100A]

.10 Compilation Report—Personal Financial Statements; GAAP Basis With GAAP Departure for Omission of Provision for Income Taxes

[*Name*]
[*Address*]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying statement of financial condition and, accordingly, do not express an opinion or any other form of assurance on it. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the statement of financial condition, generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and estimated current amounts of liabilities and their tax bases. The accompanying statement of financial condition does not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

AAM Section 3000 Engagement Planning and Administration

Sections 3160 and 3165 include illustrative audit assignment control forms and engagement letters that can be used by an accountant in the planning phase of an audit engagement.

Various formats of audit assignment controls and engagement letters are in use; nevertheless, inclusion of the formats in this section in no way means that they are preferable. Refer directly to authoritative pronouncements when appropriate.

Illustrative formats of audit assignment controls and engagement letters are often helpful in developing a consistent style within a firm. However, no set of illustrative formats can cover all the situations that are likely to be encountered in practice because the circumstances of engagements vary widely.

Readers should consider other sources of illustrative presentations, such as those in authoritative pronouncements and AICPA Audit and Accounting Guides.

References to Professional Standards. When referring to the professional standards, this manual cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*. All references to AU sections may be found in AICPA *Professional Standards*, volume 1.

TABLE OF CONTENTS

[*The next page is 3101.*]

AAM Section 3100

Planning the Engagement

General

.01 The planning phase is an important part of every engagement. During this phase, the partner and the staff obtain an understanding of the entity and its environment, including its internal control, then develop an overall strategy for the expected conduct and scope of the engagement.

.02 The need for planning is highlighted in Rule 201, *General Standards* (AICPA, *Professional Standards*, vol. 1, ET sec. 201 par. .01), AICPA Code of Professional Conduct, which states: "A member shall adequately plan and supervise an engagement."

.03 The first standard of fieldwork of generally accepted auditing standards (GAAS) states: "The auditor must adequately plan the work and must properly supervise any assistants." AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance to the independent auditor conducting an audit in accordance with GAAS on the considerations and activities applicable to planning and supervision.

.04 Proper planning also enhances the productivity of engagement personnel and may result in a more profitable engagement.

.05 The nature, timing, and extent of planning vary with the size and complexity of the entity and with the auditor's experience with the entity and understanding of the entity and its environment, including its internal control. The auditor must plan the audit so that it is responsive to the assessment of the risk of material misstatement based on the auditor's understanding of the entity and its environment, including its internal control (see AAM sections 3120 and 3125).

Audit Planning

.06 Planning is not a discrete phase of the audit, but rather an iterative process that begins with engagement acceptance and continues throughout the audit as the auditor performs audit procedures and accumulates sufficient appropriate audit evidence to support the audit opinion. As a result of performing planned audit procedures,[1] the auditor may obtain disconfirming evidence that might cause the auditor to revise the overall audit strategy.

Appointment of the Independent Auditor

.07 Early appointment of the independent auditor has many advantages to both the auditor and the client. Early appointment enables the auditor to plan the audit prior to the balance-sheet date. Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the fiscal year. In such instances, before accepting the engagement, the auditor should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they will not, the auditor should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion.

---

[1] Paragraph .03 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), provides guidance with respect to the procedures the auditor performs in obtaining an understanding of the entity and its environment to establish a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing the risks of material misstatement of the financial statements.

Establishing an Understanding With the Client and Preparing an Engagement Letter

.08 The auditor should establish an understanding with the client regarding the services to be performed for each engagement. The understanding should include the objectives of the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. The understanding could also include matters such as the timing of field work, report deadlines, and methods of fee determination and payment.

.09 AU section 311 states that the auditor should document the understanding through a written communication with the client in the form of an engagement letter. An engagement letter helps to prevent misunderstandings between the client and the auditor regarding the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client and, in most states, it becomes a legally binding contract on both parties. There are other good reasons to obtain an engagement letter, including the following:

- *Reduce the risk of litigation and avoid misunderstandings with the client*. In today's litigious environment an engagement letter is needed for both old and new clients. To avoid misunderstandings, the engagement letter generally describes in detail the services to be rendered, the fee, and other terms and conditions of the engagement. Oral agreements may result in differences of recollection or understanding between the accountant and the client.
- *Avoid misunderstandings by the staff*. It is necessary for the members of the staff working on the engagement to have a complete understanding of what is required of them. A copy of the engagement letter in the working papers provides them with an authoritative reference to supplement their oral instructions.

.10 Often, entities that have never been audited resist signing a client representation letter. To avoid client resistance at the end of the audit, many firms notify the client in the engagement letter that they will be asked to sign a client representation letter.

.11 If the auditor has reason to believe the client may publish all or a portion of an audit report, he may advise the client (preferably in the engagement letter) that firm policy is to read printer's proofs of the report and any other accompanying material. This precaution will protect both the client and accountant against condensation of financial statements, omission of footnotes, erroneous layout, and other errors such as misstatement of figures used in a president's letter, other narrative, or statistics.

.12 Generally, the auditor establishes the understanding with the client and prepares the engagement letter before any significant work takes place on the engagement. The partner may personally present the letter to the client to ensure that a complete understanding has been achieved. The understanding or a signed copy of the engagement letter may be filed with the engagement's current working papers and permanent file.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. It is a best practice to always make sure that a final engagement letter is issued in such circumstances.

.13 If the nature of an engagement changes during its progress, or if the firm is engaged for additional services during the year, a new engagement letter is generally prepared. A step-down to a compilation or review engagement, or a special engagement for preparing a forecast, are examples of changes that could necessitate a new engagement letter. Such changes are ordinarily made by the engagement partner after careful consideration of the reasons justifying the change. For example, the reasons justifying a step-down from an audit to a compilation or review may prevent the firm from reporting on the lower level of service.

Special Considerations

.14 The following matters may be considered while preparing an engagement letter:

- Whether the circumstances preclude an unqualified opinion, as in these examples:
  - — The auditor is retained after the beginning of the client's fiscal year, did not observe inventories or confirm receivables at the beginning of the year and was unable to gain satisfaction through application of alternative procedures.
  - — The client imposes restrictions on the scope of the audit. (AU section 508, *Reports on Audited Financial Statements* [AICPA, *Professional Standards*, vol. 1]).
  - — Significant litigation or other matters exist which may affect the opinion.
- Whether fee should be stated as a range, in hourly rates, as standard per diem charges for the engagement, or as a maximum or flat fee
- The person or persons to whom reports should be addressed
- The number of copies needed of the report and the people to whom they are to be distributed
- Deadlines for reports or analyses
- Out-of-pocket costs
- Additional work not contemplated in the original engagement
- The condition of records or circumstances other than those contemplated in the engagement letter (for example, deficient internal controls)
- A retainer
- One time engagements
- Start up costs when the client changes accountants
- Underwriters' requirements in connection with public offerings
- The part of the work to be done by other accountants

Contents of Engagement Letters

.15 An understanding with the client and an engagement letter regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements and the selection and application of the accounting policies.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for designing and implementing programs and controls to prevent and detect fraud.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.
- Management is responsible for making all financial records and related information available to the auditor.

- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
- The auditor is responsible for conducting the audit in accordance with GAAS. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.
- An audit includes obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies. However, the auditor is responsible for ensuring that those charged with governance are aware of any significant deficiencies that come to his or her attention.
- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

.16 The engagement letter is generally addressed to those charged with governance, the chief executive, or whoever retained the firm. The engagement partner may sign the letter on behalf of the firm. The client representative responsible for the engagement signs the letter denoting agreement with the contract. The original letter may be maintained in the engagement documentation. A copy of the letter is given to the client.

.17 An understanding with the client and an engagement letter may include other matters, such as the following:

- The overall audit strategy.
- Involvement of specialists or internal auditors, if applicable.
- Involvement of a predecessor auditor.
- Fees and billing. Estimates of fees are usually based on conservative, carefully prepared estimates. It may be useful to describe the expected billing methods and payment periods.
- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators, such as the Securities and Exchange Commission, may restrict or prohibit such liability limitation arrangements).
- Conditions under which access to the auditor's documentation may be granted to others.
- Additional services to be provided relating to regulatory requirements.
- Other services to be provided in connection with the engagement, for example, nonattest services, such as accounting assistance and preparation of tax returns subject to the limitations of Ethics Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05).

.18 The following is a list of analyses, schedules and other items that are often requested from the client prior to the start of an audit engagement. The client assistance schedule is usually tailored to each specific engagement.

- The general ledger.

- A reconciliation for each bank account.
- A trade accounts receivable aging.
- Accounts receivable confirmation letters, using drafts to be provided by the accountant.
- A schedule of accounts receivable from officers and employees.
- A schedule of bad debts written off during the year.
- A schedule of notes receivable. The notes should be available for inspection.
- A schedule of transactions with affiliated enterprises.
- An inventory listing.
- An analysis of transactions affecting marketable securities.
- An insurance schedule. The policies should be available for inspection.
- A schedule of property and equipment additions and retirements.
- A depreciation schedule.
- A schedule of life insurance for officers.
- A schedule of accounts payable. The creditor's regular monthly statements for [*date*] should be retained and made available.
- A schedule of notes payable.
- The corporate stock book and minutes should be up to date and available for inspection.
- A schedule of all transactions to partners' capital and drawing accounts.
- A copy of the partnership agreement or corporate charter should be available for inspection.
- Copies of all leases, including equipment rental contracts, should be available for inspection.
- Copies of employment contracts with salesmen or executives should be available for inspection.
- Copies of pension, profit sharing, deferred compensation, stock option agreements, and letters of acceptance from the Treasury Department, should be available for inspection.
- A schedule of repairs in excess of $________.
- A schedule of each officer's salary and expense account payments.
- A schedule of contributions.
- A schedule of tax expense.
- A schedule of professional fees.

.19 Following is a list of common engagement letter deficiencies:

- Reference in the letter to audit of the books and records rather than to audit of financial statements
- Adverse comments about other firms
- Failure to specify *in detail* the services to be rendered when a maximum fee is quoted
- Inclusion of a review of internal control as one of the services when what is really intended is an understanding of internal control as required by auditing standards
- Failure to identify accounting or other problems that may have an effect on the opinion
- Failure to change, in writing, the terms of the engagement when conditions are found to be different (such as the inability to express an opinion without extensive additional auditing because internal control was found deficient)

- Failure to include fee basis and payment terms
- Failure to identify subsidiaries
- Failure to identify specific tax returns to be prepared

Investigatory Procedures for Individuals

.20 When credit information is requested about individuals who are new clients, the investigative procedures are subject to the Fair Credit Reporting Act.

.21 Under the Fair Credit Reporting Act, an individual is informed in writing that an investigative consumer report, including information about the individual's character, general reputation, personal characteristics, and mode of living is being made. The individual is also advised, within three days of the time the report is requested, that he or she may, within a reasonable time, by written request, be furnished disclosure of the nature and scope of the investigation.

Sample Engagement Letters

.22 See AAM section 3165 for sample engagement letters.

Preliminary Engagement Activities

.23 In addition to the procedures mentioned previously, at the beginning of the audit engagement the auditor should (1) perform procedures regarding the continuance of the client relationship and the specific audit engagement and (2) evaluate the auditor's compliance with ethical requirements, including independence. The purpose of performing these preliminary engagement activities is to consider any events or circumstances that may either adversely affect the auditor's ability to plan and perform the audit engagement to reduce audit risk to an acceptably low level or may pose an unacceptable level of risk to the auditor.

The Overall Audit Strategy

.24 In establishing the overall audit strategy, the auditor should (1) determine the characteristics of the engagement that define its scope, such as the basis of reporting, industry specific reporting requirements, and the locations of the entity; (2) ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required, such as deadlines for interim and final reporting, and key dates for expected communications with management and those charged with governance; and (3) consider the important factors that will determine the focus of the audit team's efforts, such as determination of appropriate materiality levels, preliminary identification of areas where there may be higher risks of material misstatement, preliminary identification of material locations and account balances, evaluation of whether the auditor may plan to obtain evidence regarding the operating effectiveness of internal control, and identification of recent significant entity specific, industry, financial reporting, or other relevant developments. The appendix to AU section 311 provides examples of matters the auditor may consider in establishing the overall audit strategy.

The Audit Plan

.25 The auditor must develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level. The audit plan is more detailed than the audit strategy and includes the nature, timing, and extent of audit procedures to be performed by audit team members in order to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level. Documentation of the audit plan also serves as a record of the proper planning and performance of the audit procedures that can be reviewed and approved prior to the performance of further audit procedures. The audit plan should include the following:

- A description of the nature, timing, and extent of planned risk assessment procedures sufficient to assess the risks of material misstatement, as determined under AU section 314, *Understanding the*

Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, *Professional Standards*, vol. 1).

- A description of the nature, timing, and extent of planned further audit procedures at the relevant assertion level for each material class of transactions, account balance, and disclosure, as determined under AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1). The plan for further audit procedures reflects the auditor's decision whether to test the operating effectiveness of controls and the nature, timing, and extent of planned substantive procedures.
- A description of other audit procedures to be carried out for the engagement in order to comply with GAAS (for example, seeking direct communication with the entity's lawyers).

Determining the Extent of Involvement of Professionals Possessing Specialized Skills

.26 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should determine whether that professional will effectively function as a member of the audit team. If such a professional is part of the audit team, the auditor's responsibilities for supervising that professional are equivalent to those for other assistants. In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified audit procedures will meet the auditor's objectives; and to evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures.

Communications With Those Charged With Governance and Management

.27 Paragraph .23 of AU section 380, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1), explains that, among other matters, the auditor should communicate with those charged with governance an overview of the planned scope and timing of the audit.

Additional Considerations in Initial Audit Engagements

.28 Before starting an initial audit, the auditor should perform procedures regarding the acceptance of the client relationship and the specific audit engagement (see Statement on Quality Control Standards No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, as amended [AICPA, *Professional Standards*, vol. 2, QC sec. 20]) and communicate with the previous auditor, where there has been a change of auditors (see AU section 315, *Communication Between Predecessor and Successor Auditors* [AICPA, *Professional Standards*, vol. 1]). The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not have the previous experience with the entity that is considered when planning recurring engagements. See paragraph .27 of AU section 311 for additional matters the auditor should consider in developing the overall audit strategy and audit plan for an initial audit.

[*The next page is 3121.*]

AAM Section 3105

Understanding the Assignment

.01 The auditor may (*a*) meet with the client to understand the type, scope, and timing of the engagement; (*b*) understand if reports on compliance, internal control, or segments of the entity are required; (*c*) understand the client's expectations, both stated and implied; and (*d*) review the expectations of both the owners and managers.

.02 To obtain an adequate understanding of any assignment, the auditor should be familiar with generally accepted accounting principles (GAAP), which includes specialized AICPA industry guides as well as Emerging Issues Task Force (EITF) consensuses. The auditor should also be familiar with generally accepted auditing standards (GAAS), which are promulgated by the AICPA and must be followed.

.03 AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1),[*] sets forth the GAAP hierarchy.

.04 AU section 411

a. presents three separate but parallel hierarchies—one for state and local governments, another for nongovernmental entities, and another for federal governmental entities.

b. establishes a true GAAP hierarchy—each successive category in the hierarchy is a different level of authority.

.05 The following table in paragraph .06 summarizes the pronouncements that are included in each of the five categories of GAAP for nongovernmental entities, state and local governments, and federal governmental entities. This manual does not take into account federal governmental entities.

---

[*] In April 2005, the Financial Accounting Standards Board (FASB) issued an exposure draft of a proposed FASB statement, *The Hierarchy of Generally Accepted Accounting Principles*, objectives of which include moving responsibility for the generally accepted accounting principles (GAAP) hierarchy for nongovernmental entities from the AICPA AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1), to FASB literature. The FASB then issued a revised exposure draft during the third quarter of 2006. The proposed FASB statement expands the sources of category *a* of the hierarchy of GAAP to include accounting principles that are issued after being subject to the FASB's due process (including, but not limited to, FASB Staff Positions and FASB Statement No. 133, *Implementation Issues*, which are currently not addressed in AU section 411).

Among other matters, the proposed FASB statement would not carry forward the Rule 203 exception from paragraph .07 of AU section 411. Accordingly, the proposed FASB statement states that an enterprise shall not represent that its financial statements are presented in accordance with GAAP if its selection of accounting principles departs from the GAAP hierarchy set forth in this FASB statement and that departure has a material impact on its financial statements.

In response to the proposed FASB statement in May 2005, the AICPA issued an exposure draft of a proposed Statement on Auditing Standards (SAS), *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities for Nongovernmental Entities*, which deletes the GAAP hierarchy for nongovernmental entities from AU section 411. The Public Company Accounting Oversight Board (PCAOB) has already taken measures to remove the GAAP hierarchy from its interim auditing standards in a set of amendments that adopted on January 29, 2008. The amendments, if approved by the Securities and Exchange Commission (SEC), will become effective 60 days after SEC approval. For more information, please visit the FASB Web site at www.fasb.org and the PCAOB Web site at www.pcaob.org.

.06 GAAP Hierarchy Summary*

Nongovernmental Entities	*State and Local Governments*	*Federal Governmental Entities*
	Established Accounting Principles	
.10*a* Financial Accoutning Standards Board (FASB) statements and interpretations, Accounting Principles Board (APB) opinions, and AICPA Accounting Research Bulletins	.12*a* Governmental Accounting Standards Board (GASB) statements and interpretations, plus AICPA and FASB pronouncements if made applicable to state and local governments by a GASB statement or interpretation	.14*a* Federal Accounting Standards Advisory Board (FASAB) statements and interpretations plus AICPA and FASB pronouncements if made applicable to federal governmental entities by a FASAB statement or interpretation
.10*b* FASB technical bulletins, AICPA Industry Audit and Accounting Guides, and AICPA Statements of Position	.12*b* GASB technical bulletins, and the following pronouncements if specifically made applicable to state and local governments by the AICPA: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position	.14*b* FASAB technical bulletins and the following pronouncements if specifically made applicable to federal governmental entities by the AICPA and cleared by the FASAB: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position
.10*c* Consensus positions of the FASB Emerging Issues Task Force and AICPA Practice Bulletins	.12*c* Consensus positions of the GASB Emerging Issues Task Force† and AICPA Practice Bulletins if specifically made applicable to state and local governments by the AICPA	.14*c* AICPA Accounting Standards Executive Committee Practice Bulletins if specifically made applicable to federal governmental entities and cleared by the FASAB and Technical Releases of the Accounting and Auditing Policy Committee of the FASAB
.10*d* AICPA accounting interpretations, "Qs and As" published by the FASB staff, as well as industry practices widely recognized and prevalent	.12*d* "Qs and As" published by the GASB staff, as well as industry practices widely recognized and prevalent	.14*d* Implementation guides published by the FASAB staff and practices that are widely recognized and prevalent in the federal government

Nongovernmental Entities	*State and Local Governments*	*Federal Governmental Entities*
	Other Accounting Literature‡	
.11 Other accounting literature, including FASB concepts statements; AICPA issues papers; International Accounting Standards Committee statements; GASB statements, interpretations, and technical bulletins; FASAB statements, interpretations, and technical bulletins; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*, and accounting textbooks, handbooks, and articles	.13 Other accounting literature, including GASB concepts statements; pronouncements in categories (*a*)–(*d*) of the hierarchy for nongovernmental entities when not specifically made applicable to state and local governments; FASB concepts statements; FASAB statements, interpretations, technical bulletins, and concepts statements; AICPA issues papers; International Accounting Standards Committee statements; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles	.15 Other accounting literature, including FASAB concepts statements; pronouncements in categories (*a*)–(*d*) of the hierarchy in paragraph .10 when not specifically made applicable to federal governmental entities; FASB concepts statements; GASB statements, interpretations, technical bulletins, and concepts statements; AICPA issues papers; International Accounting Standards of the International Accounting Standards Committee; pronouncements of other professional associations or regulatory agencies; AICPA *Technical Practice Aids*; and accounting textbooks, handbooks, and articles

* Paragraph references correspond to the paragraphs of AU section 411, *The Meaning of* Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, *Professional Standards*, vol. 1), that describe the categories of the GAAP hierarchy.

† As of the date of this manual, the GASB had not organized such a group.

‡ In the absence of established accounting principles, the auditor may consider other accounting literature, depending on its relevance in the circumstances.

Practice Tip

On January 15, 2008, the FASB launched the one year verification phase of the *FASB Accounting Standards Codification*™ (codification). After the verification period, during which constituents are encouraged to provide feedback on whether the codification content accurately reflects existing U.S. GAAP for nongovernmental entities, the FASB is expected to formally approve the codification as the single source of authoritative U.S. GAAP, other than guidance issued by the Securities and Exchange Commission (SEC). The codification includes all accounting standards issued by a standard-setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, EITF, and related literature. The codification does not change GAAP; instead it reorganizes the thousands of U.S. GAAP pronouncements into roughly 90 accounting topics, and displays all topics using a consistent structure. The SEC guidance will follow a similar topical structure in separate SEC sections.

This edition of the Audit and Accounting Manual (AAM) has not been conformed to the new codification. The AICPA AAM, as well as other AICPA literature, will be conformed to reflect the codification after the verification phase and upon formal approval by the FASB.

Generally Accepted Auditing Standards

.07 An independent auditor plans, conducts, and reports the results of an audit in accordance with GAAS. Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

.08 AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1), provides a framework of GAAS.

.09 The general, field work, and reporting standards (the 10 standards) are as follows:

General Standards

1. The auditor must have adequate technical training and proficiency to perform the audit.
2. The auditor must maintain independence in mental attitude in all matters relating to the audit.
3. The auditor must exercise due professional care in the performance of the audit and the preparation of the report.

Standards of Fieldwork

1. The auditor must adequately plan the work and must properly supervise any assistants.
2. The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.
3. The auditor must obtain sufficient appropriate[1] audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

Standards of Reporting[2]

1. The auditor must state in the auditor's report whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).[3]

[1] See paragraph .06 of AU section 325, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1), for the definition of the term *appropriate*.

[2] The reporting standards apply only when the auditor issues a report.

[3] When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the first standard of reporting is satisfied by stating in the auditor's report that the basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used.

2. The auditor must identify in the auditor's report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.

3. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.

4. The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

.10 Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, vol. 2, ET sec. 202 par. .01) of the AICPA Code of Professional Conduct, requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the Auditing Standards Board (ASB). The ASB develops and issues standards in the form of Statements on Auditing Standards (SASs) through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

.11 The auditor should have sufficient knowledge of the SASs to identify those that are applicable to his audit. The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting.[4] The auditor should be prepared to justify departures from the SASs. When, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

.12 *Interpretive publications* consist of auditing interpretations of the SASs, appendixes to the SASs,[5] auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs.

.13 The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he complied with the SAS provisions addressed by such auditing guidance.

.14 *Other Auditing Publications* include the following:

- AICPA auditing publications not referred to previously
- Auditing articles in the *Journal of Accountancy* and other professional journals
- Auditing articles in the AICPA *CPA Letter*
- Continuing professional education programs and other instructional materials, textbooks, guide books, audit programs and checklists; and other auditing publications from state CPA societies, other organizations and individuals.

---

[4] See AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1).

[5] Appendixes to the SASs referred to in paragraph .05 of AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1), do not include previously issued appendixes to original pronouncements that when adopted modified other SASs.

Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

.15 If an auditor applies the auditing guidance included in an other auditing publication, he should be satisfied that, in his judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

[*The next page is 3141.*]

AAM Section 3110

Assigning Personnel to the Engagement and Supervision

General Comments

.01 Engagement planning includes procedures for assigning personnel to the engagement. Having procedures established provides the firm with reasonable assurance that work will be performed by persons having the degree of technical training and proficiency required in the circumstances. Generally, the more able and experienced the personnel assigned to a particular engagement, the less need for direct supervision.

.02 Some procedures regarding assignment of personnel to the engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all the procedures or be limited to those discussed. Overall firm guidance for assigning personnel to engagements is addressed in the *Practice Aid for Establishing and Maintaining a System of Quality Control for a CPA Firm's Accounting and Auditing Practice—Revised for the Issuance of Statement on Quality Control Standards No. 7,* A Firm's System of Quality Control in AAM section 10,200. Sample quality control forms are available at AAM section 10,300, which are helpful in assigning personnel to engagements.

Engagement Planning Procedures

.03 A time budget for the engagement is prepared to determine manpower requirements and to schedule field work. The engagement partner typically approves the time budget prior to the beginning of field work. A time budget may have columns for budgeted time (in hours) for preliminary and final field work. Time budget forms differ depending upon firm preference and needs. Some firms use separate forms for the time budget report and the job progress report or analysis (see paragraph .01 of AAM section 3160 for "Audit Time Budget—Sample A"), whereas others combine these reports into one form (see paragraph .02 of AAM section 3160 for "Audit Time Budget—Sample B").

.04 Other alternatives include longer, more detailed sets of forms. These forms combine the features of a time budget, a source document for staff scheduling, and a job progress report that compares each assigned person's actual daily hours against the budget. Some firms use a shorter, less detailed form for jobs of less than a predetermined number of staff hours (for example, 100 hours; see paragraph .03 of AAM section 3160 for "Audit Time Analysis—Short Form") and a longer form for jobs requiring more time (see paragraph .04 of AAM section 3160 for "Audit Time Analysis—Long Form"). Some firms use a weekly (or daily) progress report (see paragraph .05 of AAM section 3160, for example). This report, submitted by the accountant in charge, shows the time actually spent in relation to the estimate, the estimated additional time required, and the estimated variance from the original estimate.

.05 When the combined time budget and progress report form (sample B) is used, it is usually kept current as the assignment progresses. This form is carried in the working papers file and is filled in daily by the accountant in charge for all persons applying time on the engagement. This procedure is vital to identify and control time because it is applied so that it can be compared to the budgeted time for that phase of the engagement.

.06 The following factors may be considered in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:

a. Engagement size and complexity

b. Personnel availability

c. Special expertise

d. Timing of the work to be performed

e. Continuity and periodic rotation of personnel

f. Opportunities for on-the-job training

.07 The scheduling and staffing of the engagement is typically approved by the partner with final responsibility for the engagement so that the partner can consider the qualifications, experience, and training of personnel to be assigned. The experience and training of the engagement personnel is usually considered in relation to the complexity or other requirements of the engagement and the extent of supervision to be provided.

.08 It is recommended that all procedures discussed in this section be documented in the accountant's working papers.

Supervision

.09 Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant issues encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work, including knowledge of the client's business and industry.

.10 The auditor with final responsibility for the audit should communicate with members of the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, with special emphasis on fraud. Such discussion helps all audit team members understand the entity and its environment, including its internal control, and how risks that the entity faces may affect the audit. The discussion should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit.[1]

.11 In addition, assistants should be informed of their responsibilities and the objectives of the audit procedures they are to perform. They should be informed of matters that may affect the nature, timing, and extent of audit procedures they are to perform, such as the nature of the entity's business as it relates to their assignments and possible accounting and auditing issues. The auditor with final responsibility for the audit should direct assistants to bring to his or her attention accounting and auditing issues raised during the audit that the assistant believes are of significance to the financial statements or auditor's report so the auditor with final responsibility may assess their significance. Assistants also should be directed to bring to the attention of appropriate individuals in the firm difficulties encountered in performing the audit, such as missing documents or resistance from client personnel in providing access to information or in responding to inquiries.

.12 The work performed by each assistant, including the audit documentation, should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditor's report.

[1] For further guidance on the discussion among the audit team, see paragraphs .14–.18 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), and paragraphs .14–.20 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1).

.13 Each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm disagreements or concerns with respect to accounting and auditing issues that the assistant believes are of significance to the financial statements or auditor's report, however those disagreements or concerns may have arisen. The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his or her disagreement with the conclusions reached if, after appropriate consultation, he or she believes it necessary to disassociate himself or herself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented.

[*The next page is 3161.*]

AAM Section 3115

Independence

General Comments

.01 In accordance with Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .01), of the AICPA Code of Professional Conduct, a member in public practice shall be independent in the performance of professional services, which includes attest engagements.[1] Attest engagements are those in which your firm attests—or affirms—that a client's financial or other information is reasonably stated. Examples of attest services are

- financial statement audits,
- financial statement reviews, and
- other attest services as defined in the Statements on Standards for Attestation Engagements.

.02 Third parties—investors, creditors, and others—rely on your firm's attestations about a client's financial information when making various business decisions. Therefore, attest services have value for third parties only if an *independent firm* renders the services. Accordingly, AICPA *Professional Standards* states that the auditor must maintain independence in mental attitude in all matters relating to the audit; therefore, your firm may perform attest services for a client *only* when it is independent of that client. Independence is not required to perform the following services, if these are the *only* services your firm provides to a client:

1. Tax preparation and advice
2. Consulting services (such as tax consulting or personal financial planning)

.03 One other service—a compilation of a client's financial statements—does not require independence. If a nonindependent firm issues a compilation report, the following should be included as the last paragraph of the report, "I am (we are) not independent with respect to XYZ Company."[2]

.04 Engagement planning includes procedures to provide the firm with reasonable assurance that all persons required to maintain independence, to the extent required by the AICPA Code of Professional Conduct and the regulations of other organizations, as applicable (for example, the Securities and Exchange Commission [SEC], and the Department of Labor [DOL]), do so. The interpretations and rulings under Rule 101 of the AICPA Code of Professional Conduct contain examples of instances wherein a firm's independence will be considered to be impaired.

.05 As stated in the following text, audit firms that perform audits of or perform other attest services for public companies or other SEC registrants should consult the independence rules of the SEC and the Public Company Accounting Oversight Board (PCAOB).

.06 Other organizations that have established other independence requirements that a member should consult if applicable include the following:

- State boards of accountancy
- State CPA societies
- Federal and state agencies, such as the Governmental Accountability Office (GAO)

---

[1] There are additional requirements for public companies and companies subject to other governmental oversight.

[2] Paragraph .19 of AR section 100A, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2).

.07 Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule. The AICPA's Practice Aids, *Independence Compliance—Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627), and *Independence Compliance: Checklists and Tools for Complying with AICPA, SEC, and PCAOB Independence Requirements* (product no. 006630), are valuable resources for helping practitioners observe applicable independence rules. The practice aids can be obtained at www.cpa2biz.com or by calling (888) 777-7077.

Maintaining Your Independence

.08 Maintaining your independence is your responsibility, not your firm's. As part of its quality control system, the firm is often required to address independence matters; however, ultimately it is up to you to follow firm policies and the independence rules. Many firms require you to certify your independence on a regular basis. The following are some suggestions that will help you to complete and sign that certification in good faith.

.09 *Gain an understanding of the independence rules and firm policies.* As a prerequisite to establishing and maintaining the independence, a good, working understanding of the basic independence rules is essential. At a minimum, it is important to be aware of the circumstances in which you and your immediate family meet the definition of a covered member (discussed in the following section in greater detail) and of the types of relationships you may have with the firm's clients that could impair independence. If you have any questions about independence matters, you may consult with someone in your firm who is knowledgeable about such matters, or you may seek the advice of the AICPA (ethics@aicpa.org). If your firm performs audits and other attest services for SEC registrants, you should also familiarize yourself with rules promulgated by the SEC and the PCAOB.

Covered Member

.10 Know when you meet the definition of a covered member. Whenever you are a *covered member* with respect to a particular attest client, you become subject to the highest possible level of independence restrictions (for example, restrictions on financial and business interests, and your family's employment). According to paragraph .06 of ET section 92, *Definitions*, (AICPA, *Professional Standards*, vol. 1), you are a covered member with respect to a client if you are

1. an individual on the attest engagement team;
2. an individual in a position to influence the attest engagement;
3. a partner or manager who provides more than ten hours of nonattest services to the attest client;
4. a partner in the office in which the lead attest engagement partner primarily practices in connection with the attest engagement;
5. the firm, including the firm's employee benefit plans; or
6. an entity whose operating, financial, or accounting policies can be controlled (as defined by generally accepted accounting principles [GAAP] for consolidation purposes) by any of the individuals or entities described in (1)–(5) or by two or more such individuals or entities if they act together.

.11 However, there are two relationships that—due to their magnitude—impair independence even when you are *not* considered to be a covered member.

The following rules apply to all partners and professional employees of a firm:

- No partner or professional employee may be simultaneously associated with an attest client during the period covered by the financial statements or during the period of the professional engagement as a
  - — director, officer (or any management capacity), or employee,
  - — promoter, underwriter, or voting trustee, or
  - — trustee of any of the client's employee benefit plans.
- No partner or professional employee, his or her immediate family, or any group of such persons acting together may own greater than 5 percent of an attest client's outstanding equity securities (or other ownership interests).

Family Members

.12 The investments and employment of certain family members may impair your independence. Know which of your family members meet the definition of *immediate family* and which ones meet the definition of *close relative* as defined in ET section 92.

.13 If you are a covered member with respect to a client, members of your immediate family (your spouse, spousal equivalent, or dependents [whether related or not]) should follow the same rules as you. So, for example, your spouse's investments should be investments that you could own under the rules. This would be the case even if your spouse keeps the investments in his or her own name or with a different broker.

.14 There are two exceptions to this general rule.

1. Your immediate family member's employment with a client would not impair your firm's independence provided he or she is not in a *key position*. A key position is one in which your family member
   - has primary responsibility for significant accounting functions that support material components of the financial statements or the preparation of the financial statements;
   - has primary responsibility for preparing the financial statements; or
   - has the ability to exercise influence over the contents of the financial statements, including when the individual is a member of the board of directors or similar governing body, CEO, president, CFO, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.
2. Immediate family members of *certain* covered members may have a financial interest in a client through an employee benefit plan (for example, retirement or savings account) provided the plan is offered equitably to all similar employees. The covered members whose families may have such interests are
   - partners and managers who provide ten or more hours of nonattest services to the client; and
   - partners who are in the same office where the client's lead attest partner practices in connection with the engagement.

.15 Also note that immediate family of individuals on the attest engagement team *or* of those who can influence the attest engagement team may not apply this exception.

.16 The close relatives of *certain* covered members will be subject to some employment and financial restrictions. These covered members are

- persons on the attest engagement team,
- persons who can influence the attest engagement, and

- any partners in the office where the client's lead partner the attest engagement.

.17 Close relatives are your

- nondependent children,
- siblings, or
- parents.

.18 So, as a covered member, your close relative's employment by a client would impair independence if your relative had a key position with the client.

.19 Rules pertaining to your close relatives' financial interests differ depending on whether you participate on the client's attest engagement as follows:

- If you participate on the client's attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either
  - — was material to your relative's net worth and of which you have knowledge or
  - — enables the relative to exercise significant influence over the client.
- If you are able to influence the client's attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that
  - — is material to your relative's net worth and of which you or the partner have knowledge and
  - — enables your relative to exercise significant influence over the client.

Financial Relationships

.20 There are various types of financial interests and some of those interests affect independence. Although your firm and its employee benefit plans are also subject to the financial interest provisions of the independence rules (firms are included in the definition of *covered member*), here we focus on their application to individuals.

.21 As a covered member with respect to a particular client, you (and your spouse and dependents) may not have a

- direct financial interest in that client, regardless of how immaterial it would be to you.
- material indirect financial interest in that client.

.22 In addition, if you commit to acquire a financial interest in a client with respect to which you are a covered member, your independence would be impaired. For example, if you sign a stock subscription agreement with the client, your independence would be considered impaired as soon as you sign the agreement.

.23 According to paragraph .17 of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2), a financial interest is an ownership interest in an equity or a debt security issued by an entity, including rights and obligations to acquire such an interest and derivatives directly related to such interest. Examples of financial interests may include shares of stock; mutual fund shares; partnership units; stock rights; options or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles.

.24 Direct financial interests are financial interests that are owned by you directly; under your control; or beneficially owned by you through an investment vehicle, estate, trust, or other intermediary if you (*a*) control the intermediary; or (*b*) have the authority to supervise or participate in the intermediary's investment decisions.

For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest in the investments held in your account.

.25 You also have a direct financial interest in a client when you have a financial interest in a client through a

- partnership, if you are a general partner.
- Section 529 savings plan, if you are the account owner.
- estate, if you serve as an executor and meet certain other criteria.
- trust, if you serve as the trustee and meet certain other criteria.

.26 Indirect financial interests arise if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary when you can neither control the intermediary nor have the authority to supervise or participate in the intermediary's investment decisions. For example, if you invest in a defined contribution plan that is not participant directed and you have no authority to supervise or participate in the plan's investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments.

Business Relationships

.27 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as a

- director, officer, employee, or in any management capacity.
- promoter, underwriter, or voting trustee.
- stock transfer or escrow agent.
- general counsel (or equivalent).
- trustee for a client's pension or profit-sharing trust.

.28 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client's operations or business affairs, independence is considered impaired.

.29 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client's governing body and therefore would be able to participate in the client's management decisions.

.30 There are two possible exceptions to this rule, as follows:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may hold such position with a client if
   - your position is purely honorary.
   - you do not vote or participate in managing the organization.
   - your position is clearly identified as honorary in any internal or external correspondence.
2. In addition, you may serve on a client's advisory board provided all the following criteria are met:
   - The advisory board's function is purely advisory.
   - The advisory board does not appear to make decisions for the client.
   - The advisory board and any decision making boards are separate and distinct bodies.

- Common membership between the advisory board and any decision making groups is minimal.

Fee Issues

.31 Two types of fee arrangements, contingent fees and commissions, are prohibited when the arrangement involves certain attest clients (see paragraph .36 for details), even though the fee is not related to an attest service.

.32 A contingent fee is an arrangement where (1) no fee is charged unless a specified result is attained or (2) the amount of the fee otherwise depends on the results of your firm's services. Some examples of contingent fees are as follows:

- Your firm receives a "finder's fee" for helping a client locate a buyer for one of the client's assets.
- Your firm performs a consulting engagement to decrease a client's operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

Exceptions are as follows:

- Fees fixed by a court or other public authority
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies

.33 A commission is any compensation paid to you or your firm for (1) recommending or referring a third party's product or service to a client or (2) recommending or referring a client's product or service to a third party. Permitted commissions shall be disclosed to the person or entity you recommend or refer a product or service to.

.34 Examples of commissions are if you or your firm

- refers a client to a financial planning firm that pays you a commission for the referral.
- sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

.35 The rule provides an exception for *referral fees* that are related to recommending or referring the services of a CPA. That is, you may (1) receive a fee for referring the services of a CPA to any person or entity or (2) if you are a CPA, pay a fee to obtain a client provided you disclose such receipt or payment to the client. Referral fees are not considered commissions under these specific circumstances. You must inform the client if you receive or pay a referral fee.

.36 You and your firm may not have commission or contingent fee arrangements with a client when your firm also provides one of the following services to a client:

- An audit of financial statements
- A review of financial statements
- Compiled financial statements when a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence
- An examination of prospective financial statements

.37 You and your firm may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not a client).[3] For example, you or your firm may receive a commission from an officer of a client without violating the AICPA rule. Even when permitted, the existence of a commission arrangement must be disclosed to the person (or entity) to whom the commission relates.

Restricted Entities

.38 Be familiar with the firm's restricted entities. Restricted entities are those entities for whom the firm provides attest services. Many firms maintain a formal list or database of these clients. If yours is one of these firms, you should know how to access the list.

.39 Maintain the integrity of the restricted entity list. If you perform attest services, then you need to make sure that those clients are identified as restricted entities of the firm. Certain entities that are related to your clients (for example, subsidiaries) also will be considered restricted entities, even if they are not clients of the firm.

.40 Consult the restricted entities list regularly. Get into the habit of referring to the firm's restricted entity list whenever you are considering changes in circumstances that could affect your independence. For example, you may consult the restricted entity list prior to

- making an investment or acquiring a financial interest in an entity.
- entering into a business relationship.
- obtaining a loan or refinancing an existing loan.
- having an immediate family member change employers or assume new responsibilities at an existing job.

Nonattest Services

.41 Be aware of the rules relating to the performance of nonattest services. If you provide nonattest services to restricted entities, you should be familiar with Interpretation 101-3, "Performance of nonattest services" of ET section 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05) establishes standards and provides guidance regarding the performance of nonattest services. Interpretation No. 101-3 discusses the services that are permitted and prohibited under the ruling, as well as the member's responsibilities for establishing an understanding of the engagement with your client and documenting various aspects of the engagement. If your clients are SEC registrants, you should be aware of the more restrictive SEC rules in this area. Certain other regulators (for example, the GAO) may have more restrictive rules concerning nonattest services, which should be reviewed depending upon the circumstances of the engagement.

.42 The term *nonattest services* includes accounting and consulting services that are not part of an attest engagement.[4] Nonattest services specifically addressed in the rules are as follows:

- Bookkeeping services
- Payroll and other disbursement services
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Tax compliance services

---

[3] Also see AICPA Ethics Ruling No. 25, "Commission and Contingent Fee Arrangements With Nonattest Client" of ET section 391, *Ethics Rulings on Responsibilities to Clients* (AICPA, *Professional Standards*, vol. 2, ET sec. 391 par. .049–.050) of the Code of Professional Conduct.

[4] Defined in the Code of Professional Conduct, an *attest engagement* is one that requires independence under AICPA *Professional Standards*; for example, audits and reviews of financial statements or agreed upon procedures performed under the attestation standards.

- Forensic accounting services
- Corporate finance consulting or advisory
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration

.43 Interpretation No. 101-3 lists three general requirements in order to maintain independence when performing permitted nonattest services.

.44 The first of the three general requirements of Interpretation No. 101-3 states that a member should not perform management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client's management in performing its functions and making decisions.)

.45 The second general requirement is that the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, experience, or any combination of these, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed
- Accept responsibility for the results of the services

The member should be satisfied that the client will be able to meet all of these criteria and to make an informed judgment on the results of the member's nonattest services. In assessing whether the designated individual possesses suitable skill, knowledge, and experience, the member should be satisfied that the employee understands the services to be performed sufficiently to oversee them. However, the individual is not required to possess the expertise to perform or reperform the services. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with the necessary competence to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member's provision of nonattest services would impair independence.

.46 The third general requirement is that before performing nonattest services, the member should establish and document in writing his or her understanding with the client (board of directors, audit committee, or management, as appropriate in the circumstances) regarding the following:

a. Objectives of the engagement

b. Services to be performed

c. Client's acceptance of its responsibilities

d. Member's responsibilities

e. Any limitations of the engagement

The understanding might be documented in a separate engagement letter, in the working papers, or in an internal memo, or it might be included in an engagement letter obtained in conjunction with an attest engagement.

.47 The second and third general requirements do not apply to certain routine activities performed by the member such as assisting clients with technical accounting questions, advising on internal controls, or providing periodic training on new pronouncements that are part of the normal client-member relationship.

.48 One of the key principles underlying the AICPA rules on nonattest services is that you may not serve—or even appear to serve—as a member of a client's management. For example, you may not:

- make operational or financial decisions for the client.
- perform management functions for the client.
- supervise client employees in the performance of their normal recurring activities.
- determine which recommendations of the member should be implemented.
- report to the board of directors on behalf of management.
- establish or maintain internal controls, including performing ongoing monitoring activities for a client.

.49 In addition, the following are examples of the types of activities that impair independence:

- Authorizing, executing, or consummating a transaction, or otherwise exercising authority on behalf of a client or having the authority to do so
- Preparing source documents, in electronic or other form, evidencing the occurrence of a transaction
- Having custody of client assets
- Serving as a client's stock transfer or escrow agent, registrar, general counsel, or its equivalent
- Designing a client's financial information system
- Performing a valuation of a client's business
- Establishing and maintaining internal controls, including performing ongoing monitoring activities for a client

.50 Additionally, Interpretation No. 101-3 requires you comply with more restrictive independence provisions, if applicable, of certain regulators such as state boards of accountancy, the SEC, and the GAO.

.51 *Report any apparent violations*. If you become aware of any apparent violations of the independence rules, you should report these immediately to the person in your firm responsible for independence matters.

.52 The procedures employed at the engagement level should be designed to ascertain whether the firm and its partners and employees have complied with all applicable independence rules. Overall firm requirements for independence are addressed in AICPA's Statement on Quality Control Standards (SQCS) No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, vol. 2, QC sec. 10).

Independence Quality Controls

.53 Paragraph .21 of SQCS No. 7 states that the firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel, and, where applicable, others subject to independence requirements, maintain independence where required. Independence requirements are set forth in ET section 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time and safeguards to mitigate such threats involving matters that are not explicitly addressed in the Code of Professional Conduct are set forth in the AICPA's Conceptual Framework for AICPA Independence Standards. Such policies and procedures should enable the firm to *a.* communicate its independence requirements to its personnel and, where applicable, others subject to them.

b. identify and evaluate circumstances and relationships that create threats to independence and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safe guards, or, if effective safeguards cannot be applied, withdrawing from the engagement.

.54 Such policies and procedures should require

a. the engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall effect, if any, on independence requirements.

b. personnel to promptly notify the engagement partner and the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken.

c. the accumulation and communication of relevant information to appropriate personnel so that

1. the firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements;
2. the firm can maintain and update information relating to independence; and
3. the firm and the engagement partner can take appropriate action regarding identified threats to independence.

.55 The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for

a. personnel to promptly notify the firm of independence breaches of which they become aware.

b. the firm to promptly communicate identified breaches of these policies and procedures and the required corrective actions to

1. the engagement partner who, with the firm, has the responsibility to address the breach; and
2. other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.

c. confirmation to the firm by the engagement partner and the other individuals referred to in subparagraph (b[2]) that the required corrective actions have been taken.

.56 At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in ET section 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Written confirmation may be in paper or electronic form.

.57 The purpose of obtaining confirmation and taking appropriate action on information indicating noncompliance is to demonstrate the importance that the firm attaches to independence and keep the issue current for and visible to its personnel.

.58 For all audit or attestation engagements where regulatory or other authorities require the rotation of personnel after a specified period, the firm's policies and procedures should address these requirements.

Additional Guidance

.59 It is recommended that all procedures discussed in this section be documented in the auditor's working papers.

.60 For additional guidance practitioners may refer to AICPA *Independence and Ethics Alert* (AAM section 8240). This annual alert informs you of recent developments in the area of independence and ethics for accountants. Moreover, the alert helps you understand your independence requirements under the AICPA Code and, if applicable, certain other rule making and standard setting bodies. Also, the alert contains the AICPA Plain English Guide to Independence, which discusses the independence rules of the principal standard setting bodies in plain, straight forward English so you can understand and apply them with greater confidence and ease.

[*The next page is 3181.*]

AAM Section 3120

Understanding the Entity and Its Environment

General

.01 In accordance with the second standard of field work, "the auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures." Obtaining an understanding of the entity and its environment is an essential aspect of performing an audit in accordance with generally accepted auditing standards. In particular, that understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing risks of material misstatement of the financial statements and responding to those risks throughout the audit, for example, when

- establishing materiality for planning purposes and evaluating whether that judgment remains appropriate as the audit progresses;
- considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures;
- identifying areas where special audit consideration may be necessary, for example, related party transactions, the appropriateness of management's use of the going-concern assumption, complex or unusual transactions, or considering the business purpose of transactions;
- developing expectations for use when performing analytical procedures;
- designing and performing further audit procedures to reduce audit risk to an appropriately low level; and
- evaluating the sufficiency and appropriateness of audit evidence obtained, such as evidence related to the reasonableness of management's assumptions and of management's oral and written representations.

.02 The auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment, including its internal control. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures. The depth of the overall understanding that the auditor obtains in performing the audit is less than that possessed by management in managing the entity.

.03 Obtaining an understanding of the entity and its environment, including its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. Throughout this process, the auditor should also follow the guidance in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1).

Risk Assessment Procedures

.04 Audit procedures performed to obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels are referred to as *risk assessment procedures*. The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels.

.05 The auditor should perform the following risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control:

a. Inquiries of management and others within the entity

b. Analytical procedures

c. Observation and inspection

.06 Risk assessment procedures are designed to gather and evaluate information about the client and are not specifically designed as substantive procedures or as tests of controls. Nevertheless, in performing risk assessment procedures, the auditor may obtain evidence about relevant assertions or the effectiveness of controls.

Inquiry of Management and Others

.07 Although much of the information obtained by inquiry can be obtained from management, accounting personnel, and others involved in the financial reporting process, it is often helpful to direct inquiries to others within the entity. For example, people who work in production, sales, or internal audit, as well as individuals employed at different levels within the organization can provide a different perspective that helps identify risks of material misstatement. Inquiries of others can also help corroborate or provide additional details to the statements and representations made by management and accounting personnel. The following table provides examples of other individuals within the entity who might be able to help the auditor identify and assess the risk of material misstatement.

Examples of Inquiries of Others Within the Entity

.08

Inquiries of these individuals (outside of management or the financial reporting process, or both)	*May help the auditor understand*
Those charged with governance	• the environment in which the financial statements are prepared. • whether they have knowledge of any fraud or suspected fraud. • how they exercise oversight of the entity's programs and controls that address fraud. • their views on where the company is most vulnerable to fraud. • how financial statements are used.
Internal audit personnel	• the design and operating effectiveness of internal control. • internal audit activities related to internal control over financial reporting. • whether management has responded satisfactorily to internal audit findings. • their views on where the company is most vulnerable to fraud.

Employees involved in the initiation, processing, or recording of complex or unusual transactions	• the controls over the selection and application of accounting policies related to those transactions. • the business rationale for those transactions.
IT systems users	• how IT users identify changes to IT systems and how frequently those changes occur. • how users "work around" IT systems for those circumstances where the IT system does not support them. • how logical access to data and applications is controlled. • how remote access to the system is controlled. • excessive system down time and other indicators that the system is not functioning properly.
In-house legal counsel	• litigation. • compliance with laws and regulations. • fraud or suspected fraud. • warranties. • post sales obligations. • arrangements such as joint ventures. • the meaning of certain contract terms.
Marketing, sales, or production personnel	• marketing strategies. • sales trends. • production strategies. • contractual arrangements with customers. • any pressures to meet budgets or change reported performance measures.

Analytical Procedures

.09 AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), specifies that the auditor should apply analytical procedures in planning the audit. The objective of these procedures is to help the auditor understand the client and its environment and, ultimately, to assess the risk of material misstatement. As such, the auditor may consider the analytical procedures performed during audit planning to be a risk assessment procedure that provides some broad audit evidence to support the opinion on the financial statements.

.10 Please refer to paragraphs .06–.08 of AU section 329 for additional guidance on the performance of analytical procedures in planning the audit.

.11 The results of analytical procedures may help the auditor obtain an understanding of the entity. For example, analytical procedures may be helpful in identifying

- the existence of unusual transactions or events, which may indicate the presence of significant risks, and
- amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. For example, an unexpected amount, ratio, or trend may be the result of a misstatement that was not prevented or detected and corrected by the client's system of internal control.

Observations and Inspection of Documents

.12 The auditor may use observation and the inspection of documents to support the responses received to the inquiries of management and others. Additionally, the observations and inspections will provide the auditor with further information about the entity and its environment that might not otherwise be obtained.

.13 The procedures performed to observe activities and inspect documents typically include the following:

- Observation of client activities and operations
- Visits to the client's premises and plant facilities
- Inspection of documents, records, and internal control manuals
- Reading reports prepared by management (such as quarterly management reports and interim financial statements)
- Reading minutes of board of directors' meetings and other documents prepared by those charged with governance
- Tracing transactions through the financial reporting information system (walkthroughs)

A Mix of Procedures

.14 The auditor is not required to perform all the risk assessment procedures described previously for each aspect of the understanding described in the following section. However, all the risk assessment procedures should be performed by the auditor in the course of obtaining the required understanding.

Discussion Among the Audit Team

.15 The members of the audit team, including the auditor with final responsibility for the audit, should discuss the susceptibility of the entity's financial statements to material misstatements. The objectives of this discussion are for team members to

- gain a better understanding of the potential for misstatements in the specific areas assigned to them, and
- understand how the results of the audit procedures they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

.16 This discussion could be held concurrently with the discussion among the audit team that is specified by AU section 316 to discuss the susceptibility of the entity's financial statements to fraud.

.17 Topics for audit team discussion include the following:

- Areas of significant risk of material misstatement
- Unusual accounting procedures used by the client
- Important control systems
- Significant IT applications and how the client's use of IT may affect the audit
- Areas susceptible to management override of controls
- Materiality at the financial level and tolerable misstatement
- How materiality will be used to determine the extent of testing
- The application of generally accepted accounting principles to the client's facts and circumstances and in light of the entity's accounting policies

- The need to
  - — exercise professional skepticism throughout the engagement.
  - — remain alert for information or other conditions that indicate that a material misstatement due to fraud or error may have occurred.
  - — follow up rigorously on any indications of a material misstatement.

.18 The auditor should exercise professional judgment to determine logistical matters relating to the audit discussion, such as who should participate, how and when the discussion should occur, and its extent. Key members of the audit team, including the auditor with final responsibility, should be involved in the discussion.

.19 When considering who should participate in the discussion, the auditor also may determine that an IT specialist or other individual possessing specialized skills is needed on the audit team and, therefore, include that individual in the discussion.

Understanding Specified Aspects of the Entity and Its Environment

.20 The auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

a. Industry, regulatory, and other external factors

b. Nature of the entity

c. Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements

d. Measurement and review of the entity's financial performance

e. Internal control, which includes the selection and application of accounting policies

.21 The nature, timing, and extent of the risk assessment procedures performed depend on the circumstances of the engagement, such as the size and complexity of the entity and the auditor's experience with it. In addition, identifying significant changes in any of the previously mentioned aspects of the entity from prior periods is particularly important in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

Industry, Regulatory, and Other External Factors

.22 The auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include industry conditions, such as the competitive environment, supplier and customer relationships, and technological developments; the regulatory environment encompassing, among other matters, relevant accounting pronouncements, the legal and political environment, and environmental requirements affecting the industry and the entity; and other external factors, such as general economic conditions.

.23 The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (such as political, economic, social, technical, and competitive). For example, long term contracts may involve significant estimates of revenues and costs that give rise to risks of material misstatement of the financial statements. Similarly, regulations may specify certain financial reporting requirements for the industry in which the entity operates. In such cases, the auditor should consider whether the audit team includes members with sufficient relevant knowledge and experience. If management fails to comply with such regulations, its financial statements may be materially misstated.

Nature of the Entity

.24 The auditor should obtain an understanding of the nature of the entity. The nature of an entity refers to the entity's operations, its ownership, governance, the types of investments that it is making and plans to make, the way that the entity is structured, and how it is financed. An understanding of the nature of an entity enables the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements.

Objectives and Strategies and Related Business Risks

.25 The auditor should obtain an understanding of the entity's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the operational approaches by which management intends to achieve its objectives. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic and the entity's strategies and objectives change over time.

.26 Business risk is broader than the risk of material misstatement of the financial statements, although it includes the latter. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Usually management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs .76–.80 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1).

Measurement and Review of the Entity's Financial Performance

.27 The auditor should obtain an understanding of the measurement and review of the entity's financial performance. Performance measures and their review indicate to the auditor aspects of the entity's performance that management and others consider to be important. Performance measures, whether external or internal, create pressures on the entity that, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Obtaining an understanding of the entity's performance measures assists the auditor in considering whether such pressures result in management actions that may have increased the risks of material misstatement.

.28 Internally generated information used by management for this purpose may include key performance indicators (financial and nonfinancial); budgets; variance analysis; subsidiary information and divisional, departmental, or other level performance reports; and comparisons of an entity's performance with that of competitors. External parties may also measure and review the entity's financial performance. For example, external information, such as analysts' reports and credit rating agency reports, may provide information useful to the auditor's understanding of the entity and its environment. Such reports may be obtained from the entity being audited or from Web sites.

Internal Control

.29 Refer to AAM section 3125 for the discussion of internal control.

Documentation

.30 The auditor should document the key elements of the understanding obtained regarding each of the aspects of the entity and its environment, including each of the components of internal control (discussed in AAM section 3125) to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures.

[*The next page is 3201.*]

AAM Section 3125

Understanding of Internal Control

Introduction

.01 Internal control is broadly defined as a process designed to provide reasonable assurance regarding the achievement of the entity's objectives in the following categories: (*a*) reliability of financial reporting, (*b*) effectiveness and efficiency of operations, and (*c*) compliance with applicable laws and regulations. Internal control is effected by those charged with governance, management, and other personnel.

.02 The previous definition reflects certain fundamental concepts that follow:

A process. Internal control is a process. It is not one event or circumstance, but a series of actions that permeate an entity's activities. These actions are pervasive, and are inherent in the way management runs the business.

People. Internal control is effected by people. It is not accomplished by policy manuals and forms, but the people of an organization, what they do and say. People need to know their responsibilities and limits of authority.

Reasonable assurance. Internal control, no matter how well designed and operated, can provide only reasonable assurance to management and the board of directors regarding achievement of an entity's objectives.

Achievement of objectives. Internal control is geared to the achievement of entity objectives. The definition of these objectives provides auditors with a useful framework for understanding and analyzing internal controls.

.03 Auditors should obtain an understanding of their client's internal control during the planning phase of every audit. Paragraph .40 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), states the following:

> The auditor should obtain an understanding of the five components of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures.

.04 As a practical matter, the previous requirement raises the following questions:

- What constitutes a "sufficient understanding"? That is, what should an auditor know about the client's internal control?
- How should an auditor obtain this understanding?

.05 This section provides answers to each of the previous questions.

What Auditors Should Understand About Internal Control

.06 A "sufficient" understanding of internal control means the following:

- The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented.

- This understanding is ordinarily limited to controls that pertain to the entity's objective of preparing reliable financial statements for external purposes.
- That one objective can be broken into five components, and an auditor should obtain an understanding of each of the five components.

.07 Obtaining an understanding of controls is different from testing the operating effectiveness of controls. Obtaining an understanding of internal control involves evaluating the design of a control and determining whether it has been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. Implementation of a control means that the control exists and that the entity is using it. The auditor should consider the design of a control in determining whether to consider its implementation. In contrast, the objective of testing the operating effectiveness of controls is to determine whether the controls, as designed, prevent or detect a material misstatement. This includes obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

.08 *The Jones family owns and operates several neighborhood grocery stores in Anytown. On a monthly basis, the controller of Jones Grocery performs bank reconciliations for all the bank accounts. For planning purposes, the auditor of Jones Grocery should determine whether this control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements and determine whether the controller actually performs the reconciliations. Not testing, but identifying controls are a key part of audit planning.*

.09 AU section 314 provides a framework to help auditors obtain their understanding of internal control. That framework is built on two basic concepts: objectives and components.

.10 Internal control is a process designed to provide reasonable assurance regarding the achievement of entity *objectives*. Entities generally have the following three objectives:

Financial reporting. This objective relates to the preparation of reliable published financial statements.

Operations. This objective relates to effective and efficient use of the entity's resources.

Compliance. This objective relates to the entity's compliance with applicable laws and regulations.

.11 *The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* ***financial reporting*** *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the* ***operations*** *objective. Each store also has a small deli that prepares sandwiches and hot entrees. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the entity's* ***compliance*** *objective.*

.12 Ordinarily, relevant controls for an audit relate to the financial reporting objective. Controls relating to operations and compliance objectives that are not relevant to an effective audit need not be considered. It is a matter of the auditor's professional judgment, as to the controls or combination of controls that may be assessed. However, as stated in paragraph .115 of AU section 314, for significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities and determine whether they have been implemented.

.13 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. The auditor of Jones may wish to inquire and document these controls for client service or other purposes, but because these controls are not relevant to the audit, he or she is not required to do so.*

.14 However, if controls relating to operations and compliance objectives pertain to information the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.15 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she may consider obtaining an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting information about those transactions are entered into and flow through the financial reporting system
- The files that are processed
- The nature of processing involved in producing the report

.16 Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.17 Controls designed to prevent or detect misappropriations of assets may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or access controls, such as passwords that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. An auditor's responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

.18 An objective is what an entity strives to achieve. But what is needed to achieve that objective?

.19 AU section 314 provides a framework that separates each financial reporting objective into five components. These components represent what is needed to achieve the entity's objectives. The components of internal control are briefly described as follows:

Control environment. The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

Risk assessment. An entity's risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are presented fairly in conformity with generally accepted accounting principles. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

Control activities. Control activities are the policies and procedures that help ensure that management directives are carried out; for example, that necessary actions are taken to address risks that threaten the achievement of the entity's objectives.

Information and communication systems. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. The quality of system generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial reports. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting.

Monitoring. Monitoring is a process that assesses the quality of internal control performance over time.

.20 Some control components, for example the control environment, will have a pervasive effect on the entity's activities. Other components, for example control activities, will be directed primarily toward the achievement of one or more of the three objectives described in paragraph .10. Auditors are generally interested only in those components of internal control that have a pervasive effect on the entity and those that are directly related to the reliability of financial reporting.

.21 This internal control framework, the relationship between an entity's objectives and internal control components, is discussed in more detail in AAM section 4200.

.22 The internal control framework described here and in AAM section 4200 is only a means to help auditors consider the effect of an entity's internal control in an audit. An auditor's primary concern is *not* the classification of a specific control into any particular component and related objective. Rather, an auditor's primary concern is whether, and how, a specific control prevents or detects and corrects material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.23 *Andrea Auditor audits Jones Grocery. As on all audits, she should obtain an understanding of internal control sufficient to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures. To achieve this, she organizes her inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objective. As a result of performing her procedures, she discovers the client's bank reconciliation procedures. Should a bank reconciliation be considered a* control activity*? What about the fact that someone follows up and investigates old or unusual reconciling items. Is that considered a* monitoring *activity?*

.24 *The issue of how to classify a particular control is irrelevant for Andrea's purposes. As an auditor, her primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

How an Auditor Obtains an Understanding of Internal Control

.25 The auditor should obtain a sufficient understanding of internal control by performing risk assessment procedures (inquiries of management and others within the entity, analytical procedures, and observation and inspection) to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. Procedures to obtain audit evidence about the design and implementation of relevant controls may include inquiring of entity personnel, observing the application of specific controls, inspecting documents and reports, and tracing transactions through the information system relevant to financial reporting. Inquiry alone is not sufficient to evaluate the design of a control relevant to an audit and to determine whether it has been implemented.

.26 Auditors might consider the types of misstatements that occurred in prior audits (for example, whether they were associated with accounting estimates, whether they were routine errors that resulted from a lack of control consciousness, or whether they resulted from lack of sufficient personnel). This knowledge of prior misstatements can help an auditor focus his or her inquiries on those areas and whether changes have been made to internal control to prevent those misstatements in the future.

.27 In a continuing audit, the auditor may already have significant experience with and documentation of internal control. In these situations, this knowledge from previous audits allows the auditor to focus on system changes.

.28 *Jones Grocery purchased a commercially available software package for independent grocers. During 20X1, Jones installed the general ledger system and the cash receipts/disbursements and accounts payable modules. As part of performing her 20X1 audit, Andrea Auditor obtained an understanding of the software package and the modules that were installed. For her 20X2 audit, Andrea should focus on changes made to the system since 20X1. For example,* *she might inquire about the installation of other modules (such as inventory) or updated versions of the software package.*

.29 Some controls are documented in policy and procedure manuals, flowcharts, source documents, journals, and ledgers. In these cases, inspection of the documentation and inquiries of entity personnel may provide a sufficient understanding to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures.

.30 *When Jones Grocery receives a bill, it is input directly into the accounts payable module of their software package. The computer generates an accounts payable aging and a cash requirements report that indicates when each bill should be paid. The accounts payable module interfaces with the general ledger system to automatically post and update the appropriate general ledger account whenever bills are received or paid. To obtain her understanding of the accounts payable system, Andrea performed a "walk-through." She made inquiries of Jones personnel and obtained copies of bills and the reports generated by the computer. She "walked through" the example bills to see how they were included in the computer reports and how totals from those reports were posted to the general ledger. She also made inquiries related to the completeness assertion, that is, how does Jones ensure that* all *bills are entered into the system? Andrea observed the Jones employee performing those control procedures.*

.31 Documentation may not be available for some controls. For example, the understanding of certain aspects of the control environment, such as management integrity, may be obtained through previous experience updated by inquiries of management and observation of their actions. Although documentation may not be available, the auditor is still responsible for documenting his or her understanding of the components of internal control.

Documenting the Understanding

.32 The auditor should document the key elements of the understanding obtained regarding each of the components of internal control, to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures. The form and extent of this documentation is influenced by the nature and complexity of the entity's controls. For example, documentation of the understanding of internal control of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity's internal control and the more extensive the procedures performed by the auditor, the more extensive the auditor should document his or her work.

[*The next page is 3221.*]

AAM Section 3130

Assessing the Risks of Material Misstatement

General

.01 Knowledge an auditor acquires about a client encompasses a broad range of information, including the following:

- Industry, regulatory, and other external factors affecting the client
- The nature of the client, including its operations and organizational structure
- The client's objectives, strategies, and related business risks, some of which will give rise to risks affecting the financial statements
- How management measures and reviews the company's financial performance
- An understanding of the internal controls that are in use at the entity, including an understanding of the use of IT and the controls designed and used within the IT system

This knowledge of a client forms the basis for identifying risks and evaluating how these risks could result in financial statement misstatements.

.02 The auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. For this purpose, the auditor should

- identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and considering the classes of transactions, account balances, and disclosures in the financial statements.
- relate the identified risks to what can go wrong at the relevant assertion level.
- consider whether the risks are of a magnitude that could result in a material misstatement of the financial statements.
- consider the likelihood that the risks could result in a material misstatement of the financial statements.

.03 The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed. When the risk assessment is based on an expectation that controls are operating effectively to prevent or detect material misstatement, individually or when aggregated, at the relevant assertion level, the auditor should perform tests of the controls that the auditor has determined to be suitably designed to prevent or detect a material misstatement in the relevant assertion to obtain audit evidence that the controls are operating effectively, as described in AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1).

.04 The auditor should determine whether the identified risks of material misstatement relate to specific relevant assertions related to classes of transactions, account balances, and disclosures, or whether they relate more pervasively to the financial statements taken as a whole and potentially affect many relevant assertions.

Financial Statement Assertions

.05 Paragraphs .14–.19 of AU section 326, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1), discuss the use of assertions in obtaining audit evidence. In representing that the financial statements are fairly presented in accordance with generally accepted accounting procedures, management implicitly or explicitly makes assertions regarding the recognition, measurement, and disclosure of information in the financial statements and related disclosures. Assertions used by the auditor fall into the following categories:

Categories of Assertions

	Description of Assertions		
	Classes of transactions and events during the period	*Account balances at the end of the period*	*Presentation and disclosure*
Occurrence/Existence	Transactions and events that have been recorded have occurred and pertain to the entity.	Assets, liabilities, and equity interests exist.	Disclosed events and transactions have occurred.
Rights and Obligations	—	The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.	Disclosed events and transactions pertain to the entity
Completeness	All transactions and events that should have been recorded have been recorded.	All assets, liabilities, and equity interests that should have been recorded have been recorded.	All disclosures that should have been included in the financial statements have been included.
Accuracy/valuation and allocation	Amounts and other data relating to recorded transactions and events have been recorded appropriately.	Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts, and any resulting valuation or allocation adjustments are recorded appropriately.	Financial and other information is disclosed fairly and at appropriate amounts.
Cut-off	Transactions and events have been recorded in the correct accounting period.	—	—
Classification and understandability	Transactions and events have been recorded in the proper accounts.	—	Financial information is appropriately presented and described, and information in disclosures is expressed clearly.

.06 The auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks.

Assessing Risks at the Financial Statement Level

.07 Risks of material misstatement at the financial statement level are those risks that relate pervasively to the financial statements and potentially affect many individual assertions. Risks at the financial statement level may derive in particular from a weak control environment. The nature of the risks arising from a weak control environment is such that they are not likely to be confined to specific individual risks of material misstatement in particular classes of transactions, account balances, and disclosures. Rather, weaknesses such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

.08 Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- **Financial statement level risks can affect many assertions.** By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.
- **Assessing financial statement level risks requires significant judgment.** Ultimately, the auditor should relate identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of the auditor's professional judgment to determine the following:
  - The accounts and relevant assertions that could be affected
  - The likelihood that a financial statement misstatement will result from the increased risk
  - The significance of any misstatement
- **Risks at the financial statement level may not be identifiable with specific assertions.** Control weaknesses at the financial statement level can render well designed activity level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult, and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed, IT general controls may allow many unauthorized personnel the opportunity to access and inappropriately change the data and the well designed input controls will be rendered ineffective. Also, strengths in financial statement level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and therefore the assessment of the risks of material misstatement) is subjective and may vary from client to client.

Assessing Risks at the Assertion Level

.09 In making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions. Generally, the auditor gains an understanding of controls and relates them to relevant assertions in the context of processes and systems in which they exist. Doing so is useful because individual control activities often do not in themselves address a risk. Often, only multiple control activities, together with other elements of internal control, will be sufficient to address a risk.

.10 Conversely, some control activities may have a specific effect on an individual relevant assertion embodied in a particular class of transaction or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

.11 Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing or detecting and correcting misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

Significant Risks That Require Special Audit Consideration

.12 As part of the assessment of the risks of material misstatement, the auditor should determine which of the risks identified are, in the auditor's judgment, risks that require special audit consideration (such risks are defined as *significant risks*). One or more significant risks normally arise on most audits. In exercising this judgment, the auditor should consider inherent risk to determine whether the nature of the risk, the likely magnitude of the potential misstatement including the possibility that the risk may give rise to multiple misstatements, and the likelihood of the risk occurring are such that they require special audit consideration. AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), provides guidance to the auditor in determining whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor should evaluate the design of the entity's controls, including relevant control activities, over such risks and determine whether they are adequate and have been implemented. Paragraphs .45 and .53 of AU section 318 describe the consequences for further audit procedures of identifying risks as significant.

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.13 As part of the risk assessment described in paragraph .12, the auditor should evaluate the design and determine the implementation of the entity's controls, including relevant control activities, over those risks for which, in the auditor's judgment, it is not possible or practicable to reduce detection risk at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures. The consequences for further audit procedures of identifying such risks are described in paragraph .24 of AU section 318.

Revision of Risk Assessment

.14 The auditor's assessment of the risks of material misstatement at the relevant assertion level is based on available audit evidence and may change during the course of the audit as additional audit evidence is obtained. In particular, the risk assessment may be based on an expectation that controls are operating effectively to prevent or detect and correct a material misstatement at the relevant assertion level. In performing tests of controls to obtain audit evidence about their operating effectiveness, the auditor may obtain audit evidence that controls are not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency that is greater than is consistent with the auditor's risk assessment. When the auditor obtains audit evidence from performing further audit procedures that tends to contradict the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and should further modify planned audit procedures accordingly. See paragraphs .70 and .74 of AU section 318 for further guidance.

Documentation

.15 The auditor should document (*a*) the assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level and the basis for the assessment and (*b*) the risks identified and related controls evaluated as a result of the requirements for significant risks.

[*The next page is 3271.*]

AAM Section 3140

Audit Risk and Materiality

General

.01 Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures. The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. Audit risk is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. In other words, audit risk is the risk that the auditor will issue an unqualified opinion on financial statements that are materially incorrect.

.02 Financial statements are materially misstated when they contain misstatements whose effect, individually or in the aggregate, are important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles (GAAP). Materiality is the criterion used by accountants and auditors to distinguish between unimportant and important matters. The auditor's consideration of materiality is a matter of professional judgment and is influenced by a perception of the needs of users of the financial statements. The perceived needs of users are recognized in the discussion of materiality in FASB Concepts Statement No. 2, *Qualitative Characteristics of Accounting Information*, which defines materiality as

> The magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

Nature and Causes of Misstatements

.03 The representation in the auditor's standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor's belief that the financial statements, taken as a whole, are not materially misstated. Misstatements can result from errors or fraud.[1] and may consist of any of the following:

a. An inaccuracy in gathering or processing data from which financial statements are prepared

b. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under GAAP

c. The omission of a financial statement element, account, or item

d. A financial statement disclosure that is not presented in conformity with GAAP

e. The omission of information required to be disclosed in conformity with GAAP

f. An incorrect accounting estimate arising, for example, from an oversight or misinterpretation of facts

---

[1] The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1). See AAM section 3150, *Illegal Acts*. For those illegal acts that are defined in that statement as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts if the same as that for errors or fraud.

g. Management's judgments concerning an accounting estimate or the selection or application of accounting policies that the auditor may consider unreasonable or inappropriate

.04 Misstatements may be of two types: known and likely, defined as follows:

Known misstatements. These are specific misstatements identified during the audit arising from the incorrect selection or misapplication of accounting principles or misstatements of facts identified, including, for example, those arising from mistakes in gathering or processing data and the overlooking or misinterpretation of facts.

Likely misstatements. These are misstatements that:

a. arise from differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate (for example, because an estimate included in the financial statements by management is outside of the range of reasonable outcomes the auditor has determined).

b. the auditor considers likely to exist based on an extrapolation from audit evidence obtained (for example, the amount obtained by projecting known misstatements identified in an audit sample to the entire population from which the sample was drawn).

.05 The term *errors* refers to unintentional misstatements of amounts or disclosures in financial statements. The term *fraud* refers to an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage. Two types of misstatements resulting from fraud are relevant to the auditor's consideration in a financial statement audit: misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets. These two types of misstatements are further described in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1).

.06 See AAM section 3145 for a further discussion on fraud.

.07 Although the auditor has no responsibility to plan and perform the audit to detect immaterial misstatements, there is a distinction in the auditor's response to detected misstatements depending on whether those misstatements are caused by error or fraud. When the auditor encounters evidence of potential fraud, regardless of its materiality, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

Considerations at the Financial Statements Level

.08 The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of:

a. determining the extent and nature of risk assessment procedures.

b. identifying and assessing the risks of material misstatement.

c. determining the nature, timing, and extent of further audit procedures.

d. evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with GAAP.

.09 Audit risk is a function of the risk that the financial statements prepared by management are materially misstated and the risk that the auditor will not detect such material misstatement. The auditor should consider audit risk in relation to the relevant assertions related to individual account balances, classes of transactions, and disclosures and at the overall financial statement level. The auditor should perform risk assessment procedures to assess the risks of material misstatement both at the financial statement and the relevant assertion levels. The auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures based on those assessments.

.10 The auditor should perform the audit to reduce audit risk to a low level that is, in the auditor's professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms.

.11 The considerations of audit risk and materiality are affected by the size and complexity of the entity and the auditor's experience with and knowledge of the entity and its environment, including its internal control. As discussed in the following section, "Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level," certain entity related factors also affect the nature, timing, and extent of further audit procedures with respect to relevant assertions related to specific account balances, classes of transactions, and disclosures.

.12 In considering audit risk at the overall financial statement level, the auditor should consider risks of material misstatement that relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. Risks of this nature often relate to the entity's control environment and are not necessarily identifiable with specific relevant assertions at the class of transactions, account balance, or disclosure level. Such risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control. In developing responses to the risks of material misstatement at the overall financial statement level, the auditor should consider such matters as the knowledge, skill, and ability of personnel assigned significant engagement responsibilities; whether certain aspects of the engagement need the involvement of a specialist; and the appropriate level of supervision of assistants.

Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level

.13 In determining the nature, timing, and extent of audit procedures to be applied to a specific account balance, class of transactions, or disclosure, the auditor should design audit procedures to obtain reasonable assurance of detecting misstatements that the auditor believes, based on the judgment about materiality, could be material, when aggregated with misstatements in other balances, classes, or disclosures, to the financial statements taken as a whole.

.14 The auditor should consider audit risk at the individual account balance, class of transactions, or disclosure level because such consideration directly assists in determining the nature, timing, and extent of further audit procedures for the relevant assertions related to balances, classes, or disclosures. The auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk.

.15 At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk consists of (*a*) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (*b*) the risk (detection risk) that the auditor will not detect such misstatements. These components of audit risk may be assessed in quantitative terms, such as percentage-s,or in nonquantitative terms such as *high*, *medium*, or *low* risk. The way the auditor should consider these component risks and combines them involves professional judgment and depends on the auditor's approach or methodology.

.16 *Inherent risk* is the susceptibility of a relevant assertion to a misstatement that could be material, either individually or when aggregated with other misstatements, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related account balances, classes of transactions, and disclosures than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates that are subject to significant measurement uncertainty pose greater risks than do accounts consisting of relatively routine, factual data. External circumstances giving rise to business risks also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those circumstances that are peculiar to a specific relevant assertion, factors in the entity and its environment that relate to several or all of the classes of transaction, account balances, or disclosures may influence the inherent risk related to a specific relevant assertion. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.17 *Control risk* is the risk that a misstatement that could occur in a relevant assertion and that could be material, either individually or when aggregated with other misstatements, will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.18 Inherent risk and control risk are the entity's risks, that is, they exist independently of the audit of financial statements. AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), and other AU sections describe the risk of material misstatement as the auditor's combined assessment of inherent risk and control risk; however, the auditor may make separate assessments of inherent risk and control risk. Furthermore, auditors may implement the concepts surrounding the assessment of inherent and control risks and responding to the risk of material misstatement in different ways as long as they achieve the same result.

.19 The auditor should assess the risk of material misstatement at the relevant assertion level as a basis for further audit procedures. Although that assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. This basis may be obtained through the risk assessment procedures performed to obtain an understanding of the entity and its environment, including its internal control, and through the performance of suitable tests of controls to obtain audit evidence about the operating effectiveness of controls, where appropriate.

.20 *Detection risk* is the risk that the auditor will not detect a misstatement that exists in a relevant assertion that could be material, either individually or when aggregated with other misstatements. Detection risk is a function of the effectiveness of an audit procedure and of its application by the auditor. Detection risk cannot be reduced to zero because the auditor does not examine 100 percent of an account balance or a class of transactions and because of other factors. Such other factors include the possibility that an auditor might select an inappropriate audit procedure; misapply an appropriate audit procedure; or misinterpret the audit results. These other factors might be addressed through adequate planning; proper assignment of personnel to the engagement team; the application of professional skepticism, supervision, and review of the audit work performed; and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards. Detection risk can be disaggregated into additional components of tests of details risk and substantive analytical procedures risk.

.21 Detection risk relates to the substantive audit procedures and is managed by the auditor's response to risk of material misstatement. For a given level of audit risk, detection risk should bear an inverse relationship to the risk of material misstatement at the relevant assertion level. The greater the risk of material misstatement, the less the detection risk that can be accepted by the auditor. Conversely, the lower the risk of material misstatement, the greater the detection risk that can be accepted by the auditor. However, the auditor should perform substantive procedures for all relevant assertions related to material classes of transactions, account balances, and disclosures.

Materiality

.22 The auditor's consideration of materiality is a matter of professional judgment and is influenced by the auditor's perception of the needs of users of financial statements. Materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations.

Determining Materiality for the Financial Statements Taken as a Whole When Planning the Audit

.23 The auditor should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit. Determining a materiality level for the financial statements taken as a whole helps guide the auditor's judgments in identifying and assessing the risks of material misstatements and in planning the nature, timing, and extent of further audit procedures. This materiality level does not, however, establish a threshold below which identified misstatements are always considered to be immaterial when evaluating those misstatements and their effect on the financial statements and the auditor's report thereon.

.24 The auditor often may apply a percentage to a chosen benchmark as a step in determining materiality for the financial statements taken as a whole. When identifying an appropriate benchmark, the auditor may consider factors such as the following:

- The elements of the financial statements (for example, assets, liabilities, equity, income, and expenses) and the financial statement measures defined in GAAP (for example, financial position, financial performance, and cash flows), or other specific requirements
- Whether there are financial statement items on which, for the particular entity, users' attention tends to be focused (for example, for the purpose of evaluating financial performance)
- The nature of the entity and the industry in which it operates
- The size of the entity, nature of its ownership, and the way it is financed

Examples of benchmarks that might be appropriate, depending on the nature and circumstances of the entity, include total revenues, gross profit, and other categories of reported income, such as profit before tax from continuing operations. Profit before tax from continuing operations may be a suitable benchmark for profit oriented entities but may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when it is an owner managed business where the owner takes much of the pretax income out of the business in the form of remuneration. For asset based entities (for example, an investment fund) an appropriate benchmark might be net assets. Other entities (for example, banks and insurance companies) might use other benchmarks.

.25 When determining materiality, the auditor should consider prior periods' financial results and financial positions, the period-to-date financial results and financial position, and budgets or forecasts for the current period, taking account of significant changes in the entity's circumstances (for example, a significant business acquisition) and relevant changes of conditions in the economy as a whole or the industry in which the entity operates.

.26 Once materiality is established, the auditor should consider materiality when planning and evaluating the same way regardless of the inherent business characteristics of the entity being audited.

Tolerable Misstatement

.27 The initial determination of materiality is made for the financial statement taken as a whole. However, the auditor should allow for the possibility that some misstatements of lesser amounts than the materiality levels could, in the aggregate, result in a material misstatement of the financial statements. To do so, the auditor should determine one or more levels of tolerable misstatement. *Tolerable misstatement* (or *tolerable error*) is the maximum error in a population (for example, the class of transactions or account balance) that the auditor is willing to accept. Such levels of tolerable misstatement are normally lower than the materiality levels.

Qualitative Aspects of Materiality

.28 As indicated previously, judgments about materiality include both quantitative and qualitative information. As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

.29 Qualitative considerations also influence the auditor in reaching a conclusion about whether misstatements are material. Paragraph .60 of AU section 312 provides qualitative factors that the auditor may consider relevant in determining whether misstatements are material.

Considerations as the Audit Progresses

.30 Because it is not feasible for the auditor to anticipate all the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit, the auditor's judgment about materiality for planning purposes may differ from the judgment about materiality used in evaluating the audit findings.

.31 If the auditor concludes that a lower materiality level than that initially determined is appropriate, the auditor should reconsider the related levels of tolerable misstatement and appropriateness of the nature, timing, and extent of further audit procedures. The auditor should consider whether the overall audit strategy and audit plan need to be revised if the nature of identified misstatements and the circumstances of their occurrence are indicative that other misstatements may exist that, when aggregated with identified misstatements, could be material. The auditor should not assume that a misstatement is an isolated occurrence.

.32 If the aggregate of the misstatements (known and likely) that the auditor has identified approaches the materiality level, the auditor should consider whether there is a greater than acceptably low level of risk that undetected misstatements, when taken with the aggregate identified misstatements, could exceed the materiality level and, if so, the auditor should reconsider the nature and extent of further audit procedures.

Quantifying Materiality

.33 Although no authoritative body has established specific guidelines for materiality, there are certain rules of thumb that can be used in making a preliminary assessment of materiality.

.34 Generally, materiality guidelines are relative rather than absolute. In other words, materiality is usually set as a percentage rather than as an absolute amount. For example, an absolute amount such as $100,000 may be immaterial to a large, multinational corporation but very material to a small, closely held company. To apply percentage guidelines, auditors determine what base to use. Generally, auditors select a base that is relatively stable and predictable. Bases commonly used include income before taxes, revenues, and total assets. Generally, misstatements become material to income before they become material to the balance sheet. As a consequence, net income before taxes is often selected as the base.

.35 In small business audits, auditors sometimes make a number of significant audit adjustments. Thus, income before taxes may vary too much to be useful as a base. When income before taxes is not used as a base, auditors sometimes use either total revenue or an average of net income for several prior periods.

Example

.36 A common rule of thumb for materiality is 5 percent to 10 percent of pretax income (for profit-orientated entities). Some auditors apply this rule of thumb so that items less than 5 percent of normal pretax income are considered immaterial, whereas items that are more than 10 percent are material. For items between 5 percent to 10 percent, judgment is applied. For example, when unusual factors exist (perhaps the company is about to be sold for a multiple of audited earnings) auditors would tend to classify items between 5 percent and 10 percent as material. Others use 1 percent or 1.5 percent of the larger of total assets or revenues. (See exhibit 1 for a sample planning materiality worksheet.) Note that a percentage of pretax income may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when the owner takes much of the pretax income out of the business in the form of remuneration.

Exhibit 1

	Initials	Date
Done	_______	_______
Reviewed	_______	_______

Client Name
Planning Materiality Worksheet
Balance Sheet Date

1.	Unaudited total assets at balance sheet date	_______
2.	Unaudited total revenues at balance sheet date	_______
3.	Select the larger of line *1* or line *2*	_______
4.	Select a multiplier if audit risk is normal, or, if better than normal, select .01	_______
5.	Multiply line *3* by line *4*	_______
6.	Unaudited pretax income (or equivalent if not a for-profit entity)	_______
7.	Select a multiplier if audit risk is normal, or, if better than normal, select .1	_______
8.	Multiply line *6* by line *7*	_______
9.	Evaluate line *5* and line *8* along with other relevant factors and determine materiality for audit planning purposes	_______

.37 Consideration of which base to use may include such factors as income variability and the nature of the client's business and industry. For a not-for-profit organization, for example, the auditor would probably use total assets or revenues as a base because pretax income is not meaningful.

SEC Staff Bulletin on Materiality for SEC Registrants

.38 Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 99, *Materiality*, addresses the application of materiality thresholds to the preparation and audit of financial statements filed with the SEC. The SAB does not create new standards or definitions for materiality, but reaffirms the concepts of materiality as expressed in the accounting and auditing literature, as well as in long standing case law.

.39 The SAB states that registrants and the auditors of their financial statements cannot rely exclusively on quantitative benchmarks to determine whether an item is material to the financial statements. Equally important is a consideration of whether, in light of the surrounding circumstances, a reasonable investor would consider the item to be important. The SAB also states that management should not make intentional immaterial errors in a registrant's financial statements to "manage" earnings. It further reminds registrants of their legal responsibility to make and keep books, records, and accounts that, in reasonable detail, accurately and fairly reflect transactions and the disposition of assets. The SAB reminds auditors of their obligations to inform management and, in some cases, audit committees of illegal acts that come to the auditor's attention. The full text of the SAB can be viewed at the SEC Web site at www.sec.gov/interps/account/sab99.htm.

Communication of Misstatements to Management

.40 The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial,[2] and communicate them to the appropriate level of management. This communication should occur on a timely basis.

.41 When communicating details of misstatements, the auditor should distinguish between known misstatements and likely misstatements. The auditor should request management to record the adjustment needed to correct all known misstatements, including the effect of prior period misstatement, other than those that the auditor believes are trivial.

.42 If management decides not to correct some or all of the known and likely misstatements communicated to it by the auditor or identified when management examined a class of transactions, account balance, or disclosure, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that into account when considering the qualitative aspects of the entity's accounting practices and the implications for the auditor's report.

Evaluating Audit Findings

.43 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with GAAP, the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence and determine the effect of such misstatements on the financial statements taken as a whole.

.44 In aggregating misstatements, the auditor should include the effect on the current period's financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, the auditor should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

.45 In evaluating the effects of misstatements, the auditor should include both qualitative and quantitative materiality considerations (see paragraphs .59–.60 of AU section 312). Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material.

Likely Misstatements

.46 The auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined is referred to as *likely misstatements*.

---

[2] Matters that are "trivial" are amounts designated by the auditor below which misstatements need not be accumulated. This amount is set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements after the possibility of further undetected misstatements is considered.

.47 When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she ordinarily would not specifically identify misstatements but would only obtain an indication of whether a misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor ordinarily would have to employ other procedures to enable him to estimate the likely misstatement in the balance or class.

.48 When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. For example, if a $1,000 loan receivable misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $10,000. That projected misstatement also contributes to the auditor's assessment of likely misstatement.

.49 When auditing accounting estimates (for example, allowance for inventory obsolescence, allowance for doubtful accounts, or warranty obligations) the audit evidence gathered may support an amount for an estimate different from the amount the client has recorded. That difference may be considered reasonable by the auditor inasmuch as no one accounting estimate can be considered accurate with certainty. In that case, the difference between the estimate that the audit evidence supports and the estimate recorded in the financial statements would not be considered a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

Known Misstatements

.50 *Known misstatements* are those for which the amount of the misstatements are specifically identified. Such misstatements are often supported by highly reliable evidence, such as third party documents. An example of a known misstatement would be a failure to record an invoice for repairs expense.

Misstatements From the Prior Year

.51 Often overlooked is the consideration of misstatements detected in the prior year that affect the current year. For example, assume last year's aggregation of uncorrected misstatements included an item representing an overstatement of prepaid insurance and an understatement of insurance expense. This item would be included in the current year's aggregation of uncorrected misstatements because it affects the current year's insurance expense. Therefore, the prior year's aggregation of uncorrected misstatements should be reviewed for any items that may have an effect on the current year's financial statements.

Summarizing and Evaluating Misstatements

.52 Most firms prepare a summary of the uncorrected misstatements identified during the audit. This summary may be called the *Summary of Misstatements*, or the *Summary of Possible Journal Entries*, or other names. The summary presents known, likely, and prior period misstatements separately. The summary is used in evaluating the effect of uncorrected misstatements on the financial statements at the end of the audit.

.53 Some firms establish a predetermined dollar threshold below which misstatements need not be accumulated. This amount may be set so that any such misstatements, either individually, or when aggregated with other such misstatements, would not be material to the financial statements after the possibility of further undetected misstatements is considered.

.54 When concluding as to whether the effect of misstatements, individually or in the aggregate, is material, an auditor should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit.

.55 If the auditor believes that the financial statements taken as a whole are materially misstated, the auditor should request management to make the necessary corrections. If management refuses to make the corrections, the auditor must determine the implications for the auditor's report.

.56 If the auditor concludes that the effects of uncorrected misstatements, individually or in the aggregate, do not cause the financial statements to be materially misstated, they could still be materially misstated because of further misstatements remaining undetected. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases; consequently, the auditor should also consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

Documentation

.57 In addition to the documentation requirements in AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), AU section 312 states the auditor should document the following:

a. The levels of materiality, as discussed in paragraph .27 AU section 312, and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined

b. A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements

c. The auditor's conclusion as to whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion

d. All known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management

.58 Uncorrected misstatements should be documented in a manner that allows the auditor to

a. separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods

b. consider the aggregate effect of misstatements on the financial statements

c. consider the qualitative factors that are relevant to the auditor's consideration whether misstatements are material (see paragraph .60 of AU section 312)

[*The next page is 3291.*]

AAM Section 3145

Fraud

General

.01 AU section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1), states that "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud." Management is responsible for the design and implementation of programs and controls to prevent, deter, and detect fraud. That responsibility is described in paragraph .03 of AU section 110.

.02 An auditor's responsibilities relating to fraud are stated within the context of materiality to the financial statements taken as a whole. An auditor is not responsible for detecting fraud per se, but for obtaining reasonable assurances that material misstatements due to fraud are detected. An auditor is not responsible for detecting immaterial misstatements caused by fraud. Paragraph .03 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), states that the requirements and guidance set forth in AU section 316 are intended to be integrated into the overall audit process in a logical manner that is consistent with the requirements and guidance provided in other AU sections, including AU section 311, *Planning and Supervision*; AU section 312, *Audit Risk and Materiality in Conducting and Audit*; AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1). AU section 316 describes a process in which the auditor

- exercises professional skepticism,
- discusses the risks of material misstatements due to fraud with engagement personnel,
- gathers information needed to identify risks of material misstatement due to fraud,
- identifies risks that may result in a material misstatement due to fraud,
- assesses the identified risks after taking into account an evaluation of the entity's programs and controls that address the risks,
- responds to the results of the assessment,
- evaluates audit evidence,
- communicates about fraud to management, the audit committee, and others, and
- documents the auditor's consideration of fraud.

.03 Even though some requirements and guidance set forth in AU section 316 are presented in a manner that suggests a sequential audit process, auditing, in fact, involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly, the sequence of the requirements and guidance in AU section 316 may be implemented differently among audit engagements.

Description and Characteristics of Fraud

.04 The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. Paragraph .05 of AU section 316 defines fraud as an intentional act that results in a material misstatement in financial statements that are the subject of an audit.

.05 Three conditions generally are present when fraud occurs. First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Second, circumstances exist that provide an opportunity for a fraud to be perpetrated. Third, those involved are able to rationalize committing a fraudulent act.

Misstatements Arising From Fraudulent Financial Reporting

.06 Misstatements arising from fraudulent financial reporting are intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve acts such as the following:

- Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
- Misrepresentation in, or intentional omission from, the financial statement of events, transactions, or other significant information
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Misstatements Arising From Misappropriation of Assets

.07 Misstatements arising from misappropriation of assets involve the theft of an entity's assets where the effect of the theft causes the financial statement not to be presented, in all material respects, in conformity with generally accepted accounting principles. Misappropriation can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services not received. Misappropriation of assets may be accomplished by false or misleading records or documents, possibly created by circumventing controls, and may involve one or more individuals among management, employees, or third parties.

The Importance of Exercising Professional Skepticism

.08 Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence, and requires an ongoing assessment of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.09 Paragraph .14 of AU section 316 states that members of the audit team should discuss the potential for material misstatement due to fraud prior to or in conjunction with his or her information gathering procedures. The discussion should include the following:

- An exchange of ideas or brainstorming among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud

.10 Communication among the audit team members about the risks of material misstatement due to fraud should continue throughout the audit. See paragraphs .14–.18 of AU section 316 for further guidance.

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.11 In obtaining an understanding of the entity and its environment, including its internal control, information may come to the auditor's attention that should be considered in identifying risks of material misstatements due to fraud. The auditor should perform procedures to obtain information that is used to identify the risks of material misstatement due to fraud, including the following:

- Making inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed
- Considering any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit
- Considering whether one or more fraud risk factors exist
- Considering other information that may be helpful in identifying risks of material misstatement due to fraud

See paragraphs .19–.34 of AU section 316 for further guidance.

.12 Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain risk factors or other conditions may suggest to the possibility that fraud may exist. However, these conditions may be the result of circumstances other than fraud.

.13 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or error. Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify *fraud risk factors* that do not necessarily indicate the existence of fraud, but often are present in circumstances where fraud exists. A fraud risk factor is an event or condition that indicates the following:

- An incentive or pressure to perpetrate fraud
- Opportunities to carry out the fraud
- Attitudes or rationalizations to justify a fraudulent action

Identifying Risks That May Result in a Material Misstatement Due to Fraud[1]

.14 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives and pressures, opportunities, and attitudes and rationalizations. However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks.

.15 The identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including the following:

- The type of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets
- The significance of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements

[1] Paragraph .102 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA *Professional Standards*, vol. 1), states that the auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. This requirement provides a link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks.

- The likelihood of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements
- The pervasiveness of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions

.16 Material misstatements due to fraudulent financial reporting often result from an overstatement or understatement of revenues. Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. In addition, even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur and, accordingly, the auditor should address that risk (see paragraph .57 of AU section 316) apart from any conclusions regarding the existence of more specifically identifiable risks.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.17 As part of the understanding of internal control sufficient to plan the audit required by AU section 314, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation and assess those risks taking into account that evaluation.

Responding to the Results of the Assessments[2]

.18 The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence and is influenced by the nature and significance of the risks identified as being present and the entity's programs and controls that address these identified risks. The auditor's response can be (1) an overall response on how the audit is conducted, (2) a response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed, or (3) a response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur.

.19 The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action.

Overall Responses to the Risk of Material Misstatement

.20 Judgments about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

Assignment of personnel and supervision. The knowledge, skill, and ability of personnel assigned significant engagement responsibility should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud.

Accounting principles. The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.

---

[2] Paragraph .03 of AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1), states that to reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. See paragraphs .04 and .07 of AU section 318. This requirement provides a link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks.

Predictability of auditing procedures. The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.

Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.21 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending on the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures. See paragraphs .52–.56 of AU section 316 for more guidance.

Responses to Further Address the Risk of Management Override of Controls

.22 Management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. Accordingly, in addition to overall responses and responses that address specifically identified risks of material misstatement due to fraud, certain procedures should be performed to further address the risk of management override of controls, as discussed in paragraphs .58–.67 of AU section 316.

Evaluating Audit Evidence

.23 The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. The auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatements due to fraud. The auditor also should evaluate whether analytical procedure that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.

.24 At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud made earlier in the audit. Such an evaluation may provide further insight into the risk of material misstatement due to fraud and whether there is a need for additional or different audit procedures to be performed.

.25 When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. If the auditor has determined that misstatements are or may be the result of fraud, but the effect of the misstatements is not material, the auditor, nevertheless, should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. If the matter involves higher level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management. In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (*a*) the nature, timing, and extent of the tests of balances or transactions and (*b*) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

.26 If the auditor believes that the misstatement is, or may be, the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should

- attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred and, if so, its effect on the financial statements and the auditor's report thereon;
- discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and the audit committee;
- consider the implications for other aspects of the audit; and
- if appropriate, suggest that the client consult with legal counsel.

.27 The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to the audit committee or others with equivalent authority and responsibility. Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (*a*) the implications about the integrity of management and (*b*) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not always possible to definitely describe when withdrawal is appropriate. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

Communicating About Possible Fraud to Management, Those Charged With Governance, and Others

.28 Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to those charged with governance. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower level employees.

.29 If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected) the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity's internal control that should be communicated to management and those charged with governance. Also the auditor should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance.

.30 The auditor should recognize that in the following circumstances a duty to disclose outside the entity may exist

- to comply with certain legal and regulatory requirements.
- to a successor auditor when the successor makes inquiries in accordance with AU section 315, *Communications Between Predecessor and Successor Auditors* (AICPA, *Professional Standards*, vol. 1).
- in response to a subpoena.
- to a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters of fraud or possible fraud with parties outside the client.

Documenting the Auditor's Consideration of Fraud

.31 The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud
- Specific risks of material misstatement due to fraud that were identified and a description of the auditor's response to those risks
- If the auditor has not identified, in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion
- The results of the procedures performed to further address the risk of management override of controls
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions
- The nature of the communications about fraud made to management, the audit committee, and others

Practical Guidance

.32 The AICPA Practice Aid *Fraud Detection in a GAAS Audit—Revised Edition* provides a wealth of information and help on complying with the provisions of AU section 316. This practice aid is an other auditing publication as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

Fraud Risk Factor Memory Jogger

.33 An auditor may find this memory jogger helpful during planning and at other stages of the audit, when considering fraud risk factors and assessing the risk of material misstatement due to fraud. The following listing contains example risk factors for small, privately owned businesses. If used, this memory jogger should be tailored for the particular client being audited. Identified or possible risk factors should be added to the list. An auditor may also decide to remove the example factors from the list based on the circumstances. In any event, be sure to consider fraud risk factors that relate to fraudulent financial reporting and misappropriation of assets in every related category presented. An auditor should feel free to use this practice aid as he or she sees fit (for example, adding attachments, redesigning the form of the memory jogger). Finally, note that AU section 316 does not require an auditor to use a memory jogger or checklist of fraud risk factors.

Part 1—Fraudulent Financial Reporting

Fraud risk factors considered	*Present at client?*	*Audit response developed?*[3]	*Audit response documented? (W/P Ref.)*[4]	*Additional information*
A. Incentives and Pressures				
a. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by) the following:				
(1) High degree of competition or market saturation, accompanied by declining margins				
(2) New accounting, statutory, or regulatory requirements				
(3) Significant declines in customer demand and increasing business failures in either the industry or the economy in which the entity operates				
(4) High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates				
(5) Operating losses making the threat of bankruptcy or foreclosure, imminent				
(6) Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth				
(7) Rapid growth or unusual profitability especially compared to that of other companies in the same industry				
b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:				
(1) Need to obtain additional debt or equity financing to stay competitive, including financing of major research and development or capital expenditures				
(2) Marginal ability to meet debt repayment or other debt covenant requirements				
c. Management's personal net wealth is threatened by the entity's financial performance arising from the following:				
(1) Heavy concentrations of their personal net worth in the entity.				
(2) Personal guarantees of debt of the entity that are significant to their personal net worth.				

Fraud risk factors considered	Present at client?	Audit response developed?[3]	Audit response documented? (W/P Ref.)[4]	Additional information
(3) Adverse consequences on significant matters if *good* financial results are reported. Specific examples include management's motivation to inappropriately reduce income taxes, to defraud a divorced spouse or a partner of his or her share of the profits or assets of a business, or to convince a judge or arbitrator that the business in dispute is not capable of providing adequate cash flow. Keep in mind that you are not required to plan your audit to discover personal information (for example, marital status) of the owner-manager. However, if you become aware of such information, you may consider it in your assessment of risk of material misstatement due to fraud.				
d. There is excessive pressure on management or operating personnel to meet financial targets set by the owner, including sales or profitability incentive goals.				
B. Opportunities				
a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:				
(1) Significant related party transactions not in the ordinary course of business or with related entities not audited or audited by another firm				
(2) Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate				
(3) Significant, unusual, or highly complex transactions, especially those close to year-end that pose difficult "substance over form" questions				
b. There is a complex or unstable organizational structure as evidenced by the following:				
(1) Difficulty in determining the organization or individuals that have controlling interest in the entity				
(2) Overly complex organizational structure involving unusual legal entities or managerial lines of authority				
(3) High turnover of senior management or counsel				
c. Internal control components are deficient as a result of the following:				
(1) Inadequate monitoring of controls, including automated controls				
(2) High turnover rates or employment of ineffective accounting staff.				
(3) Ineffective accounting and information systems including situations involving reportable conditions				

(continued)

Fraud risk factors considered	Present at client?	Audit response developed?[3]	Audit response documented? (W/P Ref.)[4]	Additional information
C. Attitudes and Rationalizations				
1. A failure for management to display and communicate an appropriate attitude regarding internal control and the financial reporting process				
2. Ineffective communication and support of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards				
3. Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates				
4. Known history of violations or claims against the entity, its owner or senior management alleging fraud or violations of laws and regulations				
5. A practice by management of committing to creditors and other third parties to achieve aggressive or unrealistic forecasts				
6. Management failing to correct known reportable conditions on a timely basis				
7. An interest by management in employing inappropriate means to minimize reported earnings for tax motivated reasons				
8. Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality				
9. The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:				
a. Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters				
b. Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report				
c. Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or audit committee				
d. Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of audit personnel assigned to the engagement				

Part 2—Misappropriation of Assets

Fraud risk factors considered	*Present at client?*	*Audit response developed?*[3]	*Audit response documented? (W/P Ref.)*[4]	*Additional information*
A. Incentives and Pressures				
a. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.				
b. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:				
(1) Known or anticipated future layoffs				
(2) Promotions, compensation, or other rewards inconsistent with expectations				
B. Opportunities				
a. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:				
(1) Large amounts of cash on hand or processed				
(2) Company issued credit cards				
(3) Inventory items that are small in size, of high value, or in high demand				
(4) Easily convertible assets				
(5) Fixed assets, that, are small in size, marketable, or lacking observable identification of ownership				
b. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:				
(1) Inadequate segregation of duties or independent checks. Inadequate segregation of duties is quite often understandable in a small business environment in that it's a function of the entity's size. However, you may consider it in conjunction with other risk factors and with mitigating controls.				
(2) Inadequate management oversight of employees responsible for assets.				
(3) Inadequate job applicant screening of employees with access to assets.				

(continued)

Fraud risk factors considered	Present at client?	Audit response developed?[3]	Audit response documented? (W/P Ref.)[4]	Additional information
(4) Inadequate record keeping with respect to assets.				
(5) Inadequate system of authorization and approval of transactions (for example, in purchasing).				
(6) Inadequate physical safeguards over cash, investments, inventory, or fixed assets.				
(7) Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns.				
(8) Lack of mandatory vacations for employees performing key control functions.				
(9) Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.				
(10) Inadequate access controls over automated records.				
C. Attitudes and Rationalizations				
1. Disregard for the need for monitoring or reducing risks related to misappropriations of assets				
2. Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies				
3. Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee				
4. Changes in behavior or lifestyle that may indicate assets have been misappropriated				

[3] Based on the assessment of risk of material misstatement due to fraud, an auditor may respond to identified risk factors individually or in combination.

[4] The auditor's response to identified risk factors should be documented. Documentation should be maintained at a place in the working papers considered most suitable, depending upon the type of risk factor and the type of response. Generally, if a response is specific to a particular account balance or class of transactions, documentation of the audit procedures would be placed in the appropriate audit program (for example, cash investments). If it is determined that audit procedures already planned or normally carried out are a sufficient response to the identified risk factor, that fact should be documented.

[*The next page is 3311.*]

AAM Section 3150

Illegal Acts

General Comments

.01 The term *illegal acts* refers to violations of laws or governmental regulations. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

.02 Whether an act is illegal is a determination that is normally beyond the auditor's professional competence. The auditor's training and experience may provide a basis for recognition that some client acts coming to his or her attention may be illegal.

Direct and Material Effect Illegal Acts

.03 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

.04 The auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statement assertions rather than from the perspective of legality per se.

.05 The auditor's responsibility to detect and report misstatement resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for errors or fraud as described in AU section 110, *Responsibilities and Functions of the Independent Auditor* (AICPA, *Professional Standards*, vol. 1). That is, the auditor should design the audit to provide reasonable assurance that financial statement amounts are free from material misstatement resulting from these direct-effect illegal acts.

Other Illegal Acts

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects and their financial statement effect is indirect.

.07 An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. Normally, an audit conducted in accordance with generally accepted auditing standards does not include audit procedures specifically designed to detect illegal acts having an indirect effect on financial statements.

Engagement Planning Procedures

.08 The auditor should assess the risks that the entity has not complied with laws and regulations that have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies) in the planning phase of the audit.

.09 Matters that may influence the auditor's assessment include the following:

a. Management's understanding of the requirements of laws and regulations pertinent to audit objectives

b. The nature and extent of noncompliance noted in prior audits

c. Changes in requirements since the last audit

d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations

e. The client's policy relative to the prevention of illegal acts

.10 Normally, there is no need to include audit procedures specifically designed to detect illegal acts. However, if the auditor becomes aware of information that raises suspicions, he or she is obligated to apply additional procedures to determine whether an illegal act has, in fact, occurred (see paragraphs .07–.11 of AU section 317, *Illegal Acts by Clients* [AICPA, *Professional Standards*, vol. 1]).

[*The next page is 3331.*]

AAM Section 3155

Analytical Procedures

General Comments

.01 Analytical procedures are a natural extension of the auditor's understanding of the client's business and add to his or her understanding because the key factors that influence the client's business may be expected to affect the client's financial information. Analytical procedures are used in all three stages of the audit. In the planning stage, the purpose of analytical procedures is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions.[1] In the substantive testing stage of the audit, the purpose of analytical procedures is to obtain evidence, sometimes in combination with other substantive procedures, to identify misstatements in account balances and, thus, to reduce the risk that misstatements will remain undetected. The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion may be derived from tests of details, from analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor's judgment about the expected effectiveness and efficiency of the available procedures. In the overall review stage, the objective of analytical procedures is to assist the auditor in assessing the conclusions reached and in evaluating the overall financial statement presentation. In all cases, the effectiveness of analytical procedures lies in developing expectations that can reasonably be expected to identify unexpected relationships.

.02 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

Analytical procedures should be applied, to some extent, for the purposes referred to in the planning stage and the overall review stage above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

Analytical Procedures

.03 Analytical procedures are defined in paragraph .02 of AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), as "evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. ... A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of conditions to the contrary." The definition implies several key concepts:

- The "evaluations of financial information" suggests that analytical procedures will be used to understand or test financial statement relationships or balances.
- The "study of plausible relationships" implies an understanding of what can reasonably be expected and involves a comparison of the recorded book values with an auditor's expectations.

[1] In accordance with paragraph .06 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), analytical procedures are also performed as risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control. Refer to AU section 314 for further guidance.

- "Relationships among both financial and nonfinancial data" suggests that both types of data can be useful in understanding the relationships of the financial information and, therefore, in forming an expectation.

.04 Also, in accordance with paragraph .09 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), the auditor should apply analytical procedures in planning the audit to assist in understanding the entity and its environment and to identify areas that may represent specific risks relevant to the audit. For example, analytical procedures may be helpful in identifying the existence of unusual transactions or events and amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. In performing analytical procedures as risk assessment procedures, the auditor should develop expectations about plausible relationships that are reasonably expected to exist. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying risks of material misstatement. However, when such analytical procedures use data aggregated at a high level (which is often the situation), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, the auditor should consider the results of such analytical procedures along with other information gathered in identifying the risks of material misstatement.

.05 Analytical procedures performed during the overall review stage are designed to assist the auditor in assessing that (*a*) all significant fluctuations and other unusual items have been adequately explained and (*b*) the overall financial statement presentation makes sense based on the audit results and the auditor's knowledge of the business.

.06 During the substantive testing stage, analytical procedures may be used to obtain assurance that material misstatements are not likely to exist in financial statement account balances. If analytical procedures are used for substantive testing, the auditor should focus his or her analytical procedures on particular assertions about account balances and should give detailed attention to the underlying factors that affect those account balances through the development of an expectation independent of the recorded balance. Therefore, substantive analytical procedures generally are performed with more rigor and precision than those used for planning or overall review.

.07 AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1), provides requirements and guidance on the use of analytical procedures as substantive procedures. In designing substantive analytical procedures, the auditor should consider such matters as the following:

- The suitability of using substantive analytical procedures, given the assertions
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance
- The amount of any difference in recorded amounts from expected values that is acceptable

The auditor should consider testing the controls, if any, over the entity's preparation of information to be used by the auditor in applying analytical procedures. When such controls are effective, the auditor has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. When designing substantive analytical procedures, the auditor should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting some types of fraud. Alternatively, the auditor may consider whether the information was subjected to audit testing in the current or prior period. In determining the audit procedures to apply to the information upon which the expectation for substantive analytical procedures is based, the auditor should consider the guidance in paragraph .14 of AU section 318.

.08 In planning substantive analytical procedures, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced primarily by tolerable misstatement and should be consistent with the desired level of assurance. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balance, class of transactions, or disclosure could aggregate to an unacceptable amount. In designing substantive analytical procedures, the auditor should increase the desired level of assurance as the risk of material misstatement increases.

Analytical Procedure Process: Four Phases

.09 The use of analytical procedures can be considered a process that consists of four phases. The first phase is the expectation-formation process. In this phase, the auditor forms an expectation of an account balance or financial relationship. In doing so, the auditor determines the precision of the expectation and, thus, in part, the effectiveness of the analytical procedure.

.10 The remaining three phases consist of the identification, investigation, and evaluation of the difference between the auditor's expected value and the recorded book value in light of the auditor's materiality assessment. In the second phase, identification, the auditor identifies whether an unusual fluctuation exists between the expected and recorded amounts. In the third, investigation, the auditor investigates the cause of unexpected differences by considering possible causes and searching for information to identify the most probable causes. Finally, in the evaluation phase, the auditor evaluates the likelihood of material misstatement and determines the nature and extent of any additional auditing procedures that may be required.

Expectation Formation (Phase I)

.11 Forming an expectation is the most important phase of the analytical procedure process. The more precise the expectation (that is, the closer the auditor's expectation is to the correct balance or relationship), the more effective the procedure will be at identifying potential misstatements. Also, AU section 329 states that the expectation should be precise enough to provide the desired level of assurance that differences that may be potential misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate.

.12 The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

a. Financial information for comparable prior period(s) giving consideration to known changes

b. Anticipated results, for example, budgets or forecasts including extrapolations from interim or annual data

c. Relationships among elements of financial information within the period

d. Information regarding the industry in which the client operates, for example, gross margin information

e. Relationships of financial information with relevant nonfinancial information

.13 The effectiveness of an analytical procedure is a function of three factors related to the precision with which the expectation is developed: (*a*) the nature of the account or assertion, (*b*) the reliability and other characteristics of the data, and (*c*) the inherent precision of the expectation method used.

Identification and Investigation (Phases II and III)

.14 The next two phases of the analytical procedure process consist of identification and investigation. Identification begins by comparing the auditor's expected value with the recorded amount. Given that the auditor developed an expectation with a particular amount of difference that could be accepted without further explanation, he or she then compares the unexpected differences with the threshold. In substantive testing, an auditor testing for the possible misstatement of the book value of an account determines whether the audit difference was less than the auditor's threshold. If the difference is less than the acceptable threshold, taking into consideration the desired level of assurance from the procedure, the auditor accepts the book value without further investigation. If the difference is greater, the next step is to investigate the difference.

.15 In investigation, the auditor should evaluate possible explanations for the difference. The greater the precision of the expectation (that is, the closer the expectation is to the correct amount) the greater the likelihood that the difference between the expected and recorded amounts is due to misstatement rather than nonmisstatement causes. The difference between an auditor's expectation and the recorded book value of an account (value of an account not subject to auditing procedures) can be due to any or all of the following three causes: (*a*) the difference is due to misstatements, (*b*) the difference is due to inherent factors that affect the account being audited (for example, the predictability of the account or account subjectivity), and (*c*) the difference is due to factors related to the reliability of data used to develop the expectation (for example, data that have been subject to auditing procedures versus data that have not been subject to auditing procedures). The greater the precision of the expectation, the more likely the difference between the auditor's expectation and the recorded value will be due to misstatements (cause [*a*]). Conversely, the less precise the expectation, the more likely the difference is due to factors related to the precision of the expectation (causes [*b*] and [*c*]).

Evaluation (Phase IV)

.16 The final phase of the analytical procedure process consists of evaluating the difference between the auditor's expected value and the recorded amount. It is usually not practicable to identify factors that explain the exact amount of a difference identified for investigation. However, the auditor should attempt to quantify that portion of the difference for which plausible explanations can be obtained and, where appropriate, corroborated and determine that the amount that cannot be explained is sufficiently small to enable him or her to conclude on the absence of material misstatement.

.17 If a reasonable explanation can not be obtained, in accordance with paragraph .50 of AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence and determine the effect of such misstatements on the financial statements taken as a whole. Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole." In this case, the auditor should aggregate the misstatement, depending on materiality considerations, with other misstatements the entity has not corrected in the manner discussed in AU section 312.

Engagement Planning Procedures

.18 As stated previously, the purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (*a*) enhancing the auditor's understanding of the clients' business and the transactions and events that have occurred since the last audit date, and (*b*) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning ramifications.

.19 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent, and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

.20 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant, nonfinancial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

Audit Documentation Requirements

.21 Paragraph .22 of AU section 329 states than when an analytical procedure is used as the principal substantive test of a significant financial statement assertion the auditor should document all of the following:

- The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development
- Results of the comparison of the expectation to the recorded amounts or ratios developed from the recorded amounts
- Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

Analytical Procedures Audit Guide

.22 For additional guidance, practitioners may refer to the AICPA Audit Guide *Analytical Procedures*. The guide provides practical guidance for auditors on the effective use of analytical procedures. Specifically, the audit guide includes a discussion of AU section 329; concepts and definitions; a series of questions and answers, grouped in the following five categories: precision of the expectation, relationship of analytical procedures to the audit risk model, evaluation and investigation, purpose of analytical procedures, and fraud; and a case study illustrating the four types of expectation methods discussed in chapter 1 of the guide: trend analysis, ratio analysis, reasonableness testing, and regression analysis.

.23 The Audit Guide also includes illustrations that demonstrate the importance of forming expectations and considering the precision of the expectation, two of the most misunderstood concepts from AU section 329. The concepts discussed are applicable for all three stages of the audit (planning, substantive testing, and review). However, the audit guide focuses principally on how the concepts are applied to substantive testing because in designing substantive procedures, auditors ordinarily desire a specified level of audit assurance. To obtain the audit guide, call the AICPA order department at 888-777-7077 and ask for product no. 012558.

Sample Engagement Letters

.01 Following are illustrative engagement letters. These illustrative letters are examples and may not include all representations necessary for a particular engagement. They may be used as a starting point in the design of specific letters and then tailored to satisfy the terms of a particular engagement. These illustrative engagement letters are intended to be used in connection with engagements of nonpublic entities and are not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.

.02 Audit Engagement Leading to Opinion

LACKO, LYNCH, BROWN & COMPANY — Certified Public Accountants

[*Date*]
Mr. Matt Decker, President
Civil War Antiques, Inc.
111 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Decker:

This will confirm our understanding of the services we will provide to Civil War Antiques, Inc. (the Company) for the year ending December 31, 20XX.

We will audit the balance sheet of Civil War Antiques, Inc. as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them.

Audit Objective

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[1]

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements, or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

An audit includes obtaining an understanding of the entity and its environment, including its internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards.

Management Responsibilities

The Company's management is responsible for the basic financial statements and all accompanying information as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; fair presentation of the financial statements with generally accepted accounting principles; and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us and for the accuracy and completeness of that information.

The Company's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

The Company's management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud or illegal acts affecting the Company involving management, employees who have significant roles in internal control, and others where the fraud or illegal acts could have a material effect on the financial statements. Management's

[1] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94, "Indemnification Clause in Engagement Letters," under AICPA Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 191 par. .188–.189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses. Changes to independence rules regarding auditor indemnification and related issues are still pending. Practitioners should be alert to any final guidance.

responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud or illegal acts affecting the Company received in communications from employees, former employees, regulators, or others. In addition, the Company's management is responsible for identifying and ensuring that the Corporation complies with applicable laws and regulations and for taking timely and appropriate steps to remedy any fraud, illegal acts, or violations of contracts or grant agreements, or abuse that we may report.

Management is responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Other Engagement Matters and Limitations

As part of our engagement for the year ending December 31, 20XX, we will review the federal and state income tax returns for Civil War Antiques, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Professional standards require us to be independent with respect to the Company in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the Company, [xx] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.[2]

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant findings from the audit, including, among others: (*a*) the initial selection of and changes in significant accounting policies and their application; (*b*) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (*c*) significant difficulties that we encountered in dealing with management related to the performance of the audit; (*d*) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (*e*) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (*f*) management representations; (*g*) our views about matters that were the subject of management's consultation with other accountants about auditing and accounting matters; (*h*) major issues that were

[2] Ethics Ruling No. 112, "Use of a Third-Party Service Provider to Assist a Member in Providing Professional Services," under Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 191 par. .224-.225) requires that clients be informed if the firm will outsource professional services to third party service providers. If an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions indicating there could be a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out of pocket costs and administrative expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which we estimate to range from $XX,XXX to $XX,XXX. Additional expenses are expected to be $X,XXX.

The audit documentation for this engagement is the property of Lacko, Lynch, Brown & Company and constitutes confidential information. However, we may be requested to make certain audit documentation available to ______________________ [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected audit documentation to ______________________________ [*name of regulator*]. The ____________________ [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one. If you have any questions, please contact us. If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

.03 Change in Circumstances From Those Contemplated in Original Engagement Letter

MACARTHUR & KENNEY, CPA'S | Certified Public Accountants

[*Date*]
Mr. James Melakon, Treasurer
Nimbus Country Club
64 Vasily Road
Velikiye Luki, Ohio 10000

Dear Mr. Melakon:

As we agreed in our original engagement letter dated [*date*] we are notifying you that our audit of your December 31, 20XX financial statements requires additional procedures.

We have found that certain guest checks are held for only three months after they are paid. Thus, a substantial number of guest checks are not available for examination. Fortunately, your internal control activities allow us to use alternative procedures to satisfy ourselves on this part of the audit. However, this will require substantially more time than examining guest checks.

The fee for these additional services will be billed at our standard per diem rates and added to the fees quoted in our previous letter.

The situation has been discussed with your controller, who assured us that in the future all guest checks will be kept for two years.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Very truly yours,

MACARTHUR & KENNEY, CPA'S

.04 Conditions Encountered That Do Not Permit Expression of Opinion as Anticipated in Original Engagement Letter

GEROW, COLLINS & PATCH — Certified Public Accountants

[*Date*]
Mrs. Helene Daestrom, President
Cohrane Manufacturing, Inc.
1234 West Street
Cedar Hill, Tennessee 10000

Dear Mrs. Daestrom:

Our March 15, 20XX letter described our present engagement as an audit for the purpose of expressing an opinion on the financial statements based on our audit. This letter is to inform you that because of the circumstances described below, we will be required to qualify our opinion on these statements.

As you know, the Internal Revenue Service has proposed total income tax assessments of approximately $XXX,XXX for the three fiscal years ended December 31, 20XX. Your tax counsel has advised us that although you have a defensible position and will protest the assessments, counsel cannot offer an opinion as to your ultimate liability. No provision for this assessment or any portion of it is included in your December 31, 20XX financial statements, nor do you feel any is necessary.

Due to an inability to obtain sufficient appropriate audit evidence to support your assertions regarding the tax assessment situation described above, we will be unable to express an unqualified opinion. Our report will state the reasons for the qualification of our opinion.

You and your tax counsel have advised that you will inform us of any new developments in the proposed assessment before our report is issued so that we may consider their effect on your financial statements and on our report.

Sincerely,

GEROW, COLLINS & PATCH

____
[*Engagement Partner's Signature*]

Note:

> The client is not asked to sign this letter. Its purpose is to inform the client of the altered circumstances and the effect on the opinion. There is no change in the terms of the engagement. However, it might be desirable to have the client acknowledge receipt of this letter by signing a copy and returning it where—for example—it is a problem, or when there has been a history of misunderstandings.

.05 Audit of Not-for-Profit Financial Statements

LACKO, LYNCH, BROWN & COMPANY — Certified Public Accountants

[*Date*]
Mr. Matt Smith, President
Not-for-Profit Organization
222 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Smith:

This will confirm our understanding of the services we will provide to Not-for-Profit Organization (the Organization) for the year ending December 31, 20XX.

We will audit the balance sheet of Not-for-Profit Organization as of December 31, 20XX, and the related statements of activities and cash flows for the year then ended, for the purpose of expressing an opinion on them.

Audit Objective

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[3]

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected individuals, funding sources, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

---

[3] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule 101 (AICPA, *Professional Standards*, vol. 2, ET sec. 191 par. .188–.189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses. Changes to independence rules regarding auditor indemnification and related issues are still pending. Practitioners should be alert to any final guidance.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements, or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the organization and obligations related to the accountability of the organization, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

An audit includes obtaining an understanding of the Organization and its environment, including its internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards.

Management Responsibilities

The Organization's management is responsible for the basic financial statements and all accompanying information as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; fair presentation of the financial statements with generally accepted accounting principles; and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us and for the accuracy and completeness of that information.

The Organization's management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

The Organization's management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud affecting the Organization involving management, employees who have significant roles in internal control, and others where the fraud could have a material effect on the financial statements. Management's responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud affecting the Organization received in communications from employees, former employees, regulators, or others. In addition, the Organization's management is responsible for identifying and ensuring that the Organization complies with applicable laws and regulations and for taking timely and appropriate steps to remedy any fraud, illegal acts, or violations of contracts or grant agreements, or abuse that we may report. Management is responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Other Engagement Matters and Limitations

As part of our engagement, we will prepare the Federal Form 990 and [*identify other returns*] for the year ended [*date*]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of the Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Professional standards require us to be independent with respect to the Organization in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the Organization, [XX] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.[4]

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant findings from the audit, including, among others: (*a*) the initial selection of and changes in significant accounting policies and their application; (*b*) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (*c*) significant difficulties that we encountered in dealing with management related to the performance of the audit; (*d*) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (*e*) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (*f*) management representations; (*g*) our views about matters that were the subject of management's consultation with other accountants about auditing and accounting matters; (*h*) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions indicating there could be a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

---

[4] Ethics Ruling No. 112 under Rule 102 (AICPA, *Professional Standards*, vol. 2, ET sec. 191 par. .224-.225) requires that clients be informed if the firm will outsource professional services to third party service providers. If the an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers' proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket costs and administrative expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which we estimate to range from $XX,XXX to $XX,XXX. Additional expenses are expected to be $X,XXX.

The audit documentation for this engagement is the property of Lacko, Lynch, Brown & Company and constitutes confidential information. However, we may be requested to make certain audit documentation available to [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected audit documentation to [*name of regulator*]. The [*name of regulator*] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one. If you have any questions, please contact us. If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

.06 Audit of Not-for-Profit Financial Statements Subject to the Provisions of OMB Circular A-133

LACKO, LYNCH, BROWN & COMPANY — Certified Public Accountants

[*Date*]
Mr. Matt Cox, President
Not-for-Profit Organization
333 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Cox:

This will confirm our understanding of the services we will provide to Not-for-Profit Organization (the Organization) for the year ending December 31, 20XX.[5]

We will audit the balance sheet of Not-for-Profit Organization as of December 31, 20XX, and the related statements of activities, changes in partners' capital, and cash flows for the year then ended, for the purpose of expressing an opinion on them. We also will report on the following additional information accompanying the basic financial statements: (1) schedule of expenditures of federal awards and (2) [*insert additional information here*].

Audit Objectives

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America and to report on the additional information referenced in the second paragraph of this letter when considered in relation to the financial statements taken as a whole.

Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America; the standards for financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; the Single Audit Act Amendments of 1996; and the requirements of OMB Circular A-133, and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion and to render the required reports. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We will also provide a report (that does not include an opinion) on internal control related to the financial statements and compliance with the provisions of applicable laws, regulations, contracts, agreements, and grants, noncompliance with which could have a material effect on the financial statements as required by *Government Auditing Standards*. The report on internal control and compliance will include a statement that the report is intended solely for the information and use of management, [*insert audit committee, if applicable*], the board of directors, and specific legislative or regulatory bodies, federal awarding agencies, and if applicable, pass through entities and is not intended to be and should not be used by anyone other than these specified parties. If, during our audit, we become aware that the Company is subject to an audit requirement that is not encompassed in the terms of this engagement, we will communicate to management and those charged with governance that an audit is accordance with auditing standards generally accepted in the United States of America and the standards for financial audits contained in *Government Auditing Standards* may not satisfy the relevant legal, regulatory, or contractual requirements.

Audit Procedures

---

[5] *Note to users of this sample engagement letter*: You may add to the engagement letter as appropriate, for additional considerations, such as performing procedures relating to a compliance audit of or limited scope audits of subrecipients, the involvement of other auditors (for example, a joint audit with a minority firm), or the auditee's responsibility for obtaining the cooperation of the predecessor auditor.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.[6]

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected individuals, funding sources, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a "representation letter") from you about the financial statements and related matters.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the organization and obligations related to the accountability of the organization, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

As part of our audit of the basic financial statements, we will obtain an understanding of the Organization and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on the financial statements. Our audit is not designed to provide an opinion on the [*abbreviated name*]'s internal control over financial reporting or to identify deficiencies in the design or operation of internal control over financial reporting. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards, *Government Auditing Standards*, and the requirements of OMB Circular A-133.

We also will perform tests of the Organization's compliance with certain provisions of laws, regulations, and the provisions of contracts or grant agreements. However, it is not our objective to provide an opinion on overall compliance with those provisions and, accordingly, we will not express such an opinion.

In planning the audit, we will follow up on known significant findings and recommendations from previous financial audits, attestation engagements, performance audits, or other studies that directly relate to the objectives of the current audit to determine the effect on our risk assessment and audit procedures.

As part of our audit, we will be alert to situations or transactions that could be indicative of abuse, which involves behavior that is deficient or improper when compared with behavior that a prudent person would consider reasonable and necessary business practice given the facts and circumstances. The determination

[6] Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule 101 (AICPA, *Professional Standards*, vol. 2, ET sec. 191 par. .188–.189) states that the following indemnification clause in an engagement letter would not impair a CPA's independence: "The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management." Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses. Changes to independence rules regarding auditor indemnification and related issues are still pending. Practitioners should be alert to any final guidance.

of abuse is subjective; *Government Auditing Standards* does not expect us to provide reasonable assurance of detecting abuse, and we will not design the audit to detect abuse. However, if we become aware of indications of material abuse, we will apply procedures to ascertain whether abuse has occurred.

A schedule of expenditures of federal awards will accompany the Organization's basic financial statements. We will subject that schedule to the audit procedures applied in our audit of the basic financial statements and render our opinion on whether that schedule is fairly presented, in all material respects, in relation to the basic financial statements taken as a whole. We also will make specific inquiries of management about that schedule, which management will affirm to us in its representation letter.

Management Responsibilities

The Organization's management is responsible for the basic financial statements and the schedule of expenditures of federal awards as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; and the identification of and compliance with laws, regulations, and the provisions of contracts or grant agreements. Management is responsible for making all financial records and related information available to us and for the accuracy and completeness of that information. Management also is responsible for adjusting the basic financial statements to correct material misstatements and for affirming to us in its representation letter that the effects of any uncorrected misstatements that we accumulate during the current audit and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the basic financial statements.

The Organization's management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud or illegal acts affecting the Organization involving management, employees who have significant roles in internal control, and others where the fraud or illegal acts could have a material effect on the financial statements. Management's responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud or illegal acts affecting the Organization received in communications from employees, former employees, regulators, or others.

You are responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Compliance Audit of Federal Programs

The Organization's management is responsible for compliance with laws, regulations, and the provisions of contracts or grant agreements related to federal programs. Encompassed in that responsibility is the establishment and maintenance of internal control over compliance that provides reasonable assurance that the Organization is managing federal awards in compliance with laws, regulations, and provisions of contracts or grant agreements.

Our responsibility is to express an opinion on whether the Organization complied with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the Organization's major federal programs. Following the criteria for federal program risk in OMB Circular A-133, we will determine which federal programs should be considered major programs and thus included within the scope of the compliance audit.[7]

We will plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements that are applicable to the Organization's major federal programs could have a direct and material effect on each of its major federal programs. An audit of compliance includes examining, on a test basis, evidence about the Organization's compliance with those requirements and

[7] *Note to users of this sample engagement letter:* This paragraph may be modified if the auditor elects to use a dollar threshold approach to selecting major programs, as allowed by A-133 for first-year single audits.

performing such other procedures we consider necessary in the circumstances. Our audit does not provide a legal determination on the Organization's compliance with those requirements.

As part of our audit of compliance applicable to the Organization's major federal programs, we will obtain an understanding of the Organization's internal control over compliance sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on compliance and not to provide assurance on the internal control over compliance. We also will perform testing of internal control as required by OMB Circular A-133. We are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under AICPA professional standards, *Government Auditing Standards*, and the requirements of OMB Circular A-133.

We also will follow up on prior audit findings by performing procedures to assess the reasonableness of the Organization's summary schedule of prior audit findings.

We will include in our reports information about the following, if any: material noncompliance with laws, regulations, and provisions of contracts or grant agreements related to major programs; certain known questioned costs; fraud affecting federal awards; abuse that is material to a federal program; and other federal award audit findings as required by *Government Auditing Standards* and OMB Circular A-133.

Other Communications Arising From the Audit

In connection with planning and performing our audit, we will communicate certain matters to appropriate Organization's personnel and to those charged with governance, including our responsibilities for testing and reporting on internal control over financial reporting and on compliance with laws, regulations, and provisions of contracts or grant agreements, both for our financial statement audit and our compliance audit of major federal programs.[8] We also will communicate certain matters of interest, as applicable, to the audit committee, including changes in significant accounting policies or their application, adjustments arising from the audit that could either individually or in the aggregate have a significant effect on the Organization's financial reporting process, and fraud involving senior management that is not otherwise included in our reports.

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant audit findings, including, among others: (*a*) the initial selection of and changes in significant accounting policies and their application; (*b*) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (*c*) serious difficulties that we encountered in dealing with management related to the performance of the audit; (*d*) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (*e*) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (*f*) management representations; (*g*) our views about matters that were the subject of management's consultation with other accountants about auditing and accounting matters; (*h*) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions indicating there could be a substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

In planning and performing our audit, we will ask management, those charged with governance, the internal auditor, and others within the entity about fraud or suspected fraud; allegations of fraud or

[8] *Note to users of this sample engagement letter: Government Auditing Standards*, paragraphs 4.08–.09, specifies the parties to whom this communication should be made.

suspected fraud; the risks of fraud; programs and controls established to prevent and detect fraud; whether management has communicated information about those programs and controls to those charged with governance; and how management communicates to employees its views on business practices and ethical behavior.

We also may communicate in a management letter certain matters identified during the audit or possible ways to improve the Organization's operational efficiency and effectiveness or otherwise improve its internal control or other policies or procedures. Under GAAS and *Government Auditing Standards*, we also may be required to directly report fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse to outside parties.

Other Engagement Matters and Limitations

As part of our engagement, we will prepare the Federal Form 990 [*and identify other returns*] for the year ended [*date*]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Professional standards require us to be independent with respect to the [*abbreviated name*] in the performance of our services. Any discussion that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual's base compensation at the [*abbreviated name*], [XX] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.[9]

The Organization agrees to make available to us all records, documentation, and information we request in connection with our audit, to disclose to us all material information, and to give to us the full cooperation of the Organization's personnel. An enclosure to this letter describes the assistance to be supplied by Organization personnel, including preparation of schedules and analyses of accounts, and the timing for that assistance. Timely completion of that work will facilitate the conclusion of our audit.

The Organization agrees to provide us printer's proofs of its basic financial statements, schedule of expenditures of federal awards, and other information for its Circular A-133 reporting package for our review and approval before printing. The [abbreviated name] also agrees to provide us with a copy of the final reproduced material for our approval before distributing it.

[9] Ethics Ruling No. 112 under Rule 102 (AICPA, *Professional Standards*, vol. 2, ET sec. 191 par. .224–.225) requires that clients be informed if the firm will outsource professional services to third party service providers. If the an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

The Organization also is responsible for:

- Taking timely and appropriate steps to remedy fraud, illegal acts, violations of provisions of contracts or grant agreements, or abuse that we report.
- Having a process to track the status of audit findings and recommendations.
- Identifying for us previous financial audits, attestation engagements, performance audits, or other studies related to the objectives of our audit and the corrective actions taken to address significant findings and recommendations.
- Providing its views on our current findings, conclusions, and recommendations, as well as management's planned corrective actions, for our reports. The corrective action plan that the Organization develops for its OMB Circular A-133 reporting package may fully or partially satisfy this responsibility.

Our reports on the Organization's internal control and compliance will state that they are intended solely for the information and use of those charged with governance, management, federal awarding agencies, and pass-through entities and are not intended to be and should not be used by anyone other than these specified parties. However, the Organization should make copies of our reports available for public inspection unless they are restricted by law or regulation, or contain privileged and confidential information.

The documentation for this audit is our firm's property and constitutes confidential information. We will maintain that documentation for the minimum period of time required by applicable auditing standards and requirements. In accordance with *Government Auditing Standards*, OMB Circular A-133, and federal law, we may be required, upon request, to make certain of that documentation (including photocopies) available to other auditors or reviewers, including the cognizant or oversight agency for audit or its designee, a federal agency providing direct or indirect funding, and the U.S. Government Accountability Office. Those parties may intend, or decide, to distribute the photocopies or information contained therein to others, including other governmental agencies and the public. We will notify you of any such requests.

Our firm undergoes a periodic external peer review that examines the quality of our auditing practice. We are enclosing with this letter a copy of the report and letter of comment from our firm's most recent external peer review.

We are always available to meet with you or other executives at various times throughout the year to discuss current business, operational, accounting, and auditing matters affecting the Organization. Whenever you feel such meetings are desirable, please let us know. We also are prepared to provide services to assist you in any of these areas. We also will be pleased, at your request, to attend your directors' meetings.

If the Organization wishes to assert that it complied, in all material respects, with specified laws and regulations, we could perform an engagement in accordance the American Institute of Certified Public Accountants' and *Government Auditing Standards'* attestation standards. The procedures we would perform would be more limited than if we were to express an opinion on management's assertions.

Our fee estimate, which is shown in a separate schedule, is based on a "core" amount for the financial statement audit and tax return preparation services plus an incremental amount for the compliance audit of federal programs, based on the Organization's actual number of major programs.[10] We also will charge the Organization for our out-of-pocket expenses. We will bill our fees as work progresses with payment to be made upon presentation. Our initial fee estimate and our target date for delivering our reports assume that we will receive the aforementioned assistance from Organization personnel and that we will not encounter unexpected circumstances. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of fees or our report delivery date, which is on or about [*date*]. Prior to the release of the audit reports, we will require payment of 100 percent of all fees billed.

---

[10] *Note to users of this sample engagement letter:* Various factors may change the level of effort required for the compliance audit of federal programs from year-to-year. For example, the auditee may have more or fewer federal programs or major programs because of new or discontinued federal programs, increased or decreased federal funding for existing programs, and OMB changes in program clusters, or the auditee may achieve or lose low risk auditee status. As shown in this sample letter, auditors could consider pricing their services for the compliance audit based on the number of major programs to be audited.

Our charges for other services will be agreed to separately.

* * *

The arrangements described in this letter will be updated annually.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

AAM Section 4000
Internal Control

The material included in these sections on internal control is presented for illustrative purposes only. The comments and illustrations are neither all inclusive nor are they prescribed minimums. They are intended as conveniences for users of this manual who may want assistance when developing materials to meet their individual needs.

This manual is a nonauthoritative kit of practice aids and, accordingly, these sections on internal control do not include extensive explanation or discussion of authoritative pronouncements. Users of this manual are urged to refer directly to applicable authorita tive pronouncements when appropriate.

TABLE OF CONTENTS

[*The next page is 4101.*]

AAM Section 4100

Introduction

Overview

.01 As discussed in AAM section 3125, the auditor should obtain an understanding of the five components of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. A *sufficient* understanding means the auditor should perform risk assessment procedures to evaluate the design of controls relevant to an audit and to determine whether they have been implemented. In obtaining this understanding, the auditor should consider how an entity's use of information technology (IT) and manual procedures may affect controls relevant to the audit.

.02 AU section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), provides a framework to help the auditor obtain an understanding of internal control. This framework breaks internal control into five components as identified in paragraph .03 of AAM section 4200, *Internal Control Framework*. The division of internal control into the five components provides a useful framework for auditors to consider how different aspects of an entity's internal control may affect the audit.

.03 The auditor's understanding of internal control is used to

- identify types of potential misstatement;
- consider factors that affect the risks of material misstatement;
- design tests of controls, when applicable; and
- design substantive procedures.

.04 The auditor's understanding of a client's internal control should be based on previous experience with the client and the following:

- Inquiries of appropriate management, supervisory, and staff personnel
- Analytical procedures
- Inspection of documents and records
- Observation of the entity's activities and operations

.05 AAM section 4200 provides more detail on the internal control framework described in AU section 314. Refer to AAM section 5100, *Designing Further Audit Procedures*, for guidance pertaining to the design of further audit procedures (tests of controls or substantive procedures, or both) and AAM section 5200, *Performing Tests of Controls*, for specific guidance on the performance of tests of controls.

[*The next page is 4201.*]

AAM Section 4200

Internal Control Framework

Introduction

.01 As described in AAM section 3125, AU section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), provides a framework to help the auditor obtain an understanding of internal control. That framework is built on two concepts: objectives and components.

.02 An *objective* is what the entity is trying to achieve. Generally, an entity tries to achieve objectives in the following three categories:

- Reliability of financial reporting
- Effectiveness and efficiency of operations
- Compliance with applicable laws and regulations

.03 For each of these objectives, internal control consists of the following five interrelated components:

- *Control environment*, which sets the tone of an organization and influences the control consciousness of its people. It is the foundation for all other components of internal control and provides discipline and structure.
- *Risk assessment*, which is the entity's identification and analysis of relevant risks to achievement of its objectives. It forms a basis for determining how the risks should be managed.
- *Control activities*, which are the policies and procedures that help ensure management directives are carried out.
- *Information and communication systems*, which support the identification, capture, and exchange of information in a form and time frame that enables people to carry out their responsibilities.
- *Monitoring*, which is a process that assesses the quality of internal control performance over time.

.04 Although an entity's internal control addresses objectives referred to in paragraph .02, not all of these objectives and related controls are relevant to an effective audit of an entity's financial statements. Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles (GAAP), including the management of risk that may give rise to a risk of material misstatement in those financial statements. An entity may have controls that relate to operations and compliance with laws and regulations that are not relevant to an audit and, therefore, need not be considered.

.05 *The Jones family owns and operates several neighborhood grocery stores in Anytown. The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the* financial reporting *objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they run out of stock. This control activity is part of the* operations *objective. Each store has a small deli that prepares sandwiches and some hot foods. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the* compliance *objective of the entity*.

.06 *The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company's financial statement. If you were the auditor of Jones Grocery, you may wish to ask about and document these controls for client service or other purposes, but because these controls are not relevant to the audit, you are not required to do so.*

.07 However, if controls relating to operations and compliance objectives pertain to data the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.08 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she might obtain an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting data about those transactions are entered into and flow through the financial reporting system
- What files are processed
- What nature of processing is involved in producing the report

.09 Controls relating to operations and compliance objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.10 Internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.11 The internal control framework described in AU section 314 is only a means to help the auditor consider the impact of an entity's internal control in an audit. The auditor's primary consideration is whether, and how, a specific control prevents or detects and corrects material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.12 *Suppose you are the auditor of Jones Grocery. As on all audits, you should obtain an understanding of internal control sufficient to assess the risks of material misstatement and to design the nature, timing, and extent of further audit procedures. To achieve this, you organize your inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objectives. As a result of performing your procedures, you discover the client's bank reconciliation procedures. Should a bank reconciliation be considered a "control procedure"? What about the fact that someone follows up and investigates old or unusual reconciling items? Is that considered a "monitoring" activity?*

.13 *These questions are rhetorical because the issue of how to classify a particular control is irrelevant for your purposes. As an auditor, your primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.*

Effect of Information Technology on Internal Control

.14 An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.15 The use of IT also affects the fundamental manner in which transactions are initiated, authorized, recorded, processed, and reported. In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, reconciliations, and follow-ups of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

.16 IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to

- consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data;
- enhance the timeliness, availability, and accuracy of information;
- facilitate the additional analysis of information;
- enhance the ability to monitor the performance of the entity's activities and its policies and procedures;
- reduce the risk that controls will be circumvented; and
- enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

.17 IT also poses specific risks to an entity's internal control, including

- reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;
- unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions;
- unauthorized changes to data in master files;
- unauthorized changes to systems or programs;

- failure to make necessary changes to systems or programs;
- inappropriate manual intervention; and
- potential loss of data or inability to access data as required.

.18 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

.19 Manual controls of systems may be more suitable where judgment and discretion are required, such as for the following circumstances:

- Large, unusual, or nonrecurring transactions
- Circumstances where misstatements are difficult to define, anticipate, or predict
- In changing circumstances that require a control response outside the scope of an existing automated control
- In monitoring the effectiveness of automated controls

.20 Manual controls are performed by people and, therefore, pose specific risks to the entity's internal control. Manual controls may be less reliable than automated controls because they can be more easily bypassed, ignored, or overridden and they are also more prone to errors and mistakes. Consistency of application of a manual control element cannot, therefore, be assumed. Manual systems may be less suitable for the following:

- High volume or recurring transactions, or in situations where errors that can be anticipated or predicted can be prevented or detected by control parameters that are automated.
- Control activities where the specific ways to perform the control can be adequately designed and automated.

.21 The purpose of this section is to provide guidance on each of the five components that comprise the internal control framework. This guidance may help the auditor perform procedures to obtain an understanding of internal control. These procedures generally include the following steps:

- Understand internal control components that have a pervasive effect on the organization
- Understand how IT is used to process significant accounting information
- Understand control activities for significant account balances or transaction cycles
- Assess the risk of management override and lack of segregation of duties

Focus on the Small Business Entity

.22 This section emphasizes the audit of a small business entity. Small business entities are typically characterized by

- a single owner or a small group of owners who manage the business on a day to day basis;
- a small number of employees involved in the accounting function;

- no outside board of directors or internal audit function; and
- the use of off the shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.23 This section provides some guidance for the audits of medium to large businesses.

Controls Relevant to Reliable Financial Reporting and to the Audit

.24 There is a direct relationship between an entity's objectives and the internal control components it implements to provide reasonable assurance about their achievement. In addition, internal control is relevant to the entire entity or to any of its operating units or business functions. Although the entity's objectives and, therefore, controls relate to financial reporting, operations, and compliance, not all of these objectives and controls are relevant to the audit. Further, although internal control applies to the entire entity, or to any of its operating units or business functions, an understanding of internal control relating to each of the entity's operating units and business functions may not be necessary to the performance of the audit.

.25 Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with GAAP, including the management of risk that may give rise to a risk of material misstatement in those financial statements. However, it is not necessary to assess all controls in connection with assessing the risks of material misstatement and designing and performing further audit procedures in response to assessed risks. It is a matter of the auditor's professional judgment as to the controls or combination of controls that should be assessed. However, as stated in paragraph .115 of AU section 314, for significant risks—to the extent the auditor has not already done so—the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented. In exercising that judgment, the auditor should consider the circumstances, the applicable component, and factors such as the following:

- Materiality
- The size of the entity
- The nature of the entity's business, including its organization and ownership characteristics
- The diversity and complexity of the entity's operations
- Applicable legal and regulatory requirements
- The nature and complexity of the systems that are part of the entity's internal control, including the use of service organizations

.26 Controls over the completeness and accuracy of information produced by the entity may also be relevant to the audit if the auditor intends to make use of the information in designing and performing further audit procedures. The auditor's previous experience with the entity and information obtained in understanding the entity and its environment and throughout the audit assist the auditor in identifying controls relevant to the audit.

.27 Controls relating to operations and compliance[1] objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

---

[1] An auditor may need to consider controls relevant to compliance objectives when performing an audit in accordance with AU section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1).

.28 An entity generally has controls relating to objectives that are not relevant to an audit and, therefore, need not be considered. For example, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as a manufacturing plant's computerized production scheduling system), but these controls ordinarily would not be relevant to the audit.

.29 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.30 Controls relevant to the audit may exist in any of the components of internal control and a further discussion of controls relevant to the audit is included in paragraphs .67–.101 of AU section 314. In addition, paragraphs .115 and .117 of AU section 314 discuss certain risks for which the auditor should evaluate the design of the entity's controls over such risks and determine whether they have been implemented.

Internal Control Components

Understanding the Control Environment

.31 The control environment sets the tone of an organization. It influences the control consciousness of its people and is the foundation for all other components of internal control. In obtaining an understanding of the client's control environment, the auditor should obtain sufficient knowledge to understand the attitudes, awareness, and actions of those charged with governance concerning the entity's internal control and its importance in achieving reliable financial reporting. In understanding the control environment, the auditor should concentrate on the implementation of controls because controls may be established but not acted upon. The following paragraphs describe some factors the auditor should consider when evaluating a client's control environment.

.32 *Integrity and Ethical Values*. The effectiveness of internal control cannot rise above the integrity and ethical values of the owner-manager. Integrity and ethical values are essential elements of the control environment because they affect the design, administration, and monitoring of other internal control components.

.33 Management may *tell you* a great deal about their integrity and ethical values. They may even commit their *words* to a *written document*. Responses to inquiries and written policies are good, but compliance with ethical standards is best ensured by focusing on management's *actions* and how these actions affect the entity on a day to day basis.

.34 For management's integrity and ethical values to have a positive effect on the entity, the following ordinarily should exist.

- The business owner and management should personally have high ethical and behavioral standards.
- These standards should be communicated to company personnel. In a small business, this communication is often informal.
- The standards should be reinforced.

.35 When observing and evaluating management's *actions* be alert for the following:

- *Segregation of personal from business funds and activities*. Many small business owners mix their personal and business activities, for example, the company may pay the owner's credit card bills even if they contain nonbusiness expenditures. The auditor might consider the owner's attitude and the care with which he or she separates the personal from the business activities. It's not unusual for a business to pay the owner's credit card bills, but the more important question is "does the owner reimburse the company?" Owners who treat company assets as if they were personal assets set a bad example for employees who may be encouraged to do the same.

- *Dealing with signs of problems*. Consider how management deals with signs that problems exist, particularly when the cost of identifying and solving the problem could be high. For example, suppose a client became aware of a possible environmental contamination on their premises. How would they react? Would they try to hide it, deny its existence, or act evasively if asked about it, or would they actively seek out their auditor's advice or the advice of their attorney?
- *Removal or reduction of incentives and temptations*. Individuals may engage in dishonest, illegal, or unethical acts simply because the owner-manager gives them strong incentives or temptations to do so. Removing or reducing these incentives and temptations can go a long way toward diminishing undesirable behavior.

The emphasis on results, particularly in the short term, fosters an environment in which the price of failure becomes very high. *Incentives* for engaging in fraudulent or questionable financial reporting practices include the following:

— Pressure to meet unrealistic performance targets, particularly for short term results

— High performance-dependent rewards

— Upper and lower cutoffs on bonus plans

Temptations for employees to engage in improper practices include the following:

— Nonexistent or ineffective controls, such as poor segregation of duties in sensitive areas that offer temptations to steal or conceal questionable financial reporting practices

— Owner-managers who are unaware of actions taken by employees

— Penalties for improper behavior that are insignificant or unpublicized and thus lose their value as deterrents

- *Management intervention*. There are certain situations where it is appropriate for management to intervene and overrule prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the financial reporting information system. The auditor might consider whether management has provided guidance on the situations and frequency with which intervention of established controls is appropriate. It is a best practice for management interventions to be documented and explained.

.36 *Commitment to Competence*. Competence reflects the knowledge and skills necessary to accomplish tasks that define an individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

.37 *Mrs. Jones has always kept the books for Jones Grocery. She is "self-taught," with no formal training in accounting or bookkeeping. There are no plans to replace Mrs. Jones with someone more "qualified." As the auditor of Jones Grocery you recognized the risk of having an untrained bookkeeper and design your audit approach to address such concerns by*

- *training Mr. and Mrs. Jones to call you whenever they have a transaction out of the ordinary;*
- *strongly encouraging Mrs. Jones to take training classes on her accounting software package (she has);*
- *explaining to Mrs. Jones the importance of key accounting records such as the accounts payable subledger and inventory reports; and*
- *teaching Mrs. Jones important basic control functions such as bank reconciliations.*

.38 *Management's Philosophy and Operating Style*. Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include

- the owner-manager's approach to taking and managing business risks;
- attitudes and actions toward financial reporting and tax matters; and
- attitudes and actions toward information processing and accounting functions and personnel.

.39 Management's philosophy and operating style have a significant influence on the control environment, particularly in a small business where the owner-manager dominates the organization, regardless of the consideration given to the other control environment factors. For example, the auditor may be concerned about the client's unduly aggressive attitude toward financial reporting. Not only might this cause the auditor to assess control risk as high for some or all assertions, but it may heighten concerns about irregularities affecting certain assertions.

.40 However, a dominant owner-manager does not necessarily cause the auditor to assess control risk as high.

.41 *Mr. Jones dominates the management of Jones Grocery. He demonstrates a positive attitude toward the control environment and a moderate to conservative attitude toward accepting business risk such as expansion. He is more concerned about taxes than financial reporting. Mr. Jones uses information generated by the financial reporting information system to monitor the financial results of the company and compare it to prior periods. His review of the accounting reports encourages Mrs. Jones and others who help with the accounting to work with greater care. Mr. Jones also performs many control activities himself, such as the review and supervision of the physical inventory counts. Although Mr. Jones is concerned about his income tax liability, you might not view the possible bias to misstate income as a significant risk because of the otherwise positive control environment*.

.42 *Organizational Structure*. A client's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and reviewed.

.43 Significant aspects of establishing an organizational structure include considering key areas of authority and responsibility and appropriate lines of reporting. Small business entities usually have fairly simple organizational structures. A highly structured organization with formal reporting lines and responsibilities may be appropriate for large entities, but for a small business, this type of structure may impede the necessary flow of information.

.44 *Assignment of Authority and Responsibility*. The assignment of authority and responsibility includes, among other things, the following:

- The establishment of reporting relationships and authorization procedures
- The degree to which individuals and groups are encouraged to use initiative in addressing issues and solving problems
- The establishment of limits of authority
- Policies describing appropriate business practices
- Resources provided for carrying out duties

.45 Alignment of authority and accountability often is designed to encourage individual initiatives, within limits. Delegation of authority means surrendering central control of certain business decisions to lower echelons to the people who are closest to everyday business transactions.

.46 A critical challenge is to delegate only to the extent required to achieve objectives. This requires ensuring that risk acceptance is based on sound practices for identifying and minimizing risk, including sizing risks and weighing potential losses versus gains in arriving at good business decisions.

.47 Another challenge is ensuring that all personnel understand the entity's objectives. It is essential that each individual knows how his or her actions interrelate and contribute to achievement of the objectives.

.48 *Mr. Jones had to decide how to delegate authority and responsibility when he expanded Jones Grocery from the one original store to its present eight store chain spread out over greater Anytown and the surrounding suburbs. One area that proved problematic was setting prices. Mr. Jones assumed that he would be able to set the prices at all of the stores, just like he did for his original store. He felt this was a good procedure because it allowed him some control over profit margins. Problems arose because the competitive pressures were different in different areas of the city. A competitor in the north suburb ran specials or lowered prices on certain items, while a competitor in the west suburb ran specials on different items. It became too difficult for Mr. Jones to keep up with the constantly changing price battles at eight different stores. He eventually delegated this responsibility to the individual store managers. He set a limit on how much a store manager could discount prices without his prior approval, but other than that, the store managers had the freedom to set prices to respond to the changing competitive environment*.

.49 *The responsibility for accounting information was also affected by Jones Grocery's expansion. Mr. Jones' original thought was that each store would be run as a separate business, with separate financial reporting information systems that would be consolidated together at the main store. Problems soon developed in several areas, most notably accounts payable. The store managers were responsible for entering vendor invoices into the computer system. But it seemed that no matter how much Mr. Jones threatened, cajoled, and begged his store managers to enter the invoices on a timely basis, they just couldn't do it consistently. The procedure had to be changed. Now, the store managers only have the responsibility to check incoming goods for quantity and condition. Vendor invoices are sent directly to Mrs. Jones at the main store, and she is responsible for maintaining the accounts payable for all the stores*.

.50 The control environment is greatly influenced by the extent to which individuals recognize that they will be held accountable. This holds true all the way to the owner-manager, who has the ultimate responsibility for all activities within the organization, including internal control.

.51 *Human Resource Policies and Practices*. Human resource policies and practices affect an entity's ability to employ sufficient competent personnel to accomplish its goals and objectives. Human resource policies and practices include an entity's policies and procedures for hiring, orienting, training, evaluating, counseling, promoting, compensating, and taking remedial action. In many small businesses, the policies may not be formalized but they can nevertheless exist and be communicated. The owner-manager can orally make explicit his or her expectations about the type of person to be hired to fill a particular job and may even be active in the hiring process. Formal documentation is not always necessary for a policy to be in place and operating effectively.

.52 *When Mr. and Mrs. Jones added a second store, the hiring of a store manager was easy—they hired their daughter. Adding a third store proved to be more problematic, because the other Jones children had no interest in the family business. Mr. and Mrs. Jones talked at length about the type of person they would hire as a store manager. They finally decided it was more important to hire someone they could trust, someone they felt comfortable with on a personal level rather than someone with an extensive background in the grocery business. They felt they could teach someone the grocery business but not how to be trustworthy. That hiring policy worked, and they've been following it ever since*.

.53 Standards for hiring the most qualified individuals, with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity's commitment to competent and trustworthy people. Hiring practices that include formal in-depth employment interviews and informative and insightful presentations on the company's history, culture, and operating style send a message that the company is committed to its people.

.54 Personnel policies that communicate prospective roles and responsibilities and that provide training opportunities indicate expected levels of performance and behavior. Rotation of personnel and promotions driven by periodic performance appraisals demonstrate the entity's commitment to advancement of qualified personnel to higher levels of responsibility. Competitive compensation programs that include bonus incentives serve to motivate and reinforce outstanding performance. Disciplinary actions send a message that violations of expected behavior will not be tolerated.

.55 *Participation of those charged with governance*. An entity's control consciousness is significantly influenced by those charged with governance. As defined in paragraph .03 of AU section 380, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1), *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the terms *board of directors* or *audit committee*. For small business entities, those charged with governance may not include any independent or outside members. Please refer to paragraphs .80–.82 for additional discussion of how the participation of those charged with governance applies to medium and large businesses.

Risk Assessment

.56 An entity's risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of reliable financial statements in conformity with GAAP. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

.57 Risks relevant to financial reporting include events and circumstances that may adversely affect the company's ability to initiate, authorize, record, process, and report financial data. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should generally be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations.

.58 Risks can arise or change due to circumstances such as the following:

- *Changes in the operating environment*. Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel*. New personnel may have a different focus on or understanding of internal control. When people change jobs or leave the company, management generally should consider the control activities they performed and who will perform them going forward. Steps ordinarily should be taken to ensure new personnel understand their tasks.
- *New or revamped information systems*. Significant and rapid changes in information systems can change the risk relating to internal control. When these systems are changed, management generally should assess how the changes will impact control activities. Are the existing activities appropriate or even possible with the new systems? Personnel should be adequately trained when information systems are changed or replaced.
- *Rapid growth*. Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls. Management generally should consider whether accounting and information systems are adequate to handle increases in volume.
- *New technology*. Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New business models, products, or activities*. Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *New accounting pronouncements*. Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

.59 The auditor's procedures to assess whether a risk assessment process is placed in operation are generally of an inquiry nature. For example, you may ask accounting personnel what accounts they believe are the most difficult to become satisfied with as they prepare the financial statements. You may also consider asking the same questions of personnel outside the accounting department.

Control Activities

.60 Control activities are policies and procedures that help ensure necessary actions are taken to address risks to achieve the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.

.61 At the entity-wide level, control activities may be categorized as policies and procedures that pertain to the following.

- *Performance reviews*. These control activities include reviews of actual performance versus budgets, forecasts, and prior period performance. They may also involve relating different sets of data (for example, operating or financial) to one another, together with analyses of the relationships, investigating unusual relationships and taking corrective action. Performance reviews may also include a review of functional or activity performance.
- *Information processing*. A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail. These controls are discussed in more detail in paragraphs .87–.91.
- *Physical controls*. These activities encompass the physical security of assets, including adequate safeguards over access to assets and records such as secured facilities and authorization for access to computer programs and data files and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation and, therefore, the audit depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.
- *Segregation of duties*. Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Segregation of duties is often a problem for small business entities. See paragraphs .128–.136 for further discussion and guidance.

.62 You should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities. An audit does not require an understanding of all the control activities related to each class of transactions, account balance, and disclosure in the financial statements or to every relevant assertion. Ordinarily, control activities that may be relevant to an audit include those relating to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records. The auditor should obtain an understanding of the process of reconciling detail to the general ledger for significant accounts.

.63 In obtaining an understanding of control activities, the auditor's primary consideration is whether, and how, a specific control activity, individually or in combination with others, prevents or detects and corrects material misstatements in classes of transactions, account balances, or disclosures. Control activities relevant to the audit are those for which the auditor considers it necessary to obtain an understanding in order to assess risks of material misstatement at the assertion level and to design and perform further audit procedures responsive to the assessed risks. The auditor's emphasis is on identifying and obtaining an understanding of control activities that address the areas where you consider that material misstatements are more likely to occur. When multiple control activities achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to that objective.

.64 The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions have occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

.65 Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

.66 General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. Though ineffective general controls do not, by themselves, cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if there are weaknesses in the general controls over access security, and applications are relying on these general controls to prevent unauthorized transactions from being processed, such a general control weakness may have a more severe effect on the effective design and operation of the application control. General controls should be assessed in relation to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, weaknesses in the general controls over systems development may not be relevant to the financial statements being audited.

.67 The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

.68 The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls depend. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process.

Information and Communication Systems

.69 An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and automated), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems make extensive use of information technology. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Authorization includes the process of approving transactions by the appropriate level management. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by automated or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in measuring and reviewing the entity's financial performance and in other functions.

.70 The quality of system generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial statements. Thus, it is important that management receives the information they need to carry out their responsibilities and that the information is provided at the right level of detail. Accordingly, an information system encompasses procedures and records that

- identify and record all valid transactions;
- describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting;
- measure the value of transactions in a manner that permits recording of their proper monetary value in the financial statements;
- determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period; and
- present properly the transactions and related disclosures in the financial statements.

.71 The financial reporting information system is an integral part of an entity's information and communication system. The auditor's consideration of the system is often made at the individual account and classes of transaction level. See paragraphs .112–.127 for additional guidance.

.72 Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

.73 The auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting, to understand

- the classes of transactions in the entity's operations that are significant to the financial statements;
- the procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements;
- the related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting transactions;
- how the information system captures other events and conditions that are significant to the financial statements; and
- the financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.74 When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

.75 The auditor also should obtain an understanding of how the incorrect processing of transactions is resolved. For example, such understanding might include whether there is an automated suspense file, how it is used by the entity to ensure that suspense items are cleared out on a timely basis, and how system overrides or bypasses to controls are processed and accounted for.

.76 In obtaining an understanding of the financial reporting process, the auditor should understand the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include the following:

- *Entering transaction totals into the general ledger (or equivalent record)*. In some information systems, IT may be used to automatically transfer such information from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to automatically transfer information there may be little or no visible evidence of such intervention in the information systems.
- *Initiating, authorizing, recording, and processing journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as sales, purchases, and cash disbursements or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more difficult to identify through the use of computer assisted techniques.
- *Initiating and recording recurring and nonrecurring adjustments to the financial statements.* These are procedures relating to adjustments and reclassifications that are not reflected in formal journal entries.
- *Combining and consolidating general ledger data*. This includes procedures to combine detailed general ledger accounts, prepare the trial balance, and prepare consolidated financial data (for example, transferring general ledger data and adjusting journals into a consolidation system or spreadsheet; performing consolidation routines; and reconciling and reviewing consolidated financial data, including footnote data).
- *Preparing financial statements and disclosures*. These are procedures designed to ensure that information required to be presented and disclosed is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.

Monitoring

.77 Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions.

.78 Examples of ongoing monitoring activities include the following:

- Management reviews of data produced by the entity's information system. Managers are in touch with operations and may question reports that differ significantly from their knowledge of operations. However, management generally should have a basis for believing the data is accurate. If errors exist in the information, management may make incorrect conclusions from its monitoring activities.

- Communications from external parties corroborate internally generated information or indicate problems. Customers implicitly corroborate billing data by paying their invoices. Conversely, customer complaints about billings could indicate system deficiencies in the processing of sales transactions. Similarly, bankers, regulators, or other outside parties may communicate with the company on matters of accounting significance.
- External auditors regularly provide recommendations on the way internal control can be strengthened. Auditors may identify potential weaknesses and make recommendations to management for corrective action.
- Employees may be required to sign off to evidence the performance of critical control functions. The sign-off allows management to monitor the performance of these control functions.

Application to Medium and Large Businesses

.79 The control environments of medium to large businesses may differ from those of small business entities in the following ways:

- The presence of a board of directors or audit committee
- The presence of an internal audit function
- More formalized policies and procedures

Board of Directors or Audit Committee

.80 The control consciousness of a medium or large business is influenced significantly by those charged with governance. As defined previously, those charged with governance means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. Those charged with governance encompasses the term *board of directors* and *audit committee* used elsewhere in this section. Because of its importance, an active and involved board of directors—possessing an appropriate degree of management, technical, and other expertise coupled with the necessary stature and mind-set so that it can adequately perform the necessary governance, guidance, and oversight responsibilities—is critical to effective internal control.

.81 Factors that influence the effectiveness of those charged with governance include the following:

- Its independence from management
- The experience and stature of its members
- The extent of its involvement and scrutiny of activities
- The appropriateness of its actions
- The degree to which difficult questions are raised and pursued with management
- Its interaction with internal and external auditors

.82 The board of directors must be prepared to question and scrutinize management's activities, present alternative views and have the courage to act in the face of obvious wrongdoing. Because of this, it is necessary that the board contain at least a critical mass of outside directors. The number should suit the entity's circumstances, but more than one outside director normally would be needed for a board to have the requisite balance.

Internal Audit Function

.83 The internal audit function is established within an entity to monitor and evaluate the adequacy and effectiveness of internal control. For entities with an internal audit function, the auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'

- organizational status within the entity;
- application of professional standards;
- audit plan, including the nature, timing, and extent of audit work; and
- access to records and any limitations on the scope of their activities.

.84 After obtaining an understanding of the internal audit function, the auditor may either

- conclude that the internal auditors' activities are not relevant to the financial statement audit and give no further consideration to the internal audit function;
- identify relevant internal auditor activities, but conclude that it would not be efficient to consider further the work of the internal auditors; or
- decide that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of the audit. In this case, you should assess the competence and objectivity of the internal audit function as outlined in AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *Professional Standards*, vol. 1).

.85 You may also request direct assistance from the internal auditors. Paragraph .27 of AU section 322 provides guidance on using internal auditors to provide direct assistance to the auditor.

Formal Policies

.86 Medium and large businesses may communicate their policies in formal, written documents. For example, they may have a written code of conduct or human resource policies. The existence of formal policy documents is good, but as an auditor, your primary consideration is how the policies are implemented.

Computer Applications

.87 Small business entities are typically characterized by the use of off the shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.88 *Jones Grocery has a stand-alone, state of the art PC at its main store. One other store has a computer—an Apple Macintosh that Mr. and Mrs. Jones' daughter used at college. The PC at the main store is used to run the accounting software, which is an off the shelf product developed specifically for independent grocers. The payroll is processed by an outside payroll service.*

.89 In gaining an understanding of how computers are used in the business, the auditor may consider the following:

- The acquisition of hardware and software
- Physical access
- Logical access
- User controls over outsider service bureau applications

Acquisition of Hardware and Software

.90 Companies ordinarily should take steps to ensure they have compatible hardware and software. The use of compatible software reduces the risk of error, because there will be no need to transfer data from one format into another. Even small businesses generally should have a coherent plan for the purchase of computer hardware and software. If the business is growing, management will typically plan for the upgrade of the processor, random access memory (RAM), or hard disk storage.

.91 *Mr. and Mrs. Jones did not plan for the purchase of their computers. For several years, Mrs. Jones processed the accounting applications on an old PC with limited RAM and hard-disk storage. When the Jones' daughter opened the second store, she brought with her the Apple Macintosh she had in college. At first, she tried to transfer data from her store to the main store, but the software had problems converting from the Apple format, so the procedure was abandoned. At a trade show, Mr. Jones discovered a computer software program specifically designed for independent grocers. He was impressed with the program and decided that it fit his needs perfectly. However, his hardware was out of date, and so in order to run the software, he upgraded his hardware. The new software supposedly is able to handle Apple-formatted data, and the company has plans to transfer data from the second store electronically. There are no plans to install computers at the other stores.*

.92 *As the auditor of Jones Grocery, you should use this understanding of the company computer system to help plan the audit. For example, they plan to transfer data from the Apple to the PC. What other sorts of errors might occur in the transfer? What steps has the client taken to prevent or detect those errors? You also know that stores three through eight are on a manual system. What types of errors might occur in a manual system? What is the risk that those errors will occur?*

.93 Entities ordinarily should also establish policies and procedures to mitigate the risk of computer viruses being introduced into their systems. Viruses can cause the loss of data and programs. A virus has the ability to attach itself to a program and infect other programs and systems. Although some viruses merely write messages across the screen, others can cause serious damage to disk files or shut down a network by replicating themselves millions of times and filling all available memory or disk storage.

.94 Methods to prevent the introduction of viruses and to recover from a virus attack include the following:

- Obtaining recognized software from reputable sources and only accepting delivery of the software in the manufacturer's sealed package.
- Making multiple generations of backups. A virus that is not detected initially may be copied onto more recent backup copies, while the older versions may not be infected.
- Prohibiting the use of unauthorized programs introduced by employees.
- Prohibiting the downloading of untested software from sources such as dial-up bulletin boards.
- Using virus protection software to screen for virus infections.

Physical Security

.95 Physical security—primarily backup and contingency planning—often is ignored by small businesses in a microcomputer environment. Poor backup procedures can result in the loss of important data that are very difficult, time consuming and costly to recreate, if they can be recreated at all.

.96 Clients generally should have established procedures for the periodic backup of data files and applications. Critical applications and files ordinarily should be stored off-site with corresponding documentation in the event that on-site files become unavailable.

Logical Access

.97 Logical access to computer applications and data files may not be formally or rigorously controlled in a small business. This leaves the company exposed to the risk that files could be inappropriately manipulated or unauthorized transactions entered into the system. For example, without logical access controls a user may be able to enter any or all sections of a general ledger or other financial module and perform file maintenance such as changing the address of an accounts receivable customer or data used to calculate payroll.

.98 Management ordinarily should identify confidential and sensitive data for which access should be restricted. Mechanisms such as password control or the use of menus can be used to limit the access to that data.

.99 In a microcomputer environment, password control may be installed over the operating system using a shell program to prevent the user from accessing menu options of a program. Even if such a restriction exists, a sophisticated user can often bypass the shell by using a utility. Therefore, the use of utility programs generally should be controlled or monitored carefully.

User Controls Over Computer Service Organization Applications

.100 Entities may use an outside computer service organization to process significant accounting information. Guidance on auditing entities that use computer service organizations is contained in AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1).

.101 When using an outside computer service organization, most small businesses typically retain the responsibility for authorizing transactions and maintaining the related accountability. The computer service organization merely records user transactions and processes the related data. In these circumstances, the user (the small business) typically maintains controls over the input and output to prevent or detect material misstatement. When the service organization initiates, executes, and does the accounting processing of the user organization's transactions, it may not be practicable for the user organization to implement effective controls for those transactions.

.102 *Jones Grocery uses an outside computer service to process payroll. Time cards are gathered for each store and reviewed by the store manager before being sent to the main store. Mrs. Jones reviews the time cards for the store managers and checks to make sure all personnel have submitted time cards for the pay period. All other payroll transactions such as pay rates, withholdings, and benefits, among others, are sent directly to Mrs. Jones. She forwards all information to the payroll service, which prepares the checks and produces a payroll register. Mrs. Jones reviews the register and checks for any obvious misstatements before she distributes the checks*.

Application to Medium or Large Businesses

.103 Medium and large businesses typically have more complicated computer processing systems than small businesses. They also tend to use the computer for a greater amount of processing. For example, a small business may prepare customer invoices manually by looking up prices on a master price list. A medium size business may maintain master price information on a computer file and use the computer to generate packing slips, sales invoices, and reports of unmatched documents.

.104 Medium and large businesses are also typically characterized by a separate management information services department with formally defined job descriptions and responsibilities.

.105 Instead of using off the shelf, unmodified software, the medium or large business will modify standard software or develop its own applications. Its software may be more complicated than that used by the small business; for example, the medium or large business may use a database management system or telecommunications software.

.106 Medium and large businesses often use a mainframe computer in conjunction with microcomputers or a local area microcomputer network. Information is frequently transferred between the mainframe and microcomputers that may be located on-site or at a remote location.

.107 Control activities in a computerized environment generally comprise a combination of the following:

- User control activities
- Programmed control activities and manual follow-up
- Computer general control activities

.108 *User Controls*. User control activities are manual checks of the completeness and accuracy of computer output against source documents or other input. For example, an entity may have programmed procedures in a billing system that calculate sales invoice amounts from shipping data and master price files. The entity may also have a procedure to manually check the completeness and accuracy of the invoices. In many systems, user controls relate only to the completeness of records and not to the accuracy of processing.

.109 *Programmed Control Activities and Manual Follow-up Activities*. Programmed control activities are those that are built into the computer processing program; for example, the generation of an exception report. However, an exception report is useless unless the client follows up on the items listed. Thus, in addition to understanding the nature of the programmed control activities, you also need to understand the related manual follow-up procedures.

.110 *Computer General Control Activities*. If computer general control activities operate effectively, there is greater assurance that programmed control activities are properly designed and function consistently throughout the period. The auditor may plan to understand computer general control activities to provide evidence that

- programs are properly designed and tested in development;
- changes to programs are properly made;
- computer operations ensure the proper use of application programs and data files; and
- adequate access controls reduce the risk of unauthorized changes to the program and data files.

.111 The following table summarizes computer general control activities.

Area	*Control Objectives*	*Example Controls*
Program development	• Controls ensure that new applications systems are suitably authorized, designed, and tested	• Users are involved in the design and approval of systems • Checkpoints where users review the completion of various phases of the application • Development of test data and testing of the program • User involvement in the review of tests of the program • Adequate procedures to transfer programs from development to production libraries

(continued)

Area	*Control Objectives*	*Example Controls*
Program changes	• Controls over changes to existing programs and systems ensure that modifications to application programs are suitably approved, designed, tested, and implemented	• Same as program development • User involvement • Adequate testing • Adequate transfer activities • Segregation of duties between programmers and production libraries
Computer operations	• Controls ensure that application programs are used properly and that proper data files are used during processing	• Review of lists of regular and unscheduled batch jobs by operations management • Use of menu-driven job control instruction sets • Jobs executed only from the operator's terminal • Adequate procedures for managing and backing up data and program files
Access	• Controls should prevent or detect unauthorized changes to programs and to data files supporting the financial statements	• Programmers have limited access to production programs, live data files, and job control language • Operators have limited access to source code and individual elements of data files • Users have access only to defined programs and data files

Obtaining an Understanding of Significant Account Balances and Transaction Cycles

.112 As discussed in paragraph .83 of AU section 314, the auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting to understand

- the classes of transactions in the entity's operations that are significant to the financial statements;
- the procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements;
- the related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions;
- how the information system captures other events and conditions that are significant to the financial statements; and
- the financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.113 ***Accounting Processing***. In obtaining an understanding of how a client processes accounting information—from the initiation of the transaction to its inclusion in the financial statements—the auditor may focus on how the computer is used to process data and the ways in which transactions are valued, classified, and summarized in data files, journals, or ledgers. For some transactions, there may be several significant processing activities and accounting records, including the use of computer programs. Other transactions may involve only limited processing activities performed manually.

.114 *At Jones Grocery, sales are initiated by customers and recorded in the cash register. At the end of the day the cash register totals are reconciled to the cash on hand, and a deposit is prepared for the day's receipts. On a weekly basis, the daily cash register tapes are batched for each store, forwarded to Mrs. Jones, and entered into the computer. The computer generates a sales register, a sales analysis report, and posts the sales totals to the general ledger. Also, the processing of inventory transactions (for example, receipt of goods, sales, and spoilage) involves several processing activities that are linked in the inventory module of the software package. On the other hand, recording depreciation expense is fairly simple. Fixed assets and the related depreciation are maintained on a computer spreadsheet, and each month, Mrs. Jones prepares a journal entry to record depreciation.*

.115 Understanding the accounting processing also involves understanding the information used for processing and when processing occurs. For example, when considering the completeness assertion, the auditor will normally understand whether transactions entered into the computer system are processed immediately or in batches and how frequently batches are processed.

.116 The processing of accounting information may involve "end user computing." End user computing occurs when the user is responsible for the development and execution of the computer application that generates the information used by that same person.

.117 *Mrs. Jones developed and maintains the fixed asset spreadsheet that serves as the source document for her monthly depreciation expense journal entry.*

.118 In general, the product of end user computing may be used to

- process significant accounting information outside of the off the shelf accounting software package (for example, the fixed-asset spreadsheet is separate from the Jones Grocery general ledger software package);
- make significant accounting decisions. For example, a spreadsheet application may be used to generate information used to write down inventory; and
- accumulate footnote information (for example, a spreadsheet may be used to calculate the five-year debt maturity disclosure).

.119 Generally, end users have no training in the formal computer application development process. Accordingly, applications developed by end users are often inadequately tested, and the development process is often not documented. This situation can cause significant difficulties for an organization if the end user computing application is critical to making business or financial decisions.

.120 The access to end user computing applications may also be an audit concern. Many computer applications used in end user computing come with on-line systems that are capable of restricting users to specific applications, specific departments, or even specific fields. Often, however, these access restrictions facilities are not implemented.

.121 To address these concerns and to ensure the end user applications process data completely and accurately, the auditor may look for control policies and procedures that

- require all significant end user applications to be adequately tested before use;
- prescribe documentation standards for significant end user applications;
- provide for adequate access controls to data;

- provide a mechanism to prevent or detect the use of incorrect versions of data files;
- provide for appropriate applications controls, for example, edit checks, range tests, or reasonableness checks; and
- support meaningful user reconciliations.

.122 *Accounting Records, Supporting Information, and Specific Accounts*. In general, the auditor may identify the following for a client's significant accounts and transactions:

- Source documents
- Documents converted to computer media
- Computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.123 A client's accounting systems may create many documents, files, and reports that are useful for managing the organization; however, not all will be relevant to the financial statements.

.124 *At Jones Grocery, the sales analysis report described in paragraph .114* is used for management information and analysis. The documents and reports relevant to the financial statements are the daily cash register tapes and the computer generated sales register.

.125 *Other Significant Events and Conditions*. The entity's information system may capture other events and conditions that are significant to the financial statements. This might involve, for example, nonrecurring or unusual transactions or adjustments and nonrecurring estimates.

.126 *A broken water line, which is an uninsured risk, spoiled a large amount of produce and dry goods in one of the Jones Grocery stores. Based on a list of the lost inventory provided by the store manager, Mrs. Jones recorded a large spoilage loss*.

.127 *Financial Reporting Process*. When gaining an understanding of the financial reporting process, the auditor may determine the extent of client procedures to prepare accounting estimates (when significant accounting estimates are called for) and information for significant disclosures. The auditor may also understand the way in which general ledger information is summarized to determine how the amounts and disclosures are reported in the financial statements.

Segregation of Duties and Management Override

.128 Small businesses are typically characterized by the following:

- A dominant owner-manager
- A lack of segregation of duties

.129 These characteristics may pose unique risks to the entity.

.130 In general, duties should be divided among different people to reduce the risk of error or inappropriate actions. For instance, responsibilities for authorizing transactions, recording them, and handling the related assets could be divided.

.131 Even small businesses with only a few employees can usually parcel out responsibilities to achieve the necessary checks and balances. If that is not possible—which may be the case on occasion—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. Thus, a dominant owner-manager may be a positive element in the design of internal controls.

.132 A dominant owner-manager may be a negative element in the design of internal control when he or she is able to override established policies and procedures.

.133 Management *override* is different from management *intervention*. *Management intervention* is discussed in paragraph .35 and is described as the overrule of internal control for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the system.

.134 In contrast, *management override* is the overrule of internal control for illegitimate purposes with the intent of personal gain or enhanced presentation of an entity's financial condition or compliance status.

.135 An owner-manager might override the control system for many reasons:

- To increase reported revenue
- To boost market value of the entity prior to sale
- To meet sales or earnings projections
- To bolster bonus pay-outs tied to performance
- To appear to cover violations of debt covenant agreements
- To hide lack of compliance with legal requirements

Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, as well as intentionally issuing false documents such as sales invoices.

.136 When gaining an understanding of internal control, the auditor assesses the risk of management override.

Assessing Internal Control Strengths and Weaknesses

.137 When obtaining an understanding of internal control, the auditor may consider the *collective* effect of strengths and weaknesses in various control environment factors. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by top management to overstate earnings.

.138 Internal control strengths may indicate account balances, transaction classes, or assertions where you can assess control risk at low or moderate.[2] Internal control weaknesses usually indicate areas where substantive procedures may be required. However, in situations where electronic evidence (information transmitted, processed, maintained, or accessed by electronic means) is significant, testing of the related internal control generally will be necessary to obtain sufficient competent audit evidence.

.139 In rare circumstances, the auditor's understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity's records may cause the auditor to conclude it is unlikely that sufficient appropriate audit evidence will be available to support an opinion on the financial statements.

---

[2] Control risk may be assessed in quantitative terms, such as percentages, or in qualitative terms such as high, medium, or low risk.

.140 If the auditor determines the entity is unauditable, the auditor should consider withdrawing from the engagement.

Practical Guidance

Readers may refer to appendix M, "Illustrative Audit Documentation Case Study: Young Fashions, Inc.," of the AICPA Audit Guide, Assessing and Responding to Audit Risk in a Financial Statement Audit, for examples of how to document your understanding of internal control. Appendix M contains several subappendixes (appendix M-1–M-6). Those that are particularly relevant to internal control include the following:

- Appendix M-2, "Young Fashions: Evaluation of Entity–Level Controls," provides example documentation of the auditors evaluation of entity-level controls, except for IT general controls. Appendix M-2 illustrates how to document your understanding of the controls relevant to the audit, including (1) an evaluation of whether the design of the control, individually or in combination, is capable of effectively preventing or detecting and correcting material misstatements and (2) a determination of whether the control exists and the entity is using it.
- Appendix M-2-1, "Young Fashions: Procedures Performed to Evaluate Entity-Level Controls," provides illustrative documentation for the risk assessment and other procedures an auditor performs to gather information about internal control and the source of that information.
- Appendix M-3, "Young Fashions: Understanding of Internal Control—IT General Controls," provides example documentation of the auditors evaluation of IT general controls.
- Appendix M-4, "Young Fashions: Evaluation of Activity-Level Controls—Wholesale Sales," provides example documentation of an evaluation of activity-level controls. This case study presents only one class of transactions, sales. In practice, the auditor would evaluate activity-level controls for each significant class of transactions.

Designing and Performing Further Audit Procedures

> The material included in these sections on designing and performing further audit procedures is presented for illustrative purposes only. The nature, extent, and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the assessed risks of material misstatement.

AAM Section 5100

Designing Further Audit Procedures

Audit Procedures for Obtaining Audit Evidence

.01 In order to draw reasonable conclusions on which to base the audit opinion, auditors should obtain audit evidence by performing audit procedures to

- obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels (audit procedures performed for this purpose are referred to as *risk assessment procedures*);
- when necessary or when the auditor has determined to do so, test the operating effectiveness of controls in preventing or detecting material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *tests of controls*); and
- detect material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *substantive procedures* and include tests of details of classes of transactions, account balances, and disclosures, and substantive analytical procedures).

.02 The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels. Risk assessment procedures by themselves do not provide sufficient appropriate audit evidence on which to base the audit opinion and must be supplemented by further audit procedures in the form of tests of controls, when relevant or necessary, and substantive procedures.

.03 Tests of controls are necessary in two circumstances. When the auditor's risk assessment includes an expectation of the operating effectiveness of controls, the auditor should test those controls to support the risk assessment. In addition, when the substantive procedures alone do not provide sufficient appropriate audit evidence, the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness. See AAM section 5200 for additional guidance on performing tests of controls.

.04 As described in AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1), the auditor should plan and should perform substantive procedures to be responsive to the related planned level of detection risk, which includes the results of tests of controls, if any. The auditor's risk assessment is judgmental, however, and may not be sufficiently precise to identify all risks of material misstatement. Further, there are inherent limitations in internal control, including the risk of management override, the possibility of human error, and the effect of systems changes. Therefore, regardless of the assessed risk of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure to obtain sufficient appropriate audit evidence. See AAM section 5300 for additional guidance on performing substantive procedures.

Linking the Assessed Risks to the Design of Further Audit Procedures

.05 As discussed in AAM section 3130, the auditor's risk assessment process culminates with the articulation of the account balances, classes of transactions, or disclosures where material misstatements are most likely to occur and—even more specifically—how the misstatements may occur and the assertions that are likely to be misstated. This assessment of the risks of misstatement, which relates identified financial reporting risks to what can go wrong at the assertion level, provides a basis for the design of further audit procedures.

.06 To reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The overall responses and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor.

Overall Responses to Risks at the Financial Statement Level

.07 The auditor's audit response to financial statement level risks should be responsive to the assessed risk. The same is true for responses to risk at the account, assertion level, or both. It is critical that the auditor's audit procedures are linked clearly and responsive to the assessment. This linkage between risk assessment and audit procedures is part of the audit strategy and audit plan, and it should be documented. The following paragraph describes some important characteristics of financial statement level risks. The purpose of these descriptions is to help the auditor bridge between the assessment of financial statement level risks and the subsequent response.

.08 Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- *Financial statement level risks can affect many assertions*. By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.
- *Assessing financial statement-level risks requires significant judgment*. Ultimately, the auditor relates identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of the auditor's professional judgment to determine the following:
    - The accounts and relevant assertions that could be affected
    - The likelihood that a financial statement misstatement will result from the increased risk
    - The significance of any misstatement
- *Risks at the Financial Statement Level May Not be Identifiable With Specific Assertions*. Control weaknesses at the financial statement level can render well-designed activity-level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed IT general controls allow many unauthorized personnel the opportunity to access and inappropriately change the data, the well-designed input controls have been rendered ineffective. Also, strengths in financial statement-level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and, therefore, the assessment of the risks of material misstatement) is subjective and may vary from client to client.

.09 Due to the unique characteristics of financial statement level risks, it may not be possible to correlate all of these risks to a finite set of assertions. For example, a weakness in control environment may affect all or mostly all of the accounts, classes of transactions, or disclosures and the relevant assertions. To respond appropriately to these types of financial statement level risks, the auditor may need to reconsider the overall approach to the engagement. The following paragraph provides examples of overall responses to risks at the financial statement level that have a pervasive effect on the financial statements and cannot necessarily be mapped to individual assertions.

.10 The auditor's overall responses to address the assessed risks of material misstatement at the financial statement level may include the following:

- Emphasizing to the audit team the need to maintain professional skepticism in gathering and evaluating audit evidence.
- Assigning more experienced staff or those with specialized skills or using specialists.
- Providing more supervision.
- Incorporating additional elements of unpredictability in the selection of further audit procedures to be performed and in selecting individual items for testing.
- Making general changes to the nature, timing, or extent of further audit procedures as an overall response, for example, performing substantive procedures at period end instead of at an interim date. One could also focus more time and attention on audit areas more closely associated with the risk.

.11 The assessment of the risks of material misstatement at the financial statement level is affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to perform some audit procedures at an interim date rather than at period end. If there are weaknesses in the control environment, the auditor should consider an appropriate response. For example, the auditor could perform audit procedures as of the period end rather than at an interim date, seek more extensive audit evidence from substantive procedures, modify the nature of audit procedures to obtain more persuasive audit evidence, or increase the number of locations to be included in the audit scope.

.12 Such considerations, therefore, have a significant bearing on the auditor's general approach, for example, an emphasis on substantive procedures (substantive approach) or an approach that uses tests of controls as well as substantive procedures (combined approach).

.13 Paragraphs .13 and .50 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), describe the overall responses the auditor may take in response to your assessment of the risk of material misstatement due to fraud. When determining an overall audit response, the auditor may consider the assessment of fraud risk concurrently with the assessment of the risk of material misstatement due to error. The auditor can develop one overall response that is appropriate for both kinds of risks.

Audit Procedures Responsive to Risks of Material Misstatement at the Relevant Assertion Level

.14 Further audit procedures provide important audit evidence to support the auditor's audit opinion. These procedures consist of tests of controls and substantive tests.

.15 The auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditor's further audit procedures and the risk assessments.

.16 In designing further audit procedures, the auditor should consider such matters as the following:

- The significance of the risk and the likelihood that a material misstatement will occur. In general, the more significant (in terms of likelihood and magnitude) the risk, the more reliable and relevant audit evidence should be.
- The characteristics of the class of transactions, account balance, or disclosure involved, which will help determine the nature, timing, and extent of procedures available to the auditor. For example, the gross accounts receivable balance comprises transactions with third parties, which means the auditor can contact these external parties to confirm the transactions or individual account balances. On the other hand, the allowance for doubtful accounts is an estimate prepared internally, which does not lend itself to confirmation but to other substantive tests.
- The nature of the specific controls used by the entity, in particular, whether they are manual or automated.
- Whether the auditor expects to obtain audit evidence to determine if the entity's controls are effective in preventing or detecting material misstatements.

The nature of the audit procedures is of most importance in responding to the assessed risks.

.17 The auditor's assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. In some cases, the auditor may determine that performing only substantive procedures is appropriate for specific relevant assertions and risks. In those circumstances, the auditor may exclude the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures have not identified any effective controls relevant to the assertion or because testing the operating effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive procedures for the relevant assertions would be effective in reducing detection risk to an acceptably low level. The auditor often will determine that a combined audit approach using both tests of the operating effectiveness of controls and substantive procedures is an effective audit approach.

.18 Regardless of the audit approach selected, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. Because effective internal controls generally reduce, but do not eliminate, risk of material misstatement, tests of controls reduce, but do not eliminate, the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes such as examining the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to period end) due to the risk of management override of controls or the subjectivity of the account balance.

.19 In the case of very small entities, there may not be many control activities that could be identified by the auditor. For this reason, the auditor's further audit procedures are likely to be primarily substantive procedures. In such cases, in addition to the matters referred to in the preceding paragraph .16, the auditor should consider whether in the absence of controls it is possible to obtain sufficient appropriate audit evidence.

Nature of Further Audit Procedures

.20 The nature of further audit procedures refers to the following:

- Their purpose, that is, tests of controls or substantive procedures (or dual purpose tests) and whether they are designed to test for overstatement, understatement, or both.
- Their type, such as the following:
  - — Inspection
  - — Observation

- — Inquiry
- — Confirmation
- — Recalculation
- — Reperformance
- — Analytical procedures (including scanning)

Table 1 provides additional guidance on each of these procedures.

Table 1

Types of Audit Procedures

Type of Procedure	*Definition*	*Additional Guidance*
Inspection of documents	Inspection of documents involves examining records or documents, whether internal or external, in paper form, electronic form, or other media.	• This procedure provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal documents, on the effectiveness of the controls over their production. • Some documents represent direct audit evidence of the existence of an asset but not necessarily about ownership or value. • Inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting principles, such as revenue recognition. • Some forms of documents are less persuasive than others. For example, faxes and copies may be less reliable than original documents.
Inspection of tangible assets	Inspection of tangible assets consists of physical examination of the assets.	• This procedure may provide audit evidence relating to existence, but not necessarily about the entity's rights and obligations or the valuation of the assets. • Inspection of individual inventory items ordinarily accompanies the observation of inventory counting.
Observation	Observation consists of looking at a process or procedure being performed by others.	• This procedure provides audit evidence about the performance of a process or procedure but is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed.

(continued)

Type of Procedure	*Definition*	*Additional Guidance*
Confirmation	Confirmation is the process of obtaining a representation of information or of an existing condition directly from a knowledgeable third party.	• This procedure — frequently is used in relation to account balances and their components but need not be restricted to these items; — can be designed to ask if any modifications have been made to an agreement, and if so, what the relevant details are; and — also is used to obtain audit evidence about the absence of certain conditions (for example, the absence of an undisclosed agreement that may influence revenue recognition). • See AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), for further guidance on confirmations.
Recalculation	Recalculation consists of checking the mathematical accuracy of documents or records.	• This procedure can be performed through the use of information technology, for example, by applying a data extraction application or other computer assisted audit techniques (CAATs).
Reperformance	Reperformance is the auditors independent execution of procedures or controls that were originally performed as part of the entity's internal control	• This procedure may be performed either manually or through the use of CAATs, for example, reperforming the aging of accounts receivable.

Inquiry

.21 Inquiry consists of seeking information of knowledgeable individuals. These individuals may be involved in the financial reporting process or outside of that process; they may be internal or external to the company. Inquiry is used extensively throughout the audit and often is complementary to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Asking questions of knowledgeable individuals is only part of the inquiry process. Evaluating the responses to inquiries is an equally integral part of the process.

.22 Inquiry normally involves such actions as the following:

- Considering the knowledge, objectivity, experience, responsibility, and qualifications of the individual to be questioned
- Asking clear, concise, and relevant questions
- Using open or closed questions appropriately
- Listening actively and effectively
- Considering the reactions and responses and asking follow-up questions

- Evaluating the response

See appendix K, "Suggestions for Conducting Inquiries," of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* for further guidance on performing inquiries.

.23 Responses to inquiries may provide the auditor with information he or she did not previously possess or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information the auditor has obtained, such as information regarding the possibility of management override of controls. In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures. The auditor should resolve any significant inconsistencies in the information obtained.

.24 The auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Inquiry alone ordinarily does not provide sufficient appropriate audit evidence to detect a material misstatement. Moreover, inquiry alone is not sufficient to test the operating effectiveness of controls.

.25 In some instances, the auditor may need to obtain evidence about management's intended actions, for example, when obtaining evidence to support management's classification of investments as either trading, available for sale, or hold to maturity. To corroborate management's responses to questions regarding their intended future action, the following may provide relevant information.

- Management's past history of carrying out its stated intentions.
- Management's stated reasons for choosing a particular course of action.
- Management's ability to pursue a specific course of action.

.26 In some cases, the auditor should obtain replies to inquiries in the form of written representations from management. For example, when obtaining oral responses to inquiries, the nature of the response may be so significant that it warrants obtaining written representation from the source. See AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), for further guidance on written representations.

Substantive Analytical Procedures

.27 Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures

b. As risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control

c. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions

d. As an overall review of the financial information in the final review stage of the audit

.28 Analytical procedures can be effective:

- For certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts)
- When the relationships between amounts are very predictable
- When the data used to develop expectations based on the relationship are reliable

- When relatively precise expectations can be developed

.29 Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they may be used whenever practical.

.30 Paragraph .05 of AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), describes analytical procedures as follows:

> Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:
>
> *a.* Financial information for comparable prior period(s) giving consideration to known changes.
>
> *b.* Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data.
>
> *c.* Relationships among elements of financial information within the period.
>
> *d.* Information regarding the industry in which the client operates—for example, gross margin information.
>
> *e.* Relationships of the financial information with relevant nonfinancial information.

.31 Whenever analytical procedures are applied as substantive tests, the auditor may apply the following procedures:

- Consider whether the relationship is plausible and predictable.
- Consider whether the data used for the comparison is reliable.
- Consider whether the account balance tested is consistent with the auditor's expectations. If it is not consistent, obtain the client's explanation for the variance and get evidence to corroborate the client's explanation.

.32 AU section 329 states that analytical procedures should be performed in the planning and overall review stages of all audits. See AU section 329 and AAM section 3155 for further guidance on analytical procedures.

The Selection of Audit Procedures

.33 The auditor's selection of audit procedures is based on the risk of material misstatement. The higher the auditor's assessment of risk, the more reliable and relevant the audit evidence sought by the auditor from substantive procedures is. This determination of the requisite reliability and relevance of audit evidence may affect both the types of audit procedures to be performed and their combination. For example, the auditor may confirm the completeness of the terms of a contract with a third party, in addition to inspecting the document and obtaining management's representation. This combination of several procedures would result in more reliable and relevant audit evidence than obtained by performing only one procedure.

.34 In determining the audit procedures to be performed, the auditor should consider the underlying reasons for the assessment of the risk of material misstatement at the relevant assertion level for each class of transactions, account balance, and disclosure. These underlying reasons relate to both the inherent and control risks related to the assertion. For example, if the auditor assessed risk of material misstatement to be low that a material misstatement might occur because of low inherent risk, the auditor may determine that substantive analytical procedures alone may provide sufficient appropriate audit evidence. On the other hand, if the auditor expects that there is a lower risk of material misstatement because the client has effective controls and the auditor intends to design substantive procedures based on relying on the effective operation of those controls, then the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness.

.35 The auditor should obtain audit evidence about the accuracy and completeness of information produced by the entity's information system when that information is used in performing audit procedures. For example, if the auditor uses nonfinancial information or budget data produced by the entity's information system in performing audit procedures, such as substantive analytical procedures or tests of controls, the auditor should obtain audit evidence about the accuracy and completeness of such information.

Timing of Further Audit Procedures

.36 Timing refers to when audit procedures are performed or the period or date to which the audit evidence applies. The auditor may perform tests of controls or substantive procedures:

- At an interim date
- At period end
- After period end, in those instances where the procedure cannot be performed prior to or at year end (for example, agreeing the financial statements to the accounting records)

.37 The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to or at the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters. If the auditor performs tests of the operating effectiveness of controls or substantive procedures before period end, the auditor should consider the additional evidence that is necessary for the remaining period.

.38 In considering when to perform audit procedures, the auditor should also consider such matters as the following:

- The assessed risk of misstatement. In general, the higher the risk, the more likely it is that the auditor will perform procedures nearer to or at the period end.
- The control environment. In general, the more effective the control environment, the more likely it is that the auditor will be able to perform tests as of an interim date.
- When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period end).
- The period or date to which the audit evidence relates.

Extent of Further Audit Procedures

.39 Extent refers to the quantity of a specific audit procedure to be performed, for example, a sample size or the number of observations of a control activity. The extent of an audit procedure is determined by the judgment of the auditor after considering the following:

- Tolerable misstatement
- Assessed risk of material misstatement

- Degree of assurance the auditor plans to obtain

.40 In particular, the auditor may increase the extent of audit procedures as the risk of material misstatement increases. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk and reliable; therefore, the nature of the audit procedure is the most important consideration.

.41 The AICPA Audit Guide *Audit Sampling* provides additional guidance on sampling for substantive testing.

Documentation

.42 The auditor should document the overall responses to address the assessed risks of misstatement at the financial statement level and the linkage of those procedures with the assessed risks at the relevant assertion level. The manner in which these matters are documented is based on the auditor's professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5201.*]

AAM Section 5200

Performing Tests of Controls

.01 The auditor should perform tests of controls when the auditor's risk assessment[1] includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

.02 When, in accordance with paragraph .117 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), the auditor has determined that it is not possible or practicable to reduce the detection risks at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures, he or she should perform tests of controls to obtain audit evidence about their operating effectiveness. For example, as discussed in paragraphs .119–.120 of AU section 314, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the relevant assertion level when an entity conducts its business using information technology (IT) and no documentation of transactions is produced or maintained, other than through the IT system.

.03 Tests of the operating effectiveness of controls are performed only on those controls that the auditor has determined are suitably designed to prevent or detect a material misstatement in a relevant assertion. Paragraphs .106–.108 of AU section 314 discuss the identification of controls at the relevant assertion level likely to prevent or detect a material misstatement in a class of transactions, account balance, or disclosure.

.04 Testing the operating effectiveness of controls is different from obtaining audit evidence that controls have been implemented. When obtaining audit evidence of implementation by performing risk assessment procedures, the auditor should determine that the relevant controls exist and that the entity is using them. When performing tests of controls, the auditor should obtain audit evidence that controls operate effectively. This includes obtaining audit evidence about

- how controls were applied at relevant times during the period under audit,
- the consistency with which they were applied, and
- by whom or by what means they were applied.

If substantially different controls were used at different times during the period under audit, the auditor should consider each separately. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

General Considerations When Testing Controls

Sources of Audit Evidence About Internal Control Effectiveness

.05 The audit evidence used to provide support for the auditor's conclusion about the operating effectiveness of controls during the audit period may come from a variety of sources, including the following:

- Tests of controls performed during the current period.
- Risk assessment procedures performed during the current period.
- Evidence provided in a Type 2 SAS 70 report (see AU section 324, *Service Organizations* [AICPA, *Professional Standards*, vol. 1]).

[1] The auditor's strategy reflects the level of assurance the auditor plans to obtain regarding controls.

- Evidence obtained from the performance of procedures in previous audits.
- The information gathered and conclusions reached as part of the auditor's quality control procedures for client acceptance and continuance. For example, client acceptance procedures may include inquiries of attorneys, bankers, or others in the business community about client management that provide insight into their
  - — competence,
  - — integrity,
  - — operating philosophy, and
  - — ethical values.

Risk Assessment Procedures vs. Tests of Controls

.06 Risk assessment procedures allow the auditor to evaluate the design effectiveness of internal controls for the purpose of assessing risks of material misstatement. Tests of controls build on the auditor's evaluation of design effectiveness and allow the auditor to assess the operating effectiveness of controls during the operating period. The results of the auditor tests of controls are used to design substantive procedures.

.07 Although some risk assessment procedures that the auditor performs to evaluate the design of controls and to determine that they have been implemented may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, a walkthrough or the observation of the performance of a control may provide evidence about the operating effectiveness of controls. In such circumstances, the auditor should consider whether the audit evidence provided by those audit procedures is sufficient.

Evidence of Operating Effectiveness of Controls at a Service Organization

.08 A Type 2 service auditor's report may provide evidence about the operating effectiveness of controls at a service organization. However, controls over the information provided to the service organization may still need to be assessed.

Evaluating the Effectiveness of Complementary Controls

.09 When designing tests of controls, typically the auditor will focus first on testing control activities, because the control activities component of internal control is the one most directly related to the assertion. For example, physically counting goods that have been received and comparing the quantity and description to the vendor's packing slip is directly related to both the existence and valuation of inventory.

.10 However, in addition to testing the controls that relate directly to the assertion, the auditor should consider the need to obtain audit evidence supporting the effective operation of the complementary controls upon which the effectiveness of the direct control depends.

.11 When considering the need to test complementary controls, the auditor may consider the following:

- *The significance of the complementary control to the effective functioning of the direct control.* As the effectiveness of the direct control becomes more dependent on the complementary control, the auditor's need to test the indirect control increases.
- *The relative significance of the audit evidence of the complementary control to the auditor's conclusion on the effectiveness of the direct control.* The auditor's conclusion about the operating effectiveness of a control activity is supported by a combination of evidence about (i) the operating effectiveness of the direct control activity itself and (ii) the operating effectiveness of other, complementary controls upon which the effectiveness of the direct control depends. In some instances, the auditor may be

able to support a conclusion based primarily on tests of the direct control, with little evidence about the operating effectiveness of the related complementary controls. In other instances (for example, IT application controls), the auditor's conclusion may be based primarily on tests of the comple mentary controls and little on tests of the direct control. In those situations where you rely significantly on the operating effectiveness of the complementary control, the auditor might obtain more sufficient and adequate audit evidence to support the conclusion on the operating effectiveness of the indirect control, for example, the monitoring of the performance of the reconciliation.

- *The degree of reliability required of the audit evidence obtained about internal control operating effectiveness.* Testing the complementary control increases the reliability of the audit evidence obtained about the operating effectiveness of the direct control. For example, the auditor may test four month-end reconciliations and draw a conclusion about the effectiveness of those reconciliations for an entire 12-month period. If the auditor has tested the operating effectiveness of the complementary controls related to the reconciliation, the conclusion about the effectiveness of the reconciliation during the period the auditor did not test will be more reliable than if the auditor did not test the complementary controls.
- *Evidence of operating effectiveness that may have been obtainedas part of obtaining an understanding of the design and implementation of the complementary controls.* When performing risk assessment procedures to obtain an understanding of internal control, the auditor may obtain some information about the operating effectiveness of the complementary controls that are indirectly related to an assertion. For example, risk assessment procedures may provide the auditor with some evidence about the operating effectiveness of portions of the control environment. This information about operating effectiveness may be limited, but nevertheless, it may be sufficient for the purpose of drawing a conclusion about the operating effectiveness of the direct control.

.12 When testing complementary controls, the auditor may choose not to test the operating effectiveness of the entire component to which the complementary control pertains, but may limit the tests to those elements of the component that have an immediate bearing on the effectiveness of the direct control. For example, when testing controls over purchasing to place moderate reliance on them, the auditor may consider the need to test the control environment or IT general controls relating to the entire entity beyond the design and implementation assessment procedures the auditor already has performed. If practical, the auditor may limit the tests to those aspects of the control environment or IT general controls that have a direct bearing on the financial statement assertions related to purchasing. To place high reliance on the controls, the auditor may often need to gather additional evidence concerning the IT general controls and overall control environment to support high reliance on the purchasing controls.

The Relationship Between Tests of Controls and Substantive Tests

.13 There is an inverse relationship between the audit evidence to be obtained from substantive tests and that obtained from tests of controls. As the sufficiency and adequacy of the audit evidence obtained from tests of controls increases, the sufficiency and adequacy of the audit evidence required from substantive tests generally decreases. For example, in circumstances when the auditor adopts an approach consisting primarily of tests of controls, in particular related to those risks where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures, the auditor should perform tests of controls to obtain a high level of assurance about their operating effectiveness.

.14 On the other hand, the more audit evidence from substantive tests, the less audit evidence from tests of controls would be necessary. In many instances, the nature and extent of substantive tests alone may provide sufficient, adequate evidence at the assertion level, which would make the testing of control effectiveness (beyond assessing the design and implementation of the related controls) unnecessary.

A Financial Statement Audit vs. an Examination of Internal Control

.15 Testing the operating effectiveness of internal control to support an opinion on the financial statements is different from testing controls to support an opinion on the effectiveness of the internal control system.

.16 In an attestation engagement to examine the effectiveness of internal control, the audit evidence obtained from the tests of internal control is the only evidence the auditor has to support an opinion. In contrast, when performing an audit of the financial statements, the auditor ordinarily performs both tests of controls and substantive tests. The objective of the tests of controls in a financial statement audit is to assess the operating effectiveness of controls and incorporate this assessment into the design of the nature, timing, and extent of substantive procedures. Thus, when testing controls in a financial statement audit, the auditor has flexibility in determining not only whether to test controls, and if so which controls to test, but also the level of effectiveness of those controls that is necessary to provide the desired level of support for an opinion on the financial statements.

Determining the Nature of the Tests of Controls

.17 The nature of the procedures the auditor performs to test controls has a direct bearing on the relevance and reliability of audit evidence. When responding to assessed risks of material misstatement, the nature of the audit procedures is of most importance. Performing more tests or conducting the tests closer to the period end will not compensate for a poorly designed test that lacks sufficient relevance or reliability in gathering audit evidence about the effectiveness of a control.

.18 The types of audit procedures available for obtaining audit evidence about the effectiveness of controls includes the following:

- Inquiries of appropriate entity personnel
- Inspection of documents, reports, or electronic files indicating performance of the control
- Observation of the application of the control
- Reperformance of the application of the control by the auditor

.19 The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about operating effectiveness. Documentation may provide evidence about the performance of some controls; in these situations, the auditor may inspect this documentation to obtain evidence about the operating effectiveness of the control.

.20 For other controls, complete documentation may not be available or relevant. For example, documentation of the operation may be sketchy for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed automatically by the client's IT system. In these circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation of the performance of the control or the use of computer assisted audit techniques (CAATs). Entities can be encouraged to improve weak documentation.

.21 Because of the limits of inquiry and observation, inquiry combined with inspection or reperformance ordinarily provide more reliable audit evidence than a combination of only inquiry and observation. For example, the auditor may inquire about and observe the entity's procedures for opening the mail and processing cash receipts to test the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, the auditor may supplement the observation with other observations or inquiries of entity personnel, and the auditor may also inspect documentation about the operation of such controls at other times during the audit period.

Tests of IT Controls

.22 Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated control, combined with audit evidence about the operating effectiveness of IT general controls (and in particular, security and change controls) may provide substantial audit evidence about the operating effectiveness of the control during the entire audit period. That is, once the auditor has determined that an IT application control has been implemented (placed in operation), the auditor may draw a conclusion about the operating effectiveness of the IT portion of the control activity, so long as the auditor has determined that relevant IT general controls are operating effectively.

Tests of Spreadsheets

.23 The development and use of spreadsheets typically lack the controls that usually are present for formal, purchased software. Absent audit evidence indicating that appropriate general controls over spreadsheets have been implemented, the auditor might continue to test spreadsheet controls even after their implementation.

Dual Purpose Tests

.24 Some audit procedures may simultaneously provide audit evidence that both

- support the relevant assertion or detects material misstatement and
- support a conclusion about the operating effectiveness of related controls.

Tests that achieve both of these objectives concurrently on the same transaction typically are referred to as dual purpose tests. For example, the auditor may examine an invoice to determine whether it has been approved and also to provide substantive audit evidence about the existence and amount of the transaction.

.25 When performing a dual purpose test, the auditor should carefully consider whether the design and evaluation of such tests can accomplish both objectives. For example, the population of controls and the population of substantive procedures should be the same. If tests on components of a balance such as receivables are designed as dual purpose tests, only evidence of the controls operating over period-end balance items will be obtained.

.26 Furthermore, when performing such tests, the auditor should consider how the outcome of the tests of controls may affect the auditor's determination about the extent of substantive procedures to be performed. For example, if controls are found to be ineffective, the auditor should consider whether the sample size for substantive procedures should be increased from that originally planned.

Determining the Timing of Tests of Controls

.27 The timing of tests of controls affects the relevance and reliability of the resulting audit evidence. In general, the relevance and reliability of the audit evidence obtained diminishes as time passes between the testing of the controls and the end of the period under audit. For this reason, when tests of controls are performed during an interim period or carried forward from a previous audit, the auditor should determine what additional audit evidence should be obtained to support a conclusion on the current operating effectiveness of those controls.

.28 The timing of tests of controls depends on the auditor's objective:

a. When controls are tested as of a point in time, the auditor may obtain audit evidence that the controls operated effectively only at that time.

b. When controls are tested throughout a period, the auditor may obtain audit evidence of the effectiveness of the operation of the control during that period.

.29 Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose, for example, when testing controls over the client's physical inventory counting at the period end. If, on the other hand, the auditor needs audit evidence of the effectiveness of a control over a period, audit evidence pertaining only to a point in time may be insufficient, and the auditor should supplement those tests with others that provide audit evidence that the control operated effectively during the period under audit. For example, for an automated control, the auditor may test the operation of the control at a particular point in time. The auditor then may perform tests of controls to determine whether the control operated consistently during the audit period, or the auditor may test with the intention of relying on general controls pertaining to the modification and use of that computer program during the audit period.

.30 The tests the auditor performs to supplement tests of controls at a point of time may be part of the tests of controls over the client's monitoring of controls.

Updating Tests of Controls Performed During an Interim Period

.31 The auditor may test controls as of or for a period that ends prior to the balance sheet date. This date often is referred to as the *interim date* or *interim period*. The period of time between the interim date or period and the balance sheet date often is referred to as the *remaining period*.

.32 When the auditor tests controls during an interim period or as of an interim date, the auditor should:

- obtain audit evidence about the nature and extent of any significant changes in internal control that occurred during the remaining period and
- determine what additional audit evidence should be obtained for the remaining period.

.33 To determine what additional audit evidence the auditor should obtain to update tests of controls performed in advance of the balance sheet date, the auditor should consider the following:

- The significance of the assessed risks of material misstatement at the relevant assertion level
- The specific controls that were tested during the interim period
- The degree to which audit evidence about the operating effectiveness of those controls was obtained
- The length of the remaining period
- The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls
- The control environment
- The volume or value of transactions processed in the remaining period

.34 When testing controls as of or during an interim period, the auditor may obtain additional audit evidence about the operating effectiveness of controls during the remaining period by performing procedures such as

- extending the testing of the operating effectiveness of controls over the remaining period or
- testing the client's monitoring of controls.

.35 For example, the auditor might perform

- inquiries and observations related to the performance of the control, the monitoring of the control, or any changes to the control during the remaining period;
- a walkthrough covering the period between the interim date and the period end; and
- the same procedures performed at interim, but directed to the period from interim to period end.

Use of Audit Evidence Obtained in Prior Audits

.36 If certain conditions are met, the auditor may use audit evidence obtained in prior audits to support the conclusion about the operating effectiveness of controls in the current audit. If the auditor plans to use evidence obtained in prior periods, the auditor should consider

- whether the use of this evidence is appropriate and
- the length of the time period that may elapse before retesting the control.

.37 The following table summarizes the factors the auditor should consider when determining whether to use audit evidence about the operating effectiveness obtained in a prior audit.

	Appropriateness of Using Evidence From Prior Audit		*Length of Time Before Retesting Control*	
	May be appropriate	*May not be appropriate*	*Longer*	*Shorter*
Effectiveness of control environment, the client's risk assessment, monitoring, and IT general controls	Effective design and operation	Evidence of poor design or operation	Effective design and operation	Evidence of poor design or operation
Risks arising from characteristics of the control	Largely automated control	Significant manual or judgmental component to control	Largely automated control	Significant manual or judgmental component to control
Changes in circumstances at the client that may require changes in controls, including personnel changes that affect application of the control	Minor changes in client circumstances, including personnel	Significant changes in client circumstances, including personnel	Minor changes in client circumstances, including personnel	Significant changes in client circumstances, including personnel
Operating effectiveness of the control	Control operated effectively in prior audit	Control did not operate effectively in prior audit	Control operated effectively in prior audit	Control did not operate effectively in prior audit
Risks of material misstatement	Low risk of material misstatement for relevant assertion	High risk of material misstatement for relevant assertion	Low risk of material misstatement for relevant assertion	High risk of material misstatement for relevant assertion
Extent of reliance on the control to design substantive procedures	Low reliance on the control	High reliance on the control	Low reliance on the control	High reliance on the control

.38 If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in prior audits, the auditor should

- obtain audit evidence about whether changes in those specific controls have occurred subsequent to the prior audit and
- perform audit procedures to establish the continuing relevance of audit evidence obtained in the prior audit.

.39 Even when the auditor uses audit evidence about the operating effectiveness of controls obtained in prior periods, the auditor still should evaluate the design effectiveness and implementation of controls in the current period. The procedures performed as described in the preceding paragraph may help the auditor fulfill this responsibility; however, the auditor may have to supplement these procedures with others. For example, if the controls have not changed from the previous period but the client's business process has, the auditor will need to determine whether the design of controls remains effective in light of the changed business processes.

.40 The auditor may not rely on audit evidence about the operating effectiveness of controls obtained in prior audits for controls that

- have changed significantly since the prior audit,
- pertain to business processes that have changed significantly since the prior audit, and
- mitigate significant risks.

For any control that meets one of the preceding criteria, the auditor should test operating effectiveness in the current audit.

.41 For example, changes in a system that enable an entity to receive a new report from the system probably is not a significant change and, therefore, is unlikely to affect the relevance of prior period audit evidence. On the other hand, a change that causes data to be accumulated or calculated differently probably is significant and, therefore, does affect the relevance of audit evidence obtained in the prior period, in which case the operating effectiveness of the control should be tested in the current period.

Rotating Emphasis on Tests of Controls

.42 When the auditor plans to rely on controls that have not changed since they were last tested, the auditor should test the operating effectiveness of these controls at least once in every third year in an annual audit. There also may be some controls, such as over revenue recognition or inventories that, due to their importance to the client financial statements, might be subject to testing every two years or every year, depending on the risks, even when there are purported to be no changes in controls.

.43 When there are a number of controls for which the auditor plans to use audit evidence obtained in prior audits, the auditor should test the operating effectiveness of *some* controls each audit. However, when the auditor is testing controls for only one or two key classes of transactions in an entity, rotating the testing of these controls may not be warranted.

Determining the Extent of Tests of Controls

.44 The extent of the auditor's tests of controls affects the sufficiency of the audit evidence obtained to support the auditor's assessment of the operating effectiveness of controls. To reduce the extent of substantive procedures in an audit, the tests of controls performed by the auditor need to be sufficient to determine the operating effectiveness of the controls

- at the relevant assertion level and
- either throughout the period, or as of the point in time when the auditor plans to rely on the control.

.45 Factors the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The relevance and reliability of the audit evidence to be obtained in supporting that the control prevents, or detects and corrects, material misstatements at the relevant assertion level.
- The extent to which audit evidence is obtained from tests of other controls that meet the same audit objective.

- The extent to which the auditor plans to rely on the operating effectiveness of the control in the assessment of risk (and thereby reduce substantive procedures based on the reliance of such control). The more the auditor relies on the operating effectiveness of controls in the assessment of risk, the greater is the extent of the auditor's tests of controls.
- The expected deviation from the control.

Sampling Considerations

.46 The auditor should consider using an audit sampling technique to determine the extent of tests whenever the control is applied on a transaction basis (for example, matching approved purchase orders to supplier invoices) and that it is applied frequently. When a control is applied periodically (for example, monthly reconciliations of accounts receivable subsidiary ledger to the general ledger), the auditor should consider guidance appropriate for testing smaller populations (for example, testing the control application for two months and reviewing evidence the control operated in other months or reviewing other months for unusual items). AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), as amended, and the AICPA Audit Guide *Audit Sampling*, provide further guidance on the application of sampling techniques to determine the extent of testing of controls. The AICPA Audit Guide *Audit Sampling* also provides guidance for testing in smaller populations.

.47 The auditor should consider the expected deviation from the control when determining the extent of tests. As the rate of expected deviation from a control increases, the auditor should increase the extent of testing of the control. However, if the rate of expected deviation is expected to be too high, the auditor may determine that tests of controls for a particular assertion may not be effective. In this case, the auditor may conclude that a control deficiency exists and the auditor should consider its severity and whether it should be communicated to those charged with governance, management, or both.

Extent of Testing IT Controls

.48 Generally, IT processing is inherently consistent. An automated control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Therefore, the auditor may be able to limit the testing of an IT application control to one or a few instances of the control operation, provided that the auditor determines that related IT general controls operated effectively during the period of reliance.

Assessing the Operating Effectiveness of Controls

Evidence About Operating Effectiveness

.49 The concept of effectiveness of the operation of controls recognizes that some deviations in the way a client applies the controls may occur. Deviations from prescribed controls may be caused by factors such as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error.

.50 When the auditor encounters deviations in the operation of controls, those deviations will have an effect on the auditor's assessment of operating effectiveness. A control with an observed non-negligible deviation rate is not an effective control. For example, if a test is designed in which the auditor selects a sample of, say, 25 items and expects no deviations, the finding of one deviation would be considered a non-negligible deviation because, based on the results of the test of the sample, the desired level of confidence has not been obtained.

.51 There are sources of audit evidence beyond the auditor's tests of controls that contribute to the auditor's assessment of the operating effectiveness of controls. The extent of misstatements detected by performing substantive procedures also may alter the auditor's judgment about the effectiveness of controls in a negative direction. However, misstatement-free results of substantive tests do not indicate that a lower assessment of control risk may be substituted for the one supported by the procedures the auditor used to assess control risk.

Investigating Additional Implications of Identified Deviations

.52 When the auditor detects control deviations during the performance of tests of controls, the auditor should make specific inquiries to understand these matters and their potential consequences, for example, by inquiring about the timing of personnel changes in key internal control functions.

.53 Deviations in the application of control activities may be caused by the ineffective operation of indirect controls such as IT general controls, the control environment, or other components of internal control. To gain an understanding of the deviations in control, the auditor may wish to make inquires and perform other tests to identify possible weaknesses in the control environment or other indirect controls.

.54 For example, suppose that one of the client's primary controls related to the existence of inventory—periodic test counts—had several instances where the number of items counted by the count teams did not agree to the actual physical count of the items on hand. When gaining a further understanding of the nature of these deviations, the auditor determines that the underlying cause is poor training of the test count teams and a lack of written instructions. Training and written instructions are indirect controls that may affect the operating effectiveness of controls other than those related to existence. For example, the lack of training and instruction could result in the count teams reporting the wrong product number or description, which also could affect the valuation of inventory. This finding could cause the company and auditor to conclude that a recount is necessary once the teams are properly trained.

Assessing Effectiveness

.55 After considering the results of tests of controls and any misstatements detected from the performance of substantive procedures, the auditor should determine whether the audit evidence obtained provides an appropriate basis for reliance on the controls. If the reliance on the controls is not warranted, the auditor should determine whether

- additional tests of controls are necessary or
- if the potential risks of misstatement will be addressed using substantive procedures.

Once the auditor has concluded that reliance on certain controls is not warranted, it is unnecessary to perform further tests of those controls.

Deficiencies in the Operation of Controls

.56 The auditor may consider whether deviations in the operation of controls have been caused by an underlying control deficiency. When evaluating the reason for a control deviation, the auditor may consider the following:

- Whether the control is automated (in the presence of effective information technology general controls, an automated application control is expected to perform as designed)
- The degree of intervention by entity personnel contributing to the deviation (for example, was the deviation evidence of a possible override)
- Management's actions in response to the matter (if management was aware of the deviation)

.57 Regardless of the reason for the deviation, numerous or repeated instances of the deviation may constitute a significant deficiency or material weakness. The following are examples of circumstances that may be control deficiencies of some magnitude:

- Failure in the operation of properly designed controls within a significant account or process, for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy (for example,

the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements).

- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. For example, a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. However, a preventive control failure may be mitigated by an effective detective control that prevents the misstatement of the financial statements. Suppose the inventory security control fails. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement to the financial statements if performed effectively and timely (near or at the reporting date). In the absence of a timely count, a deficient preventive control may be a deficiency in internal controls of some magnitude.
- Failure to perform reconciliations of significant accounts, for example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions, for example, consistent under accruals of expenses or overstatement of allowances at the direction of management.
- Misrepresentation by client personnel to the auditor (an indicator of fraud).
- Management override of controls that would enable the entity to prepare financial statements in accordance with generally accepted accounting principles.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.

Documentation

.59 In regards to the performance of further audit procedures, the auditor should document the following:

- The overall responses to address the assessed risks of misstatement at the financial statement level
- The nature, timing, and extent of the further audit procedures
- The linkage of those procedures with the assessed risks at the relevant assertion level
- The results of the audit procedures
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[*The next page is 5301.*]

AAM Section 5300

Performing Substantive Procedures

.01 The objective of substantive procedures is to detect individual misstatements that alone or in the aggregate cause material misstatements at the assertion level. Substantive procedures include the following:

- Tests of details of transactions, account balances, and disclosures.
- Analytical procedures. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), provides guidance on the application of analytical procedures as substantive tests.

.02 The auditor should plan and perform substantive procedures to be responsive to the related assessed risks of material misstatement. However, the auditor should perform certain tests regardless of the risk assessment because the risk assessment may not identify all risks.

- *Substantive tests of material items*. The auditor should perform substantive procedures for all relevant assertions for each material class of transactions, account balance, and disclosure. For example, if the auditor determines that long term debt is a material account, the auditor should perform substantive tests for all assertions that are relevant to long term debt, even if the auditor has determined that it is unlikely that the assertion could contain a material misstatement. The auditor may determine that the risk of the entity not having the obligation to repay the debt (the obligation assertion) is low, but nevertheless, the auditor should perform a substantive procedure (for example, confirming the terms of the debt with the lender) to address the risk. Because the account is material, the auditor is precluded from relying solely on risk assessment procedures or tests of controls to support the conclusion.
- *Substantive tests related to the financial statement reporting system*. On all engagements the auditor should
  - — agree the financial statements, including their accompanying notes, to the underlying accounting records and
  - — examine material journal entries and other adjustments made during the course of preparing the financial statements. The nature and extent of the auditor's examination of journal entries and other adjustments depend on the nature and complexity of the client's financial reporting system and the associated risks of material misstatement.

.03 When, in accordance with paragraph .110 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. When the audit approach to significant risks consists only of substantive procedures, the audit procedures appropriate to address such significant risks consist of

- tests of details only
- a combination of tests of details and analytical procedures

That is, to address significant risks, it is unlikely that audit evidence obtained solely from substantive analytical procedures will be sufficient.

Nature of Substantive Procedures

.04 Substantive procedures include tests of details and substantive analytical procedures. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Tests of details are ordinarily more appropriate to obtain audit evidence regarding certain relevant assertions about account balances, including existence and valuation.

.05 The auditor should plan substantive procedures to be responsive to the planned level of detection risk. In some situations, the auditor may determine that performing only substantive analytical procedures may be sufficient to reduce the planned level of detection risk to an acceptably low level. For example, the auditor may determine that performing only substantive analytical procedures is responsive to the planned level of detection risk for an individual class of transactions where the auditor's assessment of risk has been reduced by obtaining audit evidence from performance of tests of the operating effectiveness of controls. In other situations, the auditor may determine that tests of details only are appropriate, or that a combination of substantive analytical procedures and tests of details is most responsive to the assessed risks. The auditor's determination as to the substantive procedures that are most responsive to the planned level of detection risk is affected by whether the auditor has obtained audit evidence about the operating effectiveness of controls.

Tests of Details

.06 The auditor should design tests of details responsive to the assessed risk with the objective of obtaining sufficient appropriate audit evidence to achieve the planned level of assurance at the relevant assertion level. In designing substantive procedures related to the existence or occurrence assertion, the auditor should select from items contained in a financial statement amount and should obtain the relevant audit evidence. On the other hand, in designing audit procedures related to the completeness assertion, the auditor should select from audit evidence indicating that an item should be included in the relevant financial statement amount and should investigate whether that item is so included. The knowledge gained when understanding the business and its environment should be helpful in selecting the nature, timing, and extent of audit procedures related to the completeness assertion. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

Substantive Analytical Procedures

.07 In designing substantive analytical procedures, the auditor should consider such matters as the following:

- The suitability of using substantive analytical procedures, given the assertions. Analytical procedures may not be suitable for all assertions. For example, transactions subject to management discretion (such as a decision to delay advertising expenses) may lack the predictability between periods or financial statement accounts that is necessary to perform and effective analytical procedure.
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed. To assess the reliability of the data used in a substantive analytical procedure, the auditor may consider its source and the conditions under which it was gathered.
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance. The precision of the auditor 's expectation depends on (among other things):
  - — The identification and consideration of factors that significantly affect the amount being audited (for example, contributions to an employee 401(k) plan depends on compensation expense and the percentage of the employer contribution committed to by management).
  - — The level of data used to develop the expectation. Typically, expectations developed at a detailed level have a greater chance of detecting a material misstatement than do broad comparisons.
- The amount of any difference in recorded amounts from expected values that is acceptable. The smaller the difference between the expected amount and the recorded amount that can be accepted, the more precise the expectation will typically be.

- The risk of management override of controls. Management override of controls might result in adjustments to the financial statements outside of the normal financial reporting process, which may result in artificial changes to the financial statement relationships being analyzed. These artificial relationships may result in the auditor drawing erroneous conclusions about the substantive analytical procedures.

Paragraphs .57–.67 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), direct the auditor to perform certain procedures to assess the risk of management override of controls.

.08 Paragraphs .09–.21 of AU section 329 provide additional guidance on the design of substantive analytical procedures.

Timing of Substantive Procedures

Substantive Procedures Performed at an Interim Date

.09 In some circumstances, the auditor may choose to perform substantive procedures at an interim date. When the auditor performs procedures as of a date in advance of year end, the risk that the auditor will fail to detect a material misstatement that may exist at year end is increased. This risk increases as the length of the period between interim tests and year end increases. The following table summarizes factors that may be considered when determining whether to perform substantive procedures at an interim date.

Matters to Consider in Determining Whether to Perform Substantive Procedures at an Interim Date

	Likelihood of Performing Substantive Procedures at an Interim Date	
Factor to consider	*More likely*	*Less likely*
Control environment and other relevant controls	Effectively designed or operating controls, including the control environment	Ineffectively designed or operating controls, including the control environment
The availability of information for the remaining period	Information is available that will allow the auditor to perform procedures related to the remaining period	Lack of information necessary to perform procedures related to the remaining period
Assessed risk	Lower risk of material misstatement for the relevant assertion	Higher risk of material misstatement for the relevant assertion
Nature of transactions or account balances and relevant assertions	Year-end balances are reasonably predictable with respect to amount, relative significance, and composition	Year-end balances can fluctuate significantly from interim balances, for example, due to rapidly changing business conditions, seasonality of business, or transactions that are subject to management's discretion
Ability to perform audit procedures to cover remaining period	The auditor will be able to perform all necessary procedures to cover the remaining period	The auditor's ability to perform procedures relating to the remaining period is limited, for example, by a lack of available information

.10 The objective of some of the tests may make the results of the tests irrelevant if performed at an interim date. For example, tests related to the preparation of the financial statements or the client's compliance with debt covenants typically provide relevant audit evidence only if performed at the period end.

.11 In addition to those items described in the preceding table, the circumstances of the engagement may result in the performance of certain tests at an interim date. For example, a client may request that the auditor identify all material misstatements a short period of time after year end (which is common for companies that wish to issue a press release of their earnings for the period). In that situation, the auditor may decide to confirm receivables prior to year end because the time period between the end of the period and the release of earnings is too short to allow the auditor to send and receive confirmations of customers and to complete the test work.

.12 The auditor's ability to perform audit procedures relating to the remaining period depends a great deal on whether the client's accounting system is able to provide the information needed for the auditor to perform his or her procedures. The auditor should consider whether that information is sufficient to permit investigation of the following:

- Significant unusual transactions or entries (including those at or near the period end)
- Other causes of significant fluctuations or fluctuations that did not occur
- Changes in the composition of the classes of transactions or account balances

.13 The timing of audit procedures also involves consideration of whether related audit procedures are coordinated properly. This consideration includes, for example, the following:

- Coordinating the audit procedures applied to related party transactions and balances.
- Coordinating the testing of interrelated accounts and accounting cutoffs.
- Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items.

.14 When performing substantive procedures at an interim date, the auditor should perform substantive procedures or substantive procedures combined with tests of controls to cover the remaining period that provide a reasonable basis for extending audit conclusions from the interim date to the period end.

.15 When performing substantive procedures at an interim date, the auditor may reconcile the account balance at the interim date to the balance in the same account at year end. The reconciliation will allow the auditor to

- identify amounts that appear unusual,
- investigate these amounts, and
- define the appropriate population to perform substantive analytical procedures or tests of details to test the remaining period.

.16 If misstatements are detected in classes of transactions or account balances at an interim date, the auditor should consider modifying the related assessment of risk and the planned nature, timing, or extent of the substantive procedures covering the remaining period that relate to such classes of transactions or account balances, or the auditor may extend or may repeat such audit procedures at the period end.

Substantive Procedures Performed in Previous Audits

.17 In most cases, audit evidence from substantive procedures performed in a prior audit provides little or no audit evidence for the current period. To use audit evidence obtained during a prior period in the current period audit, both the audit evidence and the related subject matter must not fundamentally change. For example, a legal opinion would continue to be relevant audit evidence if it were received in a prior period related to the structure of a securitization transaction and no changes have occurred during the current period. If the auditor plans to use audit evidence from a prior period in the current audit, the auditor should perform audit procedures during the current period to establish the continuing relevance of the audit evidence.

Extent of the Performance of Substantive Procedures

.18 The greater the risk of material misstatement, the greater the extent of the auditor's substantive procedures. However, the nature of the audit procedures is of most importance in responding to assessed risks. Increasing the extent of an audit procedure is appropriate only if the procedure itself is relevant to the specified risk.

.19 Considerations for Designing Tests of Details. When determining the extent of the tests of details, the auditor ordinarily thinks in terms of sample size. However, the auditor also may consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population, rather than performing sampling or stratifying the population into homogeneous subpopulations for sampling. AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), and the AICPA Audit Guide *Audit Sampling*, provide guidance on the use of sampling and other means of selecting items for testing.

Adequacy of Presentation and Disclosure

.20 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, are in accordance with generally accepted accounting principles (GAAP). The auditor should consider whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information. The presentation of financial statements in conformity with GAAP also includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the bases of amounts set forth. The auditor should consider whether management should have disclosed a particular matter in light of the circumstances and facts of which the auditor is aware at the time. In performing the evaluation of the overall presentation of the financial statements, including the related disclosures, the auditor should consider the assessed risk of material misstatement at the relevant assertion level. See paragraph .15 of AU section 326, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1), for a description of the relevant assertions related to presentation and disclosure.

Documentation

.21 In regards to the performance of further audit procedures, the auditor should document the following:

- The overall responses to address the assessed risks of misstatement at the financial statement level
- The nature, timing, and extent of the further audit procedures
- The linkage of those procedures with the assessed risks at the relevant assertion level
- The results of the audit procedures
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

AAM Section 5400

Audit Sampling Considerations

.01 Once an auditor decides what audit procedures to apply (the nature of the tests) and when to apply them (the timing of the tests), the next decision to be made is to determine how many items to apply which procedures to—that is, the extent of testing. The greater the risk of material misstatement, the less detection risk that can be accepted, and, consequently, the greater the extent of substantive procedures. Because the risks of material misstatement include consideration of the effectiveness of internal control, the extent of substantive procedures may be reduced by satisfactory results from tests of the operating effectiveness of controls. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

.02 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size, which is affected by the planned level of detection risk, tolerable misstatement, expected misstatement, and nature of the population. However, the auditor should also consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population as opposed to performing sampling or stratifying the population into homogeneous subpopulations for sampling.

Authoritative Standards

.03 AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), addresses a variety of issues relating to the auditor's use of sampling in an audit engagement. However, AU section 350 does not always apply when the auditor is examining less than 100 percent of a population. The AICPA Audit Guide *Audit Sampling* presents recommendations on the application of generally accepted auditing standards to audits involving the use of audit sampling methods, and provides guidance to help auditors apply audit sampling in accordance with AU section 350.

When AU section 350 Applies

.04 Audit sampling is only one of many tools used by auditors to obtain sufficient, appropriate audit evidence to support an opinion on financial statements. AU section 350 discusses design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used

- in tests of controls in internal control to evaluate operating effectiveness from prescribed controls,
- in substantive tests of details of account balances and classes of transactions, and
- in dual purpose tests that assess control risk and test whether the monetary amount of a transaction is correct.

.05 The portion of AU section 350 pertaining to tests of controls applies when sampling techniques are used to assess control risk. The portion pertaining to substantive tests apply when sampling techniques are used to test details of transactions or balances.

.06 According to AU section 350, sampling occurs when the auditor tests less than 100 percent of a population for the purpose of evaluating some characteristic of an account balance or class of transactions. AU section 350 applies to tests of controls when such tests are performed and to tests of balances when sampling populations are material. The extent to which sampling is used in an audit depends on the size of the client and the nature of the client's internal control. Also, if the sampling populations are small, it could be more efficient to audit individually significant items and obtain audit assurance about the remaining balance through analytical procedures than to perform audit sampling. As the size and sophistication of the client's internal control increases, the auditor is more likely to use audit sampling to perform tests of controls and tests of balances.

.07 In determining whether AU section 350 is applicable to circumstances in which an auditor examines less than 100 percent of the items making up an account balance or class of transactions, the auditor should consider the purpose of the test. If the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, the guidance in AU section 350 should be followed. For example, if the auditor intends to examine selected sales invoices to draw a conclusion about whether sales are overstated, audit sampling as described in AU section 350 should be applied because the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to assess the accuracy and valuation of the remaining invoices, the auditor is not sampling according to AU section 350—the examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed on the smaller items related to overstatement of sales. However, in practice, it is difficult to attain high assurance regarding a significant aggregate amount of smaller items in the population from procedures other than sampling, such as analytical tests.

.08 The way in which the population is defined can determine whether the requirements of AU section 350 apply. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables, and employee receivables. Each of these populations can be tested using a different audit strategy—some using audit sampling and others not. The sampling concepts in AU section 350 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

Authoritative Guidance About the Application of Audit Sampling to Substantive Tests Provided by AU Section 350

.09 AU section 350 contains the following provisions regarding sampling in connection with substantive testing:

- The concept that some items exist for which, in the auditor's judgment, acceptance of some sampling risk is not justified, and that these should be examined 100 percent (see paragraph .21 of AU section 350). This simply reminds the auditor that some of the items encountered in an examination of financial statements may be so significant individually or may have such a high likelihood of being in error or misstated that *all* such items should be examined.
- The suggestion that the efficiency of a sample may be improved by separating items subject to sampling into relatively homogeneous groups based on some characteristic (see paragraph .22 of AU section 350). This indicates that audit efficiency can sometimes be improved by, for example, stratifying or segregating the items constituting a balance or class of transactions into groups based on individual dollar value or some other characteristic.
- A requirement that the auditor considers tolerable misstatement in planning audit sampling applications in the examination of account balances and classes of transactions (see paragraph .18 of AU section 350). This asks the auditor to consider, in the early stages of an audit, how much misstatement the auditor will be able to tolerate for each balance and class of transactions that is sampled, in combination with misstatements in other accounts, and still render an unqualified opinion on the financial statements. AU section 350 asks the auditor to consider tolerable misstatement and to recognize that it is one of the factors influencing sample size.
- A requirement that the auditor selects a sample that can be expected to be representative of the population (see paragraph .24 of AU section 350). Simply put, this means that each item in the population being sampled should have *a chance* of being selected, not necessarily *an equal chance* of

being selected. This does not mean that the auditor is required to use a random or probability sample, but that he or she should use a method that avoids bias (for example, selecting only simple transactions for testing).

- A requirement that the auditor considers selected sample items to which the auditor is unable to apply planned audit procedures to determine their effect on the evaluation of the sample (see paragraph .25 of AU section 350). For example, sometimes the auditor may not be able to apply planned audit procedures to selected sample items because the entity may not be able to locate supporting documentation. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative audit procedures that would provide sufficient appropriate audit evidence to form a conclusion.
- A requirement that the auditor projects the misstatement results of the sample to the items from which the sample was selected (see paragraph .26 of AU section 350). Because the sample is expected to be representative of the population from which it was selected, misstatements found are also expected to be representative of the population. This requirement asks the auditor to measure the likely misstatement in the population from which the sample was drawn and to consider it in reaching his or her conclusions.
- A requirement that the auditor considers, in the aggregate, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications, along with other relevant audit evidence, when evaluating whether the financial statements taken as a whole may be materially misstated (see paragraph .30 of AU section 350).

Documentation Requirements

.10 AU section 350 contains no specific documentation requirements. However, the documentation standards set forth in the Statements on Auditing Standards dealing with documentation apply to audit sampling applications just as they apply to other auditing procedures. AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), states that the auditor "must develop an audit plan in which the auditor documents the audit procedures," and AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), states that audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested. The identification of the items tested may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- when a haphazard or random sample is selected, the documentation should include identifying characteristics (for example, the specific invoice numbers of the items included in the sample);
- when all items over a specified dollar amount are selected from a listing, the documentation need describe only the scope and the identification of the listing (for example, all invoices over $25,000 from the December sales journal); and
- when a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

With regard to audit sampling applications, the audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. Examples of items that the auditor may document for tests of controls are discussed in paragraph .25 of this section. Examples of items that the auditor typically documents for substantive tests are discussed in paragraph .55.

Determining Extent of Testing in a Small Business[1] Without Sampling

.11 Small businesses have certain characteristics that may influence the auditor's decision to use audit sampling.

.12 For substantive testing, small businesses frequently have small populations of accounting data in both account balances and classes of transactions. Consequently, sampling may not be necessary when the necessary audit assurance is attained by examining a significant portion or aggregate value of all the transactions.

.13 Paragraph .01 of AU section 350 defines *audit sampling* as "the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class." This definition allows some alternative approaches to sampling to determine the extent of testing in a small business engagement. These alternatives, by not using audit sampling and thus eliminating the requirements of AU section 350, may provide a more effective and efficient audit approach for a small business engagement.

.14 These alternative approaches include the following:

- Procedures applied to 100 percent of a certain group (strata) of transactions or balances
- Testing unusual items without applying procedures to the remainder of the population
- Other tests that involve application of procedures to less than 100 percent of the items in the population without drawing a conclusion about the entire account or class of transactions

.15 The auditor should decide what audit procedures to perform to meet the established audit objectives. Once this decision is made, the auditor needs to determine the extent of testing.

.16 An effective and efficient approach to determining the extent of testing in a small business engagement is shown in flowchart 1. This approach involves four important steps.

Identification of Individual Items to Be Examined

.17 The auditor is required to apply professional judgment in determining which individual items in an account balance or class of transactions need to be examined. In evaluating individual items, the auditor should consider factors such as the size of the item, whether the item is unusual, prior experience with the client, and whether the item involves a related party.

.18 For example, consider the following information for accounts receivable of a small business.

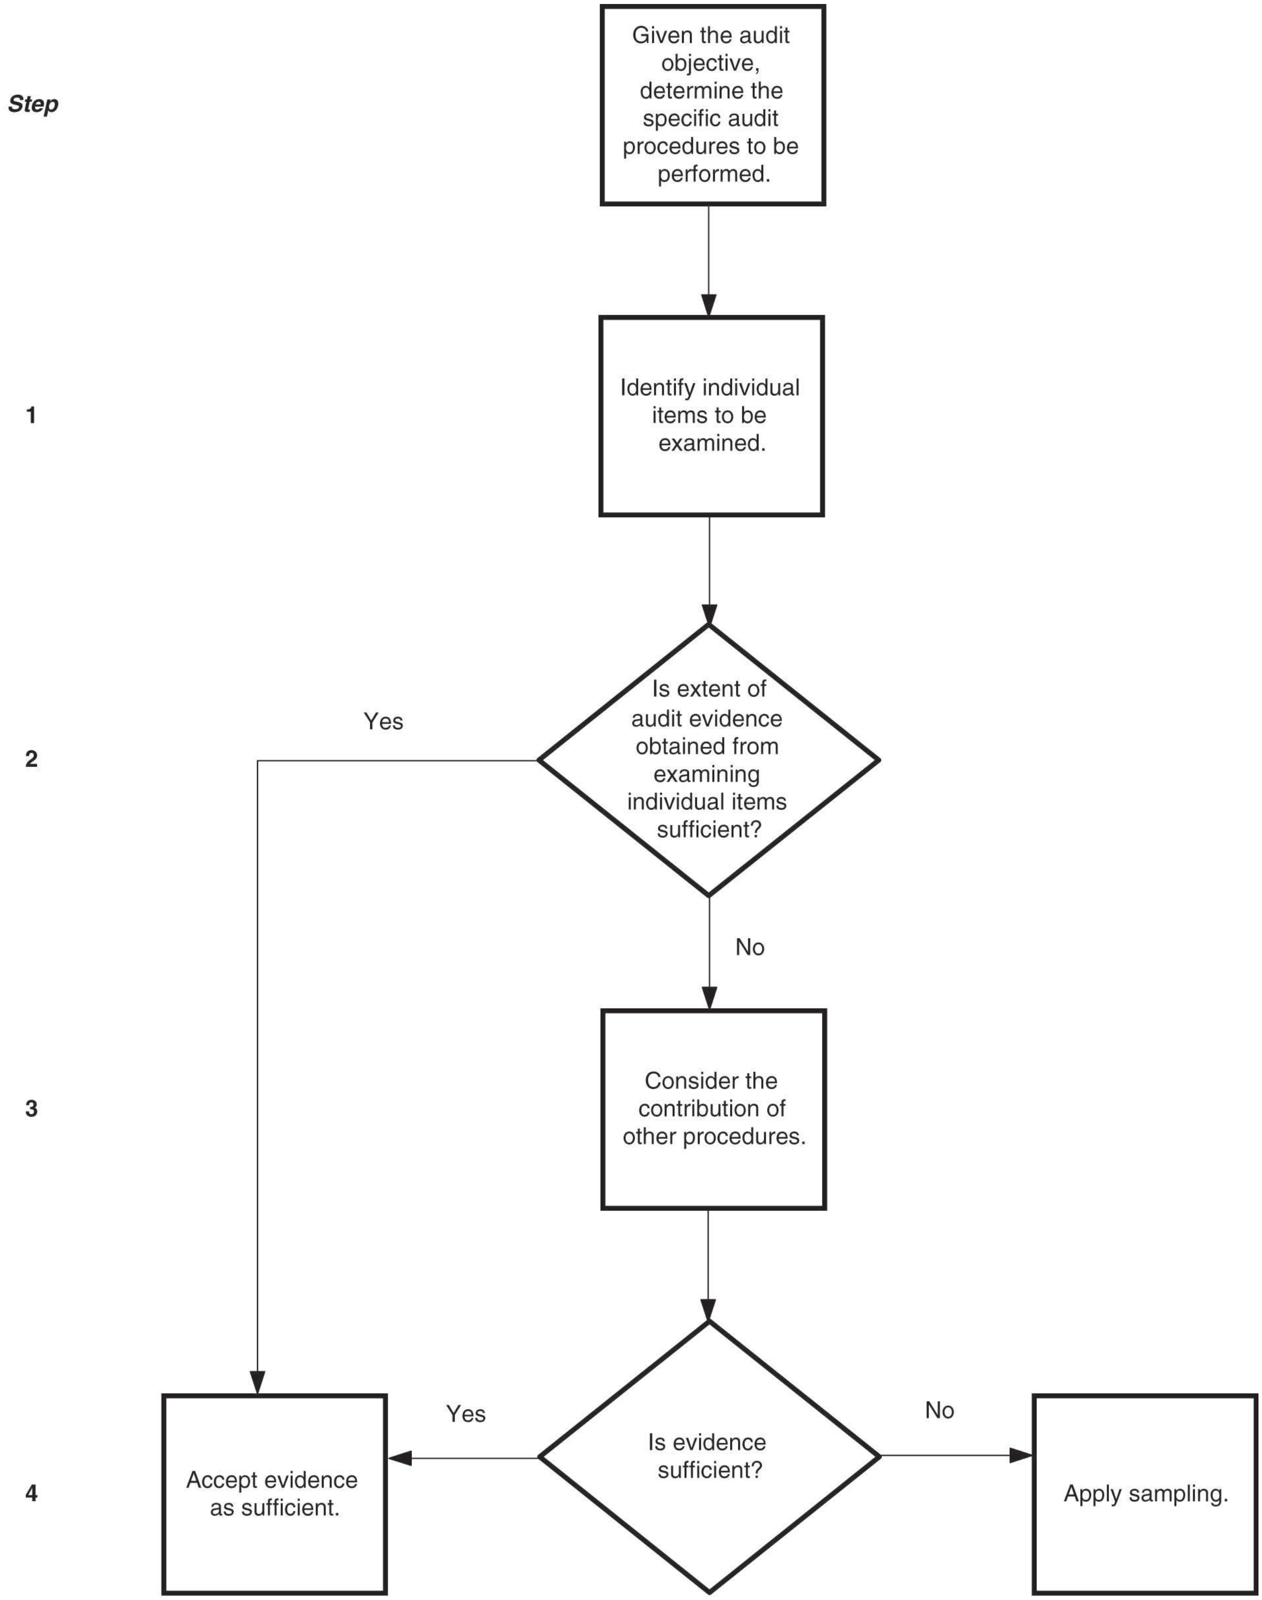
Number of Accounts	*Balances*	*Total Accounts*
4	$100,000 or more	$625,000
7	$25,000-99,999	375,000
62	$1-24,999	300,000
73		$1,300,000

In this case, if the eleven largest accounts are confirmed by the auditor, most of the accounts receivable balance is supported ($1,000,000 out of $1,300,000, or 77 percent). Provided the remaining $300,000 is not greater than tolerable misstatement or can be tested through other audit procedures, it may not be necessary to design a sample of the remaining items. Also, the auditor may decide to confirm the receivables that have unusual characteristics (for example, receivables with either large credit balances or those that are very delinquent).

[1] The concepts discussed in this section can also be applied to certain less complex account balances and classes of transactions in more complex entities.

Flowchart 1

An Audit Sampling Approach for a Small Business



Is Extent of Audit Evidence Obtained Sufficient?

.19 The following are some factors in evaluating the sufficiency of audit evidence obtained in tests of details for a particular account balance or class of transactions:

- The individual importance of the items examined. If the items examined, account for a high percentage of the total population, then the auditor may be reasonably assured that there is an acceptably low risk of an undetected misstatement.
- The nature and cause of misstatements. If during the course of the audit, misstatements are discovered, those misstatements should be evaluated to determine if they are due to differences in principle or in application, are errors or fraud or are due to misunderstanding of instructions or carelessness.
- Possible relationship of the misstatement to other phases of the audit. If it is determined that the misstatement is due to fraud, this would ordinarily require a broader consideration of the possible implications than would the discovery of an error.
- The characteristics of the sample to the population. The auditor may obtain some knowledge of the types of items in the population if the characteristics in the sample are similar in nature and the same controls are followed for processing the transactions.

Consider Contribution of Other Procedures

.20 The auditor may also consider whether other evidence obtained contributes to conclusions regarding the account balance or class of transactions. The auditor often considers the contribution of other procedures at the same time the extent of audit evidence obtained from examining individual items is considered.

.21 The auditor may use a combination of analytical procedures and substantive tests of details to support an opinion on the financial statements. In deciding whether other audit procedures make a contribution, the auditor may consider whether they support the audit objectives in the area, whether they indicate potential problems, and whether the evidence is consistent with the previous evidence obtained.

.22 In considering the contribution of other procedures, the auditor should use professional judgment in determining whether an unqualified opinion can be given without performing additional tests in the form of audit sampling.

Evaluation of Sufficiency of Evidence

.23 There are four factors that the auditor may consider in evaluating the sufficiency of audit evidence obtained from examining individual items and contributed by other procedures, and in determining whether the remaining items in the population should be tested.

.24 First, the auditor should consider whether the dollar amount of the remaining population is equal to or greater than an amount that would individually or in combination with other untested amounts be material to the financial statements. If the remaining population is less than material, the auditor may decide that no additional sampling is necessary, but may consider whether other procedures can provide sufficient assurance that any misstatement of the remaining population is not significant. Second, the auditor should consider the degree of risk involved (that is, how susceptible the account is to misstatement, and whether there have been problems with this area in prior audits). Third, the auditor should consider the sufficiency of all the audit evidence obtained so far (the extent of audit evidence obtained by testing individual items along with the contribution of other procedures). The final factor is the qualitative aspects of the misstatement. These include (*a*) the nature and cause of misstatements, such as whether there are differences in principle or in application, are errors or are caused by fraud, or are due to misunderstanding of instructions or to carelessness, and (*b*) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error.

Audit Sampling for Tests of Controls

.25 AU section 350 indicates that an auditor may use nonstatistical or statistical sampling in performing tests of controls. This section provides guidance for both approaches. Regardless of whether nonstatistical or statistical sampling is being used, audit sampling for tests of controls involves the following steps:

- *Determine the objective of the test*. The objective of tests of controls is to provide evidence about the operating effectiveness of controls. Audit sampling for tests of controls is generally appropriate when application of the control leaves documentary evidence of performance. Normally, audit sampling for tests of controls will involve selecting a sample of documents and examining them for evidence that the relevant controls were applied. Tests of controls involving observation of performance of procedures or inquiries of the client are not normally subject to audit sampling. As with any test, it should be related to a relevant assertion.
- *Define the deviation conditions*. A deviation condition is a situation that indicates that the controls were not performed. For example, if the auditor is examining purchase invoices for evidence of approval of an expenditure (for example, the initials of the approving individual), a deviation condition would be an invoice that is not initialed by the appropriate individual. Performance of a control consists of all the steps the auditor believes are necessary to support the assessed level of control risk. For example, assume that a prescribed control requires that support for every disbursement should include an invoice, a voucher, a receiving report, and a purchase order, all stamped "Paid." The auditor believes that the existence of an invoice and a receiving report, both stamped "Paid," is necessary to indicate adequate performance of the control for purposes of supporting the assessed level of control risk. Therefore, a deviation may be defined as "a disbursement not supported by an invoice and a receiving report that have been stamped 'Paid.'"
- *Define the population*. The population selected should be appropriate for the objective being tested. For example, if the auditor is testing the operating effectiveness of a prescribed control designed to ensure that all shipments were billed, the auditor would not detect deviations by sampling from billed items. An appropriate population for detecting such deviations usually includes the record of all items shipped.
- *Defining the period covered by the test*. For samples to be representative of the period under audit, the population generally includes all transactions processed during the period. Often, auditors perform tests of controls during interim work. The auditor should determine what additional evidence needs to be obtained for the remaining period. Often, the auditor obtains the additional evidence by extending the test to the transactions occurring in the remaining period. However, it is not always efficient to include all transactions executed throughout the period under audit in the population to be sampled. In some cases, it might be more efficient to use alternative approaches to test the performance of the control during the remaining period. In these cases the auditor would define the population to include transactions for the period from the beginning of the year to an interim date and consider the following factors in determining what, if any, additional evidence needs to be obtained for the remaining period:
    - The significance of the assertion involved
    - The specific controls that were tested during the interim period
    - Any changes in controls from the interim period
    - The extent to which substantive tests were changed as a result of the controls
    - The results of the tests of controls performed during the interim period
    - The length of the remaining period
    - The audit evidence about design or operation of controls or substantive correctness of the balances or transactions in the interim period that may result from the substantive tests performed in the remaining period

The auditor selects sampling units from a physical representation of the population. For example, if the auditor defines the population as all customer receivable balances as of a specific date, the physical representation might be a printout of the customer accounts receivable trial balance as of that date. Making selections from a controlled source minimizes differences between the physical representation and the population. The auditor should consider whether the physical representation includes the entire population. If the auditor reconciles the selected physical representation and the population and determines that the physical representation has omitted items in the population that should be included in the overall evaluation, the auditor should select a new physical representation or perform alternative procedures on the items excluded from the physical representation.

- *Defining the sampling unit*. The sampling unit is defined in light of the control being tested. A sampling unit may be, for example, a document, an entry, or a line item, where examination of the sampling unit provides evidence of the operation of the control. An important efficiency consideration in selecting a sampling unit is the manner in which documents are filed and cross-referenced.
- *Determine the method of selecting the sample*. Any sample that is selected should be representative of the population (selected in an unbiased manner) and all items should have an opportunity to be selected. Random number selection is generally used when statistical sampling is being applied. When nonstatistical sampling is applied, random number sampling, systematic sampling, and haphazard sampling are methods that might be used to obtain a representative sample. Methods of selecting samples are discussed beginning at paragraph .60 of this section.
- *Determine the sample size*. Sample sizes for tests of controls are affected by (*a*) the risk of assessing control risk too low, (*b*) the tolerable rate, (*c*) the expected population deviation rate, and (*d*) any effects of small population sizes.
- Guidance for determining sample size when performing nonstatistical sampling begins with paragraph .28 of this section. A description of statistical sampling begins with paragraph .31 of this section.
- *Perform the sampling plan*. Once the sample has been selected, the auditor should examine the selected items to determine whether they contain deviations from the prescribed control. If the auditor selects a voided item, and the auditor obtains reasonable assurance that the item has been properly voided and does not represent a deviation from the prescribed control, he or she should replace the voided item. If the auditor selects an unused item, he or she should obtain reasonable assurance that it actually represents an unused item, not a deviation from the control, and then replace the unused item. If the auditor is unable to examine a selected item because it cannot be located or for any other reason, and the auditor is unable to apply the planned audit procedures or appropriate alternative procedures to selected items, he or she should consider the selected items to be deviations from the controls for purposes of evaluating the sample. In addition, the auditor should consider the reasons for this limitation and the effect that such a limitation might have on his or her understanding of internal control and assessment of control risk.
- *Evaluate the sample results*. Guidance for evaluating nonstatistical sampling results begins with paragraph .30 of this section and guidance for evaluating statistical sampling results begins with paragraph .32 of this section.
- *Document the sampling procedure*. Examples of items that the auditor typically documents for tests of controls include the following:
  - A description of the control being tested. The control objectives related to the sampling application, including the relevant assertions
  - The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor considered the completeness of the population
  - The definition of the deviation condition

- — The acceptable risk of overreliance on controls (or desired confidence or assurance level), the tolerable deviation rate, and the expected population deviation rate used in the application[2]
- — The method of sample-size determination
- — The method of sample selection
- — The selected sample items
- — A description of how the sampling procedure was performed
- — The evaluation of the sample and the overall conclusion

.26 *Factors Affecting Sample Sizes for Tests of Controls.* Sample sizes for tests of controls are affected by the following factors:

- *Acceptable risk of assessing control risk too low*. The risk of assessing control risk too low is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control. Decreasing the risk of assessing control risk too low will increase the sample size.
- *Expected population deviation rate.* The expected population deviation rate is an anticipation of the deviation rate in the entire population. As the expected population deviation rate increases, the sample size will increase.
- *Tolerable rate.* Tolerable rate is the maximum rate (percentage) of deviation from a prescribed control that the auditor is willing to accept without altering the planned assessed level of control risk. Higher tolerable rates will permit smaller sample sizes.
- *Population size.* The size of the population has little or no effect on the determination of sample size except for very small populations. For example, it is generally appropriate to treat any population of more than 5,000 sampling units as if it were infinite. If the population size is under 5,000 sampling units, the population size may have a small effect on the calculation of the sample size.

.27 The effects of these factors on the appropriate nonstatistical sample size may be summarized as follows:

Factor	*General Effect on Sample Size*
Risk of assessing control risk too low—increase (decrease)	Smaller (larger)
Tolerable rate—increase (decrease)	Smaller (larger)
Expected population deviation rate—increase (decrease)	Larger (smaller)
Population size	Virtually no effect

.28 *Sample Sizes Using Nonstatistical Sampling.* The auditor using nonstatistical sampling for tests of controls uses his or her professional judgment to consider the factors described in paragraph .26 of this section in determining sample sizes.

.29 Paragraph .23 of AU section 350 states that to determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risk of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment

[2] In some instances, sample size inputs such as acceptable risk of overreliance, tolerable deviation rate, and expected deviation rate are built into firm-wide sample size tables. In these instances, reference to firm sample size guidance is sufficient (that is, each team does not need to document inputs that are implicit in the firm's sample size tables).

to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.[3] It is important to note, however, that auditors are not required to specifically compute a statistical sample size. Nevertheless, auditors might find it helpful to be familiar with the tables in paragraphs .33–.36 of this section. Auditors using these tables as an aid in understanding relative sample sizes for tests of controls will need to apply professional judgment in reviewing the risk levels and expected population deviation rates in relation to sample sizes. Also, an auditor may decide to establish guidelines for sample sizes for tests of controls based on attribute sampling tables.

.30 After completing the examination of the sampling units and summarizing deviations from prescribed controls, the auditor evaluates the results.

- *Calculate the deviation rate*. Calculating the deviation rate in the sample involves dividing the number of observed deviations by the sample size.
- *Consider sampling risk*. When evaluating a sample for a test of controls, consideration may be given to sampling risk.
- *Consider the qualitative aspects of deviations*. In addition to evaluating the frequency of deviations from pertinent controls, the auditor should consider the qualitative aspects of the deviations.
- *Reach an overall conclusion*. The auditor uses professional judgment to reach an overall conclusion about the effect that the evaluation of the results will have on the assessed level of control risk and on the nature, timing and extent of planned substantive tests.

.31 *Sample Sizes Using Statistical Sampling*. The appropriate statistical method for tests of controls is *attributes sampling*, which is a technique designed to estimate qualitative characteristics of a population. Attributes sampling is most commonly used in auditing to test the rate of deviation from a prescribed control to support the auditor's assessed level of control risk.

.32 Applying attributes sampling involves performing the following steps:

a. *Decide on the attributes to test*. The tests of controls may include the testing of one or more attributes. Proper evaluation of the results may require testing and evaluating each attribute separately.

b. *Define the population from which the sample items should be selected*. The auditor should make sure that the population is appropriate for the audit objective as described in paragraph .25 of this section.

c. Specify the following factors:

- *Acceptable risk of assessing control risk too low*. There is an inverse relationship between the risk of assessing control risk too low and sample size. If the auditor is willing to accept only a low risk of assessing control risk too low, the sample size would ordinarily be larger than if a higher risk were acceptable. When auditors seek high assurance from important controls, the risk is often set at 10 percent or less.
- *Tolerable rate*. Higher assessments of control risk will permit higher tolerable deviation rates. When auditors seek high assurance from important controls, the tolerable deviation rates are generally set at 10 percent or less.
- *Expected population deviation rate*. The auditor's expectations may be based on prior year's tests and the control environment. The prior year's results may be considered in light of changes in the entity's internal control and changes in personnel. Sample sizes will increase significantly as the expected population deviation rate increases from zero. If the deviation rate in the sample turns out to be higher than the rate specified by the auditor in determining the sample size, the sample results will not support the auditor's planned assessed level of control risk.

---

[3] This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory.

d. *Determine the appropriate sample size*. Example sample sizes are found in the tables in paragraphs .33–.34 of this section. The table in paragraph .33 is designed for a risk of assessing control risk too low of 5 percent, and the table in paragraph .34 is designed for a 10 percent risk of assessing control risk too low. With the tolerable rate and the expected population deviation rate, the auditor may find the sample size from the table. The numbers in parentheses are the number of deviations that may be found in the sample and still support the auditor's planned assessed level of control risk.

e. *Randomly select the sample from the population.* The section beginning at paragraph .60 of this section describes the methods that may be used to select a random sample.

f. *Perform the audit procedures to identify deviations in the sample.*

g. *Calculate the statistical results.* Using the tables in paragraphs .35–.36 of this section or the appropriate risk of assessing control risk too low, determine the actual tolerable deviation rate from the sample size and the actual number of deviations found in the sample.

h. *Reassess the level of control risk.* If the sample results, along with other relevant evidential matter, support the planned assessed level of control risk, the auditor generally does not need to modify planned substantive tests. If the planned assessed level of control risk is not supported, the auditor would ordinarily either perform tests of other controls that could support the planned assessed level of control risk or increase the assessed level of control risk.

i. *Document the Sampling Procedures.* AU section 350 and the AICPA Audit Guide *Audit Sampling* do not require specific documentation of audit sampling applications. See paragraph .10 of this section for certain documentation requirements of AU section 339. Examples of items that the auditor typically documents for tests of controls are discussed in paragraph .25 of this section. Auditors may also refer to the Audit Guide *Audit Sampling* for more information.

Audit Sampling for Substantive Tests of Details

.37 The purpose of substantive tests of details of transactions and balances is to detect material misstatements in the account balance, transaction class, and disclosure components of the financial statements. An auditor assesses the risks of material misstatement and relies on a combination of further control tests, analytical procedures, and substantive tests of details for providing a basis for the opinion about whether the financial statements are materially misstated. When testing the details of an account balance or class of transactions, the auditor might use audit sampling to obtain evidence about the reasonableness of monetary amounts.

.38 The auditor uses professional judgment to determine whether audit sampling is appropriate. Sampling may not always be appropriate. For example, the auditor may decide that it is more efficient to test an account balance or class of transactions by applying analytical procedures.

.39 When an auditor plans any audit sampling application, the first consideration is the specific account balance or class of transactions and the circumstances in which the procedure is to be applied. The auditor generally identifies items or groups of items that are of individual significance to an audit objective and relevant assertion. For example, an auditor planning to use audit sampling as part of the tests of an inventory balance as well as observing the physical inventory would generally identify items that have significantly large balances or that might have other special characteristics.

.40 The auditor considers all special knowledge about the items constituting the balance or class before designing audit sampling procedures. For example, the auditor might identify 20 items that make up 25 percent of the account balance, and decide that those items should be examined 100 percent and excluded from inventory subject to audit sampling. Any items that the auditor has decided to test 100 percent are not part of the population subject to sampling.

.41 A population for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. In some circumstances, an auditor might examine all the items that constitute an account balance or class of transactions that exceed a given amount or that have an unusual characteristic; the auditor might either (*a*) apply other auditing procedures (for example, analytical procedures) to items that do not exceed a given amount or possess an unusual characteristic or (*b*) apply no auditing procedures to them because there is an acceptably low risk of material misstatement existing in the remaining items.

.42 Once a decision has been made to use audit sampling, the auditor may choose between statistical and nonstatistical sampling. The choice is primarily a cost-benefit consideration. Statistical sampling uses the laws of probability to measure sampling risk. Any sampling procedure that does not measure the sampling risk is a nonstatistical sampling procedure.

.43 *Determining the test objectives*. A sampling plan for substantive tests of details might be designed to (*a*) test the reasonableness of one or more assertions about a financial statement amount (for example, the existence of accounts receivable) or (*b*) make an independent estimate of some amount (for example, the last in, first out [LIFO] index for a LIFO inventory). The auditor should carefully identify the characteristic of interest (for example, the misstatement) for the sampling application that is consistent with the audit objective.

.44 *Defining the population*. The population consists of the items constituting the account balance or class of transactions of interest. The auditor should determine that the population from which he or she selects the sample is appropriate for the specific audit objective because sample results can be projected only to the population from which the sample was selected.

.45 *Defining the sampling unit*. A sampling unit is any of the individual elements that constitute the population, and depends on the audit objective and the nature of the audit procedures to be applied. A sampling unit might be a customer account balance, an individual transaction or an individual entry in a transaction. The auditor might consider which sampling unit leads to a more effective and efficient sampling application in the circumstances.

.46 *Choosing an audit sampling technique*. Either statistical or nonstatistical sampling is appropriate for substantive tests of details. The most common statistical approaches are classical variables sampling and monetary unit sampling.

.47 *Determining the method of selecting the sample*. The auditor should select the sample in such a way that the sample can be expected to be representative of the population or the stratum from which it is selected.

.48 *Determining the sample size*. Accounting populations tend to include a few very large amounts, a number of moderately large amounts, and a large number of small amounts. Auditors consider the variation in a characteristic when they determine an appropriate sample size for a substantive test, and, generally, the variation of the items' recorded amounts as a means of estimating the variation of the audited amounts of the items in the population. A measure of this variation, or scatter, is called the standard deviation. Sample sizes generally decrease as the variation becomes smaller. Sample sizes from unstratified populations with high variation are generally much larger than stratified samples from the same population.

.49 In performing substantive tests of details, auditors are also concerned with two aspects of sampling risk:

a. *Risk of incorrect acceptance*—the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.

b. *Risk of incorrect rejection*—the risk that the sample supports the conclusion that the recorded amount is materially misstated when it is not. This risk is generally controlled by setting an adequate or conservative estimate of expected misstatement and increasing the sample size accordingly.

.50 When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions is acceptable without causing the financial statements to be materially misstated. The maximum monetary misstatement for the balance or class is called tolerable misstatement for the sample. For a particular account balance or class of transactions, the sample size required to achieve the auditor's objective at a given risk of incorrect acceptance increases as the auditor's assessment of tolerable misstatement for that balance or class decreases.

.51 The auditor also assesses the expected amount of misstatement on the basis of his or her professional judgment after considering such factors as the entity's business, the results of prior year's tests of account balances or class of transactions, the results of any pilot sample, the results of any related substantive tests, and the results of any tests of the related controls.

.52 The effect of population size on the appropriate sample size varies according to the audit sampling method used.

.53 *Performing the sampling plan*. The auditor should apply auditing procedures appropriate for the particular audit objectives to each sample item.

.54 *Evaluating the sample results*. In evaluating sample results, the auditor should do the following:

- Project the misstatements found in the sample to the population from which the sample was selected and add that amount to the misstatements discovered in any items examined 100 percent.
- Propose known misstatements to management for correction, unless the amounts are trivial.
- Compare the tolerable misstatement for the account balance or class of transactions with the total projected misstatement, adjusted for any corrected misstatements. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor

should consider the risk that such a result might be obtained even though the true monetary misstatement for the population exceeds the tolerable misstatement. In accordance with paragraph .30 of AU section 350, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications should be considered in the aggregate along with other relevant audit evidence when the auditor evaluates whether the financial statements taken as a whole may be materially misstated.

- Consider the qualitative aspects of misstatements. If the sample results suggest that the auditor's planning assumptions were in error, appropriate action is taken.

.55 *Documenting the sampling procedure*. AU section 350 and the AICPA Audit Guide *Audit Sampling* do not require specific documentation of audit sampling applications. See paragraph .10 of this section for certain documentation requirements of AU section 339. Examples of items that the auditor may document for substantive tests include the following:

- The objectives of the test the accounts and assertions affected
- The definition of the population and the sampling unit, including how the auditor determined the completeness of the population
- The definition of a misstatement
- The risk of incorrect acceptance or level of desired assurance (confidence)
- The risk of incorrect rejection, if used
- Estimated and tolerable misstatement
- The audit sampling technique used
- The method of sample selection
- Identification of the items selected
- A description of the performance of the sampling procedures and a list of misstatements identified in the sample
- The evaluation of the sample (for example, projection and consideration of sampling risk)
- A summary of the overall conclusion (if not evident from the results)
- Any qualitative factors considered significant in making the sampling assessments and judgments

.56 ***Nonstatistical Sampling for Substantive Tests of Details***. Neither paragraph .23 of AU section 350 states that to determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risk of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.[4] It is important to note, however, that auditors are not required to specifically compute a statistical sample size. Nevertheless, auditors might find familiarity with sample sizes based on statistical theory helpful when applying professional judgment and experience in considering the effect of various planning considerations on sample size.

.57 The following table "Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning" summarizes the effects of various factors on sample sizes for substantive tests of details. (The

[4] This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory.

table is provided only to illustrate the relative effect of different planning considerations on sample size and is not intended as a substitute for professional judgment).

Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning

Factors	*Conditions Leading to:* Smaller Sample Size	Larger Sample Size	Related Factor for Substantive Sample Planning
a. Assessment of inherent risk	Low assessed level of inherent risk	High assessed level of inherent risk	Allowable risk of incorrect acceptance
b. Assessment of control risk	Low assessed level of control risk	High assessed level of control risk	Allowable risk of incorrect acceptance
c. Assessment of risk related to other substantive procedures directed at the same assertion (including substantive analytical procedures and other relevant substantive procedures)	Low assessment of risk associated with other relevant substantive procedures	High assessment of risk associated other relevant substantive procedures	Allowable risk of incorrect acceptance
d. Measure of tolerable misstatement for a specific account	Larger measure of tolerable misstatement	Smaller measure of tolerable misstatement	Tolerable misstatement
e. Expected size and frequency of misstatements, or the estimated variance of the population	Smaller misstatements or lower frequency, or smaller population variance	Larger misstatements, higher frequency, or larger population variance	Assessment of population characteristics
f. Number of items in the population	Virtually no effect on sample size unless population is very small		

.58 For additional details on audit sampling, including detailed tables, auditors may refer to AICPA Audit Guide *Audit Sampling* and the appendix of AU section 350.

.59 Stratification is particularly important to increasing the efficiency of the sample. If the nonstatistical sample design is planned without stratification, the auditor should increase the sample size. Before selecting the sample, the auditor generally identifies individually significant items and may then select the sample from the remaining items using the systematic selection method, which automatically stratifies the sample, or stratify the remaining items into groups and allocate the sample size accordingly.

.60 *Evaluating the Sample Results*. The misstatement in the sample should be projected to the items from which the sample was selected. One method of projecting the amount of misstatement found in a sample is to divide the amount of misstatement in the sample by the fraction of total dollars in the population included in the sample. For example, if a $100 misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $1,000 ($100 ÷ .10).

.61 A second method for projecting the misstatement uses the average difference between the audited and the recorded amounts of each item included in the sample. For example, if $200 of misstatement is found in a sample of 100 items, the average difference between audited and recorded amounts for items in the sample is $2 ($200 ÷ 100). An estimate of the amount of misstatement in the population may be calculated by multiplying the total number of items in the population (in this case 5,000 items) by the average difference of $2 for each sample item. The estimate of misstatement in the population is $10,000 (5,000 × 2).

Suggested Supplemental Reference Materials

.01 Suggested Supplemental Reference Materials

The following publications are useful in helping to determine the nature, timing, and extent of audit procedures. To order AICPA products, call (888) 777-7077.

- **Audit and Accounting Guides (AICPA)**

  Each guide describes relevant matters, conditions, and procedures unique to a particular industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- **Audit Risk Alerts (AICPA)**

  Audit Risk Alerts complement the guidance provided in many of the Audit and Accounting Guides by describing current economic, regulatory, and professional developments that can have a significant impact on engagements.

- **Professional Standards (AICPA)**

  The publication features the outstanding pronouncements on professional standards issued by the AICPA, including standards for audits, compilations, and reviews.

- **Accounting Standards—Original Pronouncements (FASB)**[*]

  This publication contains the original text of accounting standards pronouncements with superseded sections and amendments clearly noted.

- **Accounting Standards—Current Text (FASB)**[*]

  This publication is organized into two sections: General Standards—generally applicable to all enterprises and Industry Standards—applicable to enterprises operating in specific industries. It includes comprehensive summaries of each subject, plus applicable standards, illustrations, and examples.

- **Financial Statement Preparation Manual (AICPA)**

  This publication provides sample statements and checklists for a variety of business enterprises and governmental units.

- **Disclosure Checklist series (AICPA)** (individual paperback versions of sections of the Financial Statement Preparation Manual)

  The practice aids are invaluable to anyone who prepares financial statements and reports. The material has been updated to reflect AICPA, FASB, and GASB pronouncements and interpretations as well as SEC regulations.

---

[*] On January 15, 2008, the Financial Accounting Standards Board (FASB) launched the one-year verification phase of the *FASB Accounting Standards Codification*™ (codification). After the verification period, during which constituents are encouraged to provide feedback on whether the codification content accurately reflects existing U.S. generally accepted accounting priniciples (GAAP) for nongovernmental entities, the FASB is expected to formally approve the codification as the single source of authoritative U.S. GAAP, other than guidance issued by the Securities and Exchange Commission (SEC). The codification includes all accounting standards issued by a standard-setter within levels A through D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force, and related literature. The codification does not change GAAP; instead it reorganizes the thousands of U.S. GAAP pronouncements into roughly 90 accounting topics, and displays all topics using a consistent structure. The SEC guidance will follow a similar topical structure in separate SEC sections.

This edition of the *Audit and Accounting Manual* (AAM) has not been conformed to the new codification. The AICPA AAM, as well as other AICPA literature, will be conformed to reflect the codification after the verification phase and upon formal approval by the FASB.

- **Accounting Trends & Techniques (AICPA)**

  This publication contains reporting methods based on a cumulative survey, as well as significant accounting presentations, discussions, and trends. By following the lead of these industry front-runners, practitioners can apply the latest techniques and improve their own reporting performance.

- **Fraud Detection in a GAAS Audit (Revised edition) (AICPA)**

  This practice aid provides CPAs with the most recent information related to complying with AU section 316, Consideration of Fraud in a Financial Statement Audit *(AICPA,* Professional Standards, *vol. 1).*

- **Technical Practice Aids (AICPA)**

  This publication contains all outstanding AICPA Statements of Position and Practice Bulletins and offers carefully thought-out responses to selected inquiries received by the AICPA Technical Hotline and AICPA Technical and Industry Committees.

- **Standard Form to Confirm Account Balance Information with Financial Institutions (AICPA)**

  This form may be used to request a full report on credit balance, liabilities, and contingent liabilities. It may also be used for a confirmation of bank balance only.

- **EITF Abstracts—A Summary of Proceedings of the FASB Emerging Issues Task Force*** [*]
- **Accountants' Handbook by Carmichael, Lilien & Mellman (Wiley)**
- **Montgomery's Auditing by O'Reilly, Hirsch, Defliese, and Jaenicke (Wiley)**
- **Handbook of Modern Accounting by Davidson & Weil (McGraw-Hill)**
- **Kohler's Dictionary for Accountants by Coopers & Ijiri (Prentice-Hall)**

[*The next page is 6001.*]

AAM Section 6000
Audit Documentation

TABLE OF CONTENTS

[*The next page is 6101.*]

AAM Section 6100

Audit Documentation—General

.01 Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation, also known as working papers, may be recorded on paper or on electronic or other media. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance on the form, general content, and ownership and confidentiality of audit documentation.

.02 Other Statements on Auditing Standards (SASs) contain specific documentation requirements and can be found in appendix A of AU section 339. Additionally, specific documentation or document retention requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement.

.03 The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached. Audit documentation provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards and provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

.04 Among other matters, AU section 339 provides the following:

- The auditor should prepare audit documentation in connection with each engagement in sufficient detail to provide an experienced auditor with no previous connection to the audit a clear understanding of the work performed (including the nature, timing, extent and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.
- Oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached, but may be used by the auditor to clarify or explain information contained in the audit documentation.
- The auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), the basis for the final conclusions reached, discussions of the significant findings or issues with management or others, including responses and when and with whom the discussion took place. If the auditor has identified information that contradicts or is inconsistent with the auditor's final conclusions regarding a significant finding or issue, the auditor should document how the auditor addressed the contradiction or inconsistency.
- The auditor should assemble the audit documentation to form the final audit engagement file on a timely basis, but within 60 days following the report release date (also known as the documentation completion date). After this date, the auditor must not delete or discard audit documentation before the end of the specified retention period and should appropriately document any subsequent additions. (Paragraphs .23–.30 of AU section 339 provide information regarding revisions to audit documentation after the date of the auditor's report.)
- A file retention period should not be shorter than five years from the report release date.

Audit Documentation Retention

.05 AU section 339 states that the auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than five years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period.

.06 Determining the proper periods for retaining records is a major decision for practitioners. Records may be preserved for only as long as they serve a useful purpose or until all legal requirements are met. Record retention periods vary among firms; however, retention periods generally correspond with the longest statute of limitations prevailing in each state for breach of contract, breach of fiduciary duty, and professional liability claims.

.07 Audit documentation may be retained permanently or for periods corresponding with the longest state statute of limitations, as noted in the previous paragraph. Generally, certain audited financial statement working paper data, such as accounts receivable confirmations, are destroyed after 10 years. Examples of audit documentation that the auditor may wish to retain permanently include auditor's reports, reports filed with the Securities and Exchange Commission, tax returns for current clients, and audit documentation for current clients. Some firms divide the retention period into 2 parts, records are first filed in the office and later placed in storage (for example, 3 years in the office and then permanently in storage). Other records, such as audit documentation files for former clients, may be retained for 3 years in the office, 7 years in storage, and then destroyed after the retention period has ended. The auditor may obtain specific approval of the engagement partner before destroying any audit documentation. An annual schedule may be established for reviewing and purging firm data. Because there is substantial variation in the retention periods used by firms, each firm may carefully consider its requirements and consult with legal counsel before adopting a retention period.

.08 For further guidance on record retention, see the AICPA *Management of an Accounting Practice Handbook* (product no. 090407).

Ownership and Confidentiality of Audit Documentation

.09 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes.

.10 The auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information. Because audit documentation contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

.11 Whether audit documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the auditor's knowledge or could be permanently lost or damaged. Accordingly, the auditor should apply appropriate and reasonable controls for audit documentation to

a. clearly determine when and by whom audit documentation was created, changed, or reviewed;

b. protect the integrity of the information at all stages of the audit, especially when the information is shared within the audit team or transmitted to other parties via electronic means;

c. prevent unauthorized changes to the documentation; and

d. allow access to the documentation by the audit team and other authorized parties as necessary to properly discharge their responsibilities.

Documentation of Departures From the SASs

.12 In rare circumstances, when the auditor departs from a presumptively mandatory requirement in the SASs, he or she must document the justification for the departure and how the alternative procedures in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

General Discussion

.13 These sections present points of view on the organization and preparation of audit documentation.

.14 Proper planning is important in the design of specific audit documentation if they are to serve the objective of aiding the auditor in the conduct of his work. For example, a well-planned working paper may be designed to provide information that will be needed later in the preparation of tax returns and other required reports, such as those to regulatory bodies, and may eliminate, therefore, the need for examining the same documents twice to obtain necessary information. The form, content, and extent of audit documentation are matters of the auditor's professional judgment and depend on the circumstances of the engagement and the audit methodology and tools used. The individual preferences of auditors and firms may be informal common practices or expressed as part of a firm's formal policies and procedures. A firm may consider the nature of its practice and the services commonly provided to its clients, in addition to professional standards in developing its procedures and policies on audit documentation. Those procedures and policies may permit the flexibility necessary to meet the needs of individual engagements.

[*The next page is 6201.*]

AAM Section 6200

Form, Content, and Extent of Audit Documentation

.01 The form, content, and extent of audit documentation vary with the circumstances and needs of the auditors on individual engagements. Some firms, however, include various general and specific instructions on audit documentation content in their policies concerning the working papers.

.02 Examples of audit documentation are audit programs, analyses, issues, memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail), and schedules or commentaries prepared or obtained by the auditor. Abstracts or copies of the entity's records should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. Audit documentation may be in paper form, electronic form, or other media.

.03 The auditor should prepare audit documentation that enables an experienced auditor, having no previous connection to the audit, to understand

a. the nature, timing, and extent of auditing procedures performed to comply with Statements on Auditing Standards and applicable legal and regulatory requirements, including (1) who performed the audit work and the date such work was completed and (2) who reviewed specific audit documentation and the date of such review;

b. the results of the audit procedures performed and the audit evidence obtained;

c. the conclusions reached on significant matters; and

d. that the accounting records agree or reconcile with the audited financial statements or other audited information.

.04 In determining the form, content, and extent of audit documentation, the auditor should consider the following factors:

- The nature of the auditing procedures to be performed
- The identified risk of material misstatement associated with the assertion or account or class of transactions, including related disclosures
- The extent of judgment involved in performing the work and evaluating the results
- The significance of the audit evidence obtained to the assertion being tested
- The nature and extent of exceptions identified
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or evidence obtained

Basic Elements of Format

.05 Audit documentation formats generally include at least the following for identification purposes:

- A title or heading composed of (*a*) the name of the client, (*b*) a caption that briefly describes the paper's contents, (*c*) the nature of the engagement, and (*d*) the applicable period or closing date covered by the engagement

- The initials or names of the auditors who performed and reviewed the work presented in the paper and the date the paper was completed

.06 In instances when audit documentation extends beyond one page, some auditors present the heading on only the lead page and fasten or staple all the applicable pages together as a unit and number each page (for example, 1 of 5, 2 of 5, and so forth). Many auditors index each working paper in some organized preestablished manner. This provides for ease in cross-referencing to other relevant papers, for more organized indexing and filing, and for a form of control over the audit documentation. (See AAM section 6300, *Organization and Filing (Indexing)*.)

.07 Some auditors purchase standard analysis paper that includes preprinted blocks for the initials or signature of the preparer and reviewer and the dates on which the paper was prepared and reviewed. Others design their own signature and reference blocks and have them imprinted on all of their analysis paper and lined pads. These signature blocks may include captions such as the following:

- Prepared by client and tested by
- Prepared by
- Date prepared
- Date tested
- Reviewed by
- Date reviewed
- Source
- Audit documentation reference
- Footed by
- Extensions checked by

.08 Some auditors prefer to identify client preparation of schedules and analysis by notations or codes, such as PBC (prepared by client), rather than use a detailed signature and reference block.

General Considerations

.09 The following are some general considerations on audit documentation content that may be helpful:

- The auditor may include identification of the (*a*) source of the information presented (for example, fixed assets ledger or cash disbursements journal), (*b*) the nature and extent of the work done and conclusions reached (by symbols and legend, narrative, or a combination of both), and (*c*) appropriate cross-references to other working papers in the content of an individual working paper or group of related papers.
- The auditor should document significant findings or issues, actions taken to address them, and the basis for the final conclusions reached. If for some reason the auditor leaves the assignment before resolving all items, he or she may provide an open items listing on a separate temporary paper for the in-charge auditor's attention. An unresolved exception or incomplete explanation in the working papers may be construed by some as indication of an inadequate audit.
- Information and comments in the audit documentation generally represent statements of fact and professional conclusions. Accordingly, the auditor may wish to refrain from using vague judgmental adjectives such as *good* or *bad*. Conclusions should be supported by documented facts, especially if they concern the adequacy of the client's records.
- Working papers are an integrated presentation of information. The auditor may find it useful to cross-reference working papers to call attention to inter-account relationships and to reference a paper to other working papers summarizing or detailing related information.

- All inferences and conclusions should be supported in the working papers and no misleading or irrelevant statements should be made.
- It is preferable to have negative figures in audit documentation indicated by parentheses instead of red figures to preserve their identity if the papers are photocopied or microfilmed.

Specific Considerations

.10 As mentioned in the preceding section, abstracts or copies of the entity's records should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. Additionally, audit documentation of procedures performed, including tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include the identifying characteristics of the specific items tested.

.11 Furthermore, the auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Significant audit findings or issues include, but are not limited to, the following:

- Significant matters involving the selection, application, and consistency of accounting principles with regard to the financial statements, including related disclosures. Such matters include, but are not limited to (1) accounting for complex or unusual transactions or (2) accounting estimates and uncertainties and, if applicable, the related management assumptions.
- Results of auditing procedures that indicate that the financial statements or disclosures could be materially misstated or a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- Circumstances that cause significant difficulty in applying auditing procedures that the auditor considered necessary.
- Findings that could result in modification of the auditor's report.
- Audit adjustments. For purposes of AU section 339, an audit adjustment is a correction of a misstatement of the financial information that is identified by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial information.

Timesaving Considerations

.12 There are a number of ways to save time and avoid unnecessary detail in audit documentation preparation. For example, the auditor may consider the following examples:

- Whenever possible, have the client's employees prepare schedules and analyses. (This, of course, presupposes that the client has the necessary personnel to prepare the materials.)
- Use a detailed audit program that may eliminate the need for lengthy comments in the audit documentation on the scope of audit procedures. (However, some believe that such comments are still necessary when a detailed program is used; this is a matter of individual firm judgment.)
- Analyze asset (or liability) accounts and their related expense or income accounts on the same working paper. (Examples include property, plant, and equipment; accumulated depreciation and related depreciation expense; notes receivable; accrued or prepaid interest receivable and interest income; notes payable; accrued or prepaid interest and interest expense; and accrued taxes and related provisions for tax expense.)
- Avoid unnecessary computations. (For example, if only the totals are meaningful and can be tested by a single independent computation, check the total and avoid the unnecessary checking of details.)

- Consider using carryforward analyses for accounts that tend to remain constant each year or vary only in accordance with a constant predetermined formula. Examples may include long term assets and related depreciation or amortization such as plant, equipment, and intangibles, long term debt with predetermined payment schedules, and capital stock.
- Use symbols (tick marks) whenever possible, especially when the same symbol applies to several working papers.

Symbols (Tick Marks)

.13 When using symbols, it may be helpful to consider the following basic concepts:

- Symbols are merely a shorthand means of explaining a work step performed on a particular item of data. Symbols serve as means of conserving time and space and, if properly used, may ease review of the audit documentation.
- For a working paper to be clear to a reviewer or other reader, it is important that each symbol be clearly explained. The explanation may be located on the same page as the items subjected to the work step, or on a separate legend that is clearly cross-referenced to and from the page that presents the applicable items.
- Simple, distinctive, and clear symbols can be quickly written by the preparer and easily identified by a reviewer.

.14 Applying these basic concepts is not that simple. Various auditors have conflicting notions about symbols. For example, some believe a set of standardized symbols can expedite preparation and review. Others believe that a set of standardized symbols is impractical because it lacks flexibility. Because it is generally agreed that symbols are an effective timesaver, it is desirable for firms to establish and communicate a policy on their use to maximize their potential effectiveness.

.15 The most commonly used symbols are variations on a simple checkmark—for example, a checkmark with a slash, a checkmark with a circle at the end, a double checkmark, and any one of these within a circle. This abbreviated listing alone provides eight distinctive tick marks. Symbols may also include circled letters or numbers.

[*The next page is 6301.*]

AAM Section 6300

Organization and Filing (Indexing)

.01 Some auditors organize their audit documentation during the course of an engagement into general categories such as the following:

- Planning and administration
- Internal control understanding and assessment of control risk
- Substantive test audit documentation arranged in order of the balance sheet and income statement classifications
- Trial balances, consolidating working papers, journal entries (adjustments, reclassifications, eliminations for consolidation), and potential entries
- Draft reports, financial statements, and notes
- Programs, checklists, and questionnaires (some keep these as separate units while others interfile them among working papers by statement classifications)
- General matters such as current minutes, contracts, and articles of incorporation that may apply to future engagements as well as current work

Under this approach, actual indexing and filing may be deferred until the conclusion of the engagement.

Predetermined Indexing

.02 Other practitioners and firms may use a predetermined indexing approach so that working papers can be indexed while the field work is still in progress. This offers the following advantages:

- Better control over audit documentation during the performance of field work
- Constant arrangement of audit documentation in logical order to aid in review
- Less time required in assembling and filing them into indexed files
- Quicker access to specific audit documentation after it is filed

.03 Predetermined indexing involves establishing a standard code for each section of the audit documentation, using letters and numbers or numbers only. For example, see the following table:

	Two Possible Alternatives	
Working trial balance—assets	B/S-A	T/B-1
Working trial balance—liabilities	B/S-L	T/B-2
Working trial balance—income and expense	P/L	T/B-3
Cash summary schedule	A	10
Receivables summary schedule	B	20
Inventory summary schedule	C	30

.04 Predetermined indexing requires recognition of the need for flexibility to meet unanticipated audit documentation needs or specialized industry requirements and it requires care to avoid undue complexity. Excessively complex references may obstruct rather than ease audit documentation preparation, cross-referencing and filing. Accordingly, it is helpful to develop an organizational plan adaptable to each section of the audit documentation. For example, some accountants classify working papers as lead schedules, primary detail, and secondary detail that might result in the following classification scheme for the preceding examples for cash:

	Using Letters and Numbers	*Using Only Numbers*
Lead schedule	(A)	(10)
Primary detail schedules	(A-1) (A-2) and so forth	(10-1) (10-2) and so forth
Secondary detail schedules	(A-1-1) (A-1-2) (A-1-3)	(10-1-1) (10-1-2)
	(A-2-1) (A-2-2) (A-2-3)	(10-2-1) (10-2-2)

.05 Predetermined (standardized) indexing systems may be printed on separate pages for reference during the performance of field work and insertion in the front of audit documentation binders or files when the work is completed. Some firms have their uniform indexing systems printed directly on their file or binder covers.

.06 A well-organized indexing system need not be too complex. On a fairly small engagement, the indexing system may be a lead schedule divider tab between each major group of accounts with the name of the account on it (for example, cash or accounts receivable) with the related working papers filed behind the lead schedule without being individually indexed. At the completion of the engagement, the pages can be consecutively numbered within each account group (for example, 1 of 10, 2 of 10, and so forth), because there typically are not numerous or complex layers of supporting schedules, extensive cross-referencing can be avoided.

.07 On large engagements, particularly those with detailed charts of accounts, firms may consider it necessary to develop more complex indexing systems. In one such system, standard index number series are assigned as follows:

Current audit documentation	1000–7000
Permanent file	7100–9999

.08 In this system, each index number consists of four digits, with the addition decimals if necessary. Numbers ending with double zero are reserved for lead schedules whose total agrees with a line item on the working trial balance (index 1400). Single zeros are used for specific types of accounts (such as 2010, petty cash funds).

.09 Certain index numbers can be permanently assigned to each major financial statement classification. For instance, index 2000 may be assigned to cash. If various bank accounts exist, the cash schedules are assigned index numbers 2002, 2003, and so forth. Documentation, such as supporting confirmations and lists of outstanding checks, would be assigned index numbers commencing with 2001.1, 2001.2, and so forth. As for the permanent audit documentation file, index 9300, for example, may be assigned to internal control. Accordingly, flowcharts and related questionnaires would be assigned index numbers in that series.

Current and Permanent Files

.10 Audit documentation files are generally classified as current files and permanent (continuing) files. Current files contain information that is pertinent to a single engagement. Permanent files include information relevant to several recurring engagements. Some firms have their binder or file covers preprinted as current or permanent accompanied by pertinent portions of their uniform audit documentation indexes.

.11 A common challenge to many auditors is to keep the permanent file complete, current, and free from outdated or irrelevant materials that belong in an inactive file of superseded materials.

.12 Some auditors who have confronted one too many unwieldy permanent files believe that it is better to classify all audit documentation as current with certain materials designated as matters of continuing interest to be carried forward each year until they become outdated. Under this approach, a firm may preprint its complete index on one type of file or binder cover and provide space to indicate whether specific contents are continuing or carry forward in nature. Regardless of the approach used, it is important to recognize that the provisions of AU section 339 apply to current year audit documentation maintained in *any* type of file (this includes permanent files) if such documentation serves as support for the current year's audit report.

.13 The requirements and guidance in AU section 339 also apply to permanent files. Accordingly, permanent files should be reviewed and updated, as needed, in conjunction with the annual audit. Examples of documents that may be found in permanent files are listed in paragraph .07 of AAM section 6100.

Practice Tip

The audit documentation files should contain copies of final executed documents when needed to enable an experienced auditor to understand the work performed and conclusions reached. Any drafts or unsigned versions of documents should be replaced with final versions.

Index Topics

.14 The following is a list of topics to consider in developing a standard index for audit documentation. This list is detailed, but is by no means all inclusive. For example, specialized industries such as life insurance and banking need other specialized topics. Several of the topics may be eliminated, condensed, or expanded, depending on the auditor's needs and preferences:

Planning and administration

- Time and budget data
- General correspondence and memos
- Memos—current
- Notes and copies for use in next engagement
- Engagement letters
- Schedules and analyses to be prepared by client
- Minutes
- Checklist of an administrative nature if required by firm policy

Audit or work program[1]

Matters of continuing concern

- Client's industry—background
- Description and brief history of client
- Data and ratio analysis of client's operations

---

[1] Alternate practices of filing audit programs include

(*a*) putting the program in a binder that is separate and distinct from current and permanent files;

(*b*) putting the signed-off program in the current file; and

(*c*) keeping a master copy of the program in the permanent file with the signed off copies dispersed among the related audit documentation segments in the current file.

- Client's facilities
- Articles of incorporation
- Bylaws
- Current contracts and agreements
  - — Debt agreements
  - — Leases
  - — Labor contracts
  - — Agreements with officers and key people
  - — Pension plans
  - — Profit-sharing plans
  - — Stock warrants
  - — Stock options
  - — Other agreements
  - — Client's accounting policies and procedures
  - — Carryforward analyses[2]

Internal control

- Internal control questionnaire, narrative, flowcharts, and so forth[3]
- Initial assessment of control risk memos
- Tests of controls

Reports, financial statements and footnotes, trial balances, and assembly sheets

- Reports and financial statements (including letters, if any, on reportable conditions in internal control)
- Consolidating working papers
- Consolidation eliminating entries
- Trial balance
- Adjusting journal entries
- Reclassification journal entries
- Recap of possible adjusting entries
- Assembly sheets supporting footnote disclosures (if the information is not included elsewhere in the audit documentation)
- Disclosure checklists (if required by firm policy)
- Supporting schedules (if required for reports to regulatory bodies or other reports)
- Tax return information and work sheets[4]

Assets

---

[2] Certain classifications may lend themselves to carry-forward audit documentation. Examples include allowances for doubtful accounts, brief summaries of confirmation response statistics, accumulated depreciation and amortization, deferred income taxes and open tax positions, long term debt, and capital accounts.

[3] Internal control questionnaires may be filed as separate binders or as part of current of permanent files.

[4] Some firms and practitioners keep tax return preparation working papers in files that are completely separate from other types of engagement working papers.

- Cash
- Marketable securities (and related income)
- Notes receivable (and related interest)
- Accounts receivable
  - Summary and analyses
  - Confirmation procedures[5] [6]
- Allowance for doubtful accounts and notes[7]
- Inventories
  - Summary and analysis
  - Price tests, cost, and market
  - Obsolescence review
  - Observation, test counts, and cutoff data
  - Last in, first out determinations
- Prepaid expenses
- Other current assets
- Investments
- Property, plant and accumulated depreciation, and depletion and amortization[8]
- Intangible deferred charges and amortization[9]
- Other assets
- Intercompany accounts

Liabilities

- Notes payable (and related interest)
- Accounts payable
- Accrued liabilities other than income taxes
- Accrued income taxes (both current and deferred), related provisions, and credits[10]
  - Federal
  - State and local
- Other current liabilities
- Long-term debt (including current maturities and capitalized leases)[11]
- Other long-term liabilities
- Deferred income[12]

Commitments and contingencies

---

[5] See footnote 2.

[6] For situations involving voluminous responses or bulk inventory listings, the bulk materials may be filed in separate binders that are cross referenced to the pertinent audit documentation (for example, accounts receivable, accounts payable, and inventory).

[7] See footnote 2.

[8] See footnote 2.

[9] See footnote 2.

[10] See footnote 2.

[11] See footnote 2.

AAM Section 7000
Correspondence, Confirmations & Representations

These samples are presented for illustrative purposes only. They are intended as mere conveniences for users of this manual who may want points of departure when designing their own formats to meet their individual needs. These illustrations are neither all inclusive nor are they prescribed minimums. Auditors and accountants are to rely on professional standards and their individual professional judgment in determining what may be needed in the circumstances.

TABLE OF CONTENTS

[*The next page is 7101.*]

AAM Section 7100

Control of Confirmations and Correspondence

.01 Generally, clients prepare correspondence and confirmation requests on their own letterhead and submit to the auditor the signed originals and copies. The auditor may obtain one or more copies to serve as file copies for the current audit documentation, second requests, and manuscript copies for the next engagement.

.02 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.03 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (*a*) the combined assessed level of inherent and control risk is low, (*b*) a large number of small balances is involved, and (*c*) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration.

.04 The confirmation requests could be reviewed to the extent the auditor considers necessary. For example, the auditor may perform the following for accounts receivable confirmation requests before they are mailed:

- Compare the names and addresses to the client's records
- Compare balances per confirmation requests to the subsidiary ledger

.05 The requests may then be stuffed in envelopes and submitted to the post office under the auditor's control.[1]

.06 The auditor should control the mailings and receipt of responses so that the confirmation process is independent of the client.

.07 The auditor may consider including the firm's office or post office box number as the return address on mailing envelopes so that undeliverable letters are returned to the auditor and not to the client. For mailings, the auditor may provide the envelopes or affix a label on the client's envelope that covers the client's return address and replaces it with the auditor's address.

.08 Reply envelopes addressed to the auditor may be enclosed with the request letter. Reply envelopes generally have prepaid postage to encourage responses. Some auditors also use codes on the reply envelopes so that responses may be sorted by engagement before the mail is opened. This feature may be particularly useful when there are several engagements that involve voluminous mailings.

---

[1] In April 2007, the AICPA issued Auditing Interpretation No. 1, "Use of Electronic Confirmations," of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 9330 par. .01–.06). This interpretation states that properly controlled electronic confirmations may be considered to be reliable audit evidence and discusses auditor considerations when using electronic confirmations.

.09 If the client objects to use of the auditor's name and address, some auditors suggest that a post office box in the client's name be used, with the returns to be opened under the auditor's control for the confirmation process, and that the post office be instructed that after the box is closed subsequent mail be forwarded to the auditor.

[*The next page is 7201.*]

AAM Section 7200

Requests for Confirmations and Related Materials

Wording of Confirmation Request Forms

.01 Forms and correspondence used for confirmation requests should state clearly that the client is requesting that a reply be sent to the CPA. Forms and correspondence used for information requests for engagements other than audits should not refer to "an audit." They should also use the term *accountant(s)* rather than *auditors*. Suggested wording follows:

> Please send the following information to our certified public accountants [*name and address of accountants*] who are performing accounting services for the company.

.02 The samples of correspondence in this section include language that refers to auditors and an audit of the client's financial statements on the assumption that an audit is being performed. This language needs to be modified if services other than an audit are being performed.

.03 Request for Bank Cutoff Statement

[*Prepared on Client's Letterhead*]

[*Date*]

Financial Institution Official
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of [*name of client*] as of [*balance sheet date*] and for the [*period*] then ended, we request that you send the following information directly to our auditors [*name and address of auditors*] as of close of business [*balance sheet date*]:

1. The information requested on the enclosed standard form(s) to confirm account balance information with your financial institution.
2. For the following account numbers, statement(s) of our account(s) and the related paid checks for the period from [*balance sheet date*] to [*two weeks subsequent to the balance sheet date*] inclusive.

Account Number	*Account Name*
______________________	______________________
______________________	______________________
______________________	______________________

Sincerely,
[*Name of Customer*]

____

By:____________________

Notes:

(A) This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or who is knowledgeable about the transactions or arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

(B) The request could be sent at least ten days prior to the audit date so the bank will be able to provide the information requested and to render the cutoff statements as requested. If the request does not reach the bank before the cutoff date, the cutoff statement will include transactions after that date.

(C) The letter may also include requests for the following:

- Confirmation of all securities or other items held for the clients account as of the closing date for collection or safekeeping, or as agent or trustee (a listing should be provided in cluding titles and account numbers).
- Confirmation of the list of authorized signers for the listed accounts. (This may have been previously requested at a preliminary date in connection with assessment of control risk.)

.04 Standard Form to Confirm Account Balance Information With Financial Institutions

STANDARD FORM TO CONFIRM ACCOUNT BALANCE INFORMATION WITH FINANCIAL INSTITUTIONS

____
CUSTOMER NAME

Financial Institution's Name and Address [ ]

[ ]

We have provided to our accountants the following information as of the close of business on ______________, 20____, regarding our deposit and loan balances. Please confirm the accuracy of the information, noting any exceptions to the information provided. If the balances have been left blank, please complete this form by furnishing the balance in the appropriate space below.* Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other deposit and loan accounts we may have with you comes to your attention, please include such information below. Please use the enclosed envelope to return the form directly to our accountants.

1. At the close of business on the date listed above, our records indicated the following deposit balance(s):

ACCOUNT NAME	ACCOUNT NO.	INTEREST RATE	BALANCE*

2. We were directly liable to the financial institution for loans at the close of business on the date listed above as follows:

ACCOUNT NO./ DESCRIPTION	BALANCE*	DATE DUE	INTEREST RATE	DATE THROUGH WHICH INTEREST IS PAID	DESCRIPTION OF COLLATERAL

______________________________ (Customer's Authorized Signature) ______________________________ (Date)

The information presented above by the customer is in agreement with our records. Although we have not conducted a comprehensive, detailed search of our records, no other deposit or loan accounts have come to our attention except as noted below.

______________________________ (Financial Institution Authorized Signature) ______________________________ (Date)

______________________________ (Title)

EXCEPTIONS AND/OR COMMENTS

Please return this form directly to our accountants:

[ ]

[ ]

* Ordinarily, balances are intentionally left blank if they are not available at the time the form is prepared.

Approved 1990 by American Bankers Association, American Institute of Certified Public Accountants, and Bank Administration Institute. Additional forms available from: AICPA—Order Department, P.O. Box 1003, NY, NY 10108-1003

.05 Request for Confirmation of Petty Cash Fund and Advances to Employees

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of the petty cash fund (or amount of advances) in your possession as of December 31, 20XX which was shown by our records as $_______.

Please indicate in the following space provided whether the amount above agrees with your records. If not, please send the auditors any information you have that will help them reconcile the difference.

After signing and dating your reply, please return it directly to the auditors. A stamped, addressed enveloped is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

____

The foregoing information is in agreement with my records as of December 31, 20XX with the following exceptions (if any):

____

____

____

Date:______________________________ Signed:______________________________

.06 Securities and Cash in Custodian or Trust Accounts

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Custodian or Trustee*]

[*Address*]

Our auditors, [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the enclosed list of securities owned at [*date*] and the amount of principal and income of cash held by you at that date for each of the following accounts:[1] [2]

[*If a list is not obtained from the client, the auditor may complete the following for each account:*

Name of Account	*Account No.*[3]	*Amount Held*
1.________________	___________________	___________________
2.________________	___________________	___________________
3.________________	___________________	___________________]

Please also indicate to the auditors whether or not to your knowledge any of the securities are pledged or otherwise encumbered.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

[1] This letter may be expanded, if necessary, to request cutoff statements of activity (principal and interest) in the accounts.

[2] Sometimes this request is combined with a request for cutoff bank statements and the standard form to confirm account balance information with financial institutions. However, it may be more practical to send separate letters because a bank's commercial banking and trust departments are usually separate operations.

[3] Use the custodian or trustee's account number.

.07 Securities Held by Brokers

[*Prepared on Client's Letterhead*]

[*Date*]

[*Broker's Name*]

[*Address*]

In connection with the audit of our financial statements, please send directly to our auditors [*name and address of auditors*], a statement of our account(s) with you as of [*date*], indicating the following information:

1. Securities held by you for our account
2. Securities out for transfer to our name
3. Any amounts payable to or due from us

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

Notes:

(A) The request may be sent so it reaches the broker sufficiently in advance of the listing date for the broker to respond in a practical manner.

(B) It may be helpful to include the account number(s) used by the broker for the client's account(s).

.08 Sample Receipts for Return of Cash or Securities Counted by Auditor's Representative and Cutoff Bank Statements Received Directly by the Auditors

Cash Count

The above detailed items were counted in my presence and returned to me intact by [*individual's name*], representative of [*auditor's firm name*].

[*Date and Time*] Custodian: ______________________________
[*Custodian's Signature*]

Securities Count

Received intact from [*individual's name*], representative of [*auditor's firm name*], the securities listed above contained in [*Box* ______] of the [*name of bank or custodian*] which were counted by him or her in my presence (or presented to him or her for count).

Date and Time: ___________________ Signed: ______________________________

Title: ______________________________

Cutoff Bank Statement(s)

Received intact from [*individual's name*], representative of [*auditor's firm name*], the cutoff bank statements and related paid checks for the [*period date range*] for the accounts listed in the following space provided:

Date and Time: ___________________ Signed: ______________________________

Title: ______________________________

Notes:

(A) The auditor may request that receipt(s) be written and signed in *ink.*

(B) For counts of petty cash funds, the receipt may be written directly on the bottom of the petty cash-count working paper. For security counts and returns of cutoff bank statements, the receipt may be prepared as a separate working paper.

.09 Accounts Receivable—Positive

[*Prepared on Client's Letterhead*]

[*Date*]

[*Customer Name*]

[*Address*]

In connection with the audit of our financial statements, please confirm directly to our auditors [*name and address of auditors*] the amount of your indebtedness to us which according to our records as of [*date*] amounted to $______.

If the amount shown is in agreement with your records, please check "A."

If the amount is not in agreement with your records, please check and complete "B."

After checking the appropriate response, please sign and date your reply and mail it directly to our auditors in the enclosed envelope. DO NOT SEND ANY PAYMENTS to our auditors.

Sincerely,

[*Client's Authorized Signature*]

A__________ The balance above agrees with my records.

B__________ My records show a balance of $______.

The difference may be due to the following:

____

____

____

____

[*Signed by*]

____

[*Date*]

.10 Accounts Receivable—Negative

[*May be a sticker or stamp used on client's statements to customers*]

PLEASE CHECK THIS STATEMENT

If this statement is *not correct* please write promptly (using the enclosed envelope), giving details of any differences, directly to our auditors, who are now conducting an audit of our financial statements.

[*Name of auditors*]

____

[*Address of auditors*]

____

____

If you do not write to our auditors, they will consider this statement to be correct.

Remittances should NOT be sent to the auditors.

Notes:

(A) A negative confirmation may also be requested in letter form using similar wording.

(B) The auditor may consider sending confirmation requests at the time of the client's regular monthly billings. Coordination of confirmation procedures with the client's routine preparation and mailing of statements may offer efficiency to both the auditor and client.

(C) Negative confirmation requests may be used as substantive procedure to reduce audit risk *only* when three conditions exist: (1) the combined assessed level of inherent and control risk is low, (2) a large number of small balances is involved, and (3) the auditor has no reason to believe that the recipients of the request are unlikely to give them consideration.

.11 Notes Receivable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*] are performing an audit of our financial statements. Accordingly, please confirm directly to our auditors the amount of your indebtedness due us as of [*date*], which our records show as follows:

Type of indebtedness	________________
Initial date of indebtedness	________________
Original amount of indebtedness	________________
Unpaid principal	________________
Interest rate	________________
Interest paid to	________________
Periodic payments required	________________
Description of collateral	________________

If the above information is in agreement with your records, please so indicate by signing in the following space provided and then return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please so note in the following space provided the particulars shown in your records along with any information that may help reconcile the difference from our records. Payments should not be sent to the auditors.

Sincerely,

[*Client's Authorized Signature*]

The above information is correct as of [*date*] with the following exceptions (if any):

____

____

____

____

____

____

Signed: ____________________ Date: ____________________

.12 Inventories Held by Warehouses or Others When Listing Is Not Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please send directly to our auditors the following information about merchandise held in your custody for our account as of [*date*]:

1. Quantities on hand. For each lot, please indicate the following:
   - *a.* Lot number (list each lot separately)
   - *b.* Date received
   - *c.* Kind of merchandise
   - *d.* Unit of measure or package
     - (1) Number of units
     - (2) Kind of units (box, can, crate, quart, pound, dozen, or other unit)
2. A statement about how you determined the above requested quantities; specify whether they were determined by physical count, weight, or measure or if they represent your book record
3. A list of negotiable or nonnegotiable warehouse receipts issued (if any) and whether or not such receipts have, to your knowledge, been assigned or pledged.
4. A statement of any known liens against this merchandise.
5. The amount of unpaid charges, if any, as of [*date*].

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

.13 Inventories Held by Warehouses or Others When Listing Is Provided by Client

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Warehouse*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about the merchandise held by you for our account as of [*date*]:

1. The correctness of the quantities shown on the enclosed listing of such merchandise prepared from our records (a second copy is enclosed for your files). If the enclosed listing differs from the quantities you held for us as of [*date*], please include details of the specific differences in your response to our auditors.

2. Your statement on how you determined the correctness of the quantities you are confirming; please specify whether it was determined by physical count, weight or measure, or whether the quantities are from your records.

3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.

4. A statement of any known liens against these goods.

5. The amount of any unpaid charges as of [*date*].

Please mail your reply directly to [*name and address of auditors*]. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

.15 Pension Plan Actuarial Information

FASB Statement No. 132R, *Employers' Disclosures about Pensions and Other Postretirement Benefits—an amendment of FASB Statements No. 87, 88, and 106*, provides reduced disclosure requirements for nonpublic companies. Part C of this letter assumes companies have elected the reduced disclosures allowed by that statement. Paragraph 8 of FASB Statement No. 132 describes the reduced disclosure requirements. For companies not electing the reduced disclosures, information required for disclosure can be obtained from Parts B and D of the letter.

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Actuary*]

[*Address*]

In connection with the audit of our financial statements for the period ending [*balance sheet date*] by our independent auditors [*name and address of auditors*], please furnish them the information described as follows as it pertains to the XYZ Pension Plan, which is a defined benefit plan. For your convenience and in response to those requests, you may supply pertinent sections, properly signed and dated, of your actuarial or pension expense report if they are available and if they contain the requested information.

A. Please provide a brief description of the following:

1. The employee group covered.
2. The benefit provisions of the plan used in the calculation of the net periodic pension cost for the period and of the accumulated benefit obligation and the projected benefit obligation at the end of the period. Please identify any such benefit provisions that had not taken effect in the year. Please also provide the date of the most recent plan amendment included in your calculation. Please identify any participants or benefits excluded from the calculations, such as benefits guaranteed under an insurance or annuity contract.
3. The percentages of the plan's assets that are invested in debt securities, equity securities, real estate, and any additional classifications of investment. Please identify the target compositions, if any, for the aforementioned classifications of investment groups.
4. A narrative description of the plan's investment policies and strategies, and the basis used to determine the expected long term rate of return on plan assets.
5. The method and the amortization period, if any, used for the following:
   a. Calculation of a market related value of plan assets, if different from the fair value
   b. Amortization of any transition asset or obligation
   c. Amortization of unrecognized prior service cost
   d. Amortization of unrecognized net gain or loss
6. Any substantive commitments for benefits that exceed the benefits defined by the written plan that are included in the calculations.
7. Determination of the value of any insurance or annuity contracts included in the assets.
8. Nature and effect of significant plan amendments and other significant matters affecting comparability of net periodic pension cost, funded status, and other information for the current period with that for the prior period.
9. The following information relating to the employee census data used in calculating the benefit obligations and pension cost:

a. The source and nature of the data is ____________________ and the date as of which the census data was collected is __________________.

b. The following information concerning participants:

Participants	Number of Persons	Compensation (if applicable)
Currently receiving payments	________	________
Active with vested benefits	________	________
Terminated with deferred vested benefits	________	________
Active without vested benefits	________	________
Other (describe)	________	________

Note: *If information is not available for all the above categories, please indicate the categories that have been grouped and describe any group or groups of participants excluded from the above information.*

c. Information for the following individuals contained in the census:

Participant's Name or Number	Age or Birth Date	Sex	Salary	Date Hired or Years of Service

Note to Auditor: *The auditor may select information from employer records to compare with the census data used by the actuary. In addition, the auditor may wish to have the actuary select certain census data from his or her files to compare with the employer's records.*

B. Please provide the following information on the net periodic pension cost for the period ending on __________:

1. Service cost*	$	________
2. Interest cost*		________
3. Expected return on assets*		________
4. Other components*		________
a. Amortization of unrecognized net loss or (gain) from earlier periods		________
b. Amortization of unrecognized prior service cost		________
c. Amortization of the remaining unrecognized net obligation or (asset) existing at the date of the initial application of FASB Statement No. 87, *Employers' Accounting for Pensions*—transition obligation or (asset)		________
d. Amount of loss (or gain) recognized due to a settlement or curtailment		________

* Financial Accounting Standards Board (FASB) recently issued Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*. FASB Statement No. 158 amends FASB Statements No. 87, 88, 106, and 132(R). The intent of the statement is to improve financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year end balance sheet, with some exceptions. An employer with publicly traded equity securities is required to disclose the status of a defined pension plan as of the fiscal year ending after December 15, 2006. An entity without publicly traded equity securities should disclose the status of the plan for fiscal years ending after December 15, 2006, but before June 15, 2007.

e. Net total of components (*a+b+c+d*)	$	________
5. Net periodic pension cost: (1+2-3+4*e*)	$	________

6. The above measurement of the net periodic pension cost is based on the following assumptions:

Weighted average discount rate	________%
Weighted average rate of compensation increase	________%
Weighted average expected long term rate of return on plan assets	________%

Please describe the basis on which the above rates were selected and whether the basis is consistent with the prior period.

Please briefly describe the other assumptions used in the above measurement.

7. The calculations of the items shown in B1 and B5 are based on the following:

Asset information	________
Census data	________
Measurement date (must not be more than three months before the end of the last fiscal year)	________

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in B1–B5.

C. Please provide the following information for disclosure in the financial statements for the period ending ______________:

			Estimated
1.	Projected benefit obligation	$	________
2.	Fair value of plan assets		________
3.	Funded status of the plan (2-1)		________
4.	Employer contributions to the plan		________
5.	Participant contributions to the plan		________
6.	Benefits paid		________
7.	(Accrued) or prepaid pension cost in the company financial statements		________
8.	The amount of any intangible asset or liability that is recognized pursuant to paragraph 35 may result in a temporary difference, as defined by FASB Statement No. 109, *Accounting for Income Taxes*. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to paragraphs 35–39 of FASB Statement No. 109.		________
9.	The amount of any accumulated other comprehensive income or liability that is recognized pursuant to paragraph 35 may result in a temporary difference, as defined by FASB Statement No. 109. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to paragraphs 35–39 of FASB Statement No. 109.		________
10.	The amount included in other comprehensive income for the period arising from a change in the minimum pension liability recognized in accordance with FASB Statement No. 158, *Employers' Accounting for Post Retirement Benefit Plans*.		________

(continued)

	Estimated	
11. The above amount of the projected benefit obligation is measured based on the following assumptions:		
Weighted average discount rate	________	%
Weighted average rate of compensation increase	________	%
Please provide a brief description of the other assumptions used in the measurement.		
12. The calculation of the items shown in C1–C10 is based on the following:		
Asset information	________	
Census data	________	
Measurement date (must be not more than three months before the current fiscal year end)	________	

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in C1–C10.

13. Please describe any significant events noted subsequent to the current year's measurement date and as of the date of your reply to this request and the effects of those events, such as a large plant closing, which could materially affect the amounts shown in C1–C10.

14. Please describe any significant transactions between the employer or related parties and the plan during the period, including, if applicable, the amounts and types of securities of the employer and related parties included in plan assets and the amount of future annual benefits covered by insurance contracts issued by the employer or related parties.

D. Please provide an analysis for the period showing beginning amounts, additions, reductions, and ending amounts of the

1. projected benefit obligation,
2. fair value of plan assets,
3. unrecognized prior service cost,
4. unrecognized net loss (gain),
5. net transition obligation (asset), and
6. accumulated benefit obligation (ending amount only).

E. Please provide our independent auditors with descriptions and the amounts of gains or losses from combinations, divestitures, settlements, curtailments or termination benefits during the year, such as

1. purchases of annuity contracts,
2. lump sum cash payments to plan participants,
3. other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation and eliminated significant risks related to the obligation and assets,
4. any events that significantly reduced the expected years of future service of employees,
5. any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service, or
6. any special or contractual termination benefits offered to employees.

F. Please provide the amounts of anticipated cash payments for benefits for each of the next 5 years, as well as the expected aggregate amount of benefit payments for the subsequent 5 year period (years 6–10).

G. Was all of the information above determined in accordance with FASB Statement No. 87, as amended, FASB Statement No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, as amended, and FASB Statement No. 89, *Financial Reporting and Changing Prices*, as amended (including the FASB's Guides to Implementation of Statements 87 and 88 and the American Academy of Actuaries', *An Actuary's Guide to Compliance with Statement of Financial Accounting Standards No. 87*) to the best of your knowledge? If not, please describe any differences.

H. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.

Please mail your response directly to [*audit firm's name and address*] in the enclosed return envelope as soon as possible, but no later than [*date*].

Sincerely,
[*Client's Authorized Signature*]

.16 Pension Plan Assets Held by Trustee

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Trustee or Custodian*]

[*Address*]

Our auditors [*name and address of auditor*] are conducting an audit of our financial statements. Accordingly, please provide our auditors directly with a listing of the assets including market values as of [*date*] for our employees' pension trust [*title and trustee's account number*].

Please also provide the auditors with the following information about our employees' pension trust for the period from [*beginning of period*] to [*end of period*]:[4]

1. Contributions by the Company during the above period
2. Contributions by employees during the above period
3. Payments to beneficiaries during the above period
4. Any unpaid fees due for services rendered to [*balance sheet date*]

Please send your reply directly to our auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,
[*Client's Authorized Signature*]

[4] A listing of the assets might not be requested if one had already been received by the client. In that case, the auditor might want the trustee to confirm the total market value per the listing.

.17 Notes Payable

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements.

Accordingly, please confirm directly to them the following information relating to our note(s) payable to you, as of [*date*]:

Date of note		________	
Original amount	$	________	
Unpaid principal			
Balance	$	________	
Periodic payments required	$	________	
Payment periods		________	
Maturity date		________	
Interest rate		________	%
Date to which interest has been paid		________	
Amount and description of collateral		________	
Description of terms (for example, demand provisions and prepayment penalties)		________	
Any other direct or contingent liabilities to you (please write "None" or provide description)		________	

If the above information is in agreement with your records at that date, please so indicate by signing in the following space provided and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please note in the following space provided the particulars shown in your records and any information that may help reconcile the difference from our records.

Sincerely,
[*Client's Authorized Signature*]

____

The above information is correct as of [*date*] with the following exceptions (if any):

____

Date:__________________________________ Signature:________________________________

Title:__________________________________

.18 Mortgage Debt

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Creditor or Trustee*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about our mortgage indebtedness to you as of [*date*]:

1.	Original amount	\$	__________	
2.	Date of note		__________	
3.	Unpaid principal balance	\$	__________	
4.	Interest rate		__________	%
5.	Terms for payment of principal		__________	
6.	Date to which interest has been paid		__________	
7.	Nature of mortgage and description or address of property mortgaged		__________	
8.	Amounts on deposit with you in escrow for			
	a. insurance	\$	__________	
	b. real estate taxes	\$	__________	
9.	Amounts paid during the period [*dates from and to*] for			
	a. insurance	\$	__________	
	b. taxes	\$	__________	
10.	Amounts on deposit with you for the reserve for repairs	\$	__________	
11.	The nature of defaults, if any		__________	
12.	Description of terms (for example, prepayment penalties and demand provisions)		__________	

A return envelope is enclosed for your reply.

Sincerely,

[*Client's Authorized Signature*]

Note:

Many of the items requested will vary with the circumstance of the particular mortgage or other debt involved. The above sample assumes the indenture involves an escrow arrangement for insurance and real estate taxes and a deposit account for repairs.

.19 Accounts Payable

.20 Obligation to Lessor

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessor*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements as of [*balance sheet date*] and for the [*time period*] then ended. In connection with this audit, please provide directly to our auditors the following information as of [*balance sheet date*] regarding the lease dated [*date lease was executed*] of [*brief identification of property under lease*] that we are leasing from you:

1. Inception and expiration dates for the lease period, from _______________ to _______________
2. Amount of monthly rent __________________
3. Renewal options (if any):
   a. Dates of renewal period, from _______________ to _______________
   b. Amount of monthly rent for renewal _______________
4. Purchase options (if any):
   a. Amount of purchase price _______________
   b. Inception and expiration dates of option, from _______________ to _______________
   c. Percent of monthly rent (if any) applicable towards purchase price _______________
5. Dates and descriptions of amendments or supplementary understandings, if any, to the lease mentioned above.
6. The amount of outstanding delinquent payments, if any
7. A statement that there are no defaults or a statement of the nature of defaults, if any

A return envelope is enclosed for your reply.

Sincerely,

[*Client's Authorized Signature*]

Note:	The content of this type of letter will vary based on the auditor's professional judgment in the circumstances. To provide additional illustrative language, the above letter is not made parallel with the illustration at AAM section 7200 paragraph .23.

.21 Property Out on Lease

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lessee*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements as of [*balance sheet date*] and for the [*time period*] then ended. In connection with this audit, please confirm directly to our auditors the following information regarding the lease dated [*execution date of lease*] of [*brief identification of property under lease*] that you are leasing from us:

1. Inception and expiration dates of lease period from ______________ to ______________
2. Amount of monthly rent _________________
3. Total rent payments made _______________
4. Date of last payment ___________________

A return envelope is enclosed for your reply.

Sincerely,

[*Client's Authorized Signature*]

Notes:

(A) If the leased property is of a mobile or portable nature such as a bulldozer or television camera, the confirmation may also include a request for specific serial numbers of significant equipment.

(B) In certain circumstances, the auditor may wish to consider confirming additional information such as renewal options, purchase options, and amendments or supplementary understandings.

.22 Register—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Registrar*]

[*Address*]

Our auditors [*name and address of auditors*] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of the close of business [*balance sheet date*] about each class of our preferred and common stock:

1. Authorized number of shares ____________________
2. Issued number of shares _______________________
3. Outstanding number of shares ___________________

Please also indicate the amount of any unpaid registrar fees due you as of [*balance sheet date*].

A return envelope is enclosed for your convenience.

Sincerely,

[*Client's Authorized Signature*]

The above information agrees with our records at [*balance sheet date*] with the following

____

____

____

____

Signed: ______________________________________ Date: ______________________________________
[*Name and Title*]

Notes:

(A) It may be helpful to include the registrar's account number for the client's account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) The above illustration assumes the client has a separate transfer agent (see AAM section 7200 paragraph .25).

.23 Transfer Agent—Capital Stock

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Transfer Agent*]

[*Address*]

[‡] If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.

.26 Confirmation of Compensating Balances

[*Date*]

Financial Institution Official[||]

First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of [*name of customer*] as of [*balance sheet date*] and for the [*period*] then ended, we have advised our independent auditors that as of the close of business on [*balance sheet date*] there (were) (were not) compensating balance arrangements as described in our agreement dated [*date*]. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other compensating balance arrangements between [*name of customer*] and your financial institution comes to your attention, please include such information below. Withdrawal by [*name of customer*] of the compensating balance (was) (was not) legally restricted at [*date*]. The terms of the compensating arrangements at [*date*] were:

EXAMPLES:

1. The Company has been expected to maintain an average compensating balance of 20 percent of its average loan understanding, as determined from the financial institution's ledger records adjusted for estimated average uncollected funds.
2. The Company has been expected to maintain an average compensating balance of $100,000 during the year, as determined from the financial institution's ledger records without adjustment for uncollected funds.
3. The Company has been expected to maintain a compensating balance, as determined from the financial institution's ledger records without adjustment for uncollected funds, of 15 percent of its outstanding loans plus 10 percent of its unused line of credit.
4. The Company has been expected to maintain as a compensating balance noninterest bearing time deposits of 10 percent of its outstanding loans.

In determining compliance with compensating balance arrangements, the Company uses a factor for uncollected funds of _____ [*business calendar*] days.[5]

There (were the following) (were no) changes in the compensating balance arrangements during the [*period*] and subsequently through the date of this letter.

The Company (was) (was not) in compliance with the compensating balance arrangements during the [*period*] and subsequently through the date of this letter.

There (were the following) (were no) sanctions (applied or imminent) by the financial institution because of noncompliance with compensating balance arrangements.[6]

During the [*period*], and subsequently through the date of this letter, (no) (the following) compensating balances were maintained by the Company at the financial institution on behalf of an affiliate, director, officer, or any other third party, and (no) (the following) third party maintained compensating balances at

---

[||] This letter should be addressed to a financial institution official who is responsible for the financial institution's relatioknship with the client or is knowledgeable about the compensating balance arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

[5] This is not applicable if compensating balances are based on the financial institution's ledger records without adjustment for uncollected funds. If some other method is used for determining collected funds for compensating balance purposes, the method used should be described.

[6] This is applicable only if the financial institution has applied sanctions during the [*period*] or notified the Company that sanctions may be applied. Indicate details.

the bank on behalf of the Company. (Withdrawal of such compensating balances (was) (was not) legally restricted.)

Please confirm whether the information about compensating balances presented above is correct by signing in the following space provided and returning this letter directly to our independent auditors [*name and address of CPA Firm*].

.28 Related Party Confirmation

In certain situations, the auditor may want to confirm the existence of related parties with directors, principal officers, major shareholders, or others. For example, a company does not have adequate controls and processes in place to identify related party transactions and the auditor has not otherwise been satisfied as to the extent of related party transactions. The following is an illustrative related party confirmation letter that an auditor may use when the auditor is not otherwise satisfied as to the extent of related party transactions.

[*Date*]

[*Name of Director, Principal Officer, or Major Stockholder*]

[*Address*]

Dear [*Name*]:

In connection with an audit of our financial statements, please furnish answers to the attached questionnaire, sign your name, and return the questionnaire in the enclosed stamped, addressed envelope directly to our auditors [*name and address of auditors*]. The questionnaire is designed to provide the auditors with information about the interests of officers, directors, and other related parties in transactions with the Company.

Please answer all questions. If the answer to any question is "yes," please explain why it is so. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions. Thank you for your cooperation.

Sincerely,

____

[*Client's Authorized Signature*]

____

[*Title*]

[*Client Name*]

Related Party Questionnaire

Please answer all questions. If the answer to any question is "yes," please explain why it is so. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions.

1. Have you or any related party of yours had any interest, direct or indirect, in any sales, purchases, transfers, leasing arrangements, guarantees, or other transactions since [*beginning of period of audit*] to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?

2. Do you or any related party of yours have any interest, direct or indirect, in any pending or incomplete sales, purchases, transfers, leasing arrangements, guarantees or other transactions to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) is, or is to be, a party?

3. Have you or any related party of yours been indebted to the Company (or specify any pension, retirement, savings, or similar plan provided by the client) at any time since [*beginning of period of audit*]? Please exclude amounts due for purchases on usual trade terms and for ordinary travel and expense advances.

The answers to the foregoing questions are correct to the best of my knowledge and belief.

[*Signature*] [*Date*]

Definitions

company. Parent company, any subsidiary or investee for which investments are accounted for by the equity method

related party. Any (1) party (other than the Company) of which you are an officer, director, or partner or are, directly or indirectly, the beneficial owner of 10 percent or more of the voting interests; (2) any trust or other estate in which you have a substantial beneficial ownership or for which you serve as a trustee or in a similar fiduciary capacity; (3) any member of your immediate family; and (4) other party with which you may deal if you (or the other party) control or can significantly influence the other to an extent that either of you might be prevented from fully pursuing your own separate interests.

control. Possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a party, whether through ownership, by contract, or otherwise.

party. An individual, a corporation, a partnership, an association, a joint stock company, a business trust, or an unincorporated organization.

beneficial owner. Party who enjoys, or has the right to secure, benefits substantially equivalent to those of the ownership of securities, even though the securities are not registered in the party's name. Examples of beneficial ownership include securities held for the party's benefit in the name of others, such as nominees, custodians, brokers, trustees, executors and other fiduciaries; a partnership of which the person is a partner; and a corporation for which the party owns substantially all of the stock. Shares (1) held (individually or in a fiduciary capacity) by the party's spouse, the party's or his or her spouse's minor children, or a relative of the party or his or her spouse who shares the same home with the party; or (2) as to which the party can vest or revest title in himself or herself at once or at some future time are also considered as being beneficially owned.

Inquiries to Legal Counsel[1]

.01 Illustrative Inquiry Letter to Legal Counsel[2]

[*Prepared on Client's Letterhead*][3]

[*Date*][4]

[*Name of Lawyer*]

[*Address of Lawyer*]

Dear [*Name*]:In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

Pending or Threatened Litigation (excluding unasserted claims)

> [Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments (considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

> [Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure

---

[1] If a client has not needed to retain legal counsel, the auditor may express an unqualified opinion on the financial statements even though he or she has not obtained a letter from legal counsel of the Company. In these circumstances, the auditor may consider obtaining written representation from the Company that legal counsel has not been retained for matters concerning business operations that may involve current or prospective litigation.

[2] Extracted from AU section 337A, *Illustrative Audit Inquiry Letter to Legal Counsel*, the appendix to AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1). (See footnote 4.)

[3] Paragraph .09 of AU section 337 discusses the matters that should be covered in a letter of audit inquiry.

[4] Sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practical. However, the auditor and client may consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

Sincerely,

[*Authorized Signature for Client*]

.02 Illustrative Inquiry Letter to Legal Counsel If Management Has Not Provided Details About Pending or Threatened Litigation

[*Prepared on Client's Letterhead*]

[*Date*]

[*Name of Lawyer*]

[*Address of Lawyer*]

In connection with an audit of our financial statements at [*balance sheet date*] and for the [*period*] then ended, please furnish to our auditors [*name and address of auditors*] the information requested below for which you have been engaged to provide legal consultation or representation.

Pending or Threatened Litigation, Claims and Assessments

(excluding unasserted claims and assessments)

Please furnish a list of all pending or threatened litigation, claims, and assessments your firm is handling on our behalf including the following:

1. The nature of the litigation (including the amount of monetary or other damages sought)
2. The progress of the case to date
3. How management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement)
4. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss

Unasserted Claims and Assessments

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosing concerning such possible claim or assessment, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of FASB Statement of Financial Accounting Standards No. 5, as a matter of professional responsibility to us. *Please specifically confirm to our auditors that our understanding is correct*.

We have represented to our auditors that there are no unasserted claims which are not specifically identified in this letter that you advised us are probable of assertion and must be disclosed in accordance with FASB Statement of Financial Accounting Standards No. 5.

(If unasserted claims exist, management's listed information should include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted; and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.)

Please furnish our auditors with any explanation you consider necessary to supplement the foregoing information, including an explanation of these matters as to which your views may differ from those stated.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the organization, such as guarantees of indebtedness of others.]

Sincerely,

[*Authorized Signature for Client*]

Notes:

(A) Paragraph .09 of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1), discusses the matters that should be covered in a letter of audit inquiry.

(B) The sending of this letter should be timed so that the lawyer's response is dated as close to the auditor's opinion date as practicable. However, the auditor and client may consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

(C) If a client has not needed to retain legal counsel, an unqualified opinion may be expressed on the financial statements even though a letter from legal counsel has not been obtained. In these circumstances, the auditor may consider obtaining a written representation from the Company that legal counsel has not been retained for matters concerning its operations that involve current or prospective litigation.

.03 Improving Inquiry Techniques

If inquiries to legal counsel are not sufficiently detailed or specific, deficiencies in attorneys' responses may result. A conference between the auditor and the attorney may be necessary to clarify the attorney's written response, and paragraph .10 of AU section 337 provides for such a conference. However, to improve the auditor's ability to receive all of the information necessary to complete his or her audit, he or she may wish to consider the following matters in an inquiry to legal counsel:

a. A request that the attorney specify the effective date of his or her response if it is other than the date of the reply.

b. A request that the attorney mail the response so that it will be received by a certain date.

c. A request that the nature of any litigation specifically identify (1) the proceedings, (2) the claim(s) asserted, (3) the amount of monetary damages sought, or if no amounts are indicated in preliminary case filings, a statement to that effect, and (4) the objectives sought by the plaintiff, if any, other than monetary or other damages (such as performance or discontinued performance of certain actions).

d. A request that the attorney avoid such vague phrases as *meritorious defenses*, *without substantial merit*, and *reasonable chance* in expressing an opinion on the outcome of litigation.

e. If an opinion cannot be expressed on the outcome of litigation, a request that the attorney so state together with his or her reasons for that position.

f. A request that the attorney specify to what extent potential damages are covered by insurance. (It may be possible to obtain the opinion of the insurer's counsel regarding the applicability of insurance coverage.)

g. A request that the attorney provide a summary of material litigation, claims, and assessments settled during the period.

h. A statement that confirmation of the understanding regarding disclosure of unasserted claims and assessments is an integral part of the audit inquiry and that failure to so confirm will require a follow-up contact.

i. A statement that the attorney's response will not be quoted or referred to in the financial statements without first consulting with him or her.

[*The next page is 7401.*]

AAM Section 7400

Management Representations and Representation Letters

.01 AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), states that written representations from management should be obtained for all financial statements and periods covered by the auditor's report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.[1]

.02 Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. Such representations from management are part of the audit evidence the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit.

Specific Representations

.03 In connection with an audit of financial statements presented in accordance with generally accepted accounting principles (GAAP), specific representations should relate to the following matters:

Financial Statements

a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with GAAP.

b. Management's belief that the financial statements are fairly presented in conformity with GAAP.

Completeness of Information

c. Availability of all financial records and related data.

d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.

e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.

f. Absence of unrecorded transactions.

[1] The AICPA recently released Technical Practice Aid Technical Questions and Answers (TIS) section 9100 paragraph .06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*). Auditors may find this nonauthoritative practice aid useful when conducting audits in accordance with generally accepted auditing standards (GAAS). This practice aid discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The practice aid indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.

Recognition, Measurement, and Disclosure

g. Management's belief that the effects of any uncorrected financial statement misstatements[2] aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.[3] (A summary of such items should be included in or attached to the letter.)[4]

h. Management's acknowledgement of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.

i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.

j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.

l. Information concerning related party transactions and amounts receivable from or payable to related parties.

m. Guarantees, whether written or oral, under which the entity is contingently liable.

n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (AICPA, *Technical Practice Aids*, ACC sec. 10,640).

o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*.[5]

q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.

s. Compliance with aspects of contractual agreements that may affect the financial statements.

Subsequent Events

t. Information concerning subsequent events.

The representation letter ordinarily should be tailored to include additional appropriate representations from management concerning matters specific to the entity's business or industry.

---

[2] Paragraph .07 of AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), states that a misstatement can result from errors or fraud and provides guidance for the auditor's evaluation of audit findings. (See AU section 312 par. .50–.61.)

[3] If management believes that certain identified items are not misstatements, management's belief may be acknowledged by adding to the representation

(for example,"We do not agree that items XX and XX constitute misstatements because [*description of reasons*]").

[4] AU section 312 states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated.

[5] If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see Auditing Interpretation No. 6, "Client Has Not Consulted a Lawyer" of AU section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments* (AICPA, *Professional Standards*, vol. 1, AU sec. 9337 par. .15-.17).

Materiality Considerations

.04 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements.

Addressing and Dating

.05 The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report.

Management's Signatures

.06 The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity.

Scope Limitations

.07 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or withdraw from the engagement. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

Illustrative Representation Letter—Audit of Financial Statements

.08 The following letter, which relates to an audit of financial statements prepared in conformity with GAAP, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report (for example, "balance sheets of XYZ Company as of December 31, 20X1 and 20X0, and the related statements of income and retained earnings and cash flows for the years then ended"). The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited.

.09 If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred…." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allocations discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

.10 The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information.*

.11 Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are *fraud*, in AU section 316, *Consideration of Fraud in a Financial Statement Audit*, (AICPA, *Professional Standards*, vol. 1), and *related parties* in footnote 1 of AU section 334, *Related Parties* (AICPA, *Professional Standards*, vol. 1). To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

.12 The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of AU section 333.

.13 Illustrative Representation Letter

[*Prepared on Client's Letterhead*]

[*Date*]

To [*Independent Auditor*]

We are providing this letter in connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the [*consolidated*] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [*consolidated*] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, (as of [*date of auditor's report*]), the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.
2. We have made available to you all—
   a. Financial records and related data.
   b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.

5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.

7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—

   a. Management,

   b. Employees who have significant roles in internal control, or

   c. Others where the fraud could have a material effect on the financial statements.

8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.

10. The following have been properly recorded or disclosed in the financial statements:

    a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

    b. Guarantees, whether written or oral, under which the company is contingently liable.

    c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6 [*Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year*.]

11. There are no—

    a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

    b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB Statement No. 5.[6]

    c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

[*Add additional representations that are unique to the entity's business or industry. See paragraph .07* and appendix B, of AU section 333.]

---

[6] In the circumstances discussed in footnote 7 of AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), this representation might be worded as follows:

> We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

____

[*Name of Chief and Title*]

____

[*Name of Chief Financial Officer and Title*]

Notes:

Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about

- the appropriateness of the measurement methods, including related assumptions used by management in determining the fair value and the consistency in application of the methods;
- the completeness and adequacy of disclosures related to fair values; and
- whether subsequent events require adjustments to the fair value measurements and disclosures are included in the financial statements.

[Source: Paragraph .49 of AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1)]

See appendix C of AU section 722, *Interim Financial Information* (AICPA, *Professional Standards*, vol. 1), for "Illustrative Management Representation Letters for a Review of Interim Financial Information."

.14 Illustrative Representation Letter—Audit of Personal Financial Statements

[*Date*]

[*To the Independent Auditor*]

We are providing this letter in connection with your audit of the statement of financial condition of James and Jane Person as of [*date*] and the related statement of changes in net worth for the [*period*] then ended for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the financial condition and changes in the net worth, of James and Jane Person in conformity with generally accepted accounting principles. We confirm that we are responsible for the fair presentation in the statement of financial condition and changes in net worth in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report)*,] the following representations made to you during your audit.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.
2. We have made available to you all financial records and related data.
3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.

4. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

5. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.

6. We have no knowledge of any fraud or suspected fraud affecting the entity involving

   a. us.

   b. others where the fraud could have a material effect on the financial statements.

7. We have no knowledge of any allegations of fraud or suspected fraud affecting us received in communications from analysts, regulators, short sellers, or others.

8. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.

9. The following have been properly recorded or disclosed in the financial statements:

   a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

   b. Guarantees, whether written or oral, under which we are contingently liable.

   c. Significant estimates and material concentrations known to us that are required to be disclosed in accordance with the AICPA's SOP 94-6. (*Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.*)

10. There are no

   a. violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

   b. unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB Statement No. 5.[7]

   c. other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.

11. We have satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

12. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

---

[7] Footnote 7 of AU section 333 states that if a lawyer has not been consulted regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments. In the circumstances discussed in footnote 7 to AU section 333, this representation might be worded as follows:

> We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with FASB Statement No. 5, and we have not consulted a lawyer concerning litigation, claims, or assessments.

To the best of our knowledge and belief, no events have occurred subsequent to the statement of financial condition date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

.15 Illustrative Representation Letter to Other Accountants

[*Firm's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

In connection with the report you have been requested to reissue on the financial statements of [*client's name*] for the year ended [*date*], which statements are to be included comparatively with similar statements for the year ended [*date*], we make the following representations.

We have audited (or reviewed or compiled) the balance sheet of [*client's name*] as of [*balance sheet date*] and the related statements of earnings, retained earnings, and cash flows for the year then ended. Our procedures in connection with the engagement did not disclose any events or transactions subsequent to [*predecessor's balance sheet date*] which, in our opinion, would have a material effect upon the financial statements, or which would require mention in the notes to the financial statements of [*client's name*] for the year then ended.

Should anything come to our attention prior to the date our report is issued that, in our judgment, would have a material effect upon the financial statements covered by your report, we shall notify you promptly.

Sincerely,

____

[*Engagement Partner's Signature*]

Note:

If any matters come to the firm's attention that may require revision of the previous financial statements, they could be included in a separate paragraph after approval by the engagement partner.

.16 Letter to Other Accountants Upon Whose Work We Plan to Rely

[*Firm's Letterhead*]

[*Date*]

[*Name*]

[*Address*]

We are auditing the financial statements of [*client's name*], [*parent company*]. The financial statements of [*other accountants' client's name*] that you are auditing are to be included in the financial statements of [*client's name*]. We will rely on your report on the financial statements in expressing an opinion on the (consolidated) financial statements of [*client's name*] (and subsidiaries). In that connection, we will refer to your report.

Please confirm to us that your firm is independent with respect to [*client's name*] and [*other accountant's client's name*] within the meaning of Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec.101 par. .01), of the Code of Professional Conduct.

Please provide us promptly, in writing, with the following information in connection with your current examination of the financial statements of [*other accountant's client's name*] with respect to the following:

1. Related party transactions or other matters that have come to your attention. We are aware of the following related parties: [*names of known related parties*].

2. Any limitation on the scope of your examination that is related to the financial statements of [*client's name*], or that limits your ability to respond to this inquiry.

Please update your letter to indicate any additional matters of the type designated above that have come to your attention through the date of your report on the financial statements of [*other accountants' client's name*].

Sincerely,

____

[*Engagement Partner's Signature*]

.17 Illustrative Updating Management Representation Letter

The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of AU section 333. Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. …"

[*Firm's Letterhead*]

[*Date*]

To [*Auditor*],

In connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [*date of previous representation letter*]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [*date of latest balance sheet reported on by the auditor*] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

AAM Section 7500

Communication With Those Charged With Governance

.01 AU section 380, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements. The term *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. For entities with a board of directors, the term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards (GAAS). Recognizing the importance of effective 2-way communication to the audit, AU section 380 provides a framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated with them.

Matters to Be Communicated

.02 In accordance with paragraph .05 of AU section 380, the auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. The auditor should communicate the following with those charged with governance:

a. The auditor's responsibilities under GAAS, including that

  (1) the auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management with the oversight of those charged with governance are presented fairly, in all material respects, in conformity with generally accepted accounting principles (GAAP); and

  (2) the audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

These responsibilities may be communicated through the engagement letter, or other form of contract that records the terms of the engagement, if that letter or contract is provided to those charged with governance. See paragraphs .26–.28 of AU section 380 for additional guidance.

b. An overview of the planned scope and timing of the audit. See paragraphs .29–.33 of AU section 380 for additional guidance.

c. Significant findings from the audit, including

  (1) the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures (see paragraphs .37–.38 of AU section 380);

  (2) significant difficulties, if any, encountered during the audit (see paragraph .39 of AU section 380);

  (3) uncorrected misstatements, other than those the auditor believes are trivial, if any (see paragraphs .40–.41 of AU section 380);

  (4) disagreements with management, if any (see paragraph .42 of AU section 380); and

(5) other findings or issues, if any, arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their oversight of the financial reporting process.

.03 Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate the following:

a. Material, corrected misstatements that were brought to the attention of management as a result of audit procedures. The auditor also may communicate other corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements.

b. Representations the auditor is requesting from management. The auditor may provide those charged with governance with a copy of management's written representations.

c. Management's consultations with other accountants (see paragraph .43 of AU section 380).

d. Significant issues, if any, arising from the audit that were discussed, or were the subject of correspondence, with management (see paragraph .44 of AU section 380).

The Communication Process

.04 The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. Clear communication of the auditor's responsibilities, an overview of the planned scope and timing of the audit, and the expected general content of communications helps establish the basis for effective two-way communication. Matters that may also contribute to effective two-way communication include discussion of the following:

- The purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- The form in which communications will be made.
- The person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.
- The auditor's expectation that communication will be two-way, and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; the suspicion or the detection of fraud; or concerns about the integrity or competence of senior management.
- The process for taking action and reporting back on matters communicated by the auditor.
- The process for taking action and reporting back on matters communicated by those charged with governance.

.05 The auditor should communicate in writing with those charged with governance significant findings from the audit when, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. Other communications may be oral or in writing. When the auditor communicates matters in accordance with AU section 380 in writing, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management; and is not intended to be and should not be used by anyone other than these specified parties. When matters required to be communicated have been communicated orally, the auditor should document them. When matters have been communicated in writing, the auditor should retain a copy of the communication. Documentation of oral communication may include a copy of minutes prepared by the entity if those minutes are an appropriate record of the communication.

.06 The auditor should communicate with those charged with governance on a sufficiently timely basis to enable those charged with governance to take appropriate action. The appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, and the action expected to be taken by those charged with governance.

.07 The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should take appropriate action to address the effectiveness of the communication process.

Additional Communication Requirements

.08 Requirements for the auditor to communicate with those charged with governance are included in other standards, including the following:

a. Paragraph .17 of AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1), to communicate with the audit committee or others with equivalent authority and responsibility illegal acts that come to the auditor's attention.

b. Paragraph .22 of AU section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1), to communicate to management and the audit committee (or others with equivalent authority and responsibility) when the auditor becomes aware during an audit in accordance with GAAS that the entity is subject to an audit requirement that may not be encompassed in the terms of the engagement, and that an audit in accordance with GAAS may not satisfy the relevant legal, regulatory, or contractual requirements.

c. Paragraph .22 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), to inquire directly of the audit committee (or at least its chair) regarding the audit committee's views about the risks of fraud and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity.

d. Paragraph .79 of AU section 316 to communicate with those charged with governance fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with those charged with governance about misappropriations perpetrated by lower level employees.

e. Paragraph .20 of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), to communicate in writing to management and those charged with governance control deficiencies identified during an audit that upon evaluation are considered significant deficiencies or material weaknesses. See examples in the following paragraphs. In addition, refer to AAM section 8300, *Understanding SAS No. 112 and Evaluating Control Deficiencies*, for further guidance.

.09 Report on Reportable Conditions

Bank Reconciliations

Bank reconciliations have been prepared for the operating cash account, but they have not been in agreement with the general ledger, often by as much as_____________. At _____________, the general ledger balance varied from the bank reconciliation by $_______.

In prior years, the bank reconciliations did not reconcile exactly to the general ledger; however, the variances were not as significant as in 20XX. To maintain effective internal controls over cash, it is critical that bank accounts be reconciled to the general ledger monthly with differences identified and resolved immediately. At the present time, an adjusting journal entry should be made to bring the general ledger balance into agreement with the reconciled balance.

Accounts Payable

A listing of accounts payable as of _______________ could not be produced to support the general ledger amount. We were able to reconcile accounts payable to the general ledger amount by reviewing computer generated payable listings dated ________________, along with examining unpaid invoices at the time of our field work.

As indicated in previous letters to the board, accounts payable has been an ongoing problem due to the fact that the accounts payable listing is not reconciled to the general ledger monthly. Proper recording of accounts payable is a key to maintaining adequate financial statements. Whether computer generated or manually prepared, a detailed accounts payable listing should be reconciled monthly to the general ledger balance. All reconciliations should be reviewed and approved by someone other than the preparer, with the reviewer being responsible for ensuring that all differences are resolved.

Property and Equipment

Documentation provided to support the changes in property and equipment was not in agreement with the changes in the general ledger balances, for some categories, by as much as _____. Also, the computer generated list of property and equipment was not in agreement with the total property and equipment recorded in the general ledger; therefore, this listing was not a useful resource.

The property and equipment computer listing should be reviewed, revised, and reconciled to the general ledger. Changes in property and equipment should be recorded timely and the detailed property and equipment listing should be reconciled to the general ledger balances monthly.

The procedures for recording fixed asset additions and deletions should be reviewed to determine their adequacy. Adjusting journal entries with regard to trade-ins, sales, and other retirements of fixed assets should be reviewed by the treasurer or someone other than the person preparing the entry. Examples of problems encountered include improper capitalization of assets when a like kind exchange or trade-in is involved and improper recording of gain or loss on sale of assets.

An annual or biannual physical inventory of equipment is an effective management tool to help maintain detail property and equipment records and strengthen controls of safeguarding equipment. The board should consider making a physical inventory a standard procedure.

This communication is intended solely for the information and the use of the board of directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Sincerely,

____

.10 Written Communication Regarding Significant Deficiencies and Material Weaknesses Identified During an Audit of Financial Statements

[*Date of Auditor's Report on the Financial Statements*]

In planning and performing our audit of the financial statements of [*client's name*] as of and for the year ended [*financial statement date*], in accordance with auditing standards generally accepted in the United States of America, we considered [*client's name*] internal control over financial reporting *internal control* as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. Accordingly, we do not express an opinion on the effectiveness of the company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed in the following sections, we identified certain deficiencies in internal control that we consider to be significant deficiencies and a deficiency that we consider to be a material weakness.

A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the following deficiencies to be significant deficiencies in internal control.

Accrued Vacation

Although accrued vacation has not been recorded on the financial statements, the amount of accrued vacation must be considered in determining the fair presentation of the financial statements. The year end analysis of accrued vacation had a balance significantly lower than the prior year's balance. The details of the analysis were traced to the attendance control cards. We found (1) the number of days earned on the listing did not agree to that recorded in the cards, (2) individuals were reported in the cards with earned vacation but were not on the listing, and (3) some of the cards appeared to not have been maintained.

Detailed records of vacation days earned and used by employees should be recorded in a timely manner and accurately maintained. At least annually, these days should be converted to dollar amounts. Management should review the conversion and consider reporting this liability on the financial statements for complete recognition of liabilities.

Discussions with the office manager revealed that not all employees are required to notify him or her when they use vacation days. All employees should be required to inform the office manager of all vacation days taken. Employees should also be asked to periodically review their vacation records with the office manager and to indicate their agreement by signing the records.

Bad Debts

During 20XX, the board approved the write-off of accounts receivable of about $ [*amount*] The write-off was charged to revenue rather than to bad debt expense.

Procedures for recording bad debt write-offs should be reviewed for adequacy. All adjusting entries should be reviewed by the treasurer or a member of management other than the person preparing the journal entry.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. We believe that the following deficiency constitutes a material weakness.

Blank Checks

Blank checks are maintained in an unlocked cabinet along with the check signing machine.

Blank checks and the check signing machine should be locked in separate locations so as to prevent the embezzlement of funds.

This report is intended solely for the information and use of the board of directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Sincerely,

____

AAM Section 7600

Reliance Letter

.01 Illustrative Reliance Letter

[*Addressee*]:

The following is in response to your letter to our firm dated ________.

We performed an audit of [*company's*] balance sheet dated December 31, 20X0, and the related statements of income, retained earnings, and cash flow for the year then ended. The financial statements were audited as of the financial statement date and the audit procedures performed were completed on March 28, 20X1 [*audit report date*]. No additional audit procedures were performed subsequent to March 28, 20X1.

The audit was conducted in accordance with generally accepted auditing standards (GAAS). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. However, a properly designed and executed audit may not detect a material irregularity. For example, GAAS does not require that an auditor authenticate documents, nor is an auditor trained to do so. Also, audit procedures that are effective for detecting a misstatement that is unintentional may not be effective for a misstatement that is intentional and is concealed through collusion between client personnel and third parties or among management or employees of the client.

We understand that you intend to rely on the report and associated statements in connection with [*describe as precisely as possible the transaction in connection with which the third party intends to rely on the report and statements*]. It should be noted that the audit procedures performed in order to render an opinion on the financial statements of [*company*] may not be adequate or appropriate for this purpose. Because of the limitations inherent in the audit process, we may not have detected all material misstatements. Accordingly, our audit was not intended for your benefit and should not be taken to supplant the inquiries and procedures that you should take to satisfy yourself as to [*company's*] credit-worthiness. We recommend that you perform your own due diligence investigation, which should include but not be limited to the following steps [*itemize*]. We emphasize that this list of procedures may not be all inclusive and that we cannot provide any assurance that the procedures we have mentioned will be sufficient for your purposes.

AAM Section 7700

Proposal Letter

.01 Illustrative Proposal Letter

[*Date*]

[*Name*]

[*Address*]

Dear [*Name*]:

We appreciate this opportunity to present a proposal for [*nature of services*] and a brief description of our firm and services.

Our firm was formed in 20XX. We have [*number of*] partners and [*number of*] staff and support personnel working with clients in accounting and auditing, taxation, and various consulting services. Although we serve all size clients, our clientele consists primarily of small and medium size businesses such as yours.

Our professional objectives are to provide the highest quality services on a timely basis. As a member of the AICPA Division for Firm's Private Companies Practice Section, our accounting and auditing practice has been subjected to a review by another firm of CPAs. We received an unqualified opinion as a result of that review. We extend our client relationships to include ongoing contact and services to achieve our services objectives.

We have extensive experience in the [*type of*] industry. This experience and related understanding of your industry's operations permit us to design, perform, and complete engagements for your company effectively and at a reasonable cost.

Our services include the following:

- Accounting, Auditing, and Attestation Services

  Our accounting, auditing, and attestation services include annual or special audits, compilations and reviews of financial statements, and the examination and review of financial and other information under the attestation standards. We accompany our report on audited financial statements with a reportable conditions letter and a management letter that include suggestions to correct internal control weaknesses and recommendations for operational efficiencies. Our purpose in making these suggestions is to help you accomplish your operational objectives. These suggestions often result in cost savings.

- Tax Services

  We offer diversified tax services, including assistance in all phases of federal, state, and local income taxes; estate, inheritance, and gift taxes; and payroll and other taxes. These services include tax return preparation, tax research, and representation of clients at administrative proceedings before the various taxing authorities. The objectives of our tax services are to minimize taxes and potential problems.

- Consulting Services

  Our consulting services are designed to assist clients in improving efficiency and profitability. Our approach offers assistance in such areas as developing plans for problem identification or implementing more effective operating controls, evaluating information systems and installing or upgrading data processing systems.

[*Name*], an audit partner, will be primarily responsible for your engagement.

As you requested, our proposal is for [*state nature of services*].

We estimate that our fees for the proposed services will be approximately $[*amount*], plus out-of-pocket expenses, billable as the work progresses. Our fees are based on time spent on the engagement. Should we encounter any unforeseen circumstances requiring additional time, you will be notified promptly of the situation.

Our fee estimate is based on the assumption that your personnel will prepare certain schedules and analyses for us. We also anticipate their assistance in locating invoices and other documents for our examination.

Our firm is organized and staffed to help you satisfy our business needs. Please call [*number*] with questions about this proposal.

Sincerely,

____

Audit Risk Alert—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
AUDIT RISK ALERT—2007/08

This Audit Risk Alert is intended to provide auditors with an overview of recent economic, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole, CPA, CFE
Technical Manager
Accounting and Auditing Publications

Amy M. Eubanks, CPA
Director
Accounting and Auditing Publications

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 To help auditors understand relevant industry, economic, and regulatory factors affecting their clients, the AICPA offers industry and topic-specific alerts to be used in conjunction with this alert. These alerts can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The client financial statements you audit will be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

Real Gross Domestic Product

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter final estimates, GDP increased at an annual rate of 3.8 percent.

.11 The increase in real GDP in the second quarter of 2007 reflects positive contributions for services, exports, nonresidential structures, federal and state and local government spending, and equipment and software sales. These positive contributions were partly offset by negative contributions for residential fixed investments. Imports decreased.

Unemployment

.12 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor (DOL), Bureau of Labor Statistics. Through the third quarter of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

Interest Rates

.13 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then at its September and October meetings, the Federal Reserve decided to lower its target for the federal funds rate 50 and 25 basis points, respectively, to 4.50 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 and 25 basis points, respectively, to 5.00 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements. Issues for auditors to consider include that the change in, and the volatility of, interest rates increase the inherent risk for the valuation of investments and derivatives whose value is significantly affected by interest rates. Auditors may need to determine that the recorded value of an investment or derivative uses reasonable interest rates in cases where the interest rate affects valuation.

Consumer Price Index Trends

.14 The U.S. DOL Bureau of Labor Statistics annually publishes its Consumer Price Index for all Urban Consumers (CPI-U). The CPI-U is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. The CPI-U is the most widely used measure of inflation and is sometimes viewed as an indicator of the effectiveness of government economic policy. It provides information about price changes in the nation's economy to government, business, labor, and private citizens and is used by them as a guide when making economic decisions. The table below shows the U.S. city annual average CPI-U for the past five years. The baseline years are: 1982–1984=100.

Year	*Annual Average CPI-U*	*Change From Prior Year*
2002	179.9	1.6%
2003	184.0	2.3%
2004	188.9	2.7%
2005	195.3	3.4%
2006	201.6	3.2%

Interest Rates for Below-Market Rate Loans

.15 The Internal Revenue Service (IRS) issues the blended annual Applicable Federal Rate each year to provide guidance in relation to Internal Revenue Code section 7872(e)(2), *Treatment of loans with below-market interest rates—Foregone interest* (U.S. Code, Title 26). The term *forgone interest* means, with respect to any period during which the loan is outstanding, the excess of—

a. the amount of interest, which would have been payable on the loan for the period, if interest accrued on the loan at the applicable federal rate and were payable annually on the day referred to in subsection (a)(2), over

b. any interest payable on the loan properly allocable to such period.

.16 This rate is a useful guide to auditors in evaluating interest rates and determining imputed interest for below-market-rate loans. The following table provides the blended annual rate for each of the previous five years as determined by the IRS.

Year	*Blended Annual Rate*
2003	1.52%
2004	1.98%
2005	3.11%
2006	4.71%
2007	4.92%

Housing Market

.17 The housing market continues to deteriorate and is not only slowing the economy directly, but rising concerns over falling home prices may encourage customers to cut back on their spending in the future. There is continued concern that inflation may begin to accelerate in our economy. After five years of record sales and growth, the residential real estate market slowed, and the outlook has since been bleak. The number of foreclosure filings reported in the United States in August 2007 more than doubled versus August 2006 and increased 36 percent from July 2007; a trend that signals homeowners are increasingly unable to make timely payments on their mortgages. The Mortgage Bankers Association reports that 550,000 homeowners with subprime loans began a foreclosure process over the last year and specialists say that number could double over the next couple of years.

Subprime Mortgages and the Liquidity Crisis

.18 In recent months, there has been a sharp rise in the rate of delinquency and default by subprime mortgage loan borrowers. This has occurred most frequently when the borrower on an adjustable-rate loan is unable to make the higher payments required after an interest-rate adjustment, and is unable to either refinance the loan or sell the home for an amount sufficient to pay off the mortgage. Moreover, several hundred billion dollars of adjustable-rate subprime mortgage loans are expected to "reprice" over the 15- to

18-month period beginning in October 2007. As a consequence, many industry observers expect that the rates of default—and foreclosure—will continue to increase sharply. The difficulties arising from increasing defaults have been further compounded by declining real estate prices, especially in geographic areas that have a large volume of subprime mortgage loans. In many areas, rising foreclosures have contributed to the declining prices of residential real estate. The rising level of defaults, combined with the falling price of the related real estate collateral, has resulted in significant increases in credit losses and fear by investors that those losses will continue to grow for the foreseeable future.

Market Reaction

.19 Most subprime loans were ultimately financed by investors who purchased securities backed by the underlying subprime mortgage loans. These securities vary widely in terms of their exposure to loss from defaults on the underlying loans. The level of defaults has, in many cases, exceeded the model-based projections originally used to structure and assign ratings to securities backed by subprime mortgage loans, and has led to a significant number of downgrades. As a result of the uncertainty in the marketplace arising from current conditions, investors and lenders have largely retreated from investments in assets backed by subprime mortgage loans, creating a so called "liquidity crisis." With a sharply reduced number of investors in the marketplace willing to provide funding, many subprime mortgage lenders have been forced to cease originations of new mortgages, and holders of existing loans and mortgage-backed securities have experienced sharp declines in their value. Lenders that are still making new loans have significantly tightened their underwriting standards, making it more difficult for existing borrowers to refinance.

Contagion Effect—Spread of Illiquidity to Other Markets

.20 In recent weeks, the "liquidity crisis" has spread to other corners of the credit markets. Investors have pulled back from investments in collateralized bond obligations (many of which are backed by subordinated mortgage-backed securities backed by subprime mortgage loans), high-yield "junk" bonds, debt issued in leveraged buyout transactions, and even short-term, asset-backed commercial paper. It is not possible at this time to predict how long investors will stay on the sidelines or which markets will be most affected, but it is not unreasonable to expect—especially for subprime mortgage-related assets—that current conditions could persist for an extended period of time until the uncertainty is reduced, that is, when it becomes clear that defaults have peaked and real estate prices have bottomed out.

Valuation Issues

.21 Assets backed by subprime mortgage loans (and other assets affected by the market disruptions) are held by all types of entities—including, but not limited to, commercial and investment banks, insurance companies, investment companies such as mutual funds and hedge funds, pension and employee-benefit plans, and university endowment funds. In short, these assets can be found in investment portfolios across the spectrum. These assets may be held either directly, or indirectly, such as through an investment company such as a mutual fund or a hedge fund.

.22 Investors in a variety of assets have experienced severe price volatility as a result of the increased credit risk and the reduced liquidity in the marketplace. That volatility has given rise to questions about how to measure the fair value of subprime-mortgage-related assets, as well as other assets affected by the illiquidity in today's market. Fair value is an essential component of many accounting principles that underlie companies' financial reporting, not only when fair value is the primary basis of accounting—such as for trading accounts and held-for-sale portfolios—but also for purposes of measuring and reporting asset impairment, and for making disclosures about fair value.

Audit and Attestation Issues and Developments

.23 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.24 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the Securities and Exchange Commission (SEC) and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report

SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier application permitted.
• SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	• This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
• SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	• This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
• SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	• This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
• SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	• This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
• SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	• This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
• SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	• This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

(continued)

• SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	• This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
• SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	• This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue date: December 2005 (Applicable to audits conducted in accordance with GAAS)	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339A) and amends AU section 530, *Dating of the Independent Auditors Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.

Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current years audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditors report.

(continued)

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.
PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.

PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 300—Report on the Initial Implementation of Auditing Standard No. 2") Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction • Whether a registered public accounting firms independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.25 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.26 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.27 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.28 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.29 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases, the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditors understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.30 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable

whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditors classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as a significant deficiency or a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.

- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.31 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses and that are then communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.32 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving managements internal control objectives.

.33 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.34 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.35 One issue that has arisen in audits of smaller entities is the increase in costs as a result of the time the auditor spends documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.36 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[1] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.37 The requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing (ISA).

.38 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. That alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; that alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.39 In March 2006, the ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). The SASs became effective for audits of financial statements for periods beginning on or after December 15, 2006. Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The primary objective of the SASs is to enhance your application of the audit risk model in practice by requiring, among other things:

- A more in-depth understanding of your audit client and its environment, including its internal control. This knowledge will be used to identify the risks of material misstatement in the financial statements (whether caused by error or fraud) and what the client is doing to mitigate them.
- A more rigorous assessment of the risks of material misstatement of the financial statements based on that understanding.
- Improved linkage between the assessed risks and the nature, timing, and extent of audit procedures performed in response to those risks.

Key Provisions of the SASs and How They Differ From Previous Standards

.40 The following tables list the key provisions of the eight risk assessment standards and provide summaries of how these standards differ from previous AICPA generally accepted auditing standards (GAAS).

SAS No. 104, **Amendment to Statement on Auditing Standards No. 1,** *Codification of Auditing Standards and Procedures* **("Due Professional Care in the Performance of Work")**

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 104 defines *reasonable assurance* as a "high level of assurance."	• SAS No. 104 clarifies the meaning of reasonable assurance.

SAS No. 105, **Amendment to Statement on Auditing Standards No. 95,** *Generally Accepted Auditing Standards*

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 105 expands the scope of the understanding that the auditor must obtain in the second standard of field work from "internal control" to "the entity and its environment, including its internal control." • The quality and depth of the understanding to be obtained is emphasized by amending its purpose from "planning the audit" to "assessing the risk of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures."	• Previous guidance considered the understanding of the entity to be a part of audit planning, and emphasized that the understanding of internal control also was primarily part of audit planning. • By stating that the purpose of your understanding of the entity and its internal control is part of assessing the risk of material misstatement, SAS No. 105 essentially considers this understanding to provide audit evidence that ultimately supports your opinion on the financial statements.

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
	• The new standard emphasizes the link between understanding the entity, assessing risks, and the design of further audit procedures. It is anticipated that "generic" audit programs will not be an appropriate response for all engagements because risks vary between entities. • The term *further audit procedures*, which consists of test of controls and substantive tests, replaces the term *tests to be performed* in recognition that risk assessment procedures are also performed. • The term *audit evidence* replaces the term *evidential matter*.

SAS No. 106, Audit Evidence

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 106 defines *audit evidence* as "all the information used by the auditor in arriving at the conclusions on which the audit opinion is based."	• Previous guidance did not define audit evidence. • SAS No. 106 also describes basic concepts of audit evidence. • The term *sufficient, appropriate audit evidence*, defined in SAS No. 106, replaces the term *sufficient, competent evidence.*
• SAS No. 106 recategorizes assertions by classes of transactions, account balances, and presentation and disclosure; expands the guidance related to presentation and disclosure; and describes how the auditor uses relevant assertions to assess risk and design audit procedures.	• SAS No. 106 recategorizes assertions to add clarity. • *Assertion relating to presentation and disclosure* has been expanded and includes a new assertion that information in disclosures should be "expressed clearly" (understandability).
• SAS No. 106 defines *relevant assertions* as those assertions that have a meaningful bearing on whether the account is fairly stated.	• The term *relevant assertions* is new, and it is used repeatedly throughout SAS No. 106.
• SAS No. 106 provides additional guidance on the reliability of various kinds of audit evidence.	• The previous standard included a discussion of the competence of evidential matter and how different types of audit evidence may provide more or less valid evidence. SAS No. 106 expands on this guidance.
• SAS No. 106 identifies "risk assessment procedures" as audit procedures performed on all audits to obtain an understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement at the financial statement and relevant assertion levels.	• SAS No. 106 introduces the concept of risk assessment procedures, which are necessary to provide a basis for assessing the risk of material misstatement. The results of risk assessment procedures, along with the results of further audit procedures, provide audit evidence that ultimately support the auditor's opinion on the financial statements.

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 106 provides that evidence obtained by performing risk assessment procedures, as well as that obtained by performing tests of controls and substantive procedures, is part of the evidence the auditor obtains to draw reasonable conclusions on which to base the audit opinion, although such evidence is not sufficient in and of itself to support the audit opinion.	
• SAS No. 106 describes the types of audit procedures that the auditor may use alone or in combination as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor.	• Risk assessment procedures include: — Inquiries of management and others within the entity — Analytical procedures — Observation and inspection
• SAS No. 106 includes guidance on the uses and limitations of inquiry as an audit procedure.	• Inquiry alone is not sufficient to evaluate the design of internal control and to determine whether it has been implemented.

SAS No. 107, Audit Risk and Materiality in Conducting an Audit

Key Provisions	*How the SAS Differs From Current Standards*
• The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of: 1. Determining the extent and nature of risk assessment procedures. 2. Identifying and assessing the risk of material misstatement. 3. Determining the nature, timing, and extent of further audit procedures. 4. Evaluating whether the financial statements taken as a whole are presented fairly, in conformity with generally accepted accounting principles.	• Previous guidance said that auditors "should consider" audit risk and materiality for certain specified purposes. SASs state that the auditor "must" consider. • New guidance explicitly states that audit risk and materiality are used to identify and assess the risk of material misstatement.
• Combined assessment of inherent and control *risks* is termed the *risk of material misstatement*.	• SAS No. 107 consistently uses the term *risks of material misstatement*, which often is described as a combined assessment of inherent and control risk. However, auditors may make separate assessment of inherent risk and control risks.

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
• The auditor should assess the risk of material misstatement as a basis for further audit procedures. Although that risk assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. • Assessed risks and the basis for those assessments should be documented.	• SAS No. 107 states that the auditor should have and document an appropriate basis for the audit approach. • These two provisions of the risk assessment standards effectively eliminate the ability of the auditor to assess control risk "at the maximum" without having a basis for that assessment. In other words, you can no longer "default" to maximum control risk.
• The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial, and communicate them to the appropriate level of management.	• SAS No. 107 provides additional guidance on communicating misstatements to management. • The concept of not accumulating misstatements below a certain threshold is included in the previous standards, but SAS No. 107 provides additional, specific guidance on how to determine this threshold.
• The auditor should request management to respond appropriately when misstatements (known or likely) are identified during the audit.	• SAS No. 107 provides specific guidance regarding the appropriate auditor's responses to the types of misstatements (known or likely) identified by the auditor.

SAS No. 108, Planning and Supervision

Key Provisions	*How the SAS Differs From Current Standards*
SAS No. 108 provides guidance on: • Appointment of the independent auditor. • Establishing an understanding with the client. • Preliminary engagement activities. • The overall audit strategy. • The audit plan. • Determining the extent of involvement of professionals possessing specialized skills. • Using a professional possessing information technology (IT) skills to understand the effect of IT on the audit. • Additional considerations in initial audit engagements. • Supervision of assistants.	• Much of the guidance provided in SAS No. 108 has been consolidated from several existing standards. • However, SAS No. 108 provides new guidance on preliminary engagement activities, including the development of an overall audit strategy and an audit plan. — The overall audit strategy is what previously was commonly referred to as the audit approach. It is a broad approach to how the audit will be conducted, considering factors such as the scope of the engagement, deadlines for performing the audit and issuing the report, and recent financial reporting developments. — The audit plan is more detailed than the audit strategy and is commonly referred to as the audit program. The audit plan describes in detail the nature, timing, and extent of risk assessment and further audit procedures you perform in an audit. • SAS No. 108 states that you should obtain a written understanding with your client.

SAS No. 109, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 109 describes audit procedures that the auditor should perform to obtain the understanding of the entity and its environment, including its internal control.	• The auditor should perform "risk assessment procedures" to gather information and gain an understanding of the entity and its environment. These procedures include inquiries, observation, inspection, and analytical procedures. Previous standards did not describe the procedures that should be performed to gain an understanding of the client. • Information about the entity may be provided by a variety of sources, including knowledge about the entity gathered in previous audits (provided certain conditions are met), and the results of client acceptance and continuance procedures. • SAS No. 109 also directs the auditor to perform a variety of risk assessment procedures, and it describes the limitations of inquiry.
• The audit team should discuss the susceptibility of the entity's financial statements to material misstatement.	• Previous standards did not require a "brainstorming" session to discuss the risk of material misstatements. SAS No. 109 requires such a brainstorming session, which is similar (and may be performed together with) the brainstorming session to discuss fraud.
• The purpose of obtaining an understanding of the entity and its environment, including its internal control, is to identify and assess "the risk of material misstatement" and design and perform further audit procedures responsive to the assessed risk.	• SAS No. 109 directly links the understanding of the entity and its internal control with the assessment of risk and design of further audit procedures. Thus, the understanding of the entity and its environment, including its internal control, provides the audit evidence necessary to support the auditor's assessment of risk.
• SAS No. 109 states the auditor should assess the risk of material misstatement at both the financial statement and relevant assertion levels.	• The previous standard included the concept of assessing risk at the financial statement level, but SAS No. 109 provides expanded and more explicit guidance. • SAS No. 109 also directs the auditor to determine how risks at the financial statement level may result in risks at the assertion level.
• SAS No. 109 provides directions on how to evaluate the design of the entity's controls and determine whether the controls are adequate and have been implemented.	• Under the previous standard, the primary purpose of gaining an understanding of internal control was to plan the audit. Under SAS No. 109, your understanding of internal control is used to assess risks. Thus, the understanding of internal control provides audit evidence that ultimately supports the auditors opinion on the financial statements.

(continued)

Key Provisions	*How the SAS Differs From Current Standards*
	• The previous standard directs the auditor to obtain an understanding of internal control as part of obtaining an understanding of the entity and its environment. SAS No. 109 requires auditors to evaluate the design of controls and determine whether they have been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. It is anticipated that this phase of the audit will require more work than simply gaining understanding of internal control.
• SAS No. 109 directs the auditor to consider whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence.	• Previous standard did not include the concept of "significant risks." • Significant risks exist on most engagements. • The auditor should gain an understanding of internal control and also perform substantive procedures for all identified significant risks. Substantive analytical procedures alone are not sufficient to test significant risks.
• SAS No. 109 provides extensive guidance on the matters that should be documented.	• The guidance provided by SAS No. 109 relating to documentation is significantly greater than that provided by previous standards.

SAS No. 110, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 110 provides guidance on determining overall responses to address the risk of material misstatement at the financial statement level and the nature of those responses.	• The concept of addressing the risk of material misstatement at the financial statement level and developing an appropriate overall response is similar to the requirement in previous standards relating to the consideration of audit risk at the financial statement level. However, that guidance was placed in the context of audit planning. SAS No. 110 "repositions" your consideration of risk at the financial statement level so you make this assessment as a result of and in conjunction with your performance of risk assessment procedures. In some cases, this assessment may not be able to be made during audit planning. • SAS No. 110 requires you to consider how your assessment of risks at the financial statement level affect individual financial statement

Key Provisions	*How the SAS Differs From Current Standards*
	assertions, so that you may design and perform tailored further audit procedures (substantive tests or tests of controls). • The list of possible overall responses to the risk of material misstatement at the financial statement level also has been expanded.
• Further audit procedures, which may include tests of controls, or substantive procedures should be responsive to the assessed risk of material misstatement at the relevant assertion level.	• Although the previous standards included the concept that audit procedures should be responsive to assessed risks, this idea was embedded in the discussion of the audit risk model. The SASs repeatedly emphasize the need to provide a clear linkage between your understanding of the entity, your risk assessments, and the design of further audit procedures. • SAS No. 110 requires you to document the linkage between assessed risks and further audit procedures, which was not a requirement under the previous standards.
• SAS No. 110 provides guidance on matters the auditor should consider in determining the nature, timing, and extent of such audit procedures.	• The new guidance on determining the nature, timing, and extent of tests of controls and substantive tests has been expanded greatly and addresses issues that previously were not included in the authoritative literature. • SAS No. 110 states that the nature of further audit procedures is of most importance in responding to your assessed risk of material misstatement. That is, increasing the extent of your audit procedures will not compensate for procedures that do not address the specifically identified risks of misstatement. • SAS No. 110 states that you should perform certain substantive procedures on all engagements. These procedures include: — Performing substantive tests for all relevant assertion related to each material class of transactions, account balance, and disclosure regardless of the assessment of the risk of material misstatements. — Agreeing the financial statements, including their accompanying notes, to the underlying accounting records. — Examining material journal entries and other adjustments made during the course of preparing the financial statements.

SAS No. 111, Amendment to Statement on Auditing Standards No. 39, Audit Sampling

Key Provisions	*How the SAS Differs From Current Standards*
• SAS No. 111 provides guidance relating to the auditor's judgment about establishing tolerable misstatement for a specific audit procedure and on the application of sampling to tests of controls.	• SAS No. 111 provides enhanced guidance on tolerable misstatement. In general, tolerable misstatement in an account should be less than materiality to allow for aggregation in final assessment. • SAS No. 111 revises AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1) to state that sample sizes determined using either statistical or nonstatistical methods would ordinarily be comparable in size.

.41 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations (COSO) of the Treadway Commission's framework at www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.42 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation

.43 In December 2005, the ASB issued SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339). This SAS establishes standards and provides guidance to auditors of nonissuers on audit documentation; it supersedes SAS No. 96 of the same name. Audit documentation is an essential element of audit quality and although audit documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate audit documentation contributes to the quality of an audit.

.44 In developing this SAS, the ASB considered the documentation requirements of PCAOB Auditing Standard No. 3, *Audit Documentation* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"); the International Auditing and Assurance Standards Boards (IAASB) ISA No. 230 (Revised), *Audit Documentation*, issued in September 2005; *Government Auditing Standards* issued by the Comptroller General of the United States; and suggestions from the National Association of State Boards of Accountancy. Accordingly, the requirements of the SAS are similar, in most respects, to the requirements of PCAOB Auditing Standard No. 3 and ISA No. 230 (Revised).

.45 Among other things, this SAS:

- Requires the auditor to prepare audit documentation for each engagement in sufficient detail to provide an experienced auditor, having no previous connection to the audit, with a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.

- Provides enhanced guidance on matters that should be documented. For example, in addition to the former requirements of SAS No. 96 that the auditor document audit findings or issues that in his or her judgment are significant, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached, SAS No. 103 requires the auditor to document discussions of significant findings or issues with management and others, on a timely basis, including when and with whom the discussions took place.

- States that oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached, but may be used by the auditor to clarify or explain information contained in the audit documentation.

- Requires the auditor to document audit evidence that is identified as being contradictory or inconsistent with the final conclusions, and how the auditor addressed the contradiction or inconsistency.

- Requires the auditor to assemble the audit documentation to form the final audit engagement file within 60 days following the report release date. After that date, the statement requires the auditor not to delete or discard existing audit documentation and to appropriately document any subsequent additions.

- Specifies a minimum file retention period of five years from the report release date. (The terms of the engagement or state law or regulation may specify a longer retention period.)

.46 SAS No. 103 also amends paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). See the section of this alert titled "Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*" for further discussion of this aspect of SAS No. 103. Also, see the following section of this alert titled "Audit Documentation Technical Practice Aids," which refers to two AICPA Technical Practice Aids (TPA). These TPAs address issues related to audit documentation. This SAS is effective for audits of financial statements for periods ending on or after December 15, 2006.

Audit Documentation Technical Practice Aids

.47 In May 2007, the ASB issued two TPA Technical Questions and Answers (TIS) related to SAS No. 103.

.48 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.49 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current years audit report.

Practice Alert No. 07-1, *Dating of the Auditors Report and Related Practical Guidance*

.50 As mentioned previously in this alert, a key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530 to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms, an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.51 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.52 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information that it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.53 On May 24, 2007, the PCAOB adopted Auditing Standard No. 5 that supersedes Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, and an independence rule relating to the auditor's provision of internal-control-related, nonaudit services. It also adopted certain amendments to its interim standards. The SEC approved the standard on July 25, 2007.

.54 The PCAOB has closely monitored the implementation of Auditing Standard No. 2, and came to two conclusions:

1. The audit of internal control over financial reporting has produced significant benefits related to corporate processes and controls.

2. These benefits have come at a significant, higher than anticipated cost, and, at times, the effort has appeared greater than necessary to conduct an effective audit of internal control over financial reporting.

.55 The PCAOB adopted the new Auditing Standard No. 5 to replace Auditing Standard No. 2 with the primary objective of focusing the auditor on matters most important to internal control. Goals of this new standard are to eliminate unnecessary procedures, to simplify and shorten the standard by reducing detail and specificity, and to make the audit more scalable for smaller and less complex companies. Some examples of important differences between Auditing Standard No. 5 and Auditing Standard No. 2 follow:

- The new standard is less prescriptive, with fewer mandatory requirements and more reliance on auditor judgment.
- The new standard makes the audit scalable, so it can change to fit the size and complexity of any company.
- The new standard directs the auditor to focus on what matters most and eliminates unnecessary procedures from the audit.
- The new standard includes a principles-based approach to determining when and to what extent the auditor can use the work of others.

.56 The new standard will do the following, among other things:

- Direct the auditor to the most important controls and emphasize the importance of risk assessment using a top-down approach
- Emphasize fraud controls, with an emphasis on assessing fraud risk in the planning process and additional guidance on the types of controls that may address fraud risk
- Identify management fraud as an area of higher risk, directing the auditor to focus more attention in this area
- Recalibrate the walkthrough requirement
- Permit consideration of knowledge obtained during prior audits
- Revise the definitions of significant deficiency and material weakness, as well as the "strong indicators" of a material weakness
- Adopt communication requirements, which require, among other things, that the auditor consider and communicate any identified significant deficiencies to the audit committee
- Direct the auditor to tailor the audit to reflect attributes of smaller and less complex companies
- Remove the requirement to evaluate management's process, which the PCAOB believes could contribute to a checklist approach to compliance by the auditors
- Provide auditors with further guidance regarding scoping decisions for multiple location audits

.57 Auditing Standard No. 5 is effective for audits of internal control over financial reporting required by Section 404(b) of the Sarbanes-Oxley Act of 2002 for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted at any point after SEC approval. Auditors who elect to comply with Auditing Standard No. 5 after July 25, 2007, but before its effective date, must also comply, at the same time, with newly adopted PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* (AICPA, *PCAOB Standards and Related Rules*), and other PCAOB standards as amended by Auditing Standard No. 5. Auditors who elect to comply with Auditing Standard No. 5 before its effective date should use the definition of *material weakness* contained in Auditing Standard No. 5. See www.pcaob.org/Standards/Standards_and_Related_Rules/Auditing_Standard_No.5.aspx for the full release document.

.58 Upon approval of the new standard by the SEC on July 25, 2007, the PCAOB announced that it is undertaking several initiatives to support the successful implementation of the standard. These initiatives include working closely with the audit firms, early in their process, as they evaluate how the new standard will affect their firms' audits of internal control. Other initiatives include continued outreach to public companies and smaller audit firms regarding the new standard. See full text of the press release at www.pcaob.org/News_and_Events/News/2007/07-25.aspx.

Considering and Using the Work of Others

.59 At the time the PCAOB proposed Auditing Standard No. 5 for public comment, the PCAOB also proposed an auditing standard titled *Considering and Using the Work of Others*, which would have superseded AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*). However, after considering all comments, the PCAOB decided to retain AU section 322 for both the financial statement audits and audits of internal control over financial reporting and incorporate language into Auditing Standard No. 5 that establishes integration concepts rather than adopting the proposed standard. Some of the key concepts in Auditing Standard No. 5 as they relate to using the work of others are as follows:

- Allows the auditor to use the work of others to obtain evidence about the design and operating effectiveness of controls for both the internal control audit and the financial statement audit, eliminating a barrier to integration of the two audits
- Eliminates the principal evidence provision
- Allows the auditor to use the work of company personnel, other than internal auditors, as well as third parties working under the direction of management or the audit committee
- Requires the auditor to use a risk-based approach to the extent that the auditor can use the work of others

.60 For additional information, see paragraphs 16–19 of Auditing Standard No. 5 at www.pcaob.org/Rules/Rules_of_the_Board/Auditing_Standard_5.pdf.

PCAOB Rule 3525, Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

.61 The PCAOB also adopted a new rule related to the auditor's responsibilities when seeking audit committee preapproval of internal control-related nonaudit services. The rule is intended to ensure that audit committees are provided relevant information for them to make an informed decision on how the performance of internal control-related services may affect independence. Specifically, the public accounting firm shall describe, in writing, the scope of the service and submit to the audit committee, as well as discuss with the audit committee, the potential effects of the service on the firms independence. Registered firms are also required to document the substance of such discussions in writing. This rule is effective for audits of fiscal years ending on or after November 15, 2007 (the same effective date as Auditing Standard No. 5). The full text of this rule can be found at www.pcaob.org/Rules/Rules_of_the_Board/Rule_3525.pdf.

Conforming Amendments to Interim Auditing Standards

.62 In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments due to the issuance of Auditing Standard No. 5 can be found at www.pcaob.org/Rules/Rules_of_the_Board/Conforming_Amendments_AS5.pdf.

Audit Considerations for Alternative Investments

.63 Over the past several years, certain not-for-profit organizations, healthcare entities, pension plans and investment companies—including hedge funds and funds of funds—have dramatically increased their investment in financial instruments that do not have a readily determinable market value. These investments are commonly referred to as alternative investments and, in many cases, have greater risk and volatility than other investments. For example, the value of investments related to subprime loans have reportedly declined significantly based on recent developments (discussed previously in this alert), including, but not limited to, decreased liquidity for such investments. Investments related to subprime loans may be in the form of direct holdings of subprime loans or ownership of entities or investment vehicles whose value is affected by the value of subprime loans, such as investments commonly referred to as tranches. In certain circumstances, the existence of investments related to subprime loans may not be obvious and may be identified only upon performing audit procedures designed to identify such investments.

.64 Generally, entities report alternative investments at fair value and developing valuations, as well as obtaining sufficient appropriate audit evidence in support of the valuation assertion, can present challenges because of the lack of readily determinable fair value and the limited investment information generally provided by the fund managers. For example, the value of investments related to subprime loans (which may be either direct holdings of subprime loans or ownership of entities or investment vehicles, such as tranches, whose value is affected by the value of subprime loans) have declined significantly based on recent developments, including, but not limited to decreased liquidity for such investments. However, the existence of investments related to subprime loans within an alternative investment portfolio and the basis for their valuation may not be obvious.

.65 To address the auditing challenges associated with alternative investments, the Alternative Investments Task Force developed and issued a practice aid for auditors in 2006, titled "Alternative Investments—Audit Considerations." The practice aid clarifies the responsibility of the client to have appropriate controls in place in order for management to adequately address valuation assertions and for the auditor to obtain comfort over the valuation of investments. Specifically, the practice aid includes guidance on:

- General considerations pertaining to auditing alternative investments
- Addressing management's financial statement existence assertion
- Addressing management's financial statement valuation assertion
- Management representations
- Disclosure of certain significant risks and uncertainties
- Reporting

.66 The practice aid also includes appendices on confirmations for alternative investments and illustrative examples of due diligence, ongoing monitoring, and financial reporting controls. Many of the elements of the practice aid may assist auditors in addressing the audit issues related to recent subprime-related market developments. This practice aid may be downloaded at www.aicpa.org/members/div/auditstd/alternative_investments.htm.

.67 In addition, auditors should consider AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), to determine the appropriate period in which to recognize any identified declines in value. Given the timing of some of the declines in investments related to subprime loans, this may be particularly relevant for entities with June 30 year ends and may be a continuing consideration going forward.

Accounting Issues and Developments

.68 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

TIS sections 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.69 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

Fair Value Measurements

FASB Statement No. 157

.70 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.71 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Differences in the existing guidance created inconsistencies that added to the complexity in applying generally accepted accounting principles (GAAP). FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

.72 The following paragraphs summarize FASB Statement No. 157, but are not intended as a substitute for the reading the statement itself. FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years.[2] Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year.

Definition of Fair Value

.73 Paragraph 5 of FASB Statement No. 157 defines fair value as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date." That definition retains the exchange price notion in earlier definitions of fair value, but clarifies that the exchange price is the price in a hypothetical transaction at the measurement date in the market in which the reporting entity would transact for the asset or liability. The hypothetical transaction to sell the asset or transfer the liability is considered from the perspective of a market participant that holds the asset or owes the liability. Therefore, the definition of fair value focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price).

.74 A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market—defined as the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity for the asset or liability—or, in the absence of a principal market, the most advantageous market for the asset or liability.

.75 A fair value measurement of an asset assumes the highest and best use of the asset by market participants, considering the use of the asset that is physically possible, legally permissible, and financially feasible at the measurement date. Highest and best use for an asset is established by one of two valuation premises: value in-use or value in-exchange. The highest and best use of the asset is in-use if the asset would provide maximum value to market participants principally through its use in combination with other assets as a group (as installed or otherwise configured for use). For example, value in-use might be appropriate for certain nonfinancial assets. An asset's value in-use should be based on the price that would be received in a current transaction to sell the asset assuming that the asset would be used with other assets as a group and

[2] FASB is considering a deferral of certain provisions of Statement No. 157. At the time of this writing no decision had been reached. See www.fasb.org for the latest developments.

that those other assets would be available to market participants. The highest and best use of the asset is in-exchange if the asset would provide maximum value to market participants principally on a standalone basis. For example, value in-exchange might be appropriate for a financial asset. An asset's value in-exchange is determined based on the price that would be received in a current transaction to sell the asset standalone.

.76 A fair value measurement for a liability reflects its nonperformance risk (the risk that the obligation will not be fulfilled). Because nonperformance risk includes the reporting entity's credit risk, the reporting entity should consider the effect of its credit risk (credit standing) on the fair value of the liability in all periods in which the liability is measured at fair value.

Valuation Techniques

.77 As described in FASB Statement No. 157, valuation techniques consistent with the market approach, income approach, cost approach or some combination of the approaches should be used to measure fair value, as follows:

- The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach include matrix pricing and often use market multiples derived from a set of comparables.
- The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Valuation techniques consistent with the income approach include present value techniques, option-pricing models, and the multi-period excess earnings method.
- The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (often referred to as current replacement cost). Fair value is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility, adjusted for obsolescence.

.78 Valuation techniques that are appropriate in the circumstances and for which sufficient data are available should be used to measure fair value. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate and the respective indications of fair value should be evaluated and weighted, as appropriate.

Present Value Techniques

.79 Appendix B of FASB Statement No. 157 provides guidance on present value techniques. Present value techniques differ in how they adjust for risk and in the type of cash flows they use. For example, the discount rate adjustment technique (also called the traditional present value technique) uses a risk-adjusted discount rate and contractual, promised, or most likely cash flows. In contrast, expected present value techniques use the probability-weighted average of all possible cash flows (referred to as expected cash flows). The traditional present value technique and two methods of expected present value techniques are discussed more fully in the Appendix B of FASB Statement No. 157.

The Fair Value Hierarchy

.80 FASB Statement No. 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability (referred to in the statement as inputs).

Paragraphs 21–31 establish a fair value hierarchy that distinguishes between (1) market participant assumptions developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) the reporting entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). Valuation techniques used to measure fair value should maximize the use of observable inputs and minimize the use of unobservable inputs.

.81 The fair value hierarchy in FASB Statement No. 157 prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The three levels are:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available, except as discussed in paragraphs 25–26 of FASB Statement No. 157.
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Adjustments to Level 2 inputs will vary depending on factors specific to the asset or liability. An adjustment that is significant to the fair value measurement in its entirety might render the measurement a Level 3 measurement, depending on the level in the fair value hierarchy within which the inputs used to determine the adjustment fall. Level 2 inputs include:
  - — Quoted prices for similar assets or liabilities in active markets
  - — Quoted prices for identical or similar assets or liabilities in markets that are not active
  - — Inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates)
  - — Inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs)
- Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs should be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. In developing unobservable inputs, the reporting entity need not undertake all possible efforts to obtain information about market participant assumptions. Unobservable inputs should reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

Disclosures

.82 Paragraphs 32–35 of FASB Statement No. 157 expand the disclosures required for assets and liabilities measured at fair value. For assets and liabilities that are measured at fair value on a recurring basis in periods subsequent to initial recognition or that are measured on a nonrecurring basis in periods subsequent to initial recognition, the statement requires the reporting entity to disclose certain information that enables users of its financial statements to assess the inputs used to develop those measurements. For recurring fair value measurements using significant unobservable inputs (Level 3), the reporting entity is required to disclose certain information to help users assess the effect of the measurements on earnings (or changes in net assets) for the period.

FASB Statement No. 159

.83 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No.*

115. This statement is expected to expand the use of fair value measurement, which is consistent with the FASBs long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.84 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (by April 2007 for calendar-year-end entities), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically, the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans

.85 FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*, improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity or changes in unrestricted net assets of a not-for-profit organization. This statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.86 This statement requires an employer that is a business entity and sponsors one or more single-employer defined benefit plans to:

- Recognize the funded status of a benefit plan—measured as the difference between plan assets at fair value (with limited exceptions) and the benefit obligation—in its statement of financial position. For a pension plan, the benefit obligation is the projected benefit obligation; for any other postretirement benefit plan, such as a retiree health care plan, the benefit obligation is the accumulated postretirement benefit obligation.

- Recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost pursuant to FASB Statements No. 87, *Employers' Accounting for Pensions*, or No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*. Amounts recognized in accumulated other comprehensive income, including the gains or losses, prior service costs or credits, and the transition asset or obligation remaining from the initial application of FASB Statement Nos. 87 and 106, are adjusted as they are subsequently recognized as components of net periodic benefit cost, pursuant to the recognition and amortization provisions of those statements.

- Measure defined benefit plan assets and obligations as of the date of the employer's fiscal year-end statement of financial position (with limited exceptions).
- Disclose in the notes to financial statements additional information about certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service costs or credits, and transition asset or obligation.

.87 This statement also applies to a not-for-profit organization or other entity that does not report other comprehensive income. Reporting requirements have been tailored for those entities.

.88 This statement amends FASB Statement No. 87; No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*; No. 106; No. 132 (revised 2003), *Employers Disclosures about Pensions and Other Postretirement Benefits—an amendment of FASB Statements No. 87, 88, and 106*; and other related accounting literature. Upon initial application of this statement and subsequently, an employer should continue to apply the provisions in FASB Statement Nos. 87, 88, and 106 in measuring plan assets and benefit obligations as of the date of its statement of financial position and in determining the amount of net periodic benefit cost.

.89 The FASB believes that this statement provides financial statements that are more complete and easier to understand because information previously reported in the notes will be recognized in an employer's financial statements. Reporting the current funded status of a postretirement benefit plan as an asset or liability in an employer's statement of financial position allows users of those financial statements to assess an employer's financial position and its ability to satisfy the benefit obligations without referring to a reconciliation in the notes to financial statements. Likewise, recognizing transactions and events that affect the funded status in the financial statements in the year in which they occur enhances the timeliness and, therefore, the usefulness of the financial information.

.90 The required date of adoption of the recognition and disclosure provisions of this statement differs for an employer that is an issuer of publicly traded equity securities (as defined) and an employer that is not. For purposes of this statement, an employer is deemed to have publicly traded equity securities if any of the following conditions is met:

a. The employer has issued equity securities that trade in a public market, which may be either a stock exchange (domestic or foreign) or an over-the-counter market, including securities quoted only locally or regionally.

b. The employer has made a filing with a regulatory agency in preparation for the sale of any class of equity securities in a public market.

c. The employer is controlled by an entity covered by (*a*) or (*b*).

.91 An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006.

.92 An employer without publicly traded equity securities is required to recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after June 15, 2007.

.93 However, an employer without publicly traded equity securities is required to disclose the following information in the notes to financial statements for a fiscal year ending after December 15, 2006, but before June 16, 2007, unless it has applied the recognition provisions of this statement in preparing those financial statements:

a. A brief description of the provisions of this statement

b. The date that adoption is required

c. The date the employer plans to adopt the recognition provisions of this statement, if earlier.

.94 The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. If in the last quarter of the preceding fiscal year an employer enters into a transaction that results in a settlement or experiences an event that causes a curtailment of the plan, the related gain or loss pursuant to FASB Statement Nos. 88 or 106 is required to be recognized in earnings or changes in unrestricted net assets of that quarter.

.95 Earlier application of the recognition or measurement date provisions is encouraged; however, early application must be for all of an employer's benefit plans. Retrospective application of this statement is not permitted.

Income Tax Accruals and Deferred Income Taxes

FASB Interpretation No. 48

.96 FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109,* was issued in June 2006 and is effective for fiscal years beginning after December 15, 2006.[3] FIN 48 states that financial statement tax accrual may only contain positions that meet the *more-likely-than-not* standard and any variances must be disclosed in the financial statements. This translates to more work for accountants and auditors on the tax accrual, as you evaluate even garden-variety issues, such as unreasonable compensation or expensing versus capitalization. It also means that positions taken on the return (or that were taken in any open year) that do not meet the more-likely-than-not standard will be disclosed and will likely be subject to increased IRS scrutiny.

.97 The evaluation of a tax position in accordance with this interpretation is a two-step process. The first step is recognition: The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement: A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.98 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109, *Accounting for Income Taxes*, is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this interpretation.

---

[3] FASB is currently considering a one-year deferral of the effective date of this interpretation for nonissuers who have not already implemented FIN 48. See www.fasb.org for more information.

.99 For calendar-year corporations, the new rules would seem to initially take effect with first quarter 2007 results. However, the new rules require calendar-year corporations to have a "clean" starting point for their tax accounts at January 1, 2007. In other words, the deferred tax asset and deferred tax liability accounts on that date must be determined in accordance with the standards of FIN 48.

.100 A practice guide for accountants, auditors, and tax advisers has been posted to the AICPA's Tax Center at www.aicpa.org/tax under the Resources tab. An AICPA CPE course on accounting for income taxes that has been updated for FIN 48 is now available and an AICPA webcast also is being presented. Go to www.cpa2biz.com for more information on these products.

Additional Implementation Guidance for FIN 48

FASB Staff Position FIN 48-1

.101 In May 2007, the FASB issued FASB Staff Position (FSP) FSP FIN 48-1, *Definition of Settlement in FASB Interpretation No. 48*. The purpose of this FSP is to amend FIN 48 to clarify that a tax position could be effectively settled upon examination by a taxing authority. Assessing whether a tax position is effectively settled is a matter of judgment because examinations occur in a variety of ways. In determining whether a tax position is effectively settled, an enterprise should make the assessment on a position-by-position basis, but an enterprise could conclude that all positions in a particular tax year are effectively settled. The FSP describes conditions for evaluating effective settlement of a tax position, provides guidance for determining effective settlement with respect to examination of tax positions by taxing authorities, and provides a number of conforming changes to FIN 48 with respect to the new settlement terminology discussed in the FSP. The full text of the FSP can be found at www.fasb.org/fasb_staff_positions/fsp_fin48-1.pdf.

Independence and FIN 48

.102 In August 2007, the staff of the Professional Ethics Division issued nonauthoritative guidance (a frequently-asked-question, or FAQ) on the question of whether under Ethics Interpretation 101-3, "Performance of nonattest services," under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05), members could assist an attest client in applying FIN 48 while maintaining independence. The staff of the Professional Ethics Division issued an FAQ that addresses whether independence is affected when a member helps an attest client apply FIN 48. The FAQ indicates that such services could be provided if the member met all of the requirements of Interpretation 101-3 and is satisfied that the client will be able to make informed judgments on the results of FIN 48 services (for example, understand why tax positions do or do not meet the more-likely-than-not threshold and the basis for any unrecognized tax benefit). In this way, the client may take responsibility for the amounts reported in the financial statements as a result of FIN 48.

.103 The FAQ was incorporated as question 23 into an existing FAQ document that is available on the Professional Ethics Divisions Web site at www.aicpa.org/download/ethics/nonattest_q_a.pdf.

SEC Regulations Committee Issues Revised Discussion Document on FIN 48

.104 On November 21, 2006, the SEC Regulations Committee issued a discussion document addressing specific questions regarding the implementation by public companies of FIN 48. Subsequently, the SEC staff has requested that the committee revise the discussion document to clarify the SEC staff's position regarding the financial statement presentation and disclosure when a registrant changes its accounting principle regarding the income statement classification of interest and penalties on uncertain income tax positions. Therefore, the committee amended the discussion document on February 6, 2007 to clarify the SEC staff's position, and is issuing a revised document that supersedes the previous *Appendix A—Disclosures under FASB Interpretation No. 48 in Form 10-Q in the Period of Adoption*, from the September 26, 2006 joint meeting between the SEC staff and the committee. The revised discussion document can be accessed at www.aicpa.org/caq/download/AppendixA_FIN48_092606_revised.pdf.

Recent AICPA Independence and Ethics Pronouncements

.105 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

On the Horizon

.106 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to auditors and accountants or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.107 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+ Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.108 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of GAAS. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.109 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.110 The ASB has created a number of task forces charged with monitoring specific activities of the IAASB and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of the ISA. Currently, the following ASB task forces exist:

- The Auditing Accounting Estimates Task Force is revising AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), with the objective of converging that section with the proposed, revised, and redrafted ISA No. 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.
- The Auditing Related Party Transactions Task Force plans to revise AU section 334, *Related Parties* (AICPA, *Professional Standards*, vol. 1), to achieve convergence with the related ISA, which the IAASB is developing.
- The Auditors' Reports Task Force is revising AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1). Simultaneously, the Auditor's Report Research Task Force is charged with performing research on the how the audit report might be revised to better address the existing expectation gap.
- The Going Concern Task Force is considering revisions to AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), based on proposed redrafted ISA No. 570, *Going Concern*. ISA No. 570 is predicated on International Accounting Standard (IAS) No. 1, *Presentation of Financial Statements*, which requires management to assess the entity's ability to continue as a going concern. While there is currently not a similar accounting requirement in U.S. GAAP, the FASB announced in May 2007 that it is adding a project to its agenda to address managements assessment of the entity's ability to continue as a going concern and the adoption of a liquidation basis of accounting.
- The Management Representations Task Force is considering revisions to AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1), to achieve harmonization with a proposed revision of ISA No. 580, *Written Representations*.

- The Service Organizations Task Force will develop a new attestation standard that provides guidance to service auditors performing service auditors' engagements. Currently AU section 324, *Service Organizations* (AICPA, *Professional Standards*, vol. 1), provides guidance to both user auditors using service auditors' reports in an audit of financial statements and service auditors performing service auditors' engagements. When the new attestation standard is issued, AU section 324 will only contain guidance for user auditors. The task force will work to converge AU section 324 and the new attestation standard with ISA No. 402, *Audit Considerations Relating to an Entity Using a Service Organization*, and International Standard on Assurance Engagements (ISAE) No. 3402, *Assurance Reports on a Service Organization's Controls*, which the IAASB is currently developing.

- The Using the Work of a Specialist Task Force is revising AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), and replacing it with two new standards focusing on situations in which an auditor engages an outside (nonfirm) specialist to obtain the specialized skills or knowledge needed in the audit and situations in which an auditor uses as audit evidence the work product of a nonemployee specialist hired by management. The task force is monitoring the IAASB's progress to revise ISA No. 620, *Using the Work of an Expert*.

.111 The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.112 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting* (AICPA, *Professional Standards*, vol. 1), the ASB decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.113 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411], as amended) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS concurrently with the FASB and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

PCAOB Proposed Rules and Standards

Proposed Ethics and Independence Rule 3526, Communication with Audit Committees Concerning Independence *and Proposed Amendment to Rule 3523,* Tax Services for Persons in Financial Reporting Oversight Roles

.114 On July 24, 2007, the PCAOB proposed an ethics and independence rule, Rule 3526, *Communication with Audit Committees Concerning Independence*, that would supersede the PCAOB's interim independence requirement, Independence Standards Board (ISB) Standard No. 1, *Independence Discussions with Audit Committees*, and two related interpretations (ISB Interpretation No. 00-1, *Independence Discussions with Audit Committees* and No. 00-2, *The Applicability of ISB Standard No. 1: When "Secondary Auditors" Are Involved in the Audit of a Registrant—An Amendment of Interpretation 00-1*). As part of the proposal, the PCAOB also proposed an amendment to Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles* (AICPA, *PCAOB Standards and Related Rules*), and further adjusted the implementation schedule for PCAOB Rule 3523.

Proposed Auditing Standard Evaluating Consistency of Financial Statements and Proposed Amendments to Interim Auditing Standards

.115 On April 3, 2007, the PCAOB proposed changes to its auditing standards in light of the issuance of FASB Statement No. 154, *Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3*, and the proposed FASB Statement, *The Hierarchy of Generally Accepted Accounting Principles*. This proposal, if adopted and approved by the SEC, would do the following:

- Supersede AU section 420, *Consistency of Application of Generally Accepted Accounting Principles* (AICPA, *PCAOB Standards and Related Rules*), with a new auditing standard
- Remove the GAAP hierarchy from the PCAOB's interim audit standards
- Make conforming amendments to the PCAOB's interim auditing standards

.116 For the full text of the proposal, see www.pcaob.org/Rules/Docket_023/2007-04-03_Release_No._2007-003.pdf.

.117 For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Internal Control Pipeline

.118 COSO has released a discussion document titled, *Guidance on Monitoring Internal Control Systems.* Comments received will be used in developing an exposure draft, which is expected to be issued by the end of 2007 with final guidance scheduled to be released early in 2008.

.119 The purpose of this guidance, which is appropriate for entities of any size or structure, is to enhance the application and assessment of the monitoring component of COSO's *Internal Control—Integrated Framework*. While applicable to all organizations, this guidance would be especially useful to those with reporting requirements under U.S. Sarbanes-Oxley Act of 2002, Section 404. The discussion document as well as the current status of this project can be found at www.coso.org.

Accounting Pipeline

.120 Presented below are accounting projects and pronouncements currently in progress. Some of the proposed pronouncements discussed in the prior year's alert have not been finalized as of the date of this writing, and are included again.

Business Combinations

.121 Phase 1 of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of Phase 2 of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses should be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business should be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.122 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed IAS Statement No. 27(R)

Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.123 During Phase 1 of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In Phase 2 of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on Phase 2 are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.124 In December 2006, the FASB issued an exposure draft titled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133, including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entitys financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.125 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued an exposure draft, titled *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.126 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.127 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, Emerging Issues Task Force (EITF), and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

Convergence With International Financial Reporting Standards

.128 Since their joint meeting in September 2002, the FASB and IASB have had a common goal—one set of accounting standards for international use. At that time, The Norwalk Agreement, a memorandum of understanding between the two rule-setting bodies, was signed. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. At that meeting, the FASB and the IASB pledged to use their best efforts to make their existing financial reporting standards fully compatible as soon as is practicable and to coordinate their future work programs to ensure that once achieved, compatibility is maintained. At their meetings in April and October 2005, the FASB and IASB reaffirmed their commitment to the convergence of U.S. GAAP and IFRS. A common set of high quality global standards remains the long-term strategic priority of both the FASB and the IASB.

.129 There has been progress towards this goal. FASB Standard Nos. 157 and 159 take U.S. GAAP in the direction of IFRS with respect to reporting at fair value. Also, in June 2007, the SEC announced that it was issuing for public comment a proposed rule that would eliminate the requirement to provide a reconciliation of IFRS-based financial statements to U.S. GAAP-based financial statements for foreign private issuers that file reports with the SEC.

.130 The goal of the FASB and the IASB is to reach a conclusion by 2008 about whether major differences in the a few focused areas should be eliminated through one or more short-term standard-setting projects and, if so, complete or substantially complete work in those areas. Those areas include impairment, income taxes, investment properties, government grants, research and development, joint ventures, subsequent events, and segment reporting. For more information on the status of this project go to www.fasb.org and www.iasb.org.

Private Company Financial Reporting

.131 The FASB and the AICPA are committed to exploring ways to enhance the value, transparency, and cost effectiveness of financial reporting for private companies. As a result, these two organizations have created a new committee, the Private Company Financial Reporting (PCFR) committee, whose primary objective will be to provide recommendations to the FASB as the FASB sets accounting standards for privately held enterprises.

.132 The PCFR has issued a proposal that recommends making certain improvements to the FASB's current processes for determining whether differences are needed in prospective and existing accounting standards for private company financial reporting and sponsoring a committee designed to increase private company constituent input in the standard-setting process. In assessing the need for differences for private companies in recognition, measurement, disclosure, and presentation, the FASB will consider the needs of users of financial statements as well as cost-benefit considerations. The full text of this proposal and additional information on this project is available at www.pcfr.org.

GAAP Hierarchy

.133 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, that is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.134 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.135 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/project/potential_fspd&other.shtml for complete information.

Resource Central

.136 The following are various resources that practitioners may find beneficial.

Publications

.137 Practitioners may find the following publications useful with respect to recent accounting and auditing developments:

- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- Audit Risk Alert *Compilation and Review Alert—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics Alert—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist and Illustrative Financial Statements for Corporations* (product no. 008938kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.138 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firms needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.139 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.140 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.141 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPAs flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.142 To register or learn more, visit www.cpa2biz.com.

Webcasts

.143 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the professions leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.144 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFOs personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.145 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the professions leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.146 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.147 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (877) 242-7212.

Ethics Hotline

.148 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

AICPA Governmental Audit Quality Center

.149 The Governmental Audit Quality Center (GAQC) is a firm-based voluntary membership Center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC's primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm's governmental audits.

.150 The mission of the GAQC is to do the following:

- Raise awareness about the importance of governmental audits.
- Serve as a comprehensive resource provider on governmental audits for member firms.
- Create a community of firms that demonstrates a commitment to governmental audit quality.
- Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues.
- List member firms to enable purchasers of governmental audit services to identify firms that are members.
- Provide information about the center's activities to other governmental audit stakeholders.

.151 For more information about the GAQC, visit http://gaqc.aicpa.org.

AICPA Center for Audit Quality

.152 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.153 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQis a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Employee Benefit Plan Audit Quality Center

.154 The Center is a voluntary membership organization for firms that perform or are interested in performing Employee Retirement Income Security Act (ERISA) employee benefit plan audits. The Center was established to promote the quality of employee benefit plan audits.

.155 To achieve this goal, the Center has created a community of firms that demonstrate a commitment to employee benefit audit quality, and supports those firms by:

- Providing members with timely communication of regulatory developments, best practices guidance, and technical updates
- Providing members with an online community forum for sharing best practices as well as discussions on audit, accounting, and regulatory issues
- Maintaining relationships with, and acting as a liaison to, the DOL on behalf of member firms
- Providing Center members with a marketing toolkit to facilitate promotion of their membership in the Center
- Providing information about the Centers activities to other employee benefit plan stakeholders

.156 The increasing complexity of employee benefit plan auditing and increased scrutiny by the DOL have resulted in a significant number of changes and issues for auditing firms and CPAs in general. Firms and CPAs will benefit from the assistance of the Center as a resource for improving employee benefit plan audit quality.

.157 For more information about the Employee Benefit Plan Audit Quality Center, visit ebpaqc.aicpa.org.

Compilation and Review Alert—2007/08

CURRENT ACCOUNTING
REPORTING AND PRACTICE ISSUES

NOTICE TO READERS
COMPILATION AND REVIEW ALERT—2007/08

This *Compilation and Review Alert* is intended to provide accountants with an update on recent practice issues and professional standards that affect compilation and review engagements.

This publication is an *other compilation and review publication* as defined in AR section 50, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2). Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply the Statements on Standards for Accounting and Review Services.

If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. The guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the AICPA.

Written by Kristy L. Illuzzi, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The Accounting and Auditing Publications Team would like to thank the members of the Accounting and Review Services Committee for their invaluable review of this year's publication. In addition, we would like to thank the following individuals for their contributions to this year's publication:

Michael Glynn, Technical Manager, AICPA Audit and Attest Standards

Sue Lieberum, Senior Technical Manager, AICPA Peer Review Program

How This Alert Helps You

.01 This *Compilation and Review Alert* (alert) is a crucial tool, designed to help you as you plan and perform your compilation and review engagements. This alert discusses recent Standards for Accounting and Review Services (SSARS) developments, addresses emerging practice issues, points out pitfalls that frequently occur in compilation and review engagements, and provides valuable current accounting developments.

.02 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, SSARS No. 1, *Compilation and Review of Financial Statements*, would be referred to as AR section 100 of the AICPA *Professional Standards*.

Economic Developments

The State of the Economy

.03 When compiling or reviewing financial statements, you should possess a level of knowledge of the accounting principles and practices of the industry in which the entity operates that will enable you to compile or review the financial statements for an entity operating in that industry. Furthermore, to compile or review financial statements, you should possess a general understanding of the nature of the entity's business transactions. As part of this knowledge and understanding, you may obtain an understanding of the economic conditions facing the industry in which your client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on your client.

.04 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.05 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.06 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then, at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 basis points to 5.25 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. Accountants should remain alert to developments in the financial markets and how they may affect your compilation and review engagements.

Small Business Trends and Conditions

.07 Private companies, and more specifically, small businesses, are a main driver for the United States economy. According to the National Federation of Independent Businesses, small business produces roughly half of the private gross domestic product and between 60 percent and 80 percent of net new jobs. The United States has almost 6 million small business employers, 90 percent of which employ fewer than 20 people. Small firms represent 99.7 percent of all employers, and small firms with fewer than 500 employees represent 99.9 percent of the 26.8 million businesses in the country, both large and small.

.08 In August 2007, Discover Business Card released the results of the *Discover Small Business Watch*, a monthly index of economic confidence of the nation's 22 million small businesses with five or fewer employees. The *Discover Small Business Watch* (Watch) is based upon a nationally random survey of 1,000 small business owners and 4,000 potential users of small business products and services. The survey data is compiled by Rasmussen Reports, a leading independent public opinion polling company.

.09 Economic confidence among small business owners fell in August 2007 as small business owners expressed less confidence in the economic conditions for their business and experienced more cash flow issues. The Watch is down nearly five points over July 2007 and is nearly level with the Watch's lowest index since inception in August 2006.

.10 Among the key findings, the survey found that 36 percent of small business owners feel that economic conditions for their business are getting better, a significant decrease from 41 percent in July 2007. In addition, 41 percent said they have experienced cash flow issues in the last 90 days, an increase over July's 35 percent.

.11 One of the main reasons for the declines relates to the housing market slump and related economic impact. More than one in three business owners said recent changes in the housing market have had a significant impact on their business. In addition, more than one third of business owners also noted that if obtaining credit becomes more difficult, it will have an impact on their business. When asked what kind of effect the recent changes in the housing market have had on their personal budgets and financial decisions, more than one in three small business owners said the impact was significant. On the bright side, the poll also found that 42 percent of consumers said they expected houses in their area to be priced higher six months from now, which could help soften the impact on small business owners.

.12 Overall, the economic outlook remains uncertain. You should pay close attention to how economic factors such as interest rates, consumer confidence, the housing market, overall economic expansion or contraction, inflation, and the labor market will affect your clients and your compilation and review engagements this year.

Current SSARS Developments

Issuance of SSARS No. 15

.13 On July 24, 2007, the Accounting and Review Services Committee (ARSC) issued SSARS No. 15, *Elimination of Certain References to Statements on Auditing Standards and Incorporation of Appropriate Guidance Into Statements on Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2).

.14 In many instances, the SSARSs would refer the practitioner to Statements on Auditing Standards (SASs). However, for many practitioners, compilations and reviews represent the highest level of service performed, and therefore, those practitioners may be unfamiliar with the auditing literature. The ARSC determined that it would be in the best interest of practitioners performing compilations and reviews as well as in the public interest if certain references to the auditing literature were eliminated from the SSARSs. To accomplish this, the ARSC issued SSARS No. 15, which eliminates those references to auditing literature from the SSARSs and provides guidance similar to that originally referenced.

.15 SSARS No. 15 amends AR section 100, *Compilation and Review of Financial Statements*; AR section 200, *Reporting on Comparative Financial Statements*; AR section 300, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms*; and AR section 400, *Communications Between Predecessor and Successor Accountants*, all of which are found in AICPA, *Professional Standards*, vol. 2. This SSARS provides new or enhanced guidance by:

- Providing a definition of "other comprehensive basis of accounting" (OCBOA)
- Providing examples of appropriate OCBOA financial statement titles
- Providing reporting examples for compilations and reviews of OCBOA financial statements
- Providing guidance related to an emphasis of a matter when reporting on complied or reviewed financial statements
- Clarifying the accountant's responsibility with respect to facts discovered subsequent to the date of the accountant's compilation or review report
- Providing additional illustrative representations that may be appropriate for inclusion in the management representation letter
- Providing a new appendix, Appendix J, entitled "Sources of Generally Accepted Accounting Principles"

.16 In addition, because the appropriate guidance is now included in AR section 100, the following interpretations have been withdrawn by the issuance of SSARS No. 15:

- Interpretation No. 4, "Discovery of Information After the Date of the Accountant's Report" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.13–.15), which interpreted AR section 100, *Compilation and Review of Financial Statements* was rescinded.
- Interpretation No. 12, "Reporting on a Comprehensive Basis of Accounting Other Than Generally Accepted Accounting Principles" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.41–.45), which interpreted AR section 100 was rescinded.

.17 SSARS No. 15 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2007, with earlier application permitted.

SSARS Exposure Draft, *Defining Professional Requirements in Statements on Standards for Accounting and Review Services*

.18 In December 2005, the Auditing Standards Board (ASB) issued SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1). SAS No. 102 expressly defined imperatives used to describe different degrees of the auditor's responsibility when conducting audit engagements in accordance with generally accepted auditing standards. The ARSC has concluded that by defining the levels of responsibilities that accountants have in compilation and review engagements in a fashion similar to SAS No. 102, standards for compilation and review engagements will be clarified, and the imperatives used in such standards will be consistent with the standards for audit engagements. The ARSC further concluded that this clarity and consistency will assist accountants in their work and improve the quality of compilation and review engagements.

.19 The proposed SSARS defines two categories of professional requirements:

- *Unconditional Requirements*. The accountant is required to comply with a requirement in all cases in which the circumstances exist to which the requirement applies. A requirement is indicated by the words "must" or "is required."
- *Presumptive Requirements*. The accountant is also required to comply with a presumptive requirement in all cases in which the circumstances exist to which the presumptive requirement applies. The accountant may depart from a presumptive requirement provided that he or she documents the

justification for departure and how alternative procedure(s) performed in the circumstances were sufficient to achieve the objectives of the presumptive requirement. The word "should" indicates a presumptive requirement.

.20 SSARSs also contain explanatory material that is intended to provide further explanation and guidance on the professional requirements. Such explanatory material is intended to be descriptive rather than imperative. All professional requirements that a SSARS imposes on the accountant will be identifiable by the use of "must," "is required," or "should" statements.

.21 This exposure draft was issued in August 2007, and the exposure period ends on October 25, 2007. The proposed SSARS, which is expected to be issued as SSARS No. 16 in the fourth quarter of 2007, will be effective upon issuance.

SSARS Exposure Draft, *Omnibus Statement on Standards for Accounting and Review Services—2008*

.22 In October 2007, the ARSC issued an exposure draft (ED) of a proposed Omnibus SSARS that, if issued as a final SSARS, would:

- Replace the term *nonpublic entity* in the SSARSs literature with the term *nonissuer*. This would conform the terminology in the SSARSs to the terminology used by other standards setters.
- Clarify the objectives and limitations of compilation and review engagements.
- Make clear that the accountant must, at a minimum, apply analytical procedures to the financial statements, make inquiries of management and, when deemed appropriate, other company personnel and obtain representations from management for all financial statements and periods covered by the accountant's report when performing a review engagement.
- Introduce a definition of "management" and revise the definition of "third parties" to clarify that the phrase "who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of financial statements" applies to "members of management."
- Revise SSARSs to state that management's written representations should be made as of the date of the accountant's review report.
- Provide guidance on the accountant's consideration of subsequent events in a compilation or review engagement.
- Provide guidance on the accountant's consideration, in a compilation or review engagement, of an entity's ability to continue as a going concern.

.23 In addition, the ED states:

> "The accountant need not be in physical receipt of the management representation letter as of the date of the accountant's review report provided management has acknowledged that they will sign the representation letter, without exception."

.24 The Omnibus ED also proposes to add an exhibit on analytical procedures in a review engagement, as members have expressed a great deal of interest in the analytical procedures in the AICPA Issues Paper, *Analytical Procedures in a Review Engagement*. The issues paper was issued after the issuance of SSARS No. 10, *Performance of Review Engagements* (AICPA, *Professional Standards*, vol. 2), to provide additional guidance to accountants. The ED incorporates the guidance from that issues paper and expands upon such guidance. The comment period ends on December 28, 2007. The ARSC expects to issue the proposed SSARS as SSARS No. 17 in January 2008.

Recently Issued Compilation and Review Interpretations of the SSARS

.25 Compilation and review interpretations of the SSARSs are interpretive publications pursuant to AR section 50, *Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2). Interpretive publications are not standards for accounting and review services. Interpretative publications are recommendations on the application of SSARSs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued after all ARSC members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSARSs.

.26 The accountant should be aware of and consider interpretive publications applicable to his or her compilation or review. If the accountant does not apply the guidance included in an applicable interpretive publication, the accountant should be prepared to explain how he or she complied with the SSARSs provisions addressed by such guidance.

Interpretation No. 28—Special-Purpose Financial Statements

.27 In December 2006, a new interpretation of AR section 100 was added, Interpretation No. 28, "Special-Purpose Financial Statements to Comply With Contractual Agreements or Regulatory Provisions" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.109–.119), which addresses special-purpose financial statements to comply with contractual agreements or regulatory provisions. When asked to prepare such financial statements, the basis of accounting prescribed in the agreements or provisions may result in an incomplete presentation, but one that is otherwise in conformity with generally accepted accounting principles (GAAP) or OCBOA. When the accountant submits compiled or reviewed special-purpose financial statements prepared on a basis of accounting prescribed in a contractual agreement or regulatory provision that results in an incomplete presentation, but one that is otherwise prepared in conformity with GAAP or OCBOA, the accountant's report should be modified to include an explanatory paragraph with the following information:

- An explanation of what the financial statement is intended to present and a reference to the note to the special-purpose financial statement that describes the basis of presentation
- If the basis of presentation is in conformity with GAAP or OCBOA, a statement that the presentation is not intended to be a complete presentation of the entity's assets, liabilities, revenues, and expenses
- A separate paragraph at the end of the report stating that the report is intended solely for the information and use of those within the entity, the parties to the contract or agreement, the regulatory agency with which the report is being filed, or those with whom the entity is negotiating directly, and is not intended to be and should not be used by anyone other than these specified parties

.28 A second scenario that could result when asked to prepare financial statements in accordance with a contractual agreement or regulatory provision would be a presentation that is not in conformity with GAAP or OCBOA. When the accountant submits compiled or reviewed special-purpose financial statements prepared on a basis of accounting prescribed in an agreement that results in a presentation that is not in conformity with GAAP or OCBOA, the accountant's report should be modified to include an explanatory paragraph with the following information:

- An explanation of what the presentation is intended to present and a reference to the note to the special-purpose financial statements that describes the basis of presentation
- A statement that the financial statement is not intended to be a presentation in conformity with GAAP or an OCBOA

- A description and the source of significant interpretations, if any, made by the company's management relating to the provisions of a relevant agreement
- A separate paragraph at the end of the report stating that the report is intended solely for the information and use of those within the entity, the parties to the contract or agreement, the regulatory agency with which the report is being filed, or those with whom the entity is negotiating directly, and is not intended to be and should not be used by anyone other than these specified parties. For example, if the financial statements have been prepared for the specified purpose of obtaining bank financing, the report's use should be restricted to the various banks with which the entity is negotiating the proposed financing.

.29 This interpretation also gives illustrative examples of both a compilation and review report for such circumstances.

Interpretation No. 29—Dealing With Uncertainties

.30 In February 2007, Interpretation No. 29, "Reporting on an Uncertainty, Including an Uncertainty About an Entity's Ability to Continue as a Going Concern" (AICPA, *Professional Standards*, vol. 2, AR sec. 9100.120–.129), was issued, which addresses reporting during a compilation or review engagement an uncertainty, including an uncertainty about an entity's ability to continue as a going concern. Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. If, during the performance of compilation or review procedures, evidence or information comes to the accountant's attention that there may be an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being compiled or reviewed, the accountant should consider the adequacy of management's disclosure of the uncertainty.

.31 This interpretation provides examples of emphasis of the going concern in the compilation or review report. In addition, it addresses dealing with uncertainties other than a going concern, which may include uncertainties regarding legal judgments.

ARSC's Consideration of Independence in a Compilation Engagement

.32 As a result of the evolving complexity of the Independence Standards as codified in the AICPA *Code of Professional Conduct*, the ARSC issued a Discussion Memorandum/Survey in October 2005 to obtain the input of CPAs, their clients, and third-party users of compiled financial statements as to the need for independence when performing compilation engagements. During the seven months that the Discussion Memorandum/Survey was available, the ARSC received over 4,300 responses. After holding a public meeting in May 2006 to discuss the results of the survey, the ARSC had determined that more information was needed as to what the users of compiled financial statements would want to see in compilation reports.

.33 The ARSC reached out to the American Bankers Association (ABA) and the Risk Management Association (RMA) to facilitate a meeting. On September 24, 2007, the ARSC met with representatives of the ABA and the RMA to discuss their groups concerns regarding independence in compilation engagements, as they represent third-party users of compiled financial statements.

.34 More specifically, topics discussed at the meeting included the following:

- Eighty-eight percent of third party users responded to the survey that they wanted to know the reasons for independence impairments, what specifically would they want third parties to know, and what would be the most useful presentation for third party users.

- Whether third party users feel that compiled or reviewed financial statements are more reliable if the accountant performs certain nonattest functions, even if performance impairs the accountant's independence.
- Whether the standard compilation and review reports should be modified to make them more useful to third party users.

.35 In conjunction with the ABA and RMA representatives, it was determined that additional information was needed from third-party users of compiled financial statements prior to developing any proposals to revise the reporting requirements for compilation engagements. During the fourth quarter of 2007, the ARSC will work with the ABA and RMA to develop certain additional questions and to facilitate acquiring the necessary information. The ARSC will continue to keep the membership informed as the process continues.

Current Practice Issues

AICPA Guidance for Bookkeeping Engagements

.36 The ARSC is assisting in the development of an AICPA Practice Aid for bookkeeping engagements. The practice aid, when issued, will focus on how existing standards apply to bookkeeping engagements, specifically Quality Control Standards, including client acceptance and continuance procedures and communication of best practices. In addition, the practice aid should address certain practical situations, such as whether a compilation report is necessary if financial statements are prepared, as well as issues regarding accountant independence. This practice aid is expected to be issued in 2008.

Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control*

.37 In September 2005, a task force was formed to review the Statements on Quality Control Standards (SQCS) and determine if and how they should be amended, in light of the changes in the quality control environment in the past two years, and with the goal of convergence with International Statement of Quality Control Standard No. 1, *Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements*. The task force comprises members from the ASB, the ARSC, the Peer Review Board, and the Center for Public Company Audit Firms Peer Review Committee.

.38 On October 10, 2007, SQCS No. 7, *A Firm's System of Quality Control* (AICPA, *Professional Standards*, vol. 2), was issued. This new SQCS supersedes existing statements on quality control standards and differs from them as follows:

- Defines the term *engagement quality control review*, and requires firms to establish which engagements are to be subject to an engagement quality control review.
- Defines the terminology the ASB uses to describe the degrees of responsibility that the requirements in SQCSs impose on firms, which includes use of the terms *unconditional requirements* and *presumptively mandatory requirements*.
- Requires a firm to document its quality control policies and procedures. The extent of the documentation is based on the size, structure, and nature of the firm's practice.
- Requires a firm's system of quality control to address each of the following elements: leadership responsibilities for quality within the firm, relevant ethical requirements, acceptance and continuance of client relationships, human resources, engagement performance, and monitoring.

- Recognizes the importance of a quality-oriented internal culture and requires firms to (*a*) establish policies that require the firm to assign its management responsibilities so that commercial considerations do not override the quality of work performed, and (*b*) address personnel performance evaluation, compensation, and advancement to demonstrate the firm's overarching commitment to quality.
- Provides more detailed guidance on independence and requires a written confirmation of compliance with independence requirements from all firm personnel at least annually.
- Provides more detailed guidance on client acceptance and continuance, and requires documentation of the resolution of significant issues.
- Provides more detailed guidance on engagement supervision and review, engagement documentation, and consultation policies and procedures.
- Requires policies and procedures for resolving differences of opinions, including a requirement that reports must not be released until all differences of opinions are resolved.
- Requires performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and regulatory requirements, and the firm's quality control policies and procedures.
- Requires policies and procedures for dealing appropriately with complaints and allegations of noncompliance with professional standards or with the firm's system of quality control.

.39 This SQCS is effective as of January 1, 2009.

Common Peer Review Findings

.40 In 2006, the AICPA Peer Review Program reported approximately 10,100 peer reviews, of which approximately 5,100 pertained to compilation and review engagements. The importance of the peer review findings cannot be overemphasized. The following is a summary of some of the most recent significant deficiencies that an accountant should keep in mind when planning and staffing compilation and review engagements.

Reports, Financial Statement Measurement, Presentation, and Disclosure

.41 The following is a list of some deficiencies that were encountered with regards to financial reporting:

Deficiency	*Practical Example*
Departures from standard wording where the report does not contain the critical elements of the applicable standards	It is not uncommon to see compilation and review reports with no reference to the SSARSs in those reports.
Issuance of a review report when the accountant is not independent with respect to the client	Although an accountant may report on compiled financial statements if he or she is not independent (by modifying the compilation report), the accountant may not issue a review report if he or she is not independent. In all cases in which the CPA issues an "assurance" report (audit or review) on the financial statements, the CPA must be independent with respect to the client in order to perform the engagement (that is, modifying the review report for a lack of independence is inappropriate).

(continued)

Failure to disclose lack of independence in a compilation report	Although an accountant may report on compiled financial statements when he or she is not independent, the SSARSs require modification of the compilation report to clearly indicate this lack of independence by adding a one-sentence paragraph to the compilation report, specifically, "I am [We are] not independent with respect to XYZ Company."
Failure to disclose the omission of substantially all disclosures	A CPA may compile financial statements with disclosures omitted as long as the omission of disclosures is clearly indicated in the compilation report, and the disclosures are not omitted with the intent to "mislead" those who might reasonably be expected to use the financial statements. A third paragraph should be added to the compilation report as follows: Management has elected to omit substantially all the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.
Failure to disclose the omission of the statement of cash flows in financial statements prepared in accordance with GAAP	Pursuant to the guidance in FASB Statement No. 95, *Statement of Cash Flows*, if financial statements include both a balance sheet and an income statement, the statement of cash flows should be provided for each period that the income statement is provided. Given this fact, the statement of cash flows needs to be provided when the CPA reviews financial statements (or the failure to include the statement of cash flows should be disclosed as a departure from GAAP in the accountant's review report); the same issue or result would exist when the CPA compiles full-disclosure financial statements. However, if the CPA compiles financial statements in which management elects to omit substantially all disclosures, the omitted statement of cash flows can be "referenced" in the paragraph that reports the fact that disclosures have been omitted, as follows: Management has elected to omit substantially all the disclosures and the statement of cash flows required by generally accepted accounting principles. If the omitted disclosures and statement were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Significant departures from the financial statement formats prescribed by industry accounting and audit guides	In many cases, this deficiency is prevalent if CPAs are preparing and reporting on financial statements of clients in "special industries" in which they try to "fit" the standard financial statement formats for use in these industries. For example, for health care clients, there is a requirement for a "performance indicator" to be included in the financial statements. As another example, not-for-profit organizations have a statement of activities (rather than an income statement) in which all changes in net assets during a reporting period are reflected in that statement. If CPAs try to utilize formats that are applicable to the "normal" business entities, it is not uncommon for some of the special industry guidance not to be followed. You should refer to the appropriate AICPA audit and accounting guides when financial statements are being compiled or reviewed.
Omission of disclosures of significant accounting policies applied (GAAP or OCBOA)	As a result of significant changes in disclosure requirements in recent years, CPAs need to be careful not to "copy last-year" disclosures in current-year financial statements. Some of the required policy note disclosures are often easily missed. Commonly missed policy note disclosures include the nature of operations, use of estimates, advertising costs, shipping and handling costs, basis of accounting for receivables (and the bad debts associated with those receivables). All significant accounting policies should be included in GAAP and OCBOA financial statements.
Misclassification of a material transaction or balance	You should make sure that items, transactions, and events are classified appropriately in the financial statements.
Omission of significant required disclosures related to material financial statement balances or transactions	Always use a current disclosure checklist applicable to the basis of accounting used.
Omission of significant matters related to the understanding of the financial statements (the cumulative material effect of a number of deficiencies)	This deficiency occurs if several minor deficiencies result in a cumulative material effect on the financial statements when viewed in the aggregate.

SSARS Procedures and Documentation

.42 Below are some deficiencies that were noted in regards to specific SSARS procedures and related documentation:

Deficiency	*Practical Example*
Failure to document the matters covered in the accountant's inquiries and analytical procedures in review engagements	Inquiries and analytical procedures provide the basis for the limited assurance expressed in the review report, and must be documented. AR section 100 contains a list of required documentation for a review engagement, including the requirement to document significant expectations.

(continued)

Failure to obtain a proper client management representation letter for a review engagement	A management representation letter is required in all review engagements. This letter should be updated to include all current information and cover all periods presented in the financial statements. These letters are not required in compilation engagements.

.43 Although there are many recurring deficiencies noted in peer review, the accountant can take steps to avoid them by keeping these common mistakes in mind during the planning and performance of future compilation and review engagements.

Recent AICPA Independence and Ethics Pronouncements

.44 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.45 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

AICPA TPA TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	This question and answer discusses various employee benefit plan topics.
AICPA TPA TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	This question and answer discusses various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.46 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to compilation and review engagements are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

Fair Value Measurements

FASB Statement No. 157

.47 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.48 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

FASB Statement No. 159

.49 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the

FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement Nos. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.50 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and Securities and Exchange Commission (SEC) have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109*

.51 This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.52 The evaluation of a tax position in accordance with this interpretation is a two-step process. The first step is recognition: The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement: A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.53 Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one of the following:

1. An increase in a liability for income taxes payable or a reduction of an income tax refund receivable
2. A reduction in a deferred tax asset or an increase in a deferred tax liability
3. Both items 1 and 2

.54 An enterprise that presents a classified statement of financial position should classify a liability for unrecognized tax benefits as current to the extent that the enterprise anticipates making a payment within one year or the operating cycle, if longer. An income tax liability should not be classified as a deferred tax liability unless it results from a taxable temporary difference (that is, a difference between the tax basis of an asset or a liability as calculated using this interpretation and its reported amount in the statement of financial position). This interpretation does not change the classification requirements for deferred taxes.

.55 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109 is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this interpretation. This interpretation is effective for fiscal years beginning after December 15, 2006.

FIN 48 and Independence

.56 In some instances, making such determinations under FIN 48 can involve relatively complex judgments, and practitioners have asked whether they may assist clients in applying FIN 48 without impairing their independence. At its July 19–20, 2007 meeting, the Professional Ethics Executive Committee (PEEC) considered this question and concluded that a member may assist an attest client in applying FIN 48 provided that the member is satisfied that the client understands the reasons why a specific tax position does or does not meet the more-likely-than-not threshold and the basis for the determination of the amount of related unrecognized tax benefits. In making this determination, the PEEC referred to its longstanding position in AICPA Interpretation 101-3, *Performance of Nonattest Services*, General Requirement No. 2, that the requirement that the client's "designated individual" possess suitable skill, knowledge, or experience to oversee the services does not mean that the individual must possess the technical expertise that the member possesses or the ability to perform or reperform the services.

.57 The PEEC believes that in most cases a member should be able to advise the client about whether a tax position meets the more-likely-than-not threshold and the likelihood that portions of the related tax benefit will not be realized, and adequately inform them of the factors upon which the member's advice was based and thereby enable the client to make an informed judgment on the results of the member's services and take responsibility for the work. In those instances, the PEEC believes that assisting the client in applying FIN 48 would not impair the member's independence. The staff of the AICPA Professional Ethics Division has issued nonauthoritative guidance on this matter by adding Question and Answer No. 23 to the Questions and Answers that appear on the division's Web site at www.aicpa.org/download/ethics/nonattest_q_a.pdf.

On the Horizon

.58 Accountants should keep abreast of accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to your clients or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.59 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and compilation and review projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing +Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
AICPA Accounting and Review Services Committee (ARSC)	www.aicpa.org/members/div/auditstd/index.htm
Financial Accounting Standards Board (FASB)	www.fasb.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

SSARS Pipeline

.60 The ARSC is currently working on the following potential new projects.

ARSC Clarity Project

.61 The first step in the ARSC's clarity project is the issuance of the proposed SSARS, *Defining Professional Requirements in Statements on Standards for Accounting and Review Services*, as discussed in paragraphs .18–.21 of this alert. The provisions of this proposed statement will apply to existing SSARSs. Over the course of the next few years, the ARSC will examine the existing SSARSs and consider whether any additional revisions to the SSARSs are appropriate.

.62 In addition, the specific terms used to define professional requirements in the SSARSs are not intended to apply to interpretive publications since interpretive publications are not accounting and review standards. It is the ARSC's intention to make conforming changes to the interpretive publications over the next several years to remove any language that would imply a professional requirement when none exists.

Recodification

.63 The ARSC is considering a reorganization of the codification of SSARSs. The resulting codification would be organized as follows:

- SSARS hierarchy
- Guidance with respect to compilations of financial statements
- Guidance with respect to reviews of financial statements
- Guidance with respect to compilations of specified elements, accounts, or items of a financial statement
- Guidance with respect to compilations of pro forma financial information

.64 The ARSC tentatively plans to expose a proposed SSARS during late 2008 or early 2009.

International Standards

.65 The ARSC is committed to harmonizing the SSARSs, where deemed appropriate, with the International Standards for Review Engagements (ISRE). During 2008, the ARSC will consider the guidance in the ISRE and whether revisions to the SSARSs are necessary. It is the belief of the ARSC that such harmonization will assist practitioners, especially those practitioners that are engaged to review the financial statements prepared in conformity with International Accounting Standards (IAS).

OCBOA Accounting Guidance

.66 Over the past few years, many practitioners have noted that it would be beneficial to have nonauthoritative accounting guidance as it relates to OCBOA. The ARSC will lead a cross-functional task force that will develop an OCBOA practice aid that will provide guidance to preparers. A practice aid is expected to be drafted in 2008.

Accounting Pipeline

.67 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.68 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are:

- All acquisitions of businesses are to be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business are to be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.69 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed IAS Statement No. 27(R)

.70 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.71 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.72 In December 2006, the FASB issued an exposure draft titled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.73 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

FASB Codification and Retrieval Project

.74 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.75 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69 (AICPA, *Professional Standards*, vol. 1, AU section 411). However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the accountant, which is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.76 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.77 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

Publications

.78 The following publications deliver valuable guidance and practical assistance as tools to be used on your engagements (product numbers appear in parentheses):

- *Compilation and Review Engagements—Essential Questions and Answers* (product no. 006622kk)
- *Review Engagements: New and Expanded Guidance on Analytical Procedures and Inquiries* (product no. 006618kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)
- *Elimination of Certain References to Statements on Auditing Standards and Incorporation of Appropriate Guidance Into Statements on Standards for Accounting and Review Services—SSARS No. 15* (product no. 060653kk)
- *Compilation and Review Engagement Essentials* (product no. 733677)

AICPA reSOURCE: Accounting and Auditing Literature

.79 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.80 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs performing compilation and review engagements. Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.81 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 ($369 for nonmembers) for a new subscription and $119 ($369 for nonmembers) for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to those performing compilation and review engagements include the following:

- *Accounting Services and Compilation Engagements: Documentation*
- *Compilation Engagements: Types and Scope*
- *Other Comprehensive Bases of Accounting (OCBOA): An Introduction*
- *Drafting Audit, Review, and Compilation Reports*
- *2007 Annual Update—A&A: Compilation and Review Update*
- *Compilation and Review Engagements: Quality Control*
- *Comp & Review Engagements: Environmental, Accounting, and Reporting Issues*
- *Comp & Review Engagements: New Standards and Performance Issues*
- *Compilation and Review: Documentation*
- *Review Engagement Reports*

.82 To register or learn more, visit www.cpa2biz.com.

Webcasts

.83 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.84 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

Member Service Center

.85 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.86 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.87 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA *Code of Professional Conduct*. You can reach the Ethics Hotline at (888) 777-7077.

* * * *

.88 This *Compilation and Review Alert* replaces *Compilation and Review Alert—2006/07*.

.89 The *Compilation and Review Alert* is published annually. As you encounter issues that you believe warrant discussion in next year's Alert, please feel free to share them with us. Any other comments that you have about this Alert would also be appreciated. You may e-mail these comments to killuzzi@aicpa.org or write to:

Health Care Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS
HEALTH CARE INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of health care organizations with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Zachary T. Donahue, CPA
Senior Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA wishes to thank the members of the AICPA Health Care Expert Panel and the Chair of that panel, Rick Corcoran, for their assistance and contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your health care industry audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The health care industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. This data further demonstrates the economic growth the U.S. has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent during its last 10 meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting, and in response to shaky financial market conditions, the Federal Reserve announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. The Federal Reserve then announced on August 17, 2007 that financial market conditions had deteriorated, and tighter credit conditions and increased uncertainty has the potential to restrain economic growth. The Federal Open Market Committee (FOMC) is closely monitoring the situation and is prepared to act as necessary to mitigate adverse effects on the economy arising from the disruptions in financial markets. Shortly after this August 17th release, the Federal Reserve approved actions to decrease the discount rate at the Federal Reserve Banks of Boston, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, Minneapolis, Kansas City, Dallas, and St. Louis from 6.25 percent to 5.75 percent. This narrows the spread between the primary credit rate and the target federal funds rate to 50 basis points. Auditors should remain alert to developments in the financial markets and how it may affect your audit engagements.

Industry Trends and Conditions

Centers for Medicare and Medicaid Services

.13 On August 1, 2007, the Centers for Medicare and Medicaid Services (CMS) issued a final rule that takes significant steps to improve the accuracy of Medicare's payment under the acute care hospital inpatient prospective payment system (IPPS), while providing additional incentives for hospitals to engage in quality improvement efforts. The IPPS payment reforms would restructure the inpatient diagnosis-related groups (DRGs) to account more fully for the severity of each patient's condition. In addition, the rule includes important provisions to ensure that Medicare no longer pays for the additional costs of certain preventable conditions (including certain infections) acquired in the hospital. Auditors should be aware of the impact this change will have on health care organizations. Visit the CMS Web site at www.cms.hhs.gov/AcuteInpatientPPS/IPPS/list.asp for further information.

Sarbanes-Oxley Act and Not-for-Profit Health Care Organizations

.14 Since the issuance of the Sarbanes-Oxley Act, several states' legislators, regulators, and other elected or appointed officials have sought to duplicate or extend its provisions to nonpublic companies and their auditors on the state level. The AICPA formed a Special Committee on State Regulation to assist with responses to state issues resulting from the Sarbanes-Oxley Act.

.15 To obtain an overview of accounting reform state legislative activity, go to the AICPA Web site at www.aicpa.org/statelegis/index.asp. If you are an issuer subject to the provisions of Sarbanes-Oxley, you can get information about some of the recent Securities and Exchange Commission (SEC) activities to implement Sarbanes-Oxley in the *SEC and PCAOB Alert—2007/08* (product no. 022497kk).

.16 The Public Company Accounting Oversight Board (PCAOB) issued Auditing Standard No. 5, effective July 2007. See "Recent Auditing and Attestation Pronouncements and Related Guidance" below for further discussion.

Health Care Technological Developments

.17 New technologies are continually being developed that may have a significant affect on future financial results of health care organizations. Your health care industry clients may be expanding their investment in technology in ways that may have received less attention. For example, your clients may want to achieve greater staff efficiency and productivity, improve patient care quality and safety, increase compliance with regulatory requirements, update facility and equipment modernization, and update information processing and sharing. Increasingly, individuals seek health information online before consulting with medical professionals. Additionally, researchers are working on new technologies that could lead to the development of devices allowing individuals to take certain measurements (blood pressure, temperature, heart rate) at home and then transmit that information electronically to their medical professional, which could reduce the number of necessary trips to their medical professional's office. Increasing use of technology by health care organizations includes electronic medical records, bar coding medical supplies, computerized physician ordering systems and bedside laboratory testing. The U.S. Department of Health and Human Services (HHS) continues to announce efforts to promote the use of information technology (IT) in health care, including initiatives to promote creation of electronic health records (EHR) for Americans. The American Health Information Community recently recommended that EHR adoption be its top priority and made plans to standardize secure and widely available solutions for accessing current and historical laboratory results and interpretations in the near future.

.18 As you plan your audits, consider in particular the effects of IT on internal control and your ability to sufficiently assess the associated risks of material misstatement. Auditors should consider the guidance in AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1) regarding the effect of IT on internal control.

.19 Auditors may find their health care organization clients are using off-balance-sheet financing arrangements, such as operating leases, to finance IT equipment acquisitions. Auditors should determine that the accounting guidance in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (FASB Statement) No. 13, *Accounting for Leases*, as amended and interpreted for classification of leases as operating leases, capital leases, or sale-type leases, is being followed. FASB Statement No. 13, paragraph 1, states that a lease is an agreement conveying the right to use property, plant, and equipment (land or other depreciable assets), usually for a stated period of time. Emerging Issues Task Force (EITF) Issue No. 01-8, "Determining Whether an Arrangement Contains a Lease," provides guidance on how to determine whether an arrangement contains a lease that is within the scope of FASB Statement No. 13. Governmental health care entities should also consider the guidance in Governmental Accounting Standards Board (GASB) Statement No. 13, *Accounting for Operating Leases with Scheduled Rent Increases*.

.20 A number of SEC registrants recently restated their financial statements relating to lease accounting. Specifically, restatements occurred related to the amortization of leasehold improvements; recognition of rent when lease terms of an operating lease contain what is referred to as rent holidays; and incentives related to leasehold improvements. The Chief Accountant of the SEC issued a letter in February 2005 to the AICPA's Chairman of the Center for Public Company Audit Firms. The letter clarified the SEC staff's interpretation of certain accounting issues and their application under generally accepted accounting principles (GAAP) relating to operating leases. The letter focused on specific concerns regarding the appropriate accounting for operating leases; restatements resulting from the correction of errors that deviate from the lease accounting standards; and clear and concise disclosures of both operating and capital leases. Non-SEC registrants should also ensure compliance with the lease accounting standards and related interpretations set forth by the FASB and make any necessary restatements or corrections.

.21 Auditors of nongovernmental entities should consider the guidance in Statement of Position (SOP) 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, (AICPA, *Technical Practice Aids*, ACC sec. 10,720), on accounting for the costs of computer software developed or obtained for internal use and for determining whether the costs of computer software developed for internal use are capitalizable.

Complex Financing Structures, Investments, and Access to Capital

.22 Some health care organizations are dependent on external sources of funds to satisfy their capital needs. Many health care organizations finance acquisitions, additions, and renovations with long-term debt. Health care organizations may have more complex structures that use swaps or other derivative instruments to meet their financing objectives, such as changing their liabilities from fixed-rate borrowings to variable rate borrowings, or vice versa. Auditors should determine that the method specified by generally accepted accounting principles (GAAP) to determine the value of derivatives is being followed. When auditing derivatives, auditors should follow the guidance in AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1). In addition, auditors should follow the guidance in the AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

.23 Interpretation No. 1, "Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist," (AICPA, *Professional Standards*, vol. 1, AU sec. 9332.01–.04) which interprets AU section 332, provides guidance regarding the adequacy of audit evidence with respect to the existence and valuation assertions in confirmations received from third parties, where a readily determinable fair value does not exist, and the auditor determines auditing procedures should include verifying the existence and testing the measurement of the investments. For example, an entity may have an investment in a hedge fund that is reported at fair value for which a readily determinable fair value does not exist. Further, the hedge fund may own interests in investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. As part of the auditor's procedures in accordance with AU section 332, an auditor typically would satisfy the existence assertion through confirmation with the hedge fund, examination of legal documents, or other means. In confirming existence, the auditor may request the hedge fund to indicate or confirm the fair value of the entity's investment in the hedge fund, including the fair value of investments held by the hedge fund. In some circumstances, the hedge fund will not provide detailed information about the basis and method for measuring the entity's investment in the hedge fund, nor will they provide information about specific investments held by the hedge fund. This interpretation illustrates examples of information auditors may receive in a third-party confirmation (in the aggregate or on a security-by-security basis) and provides interpretative guidance for auditors about the adequacy of audit evidence provided in those examples.

.24 A number of health care organizations are entering into build-to-suit transactions. Auditors should consider the guidance in EITF Issue No. 97-10, "The Effect of Lessee Involvement in Asset Construction." EITF Issue No. 97-10 is not limited to build-to-suit real estate projects; it applies to all asset construction projects with lessee involvement.

.25 As discussed in EITF Issue No. 97-10, if the health care organization is a lessee and has substantially all of the construction period risks, then the lessee is considered the owner of the asset during the construction period. The transaction is effectively a sale and leaseback of assets and is within the scope of FASB Statement No. 98, *Accounting for Leases: Sale-Leaseback Transactions Involving Real Estate, Sales-Type Leases of Real Estate, Definition of Lease Term, and Initial Direct Costs of Direct Financing Leases*. Evaluation of whether the lessee has substantially all of the construction period risks is based on a test similar to the 90 percent recovery-of-investment test described in FASB Statement No. 13 as well as six special provisions contained in EITF Issue No. 97-10.

Changes to Risk Profiles in Provider Contracts

.26 The negotiated contracts between health care systems and managed care companies can be complex and could be changing the historical risk profiles in those contracts. Auditors should consider the effect of any changes, whether to full risk, away from full risk, or new payment methodologies on fee-for-service on the financial statements when auditing their health care industry clients. Auditors should also consider the need to perform additional auditing procedures, including a careful review of the contract terms. These contracts can increase the difficulty in properly estimating and accounting for revenue under these arrangements.

Costs of Providing Health Care Services

.27 Governments and private employer providers of health care insurance continue to focus on the costs of health care. A number of employers announced reductions or eliminations of health care coverage to employees or retirees. There are government- and private-sector initiatives to promote consumer-directed health care and to expand use of health savings accounts. These changes can lead to increased costs to collect and higher bad debts.

Uninsured Patients

.28 Uninsured patient charges, billings, and collections have been in the spotlight in recent years. Your health care organization clients may be continuing to evaluate their policies and procedures for providing patient care for the uninsured. Auditors should be aware of the impact of changes to these policies and procedures and how this may affect the assessment of risks of material misstatements.

Legislative and Regulatory Developments

.29 This section of the alert provides brief summaries of some of the regulations issued and regulatory publications released since the writing of last year's alert that may affect your clients in the health care industry. The brief summaries provided in this section of the alert are for informational purposes only. Please refer to the full text of the regulations and other documents that are discussed.

SEC

Executive Compensation and Related Person Disclosure

.30 In November 2006, the SEC adopted amendments to the disclosure requirements for executive and director compensation, related person transactions, director independence and other corporate governance matters, and security ownership of officers and directors. These amendments apply to disclosure in proxy and information statements, periodic reports, current reports, and other filings under the Securities Exchange Act of 1934 and to registration statements under the Exchange Act and the Securities Act of 1933. These amendments are intended to make proxy and information statements, reports, and registration statements easier to understand. Furthermore, they are designed to provide investors with a clearer and more complete picture of the compensation earned by a company's principal executive officer, financial officer, highest paid executive officers, and members of its board of directors.

.31 Companies must comply with these disclosure requirements in Form 8-K for triggering events that occur on or after November 7, 2006, and in Forms 10-K and 10-KSB for fiscal years ending on or after December 15, 2006. Other provisions apply and may be found on the SEC's Web site at www.sec.gov/rules/final/2006/33-8732a.pdf.

.32 In December 2006, the SEC adopted amendments to the disclosure requirements for executive and director compensation. The amendments to Item 402 of Regulations S-K and S-B revise Summary Compensation Table and Director Compensation Table disclosure with respect to stock awards and option awards to provide disclosure of the compensation cost of awards over the requisite service period, as described in FASB FAS No. 123 (revised 2004) *Share-Based Payment* (FAS 123R). Additional information may be found on the SEC's Web site at www.sec.gov/rules/final/2006/33-8765.pdf.

Continuing Disclosure Filings Under SEC Rule 15c2-12—DisclosureUSA

.33 Because of the SEC rule 15c2-12 (17 CFR 240.15c2-12), issuers and other obligated persons of most municipal securities offerings over set dollar amounts make *continuing disclosures* of annual financial information and disclosures of certain, specific *material events*. In the past, issuers and other obligated persons usually have submitted documents with those disclosures in hardcopy format directly to each of the nationally recognized municipal securities information repositories (NRMSIRs) and applicable state information depositories (SIDs).

.34 In 2004, DisclosureUSA.org began operating as an Internet-based "electronic post office" for those filings. Instead of mailing numerous hard copies to NRMSIRs and SIDs, issuers and other obligated persons and their dissemination agents may instead submit documents in any computer file format to DisclosureUSA.org at no charge. Those who currently do not wish to file electronic documents may instead file paper documents for a small fee. DisclosureUSA.org will send the filings to each NRMSIR and applicable SID. The SEC staff issued an Interpretative Letter authorizing the use of DisclosureUSA.org to meet the continuing disclosure requirements and encourages that use. The SEC is expected to consider mandating the use of DisclosureUSA for all rule 15c2-12 filings. In September 2005, DisclosureUSA announced that 2,150 users had registered at the central post office Web site in the first 12 months the site was live. During that time period, they received filings from every U.S. state, Washington D.C., Puerto Rico, and the U.S. Virgin Islands.

.35 Instructions for making electronic and paper filings are at www.DisclosureUSA.org. The SEC staff Interpretative Letter is available on the SEC Web site at www.sec.gov/info/municipal/texasmac090704.pdf. The SEC Office of Municipal Securities release, "Tips for Making Continuing Disclosure Filings" is available on the SEC Web site at www.sec.gov/info/municipal/discfiletips.htm.

.36 Auditors may want to consider advising their clients who are issuers and conduit borrowers to consider the use of DisclosureUSA.org for their SEC Rule 15c2-12 filings. Although DisclosureUSA allows the submission of electronic documents in any computer file format, the NRMSIRs and SIDs convert the files to an Adobe Acrobat Portable Document Format (PDF) before releasing them to requesting parties. Auditors may want to consider recommending to auditees that they submit their filings to DisclosureUSA in a PDF file to reduce the possibility of subsequent data corruption. The PDF also facilitates the security of financial statements and other information that many entities post on their Internet sites.

Office of Inspector General

Medicare and State Health Care Programs: Fraud and Abuse

.37 In August 2006, the Office of Inspector General (OIG) issued the final rule, "Medicare and State Health Care Programs: Fraud and Abuse; Safe Harbors for Certain Electronic Prescribing and Electronic Health Records Arrangements Under the Anti-Kickback Statute." As required by the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (MMA), this final rule establishes a new safe harbor under the federal antikickback statute for certain arrangements involving the provision of electronic prescribing technology. Specifically, the safe harbor would protect certain arrangements involving hospitals, group practices, and prescription drug plan sponsors and Medicare Advantage (MA) organizations that provide to specified recipients certain nonmonetary remuneration in the form of hardware, software, or IT and necessary training services used solely to receive and transmit electronic prescription information. This regulation became effective October 10, 2006.

Publications: Work Plan and Semiannual Report

.38 The OIG of HHS investigates and monitors the Medicare and Medicaid programs. On the HHS OIG Web site at www.oig.hhs.gov, you can access two publications that can be helpful in obtaining information about current projects and investigative activities of the OIG: the OIG Work Plan Fiscal Year 2007 (Work Plan) and the OIG October 1, 2006 to March 31, 2007 Semiannual Report.

.39 The work plan includes a section with ongoing and proposed OIG projects planned for CMS. The projects planned for CMS are presented by categories that include hospitals (Medicare and Medicaid); home health (Medicare); nursing homes (Medicare); managed care (Medicare); physicians and other health professionals (Medicare); Medicaid administration, including upper payment limit programs; and other services (Medicare and Medicaid).

.40 For a summary of the activities of the OIG for the six-month period ended March 31, 2007, including notable criminal enforcement actions, civil settlements, and administrative sanctions, see the OIG Semiannual Report.

Centers for Medicare and Medicaid Services

Services Provided to Undocumented Aliens

.41 Section 1011 of the MMA, Federal Reimbursement of Emergency Health Services Furnished to Undocumented Aliens, provides $250 million per year for fiscal years 2005–2008 for payments to eligible providers for emergency health services provided to undocumented aliens and other specified aliens. Two-thirds of the funds will be divided among all 50 states and the District of Columbia based on their relative percentages of undocumented aliens. One-third will be divided among the six states with the largest number of undocumented alien apprehensions.

.42 From the respective state allotments, payments will be made directly to hospitals, certain physicians, and ambulance providers for some or all of the costs of providing emergency health care required under Section 1867 and related hospital inpatient, outpatient, and ambulance services to eligible individuals. Eligible providers may include an Indian Health Service facility, whether operated by the Indian Health Service or by an Indian tribe or tribal organization. A Medicare critical access hospital is also a hospital under the statutory definition. Payments under Section 1011 may only be made to the extent that care was not otherwise reimbursed (through insurance or otherwise) for such services during that fiscal year.

.43 Payments may be made for services furnished to certain individuals described in the statute as (1) undocumented aliens, (2) aliens who have been paroled into the United States at a U.S. port of entry for the purpose of receiving eligible services, and (3) Mexican citizens permitted to enter the United States for not more than 72 hours under the authority of a biometric, machine-readable, border-crossing identification card (also referred to as a *laser visa*) issued in accordance with the requirements of regulations prescribed under a specific section of the Immigration and Nationality Act.

U.S. Department of Health and Human Services

Value-Driven Health Care

.44 HHS has focused a spotlight on health care transparency. They feel consumers deserve to know the quality and cost of their health care, and they feel health care transparency provides consumers with the necessary information, and the incentive, to choose health care providers based on value.

.45 According to the HHS Web site, www.hhs.gov/valuedriven, health care transparency is built on four interconnected cornerstones.

1. **Connect the systems:** Every medical provider has some system for health records. Increasingly, those systems are electronic. Standards need to be identified so all health information systems can quickly and securely communicate and exchange data.

2. **Measure and publish quality:** Every case and every procedure has an outcome. Some are better than others. To measure quality, we must work with doctors and hospitals to define benchmarks for what constitutes quality care.

3. **Measure and publish price:** Price information is useless unless cost is calculated for identical services. Agreement is needed on what procedures and services are covered in each episode of care.

4. **Create positive incentives:** All parties—providers, patients, insurance plans, and payers—should participate in arrangements that reward both those who offer and those who purchase high quality, competitively priced health care.

.46 HHS published the final rule, *HIPAA Administrative Simplification: Enforcement*, in the February 16, 2006 *Federal Register* to impose civil monetary penalties on entities that violate the rules adopted by HHS to implement HIPAA Administrative Simplification provisions. The final rule provides that in the context of the HIPAA rules, a covered entity generally could be held liable for a civil monetary penalty based on the actions of any agent acting within the scope of the agency. A business associate will often be an agent of a covered entity. A covered entity that complies with the HIPAA rules governing business associates will not be held liable for a business associate's actions that violate the rules. If the covered entity does not enter into the requisite arrangements or contracts or does not take reasonable steps to cure a breach or end a violation by the business associate, it could be held liable for the actions of the business associate.

IRS

Community Benefit Survey

.47 In May 2006, the IRS sent a questionnaire to approximately 500 tax-exempt hospitals inquiring how they provide and report benefits to the community. Providing community benefit is required for hospitals seeking and retaining tax-exempt status under section 501(c)(3) of the Internal Revenue Code. In July 2007, the IRS released an interim report summarizing the responses to the questionnaire. According to the report, nearly all hospitals reported that they provided various types of community benefit. Although 97 percent of the responding hospitals said they have a written uncompensated care policy, there was no clear definition of what constitutes "uncompensated care." This lack of uniformity in definitions and reporting called for a separate schedule for hospitals on Form 990. As a result, the IRS recently released a discussion draft of that form to include a new Schedule H, where hospitals will report how they provide community benefit. The executive summary of the report is located at www.irs.gov/charities/charitable/article/0,,id=172267,00.html.

Redesigned Form 990 for Tax-Exempt Organizations

.48 In June 2007, the IRS released its draft Form 990. The discussion draft constitutes a significant redesign of the Form, which has not been overhauled since 1979. The IRS anticipates using the redesigned form for the 2008 tax year (returns filed in 2009). The proposed redesign does not affect the other forms in the IRS Form 990 series. The redesigned form is based on enhancing transparency, promoting tax compliance, and minimizing the burden on the filing organization. Additional information is located at www.irs.gov/charities/article/0,,id=171216,00.html.

Accounting Issues and Developments

FASB Interpretation No. 48

.49 FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes,* clarifies and expands the accounting and financial reporting for uncertainties related to income taxes. This FASB interpretation is applicable to all business enterprises whether they are taxable businesses or tax-exempt organizations. Tax positions taken by any organization that may represent potential future obligations to a taxing authority (IRS or state revenue department) may have to be recorded under this interpretation. For not-for-profit organizations, examples of tax positions that are subject to FASB Interpretation No. 48 include (1) a decision not to file a Form 990-T or state income tax return; (2) a decision not to characterize an activity as an unrelated business; (3) using an allocation method for expenses between related and unrelated activities; and (4) classifying an entity or a transaction as tax exempt. FASB Interpretation No. 48 also applies to tax-exempt organizations with net operating loss or a net operating loss carryover for unrelated business income tax purposes and tax positions taken in allocating expenses through joint venture and other business relationships with taxable entities.

FASB Staff Position (FSP) 126-1

.50 In October 2006, the FASB issued FASB Staff Position (FSP) FAS 126-1, *Applicability of Certain Disclosures and Interim Reporting Requirements of Obligors for Conduit Debt Securities*. This FSP clarifies the definition of a public entity in certain accounting standards to include entities that are conduit bond obligors for conduit debt securities that are traded in a public market. Most not-for-profit health care organizations that issue tax-exempt debt through governmental authorities fall under this definition of public entity. The FSP, effective for fiscal periods beginning after December 15, 2006, details the accounting standards impacted by the new definition.

.51 One significant impact of this FSP is its amendment of Accounting Principles Board (APB) Opinion No. 28, *Interim Financial Reporting*, requiring that not-for-profit health care organizations that issue quarterly financial information and are within the scope of the FSP to follow the reporting requirements of APB Opinion No. 28. In general, APB Opinion No. 28 requires that the operating results for each interim period be based on the accounting principles and practices used by an organization in preparing its latest annual financial statements unless a change in an accounting practice or policy has been adopted in the current year.

Accounting for Advanced Refunding of Debt

.52 Many health care organizations extinguish debt through a process often referred to as an advanced refunding. FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, provides guidance on the accounting for advanced refunding of debt, both for the debt to be treated as extinguished and also for the transfer of the U.S. government securities to the refunding escrow to accomplish the advanced refunding. Application of the statement's provisions generally requires health care organizations to obtain a legal opinion confirming the legal isolation of the transferred assets and the release of the health care organization as the primary obligor of the debt. The legal isolation criteria and the release from being the primary obligor must both be satisfied before an entity can derecognize the transferred assets and the extinguished debt.

Managed Investment Portfolios

.53 Health care organizations often outsource the management of their investment portfolios to third party investment managers. In some cases, the health care organization places restrictions on the trading activities of the third party investment manager such that management maintains control over investment decisions (for example, determining when to buy or sell specific securities). In other cases, there are no such restrictions placed on the third party investment manager. In situations where restrictions have not been imposed, management of the health care organization typically may not assert that they have the intent and ability to hold any impaired investments (that is, fair value is less than cost) until recovery. Without the intent and ability to hold an impaired security until anticipated recovery, the health care organization would be precluded from considering the severity and duration of the impairment in making the determination as to whether the impairment is "other-than-temporary." Accordingly, for not-for-profit health care organizations that classify their externally managed investment portfolio as "other-than-trading," any impairment would be considered other-than-temporary. Other-than-temporary impairment losses are included within the performance indicator, and a new cost basis for the related securities is established.

.54 Not-for-profit health care organizations that outsource the investment management function and classify their investment portfolios as other-than-trading should review the investment management agreements and determine the appropriate accounting treatment for any impaired securities. Many health care organizations are considering designating their investment portfolio as "trading." For trading securities, unrealized gains and losses on investments are included in the performance indicator, making it unnecessary to consider whether any impairments are other-than-temporary.

Other-Than-Temporary Impairment

.55 In February 2007, the SEC clarified existing guidance on asset impairment contained within SEC Staff Accounting Bulletin (SAB) No. 59, *Other-Than-Temporary Impairment of Certain Investments in Debt and Equity Securities*. Although SAB No. 59 contains several factors which must be considered in any determination of an other-than-temporary impairment, one key factor centers on an entity's intent and ability to hold an investment whose fair value is below cost ("impaired securities") for a sufficient period of time to allow for a potential recovery in that investment's fair value. Prior to the SEC's recent clarification of the SAB, the question was whether or not an entity could truly assert both a positive intent and ability to retain impaired securities until those securities' fair value recovers for investments managed by outside portfolio managers, where manager restrictions on selling impaired securities did not exist. Through its SAB No. 59 clarification, the SEC has made it clear that for any investment managed by an external portfolio manager, where restrictions are not placed on that manager with regard to selling impaired securities, an entity can no longer assert that it has both the positive intent and ability to hold impaired securities through potential recovery. This clarification has a potentially significant impact on any entity's classification and accounting for investments, as certain investments that may have historically been classified as other-than-trading may be more appropriately classified as trading.

.56 From an accounting perspective, FASB Statement No. 124, *Accounting for Certain Investments in Debt and Equity Securities by Not-for-Profit Organizations* and Chapter 4, "Investments," of AICPA Audit and Accounting Guide *Health Care Organizations*, prescribe the proper accounting for investments held by not-for-profit entities based on their classification. (Furthermore, FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, provides relevant guidance for the cash flows statement impact of accounting for investments.) Specifically, for investments classified as "trading," both unrealized investment gains and losses must be recognized as a component of net income. For investments classified as other-than-trading, unrealized investment gains and losses must be recognized as a component of unrestricted changes in net assets (or restricted changes in net assets for donor restricted funds which may be held in foundations, with the exception of other-than-temporary unrealized losses, which are recognized immediately as a component of the performance indicator (excess of revenues over expenses).

Quantifying Misstatements

.57 On September 13, 2006, the SEC released SAB No. 108, Topic 1N, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. Although the guidance is directed at registrants, it is also important for auditors of registrants as they consider and quantify the effects of misstatements in financial statements. The issuance provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement.

.58 Two methods have commonly been used to quantify such errors. Under one method, the rollover approach, the error is quantified as the amount by which the current year income statement is misstated. The other common method, the iron curtain approach, quantifies the error as the cumulative amount by which the current year balance sheet is misstated. Exclusive reliance on an income statement approach can result in a registrant accumulating errors on the balance sheet that may not have been material to any individual income statement, but that nonetheless may misstate one or more balance sheet accounts. Similarly, exclusive reliance on a balance sheet approach can result in a registrant disregarding the effects of errors in the current year income statement that result from the correction of an error existing in previously issued financial statements.

.59 The SEC staff believes registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The SEC staff believes that this can be accomplished by quantifying errors under both a balance sheet and an income statement approach and by evaluating errors measured under each approach. Thus, a registrant's financial statements would require adjustment when either approach results in quantifying a material misstatement after considering all relevant quantitative and qualitative factors.

.60 If, in correcting an error in the current year, an error is material to the current year's income statement, the prior year financial statements should be corrected, even though such a revision previously was, and continues to be, immaterial to the prior year financial statements. Correcting prior year financial statements for immaterial errors would not require previously filed reports to be amended. Such correction may be made the next time the registrant files the prior year financial statements. However, registrants electing not to restate prior periods should follow the disclosure requirements specified in SAB No. 108. In general, SAB No. 108 is effective for financial statements for fiscal years ending after November 15, 2006, with earlier application encouraged in any report for an interim period of the first fiscal year ending after November 15, 2006, and filed after the SAB's publication date of September 13, 2006. For additional accounting and transition information, see the issuance at www.sec.gov/interps/account/sab108.pdf.

.61 Since the issuance of SAB No. 108, the FASB has received inquiries about the application of SAB No. 108 to the private sector since they are not bound by SAB No. 108. The inquiries raised concerns that diversity will exist in the private sector relating to the determination of materiality associated with errors caused by the carryover or reversal of prior-year misstatements.

.62 On March 13, 2007, the FASB exposed for comment proposed FASB Staff Position Financial Accounting Standard (FSP FAS) No. 154-a, *Considering the Effects of Prior-Year Misstatements When Quantifying Misstatements in Current-Year Financial Statements*, which proposed guidance on how to evaluate and account for the correction of errors identified from the quantification of misstatements associated with the carryover or reversing effects of prior-year misstatements on current year financial statements. This proposed FSP applied to nongovernmental entities that are not subject to the requirements of SAB No. 108, which includes privately held entities and not-for-profit organizations. In absence of this guidance, private companies would not be permitted to have the same opportunity to clean up their balance sheets for passed prior-year audit adjustments without restating prior years, as allowed for public companies under SAB No. 108. The comment period for this FSP ended on April 30, 2007, and in its August 1, 2007 FASB Board Meeting, the FASB decided not to issue a final FSP and removed the project from its agenda.

Recent Auditing and Attestation Pronouncements and Related Guidance

.63 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal* *of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.64 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See "AICPA Risk Assessment Standards" in this alert.

(continued)

SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) Issue date: December 2005	SAS No. 103 supersedes SAS No. 96, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339) and amends AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1). Effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted, this SAS establishes standards and provides guidance to an auditor of a nonissuer on audit documentation.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective for periods ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.

Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
AICPA TPA TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This practice alert responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This practice alert provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.

The Auditor's Communication With Those Charged With Governance

.65 In December 2006, the Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.66 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.67 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.68 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.69 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.70 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable

whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management, and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.

- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Will Affect Practice

.71 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses, and communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.72 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.73 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.74 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.75 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor's time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.76 Another issue that may cause concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[1] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.77 The new requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.78 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.79 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).

(continued)

SAS No. 111, *Amendment to Statement on Auditing Standards No. 39*, Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.80 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks to the client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.81 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.82 In May 2007, the ASB issued two practice aids related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.83 Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.84 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, Dating of the Auditor's Report and Related Practical Guidance

.85 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.86 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.87 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information which it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements

.88 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scalable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.89 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.90 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.91 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB Emerging Issues Task Force (EITF) Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.
FASB Staff Positions (FSPs) (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA Statement of Position (SOP) 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.92 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the health care industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

Fair Value Measurements

FASB Statement No. 157

.93 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.94 Prior to this statement, there were different definitions of fair value and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying generally accepted accounting principles (GAAP). FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

FASB Statement No. 159

.95 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and No. 157.

.96 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

On the Horizon

.97 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the health care industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing GAAP or GAAS.

.98 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+ Professional+Conduct/Professional+ Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Overhaul Project—AICPA Audit and Accounting Guide Health Care Organizations

.99 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Health Care Organizations*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.100 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives.
- Structural and drafting improvements to make the standards easier to read and understand.
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities.
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards.

.101 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.102 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.103 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.104 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the

GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www. fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.105 Guidance issued by the PCAOB is included in "Recent Auditing and Attestation Pronouncements and Related Guidance" in this alert. For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.106 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.107 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.108 In June 2005, the FASB and IASB (the Boards) issued a number of exposure drafts for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The Boards expect to issue final statements during the third quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.109 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.110 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement*

No. 115, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.111 In December 2006, the FASB issued an exposure draft entitled, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.112 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.113 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the Boards are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The Boards are considering modifications to the treasury stock method and several scoping issues in which one of the Boards have issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The Boards are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.114 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information, but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the codification and retrieval project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.115 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in this alert in "Auditing Pipeline—Nonissuers") to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.116 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.117 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.118 The following are various resources that practitioners engaged in the health care industry may find beneficial.

Publications

.119 Practitioners may find the following publications useful with respect to the health care industry.

- Audit and Accounting Guide *Health Care Organizations* (2007) (product no. 012617kk)
- Audit and Accounting Guide *Not-for-Profit Organizations* (2007) (product no. 012647kk)
- Government Auditing Standards *and Circular A-133 Audits* (2007) (product no. 012747kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)

- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Compilation and Review—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklists/Checklist Supplement and Illustrative Financial Statements Health Care Organizations* (product no. 009027kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends and Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.120 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.121 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.122 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.123 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.124 To register or learn more, visit www.cpa2biz.com.

Webcasts

.125 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high-quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts.

Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.126 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.127 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.128 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.129 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.130 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.131 The AICPA sponsors an annual Health Care Conference in the fall. The Health Care Conference is a two-day conference designed to update attendees on recent developments related to the health care industry. The National Health Care Industry Conference is an unparalleled opportunity to gain the information and techniques you need to know to stay on top of trends to benefit your practice and your client offerings. With access to some of the nation's top health care specialists, you'll get up-to-the-minute information on the latest developments in health care issues. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

.132 The Governmental Audit Quality Center (GAQC) is a firm-based voluntary membership Center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC's primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm's governmental audits.

.133 The mission of the Governmental Audit Quality Center is to:

- Raise awareness about the importance of governmental audits.
- Serve as a comprehensive resource provider on governmental audits for member firms.
- Create a community of firms that demonstrates a commitment to governmental audit quality.
- Provide Center members with an online forum tool for sharing best practices as well as discussions on audit, accounting, and regulatory issues.
- List member firms to enable purchasers of governmental audit services to identify firms that are members.
- Provide information about the Center's activities to other governmental audit stakeholders.

.134 For more information about the GAQC visit gaqc.aicpa.org.

AICPA Center for Audit Quality

.135 The CAQ (formerly the Center for Public Company Audit Firms [CPCAF]) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.136 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ visit thecaq.aicpa.org.

AICPA Industry Expert Panel—Health Care

.137 For information about the activities of the Health Care Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_healthcare.htm.

Industry Web Sites

.138 The Internet covers a vast amount of information that may be valuable to auditors of health care organizations, including current industry trends and developments. Some of the more relevant sites for auditors with health care clients include those shown in the following table:

Organization	*Web Site*
Healthcare Financial Management Association	www.hfma.org
The Catholic Health Association of the United States	www.chausa.org
Federation of American Hospitals	www.americashospitals.com
Centers for Medicare and Medicaid Services	www.cms.hhs.gov
U.S. Department of Health and Human Services	www.hhs.gov

.139 This Audit Risk Alert replaces *Health Care Industry Developments—2006/07*.

.140 The Audit Risk Alert *Health Care Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to zdonahue@aicpa.org or write to:

Zachary T. Donahue, CPA
AICPA

Insurance Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS

INSURANCE INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of insurance industry entities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your insurance industry audits. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The insurance industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty have the potential to restrain economic growth. Then at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 basis points to 5.25 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. At their October 31st meeting, the Federal Reserve decided to decrease the federal funds rate and discount rate 25 basis points to 4.50 percent and 5.0 percent, respectively. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

Industry Trends and Conditions

Life and Health Industry

General Overview

.13 Over the past several years, life insurance companies have focused on products meant to accumulate wealth. Individual annuities comprise the largest component of industry premiums and profits. Growth in individual annuities continues to be spurred on by attractive 12-month equity market returns, despite a fair amount of equity market volatility during 2007 and the continued demand for benefit guarantees, including those with "for life" provisions. However, as a result of an aging population, concerns about the viability of the social security system and the shifting responsibility for retirement funds from employers to employees, life insurance companies are increasing the focus on products that ensure that an individual will not outlive his or her wealth. The early versions of these products were minimum guarantee products offered with variable annuities. The more recent focus includes variations on those minimum guarantee products as well as products that focus on longevity, liquidity, and retirement medical or long-term care expenses. However, a historically lower level of general market interest rates may reduce the opportunity for growth in earnings and surplus of fixed interest life and annuity products. Life insurers have responded to these challenges by offering creative financial options in addition to traditional mortality, morbidity, and investment returns as a part of basic product offerings.

.14 Overall, sales of traditional life insurance policies have seen small growth levels for several years; however, universal life products continue strong growth, largely on the success of no-lapse guarantee products.

.15 Life insurers competing in the market place will continue to focus on distribution, products, and product innovation, including the addition of more risky policyholder option features, risk management of those product features, and efficient use of capital.

.16 The U.S. life insurance industry is generally well capitalized with healthy asset quality (subprime exposure has not been a significant life insurance industry issue to date). However, certain important elements that may affect an auditor's risk assessment include, but are not limited to, the following:

- Limited historical or market policyholder behavior experience to be utilized by companies in pricing and reserving for recently issued policyholder financial options continues to affect the comparability of valuation amongst competitors and the availability of reinsurance capacity. (Although, the availability of reinsurance is beginning to loosen; see further discussion on reinsurance in the sections of this alert entitled "NAIC Reinsurance Disclosure and Filing Requirements" and "Reinsurance Arrangements.")
- A statutory principles-based approach to reserving for no-lapse guarantees is still a few years away and, as a result, large excess reserving needs remain for many of these contracts, causing a need to fund this excess statutory strain. The auditor can refer to AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), which provides guidance on obtaining and evaluating sufficient appropriate audit evidence to support significant accounting estimates. In evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate and, based on that understanding, should use one or a combination of the approaches included in AU section 342.

.17 Hedging programs developed by insurers in recent years to manage exposures to policyholder financial options are beginning to be tested as a result of the more volatile equity markets in 2007. Increased volatility adds to the cost of hedging strategies, which could either reduce insurers' profitability or result in additional risk. The auditor can refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities Estimates* (AICPA, *Professional Standards*, vol. 1), which provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in securities.

Other-than-Temporary Impairments

.18 Much attention has been given to the topic of other-than-temporary impairments, particularly those that may arise from increases in general market interest rates or increases in sector spreads. Other-than-temporary impairments may significantly affect life insurers' earnings as interest rates increase, causing certain securities to be impaired. Companies may need to record an impairment even if a decision to sell has not been made. One factor in not recording an impairment is whether the company has the positive intent and ability to hold these impaired securities until recovery or maturity. There may be situations under which a change in facts and circumstances would allow companies to subsequently change their intent to hold the securities until forecasted recovery.

.19 Under Statutory Accounting Principles (SAP), determining whether impairment has occurred on an investment under the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* is similar to generally accepted accounting principles (GAAP). Management needs to consider all available evidence in determining whether an impairment exists and if that impairment is other than temporary. For each type of investment, specific measurement criteria are set out in the Statements of Statutory Accounting Principles (SSAPs). Differences do arise between GAAP and SAP regarding the timing of an impairment loss for securities subject to Emerging Issues Task Force (EITF) Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets*. Additionally, under SAP, impairments related to interest rates or sector spreads are recorded when there is intent to sell the related security.

.20 The NAIC Manual requires that a loss be realized for other-than-temporary impairments of the value of investments. Significant judgment is involved in determining whether a decline in fair value is temporary or reflects conditions that are more persistent. Evidence should support management's assertion that a decline in fair value is only temporary. In their winter 2006 meeting, the NAIC's Emerging Accounting Issues Working Group (EAIWG) issued Interpretation 06-07, *Definition of Phrase "Other Than Temporary,"* which incorporates portions of Financial Accounting Standards Board (FASB) Staff Position (FSP) FAS 115-1 and 124-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* (paragraphs 6, 7, and 11), rejects other concepts (paragraphs 1–5, 8–10, 12–15, and 19), and adopts certain aspects of the consensus reached in EAIWG Interpretation 02-07, *Definition of "Other Than Temporary."*

Guarantees and Other Developments

.21 Variable annuity products that contain minimum guaranteed death benefits (MGDBs) or guaranteed minimum income benefits (GMIBs) pose additional consideration, which include the following:

- Companies may experience general account charges for the payout of these benefits (upon either death or annuitization, as applicable) when the market value of the separate account assets is not sufficient to support the level of benefit payment.
- GAAP and SAP may require insurers to establish reserves for variable annuity guarantees on these products, thereby placing strain on capital strength.

.22 The NAIC Risk Based Capital C3 Phase II initiative requires cash-flow testing for annuities or other products with exposure to interest-rate risks. Interest-rate risk may increase if there is a duration mismatch between assets and liabilities. Testing includes multiple scenarios with various interest rate fluctuations to determine whether reserves are adequate. This testing may cause some life insurers to increase their capital requirements for interest-sensitive products.

.23 Companies that issue universal life insurance with no-lapse guarantee mortality features are subject to the provisions of Statement of Position (SOP) 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts* (AICPA, *Technical Practice Aids*, ACC sec. 10,870), and should establish liabilities in addition to account balances if amounts assessed each period for the feature are expected to result in profits in earlier years followed by losses in subsequent years.

.24 SOP 03-1 contains guidance for accounting for MGDBs, GMIBs, and no-lapse guarantee features. These features are also addressed in FSP FAS 97-1, *Situations in Which Paragraphs 17(b) and 20 of FASB Statement*

No. 97, "Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments," *Permit or Require the Accrual of an Unearned Revenue Liability*, and in Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 6300.08, "Definition of an Insurance Benefit Feature" (AICPA, *Technical Practice Aids*). Management should be familiar with all of these pronouncements in applying the guidance in SOP 03-1. Auditors should also gain an understanding of these pronouncements, depending upon the circumstances at their clients.

Regulation XXX/AXXX Considerations

.25 State insurance regulators adopted regulation XXX in 2000 to provide for the cost of renewal guarantees in term insurance products. Later, universal life no-lapse guarantees based on the payment of minimum premiums were also covered by this regulation. In 2003, state regulators adopted AXXX, intended to capture secondary guarantees covered by other policy designs. It states, "Reserves need to be established for the guarantees provided by a policy." In many cases, life insurers have transferred the reserve requirements under these regulations to offshore reinsurance companies. As a result of significant growth in term insurance renewal guarantees and universal life no-lapse guarantees, some knowledgeable parties predict that the availability and cost of bank letters of credit backing offshore reinsurance could be severely affected within the intermediate future. Also, subsequent interpretation of these new regulations may result in some insurers being required to post additional statutory reserves to cover no-lapse guarantees.

.26 The NAIC formally adopted a change to AXXX that affects policies written after the effective date of July 1, 2005. It is anticipated that the change to AXXX will result in higher capital and reserve requirements, price increases for universal life policies with secondary guarantees, and revised product designs. Some life insurers are expected to use affiliated reinsurance relationships to cede these additional reserves, thereby decreasing the effect on earnings and return on equity. The change to AXXX will be in effect for two years, at which point it is expected that a principles-based approach for determining statutory reserves will be in place. On June 1, 2006, the NAIC legal staff ruled that state insurance commissioners may include lapse rates in their interpretation of Actuarial Guideline 38, *The Application of the Valuation of Life Insurance Policies Model Regulation*, when they formulate reserve requirements, and several key regulators are on record of supporting this action. This ruling may allow insurers to hold lower reserves while industry regulators and actuarial groups continue to work on a permanent rule to adopt principle-based reserving practices for statutory purposes. However, the timing and certainty of principles-based practices are not definite and probably will not occur within the upcoming audit year.

Property and Liability Industry

.27 The U.S. property and casualty insurance industry reported strong performance in the first half of 2007; however, certain concerns exist, as discussed in the next section of this alert. The industry combined ratio was 92.7 percent[1] for the first half of 2007, with an annualized statutory return on average surplus of 13.1 percent for the year, according to the Insurance Information Institute (III). Insurance companies were affected by record catastrophe losses in 2005; however, reduced hurricane activity during 2006 and 2007 has contributed to favorable 2007 operating results, resulting in restored levels of policyholder surplus.[2] According to the Insurance Services Office, the industry consolidated surplus increased by $26.6 billion or 5.5 percent in the first half of 2007 from its year-end 2006 level, to $512.8 billion, marking the first time that consolidated surplus exceeded the half trillion dollar mark.

.28 However, the industry continues to face a number of ongoing challenges including, but not limited to, the following:

---

[1] A combined ratio of 92.7 means that for every dollar of premium income that insurers earned during the first half of 2007, 92.7 cents exited in the form of claims payments, claims reserves, and expenses. The remaining 7.3 cents is underwriting profit.

[2] Policyholder surplus is a measure of claims paying capacity or capital.

- The possibility of above average catastrophe losses due to variable weather conditions and terrorist activity
- A continued soft market for rates
- Slow growth environment, driven in part by lower loss costs, that can lead to price competition
- Margin pressures as regulators limit insurers' recovery of the costs of catastrophes or reinsurance

Commercial Market

Property and Causality

.29 Continued strong profitability has led to increasingly stiff competition in the property and casualty market. Coverage is plentiful, and policies are being sold at low prices, reflecting the supply surplus in a buyers' market. Average premium rates for all commercial accounts decreased 11.8 percent during the second quarter of 2007, according to survey data released by The Council of Insurance Agents and Brokers. As premium prices fall and underwriters become more eager for new business, insurers are beginning to be more aggressive in pricing and more liberal with policy terms.

.30 One of the few exceptions to this pricing pressure is property insurance in catastrophe-prone areas. This is due in large part to court decisions in Mississippi and Louisiana, which have put upward pressure on prices and limited availability. However, the industry has seen a leveling of property catastrophe reinsurance as competition increases in combination with limited exposure since 2005.

.31 Realized investment gains have offset the declines in underwriting results, which has allowed companies to maintain strong levels of profitability. Because of the industry's conservative leanings towards investments, the turmoil in the subprime mortgage market has had limited impact on investments. Auditors would be advised to pay special attention to these investments, especially in light of the new fair value standards, which are discussed in detail later in this alert.

.32 In response to increased competitive market forces, an auditor can evaluate if the client has implemented liberal policy terms, added unattractive clients, or expanded its product mix. Is product classification and valuation appropriate, considering these management assertions may become more complex if policy terms are altered? Unattractive clientele increase the risk of loss surrounding potential claim payouts, which can affect valuation complexity. Furthermore, if new products have been rapidly developed in response to changing market conditions, an auditor may consider if there has been proper management review of long-term product strategies. A company's product mix may have a significant effect on the variability of loss reserves. New products can add to the subjectivity of the loss-reserving process because of a company's lack of experience with the new product and relative lack of relevant historical data.

.33 An auditor can refer to AU section 342, which states that the auditor's objective when evaluating accounting estimates is to obtain sufficient appropriate audit evidence to provide reasonable assurance that:

- All accounting estimates that could be material to the financial statements have been developed.
- Those accounting estimates are reasonable in the circumstances.
- The accounting estimates are presented in conformity with applicable accounting principles and are properly disclosed.

Automobile Insurance

.34 The III estimates that the average premium expenditure will drop by one half percent in 2007, which would be the first drop in the average premium since 1999. Reductions are possibly due to decreasing claim frequency coupled with only modest increases in claim severity throughout 2006 (the last period for which data was available). In 2006, as compared with 2005, claim frequency decreased between 3 and 5 percent, and the average cost per claim, which includes the cost of medical care and property damage, only increased from 2 to 4 percent. The increase in cost per claim is modest despite the ever increasing costs of medical care, which significantly affects automobile insurance pricing. Changing demographics of the U.S. population are also contributing to cost reductions because millions of baby boomers are now considered to be in what insurers consider their safest driving years.

.35 The auditor can evaluate the effect of the aforementioned variables on a client's operations. Evidence or expectations of increased competition, market saturation, or declining demand may lead to loosened underwriting standards and increased margin pressure. Additionally, implementation issues could surround newly implemented underwriting technology. AU section 319, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), describes the objectives and components of internal control and explains how an auditor should consider internal control in planning and performing an audit. Among other matters, the auditor can evaluate client operational internal controls, including, but not limited to, the sufficiency of controls surrounding IT advances and applicable manual procedures.

Potential Audit Risk Area—Claims Expense and Loss Reserves

.36 *Claim and claim expense payments*. In most cases, claim and claim expense payments originate with evidence of loss that may include signed proofs of loss, releases, medical bills, repair bills or estimates of repair costs, or invoices for fees of independent adjusters (for reinsurers, this evidence may be a notice of loss or broker's advice). When these documents are received, they are reviewed and analyzed for accuracy, consistency, and coverage under the associated policy before payment is authorized.

.37 Liabilities for the cost of unpaid claims, including estimates of the cost of claims incurred but not reported, are accrued when insured events occur. Under GAAP, the liability for unpaid claims is based on the estimated ultimate cost of settling the claims (that is, the total payments expected to be made) and should include the effects of inflation and other social and economic factors.

.38 Under GAAP, consideration should be given to the guidance in FASB Statement No. 5, *Accounting for Contingencies*; FASB Statement No. 60, *Accounting and Reporting by Insurance Enterprises*; FASB Interpretation No. (FIN) 14, *Reasonable Estimation of the Amount of a Loss—an interpretation of FASB Statement No. 5*; SOP 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (AICPA, *Technical Practice Aids,* ACC sec. 10,640); SOP 94-5, *Disclosures of Certain Matters in the Financial Statements of Insurance Enterprises* (as amended by SOP 01-5), (AICPA, *Technical Practice Aids,* ACC sec. 10,630); and the Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 87, *Contingency Disclosures on Property/Casualty Insurance Reserves for Unpaid Claim Costs*, which governs accounting and reporting if property liability loss reserves qualify as loss contingencies. Additional guidance can be found in SEC SAB No. 92, *Accounting and Disclosures Relating to Loss Contingencies*, and SEC Financial Reporting Release No. 20, *Rules and Guide for Disclosures Concerning Reserves for Unpaid Claims and Claim Adjustment Expenses of Property-Casualty Underwriters* (SEC Release No. 6559, vol. 49 of the Federal Register, page 47,594).

.39 Under SAP, SSAP No. 55, *Unpaid Claims, Losses and Loss Adjustment Expenses*, provides that the liability for unpaid losses and loss adjustment expenses shall be based upon the estimated cost of settling claims incurred (including the effects of inflation and other social and economic factors), using past experience adjusted for current trends and any other factors that would modify past experience. SSAP No. 62, *Property and Casualty Reinsurance*, and SSAP No. 65, *Property and Casualty Contracts*, provide guidance on reinsurance accounting and accounting for contracts having certain features, such as claims-made policies and high deductible policies, respectively.

.40 *Auditing Considerations*. Due to the increased number and complexity of transactions surrounding claims and claim expenses, especially following a catastrophic year such as 2005, inherent risk surrounding the recording and payout of claims can increase. Auditors would be advised to evaluate their client's response and adherence to criteria and related internal controls surrounding expenses.

.41 The identification of changes surrounding valuation variables and consideration of their effect on losses are critical audit steps. The evaluation of these factors includes the involvement of specialists and input from various operating departments within the company, such as marketing, underwriting, actuarial, reinsurance, and legal. Readers should remember that losses are only accrued for events that have occurred; catastrophe reserves are not allowed in anticipation of future events.

.42 AU section 342 states that the auditor should obtain an understanding of how management developed the accounting estimates included in the financial statements. Claims expense and loss reserve estimates are significant variables on an insurance company's financial statements. Accordingly, regardless of the approach used to audit claims expense and loss reserve estimates, the auditor should gain an understanding of how management develops estimates. Additionally, Chapter 4 and Appendix A of the AICPA Audit and Accounting Guide *Property and Liability Insurance Companies*, which incorporates SOP 92-4, *Auditing Insurance Entities' Loss Reserves* (AICPA, *Technical Practice Aids,* AUD sec. 14,230), is an additional source of guidance.

.43 Auditors can also refer to AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), as well as noting current practitioner prohibitions and restrictions that exist related to the performance of nonaudit services for audit clients, including certain actuarial services. Practitioners should be aware of and comply with these prohibitions and restrictions, including the AICPA, SEC, and Public Company Accounting Oversight Board (PCAOB) independence rules; new NAIC rules describing qualifications of an independent CPA included in the Annual Financial Reporting Model Regulation (Model Audit Rule) effective for 2010 statutory audits; and rules passed by the U.S. Government Accountability Office, state licensing boards, and others.

Potential Audit Risk Area—Reinsurance Recoverables

.44 FASB Statement No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts*, provides guidance on the recording and reporting of recoveries of losses that are reinsured. Consideration should be given to the terms of the reinsurance agreements and the creditworthiness of the reinsurer. Significant payment terms may be material to liquidity and required capital levels. See the detailed discussion of reinsurance in the "NAIC Reinsurance Disclosure and Filing Requirements" and "Reinsurance Arrangements" sections of this alert.

.45 *Auditing Considerations*. AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), requires auditors to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. A significant consideration in the auditor's evaluation of an insurance company's ability to continue as a going concern is whether the company complies with regulatory risk-based capital requirements. SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), requires that auditors communicate with those charged with governance events or conditions that lead the auditor to believe there is substantial doubt about the entity's ability to continue as a going concern.

Regulatory Developments

Recent Statutory Accounting Principles

.46 The NAIC continues to create and clarify statutory accounting guidance for insurance enterprises through its ongoing maintenance process. The most recent *Accounting Practices and Procedures Manual* (manual) was published by the NAIC as of March 2007. For manual subscribers, modifications made subsequent to the publication of the manual are available from the NAIC Web site at www.naic.org. Insurance laws and regulations of the state insurance departments require insurance companies domiciled in those states to comply with the guidance provided in the manual, except as otherwise prescribed or permitted by state law or regulation.

.47 The 2007 manual contains three new SSAPs, which were adopted during 2006:

1. SSAP No. 94, *Accounting for Transferable State Tax Credits*, requires that transferable state tax credits acquired be recorded at cost on the balance sheet, gross of any related state tax liabilities, and reported as other than invested assets. SSAP No. 94 also provides guidance on the accounting for redemption of state tax credits, gains and losses recognized on transferable tax credits, and impairment recognition for a transferable state tax credit asset. SSAP No. 94 is effective for reporting periods ending on or after December 31, 2006.

2. SSAP No. 95, *Exchanges of Nonmonetary Assets, A Replacement of SSAP No. 28—Nonmonetary Transactions*, adopts the guidance in FASB Statement No. 153, *Exchanges of Nonmonetary Assets—an amendment of APB Opinion No. 29*. SSAP No. 95 allows for an exception to measuring exchanges of nonmonetary assets at fair value when the nonmonetary exchange of similar productive assets does not have commercial substance. SSAP No. 95 is effective as of January 1, 2007.

3. SSAP No. 96, *Settlement Requirements for Intercompany Transactions, An Amendment to SSAP No. 25—Accounting for and Disclosures about Transactions with Affiliates and Other Related Parties*, requires that the terms of transactions between related parties be defined in a written agreement and that the agreement provides for timely settlement of amounts owed, including specified due dates. Any amounts owed to the reporting entity over 90 days past the due date or where the due date is not specifically addressed in a written agreement should be nonadmitted for statutory accounting purposes, unless specifically addressed by other SSAPs. SSAP No. 96 is effective for reporting periods ending on or after December 31, 2007.

.48 The NAIC has continued its ongoing discussion on proposed revisions to SSAP No. 88, *Investments in Subsidiary, Controlled and Affiliated Entities, a Replacement of SSAP No. 46*, as a result of numerous questions raised by regulators, industry representatives, and members of the accounting profession regarding its implementation. In early 2007, the NAIC drafted SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities—A Replacement of SSAP No. 88,* which is a proposed replacement to SSAP No. 88. The significant changes included in SSAP No. 97 currently being discussed include the following:

- Combined audited financial statements will be allowed in complying with requirements under SSAP No. 88 that subsidiary, controlled, or affiliated entities (SCA) be audited.
- Foreign Security Control Agreement entities will be allowed to provide audited financial statements on a foreign-GAAP basis, with an audited footnote reconciliation to U.S. GAAP, in complying with the audit requirement under SSAP No. 88.
- The "look-through" approach will be allowed, which permits a company to admit the value of a downstream holding company in certain circumstances.
- Language was added to clarify that the carrying value of an investment in an SCA should be reduced by the issuer's value of preferred stock or surplus notes.

.49 If adopted, SSAP No. 97 would be effective for reporting periods on or after December 31, 2007.

.50 Additionally, 11 new interpretations were adopted during 2006 and incorporated into the revised manual. As of the September 2007 NAIC SAP Working Group meeting, two new interpretations have been adopted that are effective for 2007. Additionally, several nonsubstantive revisions to various SSAPs and manual appendixes were made during 2006 and 2007 by the NAIC.

NAIC Reinsurance Disclosure and Filing Requirements

.51 Reinsurance disclosures were added to SSAP No. 62 effective for 2006 that consist of interrogatories directed at disclosing finite reinsurance situations. These reinsurance interrogatory disclosures are required to be included as accompanying supplemental schedules to the annual audited financial statements of property and casualty insurance companies beginning in 2006. These disclosures, which are also included as interrogatories in the annual statement, require detailed information about specific ceded reinsurance contracts. Reinsurance issues have taken center stage at the NAIC as regulators react to the former New York state attorney general's investigations of finite reinsurance, as well as allegations that undisclosed side agreements between ceding and assuming companies contributed to some property-casualty insolvencies. During 2005, the NAIC's SAP Working Group exposed updates to SSAP No. 62 that would expand disclosure requirements related to ceded reinsurance. These disclosures, which are also included as interrogatories in the annual statement, require detailed information about specific ceded reinsurance contracts.

.52 The new disclosures were included in response to interrogatories in the 2005 annual statement filings. During 2006, the reinsurance interrogatory requirement was further amended by limiting the reinsurance contracts to be included in this interrogatory to those contracts having an underwriting effect, written premium ceded, or loss and loss expense reserves ceded greater than 5.0 percent of the prior year surplus, effective for 2007. For 2006, the current limitation of 3.0 percent of surplus remains in effect for 2006 reporting. Beginning in 2006, these new reinsurance interrogatories are required to be included as accompanying supplemental schedules to the annual audited financial statements of insurance companies. As discussed briefly in this alert, during the 2006 winter NAIC meeting, the SAP Working Group adopted this proposed change to narrow the scope of disclosure. For the supplemental schedule to the audited financial statements, the scope of these disclosures is limited to reinsurance contracts entered into, renewed, or amended on or after January 1, 1994. The disclosures will be included in the 2006 audited financial statements for the first time. This limitation to post-1994 contracts does not apply to the disclosures in the annual statement interrogatories. These new financial statement disclosures include:

- Whether any quota share reinsurance contracts include provisions that would limit the reinsurer's losses below the stated quota share percentage (for example, a deductible, loss ratio corridor, loss cap, aggregate limits, or similar provisions). If such contracts exist, management is required to disclose whether the limiting provisions have had an effect on ceded losses.
- Whether any significant contracts contain any of six specific contractual features often associated with finite reinsurance arrangements.[3]
- Whether there are any significant contracts with related parties, other than approved pooling arrangements.
- Whether any contracts are accounted for as reinsurance under SAP and as deposits under GAAP, or vice versa, and, if so, why.

.53 For contracts meeting the first three bulleted criteria, management is further required to disclose a summary of the reinsurance contract terms, a brief discussion of management's principal objectives in entering into the agreement, including the economic purpose to be achieved, and the aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income.

[3] The six specific contractual features are (1) contact terms greater than two years when the contract is noncancelable by the reporting entity, (2) cancellation provisions that trigger an obligation on the reporting entity to enter into a new reinsurance agreement with the reinsurer, (3) aggregate stop loss reinsurance coverage, (4) an unconditional or unilateral right by either party to commute the treaty, (5) a provision permitting reporting or payment of losses less frequently than on a quarterly basis, and (6) any features designed to delay timely reimbursement to the ceding entity.

SSAP No. 9 Considerations

.54 SSAP No. 9, *Subsequent Events*, which was based on AU Section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), defines subsequent events and establishes criteria for recording such events in the financial statements or disclosing them in the notes to the financial statements. All information that becomes available prior to the issuance of the financial statements relating to a material Type 1 subsequent event (currently defined in SSAP No. 9 as "events that provide additional evidence with respect to conditions that existed at the date of the balance sheet and affect the estimates inherent in the process of preparing financial statements") shall used by management in determining the related accounting estimate.

.55 At the Fall 2007 NAIC meeting, the NAIC SAP Working Group adopted revisions to paragraph 13 of SSAP No. 55 in response to the issue of whether accounting judgments and estimates inherent in the preparation of statutory-basis financial statements should be updated to reflect Type 1 subsequent events occurring between the annual statement filing date and the issuance of the audited statutory-basis financial statements. This amendment clarifies that liabilities for unpaid claims, losses, and loss adjustment expenses within the scope of SSAP No. 55 are not expected to be reestimated. Rather, additional information that is obtained after the submission of the annual statement, which is not indicative of an error in the estimation process, is considered part of the continuous review process and should be reflected in the statement of operations in the period the change becomes known.

.56 Readers should be aware that this guidance applies only to unpaid claims, losses, and loss adjustment expenses within the scope of SSAP No. 55, and that to be compliant with SSAP No. 9 as currently written, companies will need to have a process in place to update other judgments and estimates for Type 1 subsequent events occurring between the annual statement filing date and the issuance of the audited statutory-basis financial statements.

Section 11 of the NAIC Model Audit Rule & AICPA Statutory Framework

.57 Section 11 of the NAIC Model Audit Rule requires that, in addition to the annual audited financial statements, each insurer provide the insurance department with a written report prepared by the accountant describing significant deficiencies in the insurer's internal control structure noted by the accountant during the audit. The current NAIC Model Audit Rule specifically references SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, for definitions and guidance on the reporting requirements. If significant deficiencies are noted, the written report should be filed annually by the insurer with the insurance department generally within 60 days following the filing of the annual audited financial statements. The insurer is required to provide a description of remedial actions taken or proposed to correct significant deficiencies, if the actions are not described in the auditor's report.[4]

.58 During the summer of 2006, the AICPA Auditing Standards Board (ASB) issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which replaced SAS No. 60. SAS No. 112 is effective for periods ending on or after December 15, 2006. SAS No. 112 conformed the definitions of significant deficiency and material weakness to those in PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With An Audit of Financial Statements*, prior to it being superseded.

.59 The AICPA and PCAOB internal control related definitions and guidance for evaluating control deficiencies were consistent until May 2007, when the PCAOB issued Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated With An Audit of Financial Statements* (AICPA,

---

[4] State laws may vary, and thus it is necessary that companies and their auditors verify reporting requirements by reference to domiciliary state laws and regulations. For example, some states require the filing of the SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended, report at the same time the audited financial statements are filed.

PCAOB Standards and Related Rules, Rules of the Board, "Standards"). The ASB has a project underway to revise AU section 325, as well as AT Section 501, *Reporting on an Entity's Internal Control Over Financial Reporting* (AICPA, *Professional Standards*, vol. 1), in response to the issuance of Auditing Standard No. 5 and the International Auditing and Assurance Standards Board's (IAASB) project related to this topic. However, the ASB revision of the standard is not expected until 2008, when the IAASB will have made further progress on its proposed International Standard on Auditing (ISA).

.60 For year-end 2007 audits, SAS No. 112 will not be revised to incorporate the revised definition of *significant deficiency* in Auditing Standard No. 5; the definition under SAS No. 112 should be used in complying with Section 11 of the NAIC Model Audit Rule.

.61 Due to changes over the past several years in AICPA and PCAOB auditing standards relating to communication of internal control matters noted in an audit, a resulting increase in the identification of deficiencies in internal control over financial reporting at many insurance companies, insurers have sought additional guidance on reporting internal control related matters to insurance regulators. The publication, *A Statutory Framework for Reporting Significant Deficiencies and Material Weaknesses in Internal Control to Insurance Regulators* (Statutory Framework), outlines a suggested framework for auditors to follow when reporting internal control deficiencies related to financial reporting identified during the course of an annual audit of statutory financial statements in accordance with Section 11 of the Model Rule and AICPA auditing standard (that is, SAS No. 112[5]) and can be found on the AICPA Web site at: www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_insurance.htm.

Terrorism Insurance Developments

.62 The market for terrorism risk insurance was severely disrupted by the events of September 11, 2001. Those events resulted in reinsurers no longer covering terrorism risk or offering coverage only at very high rates. On November 26, 2002, the president signed Terrorism Risk Insurance Act (TRIA) into law. TRIA established a temporary federal program of shared public and private compensation for insured commercial property and casualty losses resulting from acts of terrorism.

.63 Accordingly, terrorism exclusions on existing insurance policies were removed, and all policyholders had the ability to secure coverage for terrorism risk through mandatory offer requirements placed on insurers. TRIA, as amended in 2005, placed the federal government temporarily in the terrorism risk reinsurance business because the program was written to sunset on December 31, 2007. With expiration imminent, Congress is considering extending TRIA past December 31, 2007. The House of Representatives passed legislation in September 2007 to extend it and, on October 17, 2007, the Senate Banking Committee voted to pass their version out of committee. However, the timing of a full Senate vote and any necessary reconciliation of the two bills is uncertain at this writing and should be monitored by auditors. A summary of the 2005 amendments, which are currently in effect for 2007, are discussed in the following paragraphs of this alert.

.64 The 2005 amendments placed limits on the lines of business that can participate in the Terrorism Risk Insurance Program (TRIP), adding to existing exclusions (medical malpractice, reinsurance, life and health, crop, financial guaranty, and flood) the following lines: commercial auto, burglary and theft, surety, professional liability (as distinguished from directors and officers liability coverage), and farm owners multiple peril coverages. Thus, these lines are no longer required to participate in TRIP.

.65 Under the original program, once an insurer suffers a loss equal to its deductible, the U.S. Treasury covers 90 percent of the losses above the deductible. The insurer's deductible increases over the life of the

[5] SAS No. 112 specifies that, for its purposes, references to GAAP include a comprehensive basis of accounting other than GAAP.

program. In 2004, the deductible was equal to 10 percent and increased to 15 percent of direct-earned premium in 2005. TRIA also provides the U.S. Treasury with the authority to recoup federal payments via policyholder surcharges. The maximum amount of any potential policyholder surcharge that can be imposed is 3.0 percent per year. A summary of the major changes as a result of the amendments is as follows:

- The amendments increased the insurer deductible for the 2007 program year to 20 percent of the prior calendar year direct-earned premiums (the insurer deductible for the 2005 and 2006 program years were 15 percent and 17.5 percent of the prior program year's direct-earned premium, respectively).
- The amendments increased the industry aggregate retention amount for the 2007 program year to the lesser of $27.5 billion and the aggregate amount of insured losses for all insurers for the 2007 program year (the industry aggregate retention for the 2005 program year was $15 billion and for 2006, $25 billion).
- For the 2007 program year, the amendments established a program trigger of $100 million in aggregate industry insured losses resulting from certified acts occurring during the 2007 program year. (For the 2006 program year, the trigger was $50 million in aggregate industry insured losses resulting from certified acts occurring after March 31, 2006.)
- Subject to the 2007 program trigger, the amendments maintain the federal share of compensation under the program at 90 percent of the portion of the amount of insured losses exceeding the applicable deductible for the 2007 program year, while reducing the federal share to 85 percent of the portion of the amount of insured losses exceeding the applicable deductible for the 2007 program year.
- The 2005 amendments maintained the annual cap on insured losses at $100 billion for both the 2006 and 2007 program years.

.66 Auditors should remain alert to developments in this area and, depending on what laws are in place, assess effects to disclosures, liability accruals, and subsequent events for 2007 fiscal year ends. The concern is that, in the absence of TRIA, it is likely that terrorism exclusions will again become the norm for commercial line policies and that private reinsurers are not likely to fill the reinsurance capacity void if TRIA is not extended after December 31, 2007.

.67 The NAIC members have adopted a model bulletin to provide guidance to insurers related to rate filings and policy language that state regulators would find acceptable to protect U.S. businesses from acts of terrorism. They have also developed Model Disclosure Forms 1 and 2 to assist insurers in complying with TRIA. The model disclosure forms may be used and modified by insurers to meet their obligation under the rules, provide policyholders with the status of current coverage, and, in some cases, make a selection regarding future insurance coverage for acts of terrorism. Insurers must comply with state law and TRIA and are encouraged to review the disclosure forms in light of their current policy language, state legal requirements, and the provisions of the TRIA amendments and TRIP.

National Flood Insurance Program

.68 The National Flood Insurance Act of 1968 created the National Flood Insurance Program (NFIP) as this type of insurance was unavailable from the private insurance markets. NFIP was overwhelmed by claims from the 2004 and 2005 hurricane season and Congress was forced to raise the program's borrowing authority to pay claims. It became apparent that NFIP was in need of reforms in order to remain viable and to provide consumers the desired protection. Additionally, due to difficulty in the marketplace for consumers to obtain windstorm coverage and controversial decisions regarding coverage of claims from Hurricanes Rita and Katrina, there has been a move to have NFIP offer both flood and windstorm coverage. A House bill has passed to reform the program and offer windstorm coverage. The Senate Banking Committee will vote in October 2007 on its own legislative version to reform the NFIP; however, it does not propose an expansion of the program to the offering of windstorm coverage. Auditors should monitor developments in this area and, depending on what laws are passed, assess effects to disclosures, liability accruals, and subsequent events for 2007 fiscal year ends.

Reminder—Consideration of the Examiners Handbook

.69 The Model Audit Rule states that auditors shall consider the procedures in the NAIC *Financial Condition Examiners Handbook* (Examiners Handbook) in the conduct of the audit as the independent certified public accountant deems necessary. Although the AICPA supports increased communication with regulators and a better understanding of the financial examination process and procedures, it does not require auditors to perform procedures from the Examiners Handbook that they would not have otherwise performed as part of a generally accepted auditing standards (GAAS) audit. This provision of the Model Audit Rule places emphasis on giving consideration to the procedures contained in the Examiners Handbook. In planning the audit, auditors may consider incorporating into their planning documentation that they have given consideration to the Examiners Handbook procedures as they deemed necessary. In the conduct of financial examinations, examiners review, use, and rely upon the audit working papers.

Reminder—Actuarial Data Integrity

.70 The NAIC *Annual Statement Instructions: Property and Casualty* requires coordination among the auditor, the appointed actuary, and management and may potentially require additional procedures for the auditor related to claims loss and loss adjustment expense data. Section 9 of the instructions, "Scope of Examination and Report of Independent Certified Public Accountant," states:

> The insurer shall also require that the independent certified public accountant subject the data used by the appointed actuary to testing procedures. The auditor is required to determine what historical data and methods have been used by management in developing the loss reserve estimate and whether he or she will rely on the same data or other statistical data in evaluating the reasonableness of the loss reserve estimate. After identifying the relevant data, the auditor should obtain an understanding of the controls related to the completeness, accuracy, and classification of loss data and perform testing as (to) the understanding of the controls related to the completeness, accuracy, and classification of loss data, and perform (other) testing (as) the auditor deems appropriate. Through inquiry of the appointed actuary, the auditor should obtain an understanding of the data identified by the appointed actuary as significant. It is recognized that there will be instances when data identified by the appointed actuary as significant to his or her reserve projections would not otherwise have been tested as part of the audit, and separate testing would be required. Unless otherwise agreed among the appointed actuary, management and the auditor, the scope of the work performed by the auditor in testing the claims data in the course of the audit would be sufficient to determine whether the data tested is fairly stated in all material respects in relation to the statutory financial statements taken as a whole. The auditing procedures should be applied to the claim loss and defense and cost containment expense data used by the appointed actuary and would be applied to activity that occurred in the current calendar year (for example, tests of payments on claims paid during the current calendar year).

.71 There may be circumstances in which data deemed significant by the appointed actuary is not included as part of the statutory financial statement audit. This may result in a need for additional testing outside the scope of the statutory audit to comply with the NAIC data integrity requirements. The conclusion regarding the need for the auditor to perform additional procedures should be agreed with management, after discussion with the appointed actuary. Additional procedures needed to fulfill the NAIC requirement for data integrity could be accomplished through an Agreed-Upon Procedures report, performed in accordance with AICPA professional standards. In October 2004, the American Academy of Actuaries Committee on Property & Liability Financial Reporting published a paper on this area titled *Data Testing Requirement in 2004 P/C Annual Statement Instructions: Guidance For Actuaries Signing Statements of Actuarial Opinions on Loss and Loss Expense Reserves*. The paper can be found on the American Academy of Actuaries Web site at www.actuary.org.

Reminder—Access to CPA Audit Documentation

.72 An external auditor is required by the NAIC Model Audit Rule to provide timely access to or copies of audit documentation when requested by regulators.

.73 Interpretation No. 1, "Providing Access to or Copies of Audit Documentation to a Regulator," in AU section 9339, *Audit Documentation: Auditing Interpretations of Section 339* (AICPA, *Professional Standards*, vol. 1, AU sec. 9339.01–.15), addresses the responsibilities of an auditor when a regulator requests access to audit documentation. Auditors should note that PCAOB Auditing Standard No. 3, *Audit Documentation* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), supersedes AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), for audits of public companies and other issuers.

.74 The AICPA's task force on NAIC matters has worked actively with subgroups consisting of designated regulators and NAIC representatives to pursue ways to increase the examiners' reliance upon the statutory audit and use of underlying audit documentation. Suggested protocols were forwarded to the Financial Examiners Handbook Technical Group for consideration of possible revisions to the Examiners Handbook and have been incorporated into the handbook.

.75 The AICPA NAIC Task Force helped to establish the four-step process to provide a protocol for financial examiners who are having difficulty pursuing a resolution of (1) questions with respect to a firm's individual engagement to perform a statutory audit, (2) difficulties in gaining access to working papers, or (3) the regulator concerns about the work performed by the CPA. If a financial examiner determines that an additional response is required, after informing appropriate management, the financial examiner would contact the following individuals in this suggested order, as needed:

1. The engagement partner
2. The designated national firm representative (included on the NAIC Web site)
3. Chair of the insurer's audit committee
4. State board of accountancy, ethics (or quality review) committee, or other regulatory bodies deemed appropriate

.76 Firms or individual practitioners performing statutory audits of regulated insurance entities that wish to designate a national firm representative and have not already done so should contact NAIC representatives at (816) 783-8006 or (816) 783-8132.

Audit and Accounting Issues and Developments

Reinsurance Arrangements

Accounting Considerations

.77 During the past several years, the New York attorney general's office, the SEC, several state insurance departments, and other governmental and regulatory bodies have been investigating the use of finite risk reinsurance contracts and whether companies have properly accounted for these products. Several companies have restated previously issued financial statements to change their accounting for reinsurance arrangements and some insurance company executives have been indicted or are the subject of enforcement actions. Reinsurance accounting and reporting—in particular, the question of what constitutes an acceptable transfer of risk and whether side agreements having accounting consequences exist between ceding and assuming companies—continue to be important issues requiring careful analysis.

.78 FASB Statement No. 113 and FASB EITF Topic No. D-34, "*Accounting for Reinsurance: Questions and Answers about FASB Statement No. 113*," continue to be the primary sources of guidance used to determine whether a contract transfers risk and meets the conditions for reinsurance accounting. In May 2006, the FASB issued an invitation to comment on *Bifurcation of Insurance and Reinsurance Contracts for Financial Reporting*, which applies to policyholders, insurers, and reinsurers, with a comment deadline of August 2006. The invitation to comment asked for comments from buyers and sellers of insurance and reinsurance contracts and the users of their financial statements about the possible bifurcation of those contracts.

.79 At its December 6, 2006 meeting, the FASB discussed the comment letters received on the FASB Invitation to Comment, *Bifurcation of Insurance and Reinsurance Contracts for Financial Reporting*, and how to proceed with the risk transfer project. The board directed the staff to focus on the following items to enhance the current risk transfer guidance:

- Propose editorial changes, principally to FASB Statement No. 113, to clarify the minimum level of insurance risk transfer required for a contract to be accounted for as reinsurance under the statement.
- Develop improved insurance and reinsurance disclosure requirements highlighting (*a*) how and why the entity uses insurance and reinsurance, (*b*) how those contracts are accounted for, (*c*) any risk-limiting features included in those contracts, and (*d*) the effect of those contracts on the financial statements.
- Clarify that noninsurance company policyholders must evaluate whether the insurance contracts they hold transfer significant insurance risk using criteria like those for reinsurance contracts in FASB Statement No. 113.

.80 The FASB plans to issue an exposure draft in the fourth quarter of 2007 that will clarify the level of insurance risk transfer required for a contract to be accounted for as reinsurance, clarify that noninsurance entity policyholders must evaluate whether contracts they hold transfer significant insurance risk, and improve insurance and reinsurance disclosure requirements. Information on the status of this project can be found on the FASB's Web site at www.fasb.org/project/insurance_risk_transfer.shtml.

.81 EITF Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises;" EITF Issue No. 93-14, "Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprises;" and EITF Topic No. D-35, FASB Staff Views on Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises," represent guidance on required accruals when future rights and obligations under a multiple-year contract change based on loss experience to date.

.82 SOP 98-7, *Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk* (AICPA, *Technical Practice Aids*, ACC sec. 10,760), should be used to determine the appropriate method of accounting for contracts that do not meet the requirements for reinsurance accounting under FASB Statement No. 113. SOP 98-7 outlines the appropriate accounting for contracts based on whether the contract transfers:

- Only significant timing risk
- Only significant underwriting risk
- Neither significant timing nor underwriting risk
- An indeterminate risk

.83 Other accounting standards continue to have implications for transactions involving reinsurance arrangements. For example, FIN 46(R), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*, may necessitate counterparties to reinsurance arrangements placed in certain kinds of structures or entities (for example, catastrophe bond structures) to consider consolidation of these structures or entities. In addition, certain reinsurance contracts may contain embedded derivatives that require accounting in accordance with FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. Auditors may want to review FASB Statement No. 133 Implementation Issue No. B36, *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments*, which addresses embedded derivatives in modified coinsurance and coinsurance with funds-withheld arrangements and other contracts with similar provisions where, for example, a return under the contract is calculated based on a referenced pool of assets. This implementation issue, which was last updated in June 2006, can be accessed on the FASB Web site at www.fasb.org/derivatives/issuindex.shtml.

.84 As products become more advanced and complex, careful consideration is required to determine whether the contracts are being accounted for appropriately based on a complete understanding of the facts and circumstances. Alternative risk transfer products and finite risk covers usually present complex issues with respect to evaluating the contracts for risk transfer under FASB Statement No. 113 and to determine proper accruals under FASB Statement No. 60, FASB Statement No. 113, and EITF Issue No. 93-6 (for example, whether premium recognition should be accelerated as reinsurance coverage is exhausted). Auditors may need to assess whether companies have adequate internal controls to identify and analyze complex reinsurance agreements to determine the proper accounting.

Reinsurance Auditing Considerations

.85 Auditors of companies with significant reinsurance contracts may want to request that management state in its representation letter to the auditor that there are no side agreements to reinsurance contracts, or, alternatively, that the auditor has been informed of any such agreements to enable a determination as to whether the company has properly considered these in the accounting analysis for the contract. Auditors of companies with significant reinsurance contracts also may consider directing procedures under AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1) toward these arrangements to identify any of the following:

- Contracts backdated to avoid retroactive reinsurance accounting on coverage of losses that had already been incurred
- Side agreements to reimburse the reinsurer for covered losses or to return profits under a contract in a different accounting period, which may compel accounting accruals
- Linked contracts where losses experienced under one will be reimbursed under another in the future and which should be considered together in the risk transfer analysis
- Contracts whose terms do not make economic sense and indicate a side agreement, or linkage, with another contract that should be considered in the accounting evaluation
- Exclusive reinsurance arrangements with offshore assuming companies that raise consolidation questions
- Commutations where the settlements are not in accordance with contract terms and suggest a noncontractual agreement on the allocation of profits and losses
- Contracts where the risk transfer analysis supporting the accounting evaluation differs materially from and cannot be reconciled to cash flow analyses included in the underwriting file

.86 Paragraph .02 of AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *Professional Standards*, vol. 1), states that an independent auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he is aware at the time. Are company disclosures with respect to significant reinsurance agreements in accordance with FASB Statement No. 113, and are disclosures with respect to ongoing regulatory investigations, if any, adequate?

.87 Finite reinsurance investigations may reveal errors in financial statements on which the auditor has previously reported. AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* (AICPA, *Professional Standards*, vol. 1), provides guidance when the auditor becomes aware of facts that may have existed at the date of the auditor's report that may have affected the report had he or she been aware of such facts. In addition, Practice Alert 94-1, *Dealing with Audit Differences* (AICPA, *Technical Practice Aids*, PA sec. 16,010), provides guidance to auditors assessing the materiality of financial statement errors.

Fair Value Measurements

FASB Statement No. 157

.88 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.89 Prior to this statement, there were different definitions of fair value and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

.90 Auditors would be advised to pay special attention to the Fair Value Hierarchy discussed in paragraphs 22–30 of FASB Statement No. 157 as companies' determination of the hierarchical level of the fair value input could have significant impact on the valuation calculation.

.91 At its October 17, 2007 meeting, the FASB decided not to add a project to its agenda to defer the effective date of FASB Statement No. 157 in its entirety. However, the FASB directed the staff to evaluate other potential deferral alternatives, including a deferral for all assets and liabilities except financial assets and liabilities and derivatives subject to the scope of FASB Statement No. 133, private entities, or "small" entities. The FASB will discuss those alternative deferral options at a future board meeting. Readers should be alert to any further developments.

FASB Statement No. 159

.92 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.93 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year-end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically, the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

The NAIC's Sarbanes-Oxley Initiative Update

.94 The NAIC adopted changes to the Model Audit Rule related to Sarbanes-Oxley during its fall 2006 meeting, with the majority of the changes effective for 2010. The key areas of focus for the NAIC were auditor independence, corporate responsibility, and enhanced financial disclosures.

Significant Changes in Model Audit Rule

.95 Highlights of the significant changes made to the Model Audit Rule related to Sarbanes-Oxley include:

- Section 7: The time allowed to serve in the capacity as the lead or coordinating audit partner was decreased from seven to five consecutive years with a new five year break in service (previously two years), effective beginning with year 2010 statutory audits.
- Section 7: There is a list of nonaudit services that cannot be performed by the auditor in conjunction with the audit (the prohibitions generally agree with those designated by the SEC), effective for the year 2010 statutory audits.
- Section 9: To the extent required by AU section 319 for those insurers required to file a Management's Report of Internal Control Over Financial Reporting pursuant to Section 16 (see the "Section 16" bullet point that follows in this alert), the independent accountant should consider the most recently available report in planning and performing the audit of statutory financial statements.
- Section 11: Auditors should prepare a written communication of any unremediated material weaknesses that the insurer will furnish the domiciliary commissioner, effective beginning with year 2010 statutory audits. The current Model Audit Rule requires the auditor to prepare a report of significant deficiencies and material weaknesses in the insurer's internal control structure noted by the auditor during the audit. The AICPA NAIC Task Force has, for several years, undertaken efforts to confirm that states will accept the reporting of only those significant deficiencies and material weaknesses that are unremediated as of the balance sheet date, and it will continue to do so until the year 2010 effective date of the revised Model Audit Rule.

Until the revisions of this section become effective in 2010, representatives of the AICPA plan on obtaining negative clearance from regulators that they will continue to follow guidance contained in a March 9, 2005 letter sent to regulators. This letter contained suggested guidance for complying with Section 11 of the Model Audit Rule since the term *significant deficiencies* had a different definition under Sarbanes-Oxley than it had under Section 11 of the Model Audit Rule.

- Section 14: There are new specifications for the responsibilities of audit committees and the required qualifications of audit committee members, effective January 1, 2010. The premium threshold that triggers the requirement for independent audit committee members is $300 million assumed and direct premiums. The premium range for a majority of independent audit committee members is $300 to $500 million. The requirement for a supermajority of independent audit committee members is $500 million in premiums. Notwithstanding premium volume, all insurers are encouraged to structure their audit committees with at least a supermajority of independent audit committee members.

- Section 16: Every insurer required to file an audited financial report that has annual direct written and assumed premium of $500 million or more shall prepare a report of the insurers' or group of insurers' *Internal Control Over Financial Reporting* and file it with their insurance commissioner, effective December 31, 2010. The Model Audit Rule also includes a list of what should be included in *Management's Report of Internal Control Over Financial Reporting*. This report is prepared by management and is not audited. Section 9 (highlighted above) specifies the independent accountant's responsibilities as they pertain to this report.

Implementation Guide for Changes in Model Audit Rule:

.96 In September 2006, the NAIC adopted an implementation guide that was developed to assist insurers, auditors, and regulators in implementing the changes to the Model Audit Rule related to Sarbanes-Oxley. The new requirements within the Model Audit Rule related to auditor independence, corporate governance and internal control over financial reporting are proposed to become effective in 2010. As such, the implementation guide was published to assist companies in planning and preparing for compliance with the new requirements when they become effective. The implementation guide is included as Appendix G of the *Accounting Practices and Procedures Manual*, and is also included on the NAIC Web site at: www.naic.org/documents/committees_e_naic_aicpa_implementation_guide_exposed-Final_0314.pdf.

Recent Auditing and Attestation Pronouncements and Related Guidance

.97 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.98 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.
SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*. It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.

Recent Auditing and Attestation Pronouncements and Related Guidance	
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.
Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.

Recent Auditing and Attestation Pronouncements and Related Guidance	
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.
AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007	This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed

Recent Auditing and Attestation Pronouncements and Related Guidance	
(Applicable to audits conducted in accordance with PCAOB standards)	service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.
PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, Select SEC-Approved PCAOB Releases) Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.

Recent Auditing and Attestation Pronouncements and Related Guidance	
PCAOB Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522 (a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction • Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)
PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.99 In December 2006, the ASB issued SAS No. 114, which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.100 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61.

However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.101 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.102 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.103 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.104 In May 2006, the AICPA ASB issued SAS No. 112, which establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2. However, with the adoption of PCAOB Auditing Standard No. 5, the PCAOB redefined these terms, which now differ from SAS No. 112.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.
- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.
- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.105 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses and that are then communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.106 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.107 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.108 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct* or *remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.109 One issue that has arisen in audits of smaller entities is the increase in costs as a result of the time the auditor spends documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.110 Another issue that has caused concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, because doing so would impair independence.[6] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

.111 The requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and ISAs.

.112 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.113 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	***Effect on Existing Standards***
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).

(continued)

[6] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).
SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.114 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the client's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.115 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.116 In May 2007, the ASB issued two TIS related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.117 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*), discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.118 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*), discusses whether the provisions of SAS No. 103 related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.119 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.120 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.121 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information that it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.122 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scaleable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk-based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.123 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

.124 Readers should also be aware that the ASB has a project underway to revise AU Section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards* vol. 1), as well as AT Section 501 in response to the issuance of Auditing Standard No. 5 and the IAASB project related to this topic. However, the ASB revision of the standard is not expected until 2008, when the IAASB will have made further progress on its proposed ISA.

Recent AICPA Independence and Ethics Pronouncements

.125 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.126 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Interpretation No. 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*
FASB Emerging Issues Task Force (EITF) Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.
FASB Staff Positions (FSPs) (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
AICPA Statement of Position (SOP) 07-1 (AICPA, *Technical Practice Aids*, ACC sec. 10,930)	*Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*
TIS section 6140.20–.22 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss not-for-profit organizations fund-raising expenses.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.127 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the insurance industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077, or go online at www.cpa2biz.com.

SOP 07-1

.128 In June 2007, Accounting Standards Executive Committee (AcSEC) issued SOP 07-1, *Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*. At its October 17, 2007 meeting, the FASB added a project to its agenda to indefinitely defer the effective date of SOP 07-1. For entities that have not yet adopted the provisions of SOP 07-1, early adoption would not be permitted. The FASB directed the staff to prepare a draft of a proposed FSP for vote by written ballot. The FASB decided that the proposed FSP should have a 30-day comment period. Readers should be alert to any further developments.

.129 SOP 07-1 provides guidance for determining whether an entity is within the scope of the AICPA Audit and Accounting Guide *Investment Companies* (guide). For those entities that are investment companies under this SOP, the SOP also addresses whether the specialized industry accounting principles of the guide (referred to as investment company accounting) should be retained by a parent company in consolidation or by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity (referred to as an equity method investor).

.130 SOP 07-1 also provides guidance for determining whether investment company accounting applied by a subsidiary or equity method investee should be retained in the financial statements of the parent company or an equity method investor. That guidance should be used to evaluate relationships between (1) the parent company or equity method investor and (2) investees to determine, among other matters, whether the parent company or equity method investor (through the investment company) is investing for current income, capital appreciation, or both, rather than for strategic purposes. If the application of that guidance leads to the conclusion that investment company accounting should not be retained in the financial statements of the parent company or equity method investor, the financial information of the investment company should be adjusted as if investment company accounting had not been applied by the subsidiary or equity method investee for purposes of the consolidated financial statements of the parent company or the application of the equity method of accounting by an equity method investor.

FIN 48

.131 FIN 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, was issued in June 2006 and is effective for fiscal years beginning after Dec. 15, 2006. On November 7, 2007, FASB voted to defer the effective date of FIN 48 for nonpublic entities for financial statements for fiscal years beginning after December 15, 2007. This represents a one-year delay. FIN 48 states that the financial statement tax accrual may only contain positions that meet the "more-likely-than-not" standard, and any variances must be disclosed in the financial statements. This translates to more work for accountants and auditors on the tax accrual, as you evaluate even garden-variety issues, such as unreasonable compensation or expensing versus capitalization. It also means that positions taken on the return (or that were taken in any open year) that do not meet the "more-likely-than-not" standard will be disclosed and will likely be subject to increased IRS scrutiny.

.132 The evaluation of a tax position in accordance with this interpretation is a two-step process. The first step is recognition: The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement: A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.133 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109, *Accounting for Income Taxes*, is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this interpretation.

.134 For calendar-year corporations, the new rules would seem to initially take effect with first quarter 2007 results. However, the new rules require calendar-year corporations to have a "clean" starting point for their tax accounts at Jan. 1, 2007. In other words, the deferred tax asset and deferred tax liability accounts on that date must be determined in accordance with the standards of FIN 48.

.135 A practice guide for accountants, auditors, and tax advisers has been posted to the AICPA's Tax Center at www.aicpa.org/tax under the Resources tab. An AICPA CPE course on accounting for income taxes that has been updated for FIN 48 is now available and an AICPA webcast also is being presented. Go to www.cpa2biz.com for more information on these products.

Additional Implementation Guidance for FIN 48

FASB Staff Position FIN 48-1

.136 In May 2007, FASB issued FSP FIN 48-1, *Definition of Settlement in FASB Interpretation No. 48*. The purpose of this FSP is to amend FIN 48 to clarify that a tax position could be effectively settled upon examination by a taxing authority. Assessing whether a tax position is effectively settled is a matter of judgment because examinations occur in a variety of ways. In determining whether a tax position is effectively settled, an enterprise should make the assessment on a position-by-position basis, but an enterprise could conclude that all positions in a particular tax year are effectively settled. The FSP describes conditions for evaluating effective settlement of tax positions, provides guidance for determining effective settlement with respect to examination of tax positions by taxing authorities, and provides a number of conforming changes to FIN 48 with respect to the new settlement terminology discussed in the FSP. The full text of the FSP can be found at www.fasb.org/fasb_staff_positions/fsp_fin48-1.pdf.

FIN 48 and Independence

.137 In some instances, making such determinations under FIN 48 can involve relatively complex judgments, and practitioners have asked whether they may assist clients in applying FIN 48 without impairing their independence. At its July 19–20, 2007 meeting, the Professional Ethics Executive Committee (PEEC) considered this question and concluded that a member may assist an attest client in applying FIN 48 provided that the member is satisfied that the client understands the reasons why a specific tax position does or does not meet the more-likely-than-not threshold and the basis for the determination of the amount of related unrecognized tax benefits. In making this determination the PEEC referred to its longstanding position, in Interpretation 101-3, "Performance of nonattest services" under Rule 101, *Independence* (AICPA, *Professional Standards,* vol. 2, ET sec. 101.05), General Requirement No. 2, that the requirement that the client's "designated individual" possess suitable skill, knowledge, or experience to oversee the services does not mean that the individual must possess the technical expertise that the member possesses or the ability to perform or reperform the services.

.138 The PEEC believes that in most cases a member should be able to advise the client about whether a tax position meets the more-likely-than-not threshold and the likelihood that portions of the related tax benefit will not be realized, and adequately inform them of the factors upon which the member's advice was based and thereby enable the client to make an informed judgment on the results of the member's services and take responsibility for the work. In those instances, the PEEC believes that assisting the client in applying FIN 48 would not impair the member's independence. The staff of the AICPA Professional Ethics Division has issued nonauthoritative guidance on this matter by adding question 23 to the Q&As that appear on the division's Web site at www.aicpa.org/download/ethics/nonattest_q_a.pdf.

On the Horizon

.139 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the insurance industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.140 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	*Web Site*
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov
National Association of Insurance Commissioners (NAIC)	www.naic.org
International Accounting Standards Board (IASB)	www.iasb.co.uk/

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Overhaul Project—AICPA Audit and Accounting Guide *Property and Liability Insurance Companies*

.141 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Property and Liability Insurance Companies*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1990. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.142 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives
- Structural and drafting improvements to make the standards easier to read and understand
- Inclusion, in the explanatory material of the standards, of special considerations related to audits of public entities and small entities
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards

.143 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.144 The ASB has created a number of task forces charged with monitoring specific activities of the IAASB and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of ISA. The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.145 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of **Present Fairly in Conformity With Generally Accepted Accounting Principles**

.146 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled *Amendment to Statement on Auditing Standards No. 69,* The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.147 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.148 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

International Accounting Standards Board Insurance Contracts Project

.149 The International Accounting Standards Board (IASB) has untaken a project to develop an International Financial Reporting Standard (IFRS) on accounting for insurance contracts. The project will address accounting by both insurers and policyholders. The IASB is currently receiving comments on the discussion paper *Preliminary Views on Insurance Contracts* and currently expects an exposure draft to be published in 2009. The final IFRS standard is not expected to be completed until 2010. Additional information can be obtained from the IASB's Web site at: www.iasb.co.uk/.

.150 In response, the FASB has issued an invitation to comment on *An FASB Agenda Proposal: Accounting for Insurance Contracts by Insurers and Policyholders, Including the IASB Discussion Paper,* Preliminary Views on Insurance Contracts. The full invitation can be obtained from the FASB's Web site at: http://72.3.243.42/draft/ITC_Insurance_Contracts.pdf.

Business Combinations

.151 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and IASB accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.152 In June 2005, the FASB and IASB issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The FASB and IASB expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and IFRS No. 3(R), *Business Combinations*
- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.153 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Financial Guarantee

.154 On April 18, 2007, the FASB issued an exposure draft of a proposed statement, *Accounting for Financial Guarantee Insurance Contracts*, with a 60-day comment period. The comment period ended on June 18, 2007. On September 4, 2007, the FASB held a public roundtable meeting with respondents to the exposure draft to discuss significant issues raised in comment letters.

.155 The objective of this project is to improve the comparability of financial reporting by insurance enterprises by establishing a single approach for recognition and measurement of financial guarantee insurance contracts under FASB Statement No. 60. The focus of that reporting is on premium revenue and claim liabilities. A related objective is to improve the usefulness of information provided to users of financial statements by expanding disclosures about financial guarantee insurance contracts.

.156 The FASB plans to begin redeliberations of the exposure draft in the fourth quarter 2007. Readers should remain alert to any final issuances and visit the FASB Web site for further information.

Fair Value Option

.157 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.158 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure draft ended in March 2007, and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.159 The FASB is working on a project to amend FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, to address issues related to the permitted activities of a qualifying special-purpose entity (QSPE), isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued the exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.160 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB

Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.161 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.162 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA SAS No. 69. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor that is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in SAS No. 69, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.163 ***Proposed FASB EITF Issues.*** Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.164 ***Proposed FSPs.*** A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.165 The following are various resources that practitioners engaged in the insurance industry may find beneficial.

Publications

.166 Practitioners may find the following publications useful with respect to the insurance industry:

- Audit and Accounting Guide *Life and Health Insurance Entities* (2006) (product no. 012636kk)
- Audit and Accounting Guide *Property and Liability Insurance Companies* (2006) (product no. 012676kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)

AICPA reSOURCE: Accounting and Auditing Literature

.167 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, TPAs, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.168 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

.169 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.170 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.171 To register or learn more, visit www.cpa2biz.com.

Webcasts

.172 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.173 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.174 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.175 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.176 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (877) 242-7212.

Ethics Hotline

.177 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

AICPA CAQ

.178 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors, and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.179 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Insurance

.180 For information about the activities of the Insurance Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel _insurance.htm.

Insurance Industry Web Sites

.181 The Internet covers a vast amount of information that may be valuable to auditors of insurance entities, including current industry trends and developments. Some of the more relevant sites for auditors with insurance clients include those shown in the following table:

Organization	*Web Site*
National Association of Insurance Commissioners (NAIC)	www.naic.org/
Insurance Information Institute (III)	www.iii.org
Citizens Property Insurance Corporation of Florida (Florida Citizens)	www.citizensfla.com
Florida Hurricane Catastrophe Fund (FHCF)	www.sbafla.com/fhcf
Texas Windstorm Insurance Association (TWIA)	www.twia.org
Louisiana Citizens Property Insurance Corporation	www.lacitizens.com
The Mississippi Windstorm Underwriting Association (MWUA)	www.msplans.com/mwua
The Mississippi Residential Property Insurance Underwriting Association (MRPIUA)	www.msplans.com/MRPIUA
Alabama Insurance Underwriting Association (AIUA)	www.alabamabeachpool.org

.182 The insurance practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

AAM Section 8050

Bank, Credit Union, and Other Depository and Lending Institution Industry Developments—2007/08

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

NOTICE TO READERS

BANK, CREDIT UNION, AND OTHER DEPOSITORY AND LENDING INSTITUTION INDUSTRY DEVELOPMENTS—2007/08

This Audit Risk Alert is intended to provide auditors of financial statements of banks, credit unions, and other depository and lending institutions with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits of financial institutions and other lenders. This alert can also be used by an entity's internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or going online to www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards***. When referring to the professional standards, this alert cites the applicable sections as codified in the AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 The financial institutions industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the entity's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic, and the entity's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity's financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, GDP increased at an annual rate of 2.9 percent in 2006, consistent with the pace of growth experienced in 2005 when GDP increased by 3.1 percent. During the first quarter of 2007, GDP increased by an annual rate of only 0.6 percent. However, according to second quarter preliminary estimates, GDP increased at an annual rate of 4.0 percent.

.11 The unemployment rate remained relatively unchanged during 2006, holding between 4.4 percent and 4.8 percent, with an annual average rate of 4.6 percent representing approximately 7 million people. The 2006 rates represent the lowest annual rate and total number of jobless since 2000, according to the U.S. Department of Labor, Bureau of Labor Statistics. During the first half of 2007, the unemployment rate averaged 4.5 percent. These data further demonstrate the economic growth the United States has experienced since the beginning of 2006.

.12 After a period of rising rates during the first half of 2006, the Federal Reserve kept its target for the federal funds rate at 5.25 percent for 10 consecutive meetings (June 2006–August 2007). At that time, the Federal Reserve indicated future federal fund rate adjustments would likely depend upon the outlook for economic growth and inflation. Since its August 2007 meeting and in response to shaky financial market conditions, the Federal Reserve has taken several action steps. It announced that it would provide reserves as necessary through the open market to facilitate the orderly functioning of financial markets by promoting trading in the federal funds market at rates close to the 5.25 percent target rate. On August 17, 2007, it announced that financial market conditions had deteriorated and tighter credit conditions and increased uncertainty has the potential to restrain economic growth. Then at its September meeting, the Federal Reserve decided to lower its target for the federal funds rate 50 basis points to 4.75 percent citing increased uncertainty surrounding the economic outlook. The Federal Reserve also decided to decrease the discount rate 50 basis points to 5.25 percent to consistently keep the spread between the primary credit rate and the target federal funds rate at 50 basis points. Auditors should remain alert to developments in the financial markets and how they may affect your audit engagements.

Industry Trends and Conditions

The State of the Financial Institution Industry

.13 According to the Federal Deposit Insurance Corporation (FDIC) Quarterly Banking Profile issued for the first quarter of 2007, higher credit expense at large institutions and narrower net interest margins at smaller institutions caused a decrease in earnings of FDIC-insured institutions during the quarter. Industry net income was $36 billion for the first quarter of 2007, which is 2.5 percent less than the earnings posted in the first quarter of 2006. This is the largest year-over-year decline in quarterly earnings since 2001. Much of the decrease in income was attributable to a change in the way earnings were reported in the aftermath of large corporate restructurings. Lower operating results at a number of institutions also contributed to the earnings drop. Evidence of pressure on earnings was widespread as a majority of institutions reported lower quarterly net income.

.14 Average return on assets (ROA) for institutions for the first quarter of 2007 was 1.21 percent, compared to 1.34 percent in the first quarter of 2006. Fifty-nine percent of all institutions experienced a decline in quarterly ROA. This is the lowest first quarter ROA for the industry since 2001.

.15 Provisions for loan losses totaled $9.2 billion in the first quarter of 2007. This reflects a 54.6 percent increase compared to the first quarter of 2006. Noninterest expense also increased $3 billion during 2007 as several large banks reported higher payroll expenses. Increased interest income helped to offset these higher costs.

.16 Auditors should consider the pressures financial institutions are facing when planning and performing the audit engagement. Auditors have a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Paragraph .32 of AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), explains that when obtaining information about the entity and its environment, an auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud. Paragraph .33 of AU section 316 lists three conditions generally present when fraud exists: incentive or pressure to perpetrate fraud, an opportunity to carry out the fraud, and attitude or rationalization to justify the fraudulent action.

The State of the Banking Industry

.17 According to the FDIC's Quarterly Banking Profile, at the end of March 2007 there were 8,650 FDIC-insured commercial banks and savings institutions reporting financial results, which represented a net decline of 31 institutions compared to reporting institutions at the end of 2006. There were 41 new banks reporting during the first quarter while 72 institutions were absorbed by mergers. One FDIC-insured bank, with $15.3 million in assets, failed during the quarter. The FDIC's "problem list" increased during the quarter from 50 to 53 institutions.

.18 Total deposits grew by $70 billion, which was the smallest quarterly increase since the third quarter of 2003. Domestic deposits increased by $63.3 billion during the quarter. Interest bearing account deposits grew by $43.8 billion, which outweighed a decline in noninterest bearing deposits.

.19 As lending markets continue to show weak results, banking executives are searching for alternative uses for excess capital. Since the beginning of 2007, the challenge has been to find appropriate assets to maximize excess capital. The trend, thus far, is to utilize assets outside of the usual industry capital allocations. Banks are beginning to invest in investments like embedded derivates, which are riskier than loans. This is being done in an attempt to deploy excess capital. Another result of increased capital is the issuance of larger dividends to shareholders. The impact of increased dividends to shareholders is a decrease in each respective institution's retained earnings.

The State of Credit Unions

.20 In a June 21, 2007, letter to members, the Chairman of the National Credit Union Administration (NCUA) reported that the condition of the credit union industry remains sound. This statement is based on data from call reports submitted to the association by all federally insured credit unions. The letter points out that very strong share growth, increasing net worth dollar levels, and lower delinquency and charge-off loan ratios have all contributed to the sound state of the credit union industry. The letter explained that loan growth this quarter continued to come from the real estate portfolio. Credit unions that hold real estate portfolios are urged to continue to offer members sound products.

.21 Credit unions are encouraged to continue to assess their asset-liability management and liquidity management planning processes. Auditors should be aware of management's asset-liability and liquidity management processes when performing the audit. Understanding such processes will assist the auditor in the risk assessment. AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors on analytical procedures used during the planning phase of the audit and those used as substantive tests.

NCUA and Financial Crimes Enforcement Network Host First Ever Joint Seminar on Bank Secrecy Act Compliance Programs

.22 The NCUA and Financial Crimes Enforcement Network (FinCEN) recently held a joint Web-based seminar titled "BSA: A Year in Review and Setting the Table for 2007." The goal of the seminar was to educate credit unions about their Bank Secrecy Act (BSA) obligations. More than 2,000 members of the credit union industry participated in the seminar.

The State of Financial Service Companies[1]

.23 Finance companies provide lending and financing services to consumers (consumer financing) and to business enterprises (commercial financing). A number of finance companies engage solely in consumer or commercial financing activities; others provide both types. Examples of financial service companies include insurance companies, businesses that provide financing to entice the purchase of goods, and consumer finance companies.

.24 Numerous state and federal statutes affect finance companies' operations. Some statutes apply only to specific types of activities. Regulations affecting finance companies generally are limited to matters such as loan amounts, repayment terms, interest rates, and collateral; they generally do not address financial accounting and reporting.

Delinquencies Increase in Latest Mortgage Bankers Association National Delinquency Survey

.25 The delinquency rate for mortgage loans on 1-to-4-unit residential properties stood at 5.12 percent of all loans outstanding in the second quarter of 2007 on a seasonally adjusted basis, up 28 basis points from the first quarter of 2007 and up 73 basis points from 1 year ago, according to the Mortgage Bankers Association (MBA) National Delinquency Survey.

.26 The delinquency rate does not include loans in the process of foreclosure. The percentage of loans in the foreclosure process was 1.40 percent of all loans outstanding at the end of the second quarter, which is an increase of 12 basis points from the first quarter of 2007 and 41 basis points from 1 year ago.

.27 The rate of loans entering the foreclosure process was 0.65 percent on a seasonally adjusted basis, 7 basis points higher than the previous quarter and up 22 basis points from 1 year ago. This quarter's foreclosure starts rate is the highest in the history of the survey, with the previous high being last quarter's rate.

---

[1] Practitioners may also find the AICPA's Audit Risk Alert *Insurance Industry Developments—2006/2007* helpful when auditing financial service companies. This alert will help you plan and perform your audits by identifying the significant business risks that may result in the material misstatement of your client's financial statements.

.28 Similar to last quarter, the national delinquency and foreclosure rates are being driven by what is taking place in a few large states. Additionally, the performance of prime and subprime adjustable rate mortgages (ARMs) is contributing significantly to the overall results.

.29 As reported in the June 13, 2007, issue of *American Banker*, financial service companies will continue to reach out to the nation's rapidly growing minority community. Financial service companies are focusing on smaller cities such as Albany, New York, and Toledo, Pennsylvania, as alternatives to competing for immigrant deposits in metropolitan cities like New York City or Los Angeles.

The State of Mortgage Banking

.30 *American Banker* recently reported that home resales hit a 4-year low due to continued price decline. Many in the housing industry believe the decline in resales signifies a protracted housing slump. Another issue contributing to sluggish home sales is the rising number of foreclosures of properties financed with subprime debt. Auditors should consider the current real estate climate when conducting an audit of a mortgage company. Awareness of the business environment in which the institution operates could provide valuable insight on loan policies and the organization's internal controls. For example, mortgage companies that are subsidies of insured depository institutions are subject to increased scrutiny from underwriters. Pressure from reduced home sales could entice management to override internal controls. For example, a mortgage banking manager may be enticed to circumvent the company's loan application review policies to make a loan to a high risk borrower. AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1), provide guidance for the auditor's consideration of an entity's internal control in an audit of financial statements. As home sales decline, many financial institutions may begin to aggressively cut expenses. Per AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1), auditors have a responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time not to exceed one year from the date of the financial statements being audited.

.31 Auditors should also consider whether the institution is considering or in the process of restructuring its loan origination or securitization departments. The auditor may refer to Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards Nos. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, and 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, for guidance. Additional guidance for public companies is included in Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 100, *Restructuring and Impairment Charges*, which provides guidance on the accounting for and disclosure of certain expenses and liabilities commonly reported in connection with restructuring activities and business combinations and the recognition and disclosure of asset impairment charges.

.32 On June 8, 2007, the Federal Financial Institutions Examination Council (FFIEC), which consists of the Board of Governors of the Federal Reserve System, FDIC, NCUA, Office of the Comptroller of the Currency (OCC), and Office of Thrift Supervision (OTS), published final illustrations of consumer information intended to assist institutions as they implement the consumer protection portion of the interagency guidance on nontraditional mortgage product risks. The three illustrations present examples of the types of information contemplated in the guidance. Institutions have discretion in determining whether to tailor and use the illustrations provided.

Federal Reserve Panel Announcement

.33 In June 2007, the Federal Reserve Board announced the panelists for its public hearing under the Home Ownership and Equity Protection Act. They include key players in the home mortgage market, including the subprime sector lenders, brokers, secondary market participants, consumer advocacy and community development organizations, academics and researchers, and state regulators.

.34 The focus of the public hearing is to gather information on how to develop rules to stop fraud and abusive practices in the home mortgage market. The rules must be drafted to sharply and clearly avoid the unintended consequence of restricting consumers' access to responsible subprime credit. Several states are expected to participate in the hearing to draft updated rules on predatory lending.

Small Banks Begin to Enter the Mortgage Sector

.35 As reported in the June 22, 2007, edition of *American Banker*, the recent decline of the subprime mortgage sector could allow smaller banks to emerge as players in the mortgage sector. Many of the national and large regional banks are consumed with problems and damage control as a result of risky lending. In the past, this sector was dominated by conglomerate banks.

Subprime Mortgage Update

.36 On May 17, 2007, Ben S. Bernanke, Chairman of the Board of Governors of the Federal Reserve System, commented that the rise in delinquencies among subprime ARMs was due to several causes. These causes include rising interest rates, moderate economic growth, decline in the housing market, and regional economic problems.

.37 Bernanke noted that the practices of several mortgage originators to loosen underwriting standards contributed to the problems in the subprime market. As the underlying pace of mortgage originations slowed but the demand for securities with high yield rates strengthened, some lenders loosened underwriting standards. The loosened standards undoubtedly contributed to defaults occurring within a few months of origination. Bernanke explained that mortgages sold generally pass a large amount of risk to the investor, rather than being borne primarily by the company that originated the loan, which may have contributed to the loosening of underwriting standards. In addition to weakened standards, incentive structures that tied originator revenue to the number of loans finalized, instead of the quality of loans made, are also a cause for concern.

.38 Despite subprime woes, Bernanke indicated that the market had shown signs of self-correction. Although credit spreads on new subprime securities have risen, the volume of subprime mortgage backed securities issued has slowed. That does not mean that the subprime market has evaporated. Although some subprime lenders have gone out of business, other entities such as hedge funds and investment banks have started to purchase subprime mortgage backed securities. Importantly, Bernanke pointed out that the majority of troubled lenders have not been institutions with federally maintained deposits.

.39 Auditors may need special skills or knowledge to plan and perform auditing procedures for institutions that deal with subprime mortgages. This is very important when considering whether an institution has disclosed its subprime lending activities properly. AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1), states that for some derivatives and securities, generally accepted accounting principles (GAAP) may prescribe presentation and disclosure requirements. Furthermore, AU section 332 advises the auditor to consider the form, arrangement, and content of the financial statements (including the notes) when evaluating the adequacy of presentation and disclosure. Auditors may also consider using a specialist when determining how to audit an entity that deals in derivatives. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance on the use of a specialist during an engagement.

Subprime Strategies

.40 The rapid growth of subprime mortgages has led to the equally rapid growth of subprime mortgage repossessions. Subprime mortgage repossessions occur when a borrower who is unable to make payments must surrender the mortgage to the lender. There are several strategies that lenders can use to help ensure that they survive subprime meltdown. Examples of subprime strategies include retaining sufficient capital to withstand some subprime turn around; maximizing liquidity and if necessary cutting costs; maintaining a strong credit position; having written plans; and being willing to take action against any broker that puts together fraudulent loans.

.41 There is growing speculation that the problems and risks associated with subprime mortgages, for example, increased risk of past due credit card payments, may spread to other financial transactions. According to a June 25, 2007, article in the *Wall Street Journal* titled "Beyond Subprime, Risks Abound," the bond market is one industry that is already feeling the pressure from subprime mortgages. According to Emerging Portfolio Fund Research Global, investors pulled more than $1 billion out of high yield bond funds in the 2 weeks leading up to the June 2007 article. Another concern is the way ARMs will react as subprime woes continue to trickle down the mortgage industry.

.42 Auditors may consider the overall impact of an entity's portfolio of subprime mortgages when auditing the financial statements of a financial institution. The auditor may consider the institution's internal controls as well as policies that affect the management of subprime mortgages, for instance, the amount reported as the allowance for loan and lease losses.

Subprime Foreclosures

.43 Recently the OCC expressed concern over foreclosures due to subprime mortgages, pointing out that the cost of foreclosure extends not only to the borrower, but also to the local communities that may experience a decline in property value and those in the community who may want to refinance or obtain new financing. Leaving a property vacant during foreclosure can create a negative cycle of disinvestment and lead to decline in an entire community. On June 26, 2007, the OCC released an *Insights* report titled "Foreclosure Prevention: Improving Contact with Borrowers." The report is based on strategies banks are using to prevent foreclosures and mitigate credit loss. The OCC believes that early contact with borrowers is critical to minimizing the detrimental effects of foreclosure. If banks are able to keep homeowners in their homes, they prevent credit losses and maintain customer relationships. Another factor that is helping reduce the number of foreclosures is the use of third parties, such as nonprofits or other interested parties. As a result of third party involvement, many nonprofits are offering counseling services to at-risk homeowners across the nation. The OCC offers three strategies that financial institutions may use to reach borrowers who are behind in their mortgage payments. The first two strategies involve direct customer contact by a loan officer or interested third party, such as a nonprofit counseling agency. The third strategy depends on the borrower using a toll-free telephone number to call the loan servicer or a counseling agency. The full text of this *Insights* report can be accessed at www.occ.treas.gov/cdd/Foreclosure_Prevention_Insights.pdf.

.44 On Sept. 4, 2007, the federal financial institution regulators and the Conference of State Bank Supervisors issued a joint statement on loss mitigation strategies for servicers of residential mortgages. This statement encourages federally regulated institutions and state-supervised entities that service mortgage loans to pursue strategies to mitigate losses while preserving homeownership to the extent possible and appropriate. As a number of adjustable-rate mortgages reset, concerns remain that borrowers subject to these significant payment shocks and increased payments will be more likely to default on the loan.

.45 In the statement, the agencies acknowledge that many subprime and other mortgage loans are sold or transferred, commonly into securitization trusts, with the servicing for these securitized loans maintained by the originating institution. Questions have arisen in recent months on the ability of servicers to restructure loans in jeopardy of foreclosure without nullifying the prior sale for accounting purposes under FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. The statement reminds institutions that this authority is governed by the terms of contract documents, typically referred to as pooling and servicing agreements.

.46 This statement urges servicers to use the authority that they have under the governing documents to take appropriate steps when an increased risk of default is identified, including the following:

- Proactively identifying borrowers at heightened risk of delinquency or default, such as those with impending interest rate resets
- Contacting borrowers to assess their ability to repay
- Assessing whether there is a reasonable basis to conclude that default is "reasonably foreseeable"
- Exploring, where appropriate, a loss mitigation strategy that avoids foreclosure or other actions that result in a loss of homeownership

.47 The releases can be found at the FDIC Web site at www.fdic.gov/news/news/financial/2007.

Final Statement on Subprime Lending

.48 On June 29, 2007, the federal financial regulatory agencies (Board of Governors of the Federal Reserve System, FDIC, NCUA, OCC, and OTS) issued the *Statement on Subprime Mortgage Lending* to address issues related to ARMs. The statement can be accessed at www.federalreserve.gov/boarddocs/press/bcreg/2007/20070629/default.htm. The agencies' primary concern is the possibility of "rate or payment shock" to the borrower that may result from the expiration of a fixed introductory rate to an adjustable variable rate for the duration of the loan. The statement is also designed to protect consumers from unfair, deceptive, and other predatory practices and to ensure that consumers are provided with clear and balanced information about the risks of subprime loans.

.49 The statement addresses the need for financial institutions to maintain strong controls to manage the risks associated with these products. Institutions should develop strong controls that monitor whether actual practices are consistent with established policies and procedures. The controls should address compliance and safe guard consumer information concerns. Examples of important controls institutions may adopt include establishing criteria for hiring and training personnel, entering and maintaining relationships with third parties, and conducting ongoing due diligence on third parties.

.50 The statement describes the prudent safety and soundness and consumer protection standards that financial institutions can employ to ensure that loans are made to customers who can afford to make the payments. These standards include a fully indexed, fully amortized qualification for borrowers and cautions on risk-layering features, including an expectation that stated income and reduced documentation should be accepted only if there are documented mitigating factors that clearly minimize the need for verification of a borrower's repayment capacity. Consumer protection standards include clear and balanced product disclosures to customers and limits on prepayment penalties that allow for a reasonable period of time, typically at least 60 days, for customers to refinance prior to the expiration of the initial fixed interest rate period without penalty. It should be noted that there is no supervisory expectation for institutions to waive contractual terms with regard to prepayment penalties on existing loans. The statement reinforces the April 17, 2007, interagency *Statement on Working with Borrowers*, which encouraged institutions to work constructively with residential borrowers who are financially unable or reasonably expected to be unable to meet contractual payment obligations on their home loans. Workout arrangements that are consistent with safe and sound lending practices are generally in the long-term best interest of both the financial institution and the borrower. Auditors should be aware of and document their understanding of an institution's policies in relation to workout arrangements and potential foreclosures. The auditor should determine if the financial institution is properly disclosing any workout agreements it may have with clients. Auditors may refer to AU section 431, *Adequacy of Disclosure in Financial Statements* (AICPA, *Professional Standards*, vol. 1), when considering whether an institution has adequately disclosed the risk of foreclosure as a contingency.

Legislative and Regulatory Developments

Watters v. Wachovia—Where the Supreme Court Decision May Lead U.S. Banks

.51 In an April 2007 decision, the U.S. Supreme Court asserted that the National Bank Act and certain OCC regulations "preempt" state consumer protection laws that subject a national bank's operating subsidy to certain state licensing, reporting, and supervisory requirements. This decision was made even though many in Congress and industry question whether the OCC and OTS are equipped to properly regulate the consumer protection side of business regulation. Federal regulations have, historically, carried an automatic blanket exemption from state consumer protection regulations, and this is an advantage over local banks.

.52 As a result of the decision, state regulators must take a "hands-off" approach when dealing with national bank chains. In addition to that approach, there are questions about what a state can regulate when dealing with the "business of banking." Another interesting consideration is the fact that the OCC and federal courts have not defined what constitutes the business of banking as that business relates to national banks. Readers should remain alert to any developments.

New Regulator for Fannie Mae, Freddie Mac, and the Federal Home Loan Banks

.53 On May 22, 2007, the House of Representatives voted 313 to 104 to approve legislation HR 1427 that would create a new regulator for Fannie Mae, Freddie Mac, and the Federal Home Loan Banks. Included in the bill was an amendment that forbids government-sponsored enterprises from purchasing mortgages from sellers that do not hold social security numbers. The amendment passed 217 to 205; it is yet to be voted on by the Senate. Readers should remain alert to any developments.

BSA and USA PATRIOT Act Regulations

.54 The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (USA PATRIOT Act) was passed to strengthen our nation's ability to combat terrorism and prevent and detect money laundering activities in all financial institutions. In March 2006, the USA PATRIOT Act was renewed, making permanent several sun setting provisions, extending two provisions until 2009, and incorporating a number of new right protections. Money laundering provisions of the USA PATRIOT Act described here were made permanent.

.55 Broad authority to develop anti-money laundering regulations applicable to each of the various segments of the financial services industry was delegated to the Treasury Department. Discussed in the following paragraphs are sections of the USA PATRIOT Act that directly relate to financial institution practices.

.56 Section 312 of the USA PATRIOT Act requires U.S. financial institutions to establish due diligence policies, procedures, and controls reasonably designed to detect and report money laundering through correspondent accounts of foreign banks and private banking accounts of non-U.S. citizens. On January 4, 2006, FinCEN issued a final regulation implementing Section 312 of the USA PATRIOT Act. The final rule took effect on February 3, 2006, and superseded the interim final rule issued in July 2002. On March 30, 2006, FinCEN extended the applicability date required by the January 4, 2006, final rule from April 4, 2006, to July 5, 2006, for new accounts opened by U.S. financial institutions. The effective date for existing accounts to comply with the January 4, 2006, final rule remains October 2, 2006. Highlights of the final rule include, among other matters, a requirement for U.S. financial institutions to apply due diligence to correspondent accounts maintained for certain foreign financial institutions and private banking accounts maintained for foreign individuals. The rule also establishes scope requirements.

.57 Sections 313(a) and 319(b) of the USA PATRIOT Act add sections 103.177 and 103.185 to the BSA regulations and are intended to prevent money laundering and terrorist financing through correspondent accounts maintained by U.S. financial institutions on behalf of foreign banks. Auditors should be aware of the guidelines as noted in sections 313(a) and 319(b) that do the following:

- Prohibit financial institutions from establishing, maintaining, administrating, or managing a correspondent account in the United States for, or on behalf of, a foreign shell bank.
- Require financial institutions to take reasonable steps to ensure that correspondent accounts of foreign banks are not used to indirectly provide banking services to a foreign shell bank.

- Require financial institutions to maintain records in the United States identifying the owners of each nonpublicly traded foreign bank that maintains an account in the United States and the bank's U.S. agent authorized to accept service of legal process.
- Require financial institutions to close accounts for, and cease transactions with, any foreign bank for which they are unable to obtain the required information or to assure themselves that the correspondent account is not being used to indirectly provide services to a foreign shell bank.
- Require financial institutions to maintain records for five years after an account is closed.

.58 Section 314 of the USA PATRIOT Act adds sections 103.100 and 103.110 to the BSA regulations, which establish procedures that encourage information sharing between governmental authorities and financial institutions and among financial institutions themselves. Section 314 requires a financial institution to do the following:

- Diligently search records and documents to determine whether the institution maintains or has maintained accounts or engaged in transactions with an entity or person listed in a request submitted by the FinCEN. The records search must cover all current accounts, accounts opened in the past 12 months, and financial transactions that occurred in the past 6 months.
- Notify FinCEN if an account or transaction is detected.
- Appoint a contact person.
- Maintain adequate procedures to ensure confidentiality of FinCEN requests.

.59 Section 326 of the USA PATRIOT Act requires the Secretary of the Treasury to jointly prescribe with each of the agencies, the SEC, and the Commodity Futures Trading Commission, a regulation that, at a minimum, requires financial institutions to (1) implement reasonable procedures to verify the identity of any person seeking to open an account, to the extent reasonable and practicable, (2) maintain records of the information used to verify the person's identity, and (3) determine whether the person appears on any lists of known or suspected terrorists or terrorist organizations provided to the financial institution by any government agency. This final "know your customer" regulation applies to banks, savings associations, credit unions, private banks, and trust companies.

.60 Section 326 also contains procedures for examining each domestic and foreign banking organization's customer identification program (CIP). The procedures are designed to help financial institutions fully implement the new CIP requirements and facilitate a consistent supervisory approach among the federal financial institutions regulatory agencies. On April 28, 2005, the agencies issued *Interagency Interpretive Guidance on Customer Identification Program Requirements*. This was issued to provide interpretive guidance with respect to the CIP rule.

The "Death Penalty Law"

.61 Congress is expected to vote on a new law that many in the banking industry have labeled the "Death Penalty Law." The proposed law gets its name from the nature and severity of punishment if a federally chartered financial institution is convicted of money laundering. If convicted, the financial institution will lose its charter and close. If the institution is state chartered, its insurance coverage will be terminated.

.62 Many top bank executives are lobbying the U.S. Congress in an effort to slow the passage of legislation. This is being done because executives believe the new law creates an unreasonable standard for financial institutions. For more information, access www.bankersonline.com/articles/bhv01n03/bhv01n03a10.html. AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1), provides guidance on the auditor's responsibility when a possible illegal act, for example, an unauthorized transaction, is detected.

Basel II Update

.63 On December 26, 2006, the federal bank and thrift regulatory agencies issued a notice of proposed rulemaking (NPR) seeking comment on possible modifications to the risk based capital standards for all banks, bank holding companies, and savings associations not covered under the risk based capital framework proposed in the Basel II NPR. Comments were accepted through March 26, 2007. It should be noted that Basel II is not all inclusive because it only affects the largest banking institutions.

.64 The federal bank and thrift agencies recommend the following modifications:

- Modernize the risk based capital rules to ensure that the capital framework is able to reliably measure risk in the banking system.
- Mitigate the differences that may arise as a result of differences in capital requirements between banks that adopt Basel II and those banks that continue to apply existing capital rules.
- Ensure that implementation is simple for banks that are subject to the existing risk based capital rules.

.65 This NPR allows banking organizations to early adopt the modifications or remain subject to the agencies' current risk based capital rules. For more information, visit www.fdic.gov/news/news/financial/2006/fil06111.html.

.66 The federal bank and thrift regulatory agencies have also sought comment on proposed guidance describing the agencies' expectations and concerns about the adoption of Advanced Internal Ratings Based (IRB) Approach for credit risk and the Advanced Measurement Approaches (AMA) for operation risk under the Basel II capital framework. The proposed guidance also establishes standards for supervisory review and capital assessment under Pillar 2 of the Basel II framework. Highlights of the proposal are summarized in the following list:

- The proposed guidance is required for banking organizations that implement the proposed Basel II framework.
- The proposed new guidance should provide more direction in instances where prudential issues or industry standardization is of significant importance.
- The guidance should also provide banks with a clear description of the essential components of an acceptable IRB framework.
- The guidance also highlights supervisory standards that banks can follow to implement and maintain an AMA framework for regulatory capital purposes.
- Pillar 2 has three fundamental objectives: comprehensive supervisory assessment of capital adequacy, bank compliance with regulatory capital requirements, and bank implementation of an internal capital adequacy assessment process.
- It is important to note that the proposed guidance should not be construed as the agencies' predisposition of the Basel II NPR.

Banking Agencies Reach Agreement on Basel II Implementation

.67 The Federal Reserve, OCC, OTS, and FDIC reached an agreement regarding the implementation of Basel II in the United States. The agreement resolves the remaining major issues and should lead to finalization of a rule that implements advanced approaches for computing large banks' risk based capital requirements.

.68 The agencies agree that rules implementing the advanced approach should be finalized expeditiously and should be consistent in most regards to international approaches. The agencies also agree that two transition periods will be required to fully implement the rules. Highlights of the agencies' release are included in the following list:

- The agreement retains the NPR's transitional floor periods.
- At the end of the second transition year period, the agencies intend to publish a study that evaluates the new framework to determine if there are any material deficiencies.
- The agencies have agreed to eliminate language in the NPR concerning the 10 percent limitation on aggregate reductions in risk based capital requirements.
- The agencies believe the annual review process is consistent with recommendations of the U.S. Government Accountability Office and that it provides a prudent framework for managing the implementation of Basel II in the United States.
- The agencies also agreed to proceed with the issuance of a proposed rule that would allow all noncore banks to adopt a standardized approach under Basel II. This would eliminate the adoption of Basel 1AA.

Proposed Update of Section 12 of the Code of Federal Regulations 563.81

.69 The OTS recommended a rule change to Section 12 of the Code of Federal Regulations (CFR) 563.81. The proposal serves as a final revision of Section 12 of CFR 563. The final rule updates regulations that require savings associations to obtain approval before they may include subordinated debt securities or mandatorily redeemable preferred stock in supplementary (tier 2) capital. The final rule removes several unnecessary or outdated requirements and conforms other provisions, such as maturity period requirements and purchaser restrictions. The final rule also reconciles conflicting rules, adds appropriate statutory references, and rewrites the rule in plain language. The effective date for the final rule is April 1, 2007.

FDIC Improvement Act Filers

.70 Banking regulators continue to assess the requirements for nonpublic and nonaccelerated FDIC Improvement Act (FDICIA) filers under Part 363 of the FDICIA. FDIC is currently revising Part 363. Readers are advised to monitor the progress of the revision. In anticipation of the changes to Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the AICPA's Auditing Standards Board (ASB) decided to defer the issuance of the revised AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting* (AICPA, *Professional Standards*, vol. 1), until the PCAOB issued its amendments and the ASB has time to consider them. On July 25, 2007, the PCAOB issued Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), which is effective for audits of internal control over financial reporting required by Section 404(b) of the Sarbanes-Oxley Act of 2002 for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted at any point after SEC approval. When Auditing Standard No. 5 becomes effective, it will supersede Auditing Standard No. 2. In the interim, to avoid inconsistencies between AT section 501 and SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which was issued in May 2006, the following conforming changes were made to AT section 501 to bring that standard into conformity with corresponding aspects of AU section 325:

- Deleting the term *reportable condition* and its definition
- Replacing the definition of the term *material weakness*

- Introducing the terms *control deficiency* and *significant deficiency* and their related definitions
- Replacing the guidance on evaluating control deficiencies with the relevant guidance from AU section 325
- Replacing the term *audit committee* with the term *those charged with governance*, defined in AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), to describe the party to whom the practitioner must communicate significant deficiencies and material weaknesses
- Identifying areas in which a control deficiency ordinarily is at least a significant deficiency in internal control
- Identifying indicators of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control
- Requiring the practitioner to communicate to management and those charged with governance, in writing, significant deficiencies and material weaknesses

.71 The ASB conferred with the banking regulators on the decision to temporarily "freeze" the AT section 501 project until the PCAOB completed its revisions to Auditing Standard No. 5. Now that the standard is issued, the AT section 501 task force has resumed its work and plans to issue an exposure draft in late 2007 or early 2008. In the interim, banking regulators have indicated that they will continue to apply their previous guidance to nonpublic FDICIA institutions and nonaccelerated public FDICIA institutions subject to the FDICIA internal control reporting requirements. The FDIC has not issued any official guidance to this effect, but the FDIC's Financial Institution Letter FIL-122-2004, which outlines the requirements for nonpublic and nonaccelerated public FDICIA filers, is relevant. Auditors are urged to consult the FDIC Web site (www.fdic.gov) for official communications.

Reminder of Supervisory Guidance for Financial Institutions Affected by Hurricane Katrina

.72 On February 5, 2007, the FFIEC issued *Reminder of Supervisory Guidance for Financial Institutions Affected by Hurricane Katrina* for immediate release. The intent of the guidance is to remind financial institutions in the U.S. Gulf Coast region that the guidance outlined in Hurricane Katrina Examiner Guidance remains in effect and should be referred to when making decisions regarding payment deferrals, loan refinancing, extensions, restructurings, or other payment programs. Although loan workout programs may involve protracted payment plans, ultimately the loan should be repaid.

.73 The agencies and state supervisory authorities in Alabama, Louisiana, and Mississippi continue to remind financial institutions doing business in the Gulf Coast region that working constructively with borrowers is in the best interest of both the financial institution and the customer.

The SEC's Executive Compensation and Related Person Disclosure

.74 The SEC issued Release No. 33-8732A on August 29, 2006, which adopts amendments to the disclosure requirements for executive and director compensation, related person transactions, director independence, and other corporate governance matters and security ownership of officers and directors. These amendments apply to disclosure in proxy and information statements, periodic reports, current reports, and other filings under the Securities Exchange Act of 1934 and to registration statements under the Securities Exchange Act of 1934 and the Securities Act of 1933. The SEC is also adopting a requirement that disclosure under the amended items generally be provided in plain English. This rule is effective November 7, 2006.

.75 Additionally, on August 29, 2006, the SEC requested additional comments on a proposed amendment to the disclosure requirements for executive and director compensation, which would require disclosure for three additional highly compensated employees. The full text of the release can be viewed at www.sec.gov/rules/proposed/2006/33-8735.pdf.

SEC Disclosure Questions and Answers on Executive Compensation and Related Person Disclosure Transition

.76 Additionally, the SEC has published a set of questions and answers (Q&A) representing the staff's views on questions it has received regarding issuers' transition to compliance with the amendments and new rules adopted by the SEC in the Executive Compensation and Related Person Disclosure rulemaking. The nine Q&A cover the effective date of the new rules and early compliance with the new rules. The Q&A can be found at www.sec.gov/divisions/corpfin/faqs/execcompqa.pdf.

FDIC Rule Revisions

.77 The FDIC issued a final rule repealing Part 349 of the FDIC Rules and Regulations, Reports and Public Disclosure of Indebtedness of Executive Officers and Principal Shareholders to a State Nonmember Bank and Its Correspondent Banks. Auditors should note that repeal of the rule does not eliminate restrictions on loans made to bank executive officers and shareholders. The repeal does eliminate reporting requirements and public disclosure of insider loans.

.78 The FDIC issued a final rule on Part 328 of the FDIC Rules and Regulations, *Advertisement of Membership*. Recent amendments to the Federal Depository Insurance Reform Act of 2005 required the FDIC to prescribe an official sign that all FDIC-insured depository institutions would be required to display. The amended rule accomplishes that requirement and provides for other changes to the regulation.

.79 The FDIC also issued final rules to amend Part 327 of the FDIC Rules and Regulations. The first rule creates a new system for risk based assessments and sets assessment rates as of January 1, 2007. The other rule sets the designated reserve ratio at 1.25 percent. The amendments were made to implement the Federal Depository Insurance Reform Act of 2005. The rules are designed to make the insurance assessment system's reaction to changes in an institution's risk profile more efficient. The final rule took effect January 1, 2007.

.80 On October 16, 2006, the FDIC Board of Directors approved a final rule to implement the One Time Assessment Credit as required by the Federal Depository Insurance Reform Act of 2005. Under the final rule, eligible institutions will share in an aggregated 1-time deposit insurance assessment credit of $4,707,580,238.19. The final rule outlines who is eligible for the 1-time credit as well as the guidelines when applying the credit. The final rule took effect on November 17, 2006.

Revised Interagency Policy Statement on the Allowance for Loan and Lease Losses

.81 The OCC, Board of Governors of the Federal Reserve System, FDIC, OTS, and NCUA have revised the banking agencies' 1993 policy statement on the allowance of loan and lease losses (ALLL).

.82 The agencies' revised their policy in an effort to be more consistent with GAAP and more recent supervisory guidance. The two major revisions to the agencies' 1993 policy statement are as follows:

1. The extension of applicability to credit unions

2. A frequently asked questions section designed to assist institutions in complying with GAAP and ALLL guidance

.83 The revised policy statement applies to all depository institutions (except U.S. branches and agencies of foreign banks) that are supervised by the OCC, Board of Governors of the Federal Reserve System, FDIC, OTS, and the credit unions insured and supervised by the NCUA. U.S. branches and agencies of foreign banks continue to be subject to any separate guidance issued by their respective supervisory agency.

.84 The revised policy reiterates key concepts and requirements included in GAAP and existing ALLL guidance. The principal sources of guidance include FASB Statement Nos. 5, *Accounting for Contingencies*, and 114, *Accounting by Creditors for Impairment of a Loan—an amendment of FASB Statements No. 5 and 15*. The FASB also issued an article that presents Q&A to provide specific guidance on the application of ALLL policy. For more information, please visit www.fdic.gov/news/news/financial/2006/fil06105a.pdf. The FASB is also working on a project to address disclosures related to the allowance for loan losses for financing receivables (loans and finance leases pursuant to FASB Statement No. 13, *Accounting for Leases*). For more information, visit the FASB Web site at www.fasb.org.

.85 Because ALLL represents one of the most significant estimates in a financial institution's financial statements (and regulatory reports), auditors should develop an understanding of the estimation methodology of the institution. It is important to note that the auditor's primary concern is to determine, through audit procedures, that the loan loss estimate is not materially misstated. AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors when auditing accounting estimates as described above. AU section 342 details how important it is for the independent auditor to gain an understanding of the methods used by management to make accounting estimates. The section also describes how the auditor might evaluate the reasonableness of estimates during testing.

.86 The auditor typically achieves objectives for auditing the allowances by testing management's estimates of the allowance based on available and relevant information regarding loan collectibility. The auditor is not responsible for estimating the amount of the allowance or ascertaining the collectibility of each, or any, specific loan included in an institution's loan portfolio. However, the auditor's objective of audit procedures for credit losses is to obtain sufficient appropriate audit evidence that the loan loss estimate is not materially misstated. Some questions include the following:

- Are the allowance for loan losses and the allowance for credit losses on off-balance sheet credit exposures reasonably estimated in accordance with GAAP to cover the amount of probable credit losses inherent in the loan portfolio and in off-balance sheet financial instruments, respectively, at the balance sheet date?
- Are controls over the allowance estimation process operating effectively?
- Is the allowance calculation properly documented and in accordance with current accounting and regulatory guidance?
- Are disclosures adequate?
- Is the allowance excessive, or does it imply shortfall?
- Is there directional consistency between credit quality indicators (for example, charge-offs versus delinquencies, and loan-loss provision levels versus allowance levels)?

Commercial Real Estate Update

.87 Major commercial real estate (CRE) sectors include office, hotel, industrial, multifamily, and retail. According to the FDIC, CRE debt measured $3 trillion in the first quarter of 2007, compared to $2.3 trillion in 2006. The real estate industry continues to grow, albeit at a slower rate compared to 2006. The CRE market has maintained its strength despite the consumer housing slowdown.

.88 On December 12, 2006, the FDIC, OCC, and Board of Governors of the Federal Reserve System issued joint *Guidance on Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices*. The guidance reminds institutions that strong risk management practices and appropriate levels of capital are essential elements of a sound CRE lending program, particularly when an institution has a large concentration in CRE loans. Highlights include the following:

- There is growing concern that rising CRE concentrations may expose the institutions to unanticipated earnings and capital volatility in the event of adverse changes in the general CRE market.
- Guidance issued by the institutions addresses sound risk management practices for concentrations of CRE lending.
- The guidance includes criteria for supervisors, including numerical indicators for institutions with potentially significant CRE loan concentrations that may warrant more scrutiny.
- The guidance is not intended to limit banks' CRE lending because banks serve an important role in their communities by supplying credit for business and real estate development.

CRE Examination Issues and Best Practices

.89 Recently the FDIC issued an article on CRE underwriting and loan administration practices, recurring examination issues, and best practices for managing CRE portfolios in the current business environment. It is important to note that many institutions are experiencing moderate to rapid growth in CRE lending portfolios. As a result, many of the financial institutions consider such portfolios as a viable market niche. Larger financial institutions continue to use pricing advantages over smaller community banks in other areas, such as home equity lines or customer financing. Smaller community banks use their knowledge of the local market and borrowers to compete with the larger institutions.

.90 The FDIC is very concerned about the trends in underwriting and management in CRE lending. During a recent examination, it was noted that the most worrisome findings were a lack of construction supervision, weak appraisal review programs, inadequate knowledge of lending markets, and poor loan structuring. It was also noted that most institutions failed to properly monitor their CRE portfolios properly or failed to comply with the requirements of Part 365 of FDIC Rules and Regulations, *Real Estate Lending Standards*.

.91 Although many institutions have increased their exposure to CRE lending risks, they have not implemented an adequate monitoring system. Some institutions did not know what percentages of their CRE portfolio investments were concentrated as low, moderate, or more risky. Common monitoring deficiencies include failure to do the following:

- Establish exposure limits
- Prepare reports that provide sufficient relevant information
- Prepare timely concentration reports
- Track exceptions
- Track aggregate loan amounts
- Consider commitment amounts when computing loan to value limits

.92 FDIC examiners also feel that many institutions overlook the importance of market analysis. In some cases, the examiners determined that institutions had not bothered to perform market analysis of key lending areas. It was also noted that loan to value limits were not established as a supervisory tool. There were a number of instances noted by the examiners of loans structured with weak or lenient loan terms. Conditions included the following:

- Over-reliance on collateral values instead of cash flow
- Liberal use of interest or other reserves

- Loans with balloon maturities secured by undeveloped land
- Letters of credit and unsecured loans granted for the purpose of investing in real estate developments (primarily in the Southeastern United States)

.93 Lastly, examiners noted that many institutions did not maintain proper oversight over the appraisal process. The following findings were noted during the examination:

- Missing or incomplete internal reviews of appraisals
- Inadequate appraisals or violations of FDIC Rules and Regulations concerning appraisals
- Loan funding prior to receipt and review of appraisals
- Including the proposed loan amounts on appraisal engagement letters
- Extending funds to customers based on future gross sell-out values of real estate projects

.94 Although the examiners noted several deficiencies, they also discovered several "best practices" that institutions may consider implementing to control their CRE lending portfolios. Examples of the best practices are as follows:

- The Board of Directors should approve the scope of lending activities and the way real estate loans are processed, serviced, and collected. Market conditions, concentrations, and lending activity should be monitored on a consistent basis, with timely and adequate reports made to the Board of Directors.
- Internal and external factors should be considered during the formation of loan policies. Examples of factors to consider include the organization's size, strategic plan, and the expertise of the institution's staff.
- Prudent underwriting standards should be developed. The standards should consider the capacity of the borrower and the income from the underlying property to service the debt.
- Lending policies should reflect the level of risk that is acceptable to the institution's Board of Directors. Clearly measurable limits that include maximum loan amounts, maturities by type of property, amortization schedules, pricing structure, and loan to value limits should be reflected.
- Loan administration policies and procedures should address the type and frequency of financial statements required based on the type of loan. Collateral evaluations, adequate construction inspections, and other requirements may also be useful.

.95 Historically, financial institutions have generally suffered severe losses as a result of the loss of expected cash flows due to loan defaults and inadequate collateral. For example, significant credit losses on real estate loans have occurred, due largely to downturns in regional and national real estate markets but also because of other general economic conditions and higher risk lending activities. Therefore, the auditor needs to assess the existence, valuation, and ownership of the collateral supporting the client's receivables and to determine if the internal control systems have been properly designed and are effective. The auditor can observe the CRE lending at the client and plan accordingly. Some issues auditors may want to consider include, but are not limited to, those described in the following sections.

.96 Certain real estate loan arrangements, in which the lender has virtually the same risks and potential rewards as those of the owners of the property, should be classified and accounted for as investments in real estate and not CRE loans. Certain acquisition, development, and arrangements should be accounted for as investments in either real estate (in conformity with FASB Statement Nos. 66, *Accounting for Sales of Real Estate*, and 67, *Accounting for Costs and Initial Rental Operations of Real Estate Projects*) or real estate joint ventures (in conformity with the provisions of Statement of Position [SOP] 78-9, *Accounting for Investments in Real Estate Ventures* [AICPA, *Technical Practice Aids*, ACC sec. 10,240]; FASB Staff Position [FSP] SOP 78-9-1, "Interaction of AICPA Statement of Position 78-9 and EITF Issue No. 04-5;" Emerging Issues Task Force [EITF] Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights;" and FASB Statement No. 34, *Capitalization of Interest Cost*, as amended by FASB Statement No. 58, *Capitalization of Interest Cost in Financial Statements That Include Investments Accounted for by the Equity Method*). Additionally, provisions of FASB Interpretation No. (FIN) 46(R), *Consolidation of Variable Interest Entities (revised December 2003)*, should be considered for real estate held joint ventures or partnerships. FIN 46(R) clarified the application of Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to certain entities in which equity investors do not have the characteristics of a controlling interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support.

.97 The federal banking and thrift agencies and the NCUA require real estate appraisals for properties over defined limits. Many fair values will be based on valuations by independent appraisers.[2] In applying audit procedures to real estate loans, the independent accountant can evaluate the fair value of the underlying collateral (including those held for sale) and note contents of loan files that include collateral description and valuation. The auditor often relies on representations of independent experts, particularly appraisers and construction consultants, to assist in the assessment of real estate collateral. AU section 336 provides guidance in this area. Independent appraisals may be considered acceptable audit evidence. The quality of appraisals varies, however, and in some instances, the independent accountant may have reason to believe certain assumptions underlying appraisals are unrealistic. The independent accountant needs to understand and consider the approaches and assumptions used in obtaining the appraised value. The current downturn in the real estate market increases audit risk surrounding the valuation of receivables; the institution will have to absorb losses between actual and appraised values if credit quality deteriorates and borrowers default.

.98 Additionally, AU section 342 provides guidance on auditing accounting estimates (such as estimates of fair values, discussed previously, and estimates of loan losses). AU section 342 discusses how an independent accountant obtains an understanding of how management developed estimates, concentrating on the key factors and assumptions used. It also discusses how the independent accountant evaluates the reasonableness of those estimates. AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance on auditing fair value measurements and disclosures contained in financial statements.

.99 Auditors should note management's general attitude toward CRE lending policies when considering an institution's internal controls. Strong CRE lending policies and a diligent Board of Directors could assist the independent auditor when assessing control risk. Auditors should refer to AU sections 314 and 318 for guidance when considering an entity's internal controls. Auditors should also consider management's attitude toward CRE lending policies and internal controls as they relate to the management representation letter. For guidance on management representations, auditors should refer to AU section 333, *Management Representations* (AICPA, *Professional Standards*, vol. 1).

Market Risk Capital and the Applicability of Market Risk Capital Rules

.100 The July 18, 2007, edition of the Financial Institution Letter (FIL-64-2007) reminds financial institutions that reporting a significant amount of trading assets on the institution's balance sheet or increasing the percentage of assets reported as trading may subject that institution to the market risk capital requirements of Part 325, Appendix C of the FDIC's Rules and Regulations. This rule applies to banks with trading activity of $1 billion or more, or at least 10 percent or more of total assets. Trading activity is usually reported on an institution's quarterly call report.

---

[2] On June 22, 2006, the Federal Deposit Insurance Corporation, Federal Reserve Board, Office of the Comptroller of the Currency, Office of Thrift Supervision, and National Credit Union Administration released an interagency statement and frequently asked questions regarding revisions made to the Uniform Standards of Professional Appraisal Practice (USPAP). Under the agencies' appraisal regulations, regulated institutions must ensure that appraisals supporting federally related transactions adhere to USPAP. The interagency statement provides an overview of the USPAP revisions and the ramifications of these revisions to regulated institutions' compliance with the agencies' appraisal regulations.

.101 Financial institutions should be aware of the implications and potential impact of FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. Application of FASB Statement No. 159 could result in institutions meeting the market risk capital requirements. The market risk capital rules require institutions to have certain risk management systems in place prior to the performance of any trading activity that is above $1 billion or at least 10 percent of total assets. Institutions that are subject to market risk capital requirements are required to measure their market risk using value-at-risk models. In addition to risk management systems, institutions should contact the FDIC in preparation for compliance with the market risk capital requirements.

.102 Auditors should consider the institution's risk management systems and controls if the institution meets the market risk capital requirements as outlined in Appendix C of the FDIC's Rules and Regulations. The auditor may inquire about the institution's risk management systems when considering the entity's internal controls. The auditor should consider whether the entity's risk management systems can be circumvented by collusion or fraud. AU sections 314 and 318 may provide some guidance when considering the entity's risk management systems. Auditors may also consider using a specialist if the institution is implementing the capital risk requirements for the first time. AU section 336 may provide guidance for the auditor considering the use of a specialist.

Audit and Attestation Issues and Developments

Fraud in the Industry

Money Laundering

.103 The U.S. Departments of Treasury, Justice, and Homeland Security joined together in issuing the 2007 National Money Laundering Strategy, a report detailing efforts to dismantle money laundering rings and terrorist financing networks and bring these criminals to justice. The 2007 strategy is based on data and analysis from the 2006 Money Laundering Threat Assessment.

.104 The 2007 strategy builds on initiatives and programs pioneered in preceding National Money Laundering Strategies. The Assistant Attorney General believes that implementation of a sound strategy is the key to success in the fight against money laundering and that constant searching by criminals for new ways to launder and hide dirty money is evidence of successful regulatory and law enforcement efforts to safeguard the banking system. With an aim at continuing these robust efforts, the 2007 strategy places an emphasis on bolstering the efficiency of the anti-money laundering processes currently in place.

.105 The 2007 strategy focuses on leveling the playing field internationally, helping to ensure that U.S. financial institutions are not disadvantaged through the implementation of controls and standards to combat money laundering and terrorist financing. Indeed, money laundering is a global threat that the United States is working to address through international bodies, including the Financial Action Task Force, and through direct private sector outreach in regions around the world. More information is available at www.treas.gov/press/releases/hp386.htm.

.106 When obtaining an understanding of a financial institution's internal control system, auditors may consider controls that focus on money laundering. AU sections 314 and 318 provide guidance on an independent auditor's consideration of an entity's internal control in an audit of financial statements.

Mortgage Fraud

.107 Lower interest rates helped create the housing boom of the early 2000s. Consumers and investors took advantage of lower interest rates to purchase, upgrade, or invest in the real estate market. To keep up with demand and work with borrowers, certain financial institutions created new, nontraditional mortgage products that increased the dollar amount of mortgage individuals who were willing to finance to purchase real estate. In effect, the products turned the real estate market into a "golden egg" search as investors armed with excess capital searched for investments.

.108 The new mortgage products also opened the door for unscrupulous individuals who figured out ways to manipulate circumstances to their advantage. For example, a mortgage broker could bundle several subprime mortgages and sell them to an unsuspecting buyer. Another example of fraud in the mortgage industry is the use of false property appraisals.

.109 In the spring of 2007, the FBI had 1,036 pending mortgage fraud investigations, a substantial increase compared to prior years. Most types of mortgage fraud fall into two categories:

- Fraud for property that typically involves a borrower who will overstate income or asset values on his or her financial statement to qualify for a property loan. When the borrower fails to met the mortgage payment, he or she sells the property at a profit based on appreciation.
- Fraud for profit that involves complicated schemes and is generally harder to detect. These types of fraud usually involve several members, including some insiders.

.110 In addition to understanding the client and proper audit planning, auditors should be alert for possible indicators that could be signs of fraud. In performing the audit, auditors should consider whether the institution has done the following:

- Established a system to monitor concentration of risk by broker and project
- Performed internal audits of loan origination documentation
- Established clearly defined quality control programs
- Established dual controls over loan origination and fund disbursement
- Conducted background checks on new employees
- Provided ongoing employee training and oversight

.111 AU sections 314 and 318 require the auditor to obtain an understanding of internal control that will enable the auditor to identify the types of potential misstatements of management's assertions, consider factors that affect the risk of material misstatement, design tests of controls where applicable, and design substantive tests. As the auditor gains an understanding of an entity's internal control, he or she may determine areas where fraud could occur. See AU section 316 for guidance on fraud related issues when conducting a financial statement audit. AU section 317 may also be useful to auditors when conducting an audit of an institution's financial statements. Auditors should also consider management's attitude toward CRE lending policies and internal controls as they relate to the management representation letter. For guidance on management representations, auditors should refer to AU section 333.

Revised Bank Secrecy Act/Anti-Money Laundering Examination Manual

.112 On August 24, 2007, the FFIEC released the revised Bank Secrecy Act/Anti-Money Laundering (BSA/AML) Examination Manual (manual). The revised manual reflects the commitment of the federal and state banking agencies and the FinCEN to provide consistent guidance on risk based policies, procedures, and processes for banking organizations to comply with the BSA and safeguard operations from money laundering and terrorist financing. The 2007 edition clarifies supervisory expectations since the July 28, 2006, update.

.113 On November 9, 2006, FinCEN released an advisory to alert financial institutions of some of the potential money laundering risks associated with providing financial services to shell companies. Although many shell companies are formed for legitimate reasons, others have been used for illicit purposes. Shell companies provide an opportunity for foreign or domestic entities to move money by wire transfer or other methods, whether directly or through a correspondent banking relationship, without company owners disclosing their true identities or the nature of the transaction. Billions of dollars have been moved globally by shell companies. Banks often face the following challenges when filing suspicious activity reports involving shell companies:

- Inability to obtain information necessary to identify originator or beneficiaries of wire transfers
- Payments that do not state a specific purpose or contract number
- Multiple high volume payments or transfers between shell companies with no apparent legitimate business purpose
- An unusually large number and variety of beneficiaries that receive wire transfers from one company
- Goods or services listed on transfer reports that do not match the industry in which the entity works

.114 To safeguard against the risk of money laundering by shell companies, financial institutions should assess the risks involved with each shell company relationship and take steps to ensure that the risks are appropriately and effectively identified and managed in accordance with their BSA obligations. All financial institutions should periodically evaluate internal policies, controls, systems, and training programs designed to prevent, detect, and report possible money laundering involving shell companies. Auditors may consider documenting the controls an entity has in place concerning money laundering and other suspicious activity when documenting their understanding of internal controls. See AU sections 314 and 318 for guidance on the independent auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards (GAAS).

.115 On July 13, 2007, FinCEN issued guidance for financial institutions with account relationships that law enforcement may have an interest in ensuring remain open, notwithstanding suspicious or potential criminal activity in connection with the account. The intent of the guidance is to combat money laundering terrorist financing and other crimes. FinCEN acknowledges that the right to open or close an account remains with each financial institution, each using their standards and policies.

.116 When a law enforcement agency requests that an account remain open, it should be in writing. The requests should come from the U.S. Attorneys Office or be issued by a supervisory agent. The written request should indicate that the agency has requested the account remain open and the purpose of the request. The request should also state the duration for which the account should remain open, which should not exceed six months. Although there is no record keeping requirement under the BSA for this type of correspondence, FinCEN recommends that financial institutions maintain such requests. If the financial institution is aware that the account is under investigation, FinCEN recommends the institution contact law enforcement before making any decision regarding the status of the account. Auditors should be aware of the institution's policies, procedures, and processes that address identification of suspicious activity in accordance with the BSA/AML compliance program.

.117 On June 22, 2007, the FDIC Chairman applauded FinCEN for addressing the need to tailor administration of the BSA to the many different risk profiles of community banks. The Chairman welcomed the continued opportunity to continue working with FinCEN and other regulatory agencies to ensure that BSA guidance and procedures are efficient and effective for all banks.

.118 Financial institutions often face common problems when it comes to the BSA. Examples include a lack of written policies, failure to conduct periodic transaction reviews in a timely matter, lack of an independent and sufficiently knowledgeable reviewer, and failure to include overall integrity of the program within the review.

Third Party Risks

.119 The FDIC is increasingly concerned with the use of third party entities that act as agents between consumers and financial institutions, especially community banks. Although third party entities can provide a valuable service to consumers and financial institutions, they can also increase the risk faced by the financial institutions. Successful third party relationships start with understanding of potential risks and proper strategic management. For example, a team of risk management examiners could discover suspicious activity reports during an engagement. The information and evidence they uncover could also provide evidence of unfair or deceptive practices. That evidence could be very useful to compliance auditors.

.120 The term *third party* is broadly defined to include any entity or individual that has entered into a business relationship with an insured depository institution. Examples of third parties include banks (affiliated or not), a regulated institution, and a nonregulated institution, foreign or domestic. Third parties are usually deeply involved in the delivery of financial services to the consumer. The third party can be positioned either directly or indirectly between the financial institution and the consumer. The FDIC is concerned that the use of third parties in financial transactions increases the level of risk for financial institutions and creates potential adverse effects for consumers. The FDIC believes that third party risks transcend all examination disciplines and necessitate close communication between examination teams.

.121 As the role and scope of financial services expands, so to does the role of the third party. Listed below are some pervasive examples of services provided by third parties. Auditors should be aware and document these relationships when performing an audit:

- Perform functions on the institution's behalf.
- Provide customer access to various products and services.
- Increase the financial institution's revenue through the third party's products, such as loan review or asset and liability management.

.122 Some of the risks associated with third party involvement are based on the underlying activity itself, for example, helping consumers secure loans. Other types of risk associated with third party involvement are less noticeable. It is important to remember that a more complex financial service has the potential to increase third party risk. Third party risk is described in the following broad categories:

- Strategic risk is described as the risk that arises from ill-advised business decisions or the failure to implement consistent business strategies that could mitigate potential risk. In general, financial transactions should provide a return commensurate with the level of risk they expose the financial institution to.
- Reputation risk is the risk of negative public perception that is often caused by breaches in institution policy or standards. Negative publicity from a third party, even one not involved with the institution, can be harmful.
- Transaction risk is the risk that the institution will not be able to deliver products and services to the customer. Auditors should be aware of weak controls that could affect the institution's ability to conduct business.
- Credit risk is the risk that a third party or other creditor necessary to the third party relationship is unable to comply with the terms of the contractual agreement. Auditors may examine documents that confirm the institution monitors third party activities to ensure that credit risk is understood and is within established limits.
- Compliance risk is the risk that the institution or other third party is not in compliance with the rules, laws, regulations, and internal policies of contractual obligations. Company oversight serves as a key control for compliance risk.

- Other risks include liquidity, interest rate shifts, rapid price changes, and foreign currency rate changes. Before an institution enters into a third party relationship, it is important for the institution to consider potential risks.

.123 Each institution's audit department should provide comprehensive, independent reviews of all third party arrangements, as well as any underlying activities. Findings should be presented to the institution's Board of Directors as soon as possible to ensure that appropriate action is taken. During an audit of a financial institution that conducts transactions with third parties, auditors should evaluate the results of audit procedures carefully. The auditor may encounter specific information that may raise questions concerning possible illegal acts. AU section 317 lists the following as examples of possible illegal acts:

- Unauthorized transactions or improperly recorded transactions
- Unusual payment of fines or penalties to government or regulatory entities
- Large payments to consultants, affiliates, or employees
- Excessive sales commissions or agent fees
- Unexpected payments made to government officials
- Failure to file tax returns or pay government duties or similar fees that are common in the financial industry

.124 Furthermore, AU section 317 states that auditors who become aware of information concerning a possible illegal act should obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effects on the financial statements. The auditor should contact management one level above those involved. Based on the results of the additional testing and the responses from management one level higher than those involved, the auditor may be forced to issue a qualified or even an adverse audit opinion.

.125 AU section 326, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1), states the auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit. Auditors should be aware of the institution's third party arrangements and test them to support their audit opinion.

Accounting Issues and Developments

FASB Statement No. 157

.126 In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities. This statement defines fair value and expands disclosures about fair value measurements. The statement applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The statement does not expand the use of fair value in any new circumstances.

.127 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Readers can access the full text of FASB Statement No. 157 on the FASB's Web site at www.fasb.org. The following items are common areas in a financial institution that may be affected by FASB Statement No. 157:

- Other real estate (required to be carried at lower of cost or fair value less costs to sell)
- Loans evaluated under FASB Statement No. 114 (observable market price or the fair value of collateral)
- Loans held for sale
- Interest rate lock commitments
- Derivatives
- Intangibles and goodwill
- Assets acquired and liabilities assumed in purchased business
- Securities
- Servicing rights (SRs)
- Branches held for sale
- FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, footnote disclosures

FASB Statement No. 159

.128 Subsequent to the issuance of FASB Statement No. 157, the FASB issued FASB Statement No. 159. This statement is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The statement permits an entity to elect the fair value option on an instrument-by-instrument basis, and once the election is made, it is irrevocable. This statement's objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement Nos. 107 and 157.

.129 FASB Statement No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, provided the entity also elects to apply the provisions of FASB Statement No. 157. The choice to adopt early should be made within 120 days of the beginning of the fiscal year of adoption (for calendar year end entities, by April 2007), provided the entity has not yet issued financial statements, including required notes to those financial statements, for any interim period of the fiscal year of adoption. The FASB and SEC have expressed concern in the way some early adopters have applied the transition provisions of the standard. The AICPA Center for Audit Quality (CAQ) issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard such as this is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to "be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard." The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB's Web site at www.fasb.org.

SOP 07-01, *Clarification of the Scope of the Audit and Accounting Guide* Investment Companies *and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies*

.130 In June 2007, the Accounting Standards Executive Committee (AcSEC) issued SOP 07-01, *Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* (AICPA, *Technical Practice Aids*, ACC sec. 10,930). The SOP provides guidance for auditors when trying to determine whether an entity is within the scope of the AICPA Audit and Accounting Guide Investment Companies. In addition, the SOP also contains disclosure requirements for parent companies and equity method investors in investment companies that retain investment company accounting in the parent company's consolidated financial statements or the financial statements of an equity method investor. The SOP is effective for fiscal years beginning on or after December 15, 2007, with earlier application encouraged.

FASB Interpretation No. 48

.131 FIN 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

.132 The evaluation of a tax position in accordance with this interpretation is a two-step process. The first step is recognition. The enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

.133 Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one or both of the following:

1. An increase in a liability for income taxes payable or a reduction of an income tax refund receivable
2. A reduction in a deferred tax asset or an increase in a deferred tax liability

.134 An enterprise that presents a classified statement of financial position should classify a liability for unrecognized tax benefits as current to the extent that the enterprise anticipates making a payment within one year, or within the operating cycle if it is longer. An income tax liability should not be classified as a deferred tax liability unless it results from a taxable temporary difference (that is, a difference between the tax basis of an asset or a liability as calculated using this interpretation and its reported amount in the statement of financial position). This interpretation does not change the classification requirements for deferred taxes.

.135 Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. Use of a valuation allowance as described in FASB Statement No. 109 is not an appropriate substitute for the derecognition of a tax position. The requirement to assess the need for a valuation allowance for deferred tax assets based on the sufficiency of future taxable income is unchanged by this interpretation.

FSP FIN 48-1, "Definition of Settlement in FASB Interpretation No. 48"

.136 On May 2, 2007, the FASB issued FSP FIN 48-1, "Definition of Settlement in FASB Interpretation No. 48." This FSP amends FIN 48 to provide guidance on how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits.

.137 Specifically, the FSP amends FIN 48 to clarify that a tax position could be effectively settled upon examination by a taxing authority. Assessing whether a tax position is effectively settled is a matter of judgment. When making a settlement determination, an enterprise should make a position-by-position assessment for all positions in a particular tax year.

.138 The guidance outlined in the FSP shall be applied upon the initial adoption of FIN 48. An enterprise that applied FIN 48 in a manner consistent with the provisions of this FSP would continue to apply the provisions in this FSP from the date of initial adoption of FIN 48. An enterprise that did not apply FIN 48 in a manner consistent with this FSP is required to retrospectively apply the provisions in this FSP to the date of the initial adoption of FIN 48.

.139 To help financial statement preparers, auditors, and tax advisers meet this new requirement, the Accounting Standards, Auditing and Attest Standards, and Tax Teams have developed a practice guide on accounting for uncertain tax positions under FIN 48. Tax positions can only be recognized if they meet a more-likely-than-not threshold of being realized if challenged by a taxing authority with full knowledge of the facts. If this level of certainty is not met, no tax benefit can be booked. Even if it is met, only the amount that has a greater than 50 percent chance of being sustained may be booked. Specific financial statement disclosures are required with respect to uncertain tax positions. The AICPA's 13-page practice guide includes highlights of FIN 48 and its implications for in-house accountants, auditors, and tax advisers. It is not authoritative but is intended to assist members in quickly understanding the requirements of FIN 48. The practice guide is available without charge to all AICPA members. For more information, please visit the AICPA Web site at www.aicpa.org.

Deferred Acquisition Costs on Internal Replacements

.140 In September 2005, AcSEC issued SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications of Exchanges of Insurance Contracts* (AICPA, *Technical Practice Aids*, ACC sec. 10,920). The SOP provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically outlined in FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. This SOP was effective for internal replacements occurring in fiscal years beginning after December 15, 2005, with earlier adoption encouraged. Retrospective application to previously issued financial statements is not permitted.

Request to Withdraw SEC SAB No. 105

.141 SAB No. 105, *Application of Accounting Principles to Loan Commitments*, was released in 2004 to address questions about the proper valuation of loan commitments that are derivatives under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended by FASB Statement No. 149, *Amendment to Statement 133 on Derivative Instruments and Hedging Activities*. SAB No. 105 intends to prohibit entities from incorporating expected future cash flows related to the associated servicing on a loan underlying a derivative loan commitment, or any other internally developed intangible asset, in valuing a commitment.

.142 The MBA believes that the release of FASB Statement No. 159 broadens the scope of SAB No. 105 by permitting entities to report nonderivative loan commitments at fair value beginning in 2008 for most companies. This includes commitments to originate nonmortgage loans. There is also the belief that many people may undoubtedly conclude that SAB No. 105 correctly applies GAAP to derivative loan commitments; therefore, it must also be correct to apply the SAB to other loan commitments, regardless of the fair value guidance of FASB Statement No. 157.

.143 Because FASB Statement No. 157 requires reporting entities to incorporate the cash flows that market participants would consider in pricing loan commitments, which is contrary to the guidance in SAB No. 105, an entity's valuation models produce more accurate representations of fair values of loan commitments than would be true if the cash flows were excluded. Based on this belief, the MBA believes the SAB should be withdrawn as soon as possible to avoid the risk of widespread confusion in implementation of FASB Statement Nos. 157 and 159. On July 6, 2007, the MBA formally requested a meeting with the SEC to discuss withdraw of SAB No. 105. Auditors and banking professionals should monitor this situation.

Securitization and Sale of Nontraditional Products

.144 Higher yielding nonconforming or nontraditional products as well as subprime loans are being securitized and sold in the secondary market. Upon securitization, derivatives are being added to make the securities more attractive to investors. Auditors need to carefully evaluate those derivatives to see whether they qualify as passive derivatives permitted for a qualifying special-purpose entity (QSPE) under FASB Statement No. 140. Note that FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments*, amended FASB Statement No. 140 to eliminate the prohibition on a QSPE from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. For additional information, see the section of this alert titled "Changes to FASB Statement No. 140."

Obtaining Legal Opinions

.145 Increased numbers of securitizations means an increased need for legal opinions. Paragraph 27 of FASB Statement No. 140 states that "[t]he nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law." After the issuance of FASB Statement No. 140, the ASB issued Interpretation No. 1, "The Use of Legal Interpretations As Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140," of AU section 336. Readers may wish to refer to that auditing interpretation when evaluating the need to obtain a legal opinion.

Changes to FASB Statement No. 140

.146 Effective for fiscal years starting subsequent to September 15, 2006, with early application permitted in certain cases, FASB Statement No. 140 has been amended by two new FASB Statements, FASB Statement Nos. 155 and 156, *Accounting for Servicing of Financial Assets*. Another exposure draft, *Accounting for Transfers of Financial Assets*, will also affect FASB Statement No. 140 and is expected to be issued during the fourth quarter of 2007.

.147 FASB Statement No. 155 amends FASB Statement No. 133 to permit fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to FASB Statement No. 133 requirements. Consequently, the statement resolves issues surrounding FASB Statement No. 133's Implementation Issue No. D1, "Recognition and Measurement of Derivatives: Application of Statement 133 to Beneficial Interests in Securitized Financial Assets," and amends FASB Statement No. 140 in the process.

The Old FASB Statement No. 140	*FASB Statement No. 155 Influence*
Paragraphs 35(c)(2) and 40	Amended by paragraphs 4 and 5 of FASB Statement No. 155

Background. Derivatives Implementation Group (DIG) Implementation Issue No. D1 allowed a temporary exemption for derivative accounting for beneficial interests in QSPEs and stated, "Holders of beneficial interests in securitized financial assets that are not subject to paragraph 14 or paragraph 362 of FASB Statement No. 140 are not required to apply FASB Statement No. 133 to those beneficial interests until further guidance is issued."

FASB Statement No. 140 Prohibition. The old FASB Statement No. 140 prohibited a QSPE from holding a derivative financial instrument that pertained to a derivative beneficial interest (or a beneficial interest that included an embedded derivative).

Why? Before the prohibition, the Implementation Issue No. D1 temporary exemption discussed above allowed entities to circumvent derivative accounting by transferring derivatives or hybrids into QSPEs.

FASB No. 155 Amendments to FASB No. 133.

- Amends paragraph 14 to eliminate the temporary exemption for interests in securitized financial assets provided by Implementation Issue No. D1. (Prospective application required: Implementation Issue No. D1 guidance remains effective for instruments recognized prior to the effective date of FASB Statement No. 155.)
- Amends paragraph 14 to require interest holders to evaluate whether instruments are freestanding derivatives or a hybrid financial instrument subject to FASB Statement No. 133 bifurcation requirements.
- Amends paragraph 14 to clarify that concentrations of credit risk in the form of subordination are not embedded derivatives. This is important because if redistributed credit risk constituted an embedded derivative, many securitizations would have been affected.

Amendment to FASB Statement No. 140. Amends paragraphs 35 and 40 of FASB Statement No. 140 to eliminate the prohibition. Because the Implementation Issue No. D1 temporary exemption was eliminated, the prohibition is no longer necessary because each interest holder needs to evaluate whether instruments are freestanding derivatives or hybrid financial instruments subject to FASB Statement No. 133 bifurcation requirements. Evaluation of all potential derivative instruments categories in securitizations is now captured. Because securitizations provide many ways to redistribute to investors the cash flows of the underlying assets, the potential exists for many securitization interests to be hybrid financial instruments.

FASB Statement No. 133 contains an impracticability exception, which FASB Statement No. 155 retained. (If an entity is unable to reliably identify and measure an embedded derivative that must be bifurcated, the entire contract must be measured at fair value with changes in fair value recognized in earnings. Although this exception has been used rarely, it may now be used more frequently due to the complexity of instruments that will no longer receive the temporary exemption under Implementation Issue No. D1.)

.148 FASB Statement No. 156 also amends FASB Statement No. 140 with respect to the accounting for the servicing of financial assets. FASB Statement No. 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract. The statement also requires that all separately recognized SRs be initially measured at fair value, if practicable. For each class of separately recognized servicing assets and liabilities, the guidance permits an entity to choose either of the following subsequent measurement methods: (1) the amortization of servicing assets or liabilities in proportion to and over the period of estimated net servicing income or net servicing loss or (2) the reporting of servicing assets or liabilities at fair value at each reporting date and reporting changes in fair value in earnings in the period in which the changes occur. The guidance also requires additional disclosures for all separately recognized SRs.

.149 Concepts surrounding FASB Statement No. 156 changes to FASB Statement No. 140 are summarized below. Not all changes are included. For complete guidance, refer to the standard.

The Old FASB Statement No. 140	*FASB Statement No. 156 Influence*
Paragraph 10 states, "Upon *completion* of any transfer (including sales)"	Amended by paragraph 4(c) of FASB Statement No. 156
Continue to carry in the statement of financial position any retained interest in the transferred asset, including *servicing assets*, beneficial interests in assets transferred to a QSPE in a securitization, and retained undivided interests.	Initially recognize and measure at *fair value*, if practicable servicing assets and servicing liabilities that require recognition under the provisions of paragraph 13.
Allocate the previous carrying amount between the assets sold, if any, and the *retained interests*, if any, based on *their relative fair values* at the date of transfer.	Allocate the previous carrying amount between the assets sold, if any, and the interests that *continue to be held by the transferor*, if any, based on their relative fair values at the date of transfer. Continue to carry in the statement of financial position any interest it continues to hold in the transferred assets, including, if applicable, beneficial interests in assets transferred to a QSPE in a *securitization* and any *undivided interests.*
Paragraphs 11 and 56, "Sales" (other paragraphs are involved as well.)	Amended by paragraph 4(d) and 4(j) of FASB Statement No. 156
Describes sale treatment. Derecognize all assets sold and recognized all assets obtained and liabilities incurred. SRs are recorded at allocated carrying amounts and treated as retained interests in transferred assets; hence the term *retained interest* is used.	Adds servicing assets to the definition of proceeds. The proceeds from a sale include SRs. Therefore, the gain or loss on sale is altered by the value of the SR and depends in part on both (*a*) the previous carrying amount of the financial assets involved in the transfer, allocated between the assets sold and the retained interests that continue to be held by the transferor based on their relative fair value at the date of transfer, and (*b*) the proceeds received. The phrase *interests that continue to be held by the transferor* has replaced the term *retained interest* throughout FASB Statement No. 140. FASB Statement No. 156 requires SRs to be initially recorded at fair value and treated as sale proceeds, if applicable, not as retained interests.

The Old FASB Statement No. 140	*FASB Statement No. 156 Influence*
Paragraph 13, "Recognition and Measurement for Obligations Undertaken"	Amended by paragraph 4(e) and 4(f) of FASB Statement No. 156
For transfers/sales, recognize SRs unless the assets were transferred to a QSPE in a guaranteed mortgage securitization, and all resulting securities are retained and classified as held to maturity debt under FASB Statement No. 115. To recognize servicing rights, use the relative allocation method at the date of obligation and amortize using the amortization method only. *For purchases/assumptions*, the SRs should be initially measured at fair value, presumptively at the price paid and then subsequently value the right using amortization method only.	*For all situations*. Always initially value servicing rights at fair value, if practicable. This includes all transfers (accounted for as sales), transfers of financial assets to QSPE in a guaranteed mortgage securitization in which the transferor retains all securities and classified them as available for sale or trading; or purchases/assumptions (transactions that do not relate to financial assets of the servicer or its consolidated affiliates). Paragraph 13 is also amended to discuss the new choice of two methods for subsequent valuation, the fair value method, and the former amortization method.
Paragraph 17, Overview of Disclosures (Description not inclusive)	Amended by paragraph 4(h) of FASB Statement No. 156 Overview (Description not inclusive)
• Collateral disclosures • For SR under amortization method (only method allowed) — Disclose SR recognized and subsequently amortized (only method allowed). — Disclose fair value of recognized SRs and fair value methodology. — Disclose valuation allowance activity. — Disclose risk characteristics of the underlying financial assets used to stratify SRs for purposes of measuring impairment.	• Collateral disclosures are unchanged. • For SR under amortization method, similar disclosures to column one. (However, note that disclosures surrounding the activity for each class and respective location of income statement changes, as well as valuation techniques, are now required.) • New for SR under fair value method: — Activity for each class and where the changes are reported in the income statement. — Description of valuation techniques or other methods used to estimate fair value of each class. — Fair value for each class at beginning and end for each class measured under the amortization method. • New for both methods: — Management's basis for determining its classes of servicing assets/liabilities (relates to the choice of two subsequent valuation methods per paragraph 13A). — Amount of fees earned each period. — Disclosure surrounding inherent risks of SRs and instrument used to mitigate fair value income statement effects.

FASB Projects Updates for FASB Statement No. 140

.150 The FASB issued proposed FSP FAS 140-d, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions," on July 24, 2007. The objective of the proposed FSP is to provide implementation guidance on whether there are circumstances that would permit a transfer of a financial asset separately from repurchase financing. A repurchase financing is a repurchase agreement relating to a previously transferred asset between the same counterparties. The repurchase financing may be agreed upon at the time of the initial transfer or may occur at a later date. The comment period for this project runs through September 14, 2007. The FASB plans to address comments received and issue a final FSP during the fourth quarter of 2007. For more information on this FASB project, please visit the following Web site: www.fasb.org/project/repurchase_financing_agreements.shtml.

.151 The FASB is also working a project that addresses practice issues related to the permitted activities of a QSPE, isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve the comparability of financial statements. The FASB decided that removing the QSPE concept from FASB Statement No. 140 is an approach worthy of research. The FASB recommends that staff consider amending paragraph 9(b) on the remaining criteria in paragraph 9 be included in the research for this project. The FASB expects to issue an exposure draft containing potential amendments to FASB Statement No. 140 in the fourth quarter of 2007. For more information, please visit the following Web site: www.fasb.org/project/transfers_of_financial_assets.shtml.

Clarification of FASB Statement No. 140

.152 On June 15, 2007, members of the U.S. House of Representatives Committee on Financial Services sent a letter to the Chairman of the SEC. The representatives are concerned with current lending practices and the recent collapse of the subprime market. Specifically, the representatives are concerned with the number of foreclosures and the impact of FASB Statement No. 140 on loan modifications. One solution presented by the representatives was to make loan modifications and, where possible, forbear foreclosure.

.153 The representatives asked for SEC expertise on FASB Statement No. 140. They asked if FASB Statement No. 140 clearly addresses whether a loan held in trust can be modified when default is reasonably foreseeable or only once a delinquency or default has already occurred. The representatives believe that the lack of clarity may be leading some institutions to withhold making some loan modifications that may benefit borrowers and bondholders for fear of being in violation FASB Statement No. 140. The SEC is currently looking into this issue. For more information on this issue, readers should refer to the SEC Web site at www.sec.gov.

.154 On July 24, 2007, the SEC responded to the Committee on Financial Services. The letter outlined one approach servicers may take in response to anticipated residential mortgage loan defaults. The approach is to modify the terms of the mortgage loan when default is "reasonably foreseeable," rather than when a default or delinquency has already occurred. The letter also explains that said loan modifications undertaken when loan default is reasonably foreseeable should be consistent with the nature of modification activities that would have been permitted if a default had occurred.

The Hybrid and Servicing Ripple Effect

.155 In addition to the effects on FASB Statement No. 140 discussed in the previous section, the implementation of FASB Statements No. 155 and No. 156 will affect a number of GAAP issues, including but not limited to DIG Issues, EITF Issues, and Technical Bulletins.

FASB Statement No. 158

.156 FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, improves financial reporting by requiring an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity or changes in unrestricted net assets of a not-for-profit organization. This statement also improves financial reporting by requiring an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions.

.157 The required date of adoption of the recognition and disclosure provisions of this statement differs for an employer that is an issuer of publicly traded equity securities (as defined) and an employer that is not. An employer with publicly traded equity securities is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after December 15, 2006. An employer without publicly traded equity securities is required to recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of the fiscal year ending after June 15, 2007.

Ratification of EITF Issue Nos. 06-4 and 06-5

.158 In September 2006, the FASB ratified EITF Issue Nos. 06-4, "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements" and 06-5, "Accounting for Purchases of Life Insurance—Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, *Accounting for Purchases of Life Insurance*." EITF Issue No. 06-4 requires that policyholders recognize a liability for the postretirement benefits provided through endorsement split-dollar life insurance. The liability to recognize is dependent upon whether the company is deemed to have promised a death benefit to the participant or to maintain the split-dollar arrangement for the participant's benefit. EITF Issue No. 06-5 provides guidance for calculating policy amounts that could be realized and recognized as assets on the policyholder's balance sheet. Both EITF Issue Nos. 06-4 and 06-5 will be effective for fiscal years beginning after December 15, 2007. The company does not anticipate that these issues will have a material effect on its financial statements.

EITF Issue No. 06-10

.159 The EITF reached consensus that an employer should recognize a liability for post retirement benefits related to a collateral assignment split-dollar life insurance arrangement in accordance with FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, or Option 12 if the employer has agreed to maintain a life insurance policy on the employee during retirement. Examples of evidence to be considered when determining the arrangement include written agreements, communication between the employee and employer, and past practices of the employer. Similarly, if the employer has provided the employee with a death benefit, the employer should accrue a liability for the actuarial present value of the future death benefit as of the employee's expected retirement date, in accordance with FASB Statement No. 106 or Option 12. The consensus for EITF Issue No. 06-10, "Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements," is effective for fiscal years beginning after December 15, 2007, included interim periods within those fiscal years.

Other Literature Important to Financial Institutions

.160 FASB Statement No. 156 also amends paragraphs 9 and 10 of FASB Technical Bulletin No. 87-3, *Accounting for Mortgage Servicing Fees and Rights*; paragraph 8(h) of SOP 01-6, *Accounting by Certain Entities (Including Entities With Trade Receivables) That Lend to or Finance the Activities of Others* (AICPA, *Technical Practice Aids*, ACC sec. 10,850); the FASB Special Report titled *A Guide to Implementation of Statement 140 on Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—Questions and Answers—Fourth Edition (cumulative); Special Report on Statement 140 on Accounting for Transfers and Servicing* *of Financial Assets and Extinguishments of Liabilities Index of All Q&As Affected by Statement 156 As of March 17, 2006*; and sections of the AICPA Audit and Accounting Guide *Depository and Lending Institutions: Banks and Savings Intuitions, Credit Unions, Finance Companies, and Mortgage Companies.*

FSP FIN 39-1

.161 FSP FIN 39-1, "Amendment of FASB Interpretation No. 39," issued in April 2007, amended certain aspects of FIN 39, *Offsetting of Amounts Related to Certain Contracts*. The FSP amends paragraph 10 of FIN 39 to permit a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) against fair value amounts, including amounts that approximate fair value, recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. This FSP applies to instruments that meet the definition of a derivative in FASB Statement No. 133, including those that are not included in the scope of FASB Statement No. 133 (for example, a financial guarantee or weather derivatives), and indicates that application of the guidance in the FSP is an accounting policy decision and should be consistently applied. Upon adoption of this FSP, a reporting entity is permitted to change its accounting policy to offset or not offset fair value amounts recognized for derivative instruments under master netting arrangements.

.162 The FSP is effective for fiscal years beginning after November 15, 2007, with early application permitted, and is applied as a change in accounting principle through retrospective application for all financial statements presented, unless it is impracticable to do so.

FSP FAS 140-2, Paragraphs 40(b) and 40(c)

.163 Paragraph 35 of FASB Statement No. 140 provides conditions that must be met for a trust or other legal entity to be considered a QSPE. One condition is that a QSPE may hold only passive derivative financial instruments that pertain to beneficial interests issued or sold to parties other than the transferor, its affiliates, or its agents.

.164 Constituents have questioned whether paragraphs 40(b) and 40(c) would require a QSPE to become disqualified if the amount of beneficial interests held by outside parties is reduced to less than the total notional amount of the related derivative financial instruments because of events that were not anticipated at the inception of the QSPE. Constituents have also questioned whether purchases of beneficial interests by the transferor, its affiliates, or its agents in connection with treasury, market-making, or trading activities would disqualify a qualifying QSPE.

.165 FSP FAS 140-2, "Clarification of the Application of Paragraphs 40(b) and 40(c) of FASB Statement No. 140," answers these questions by concluding that paragraph 40(b) and 40(c) requirements must be met when beneficial interests are *initially* issued by the QSPE or when a passive derivative financial instrument needs to be replaced upon the occurrence of a specified event *outside the control* of the transferor, its affiliates, or its agents. For additional specifics, see the FSP available at www.fasb.org, which was effective upon issuance on November 5, 2005.

DIG Issues

.166 FASB Statement No. 155 amends paragraphs 14, 16, 44, and 200A-D of FASB Statement No. 133. Consequently, the following DIG issues are affected: DIG Implementation Issue Nos. A1, B1, B2, B4, B5, B6, B10, B11, B15, B17, B20, B23, B24, B29, B30, B35, B36, B37, B39, C4, and D1. FASB Statement No. 156 amends footnote 9 to paragraph 21 as well as paragraph 56 of FASB Statement No. 133. The statement affects DIG Implementation Issue Nos. B12, B36, D1, F1, F8, and J7.

FASB Implementation Issue No. B-40

.167 In January 2007, the FASB posted Implementation Issue No. B40, "Embedded Derivatives: Application of Paragraph 13(b) to Securitized Interests in Prepayable Financial Assets," which clarifies the circumstances in which a securitized interest in prepayable financial assets would not be subject to the conditions in paragraph 13(b) of FASB Statement No. 133. They responded that a securitized interest in prepayable financial assets would not be subject to the conditions in paragraph 13(b) of FASB Statement No. 133 if it meets both of the following criteria:

- The right to accelerate the settlement of the securitized interest cannot be controlled by the investor.
- The securitized interest itself does not contain an embedded derivative (including an interest-rate-related derivative) for which bifurcation would be required other than an embedded derivative that results solely from the embedded call options in the underlying financial assets.

.168 The objective of this guidance is to provide a narrow scope exception from paragraph 13(b) of FASB Statement No. 133 for securitized interests that contain only an embedded derivative that is tied to the prepayment risk of the underlying prepayable financial assets and that meet the criteria listed in the previous paragraph. For more information, please visit the following Web site: www.fasb.org/derivatives/issueb40.

EITF Issues

.169 FASB Statement No. 155 affects EITF Issue Nos. 85-9, 85-29, 86-15, 86-28, 90-19 , 96-12, 97-15 98-5, 99-20, 00-19, 03-7, instrument C of Issue No. 90-19, and 88-11. FASB Statement No. 156 affects EITF Issues No. 85-13, 87-34, 88-11 (nullified), 88-22, 89-2, 90-18, 90-21, 90-2, 02-9, 02-12, and Topic D-69.

Hybrid Financial Instruments

.170 FASB Statement No. 133 requires transactions to be evaluated for embedded derivatives. If the derivative is present, it has to be bifurcated if the following three criteria are met: (1) the economics of the derivative are not clearly and closely related to the economics of the host instrument, (2) the instrument is not measured at fair value through earnings, and (3) the terms of the derivative meet the definition of a derivative under FASB Statement No. 133. The host is accounted for based on applicable literature (for example, cost amortization) while the derivative is accounted for at fair value through earnings unless it is designated as a FASB Statement No. 133 hedge.

.171 If an embedded derivative is present but not closely and clearly related to its host instrument, the entity must apply FASB Statement No. 155. The statement allows the entity a choice in accounting for embedded derivates requiring bifurcation. An entity can elect to either bifurcate the embedded derivative or carry the entire instrument at fair value with changes that pass through the income statement. Thus far, holders of embedded derivatives have been disappointed in the choices.

.172 FASB Statement No. 155 is effective for all financial instruments acquired or issued after the beginning of the fiscal year that begins after September 15, 2006. Auditors should be aware that FASB Statement No. 155 applies to securities purchased after adoption or securities that have a remeasurement event, for example, a business combination. Only securities purchased after adoption are evaluated to determine if there is an embedded derivative and whether or not that derivative should be bifurcated from its host.

FASB Statement No. 156

.173 FASB Statement No. 156 amends FASB Statement No. 140 with respect to the accounting for separately recognized servicing assets and servicing liabilities. The statement requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract under certain circumstances.

.174 FASB Statement No. 156 requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. It permits an entity to choose either of the amortization or fair value methods for each class of separately recognized servicing assets and servicing liabilities.

.175 At its initial adoption, it permits a one-time reclassification of available-for-sale securities to trading securities by entities with recognized SRs, without calling into question the treatment of other available-for-sale securities under FASB Statement No. 115, provided that the available-for-sale securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or servicing liabilities that a servicer elects to subsequently measure at fair value.

.176 The statement also requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities.

.177 An entity should adopt this statement as of the beginning of its first fiscal year that begins after September 15, 2006. For more information, please visit the FASB Web site at www.fasb.org.

Recent Auditing and Attestation Pronouncements and Related Guidance

.178 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.179 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by going online to www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance	
SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) Issue Date: December 2006 (Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])	This standard replaces SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. It is effective for periods beginning on or after December 15, 2006.

SAS No. 113, *Omnibus Statement on Auditing Standards—2006* (AICPA, *Professional Standards*, vol. 1) Issue Date: November 2006 (Applicable to audits conducted in accordance with GAAS)	This standard does the following: • Revises the terminology used in the 10 standards of SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A), to reflect terminology in SAS No. 102, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 120) • Adds a footnote to the headings before paragraphs 35 and 46 in SAS No. 99, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 316), to provide a clear link between the auditor's consideration of fraud and the auditor's assessment of risk and the auditor's procedures in response to those assessed risks • Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor's report* • Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor's report
SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325) Issue date: May 2006 (Applicable to audits conducted in accordance with GAAS)	This standard supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325A). It establishes requirements and provides extensive guidance about communicating matters related to an entity's internal control over financial reporting identified while performing an audit of financial statements. SAS No. 112 also requires that certain communications be in writing. It is effective for periods ending on or after December 15, 2006.
SAS Nos. 104–111, the risk assessment standards Issue Date: March 2006 (Applicable to audits conducted in accordance with GAAS)	See the "AICPA Risk Assessment Standards" section in this alert.
Statement on Standards for Attestation Engagements (SSAE) No. 14, *SSAE Hierarchy* (AICPA, *Professional Standards*, vol. 1, AT sec. 50) Issue Date: November 2006	This SSAE identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in SSAE No. 13, *Defining Professional Requirements in Statements on Standards for Attestation Engagements* (AICPA, *Professional Standards*, vol. 1, AT sec. 20). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.

(continued)

Interpretation No. 1, "Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget (OMB) Circular A-133 Audit" (AICPA, *Professional Standards*, vol. 1, AU sec. 9325.01–.04), which interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1) Issue Date: July 2007 (Interpretive publication)	This auditing interpretation interprets AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1), and addresses how the definitions of the terms *control deficiency*, *significant deficiency*, and *material weakness* should be adapted and applied in the context of reporting on internal control over compliance in a single audit.
Interpretation No. 1, "Use of Electronic Confirmations" (AICPA, *Professional Standards*, vol. 1, AU sec. 9330.01–.06), which interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1) Issue Date: March 2007 (Interpretive publication)	This auditing interpretation interprets AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1), and addresses the issue of electronic confirmations.
AICPA Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) Issue Date: May 2007 (Nonauthoritative)	This question and answer discusses whether the provisions of SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, *Audit Confirmations* (AICPA, *Technical Practice Aids*, PA sec. 16,240) Revised: June 2007 (Nonauthoritative)	This PA responds to practitioners' current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics.
AICPA PITF PA 07-1, *Dating of the Auditor's Report and Related Practical Guidance* (AICPA, *Technical Practice Aids*, PA sec. 16,290) Issue Date: January 2007 (Nonauthoritative)	This PA provides guidance regarding application of certain provisions of SAS No. 103, primarily related to dating the auditor's report.
PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This standard replaces the PCAOB's previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company's financial statements, and, at the same time, eliminate procedures that are unnecessary. Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.
PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting* Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This rule requires a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm's independence, and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee pre-approval to perform tax services for an audit client under PCAOB Rule 3524. This rule is effective for audits of fiscal years ending on or after November 15, 2007.

(continued)

PCAOB Conforming Amendments to the Interim Auditing Standards Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in Appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.
PCAOB Report, *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report is based on PCAOB inspections that looked at parts of approximately 275 audits of internal control over financial reporting by registered public accounting firms. Inspections focused on four areas: integrating the audits of financial statements and internal control, using a top-down approach, using the work of others, and assessing risk.
PCAOB Report, *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 300—Report on the Initial Implementation of Auditing Standard No. 2") Issue Date: January 2007 (Applicable to audits conducted in accordance with PCAOB standards)	This report focuses on aspects of the PCAOB's interim auditing standards that address the auditor's responsibility with respect to fraud, specifically AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *PCAOB Standards and Related Rules*). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
PCAOB Staff Questions and Answers , *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees* Issue Date: April 2007 (Applicable to audits conducted in accordance with PCAOB standards)	Topics covered include the following: • The application of Rule 3522(a) when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm • Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction • Whether a registered public accounting firm's independence is affected by the IRS's subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b) • Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself • Clarification of the term *other change in employment event* as it relates to Rule 3522(c)

PCAOB Staff Questions and Answers, *Auditing the Fair Value of Share Options Granted to Employees* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 100—PCAOB Staff Questions and Answers") Issue Date: October 2006 (Applicable to audits conducted in accordance with PCAOB standards)	The guidance provides direction for auditing a company's estimation of the fair value of stock options granted to employees pursuant to FASB Statement No. 123 (revised 2004), *Share-Based Payment*, which became applicable for financial statements of companies with fiscal years ending on or after June 15, 2006.

The Auditor's Communication With Those Charged With Governance

.180 In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380), which supersedes SAS No. 61, *Communication With Audit Committees* (AICPA, *Professional Standards*, vol. 1, AU sec. 380A). The new SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and is effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.181 SAS No. 114 recognizes the importance of effective two-way communication to the audit. It provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires significant matters communicated with those charged with governance to be documented.

Identifying Those Charged With Governance

.182 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including overseeing the entity's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the enterprise and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.183 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated. Governance structures vary by entity, reflecting influences such as size and ownership characteristics.

.184 Since there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314), is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate.

Communicating Internal Control Related Matters Identified in an Audit

.185 In May 2006, the AICPA ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325). SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements,* the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies, as well as indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.

- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.

- Contains illustrative written communications to management and those charged with governance.

How Revisions of SAS No. 112 Affect Practice

.186 As auditors gain a better understanding of what needs to be communicated to management and those charged with governance, there may be more control deficiencies that are identified as significant deficiencies and material weaknesses, and communicated to management and those charged with governance. Auditors may emphasize and therefore spend more time evaluating identified control deficiencies than in the past.

Discussions With Management and Others

.187 The new requirements of SAS No. 112 may change perceptions regarding the auditor's role in the client's internal control. Auditors may have to explain to clients that the auditor *cannot* be a part of their internal control. Only the client—not the auditor—can correct control deficiencies. However, a CPA firm other than the auditor who does not provide attest services for the client can be part of a client's internal control. This may raise new questions regarding the role of outsourcing in achieving management's internal control objectives.

.188 Auditors may be called upon to hold discussions with management and other users of the auditor's written communication, such as regulators, to explain why the nature and extent of the internal control matters communicated to management and those charged with governance are different from the matters communicated in prior years. One reason is that the criteria have changed because of the introduction of the term *significant deficiencies* and its definition as well as a new definition of material weaknesses. Another reason is that auditors have to include significant deficiencies and material weaknesses, identified and communicated in previous years, in written communication as long as these deficiencies have not been remediated. Auditors may need to explain to management and other users that the auditors are required to inform them of the significant deficiencies and material weaknesses every year as long as those deficiencies still exist.

.189 Auditors may also need to hold discussions with management and other users who ask how the auditors were able to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. Auditors may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client's internal control system. Auditors can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, because sufficient procedures were performed and appropriate audit evidence was obtained to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not *correct or remediate* control deficiencies; the deficiencies in internal control could still result in a material misstatement not being prevented, detected, and corrected by the client.

Issues for Audits of Smaller Entities

.190 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor time spent documenting his or her evaluation of internal control and evaluating identified control deficiencies.

.191 Another issue that may cause concern is the extent to which the auditor may be involved in the drafting of an entity's financial statements. It is a strong indication of material weakness in internal control if a client has ineffective controls over the preparation of its financial statements such that client controls are absent or controls are not effective in preventing, detecting, or correcting material misstatements in the preparation of financial statements, including the related notes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client's controls, including monitoring ongoing activities, since doing so would impair independence.[3] How an auditor responds to a client's internal control weakness, in terms of designing and carrying out auditing procedures, does not affect or mitigate a client's internal control weakness. Just as an auditor's response to detection risk is independent of the client's control risk, so too the auditor's response to a client's control weakness by assisting in drafting the financial statements does not change that control weakness.

---

[3] See Ethics Ruling 101-3, "Performance of nonattest services," of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101.05).

.192 The new requirements of SAS No. 112 introduce possible opportunities for auditors. Auditors can help clients evaluate the cost-benefit implications of improving their internal control, including training their personnel to be more knowledgeable. Auditors can also teach clients how to develop a risk assessment approach to designing internal control. Readers should also note that the Internal Control Task Force of the ASB is revising SAS No. 112 in response to the adoption of PCAOB Auditing Standard No. 5 and International Standards on Auditing.

.193 The AICPA has published the AICPA Audit Risk Alert titled *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in implementation of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

AICPA Risk Assessment Standards

.194 In March 2006, the AICPA ASB issued eight SASs referred to as the risk assessment standards (SAS Nos. 104–111). Although the SASs include many of the underlying concepts and detailed performance requirements contained in existing standards, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risk of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage between the risks, controls, audit procedures, and conclusions. The risk assessment standards are effective for audits of financial statements for periods beginning on or after December 15, 2006, with earlier applications permitted. The following table lists the eight SASs and their effects on existing standards.

Statement on Auditing Standards	*Effect on Existing Standards*
SAS No. 104, *Amendment to Statement on Auditing Standards No. 1,* Codification of Auditing Standards and Procedures *("Due Professional Care in the Performance of Work")* (AICPA, *Professional Standards*, vol. 1, AU sec. 230)	This statement amends SAS No. 1, *Due Professional Care in the Performance of Work* (AICPA, *Professional Standards*, vol. 1, AU sec. 230A).
SAS No. 105, *Amendment to Statement on Auditing Standards No. 95,* Generally Accepted Auditing Standards (AICPA, *Professional Standards*, vol. 1, AU sec. 150)	This statement amends SAS No. 95, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1, AU sec. 150A).
SAS No. 106, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1, AU sec. 326)	This statement supersedes SAS No. 31, *Evidential Matter* (AICPA, *Professional Standards*, vol. 1, AU sec. 326A).
SAS No. 107, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312)	This statement supersedes SAS No. 47, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 312A).
SAS No. 108, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311)	This statement supersedes SAS No. 1, *Appointment of the Independent Auditor* (AICPA, *Professional Standards*, AU sec. 310), and supersedes SAS No. 22, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1, AU sec. 311A).

SAS No. 109, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1, AU sec. 314)	This statement supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 110, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1, AU sec. 318)	This statement supersedes SAS No. 45, *Substantive Tests Prior to the Balance Sheet Date* (AICPA, *Professional Standards*, vol. 1, AU sec. 313), and together with SAS No. 109, supersedes SAS No. 55, *Consideration of Internal Control in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 319).
SAS No. 111, *Amendment to Statement on Auditing Standards No. 39,* Audit Sampling (AICPA, *Professional Standards*, vol. 1, AU sec. 350)	This statement amends SAS No. 39, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1, AU sec. 350A).

Key Provisions of the Risk Assessment Standards

.195 Whether due to error or fraud, the new risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks to the client's business and the mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. Auditors may no longer simply default to a maximum control risk. Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's (COSO) framework, www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs will most likely result in significant changes to firm audit methodologies and the training of personnel. Therefore, it is recommended that auditors allow ample time in advance of the required implementation date. Readers can obtain the SASs and the related AICPA Audit Risk Alert titled *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk) by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Companion Audit Guide

.196 In December 2006, the AICPA published the Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This guide helps auditors understand and implement the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.

Audit Documentation Technical Practice Aids

.197 In May 2007, the ASB issued two Technical Practice Aid (TPA) Technical Questions and Answers (TIS) related to SAS No. 103, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1, AU sec. 339), which was issued in December 2005.

.198 TIS section 9100.06, "The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report" (AICPA, *Technical Practice Aids*) discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor's report. This question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor's report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. The auditor will need to have the signed management representation letter in hand prior to releasing the auditor's report because, since management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.199 TIS section 8350.01, "Current Year Audit Documentation Contained in the Permanent File" (AICPA, *Technical Practice Aids*) discusses whether the provisions of SAS No. 103 related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. This question and answer indicates that SAS No. 103 does apply to current year audit documentation maintained in a permanent file, or for that matter, maintained in any type of file, if the documentation serves as support for the current year's audit report.

Practice Alert No. 07-1, *Dating of the Auditor's Report and Related Practical Guidance*

.200 A key provision of SAS No. 103 is the amendment to paragraphs .01 and .05 of AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*, vol. 1), to require that the auditor's report not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements. As defined in the footnote to paragraph .01 of AU section 530, sufficient appropriate audit evidence includes, among other things, evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. Application of the rules may require revising the process used by audit firms at the end of fieldwork to include a field review of the audit working papers and financial statements. For some firms an additional visit to the client's office to update subsequent event analysis and management's representations may be required as well.

.201 The Professional Issues Task Force (PITF) issued this practice alert to provide guidance to auditors of nonissuers regarding the following:

- The audit report date
- Evidence supporting financial statement amounts and disclosures, specifically relating to attorney letters, obtaining waivers, and consideration and evaluation of subsequent events
- Financial statement preparation and management's assertions
- Evidence that the audit documentation has been reviewed

.202 Readers may access the practice alert at www.aicpa.org/download/auditstd/pract_alert/pa_2007_1.pdf. Readers should also note the PITF is currently working on a practice alert that addresses auditing and other considerations related to electronic information which it plans to issue during the third quarter of 2007.

PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*

.203 In May 2007, the PCAOB adopted Auditing Standard No. 5, which was later approved by the SEC on July 25, 2007. This standard replaces Auditing Standard No. 2. Auditing Standard No. 5 is principles-based and presents a risk-based, top-down approach designed to increase the likelihood that material weaknesses will be found before resulting in a material misstatement of a company's financial statements, while eliminating unnecessary procedures. The standard was also designed to make audits more scaleable for smaller or less complex companies. The PCAOB worked closely with the SEC to coordinate Auditing Standard No. 5 with the guidance to public company management that was approved by the SEC in May 2007. Mark Olson, PCAOB Chairman, stated "The new standard is more risk based and scalable, which will better meet the needs of investors, public companies, and auditors alike."

.204 This new standard is required for all audits of internal control for fiscal years ending on or after November 15, 2007. However, early adoption is permitted and encouraged. For more information, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk).

Recent AICPA Independence and Ethics Pronouncements

.205 The AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.206 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
TIS section 6300.25–.35 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various issues related to SOP 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.207 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the financial institutions industry are discussed throughout this alert. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or go online at www.cpa2biz.com.

On the Horizon

.208 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. Presented in the following sections is brief information about some ongoing projects that have particular significance to the financial institutions industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.209 The following table lists the various standard-setting bodies' Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain much more in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Standard-Setting Body	***Web Site***
AICPA Auditing Standards Board (ASB)	www.aicpa.org/Professional+Resources/Accounting + and+Auditing/Audit+and+Attest+Standards/ Auditing+Standards+Board/
AICPA Accounting Standards Executive Committee (AcSEC)	www.aicpa.org/Professional+Resources/Accounting + and+Auditing/Accounting+Standards/
Financial Accounting Standards Board (FASB)	www.fasb.org
Public Company Accounting Oversight Board (PCAOB)	www.pcaob.org
Professional Ethics Executive Committee (PEEC)	www.aicpa.org/Professional+Resources/Professional + Ethics+Code+of+Professional+Conduct/ Professional+Ethics/
Securities and Exchange Commission (SEC)	www.sec.gov

Help Desk—The AICPA's standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate "exposure draft e-mail list" in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.210 The ASB has formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper titled *Improving the Clarity of ASB Standards*. This discussion paper seeks feedback on proposed changes to the standards, including:

- Establishing objectives for each of the standards, and the auditor's obligations related to the objectives.
- Structural and drafting improvements to make the standards easier to read and understand.
- Inclusion, in the explanatory material of the standards, special considerations related to audits of public entities and small entities.
- Establishing a glossary of terms that would be presented in a separate section of the codification of the standards.

.211 The period to comment ended June 15, 2007. The discussion paper can be accessed at www.aicpa.org/download/auditstd/Clarity_of_ASB_Standards_Discussion_Memo.pdf.

Convergence With International Standards

.212 The ASB has created a number of task forces charged with monitoring specific activities of the International Auditing and Assurance Standards Board (IAASB) and working toward convergence with international auditing standards. The ASB has commented on several exposure drafts of International Standards on Auditing (ISA). The status of these and other ASB projects can be monitored online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+Board/.

Proposed Statement on Standards for Attestation Engagements Regarding Reporting on an Entity's Internal Control Over Financial Reporting

.213 In January 2006, the ASB issued a revised exposure draft of a proposed Statement on Standards for Attestation Engagements (SSAE) that would supersede Chapter 5, "Reporting on an Entity's Internal Control Over Financial Reporting," of SSAE No. 10, *Attestation Engagements: Revision and Recodification* (AICPA, *Professional Standards*, vol. 1, AT sec. 501), as amended. This proposed SSAE establishes standards and provides guidance to the practitioner who is engaged to issue or does issue an examination report on the effectiveness of an entity's internal control over financial reporting as of a point in time (or on an assertion thereon). As mentioned previously, in May 2007, the PCAOB adopted Auditing Standard No. 5, which replaces Auditing Standard No. 2. Knowing the forthcoming changes would be relevant to the revision of AT section 501, the ASB previously decided to defer to issuance of a final revised AT section 501 until the PCAOB issued its amendments and the ASB had time to consider them. The Internal Control Task Force of the ASB is responsible for this revision. Readers may monitor progress on the AICPA Web site at www.aicpa.org.

Proposed Amendment to SAS No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*

.214 In May 2005, the ASB issued an exposure draft introducing a proposed SAS titled Amendment to Statement on Auditing Standards No. 69, The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles, for Nongovernmental Entities*. This proposed SAS, which applies only to nongovernmental entities, has been issued in response to the FASB's proposed Statement of Financial Accounting Standards titled *The Hierarchy of Generally Accepted Accounting Principles*. The FASB proposal moves responsibility for the GAAP hierarchy for nongovernmental entities from the auditing literature (SAS No. 69 [AICPA, *Professional Standards*, vol. 1, AU sec. 411]) to the accounting literature. The proposed SAS deletes the GAAP hierarchy for nongovernmental entities from SAS No. 69. The ASB decided to coordinate the provisions and effective date of this exposure draft with the proposed FASB statement, which can be obtained at www.fasb.org. The ASB will issue its final SAS coincidentally with the FASB's and PCAOB's issuance of their final standards.

Auditing Pipeline—Issuers

.215 Guidance issued by the PCAOB is included in the section of this alert titled "Recent Auditing and Attestation Pronouncements and Related Guidance." For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the *SEC and PCAOB Alert—2007/08* (product no. 022498kk), mentioned previously.

Accounting Pipeline

.216 Presented below are accounting projects and pronouncements currently in process. Some of the proposed pronouncements discussed in the prior year alert have not been finalized as of the date of this writing, and thus are included again.

Business Combinations

.217 Phase one of the business combination project resulted in the issuance of FASB Statement No. 141, *Business Combinations*, and FASB Statement No. 142, *Goodwill and Other Intangible Assets*. In those statements, the FASB eliminated the use of the pooling of interests method of accounting for business combinations and addressed purchase accounting guidelines for acquired intangible assets and goodwill and goodwill impairment. The objective of phase two of this project is to standardize business combination accounting through the convergence of the FASB and International Accounting Standards Board (IASB) accounting standards and by reconsidering the existing guidance for the purchase method of accounting for business combinations. Among the main proposals are the following:

- All acquisitions of businesses be measured at the fair value of the business acquired.
- Substantially all the assets acquired and liabilities assumed of the acquired business be recognized and measured at their fair values at the acquisition date.
- Entities that follow U.S. GAAP and international standards apply substantially the same accounting requirements for their business combinations.

.218 In June 2005, the FASB and IASB (the Boards) issued a number of exposure drafts, for which comment periods ended in October 2005. Redeliberations began in January 2006 and were completed in June 2007. The Boards expect to issue final statements during the fourth quarter of 2007. Four standards are expected to be issued:

- Proposed FASB Statement No. 141(R) and International Financial Reporting Standard (IFRS) No. 3(R), *Business Combinations*

- Proposed FASB Statement No. 160, *Consolidated Financial Statements, Including Accounting and Reporting of Noncontrolling Interests in Subsidiaries*
- Proposed International Accounting Standard (IAS) Statement No. 27(R)

.219 Readers should remain alert to the final issuances and visit the FASB Web site for further information.

Fair Value

.220 During phase one of the FASB's fair value option project, the FASB issued FASB Statement No. 159, which was previously discussed. In phase two of the project, the FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase two are expected to begin in the third quarter of 2007. Readers should remain alert to developments by visiting the FASB Web site.

Derivative Disclosures

.221 In December 2006, the FASB issued an exposure draft titled *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The comment period for this exposure ended in March 2007 and the FASB has begun redeliberations to consider significant issues raised by respondents. The objective of this project is to provide guidance on enhanced disclosure requirements and balance sheet and income statement display of derivatives accounted for in accordance with FASB Statement No. 133 including how and why an entity uses derivative instruments; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments affect an entity's financial position, results of operations, and cash flows. Readers can monitor the progress of this project on the FASB Web site.

Transfers of Financial Assets

.222 The FASB is working on a project to amend FASB Statement No. 140 to address issues related to the permitted activities of a QSPE, isolation criteria, and other issues that arose during redeliberations on the amendment of FASB Statement No. 140 to improve comparability of financial statements. In August 2005, the FASB issued exposure draft, *Accounting for Transfers of Financial Assets*, which was a revision of a June 2003 exposure draft. During 2007, the FASB expects to address issues related to the permitted activities of a QSPE and then issue another exposure draft during the fourth quarter of 2007 containing potential amendments to FASB Statement No. 140. See the FASB Web site for complete information.

Earnings Per Share

.223 The FASB and IASB have been working together to resolve differences between FASB Statement No. 128, *Earnings per Share*, and IAS Statement No. 33, *Earnings per Share*. This project is part of the larger FASB project, Short-term International Convergence, which has resulted in the issuance of a number of FASB Statements. Currently the FASB and IASB are addressing significant differences that remain relating to instruments that can be settled in cash or shares and are classified as a liability on an entity's balance sheet. The FASB and IASB are considering modifications to the treasury stock method and several scoping issues in which either the FASB or IASB has issued or may issue more detailed implementation guidance on earnings per share that may create a convergence difference. The FASB and IASB are expected to issue an exposure draft for public comment during the third quarter of 2007. This exposure draft will be the third exposure draft the FASB has issued on the earnings per share project. The project and current exposure draft can be reviewed on the FASB Web site.

FASB Codification and Retrieval Project

.224 The goal of this FASB project is to create a single, authoritative codification of U.S. GAAP. The codification will integrate and topically organize all relevant accounting guidance issued by the U.S. standard setters (FASB, AICPA, EITF, and the SEC). The codification will have a three layered structure: topic, subtopic, and section. The FASB has structured the topics into three primary areas: overall presentation, transactional (or financial statement account), and industry. The overall presentation area addresses presentation of financial information, but does not address items such as recognition, measurement, or derecognition. The transactional or financial statement account area addresses accounting recognition, measurement, or derecognition. The industry area includes guidance unique to the industry. A codification draft is expected in 2007 and will have an extended verification period to ensure that it accurately reflects U.S. GAAP. Once the FASB addresses respondent comments, the codification will become the single authoritative source of U.S. GAAP and will supersede all existing standards. Readers can track progress of the Codification and Retrieval Project on the FASB Web site at www.fasb.org/project/codification&retrieval_project.shtml.

GAAP Hierarchy

.225 This proposed statement would identify the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental companies that are presented in conformity with U.S. GAAP (or the GAAP hierarchy). The GAAP hierarchy is currently presented in AICPA AU section 411. However, the FASB believes that the GAAP hierarchy should be directed specifically to companies because it is the company, not the auditor, who is responsible for selecting its accounting principles for financial statements. Accordingly, the FASB concluded that the GAAP hierarchy should reside in the accounting literature established by the FASB. The FASB decided to carry forward the GAAP hierarchy as set forth in AU section 411, subject to certain modifications. The FASB staff will coordinate with the AICPA (as previously discussed in the "Auditing Pipeline—Nonissuers" section) to ensure that each of the documents has a uniform effective date. Readers should be alert for the issuance of a final statement.

Proposed FASB EITFs and FSPs

.226 ***Proposed FASB EITF Issues***. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.227 ***Proposed FSPs***. A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.228 The following are various resources that practitioners engaged in the depository and lending institutions industry may find beneficial.

Publications

.229 Practitioners may find the following publications useful with respect to the depository and lending industry:

- Audit and Accounting Guide *Depository and Lending Institutions: Banks and Savings Institutions, Credit Unions, Finance Companies, and Mortgage Companies* (2007) (product no. 012737kk)
- Audit Guide *Analytical Procedures* (2007) (product no. 012557kk)
- Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk)

- Audit Guide *Auditing Derivative Instruments Hedging Activities, and Investments in Securities* (2007) (product no. 012527kk)
- Audit Guide *Auditing Revenue in Certain Industries* (2007) (product no. 012517kk)
- Audit Guide *Audit Sampling* (2007) (product no. 012537kk)
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2007) (product no. 012777kk)
- AICPA *Audit Risk Alert—2007/08* (product no. 022338kk)
- Audit Risk Alert *Compilation and Review—2007/08* (product no. 022308kk)
- Audit Risk Alert *Independence and Ethics—2007/08* (product no. 022478kk)
- Audit Risk Alert *SEC and PCAOB Alert—2007/08* (product no. 022498kk)
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk)
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk)
- *Checklist and Illustrative Financial Statements for Depository and Lending Institutions* (product no. 008916kk)
- Audit and Accounting Practice Aid *Illustrative Disclosures on Derivative Loan Commitments* (product no. 006642kk)
- *Audit and Accounting Manual* (2007) (product no. 005137kk)
- *Accounting Trends & Techniques, 61st Edition* (product no. 009899kk)

AICPA reSOURCE: Accounting and Auditing Literature

.230 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm's needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA's latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.231 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA's Annual Accounting and Auditing Update Workshop* (2007 Edition) (product no. 736183kk [text] or 187191 [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736774kk [text] or 186755 [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

Among the many courses, *Audits of Banks and Other Financial Institutions* (self study) (product no. 733440) specifically relates to the banking and lending institutions industry. Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.232 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA's flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.233 To register or learn more, visit www.cpa2biz.com.

Webcasts

.234 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA Webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession's leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each Webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.235 The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of "hot topics" that successful organizations employ and subjects that are important to the CFO's personal success. From financial reporting and budgeting and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.236 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession's leading experts on what is "hot" at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you "plugged in" to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.237 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.238 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA's Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. You can reach the Technical Hotline at (888) 777-7077.

Ethics Hotline

.239 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA's Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.240 The AICPA sponsors an annual conference on banks and savings institutions in the winter. The National Conference on Banks & Savings Institutions is a three-day conference designed to update attendees on recent developments related to all banking operations. This is the only conference where both community banks and large banking institutions can acquire the critical understanding of current banking issues on emerging audit, accounting, and regulatory developments. Speakers will focus on issues and updates as well as forecasts and trends in the banking industry. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA CAQ

.241 The CAQ (formerly the Center for Public Company Audit Firms) was created to serve investors, public company auditors and the markets. The CAQ's mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession's core values of integrity, objectivity, honesty, and trust.

.242 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Depository Institutions

.243 For information about the activities of the Depository Institution Industry Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_depository.htm.

Industry Web Sites

.244 The Internet covers a vast amount of information that may be valuable to auditors of financial institutions, including current industry trends and developments. Some of the more relevant sites for auditors with financial institution clients include those shown in the following table.

Organization	*Web Site*
Federal Deposit Insurance Corporation	www.fdic.gov
Financial Crimes Enforcement Network	www.fincen.gov
Mortgage Bankers Association	www.mbaa.org
National Credit Union Administration	www.ncua.gov
Office of the Comptroller of the Currency	www.occ.treas.gov

.245 The financial institution practices of some of the larger CPA firms may also contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.246 This Audit Risk Alert replaces *Bank, Credit Union, and Other Depository and Lending Institution Industry Developments—2006/07*.

.247 The Audit Risk Alert *Bank, Credit Union, and Other Depository and Lending Institution Industry Developments* is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year's Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to kbiser@aicpa.org or write to:

Kenneth R. Biser, CPA
AICPA
220 Leigh Farm Road
Durham, NC 27707-8110

AAM Section 8060

Employee Benefit Plans Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of employee benefit plans with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Linda C. Delahanty, CPA
Technical Manager
Audit and Attest Standards

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your employee benefit plan audits. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with AICPA *Audit Risk Alert—2007/08* (product no. 022338kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.03 ***References to Professional Standards.*** When referring to the professional standards, this alert cites the applicable sections as codified in AICPA *Professional Standards* and not the numbered statements, as appropriate. For example, Statement on Auditing Standards (SAS) No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of AICPA *Professional Standards*.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.04 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity's financial performance
- Internal control, which includes the selection and application of accounting policies

.05 Employee benefit plans may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.06 The auditor should obtain an understanding of the plan's objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the plan's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the plan's business is also dynamic, and the plan's strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the plan and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client's environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

.09 Paragraphs 5.56–.59 in the AICPA Audit and Accounting Guide *Employee Benefit Plans*, with conforming changes as of March 1, 2008, provide additional guidance on understanding the plan and its environment.

Hot Topics

The Subprime Mortgage Crisis and Other Market Events

.10 The repercussions of subprime mortgage events continue to be felt in the financial markets. Liquidity in the market for subprime-mortgage-backed securities has deteriorated significantly since the major rating agencies began to downgrade subprime mortgage ratings on a number of issues, including the increased numbers of delinquencies and foreclosures. Additionally, a number of highly leveraged hedge funds (and other investment vehicles) breached various borrowing and margin covenants, which resulted in portfolio liquidations both of subprime-asset-backed securities and, at times, other unrelated investments. Price quotations for subprime-asset-backed securities have become increasingly difficult to obtain and, when obtained, exhibit wide, bid-asked spreads. The auctions for the auction market preferred stock for many entities, including closed-end funds, have failed early in 2008. Further, actual transactions periodically occur at values significantly different from quoted prices, due both to the general market illiquidity and the presence of distressed sellers.

.11 One major spillover effect of these events has been in the market for short term commercial paper, particularly securities backed by various financial assets. Some of this paper, issued by structured investment vehicles, other conduit structures, and hedge funds, was supported in part by subprime mortgage securities. The paper was rated investment grade because the value of the collateralizing securities was significantly higher than the outstanding debt. In some cases, the deterioration in the subprime market caused this overcollateralization to be reduced below the levels permitted under the commercial paper issuance program, resulting in the unexpected extension of maturities or the repayment of maturing paper through drawdowns on bank lines of credit because the issuers could not sell new paper on the market. The resulting uncertainty about these issuers' outstanding commercial paper, and the potential for other issuers to encounter the same difficulties, caused the market for asset-backed commercial paper to exhibit many of the same signs of illiquidity apparent in the subprime market. In some cases, issuers who had not breached covenants but were perceived as having some of the same risk characteristics of troubled issuers had difficulty selling commercial paper.

.12 Various money market funds (both registered and unregistered) have acknowledged investments in troubled paper. They have enhanced their procedures to monitor the differences between net asset value as determined using amortized cost and market values of securities, as required by Rule 2a-7 under the Investment Company Act of 1940 or other equivalent regulations. Some money market funds may have material differences between amortized cost and the market value of securities, resulting in a share value reported in the audited financial statements that is different than what is used for participant transactions and reported on the trustee or custodial statements at year-end.

.13 It is important for the auditor to be aware of the increased risk posed by current market conditions and to develop or modify audit procedures accordingly. Among other things, auditors may consider the following:

- The overall effect of risk on a plan's portfolio of subprime mortgages and related investments (for example, asset-backed commercial paper or high-yield debt or loans). The auditor should identify risks throughout the process of obtaining an understanding of the plan and its environment, including relevant controls such as controls at the plan sponsor and outside service provider, including any applicable investment service provider. The auditor may also consider the policies that affect the management and monitoring of these investments.
- The increased difficulty of obtaining reliable valuations for certain types of asset-backed securities, given the decrease in market liquidity. The auditor should obtain an understanding of the plan's process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach. This would include controls over valuation at the plan sponsor and service provider, in particular the extent to which they monitor valuations obtained from brokers and external pricing services for consistency with observations of market conditions, as well as the involvement of valuation committees or other internal review groups independent of portfolio managers in assessing the day-to-day reasonableness of security valuations and overriding quotations that appear to be unrepresentative.
- The existence of financial covenants within the vehicle and its compliance with those covenants to the extent an investment vehicle has employed leverage. The auditor may obtain an understanding of management's ongoing monitoring process. If the vehicle is no longer in compliance with the

covenants, the auditor would assess the appropriate accounting and reporting implications, including AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*, vol. 1).

.14 In certain instances, the auditor may need special skills or knowledge to plan and perform auditing procedures for plans that hold subprime-mortgage-backed securities. AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, *Professional Standards*, vol. 1), states that for some derivatives and securities, generally accepted accounting principles (GAAP) may prescribe presentation and disclosure requirements. Furthermore, AU section 332 advises the auditor to consider the form, arrangement, and content of the financial statements (including the notes) when evaluating the adequacy of presentation and disclosure. Auditors may also consider using a specialist when determining how to audit a plan that deals in derivatives. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance on the use of a specialist during an engagement.

Impact on Employee Benefit Plans

.15 As a result of the conditions in the subprime markets, several business and accounting issues arise, many of which relate to the measurement of the fair value of securities in the current illiquid market and the devaluation of commercial paper or other securities in money market funds or held as collateral for security lending transactions. Although the plan sponsor is responsible for establishing an accounting and financial reporting process for determining fair value measurements, the plan sponsor will typically rely on the trustee or custodian for the pricing of its investments. The trustee or custodian may use an outside service provider or pricing service for valuation of the investments. Although the valuation function may be outsourced in whole or in part, management continues to maintain ultimate responsibility.

.16 Pricing services typically used by plan trustees or custodians to provide investment prices, such as Interactive Data Pricing and Reference Data, have issued press releases to inform users that they are experiencing difficulties in obtaining consistent market information in the production of valuations of subprime-related securities. Therefore, certain service providers have enhanced their procedures to respond to these issues including, among other things, more frequent monitoring of the differences between amortized cost and the market value of securities for money market funds and close monitoring of the portfolios for exposure to these markets and the associated valuations of these securities.

.17 Accordingly, for full scope audits, auditors may consider the procedures and controls put in place by the plan sponsor and service provider to identify problem investments and pricing concerns; validate the reliability of pricing or institute fair-value procedures, or both, if necessary; monitor the collectibility of accrued income; and modify reporting and disclosures based on the exposure of these markets in their plans. Auditors may also consider the need to enhance audit procedures to ensure that prices obtained from pricing services are reasonable, including the use of multiple pricing sources or valuation experts to review any pricing models or fair value methodologies put in place, or both. Prices used to value money market type funds in trustee or custodial statements may be compared to published prices or agreed to audited financial statements of the funds.

.18 Events or transactions sometimes occur that affect the measurement of fair value of financial instruments, subsequent to the balance-sheet date but prior to the issuance of the financial statements, that have a material effect on the financial statements and therefore require adjustment or disclosure in the statements. The determination of whether such information represents a type 1 or type 2 subsequent event is highly judgmental and will be based on the specific facts and circumstances. For example, the subsequent events procedure to review trustee or custodial statements after year-end may identify pricing adjustments to investment accounts. Auditors may consider if the adjustment resulted from specific market events occurring (1) after year-end (type 2 event) or (2) as of year-end (type 1). Type 1 subsequent events may need to be recorded as an adjustment to the year-end financial statements. See AU section 560, *Subsequent Events* (AICPA, *Professional Standards*, vol. 1), for further guidance. Flexibility in auditing procedures will help the auditor to respond to changes in market conditions.

.19 For limited scope audits, if the auditor becomes aware that the certified information relating to such investments is inaccurate as a result of valuation or other concerns, further inquiry may be necessary that might result in additional testing or modification to the auditor's report. See the "Limited Scope Certifications" section of this alert for further guidance.

.20 In addition, auditors should consider the requirements of Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (AICPA, *Technical Practice Aids*, ACC sec. 10,640), regarding disclosing significant risks and uncertainties in the plan's financial statements at year-end regarding investments affected by subprime, illiquid, or other market events. The following is an example of such a disclosure.

.21 The plan invests in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

> **Help Desk—**For audits of issuers, such as Form 11-K audits, the guidance in Public Company Accounting Oversight Board (PCAOB) Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists*, would be applicable.

Additional Guidance

.22 The following is a list of additional resources that provides guidance on auditing investments:

- AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards,* vol. 1)
- AU section 332, *Auditing Derivative Instruments, Hedging Activities and Investments in Securities*
- AU section 336, *Using the Work of Specialists*
- AU section 342, *Auditing Accounting Estimates*
- AU section 560, *Subsequent Events*
- PCAOB Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists*

- AICPA Practice Aid *Alternative Investments—Audit Considerations*

New Filing and Audit Requirements for ERISA-Covered 403(b) Employee Benefit Plans

.23 Section 403(b) plans are also commonly known as *tax-sheltered annuity plans* (TSA plans). A 403(b) TSA plan is a retirement plan offered by schools, hospitals, churches, charities, and certain other tax-exempt organizations. An individual's 403(b) annuity can be obtained only under an employer's TSA plan. Generally, these annuities are funded by elective deferrals made under salary reduction agreements and may include nonelective employer contributions. A 403(b) plan works very similarly to a 401(k) plan.

.24 A 403(b) plan comprises individual investment accounts that include the following types:

- Fixed and variable annuity contracts with insurance companies, [403(b)(1) annuities]
- Custodial accounts made up of mutual funds [403(b)(7) accounts]
- A retirement income account set up for church employees [403(b)(9) accounts]

Revisions to the Form 5500 for 403(b) Plans

.25 On November 16, 2007, the Employee Benefits Security Administration (EBSA), the IRS, and the Pension Benefit Guaranty Corporation (PBGC) published in the Federal Register revisions to the Form 5500 annual return/report for plan year 2009. The revisions include improved financial disclosure by the approximately 16,000 403(b) TSA plans subject to Title I of Employee Retirement Income Security Act (ERISA) by making the reporting rules for those 403(b) plans on par with 401(k) plans.

.26 This means that beginning in 2009, employee benefit plans sponsored by charitable organizations and schools under Internal Revenue Code (IRC) section 403(b) and covered under ERISA will be subject to the same reporting and audit requirements that currently exist for section 401(k) plans. This will involve the completion of the Form 5500 as a small or large pension plan, depending on the number of participants eligible to participate in the plan as of the beginning of the plan year. The Department of Labor (DOL) anticipates that most small 403(b) plans will be eligible to use the new Form 5500-SF and thus will only have to meet that limited filing obligation.

.27 For large 403(b) plans, however, the new reporting requirements will require not only the completion of the entire Form 5500, but also the engagement of an independent qualified public accountant (IQPA) to conduct an independent audit of the plan.

.28 The DOL intends to fully enforce this new audit requirement in 2009. Accordingly, it is critical that plan auditors educate themselves and their clients about this change and its effects on plan records that will be subject to audit. Under the current reporting model, it is not uncommon for 403(b) plans to have participant records that are difficult to "roll up" into plan-level records. Careful consideration of such situations will be essential in 2008 to ensure that these 403(b) plans will be auditable in 2009.

.29 The 2009 Form 5500 package and the related Federal Register notices are available on the EBSA's Web site at www.dol.gov/ebsa.

First Year Auditing Considerations for 403(b) Plans

.30 If the auditor did not audit the plan's financial statements or they have not been previously audited, the auditor should apply procedures that are practicable and reasonable in the circumstances to assure him- or herself that the accounting principles used by the plan in the current and the preceding year are consistent. See paragraphs .24–.25 of AU section 420, *Consistency of Application of Generally Accepted Accounting Principles*, for further guidance.

.31 Areas of special consideration in an initial audit of a plan's financial statements include (*a*) the completeness of participant data and records of the prior year(s), especially as they relate to participant eligibility; (*b*) the amounts and types of benefits; (*c*) the eligibility for benefits; and (*d*) account balances. The nature, timing, and extent of auditing procedures applied by the auditor are a matter of judgment and will vary with factors such as the adequacy of past records, the significance of beginning balances, and the complexity of the plan's operations. Because ERISA requires that audited plan financial statements present comparative statements of net assets available for benefits, the current year statements should be audited, and the prior year that is presented for comparative purposes may be either compiled, reviewed, or audited.

Appropriate reference in the current year audit report should be made to describe the level of responsibility assumed in the prior year. However, although a compilation or review of prior year is acceptable, the auditor would apply sufficient auditing procedures on the beginning balance of net assets available for benefits to obtain appropriate evidence that there are no material misstatements to these beginning balances that may affect the current year's statement of changes in net assets available for benefits.

Automatic Enrollment and Planning Considerations

.32 There has been a significant increase in the number of plan sponsors choosing to automatically enroll plan participants largely because the Pension Protection Act of 2006 (PPA) included provisions designed to encourage sponsors of 401(k) plans to add an automatic enrollment feature.

.33 Automatic enrollment is a mechanism under which an eligible employee who does not make an affirmative election to make pretax contributions to the plan is automatically enrolled in the plan at a specific pretax contribution percentage, unless the employee specifically opts out. Because those funds must then be invested, the PPA also included provisions to protect plan fiduciaries that invest a participant's account in certain default investment options. Recently, the IRS issued proposed regulations regarding the implementation of automatic contribution arrangements, and the DOL issued final regulations regarding default investments.

.34 On October 24, 2007, the DOL published a final rule in the Federal Register establishing qualified default investment alternatives (QDIA), making it easier for employers to automatically enroll workers in their 401(k) and other defined contribution (DC) plans. Auditors may want to consider any amendments made to the plan document as a result of the PPA provisions when determining the scope of the audit.

.35 The IRS issued proposed regulations in November of 2007 to implement automatic enrollment. The proposed regulations describe 2 types of automatic enrollment arrangements: an eligible automatic contribution arrangement and a more complex qualified automatic contribution arrangement that passes certain nondiscrimination rules automatically.

.36 The final regulation does not identify specific investment products. Rather, it describes mechanisms for investing participant contributions. The intent is to ensure that an investment qualifying as a QDIA is appropriate as a single investment capable of meeting a worker's long term retirement savings needs.

.37 A copy of the regulation and a fact sheet detailing the rule may be found at the DOL's Web site at www.dol.gov/ebsa/regs.

AICPA Risk Assessment Standards

.38 The eight SASs referred to as "the risk assessment standards" (SAS Nos. 104–111) became effective for audits of financial statements for periods beginning on or after December 15, 2006, (earlier application was permitted), which means they are effective for 2007 calendar year audits. Although the SASs include many of the underlying concepts and detailed performance requirements contained in the standards they amend or supersede, they do create significant new requirements for the auditor. The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits, focusing on identifying and assessing the risks of material misstatements, further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels, and improving the linkage among the risks, controls, audit procedures, and conclusions. Chapter 5 of Audit and Accounting Guide *Employee Benefit Plans*, with conforming changes as of March 1, 2008, discusses how the risk assessment concepts may be applied in employee benefit plan audits. Auditors are encouraged to review such guidance.

Key Provisions of the Risk Assessment Standards

.39 Whether due to error or fraud, the risk assessment standards require the auditor to understand and respond to the risks of material misstatement. That understanding should identify risks that may lead to a material misstatement in the plan's financial statements and any mitigating controls in place. The risk assessment standards place an even greater emphasis on the understanding and testing of internal control. It is not acceptable to simply deem risk to be "at a maximum." Although this does not mean auditors are required to test and rely on controls as part of their audit strategy, they should assess how all five components of internal control over financial reporting relate to the client that they are auditing (see the Committee on Sponsoring Organizations of the Treadway Commission's framework at www.coso.org/key.htm). These standards may significantly affect the formality of your risk assessment and documentation and may vary greatly from what auditors have previously done. Implementation of the SASs should have already been completed and has likely resulted in significant changes to firm audit methodologies and personnel training.

.40 The AICPA issued Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk), which can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Companion Audit Guide

.41 In December 2006, the AICPA published Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (product no. 012456kk). This authoritative guide helps auditors further understand the risk assessment standards. It includes practical guidance, examples, and an in-depth case study. The guide can be ordered by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Technical Questions and Answers

.42 The following Technical Questions and Answers have been developed in response to common questions received from members regarding the implementation of SAS Nos. 104–111, the risk assessment standards.

- TIS section 8200.05, "Testing the Operating Effectiveness of Internal Control"
- TIS section 8200.06, "The Meaning of Expectation of the Operating Effectiveness of Controls"
- TIS section 8200.07, "Considering a Substantive Audit Strategy"
- TIS section 8200.08, "Obtaining an Understanding of the Control Environment"
- TIS section 8200.09, "Assessing Inherent Risk"

These questions and answers are available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Practice+Aids+and+Tools/Recently+Issued+Technical+Practice+Aids.htm.

Limited Scope Certifications

.43 When a plan administrator elects to have a limited scope audit performed, the auditor is instructed by the plan administrator to limit the scope of testing on investment information prepared and certified by a qualified trustee or custodian as complete and accurate. Typically, the trustee or custodian certifies to the completeness and accuracy of the plan's investment assets and investment activity as contained in his or her ordinary books and records, which may or may not be fair value (for example, it may not be based on market quotations or year-end valuations). Although the DOL regulations allow the qualified trustee or custodian to report in this manner, it is the plan sponsor's responsibility to prepare the financial statements and footnote disclosures in accordance with GAAP (that is, at fair value as of the plan year-end).

.44 The auditor's responsibilities for investments covered by the limited scope exemption are to (1) obtain and read a copy of the certification from the plan administrator, (2) determine whether the entity issuing the certification is a qualifying institution under DOL regulations, (3) compare the certified investment information to the financial information in the financial statements and related disclosures, (4) perform the necessary procedures to become satisfied that any received or disbursed amounts reported by the trustee or custodian were determined in accordance with the plan provisions, and (5) determine whether the form and content of the financial statement disclosures related to the investment information prepared and certified by the plan's trustee or custodian are in conformity with GAAP and are in compliance with DOL rules and regulations.

.45 The scope limitation and the corresponding limitation of the auditor's work extend only to investments and related investment information certified by the qualified trustee or custodian. Plan investments not held by a qualified trustee or custodian, such as real estate, leases, mortgages, self-directed brokerage accounts, participant loans, and any other investments or assets not covered by such an entity's certification, should be subjected to appropriate audit procedures. Moreover, the appropriate audit procedures for all noninvestment related information (for example, benefit payments, employer and employee contributions, and receivables) are the same for a limited scope audit as they are for a full scope audit.

.46 When engaged to perform a limited scope audit, the auditor has no responsibility to perform audit procedures on investments and related activity covered by the certification. Although the auditor is not required to audit certain investment information when the limited scope audit exception is applicable, if the auditor becomes aware that the certified information is incomplete, inaccurate, or otherwise unsatisfactory, further inquiry may be necessary that might result in additional testing or modification to the auditor's report. In certain instances, a limited scope audit may no longer be appropriate (or may only be appropriate with respect to certain investments held by the plan).

.47 Because plans increasingly invest in alternative investments (including hedge funds, real estate, limited partnerships, private equity funds, and other difficult-to-value investments), care ordinarily should be taken by plan administrators when determining if certified information can be relied upon in preparing the plan's Form 5500 and related financial statements. If, for example, the auditor becomes aware that adequate year-end valuation procedures have not been performed and therefore the financial statements may not be prepared in conformity with GAAP, the auditor would communicate those findings to the plan administrator. It is the plan administrator's responsibility to prepare the financial statements and footnote disclosures in conformity with GAAP and in compliance with DOL rules and regulations. Accordingly, the plan administrator may request the trustee or custodian to recertify or amend the certification for such investments at their appropriate year-end values or to exclude such investments from the certification. If the trustee or custodian amends the certification to exclude such investments from the certification, or if the trustee or custodian does not recertify those investments, the plan administrator is responsible for valuing such investments as of the plan year-end and engaging the auditor to perform full audit procedures on the investments excluded from the certification. Paragraph 7.69 of Audit and Accounting Guide *Employee Benefits Plans*, with conforming changes as of March 1, 2008 contains an illustrative auditor's report when plan investments have been certified and the plan administrator was unable to determine whether the investment information is valued in conformity with GAAP.

.48 Prior to being engaged to perform a limited scope audit, it is recommended that plan administrators and their auditors briefly discuss the nature of the investments held by the plan (including how those investments are valued) to help ensure that the plan administrator engages the auditor to perform the appropriate type of audit. The plan administrator's decision regarding whether it can rely on a certification for purposes of limiting the scope of the audit has become increasingly more challenging (especially in light of the investment-related issues previously discussed in this alert).

Fair Value Measurements

.49 In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 157, *Fair Value Measurements*, to provide enhanced guidance for using fair value to measure assets and liabilities.

This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. FASB Statement No. 157 amends paragraph 11 of FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans*, to change the definition of *fair value*.

.50 Prior to FASB Statement No. 157, certain fair value measurements were based on the price that would be paid to acquire an asset (an entry price). FASB Statement No. 157 clarifies the definition of *fair value* as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date (an exit price). The exit price is based on the amount that the holder of the asset or liability would receive or need to pay in an actual transaction (or in a hypothetical transaction if an actual transaction does not exist) at the measurement date. In some circumstances, the entry and exit price may be the same; however, they are conceptually different.

.51 Fair value is generally determined based on quoted market prices in active markets for identical assets and liabilities. If quoted market prices are not available, the company uses valuation techniques that place greater reliance on observable inputs (assumptions based on market data) and less reliance on unobservable inputs. In measuring fair value, the plan may make adjustments for risks and uncertainties if a market participant would include such an adjustment in its pricing. Fair value measurements for each major asset or liability are required to be disclosed under FASB Statement No. 157, categorized by where the measurement falls in the fair value hierarchy as discussed in paragraphs 22–31 of the standard.

Effect on Employee Benefit Plans

.52 FASB Statement No. 157 may have a significant effect on the financial reporting for employee benefit plans depending upon the types of investments held by the plan, such as investments in stocks, employer securities, corporate bonds, government securities, investment and insurance contracts, and hard-to-value alternative investments. These investments are made directly by the plan or through common/collective trusts (CCTs), pooled separate accounts, master trusts, investment entities, and registered investment companies. Plans generally report investments at fair value in their financial statements and in regulatory filings with the DOL.

.53 Preparing to meet the requirements of FASB Statement No. 157 will require coordination among plan management, custodians, investment fiduciaries, and auditors. GAAP requires plan management to take responsibility for valuation and the Form 5500 requires assets to be reported at current value. Plan administrators have a fiduciary responsibility to ensure the accuracy of the information reported on the Form 5500. Plan management can delegate but not abdicate their valuation responsibility. Although plan management can outsource the mechanics of the valuation process, they need to retain responsibility for the oversight of the final valuations, including determining the adequacy of the related footnote disclosures.

.54 Because plan sponsors have historically used outside service providers to assist in the valuation of investments, they may not have full insight into the mechanics of the process. Some plan sponsors lack expertise over valuation of investments and will look to their service providers to assist in the process. Undoubtedly clients are at different levels of preparedness when it comes to meeting the requirements of FASB Statement No. 157. Regardless, FASB Statement No. 157 provides an opportunity for greater education of plan management on their responsibilities related to valuation. Service providers frequently offer different levels of services, and plan sponsors need to understand the level of information they are receiving from their service provider.

.55 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. Generally, FASB Statement No. 157 should be applied prospectively as of the beginning of the year in which it is initially applied. Retrospective application by recognizing a cumulative effect adjustment applies only in specific circumstances as discussed in paragraph 37 of the statement. Readers can access the full text of FASB Statement No. 157 on the FASB Web site at www.fasb.org.

Fair Value Option—FASB Statement No. 159

.56 FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, creates a fair value option under which an organization may irrevocably elect fair value as the initial and subsequent measure for many financial instruments and certain other items, with changes in fair value recognized in the statement of activities as those changes occur. An election is made on an instrument-by-instrument basis (with certain exceptions), generally when an instrument is initially recognized in the financial statements. FASB Statement No. 159 is effective as of the beginning of the first fiscal year that begins after November 15, 2007. Earlier adoption is permitted if certain conditions described in paragraph 30 of the statement are met. See FASB Statement No. 159 for further guidance, including presentation and disclosure requirements.

FASB Staff Position AAG INV-1 and SOP 94-4-1

.57 FASB Staff Position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*, was effective for financial statements for plan years ending after December 15, 2006.

.58 The FSP provided (1) a definition of a *fully benefit-responsive investment contract* and (2) guidance with respect to the financial statement presentation and disclosure of fully benefit-responsive investment contracts. FSP AAG INV-1 and SOP 94-4-1 defines an *investment contract* as (*a*) a traditional or separate account guaranteed investment contract (GIC), (*b*) a bank investment contract, (*c*) a synthetic GIC contract composed of a wrapper contract and the underlying wrapped portfolio of individual investments, or (*d*) a contract with similar characteristics (for example, insurance company general account evergreen group annuity products).

.59 Plans may hold stable value investments through direct contracts with issuers or through a specifically plan-managed account. Plans may also hold stable value investments through beneficial ownership of bank collective funds (CCTs) that own investment contracts. Insurance company pooled separate accounts that hold investment contracts also have similar characteristics. See Technical Questions and Answers (TIS) section 6931.08, "Types of Investments Subject to SOP 94-4, as Amended by FSP AAG INV-1 and SOP 94-4-1" (AICPA, *Technical Practice Aids*).

Financial Statement Presentation and Disclosure Requirements

.60 DC plans, including both health and welfare and pension plans, should report all investments (including derivative contracts) at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a DC plan attributable to fully benefit-responsive investment contracts. An investment contract is considered fully benefit responsive if certain criteria are met for that contract, as analyzed on an individual basis. See paragraph 3.36 of Audit and Accounting Guide *Employee Benefits Plans*, with conforming changes as of March 1, 2008 for such criteria.

.61 The statement of net assets available for benefits of the plan shall present amounts for (1) total assets, (2) total liabilities, (3) net assets reflecting all investments at fair value, and (4) net assets available for benefits. The amount representing the difference between (3) and (4) shall be presented on the face of the statement of net assets available for benefits as a single amount, calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to each fully benefit-responsive investment contract from fair value to contract value. The statement of changes in net assets available for benefits shall be prepared on a basis that reflects income credited to participants in the plan and net appreciation or depreciation in the fair value of only those investment contracts that are not deemed to be fully benefit responsive.

.62 DC plans, including both health and welfare and pension plans, shall disclose the following in connection with fully benefit-responsive investment contracts in the aggregate:

1. A description of the nature of those investment contracts, how they operate, and the methodology for calculating the interest crediting rate, including the key factors that could influence future average interest crediting rates, the basis for and frequency of determining interest crediting rate resets, and any minimum interest crediting rate under the terms of the contracts. This disclosure should explain the relationship between future interest crediting rates and the amount reported on the statement of net assets available for benefits representing the adjustment for the portion of net assets attributable to fully benefit-responsive investment contracts from fair value to contract value.
2. The average yield earned by the plan for all fully benefit-responsive investment contracts (which may differ from the interest rate credited to participants in the plan) for each period for which a statement of net assets available for benefits is presented. This average yield shall be calculated by dividing the annualized earnings of all fully benefit-responsive investment contracts in the plan (irrespective of the interest rate credited to participants in the plan) by the fair value of all fully benefit-responsive investment contracts in the plan.

   Help Desk—The average yield should be based on the investment income from the investments in the fund (not the crediting rate) as of the last day of the period, annualized, divided by the fair value of the investments as of the last day of the period. In situations in which there are material unsettled trades as of year-end, consideration should be given to adjusting the investment earnings for the estimated amount relating to those unsettled trades.

3. The average yield earned by the plan for all fully benefit-responsive investment contracts with an adjustment to reflect the actual interest rate credited to participants in the plan for each period for which a statement of net assets available for benefits is presented. This average yield shall be calculated by dividing the annualized earnings credited to participants in the plan for all fully benefit-responsive investment contracts in the plan (irrespective of the actual earnings of those investments) by the fair value of all fully benefit-responsive investment contracts in the plan.

   Help Desk—The average yield should be based on the amounts credited to participants in the fund as of the last day of the period, annualized, divided by the fair value of the investments in the fund as of the last day of the period. Note that even though the numerator is the earnings credited to participants in the fund (crediting rate) based on contract value, the denominator is based on the fair value, not the contract value, of the investments.

4. A description of the events that limit the ability of the plan to transact at contract value with the issuer (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives), including a statement as to whether the occurrence of those events that would limit the plan's ability to transact at contract value with participants in the plan is probable or not probable (the term *probable* is used in the FSP AAG INV-1 and SOP 94-4-1 consistent with its use in FASB Statement No. 5, *Accounting for Contingencies*).
5. A description of the events and circumstances that would allow issuers to terminate fully benefit-responsive investment contracts with the plan and settle at an amount different from contract value.

.63 When the plan invests in a CCT (or similar vehicle) or a master trust that holds fully benefit-responsive investment contracts, the fair value of the investment in the CCT or master trust should be reported in investments on the face of the statement of net assets available for benefits. The amount representing the difference between the fair value and the contract value of the fully benefit-responsive investment contracts held by the CCT or master trust should be presented on the face of the statement of net assets available for benefits and calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to the plan's investment in the CCT or master trust from fair value to contract value. For the master trust, the adjustment only relates to the plan's portion of the master trust invested in the fully benefit-responsive investment contracts. See TIS section 6931.09, "Financial Statement Presentation When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts" (AICPA, *Technical Practice Aids*). See also the illustrative financial statements in appendix D of this alert.

.64 Plans that directly invest in CCTs, or similar vehicles that hold fully benefit-responsive investment contracts, do not need to include the disclosures detailed in FSP AAG INV-1 and SOP 94-4-1 in the plan's financial statements. Such disclosures would be included in the financial statements of the CCT, in accordance with paragraph 11 of the FSP. For plans that invest in a master trust that holds fully benefit-responsive investment contracts, the notes to the financial statements should include the disclosures required in paragraph 15 of SOP 94-4, *Reporting of Investment Contracts Held by Health and Welfare Benefit Plans and Defined-Contribution Pension Plans* (AICPA, *Technical Practice Aids*, ACC sec. 10,620), as amended by FSP AAG INV-1 and SOP 94-4-1, related to the fully benefit-responsive investment contracts held by the master trust. See TIS section 6931.10, "Financial Statement Disclosure Requirements When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts" (AICPA, *Technical Practice Aids*).

Related Auditing Issues

.65 The valuation of investment contracts in accordance with the FSP is the responsibility of the plan sponsor. The plan sponsor can look to an outside service provider to assist in the mechanics of the valuation. The plan sponsor ordinarily should have sufficient information to evaluate and independently challenge the valuation. Plan sponsors may need to work with the various service providers (for example, the trustee or custodian, investment advisor, or recordkeepers) surrounding the investment contracts to determine which service provider will assist in the mechanics of the valuation. Auditors may recommend to plan sponsors that discussions with service providers happen early in the audit planning process to ensure the investment contract valuation will be completed in time for filing deadlines.

.66 For full scope audits of plans with investments in investment contracts, auditors may gain an understanding of the valuation methodology during planning through discussion with clients and service providers and review of valuation documentation. The auditor then reviews and tests the significant assumptions and underlying data used in the valuation of the investment contracts. Additional guidance can also be found in the AICPA practice aid titled *Alternative Investments—Audit Considerations* at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Practice+Aids+and+Tools/Alternative_investments.htm.

.67 Many plans invest in investment contracts through bank collective investment funds or CCT funds. Paragraph 7.22 of Audit and Accounting Guide *Employee Benefits Plans* contains examples of substantive procedures for auditing a CCT when performing a full scope audit. If the year-end of the fund is different from the year-end of the plan, the auditor may obtain the financial statements as of the fund's year-end and consider performing the following additional procedures:

- Obtain a confirmation of the plan's position in the fund as of the plan's year-end.
- Obtain the trial balance and portfolio listing of the fund as of the plan's year-end.
- Obtain a SAS No. 70 report on the bank's internal controls during the gap period.
- Perform valuation procedures on the investments held as of the plan's year-end or perform analytical procedures based on indicative data comparing the audited financial statements as of the fund's year-end to the unaudited information as of the plan's year-end, or perform both procedures.

.68 The underlying investments of synthetic investment contracts may consist of investments affected by the subprime or credit crisis events previously described, resulting in an increase in the adjustment from fair value to contract value at year-end. It is important for auditors of plans with investment contracts to take into account the auditing considerations previously described for subprime and other investments affected by recent market events. Auditors may want to read the investment contract agreements and consider what effect any depreciation in value of the underlying investments has on the overall value of the contract and its ability to maintain its benefit-responsiveness features.

.69 For limited scope audits, if the auditor becomes aware that the certified information relating to such investments is inaccurate as a result of valuation or other concerns, further inquiry may be necessary that might result in additional testing or modification to the auditor's report. See paragraphs 7.65–.69 of Audit and Accounting Guide *Employee Benefits Plans* for further guidance on limited scope audits.

Economic and Industry Developments

The State of the Economy

.70 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an impact on the entity's financial statements being audited.

.71 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007, compared with an increase of 2.9 percent in 2006. According to 2007 fourth-quarter final estimates, real GDP increased at an annual rate of just 0.6 percent, down from third quarter real GDP growth of 4.9 percent.

.72 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. As of February 2008, the unemployment rate was 4.8 percent, representing approximately 7.4 million people.

.73 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 3 percent to 2.25 percent as of the end of March 2008. The Federal Reserve noted in its March press release that financial markets continue to experience considerable stress and credit continues to tighten for some businesses and households. The housing contraction continues to deepen and labor markets soften. As such, the policy actions taken to decrease rates are meant to promote moderate growth over time and mitigate risks to economic activity while moderating inflation.

Industry Trends and Conditions

.74 Over the past year, employee benefit plans have seen a dramatic change in their portfolios as well as a new understanding of the types of investments held by plans. Due to the current credit crisis, there has been an increase in participant loans taken in 401(k) plans. Many participants are borrowing from their 401(k) plans to pay their monthly mortgage payments. Additionally, there is an increase in the number of participants that are attempting to qualify for hardship withdrawals to pay their mortgages or credit card debt. It is important for plan auditors to be aware of the increase in both participant loans as well as hardship withdrawals.

.75 Secure client information continues to be an issue for both participants and employers who offer employee benefit plans. Stolen computers include client data and present risks not only for the participants but also for the plan sponsor, service providers, and auditors. Practitioners need to implement appropriate security procedures so that personal information such as social security numbers are not included in working papers or on computer supplied information.

.76 New litigation in the past few months is drawing attention to timely complying with participant's instructions. Recently, the U.S. Supreme Court issued its ruling in LaRue v. DeWolff, Boberg & Associates, Inc. The high court disagreed with the Fourth Circuit Court of Appeals' decision that a participant in a 401(k) plan is prohibited from using Section 502(a)(2) of ERISA to recover losses allegedly caused by his or her employer's failure to carry out his or her investment instructions. It is important for auditors to be aware that plan sponsors may be liable for these types of issues.

Audit and Accounting Guide Revision as of March 1, 2008

.77 The AICPA Audit and Accounting Guide *Employee Benefit Plans* has been updated with conforming changes as of March 1, 2008, and includes guidance in planning and performing audits under the risk assessment standards (SAS Nos. 104–111). It also provides additional guidance on the auditor's responsibilities as set forth in SAS Nos. 112–114, including identifying and reporting internal control deficiencies, understanding the link between the auditor's consideration of fraud and the auditor's assessment of risk, and the auditor's communications with those charged with governance.

.78 The Audit and Accounting Guide *Employee Benefits Plans* has also been updated to reflect FASB Statement No. 157, *Fair Value Measurements* and FSP AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans*.

> **Help Desk**—To order Audit and Accounting Guide *Employee Benefit Plans*, with conforming changes as of March 1, 2008, call the Service Center Operations at (888) 777-7077 or go to www.cpa2biz.com and order product no. 012598kk.

Audit and Attestation Issues and Developments

Client Acceptance and Continuance

.79 Statement on Quality Control Standard No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* (AICPA, *Professional Standards*, vol. 2, QC sec. 20 par. .14), provides that policies and procedures should be established for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for that client. Such policies and procedures should provide the audit firm with reasonable assurance that the likelihood of association with a client whose management lacks integrity is minimized. Such policies and procedures should also provide reasonable assurance that the audit firm (*a*) undertakes only those engagements that the firm can reasonably expect to be completed with professional competence and (*b*) appropriately considers the risks associated with providing professional services in the particular circumstances.

.80 The following is a list of risk factors that engagement teams might consider during their client acceptance and continuance discussions related to an employee benefit plan engagement:

- Ineffective monitoring by management (for example, lack of oversight by plan management of outside providers [such as lack of review of reconciliations of trust assets to participant accounts or no independent records maintained by the sponsor to periodically check information provided by the custodian] or an ineffective plan oversight committee)
- Complex or unstable organizational structure (for example, turnover of plan management, oversight committee members, or outside service providers or difficulty in determining which individuals or committees have oversight or fiduciary responsibility for the plan)
- Weak financial reporting skills, failure by the plan administrator or plan management to take appropriate responsibility for the financial statements, or the plan has a material weakness or significant deficiency in its financial reporting process

- Significant related party transactions or transactions with parties in interest, or history of engaging in prohibited transactions (for example, involvement in nonexempt transactions or events or activities [violations of laws, regulations, or plan provisions] that could cause loss of tax-exempt status)
- Plan invests in nonreadily marketable securities (such as limited partnerships and nonpublicly traded employer securities), specialized or unique investments, or engages in securities lending (regardless of the scope of the audit) and management lacks the proper oversight and understanding of such investments, including valuation
- The use of service providers that do not provide a type 2 SAS No. 70 report
- The plan is inherently more complex (such as, health and welfare plans and leveraged ESOPs) and the engagement team lacks the technical skills that are necessary to audit such a plan
- Other inherent risk factors, such as electronic payroll or human resources systems, complex-decentralized control environment, or in-house processing of complex transactions (such as benefit calculations and claims)
- The plan has significant issues with regulatory agencies, pending enforcement matters, or other investigations

SAS No. 70 Issues

.81 Internal control of a benefit plan consists of the controls at the sponsor as well as the controls at applicable service and subservice organizations that perform significant plan functions including but not limited to processing of participant-level transactions such as contributions and distributions, investment custody and valuation, and execution of investment transaction A report prepared in accordance with SAS No. 70, as amended, may be useful in providing user auditors with a sufficient understanding of controls at the service organization to assess the risks of material misstatement in accordance with AU section 314.

.82 It is not uncommon for the service organization's SAS No. 70 report to cover only some of the services used by the plan (for example, the report might cover custodial services but not allocation services) or to not cover activities performed by subservice organizations (for example, the report might not cover services performed by an investment pricing service). The subservice organization may be a separate entity from the service organization or may be related to the service organization. For example, 401(k) recordkeepers often exclude the related party data processing center from their SAS No. 70 reports. The independent auditor's report included in the SAS No. 70 report will typically include language that the report does not cover certain significant service or subservice organizations or systems. For less significant service or subservice organizations or systems, this language will not be included in the auditor's report but will be described elsewhere in the report. In these situations, auditors would gain an understanding of the controls related to the services not covered in the SAS No. 70 report as they relate to the plan's transactions processed by the service or subservice organization that are part of the plan's information system. If the user auditor does not have sufficient information to assess control risk as low or moderate, the plan auditor may decide to perform additional tests of the service or subservice organization's controls or perform additional audit procedures on the plan's financial statements. The auditor may obtain a copy of the subservice organization's SAS No. 70 report if one was issued. See chapter 6 in Audit and Accounting Guide *Employee Benefits Plans* for further guidance.

The Auditor's Communication With Those Charged With Governance

.83 In December 2006, the Auditing Standards Board (ASB) issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*, vol. 1, AU sec. 380) which supersedes SAS No. 61, *Communication With Audit Committees*. This SAS establishes standards and provides guidance to auditors on matters required to be communicated with those charged with governance in relation to an audit of financial statements and became effective for audits of financial statements for periods beginning on or after December 15, 2006. SAS No. 61 established communication requirements applicable to plans that either have an audit committee or have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee. However, SAS No. 114 broadens the applicability of the SAS to audits of the financial statements of all nonissuers regardless of size, ownership, or organizational structure.

.84 SAS No. 114 provides a framework for the auditor's communication with those charged with governance and identifies specific matters to be communicated, many of which are generally consistent with the requirements in SAS No. 61. However, SAS No. 114 does include certain additional matters to be communicated and provides additional guidance on the communication process. Among other matters, SAS No. 114 adds requirements to communicate an overview of the planned scope and timing of the audit. It also requires that significant matters that are communicated with those charged with governance be documented.

Identifying Those Charged With Governance

.85 The SAS uses the term *those charged with governance* to refer to those with responsibility for overseeing the strategic direction of the plan and obligations related to the accountability of the plan, including overseeing the plan's financial reporting process. The SAS uses the term *management* to refer to those who are responsible for achieving the objectives of the plan and who have the authority to establish policies and make decisions by which those objectives are to be pursued.

.86 Governance structures vary by plan. The auditor should determine the appropriate person(s) within the plan's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated.

.87 Because there is such diversity, it is not possible for SAS No. 114 to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Furthermore, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances. The auditor's understanding of the plan's governance structure and processes obtained in accordance with AU section 314 is relevant in deciding with whom to communicate matters. When the appropriate person(s) with whom to communicate is not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the plan's governance structure with whom the auditor will communicate.

.88 For a single-employer employee benefit plan, the individual charged with governance may include the audit committee of the plan sponsor or the appropriate entity overseeing the activities of the employee benefit plan, such as the employee benefit committee, administrative committee, investment committee, plan administrator, or responsible party. For a multiemployer plan, those charged with governance will ordinarily be the board of trustees. For further guidance, see AU section 380 and paragraphs 5.05–.12 and 12.38–.46 in Audit and Accounting Guide *Employee Benefit Plans*.

Auditing Plan Fees and Expenses

.89 Most defined benefit plans and many DC plans pay administrative expenses out of plan assets. As plan sponsors look for ways to decrease operating costs, it is becoming more common to amend benefit plans to allow for the payment of the expenses out of the plan. In certain instances, forfeitures are used to pay plan expenses. The auditor's responsibilities with respect to testing administrative expenses are detailed in paragraphs 12.13–.14 of Audit and Accounting Guide *Employee Benefit Plans*. Typically, plan expenses are below materiality levels in a benefit plan audit and, therefore, are not subject to significant detailed testing. Often, auditors obtain reasonable assurance related to expense balances using other audit procedures such as substantive analytics. Auditors need to gain an understanding of the expenses that are allowed to be paid by the plan according to the plan document.

.90 Auditors may also want to be aware of fees paid by one plan on behalf of another plan resulting from errors or inappropriate allocations or fees paid by the plan for certain services (actuarial fees) that may relate to services provided to the plan sponsor. Excessive fees or expenses paid by the plan that are not allowed by the plan document, no matter how immaterial, may be deemed a prohibited transaction requiring further testing and disclosure as described in paragraph 11.13 of Audit and Accounting Guide *Employee Benefit Plans*.

.91 In addition, any fees or expenses paid to related parties need to be considered for disclosure under FASB Statement No. 57, *Related Party Disclosures*. In certain instances, it may be difficult to understand the nature of the expenses being paid by the plan due to the netting of expenses against income or other "hidden" arrangements. In these situations, the auditor may determine that additional inquiries with management and the service providers or review of service provider agreements may assist in understanding the fee arrangements. Also, refer to the DOL-issued publication *Understanding Retirement Plan Fees and Expenses* to better understand and evaluate plan fees and expenses.

Investments Reported as 103-12 Entities as Required by the DOL

.92 For many years, EBSA has focused attention on the valuation of hard-to-value assets (currently, more commonly referred to as *alternative investments*). This year, the EBSA is reviewing alternative investments held by 103-12 investment entities (103-12 IEs) to determine how they are valued and whether they are audited in accordance with generally accepted auditing standards (GAAS).

.93 In the initial phase of this year's effort, EBSA has contacted twenty-four 103-12 IEs, requesting access to working papers supporting their independent audits. Review of these working papers will provide an understanding of the auditor's approach to auditing alternative investments.

.94 A subsequent phase of EBSA's review will involve similar reviews of alternative investments, including investment units of 103-12IEs held directly or indirectly by employee benefit plans. Particular attention will be paid to investments that have been exempted from audit pursuant to DOL Code of Federal Regulations (CFR) Title 29, section 2520.103-8, "Limitation on scope of accountant's examination." EBSA intends to obtain an understanding of the procedures used by plan administrators to properly value, disclose, and monitor their plans' alternative investments.

Eligible Compensation and Payroll Data

Eligible Compensation

.95 Plan documents specify the various aspects of compensation (for example, base wages, overtime, and bonuses) that are considered in the calculation of plan contributions for DC plans and in the determination of benefits in a defined benefit plan. Testing of payroll data may address the determination of eligible compensation for individual employees and comparison of the definition of *eligible compensation* used in the calculation to the plan document. Because this process is generally not included in the payroll testing of the plan sponsor or in SAS No. 70 type 2 reports, a comparison of eligible compensation per the plan document to eligible compensation used in plan operations may be necessary.

.96 The auditor may examine the definition of *compensation* used to determine whether the method used is allowable within the IRC. An employer may use any definition of compensation that satisfies IRC section 414(s), which does not allow a method of determining compensation if that method discriminates in favor of highly compensated employees. Salary deferrals do not have to be included in the definition of compensation if the plan specifically provides for this limitation.

Self-Employed Persons

.97 For plans that include self-employed persons, it is important for the auditor to gain an understanding of the plan's definition of compensation for self-employed persons, procedures for withholding participant deferrals, and the procedures for accumulating the final measurement of net earnings from self-employment for allocations.

.98 Often, benefit plan participants include persons who are classified as self-employed for tax purposes. This includes partners in a partnership, members in an LLC, or sole owners of unincorporated businesses. Plan compensation for these persons is defined as *net earnings from self-employment*. For a partner or LLC member classified as a partner, the starting point for determining compensation is to look on his or her Form 1065, Schedule K-1, "Partner's Share of Income, Deductions, Credits, etc." (line 14). For a self-employed person or the owner of a single-member LLC, this number is derived from information included in Schedule C, "Profit or Loss From Business (Sole Proprietorship)," of his or her Form 1040. As is the case with wages, plans may have additional provisions that affect the amount of net earnings from self-employment that is recognized for plan purposes.

.99 A critical audit consideration is the realization that this figure will frequently vary from the amount of any periodic cash payments made to such persons during the plan year. Salary deferrals may be withdrawn from these periodic payments, but these payments are not compensation for purposes of plan allocations or compliance testing.

Payroll Data

.100 If one audit firm performs both the plan audit and corporate audit, there may be some efficiencies to be achieved surrounding the testing of payroll. Although testing of the payroll area may have been performed in conjunction with the corporate audit, relevant assertions related to payroll for the plan audit may or may not have been tested. When determining the scope of testing for the plan audit, the plan auditor may consider gaining an understanding of the assertions relevant to payroll that were tested during the corporate audit.

.101 For example, payroll testing performed for a corporate audit may not place any emphasis on individual amounts withheld and may be insufficient to satisfy the payroll testing requirements for a plan audit. Often payroll processing is outsourced to an outside service provider that may or may not have an appropriate SAS No. 70 report (see chapter 6 of Audit and Accounting Guide *Employee Benefit Plans* for further discussion of SAS No. 70 reports).

.102 If the plan sponsor has an internal audit department that has performed work on payroll data that is relevant to the audit, and it would be effective to incorporate their work into the audit, AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* (AICPA, *Professional Standards*, vol. 1), provides guidance on what the auditor needs to consider when making use of the internal auditors' work in an audit.

Actuarial Reports for Defined Benefit Plans

.103 Several economic and demographic assumptions are used in actuarial valuations for defined benefit plans to determine funding requirements and the actuarial present value of accumulated plan benefits in accordance with FASB Statement No. 35. One of the most significant economic assumptions is the discount rate. There are two approaches that can be used to select the discount rate. The most commonly used approach is to reflect the long term expected rate of return on assets. This amount is generally stable from one year to the next. This assumption would reflect anticipated growth of the actual underlying investments in the pension trust. Many employers are changing the mix of investments that have been used historically. For employers that are changing their mix of assets, the actual history of returns is not as relevant as new expectations for the new mix of assets. When an approach of looking at the long term expected return is used, the rate selected will generally be the same as that used for funding purposes. It is important that the plan auditors not assume that the FASB Statement No. 35 discount rate under this approach will be the same as the FASB Statement No. 87, *Employers' Accounting for Pensions*, expected long term rate of return on assets or the FASB Statement No. 87 discount rate. In most cases, the plan discount rate will be different than either of the FASB Statement No. 87 rates. Therefore, auditors may want to take care when determining if the proper rate is disclosed in the benefit plan's financial statements.

.104 The second approach that may be used to select the FASB Statement No. 35 discount rate is to select a rate that reflects an insurance company's purchase rates as of the benefit information date. Because this is a settlement type of rate, it may be similar to (but not necessarily the same as) the FASB Statement No. 87 discount rate. A discount rate selected on this basis can be expected to change from year to year to reflect changes in the long term interest rate markets. As of December 31, 2007, long term interest rates increased significantly. This was largely due to risk factors related to the subprime mortgage crisis. Those plans that base the discount rate on a settlement type rate and that use end-of-year benefit information will see a significant increase in the discount rate. That increase will produce a gain with a resulting decrease in present value of accumulated plan benefits. Plans that use beginning of year information will not experience that impact until 2008.

.105 The most significant demographic assumptions used to determine the actuarial present value of accumulated plan benefits include mortality rates, turnover, retirement age, marriage statistics, and form of payment or type of benefit elections. With the increase in life expectancies, the mortality assumption should include improvements to longevity that were not included in earlier tables. Certain mortality tables used by actuaries include the 1983 GAM, 1994 GAM, UP 1994, and RP 2000 tables. For 2007 calendar year plans, a new mortality table is required as part of the minimum required contribution calculation. This table, which is based on the RP 2000 mortality table, has replaced the 1983 GAM table. Many actuarial reports will refer to this table as the RP 2000 Combined Mortality Table with projections as specified by IRS Regulation 1.412(1)(7)-1. It has been common practice to use the same table for FASB Statement No. 35 purposes as is required for minimum funding purposes. It can therefore be expected that the RP 2000 table with or without the IRS required projections will be used frequently for 2007 audits. Beginning in 2007, the new table that will be required for minimum funding purposes will be based on the RP 2000 table.

.106 Because older mortality tables such as 1983 GAM are becoming outdated and will no longer be used for funding purposes after 2006, auditors may consider challenging the use of such tables for purposes of determining the FASB Statement No. 35 liability beginning in 2007. It is possible that the use of the 1983 GAM table may continue to be acceptable depending on the plan's experience; however, most plans will be changing to use the 1994 GAM, UP 1994, or the recent RP 2000 tables for their mortality assumptions.

.107 Regardless of the assumption used, each assumption must be individually reasonable. Plan administrators ordinarily should review actual plan experience with assumptions used periodically to determine if any changes should be made. The following may also be considered as plan auditors review actuarial valuations:

- Trends and nature of benefit distributions (for example, lump sum versus annuity). A plan that predominantly pays lump sum benefits may have a higher obligation than an equivalent plan that pays annuities. To properly value the plan's liabilities, there must be assumptions used to reflect the cost of the lump sum benefits. If there are only assumptions that reflect annuities, the lump sum benefits may be undervalued.
- Whether there has been a shift in the plan population over time. This could warrant a different assumption for turnover or retirement, for example, if participants are retiring much earlier or later than assumed.
- Whether there have been recent plan mergers or acquisitions. In the case of a plan merger, all assumptions would be reviewed for their continued reasonableness because the assumptions used for one plan may not be appropriate for the plan being merged.
- Whether there have been any plan benefit formula changes or a freezing of the plan. Changes in plan benefits available may affect anticipated turnover and retirement patterns. These assumptions would be reviewed if the plan is amended to change benefits.

- Whether consistent gains and losses are generated each year. If yes, this may indicate that one or more of the assumptions are not reasonable based on actual experience.
- When reviewing an actuarial report, consideration may be given to
  — consistency of benefits accumulated each year (auditors would expect changes if there has been a plan merger, acquisition, a significant plan provision change, or changes to the underlying assumptions).
  — benefit payments in the roll forward of accumulated plan benefits should match the amount per the statement of changes in net assets (to properly match these amounts, it is necessary to understand if the beginning of the year or end of the year information is used for the actuarial valuation).
  — the asset value on the financial statements should match the asset value shown in the actuarial report.
  — inclusion of impact of a change in plan provisions and impact of merger, spin-off, or acquisition.

.108 It is also important to note that the assumption of salary increases may not be relevant for FASB Statement No. 35 because the statement is based on the disclosure of the actuarial present value of accumulated plan benefits, which does not take into account future salary increases. It may have some relevance if the actuary does not have or maintain salary histories for the plan participants and the salary increase assumption is used to estimate prior salary histories.

The Use of Beginning of Year Benefit Information Date

.109 The presentation of the financial statement information and the footnotes are affected by the benefit information date selected for disclosure. The preferred approach is to use an end-of-year benefit information date. If this is done, the present value of accumulated plan benefits will be as of the same date as the net assets. In this case, at a minimum, there will be two statements of net assets available for benefits and one statement of changes in net assets. There will be two corresponding statements (or disclosure in the footnotes) of the present value of accumulated plan benefits and one statement of changes. Examples of this are shown in exhibits D-1, D-2, D-3, and D-4 of Audit and Accounting Guide *Employee Benefit Plans*.

.110 However, if beginning-of-year benefit information is used, the date of the benefit information in the actuarial report may not match the date at which net assets are presented. For example, for financial statements presented as of December 31, 2007, and December 31, 2006, the actuarial valuation will be as of January 1, 2007. For the benefit information to match the statement of net assets, the present value of accumulated plan benefits should be presented as of December 31, 2006 (one day earlier). Typically, this will not cause a material misstatement unless there was a plan amendment that was adopted on or after January 1, 2007, with a January 1, 2007, effective date. In that case, the effect of the amendment must be removed. As shown in Audit and Accounting Guide *Employee Benefit Plans*, when beginning-of-year benefit information is used, 2 statements of net assets and 2 statements of changes would be included. Only a single year of present value of accumulated plan benefits is required with a reconciliation from the prior year. Examples of this are shown in exhibits D-1, D-7, and D-8 of Audit and Accounting Guide *Employee Benefit Plans*.

Allocation Testing for DC Plans

.111 One of the objectives of auditing procedures applied to individual participant accounts of a DC plan is to provide the auditor with a reasonable basis for concluding whether net assets and transactions have been properly allocated to participant accounts in accordance with the plan documents. Participant account activity during the year (for example, contributions, income allocations, expense allocations, and forfeiture allocations) would be taken into consideration in the determination of auditing procedures including consideration of reliance on a SAS No. 70 type 2 report, if available. Net appreciation or depreciation is typically not allocated to participant accounts but is derived by the recordkeeping system based on the end of day pricing of investments. Often, dividend and interest income is immaterial to the financial statements taken as a whole. In a limited scope audit, the allocation of investment income to individual accounts is not certified by the trustee or custodian and therefore would be considered for testing by the auditor. One method to test certain allocations is to recalculate activity for individual participants (for example, deferral or matching contributions). Other allocations may be performed electronically by the recordkeeping system, and it may be more efficient to rely on the SAS No. 70 type 2 report to reduce the scope of the substantive testing. Some of the additional substantive procedures the auditor may consider in addition to obtaining the SAS No. 70 type 2 report for participant allocations include

- reconciling the summation of participant accounts by investment option to investment balances.
- testing adjustments to participant accounts during the period.
- testing the participant complaint process including the resolution of complaints.

.112 Based on the results of those procedures as well as the auditor's overall risk assessment of participant accounts, the auditor can determine if additional procedures are required, such as

- performing scanning analytics of participant activity (for example, contributions, benefit payments, and income allocation) during the period or
- confirming allocation activity directly with participants.

See chapter 10 of Audit and Accounting Guide *Employee Benefit Plans* for further discussion of auditing participant data.

Missing Participant Data

.113 With recent trends in plan mergers as a result of corporate actions, a number of plan sponsors have been experiencing difficulties in maintaining all pertinent participant data relating to census data and benefit payments. Often, plan sponsors do not maintain the proper detail supporting the deferred vested benefits for defined benefit plans. Lapses in maintaining data can also be caused by a change in service providers (for example, actuaries or other third-party administrators). ERISA requires plans to maintain records that are detailed enough to determine benefits due or that may become due. When auditors are unable to obtain the necessary information to test participant data or benefit payments, this could be considered a restriction on the scope of the audit. According to AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*, vol. 1), restrictions on the scope of the audit, whether imposed by the client or by circumstances (such as the timing of his or her work, the inability to obtain sufficient competent evidential matter, or an inadequacy in the accounting records), may require the auditor to qualify his or her opinion or to disclaim an opinion. In these situations, the auditor will need to determine how significant the restriction on the scope of the audit is to the overall engagement to determine the effect on the auditor's report.

.114 The missing participant data issue is exacerbated when there is a change in auditor, especially for defined benefit plans. Often, the predecessor auditor has been auditing the participant data for years and is comfortable with the cumulative audit knowledge. However, if the participant data have not been maintained, the successor auditor may have a scope limitation. Prior to accepting a new benefit plan engagement, auditors may wish to take special care in determining if there are any missing participant data.

.115 Auditors may recommend that the plan sponsor consult with legal counsel and consider contacting the DOL prior to attaching a qualified or disclaimer of opinion relating to a Form 5500 filing for a benefit plan.

Auditing Health and Welfare Plans

.116 This section is intended to describe certain areas unique to health and welfare benefit plans because these plans present unique audit challenges. They continue to be more complex and more expensive to audit than other types of plans. The administration of health claims payments has always been complicated, and the requirements for more timely claims processing, appeal decisions, and the privacy requirements under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) have added to these complexities. Standard audit programs for employee benefit plans should be tailored to the unique nature of health and welfare plans.

.117 Before performing a health and welfare plan audit, it is critical for the auditor to obtain a clear understanding of the plan. It is important to note that the audit requirement is of the plan and not of the trust. Therefore, the auditor needs to understand the benefits offered by the plan and may consider the following:

- Which benefits are fully insured versus self-insured
- Who the providers are and the elements of the contractual arrangement with the plan
- For self-insured claims, how the various claims are administrated and adjudicated; how fees are charged; and if the benefit payment is recognized when the check is written, when the check is presented for payment, or when the check has cleared the bank
- For insured benefits, how the premiums are determined and billed and if the contract requires or provides for premium stabilization reserves or experience-rated adjustments
- What the funding arrangement is for each benefit offered, for example, paid from trust like the voluntary employees' beneficiary association (VEBA), taxable trust, 401(h) account or general assets of plan sponsor, and frequency of payment (daily, monthly, quarterly, or annually)
- What information systems are used to support the plan operations and which of those are in-house systems or outsourced

.118 When answering these questions, the auditor would consider the responses with regard to all covered participants (that is, active participants, dependents, terminated employees under the Consolidated Omnibus Budget Reconciliation Act [COBRA], and retirees). Understanding the various benefits offered, the service providers, and the control environment is integral to developing the audit approach and the sampling methodology.

.119 This section is intended to describe certain areas unique to health and welfare plans and in certain instances to provide examples of audit procedures.[1]

HIPAA Privacy Concerns

.120 HIPAA established standards for the privacy and protection of individually identifiable electronic health information as well as administrative simplification standards. HIPAA includes protection for those who move from one job to another, who are self-employed, or who have preexisting medical conditions. It places requirements on employer-sponsored group health plans, insurance companies, and health maintenance organizations.

.121 The rules include standards to protect the privacy of individually identifiable health information. The rules (applicable to health plans, health care clearinghouses, and certain health care providers) present standards with respect to the rights of individuals who are the subjects of this information, procedures for the exercise of those rights, and the authorized and required uses and disclosures of this information. These are the first-ever national standards to protect medical records and other personal health information.

Business Associates Agreements

.122 HIPAA requires that plan sponsors enter into a business associates agreement with any of their service providers that have access to any protected health information (PHI). Accordingly, an auditor is

[1] Some of the example audit procedures may be more extensive than what is required by generally accepted auditing standards.

considered a business associate and, after entering into a business associates agreement, should be permitted access to the necessary information required by professional standards to opine on a plan's financial statements. When asked to sign a business associates agreement, auditors need to take special care in reviewing the agreement.

.123 Sponsors of health and welfare plans frequently hire third party administrators (TPAs) to perform administrative functions for their plans, such as administration of participant claims. Generally, the plan auditor tests a sample of claims processed by the TPA as part of the audit. As a result, confidential information generally is exchanged. Before agreeing to provide this proprietary information and data, TPAs frequently request the plan sponsor or auditor, or both, to sign confidentiality agreements or nondisclosure agreements (NDAs). As with business associates agreements, auditors need to take special care in reviewing nondisclosure agreements. Often, the auditor may not agree with certain language in the agreement, resulting in delays in the audit until mutually agreeable language is determined.

> **Help Desk—**NDAs can take many forms and arise on the audit of all types of plans. For example, some TPAs require the auditor to agree to the terms of an NDA prior to being permitted limited access to electronic databases needed to obtain audit evidence directly from the TPA's Web site. Acceptance of these terms would constitute an NDA.

Audit Documentation

.124 As previously noted, HIPAA requires that plan sponsors enter into a business associates agreement with any of their service providers that have access to PHI. Accordingly, an auditor is considered a business associate and, after entering into a business associates agreement, should be permitted access to the necessary information required by professional standards to opine on a plan's financial statements. HIPAA regulations allow for the auditors' working papers to contain PHI; however, PHI in working papers obligates the auditing firm to comply with the HIPAA privacy laws and business associates agreement provisions to maintain the privacy of the PHI, which includes

- restricting access to the working papers,
- providing an accounting of disclosures of PHI, and
- reporting to the sponsor any misuse of PHI by the accounting firm.

.125 AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), (SAS No. 103) provides guidance to auditors on documentation requirements. See paragraphs 5.80–.87 of Audit and Accounting Guide *Employee Benefit Plans* for guidance.

.126 De-identified health information is not subject to HIPAA. To be considered de-identified under HIPAA, information in working papers may not contain

- names,
- dates (such as birth date, admission date, discharge date, and date of death),
- age if 90 or over,
- social security numbers (or block out all except last 4 digits),
- telephone and fax numbers,
- e-mail addresses,
- medical record numbers,
- health plan beneficiary numbers, or
- account numbers.

Health and Welfare Claims and Potential Problems

.127 When auditing claims, it is not expected that the auditor would have the knowledge of a skilled billing claims specialist or a skilled medical specialist when claims are processed by a third-party administrator. It is important however, that the auditor have a basic understanding of the terms of the plan and have the skill and knowledge to test that claims are being properly adjudicated. The auditor may want to be aware of any processing problems that the plan is experiencing with claims and discuss what the plan is doing to correct these issues with the plan administrator. Examples of potential problems when processing claims include

- unbundling (charging for performance of multiple procedures when only one procedure was performed) or upcoding (charging for a higher level of service than the procedure actually performed),
- fictitious services or unnecessary services performed by providers,
- duplicate claims or duplicate coverage,
- kickbacks,
- nontransmittal of rebates and discounts to the plan, and
- improper denial of claims.

.128 When testing health and welfare claims, some errors typically found include the following:

- *Eligibility*. Testing for eligibility is different from those procedures for a pension or 401(k) plan. In many cases, the person receiving the benefit is different from the actual participant. Audit procedures may include verifying the coverage elected by the participant at the date of service. Many plans allow coverage for a spouse, dependents, or other family members. Most problems with eligibility relate to a participant who terminates and whose eligibility ceased before the date of service for which the claim was filed.
- *Wrong individual*. The claim was paid for the wrong person. This occurs when two or more participants have the same or similar names. Claims are also paid for the wrong family member.
- *Deductibles*. Deductibles are not calculated properly.
- *Accumulators*. Benefits are improperly totaled, which may cause the benefit amount to improperly exceed the maximum benefit.
- *Other errors*. These may occur in the diagnosis code, the Current Procedural Terminology or Healthcare Common Procedure Coding System code,[2] or in the information in the claims form.

Contracts With Benefit Service Providers

.129 For any contracts the plan has with a benefit service provider, the auditor may examine the reconciliation of the amounts due to or from the benefit service provider to determine if the amounts are appropriate. Any amounts due from the benefit provider are typically classified as a receivable in the statement of net assets, and amounts due to the provider for benefits paid would normally be shown in the financial statements as a liability on the statement of net assets. If the benefit payment has not been disbursed, then the amount would typically be included with benefit obligations of the plan.

Rebates Receivable

.130 If there are rebates receivable from a service provider, the auditor may examine those rebates to determine if the correct amount for the appropriate period of time has been properly reflected in the financial

---

[2] *Physicians' Current Procedural Terminology* (CPT) is a listing of descriptive terms and identifying five-digit codes for reporting medical services and procedures. The Health Care Financing Administration (HCFA) developed level II and level III codes in its Healthcare Common Procedure Coding System (HCPCS codes) to bill for supplies and services not covered by a CPT code (level I).

statements. In addition, the auditor may gain an understanding of the service contracts and apply procedures to determine if all rebates have been received by the plan. These include rebates from prescription drug programs or excess premiums paid over claims incurred under certain contractual arrangements with insurance companies. The auditor would also consider the propriety of the rebate. For example, if the payment vehicle for the claims receiving the rebate was the VEBA trust account, receipt of the rebate by the plan sponsor and deposit of such rebate into a nontrust account may not be appropriate.

Accumulated Eligibility Credits

.131 Many plans cover participants when they are terminated or otherwise unemployed. Single employer plans often cover up to 30 days after employment ends. Multiemployer plans can cover up to 60 days or longer after employment ends. In the construction industry, where work is seasonal, hour banks are often used to provide insurance coverage for the months when the participant does not work. If the plan permits accumulated eligibility credits, there should be an obligation recorded for those credits. The auditor may determine whether the plan provides for accumulated eligibility credits and, if so, if the obligation has been properly calculated, reported, and disclosed in the financial statements in accordance with paragraph 23 of SOP 01-2, *Accounting and Reporting by Health and Welfare Benefit Plans* (AICPA, *Technical Practice Aids*, ACC sec. 10,830).

Actuarial Data and Census Information

.132 The actuarial data and census information furnished by the health and welfare plan sponsor to the actuary, especially when the plan covers retirees, is as important as the data used in a defined benefit pension plan. The auditor may gain assurance through confirmation or other audit procedures to ensure that the actuarial data and census information furnished to the actuary is complete and accurate.

Stop-Loss Coverage

.133 One way for a plan to protect itself against excessive losses is to purchase stop-loss insurance. Stop-loss insurance can be either specific or aggregate. Specific stop-loss insurance protects the plan against claims that exceed a predetermined maximum per person or per family. All claims above the specific stop-loss amount (for example, $25,000) are normally reimbursed at 100 percent up to a limit contained in the plan. Aggregate stop-loss coverage reimburses the plan when total eligible claims exceed a predetermined aggregate, such as 125 percent of expected claims.

.134 It is important for the auditor to gain an understanding of the stop-loss coverage that a plan has and to test that claims have been properly filed against the policy within the period specified by the policy.

Premium Stabilization Reserves

.135 In some fully insured or minimum premium arrangements, an insurance company may require a contract holder to maintain a premium stabilization reserve. Such reserves are usually adjusted by the insurance company at the end of the policy year. The annual adjustment is often the computed difference, or some factor thereof, between actual claims experience of the insurer and premiums paid by the contract holder. Generally, premium stabilization reserves are held in the general assets of the insurance company and are used to pay future premiums of the contract holder. If the premium stabilization reserve is certain to provide future benefits to the plan, the reserve is reported as an asset of the plan. In some cases, the contract holder may liquidate the premium stabilization reserve via cash payment from the insurance company. In other cases, the premium stabilization reserve is forfeited by the contract holder in the event of termination of coverage. Criteria for realization of the reserve are considered when evaluating the existence of the asset.

Health Savings Accounts and Health Reimbursement Arrangements

.136 Individuals enrolled in certain high-deductible health plans can establish health savings accounts (HSAs) to receive tax-favored contributions (from either the employee or employer). The contribution made to the HSA is distributed on a tax-free basis to pay or reimburse qualifying health expenses. The contribution may be used for future expenses or may be used (on a taxable basis) for nonhealth purposes. Funds held in the HSA can be used to pay premiums for long term care insurance and health insurance premiums while receiving unemployment benefits or continuation benefits under COBRA. The HSA's funds are required to be held by an insurance company or trustee (bank).

.137 When HSAs or health reimbursement arrangements (HRAs) are standalone, they have no audit requirement. However, HSAs and HRAs that are components of a health and welfare plan are subject to audit, as are the other components of that health and welfare plan, provided that the plan in question is subject to ERISA's audit requirement. When made a component of a health and welfare plan that is subject to audit, it is critical to obtain a clear understanding of these arrangements to determine the appropriate accounting treatment and auditing procedures. For example, understand where the sources of funding come from (employers, participants, or both), who has legal title to the amounts in these accounts, how the claims are adjudicated (by employer, self-adjudicated by participant, or other), and whether there is a carryforward provision into the next plan year for unused amounts.

.138 In Field Assistance Bulletins (FABs) 2004-1 and 2006-2, the DOL addressed various questions concerning HSAs, including the issue of whether HSAs established in connection with employment-based group health plans constitute employee welfare benefit plans for purposes of Title I of ERISA. See these FABs and paragraph 4.06 in Audit and Accounting Guide *Employee Benefit Plans* for further information about HSAs and HRAs.

COBRA

.139 Many health and welfare plans are required to provide continuation of benefits upon termination of employment through COBRA. This continuation of benefits may be considered a postemployment or postretirement obligation, depending upon the terms of participation. In accordance with SOP 01-2, the benefit obligation associated with COBRA would be equal to the actuarial present value of the cost of such benefits, less the present value of expected participant contributions for such benefits. Many plans require that participants pay the estimated full cost of health benefits provided under COBRA. In such situations, the net cost to the plan sponsor for such benefits is zero, thus the plan would not recognize an obligation. If the plan sponsor subsidizes the cost of health benefits under COBRA, an obligation should be recognized by the plan to the extent that all criteria required by either FASB Statement No. 112, *Employers' Accounting for Postemployment Benefits* or FASB Statement No. 106, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, or both, are satisfied.

.140 In many cases, the collection of COBRA contributions and payment of COBRA benefits are performed by third-party administrators. The administration of these benefits needs to be understood, so accounting for all COBRA activity is included in the financial statements of the plan. In the event that benefits provided by COBRA are self-insured, the obligation for claims incurred but not reported should include COBRA participants.

Notices for COBRA Continuation Health Care Coverage

.141 The DOL has published rules clarifying the requirements for notices under COBRA for employees, employers, and plan administrators. Under COBRA, most group health plans must give employees and their families the opportunity to elect a temporary continuation of their group health coverage when coverage would otherwise be lost for reasons such as termination of employment, divorce, or death. COBRA requires that certain notices be given before individuals can elect COBRA coverage. The plan administrator must give employees and spouses a general notice explaining COBRA when the employees and spouses first become covered under the plan. When an event occurs that would trigger a right to elect COBRA coverage, either the employer or the employee and his or her family members must notify the plan of the event. Finally, when the plan receives this notice, the plan must notify individuals of their COBRA rights and allow them to elect continuation coverage. Model notices contained in the regulation are available for download from the EBSA's Web site at www.dol.gov/ebsa.

Recent Auditing Pronouncements and Related Guidance

.142 Presented in the following table is a list of recently issued auditing pronouncements and related guidance relevant to employee benefit plans. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter*, *Journal of Accountancy*, and in the quarterly electronic newsletter *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. See the "Form 11-K Audits" section of this alert for a discussion of PCAOB standards.

Communicating Internal Control Related Matters Identified in an Audit

.143 The ASB issued SAS No. 112, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*, vol. 1, AU sec. 325), which became effective for audits of financial statements for periods ending on or after December 15, 2006. SAS No. 112 establishes standards and provides guidance on communicating matters related to a plan's internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 112 supersedes SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, as amended. This SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion). Among other things, SAS No. 112 does the following:

- Requires the auditor to communicate control deficiencies that are *significant deficiencies* or *material weaknesses* in internal control. The terms are defined in the SAS. The term *reportable condition* is no longer used. When SAS No. 112 was issued, the terms *significant deficiencies* and *material weaknesses* were consistent with PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. However, with the adoption of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"), the PCAOB redefined these terms, which now differ from SAS No. 112.

- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements and requires that the auditor conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

- Identifies areas in which control deficiencies ordinarily are to be evaluated as at least significant deficiencies and identifies indicators that control deficiencies should be regarded as at least a significant deficiency and a strong indicator of a material weakness.

- Requires the auditor to communicate significant deficiencies and material weaknesses identified in the audit, in writing, to management and those charged with governance. This includes the significant deficiencies and material weaknesses that were communicated in previous audits if they have not yet been remediated.
- Indicates that the communication must be in writing and is best made by the report release date (the date on which the auditor grants permission for the client to use the auditor's report in connection with the financial statements), but should be made no later than 60 days following the *report release date*.
- Contains illustrative written communications to management and those charged with governance.

.144 The AICPA published Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

.145 See appendix B of this alert for further guidance specific for employee benefit plans.

AICPA Peer Review Developments—Recurring Deficiencies Found in Employee Benefit Plan Audits

.146 The AICPA, working with the EBSA, has made a concerted effort to improve the guidance and training available to auditors of employee benefit plans. The AICPA self-regulatory teams continue to be concerned about deficiencies noted on audits of employee benefit plans, and practitioners need to understand that severe consequences can result from inadequate plan audits, including loss of membership in the AICPA and loss of license. Some recurring deficiencies found in employee benefit plan audits include the following:

- Inadequate testing of participant data
- Inadequate testing of investments, particularly when held by outside parties
- Inadequate documentation of audit procedures in areas such as payroll data, participant data, benefit payments, contributions, prohibited transactions, investment transactions, planning, understanding of internal control, and analytical procedures
- Inadequate disclosures related to participant-directed investment programs
- Failure to understand testing requirements on a limited scope engagement
- Inadequate consideration of prohibited transactions
- Incomplete description of the plan and its provisions
- Inadequate or missing disclosures related to investments, including the description of the method and significant assumptions used to determine fair value, an indication of how the fair value had been determined or the net change in fair value of each significant type of investment, the average yield, a description of the basis for determining the interest rate, and whether the contracts carry a minimum crediting interest rate
- Failure to disclose the amount of forfeited nonvested accounts, party-in-interest transactions, or the reconciliation between the assets reported in the audited financial statements and the assets reported in the Form 5500
- Failure to properly report on a DOL limited scope audit
- Improper use of limited scope exemption because the financial institution did not qualify for such an exemption
- Inadequate or missing disclosures related to participant data

- Failure to properly report on or include the required supplemental schedules relating to ERISA and the DOL

.147 The Audit and Accounting Guide *Employee Benefit Plans* provides guidance concerning areas of noted deficiencies.

Form 11-K Audits

.148 The Securities and Exchange Commission (SEC) requires employee stock purchase, savings, and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to section 15(d) of the Securities Exchange Act of 1934. Plans that are required to file a Form 11-K are deemed to be issuers under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the PCAOB.

.149 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review *SEC and PCAOB Alert—2007/08* (product no. 022498kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

Recent PCAOB Pronouncements and Related Guidance	
PCAOB Auditing Standard No. 5 Issue Date: July 2007 (Applicable to audits conducted in accordance with PCAOB standards)	*An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards")
PCAOB Release 2007-005A (appendix 3) Issue Date: June 2007 (Applicable to audits conducted in accordance with PCAOB standards)	PCAOB conforming amendments to the interim Auditing Standards (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards"). In conjunction with the PCAOB's adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in appendix 3 of PCAOB Release No. 2007-005A at www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf.

PCAOB Staff Audit Practice Alert No. 2 Issue Date: December 2007 (Applicable to audits conducted in accordance with PCAOB standards)	*Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, "Section 400—Staff Audit Practice Alerts")

Form 8-K Requirements for Form 11-K Filers

.150 For an employee benefit plan required to file Form 11-K, the SEC staff has historically expected a change in a plan's auditor to be reported on Form 8-K; however, plans that filed their financial statements as part of the plan sponsor's annual report (as provided for in Securities Exchange Act of 1934 Rule 15d-21) have not been expected to report changes in its auditors on Form 8-K. This requirement was discussed at the April 4, 2006, AICPA SEC Regulations Committee meeting, and although the SEC staff unofficially stated that all employee stock purchase, savings, or similar plans that change auditors are not required to file a Form 8-K (regardless of whether it files its annual financial statements on Form 11-K or as part of the plan sponsor's annual report), the committee observed that, under Section 1000.08(m), "Notification of the Commission or Resignations and Dismissals from Audit Engagements for Commission Registrants," of the PCAOB Interim Quality Control Standards, an independent registered public accounting firm is required to report the termination of the auditor-client relationship for any SEC registrant, which is defined to include employee benefit plans that file Form 11-K. This communication should be in writing directly to the former client, with a simultaneous copy to the Office of the Chief Accountant (OCA) of the SEC. This letter should be sent by the end of the fifth business day following the firm's determination that the client-auditor relationship has ended (or it may be faxed to OCA at 202-772-9251 with a reference to "PCAOB Letter File"). The SEC staff agreed to discuss its position on Form 8-K reporting by employee benefit plans with the PCAOB staff. Until authoritative guidance is provided by the SEC that provides a specific exemption, public accounting firms should continue to provide these "five-day" letters to comply with PCAOB requirements for a change in auditor of a plan that files a Form 11-K. An employee benefit plan whose financial statements are filed as an amendment to the sponsor's Form 10-K does not meet the definition of an *SEC engagement* and would therefore fall outside the scope of Section 1000.08(m).

Preapproval of Employee Benefit Plan Audits

.151 In December 2005, the SEC issued "Current Accounting and Disclosures Issues in the Division of Corporation Finance" to provide guidance regarding the preapproval of audits of employee benefit plans. Section II.R.3 is summarized in the following paragraph.

.152 An employee benefit plan may be an affiliate of a registrant as its plan sponsor. The SEC's independence rules related to preapproval surround services provided to the issuer and the issuer's subsidiaries but not to services provided to other affiliates of the issuer that are not subsidiaries. Therefore, the independence rules do not require the audit committee of the plan sponsor to preapprove audits of the employee benefit plans, although the audit committee is encouraged to do so. When employee benefit plans are required to file Form 11-K, those plans are separate issuers under the Exchange Act; as a result, those issuers are subject to the preapproval requirements. This preapproval can be provided by either the audit committee of the plan sponsor or the appropriate entity overseeing the activities of the employee benefit plan, such as the trustee, plan administrator, or responsible party. The SEC's rules require that all fees, including fees related to audits of employee benefit plans, paid to the principal auditor be included in the company's fee disclosures, regardless of whether the audit committee of the company preapproved those fees. As part of the exercise to gather the information for the required fee disclosures, the audit committee should be made aware of all fees paid to the principal auditor, including those related to audits of the employee benefit plans. The company may elect to separately indicate in their disclosures those fees paid to the principal auditor that were not subject to the preapproval requirements. Registrants and their auditors are reminded that the financial statements included in a Form 11-K must be audited by an independent auditor who is registered with the PCAOB, and the audit report must refer to the standards of the PCAOB rather than GAAS.

Audit Reports—Following Two Sets of Standards

SEC Requirements

.153 The SEC requires employee stock purchase, savings, and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to Section 15(d) of the Securities Exchange Act of 1934. When the Form 11-K is filed separately (not as an exhibit to Form 10-K), it must be filed with the SEC within 90 days after the end of the plan's fiscal year-end; however, if the plan is subject to ERISA, the Form 11-K filing deadline is increased to180 days after the plan's fiscal year-end.

Applicable Audit Standards

.154 Plans that are required to file Form 11-K are deemed to be *issuers* under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the PCAOB. These plans may also be subject to ERISA and must submit to the DOL an audit in accordance with GAAS promulgated by the AICPA's ASB. It is our understanding that the SEC will not accept an audit report that references GAAS, and the DOL will not accept an audit report that does not reference GAAS.

Performance and Reporting Requirements

.155 Based on AICPA staff discussions with the SEC and PCAOB staff to seek clarification of the performance and reporting requirements for audits of Form 11-K filers, firms will need to conduct their audits of these Form 11-K plans in accordance with two sets of standards and prepare two separate audit reports: an audit report referencing PCAOB standards for Form 11-K filings with the SEC and a separate audit report referencing GAAS for DOL filings. The PCAOB and SEC staff believe that an opinion issued in accordance with PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Rules of the Board, "Standards") (www.pcaobus.org/Rules/Rules_of_the_Board/Auditing_Standards_1.pdf), does not allow a reference to GAAS; therefore, a "dual" standard report is not appropriate and will not be accepted by the SEC.

.156 Any questions regarding performance and reporting requirements of audits of financial statements of Form 11-K filers should be directed to the SEC Division of Corporation Finance, OCA at (202) 551-5300. See paragraph 13.19 of Audit and Accounting Guide *Employee Benefit Plans* for an example of an opinion for a Form 11-K audit.

Accounting Issues and Developments

FASB Accounting Standards Codification™

.157 On January 15, 2008, FASB launched the 1-year verification period of the *FASB Accounting Standards Codification*.™ The codification is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. The codification includes all accounting standards issued by a standard-setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. The codification also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.158 The codification does not change GAAP but rather it reorganizes thousands of GAAP pronouncements into approximately 90 topics. Therefore, the 1-year verification period is not to debate the underlying requirements of GAAP but rather to verify that the codification appropriately captures them and accurately reflects existing U.S. GAAP for nongovernmental entities. The verification period is also a period for constituents to acquaint themselves with the new structure and to submit feedback regarding any issues before the codification content becomes authoritative. At the end of the 1-year verification period, FASB is expected to formally approve the codification as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve the codification in April 2009.

.159 The codification uses a topical structure in which topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard-setter or standard from which the content was derived. The topics of the codification reside in four main areas: presentation, financial statement accounts, broad transactions, and industry guidance. The overall presentation area addresses presentation of financial information but does not address items such as recognition, measurement, or derecognition. For example, topics in this area include income statement, balance sheet, and earnings per share. The financial statement account area presents topics in financial statement order including assets, liabilities, equity, revenue, and expenses. The broad transactions area includes topics related to multiple financial statement accounts that are transaction oriented, such as derivatives and business combinations. The industry area includes guidance unique to an industry or type of activity such as airlines, software, and employee benefit plans. Plan accounting may be found in the following sections of the codification:

- Section 960—Defined Benefit Pension Plans
- Section 962—Defined Contribution Pension Plans
- Section 965—Health and Welfare Benefit Plans

.160 Constituents are encouraged to use FASB's online Codification Research System free of charge and provide feedback to FASB on the codification. The Codification Research System includes general information on how to use the online research system and special features such as Cross Reference Reports, which show where current standards reside in the codification. Readers are encouraged to register and access the codification at www.fasb.org/project/codification&retrieval_project.shtml. Special attention should be paid to where the FASB reconciled conflicts in existing GAAP and to identify any unintentional changes to GAAP.

Unrelated Business Income Tax and FASB Interpretation No. 48

.161 Although qualified benefit plans are not generally subject to taxation, certain activities of a qualified plan may be taxable. In general, unrelated business taxable income (UBTI) of a tax-exempt entity is subject to taxation. UBTI is

a. gross income derived from an unrelated trade or business that is regularly carried on, less

b. allowable deductions directly connected with the trade or business.

.162 With respect to qualified retirement plans, *unrelated trade or business* is defined as any trade or business regularly carried on by the trust or by a partnership of which the trust is a member. This means that a qualified plan can have UBTI due to its investments. For tax-exempt welfare plans, UBTI includes the previous examples. In addition, such plans may be subject to UBTI on their investment income if their assets exceed certain allowable reserves.

.163 Nonleveraged investments, such as government securities, stocks and debt instruments of noncontrolled corporations, mutual funds, and insurance company annuity contracts, do not typically generate UBTI.

However, other nonleveraged investments, such as investments in partnerships, real estate investment trusts, loans or mortgages, and options to buy or sell securities such as short sales or repurchase agreements, may generate UBTI. The most common plans that generate UBTI are health and welfare plans and defined benefit pension plans. However, with the increase of such investments held by DC plans, such plans may begin to be subject to UBTI also.

FASB Interpretation No. 48

.164 FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes*, clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes.* This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. See FIN 48 for further guidance.

.165 For public enterprises (including nonpublic consolidated entities of public enterprises that apply GAAP), this interpretation is effective for fiscal years beginning after December 15, 2006. For nonpublic enterprises (as defined in paragraph 289 of FASB Statement No. 109), except for nonpublic consolidated entities of public enterprises that apply U.S. GAAP, this interpretation is effective for annual financial statements for fiscal years beginning after December 15, 2007. See FSP FIN 48-2, *Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises*, for further guidance on the effective date. Earlier adoption is permitted as of the beginning of an enterprise's fiscal year.

Considerations for Employee Benefit Plans

.166 FSP FIN 48-2 has generally deferred the effective date of the application of FIN 48 to fiscal years commencing after December 15, 2007. However, when applied, the standard will require assessment of uncertainty of income tax positions for all open years. As such, the auditor may wish to consider the implications of this standard during 2007 benefit plan audits.

.167 Because benefit plans are generally exempt from income taxes, there are few issues that may trigger the application of FIN 48. The main concern for all plans is the retention of the plan's tax-exempt status. For retirement plans, the existence of the IRS's Employee Plans Compliance Resolution System under Revenue Procedure 2006-27 is generally assumed to meet the conditions of an *administrative practice or precedent* as defined in FIN 48, which can be relied upon to retain the plan's exempt status for all but the most egregious of violations. Note that there is no such relief program for welfare benefit plans.

.168 Notwithstanding this general relief for the plan's tax qualified status, a plan may be faced with issues under FIN 48. These potential issues include, but are not limited to, the following:

- Uncertain tax positions taken by pass-through entities in which the plan has invested that generate material unrelated business income tax to the trust
- The determination of whether a pass-through entity generates unrelated business income to the plan
- The assumptions used in determining the reserves for a welfare benefit plan that is subject to unrelated business income tax due to excess asset accumulations
- The assumptions used by an ESOP of an S corporation to demonstrate satisfaction with the "broadly held" rules of IRC Section 409(p) and the associated exemption from tax on the pass-through income
- The continuation of a welfare benefit plan's tax exempt status

Recent AICPA Independence and Ethics Pronouncements

.169 AICPA *Independence and Ethics Alert—2007/08* (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

Recent Accounting Pronouncements and Related Guidance

.170 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the *CPA Letter* and *Journal of Accountancy*.

Recent Accounting Pronouncements and Related Guidance	
FASB Statement No. 161 (March 2008)	*Disclosures about Derivative Instruments and Hedging Activities*
FASB Statement No. 160 (December 2007)	*Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*
FASB Statement No. 141 (revised 2007) (December 2007)	*Business Combinations*
FASB Statement No. 159 (February 2007)	*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*
FASB Statement No. 158 (September 2006)	*Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*
FASB Statement No. 157 (September 2006)	*Fair Value Measurements*
FASB Interpretation No. (FIN) 48 (June 2006)	*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* FASB Staff Position (FSP) FIN 48-2, *Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises*, issued in February 2008, defers the effective date of FIN 48 for certain nonpublic enterprises, as defined in the FSP, to the annual financial statements for fiscal years beginning after December 15, 2007.
FASB EITF Issues (Various dates)	Go to www.fasb.org/eitf/agenda.shtml for a complete list of EITF Issues.
FASB Staff Positions (Various dates)	Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs.
TIS section 6931.08–.10 (AICPA, *Technical Practice Aids*) (Nonauthoritative)	These questions and answers discuss various employee benefit plan topics.
AICPA Practice Guide (Nonauthoritative)	"Practice Guide on Accounting for Uncertain Tax Positions Under FIN 48"

.171 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to employee benefit plans are briefly explained in this alert. The AICPA general *Audit Risk Alert—2007/08* and other AICPA industry-specific alerts contain summaries of recent pronouncements that may not be discussed in this alert. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

Disclosures About Derivative Instruments and Hedging Activities

.172 In March 2008, the FASB issued FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities*. The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged.

Regulatory Developments

2007 Form 5500 Series

.173 On October 10, 2007, the DOL, the IRS, and the PBGC published the 2007 Form 5500 "Annual Return/Report of Employee Benefit Plan" and related instructions.

.174 Modifications to the Form 5500 for plan year 2007 are described under "Changes to Note" in the 2007 instructions. Significant changes include the following:

Modifications to the Form 5500 Annual Report for 2007

- Under the PPA, a new simplified reporting option is available for eligible plans with fewer than 25 participants as of the beginning of the plan year.
- The instructions for voluntary alternative reporting option for certain plans with fewer than 25 participants on page 8 describe this reporting option.
- Under the PPA, separate actuarial information schedules were developed for 2008 plan year filings for single employer plans (Schedule SB) and multiemployer plans (Schedule MB). Accordingly, the Schedule B is not a valid schedule to file with a plan's 2008 Form 5500 annual return/report. A caution added to the 2007 instructions advises that filers required to file a Schedule B cannot use the 2007 forms to satisfy their 2008 filing requirements, and that short plan year filers who must file a Schedule SB or Schedule MB and/or a supplemental attachment to Schedule R for 2008 will have an automatic extension to file their complete Form 5500 until 90 days after the 2008 forms are available to use for filing.
- Under the PPA, some multiemployer pension plans will have to provide for the 2008 plan year certain PPA-required information as an attachment to the Schedule R. A caution added to the 2007 instructions advises multiemployer defined benefit pension plan filers, including short plan year filers, that they cannot use the 2007 Schedule R without the attachment to satisfy their 2008 Form 5500 filing requirements.
- For Schedule B, Section 1.412(l)(7)-1 of the Income Tax Regulations (published February 2, 2007) provides updated mortality tables to be used under IRC section 412(l)(7)(C)(ii) to determine current liability for participants and beneficiaries (other than disabled participants) for plan years beginning on or after January 1, 2007. The 2007 instructions for Schedule B, line 6d, reflect these updated mortality tables and the list of codes used for valuation purposes and for calculating current liability.

- For Schedule B, IRC section 412(l)(10) states that the *unfunded mortality increase*, as defined in IRC section 412(l)(10)(B), is amortized over a period of 10 years beginning with the first plan year for which new mortality tables are applicable (that is, the 2007 plan year). The amount of the unfunded mortality increase will be combined with any outstanding balance of unfunded old liability and reported on line 12g of the 2007 Schedule B. The associated amortization amount will be combined with any unfunded old liability amount and reported on line 12j of the 2007 Schedule B. ***Note:*** For most plans, the unfunded old liability is completely amortized by the first day of the 2007 plan year.

- For Form 5500, the instructions on page 3 for "Special Rules for Certain Plans of Partnerships and Wholly Owned Trades or Businesses" were revised pursuant to the PPA for 1-participant retirement plans in determining the exemption for filing a Form 5500-EZ when total plan assets are $250,000 or less at the end of the plan year beginning on or after January 1, 2007.

Modifications to the Form 5500-EZ Annual Report for 2007

- Under the PPA, the requirements for filing annual returns with respect to 1-participant retirement plans have been modified to ensure that such plans (and any other plans of the employer) with total assets of $250,000 or less as of the close of the plan year beginning on or after January 1, 2007, will not have to file a return for that year upon meeting the 5 conditions under "Who May File Form 5500-EZ" (see "General Instructions").

- Plans beginning on or before December 31, 2006, for which a Form 5500-EZ was required to be filed will not need to continue filing the Form 5500-EZ unless their total plan assets (for 1 or more 1-participant plans, separately or together) exceed $250,000 at the close of the plan year beginning on or after January 1, 2007.

.175 The official government-printed forms are available by calling (800) TAX-FORM (800-829-3676). In addition, EBSA publications may be ordered by calling (866) 444-EBSA (3272). Information copies of the forms, schedules, and instructions are available on the EBSA's Web site at www.efast.dol.gov.

.176 Filers should monitor the ERISA Filing Acceptance System (EFAST) Web site for information on approved software vendors when completing 2006 Forms 5500 by computer and for electronic filing options. Filers may contact the EFAST Help Line for general assistance by calling (866) 463-3278.

2007 Form M-1 for Multiple Employer Welfare Arrangements

.177 On December 12, 2007, the DOL published in the Federal Register the 2007 Form M-1 annual report for multiple employer welfare arrangements (MEWAs). Plan administrators may use EBSA's online filing system to expedite processing of the form.

.178 MEWAs generally are arrangements that offer medical benefits to the employees of 2 or more employers or to their beneficiaries. The annual filing date for the 2007 Form M-1 is March 3, 2008. In addition, administrators can request an automatic 60-day extension to May 2, 2008. The 2007 form is virtually identical to last year's form.

.179 The online filing system is available on EBSA's Web site. It allows filers to complete the form and submit it at no cost. The online form can be completed in multiple sessions and be printed for the filer's records. The Web site includes a user manual, frequently asked questions (FAQs), and a link to submit questions electronically.

> **Help Desk—**To use the online filing process, go to www.askebsa.dol.gov/mewa. Technical assistance for the online filing system is also available by calling (202) 693-8600. Information about the Form M-1 and how to fill it out is available on the Web site or by calling (202) 693-8360. Paper copies of the form are available at www.dol.gov/ebsa (click on "Forms/Doc Requests") or by calling EBSA toll-free at (866) 444-EBSA (3272).

Correspondence From EFAST or the DOL OCA

.180 Plan administrators often receive correspondence from the DOL regarding the Form 5500 filed for their pension and welfare benefit plans. These letters are generated by both the EFAST processing center in Lawrence, Kansas, and the DOL's Office of the Chief Accountant (OCA) in Washington, DC. Auditors are often asked by their clients to assist in the resolution of issues contained in these government letters.

EFAST-Generated Correspondence

.181 Each year, plan administrators complete and submit to the DOL a Form 5500 for each of their qualified employee benefit plans. Large plans (and certain small pension plans) also require an annual audit, and the independent auditor's report and audited financial statements become an integral part of the Form 5500 filing.

.182 Once completed, the Form 5500 is filed with the DOL's EFAST processing center in Lawrence, Kansas. EFAST uses sophisticated electronic technologies to review each filing before acceptance. The DOL, IRS, and the PBGC have created a variety of edit tests designed to check for things such as completeness, accuracy, timeliness, internal consistency, missing schedules or attachments, and failure to answer mandatory questions. If after subjecting Form 5500 filings to these multiagency edit tests deficiencies or discrepancies are identified, the EFAST system generates a letter addressed to the plan administrator that identifies the problem(s) and provides 30 days within which to make any necessary corrections. After 30 days, if the filing remains deficient, EFAST will generate a second letter in a final attempt to perfect the filing. At the end of a second 30-day period, the Form 5500 filings are said to "post" final to the ERISA database. Those filings still containing errors or omissions are flagged for further review by the DOL's OCA, the IRS, and the PBGC.

Correspondence From the OCA

.183 The DOL's OCA has the responsibility for enforcing ERISA reporting and disclosure requirements. This includes ensuring that the Form 5500 filings are filed timely and correctly and determining whether plan audits are performed in accordance with professional auditing and regulatory standards. The OCA routinely queries the ERISA database and targets for review Form 5500 filings that satisfy certain criteria, including those filings in which processing errors went uncorrected and those with improperly prepared auditor's reports. The OCA staff review the Form 5500 filings and also request copies of working papers that support audit engagements. If the OCA staff identifies problems, a formal enforcement process commences with the issuance of a notice of rejection (NOR) against the plan administrator.

.184 Upon receipt of an NOR, the plan administrator has 45 days to make any necessary corrections to the Form 5500 filing. This may involve the auditors having to correct their audit reports or even perform additional fieldwork in audit areas in which work was previously not performed or deemed by the DOL to be insufficient. At the end of the 45-day period, if the Form 5500 filing remains deficient, the DOL issues a notice of intent to assess a penalty (NOI), potentially subjecting the plan administrator to civil penalties of up to $1,100 per day (imposed from the day after the original due date of the filing). As a policy matter, however, most deficiencies are penalized at $150 per day with penalties capped at $50,000.

.185 When plan administrators receive an NOI, they have 35 days to submit to the DOL a statement of reasonable cause, submitted under penalty of perjury, in which they set forth any reasons why the penalty should be abated in part or in full. It is important to note that traditionally the DOL will not consider abatement of any penalties in cases where deficiencies still exist. If the plan administrator fails to comply with the requirements of the NOI, the penalty becomes a final DOL action, and the plan administrator forfeits all appeal rights.

.186 After the DOL reviews the statement of reasonable cause, the DOL issues a notice of determination that contains the final penalty amount assessed against the plan administrator. The plan administrators may choose to pay the penalty amount or, within 35 days as provided for in the letter, file an answer with the administrative law judge that appeals the penalty.

Important Reminders

.187 Plan administrators should make all efforts to respond timely and thoroughly to all correspondence they receive from the EFAST processing center. Failure to do so may result in future enforcement correspondence from the DOL's OCA. The DOL's penalty process contains rigid timeframes, and DOL officials do not have latitude to extend the deadlines contained in any correspondence. Plan administrators should also be aware that they may receive future enforcement correspondence from the IRS or PBGC, or both, regarding any unresolved filing issues.

.188 Plan auditors often assist their clients in responding to the various DOL penalty notices. To respond on behalf of their clients, plan auditors must be authorized to do so pursuant to a duly executed, notarized power of attorney. Any questions regarding the DOL penalty process should be directed to the OCA at (202) 693-8360.

EBSA-Enhanced Programs to Assess Plan Audit Quality

.189 The EBSA continues its enhanced programs aimed at assessing and improving the quality of employee benefit plan audits. According to the EBSA, nearly 50 public accounting firms audit more than 100 plans that cover approximately 80 percent of plan assets subject to audit. The balance of the more than 70,000 ERISA audits is performed by nearly 10,000 different CPA firms, 8,200 of which perform 5 or fewer audits. The EBSA utilizes both top-down and bottom-up strategies in selecting and evaluating ERISA audits.

.190 First, the EBSA conducts periodic inspections of firms with substantial ERISA audit practices. The EBSA staff meet with firm management, review firm policies and procedures that relate to employee benefit plan audits, and conduct onsite reviews of a sample of ERISA audit engagements. This top-down approach will provide the EBSA a more efficient means of evaluating the quality of audit work performed by these large firms and ensure that findings and recommendations are communicated to those in a position to effect any necessary changes. To date, the EBSA has completed five such reviews.

.191 Next, for firms with small to medium-sized employee benefit plan audit practices, the EBSA focuses its in-house work on reviewing copies of selected audit working papers. When circumstances warrant, the scope of the EBSA's reviews is expanded to additional audit areas. To date, the EBSA has conducted approximately 900 of these desk reviews.

.192 In instances in which deficient audit work is identified, the related Form 5500 filings are subject to rejection, and auditors potentially face referral to the AICPA's Professional Ethics Division or State Board of Public Accountancy.

.193 Finally, the EBSA has expanded its enforcement efforts dealing with fiduciary breaches to include determining whether plan auditors may be considered *knowing participants*. An auditor is considered a knowing participant if at least one of the three following elements is present:

- The plan auditor took affirmative action to further the violation.
- The plan auditor helped conceal the violation.
- The plan auditor failed to act when required to do so by applicable professional standards.

DOL Fiduciary Education Initiatives

.194 The DOL is committed to providing employers and service providers with clear and easy-to-access information on how to comply with federal employment laws. Such information and guidance are often referred to as *compliance assistance*, which is a cornerstone of the DOL's mission.

.195 The DOL's fiduciary education initiatives include nationwide educational seminars to help plan sponsors understand rules and meet their responsibilities to workers and retirees, thereby improving their financial security. The DOL's Web site contains archived versions of webcasts of these programs.

.196 The DOL has also developed an e-law tool to increase awareness and understanding about basic fiduciary responsibilities when operating a retirement plan. The ERISA Fiduciary Advisor provides information and answers to a variety of questions about who is a fiduciary and their responsibilities under ERISA. The ERISA Fiduciary Advisor includes links to more detailed information that may be useful to the user, such as links to regulatory text, publications, and organizations.

.197 Also included in the DOL's compliance assistance efforts are the following DOL-issued publications:

- *Meeting Your Fiduciary Responsibilities*
- *Understanding Retirement Plan Fees And Expenses*
- *401(k) Plan Fee Disclosure Tool*
- *Selecting An Auditor For Your Employee Benefit Plan*
- *Selecting And Monitoring Pension Consultants—Tips For Plan Fiduciaries*
- *Tips For Selecting And Monitoring Service Providers For Your Employee Benefit Plan*
- *Reporting and Disclosure Guide for Employee Benefit Plans*

Help Desk—Further information regarding DOL publications and the dates and locations of upcoming educational programs may be found on the EBSA's Web site at www.dol.gov/ebsa.

Delinquent Filer Voluntary Compliance Program

.198 The Delinquent Filer Voluntary Compliance Program (DFVCP) is designed to encourage plan administrators to file overdue annual reports by paying reduced penalties. Established in 1995 and revised in March 2002, the program offers incentives for delinquent plan administrators to voluntarily comply with ERISA's annual reporting requirements.

.199 The address to be used for the DFVCP is

Standard Mail	*Private Delivery Service*
DFVC Program—DOL P.O. Box 70933 Charlotte, NC 28272-0933	DFVC Program—DOL QLP Wholesale Lockbox—NC 0810 1525 West WT Harris Blvd. Charlotte, NC 28262

Program Eligibility

.200 Eligibility in the DFVCP continues to be limited to plan administrators with filing obligations under Title I of ERISA who comply with the provisions of the program and who have not been notified in writing by the DOL of a failure to file a timely annual report under Title I of ERISA. Form 5500-EZ filers and Form 5500 filers for plans without employees (as described in 29 CFR 2510.3-3(b) and (c)) are not eligible to participate in the DFVCP because such plans are not subject to Title I.

Program Criteria

.201 Participation in the DFVCP is a 2-part process. First, file with the EBSA a complete Form 5500 series annual return/report, including all schedules and attachments, for each year relief is requested. Special simplified rules apply to "top hat" plans and apprenticeship and training plans. Second, submit to the DFVCP the required documentation and applicable penalty amount. The plan administrator is personally liable for the applicable penalty amount, and, therefore, amounts paid under the DFVCP shall not be paid from the assets of an employee benefit plan.

Penalty Structure

.202 *Per day penalty.* The basic penalty under the program is $10 per day for delinquent filings.

.203 *Per filing cap.* The maximum penalty for a single late annual report is $750 for a small plan (generally a plan with fewer than 100 participants at the beginning of the plan year) and $2,000 for a large plan.

.204 *Per plan cap.* This cap is designed to encourage reporting compliance by plan administrators who have failed to file an annual report for a plan for multiple years. The per plan cap limits the penalty to $1,500 for a small plan and $4,000 for a large plan, regardless of the number of late annual reports filed for the plan at the same time. There is no "per administrator" or "per sponsor" cap. If the same party is the administrator or sponsor of several plans that are required to file annual reports under Title I of ERISA, the maximum applicable penalty amounts would apply for each plan.

.205 *Small plans sponsored by certain tax-exempt organizations.* A special per plan cap of $750 applies to a small plan sponsored by an organization that is tax-exempt under IRC section 501(c)(3). The $750 limitation applies regardless of the number of late annual reports filed for the plan at the same time. It is not available, however, if as of the date the plan files under the DFVCP there is a delinquent annual report for a plan year during which the plan was a large plan.

.206 *Top hat plans and apprenticeship and training plans.* The penalty amount for top hat plans and apprenticeship and training plans is $750.

IRS and PBGC Participation

.207 Although the DFVCP does not cover late filing penalties under the IRC or Title IV of ERISA, the IRS and PBGC agreed to provide certain penalty relief for delinquent Form 5500s filed for Title I plans in which the conditions of the DFVCP have been satisfied.

.208 Questions about the DFVCP should be directed to EBSA by calling (202) 693-8360. For additional information about the Form 5500 series, visit the EFAST Internet site at www.efast.dol.gov, or call the EBSA Help Desk toll-free at (866) 463-3278.

Voluntary Fiduciary Correction Program

.209 The Voluntary Fiduciary Correction Program (VFCP) encourages voluntary compliance by self-correcting violations of the law. The program also helps plan officials understand the law and gives immediate relief from payment of excise taxes under a class exemption.

.210 In April 2006, the EBSA expanded and simplified the VFCP to help employers and their professional advisors voluntarily correct violations of the law for employee benefit plans. This update to the VFCP reflects public comments and includes

- expansion and simplification of eligible transactions;
- streamlined documentation and clarified eligibility requirements;
- a model application form;
- clarification of what constitutes *under investigation*, allowing more entities to qualify for the program; and
- relief from civil penalties for transactions involving health and welfare plans.

.211 Under the VFCP, employers may voluntarily correct specific ERISA violations. Applicants must fully correct any violations, restore to the plan any losses or profits with interest, and distribute any supplemental benefits owed to eligible participants and beneficiaries. A no-action letter is given to plan officials who properly correct violations.

.212 The DOL also provides applicants conditional relief from payment of excise taxes for certain VFCP transactions under a class exemption related to the VFCP. The amended class exemption was also published in the Federal Register in April 2006.

.213 For more information about the VFCP, contact a local EBSA regional office through its toll-free number, (866) 444-EBSA (3272), or visit the DOL online at www.dol.gov/ebsa.
